STEREOSCOPE, n. *Ste'r'e-o-skop*. From *stereós*, solid, and *skopeiv*, to examine. Fr., *stéréoscope*. Ger., *Stereoskop*. An apparatus employed to produce the impression of projection in a picture, so that the observer, looking with both eyes, sees what appears to him the actual things represented instead of a picture on a flat surface.—**Brewster's prismatic a. s.** A s. consisting of two prisms with convex surfaces, having their refracting angles turned inward, one before each eye, through which the person being examined must look with parallel visual lines. In the median plane between the two prisms is placed a blackened screen, which reaches nearly to the points of fixation. The eyes are correctly accommodated by the convexity of the prismatic surface, and the images of the two objects of fixation are fused into one by the action of the prisms. [F.]—**Lenticular a. s.** A s. having, instead of convex prisms, ordinary convex lenses of about 200 mm. focus. In other respects it resembles Brewster's prismatic a. s. [F.]—**Wheatstone's mirror a. s.** A s. which consists of two plane mirrors joined together at right angles, in which are reflected the projected images corresponding to the right and left eye, which are placed at the limit of distinct vision in front of the mirrors at an angle of 45° to their reflecting surface. The two eyes then see the reflected images united at one point. [F.]

STEREOSCOPE (Fr.), n. *Sta-ra-o-skop*. See **STEREOSCOPE**.—**S. à charnière**. Ger., *Spiegel-Stereoskop*. A stereoscope devised by Javal for the subjective determination of the squinting angle. Around a vertical hinge two mirrors may be rotated. Each of these mirrors is firmly fastened at its other end at an angle of 45° with a plate or tablet. Upon the inner surface of the latter are placed the objects of fixation, which are to be reflected by the mirrors. If an observer looks with one eye toward one mirror and the other toward the other, then by a proper arrangement of the angle of the hinge he can fuse the two reflected images. If this angle is 90° the eyes must stand parallel, if it is greater than 90° they must diverge, if it is smaller they must converge, in order to see binocularly. The position of the mirrors in which each eye is directed toward one of the images is thus found, and the included angle may be read off on a graduated arc. ["Ann. d'ocul.," liv, p. 14, lxx, p. 124 (F).]

STEREOSPERMUM (Lat.), n. *Ste'r'e-o-sper-mum*. From *stereós*, solid, and *sperma*, a seed. Fr., *stéréosperme*. A genus of the *Bignoniaceæ*. [a, 35.] **S. chelonoides**. An East Indian species. The root is used in fevers and snake-bites, and the bark in menorrhagia. [a, 35.]—**S. suaveolens**. A tree of southern India. The roots are tonic. [a, 35.]

STERESIS (Lat.), n. f. *Ste'r'e-sis*. Gen., *-es-eos* (-is). Gr., *stérēsis* (from *stereiv*, to deprive). Ger., *Beraubung*. Deprivation; negation. [A, 311, 322 (a, 48).]

STERETICUS (Lat.), adj. *Ste'r'e-ti-cus*. Gr., *stereiticos*. Ger., *beraubend*. Privative, negative. [A, 311, 322 (a, 48).]

STERIGMA (Lat.), n. *Ste'r-i-gma*. Fr., *stérigmate*. Ger., *stérigmate*. A leaf-blade down on the stem by decurrence. 2. In *Fungi* and lichens, a slender filamentous process (stalk) giving origin to the spores or spermatia in a narrow sense, as distinguished from the arthrosterigma, such a process when not distinctly articulated and when producing spermatia from its apex only. [a, 35.]

STERIGMATOCYSTIS (Lat.), n. f. *Ste'r-i-gma-tô-cystis*. From *stérigma*, a support, and *cystis*, a bladder. A genus of hyphomycetous *Fungi*. Many of the so-called species are stages of *Aspergillus*. [a, 35.]—**S. antacustica**. Of Cramer, a species found in the external auditory canal; according to some, a conical stage of *Eurotium aspergillus niger*. [a, 35.]

STERILE, adj. *Ste'r'i-l*. Gr., *stérēos*. Lat., *sterilis*. Fr., *stérile*. Ger., *unfruchtbar*. 1. Barren, unfruitful, unproductive. [a, 35.] See also *EFFERT*. 2. Freed from living micro-organisms.

STERILITY, n. *Ste'r-i-l-i-tas*. Gr., *stérēos*. From *stérēos*, barren. Lat., *sterilitas*, *impotentia generandi*. Fr., *stérilité*. Ger., *Sterilität*, *Unfruchtbarkeit*. The condition of being sterile. [a, 35.]—**Facultative s. Ger., facultative Sterilität**. The prevention of conception. [C. Hasse, "Ctbl. f. d. ges. Therap.," June, 1886, p. 277.]—**Idiopathic s.** See **AZOOSPERMATISM**.—**Relative s.** S. in consequence of the fertilizing element being wanting or of the ovum not coming to maturity, there being no abnormal condition of the sexual organs. [a, 34.]

STERILIZATION, n. *Ste'r-i-l-i-z-a'shun*. Fr., *stérilisation*. Ger., *Sterilisierung*. The process of rendering sterile by the destruction of all living matter on or within a substance. [a, 34.]—**Hueppe's method of s.** The exposure of the substance to be sterilized to a temperature of from 53° to 65° C. for one or two hours so as to destroy the living bacteria. The process is repeated at periods of 24 and 48 hours, so as to destroy any germinated spores that may have resisted these temperatures. [a, 34.]

STERILIZED, adj. *Ste'r-i-l-iz-d*. Deprived of all living matter; rendered sterile. [a, 34.]

STERILIZER, n. *Ste'r-i-l-iz-u-r*. Ger., *Sterilisator*. An apparatus for effecting sterilization. Seibert's milk-s. consists of a circular tray having a central handle by which it may be carried and sufficient capacity for holding eight specially constructed bottles. It is placed in a covered kettle for steam sterilization. ["N. Y. Med. Jour.," Feb. 15, 1890, p. 172 (a, 34).]

STERN (Ger.), n. *Ste'r-n*. See **ASTER** (2d def.).

STERNAD, adv. *Stu'r-n'ad*. Toward the sternal aspect.

STERNAL, adj. *Stu'r-n'al*. Lat., *sternalis* (from *sternum* [g. v.]). 1. Pertaining to the sternum. [L.] 2. Of Barclay, see **VENTRAL**.

STERNALGIA (Lat.), n. f. *Stu'r-n'al-gi-a*. From *sternon*, the sternum, and *álgos*, pain. Fr., *sternalgie*. Ger., *Brustschmerz*. Pain in or about the sternum. [L, 41 (a, 14).]

STERNALIS (Lat.), adj. *Stu'r-n'al-is*. Fr., *sternal*; as a n. (Fr., *sternal*), (1) a muscle connected with the sternum, especially the s. *brutorum*; (2) see **TRIANGULARIS sterni**.—**S. brutorum**, s. *rectus*, s. *thoracicus*. An anomalous muscle on the anterior surface of the sternum connected with the sternocleidomastoides, pectoralis major, and rectus abdominis. [L, 332.]

STERNANIS (Ger.), n. *Ste'r-n'a-n-es*. The genus *Illicium*; also the fruit (star-anise) of *Illicium anisatum*. [a, 35.]—**S'samen**. See **STAR-ANISE**.

STERNBERG (Ger.), n. *Ste'r-n-be'rg*. A place in Bohemia where there are alkaline and chalybeate springs. [L, 49, 57 (a, 14).]

STERNBERGIA (Lat.), n. f. *Ste'r-n-be'rg-i-a*. From *Sternberg*, a German botanist. Fr., *sternbergie*. A genus of bulbous plants. The *Sternbergieae* are a subtribe of the *Amaryllidaceæ*. [a, 35.]—**S. lutea**. Fr., *faux safran*, *narcisse d'automne*. Winter-daffodil; a native of the Orient and southern Europe. The purgative root, *radix lilio-narcissi*, was formerly used as a maturant.

STERNDISTEL (Ger.), n. *Ste'r-n'di'st-el*. See **CALCIOTRAPA**.

STERNEBER, n. *Stu'r-n'e-b-ur*. Lat., *sternebra* (see **STERNUM** and **VERTEBRA**). Fr., *sternebre*. A subdivision or segment of the sternum. [L, 50 (a, 14).]

STERNO-ABDOMINALIS (Lat.), n. m. *Stu'r-n(o)-o-ab-dom-i-n'al-is*. From *sternum* and *abdominis* muscles considered as a single structure. [L, 31 (a, 20).]

STERNO-APONEUROTICUS (Lat.), n. m. *Stu'r-n(o)-o-ap-o-neu-ro-ti-cus*. From *sternum*, the sternum, and *aponeurosis*, a tendon. The portion of the pectoralis superficialis that is attached to the fascia of the arm. [L, 13.]

STERNOCERVICALIS (Lat.), n. m. *Stu'r-n(o)-o-cerv-i-c'al-is*. From *sternum* (g. v.), and *cervix*, the neck. An anomalous variety of the costo-fascialis muscle arising from the sternum. [L, 31.]

STERNO-CLAVICULAR, adj. *Stu'r-n-o-kla-v'i-c'u-l'a-r*. Lat., *sternoclavicularis*. Pertaining to the sternum and the clavicle.

STERNOCLAVICULARIS (Lat.), adj. *Stu'r-n(o)-o-kla-v'i-c'u-l'a-r*. From *sternum* and *clavicle*. As a n. m., an anomalous muscle arising from the sternum or from the cartilage of the first rib and inserted into the clavicle, internally to the subclavius.—**S. anticus**. See **S. S. posticus**. An anomalous muscle arising from the posterior surface of the manubrium sterni and inserted into the clavicle. [L, 332.]—**S. superior**. An anomalous muscle arising from the upper part of the sternum and inserted into the clavicle. [L, 31, 332.]

STERNO-CLAVIO-HUMERAL (Fr.), n. *Ste'r-no-kla-v'e-o-u'e-ma-ra-l*. See **PECTORALIS major**.

STERNO-CLAVIO-MASTOIDÉEN (Fr.), n. *Ste'r-no-kla-v'e-o-ma-st-o-i-dé-en*. See **STERNO-CLEIDO-MASTOID**.

STERNOCLEIDOBRACHIALIS (Lat.), n. m. *Stu'r-n(o)-o-kle-i-d'o-brak-i-a-l-is*. From *sternum*, *clavicle*, and *brachium*, the arm. See **PECTORALIS major**.

STERNO-CLEIDO-HUMERAL, adj. *Stu'r-n(o)-o-kle-i-d'o-hu-m'e-r'al*. For deriv., see **STERNUM**, **CLEIDION**, and **HUMERUS**. Pertaining to the sternum, clavicle, and humerus. [L.]

STERNOCLEIDOHYOIDEUS (Lat.), n. m. *Stu'r-n(o)-o-kle-i-d'o-hyo-i-dé-us*. For deriv., see **STERNUM**, **CLEIDION**, and **HYOID**. See **STERNOHYOIDEUS**.

the chest, and *σπῆς*, a bond. Fr., *stéthodesmie*. See *Chest-BAND-AGE* and *CORSET* (2d def.).

STETHOGONIOMETER, n. *Stēth-o-gon-i-ō-m'ē-t-u'r*. From *σῆθος*, the chest, *γωνία*, an angle, and *μέτρον*, a measure. An instrument for measuring the curvature of the chest. [D, 25.]

STETHOGRAPH, n. *Stēth'o-grāf*. From *σῆθος*, the chest, and *γράφειν*, to write. See *STETHOMETER*.

STETHOMENIA (Lat.), n. f. *Stēth(stath)-o(o)-men(man)-i-ā*. From *σῆθος*, the chest, and *μήν*, a month. Fr., *stéthoménie*. Vicarious menstruation by way of the bronchial tubes.

STETHOMETER, n. *Stēth-o-m'ē-t-u'r*. From *σῆθος*, the chest, and *μέτρον*, a measure. Fr., *stéthomètre*. Ger., *S. Brustmesser*. Of Quain, an instrument for measuring the variations in size of the thorax. As modified by J. B. Sanderson, for registering the respiratory movements of the chest, it consists of two parallel rigid bars joined at right angles to a cross-piece. The free end of one bar bears an ivory button and that of the other a receiving tambour, the latter being connected with a registering tambour. The instrument is somewhat similar to Bert's tambour mounted on calipers and is used much in the same way. [J, 5, 6, 19.]

STETHOMETRY, n. *Stēth-o-m'ē-t-rī*. Ger., *Brustmessung*. The process of using the stethometer. [D.]

STETHOMYITIS (Lat.), n. f. *Stēth(stath)-o(o)-mi(mu)-i(e)-tis*. Gen., *-itidos (-idis)*. From *σῆθος*, the chest, and *μῦς*, a muscle. Fr., *stéthomyélite*. Inflammation of the pectoral muscles.

STETHOPHONOMETER, n. *Stēth-o-fon-o-m'ē-t-u'r*. From *σῆθος*, the chest, *φωνή*, a sound, and *μέτρον*, a measure. A straight stethoscope having a sliding graduated tube to measure the intensity of an auscultatory sound. ["Wien. klin. Woch.," Nov. 8, 1892, p. 629 (a, 34).]

STETHOPOLYSCOPIUM (Lat.), n. n. *Stēth(stath)-o(o)-po-li(u)-skop(skōp)-i-ū(u)-m(u)-m*. From *σῆθος*, the chest, *πολύς*, many, and *σκοπεῖν*, to examine. Fr., *stéthopolyscope*. Ger., *Stethopolyskop*. A stethoscope furnished with conducting tubes, so as to be used by several persons simultaneously. [L, 50 (a, 14).]

STETHORRHEUMIA (Lat.), n. n. *Stēth(stath)-o(r)-ru-m'a*. Gen., *-rheum(-atis)*. From *σῆθος*, the chest, and *ῥεῦμα*, a flux. Fr., *stéthorrhume*. Pectoral rheumatism. [L, 50 (a, 14).]

STETHOSCOPE, n. *Stēth'o-skop*. From *σῆθος*, the chest, and *σκοπεῖν*, to examine. Fr., *stéthoscope*. Ger., *Stethoskop*, *Brusthorcher*. An instrument for conveying to the ear the sounds pro-

A BINAURAL STETHOSCOPE.

duced within the body for diagnostic purposes; consisting of a tube with one end flaring for application to the chest-wall and the other end shaped for insertion into the ear. [B, a, 34].—**Binaural s.** A s. adapted for adjustment to both ears. [D].—**Differential s.** A binaural s. with two cones in connection with the ear-tubes, capable of being applied to different parts of the body simultaneously, and thus enabling the observer to compare the sounds at two different points. [D, 1].—**Double s.** See *Binaural s.*—**Pulse s.** See *SPHYGMOPHONE*.

STETHOSCOPY, n. *Stēth-o'sk'op-i*. Fr., *stéthoscopie*. Ger., *Stethoskopie*. Examination by means of the stethoscope. [a, 48].—**Vaginal s.** Auscultation of the gravid uterus by means of a stethoscope introduced into the vagina. [J. Wallace, "Edinb. Med. Jour.," xviii, p. 427 (a, 34).]

STETHOSPASMUS (Lat.), n. m. *Stēth(stath)-o(o)-spa-2z(-spa-s)/mu's(mu's)*. From *σῆθος*, the chest, and *σπασμός*, a spasm. Fr., *stéthospasme*. Pectoral spasm. [L, 50 (a, 14).]

STETHOTHLASTES (Lat.), n. m. *Stēth(stath)-o(o)-thla'st(-thla'st)/ez(as)*. From *σῆθος*, the chest, and *θλάω*, to crush. Ger., *Brustzermalner*. An instrument for crushing the thorax in embryoclia.

STETHURIA (Lat.), n. f. *Stēth(stath)-u(u)-ri-ā*. From *σῆθος*, the chest, and *οὖρον*, urine. Fr., *stéthurie*. Metastasis of urine to the chest. [L, 50 (a, 14).]

STETHYLIC ALCOHOL, n. *Stēth-i-l'ik*. See *STETHAL*.

STETIG (Ger.), adj. *Stat'ig*. See *CONTIGUOUS*.

STEUERFEDER (Ger.), n. *Stoif'er-fad-er*. See *RECTRIX*.

STEVIA (Lat.), n. f. *Stā'vī-ā*. From *Esteve*, a Spanish botanist. Fr., *stévia*. A genus of the *Eupatoriaceae*. The *Stevia* of Reichenbach are a section of the *Agerateae*. [a, 35].—*S. febrifuga*. A North American species used as a tonic, stomachic, and febrifuge. [B, 173 (a, 35).]

STHENIA (Lat.), n. f. *Stēn(stēn)-i(e)-ā*. From *σθένος*, strength. Fr., *sthénie*. Ger., *Krafttheikeit*. 1. Strength, vigor. 2. In the Brunonian nosology, see under *ASTHENIA* (2d def.).

STHENIC, adj. *Stēn'ik*. Fr., *sthénique*. Ger., *sthenisch*. Strong, forcible. [D.] See under *ASTHENIA* (3d def.) and cf. *ASTHENIC*.

STHENOPYRA (Lat.), n. f. *Stēn-o-p'y-i(r)-ā*. From *σθένος*, strength, and *πῦρ*, fever. See *FEBRIS sthenica*.

STIRAMINE, n. *Stī'b-a'm-en*. See *HYDROGEN antimonide*.

STIBDIAMYL, n. *Stī'b-di-a'm'i-l*. A radicle, *Sb(C₁₁H₁₉)*.

STIBETHYL, n. *Stī'b-e'th'i-l*. Fr., *stibéthyle*. Ger., *Stibthyl*. See *TRIETHYLSBINE*.

STIBI (Lat.), n. n. *Stīb(stīb)-i*. Gen., *stib'is*. Gr., *στίβα*. See *ANTIMONY*.

STIBIACNE (Lat.), n. f. *Stīb-i-ā-k(a)k(ne)na*. Gen., *-ac'nes*. From *στίβα*, antimony, and *ἀκνῆ*, acne. Acne produced by the use of antimony. [L, 50 (a, 14).]

STIBIALIS (Lat.), adj. *Stīb-i-āl(a)l'i*. Of, pertaining to, or containing antimony. [B.]

STIBIALISM, n. *Stīb-i-ā'l-i-zm*. From *στίβα*, antimony. Systemic poisoning by antimony. [a, 34.]

STIBIAS (Lat.), n. m. *Stīb-i-ā-s(a)s*. Gen., *-at'is*. See *ANTIMONATE*.—*S. kalicus*. See *POTASSIUM antimonate*.—*S. natricus*. Sodium antimonate. [B.]

STIBIATION, n. *Stīb-i-ā'shu'n*. From *στίβα*, antimony. Fr., *s.* The excessive use of antimonials. [L, 41, 49 (a, 14).]

STIBIATUS (Lat.), adj. *Stīb-i-āt(a)l'i*. Fr., *stibié*. Containing antimony, antimonial. [B.]

STIBICUS (Lat.), adj. *Stīb-i-k-us(u)s*. See *ANTIMONIC*.

STIBIE (Fr.), adj. *Steb-e-a*. See *STIBIATUS*.

STIBIUS (Lat.), n. m. *Stīb-i-ūs*. See *ANTIMONITE*.

STIBINE, n. *Stīb'en*. Ger., *Stibin*. See *HYDROGEN antimonide* and *ANTIMONY trisulphide*.

STIBIOKALI TARTARICUM (Lat.), n. n. *Stīb-i-ō-k'al(a)l'i(-iē)*. See *TARTARUS stibio-kali*. See *ANTIMONY astringentum tartaricatum*.—*Emplastrum stibio-kali tartarici*. See *Emplastrum TARTARI stibiati*.—*Unguentum stibio-kali tartarici*. See *Unguentum ANTIMONII*.—*Vinum stibio-kali tartarici*. See *Vinum ANTIMONII*.

STIBIOSO-STIBICUS (Lat.), adj. *Stīb-i-ō-s'o(o)-stīb-i-ik-us(u)s*. See *ANTIMONIO-ANTIMONIC*.

STIBIOSUS (Lat.), adj. *Stīb-i-ō-s'us(u)s*. Antimonious. [B.]

STIBIUM (Lat.), n. n. *Stīb-i-ū(u)-m(u)-m*. Gr., *στίβα*. Antimony; of the Gr. Ph., crude antimony. [B, 95 (a, 38)].—*Calx stibii grisea* (seu imperfecta), *Cinis stibii*. See *ANTIMONY ash*.—*Flos stibii helmuntianus*. See *Flores ANTIMONII Helmunti*.—*Hydrosulphuretum oxydi stibii fuscum* (seu oxydi stibii rubrum, seu oxyduli stibii). *Kermes mineral*. [B, 119].—*Liquor stibii chlorati*. See *LIQUOR ANTIMONII chloridi*.—*Morsuli stibii*. See *TROCHISCI stibiat*.—*Murias oxyduli stibii*, *Murias stibii* (oxygenatus). Antimony chloride (trichloride). [B, 119].—*Oxodes stibii sulphuratum*. Antimony pentasulphide. [B, 119].—*Oxydulum stibii sulphuratum semivitreum*. See *HEPAR ANTIMONII*.—*Oxydulum stibii vitreum* (seu vitreum, seu vitrificatum). See *LIQUOR ANTIMONII*.—*Oxydum stibii acido muriatico oxygenato puratum*. Antimony oxychloride. [B, 119].—*Oxydum stibii cum potassa*. See *ANTIMONIUM diaphoreticum nitratum*.—*Oxydum stibii (potassium) non ablutum*. See *ANTIMONIUM diaphoreticum nitratum*.—*Oxydum stibii sulphuratum rubrum*. See *KERMES mineral*.—*Oxydum stibii sulphuratum vitreum*. See *VITRUM ANTIMONII*.—*Pilule ex stibio et hydrargyro*. See *Pilule ANTIMONII compositae*.—*Protoxydum stibii griseum*. Antimony trioxide. [B, 119].—*Pulvis oxydi stibii compositus*. See *PULVIS Cornacchini*.—*Pulvis stibii compositus*. See *PULVIS antimonialis*.—*Sapo hydrosulphureti oxyduli stibii sulphurati*. See *Sapo ANTIMONII*.—*S. arsenicium*. Antimony arsenate. [B, 270].—*S. chloratum* (concretum). Antimony trichloride. [B, 119].—*S. chloratum solutum*. See *LIQUOR ANTIMONII chloridi*.—*S. muraticum*. Antimony chloride. [B, 119].—*S. muraticum causticum*. See *ANTIMONIUM trichloride*.—*S. muraticum oxydulatum liquidum*. See *LIQUOR ANTIMONII chloridi*.—*S. oxydatum*. See *ANTIMONIUM trioxide*.—*S. oxydatum album*. See *ANTIMONIUM diaphoreticum lotum*.—*S. oxydatum fuscum*. See *CROCUS ANTIMONII*.—*S. oxydatum griseum*. 1. Antimony trioxide. [B, 119]. 2. See *ANTIMONY ash*.—*S. oxydatum sulphuratum vitrificatum*. See *VITRUM ANTIMONII*.—*S. oxydulatum*. Antimony trioxide. [B, 119].—*S. oxy-sulphuratum*. See *ANTIMONIUM sulphuratum*.—*S. oxy-sulphuratum fuscum*. See *VITRUM ANTIMONII*.—*S. purum*. See *Regulus ANTIMONII*.—*S. striatum nigrum*. See *ANTIMONIUM crudum*.—*S. sulphuratum aurantiacum* (seu auratum). See *ANTIMONIUM pentasulphide*.—*S. sulphuratum levigatum*. See *ANTIMONIUM sulphidum*.—*S. sulphuratum nigrum*. Of the Gr. Ph., *Ausit. Ph.*, *Hung. Ph.*, and *Gr. Ph.*, antimony trisulphide. [B, 205].—*S. sulphuratum nigrum alcoholisatum*. See *ANTIMONIUM sulphidum*.—*S. sulphuratum nigrum crudum*. Antimony trisulphide. [B, 95].—*S. sulphuratum nigrum depuratum*. See *ANTIMONIUM sulphidum purificatum*.—*S. sulphuratum nigrum levigatum*. See *ANTIMONIUM sulphidum*.—*S. sulphuratum pulveratum*. Antimony trisulphide sifted through a 1,600-mesh sieve. [B, 95 (a, 38)].—*S. sulphuratum rubrum* (seu rubrum). See *KERMES mineral*.—*S. ustum*. See *ANTIMONY ash*.—*Sulphuretum oxyduli stibii hydrogenatum*. Antimony pentasulphide. [B, 119].—*Sulphuretum stibii arsenicium*. See *CAUSTICUM arsenicatum*.—*Sulphuretum stibii cum cale*. See *Calx ANTIMONII Hoffmanni*.—*Sulphuretum stibii nativum*. See *ANTIMONIUM crudum*.—*Sulphuretum stibii oxydulatum*. Antimony pentasulphide.—*Sulphuretum stibii precipitatum*. See *KERMES mineral*.—*Sulphuretum stibii preparatum*. See *ANTIMONIUM sulphidum*.—*Sulphuretum stibii venale*. See *ANTIMONIUM crudum*.—*Tinctura stibii alcalisata*. See *Tinctura ANTIMONII aurata*.—*Vinum stibii*. See *Vinum ANTIMONII*.—*Vitrum stibii*. See *Vitrum ANTIMONII*.

STICH (Ger.), n. *Stīch*. A puncture or stab; a darting pain; a sting or bite. [a, 17].—*Impf's*. A puncture or incision for vaccination. [a, 14].—*Sonnens'*. See *INSOLATION* (2d def.).—*S'kanal*. The tract of a puncture (e. g., one made by the passage of a suture).

STICHELN (Ger.), n. *Stech*²/e²ln. See **SCARIFICATION**.

STICHIDIUM (Lat.), n. n. *Sti*²k(sti)²ch²²·i²d²·u²m(u)m. Gr., *στίχιδιον* (dim. of *στίχος*, a row). Ger., *Reihenfrucht*. In certain *Algae* (*Rhodophyceae*), a special branch of the thallus containing spores (tetragonidia) arranged in rows. [a, 35.]

STICKDAMPF (Ger.), n. *Sti*²k(da)²mpf. See **NITROGEN** and **Choke-DAMP**.

STICKEND (Ger.), adj. *Sti*²k(e)²nd. Choking, suffocating.

STICKFLUSS (Ger.), n. *Sti*²k(flus). See **SUFFOCATIVE CATARRH** and **NARCOTROPNEA**.

STICKGAS (Ger.), n. *Sti*²k(ga)²s. Nitrogen. [B.]

STICKHUSTEN (Ger.), n. *Sti*²k(hust)²e²n. A convulsive cough, especially whooping-cough.

STICKLUFT (Ger.), n. *Sti*²k(luft). See **MEPHITIS** (1st def.) and **NITROGEN**.

STICKOXID (Ger.), n. *Sti*²k(ox)²u²d. See **NITROGEN DIOXIDE**.

STICKOXIDUL (Ger.), n. *Sti*²k(ox)²u²d-ul. See **NITROGEN MONOXIDE**.

STICKSTOFF (Ger.), n. *Sti*²k(sto)²f. See **NITROGEN**.—*S*²haltig. See **NITROGENOUS**.—*S*²odür. See **NITROGEN IODIDE**.—*S*²oxyd. See **NITROGEN DIOXIDE**.—*S*²oxydul, *S*²oxydulgas. See **NITROGEN MONOXIDE**.—*S*²säure. See **NITRIC ACID**.

STICKSUCHT (Ger.), n. *Sti*²k(zuch)²t. See **ATELECTASIS pulmonum**.

STICKWURZ (Ger.), n. *Sti*²k(wur)²ts. See **BRONIA**.

STICTA (Lat.), n. f. *Sti*²k(ta)². From *στίκτης*, punctured, *Fr.*, *s.*, *sticte*, *Ger.*, *Grubenflechte*. A genus of lichens, of the *Stictici* (a tribe of the *Phycidæ*). [a, 35.]—*S*²aurata. A species found on cinchona barks, especially ioxa-bark. [a, 35.]—*S*²pulmonacea, *S*²pulmonaria. *Fr.*, *pulmonaire de chêne, hépatique des bois, herbe aux poumons, thés des forêts (ou des Vosges), sticte pulmonacée*. Ger., *Lungengrubenflechte, Lungenflechte, Lungenmoos, Baum-lungenkraut, Eichenlungenmoos*. Sp., *pulmonaria* (Mex. Ph.). Hazel-rag (or -crotles), lung lichen, tree lungwort; a species formerly official as *lichen pulmonarius* (seu *arboris*), *muscus arboris pulmonarius, muscus pulmonarius quercinus*, etc. It contains a mucilaginous astringent principle, and is still sometimes used as a pectoral. [a, 35.]

STICTACNE (Lat.), n. f. *Sti*²k(ta)²k(a)²k(ne)²na. Gen., *-ac*²nes. From *στίκτης*, punctured, and *ἀκνη*, acne. See **ACNE punctata**.

STICTIC ACID, n. *Sti*²k(tik)². *Fr.*, *acide stictique*. Ger., *Stictinsäure*. A bitter substance, analogous to cetraric acid, obtained from *Stictia pulmonacea*. [B, 38, 93, 108 (a, 14).]

STIEFEL (Ger.), n. *Stief*²el. A boot; of Günther, the hippocampus minor. [I, 3 (K.)]—*Schröppfs*². Junco's boot. See **BOOT**.

STIEL (Ger.), n. *Stiel*². 1. A pedicle; in botany, a stipe, a corm (*q. v.*, 2d def.). [a, 35.] 2. The petiolus of the epiglottis. [I, 304.]—*Augenbläsens*². See under **Augē**.—*Blüthens*². See **PEDUNCLE** (4th def.).—*Flockens*². See **FLOCCULUS** (2d def.).—*Gehirnanhangs*². See **INFUNDIBULUM** (2d def.).—*Harnsacks*². See **URACHUS**.—*Hirns*²e. See *Crura cerebri* and *Caudex cerebri*.—*Hypo-physiss*². See **INFUNDIBULUM** (2d def.).—*Kleinhirns*². The restiform body. [J, 6 (K.)]—*Marks*². See **PEDUNCLE of the flocculus**.—*Rückenmarks*². Of Meckel, the inferior peduncles of the cerebellum. [J, 8 (K.)]—*Schnitts*². See **ANSA** (2d def.).—*S*²be-handlung. The treatment of a pedicle.—*S*²hirm. See **PODENCEPHALUS**.—*S*²torsion. Twisting of a pedicle, as of an ovarian tumor. [a, 34.]—*S*²versenkung. Treatment of the pedicle of an ovarian tumor by dropping it into the abdominal cavity. [a, 34.]—*S*²versorgung. The treatment of an ovarian-tumor pedicle. [a, 34.]—*S*²zerreissung. Rupture of a pedicle, as of an ovarian tumor. [a, 34.]—*Unter*². *S*²des Thalamus. The inferior pillar of the optic thalamus, a bundle of fibres which extends downward from the posterior and inferior part of the optic thalamus into the temporo-phenoidal lobe. [I, 17 (K.)]—*Vorderer*². *S*²des Thalamus. Of Meynert, the anterior peduncle of the optic thalamus, a tract of nerve-fibres which issues from the central part of the frontal lobe, extends between the head of the caudate nucleus and the lenticular nucleus, and enters the anterior extremity of the optic thalamus. [I, 17 (K.)]

STIELCHEN (Ger.), n. *Stiel*²ch(e)²n. See **PEDICLE** and **STIPULE**.

STIELRUND (Ger.), adj. *Stiel*²rund. See **TERETE**.

STIER (Ger.), n. *Ster*². See *Bos taurus*.—*S*²äugig. Affected with buphthalmia.

STIFF-NECK, n. *Stif*²-ne²k. 1. A state of painfulness on bringing the neck-muscles into play, so that the head is carried stiffly. [D.] 2. See **TORTICOLLIS**.

STIFLE, STIFLE-JOINT, n. *Stifl*², *stifl*²joint. *Fr.*, *grasset*. Of the veterinarians, the region of the hind-limb corresponding to the human knee and having for a base the patella and the soft parts that surround it. [a, 34.]

STIFT (Ger.), n. *Stift*²ft. See **PENCIL** (1st def.).—*Pastens*². See **STILUS dilubilis**.—*Saibens*². See **STILUS unguens**.

STIGMA (Lat.), n. n. *Sti*²g(sti)²ma². Gen., *stigm*²ma²-(atis). Gr., *στίγμα*. *Fr.*, *stigmaté*. Ger., *S*². 1. A punctiform spot or mark on the skin (see **MARK** and **NÆVUS**). 2. A red spot on the skin with an elevated efflorescence at its centre; an umbo. 3. A small cicatrix; a cicatricula. [G, 16.] 4. The mark of stigmatization (*q. v.*). 5. See *S*²folliculi. 6. Of J. Arvid, one of the gaps between the endothelia forming the wall of blood-capillaries. The gaps are filled with cell-cement, and it is supposed that at these points the white blood-corpuscles emigrate from the capillaries. According to Heitzmann, the *s*²ta are gaps along the sides of the cells, those at the angles being called stomata. [J, 26.] 7. In botany: (a) the part of a pistil, usually the apex of the style, that receives the pol-

len for the fertilization of the ovules (see **Stigmatic CELL**); (b) of Hedwig, a small prominence on the globules in the involucre of the *Equisetaceæ*; (c) of Beauvois, a point persisting at the apex of the columella of mosses. [a, 35.] 8. The spiracle of an insect. [a, 27.] 9. Any mark or distinguishing feature.—*Baker's s*²ta. Callosities on the dorsal surface of the first and second phalanges of the hands produced by kneading dough. [a, 24.]—*Hysterical s*²ta. 1. Psychical or somatic *s*²ta indicative of neurasthenia. [a, 34.] 2. The *s*²ta of stigmatization (*q. v.*).—*Neurasthenic s*²ta. See *Hysterical s*²ta (1st def.).—*Physical s*²ta of degeneration. Certain variations from the normal type in the configuration of the skull, extremities, or other portions of the body, indicating a low or vicious type of mental development. [a, 34.]—*Psychical s*²ta. Of Gilles de la Tourette, certain mental peculiarities characterized by extreme susceptibility to suggestions of a particular kind. [a, 34.]—*Somatic s*²ta. Of Gilles de la Tourette, the objective signs of hysteria, neurasthenia, and other neuroses. [a, 34.]—*S*²ta degeneracionis. See *Physical s*²ta of degeneration.—*S*². folliculi. Ger., *Narbe*. A small non-vascular spot (the macula) near the middle of the thinner and more projecting part of a maturing Graafian vesicle, formed by the convergence of minute blood-vessels. At a subsequent period it is devoid of blood- and lymph-vessels, and its cells are undergoing fatty degeneration. It marks the spot where the vesicle bursts when it is fully matured, and the ovum escapes. [A, 5; J, 35.]—*S*²ta hereditatis. Psychical or somatic *s*²ta resembling those of an ancestor and attributed to heredity. [a, 34.]—*S*²ta Malpighi. Opening of small veins into the larger splenic veins. [L, 333.]—*S*²ta nativæ. Punctate naevi. [G, 11.]—*S*²ta nigra. Black spots caused by the lodgment of particles of gunpowder in the skin. [G, 11.]—*S*². of the Graafian vesicle, *S*². ovarii. See *S*². folliculi.—*S*²ta rubra. Red spots (petechiæ) on the skin due to violent coughing or vomiting, to scurvy, or to suppression of the menses. [G, 11.]—*Venous s*²ta. Varicose veins of the lower portion of the body and extremities. [a, 34.]

STIGMATIC, adj. *Sti*²g(ma)²tik. Lat., *stigmaticus*. *Fr.*, *stigmatique*. Ger., *stigmatisch*. Of or pertaining to a stigma.

STIGMATIZATION, n. *Sti*²g(ma)²ti-z(a)²shu²n. From *στίματιζεν*, to brand. *Fr.*, *stigmatisation*. The supposed miraculous impression of marks like those of Christ's wounds on the bodies of certain individuals; hence the formation or appearance of bleeding points on the body in consequence of some psychical or nervous morbid state. [G, 60; a, 48.]

STIGMATOID, adj. *Sti*²g(ma)²to-id. Lat., *stigmatoides* (from *στίγμα*, a stigma, and *ειδός*, resemblance). Resembling a stigma.

STIGMATOPHORE, n. *Sti*²g(ma)²to-for. Lat., *stigmatophora*, *stigmatophorus* (from *στίγμα*, a stigma, and *φορέω*, bearing). *Fr.*, *a*. Of Cassini, that part of the style of *Compositæ* which bears the stigmata. [a, 35.]

STIGMATOSES (Lat.), n. f., pl. of *stigmatis* (*q. v.*). *Sti*²g(ma)²ma²ti)²o-s(e)²ez. From *στίγμα*, a mark. Ger., *Stigmatosen*, *erwite Hautkatharrhe*. Erosive catarrhs of the skin. *S*²Auspitz, the second family under *Dermatitides catarrhales*, embracing catarrhal affections of the skin which are primarily of an erosive character, including parasitic and traumatic *s*². [G, 4.]

STIGMATOSTEMON (Lat.), n. m. *Sti*²g(ma)²t(ma)²to(o)²stem(stam)²o²n(on). Gen., *-stem*²on(o)s(-is). From *στίγμα*, a stigma, and *στίμων*, a filament. *Fr.*, *stigmatostème*. Of Mönch, a body formed by the union of stamens (or anthers) with the stigma.

STILAGO (Lat.), n. f. *Stil*²(a)²g(go). Gen., *-ag*²inis. *Fr.*, *stilage*. Ger., *Salamanderbaum*. The genus *Antidesma*. The *Stilaginaceæ* or *Stilagineæ* are the *Antidesmaceæ*. [a, 35.]—*S*²bunias. Ger., *lorbeerblättriger Salamanderbaum*. Chinese laurel, the *Antidesma bunias*. [a, 35.]

STILBE (Lat.), n. f. *Stil*²(b)²(e)a. Gen., *stil*²bes. From *στίλαειν*, to glitter. *Fr.*, *s*². A genus of shrubs found in southern Africa. The *Stilbaceæ*, or *stilbids* of Lindley and *Stilbineæ* (the *Stilbineæ* of Kunth) are now regarded as a tribe (*Stilbeæ*) of the *Verbenaceæ*. [a, 34.]

STILBENE, n. *Stil*²(b)²en. *Fr.*, *stilbène*. Ger., *Stilben*. A substance, *C*₁₂H₁₂, isomeric with diphenylethylene. [B, 38, 93 (a, 14).]

STILBOCARPA (Lat.), n. f. *Stil*²(b)²(o)²(o)²ka²rp(a)². From *στίλαειν*, to glitter, and *καρπός*, fruit. A genus of the *Araliaceæ*. [a, 35.]—*S*²polaris. An herb with saccharine, edible roots, found in New Zealand. [a, 35.]

STILBUM (Lat.), n. n. *Stil*²(b)²u²m(u)m. From *στίλαειν*, to glitter. *Fr.*, *stilbe*. A genus of hyphomycetous *Frangi*, the type of the *Stilbacei* of Lindley, a suborder of the *Hyphomycetes*, the *Stilbei* or *Stilbini* (of Fries, a tribe of the *Mucorini*), the *Stilbideæ* (of Gray, a division of the *Nematomyces*), and the *Stilboidei* (of Fries, an order of the *Hyphomycetes*). [a, 35.]

STILETT (Ger.), **STILETTE** (Fr.), n's. *Stel*²(e)²t, *-et*². See **STILET**.

STILL, n. *Stil*². Gr., *κόγχος στίλπεος*. Lat., *concha ferrea*. *Fr.*, *alambic*. Ger., *Destillirapparat*. See under **DISTILLATION**.

STILLAMME (Ger.), n. *Stil*²(a)²m-me². See **Wet NURSE**.

STILLATORY, n. *Stil*²(a)²t-or-i². A still.

STILL-BORN, adj. *Stil*²(b)²o-rn². Lat., *natus mortuus*. *Fr.*, *mort-né*. Ger., *stillegeboren*. Dead at the time of birth. [a, 48.]

STILLE (Ger.), n. *Stil*²(le)². Quiet (said of the state of quiescence of a frog's heart when filled with salt solution; this phenomenon may last for over an hour, and the heart-beat may again be restored by supplying the organ with fresh blood). [K, 19.]

STILLEND (Ger.), adj. *Stil*²(le)²nd. 1. Calming, sedative. [A, 521 (a, 48).] 2. Giving suck.

STILLENDE (Ger.), n. *Stil*²(le)²nd-e². A nursing woman.

STILLICIDIUM (Lat.), n. n. $Sti^{12}l^{12}i^{12}s^{12}(i^{12})k^{12}i^{12}d^{12}i^{12}u^{12}m^{12}(u^{12}m)$. From *stilla*, a drop, and *cadere*, to fall. Fr., *stillicide*. Ger., *Tröpfeln*. 1. Effusion of a liquid drop by drop. [a, 48.] 2. The bathing of a part by dropping water on it. [B, 48.]—*S. lacrimale*. *S. lacrimarum*. See *EPIPHORA* (2d def.).—*S. narium*. Of Bidloo, coryza. [a, 34.]—*S. sanguinis*. See *STASIS*.—*S. urinæ*. Ger., *Harnabträufeln*. Dribbling of urine.—*S. uteri*. See *MENSES* *stillantes*.—*Virulent* s. Of Norman, gonorrhoea. [a, 34.]

STILLINGIA (Lat.), n. f. $Sti^{12}l^{12}i^{12}n^{12}(i^{12}n^{12})i^{12}g^{12}(i^{12})a^{12}$. From *Stillingieft*, an English botanist. Fr., *stillingie*. Ger., *Stillingie*. 1. A genus of euphorbiaceous shrubs; by Bailion made a section of the genus *Euphorbia*. The *Stillingieae* are a tribe and the *Stillingieae* a division of the *Euphorbiaceae*. 2. Of the U. S. Ph., the root of *S. silvatica*. [a, 35.]—*Extractum stillingie fluidum* [U. S. Ph.]. A fluid extract made by exhausting 10 grammes of s.-root in No. 40 powder with alcohol of sp. gr. 0.928, and bringing up to 100 c. c. [B, 95 (a, 38).]—*S. sebifera*. Fr., *arbre à suif*. Ger., *chinesischer Talgbaum*. Chinese tallow-tree; cultivated in India and America. The seeds, which yield a fixed oil used externally in medicine and for burning, are thickly coated with a white tallowy substance (stillistearin, or Tangawang fat), said to be nearly pure stearin, used for making candles. [a, 35.]—*S. silvatica*. Queen's-delight (or-root), silver-leaf, yaw-root; the *Excoecaria silvatica*. Its thick sub-cylindrical root, the s. of the U. S. Ph., is used as an alterative and especially in secondary syphilis. [a, 35.]

STILLISTEARIC ACID, n. $Sti^{12}l^{12}i^{12}st^{12}e^{12}a^{12}r^{12}i^{12}c^{12}$. Fr., *acide stillistearique*. Ger., *Stillistearinsäure*. A fatty acid, $C_{21}H_{40}O_2$, obtained by saponification of stillistearin. According to Heintz, it is merely a mixture of fatty acids. [B, 93 (a, 14).]

STILLISTEARIN, n. $Sti^{12}l^{12}i^{12}st^{12}e^{12}a^{12}r^{12}i^{12}n$. Fr., *stillistearine*. Ger., *S*. See under *STILLINGIA sebifera*.

STILLSTAND (Ger.), n. $Sti^{12}l^{12}i^{12}sta^{12}nd$. See *STANDSTILL* and *STASIS*.—*Herzens'*. See *PERISTOTOLE*.

STILLUNG (Ger.), n. $Sti^{12}l^{12}i^{12}ung$. The act or process of calming, stopping, or stanching, also of suckling. [a, 48.]—*S'*mittel. A sedative. [a, 48.]

STILOGONIDIUM (Lat.), n. n. $Sti^{12}l^{12}(sti^{12}l^{12})o^{12}g^{12}o^{12}n^{12}i^{12}d^{12}i^{12}u^{12}m$. From *stilus* (q. v.), and *gonidium* (q. v.). In Fungi, a gonidium abjoined from the end of a sterigma on a gonidiophore.

STILUS (Lat.), n. m. $Sti^{12}l^{12}(sti^{12}l^{12})u^{12}s^{12}(u^{12}s)$. 1. See *PENCIL*. 2. A peduncle, especially of the optic thalamus. [I, 73 (K).]—*S. dilubilis*. Ger., *Pastenschiff*. Of Unna, a pencil composed of dextrin, gum-arabic, or tragacanth and some medicament; used in local treatment of skin diseases. [a, 34.]—*S. ungues*. Ger., *Salbenstift*. Of Unna, a small cone composed of rosin, wax, olive-oil, and some medicament; used in skin diseases. [a, 34.]

STIMATOSIS (Lat.), n. f. $Sti^{12}m^{12}a^{12}t^{12}(a^{12}t^{12})o^{12}s^{12}$. Gen., *-os' eos* (-is). See *STYMATOSIS*.

STIMMESCHWERDE (Ger.), n. $Sti^{12}m^{12}be^{12}shwe^{12}rd^{12}e^{12}$. See *PHONOSUS*.

STIMMBILDUNG (Ger.), n. $Sti^{12}m^{12}bi^{12}ld^{12}ung$. See *PHONATION*.

STIMME (Ger.), n. $Sti^{12}m^{12}me^{12}$. See *VOICE*.—*Flüsters'*. Fr., *voix chuchotée*. In auscultation, the whispered voice. [a, 18.]—*Höhle's*. See *CÆLOSTOMA*.—*Kehlkopfs'*, *Kehls'*. See *LARYNGOPHONY*.—*Kopfs'*. See *FALSETTO*.—*Krugs'*. See *AMPHORIC RESONANCE* (2d def.).—*Meckers'*, *Ziegens'*. See *PARAPHONIA puberum*.

STIMMFEHLER (Ger.), n. $Sti^{12}m^{12}fal^{12}er$. See *PARAPHONIA*.

STIMMI (Lat.), n. n. $Sti^{12}m^{12}mi^{12}(mi^{12})$. Fr., *stimmi*. See *ANTIMONY*.

STIMMKRAMPF (Ger.), n. $Sti^{12}m^{12}kra^{12}mpf$. See *PHONOSPASM*.

STIMMLEIDEN (Ger.), n. $Sti^{12}m^{12}li^{12}den$. See *PHONOSUS*.

STIMMLOSIGKEIT (Ger.), n. $Sti^{12}m^{12}los^{12}ig^{12}kit$. Aphonia.—*Cholerische S*. See *CHOLERAPNEUMIA*.

STIMMRITZE (Ger.), n. $Sti^{12}m^{12}rit^{12}se^{12}$. See *GLOTTIS*, *True GLOTTIS*, and *RIMA GLOTTIDIS*.—*Phonischer S'nkrampf*. See *SPASTIC APHONIA*.—*S'ndeckel*. See *EPIGLOTTIS*.—*S'nkrampf*. Spasm of the glottis. [a, 34.]

STIMULANT, adj. $Sti^{12}m^{12}u^{12}l^{12}ant$. Fr., *s*. Ger., *stimulirend*. Stimulating; as a n. (Ger., *Stimulierungsmittel*, *Reizmittel*), an agent that stimulates; colloquially, an alcoholic liquor. Cf. *STIMULUS*.—*Diffusible* s. A s. that, administered by the mouth or hypodermically, acts quickly. [a, 34.]

STIMULATE, v. tr. $Sti^{12}m^{12}u^{12}at$. Lat., *stimulare*. Fr., *stimuler*. Ger., *stimulieren*, *reizen*. 1. To incite or urge on to increased action. 2. To treat with stimulants. [D.]

STIMULATING, adj. $Sti^{12}m^{12}u^{12}at^{12}ing$. Lat., *stimulans*. Having the power or a tendency to stimulate. [D.]

STIMULATION, n. $Sti^{12}m^{12}u^{12}a^{12}shu^{12}n$. Lat., *stimulatio*. Fr., *s*. Ger., *Reizung*. The act or process or result of stimulating. [a, 48.]—*Intramuscular s.* Of Remak, Duchenne's direct muscular faradization. [a, 34.]—*Latent s.* The period in which the energy of a muscle rises and sinks after instantaneous s. [J. B. Sanderson, "Proc. of the Roy. Soc." xlviii, 292, p. 14 (a, 34).]—*Terminal labile s.* Stroking the tendinous end of a muscle with the cathode as a means to affect the entire length of the muscle, the anode being stationary. [A. L. Ranney, "N. Y. Med. Jour." July 25, 1885 (a, 34).]—*Unipolar s.* The stimulus to a nerve effected by the application of a single electrode of an induction apparatus. [Landois (K).]

STIMULOSE, adj. $Sti^{12}m^{12}u^{12}os$. Lat., *stimulosus*. Fr., *stimuleux*. Covered with stinging hairs (stimuli). [a, 35.]

STIMULUS (Lat.), n. m. $Sti^{12}m^{12}u^{12}(u^{12})l^{12}u^{12}s^{12}(u^{12}s)$. From *στυμός*, a pricking, Fr., *aiguillon* (1st def.). Ger., *S*. (1st def.), *Reiz* (2d def.), *Reizung* (2d def.). 1. An agent or agency that stimulates.

2. The action or result of a stimulant; stimulation. 3. In botany (Ger., *Brennhaar*, *Nesselhaar*, *Brennborste*, *Zithorste*, *Brennspitze*), a sting (i. e., a stinging hair). [D, 1; a, 35.]—*Adequate s.* Fr., *suffisant*. Ger., *hinlänglicher Reiz*. That special form of s. which excites the terminal filaments of a nerve distributed to an organ of sense. [K, 8.]—*Chemical s.* An irritation of the animal economy or of a separate muscle or nerve, produced by the application of a chemical agent. [K.]—*Heterologous s.* An extrinsic (mechanical, thermal, chemical, electrical) s. that acts upon the nervous elements of the sensory apparatus along their entire course. [a, 34.]—*Homologous s.* See *Adequate s.*—*Infalible s.* A weak s., such as is just sufficient to cause a contraction of a frog's heart if applied at the proper time. [K, 19.]—*Mechanical s.* An irritation of a nerve or muscle brought about by mechanical means, as by pinching or striking. [K.]

STIMMWECHSEL (Ger.), n. $Sti^{12}m^{12}ve^{12}ch^{12}sw^{12}el$. The change of voice at puberty. [a, 34.]

STINGING, adj. $Sti^{12}n^{12}g^{12}ing$. Lat., *stimulans*. In botany, of a hair, producing pain on penetrating the skin. [a, 35.]

STINKASANT (Ger.), n. $Sti^{12}n^{12}ka^{12}sz^{12}ant$. See *ASAFETIDA*.—*Ammoniakalischer S'geist*. See *Spiritus ammoniæ fetidus*.—*S'plaster*. See *Emplastrum ASAFETIDÆ*.

STINKBAUM (Ger.), n. $Sti^{12}n^{12}k^{12}ba^{12}um$. See *STERCULIA*, *ANAGIRIS fetida*, and *PRUNUS padus*.

STINKHOLZ (Ger.), n. $Sti^{12}n^{12}k^{12}ho^{12}lts$. The genus *Olax*.

STINKNASE (Ger.), n. $Sti^{12}n^{12}ka^{12}sz^{12}e^{12}$. Ozena. [a, 34.]

STINKWEED, n. $Sti^{12}n^{12}k^{12}wed$. The *Cassia occidentalis*, *Chenopodium anthelminticum*, *Senecio jacobæa*, *Datura stramonium*, *Diplotaxis muralis*, etc. [a, 35.]

STINK-WOOD, n. $Sti^{12}n^{12}k^{12}wu^{12}d$. The *Oreodaphne bullata*, *Zieria macrophylla*, etc., also their wood. [a, 35.]

STIPA (Lat.), n. f. $Sti^{12}p^{12}(step^{12})a^{12}$. Fr., *stipe*. Weather-grass; a genus of grasses. The *Stipaceæ* (of Kunth, a tribe of the *Gramineæ*) are now made a subtribe (*Stipeæ*) of the *Agrostideæ*. [a, 35.]—*S. salicifolia*. A species used by the Russians as a diuretic. [a, 35.]—*S. pennata*. Fr., *étipe*, *agrette*, *stipe à panache*. Feather-grass; a well-known ornamental grass. According to some, the freedom of the Tartars around the Volga from pulmonary disease is due to their daily use of the milk of mares fed upon this grass. [B, 185 (a, 35).]—*S. tenacissima*. Esparto-grass; a rush-like grass growing in sandy tracts of the Mediterranean coast; used for making hats, mats, baskets, etc. [a, 35.]

STIPATE, adj. $Sti^{12}p^{12}at$. Lat., *stipatus* (from *stipare*, to press together). 1. Stipitate by numerous or less crowded. 2. Packed, crowded (said of spores, etc.). [a, 35.]

STIPATIPLO (Lat.), n. f. $Sti^{12}p^{12}(step^{12})a^{12}(stip^{12})i^{12}plo$. Gen., *-onis*. From *stipare*, to press together. Fr., *stipation*. An accumulation that forms an obstruction. [L, 50 (a, 48).]—*S. telæ cellulose infantum*. See *SCLEREMA neonatorum*.

STIPE, n. *Stip*. See *STIPES*.

STIPEL, n. $Sti^{12}p^{12}el$. Lat., *stipella*, *stipellum*. Fr., *stipelle*. Ger., *Nebenblättchen*. A small slender or secondary stipule, the stipule of a leaflet. *S's* are single to each leaflet, except to the terminal one, which has two. [a, 35.]

STIPES (Lat.), n. m. $Sti^{12}p^{12}(step^{12})ez^{12}(ez)$. Gen., *stip'itis*. Fr., *stipe*. Ger., *Stiel*. The stalk (Ger., *Strunk*) that bears the pileus of *Fungi* or the apothecium of lichens; a leaf-stalk (Ger., *Blattstiel*) in ferns or palms; a stalk-like support (*s. pistilli*) of a pistil or of a gynœcium. [a, 35.]—*S. vaginularis*. Ger., *Scheidestiel*. The pedicle which in certain mosses (*Sphagnum* and *Andraea*) carries the vagina with the fruit above the topmost leaves. [a, 35.]

STIPIFORM, adj. $Sti^{12}p^{12}i^{12}fo^{12}rm$. Lat., *stipiformis* (from *stipes*, a stem, and *forma*, form). Fr., *stipiforme*. Resembling the stem of a palm. [a, 35.]

STIPITATE, adj. $Sti^{12}p^{12}i^{12}t^{12}at$. Lat., *stipitatus*. Fr., *stipité*. 1. Provided with a stipex which is neither petiole nor peduncle. 2. Elevated on a stipex. [a, 35.]

STIPPCHEN (Ger.), n. $Sti^{12}p^{12}ch^{12}e^{12}n$. An inflamed papule with an inflammatory areola. [G.]

STIPPENAUSSCHLÄGE (Ger.), n. pl. $Sti^{12}p^{12}pe^{12}n^{12}a^{12}u^{12}s^{12}hlag^{12}e^{12}$. Eruptions characterized by inflammatory papules with red areolæ. [G, 5.] See *MONOCARPÆ* (1st def.).

STIPULA (Lat.), n. f. $Sti^{12}p^{12}(step^{12})u^{12}l^{12}a^{12}$. Dim. of *stipes*, a stalk. 1. A newly sprouted feather. [L, 343.] 2. A stipule; also, especially in the pl., the amphigastria of the liverworts. [B, 198.]

STIPULACEOUS, adj. $Sti^{12}p^{12}u^{12}l^{12}a^{12}shu^{12}s$. Lat., *stipulaceus*. Fr., *stipulé*. Ger., *nebenblättrig*. Pertaining to or composed of stipules; of De Candolle, having scales which are aborted stipules (said of buds). [a, 35.]

STIPULANEUS, n. $Sti^{12}p^{12}u^{12}l^{12}an^{12}e^{12}us$. Lat., *stipulaneus*. Fr., *stipulem*. Taking the place of stipules. [a, 35.]

STIPULAR, adj. $Sti^{12}p^{12}u^{12}l^{12}ar$. Belonging to a stipule. [a, 35.]

STIPULATE, adj. $Sti^{12}p^{12}u^{12}l^{12}at$. Lat., *stipulatus*. Fr., *stipulé*. Ger., *nebenblättrig*. Furnished with stipules. The *Stipulatæ* are a subclass of the *Filicina* having stipule-like appendages. [a, 35.]

STIPULE, n. $Sti^{12}p^{12}u^{12}l^{12}$. Lat., *stipula*. Fr., *s*. Ger., *Afterblatt*, *Afterblättchen*, *Nebenblatt*. One of the two foliar appendages at the base of the petiole of a leaf; also one of certain other stipular bodies, such as the unicellular tubes on the inner and outer sides of a leaf in the *Characeæ* and the appendage at the point of a leaf in the *Archegoniate*. [a, 35.] See also *STIPULA*.

STIPULIFEROUS, adj. $Sti^{12}p^{12}u^{12}l^{12}i^{12}fer^{12}us$. Lat., *stipulifer* (from *stipula*, a stipule, and *ferre*, to bear). Fr., *stipulifère*. Of a petiole, having stipules. [a, 35.]

STIPULOSUS (Lat.), adj. Stīp-u¹(u¹)-os-u²s(u²s). Fr., *stipuleux*. Furnished with stipules which are comparatively very long or large. [a. 35.]

STIRN (Ger.), n. Stern. See FOREHEAD.—S'band. A head bandage or band.—S'gegend. The frontal region of the brain. [J. 17 (K).]—S'lage. See BROW PRESENTATION.—S'mittel. See EPIPROSIUM.—S'schau. See METOPOSCOPY.—S'sheil. See PARS FRONTALIS OSSIS FRONTALIS.—S'wulst. A frontal convolution. [K.]

STIRNFORTSATZ (Ger.), n. Sternfort-zat's. See FRONTAL PROCESS.—Seitlicher S. See External nasal PROCESS.

STIRNWINNUNG (Ger.), n. Stern'vīnd-un². A frontal convolution. [K.]—Dritte S., Dritte S'gruppe, Dritter S'szug. See Inferior frontal CONVOLUTION.—Erste S., Erste S'gruppe, Erster S'szug. See Superior frontal CONVOLUTION.—Mittlere S., Mittlerer S'szug. See Middle frontal CONVOLUTION.—Obere S., Oberer S'szug. See Superior frontal CONVOLUTION.—Untere S., Unterer S'szug. See Inferior frontal CONVOLUTION.—Zweite S., Zweite S'gruppe, Zweiter S'szug. See Middle frontal CONVOLUTION.

STIROSI (Lat.), n. f. Stīr(ster)-os'i's. Gen., os'eos(-is). Gr., στήριος (from στειρος, barren). Fr., s. Ger., S. See STERILITY.

STIRPS (Lat.), n. f. Stīr'p'z(stīr'ps). Gen., stīr'p's. Fr., *stirpe*. In botany, (1) a race or permanent variety; (2) the aerial stem of a plant. [a. 35.]

STIERUP, n. Stīr'u¹p. See STAPES.

STITCH, n. Stīč'h. Fr., *point*. Ger., *Stich*. 1. The product of one complete movement of the needle in the process of sewing; also any variety of sewing (or of surgical suture) produced by the use of a particular kind of such s's. [a. 48.] 2. See S'-pain.—Loop s. See SUTURE a. anse.—Royal s. See ROYAL SUTURE.—S'-pain. A colloquial term for a sharp, sudden pain that comes and goes without apparent cause, appearing in any part of the body. [a. 34.]—Taylor's s. See Cobbler's SUTURE.

STIXIS (Lat.), n. f. Stīx'i's. Gen., stīx'eos(-is). Gr., στίξις (from στίγειν, to prick). Tattooing. [L. 50 (a. 14).]

STOBÆA (Lat.), n. f. Stōb'æ(-a) or St. stōbæ. A genus of the Compositæ. [a. 35.]—S. heterophylla. A Cape-of-Good-Hope species, considered lithontriptic and used in renal diseases.

STOCK, n. Stōk. A.-S., *stoc*. Gr., στέλεχος (1st def.). Lat., *truncus*, *stirps* (4th def.). Fr., *tronc*. Ger., *Stamm*. 1. The trunk or stem of a plant. 2. The basal persistent portion of a stem from which roots proceed. 3. The portion of a stem into which a scion or graft is inserted. 4. A race or fixed variety. 5. The genus *Matthiola*. 6. The *Trollius europæus*. [a. 35.]

STOCKFISCHLEBERTHRAN (Ger.), n. Stōk'fīsh-lab'/-e'r-tra-n. The oil of the hake (*Gadus merluccius*). [B.]

STOCKUNG (Ger.), n. Stōk'ung. See STASIS.

STOBÆA (Lat.), n. f. Stēb'(stō'ēch'2)-e(a). Gen., stōb'æ. Fr., *stébé*. 1. Of Person, the genus *Centaurea*. 2. Of Linnaeus, a genus of composite shrubs. [a. 35.]—S. rhinocerotis. A species used at the Cape of Good Hope as a digestive tonic. [a. 35.]

STECHAS (Lat.), n. f. Stēk'(stō'ēch'2)-a's(a's). Gen., stēch'-ados(-adis). Sp., *cantueso* [Sp. Ph.] (2d def.). 1. Of Tournefort, the genus *Lavandula*. 2. Of the Fr. Cod., the flowering stalk (herb and flowering tops [Sp. Ph.]) of *Lavandula* s. 3. The *Helichrysum* s. [B. 95 (a. 38); a. 35.]—Stēchadis flōres [Gr. Ph.]. Sp., *cantueso* (la sumidad florida) [Sp. Ph.]. The flowers of *Lavandula* s. [B. 95 (a. 38).]

STEOCHIOLOGIA (Lat.), n. f. Stēk'(stō'ēch'2)-i'2(e)-o(o's)-lōj(-lō'g)'i'2-a's. Fr., *stœchiologie*. See STOICHOLOGY.

STEOCHIMETRIA (Lat.), n. f. Stēk'(stō'ēch'2)-i'2(e)-o(o's)-mē't'r'i'2-a's. Fr., *stœchiométrie*. See STOICHIOMETRY.

STEOCHION (Lat.), n. n. Stēk'(stō'ēch'2)-i'e(o)'2n. Gr., στωχίων. See ELEMENT.

STOFF (Ger.), n. Stōf. See MATERIAL and MATTER.—Ausgeschiedener S., Auswurf's. Excretion, waste matter. [K. 16.]—Einfache Stoffe. Elements. [B.]—Krankheit's. See MATERIES morbi (2d def.).—Riech's. Any substance which acts as a stimulus to the olfactory nerves. [Gruenhagen (K).]—Schmeck's. Any substance which acts as a stimulus to the nerves of taste. [Gruenhagen (K).]—S'austausch. See S'umsatz.—S'bilanz. The balance of nutrition in the body. [K. 16.]—S'spender. The blood considered as the agent in effecting tissue-changes. [K. 16.]—S'umsatz. Interchange of matter.—S'wechsel. 1. See METABOLISM. 2. Change of matter. [K.]—S'wechselbilanz. The balance or equalization of the tissue-changes in the animal economy.

STOICHOLOGY, n. Stōik-i'2-ō'i-o-i'2. Lat., *stœchiologia* (from στωχίον, an element, and λόγος, understanding). Fr., *stœchiologie*. Ger., *Elementenlehre*. The scientific investigation of elements (especially of the chemical elements) or of elementary principles. [a. 48.]

STOICHIOMETRY, n. Stōik-i'2-ō'i'2-e'2-i'2. Lat., *stœchiometria* (from στωχίον, an element, and μετρέω, to measure). Fr., *stœchiométrie*. Ger., *Stœchiometrie*, *Elementenmessung*. The determination of the proportions in which elements combine to form compounds. [B. 38, 48 (a. 14).]

STOLE, n. Stōl. See STOLON.

STOLLBEULE (Ger.), n. Stōl'boil-e'. See SPAVIN.

STOLON, n. Stōl'2n. From stōla, a shoot. Fr., s. Ger., *Sprosser*, *Stengelsprosse*. 1. Any basal branch striking root; in phanerogams, a slender runner piercing the soil; in Musci, a shoot running along or beneath the soil and finally turning upward and producing fully-leaved shoots. [a. 35.] 2. A process or structure resembling the s. of a plant. [a. 27.]

STOLONIFEROUS, adj. Stōl'2n-i'2f'2-er-u's. From stōla, a shoot, and ferre, to bear. Furnished with stolons.

STOLPERGANG (Ger.), n. Stōlp'e'r-ga'2n. A stumbling gait.

STOMA (Lat.), n. Stōm(stō'm)'a's. Gen., stōm'atos(-atis). Gr., στόμα. Fr., *stomate*. Ger., S., *Mündung*, *Spaltöffnung* (2d def.). 1. A mouth or opening. 2. A breathing pore; one of the organized apertures in the epidermis of plants, most abundant on the lower surface of leaves, consisting each of a pair of cells (guard-cells) between the opposed concave sides of which is a slit forming a medium of communication between an intercellular space within and the air without. [a. 35.] 3. A minute opening in a serous membrane, surrounded by a ring of small cuboidal cells and leading into a lymph-vessel. [J.] 4. See under STIGMA (6th def.).—False s'ta. See PSEUDOSTOMATA.

STOMACE (Lat.), n. f. Stō'm-a'sk(a'sk)'a's(a'sk)-e(a). Gen., -ac'aces. Gr., στομαχία (from στόμα, the mouth, and κακός, evil). Fr., s. Ger., *Mundfäule*, *Mundfäulniss*, *Mundkrankheit*. Any severe form of stomatitis.—S. apithosa. See APHTHÆ.—S. gangrenosa. See GANGRENOUS STOMATITIS.—S. universalis. Of Sauvages, purpura hemorrhagica. [a. 34.]

STOMACH, n. Stū'm'k. Gr., στόμαχος. Lat., *stomachus*. Fr., *estomac*. Ger., *Magen*. 1. A somewhat conical hollow viscus, with rounded ends, constituting the largest dilatation of the alimentary canal. It is concave above, convex below, with its larger end (the cardia) directed to the left side and situated higher than its smaller extremity (the fundus). On the left side it connects with the oesophagus, on the right with the duodenum. It lies close beneath the diaphragm, and extends on the right side nearly to the liver and below to a point about midway between the diaphragm and the umbilicus. When moderately distended it is about 12 inches long and about 5 inches wide at its widest part. It consists of four coats, known as the serous, muscular (made up of longitudinal, circular, and oblique fibres), submucous, and mucous, and is provided with glands concerned in digestion. In ruminants the s. proper is the abomasum, or rennet, for in the rumen, reticulum, and omasum the food is merely macerated and, to a certain extent, triturated. The slightly masticated food passes into the rumen and reticulum, where it is thoroughly mixed with the saliva and is macerated and softened. After remaining there for a variable length of time it is regurgitated and again masticated, the animal making one movement of the jaw from right to left or left to right, and then a number of movements in the reverse direction until the food is finely triturated. It next passes into the omasum, being prevented by the oesophageal groove from entering the rumen or reticulum, and then, grasped by the folds of the omasum, it is submitted to further trituration and maceration. Thence it enters the abomasum, where the true digestion takes place. The s's of the lower animals, except ruminants, do not differ very materially from that of man, except in shape and size. In Carnivora the s. is relatively large, secreting gastric juice throughout its whole extent, while in Omnivora but a smaller proportion of surface secreting the gastric juice is found. The smaller the secreting surface of the s. is in any animal, the greater are the surface and extent of the intestines. Thus, in Carnivora the intestines are relatively smaller than in ruminants, etc. For the s. in birds see PROVENTRICULUS. [L.] 2. Popularly, the abdomen.—Honey-comb s. See RETICULUM (3d def.).—Hour-glass s. Ger., sanduhrförmiger Magen. An hour-glass-shaped distortion of the s. from constriction of its median portion by a band of exudation. [G. Ciarracchi, "Gazz. degli ospit.," 1884, p. 101; "Ctbl. f. klin. Med.," Mar. 14, 1885, p. 189.]—S'ache. See CARDIALGIA.—S.-bucket, of Einhorn, a small silver aconite-limb vessel to which is attached a silk thread; used to obtain a specimen of the gastric contents. [a. 34.]

STOMACHAL, adj. Stū'm'a'sk'l. Fr., *stomacal*. See GASTRIC.

STOMACHALGIA (Lat.), n. f. Stō'm-a'sk(a'sch'2)-a'l'i'2(a'l'g)'i'2-a's. From στόμαχος, the stomach, and άλγος, pain. See CARDIALGIA.

STOMACHIC, adj. Stō'm'a'sk'i'2k. Gr., στομαχικός. Lat., *stomachicus*. Fr., *stomachique*. 1. Gastric. 2. Acting as a digestive tonic. [a. 17.]

STOMACHIUM (Lat.), n. n. Stō'm-a'sk(a'sch'2)'i'2k-u'm(u'm)'a. A stomachic remedy. [a. 17.]—S. Poteril. See Cerasua ANTIMONI SOLARIS and ANTIMONIUM diaphoreticum martiale.

STOMACH-PUMP, n. Stū'm'k-pū'mp. See under PUMP.

STOMEMORRHAGIA (Lat.), n. f. Stōm(stō'm)-e'm(a's-e'm)-ō'r-aj(rag)'i'2-a's. From στόμα, the mouth, αἷμα, blood, and πύρωσις, to burst forth. Fr., *stémorrhagie*. Ger., *Mundabthung*. Hemorrhage from the mouth. [L. 50 (a. 14).]

STOMATALGIA (Lat.), n. f. Stō'm-a'st(a'st'2)-a'l'i'2(a'l'g)'i'2-a's. From στόμα, the mouth, and άλγος, pain. Fr., *stomatgie*. Ger., *Mundschmerz*. Pain in the mouth. [L. 41 (a. 14).]

STOMATELOSIS (Lat.), n's f. Stōm-a'st(a'st)-e'st(a'st)'i'2-a's. Gr., στόματις, the mouth, and έλκος, an ulcer. Fr., *stomatelcie*, *stomatelcosie*. Ulceration of the mouth. [E.]

STOMATIC, adj. Stō'm-a'st'i'2k. Gr., στοματικός. From στόμα, the mouth. Lat., *stomatonic*. Fr., *stomatique*. Pertaining to a stoma or mouth; as a n., a medicine for affections of the mouth.

STOMATITE (Fr.), n. Stōm-a'st-et. See STOMATITIS.—S. charbonneuse. See GANGRENOUS STOMATITIS.—S. couenneuse. See BUCCAL DIPHTHERIA.—S. crémense. See APHTHÆ.—S. des casernes. A form of stomatitis, probably scorbutic, observed in garrisons.—S. du muguet. See APHTHÆ.—S. epizootique. See Epizootic STOMATITIS.

STOMATITIS (Lat.), n. f. Stōm(stō'm)-a'st(a'st)-i'e(e)'t'i's. Gen., -it'idos(-idis). From στόμα, the mouth. Fr., *stomatite*. Ger., *Mundentzündung*. Inflammation of the mouth. [D.]—Aphthous s. See APHTHÆ.—Catarrhal s. Inflammatory redness and swell-

ing of the oral mucous membrane without ulceration. [a, 34].
Corrosive s. 1. See *Gangrenous s.* 2. S. produced by the action of corrosive substances. [D, 48].
Diabetic s. S. caused by diabetes. — **Diphtheritic s.** See *Buccal diphtheria*. — **Epithelial s.** See *Leucoplakia buccalis*. — **Epizootic s.** Of Hardy, aphthae epizooticae. [a, 34]. — **Erythematous s.** See *Simple s.* — **Follicular s.** See *APHTHÆ*. — **Gangrenous s.** S. accompanied by gangrene. — **Mercurial s.** S. due to mercurial poisoning. [a, 34]. — **Pseudo-membranous s.** See *Buccal diphtheria*. — **Pultaceous s.** See *APHTHÆ*. — **Saurine s.** S. due to lead poisoning. [a, 34]. — **Scorbutic s.** S. occurring in and due to scurvy. [a, 34]. — **Simple s.** An erythematous inflammation of the mouth, especially of its mucous membrane, which occurs in patches, and may be due to heat, cold, irritation of the teeth, etc. It is also caused at times by gastric derangement. [D, 1]. — **S. aphthosa**, **S. aphthophyta**, **S. crenosa**. See *APHTHÆ*. — **S. crouposa**. See *Buccal diphtheria*. — **S. epidemica**. An acute infectious s. occurring epidemically. [a, 34]. — **S. erythematosa**. See *Simple s.* — **S. exsudativa**. Of Löwenstamm, s. associated with exudation. [a, 34]. — **S. exulcerans**. See *Ulcerative s.* — **S. follicularis**, **S. fungosa**. See *APHTHÆ*. — **S. intertropica**. See *APHTHÆ tropica*. — **S. leucæmica**. S. caused by leucæmia. [a, 34]. — **S. materna**. S. occurring during pregnancy or lactation, due to the enfeeblement of the system incident to those conditions. [a, 34]. — **S. membranacea**, **S. membranosa**. See *Buccal diphtheria*. — **S. mercurialis**. See *Mercurial s.* — **S. nodosa**. S. with the formation of small nodules in the buccal mucosa. [a, 34]. — **S. parasitica**. See *APHTHÆ*. — **S. pustulosa acarosa**. Aphthae epizooticae caused by an *Acarus*. [a, 34]. — **S. pustulosa contagiosa**. A contagious form of aphthae epizooticae observed in horses. [a, 34]. — **S. septica**. S. due to septic infection, ulcerations, idiopathic. See *Gangrenous s.* — **S. vesicularis**. See *APHTHÆ*. — **Toxic s.** S. due to the local application or ingestion of a poison or to the action of a poison generated in the system. [a, 34]. — **Ulcerative s.** S. with ulceration. — **Ulceromembranous s.** Buccal diphtheria with ulceration. — **Vesicular s.** See *APHTHÆ*.

STOMATIUM (Lat.), n. n. Stom²m-a³(a³)shi²(ti)²-u³m(u⁴m). See *STOMA* (2d def.).

STOMATOCE (Lat.), n. f. Stom²m-a³(a³)-o³k'a³s(a³l²)-(e)a. Gen., -oc'aces. See *STOMACE*.

STOMATOCATHARSIS (Lat.), n. f. Stom²m-a³(a³)-o(a³)-ka³th(k'a³th)-a³rs'i³s. Gen., -ars'eo³-(is). From *stoma*, the mouth, and *katharsis*, a cleansing. Fr., *stomatocatharsie*. Ger., *Mundauswurf*. Salivation. [L, 50 (a, 48).]

STOMATOCATHARTICUM (Lat.), n. n. Stom²m-a³(a³)-o(a³)-ka³th(k'a³th)-a³rt'i²k-u³m(u⁴m). See *STOMATOCATHARTICUM*.

STOMATODYNIA (Lat.), n. f. Stom²m-a³(a³)-o(a³)-di²n(di²n')-i²-a³. From *stoma*, the mouth, and *dýnyn*, pain. See *STOMATALGIA*.

STOMATOLITRIA (Lat.), n. f. Stom²m-a³(a³)-o(a³)-i²-a³(a³)-rt'i(re)³a³. From *stoma*, the mouth, and *litæia*, medical treatment. The therapeutics of diseases of the mouth. [a, 34].

STOMATOLOGY, n. Stom²m-a³-o³i²-j². From *stoma*, the mouth, and *lógos*, understanding. The pathology, etc., of the mouth. ["N. Y. Med. Jour.," Mar. 17, 1888, p. 290 (a, 48).]

STOMATOMALACIA (Lat.), n. f. Stom²m-a³(a³)-o(a³)-ma²l-(ma³)-as(a³l²)-i²-a³. From *stoma*, the mouth, and *malakia*, softness. Fr., *stomatomalacie*. A morbid softening of the structures of the mouth. [L, 50 (a, 14).]

STOMATOMENIA (Lat.), n. f. Stom²m-a³(a³)-o(a³)-men(man)-i²-a³. From *stoma*, the mouth, and *μήν*, a month. Fr., *stomatoménie*. Vicarious menstruation by the mouth. [L, 50 (a, 14).]

STOMATOMIA (Lat.), n. f. Stom²m-a³(a³)-om(o²m)-i²-a³. From *stoma*, the mouth, and *τομή*, a cutting. Incision of a mouth (e. g., the os uteri). [a, 34].

STOMATOMICOSIS (Lat.), n. f. Stom²m-a³(a³)-o(a³)-mi(mi)-u³s. Gen., -os'eo³-(is). From *stoma*, the mouth, and *μύκωσις*, fungus. Any mycotic affection of the mouth. — **S. oidica**. S. caused by *Oidium albicans*. — **S. sarcinica**. S. caused by *Sarcina*. [a, 34].

STOMATONECROSIS (Lat.), **STOMATONOMA** (Lat.), n. f. Stom²m-a³(a³)-o(a³)-ne²k-ros'i³s. — **-o²n'o²m-a³**. Gen., -ros'eo³-(is). From *stoma*, the mouth, and *νέκρωσις*, necrosis, or *νόμος*, a corroding ulcer. Fr., *stomatonecrose*, *stomatonomie*. See *Gangrenous stomatitis*.

STOMATOPANUS (Lat.), n. m. Stom²m-a³(a³)-o(a³)-pan-(pa³n)-u³s(u⁴s). From *stoma*, the mouth, and *πανς* (p'a³n), Fr., *stomatopane*. Swelling of the glands of the mouth. [L, 50 (a, 14).]

STOMATOPATHIA (Lat.), n. f. Stom²m-a³(a³)-o(a³)-pa³th-(pa³th)-i²e³a³. From *stoma*, the mouth, and *πάθος*, disease. Fr., *stomatopathie*. Any disease of the mouth. [a, 34].

STOMATOPHYMA (Lat.), n. n. Stom²m-a³(a³)-o(a³)-fi(fu)³-ma³. Gen., -phy³m(a³-atis). From *stoma*, the mouth, and *φύμα*, a growth. Fr., *stomatophymie*. Ger., *Mundgeschwulst*. Any tumor of the mouth. [L, 50 (a, 14).]

STOMATOPLASTY, n. Stom²m-a³-o-pla³st'i². From *stoma*, the mouth, and *πλάσσειν*, to mold. Fr., *stomatoplastie*. Ger., *Stomatoplastik*. The plastic surgery of the mouth, also of the os uteri. [E, a, 34].

STOMATOPOLYSIS (Lat.), n. f. Stom²m-a³(a³)-o(a³)-poi-ei(a³)-s'i³s. Gen., -es'eo³-(is). From *stoma*, the mouth, and *πόλινσις*, production. 1. See *Stomatoplasty*. 2. Any operation for establishing an aperture of communication.

STOMATOPYRA (Lat.), n. f. Stom²m-a³(a³)-o²p'i²r(u³r)-a³. From *stoma*, the mouth, and *πύρ*, fire. See *APHTHÆ*.

STOMATORRHAGIA (Lat.), n. f. Stom²m-a³(a³)-o²r-ra³-ra³-g'i²-a³. From *stoma*, the mouth, and *ῥήγνυσθαι*, to burst forth. Ger., *Mundblutung*. Hemorrhage from the mouth. [E]

STOMATORRHEA (Lat.), n. f. Stom²m-a³(a³)-o²r-re'(ro²e³)-a³. From *stoma*, the mouth, and *ῥέειν*, to flow. Fr., *stomatorrhée*. Ger., *Mundfluss*. Any morbid discharge from the mouth.

STOMATOSCOPE, n. Stom²m-a³-o-skop. From *stoma*, the mouth, and *σκοπεῖν*, to examine. Fr., s. Ger., *Stomatoskop*. An apparatus for the visual examination of the mouth-cavity.

STOMATOSEPSIS (Lat.), n. f. Stom²m-a³(a³)-o(a³)-se²ps-(saps)'i³s. Gen., -seps'eo³-(is). From *stoma*, the mouth, and *σῆψις*, putrefaction. See *Septic stomatitis*.

STOMATOSIS (Lat.), n. f. Stom²m-a³(a³)-o²s'i³s. Gen., -os'eo³-(is). From *stoma*, the mouth. Any disease of the mouth.

STOMATOSPASMUS (Lat.), n. m. Stom²m-a³(a³)-o(a³)-spa²z-(spa³s)'mu³s(mu⁴s). From *stoma*, the mouth, and *σπασμός*, a spasm. Fr., *stomatospasme*. See *TRISMUS*.

STOMATOTYPHUS (Lat.), n. m. Stom²m-a³(a³)-o(a³)-tif-(tu³f)'u³s(u⁴s). From *stoma*, the mouth, and *τύφος*, typhus. Fr., s. Ger., *Mundtyphus*. Of Eisenmann, a form of typhus ushered in by lesions of the mouth. [A, 322.]

STOMATURIA (Lat.), n. f. Stom²m-a³(a³)-u²(ur)'i²-a³. From *stoma*, the mouth, and *ούρον*, urine. Fr., *stomaturie*. Metastasis of the urine to the mouth. [L, 50 (a, 14).]

STOMENCEPHALUS (Lat.), n. m. Stom²m-e²n(en')-se²f(ke³f)-a³l(a³l)-u³s(u⁴s). From *stoma*, the mouth, and *ἐγκεφαλος*, the brain. See *STOMOCOPHALUS*.

STOMOCATHARTERIUM (Lat.), **STOMOCATHARTICUM** (Lat.), n. n. Stom²m-o(a³)-ka³th(k'a³th)-a³rt-e(a³)-u³m(u⁴m). — **-a³rt'i²k-u³m(u⁴m)**. From *stoma*, the mouth, and *καθάρτικον*, or *καθαριστικός*, purificative. Fr., *stomocathartique*. A mouth-cleansing medicine. [L, 50 (a, 48).]

STOMOCEPHALUS (Lat.), n. m. Stom²m-o(a³)-se²f(ke³f)'a³l(a³l)-u³s(u⁴s). From *stoma*, the mouth, and *κεφαλή*, the head. Fr., *stomocéphale*. A cyclocephalus in which the upper portion of the face resembles that of a rhinocephalus, while in the lower portion of the face the jaws are rudimentary. There is more or less complete absence of the buccal cavity, with a tubercular or polycystic-like formation where the mouth should be. [Geoffroy St.-Hilaire.]

STOMODEUM (Lat.), n. n. Stom²m-o(a³)-o²d-(a³e³)-u³m(u⁴m). Ger., *Kopfdarm*, *Mundbruch*, *Mundöffnung*, *primitive Mundhöhle*. The primitive mouth of the embryo, being the common cavity of the mouth, the nose, and the pharynx. [A, 5.]

STOMOMANICON (Lat.), n. n. Stom(stom²m)-o²-ma²n-(ma³n)'i²k-o²n. See *PLATYSMA myoides*.

STOMOSCHISIS (Lat.), n. f. Stom²m-o²sk(o²sch'2)'i²s-i²s. Gen., -schis'eo³-(osch'is)is. From *stoma*, the mouth, and *σχίσσις*, a cleaving. Fr., *stomoschisie*. Fissure of some oral structure, especially cleft palate. [L, 50 (a, 14).]

STOMOTICUS (Lat.), adj. Stom²m-o²t(o²)'i²2k-u³s(u⁴s). From *stoma*, the mouth. Pertaining to the mouth or to inoculation.

STOMOTOSYRINX (Lat.), n. f. Stom²m-o²t(o²)-o²-si²r(su³r)'i²-p²n'x. Gen., -i²ng'o³s(-i²ng'is). From *stoma*, the mouth, *ὄψ*, the ear, and *σύνρυξ*, a tube. See *Eustachian tube*.

STOMURIA (Lat.), n. f. Stom²m-a³(a³)-ur'i²-a³. See *STOMATURIA*.

STONE, n. Stom²n. Gr., *λίθος*. Lat., *lapis*. Fr., *pierre*. Ger., *Stein*. 1. An aggregated mass of more or less firmly cohesive mineral matter, especially of siliceous matter, which may or may not also the condition of being affected with vesical calculi. [a, 48.] 2. See *PUTAMEN* (2d def.). — **Blue s.** See *COPPER sulphate*. — **Gall-s.** See *Biliary calculus*. — **Livers' s.** A mixture of heavy spar (barium sulphate) and bitumen. [a, 35]. — **Philosopher's s.** Lat., *lapis philosophicus*, *lapis philosophorum*. Fr., *pierre philosophale*. Ger., *Stein der Weisen*. A hypothetical substance sought after by the alchemists as a panacea and a restorer of youth, also as an agent for transmuting baser matter into the precious metals. [a, 48]. — **S.-crusher**. See *LITHOTRITE*. — **S.-oil**. See *PETROLEUM*. — **Sun-s.** See *LAPIS solis*.

STONECROP, n. Stom²n'kro²p. The genus *Sedum*, especially *Sedum acre*. [a, 35.]

STONE-POX, n. Stom²n'po²x. Ger., *Steinpocken*. 1. Varicella solidescens. 2. Variola vaccina atrophica. 3. Acne. [G.]

STONEWORT, n. Stom²n'wu³rt. See *CHARA* (2d def.).

STOOL, n. Stul. Gr., *καρβολή* (2d def.), *ἄποβολή* (2d def.), *κοιλία* (3d def.), *Lat. defecio* (2d def.), *feces* (3d def.). Fr., *garde-robe* (1st def.), *selle*. Ger., *Stuhl*, *Stuhlgang* (2d def.). 1. A seat or chair, especially one arranged for evacuation of the bowels. 2. The discharge of feces. 3. The matter evacuated from the bowels. 4. A plant used for propagation by having its branches bent down into the ground. [a, 35]. — **Bilious s's**. — Discharges in bilious diarrhoea, and also after the purgative use of calomel. When bile is in abundance in the s's their color is yellowish or yellowish-brown; this becomes darker after exposure to the air. If the alimentary tube is in a decidedly acid condition the bilious s's are green. [D, 25]. — **Caddy s's**. The evacuations in yellow fever, which resemble fine, dark, sandy matter. [D, 1]. — **Palfy s's**. S's in which fat is present, observed in diseases of the pancreas. — **Mucous s's**. S's consisting entirely or partly of mucus; observed in certain intestinal inflammations. [a, 34]. — **Rice-water s's**. Watery s's of serum containing detached epithelium and liquid feces, resembling rice-water; observed in cholera.

STOPCOCK, n. Stom²p'ko²k. Fr., *robinet*. Ger., *Hahn*. A key for regulating the flow of liquid or gas from a reservoir. [a, 48.]

STOFFEND (Ger.), adj. Stom²p'e²nd. 1. Constipating. 2. Styptic. [L, 521 (a, 48).]

STOPFWACHS (Ger.), n. Stom²p'fa³sch²s. See *PROPOLIS*.

STOPPAGE, n. Stom²p'e²j. A colloquialism for the obstruction of some natural discharge. [a, 34.]

STOPPING, n. *Sto²p'iⁿ*. The operation of plugging a dental cavity. [a, 34.]

STORAX (Lat.), n. m. and f. *Storax* (sto²r'ax' (a²x'). Gen. *stor'acis*. Fr., *sax* (1st def.). Ger., *feater* S. (1st def.). 1. True s., a fragrant solid resin, somewhat like benzoin, obtained from the stem of *Styrax officinalis*. It was highly esteemed by the ancients, but does not now occur in commerce. [a, 35.] 2. See *Liquid s.*—**AMYGDALOID S.** Lat., *styrax amygdaloides*. Fr., *s. amygdaloïde*. Ger., *Mandels'*. A variety with a vanilla-like odor, consisting of dry, brittle masses composed chiefly of yellowish, agglutinated tears; produced, according to some, by the *Styrax officinalis*; according to others, identical with amygdaloid benzoin. [a, 35.]—**BALSAMUM STORACIS**, 1. See S. (1st def.). 2. See *Liquid s.* 3. The balsam of *Liquidambar altingiana*. [a, 35.]—**LIQUID S.** Fr., *styrax liquide* (ou *purifié*). Ger., *flüssiger S.*, *gemeiner S.* Sp., *estorace liquido* (Sp. Ph.). A half-fluid, opaque, viscid, grayish-brown resin, of pungent aromatic taste and a pleasant balsam-like smell, obtained from the bark [Norw. Ph., Swed. Ph., Austr. Ph.] (the branches [Gr. Ph.], the inner bark [U. S. Ph., Br. Ph., Ger. Ph., Roum. Ph.]) of *Liquidambar orientalis*. The purified s. of the Br. Ph. is translucent and of a yellow-brown color. The Fr. Cod. recognizes two grades of s., one of which, the *s. purifié*, is purified by melting and straining; and several other ph's order that the s. be purified before use. In its recent state it smells of bitumen or naphthalin. It is soluble in an equal weight of alcohol, is melted by a moderate degree of heat, and at a higher temperature takes fire and burns with a white flame. It contains stearin, styracine, and several other compound ethers, about 0.4 per cent. of an essential oil, small proportions of a fragrant substance (vanillin) and benzoic acid, and a hydrocarbon which exists both as a liquid (styröl) and as a solid (metastyröl). Liquid s. is stimulant and expectorant, but is now rarely used, except, mixed with linseed oil, as an application in scabies and as an ingredient of the compound tincture of benzoin. [B, 5, 180 (a, 35); B, 95 (a, 38).]—**LIQUID S. PLANT.** See *LIQUIDAMBAR ORIENTALE*.—**PILULE STORACIS**. Fr., *pilules d'opium balsamiques*. A pill-mass consisting essentially of 15 parts of s. with 5 each of opium and saffron or with 7 each of extract of opium, mastic, olibanum, and benzoin, 1 of licorice-juice, and 4 of saffron, worked up with oil of amber. [B, 119 (a, 38).]—**PREPARED S.** See *Liquid s.*—**RESINA STORACIS**, Solid s. See S. (1st def.).—**S. BARK.** The foliaceous, brown, fragrant bark remaining after the expression of liquid storax; formerly common in European pharmacy as *cortex thymianatis*. [a, 35.]—**S. IN GRAINS.** Lat., *styrax in granis*. Fr., *s. en larmes*. Ger., *körniger S.* A variety, not now found in commerce, consisting of soft, adhesive tears as large as a pea. [a, 35.]—**S. ISAUROICA.** According to some, liquid s.; according to others, the resin of *Styrax officinalis*. [a, 35.]—**S. PLANT.** See *STYRAX* (1st def.).—**S. von Bogotá** (Ger.). See *STYRAX bogotensis*.—**S. vulgaris.** See *Liquid s.*

STORESIN, n. *Sto²r'e's'iⁿ*. A substance, $C_{28}H_{48}O_8$, forming an important constituent of liquid storax and occurring in two isomeric forms, both of them colorless and amorphous. [a, 35; B, 5, 270 (a, 38).]

STORKBILL, **STORK'S-BILL**, n's. *Sto²rk'bi^l*, *sto²rkz'bi^l*. See PELARGONIUM, GERANIUM maculatum, and ERODIUM cicutarium.

STÖRUNG (Ger.), n. *Stu²r'ung*. See DERANGEMENT.—**Geistess'**. See Mental aberration.—**S. des organischen Baues.** See DISORGANIZATION.—**S. sentwicklung.** See CENOGENESIS.

STOSS (Ger.), n. *Sto²s*. See SHOCK (2d def.).—**Hertzsptizens'**. See APERT-BEAT.—**Herz's'**. See Heart-beat.

STÜSSEL (Ger.), n. *Stu²s'se^l*. See PESTLE.

STÖSSER (Ger.), n. *Stu²s'se^r*. A thruster or pusher. [A, 315 (a, 48).]—**Schlunds'**. See PROBANG.

STOTERN (n.), n. *Sto²t'et'ern*. See STUTTERING.

STOTERNBEIM (Ger.), n. *Sto²t'et'ern-beim*. A place in Saxe-Weimar where there is a saline spring. [L, 30, 57 (a, 14).]

STOUT, n. *Stu²u^t*. A strong variety of porter.

STOVE, n. *Stov*. Fr., *poêle*. Ger., *Ofen*. A hollow stand (generally closed) within which fuel is burned for heating purposes. [a, 48.]—**Salt-water s.** Ger., *Salzwasser-Ofen*. A s. for boiling water that has had its boiling point raised by the addition of common salt or some other saline substance, for the purpose of securing a high temperature for the destruction of micro organisms. [Dobrowskian, "Vratsch," No. 32, 1885; "St. Petersb. med. Wochenschrift," Jan. 4 (16), 1886, p. 5.]

STRABILISMUS (Lat.), n. m. *Strab²is* (stra²b'i²)—[i²l²i²mu²s] (mu²4s). See STRABISMUS.

STRABIMIC, adj. *Strab²is*—[i²s'mi²k]. Fr., *louchant* (1st def.), *strabique* (2d def.), *louché* (2d def.). Ger., *strabistisch*, *schielend* (2d def.). 1. Pertaining to strabismus. 2. Affected with strabismus.

STRABISMOMETER, n. *Strab²is-mo²m'e²t'r*. From *στραβισμός*, a squinting, and *μέτρον*, a measure. An instrument for measuring the amount or degree of deviation from the normal position in a squinting eye. [F.]—**Galezowski's binocular s.** A s. consisting of a graduated horizontal bar, on which slide two needles which, when placed opposite the centres of the cornea, indicate by means of a scale on the bar the degree of deviation. The transverse bar is held on a level with the eyelids, the handle of the instrument upward and the fork of the bar against the root of the nose. [F.]—**Laurence's s.** A s. consisting of an ivory plate molded to the conformation of the lower lid, having a scale of lines and half-lines on its border. The plate is applied to the border of the lower lid of the squinting eye. [F.]

STRABISMUS (Lat.), n. m. *Strab²is* (stra²b'i²)—[i²z'is] (mu²4s). Gr., *στραβισμός*. Fr., *strabisme*. Ger., *S.*, *Strabosität*, *Schielen*. Squinting; an inability to bring the visual axes of both eyes to bear simultaneously on one point, the axis of vision of one eye always de-

viating in a certain direction from the object. It may be the result of over-action, or faulty insertion, weakness, or of paralysis of a muscle. [F.]—**Absolute latent s. divergens.** S. in which the latent divergence is present for all distances, though more marked for the near point. [F.]—**Apparent s.** Convergent or divergent s. in which neither eye moves when the other is closed; due to retinal incongruence. [a, 34.]—**Concomitant s.** S. in which the movements of the squinting eye accompany those of the normal one. When the affected eye is used for fixation, the associated deviation of the eye generally used for fixation is equal to the usual deviation of the squinting eye. [F.]—**Convergent s.** That variety of s. in which the one eye deviates inward toward the nose, so that its visual axis, when prolonged, crosses that of the other eye in front of the point of fixation. [F.]—**Divergent s.** S. in which one eye deviates outward toward the temple, so that the optic axes never meet, but continually diverge from one another if prolonged. [F.]—**Downward s.** See *S. deorsum vergens*.—**Dynamic s.** A tendency or inclination to convergence or divergence, which, under ordinary circumstances, is overcome in the interest of binocular single vision, but which can be detected by the help of vertically refracting prisms. [F.] See INSUFFICIENCY of an ocular muscle and HETEROPIORIA.—**External s.** See *Divergent s.*—**Intermittent s.** Of Noyes, s. in which there are periods during which the axes of the eyes are normal. [a, 34.]—**Internal s.** See *Convergent s.*—**Latent s. convergens, Latent s. divergens.** See *Dynamic s.*—**Monolateral s.** See *Unilateral s.*—**Paralytic s.** S. due to paralysis of an ocular muscle. It is distinguished from ordinary or concomitant s. by the fact that the deviation occurs only when the eye is turned in the direction in which the paralyzed muscle would turn the eye, and that this deviation, instead of being constant, increases more and more as the eye is turned in this direction. Later on, a further deviation occurs from spastic contraction of the antagonist of the paralyzed muscle. [B.]—**Periodic s.** S. observed in hypermetropia or myopia, occurring only when accommodation is made for near points, but not when fixation is made for distance. [B, a, 34.]—**Relative latent s. divergens.** Exophoria in which the latent divergence is only present in near vision, while for all other distances, even under the covering hand, the axes of the eyes are parallel. [F.]—**S. adnatus.** Congenital s.; rarely observed. [a, 34.]—**S. alternans.** Concomitant s. in which sometimes one eye deviates, sometimes the other. [a, 34.]—**S. convergens.** See *Convergent s.*—**S. convergens inconstans.** S. convergens periodicus. A periodic convergent s. [F.]—**S. convergens spasticus.** A form of periodic convergent squint so called from the sudden, spasmodic appearance of the deviation. [F.]—**S. deorsum vergens.** S. in which the squinting eye turns downward below the point of fixation of the other eye. [F.]—**S. divergens, S. externus.** See *Divergent s.*—**S. incongruens.** Of von Graefe, s. due to incongruity of the retina. [Stellwag (a, 34).]—**S. internus.** See *Convergent s.*—**S. muscularis.** S. due to muscular action. [a, 34.]—**S. necessarius.** Of Cullen, caused by a change in the form or tissues of the eye. [a, 34.]—**S. paralyticus.** See *Paralytic s.*—**S. periodicus.** See *Periodic s.*—**S. spasticus.** S. due to spastic contraction of an ocular muscle; occurring either as a symptom of epilepsy or other central nervous affection, or due to the contracture of the antagonist of a paralyzed muscle. [B.]—**S. supernus, S. sursum vergens, Upward s.** S. in which the squinting eye turns upward beyond the point of fixation of the other eye. [F.]—**Unilateral s.** S. in which the transfer of the squint from one eye to the other does not occur spontaneously, but is artificially induced by covering the eye ordinarily employed in fixation. [F.]

STRABOMETER, n. *Strab²is-m'e²t'r*. From *στραβός*, oblique, and *μέτρον*, a measure. Fr., *strabomètre*. Ger., *S.* See STRABISMOMETER.

STRABOSITAS (Lat.), n. f. *Strab²is* (stra²b'i²)—[o²s] (a²s). Gen., *-at'is*. From *στραβός*, oblique. See STRABISMUS.

STRABOTOMY, n. *Strab²is-o²tom'i²*. From *στραβός*, oblique, and *τομή*, a cutting. Fr., *strabotomie*. Ger., *Strabotomie*. The operation for the cure of squint. It consists in dividing the conjunctiva over the line of insertion of the tendon of the contracted muscle, opening the sheath more or less extensively with scissors, passing a strabismus-hook beneath the tendon of the muscle, separating it from the underlying eyeball, and dividing it with scissors close to the line of implantation in the sclerotic. [F.]

STRAFF (Ger.), adj. *Stra²f*. Stretched, extended; in botany, strict. [L, 31; a, 35.]

STRAGULA (Lat.), **STRAGULUM** (Lat.), n's. f. and n. *Strag²ula* (stra²g'u²) (a²l²)—[a²l²—u²m] (u²m). From *sternere*, to spread out. Fr., *stragule*. A glumella. [a, 35.]

STRAHL (Ger.), n. *Stra²l*. See RAY (1st def.). **BARBULE** (2d def.) and **FRÖG** (2d def.).—**Flossens'**. See *Fim-ray*.—**Kiemenhaut's en.** See *Branchiostegal bones*.—**Marks'**. See *Medullary rays*.—**Marks'en der Nieren.** See *Medullary radii*.—**S'enbeurung.** See *Enervation*.—**S'enbündel.** See *Bundle*.—**S'en-cord.** A cord of interlacing nerve-fibres in the posterior column of the brain in the vicinity of the sensory nerve-roots. [L, 6 (K).]—**S'en-körper.** See *Ciliary body*.—**S'enpilz.** See *ACTINOMYCES*.—**S'en-sonne.** See *CORONA radiata*.

STRAHLEND (Ger.), adj. *Stra²l'e²nd*. See *RADIATE* (2d def.) and *RADIATIFORM*.

STRAHLUNG (Ger.), n. *Stra²l'ung*. See *RADIATION*.—**Marks', Peripherische S.** [Tiedemann]. See *CORONA radiata* (2d def.).—**S. des Balkens.** Those fibres at the extremities of the corpus callosum which are prolonged into the cerebral lobes. [K.]—**S. des hinteren Längsbündels.** The radiation of the posterior longitudinal fibres of the tegmentum into the cortex cerebri. [K.]

STRAIN, n. *Stran*. From *stringere*, to draw tight. The action or effect of bringing to bear on a structure an amount of force sufficient to endanger or impair its integrity, or of throwing on an

organ too great or too long-continued an amount of work.—**Cardiac** s. Cardiac irritability due to severe or protracted exercise or labor. [a. 34.]

STRAIT, n. *Strat.* Gr. στενωπία. Lat. *angustia*. Fr. *détoit*. Ger. *Enge*. A contracted passage. [a. 48.]—**Inferior** s. of the pelvis. Fr. *détoit inférieur du bassin*. The lower contracted portion of the pelvic canal; bounded in front by the lower extremity of the symphysis pubis, behind by the tip of the coccyx, and on each side by the lower border of the ischium.—**Superior** s. of the pelvis. Fr. *détoit supérieur du bassin*. The brim, or inlet, of the pelvis; its upper boundary of the true pelvis.

STRAIMOINE (Fr.), n. *Strā*^m*mwān*². See **STRAMONIUM**; of the Fr. Cod., see **DATURA stramonium**.—**Alcoolature** de s. See **Tinctura stramonii ex herba recente**.—**Cigarettes** de s. See **Cigarette stramonii**.—**Emplâtre d'extraît de s.** [Fr. Cod.]. A plaster consisting of 15 parts of extract of stramonium-seeds, 2 of purified elemi, and 4 of compound lead plaster. [B. 95 (a. 38).]—**Extraît de s. (feuille)**. See **Extractum stramonii—Huile** de s. See **Oleum stramonii**.—**Poudre** de s. Stramonium-leaves dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.]; or sifted through a 1,600-mesh sieve [Russ. Ph.] (leaving one quarter residue [Sved. Ph.]). [B. 95 (a. 38).]—**Sirap** de s. [Fr. Cod.]. A mixture of 3 parts of tincture of stramonium-leaves and 37 of syrup. [B. 95 (a. 38).] Cf. **Sirap de datura**. S. (semen). See **STRAMONIUM-seed**.—**Teinture** de s. See **Tinctura stramonii** (1st def.).

STRAMONIN, n. *Strā*^m*ō'n*²*pn*. Fr. *stramoine*. Ger. S. A substance obtained from *Datura stramonium*; occurring as small white crystals. [B. 270 (a. 38).]

STRAMONIUM (Lat.), n. n. *Strā*^m*(strām)*²*-on*²*is*^m*(u)m*. Fr. *stramoine*, *pomme épineuse* (3d def.). Ger. *Dornappel* (3d def.), *Stechapfel* (3d def.). 1. Of Tournefort, the genus *Datura*. 2. Of Baillon, a section of *Datura*. 3. The *Datura* s. (see *S-leaves* and *S-seed*). 4. Of the Aust. Ph., Hung. Ph., and Netherl. Ph. s-leaves. [a. 35.]—**Candle** s. Stramonium. Candles designed for the administration of s. by inhalation, made of 150 parts of pulverized s-leaves, 70 of potassium nitrate, and 8 of balsam of Peru. [B. 270.]—**Cigarette stramonii** [Belg. Ph.], **Cigarette stramonii**. Fr. *cigarettes de stramoine* [Fr. Cod.]. Cigarettes containing each 1 gramme of the leaves of s. [B. 95 (a. 38).]—**Cigarette stramonii composite**. Sp. *cigarros de estramonio compuesto* [Sp. Ph.]. Cigarettes containing each 1 gramme of the leaves of 3 grammes of the leaves of s. and 1 gramme each of the leaves of belladonna and *Tussilago farfara*. [B. 95 (a. 38).]—**Emplastrum stramonii** [Belg. Ph.]. A plaster consisting of 14 parts of Burgundy-pitch plaster, 2 of oil of s., and 4 of extract of s-leaves. [B. 95 (a. 38).]—**Extractum stramonii**. Fr. *extraît de stramoine*. Ger. *Stechapfelsamenextrakt*. An extract made from the seeds [U. S. Ph., Br. Ph., Dan. Ph., Ger. Ph., Swiss Ph. (1st ed.)], Belg. Ph., Dan. Ph., Ger. Ph., Swiss Ph. (1st ed.)], Russ. Ph., Netherl. Ph., Fr. Cod.]. [B. 95.]—**Extractum stramonii alcoholicum**. An alcoholic extract made from the dried leaves of s. [B. 119 (a. 38).]—**Extractum stramonii fluidum** [U. S. Ph.]. An extract made by treating 100 grammes of s.-seed in No. 40 powder with a mixture of 3 parts of alcohol and 1 part of water in a percolator till exhausted, reserving 90 c. evaporating the rest to a soft extract, mixing the two, and bringing up to 100 with the menstruum. [B. 95 (a. 38).]—**Extractum stramonii foliorum**. Extract of s-leaves. [B. 95.]—**Extractum stramonii seminis** (see *seminum*). Extract of s-seeds. [B. 95.]—**Extractum stramonii spirituosum** [Netherl. Ph.]. Alcoholic extract of s-leaves. [B. 95.]—**Folia stramonii**. See *S-leaves*.—**Fotus stramonii**. Sp. *fontenclat de stramoine*. A poultice made of 3 parts of boiling 35 parts of s-leaves in water enough to make 1,000 [Belg. Ph. (1st ed.)], or by treating 15 parts of s-leaves with 520 of water [Sp. Ph.]. [B. 95 (a. 38).]—**Herba stramonii**. See *S-leaves*.—**Infusum stramonii** [Russ. Ph.]. An infusion made by boiling 18 parts of s-leaves five minutes in water enough to make 3,000. [B. 95 (a. 38).]—**Oleum stramonii**. Fr. *huile de datura*. Sp. *aceite de estramonio* [Sp. Ph.]. A preparation made by boiling s-leaves with twice as much olive-oil until the moisture is dissipated, expressing, and filtering. [B. 95 (a. 38).]—**Oleum stramonii compositum**. Sp. *aceite de estramonio compuesto* [Sp. Ph.]. A preparation made by boiling 115 parts each of the leaves of hyoscyamus, tobacco, *Solanum nigrum*, and s., and 230 each of belladonna and poppy leaves, with 175 of olive-oil until the moisture is dissipated, expressing, adding 75 parts each of the flowering tops of wormwood, *Balsamita myriophylla*, hypericum, hyssop, lavender, sweet marjoram, cranesbill, mint, rosemary, rue, sage, and thyme, and of elder-flowers, digesting for four days, straining, expressing, and, when settled, filtering. [B. 95 (a. 38).] See also **BALSAMUM tranquillans**.—**Semen** (see *semina*) *stramonii*. See *S-seed*.—**S. fœtidum**. The *Datura* s. [a. 35.]—**S-leaves**. Lat. *stramonii folia* [U. S. Ph., Br. Ph.], *folia stramonii* [Ger. Ph.], *herba stramonii*. Fr. *feuilles de stramoine* [Fr. Cod.], *Stechapfelblätter*, *Stechapfelblätter*, *Dornappelblätter*. Thorn-apple leaves; the leaves of *Datura* s. [a. 35.]—**S-seed**. Lat. *stramonii semen* [U. S. Ph. (see *semina*) [Br. Ph.], *semen stramonii* [Ger. Ph.], *s. semina* [Hung. Ph. (1st def.)], Netherl. Ph.]. Fr. *semence (ou graines) de stramoine*, *stramoine* (semen) [Fr. Cod.]. Ger. *Tollkörner*, *Stechapfelsamen*, *Igelkolbensamen*, *Nagarsamen*. The seeds of *Datura* s. [a. 35.]—**S. spinosus**, *S. vulgare*, *S. stramonium*. The *Datura* s. [a. 35.]—**Tinctura seminis stramonii**. See **Tinctura stramonii** (2d def.).—**Tinctura stramonii**. Fr. *teinture de stramoine* [Fr. Cod.] (1st def.). Ger. *Stechapfelsamentinktur*. 1. A tincture made by macerating s-leaves with five times as much 60-per-cent. alcohol for three days [Belg. Ph.] (ten days [Fr. Cod.]). 2. Of the U. S. Ph., Br. Ph., Ger. Ph. (1st ed.), Dan. Ph., Swiss Ph., Hung. Ph. (1st ed.), and Sved. Ph. A tincture made from powdered s.-seed by digesting in a percolator with alcohol of sp. gr. 0.988 [U. S. Ph.] (0.920 [Br. Ph.]), or by macerating or digesting it for some days with from five to ten times as much dilute alcohol. [B. 95 (a. 38).]—**Tinctura stramonii**

ætherea. Fr. *teinture éthérée de datura*. A preparation made by treating s.-seed with four times as much ether for a week, and filtering. [B. 119 (a. 38).]—**Tinctura stramonii ex herba recente**. Fr. *alcoolature de stramoine*. A preparation made by macerating fresh s-leaves with an equal amount of 90-per-cent. alcohol for ten days [Fr. Cod.] (of 92-per-cent. alcohol for three days [Belg. Ph.]), expressing, and filtering. [B. 95 (a. 38).]—**Tinctura stramonii seminum**. See **Tinctura stramonii** (2d def.).—**Unguentum stramonii** [U. S. Ph.]. An ointment made by boiling 60 parts of s-leaves with 168 of lard till the moisture is consumed, expressing, and adding 2 parts of yellow wax for each 12 of the mixture. [B. 119 (a. 38).]—**Vinum stramonii**. A preparation made by treating s.-seed with 24 of Mulaga wine and 3 of alcohol for some days, and filtering. [B. 119 (a. 38).]

STRANG (Ger.), n. *Strā*ⁿ². A cord. [a. 17.]—**Burdach-scher S.** See **Cuneate FUNICULUS**.—**Follicularis** ränge. See **Lymphoid CORDS**.—**Goll'scher Keils**, **Goll'scher S.** See **COLUMN of Goll**.—**Grenzs**. See **Great ganglionic cord**.—**Harnstränge**. See **Superior false LIGAMENTS of the urinary bladder**.—**Hinterer Rückenmarks**, **Hinterer weisser S.**, **Hinters**. See **Posterior white COLUMN**.—**Hülsenstränge**. See **FUNICULI siliques**.—**Keils**. See **Cuneate FUNICULUS**.—**Knochen**. See **cartilaginous cord** (e. g., the notochord).—**Markstränge**. See **Lymphoid CORDS**.—**Medialer Keils**, **Medialer S.** See **Cuneate FUNICULUS**.—**Olivenkerns**. See **FASCICULUS nuclei olivæ**.—**Quintus** tränge. Of Meynert, groups of nerve-fibres which arise from the trigeminal nuclei and run downward through the medulla. [I (K).]—**Rückenmarkseitens**. See **Lateral COLUMN**.—**Rückenmarkstränge**. See **COLUMNS of the spinal cord**.—**Rücken**. See **Spinal cord**.—**Runder S.** See **Reservoir body**.—**Samens**. See **Spermatic cord**.—**Segmentalstränge**. See **Tubuliferous TISSUE**.—**Seitens**, **Seitlicher S.** See **Lateral COLUMN**.—**Vorderstränge**. See **Anterior COLUMNS of the spinal cord**.—**Zarter S.** See **COLUMN of Goll**.

STRANGALIS (Lat.), n. f. *Strā*ⁿ²*g*(*strā*ⁿ²*g*(*a*2)(*a*1))²*is*. Gr. στράγγαλις. An induration, especially in a woman's breast.

STRANGLES, n. *Strā*ⁿ²*g*'s. Ger. *Strängel*, *Strenge*. In the horse, a febrile disease generally attacking young animals and terminating in the formation of an abscess or abscesses in the areolar tissue of the submaxillary space. The symptoms of chocking give rise to this name. [a. 34.]—**Eastard**. An acute suppurative inflammation of the lymphatics of the submaxillary region and sometimes of the salivary glands, with a tendency to suppurative inflammation of the lymphatic system of other parts. [a. 34.]

STRANGULATE, adj. *Strā*ⁿ²*g*'u2²*at*. In botany, irregularly contracted and expanded. [a. 35.]

STRANGULATED, adj. *Strā*ⁿ²*g*'u2²*at*-e²*d*. Fr. *strangulé*. Ger. *stranguliert*. In a state of strangulation.

STRANGULATIO (Lat.), n. f. *Strā*ⁿ²*g*(*strā*ⁿ²*g*(*a*2)(*a*1))²*is*. (a) *shi*²(*t*2)²*o*. Ger. *-on*'is. See **STRANGULATION**.—**S. uteri**. An old term for hysteria. [A. 42.]

STRANGULATION, n. *Strā*ⁿ²*g*-u2²*a*'shu²*n*. Gr. στρυγμός (1st def.), *πνίξ* (2d def.). Lat. *strangulatio* (from *strangulare*, to choke), *strangulismus*. Fr. s., *étranglement*. Ger. s., *Erdrosselung*. 1. The act of choking; the state of being asphyxiated by choking. 2. A constriction; the state of being constricted, so as to endanger the life of the part shut off by the stricture. [E.]—**Internal** s. Interference with the normal functions of an organ or part by means of mechanical pressure, e. g., such as may be brought to bear in twists of the intestines and by twisting the pedicle of a tumor. [D. 47.]—**Intrasaccular** s. Fr. *étranglement intrasacculaire*. S. of a hernia by a constriction situated within the sac.

STRANGURIA (Lat.), n. f. *Strā*ⁿ²*g*(*strā*ⁿ²*g*(*a*2)(*a*1))²*is*. See **STRANGURY**.—**S. cruenta**. See **CYSTORRHEA**.

STRANGURY, n. *Strā*ⁿ²*g*'u2²*is*. Gr. στράγγουρία (from στράγγε, a drop, and ούρον, urine). Lat. *stranguria*. Fr. *strangurie*. Ger. *Harnbeschwerde*, *Harnzwang*, *Strangurie*. Urination by painful, spasmodic effort. [a. 48.]

STRAPPER, n. *Strā*ⁿ²*g*'u2²*is*. An apparatus for binding up a part by means of strips of flexible material. [a. 48.]—**Milano's ready** s. A suspensory bandage of webbing fitted with tapes for drawing it tightly around the scrotum. [E.]

STRAPPING, n. *Strā*ⁿ²*g*'u2²*is*. 1. The process of applying straps; specifically, that of subjecting a part to compression or giving it support by the methodical application of strips of adhesive plaster. 2. Strips of adhesive plaster, also any material for use as straps.

STRATHPEFFER, n. *Strā*ⁿ²*h*-pe²*f*'u2²*is*. A place in Ross-shire, Scotland, where there is a chalybeate and sulphurous spring. [L. 49, 57 (a. 14).]

STRATIFICATION, n. *Strā*ⁿ²*t*-f2²*a*'ka'shu²*n*. From *stratum*, a layer, and *facere*, to make. The condition of being stratified; the arrangement of the elements of a body in layers. [a. 35.]

STRATOTES (Lat.), n. m. *Strā*ⁿ²*t*u2²*a*'t2²*is*. Gen. *-ot2²*. Gr. στρατοτης. Fr. *stratote*. Ger. *Wasserfeder*, *Wasserheer*, *Krebsheer*. Water-soldier; a genus of the *Stratiotea*, or *Stratiotidae* (a tribe of the *Hydrocharideae*). [a. 35.]—**S. aloides**. Fr. s. *à feuilles d'aloë*. Water-houseleek (or -aloe, or -soldier, or -sengreen), knight's pondwort, soldiers' yarrow, wading pondweed; used by the ancients in erysipelas and as a vulnerary. The leaves are emollient and refrigerant, and in India are applied to hemorrhoids. [a. 35.]

STRATUM (Lat.), n. n. *Strat*(*strā*ⁿ²*t*)²*is*(*u*²*m*). From *sternere*, to spread out. Fr. *strate*, *couches*. Ger. s. *Schicht*. See **LAYER** (1st def.).—**External molecular** s. A thin layer of fibrilla, with intervening granular matter, connected with the lateral branches of Müller's fibres. [L. 31, 332, 352.]—**Flesh**-s. See **Porietal MESOBLAST**.—**Granular** s. See *S. granulatum*.—**Intermediate** s. of

the blastoderm. See MESOBLAST (1st def.).—**Interolivary s.** Of Spitzka, a tract of fibres which extends between the interolivary olivary body, the raphe, and the pyramidal tract; surmised by him to be continuous with the columns of Goll and Burdach in the spinal cord. [*"Med. Record,"* Oct. 18, 1884, p. 421 (K.).]—**Kernels' (Ger.)**. See *S. granulosum*.—**Ligamenti sacrococcygei postici longi s. profundum** [Barkow]. See LIGAMENTUM SACROCOCYGEUM POSTICUM.—**Ligamentum sacrococcygei postici longi s. superficialis**. See LIGAMENTUM SACROCOCYGEUM POSTICUM SUPERFICIALE.—**Ligneous s.** Lat., *s. ligneum*. Fr., *couche ligneuse*. One of the layers (observed on cross-section) of the trunk of a tree as annual rings) forming the woody, solid portion of a dicotyledonous plant. [a. 35.]—**Medullary s.** Lat., *s. medullare*. Ger., *Markschicht*. In the stratified thallus of lichens, a colorless layer developed upon the hypothallus. It consists sometimes of simple or branched filaments, sometimes of molecular granulations intermixed with crystals of lime, and sometimes of variously shaped tissues containing gonidia. [a. 35.]—**Mucous s.** See HYPOBLAST (1st def.). **LAMELLA mucosa**, and **RETE mucosum**.—**Serous s.** See EPIPLAST.—**S. adiposum**. A layer of subcutaneous tissue containing fat. [L. 351.]—**S. arymembranousum**. See THYREO-ARTENOIDEUS superior medialis.—**S. arysyndesmicum**. See SYNDESMO-ARTENOIDEUS.—**S. bacillatum retinæ**. See BACILLARY LAYER OF THE RETINA.—**S. bacillorum**. See BACILLARY LAYER.—**S. basale**. See under *S. corneum* (epidermidis).—**S. Bowmani**. See Bowman's LAYER.—**S. cellularum pyramidalium**. 1. See CLAUSTRAL FORMATION. 2. The fifth (according to some, the sixth) layer of the hippocampus major, made up of pyramidal ganglion cells. [L. 332.]—**S. cellulolum (placentæ)**. The cellular layer of the maternal placenta, as distinguished from the s. spongiosum.—**S. cellulolum of the cochlea**. The cellular layer found in the spiral canal of the cochlea, which brings about the connection of the nerve-bundles entering the cochlea with those in the lamina spiralis. [F. 32.]—**Strata cerebelli primaria**. The principal laminae, or folia, of the cerebellum. [L. 3 (K.).]—**Strata cerebelli secundaria** (Gordon). The secondary laminae of the cerebellum. [L. 3 (K.).]—**Cerebelli tertiaria** (Gordon). One of the smallest subdivisions of the cerebellar laminae. [L. 3 (K.).]—**S. choriocapillare**. See CHORIOCAPILLARIS.—**S. ciliare**. The portion of the orbicularis palpebrarum that is situated along the margin of the lid. [L. 332.]—**S. cinereum**. The second layer of gray matter in the anterior corpora quadrigemina, sometimes described as the nucleus. It is composed largely of neuroglia, containing numbers of small ganglion cells. [L. 17 (K.).]—**S. complexum et profundum pontis**. Of Edinger, those fibres from the pes that dip in between the fibres of the crusts. [a. 34.]—**S. complexum pontis**. See *S. superficialis pontis*.—**S. conjunctivum extra peritoneum**. The continuation of the peritoneum in the region of the uterus. [L. 115 (a. 50).]—**S. convolutum**. An important layer of large pyramidal cells seen in a section through the hippocampus major. It is prolonged into the pes hippocampi, its free border forming the point of the nucleus. [L. 1 (K.).]—**S. corneum** (epidermidis). Fr., *couche cornée* (ou *cornée*). Ger., *eigentliche Epidermis*, *Hornschicht*. The true epidermis; the corneous or most superficial layer of the epidermis, consisting of transparent flattened cells, closely packed together and devoid both of nuclei and of granules. Unna divided the s. corneum into four layers, according to their different color reactions under perosmic acid, etc. They are the (1) superficial (Ger., *Entschicht*), (2) middle, (3) superficial basement (s. *superbasale*), and (4) subbasal (s. *basale*) layers. The fourth, the s. lucidum of Oehl, is subdivided into two layers, the first of which is the thicker and denser. [G.]—**S. corticale**. 1. See Cerebral cortex. 2. Any one of the layers of the bark of plants. 3. In a stratified thallus, a layer of pseudo-parenchyma forming the upper surface in crustaceous lichens, the upper and lower surfaces in some foliaceous lichens, or the entire external surface in filamentose and fruticulose lichens. [a. 35.]—**S. cutaneum**. The external dermic layer of the membrana tympani. [L.]—**S. cylindricum**. Ger., *Cylindrellenschicht*. The layer of columnar cells in the rete mucosum next the corium. [J.]—**S. cylindrorium**. See BACILLARY LAYER OF THE RETINA.—**S. dentatum**. See *S. spinosum*.—**S. epithrichiale** [Kerbert]. The special outer or ectal layer of the embryonic epidermis in vertebrates; a kind of envelope inclosing the whole body, and not supposed to take part in the formation of appendages, except, perhaps, feathers. In some animals it is composed of from two to five layers of cells; typically, however, it is supposed to consist of a single layer of very large polygonal cells. In birds and mammals it is shed before or after birth, and is never renewed. In animals which molt it is renewed after birth and is present throughout life. [J. 23; Kerbert, "Arch. f. mikr. Anat.," Bd. xiii, p. 205; Jeffries, "Proc. of the Bost. Soc. of Nat. Hist.," xxii, p. 203; Minot, "Proc. of the Am. Assoc. for the Adv. of Sci.," xxxv, 1885 (J.).]—**S. externum orbicularis oris**. The subcutaneous portion of the orbicularis oris. [L.]—**S. externum oculi Graefianum**. See TARCIA folliculi.—**S. fibrilloseum**. Ger., *Nervenfaserschicht*, *Opticusfaserschicht*. The innermost s. of the retina, made up of fibres of the optic nerve consisting of axis-cylinders only. [L.]—**S. gangliosum (retinæ)**. A layer of multipolar, nucleated ganglion cells external to the expansion of the optic nerve. [L. 31, 142, 332.]—**S. gelatinosum**. The fourth layer in the olfactory bulb, consisting of large ganglion-cells with branching processes. [L. 17 (K.).]—**S. germinativum**. See Germinal spot.—**S. globulosum retinæ**. See *S. gangliosum*.—**S. glomerulosum**. Fr., *zone de papilles*. Ger., *Knäuelschicht*. The second layer of the olfactory bulb, consisting from the ventral side. It is between the s. olfactorium and the s. gelatinosum, and is characterized by the olfactory glomeruli (see GLOMERULUS olfactorius). [J. 10, 30, 35.]—**S. gonimicum**. Ger., *Brutschicht*. In lichens, a greenish s. situated immediately beneath the cortical s. and consisting of gonidial granules (gonimia). [a. 35.]—**S. granulosum**. Fr., *couche rouillée*. Ger., *Körnerschicht*, *Zellenschicht*, *Zellenzone*, *Kernels'*, *rostfarbene*

Schicht. A layer of very small cells or of cells containing many granules, such as (1) the layer of minute cells in the cerebellum between the cells of Purkinje and the medullary substance; (2) a layer of minute ganglion-cells imbedded in a mass of medullated nerve-fibres, found in the olfactory lobe between the medullary ring and the s. gelatinosum; (3) the s. of small cells in the cerebral cortex between the formation of the cornu Ammonis and the claustral formation; (4) the s. granulosum epidermidis. [J. 10, 31, 35.]—**S. granulosum epidermidis**. Ger., *Körnerzellenschicht*. A layer of lozenge-shaped or trapezoid-shaped cells containing numerous coarse roundish granules of eleidin that strongly refract light and render the epidermis more or less opaque. It covers the rete mucosum, and is itself covered by the s. lucidum. [J.]—**S. granulosum (retinæ) externum**. Ger., *äussere Körnerschicht*, *Schicht der Nervenaustritte*. A layer of several strata of oval nuclei contained in a reticulated matrix immediately internal to the membrana limitans externa, which have processes connected with a retinal rod or cone. [L. 31, 332, 351.]—**S. granulosum (retinæ) internum**. See INTERNAL GRANULE LAYER.—**S. horizontale**. That portion of the arciform fibres which covers the surface of the anterior pyramids immediately adjacent to the anterior median fissure. [L. 6 (K.).]—**S. horizontale superioris**. See *S. musculare superius urethrae*.—**S. inferius constrictoris urethrae**. See Guthrie's MUSCLE.—**S. intermedium**. Ger., *Zwischenschicht* (1st def.). 1. Of Meynert, a band of nerve-fibres in the substantia nigra. [L. 17 (K.).] 2. The mesoderm. 3. See *S. lucidum*.—**S. infermedium peduncul.** See *S. infermedium* (1st def.).—**S. intermedium thalami**. One of the subdivisions of the subthalamic regions. [L.]—**S. internum circulare**. See *S. musculare circulare urethrae*.—**S. internum orbicularis oris**. The deep portion of the orbicularis oris. [L.]—**S. laciniosum**, **S. lacunosum** [Meynert]. A layer of loose nerve-fibres and lymph-spaces seen in a section made through the hippocampus major, continuous with the s. radiatum. [L. 28 (K.).]—**S. lemnisci (tegmen)**. See INFERIOR LEMNISCUS.—**S. lignum**. See *Lignum*.—**S. lucidum**. Of Oehl, a translucent layer of the epidermis, consisting of from four to six layers of clear transparent cells, with indefinite outlines and traces of a nucleus. It forms the deeper portion of the s. corneum proper, and separates it from the s. granulosum. [G.; J. 30, 31, 32.]—**S. malpighianum**, **S. Malpighii**. See RETE mucosum.—**S. marginale** [Meynert]. A thin medullary lamina of nerve-substance on the upper free surface of the fascia dentata. [L. 17 (K.).]—**S. medianum** [Landolt]. A layer of transverse nerve fibres passing horizontally through the spinal cord, connecting the anterior and posterior extremities of the arciform fibres. [L. 6 (K.).]—**S. medianum horizontale**. See *S. horizontale*.—**S. medianum horizontale pontis Varolii**. The raphe of the pons Varolii. [L.]—**S. medium cutis**. See CORIUM (1st def.).—**S. medullare**. See Medullary s., *S. fibrosum*, and *S. olfactorium*.—**S. medullare medium**. See *S. lacunosum*.—**S. moleculare**. Ger., *zellenfreier Rindensaum* (3d def.). 1. Any layer appearing to be composed of minute granules without definite structure. 2. A thin layer of finely reticulated neuroglia, devoid of nerve-cells, between the s. lacunosum and the superficial medullary lamina in the hippocampus major. [J. 10, 35.] 3. The second layer of the cerebral cortex, consisting mainly of neuroglia and fine nerve-fibres, with but few ganglion-cells. [L. 17 (K.).]—**S. mortification** [Wendt]. The outermost layer of epidermis, consisting of the flat, dead epithelia. [L. 31.]—**S. mucosum (epidermidis)**. See RETE mucosum.—**S. musculare circulare urethrae**. Muscular fibres beneath the constrictor urethrae, surrounding the membranous portion of the urethra. [L. 142, 332.]—**S. musculare lingue longitudinale**. See LINGUALIS inferior.—**S. musculare lingue perpendiculare**. Vertical muscular fibres in the tongue. [L. 332.]—**S. musculare lingue transversum**. See TRANSVERSUS lingue.—**S. musculare transversum urethrae inferius**. See TRANSVERSUS perinaei profundum.—**S. musculare urethrae (sen transversum) superius**. Muscular fibres embracing the proximal extremity of the s. musculare circulare urethrae. [L. 332.]—**S. nigrum**. See LOCUS niger.—**S. of Oehl**. See *S. lucidum*.—**S. of Remak**. A narrow layer of medullated nerve-fibres just beneath the first layer of the cortex cerebri. [J. 1 (K.).]—**S. of visual cells**. A retinal layer, subdivided into the bacillary layer, the membrana limitans externa, and the internal granule layer. [L. 31.]—**S. olfactorium**. Ger., *Nervenfaserschicht*. The ventral layer of the olfactory bulb, consisting of olfactory nerve-fibres. [L. 332.]—**S. opticum**. The third layer of fine nerve-fibres in the corpora quadrigemina. [L. 17 (K.).]—**S. orbitale**. See ORBICULARIS oculi, *pars orbitalis*.—**S. oriens**. Scattered fusiform cells that are representations of the cells of the fifth layer of the cerebral cortex, forming, according to Obersteiner, the sixth layer of the cornu Ammonis. [a. 34.]—**S. palpebrale**. See ORBICULARIS oculi, *pars palpebralis*.—**S. profundum pontis**. Deep transverse fibres of the pons Varolii. [L.]—**S. proligerum**. Fr., *couche prolifère*. 1. The discus proligerus, including the cumulus proligerus. [A. 45.] 2. See MEMBRANA granulosa.—**S. radiatum**. Of Kupfer, one of the deep layers of the hippocampus major, consisting of radiating nerve-fibres. [L. 28 (K.).]—**S. reticulare**. See RETICULAR FORMATION.—**S. reticulare cutis**. See CORIUM (1st def.) and cf. RETICULAR LAYER OF THE CORIUM.—**S. reticulatum**. See RETICULAR FORMATION.—**S. semilunare (cochleæ)**. See LIGAMENTUM spirale.—**S. spinosum**. Ger., *Stachelschicht*. A layer of prickle-cells. [J.]—**S. spinosum epidermidis**. The rete mucosum, especially the portion of it made up of prickle cells. [L.]—**S. stratum (placentæ)**. The spongy layer of the maternal placenta.—**S. striatum**. A layer of nerve-fibres forming the inner lamina of the hippocampal gyrus. [J. 6 (K.).]—**S. subpapillare**. See *S. vasculosum cutis*.—**S. subthalamicum**. See SUBTHALAMIC REGION.—**S. superbasale**. See under *S. corneum*.—**S. superficiale pontis**. Ger., *oberflächliche Brückenfasern*. Transverse bundles of fibres upon the ventral surface of the pons Varolii. [L.]—**S. superius constrictoris urethrae**. See

S. musculare superius urethrae.—*S. supravasculare*. See *S. uteri supravasculare*.—*S. thyreo-ary-epiglotticum*. See *DEPRESSOR epiglottidis*.—*S. thyroembrausium*. See *THYREO-EPICLORICUS*.—*S. transvasale*. *S. transversum*. See *Arcoform fibres*.—*S. transversum urethrae*. See *S. musculare superius urethrae*.—*S. uteri infravasculare*. The portion of the inner muscular layer of the uterus internal to the *s. vasculare*. [L. 332.]—*S. uteri submucosum*. The portion of the inner muscular layer of the uterus immediately beneath the mucous membrane. [L. 332.]—*S. uteri subserosum*. The outer muscular layer of the uterus. [L. 332.]—*S. uteri supravasculare*. The portion of the inner muscular layer of the uterus consisting principally of longitudinal fibres. [L. 332.]—*S. (uteri) vasculare*. The middle portion of the inner muscular layer of the uterus, made of interlacing fibres and blood-vessels. [L. 332.]—*S. vasculosonervum*. See *S. fibriliosum*.—*S. vasculosum*. See *TENICA vasculosa*.—*S. vasculosum cutis*. That portion of the corium just beneath the papillae, occupied by a network of blood-vessels which run parallel to the surface and from which vascular loops are distributed to the papillae. [G.]—*S. zonale*. Ger. *Gürtelschicht* (2d def.). 1. Of Arnold, the layer formed by the annular arrangement of the arciform fibres around each half of the spinal cord. 2. A layer of reticular substance in the subthalamie tegmental region; it consists of bundles of white fibres which extend from the crura. [L.]—*S. zonale corporis quadrigenum*. A thin layer of white nervous tissue upon the outer surface of the corpus quadrigenum. [L. 332.]—*S. zonale corporis striati*. A thin layer of intercrossing nerve-fibres and bundles on the free surface of the striatum and callosum. [J. 67.]—*S. zonale thalamie*. See *S. zonale* (2d def.).—*Vascular s.* See *FISCAL MESOBLAST*.

STRAUCH (Ger.), n. *Stra*'u'ch². See *SERRA*.

STRAUSS (Ger.), n. *Stra*'u's. See *THYRE* and *STRUTHIO camelus*.

STRAVADIUM (Lat.), n. n. *Stra*'(stra³-vadi-wa³rd)ⁱ2-u'm-(u'm). Fr., *stravadié*. The genus *Barringtonia*. [A. 35.]

STRAWBERRY, n. *Stra*'be'r-i². The genus *Fragaria*, especially the *Fragaria vesca*; also the fruit of that and other species. [A. 35.]

STREAK, n. *Stre*k. Lat., *stria*. Fr., *strie*, *ligne*. Ger., *Streif*, *Streifen*, *Rinne*. A line or stripe. [A. 48.]—*Abdominal s.* See under *LINEAR ATROPHY of the skin*.—*Germinal s.* See *Primitive s.*—*Medullary s.* See *Medullary groove*.—*Primitive s.* Lat., *nota primitiva*. Fr., *ligne primitive* (on *axiale*). Ger., *Primordialstrief*, *Primordialstriefen*, *Azenstriefen* [His. Syn.: *axial plate*, *primitive trace*. In embryology, a temporary structure consisting of a sickle-shaped opacity (which becomes a strap-like thickening) of the germinal disc of the blastoderm, starting from that side of the disc which afterward becomes the narrow end, and gradually extending to or beyond the centre of the transparent area; a linear or strap-like mass of cells formed by direct proliferation from the lower (inner) cells of the epiblast, constituting the origin of the mesoblast. It is the first indication of the lineaments of the future embryo. Supposed by some writers to be the vestige of a blastopore. [A. 5.]—*Purkinje's elliptical light-s.* An appearance seen by Purkinje while looking at a glowing sponge in darkness. When the image of the sponge lay on the inner side of the point of fixation, there appeared two horus running transversely outward from the margin of the epiblast, imbricate, with the convexities upward and downward, so as to inclose an ellipse between the object and the entrance of the optic nerve. [Graefe u. Saemisch (Fr.).]

STREAMING, n. *Strem*'i'2n². The passage to and fro of currents in protoplasm. [L. 121.]

STREAMLESS, adj. *Strem*'le's. Ger., *stromlos*. Devoid of electrical currents (said of fresh, intact muscles, which do not manifest the active phenomena of dying muscles). [Landois (K.).] Cf. *Difference theory*.

STREBEN (Ger.), n. *Strab*'e'n. See *NISUS*.

STREBLOSIS (Lat.), n. f. *Stre*'b-lo's-i's. Gen., *los'eos* (-is). Gr., *στρεβλωσις* (from *στρεβλός*, twisted). See *DISLOCATION*.

STREBLUS (Lat.), n. m. *Stre*'b-lu's-i'u's. From *στρεβλός*, twisted. Fr., *strebilus*. A genus of the *Urticaceæ*. The *Strebles* are a tribe of the *Moroideæ*. [A. 35.]—*S. asper*. Ger., *Schweifheere*. A tropical Asiatic tree or shrub. The root is used in epilepsy and inflammatory swellings, and is applied to boils and, in fevers, to the whole body. The juice is astringent and antiseptic. [A. 35.]

STRECKBETT (Ger.), n. *Stre*'k-be't. An extension-bed. [A. 48.]

STRECKBEWEGUNG (Ger.), n. *Stre*'k-be'2-vag-un². Extension. [L.]

STRECKER (Ger.), n. *Stre*'k-e'r. See *EXTENSOR*.—*Aeusserer S. des Vorarmes*. See *HUMERO-OLECRANUS externus*.—*Aeusserer Unterschenkel's*. See *VASTUS externus*.—*Daumens'*. An extensor muscle of the thumb. [L.]—*Dicker S. des Vorarmes*. See *SCAPULO-OLECRANUS minor*.—*Eigener S. des kleinen Fingers*. See *EXTENSOR digiti minimi proprius*.—*Eigener S. des Zeigefingers*. See *TRIICEPS EXTENSOR cubiti*.—*S. des Fesselbeins*. See *CUBITO-PRÆPHALANGIUS*.—*S. des Fesselkron- und Huftbeins*. See *EPICONDYLO-PRÆPHALANGIUS*.—*S. des Knie's*. See *EXTENSOR metacarpi obliquus*.—*S. des Kopfs*. See *DORSO-MASTOIDEUS*.—*S. des Schienbeins*. See *EXTENSOR metacarpi magnus*.—*S. des Vorderfussmuskels*. See *EXTENSOR metacarpi obliquus*.—*S. des Zeigefingers*. See *EXTENSOR indicis*.—*Tiefer Unterschenkel's*. See *VASTUS medius*.—*Vierköpfiger Schenkels' (oder Unterschenkels')*. See *EXTENSOR cruris quadriceps*.—*Vorderarms'*. See *TRIICEPS EXTENSOR cubiti*.—*Vorderer S. des Fesselkron- und Huftbeins*. See *FEMORO-PRÆPHALANGIUS*.—*Zweibäuchiger Sprunggelenks'*. See *BIFEMORO-CALCANEUS*.

STRECKFLÄCHE (Ger.), n. *Stre*'k-flach²-e². The surface of the tibia from which the extensor muscles arise. [L.]

STRECKMUSKEL (Ger.), n. *Stre*'k-musk-el. See *EXTENSOR*.—*Gemeinschaftlicher langer S. der Fusszehe*. See *EXTENSOR digitorum pedis longus*.—*Kleiner S. des Vorderarms*. See *ANCONÆUS* (3d def.).—*Kurzer gemeinschaftlicher S.* See *EXTENSOR digitorum pedis brevis*.—*S. der Zehe*. See *EXTENSOR digitorum pedis*.—*S. des Fusses*. See *EXTENSOR pedis*; of Theile and Henle, see *GASTROCNEMIUS*.

STRECKUNG (Ger.), n. *Stre*'k-u'2n². Extension. [L.]

STREICHEN (Ger.), n. *Strich*'e'n. Stroking or friction movements in massage. [L. 57 (A. 14).]

STREIF (Ger.), n. *Strif*. See *STREIFEN*.

STREIFEN (Ger.), n. *Strif*'e'n. A stripe, streak, or stria. [A. 521.]—*Baillarger'sche S.* The gray lamina, separated by layers of white nerve-substance, into which the cerebral cortex is divisible; best seen in a vertical section of the superior frontal convolution. [L. 17 (K.).] Cf. *Picq d'Azpy'sche S.*—*Hürfels'*. See *ZONE*.—*Grehen's*. See *STRIZIA semicircularis*. 2. As a pl. see *CORPUS fimbriatum*.—*Horns'*. See *TENIA semicircularis* and *LAMINA cornea* (1st def.).—*Hörs'*. See *ACOUSTIC STRIZIA*.—*Knorpels'*. A streak of cartilage. [L.]—*Lancisi'scher S.* See *STRIZIA longitudinalis mediales*.—*Marks'*. See the major list.—*Mediäner Sehnens'*. See *LINEA alba* (1st def.).—*Primitivs'*. See *PRIMITIVE STREAK*.—*Riechs'*. See *STRIZIA olfactoria*.—*Schwanzschwertschafts'*. See *STRIZIA graciliorum*.—*Vieu d'Azpy'sche S.* The white lamina in the cerebral cortex which separate the layers of gray matter. [L. 1 (K.).] Cf. *Baillarger'sche S.*—*Weisslicher S. des Schlundkopfes*. See *RHAPHÉ of the pharynx*.

STREIFENHÜGEL (Ger.), n. *Strif*'e'n-hu'g-el. See *CORPUS striatum*.—*S. Brückenbahn, S. Brückensystem*. The system of nerve-fibres connecting the pons Varolii and the corpora striata. [L. 27 (K.).]—*S'kopf*. See *CAPUT corporis striati*.

STREIFFARN (Ger.), n. *Strif*'fa'rn. See *ASPENIUM*.

STREIFFIG (Ger.), adj. *Strif*'i'g. See *STRIZIATE*.

STREIFKRAUTWURZEL (Ger.), n. *Strif*'kra³-u't²-wur²-e²l. The root of *Rumex crispus*, *Rumex obtusifolius*, and related species. [A. 35.]

STREIFSCHUSS (Ger.), n. *Strif*'shus. A grazing gunshot wound. [A. 521 (A. 48).]—*Lufts'*. A contusion ascribed to the wind of a shot. [E.]

STREIFWURZ (Ger.), n. *Strif*'wurts. The *Rumex crispus*.

STREMMIA (Lat.), n. p. *Str*'e'm'i'a³. Gen., *strem*'m'atos (-atis). Gr., *στρέμμα* (from *στρέφειν*, to twist). See *SFRAIN*.

STRENGEL (Ger.), n. *Stre*'n²-e'l. See *STRANGLER*.

STRENGFLÜSSIG (Ger.), n. *Stre*'n²-flu's-si'g. See *REFRACTORY*.

STRÉPHENDOPODIE (Fr.), n. *Stra*-fa'n²-do-po-de. From *στρέφειν*, to turn, *ἐνδω*, inward, and *πους*, the foot. Of Duval, varus.

STRÉPHODIPLOIE (Fr.), n. *Stra*-fo-po-de. Of Duval, any lateral deviation of the foot constituting a deformity. [Rev. de Chir., June, 1882, p. 443.]

STREPHOTOME, n. *Stre*'fo-to-m. From *στρέφειν*, to turn, and *τόμος*, to cut. An instrument resembling a corkscrew. The spiral shaft is flattened, and has an eye near its point. The handle may be detached. It is used for maintaining invagination of the sac of an inguinal hernia, and at the same time approximating the tendinous structures which it transfixes in its screw-like passage, for the cure of the hernia. [W. D. Spanton, "Ann. of Anat. and Surg.," Oct., 1882, p. 155.]

STREPITOSUS (Lat.), adj. *Stre*'p-i'to-us²-(u's). Noisy, strident. See *ANGINA strepitosa*.

STREPITUS (Lat.), n. m. *Stre*'p-i't²-u's²-(u's). Gen., *strep*'i'tus. From *strepere*, to make a noise. A noise, a sound. [L. 50 (A. 14).]—*S. aurium*. See *TRINITUS aurium*.—*S. coriaceus*. A sound like the creaking of leather heard on auscultation. [A. 319 (A. 34).]—*S. uterinus*. See *UTERINE SOTTLE*.

STREPISIS (Lat.), n. f. Streps^{ps}/is. Gen., streps^{ps}/eos (-is). Gr., strepsis. See TORSION.

STREPTOCOCCUS (Lat.), n. m. Strept^{pt}-o(-o)^o/k(-ku)s(ku)s. From *streptos*, twisted, and *κόκκος*, a kernel. Fr., streptococque. Ger., S. Of Bilroth, a micrococcus forming with other micrococci chaplet-like chains. In Saccardo's system, it is distinguished as a genus from *Micrococcus*, not only by the moniliform threads, but especially by the presence of arthrospores instead of endospores. [B, 238, 316 (a, 35).]—**Bonomi's** s. A s. obtained from the exudations of the cerebro-spinal meninges and from hemorrhagic extravasations in the lungs in cases of epidemic cerebro-spinal meningitis. It does not grow upon blood-serum or readily upon any artificial culture medium, and soon loses its pathogenic power when cultivated through a few successive generations. [a, 35.]—**S. acidilactici**. Of Grotenfeld, a spherical or oval coccus, from 0.5 to 1 μ long and $\frac{1}{2}$ to $\frac{3}{4}$ of a μ thick; a non-liquefying s. forming spherical white colonies on gelatin plates. It is found in coagulated milk in Finland. [a, 34.]—**S. aethiopes**. A species occurring in human urine. The spheres are 1.25 to 2 μ in diameter, and form chains composed of from 3 to 10 cocci. It liquefies gelatin, and gelatin plates, after two days, small white points appear, which somewhat slowly become disc-shaped and of a dark-gray color. [a, 35.]—**S. albus**. Of Maschke, an aerobic liquefying s. growing in flat circular colonies; found in Freiburg water. [a, 34.]—**S. alvearis**. See *Cryptococcus alveus*.—**S. ambratus**. A species found in the exudations of the lungs, pus from the nose, and other secretions of sucking calves infected with a form of pneumonia (*pneumonia vitulorum lactantium*). It consists of more or less elongated filaments composed of colorless, spherical cocci 1 μ in diameter. In gelatin cultures it forms club-shaped colonies. Its inoculations are innocuous to rabbits and guinea-pigs, but reproduce the pneumonia in calves. [a, 35.]—**S. aphtholica**. A species occurring among the epidemic cells and blood-globules and in the milk of domestic animals with the foot-and-mouth disease (formerly supposed to be caused by *Saccharomyces albidus*). The filaments are composed of pale, globular cocci 2 μ in diameter. [a, 35.]—**S. articularum**. Ger., S. *bei Diphtherie*. The micrococcus of diphtheria; a species composed of spherical cocci from 0.3 to 1 μ in diameter, arranged in chains, often very long, containing each 100 or more cocci. It occurs on and in the diseased mucous membrane in various forms of diphtheria, but, according to its discoverer, Loeffler, is an accidental accompaniment, and not the cause of the disease, although it may produce local or general complications. On gelatin plates, which it does not liquefy, it forms small, light-grayish, hyaline colonies, with small oval lines (chains of cocci) at the center. It is pathogenic to mice, proving fatal in more than one half of the cases in which subcutaneous inoculations or injections of the cultivations are made. If the cultivations are injected into the veins of rabbits, suppuration of the joints is produced in from four to six days, and in the majority of cases death gradually ensues. Guinea-pigs are not affected. [a, 35.]—**S. bombycis**. An organism consisting of oval cocci having a maximum length of 1.5 μ , single or united in straight or curved chains of from 2 to 8, found in great numbers in the juices of the stomach and intestines of silkworms having an infectious disease in which the larva after death becomes soft and finally filled with gases and a blackish-brown putrid fluid. It is not positively ascertained that this s. is the exciting agent of the malady, as other bacteria accompany it. [a, 35.]—**S. brevis**. Of von Lingelsheim, an aerobic and facultative anaerobic, non-liquefying s. growing more rapidly in the usual culture media than *S. pyogenes*. It occurs solitary, in pairs, or in short chains. At the end of twenty-four hours it forms punctiform colonies on gelatin plates; in gelatin stick cultures after three or four days a funnel-like cavity forms near the surface, that finally extends downward for a distance of 4 to 5 mm. It is obtained from normal human saliva. [a, 34.]—**S. cadaveris**. Of Sternberg, an aerobic and facultative anaerobic, non-liquefying s. growing in a decidedly acid medium at ordinary temperatures. It occurs in short chains and has a diameter of 0.5 μ . It was found in the liver of a person that had died of yellow fever. [a, 34.]—**S. Charin**. Fr., *microbe de la septicémie consécutive au charbon*. A species found by Charin in the blood of all the viscera, in the urine, and in the feces of rabbits which had died of anthrax. The filaments are composed of spherical or oval hyaline cocci (as many as 20 in some of the chains). Subcutaneous inoculations kill rabbits in from 18 to 48 hours, producing oedema at the point of injection and great swelling of the spleen. Sparrows and sometimes cats are also affected; dogs and fowls are not. [a, 35.]—**S. cinnabareus**. A species consisting of short chains of spherical cocci, often found on old cultivations. The colonies grow very slowly, forming in about eight days on gelatin, without liquefying it, a knob-like elevation of a cinnabar color. [a, 35.]—**S. coli gracilis**. See *S. gracilis*.—**S. conglomeratus**. A s. occurring in masses made up of chains of cocci and forming firm white scales at the bottom of the tube of a bouillon culture. It is very pathogenic for mice. It is obtained from scarlet-fever patients. [a, 34.]—**S. coronatus**. A species obtained from cultures of air at Göttingen, Germany. The cocci are spherical, about 1 μ in diameter, and united in short chains or sometimes in zoogloea. In gelatin, which it liquefies, this s. forms after two days whitish-yellow points surrounded by a depressed zone. [a, 35.]—**S. Corydæ contagiosæ equorum**. See *SCHRETTZIA equi*.—**S. dysiens**. A s. observed in cultures at Göttingen, Germany, occurring as very small, spherical cocci united in short chains. After two days the colonies are punctiform and whitish-yellow; they somewhat slowly become disc-shaped, ovate, with one margin often sinuous, and granular superficially. It liquefies gelatin at first, and eventually liquefies it. [a, 35.]—**S. diptheriticeus**. See *S. articularum*.—**S. endocarditidis**. One of the micro-organisms found in ulcerative endocarditis and other diseased states of the heart. It occurs as spherical cocci, 0.5 to 1 μ in diameter, arranged in chains often accumulated compactly in large heaps. [a, 35.] Cf. *BACILLI of endocarditis*.—**S. equi**. See

SCHRETTZIA equi.—**S. erysipelatis**, *S. erysipelatos*. The exciting agent of erysipelas, which occurs as very minute cocci, 0.3 to 0.4 μ in diameter, hardly distinguished from *S. pyogenes*, except that in stroke cultivations the colonies are more opaque and whitish and show at the periphery numerous projecting chains which give to the cultivation a dendritic appearance. The organism occurs, however, only in erysipelas, while *S. pyogenes* is present in about half of all forms of suppuration. Inoculations of pure cultivations in man and animals produce erysipelas without suppuration; such inoculations have been made with good therapeutic results on patients suffering from malignant tumors, which have improved or entirely disappeared after recovery from the induced attack of erysipelas. [a, 35.]—**S. fermenti**. A species consisting of spherical cocci, 0.2 μ in diameter, arranged chiefly in the form of chains, found in wine and various other saccharine liquids, which it converts into a thick, tenacious mass by developing a form of gum called by Bechamp *viscose*. [a, 35.]—**S. flexuosus**. A s. found in the buccal cavity and in pus in cases of erysipelas. It forms in bouillon cultivations long serpentine chains with a non-coherent sediment. After division the cells are circular or oval. [V. Ctrbl. f. Bakt. u. Parasit., Apr. 16, 1892, p. 509 (a, 50).]—**S. giganteus urethræ**. Of Lustgarten, a spherical coccus, 0.8 to 1 μ in diameter, occurring in chains often united in thick tangled masses. It is aerobic and forms elongated drop-like colonies on gelatin plates; found in the normal urethra. [a, 34.]—**S. gracilis**. A non-pathogenic species consisting of spherical cocci often arranged in the form of the letter S, found in the intestines and excrement of carnivorous animals and also of new born children. It rapidly liquefies gelatin plates, forming very small dark colonies with well-defined borders. [a, 35.]—**S. hematosprus**. A s. found in putrefying blood, etc. It occurs as spherical cocci, 0.7 to 0.8 μ in diameter, rather loosely united in long flexuose chains. [a, 35.]—**S. havanensis**. Of Sternberg, a micrococcus from 0.6 to 0.9 μ in diameter, occurring in long chains of cocci in pairs. It was found in the vomit of a yellow-fever patient. [a, 34.]—**S. hydrophoborum**. Ger., *S. bei Rabies*. A common organism in the brain of rabid animals. The cocci are spherical, from 0.5 to 0.7 μ in diameter, and are arranged in very short chains. In the lowest layer of agar-agar it slowly forms whitish points at the temperature of the body. In gelatin, which it liquefies, the colonies grow very slowly, forming heaps which are dense in the middle and loose at the periphery of the cultivation. [a, 35.]—**S. influenzae**. A s. consisting of numerous filaments composed of very small, globular, hyaline cocci from 0.5 to 0.8 μ in diameter; found in the blood and exudations of horses and asses affected with influenza. [a, 35.]—**S. lactetorum**. A s. occurring as oval cocci 0.7 to 1 μ long, by 0.55 μ wide, disposed in necklace-shaped filaments, frequently aggregated in zoogloea. It has been observed in the digestive apparatus of the *Blissum leucoperum* when affected with a peculiar infectious disease. [a, 35.]—**S. Kochii**. A species found in the blood, especially in the capillary vessels, of rabbits and mice infected with septicæmia from an injection of an infusion of putrid flesh. The cocci, which are oval, from 0.8 to 1 μ long, and collected in masses, adhere laterally to the blood-corpuscles. [a, 35.]—**S. Krausei**. See *S. pyogenes*.—**S. lacteus**. A species found in gelatin cultivations and in the dust of sleeping apartments. It occurs as spherical cocci, about 0.5 μ in diameter, in chains of from 4 to 16, forming minute, milky-white, rounded drops, which on drying change into white crusts. [a, 35.]—**S. lanceolatus Pasteuri**. Of Gamaleia, the *Micrococcus Pasteuri*. [a, 34.]—**S. liquefaciens**. Of Sternberg, an aerobic and facultative anaerobic liquefying s. obtained from the liver and intestines of yellow-fever patients; but pathogenic to rabbits and guinea-pigs. [a, 35.]—**S. longus**. Of von Lingelsheim, the *S. pyogenes*. [a, 34.]—**S. Lucæ**. A s. found by De Luca in simple chancre, occurring in very minute cocci arranged in chains, which often form zoogloea masses. The colonies in cultures are of a bright-yellowish color. Inoculations with the cultivations induce the typical soft chancre. [a, 35.]—**S. malignus**. The *S. pyogenes malignus* of Flügge, who cultivated it from necrotic emboli in a leucocythæmic spleen. The minute cocci, which are not distinguishable from *S. erysipelatos* and *S. pyogenes*, form gelatin plates (which they do not liquefy) and in puncture cultivations colonies similar to those of *S. erysipelatos* and *S. pyogenes*, except that they are slightly smaller and grow more slowly. Subcutaneous inoculations with small quantities of the cultivations are fatal to mice in from three to five days. Inoculation of the ear of a rabbit produces at first an erysipelas like that from *S. erysipelatos* or *S. pyogenes*, but also in two or three days a general infection which results in death on the fourth day. [a, 35.]—**S. Manfredi**. Of Trevisan, a s. occurring in the sputum of patients with lobar pneumonia. The hyaline, ellipsoid cocci (1 by 0.4 to 0.8 μ in diameters) are disposed in more or less elongated chains. Dogs, rabbits, and guinea-pigs, when inoculated, show the characteristic symptoms of the disease and usually die. [a, 35.] Cf. *Micrococcus of pneumonia*.—**S. margaritaceus**. A s. found in putrid blood and other fluids; somewhat large, spherical cocci, rather loosely united into chains of from 10 to 20. [a, 35.]—**S. meningitidis**. A species consisting of globosco-ovoid cocci in long tortuous chains found by Bonome in the intrameningeal exudations of cerebro-spinal meningitis and in pulmonary hemorrhagic foci. It differs from *S. erysipelatos* in being evolved neither in blood-serum nor in gelatin. It is pathogenic to mice, rabbits, guinea-pigs, and dogs, but not to pigeons. [a, 35.]—**S. merdarius**. Fr., *streptococque des selles*. A s. found in human and animal feces, consisting of very small, slightly curved cocci, forming on gelatin plates, which it does not liquefy, rounded, granular colonies of a deep-brown color. [a, 35.]—**S. morbillosus**. A most solitary species occurring in young dogs and in human infants, which it attacks as spherical cocci, from 1.2 to 1.5 μ in diameter, mainly solitary, sometimes loosely united in short chains. It forms on potatoes, at a temperature of from 27° to 35° C., milky-white, prominent, subhemispherical colonies. [a, 35.]—**S. murisepticus**. Of von Lingelsheim, a variety of *S. longus* that grows scantily on ox serum and is especially virulent when inoculated in mice. [a, 34.]—**S. Nocardi**. A

STRIATION, n. *Stria*-shu³n. 1. The state of being striate. 2. A striated structure. [a, 17, 35.]—**S's of Heidenhain**. See *Rods of Heidenhain*.

STRILIUM (Lat.), n. n. *Stri*(stri²)-at(a³t)/u³m(u⁴m). From *strigare*, to furrow. Of Wilder, the corpus striatum. [J, 80 (K).]

STRIBLING SPRINGS, n. *Stri*b²l²/p²a². A place in Augusta County, Virginia, where there are mineral springs. [a, 14.]

STRICKFÖRMIG (Ger.), adj. *Stri*k²f²u²r²m-i²g. See *RESTRIFORM*.

STRICT, adj. *Stri*kt². Lat., *strictus* (from *stringere*, to draw tight). Fr., *roide*. Ger., *straff* (1st def.). 1. Of stems, etc., more or less rigid. 2. Very upright or straight. The *Stricta* of Scopoli are a tribe of plants comprising three genera, the first including genera (*Circæa*, *Ludwigia*, etc.) with dry fruit, the second genera (*Protium*, *Ribes*, etc.) with succulent fruit, and the third genera (*Hedera*, *Aralia*, etc.) related to the *Umbelliferae*. [a, 35.]

STRICTURA (Lat.), n. f. *Stri*kt²-u²r²i²u²r²a². See *STRICTURE*.—**S. præputii**. See *PHIMOSIS*.

STRICTURE, n. *Stri*kt²u²r². Lat., *strictura* (from *stringere*, to draw tight), *angustia*. Fr., *s. rétrécissement*. Ger., *Striktur*, *Zusammenschnürung*, *Verengung*. A contracted part of a narrow tube or passage. [E.]—**Cicatricial s.** A s. due to cicatricial contraction. [a, 34.]—**Impassable s.** Fr., *rétrécissement infranchissable*. A s. in which the passage is so tortuous and contracted that a filiform body can not be passed through it. [a, 34.]—**Pelvic-inlet s.** [Lais]. See *Band's ring*.—**Spasmodic s.** A s. due to muscular spasm and not to organic change. [E.]—**S. of the rectum**. Lat., *strictura* (seu *angustia*) *intestinali recti*. Ger., *Aftersperre*. A decrease in the calibre of the rectum, due to the growth of new tissue or to cicatricial contraction. [E.]

STRICTURE-CUTTER, **STRICTUROTOME**, n's. *Stri*kt²u²r²-ku²t²/u²r².—u²r²-o²-tom. From *strictura*, a stricture, and *τέμνω*, to cut. An instrument for incising a stricture. [a, 34.]

STRICTUROTOMY, n. *Stri*kt²u²r²-o²t²/om-i². Fr., *stricturotomie*. The division of a stricture by a cutting operation. [Chibret, "Rec. d'ophth.," June, 1882, p. 321.] See *URETHROTOMY*.

STRIDOR (Lat.), n. m. *Strid*(stred)²/o²r. Gen., -o²r/s. From *stridere*, to make a creaking sound. Fr., *stridreux*. Ger., *Schall*. A harsh, shrill sound. [D.]—**Congenital laryngeal s.** Of Suckling, s. produced by spasmodic muscular contraction of the larynx in very young infants. ["Edin. Med. Jour.," xxxviii, p. 205 (a, 34).]—**Inspiratory s.** The shrill sound heard in inspiration when the glottis is spasmodically closed or nearly closed. [D.]—**Laryngeal s.** S. produced by temporary or permanent laryngeal stenosis. [a, 34.]—**S. dentium**. See *ARABOS* and *BRYGMUS*.—**S. serraticus**. Fr., *bruit serratique*. A sound like that produced in sharpening a saw, sometimes heard after tracheotomy, in expiration, as the air traverses the tracheotomy tube. [D, 72.]

STRIDULOUS, adj. *Stri*d²u²l²-u²s. Lat., *stridulus*. Fr., *stridulant*, *striduleux*. Ger., *knisternd*. Harsh, shrill, or creaking (said of the respiration). [D.]

STRIE (Fr.), n. *Stre*. See *STRIA*.—**S's de Frommann**. See *Frommann's LINES*.—**S. intermédiaire**. See *Hensen's DISC*.—**S. obscure**. See *Dark DISC*.—**S. optique**. See *Optic TRACT*.

STRIEGELHAARIG (Ger.), **STRIEGELIG** (Ger.), adj's. *Stre*g²-el²-ha²r²-i²g. -e²l²-i²g. See *STRIGOSE*.

STRIEME (Ger.), n. *Strem*². Written also *Striemen*. A stripe, a wheel. See *VIBEX* (1st def.) and *VITTA* (3d def.).—**Rücken's n.** See *VITTE dorsales*.

STRIGA (Lat.), n. f. *Strig*(stri²g²)/a². From *stringere*, to draw tight. Fr., *s. Ger.*, *Striegel*, *Striegelhaar*. In botany, a rigid, sharp-pointed, and appressed hair or bristle. [a, 35.]

STRIGIL, n. *Stri*g²/i²l. Gr., *στρίγις*, *στρίγγιςτρον*. Lat., *strigilis* (from *stringere*, to strip off). A scraper used by the ancient bathers. [A, 39 (a, 30).] See under *ROMAN BATH*.

STRIGILATION (Fr.), n. *Stre*zh-el²-a²s-se²-o²m². Friction by means of a brush, etc., in massage. [A, 385 (a, 48).]

STRIGMENTUM (Lat.), n. n. *Stri*g²-me²nt²/u²m(u⁴m). From *stringere*, to strip off. Literally, that which is scratched or scraped off; filth or dirt scraped off, especially from the skin after a bath or athletic exercise. [B, 70.]—**S. capitis**. See *PITYRIASIS*.

STRIGOSE, **STRIGUOUS**, adj's. *Strig*-os² -u²s. Lat., *strigosus* (from *striga* [q. v.]). Fr., *strigueux*. Ger., *striegelig*, *striegelhaarig*. Covered with strigæ. [a, 35.]

STRIKTUR (Ger.), n. *Stri*kt²-ur². See *STRICTURE*.

STRING-HALT, n. *Stri*n²h²-a²lt. See *SPRING-HALT*.

STRIOLA (Lat.), n. f. *Stri*(stri²g²)/o²l²-a². Dim. of *stria*, a furrow. Fr., *strieole*. Ger., *Streifenchen*. A very delicate stria. [a, 35.]

STRIOLATED, adj. *Stri*o²l²-at²-e²d. Lat., *striolatus*. Fr., *striolé*. Marked with striolæ. [B, 38 (a, 14).]

STROBILA (Lat.), n. f. *Stro*b²-i²l²(e²l²)². From *σπρόβιλος*, a pine-cone. An adult tape-worm with its generative segments or proglottides. [B, 28 (a, 27).]

STROBILACEOUS, adj. *Stro*b²-i²l²-a²shu²s. Lat., *strobilaceus*. Fr., *strobilacé*. 1. See *STROBILIFORM*. 2. Pertaining to a strobile; belonging to or having the characters of the *Strobilaceæ* (of Reichenbach, the *Coniferae*). [a, 35.]

STROBILE, n. *Stro*b²/i²l. Gr., *σπρόβιλος*. Lat., *strobilus*. Fr., *s. Ger.*, *Zapfen*, *Eruchzapfen*, *Zapfenfrucht*. A cone (2d def.) of a pine or fir; also the fruit of the hop. [a, 35.]

STROBOSCOPE, n. *Stro*b²-o²-skop. From *σπρόβος*, a whirling round, and *σκοπεῖν*, to examine. Ger., *Stroboskop*. See *ZOETROPE*.

STROKE, n. *Strok*. Gr., *πληγή*. Lat., *ictus*. Fr., *coup*. Ger., *Schlag*. 1. A blow. 2. A sudden attack of disease, especially of

paralysis or apoplexy. [a, 48.]—**Heat s.** See *HYPERPYREXIA* and *INSOLATION* (2d def.).—**Paralytic s.**, **S. of apoplexy**. See *APOPLEXY*.

STROM (Ger.), n. *Stro*m. See *CURRENT*.—**Drucks'**. Lit., pressure stream; of Niemeyer, the current produced in a blood-vessel just beyond the point at which an artificial stenosis has been produced. [K, 16.]—**Haupts'**. See *Primary CURRENT*.—**Hauts'**. See *Cutaneous CURRENT*.—**Nebens'**. See *Faradaic CURRENT*.—**Neigungss'**. Of Dubois-Reymond, the natural current in a muscle-rhombus which has its positive pole at or near one of the obtuse angles, the neighborhood of the adjacent acute angle being positive. [K, 16.]—**Nervens'**. See *NERVE-CURRENT*.—**Schleimhauts'**. Of Rosenthal, a natural electrical current existing in the mucous membrane lining the alimentary canal. [K, 16.]—**S'geber**. See *ELECTRODE*.—**S'ühr**. See *RHEOMETER* (2d def.).—**S'wechsler**, **S'wender**. See *RHEOTROPE*.

STROMA (Lat.), n. n. *Strom*²/a². Gen., *stro*'m²atos (-atis). Gr., *στρώμα* (from *στρώνναι*, to spread). Fr., *s. Ger.*, *S. Grundgewebe*. 1. The tissue or combination of tissues forming the principal mass of an organ and serving as a kind of matrix or support for its special anatomical elements. According to Littré, the term should be applied to a covering and not to the supporting framework of an organ. 2. The connective-tissue framework of serous membranes exclusive of the endothelium. 3. The cell-body of nucleated red blood-corpuscles, or in mammalian red blood-corpuscles, the entire mass of the corpuscle exclusive of the coloring matter. [J, 30, 32, 35.] 4. A body, variously shaped, composed of compactly arranged hyphal tissue, bearing the perithecia in pyrenomycetous *Fungi*. [a, 35.]—**S. Histi**. See *HILUM of the ovary*.

STROMBIDÆ (Lat.), n. f. pl. *Stro*mb²-i²d²-e(a²-e²). Ger., *Flügeltschnecken*. See under *STROMBUS*.

STROMBUS (Lat.), n. m. *Stro*mb²-u²s(u⁴s). Gr., *στρόβος* (from *στρέβειν*, to twist). 1. Anything twisted up. 2. A spiral snail-shell. [A, 312 (a, 21).] 3. A genus of the *Strombidae*, or wing-shells, which are a family of gasteropodous molluscs. [a, 48.]—**S. lenticinosus**. Ger., *fleckige Flügeltschnecke*, *Sommersprossen*. A species the operculum of which, with that of *Murex inflatus*, etc., was formerly official as *unguis odoratus*, *blatta byzantina*, etc. [a, 35.]

STRONGYLUS (Lat.), n. m. *Stro*n²(stro²n²g²)/i²l²(gu²l²)-u²s(u⁴s). From *στρογγύλος*, round. Fr., *strongle*, *strongyle*. A genus of ectozoic worms. The *Strongylidæ* of Dujardin are an order of the *Nematoda*.—**S. armatus** (minor). See *SCLEROSTOMA*.—**S. bronchialis**. A yellowish viviparous worm, from $\frac{1}{16}$ to $\frac{1}{8}$ inch long, the male being $\frac{1}{16}$ inch long and the female of double that length. It has been found occasionally in the lungs and bronchial glands of man. [L.]—**S. cernuus**. See *SCLEROSTOMA hypostomum*.—**S. duodenalis**. See *SCLEROSTOMA duodenale*.—**S. elongatus**. A species found in the trachea and bronchi of the hog. [L, 18.]—**S. equinus**. See *SCLEROSTOMA equinum*.—**S. filaria**. A species found in the trachea and bronchi of the sheep, goat, and other ruminants. [L, 17.]—**S. gigas**. See *EUStrongylus gigas*.—**S. hypostomus**. See *SCLEROSTOMA hypostomum*.—**S. longevagatus**. A species found in the kidney and urinary ducts of man, and once in the parenchyma of the lung of a child. [Diesing (L, 17); L, 57 (a, 50).]—**S. lupi**. See *SPIROPTERA sanguinolenta*.—**S. micrurus**, **S. micrurus**. A species the immature form of which is found in the lungs of young sheep and calves, producing hoose. [L.]—**S. ovinus**. See *S. contortus*.—**S. quadridentatus**. See *SCLEROSTOMA duodenale*.—**S. renalis**. See *EUStrongylus gigas*.

STRONTIA (Lat.), n. f. *Stro*n²-sh²i²(t²i²)²-a². Fr., *strontiane*. Ger., *Strontian*. Strontium oxide, SrO; a grayish or whitish, porous substance, analogous in structure and chemical properties to lime. [B.]

STRONTIUM (Lat.), n. n. *Stro*n²-sh²i²(t²i²)-u²s(u⁴m). A bivalent element allied to calcium, found in various minerals and in some mineral waters. It is a yellow metal, rather harder than lead and readily malleable. Sp. gr., 2.5; atom. weight, 87.2 symbol, Sr. [B, 3.] Several of its salts are antiseptic. [a, 50.]—**Ammonium and s. arsenate**. The compound $2\text{Sr}(\text{NH}_4)\text{AsO}_4 + \text{H}_2\text{O}$. [B, 2.]—**S. acetate**. A compound of s. and acetic acid; crystallizing in different forms according to the amount of water which the crystals contain, and having respectively the formulæ $2\text{Sn}(\text{C}_2\text{H}_3\text{O}_2)_2 + \text{H}_2\text{O}$ and $\text{Sn}(\text{C}_2\text{H}_3\text{O}_2)_2 + 2\text{H}_2\text{O}$. [B, 2.]—**S. acrylate**. The compound $\text{Sr}(\text{C}_3\text{H}_5\text{O}_2)_2$. [B, 2.]—**S. antimonate**. The compound $\text{Sr}(\text{SbO}_3)_2 + 6\text{H}_2\text{O}$. [B, 2.]—**S. arsenate**. A compound of s. and arsenic acid. The monohydric s. arsenate, SrHAsO_4 , is known. [B, 2.]—**S. arsenite**. See *S. metarsenite*.—**S. carbonate**. A substance, SrCO_3 , occurring in nature as the mineral strontianite and also prepared artificially. [B, 3.]—**S. chloride**. A body, $\text{SrCl}_2 + 6\text{H}_2\text{O}$, forming long, acicular, efflorescent crystals which, on heating, lose their water of crystallization and are reduced to a white powder. [B, 3.]—**S. cyanide**. A substance, $\text{Sr}(\text{CN})_2$, prepared by the decomposition of s. ferrocyanide or by the action of hydrocyanic acid on s. hydrate. It is very readily decomposed by the action of carbonic acid. [B, 3.]—**S. ferrocyanide**. A substance, $\text{Sr}_2\text{Fe}(\text{C}_2\text{N}_3)_2 + 15\text{H}_2\text{O}$, produced by the action of s. hydrate on a ferrocyanide of a heavy metal, like copper. [B, 3.]—**S. gallate**. A substance, $(\text{C}_7\text{H}_5\text{O}_2)_2\text{Sr} + 4\text{H}_2\text{O}$, occurring in acicular crystals. [B, 46 (a, 14).]—**S. hydroxide**. A white pulverulent substance, $\text{Sr}(\text{OH})_2$. [B, 3.]—**S. lactate**. A compound of s. and lactic acid; a dieth. [a, 50.]—**S. metarsenite**. The compound $\text{Sr}(\text{AsO}_3)_2 + 4\text{H}_2\text{O}$. [B, 2.]—**S. nitrate**. A crystalline substance, $\text{Sr}(\text{NO}_3)_2$, or $\text{Sr}(\text{NO}_3)_2 + \text{H}_2\text{O}$. [B, 3.]—**S. oxalate**. The compound SrC_2O_4 . [B, 2.]—**S. oxide**. See *STRONTIA*.—**S. pyrothioarsenate**. Neutral s. sulpharsenate, $\text{Sr}_2\text{As}_2\text{S}_7$. [B, 2.]—**S. sulpharsenate**. See *S. pyrothioarsenate* and *S. thioarsenate*.—**S. sulphate**. The compound SrSO_4 , occurring in nature as the mineral celestine. It forms large, rhombic, light-blue crystals. [B, 3.]—**S. thioarsenate**. Basic s. sulpharsenate, a whitish powder, $\text{Sr}_3(\text{AsS}_4)_2$. [B, 2.] See also *S. pyrothioarsenate*.

STROPHANTHEIN, n. Stro^f-anth^e-i²n. A substance insoluble in water, formed along with sugar by the decomposition of strophanthin by weak acids. [B.]

STROPHANTHIN, STROPHANTIN, n's. Stro^f-a²nthⁱ2n, -a²ntⁱ2n. Fr., *strophanthine, strophantine*. Ger., S. A crystallizable glucoside, C₂₀H₃₄O₁₁, very bitter and feebly acid, obtained from the seeds, leaves, and bark of *Strophanthus hispidus*. By boiling with dilute acids, it is converted into sugar and strophanthin. It acts, like digitalin, as a cardiac tonic and a diuretic. [B.]

STROPHANTHUS (Lat.), n. m. Stro^f-a²nthⁱ(a²nthⁱu²s(u²s)). From *στροφος*, a twisted cord, and *άνθος*, a flower. Fr., *strophante*. A genus of the *Apocynaceae*. [a. 35.]—*S. hispidus*. A Gaboon species identified by some with *S. kombé*. The seeds contain strophanthin, and probably do not differ in properties from those of *S. kombé*. [a. 35.]—*S. kambé*, *S. kombé*. A woody climber of Gaboon, where the seeds and those of other species are used as an arrow-poison (*kombé tiwé*, or *ouage*), which acts directly on the heart muscle. They contain strophanthin (the active principle) and ineine. The tincture is used as a heart tonic, like digitalis, though more stimulant and less permanent in its effects. It is considered superior to digitalis as a diuretic, and is recommended in renal complaints with secondary heart-failure. [a. 35.]—*S. seed*. Lat., *semen strophanthi*. The seed of several species of *S.* Those of *S. kombé* are from 1½ to 2½ cm. in length and from 4 to 5 mm. in breadth, and have a keel-shaped ridge on each of the flattened sides, one much more prominent than the other. They are covered with appressed silky hairs, varying in color from grayish-green to brown. Those of *S. hispidus* are brown. Another sort, known as white *s. seed*, are more densely covered with nearly white hairs. [a. 35.]

STROPHOLE, n. Stro^fi²-ol. Gr., *στροφώλιον* (dim. of *στροφός*, a twisted band). Lat., *stropholia, stropholum*. Fr., *S. Ger., Nabeldecke*. See *Appendix funicularis* and *CARUNCLE* (3d def.).

STROPHIUM (Lat.), n. n. Stro^fat²ro^fi²-u²m(u²m). Gr., *στροφίον* (dim. of *στροφός*, a band). 1. A bandage. 2. See *STROPHIOLE*.

STROPHOCEPHALIA (Lat.), n. f. Stro^f-o²(o²)-se²f(ke²f)-al (a²l)ⁱ2-a². From *στροφός*, a twisted band, and *κεφαλή*, the head. The condition of a strophocephalus. [a. 34.]

STROPHOCEPHALUS (Lat.), n. m. Stro^f-o²(o²)-se²f(ke²f)-a²l(a²l)ⁱ2-u²s(u²s). Of Geoffroy St.-Hilaire, a rare form of monster having ectopia of the different organs and parts forming the head and face. [a. 34.]

STROPHULUS (Lat.), n. m. Stro^fi²-u²(u²l)ⁱ2-u²s(u²s). Probably from *strophus* (q. v.), since s. has often been ascribed to gastric disorders. Fr., *strophule, dartre poussée, poussée, ébullition, taches de lait*. Ger., *rothes Ausfahren, Schalknötchen, Hitzblätterchen*. [Wied.] Rash, red-gum, red-gown, red-gow, tooth-rash, milk-spots, lichen of infants; an obsolete term for certain papular, erythematous, and eczematous skin eruptions in infants, usually of an evanescent character. [G.]—*S. abidus*. Ger., *weisse Gesimte*. White-gum. The affection described by Willan and others under this name does not correspond to the other varieties of s., but rather to milium. [G. 28.]—*S. candidus*. "Pallid-gown", s. in which the papules are pale-red or whitish and usually of larger size than in the ordinary forms; probably a form of urticaria. [G. 28.] Cf. *URTICARIA papulosa*.—*S. confertus*. Rank red-gum; a variety in which the papular lesions are closely packed together or aggregated in clusters. [G. 28.]—*S. dentitionis*. See *TOOTH-RASH*.—*S. intertinctus*. A form in which the pimples are distributed over the surface so as to give it a mottled appearance, much commonly on the face, neck, hands, and arms. [G. 28.]—*S. juvenilis*. A variety affecting young persons; the lichen simplex of Willan. [G. 5.]—*S. neonatorum*. The s. of new-born children. Fuchs describes the following varieties: *abidus, intertinctus, and lenticularis (candidus)*. [G. 5.] See *S. abidus*, etc.—*S. pruriginosus*. A form of eruption consisting of rather large, disseminated papules, some of a red color and accompanied with urticaria, others not differing in hue from the surrounding skin, which occasion intense itching, especially at night, and show little black crusts on their summits. The disease occurs in infants and young persons, affecting especially the upper portions of the body, less frequently the legs. Its duration varies from a few days to several months. [G. 51.]—*S. simple* (Fr.). Of Hardy, the ordinary forms, except a. pruriginosus. [G. 51.]—*S. volutatus*. "Wildfire rash", an obsolete term for an epimeral eruption in infants, sometimes erythematous and sometimes vesicular. [G. 28.]

STROPHOS (Lat.), n. m. Stro^fi²-o²s. Gr., *στροφός* (from *στροφήν*, to twist). See *VOLVULUS*.

STROTZEN (Ger.), n. Stro^t-ze²n. Turgescence. [A. 521 (a. 48).]

STROYL, n. Stroyl. The *Triticum repens*. [A. 505 (a. 21).]

STRUCTURAL, adj. Stru^t-k²u²-r². From *struere* to build. Pertaining to or affecting structure (cf. *S. DISEASE*). [a. 48.]

STRUMA (Lat.), n. f. Stru^m2m(stru^m)ⁱ2-a². Fr., *strume* (2d def.). Ger., *S. Kropf* goitre. 1. Scrofula. 2. Goitre. [E.] 3. In botany, a cushion-like swelling or protuberance. [a. 35.]—*S. amyloides*. See *AMYLOID DEGENERATION*.—*S. aneurysmatica*. See *ANEURYSMAL GOITRE*.—*S. colloides*. See *Colloid goitre*.—*S. congenita*. See *Congenital goitre*.—*S. cystica (parenchymatosa)*. See *Cystic goitre*.—*S. cystica pulsans*. See *Pulsating goitre* (2d def.).—*S. fibrosa*. See *Fibroid goitre*.—*S. follicularis*. Ger., *Drüsenkropf*. See *Follicular goitre*.—*S. gangliosa*. See *Ganglionic goitre*.—*S. gelatinosa*. See *Colloid goitre*.—*S. hyperplastica*. 1. See *Goitre*. 2. Goitre in which the gland becomes tattered and nodular. [L. 57 (a. 30).]—*S. hyperplastica aneurysmatica*. See *ANEURYSMAL GOITRE*.—*S. hyperplastica fibrosa*. See *Fibroid goitre*.—*S. hyperplastica follicularis*. See *Follicular goitre*.—*S. hyperplastica varicosa*. Goitre with dilated veins.—*S. hyperplastica vascularis*. A vascular goitre in which there is

hyperplasia of the connective tissue. [a. 34.]—*S. hypertrophica simplex*. Simple hypertrophy of the thyroid gland. [a. 34.]—*S. infrathoracica*. A goitre occupying the anterior mediastinum. [a. 34.]—*S. intratrachea congenita*. Of Spieckermann, a simple parenchymatous hyperplasia of the thyroid gland in the newborn; to be distinguished from the transitory enlargement caused by the fact of a face presentation. [A. 15.]—*Struma lipomatodes aberrata renis*. Of Grawitz, small fatty tumors having a connective-tissue network, found beneath the renal capsule. [Jour. de l'anat. et de la phys., 1891, p. 454 (a. 34).]—*Struma lipomatodes suprarenales*. Neoplasms resembling struma lipomatodes aberrata renis found within the suprarenal capsule. [a. 34.]—*S. lymphatica*. Of Walther, see *Lymphatic goitre*.—*S. maligna*. Cancer of the thyroid gland. [Braun, "Ctbl. f. Chir.," July 22, 1882, Beilage, p. 42.]—*S. mollis*. See *Soft goitre*.—*S. ossea*, *S. petrosa*. See *Calcareous goitre*.—*S. pulsans*. See *Pulsating goitre*.—*S. varicosa*. See *Varicose goitre*.—*S. vascularis aneurysmatica*. See *Aneurysmal goitre*.—*S. vasculosa*. See *Pulsating goitre*.

STRUMATOMIE (Ger.), **STRUMECTOMIE** (Ger.), n's. Strum-a²-tom-e², -e²k-tom-e². Excision of the thyroid gland. [B.]

STRUMPRIVUS (Lat.), adj. Stru^m2m(stru^m)ⁱ2-prⁱpre²-vu²s(wu²s). From *struma* (q. v.), and *privus*, deprived of. Fr., *strumprive*. Deprived of the thyroid gland (cf. of a morbid condition, due to loss of the thyroid gland (cf. *CACHEXIA strumpriva* and *MYXEDEMA*).

STRUMITIS (Lat.), n. f. Stru^m2m(stru^m)ⁱ2-(e²)tⁱ2s. Gen., -itⁱ2idos (-idis). See *THYROIDITIS*.

STRUMODEIMA (Lat.), n. n. Stru^m2m(stru^m-o²)-(dⁱu²rm-(de²rm)/a². Gen., -derm²atos (-atis). From *struma* (q. v.), and *δέρμα*, the skin. See *SCORFLODERMA*.

STRUMOSIS (Lat.), n. f. Stru^m2m(stru^m)ⁱ2-osⁱ2s. Gen., -osⁱ2eos (-is). From *struma* (q. v.). See *STRUMOSITAS*.

STRUMOSITAS (Lat.), n. f. Stru^m2m(stru^m)ⁱ2-osⁱ2s(2t-a²s(a²s)). Gen., -tatⁱ2s. From *struma* (q. v.). Fr., *strumosité*. The goitrous or the scrofulous diathesis. [a. 34.]

STRUMOUS, adj. Stru^m2m/2s. Lat., *strumosisus* from *struma* (q. v.). Fr., *strumexux*. Ger., *strumös, kropfig*. Pertaining to, affected with, or of the nature of struma. [D.]

STRUMPELIA (Lat.), n. f. Strumpⁱ2-i²-a². Fr., *strumpfle*. A genus of the *Riaceae*. [a. 35.]—*S. maritima*. Fr., *faux romarin*. A West Indian shrub. The stimulant flowers and leaves are used for snake-bites and as a febrifuge. [a. 35.]

STRUPPIG (Ger.), adj. Strupⁱ2-pi²g. See *HIRSUITE*.

STRUTHIN, n. Stru^thⁱ2-thⁱ2n. Fr., *struthine*. See *SAPONIN*.

STRUTHIO (Lat.), n. m. Stru^thⁱ2(thⁱ2)u²-o. Gen., -onⁱ2s. Fr., *struthion*. The ostrich. [A. 312 (a. 31).]—*S. camelus*. Written also *struthiocamelus*. Ger., *struthiocamelus*. Ger., *Struthio, Vogelstraus*. The African ostrich. The shells of its eggs, *testa oorum struthionis* (Ger., *Strausierschalen*), were formerly official. [a. 35, 39.]

STRUTHIOPTERIS (Lat.), n. f. Stru^thⁱ2(thⁱ2)u²-o²ptⁱ2rⁱ2s. Gen., -pterⁱ2idos (-idis), -pterⁱ2eos. From *στροφιων*, the ostrich, and *πτερις*, a kind of fern. Fr., *struthioptère, struthioptère*. A genus of ferns. The *Struthiopteris* are a section of the *Polypodiaceae*. [a. 35.]—*S. germanica*. Ostrich-fern; a species growing in Canada and in the northern United States. [a. 35.]

STRUTHIUM (Lat.), n. n. Stru^thⁱ2(thⁱ2)u²-i²2-m(u²m). Gr., *στροφιων*. The genus *Gypsophylla*; of the ancients, see *GYPSOPHYLLA* s. [a. 35.]

STRYCHNÉ (Fr.), adj. 1. Containing strychnine. 2. Consisting in the use of strychnine (said of a course of medication).

STRYCHNIA (Lat.), n. f. Stri^k2(k²stru²ch²)ⁱ2-ni²-a². See *STRYCHNINE*—*Strychnine sulphas*. See *STRYCHNINE sulphate*.

STRYCHNIC ACID, n. Stri^k2k²/ni²2k. Fr., *acide strychnique*. See *IGASTRIC ACID*.

STRYCHNINA (Lat.), n. f. Stri^k2(k²stru²ch²)ⁱ2-ni²(nen)/a². See *STRYCHNINE*.—*Granula strychnina* (Belg. Ph., Fr. Cod.). Fr., *granules de strychnine* [Fr. Cod.]. Pellets made of strychnine incorporated with sugar or milk-sugar and gum arabic, tragacanth, or honey, and containing each 1 milligramme of the drug. [B. 95 (a. 38).]—*Liquor strychninae hydrochloratis* [Br. Ph.]. A preparation made by dissolving 2 parts by weight of pure strychnine crystals in a mixture of 4 parts of hydrochloric acid of sp. gr. 1.052 and 48 of water, and adding 48 of alcohol of sp. gr. 0.838 and 98 of water. [B. 95 (a. 38).]—*Pilule strychninae*. A mass of 5 centigrammes of strychnine and 96 of confection of rose, divided into 12 pills. [B. 119 (a. 38).]—*Strychnine sulphas*, *Sulphas strychninae*. See *STRYCHNINE sulphate*.

STRYCHNINE, n. Stri^k2/nen. Lat., *strychnina* [U. S. Ph., Br. Ph., Belg. Ph., Dan. Ph., Swed. Ph.], *strychninum* [Ger. Ph. (1st ed.), Austr. Ph., Fr. Ph., Hung. Ph. (1st ed.), Ital. Ph., Russ. Ph.], *strychnin* [U. S. Ph., Belg. Ph., Fr. Ph. (1870). Fr., *strychnine*. Ger., *Strychnin*. It., *strychnina*. Sp., *strychnina* [Sp. Ph.]. An alkaloid, C₂₁H₂₂N₂O₄, obtained from the seeds of *Strychnos nuxvomica*, occurring as small, four-sided prisms or rectangular octahedra or as a crystalline powder, having neither color nor odor, but an exceedingly bitter and persistent taste. [B. 95 (a. 38).]—*Alcoolé de s. (Fr.)*. See *Tinctura strychninae*.—*Azotate de s. (Fr.)*. See *S. nitrate*.—*Granules de s. (Fr.)*. See *Granula strychninae*.—*Pilules de s. (Fr.)*. See *Pilule strychninae*.—*Sirope de sulfate de s. (Fr. Cod.)* (Fr.). Sp., *jaboré de sulfato estricnico* [Sp. Ph.]. A solution of 5 centigrammes of s. sulphate in 4 grammes [Fr. Cod.] (the necessary amount [Sp. Ph.]) of water, mixed with 196 grammes [Fr. Cod.] (200 [Sp. Ph.]) of syrup. [B. 95 (a. 38).]—*S. hydrate*. A substance, C₂₁H₂₂N₂O₄ + H₂O, obtained as a white precipitate by boiling s. in a solution of caustic soda with alcohol,

evaporating and directing a jet of carbonic-acid gas upon the residuum after dissolving it in water. [*Am. Jour. of Pharm.*] Nov., 1888, p. 504 (a, 50).—**S. nitrate**. Lat., *nitras strychnini* (Netherl. Ph.) (see *strychnine* [Dan. Ph., Finn. Ph., Norw. Ph., Swed. Ph.]), *strychninum nitricum* [Ger. Ph., Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph. (2d ed.), Russ. Ph.]. Fr., *azotate de s.* [Fr. Cod.]. Ger., *Strychninnitrat* [Ger. Ph.]. A compound of s. and nitric acid, $C_{21}H_{22}N_2O_8 \cdot NHO_3$. [B, 95 (a, 38).]—**S. plant**. See *STRYCHNOS nux vomica*.—**S. sesquioxide**. The compound $(C_{21}H_{22}N_2O_8)_2 \cdot O_3$. [B, 10.]—**S. sulphate**. Lat., *strychnina sulphas* [U. S. Ph.], *strychninum sulfuricum* [Gr. Ph., Russ. Ph.], *sulphas strychninae* (Belg. Ph.). Fr., *sulfate de s.* [Fr. Cod.]. Sp., *sulfato estricnico* [Sp. Ph.]. A substance, $(C_{21}H_{22}N_2O_8)_2 \cdot SH_2O_4 + 7H_2O$, occurring as colorless, transparent, prismatic or acicular crystals, or as a white, crystalline powder, having no odor but a very bitter taste. S. sulphate is the s. salt usually employed in medicine. It is soluble in 10 [U. S. Ph., Rom. Ph.] (40 [Gr. Ph.], 42 [Russ. Ph.]) parts of cold water, in 1 part [Russ. Ph.] (2 parts [U. S. Ph.]) of boiling water or boiling alcohol, in 60 [U. S. Ph.] (80 [Gr. Ph.], 82 [Russ. Ph.]) parts of cold alcohol, is insoluble in ether, and melts at $135^\circ C$, losing 141 per cent. of its water of crystallization [U. S. Ph.]. [B, 95 (a, 38).]—**Teinture de s.** (Fr.). See *Tinctura STRYCHNINI*.

STRYCHNINIC ACID, n. $Stri^2k-ni^2n^2ik$. Fr., *acide strychnique*. A substance produced by the oxidation of strychnine, occurring in colorless needles, of acid reaction, and forming crystallizable salts. [B, 93 (a, 14).]

STRYCHNINUM (Ger. Ph. (1st ed.), Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph. (1st ed.), Netherl. Ph., Russ. Ph.) (Lat., n. n. $Stri^2k-(stru^2ch^2n^2i)^2m(nen)^2m(u^2m)$). See *STRYCHNINE*.—**Nitras strychnini**, s. *nitricum*. See *STRYCHNINE nitrate*.—**S. sulfuricum. See *STRYCHNINE sulphate*.—**Tinctura strychnini**. A tincture made with 16 centigrams of strychnine and 30 grammes of 36-per-cent. alcohol. [B, 119 (a, 39).]**

STRYCHNINATION (Fr.), n. *Strek-ne-za-s^2-se-on^2*. The state of being under the influence of strychnine.

STRYCHNISM, n. $Stri^2k-nizm$ Lat., *strychnismus*. Fr., *strychnisme*. Of M. Hall, the associated phenomena produced by the administration of large doses of strychnine. [a, 34.]

STRYCHNIUM (Lat.), n. n. $Stri^2k(stru^2ch^2n^2i)^2m(nen)^2m(u^2m)$. A univalent radicle, $C_{21}H_{22}N_2O_8$, bearing the same relation to strychnine that ammonium bears to ammonia. The addition compounds of strychnine with acids may be regarded as substitution compounds of s. with acids. [B, 2.]

STRYCHNOL, n. $Stri^2k-no^2l$. See *STRYCHNINE hydrate*.

STRYCHNOMANIA (Lat.), n. f. $Stri^2k(stru^2ch^2n^2i)^2m-no(n)^2s-man$ (ma^2n^2i)². From *strychnos*, nightshade, and *mania*, madness. Ger., *Strychnomanie*. An old term for the delirium resulting from eating belladonna. [A, 540 (a, 34).]

STRYCHNOS (Lat.), n. f. $Stri^2k(stru^2ch^2n^2i)^2m-no(n)^2s$. Ger., *strychnos*. Fr., s. *vomiqueur*. Lat., s. *Krähenaugenbaum*. A genus of the *Loganiaceae*. The *Strychnaceae* are an order of the *Hypericaceae*, consisting of *S.* and the *Strychnaceae* are a family of plants comprising *S. Fagracea*, etc.; the *Strychnaceae* (Fr., *strychnées*) are an order of the *Corolliflorae*, now included in the *Loganiaceae*; and the *Strychnideae* are a family of the *Jasminariaceae* consisting of the *Carriseae* and *Strychnaceae*. [a, 35.]—**Aqua strychni Rademacheri**. See *Aqua nuxvomica*.—**Extractum strychni**. See *Extractum nuxvomica*.—**Extractum strychni aquosum** [Ger. Ph. (1st ed.), Russ. Ph.]. Syn.: *extractum nuxvomicae aquosum* [Gr. Ph., Swiss Ph.]. An aqueous extract made from the seed of *S. nux vomica* by exhaustion with boiling (hot [Swiss Ph.]) water and evaporation to dryness (thickness [Gr. Ph.]). [B, 95 (a, 38).]—**Extractum strychni fluidum**. See *Extractum nuxvomicae fluidum*.—**Extractum strychni siccum**. See *Extractum nuxvomicae spirituosum pulveratum*.—**Extractum strychni spirituosum**. See *Extractum nuxvomicae*.—**Extractum strychni spirituosum cum dextrino**. See *Extractum nuxvomicae spirituosum pulveratum*.—**Semen (seu semina) strychni**. See *Nux vomica*.—**Semen strychni pulveratum**. The dried, powdered, and sifted seeds of *S. nux vomica*. [B, 95 (a, 38).]—**S. axillaris**. An East Indian species. The leaves are used for ulcers and the poisonous seeds for fevers. [a, 35.]—**S. bicirrhosa**. An East Indian species. The bitter root is used in abdominal pains and rheumatic affections of the joints, and the fruit-pulp in flatulent colic. [a, 35.]—**S. brachiata**. The comoda de venado of Peru; probably poisonous, though its fruits are said to be eaten by certain animals. [a, 35.]—**S. castelnaana**. A species growing on the upper Amazon, furnishing an ingredient of curare. [a, 35.]—**S. cogens**. A British Guiana species yielding a constituent of curare. [a, 35.]—**S. colubrina**. Fr., *bois (ou racine) de couleuvre*. Ger., *Schlangenholzbaum*. The snakewood of the East Indies, where the wood (*lignum colubrinum*) (see *serpentarium officinale*, see *serpentum*),—*S. ignatia*, *S. ignatiif.* Fr., *a de Saint-Ignace*. Ger., *bitterer Ignatiusbaum*. St. Ignatius's bean; a tree indigenous to the Philippine Islands. The hard, bony, inodorous, bitter seeds, the *ignatia* of the U. S. Ph., which have the same properties as *nux vomica*, contain 12 per cent. of strychnine and 0.5 per cent. of brucine, combined, according to Caldwell, with igasuric acid. [a, 35.]—**S. innocua**. Fr., *s. non nuisible*. An Egyptian and Senegal species said not to be poisonous. The acedulous pulp of the fruit is eaten. [a, 35.]—**S. ligustrina**. A tree of the Eastern Archi-

pelago, yielding a *lignum colubrinum* used like that of *S. colubrina*. It is thought to be the source of *bidiara laut* (of the Indian bazaars), the wood of which contains 2.26 per cent. of brucine without strychnine. [a, 35.]—**S. minor**. A Malabar species. The fruit is used externally in mania. The root is used in diarrhoea and colic and externally in rheumatism. [a, 35.]—**S. muricata**. Ger., *stachel-früchtiger Krähenaugenbaum*. A species of Timor and neighboring islands, yielding a *lignum colubrinum*. All parts, especially the fruit, are bitter. The root is used as a febrifuge. [a, 35.] Cf. *S. ligustrina*.—**S. nux vomica**. Fr., *noix vomique*. Ger., *dichter Krähenaugenbaum*, *gemeiner Brechnussbaum*. The source of *nux vomica*; a tree indigenous to the East Indies, Indian Archipelago, etc., and found also in northern Australia. The bitter wood and root are used as a febrifuge and in snake-bites. The bark, false angustura-bark, official in the Sp. Ph. as *angustura falsa*, contains brucine. In the East Indies it is the chief ingredient in medicated oils applied to obstinate eruptions, such as those of leprosy and syphilis. The leaves are used externally in paralisis and rheumatism. [B, 95 (a, 35).]—**S. potatorum**. Fr., *s. des buveurs*. Clearing (or water-filter) nut of the East Indies; a species that is not poisonous. The nut is rubbed on the inside of vessels to clarify foul water. The fruit is emetic and antidyenteric. The seeds are used in gonorrhoea and diabetes, and pulverized and mixed with honey, are applied to boils to hasten suppuration. [a, 35.]—**S. pseudo-china**. Fr., *fauz quina*. Brazilian copalchi-plant. The bark, which is said to contain extractive, resin, gum, an acid, and a nitrogenous body, but neither strychnine nor brucine, is used in Brazil, under the names of *quina de campo* and *quina de mendianla*, as a substitute for cinchona. [a, 35.]—**S. samen** (Ger.). See *Nux vomica*.—**S. Schomburgkii**. A species of British Guiana, where it enters into the composition of curare. [a, 35.]—**S. spinosa**. Fr., *s. épineux*. Ger., *dorniger Krähenaugenbaum*. A Madagascar tree. The berries are used to prepare a vinous, mildly laxative beverage. The unripe fruit is bitter and poisonous. [a, 35.]—**S. tieute**. Fr., *upas tieudé*. Ger., *Javanischer Krähenaugenbaum*, *Tschetlik*. The most poisonous species, a Javanese shrub. The root-bark contains strychnine and is used to prepare an arrow-poison known as *upas tieute* (not to be confounded with the *upas antiar* of the *Antiaris toxicaria*). The dry seeds are said to contain strychnine and a trace of brucine. [a, 35.]—**S. toxicaria**, *S. toxifera*. A tree indigenous to British Guiana and the upper regions of the Orinoco and Amazon. The bark is used as an ingredient of curare. [a, 35.]—**S. yaporensis**. A poisonous species of the upper Amazon, believed to enter into the composition of curare. [a, 35.]—**Tinctura strychni**. See *Tinctura nuxvomica*.—**Tinctura strychni aetherea** [Ger. Ph. (1st ed.), Russ. Ph.]. A preparation made by macerating the coarsely powdered seeds of *S. nux vomica* with ten times as much spiritus aetheris for 8 days (5 days [Russ. Ph.]). [B, 95 (a, 38).]—**Tinctura strychni Rademacheri** [Russ. Ph.]. See *Tinctura nuxvomicae Rademacheri*.

STRYPHNODENDRON (Lat.), n. n. $Stri^2f(stru^2f)^2m-no(n)^2s-den^2i-ro^2n$. From *stryphnos*, harsh, and *dendron*, a tree. Fr., s. A genus of leguminous trees of the *Adenantheraceae*. [a, 35.]—**S. barbatimão**. The *barbatimão* of Brazil, where the bark, which is highly astringent, is used in wounds, burns, and even hernias. [a, 35.]—**S. jurema**. A species furnishing a bark (see *Jurema bark*) similar in properties to that of *S. barbatimão*. Bailion identifies it with *Acacia niopo*. [a, 35.]—**S. polyphyllum**. The *angico* of Brazil, by some authors identified with *S. barbatimão*. It yields a translucent, brownish-red gum, which is used as a pectoral. [*Proc. of the Am. Pharm. Assoc.*] xxxi (a, 50); [a, 35.]

STRYPHONUS (Lat.), adj. $Stri^2f(stru^2f)^2m-nu^2s(nu^2s)$. Gr., *στυφνός* (from *στυφνέω*, to contract). See *ASTRINGENT*.

STUBITZA, n. A place in Agram County, Croatia, where there are warm gaseous and alkaline springs. [a, 14.]

STUBNYA, n. A place in Thuróc County, Hungary, where there are warm alkaline and sulphurous springs. [L, 30, 57 (a, 14).]

STÜCK (Ger.), n. Stu^2k . A piece, a part, a fragment. [L, 46 (a, 21).]—**Scheibenförmiges S. des Schiefenbeins**. See *Quadrato-jugal bone* (1st def.) and *Metapterygoid bone*.—**S'chen**. See *FRUSTULE*.

STUFENJAHR (Ger.), n. $Stuf^2e-n^2a-ja^2r$. See *CLIMATERIUM*.
STUFFED, adj. Stu^2ft . Of the stem of a *Fungus*, filled with a spongy mass. [a, 35.]

STUHL (Ger.), n. *Stul*. See *CHAIR* and *STOOL*.—**S'ausleerung**, *S'entleerung*, *S'gang*. See *DEFECATION* (2d def.).—**S'verstopfung**. See *OBSTIPATION*.—**S'zapfen**. See *SUPPOSITORY*.

STUMM (Ger.), adj. *Stum*. See *DUMB*.

STUMMEL (Ger.), n. *Stum-me^2l*. See *STUMP*.

STUMP, n. Stu^2mp . Fr., *moignon*. Ger., *Stumpf*, *Stummel*. The part that is left after a portion of an organ has been removed by amputation or otherwise. [a, 48.]—**Conical s.** A troublesome condition, the result of insufficient flap, of sloughing, or of retraction of muscles, by which the bone is left after an amputation to be covered by granulation tissue. In a s. of this sort the cicatrix possesses very little vitality and is constantly liable to ulceration. The remedy is reamputation. [E.]

STUMPFICHTIG (Ger.), adj. $Stumpf^2i^2cht^2t-i^2g$. See *AM-BLYOTIC*.

STUPA (Lat.), n. f. $Stu^2p(stup)^2a^2s$. Gr., *στῦμα*. Fr., *étoupe*. Ger., *Werg*. 1. A tuft or mat of long hairs; tow. 2. A web consisting of simple or branched filaments forming the medullary stroma of the thallus of some lichens. [a, 35.]—**S. piciis liquidæ**. Tow impregnated with fresh tar; used as an antiseptic dressing.

STUPACEOUS, adj. $Stu^2p-a^2shu^2s$. Lat., *stupaceus*. Resembling stupa; tow-like. [a, 35.]

STUPE, n. Stu^2p . From *stupa*, tow. Flax or cloth dipped in a liquid to be applied in fomentation. [a, 48.]

STUPEFACIENT, adj. *Stu^p-e²-fa²'shuⁿ*. Gr., *ναρκωτικός*. Lat., *narcocticus*. Fr., *stupefiant*. Ger., *betäubend*. Producing stupor.

STUPEFACTION, n. *Stu^p-e²-fa²'shuⁿ*. From *stupefacere*, to make numb. Gr., *ναρκωσις*. Fr., *stupéfaction*. Ger., *Betäubung*. 1. The act of making or becoming stupefied or insensible. 2. Stupor, narcosis. [D.]

STUPEMANIA (Lat.), n. f. *Stu^p(stu^p)-e²-man*(maⁿ)/'i²-a². From *stupor*, numbness, and *mania*, madness. Mental stupor. [a, 34.]

STUPHA (Lat.), n. f. *Stu^p(stuf)-a²*. Gr., *σύνθη*. See STUPA, STUPE, and SWEAT BATH.

STUPOR (Lat.), n. m. *Stu^p(stup)-o²r*. Gen., *-oris*. Gr., *νάρκη*, *ναρκωσις*. Fr., *stupéur*. Ger., *S.*, *Bewusstlosigkeit*, *Betäubung*. A state of apathy with drowsiness.—**ANERGIC** s. Of Clouston, acute dementia. [a, 34.]—**DELUSIONAL** s. See MELANCHOLIA with s.—**DIGITORUM** s. a *gelu*. See Ongle.—**EPILEPTIC** s. S. following an attack of epilepsy. [D, 36.]—**LETHARGIC** s. See TRANCE.—**POST-CONVULSIVE** s. S. following a convulsion, especially an epileptic convulsion. [D, 36.]—**S. a pressione**. Of Sauvages, apoplectic s. [a, 34.]—**S. formicans**. Of Sauvages, formication. [a, 34.]—**S. melancholicus**. See MELANCHOLIA with s.—**S. miliaris**. Paræsthesia of the fingers and toes occurring before the eruption of military fever. [a, 34.]—**S. vigilans**. See CATAPLEPSY.

STUPOROUS, adj. *Stu^p-o²r-u^s*. 1. In a state of stupor. 2. Attended with stupor.

STUPOSE, adj. *Stu^p-o²bs*. Lat., *stuposus* (from *stupa*. tow). Fr., *stupeux*. Ger., *uerig*. Having a stupa (in either sense). [a, 35.]

STUPPA (Lat.), n. f. *Stu^p(stup)-pa²*. See STUPA.

STUPEUS (Lat.), adj. *Stu^p(stup)-e²-u^s(u^s)*. See STUP-ACEOUS.

STUPRATION, n. *Stu^p-ra²'shuⁿ*. Lat., *stuprum*. Fr., *stupre*. See RAPE.

STURDY, n. *Stu^rd-i²*. See GID.

STURGEON, n. *Stu^r-j'n*. Fr., *esturgeon*. Ger., *Stör*. See ACPENSER.

STURMEISENHUT, STURMHUT (Ger.), n's. *Sturm'-iz-eⁿ*-hut, *sturm'hut*. See ACOMITE.

STURZGEBURT (Ger.), n. *Sturts'-ge²-burt*. Sudden, unexpected delivery; sometimes while the mother is standing. [L, 57 (a, 14).]

STUTTERING, n. *Stu^t-u^r'i²n²*. Gr., *τραυλιόμος*. Lat., *balbuties*. Fr., *balbutie*, *bégaiement*. Ger., *Stottern*, *Stammeln*. A defect in speech in which there is a spasmodic repetition of the same syllable. [a, 34.]—**APHASIC** s. The s. of aphasic persons. It is more or less spasmodic in characters. [D, 18.]

STÜTZE (Ger.), n. *Stu^t's-e²*. See FULCRUM.

STÜTZGEWEBE (Ger.), n. *Stu^t's-ge²-vab-e²*. Supporting tissue, usually connective tissue. [J.]

STY, n. *Sti*. See HORDEOLUM.

STYCHNIC ACID, n. *Sti^s-e²r-'i²k*. Fr., *acide stychnique*. Ger., *Stychninsäure*. Phenylglyceric acid; an acid, C₆H₅.CH(OH).CH(OH).CO.OH, crystallizing from ether as shining plates, melting and decomposing at about 144° C. [B, 3 (a, 38).]

STYCHERIN, n. *Sti^s'e²r-'i²n*. Fr., *styrchine*. Ger., *S.* A triatomic alcohol, C₃H₅O₃ = C₃H₄(C₂H₅O)₂, of the aromatic series, derived from glycerin. It forms a light-yellow, gummy, bitter mass. [B, 99 (a, 14).]

STYCEROL, n. *Sti^s'e²r-o²*. Fr., *stycérol*. Phenylglycerol; a substance, C₆H₅.CH(OH).CH(OH).CH₂.OH, occurring as a bitter, gum-like mass decomposing when heated. [B, 3 (a, 38).]

STYLAGRA (Lat.), n. f. *Stilst(u²)-a²g(a²)-ra²*. From *stylos*, a pillar, and *agra*, a seizure. Ger., *Stielzange*. See ANTHROCOXYNIUM.

STYLATE, adj. *Stilst'at*. Having a persistent style. [a, 35.]

STYLE, n. *Stil*. Gr., *στυλος*. Lat., *stylus*. Fr., s. Ger., *Griffel*. 1. The stalk of the stigma; the usually attenuated part of a pistil or carpel, inclosing one or more canals usually filled with thin-walled cellular tissue, connecting the ovary with the stigma. [a, 35.] 2. See STYLET.—**APICAL** s. A s. arising from the top of the ovary. [a, 35.]—**BASAL** s., **BASILAR** s. A s. attached to the base of the ovary. [a, 35.]—**LACRYMAL** s. A stylet made of lead or flexible silver, usually solid, though sometimes tubular, which is introduced through the lacrimal canaliculus and sac into the nasal duct. It is intended to be worn for a length of time in order to maintain the calibre of the duct after a stricture has been divided. [F.]—**LATERAL** s. A s. inserted on one side of the ovary. [a, 35.]

STYLET, n. *Stilst-e²r*. From *stylus*, a pointed instrument. Fr., *s.*, *stilet*, *stilette*. Ger., *Stilet*. 1. A probe. 2. A wire or slender rod passed through a trocar or catheter, for purposes of perforation or of stiffening. [a, 48.]

STYLIUM (Lat.), n. n. *Stilst(u²)-i²d-'i²-u²m(u²m)*. From *stylos*, a pillar. Ger., *Fadenstäichen* (1st def.). 1. In certain *Fungi* (*Podaxine*), a column, formed by the stipe, traversing the peridium. 2. Of Loureiro, the genus *Markea*. 3. Of Swartz, the principal genus of the styliorvites (*Styliaceæ*, *Styliaceæ*, or *Styliaceæ*), an order of monopetalous dictyodendroid plants of the cohort *Campanales*, chiefly Australian herbs. [a, 35.]

STYLINE, adj. *Stilst'i²n*. Lat., *stylinus*. Pertaining to the style. [a, 34.]

STYLISCUS (Lat.), n. m. *Stilst(u²)-i²sk(u²s(u²s))*. Gr., *στυλίσκος* (dim. of *stylos*, a pillar). Fr., *stylisque*. Ger., *Stäichen*. 1. See COLUMELLA (5th def.). 2. The channel leading into the ovary of a flower from the stigma through the style. [a, 35.]

STYLO-AURICULARIS (Lat.), n. m. *Stilst(u²)/'o(o²)-a²r(u²-u²r)-i²k-u²-i²l(u²)-a²l(u²)-i²'s*. From *stylos* (see STYLOID) and *auricula*, the external ear. An anomalous muscle which arises from the styloid process of the temporal bone, and is inserted into the cartilage of the external auditory meatus. [L, 333.]

STYLOCEATOHYOIDEUS (Lat.), n. m. *Stilst(u²)/'o(o²)-se²(ke²l²)/a²u²(a²)-o(o²)-hi²(hu²)-o(o²)-i²d(e²)/e²-u²s(u²s)*. From *stylos* (see STYLOID), *céps*, a horn, and *hyoide²*, hyoid. Fr., *styloceato-hyoïdien*. See STYLOHYOIDEUS.

STYLOCHONDROHYOIDEUS (Lat.), n. m. *Stilst(u²)/'o(o²)-ko²nd(ch²o²nd)/'ro²(ro²)-hi²(hu²)-o²(e²z/as)*. From *stylos* (see STYLOID), *chondros*, cartilage, and *hyoide²*, hyoid. An anomalous muscle which arises from the styloid process of the temporal bone and is inserted into the lesser cornu of the hyoid bone. [L, 332.]

STYLOCORYNA (Lat.), n. f. *Stilst(u²)-o(o²)-ko²r'i²zn(u²n)-a²*. From *stylos*, a pillar, and *κόρυνη*, a club. A genus of the *Rubiaceæ*. [a, 35.]—**S. Rheedii**. A Malabar tree. The root-bark is used as an emmenagogue and to expel the placenta, and the astringent unripe fruit in diarrhoea, dysentery, etc. [a, 35.]

STYLO-GLOSSAL, adj. *Stilst-o-glo²s'g²l*. From *stylos* (see STYLOID), and *γλῶσσα*, the tongue. Pertaining to the styloid process of the temporal bone and to the tongue. [a, 48.]

STYLOGLOSSUS (Lat.), n. m. *Stilst(u²)/'o(o²)-glo²s(glos)/su²s(u²s)*. Fr., *stylo-glosse*. Ger., *Griffelzungenmuskel*. A muscle which arises from the styloid process of the temporal bone and the stylomaxillary ligament and is inserted into the side and lower surface of the tongue nearly to its tip. [L, 31, 142, 332.]

STYLOHYAL, adj. *Stilst-o-hi²'l*. See STYLOHYOID.

STYLO-HYOID, adj. *Stilst-o-hi²oïd*. From *stylos* (see STYLOID), and *hyoide²*, hyoid. Fr., *stylo-hyoïdien*. Pertaining to the styloid process of the temporal bone and to the hyoid bone. [a, 48.]

STYLOHYOIDEUS (Lat.), n. m. *Stilst(u²)/'o(o²)-hi²(hu²)-o(o²)-i²d(e²)/e²-u²s(u²s)*. Fr., *stylo-hyoïdien*. Ger., *Griffelhornzungenbeinmuskel*, *Griffelzungenbeinmuskel*. A muscle which arises from the styloid process of the temporal bone and is inserted into the body or great cornu of the hyoid bone. [L.]—**S. accessorius**, **S. alter**, **S. minor**, **S. novus**, **S. profundus**, **S. secundus**. See STYLOCHONDROHYOIDEUS.

STYLO-HYOIDIEN (Fr.), adj. *Ste^l-o-e-o-e-de-a²n²*. Stylohyoid; as a n., the stylohyoid muscle. [a, 17.]

STYLOID, adj. *Stilstoïd*. From *στυλος*, a pillar, and *είδος*, resemblance. Lat., *styloideus*, *graphoideus*. Fr., *styloïde*. Ger., *stiel förmig*. Resembling a style or pointed instrument (said of certain osseous processes). [a, 48.]

STYLOÏDE (Fr.), adj. *Ste^lo-ïd*. *Styloïde* as a n., a styloid process or bone. [A, 385 (a, 48).]—**S. de l'os hyoïde** [Agassiz]. See *Stylo-hyal bone*.

STYLOLARYNGEUS (Lat.), n. m. *Stilst(u²)/'o(o²)-la²r(la²r)-i²zn(u²n²)/je²(ge²)-u²s(u²s)*. From *stylos* (see STYLOID), and *λάρυγξ*, the larynx. See PHARYNGOEPIGLOTTICUS.

STYLOMASTOID, adj. *Stilst-o-ma²st'oïd*. For deriv., see STYLOID and MASTOID. Fr., *stylo-mastoïdique*. Pertaining to the styloid and mastoid processes of the temporal bone. [a, 48.]

STYLOMAXILLARIS (Lat.), n. m. *Stilst(u²)/'o(o²)-ma²x-(ma²x)-i²l-la(la²)/r'i²s*. Fr., *stylo-maxillaire*. 1. See DIGASTRICUS (2d def.). 2. An anomalous muscle which arises from the styloid process of the temporal bone and is inserted into the stylo-maxillary ligament. [L.]

STYLO-MAXILLARY, adj. *Stilst-o-ma²x'i²l-a-r'i²*. From *stylos* (see STYLOID), and *maxilla* (q. v.). Pertaining to the styloid process of the temporal bone and to the jaw. [a, 48.]

STYLOPHARYNGEUS (Lat.), n. m. *Stilst(u²)/'o(o²)-fa²r(fa²r)-i²zn(u²n²)/je²(ge²)-u²s(u²s)*. From *stylos* (see STYLOID), and *φάρυγξ*, the pharynx. Fr., *stylo-pharyngien*. Ger., *Stielrachenkopfmuskel* (1st def.), *oberer Zungenbeinastmuskel des Schlundkopfes* (2d def.). 1. A muscle which arises from the base of the styloid process of the temporal bone and is inserted into the side of the pharynx, the margin of the glottis, and the pharyngo-epiglottidean ligament. [L, 31, 142, 332.] 2. A muscle of the lower animals arising from the styloid bone and inserted into the side of the pharynx, of which it is a constrictor. [L.]—**S. internus**. An anomalous duplication of the s. [L, 332.]

STYLOPHARYNGOLARYNGEUS (Lat.), n. m. *Stilst(u²)/'o(o²)-fa²r(fa²r)-i²zn(u²n²)/je²(ge²)-u²s(u²s)*. From *stylos* (see STYLOID), *φάρυγξ*, the pharynx, and *λάρυγξ*, the larynx. See STYLOPHARYNGEUS (1st def.).

STYLOPODIUM (Lat.), n. n. *Stilst(u²)/'o(o²)-pod(po²d)/i²-u²m(u²m)*. From *stylos*, a pillar, and *πῶς*, the foot. Fr., *stylopede*. Ger., *Griffelfuss*, *Griffelpolster*. A disc-like enlargement at the base of some styles. [a, 35.]

STYLOSANTHES (Lat.), n. f. *Stilst(u²)-os-a²nth(a²nth)/ez(as)*. From *stylos*, a pillar, and *άνθος*, a flower. A genus of the *Leguminosæ*. The *Stylosanthæ* are a subtribe of the *Hedysæreæ*. [a, 35.]—**S. procumbens**, **S. viscosa**. A laxative and diuretic species found in Brazil. [a, 35.]

STYLOSEPORA, n. *Stilst-o-spor*. From *stylos*, a pillar, and *σπόρος*, a seed. Fr., *s.* A spore borne upon a filament; in lichens, a colorless, usually oblong, body abjoined from a sterigma in a special conceptacle (pynicle). [a, 35.]

STYLO-STAPHYLIN (Fr.), adj. *Ste^l-o-sta²-fe-la²n²*. Pertaining to the styloid process of the temporal bone and to the velum of the palate. [a, 48.]

STYLOSTEGIUM (Lat.), n. n. *Stilst(u²)/'o(o²)-ste²j(ste²g)/i²-u²m(u²m)*. From *stylos*, a pillar, and *στέγος*, a house. Ger., *Griffeldeckel*. See GYNOSTEGIUM.

STYLOSTEMON, n. Stil-o-stem'ō'n. From *σῦλος*, a pillar, and *στέμνον*, a thread. Of Münch, a stamen inserted on the style. [a. 35.]

STYLOSTEMUS (Lat.), adj. Stil(stu)l-(o)-st-(am)u's-(u)s. (u)s. From *σῦλος*, a pillar, and *στέμνον*, a thread. Fr., *stylotème*. Ger., *griffelstempel*. Having a style and stamens; of Desvauz, hermaphrodite. [a. 35.]

STYLOSTEOPHYTUM (Lat.), n. Stil(stu)l-(o)-st-e-o'ph-(i)t-(u)s. From *σῦλος*, a pillar, *ὀστέον*, a bone, and *φυτόν*, a plant. A style-shaped exostosis. [L. 50 (a. 48).]

STYLOSTIXIS (Lat.), n. f. Stil(stu)l-(o)-st-i'x-(i)s. Gen., *-stix-eos* (-is). From *σῦλος*, a pillar, and *στίξις*, a pricking. See *ACUPUNCTURE*.

STYLOSUS (Lat.), adj. Stil(stu)l-(o)-st-u's-(u)s. Having very long or numerous styles. [a. 35.]

STYLO-THYRO-PHARYNGIEN (Fr.), n. Ste-lo-te-ro-fa-rin'2-zhe-an'2. See *STYLOPHARYNGEUS*.

STYLOSTILLARIS (Lat.), n. m. Stil(stu)l-(o)-st-to'ns-(i)en-i'l-la(st)u's-(u)s. From *σῦλος* (see *STYLOID*), and *tonilla*, a tonsil. Of Luschka, fibres of the stylopharyngeus that are inserted into the fibrous covering of the tonsil. [L. 332.]

STYMA (Lat.), n. n. Stim(stu)s'-(a)s. Gen., *stym'atos* (-atis). Gr., *σῦμα* (from *σῦναι*, to erect). Fr., *styme*. See *PRAPISM*.

STYMATOSIS (Lat.), n. f. Sti'm(stu)m-(a)st-(a)st-o's-(i)s. Gen., *-stos* (-is). From *σῦμα*, *prapism*. Ger., *Hemorrhoiden*. Hemorrhage from the penis, especially when associated with priapism. [L. 50 (a. 14); a. 34.]—*S. prostatica*. Ger., *Vorsteherdrüsenhämorrhöenblutung*. S. originating in the prostate. [L. 50 (a. 14).]—*S. seminalis*. S. originating in the seminal vesicles. [L. 50 (a. 14).]—*S. testicularis*. S. originating in the testicles. [L. 50 (a. 14).]

STYPHAGE (Fr.), n. Ste-fa'zh. 1. A process for modifying the action of an energetic external revulsive (or refrigerant) by interposing some textile substance. ["Sem. méd." 1887, p. 419 (a. 18).] 2. Of Bailly, local refrigeration by the application of pledgets of lint steeped in methyl chloride. ["Lancet," Mar. 10, 1888, p. 489 (a. 50).]

STYPHELIA (Lat.), n. f. Sti't(stu)s'-(e)l-(e)l'i'2-a's. From *στυφός*, rough, *styphele*. A genus of the *Stypheliaceae* or *Stypheliaceae* (a division of the *Eparideae*). [a. 35.]—*S. humifusa*. See *ASTROLOMA humifusum*.

STYPHENIC ACID, n. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Ger., *Stypheninsäure*. Trinitroresorcinol, C₆H₃(NO₂)₃(OH)₃, crystallizing from dilute alcohol as large, sulphur-yellow hexagons. [B. 3 (a. 38).]

STYPSIS (Lat.), n. f. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Gen., *styps'eos* (-is). Gr., *στυψις* (from *στυφναι*, to contract). Fr., s. 1. The application or the action of a styptic. [a. 17.] 2. See *CONSTIPATION*.

STYPTERIA (Lat.), n. f. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Gr., *στυπτήρια*. See *ALUM*.—*S. ægyptia*. Egyptian alum; the best sort of alum known to the ancients. It was recommended by Hippocrates as an application to painful swellings of the gums, and mixed with goose-grease, made into a pessary with wool "and applied to the os uteri with a view of promoting fecundity." It is uncertain whether this was a true alum or an iron sulphate. It was made from a stone called chalcitis (*χαλκίτις*), thought by some to be rock-alum. [B. 115, 200.]

STYPTIC, adj. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Lat., *stypticus*. Fr., *styptique*. Ger., *styptisch*. Astringent, hemostatic; as a n. a remedy which arrests hemorrhage by its local astringent action or by coagulating the blood. [a. 17.]—*Eaton's s.* French brandy highly impregnated with calcined green vitriol. [L. 84.]—*Pagliari's s.* See *Aqua hamostatica*.

STYRACIFLUS (Lat.), n. f. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Gen., *styraciflu's* (-u)s. From *styrax*, *styrax*, and *fluere*, to flow. Fr., *styraciflue*. Yielding storax (see *LIQUIDAMBRA styraciflua*).

STYRACIN, n. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Ger., *S. Cinnyl* cinnamate, C₁₅H₁₄O₂(C₆H₅)₂; the chief constituent of liquid storax, occurring as brilliant white bundles of crystals. [B. 3 (a. 38).]

STYRACOL, n. Sti't(stu)s'-(e)l-(e)l'i'2-a's. The cinnamic ether of guaiaicol. It has been recommended as an antiseptic and as a remedy in pulmonary tuberculosis and in chronic gastric, intestinal, and vesical catarrh. [Squibb, "Ephemeris," etc., Feb., 1893.]

STYRACONE, n. Sti't(stu)s'-(e)l-(e)l'i'2-a's. See *CINNAMIC alcohol*.

STYRAX (Lat.), n. m. and f. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Gen., *styr'acos* (-acis). Gr., *στυράξ*. Fr., *aliboufier* (1st def.), *aliboufier* (2nd def.). Ger., *Storaxbaum* (1st def.). 1. A genus of plants forming, with *Symplocos*, *Halesia*, etc., an order [the *Styracaceae* (Fr., *styracées*) or *storaxworts*] of gamopetalous dicotyledons, of the cohort *Ebenales*. The *Styracaceae* (Fr., *styracées*) are: Of Sprengel and others, the *Styracaceae*; of Wood and others, a tribe of the latter. The *Styracaceae* are: Of Humboldt, Bonpland, and Kunth, the *Styracaceae*; of Bartling, a class including the orders *Styracaceae*, *Ebenaceae*, and *Sapotaceae*. The *Styracaceae* are: Of Nees and Martius, the *Styracaceae*; of Spach, the *Styracaceae* of Bartling. [a. 35.] 2. Of the U. S. Ph., see *LIQUID STORAX*. 3. See *STORAX* (1st def.).—*Emplastum styracis compositum*. Sp., *emplastro de estoraque compuesto* [Sp. Ph.]. A plaster consisting of 690 parts of yellow wax, 1,035 of turpentine, 100 each of ladanum and mastic, 80 each of liquid storax and benzoin, 518 of oilbalm, 180 of pimenta, and 7 each of the oils of mint and wormwood. [B. 95 (a. 38).]—*Liquidum styracis* [Swiss Ph.]. A liniment consisting of 30 parts of liquid storax dissolved in 10 of alcohol, strained, and mixed with 5 of oil of sesame. [B. 95 (a. 38).]—*Liquidum styracis*. See *LIQUID STORAX*.—*Onguent de s. (Fr.)*. See *Unguentum styracis*.—*Pilule styracis thebaice* [Swed. Ph.]. Sp., *pildoras de estoraque opiatas* [Sp. Ph.]. A pill-mass consisting of 2 grammes of powdered opium, 4

of s., and 6 of powdered licorice [Swed. Ph.] (or of 1 gramme of extract of opium, 10 grammes of s., and the necessary amount of powdered licorice [Sp. Ph.]), divided into 100 pills. [B. 95 (a. 38).]—*Sapo styracis*. Ger., *Styraxeife*. A mixture of 100 parts of liquid storax, 250 of common soap, and 16 of balsam of Peru. [B. 108 (a. 14).]—*Solid s.* See *STORAX* (1st def.).—*Styracis benzoini balsamum*. See *BENZOIN*.—*S. alba*, *S. albus*. 1. White balsam of Peru. [B.] 2. A translucent, yellowish-red variety of storax, not now found in commerce. [B. 180 (a. 35); B. 200.]—*S. alcockii* (Fr.). See *CINNAMIC alcohol*.—*S. americana*. A shrub found in the southern United States and in the West Indies; said to yield an aromatic stimulant resin. [a. 35.]—*S. aureus*. Fr., *aliboufier doré*. A Brazilian species yielding a fragrant balsam resembling storax. [a. 35.]—*S. benzoini*. Fr., *aliboufier* (ou *aligoufier*) officinal, *aliboufier*. Ger., *gebräuchlicher Benzoëbaum*. The gum-benzoin shrub or tree; indigenous to Sumatra, Java, Borneo, Laos, and Siam. It is the source of benzoin. [a. 35.]—*S. bogotensis*. Ger., *Storax von Bogotä*. A balsamic product of an undetermined tree, probably a species of *S.* growing in Bogotä. [a. 35.]—*S. calamita*, *S. calamites*. Fr., *storax calamite*, *storax en pias* (2d def.). 1. Of the Gr. Ph., a variety of storax, probably produced by *S. officinalis*, consisting of dry brittle masses of yellowish agglutinated tears having the odor of vanilla; not now found in commerce. 2. A modern product found in the shops as a coarse dark powder mixed with a few friable lumps, said to be prepared at Trieste, Venice, and Marseilles by mixing coarsely powdered storax-bark with liquid storax. Sometimes common sawdust is used in place of the storax-bark, and sometimes oilbalm, honey, and earthy substances are added. [a. 35.]—*S. ferrugineus*. Fr., *aliboufier ferrugineux*. A Brazilian species said to yield a product similar to that of *S. officinalis*. [a. 35.]—*S. in gravis*. See *STORAX in grains*.—*S. liquida*. See *LIQUID STORAX*.—*S. liquida folio minore*. Of Ray, probably the *Liquidambra formosana*. [a. 35.]—*S. liquide* (Fr.). *S. liquidus* (orientalis). See *LIQUID STORAX*.—*S. officinalis*. Fr., *aliboufier officinal*, *aliboufier*. Ger., *gebräuchlicher* (oder *officiner*) *Storaxbaum*. The *crucif.* of Dioscorides; a tall bush or small tree growing in countries on the Mediterranean, yielding storax and perhaps amygdaloid storax. [a. 35.]—*S. preparatus*. See *LIQUID STORAX*.—*S. punctatus*. A Veragua species. After the tree is cut down and allowed to remain several years on the ground, a gum-resin is collected from it and used as frankincense. [a. 35.]—*S. purifié* (Fr.). See *LIQUID STORAX*.—*S. reticulatus*. A Brazilian species yielding a fragrant storax-like balsam. [a. 35.]—*S. seife* (Ger.). See *SAP STYRACIS*.—*S. subidentulata*. A species found in southwestern Sumatra, where it is known by the same name (*kajoe kemijanan*) as the *S. benzoini*; possibly the source of a variety of benzoin known as *Penang benjamin* (storax-smelling benjamin). [a. 35.]—*Unguentum cum styrace* [Fr. Cod.], *Unguentum styracis* [Gr. Ph., Swiss Ph.] (*compositum* [Belg. Ph.]). Fr., *onguent de s.* [Fr. Cod.]. Sp., *ungüento de estoraque* [Sp. Ph.]. An ointment consisting of 150 [Fr. Cod.] (149 [Belg. Ph.], 120 [Sp. Ph., Gr. Ph.]) parts each of s., yellow wax, and elemi, with 270 of colophony and 225 of olive-oil [Fr. Cod.] with 319 of larch turpentine and 234 of olive-oil [Belg. Ph.], with 240 each of colophony and olive-oil and 80 of mutton suet [Gr. Ph.], with 240 of colophony and 180 of walnut-oil [Sp. Ph.]; or of 300 parts of s. with 100 of yellow wax, 50 each of colophony and elemi, and 400 of olive-oil [Swiss Ph.]. [B. 95 (a. 38).]

STYROGENIN, n. Sti't(stu)s'-(e)l-(e)l'i'2-a's. A crystalline compound, C₂₀H₁₆O₃, produced by the action of sulphuric acid on storax. [Mylius, "Pharm. Cribl.," 1882, p. 79; "Am. Jour. of Pharm.," July, 1882, p. 370 (B).]

STYROL, **STYROLENE**, n's. Sti'r'ol, -en. Fr., *styrène*. Ger., *Styrol*. Cinnamene obtained from liquid storax; a very refractive aromatic liquid, boiling at 144° C. [B. 3 (a. 38).]—*Styrolene alcohol*. Phenylglycol; a crystalline substance, C₈H₈·CH(OH)·CH₂OH. [B. 3 (a. 38).]

STYROLIC ACID, n. Sti't(stu)s'-(e)l-(e)l'i'2-a's. Fr., *acide styrolique*. See *CINNAMIC acid*.

STYRONE, n. Sti'r'on. Fr., s. Ger., *Styron*. 1. See *CINNAMIC alcohol*. 2. An antiseptic compound of storax and balsam of Peru. ["N. Y. Med. Jour.," June 11, 1892, p. 666 (a. 50).]

STYRONYL, n. Sti'r'on-yl. 1. See *PHENETHYL*. 2. Phenylallyl, C₆H₅·CH·CH₂, the triatomic radicle of cinnamic alcohol. [B. 7, 93 (a. 14).] Cf. *CINNYL*.—*S. alcohol*. See *CINNAMIC alcohol*.—*Phenethyl alcohol*.—*S. chloride*. A liquid, (C₆H₅)₂·CH₂·Cl. [B. 4.]

STYRYL, n. Sti'r'yl. Fr., *styrile*. Ger., *S.* See *STYRONYL*.—*S. alcohol*. See *STYRONYL alcohol*.—*S. ether*. The compound (C₆H₅)₂O. [B. 4.]

STYRYLIC ACID, n. Sti'r'yl-i'2-k. Fr., *acide styrylique*. See *CINNAMIC acid*.

STYSIS (Lat.), n. f. Stis(stu)s'-(i)s. Gen., *stys'eos* (-is). From *stivus*, to erect. See *PRAPISM*.

SUEDA (Lat.), n. f. Su'2-ed'(swa'2-ed)-a's. Fr., *süeda*. A genus of chenopodiaceous herbs and shrubs. The *Suædæ* and the *Suedineæ* are a subdivision (tribe) of the *Spirolobee*. [a. 35.]—*S. fruticosa*. Shrubby saltwort of Arabia, Persia, Egypt, Senegal, Europe, and California; burned for barilla. [a. 35.]—*S. maritima*. Fr., *blanchette*, *blanquette*. Sea-bithe, sea-side goosefoot, white glasswort; growing in Europe and Siberia; used to prepare soda and as salad. [a. 35.]—*S. maxima*, *S. salsa*. Soda-yielding species growing in Russia and on the Mediterranean coasts. [a. 35.]—*S. setigera*. A species found on the southern coasts of Spain and France; used in the preparation of a superior soda (*barilla fina* or *d'Alicante*). [a. 35.]

SUAVEOLENS (Lat.), adj. Swa'2(swa'2)-ve'(we'2)2-(o)l-e'2-nz(ans). Gen., -ent'is. From *suaavis*, sweet, and *olere*, to smell. See *FRAGRANT*.

SUBACETAS (Lat.), n. m. *Su³b(su⁴b)-a²s(a²k)-et(at)/a²s(a²s)*. Gen., *-at'is*. See **SUBACETATE**.—**Aqua subaceticis plumbici**. See **Liquor PLUMBI subaceticis dilutus**.—**Ceratum cum subaceticis plumbico**. See **Ceratum PLUMBI subaceticis**.—**Liquor subaceticis plumbici**. See **Liquor PLUMBI subaceticis**.—**Solutio subaceticis ferri**. See **Liquor FERRI aceticis**.—**Solutio subaceticis plumbici**. See **Liquor PLUMBI subaceticis**.—**Solutio subaceticis plumbici diluta**. See **Liquor PLUMBI subaceticis dilutus**.—**S. cupricus**. See **Copper subacetate**.—**S. plumbicus**. See **LEAD subacetate**.—**S. plumbicus liquidus**. See **Liquor PLUMBI subaceticis**.—**Unguentum subaceticis plumbici**. See **Unguentum PLUMBI**.

SUBACETATE, n. *Su³b-a²s'e²t-at*. Lat., *subacetas*. Fr., *sous-acétate*. A basic acetate. [B.]—**Cupric s.** See **Copper subacetate**.

SUBACROMIAL, adj. *Su³b-a²k'-rom'i²-l*. From *sub*, under, and *acromia*, the acromion. Fr., *sous-acromial*. Situated below the acromion. [a, 48.]

SUBACROMIOTROCHITERIS (Lat.), n. m. *Su³b(su⁴b)-a²k(a²k)-rom'i²-o(o²)-trok(trō'chē)-i²t-e(a²)/r'i²-u²s(u²s)*. For deriv., see *Sub-*, *acromion*, and *TROCHITER*. See **INFRAASPINATUS**.

SUBACUTE, adj. *Su³b-a²k-u²t'*. From *sub*, somewhat, and *acutus*, sharpened. Fr., *subaigu*. Ger., *hathbühlig*. Of disease, showing symptoms less pronounced than in the acute type. [a, 34.]

SUBALARIS (Lat.), adj. *Su³b(su⁴b)-a²l(a²l)/a²l/r'i²s*. Fr., *subalare*. From *sub*, under, and *ala*, a wing. Situated below the axilla. [a, 48.]

SUBALBUMINIZATION, n. *Su³b-a²l-bu'm-in-i²z-a²-shu'n*. From *sub*, under, and *albumin* (q. v.). Fr., *subalbuminisation*. Diminution in the quantity of contained albumin. [B, 146.]

SUBANAL, adj. *Su³b-a²n'l*. Situated below the anus. [a, 48.]

SUBANCONTEUS (Lat.), n. m. *Su³b(su⁴b)-a²n²(a²n²)-ko'n(kon)-e²(a²e²)/u²s(u²s)*. From *sub*, under, and *anconaeus* (q. v.). Fr., *sous-anconé*. Scattered muscular fibres extending between the lower posterior surface of the humerus and the capsule of the elbow. [L.]

SUBAPICULARIS (Lat.), adj. *Su³b(su⁴b)-a²p(a²p)-i²k-u²l(u²l)/a²l/r'i²s*. From *sub*, under, and *apex* (q. v.). Fr., *sous-apiculaire*. Of the arista of grasses, inserted immediately under the apex of the pale. [a, 35.]

SUBARACHNOID, adj. *Su³b-a²r-a²k'noid*. Fr., *sous-arachnoïde*. Situated beneath the arachnoid membrane. [a, 48.]

SUBARBORESCENT, adj. *Su³b-a²r-b-o²-e²s'e²nt*. Lat., *subarborescens* (from *sub*, somewhat, and *arborescere*, to grow to be a tree). Somewhat tree-like in appearance. [a, 35.]

SUBAREOLAR, adj. *Su³b-a²r-e²-o²-la²r*. Lat., *subareolaris*. Fr., *sous-aréolaire*. Situated beneath the areola of the nipple.

SUBASTRAGALAR, adj. *Su³b-a²s-tra²g-a²l-a²r*. Pertaining to what is below the astragalus (cf. **S. AMPUTATION**). [a, 48.]

SUBASTRINGENT, adj. *Su³b-a²s-tri²n'j-nt*. From *sub*, somewhat, and *astringere*, to draw close. Slightly astringent.

SUBATLOIDEUS (Lat.), n. m. *Su³b(su⁴b)-a²t(a²t)-lo²(lo²)-i²d(ed)/e²a²-u²s(u²s)*. See **INFRA-ATLOIDEUS**.

SUBAXIAL, adj. *Su³b-a²x'i²-l*. Situated below the axis.

SUBAXILLARY, adj. *Su³b-a²x'i²-a²-ri²*. Lat., *subaxillaris*. Fr., *sous-axillaire*. 1. Situated beneath the axilla. [a, 17.] 2. See **INFRAAXILLARIS**.

SUBAXOIDEUS (Lat.), n. m. *Su³b(su⁴b)-a²x(a²x)-o²(o²)-i²d(ed)/e²a²-u²s(u²s)*. See **INFRA-AXOIDEUS**.

SUBBASAL, adj. *Su³b-ba²-s'l*. Situated near the base. [L.]

SUBBRACHYCEPHALIC, adj. *Su³b-bra²k'i²-e²se²f-a²l'i²k*. From *sub*, somewhat, *brachy*, short, and *κεφαλή*, the head. Slightly brachycephalic; having the length-breadth index between 78 and 79. [L, 392.]

SUBCÆCAL, adj. *Su³b-se²-k'l*. Situated below the cæcum. [a, 48.]

SUBCARBONAS (Lat.), n. m. *Su³b(su⁴b)-ka²r-b-on'a²(a²s)*. Gen., *-at'is*. See **SUBCARBONATE**.—**S. ammonicus**. Ammonium sesquicarbonate. [B, 119 (a, 38).] See under **AMMONIUM carbonate**.—**S. ferroso-ferricus**. See **IRON carbonate**.—**S. kalicus**. See **POTASSIUM carbonate**.

SUBCARBONATE, n. *Su³b-ka²r-b'o²n-at*. Lat., *subcarbonas*. Fr., *sous-carbonate*. 1. As formerly used, a normal carbonate (as distinguished from a bicarbonate). 2. A neutral or basic carbonate, so called because it contains with relation to its basic constituent less of the carbonic acid radicle than the normal carbonate. [B.]

SUBCARBONIC, adj. *Su³b-ka²r-b-o²n'i²k*. Lat., *subcarbonicus*. Containing a smaller amount of carbon than normal carbonic compounds; of basic carbonates, containing a smaller relative amount of the carbonic acid radicle than the normal carbonates. [B.]

SUBCARBONICUS (Lat.), adj. *Su³b(su⁴b)-ka²r-b-o²n'i²k-u²s(u²s)*. Subcarbonic, containing a subcarbonate; with the name of a base, the subcarbonate of the base. [B.]

SUBCAUDAL, adj. *Su³b-ka²-d'l*. From *sub*, under, and *cauda*, the tail. Situated under the tail or cauda (said in embryology of a rudimentary prolongation of the intestine below the anus).

SUBCENTRAL, adj. *Su³b-se²nt'r'l*. From *sub*, somewhat, and *centrum*, the centre. Nearly central. [a, 27.]

SUBCEREBELLAR, adj. *Su³b-se²r-e²-be²l'a²r*. Situated below the cerebellum. [a, 48.]

SUBCEREBRAL, adj. *Su³b-se²r'e²-br'l*. Situated below the cerebrum. [a, 48.]

SUBCHLORIDE, **SUBCHLORURET**, n's. *Su³b-klor'i²d(i²d)*. -u²r-e²l. Lat., *subchloridum*. Fr., *sous-hydrochlorure*. A chloride

containing less chlorine than another compound considered as the normal chloride; as sometimes used, an oxychloride. [B.]

SUBCHORIONIC, adj. *Su³b-kor-i²-o²n'i²k*. Situated beneath the chorion. [a, 48.]

SUBCLASS, n. *Su³b'kla's*. A grade immediately subordinate to a class and of higher rank than an order or cohort. [a, 35.]

SUBCLAVIAL, **SUBCLAVIAN**, **SUBCLAVICULAR**, adj's. *Su³b-klav'i²-l*, -n, -kla²v'i²k-u²l-a²r. Lat., *subclavius*. Fr., *sous-clavier*, *sous-claviculaire*. Situated beneath the clavicle. [L, 343.]

SUBCLAVIUS (Lat.), adj. *Su³b(su⁴b)-kla(kla²)/v'i²(wi²)-u²s(u²s)*. Subclavian; as a n. m. (Fr., *sous-clavier*; Ger., *Schlüsselsbeinmuskul*, *Unterschlüsselbeinmuskul*, a muscle which arises from a groove on the lower surface of the clavicle and is inserted into the first costal cartilage; also, of Bardeleben, a rare muscle, arising from the clavicle and inserted into the superficial fascia of the pectoralis major. [L, 332.]—**S. posticus**. See **STERNOSCAPULARIS** (1st def.).

SUBCONJUNCTIVAL, adj. *Su³b-ko'n-jun²kt-i²v'l*. Lat., *subconjunctivalis*. Situated beneath the conjunctiva. [a, 48.]

SUBCONTINUAL, **SUBCONTINUOUS**, adj's. *Su³b-ko'n-ti²n-u²-l*, -u²s. From *sub*, somewhat, and *continuum*, uninterrupted. Ger., *halbanhaltend*. Continuous except for slight intermissions.

SUBCORDATE, adj. *Su³b-ko²r'd-at*. From *sub*, somewhat, and *cor*, the heart. Nearly heart-shaped. [a, 35.]

SUBCOSTAL, adj. *Su³b-ko²s't-l*. Lat., *subcostalis* (from *sub*, under, and *costa*, a rib). Fr., *sous-costal*. Situated beneath the ribs or beneath a rib. [a, 48.]

SUBCOTYLEDONARY, adj. *Su³b-ko²t-i²l-ed'o²n-a²-ri²*. Situated beneath the cotyledons (said of the connective tissue of the uterine mucous membrane situated beneath the maternal cotyledons of the placenta).

SUBCRANIAL, adj. *Su³b-kran'i²-l*. Situated below the skull (cf. **S. PLATES**). [a, 48.]

SUBCREPITANT, adj. *Su³b-kre²p'i²-t'nt*. From *sub*, somewhat, and *crepitare*, to crackle. Fr., *sous-crepitant*. Indistinctly crepitant, crackling. [D.]

SUBCRUENTUS (Lat.), adj. *Su³b(su⁴b)-kru²(kru²)-e²nt'u²s(u²s)*. From *sub*, somewhat, and *cruentus*, stained with blood. Somewhat like blood in color. [A, 325 (a, 48).]

SUBCRURÆUS (Lat.), **SUBCRURALIS** (Lat.), n's n. *Su³b(su⁴b)-kru²(kru²)-e²(a²e²)-u²s(u²s)*, -ral(r'al)/i²s. From *sub*, under, and *crus*, the leg. Fr., *sous-crural*. Ger., *unterer Schenkelmuskul*, *Kniesgelenkspanner*. A small muscle lying beneath the cruræus and inserted into the capsule of the knee joint. [L.]

SUBCULTURE, n. *Su³b-ku²l't'u²r*. From *sub*, under, and *cultura*, cultivation. Of Buchanan, a continued cultivation of a virulent microphyte. [i'Practitioner," Mar., 1885, p. 232.]

SUBCUNEUS (Lat.), n. m. *Su³b(su⁴b)-ku²n²(ku²n)/e²-u²s(u²s)*. From *sub*, under, and *cuneus*, a wedge. Ger., *Unterwinkel*. A small group of cerebral convolutions on the lower surface of the occipital lobe, in front of the third occipital convolution, continuous with the gyrus fornicatus. [J, 6 (K).]

SUBCURRENS (Lat.), adj. *Su³b(su⁴b)-ku²r(ku²r)/e²-n²z(rans)*. Gen., *-ren'tis*. From *succurrere*, to run under. See **SUBCURREOS**.

SUBCUTANEOUS, adj. *Su³b-ku²t-an'e²-u²s*. Lat., *subcutaneus* (from *sub*, under, and *cutis*, the skin). Fr., *sous-cutané*. Ger., *subcutan*. 1. Situated immediately beneath the skin. [G.] 2. Of an injection, thrown under the skin.

SUBCUTANEUS (Lat.), adj. *Su³b(su⁴b)-ku²t(ku²t)-an(a²n)/e²-u²s(u²s)*. Subcutaneous; as a n., a subcutaneous muscle. [a, 17.]—**S. collis**. See **PLATYSMA myodes**.—**S. nuchæ**. A muscle arising from the lower surface of the occipital bone and blending with the upper portion of the fascia of the back. [L, 332.]

SUBCUTICULAR, adj. *Su³b-ku²t-i²k-u²l-a²r*. See **SUBEPIDERMIC**.

SUBDELIRIUM (Lat.), n. *Su³b(su⁴b)-de²l(i²d)-i²r(er)/i²-u²m(u²m)*. From *sub*, under, and *delirium*, madness. Fr., *subdelirium*. A mild delirium in which the attention of the patient may be aroused for a longer or shorter interval. [a, 34.]

SUBDENTAL, adj. *Su³b-de²n't-l*. From *sub*, under, and *dens*, a tooth. Situated below the teeth. [a, 48.]

SUBDERMAL, adj. *Su³b-du²r'm'l*. From *sub*, under, and *δέρμα*, the skin. See **SUBCUTANEOUS**.

SUBDIROCTIC, adj. *Su³b-di-kro²t'i²k*. For deriv., see **Sub-*** and **Dicrotic**. Obscurely dicrotic. [a, 34.]

SUBDIVIDED, adj. *Su³b-di²-vi²d-ed*. Lat., *subdivisus* (from *sub*, under, and *dividere*, to divide). Fr., *subdivisé*. Divided again, having secondary divisions. [a, 35.]

SUBDOLICHOCEPHALIC, adj. *Su³b-do²l-i²k-o²-se²f-a²l'i²k*. From *sub*, somewhat, *δολιχός*, long, and *κεφαλή*, the head. Fr., *subdolichocephale*. Having the length-breadth index between 75 and 77.9. [i'Arch. f. Anthrop." xx, p. 310 (a, 33); L.]

SUBDORSO-ATLOIDEUS (Lat.), n. m. *Su³b(su⁴b)-do²rs/o²(o²)-a²t(l)-lo²(lo²)-i²d(ed)/e²a²-u²s(u²s)*. From *sub*, under, *dorsum*, the back, *ἀτλας*, the atlas, and *εἶδος*, resemblance. See **LONGUS colli**.

SUBDURAL, adj. *Su³b-du²r'al*. From *sub*, under, and *dura* (q. v.). Fr., *sous-dure-ménie*. Situated beneath the dura. [a, 18.]

SUBPECTOPIC, adj. *Su³b-e²k-to²p'i²k*. From *sub*, somewhat, and *ἐκτοπος*, out of place. Moderately displaced.

SUBNCEPHALON (Lat.), n. *Su³b(su⁴b)-e²n(e²n²)-se²f(ke²f)/a²l(a²l)-o²n*. From *sub*, under, and *ἐγκεφαλος*, the brain. Ger., *Unterhirn*. The medulla oblongata, pons Varolii, and corpora quadrigemina. [L, 332.]

SUBENDOTHELIAL, adj. $\text{Su}^{\text{b}}\text{-e}^{\text{nd}}\text{-o-thel}^{\text{t}}\text{-l}$. Fr., *sous-endothélial*. Situated beneath an endothelium. [J.]

SUBEPENDYMCLEROSE (Ger.), n. $\text{Zub-e}^{\text{p}}\text{-e}^{\text{nd}}\text{-du}^{\text{m}}\text{-cl-er-oz-e}^{\text{e}}$. Sclerosis beneath the ependyma. [a, 34.]

SUBEPIDERMAL, **SUBEPIDERMIC**, adj's. $\text{Su}^{\text{b}}\text{-e}^{\text{p}}\text{-i}^{\text{d}}\text{-du}^{\text{r}}\text{-m}^{\text{l}}$, $\text{-m}^{\text{l}}\text{2k}$. Fr., *sous-épidermique*. Situated beneath the epidermis. [a, 48.]

SUBÉPINEUX (Fr.), adj. $\text{Su}^{\text{b}}\text{-e}^{\text{p}}\text{-an-e-u}^{\text{s}}$. See **INFRAPIPINOUS**.

SUBEPITHELIAL, **SUBEPITHELIAN**, adj's. $\text{Su}^{\text{b}}\text{-e}^{\text{p}}\text{-i}^{\text{t}}\text{-hel}^{\text{t}}\text{-l}$, -n . Situated beneath the epithelium.

SUBER (Lat.), n. n. (1st def.), m. (2d def.). $\text{Su}^{\text{b}}\text{(sub)}\text{/u}^{\text{r}}\text{(e}^{\text{r}}\text{)}$. Gen., *sub'eris*. 1. See **CORK** (1st def.). 2. A tree that yields cork. —**Cortex suberis**. See **S** (1st def.). —**S. primus**. See **QUERCUS** s.—**S. secundus**. See **QUERCUS ilex**.

SUBERAMIC ACID, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-a}^{\text{m}}\text{-i}^{\text{c}}\text{-i}^{\text{c}}$. Fr., *acide suberamique*. A substance, $\text{C}_6\text{H}_{12}(\text{CO.OH})(\text{CO.NH}_2)_2$, formed by the action of heat on ammonium suberate. [B, 93 (a, 14).]

SUBERANILIC ACID, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-a}^{\text{n}}\text{-i}^{\text{l}}\text{-i}^{\text{c}}$. Fr., *acide subéranilique*. Ger., *Suberänsäure*. A crystallizable substance, $\text{C}_8\text{H}_8(\text{CO.OH})(\text{CO.NH.C}_6\text{H}_5)_2$, found in the alcoholic solution from which suberanilide has been precipitated; an oily liquid which solidifies when cold. [B, 93 (a, 14).]

SUBERANILIDE, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-a}^{\text{n}}\text{-i}^{\text{l}}\text{-i}^{\text{d}}$ (id). Fr., *subéranilide*. A substance, $\text{C}_8\text{H}_8(\text{CO.NH.C}_6\text{H}_5)_2$, produced by the action of aniline on suberic acid under the influence of heat. It forms microscopic crystals. [B, 93 (a, 14).]

SUBERIC, adj. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-i}^{\text{c}}$. Derived from cork. [B.]—**S. acid**. Fr., *acide subérique*. Ger., *Suberinsäure*, *Suberylsäure*, *Korksäure*. A dibasic acid, $\text{C}_6\text{H}_8(\text{CO.OH})_2 = \text{C}_6\text{H}_4\text{O}_4$, obtained from cork by prolonged boiling with nitric acid or by the saponification of castor-oil and other oils and fats. It occurs as long acicular or irregular tabular crystals. [B, 93 (a, 38).]

SUBERICERIN, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-i}^{\text{c}}\text{-er}^{\text{-i}^{\text{n}}}$. Fr., *subéricérine*. Cerin obtained from cork. [B, 93 (a, 14).]

SUBERIFICATION, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-i}^{\text{f}}\text{-i}^{\text{c}}\text{-a}^{\text{t}}\text{-i}^{\text{on}}$. See **CUTINIZATION**.

SUBERIMIDE, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-i}^{\text{m}}\text{-i}^{\text{d}}$ (id). Fr., *subérimide*. Of Arppe, a white crystalline powder obtained by heating suberic acid to 170°C . [B, 93 (a, 14).]

SUBERIN, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-i}^{\text{n}}$. Fr., *subérine*. Ger., *Korkstoff*. A modification of cellulose obtained from cork, resembling (according to some, identical with) cutin; used as a dusting powder. [B, 93 (a, 14) & a, 35.]

SUBERONE, n. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-on}$. Fr., *subérone*. A ketone, $\text{C}_7\text{H}_{10}\text{O}$, derived from suberic acid; a liquid of the odor of peppermint. [B, 2, 3, 93 (a, 38).]

SUBEROSE, **SUBEROUS**, adj's. $\text{Su}^{\text{b}}\text{-e}^{\text{r}}\text{-os}$, -u^{s} . Lat., *suberosus*. Fr., *subéreux*. Ger., *korkig*, *korkartig*. Resembling cork, having a corky texture. [a, 35.]

SUBETH (Ar.), n. See **COMA**.

SUBFAMILY, n. $\text{Su}^{\text{b}}\text{-f}^{\text{a}}\text{-m}^{\text{l}}\text{-i}^{\text{l}}$. From *sub*, under, and *familia*, a family. Ger., *Subfamilie*, *Unterfamilie*. A group immediately subordinate to a family. [a, 48.]

SUBFLAVUS (Lat.), adj. $\text{Su}^{\text{b}}\text{(sub)}\text{-f}^{\text{l}}\text{-a}^{\text{v}}\text{-u}^{\text{s}}$ (vu^{s}). From *sub*, somewhat, and *flavus*, yellow. Yellowish. [a, 35.]

SUBFLUORIDE, n. $\text{Su}^{\text{b}}\text{-f}^{\text{l}}\text{-u}^{\text{r}}\text{-i}^{\text{d}}$ (id). A fluoride containing a smaller amount of fluorine than the ordinary fluoride. [B, 2.]

SUBFRIGIDUS (Lat.), adj. $\text{Su}^{\text{b}}\text{(sub)}\text{-f}^{\text{r}}\text{-i}^{\text{g}}\text{-i}^{\text{d}}$ ($\text{freg}^{\text{t}}\text{-u}^{\text{s}}$). From *sub*, somewhat, and *frigidus*, cold. See **CHILLY**.

SUBFRONTAL, adj. $\text{Su}^{\text{b}}\text{-f}^{\text{r}}\text{-on}^{\text{t}}\text{-al}$. From *sub*, under, and *frons*, the forehead. Situated below the frontal bone. [a, 48.]

SUBGENUS (Lat.), n. n. $\text{Su}^{\text{b}}\text{(sub)}\text{-g}^{\text{e}}\text{-n}^{\text{u}}\text{-u}^{\text{s}}$ (u^{s}); in Eng., $\text{su}^{\text{b}}\text{-jen}^{\text{u}}\text{-u}^{\text{s}}$. Gen., *gen'eris*. Fr., *sous-genre*. Ger., *Untergattung*. A group nearly as important as a genus and immediately subordinate to it, comprising a section or sections of species. [a, 35.]

SUBGERMINAL, adj. $\text{Su}^{\text{b}}\text{-g}^{\text{e}}\text{-r}^{\text{m}}\text{-i}^{\text{n}}$. From *sub*, under, and *germen*, a germ. Situated beneath a germinal structure.

SUBGLENOID, adj. $\text{Su}^{\text{b}}\text{-g}^{\text{le}}\text{-n}^{\text{u}}\text{-i}^{\text{d}}$. Fr., *sous-glénôidien*. See **INFRAGLENOID**.

SUBGLENOIDALIS (Lat.), n. m. $\text{Su}^{\text{b}}\text{(sub)}\text{-g}^{\text{le}}\text{-n}^{\text{u}}\text{(glen)}\text{-o}^{\text{(o)}}\text{-i}^{\text{d}}$ (ed)-al)-a)-l)-i)-s. See **SUBSCAPULARIS minor**.

SUBGLOTTIC, adj. $\text{Su}^{\text{b}}\text{-g}^{\text{lo}}\text{-t}^{\text{t}}\text{-i}^{\text{c}}$. See **INFRAGLOTTIC**.

SUBGRONDATION (Fr.), n. $\text{Su}^{\text{b}}\text{-g}^{\text{r}}\text{-o}^{\text{nd}}\text{-a}^{\text{t}}\text{-i}^{\text{on}}$. An old term for a fracture of the skull. [L, 41 (a, 14).]

SUBHEPATIC, adj. $\text{Su}^{\text{b}}\text{-he}^{\text{p}}\text{-a}^{\text{t}}\text{-i}^{\text{c}}$. From *sub*, under, and *hēpar*, the liver. Fr., *sous-hépatique*. Beneath, on the lower surface of, or in the lower portion of the liver. [L, 41 (a, 14).]

SUBHYDROCHLORAS (Lat.), **SUBHYDROCHLORETUM** (Lat.), n. m. and n. $\text{Su}^{\text{b}}\text{(sub)}\text{-h}^{\text{i}}\text{-d}^{\text{r}}\text{(u)}\text{-r}^{\text{o}}\text{(o)}\text{-ch}^{\text{l}}\text{-or}^{\text{u}}\text{-a}^{\text{s}}$ (a^{s}), $\text{chlor}^{\text{u}}\text{(ch}^{\text{l}}\text{-or)}\text{-et}^{\text{a}}\text{(u)}\text{-m}^{\text{l}}$ (u^{m}). Gen., *at'is*, *et'i*. See **SUBCHLORIDE**.

SUBHYDROSULPHATE, n. $\text{Su}^{\text{b}}\text{-h}^{\text{i}}\text{-d}^{\text{r}}\text{-o}^{\text{s}}\text{-ul}^{\text{f}}\text{-at}$. Lat., *subhydrosulphas*. Fr., *sous-hydrosulfate*. A compound of a base with a smaller amount of hydrogen sulphide than the base can take up; also a subsulphide or oxysulphide. [B.]

SUBHYOID, adj. $\text{Su}^{\text{b}}\text{-h}^{\text{i}}\text{-o}^{\text{i}}\text{-d}$. Fr., *sous-hyoïdien*. See **INFRAHYOID**.

SUB-ICTERIC, adj. $\text{Su}^{\text{b}}\text{-i}^{\text{c}}\text{-te}^{\text{r}}\text{-i}^{\text{c}}$. From *sub*, somewhat, and *icteros*, jaundice. Fr., *subictérique*. Pertaining to icterus in a modified form or degree. [B.]

SUBICULUM (Lat.), n. n. $\text{Su}^{\text{b}}\text{(sub)}\text{-i}^{\text{c}}\text{-u}^{\text{l}}\text{(u)}\text{-u}^{\text{m}}$ (u^{m}). Dim. of *suber*, a support. Fr., *subicule*. Ger., *Unterlage* (1st def.),

Fadenboden (1st def.). 1. The filamentous mycelium of certain *Fungi*. [a, 35.] 2. See **UNCINATE** **GYRUS**.—**S. cornu Ammonis** [Burdach]. See **UNCINATE** **GYRUS**.

SUBINFLAMMATION, n. $\text{Su}^{\text{b}}\text{-i}^{\text{n}}\text{-f}^{\text{l}}\text{-a}^{\text{m}}\text{-a}^{\text{s}}\text{-hu}^{\text{n}}$. Lat., *sub-inflammatio* (from *sub*, somewhat, and *inflammatio*, inflammation). Fr., *s. Ger. gelinde Entzündung*. A slight inflammation of slow progress. [a, 34.]

SUBINTESTINAL, adj. $\text{Su}^{\text{b}}\text{-i}^{\text{n}}\text{-te}^{\text{st}}\text{-i}^{\text{n}}$. From *sub*, under, and *intestinum*, a gut. Situated below the intestine. [a, 48.]

SUBINTRANS, adj. $\text{Su}^{\text{b}}\text{-i}^{\text{n}}\text{-tr}^{\text{a}}\text{-n}^{\text{t}}$. Lat., *subintrans* (from *subintransire*, to go into secretly). Fr., *s. Ger. vorhereintretend, zwischenetretend*. Of a fever, having a second paroxysm begin before the first has wholly subsided. [L, 41 (a, 14).]

SUBINVOLUTION, n. $\text{Su}^{\text{b}}\text{-i}^{\text{n}}\text{-vo}^{\text{l}}\text{-u}^{\text{t}}\text{-i}^{\text{on}}$. Lat., *subinvolutio* (from *sub*, defectively, and *involutio*, a rolling up). Defective involution (as of the uterus). [a, 48.]—**Menstrual s.** S. of the endometrium after menstruation. [M. P. Jacobi, "Am. Jour. of Obstet.," Sept., 1885, p. 915.]

SUBIODIDE, n. $\text{Su}^{\text{b}}\text{-i}^{\text{od}}\text{-i}^{\text{d}}$ (id). A compound of an element or radicle with iodine, containing a smaller proportionate amount of iodine than the ordinary iodide; also, as sometimes used, on oxyiodide. [B.]

SUBIRATS (Sp.), n. $\text{Su}^{\text{b}}\text{-ir}^{\text{a}}\text{-ts}$. A place in Barcelona, Spain, where there are no sulphurous springs. [L, 49 (a, 14).]

SUBJECT, n. $\text{Su}^{\text{b}}\text{-j}^{\text{e}}\text{-kt}$. From *subjicere*, to throw under. 1. An individual subjected to observation, treatment, or experiment. 2. A cadaver used for dissection. [a, 17.]

SUBJECTIVE, adj. $\text{Su}^{\text{b}}\text{-j}^{\text{e}}\text{-kt}^{\text{t}}$. Lat., *subjectivus*. Fr., *subjectif*. Ger., *subjectiv*. Of symptoms, discernible by the patient, but not patent to physical examination (cf. **OBJECTIVE**).

SUBKINGDOM, n. $\text{Su}^{\text{b}}\text{-k}^{\text{i}}\text{-n}^{\text{g}}\text{-d}^{\text{u}}\text{-m}$. A series, a division of a kingdom. In botany there are two, phanerogams and cryptogams. [a, 35.] Cf. **PHYLUM** and **CLASSIFICATION**.

SUBLACRYMAL (G. St.-Hilaire) (Fr.), n. $\text{Su}^{\text{b}}\text{-l}^{\text{a}}\text{-k}^{\text{r}}\text{-e}^{\text{ma}}\text{l}$. See **SPIENAL** **BONE**.

SUBLATIO (Lat.), n. f. $\text{Su}^{\text{b}}\text{(su)}\text{-l}^{\text{a}}\text{(la)}\text{-i}^{\text{o}}\text{(i)}\text{-o}$. Gen., *-on'is*. From *sublatum*, the supine of *tolle*, to lift up. Removal. [a, 48.]—**S. cataractæ**. See **DEPRESSIO cataractæ**.—**S. chorioidæ**. Subchorioid dropsy. [a, 34.]—**S. retinæ**. Detachment of the retina. [a, 34.]

SUBLIGACULUM (Lat.), n. n. $\text{Su}^{\text{b}}\text{(su)}\text{-l}^{\text{i}}\text{-g}^{\text{a}}\text{-c}^{\text{u}}\text{(a)}\text{-l}^{\text{u}}\text{(u)}\text{-m}$ (u^{m}). From *sub*, under, and *ligare*, to bind. See **TRUSS**.

SUBLIGATOR (Lat.), n. m. $\text{Su}^{\text{b}}\text{(su)}\text{-l}^{\text{i}}\text{-g}^{\text{a}}\text{-at}^{\text{a}}\text{(a)}\text{-t}^{\text{or}}$. From *subligare*, to tie below. See **HYPODESMEUS**.

SUBLIGATURA (Lat.), n. f. $\text{Su}^{\text{b}}\text{(su)}\text{-l}^{\text{i}}\text{-g}^{\text{a}}\text{-a}^{\text{t}}\text{(a)}\text{-t}^{\text{ur}}\text{(ur)}\text{-a}^{\text{s}}$. See **TRUSS**.

SUBLIGNEOUS, adj. $\text{Su}^{\text{b}}\text{-l}^{\text{i}}\text{-g}^{\text{e}}\text{-n}^{\text{e}}\text{-u}^{\text{s}}$. Lat., *sublignosus* (from *sub*, under, and *lignum*, wood). Fr., *sous-ligneux*. Of plants, woody at the base and herbaceous at the top. [a, 35.]

SUBLIMAT (Ger.), n. $\text{Zub-le}^{\text{m}}\text{-a}^{\text{st}}$. See **SUBLIMATE** and **CORROSIVE SUBLIMATE**.—**S'aluminat**. See **HYDRARGYRUM bichloratum albuminum**.—**S'holzwoile**. Wood-wool impregnated with corrosive sublimate. —**S'räucherseide**. Fumigation with corrosive sublimate. [B, 108 (a, 14).]—**S'seife**. Silk for sutures made aseptic by boiling for 15 minutes in a 1-to-500 solution of corrosive sublimate. [B, 108 (a, 14).]—**S'seife**. Castile soap containing 1 per cent. of corrosive sublimate. [B, 108 (a, 14).]

SUBLIMATE, n. $\text{Su}^{\text{b}}\text{-l}^{\text{i}}\text{-m}^{\text{a}}\text{-t}$. Lat., *sublimatum*, *sublimatus*. Fr., *s., sublimé*. Ger., *Sublimat*. 1. In sublimation, that portion of a substance which volatilizes and subsequently condenses and assumes the solid form. 2. Any substance usually obtained by sublimation. [B.]—**Corrosive s.** Fr., *sublimé (corrosif)* [Fr. Cod.]. Ger., *ätzendes Quecksilbersublimat*, *Sublimat*. Mercury bichloride; so called on account of its acid properties and its preparation by sublimation. [B.]—**Corrosive s., ganze**. A cake impregnated with a preparation made by dissolving 1 part of mercury bichloride in 100 parts of alcohol, and adding 150 of distilled water, 50 of glycerin, and a little fuchsine. ["Proc. of the Am. Pharm. Assoc.," xxxv (a, 14).]

SUBLIMATION, n. $\text{Su}^{\text{b}}\text{-l}^{\text{i}}\text{-m}^{\text{a}}\text{-i}^{\text{on}}$. Lat., *sublimatio* (from *sublimare*, to lift up on high). Fr., *s. Ger., S. Sublimierung*. The act or process of vaporization of a solid body by means of heat, with subsequent recondensation in a purified but essentially unaltered form. [B.]

SUBLIMATUM (Lat.), n. n. $\text{Su}^{\text{b}}\text{(su)}\text{-l}^{\text{i}}\text{-m}^{\text{a}}\text{(lem)}\text{-at}^{\text{a}}\text{(a)}\text{-t}^{\text{u}}\text{(u)}\text{-m}$ (u^{m}). See **SUBLIMATE**.—**Liquor sublimati corrosivi**. See **Liquor HYDRARGYRI perchloridi**.—**S. dulce**. See **MERCURY chloride**.

SUBLIMATUS (Lat.), n. m. $\text{Su}^{\text{b}}\text{(su)}\text{-l}^{\text{i}}\text{-m}^{\text{a}}\text{(lem)}\text{-at}^{\text{a}}\text{(a)}\text{-t}^{\text{u}}\text{(u)}\text{-s}$ (u^{s}). See **SUBLIMATE**.—**S. corrosivus**. See **MERCURY bichloride**.

SUBLIME, v. t. and intr. $\text{Su}^{\text{b}}\text{-l}^{\text{i}}\text{-m}$. From *sublimare*, to raise on high. Fr., *sublimer*. Ger., *sublimieren*. 1. To subject to sublimation. 2. To undergo sublimation. [B.]

SUBLIME (Fr.), n. $\text{Su}^{\text{b}}\text{-l}^{\text{i}}\text{-m}$. See **SUBLIMIS**.—**S. des doigts**. See **FLEXOR sublimis digitorum**.

SUBLIMÉ (Fr.), adj. $\text{Su}^{\text{b}}\text{-l}^{\text{i}}\text{-e}^{\text{ma}}$. See **SUBLIMED**; as a n., see **SUBLIMATE** and **CORROSIVE SUBLIMATE**.—**Émulsion de s. corrosif**. An emulsion consisting of 12 centigrammes of corrosive sublimate, 4 grammes of ether, 150 grammes of peppermint water, 30 grammes of syrup of marsh-mallow, and the yolks of two eggs. [B, 119 (a, 38).]—**Éthérolé de s. corrosif**. See **ETHER mercurialis**.—**Pommade de s. corrosif**. See **POMADE de Cérille**.—**Solution aqueuse de s. corrosif**. See **Liquor mercurialis**.—**S. corrosif**. See **MERCURY bichloride**.—**S. doux**. See **MERCURY chloride**.—**Trochiscus de s. corrosif**. See **Trochisci muriatis oxygenati** **HYDRARGYRI**.

SUBLIMIRUNG (Ger.), n. Zub-len-e'r-un². See **SUBLIMATION**.
SUBLIMIS (Lat.), adj. Sub³(sub⁴)-lim²(em)¹/i²s. Lit., elevated; superficial; as a n. (Fr., *sublime*), a superficial muscle. [C.]—S. **phalangorum**. See **EPITROCHLEOPHALANGIUS** and **FLEXOR sublimis digitorum**.

SUBLINGUAL, adj. Sub³-lin²n²/gw¹. Fr., *sous-lingual*. Situated beneath the tongue. [C.]

SUBLOBULAR, adj. Sub³-lo²b²/u²l-a²r. Fr., *sublobé* (1st def.), *sous-lobulaire* (2d def.). 1. Indistinctly lobular. 2. Situated beneath a lobule.

SUBLUMBAR, adj. Sub³-lu²m²b²a²r. From *sub*, under, and *lumbus*, a loin. Fr., *sous-lombaire*. Situated under the loins. [a, 48.]

SUBLUMBO-ILIACUS (Lat.), **SUBLUMBOPUBIALIS** (Lat.), n.s. m. Sub³(sub⁴)-lu²m²b²(lu²m²b²/o²o²)-il²(il²)-i²a²k²(a²k²)-u²s(u²s), -pu²b²(pub²)-i²a²(a²l²)/i²s. For deriv., see *Sub*-, *LUMBUS*, *ILIACUS*, and *PUBES*. See *PSOAS parvus*.

SULMBOTIBIALIS (Lat.), n. m. Sub³(sub⁴)-lu²m²b²(lu²m²b²/o²o²)-ti²b²(teb²)-i²a²(a²l²)/i²s. From *sub*, under, *lumbus* (q. v.), and *tibia* (q. v.). See *Long adductor of the leg*.

SULMBOTROCHANTINEUS (Lat.), n. m. Sub³(sub⁴)-lu²m²b²(lu²m²b²/o²o²)-trok²(tro²ch²)-a²nt²(a²nt²)-e²u²s(u²s). From *sub*, under, *lumbus* (q. v.), and *trochantrip* (see *TROCHANTER*). See *PSOAS magnus*.

SUBLUXATION, n. Sub³-lu²x-a²-shu²n². Lat., *subluxatio* (from *sub*, somewhat, and *luxare*, to dislocate). Fr., *S. Gelenk-distorsion*. A partial dislocation of a bone. [E.; L. 30, 41 (a, 14).]

SUBMAXILLAR (G. St. Hilaire) (Fr.), n. Sub³-ma²-la-a²l. The articular bone in fishes. [L, 14.]

SUBMAMMARY, adj. Sub³-ma²-m²a²r-i². Ger., *submamär*. See *INFRA-MAMMARY*.

SUBMARGINAL, adj. Sub³-ma²-r²i²-n²l. From *sub*, under, and *margo*, a margin. Situated near the border. [a, 35.]

SUBMATITÉ (Fr.), n. Sub³-ma²-te-ta. Dullness on percussion. [D, 51.]

SUBMAXILLARY, adj. Sub³-ma²x²/i²a-r-i². From *sub*, under, and *maxilla*, the jaw. Fr., *sous-maxillaire*. Ger., *submaxillär*. Situated beneath the jaw; as a n., the inferior mandible in birds. [L, 343.]

SUBMAXILLO-CUTANEUS (Lat.), n. m. Sub³(sub⁴)-ma²x²(ma²x²/i²l²lo²)-ku²i²(ku²i²-a²na²n²/e²u²s(u²s)). From *sub*, under, *maxilla* (q. v.), and *cutis* (q. v.). Fr., *sous-maxillo-cutané*. See *PLATYSMA myoides*.

SUBMAXILLO-LABIALIS (Lat.), n. m. Sub³(sub⁴)-ma²x²(ma²x²/i²l²lo²)-la²b²(la²b²-i²a²la²l²/i²s). From *sub*, under, *maxilla*, the jaw, and *labium*, the lip. Fr., *sous-maxillo-labial*. See *DEPRESSOR anguli oris*.

SUBMEDIAL, adj. Sub³-med²/i²-l. From *sub*, under, and *medius*, middle. Situated beneath the middle of a structure.

SUBMENTAL, adj. Sub³-me²n²t²l. Fr., *sous-mental*. Ger., *a*. Situated beneath the chin. [C.]

SUBMERGÉ (Fr.), adj. Sub³-me²r²-zha. Submerged, drowned.

SUBMERGED, **SUBMERSED**, adj. Sub³-mu²r²jd²-, mu²r²st²-. Lat., *submersus*. Fr., *submergé*. Ger., *untergetaucht*. Sunk beneath the surface of a liquid; of plants, growing beneath the surface of water. [a, 35.]

SUBMETALLIC, adj. Sub³-me²t²-a²l²/g. From *sub*, somewhat, and *metallum*, a metal. Somewhat metallic. [B.]

SUBMICROSCOPIC, adj. Sub³-mi²k²-ro²s²-ko²p²/i²k. From *sub*, under, *μικρός*, small, and *σκοπεῖν*, to examine. Nearly microscopic; requiring a weak lens for its proper discernment. [B.; L. 41 (a, 14).]

SUBMISSIO (Lat.), n. f. Sub³(sub⁴)-mi²s²/shi²(si²)-o. Gen., -on²is. From *submittere*, to place under. A lowering. [A, 312 (a, 48)]—S. **cordis**. Cardiac systole. [L, 50 (a, 48).]

SUBMORPHOUS, adj. Sub³-mo²r²f²u²s. From *sub*, under, and *μορφή*, form. Intermediate in structure between a crystal and an amorphous body (said of small, rounded bodies having on section a concentrically laminated and radiated appearance, occurring when an insoluble crystalline salt is thrown down in a colloidal medium, and due to the union, molecule by molecule, of the crystal with the colloid). [B, 11.]

SUBMUCOSA (Lat.), n. f. Sub³(sub⁴)-mu²k²(muk²-os²a²). The areolar tissue immediately beneath a mucous membrane. [L.]

SUBMUCOUS, adj. Sub³-mu²k²u²s. From *sub*, under, and *mucosus*, mucous. Situated immediately beneath the mucous membrane. [L.]

SUBMURIAS (Lat.), n. m. Sub³(sub⁴)-mu²s²/mu²i²/ri²-a²s(a²s). Gen., -a²is. A subchloride or oxychloride. [B.]—S. **ammonioac-hydargyrius**. See *Ammoniated MERCURY*.

SUBNASAL, adj. Sub³-na²s²l. From *sub*, under, and *nasus*, the nose. Situated below the nose. [a, 48.]

SUBNITRAS (Lat.), n. m. Sub³(sub⁴)-ni²t²-ra²s(ras²). Gen., -ra²is. See *SUBNITRATE*.—S. **bismuthicus**. See *BISMUTH subnitrate*.—S. **hydrargyrius**. See *MERCURY subnitrate*.—**Tabellæ cum subnitrate bismuthico**. See *TROCHISCI BISMUTHI*.—**Unguentum subnitratiss hydrargyri**. See *Unguentum HYDRARGYRI oxidis rubri*.

SUBNITRATE, n. Sub³-ni²t²/rat. Lat., *subnitras*. Fr., *sous-azotate*, *sous-nitrate*. A basic nitrate. [B.]

SUBNORMAL, adj. Sub³-no²r²m²l. From *sub*, under, and *norma*, a rule. Slightly less than normal. [a, 48.]

SUBNUCLEUS [Spitzka] (Lat.), n. m. Sub³(sub⁴)-nu²(nu²/kle²-u²s(u²s)). From *sub*, under, and *nucleus*, a nucleus. One of the

parts into which the larger collections of nerve-cells are divided by the passage of delicate intersecting fasciculi through them. [“Med. Record,” Oct. 11, 1884, p. 421 (K).]

SUBOCCIPITAL, adj. Sub³-o²k²-si²p²/i²-l. Lat., *suboccipitalis*. See *INFRA-OCCIPITAL*.

SUBOCCIPITALIS (Lat.), adj. Sub³(sub⁴)-o²k²-si²p²(ki²p²)-i²-a²(a²)/i²s. See *INFRA-OCCIPITAL*; as a n., in the m., an anomalous muscle which arises from the external occipital protuberance and is inserted into the superior curved line or blends with the posterior portion of the insertion of the sterno-cleido-mastoides. [L, 332.]

SUBOCCIPITO-BREGMATIC, adj. Sub³-o²k²-si²p²/i²-o²-bre²g²-ma²t²/i²k. For deriv., see *Sub*°, *OCCIPUT*, and *BREGMA*. Extending between the inferior occipital region and the bregma. [L.]

SUBOCULARE (Lat.), n. n. Sub³(sub⁴)-o²k²-u²l²(u²l²-ar²)/e²(e²). From *sub*, under, and *oculus*, the eye. See *MALAR bone*.

SUBORBITAL, **SUBORBITAR**, **SUBORBITARY**, adj.s. Sub³-o²r²b²/i²-l, -ta²r, -ta²-ri². From *sub*, under, and *orbitis*, the orbit. See *INFRA-ORBITAL*.

SUBORDER, n. Sub³-o²r²d²u²r. Lat., *subordo*. Ger., *Unterordnung*. A group immediately subordinate to an order. [a, 35.]

SUBOXIDE, n. Sub³-o²x²/i²-d²(id). Lat., *suboxidum*, *suboxydum*. Fr., *suboxyde*, *sous-oxyde*, *sous-oxyde*. Ger., *Suboxyd*. An oxide which contains less oxygen than the ordinary oxide. [B.]

SUBPARALYTIC, adj. Sub³-pa²r²-a²l²/i²-t²k. From *sub*, somewhat, and *παράλυσις*, paralytic. Slightly paralytic. [a, 34.]

SUBPARIETAL, adj. Sub³-pa²r²-i²e²t²l. From *sub*, under, and *paries*, a wall. Situated below the parietal bone, convolution, or fissure. [a, 48.]

SUBPATELLAR, adj. Sub³-pa²t²-e²l²/a²r. From *sub*, under, and *patella* (q. v.). Situated below the patella. [a, 48.]

SUBPECTORAL, adj. Sub³-pe²k²t²-o²r²l. From *sub*, under, and *pectus*, the chest. Placed below the chest or breast.

SUBPEDUNCULAR, **SUBPEDUNCULATE**, adj.s. Sub³-pe²d²-u²n²k²/u²l-a²r, at. From *sub*, under, and *pedunculus*, a foot-stalk. Fr., *subpediculé* (1st def.), *sous-pédunculaire* (2d def.). 1. Indistinctly pedunculate. 2. Situated beneath a peduncle.

SUBPERICARDIAL, adj. Sub³-pe²r²-i²a²-k²a²r²/i²-l. From *sub*, under, and *pericardium* (q. v.). Fr., *sous-pericardique*. Situated beneath the pericardium. [L, 41 (a, 14).]

SUBPERIOSTEAL, adj. Sub³-pe²r²-i²-o²st²/e²-l. From *sub*, under, and *periosteum* (q. v.). Fr., *sous-périoste*. Beneath the periosteum. [a, 48.]

SUBPERITONEAL, adj. Sub³-pe²r²-i²-t²o²n²-e²l. From *sub*, under, and *peritonæum* (q. v.). Fr., *sous-péritonéal*. Ger., *sub-peritonéal*. Situated beneath the peritonæum. [L, 41 (a, 14).]

SUBPETIOLAR, adj. Sub³-pe²t²/i²-o²-la²r. Lat., *subpetiolaris*. Fr., *sous-pétioleaire*. Ger., *unterblattstielständig*. Situated under the petiole. [a, 35.] See *S. sup*.

SUBPHOSPHORICUS (Lat.), adj. Sub³(sub⁴)-fo²s²(fos²)-fo²-i²-t²u²s(u²s). Of the Gr. Ph., containing a dihydrop phosphate; with the name of a base, the dihydrop phosphate of the base. [B.]

SUBPHRENIC, adj. Sub³-f²re²n²/i²-k. From *sub*, under, and *φῆρ*, the diaphragm. Situated beneath the diaphragm. [a, 34.]

SUBPLACENTA (Lat.), n. f. Sub³(sub⁴)-pla²s²(pla²-k²)-e²nt²a². From *sub*, under, and *placenta* (q. v.). See *DELCIDA vera*.

SUBPLEURAL, adj. Sub³-plu²-a²r. From *sub*, under, and *πλευρά* (see *PLEURA*). Situated beneath the pleura. [L.]

SUBPONTINE, adj. Sub³-po²nt²/i²m. From *sub*, under, and *pons*, a bridge. Situated below the pons Varolii. [a, 48.]

SUBPOPLEITEUS (Lat.), n. m. Sub³(sub⁴)-po²p²-li²-e²a²/u²s(u²s). From *sub*, below, and *poplis*, the ham. See *POPLEITEUS*.

SUBPUBIC, adj. Sub³-pu²b²/i²k. From *sub*, under, and *pubes* (q. v.). Fr., *sous-pubien*. Situated below the pubic arch. [C.]

SUBPUBIOFEMORALIS (Lat.), n. m. Sub³(sub⁴)-pu²b²(pu²-i²-o²)-fe²m²-o²r²-a²l²/i²s. From *sub*, under, *pubes* (q. v.), and *femur* (q. v.). See *ADDUCTOR femoris brevis*.

SUBPUBIOPROSTATICUS (Lat.), n. m. Sub³(sub⁴)-pu²b²(pu²-i²-o²)-pr²o²-st²a²t²(pr²o²-i²)/i²s(u²s). From *sub*, under, *pubes* (q. v.), and *prostate*, the prostate. See *COMPRESSOR prostatae*.

SUBPUBIOTIBIALIS (Lat.), n. m. Sub³(sub⁴)-pu²b²(pu²-i²-o²)-ti²b²(teb²)-i²a²(a²l²)/i²s. From *sub*, under, *pubes* (q. v.), and *tibia* (q. v.). See *Short adductor of the leg*.

SUBPUBIOTROCHANTERICUS (Lat.), n. m. Sub³(sub⁴)-pu²b²(pu²-i²-o²)-trok²(tro²ch²)-a²nt²(a²nt²)-e²a²/i²-u²s(u²s). From *sub*, under, *pubes* (q. v.), and *trochantrip*, a trochanter. A subpubic muscle attached to a femoral trochanter.—S. **externus**. See *Obturator externus*.—S. **internus**. See *Obturator internus*.

SUBRAMOSE, adj. Sub³-ra²m²/os. From *sub*, somewhat, and *ramosus*, full of boughs. Slightly branching. [a, 35.]

SUBREGULARIFLORUS (Lat.), adj. Sub³(sub⁴)-re²g²(rag²)-u²l²(u²l²)-a²(a²)/i²-flor²/u²s(u²s). From *sub*, somewhat, *regularis*, regular, and *flos*, a flower. Fr., *subrégulariflore*. Of the calathidium and disc, composed of flowers in which the corollas are nearly regular. [a, 35.]

SUBRETINAL, adj. Sub³-re²t²/i²-n²l. From *sub*, under, and *retina*, the retina. Fr., *sous-rétinien*. Situated beneath the retina.

SUBRUPÉAL (G. St. Hilaire) (Fr.), n. Sub³-ru²-e²-pa-a²l. The articular bone of the crocodile. [L, 14.]

SUBSALT, n. Sub³-sa²l²t. Fr., *sous-sel*. See *BASIC SALT*.

SUBSCAPULAR, adj. Sub³-ska²-p²u²l-a²r. Lat., *subscapularis*. Situated beneath or on the anterior aspect of the scapula.

SUBSCAPULARIS (Lat.), adj. *Su*^b(*su*⁴)-*skap*^p(*skap*^p)-*u*^l-(*u*^l)-*ari*^ar³]²s. See **SUBSCAPULARIS** as a n. (Fr. *sous-scapulaire*; Ger., *Unter Schulterblattmuskul.*), a muscle arising from nearly the whole of the ventral surface of the scapula and inserted into the lesser tuberosity of the humerus. [L.]—**S. minor**. An anomalous muscle arising from the margin of the scapula and inserted into the capsule of the scapulo-humeral articulation, or into the humerus. [L. 31, 532.]

SUBSCAPULO-CAPSULARIS (Lat.), n. m. *Su*^b(*su*⁴)-*skap*^p-(*skap*^p)-*u*^l(*u*^l)-*o*(*o*³)-*ka*^p(*ka*^p)-*ps*^u-*u*^l(*u*^l)-*a*(*a*²)]²s. From *sub*, under, *scapula* (*q. v.*), and *capsula*, a capsule. See **SUBSCAPULARIS minor**.

SUBSCAPULOHUMERALIS (Lat.), n. m. *Su*^b(*su*⁴)-*skap*^p-(*skap*^p)-*u*^l(*u*^l)-*o*(*o*³)-*hu*^m(*hu*^m)-*e*r^a-*ala*³]²]²s. From *sub*, under, *scapula* (*q. v.*), and *humerus* (*q. v.*). See **SUBSCAPULARIS minor**.

SUBSCAPULOHYOIDEUS (Lat.), n. m. *Su*^b(*su*⁴)-*skap*^p-(*skap*^p)-*u*^l(*u*^l)-*o*(*o*³)-*hi*^u(*hi*^u)-*o*(*o*³)-*i*²(*i*²)-*u*^l(*u*^l)-*s*]²s. From *sub*, under, *scapula* (*q. v.*), and *hoyoideus*, hyoid. Of Percival, see **OMOHYOIDEUS** (2d def.).

SUBSCAPULOTROCHINEUS (Lat.), n. m. *Su*^b(*su*⁴)-*skap*^p-(*skap*^p)-*u*^l(*u*^l)-*o*(*o*³)-*tro*^h(*tro*^h)-*ch*³]-*u*^l(*u*^l)-*e*²-*u*^l(*u*^l)-*s*]²s. From *sub*, under, *scapula* (*q. v.*), and *trochæus*, a runner. See **SUBSCAPULARIS**.

SUBSCRIPTIO (Lat.), n. f. *Su*^b(*su*⁴)-*skri*^p(*skri*^p)-*shi*²(*ti*²)-*o*. Gen., *-on*is. From *subscribere*, to write underneath. In a prescription, the directions to the pharmacist, showing how the ingredients are to be compounded and prepared. [B. 10.]

SUBSECTION, n. *Su*^b-*se*^k-*shu*ⁿ. Lat., *subsectio* (from *sub*, under, and *secare*, to divide). A group immediately subordinate to a section. [A. 35.]

SUBSEROUS, adj. *Su*^b-*ser*^us. From *sub*, under, and *serum* (*q. v.*). Fr., *sous-séreux*. Situated beneath a serous membrane. [L. 56 (a. 43).]

SUBSESSILE, adj. *Su*^b-*se*^s-*si*²]. Lat., *subsessilis* (from *sub*, somewhat, and *sessilis*, sessile). Fr., *s.* Having a very short support or stalk; nearly sessile. [A. 35.]

SUBSPECIES (Lat.), n. f. *Su*^b(*su*⁴)-*spe*(*spe*²)-*si*²(*ki*²)-*ez*(*as*); in Eng., *sub*³-*spe*³-*shez*. Gen., *-ei*. From *sub*, under, and *species* (*q. v.*). A variety having such decided characteristics as nearly to have the characters of a distinct species. [A. 35.]

SUBSTANCE, n. *Su*^b-*st*^us. Gr., *ὕλη*, *hulē*. Lat., *substantia* (from *substare*, to be present). Fr., *s.* Ger., *Substanz*. 1. That of which anything is composed or of which it consists. [A. 48.] 2. In histology, a general term for tissue, etc. [J.]—**Adamantine s.** See **ENAMEL**.—**Adenoid s.** See **ADENOID TISSUE**.—**Alb s.** That portion of the chyme that is destined for the nourishment of the body. [L. 42.]—**Alimentary s.** An article of food in the crude form as supplied by Nature. [K. 14.]—**Basis s.** (Heitzmann). 1. See **Ground s.** (1st def.). 2. In connective tissue, etc., the entire s., except protoplasmic bodies or cells. [J. 26.]—**Bony basis s.** See **Osseous basis s.**—**Cancellated (or cancellous) osseous s.** See **Spongy bone s.**—**Cartilaginous basis s.** Of Heitzmann, chondrin. [J. 26.]—**Cell s.** See **PROTOPLASM**.—**Central gelatinous s.** See **SUBSTANTIA GELATINOSA**.—**Chondrogenous basis s.** See **CHONDRIUM**.—**Cineritious s.** See **ALA CINEREA** and **LAMINA CINEREA**.—**Compact osseous s.** Ger., *dichte Knochensubstanz*. The more compact tissue found in long bones and forming the superficial portion of flat or short bones. [L. 332.]—**Conglobate gland s.** The adenoid tissue of conglobate glands. [J.]—**Connective s.** See **CONNECTIVE TISSUE**.—**Contractile s.** 1. Any living s., or tissue capable of contraction (e.g., undifferentiated protoplasm, muscular tissue, cilia, etc.). [J. 2.] The contractile portion of a muscle fibre (i. e., that within the sarcolemma). [L. 332.] 3. See **Dark disc**.—**Cork s.** Cutin. [A. 35.]—**Cortical s. of a hair.** The bundles of fibres cemented together which constitutes the larger portion of a hair. In colored hairs they contain pigment granules. [L.]—**Cortical s. of the kidney.** The portion of the kidney immediately beneath its fibrous covering. It is of a light crimson-brown color and about two lines in thickness, sends numerous processes (columns of Bertini) between the pyramids, and contains the Malpighian corpuscles and the terminals of the renal artery. [L.]—**Cortical s. of the suprarenal capsule.** The s. forming the external and greater portion of the suprarenal capsule. It consists of a fibrous stroma containing column-like groups of polyhedral cells. [L.]—**Fibrinoplastic s.** Paraglobulin. [B.]—**Fibrous basis s.** Of Heitzmann, the fibrous or laminated s. of striated or fibrous connective tissue, yielding glue or a glue-like body on being boiled. [J. 26.]—**Fused ganglion-cell s.** See **NEUROGLIA**.—**Gelatinous central s.** See **SUBSTANTIA GELATINOSA CENTRALIS**.—**Gelatinous ganglion-cell s.** See **NEUROGLIA**.—**Gelatinous s.** See **SUBSTANTIA GELATINOSA**.—**Gelatinous s. of Roland.** See **SUBSTANTIA GELATINOSA ROLANDI**.—**Germinal s.** See **GERM LAMINA**.—**Ground s.** Fr., *intercellulaire*. Ger., *Grundsubstanz*. *Zwischen*-*substanz* (1st def.). *Kittsubstanz* (1st def.). 1. The homogeneous s. or matrix in which the structural elements (cells and fibres) are imbedded, or which cements them together. Cf. **Cell-cement**. 2. The homogeneous hyaline material in the substance of cells in which is imbedded the network of protoplasm. [J.] See **PLASM**, **ENCHYLEMA**, and **STROMA**.—**Horny s.** See **CORNEOUS TISSUE**.—**Hyaline s.** See **HYALINOLASTEMA** (1st def.).—**Hyaloid s.** See **CORPUS VITREUM**.—**Intercellular s.** 1. See **CYTOSOLASTEMA** (1st def.). 2. See **Ground s.** (1st def.).—**Interfibrillar s.** See **ENCHYLEMA**.—**Interglobular s.** Of Czermak, the s. of dentin which appears to contain irregular cavities when a cross-section is dried in the air. It is most marked next the cementum. [J. 30, 35.]—**Intermediate s.** See **Ground s.** (1st def.) and **Lateral disc**.—**Interstitial s.**—**Interstitial s.** Osseous tissue between the lamellæ of bone. [L. 332.]—**Interstitial s.** See **ACHROMATIN**, **CYTOSOLEMA**, and **ENCHYLEMA**.—**Intertubular s.** The homogeneous matrix of dentin in which the dentinal canals are situated. [L. 351.]—**Intervertebral s.**

See **INTERVERTEBRAL CARTILAGES**.—**Isotrope s.** See **Lateral disc**.—**Living s.** See **PROTOPLASM**.—**Medullary s.** Lat., *tela medullaris*. Fr., *tissu médullaire*. Ger., *Markgewebe*. 1. The s. forming the medulla of a part, as of bone; the tissue forming the medullary in contradistinction to the cortical part of an organ, as of the kidney. [G.] 3. In botany, pith. [A. 35.]—**Medullary s. of hair.** The hair-pith. See **SEROTIN**.—**Medullary s. of the kidney.** The portion of the kidney internal to and denser and more distinctly striated than the cortical s. It consists mainly of the pyramids of Ferrein and the papillæ. [L.]—**Medullary s. of the suprarenal capsules.** The internal portion of the suprarenal capsules. It consists of a reticular fibrous stroma inclosing irregularly shaped cells and venous capillaries. [L.]—**Middle perforated s.** See **POSTERIOR PERFORATED SPACE**.—**Molecular (ganglion-cell) s.** See **NEUROGLIA**.—**Mucoid basis s.** Myxomatous basis s. Of Heitzmann, the non-glue-yielding, translucent s. which distinguishes the form of connective tissue called by him myxomatous or mucoid. [J. 26.]—**Nervous s.** See **NERVOUS TISSUE**.—**Nuclear s.** See **CHROMATIN** and **NUCLEOPLASM**.—**Nucleoplasmic s.** See **NUCLEOPLASMIC BODY**.—**Osseous basis s.** Of Heitzmann, "a dense, opaque, glue-yielding s. of striated or laminated appearance, infiltrated with lime salts" which serves to distinguish bone. [J. 26.]—**Osseous s. of a tooth.** See **DENTIN**.—**Osteogenic s.** See **OSTEOGEN**.—**Osteoid s.** See **CAUSEY** (2d def.).—**Parietal s.** Of Remak, the matrix of cartilage. [J. 35.]—**Proteic s.** See **PROTEIN**.—**Reticular s.** See **RETICULAR FORMATION**.—**Reticular s. of bone.** See **Spongy bone s.**—**Reticulated white s.** Lat., *substantia reticularis alba*. A reticulated layer of white nervous tissue on the anterior half of the uncinate gyrus. [L. 31, 142.]—**Rolando's gelatinous s.** See **SUBSTANTIA GELATINOSA ROLANDI**.—**Sarcoid s.** See **SARCOIDE**.—**Secondary s.** See **Lateral disc**.—**Solid nutritive s's.** Solid materials (e.g., eggs, slices of potatoes and of carrots, gelatin, gelose, and gelatinized blood-serum) used in bacteriological cultures. [L. 164 (a. 27).]—**Spongy bone (or osseous) s.** Bone tissue containing numerous cavities, giving it a cancellated appearance; found in the articular ends of long bones and in the interior of the short and flat bones. [B. L. 332.]—**Spongy s. of the nerve-centres.** See **NEUROGLIA**.—**S. amorphe** (Fr.). See **ACHROMATIN**.—**S. blanche perforée de Vica d'Azyr** (Fr.). See **ESPACE PERFORÉ LATÉRAL**.—**S. cellulaire** (Fr.). Cellular tissue. [A. 35.]—**S. centrale** (Fr.). See **LAMINA CINEREA**.—**S. centrale** (Fr.). The central gray matter of the brain. [L. 36 (K).]—**S. conjonctive** (Fr.). See **CONNECTIVE TISSUE**.—**S. criblée antérieure** (Fr.). See **Anterior perforated space**.—**S. criblée postérieure**. See **POSTERIOR PERFORATED SPACE**. [L. 39.]—**S. de soutien** (Fr.). See **CONNECTIVE TISSUE**.—**S. éburnée** (Fr.). See **DENTIN**.—**S. émaillee** (Fr.). See **ENAMEL**.—**S. gélatineuse centrale** (Fr.). See **SUBSTANTIA GELATINOSA**.—**S. herbacée** (Fr.). Cellular tissue. [A. 35.]—**S. noire** (de Sömmerring) (Fr.). See **LOCUS NIGER**.—**S. perforée antérieure** (Fr.). See **Anterior perforated space**.—**S. perforée médiane** (Fr.). See **POSTERIOR PERFORATED SPACE**.—**S. perforée médiane antérieure** (Fr.). See **Anterior perforated space**.—**S. perforée (médiane) moyenne (ou postérieure)** (Fr.). See **POSTERIOR PERFORATED SPACE**.—**S. rhomboidale** (Fr.). See **CORPUS DENTATUM**.—**S. striée** (Fr.). See **ENAMEL**.—**S. ternaïre** (Fr.). A non-nitrogenous principle composed of three elements. [A. 18.]—**S. tubuleuse** (Fr.). See **DENTIN**.—**S. vitrée** (Fr.). See **ENAMEL**.—**Supporting s.** Ger., *Stützsubstanz*. A supporting tissue of s. (e.g., neuroglia, connective tissue, etc.). [J.]—**Ventricular gray s.** Ger., *graues Boden*. Of Meynert, the gray matter immediately adjacent to one of the ventricles of the brain; also the floor of the fourth ventricle. [J. 31 (K).]—**Vitreous s.** See **ENAMEL**.—**White s. of Schwann**. The medullary sheath of a nerve. [L.]

SUBSTANTIA (Lat.), n. f. *Su*^b(*su*⁴)-*sta*ⁿ(*sta*ⁿ)-*shi*²(*ti*²)-*a*³. See **SUBSTANCE**.—**S. adamantina**. See **ENAMEL**.—**S. antica media**. See **Anterior perforated space**.—**S. callosa**, **S. candida**. The medullary cerebral substance. [L. 3 (K).]—**S. cinerea**. Gray nervous matter. [L.]—**S. cinerea gelatinosa**. See **S. gelatinosa**.—**S. cineritia**. The gray substance of the brain. [L. 3 (K).]—**S. conjunctoria**. See **CONNECTIVE TISSUE**.—**S. corticalis** (cerebri). The cortex cerebri. [L.]—**S. corticalis lentis**. The peripheral portion or cortex of the lens, as distinct from the nucleus. [F.]—**S. corticalis pili**. See **Cortical substance of a hair**.—**S. corticalis renis**. See **Cortical substance of the kidney**.—**S. cribrosa lateralis**. See **Anterior perforated space**.—**S. cribrosa media**. See **LAMINA CINEREA**.—**S. dentata ossea**. The cement of a tooth. [L.]—**S. dentata tubulosa**. See **DENTIN**. The tissue forming the teeth (enamel, cement, and dentin). [J.]—**S. dentis propria** (seu tubulosa), **S. eburnea**. See **DENTIN**.—**S. ferruginea**. 1. See **S. grisea**. 2. The gray substance of the locus cæruleus. [J. 6 (K).]—**S. ferruginea Arnoldii**. See **S. ferruginea** (2d def.).—**S. ferruginea superior**. See **NUCLEUS OF THE TEGMENTUM**.—**S. fibrosa pili**. See **Cortical substance of a hair**.—**S. filamentosa**. See **ENAMEL**.—**S. flava**. Ger., *gelbe Substanz*. The yellow nervous substance of the brain. [J. 3 (K).]—**S. fundi mentalis**. See **Substantia intertubularis**.—**S. fusca**. See **S. nigra**.—**S. gelatinosa**. Neuroglia having a transparent, jelly-like appearance when fresh. [J.]—**S. gelatinosa centralis**. Ger., *centrales Höhlengrau, grauer Centraltrern, Ringcommissur*. Syn.: *central ependymal thread, gray central nucleus*. The hollow, cylindrical or ellipsoidal mass of neuroglia surrounding the central canal of the myel and forming a kind of membrane upon which rests the epithelium of the central canal. It is composed of an amorphous substance, granules, fine fibres, and a few neuroglia cells, and in the fresh state appears translucent like jelly. [J. 10, 21, 30.]—**S. gelatinosa columna posterioris**, **S. gelatinosa Rolandi**. Neuroglia of a peculiarly transparent appearance found in the tip of the posterior gray cornu in the myel. It is supposed to contain very few true nerve-elements. [J. 10, 30, 32.]—**S. glandulosa**. Of Viessens, the gray substance of the cortex cerebri. [I. 3 (K).]—**S. glomerulosa**. The cortical substance of the kidney. [J. 16.]—**S. grisea**. The central gray nervous matter of the spinal cord. [J. 6 (K).]—**S. hepatis brunnea** (seu corti-

calis). The outer and darker-colored portion of the liver. [L.]—**S. hepatis flava** (seu medullaris). The yellowish or deeper substance of the liver in contradistinction to the brown or cortical substance. [L, 50 (a, 50).]—**S. innominata.** Of Reil, see *ANSA OF REIL*.—**S. hyalina.** See **CYTOBLASTEMA** (1st def.).—**S. intermedia.** Of Sömmerring, the layer of nerve-substance in the cerebellum interposed between the central and cortical gray zones. [I, 3 (K).]—**S. intertubularis dentis.** See **Intertubularis substance**.—**S. lentis corticalis.** The cortex of the lens. [L.]—**S. lenis pulposa** (seu rubra, seu vasculosa). See **Splenic PULP**.—**S. medullaris.** See **Medullary substance**.—**S. medullaris pili.** The hair-pith (see under **HAIR**).—**S. medullaris renis.** See **Medullary substance of the kidney**.—**S. nigra Soemmerringii.** See **LOCUS niger**.—**S. ochracea.** See **LYGGA NUCLEUS OF THE CORPUS STRIATUM**.—**S. opaca.** Of Leydig, see **PROTODERMIS**.—**S. ossea.** See **DENTIN**.—**S. ossium compacta.** See **Compact osseous substance**.—**S. ossium corticalis.** Ger., *Knorpelrinde*. The more condensed layer forming the outer surface of bone. [L, 332.]—**S. ostioidea.** See **CEMENT** (2d def.).—**S. parenchymatosa.** See **PARENCHYMA**.—**S. perforata anterior** (seu antica). See **Anterior perforated space**.—**S. perforata cinerea.** See **Posterior perforated space**.—**S. perforata lateralis.** See **Anterior perforated space**.—**S. perforata media** (seu posterior). See **Posterior perforated space**.—**S. primaria.** Of Stenson, the medullary substance of the central and I, 3 (K).—**S. propria.** The parenchyma or true tissue of the cornea. [L.]—**S. propria dentis.** See **DENTIN**.—**S. propria of the membrana tympani.** See **Lamina propria of the membrana tympani**.—**S. pulposa dentis.** See **Dental PULP**.—**S. pulposa lenis.** See **Splenic PULP**.—**S. renis cinerita** (seu fibrosa, seu glandulosa, seu interna, seu medullaris, seu tubulosa). See **Medullary substance of the kidney**.—**S. renis corticalis** (externa, seu glandulosa, seu rubicunda). The cortical substance of the kidney. [L, 7.]—**S. reticularis.** See **Reticular formation**.—**S. reticularis alba.** See **Reticulated white substance**.—**S. Rolandi.** See **gelatinosa Rolandi**.—**S. rubra** (lenis). See **Splenic PULP**.—**S. secundaria.** Of Carus, the gray matter of the cortex cerebri. [I, 3 (K).]—**S. Soemmerringii.** See **LOCUS niger**.—**S. striata.** See **ENAMEL**.—**S. strata.** See **S. flava**.—**S. tubulosa dentis.** See **Medullary substance of the kidney**.—**S. tubulosa lenis.** See **DENTIN**.—**S. vasculosa** (lenis). See **Splenic PULP**.—**S. vasculosa renalis.** See **Cortical substance of the kidney**.—**S. visceralis.** See **PARENCHYMA**.—**S. vitrea.** See **S. gelatinosa Rolandi**.—**S. vitrea dentis.** See **ENAMEL**.—**S. vitrea ossis.** See **Compact osseous substance**.

SUBSTANTZ (Ger.), n. **Zub-sta'nts**. See **SUBSTANCE**.—**Braune S.** Of Gordon, the gray matter of the brain. [J, 3 (K).]—**Centrale S.** See **Aquiductus**. The gray matter surrounding the aqueduct of Sylvius. [I, 17 (K).]—**Dichte Knochen's.** Compact osseous substance. [L.]—**Conglobate S.** See **Adenoid tissue**.—**Gallert's.** See **Gelatinous tissue**.—**Geförnte S.** See **Formed material**.—**Gelatinöse S.** See **SUBSTANTIA gelatinosa**. [I, 6.]—**Gelbe S.** See **SUBSTANTIA flava**.—**Graue gelatinöse S.** A thin layer of nerve-cells and neuroglia on the dorsal aspect of the olfactory bulb. [I, 17 (K).]—**Kern's.** See **Nuclear substance**.—**Knochengrunde's.** The ground substance of bone. [J.]—**Knochen's.** Osseous tissue. [L.]—**Mittlere durchlöcherichte S.** See **Posterior perforated space**.—**Mutter-S.** That substance which is supposed to give rise to the active principle of the digestive fluids. [K, 16.] Cf. **PEPSINOGEN** and **ZYMOGEN**.—**Periphere graue S.** See **STRATUM cinereum**.—**Punkte's.** See **NEUROSPONGIUM**.—**Rindige S.** Cortical substance. [L.]—**Rosfarbige S.** **Rothbraune S.** **Rothgelbe graue S.** See **ALA cinerea**.—**Schwammige Knochen's.** **Schwammige S.** See **Spongy osseous substance**.—**Sömmerring'sche S.** See **LOCUS niger**.—**Spongiose Knochen's.** See **Spongy osseous substance**.—**Stütz's.** See **Supporting substance**.—**S'inseln.** The masses of interstitial tissue intervening between the blood-vessels of the germinal area of the ovum. [A, 8.]—**Vordere durchlöcherichte S.** See **Anterior perforated space**.—**Weisse reticuläre S.** See **FORMATIO reticularis alba**.—**Zwischen's.** See **MATIX** (2d def.).

SUBSTERNAL, adj. **Su'b-stu'ér-n'l.** See **INFRASTERNAL**.

SUBSTITUTION, n. **Su'b-sti'tu'-u'sh'ún.** Lat., *substitutio* (from *substituere*, to substitute). 1. In chemistry, the process of replacing one or more atoms in a molecule by other atoms or molecules. [B, 2.] In physiology and pathology, compensatory or vicarious action; a manifestation of disease in alternation with another and especially a nervous disorder; of French writers, replacement of the tissue of an organ by an inflammatory product. ["Edinb. Med. Jour." Apr., 1888, p. 895 (a, 17).]—**S. parenchymatose** (Fr.). Of Luton, the process of producing local artificial inflammation by injections of a common salt or potassium nitrate solution. [L, 57 (a, 14).]—**S. product.** In chemistry, a product of the reaction of two bodies in which a molecule of one replaces a portion of the molecule of the other. [B.]

SUBSTRATUS (Lat.), adj. **Su'b(su'b)-strat(stra't)-u's(u's).** From *substrere*, to spread beneath. Ger., *untergebreitet*. Spread under; so placed beneath another part as to form a substratum. [a, 35.]

SUBSULFAS (Lat.), n. m. **Su'b(su'b)-sul'f(su'l'f)-a's(a's).** Gen., *-fa's*. See **SUBSULPHATE**.—**S. hydrargyricus.** See **MERCURY subsulphate**.

SUBSULFUROSUS (Lat.), adj. **Su'b(su'b)-sul'f(su'l'f)-u's(u's)-u's(u's).** Hyposulphurous; with the name of a base, the hyposulphite (thiosulphate) of the base. [B.]

SUBSULPHAS (Lat.), n. m. **Su'b(su'b)-sul'f(su'l'f)-a's(a's).** Gen., *-phat's*. See **SUBSULPHATE**.—**Pilula subsulphatis ammonico-cuprici.** See **Pilula ammoniariet cupri**.—**S. chinicus.** See **QUININE sulphate**.—**S. cinchoninus.** See **CINCHONINE sulphate**.—**S. cinchonidinus.** See **CINCHONIDINE sulphate**.—**S. quinicus.** See **QUININE sulphate**.—**S. quindicus.** See **QUINIDINE sulphate**.

SUBSULPHATE, n. **Su'b-sul'f'at.** Lat., *subsulphas*, *subsulphas*. Fr., *sousulfate*. A basic sulphate. [B.]

SUBSULPHIDE, n. **Su'b-sul'f'id'id.** A sulphide which contains a relatively smaller amount of sulphur than an ordinary sulphide. [B.]

SUBSULTUS (Lat.), n. m. **Su'b(su'b)-sul't(su'l't)-u's(u's).** From *subsilire*, to leap up. Fr., *sousaut*. Ger., *Hüpfen*. A jerking or twitching. [a, 17.]—**S. tendinum.** Ger., *Schneckenhipfen*. Trembling of the tendons caused by involuntary twitches of the muscles, especially of the face and arms. [D, 1.]

SUBTEGMEN (Lat.), n. m. **Su'b(su'b)-te'g'm'e'n.** Gen., *-teg'minis*. From *subtegere*, to weave under. Weft. [A, 312 (a, 48).]—**S. fornicis.** The layer of nerve-fibres in the fornix cerebri under the superficial bundles of longitudinal fibres. [I, 3 (K).]

SUBTEMPORAL, adj. **Su'b-te'mp'o'ra'l.** See **INFRATEMPORAL**.

SUBTERCUTANEUS (Lat.), n. m. **Su'b(su'b)-tu'r(tu'r)-ku't(ku't)-an(a'n)-e'u's(u's).** From *subter*, beneath, and *cutis*, the skin. See **PLATYSMA myodes**.

SUBTERRANEUS, adj. **Su'b-te'r'an-e'u's.** Lat., *subterraneus* (from *sub*, under, and *terra*, the earth). Fr., *souterré*, *souterrain*. Ger., *unterirdisch*. Growing beneath the surface of the soil. [a, 35.]

SUBTHALAMIC, adj. **Su'b-tha'l'a-m'i-k.** From *sub*, under, and *thalamus* (q. v.). Situated below the optic thalamus. [a, 48.]

SUBTHALAMICUM (Lat.), n. n. **Su'b(su'b)-tha'l'(tha'l')-a'm(a'm)-i'k-u's(u'm).** See **Subthalamie NUCLEUS**.

SUTHORACIC, adj. **Su'b-tho'r-a's'i'k.** See **INFRAThorACIC**.

SUTHYREOIDEUS (Lat.), n. m. **Su'b(su'b)-thir(thu'r)-e'o(o)-i'd'id(ed)-e'u's(u's).** For deriv., see *Sub-* and *THYREOID*. An anomalous bundle of muscular fibres uniting the thyreo-arytenoid inferior and lateralis. [L, 333.]

SUBTRIBE, n. **Su'b'trib.** Lat., *subtribus* (from *sub*, under, and *tribus*, a tribe). A group ranking between the tribe and the genus. [a, 35.]

SUBTROCHANTERIC, adj. **Su'b-trok-a'nt-e'r'i'k.** Fr., *sous-trochanterien*. See **INFRAtrochanTERIC**.

SUBTROCHLEAR, adj. **Su'b-tro'k-le'a'r.** See **INFRAtrochLEAR**.

SUBTROPICAL, adj. **Su'b-tro'p'i'k-l.** From *sub*, near to, and *tropics*, of the solstice. Of plants, growing in countries approximating to the tropics in climatic conditions. [a, 35.]

SUBULA (Lat.), n. f. **Su'b(su'b)-u'l(a)-a's.** Ger., *Friemspitze*. One of the prickles, formed by the hymenium, covering the lower surface of the pileus in certain *Fungi* (*Hydnum*). [a, 35.]

SUBULATE, adj. **Su'b-u'l(a)-at.** Lat., *subulatus* (from *subula*, an awl). Fr., *subulé*. Ger., *pfiemenartig*, *pfiemig*. Awl-shaped, styloid. [L, 221.]

SUBULIFORM, adj. **Su'b-u'l'i'fo'rm.** Lat., *subuliformis* (from *subula*, an awl, and *forma*, form). Subulate, styloid (said of solid bodies). [a, 35.]

SUBULOSE, adj. **Su'b'u'l-o's.** Lat., *subulosus*. Ger., *pfiemspitzig*. Covered with or consisting of subule. [a, 35.]

SUBUNGUAL, **SUBUNGUAL**, adj's. **Su'b-u'n'g-w'l'-gw'i'z-l.** From *sub*, under, and *unguis*, a hoof. Fr., *sous-ungueal*, *sous-ongulaire*. Situated beneath a nail. [a, 48.]

SUBVAGINAL, adj. **Su'b-va'j'i'z-n'l.** See **INFRAVAGINAL**.

SUBVARIETY, n. **Su'b-va'r'i'e't'e'l.** Lat., *subvarietas*. Ger., *Unterspielart*. One of the more or less divergent groups into which some varieties may be divided. [a, 35.]

SUBVERTEBRA (Lat.), n. f. **Su'b(su'b)-vu'r'te'ra'eb-ra's.** From *sub*, under, and *vertebra* (q. v.). See **SACRUM**.

SUBVOLA (Lat.), n. f. **Su'b(su'b)-vo'l(wo'l)-a's.** 1. The space between the second and fifth fingers. [L, 50 (a, 14).] 2. See **HYPOTHENAR**.

SUBVOMÉRAL [G. St. Hilaire] (Fr.), n. **Su'b-vo-ma-ra'l.** The splenial bone in fishes. [L, 14.]

SUBZONAL, adj. **Su'b-zo'n'l.** From *sub*, under, and *ζώνη*, a belt. Situated beneath the zona pellucida. [L.]

SUBZYGOMATIC, adj. **Su'b-zig'o-m'a't'i'k.** From *sub*, below, and *ζυγωμα*, a bolt. Fr., *sous-zygomatique*. Situated below the zygoma. [L, 41 (a, 14).]

SUC (Fr.), n. **Su'k**. 1. Juice, sap. 2. See **SCROCC** (2d def.).—**Extrait de s.** An extract made by condensing a fruit juice. [L, 41 (a, 14).]—**Sirap de s. d'herbes.** See **SIRAP laxatif d'Amusaal**.—**S. antiscorbütique.** See **SUCCUS antiscorbüticus**.—**S. cancéreux.** See **CANCER juice**.—**S. cellulaire.** See **CELL juice**.—**S. de la liqueur végétale.** Of the alchemists, grape-juice. [L, 41 (a, 14).]—**S. entérique.** See **Intestinal juice**.—**S. gastrique.** See **GASTRIC juice**.—**S. huileux fixes.** Vegetable juices containing fixed oils. [L, 49 (a, 14).]—**S. lacté.** See **CHYLE**.—**S. nourricier.** See **NUTRIENT juice**.—**S. nucléolaire.** See **ACHROMATIN**.—**S. pancréatique.** See **PANCREATIC juice**.—**S. pylorique.** See **SUCCUS pyloricus**.—**S. stomacal.** See **GASTRIC juice**.—**S. sucrés.** Saccharine vegetable juices, such as those of the sugar cane, beet-root, maple, etc. [L, 41 (a, 14).]—**S. végétaux** [Fr. Cod.]. Juices prepared from the green part, especially the fresh leaves, or from the fruit of various vegetable substances. [B, 95 (a, 38).]

SUCCADE (Ger.), n. **Zuk-ka-d'e.** See **CITRONNAT**.

SUCCEDANEUM (Lat.), n. n. **Su'k(su'k)-se'd(kad)-an(a'n)-e'u's(u'm)(u'm).** From *succedaneus*, substituted. Fr., *succédané*. Ger., *stellvertretendes Mittel*, *Surrogat*. A substitute. [L, 49, 50 (a, 43).]

SUCCEDANEUS (Lat.), adj. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-se}^3\text{d}(\text{kad})\text{-an}(\text{a}^3\text{n})\text{-e}^3\text{u}^3(\text{u}^3\text{e})$. From *succedere*, to succeed. Fr., *succédané*. Ger., *allmälig* (1st def.), *stellvertretend* (2d def.). 1. Taking place by degrees or through a long period of time. 2. Vicarious. [a, 35.]

SUCCENTURIATUS (Lat.), adj. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-se}^3\text{nt}(\text{ke}^3\text{nt})\text{-u}^3\text{r}$ (u^3r)- $\text{ia}^3(\text{a}^3\text{t})\text{-u}^3\text{s}(\text{u}^3\text{s})$. From *succenturiare*, to receive as a recruit or substitute. Fr., *succenturié*. 1. Substituted. 2. Accessory (see *PLACENTA succenturiata*); as a n., an accessory muscle. —*S. recti*. Of Sylvius, see *PYRAMIDALIS abdominis*.

SUCCESSIVE, adj. $\text{Su}^3\text{k-se}^3\text{a}^3\text{s}^3\text{iv}$. Lat., *successivus* (from *succedere*, to follow). Fr., *successif*. Ger., *nachfolgend*. In botany, developed first after another similar part or organ. [a, 35.]

SUCCHOLATA (Lat.), n. f. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-lo}^3(\text{ch}^3\text{o}^3\text{l})\text{-at}(\text{a}^3\text{t})\text{-a}^3$. See *CHOCOLATE*.

SUCCIN (Fr.), n. $\text{Su}^3\text{k-sa}^3\text{n}^3$. See *AMBRA flava*. —**Alcoolé de s.** See *Tinctura succini* (1st def.). —**Baume de s.** See *Balsam of AMBER*. —**Épave de s. ammoniacale**. See *Spiritus ammoniacum succino*. —**Éthérolé de s.** See *Tinctura succini* (2d def.). —**Huile (volatile) de s.** See *Oleum succini* (2d def.). —**Poudre de s.** See *Succinum pulveratum*. —**Sel volatil de s.** See *Succinic acid*. —**S. noir**. See *AMBRA nigra*. —**Teinture (alcoolique) de s.** See *Tinctura succini* (1st def.). —**Teinture éthérée de s.** See *Tinctura succini* (2d def.).

SUCCINAMIC ACID, n. $\text{Su}^3\text{k-si}^3\text{n-a}^3\text{n}^3\text{-i}^3\text{k}$. Fr., *acide succinamique*. Ger., *Succinaminsäure*. A monobasic acid, $\text{C}_6\text{H}_7\text{NO}_2$, occurring as large tabular crystals of agreeable acid taste. [B, 3 (a, 38); B, 4.]

SUCCINAMIDE, n. $\text{Su}^3\text{k-si}^3\text{n-a}^3\text{n}^3\text{-id}(\text{id})$. Fr., *s. Ger.*, *Succinamid*. The compound $\text{C}_6\text{H}_7\text{N}_2\text{O}_2$. [B, 3 (a, 38).]

SUCCINANILIC ACID, n. $\text{Su}^3\text{k-si}^3\text{n-a}^3\text{n}^3\text{-i}^3\text{k}$. Fr., *acide succinanilique*. An acid, $\text{C}_{10}\text{H}_7\text{NO}_3 = \text{C}_6\text{H}_4\text{O}_2(\text{NH.C}_6\text{H}_5)(\text{OH})$. [B, 93 (a, 14).]

SUCCINANILIDE, n. $\text{Su}^3\text{k-si}^3\text{n-a}^3\text{n}^3\text{-id}(\text{id})$. Fr., *s. Ger.*, *Succinanilid*. A substance, $\text{C}_{12}\text{H}_9\text{N}_2\text{O}_2 = \text{C}_6\text{H}_4\text{O}_2(\text{NH.C}_6\text{H}_5)_2$, obtained by heating a mixture of succinic acid and aniline or by the action of aniline on succinyl chloride. [B, 93 (a, 14).]

SUCCINAS (Lat.), n. m. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-si}^3\text{n}(\text{ki}^3\text{n-a}^3\text{s})$. Gen., *-atis*. See *SUCCINATE*. —**Liquor succinatis ammonici** (*pyroloosi*), **Solutio succinatis ammonici pyro-animalis**, **Spiritus succinatis ammonici**. See *Liquor AMMONII succinici*.

SUCCINATE, n. $\text{Su}^3\text{k-si}^3\text{n-at}$. Lat., *succinas*. Fr., *s. Ger.*, *Succinat*, *Bernsteinsalz*. A salt of succinic acid. [B.]

SUCCINATED, adj. $\text{Su}^3\text{k-si}^3\text{n-at-e}^3\text{d}$. Lat., *succinatus* (from *succinum*, amber). Fr., *succiné*. Combined, mixed with, or containing amber or succinic acid. [B, 92; L, 56.]

SUCCINICUM (Lat.), **SUCCINUTURA** (Lat.), n's n. and f. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-si}^3\text{n}^3\text{kt}(\text{ken}^3\text{k})\text{-u}^3\text{m}(\text{u}^3\text{m})$. — $\text{si}^3\text{n}^3\text{kt}(\text{ken}^3\text{k})\text{-u}^3\text{r}(\text{ur})\text{-a}^3$. From *succingere*, to gird below. See *DIAPHRAGM* (1st def.).

SUCCINIC, adj. $\text{Su}^3\text{k-si}^3\text{n-i}^3\text{k}$. Lat., *succinicus* (from *succinum*, amber). Fr., *succinique*. Derived from or contained in amber. [B.] —**S. acid**. Lat., *acidum succinicum*. Fr., *acide succinique*. Ger., *Bernsteinsäure*, *Succinsäure*. An acid, $\text{C}_4\text{H}_4(\text{CO.OH})_2 = \text{C}_4\text{H}_2\text{O}_4$, obtained by the dry distillation of amber, from the products of fermentation of sugar and of malic and tartaric acids, and from fossil wood, and occurring in the spleen and acinous glands and in the urine after the ingestion of a considerable quantity of fruit. It forms monoclinic tabular or prismatic crystals of slightly acid taste. [B, 3 (a, 38).] —**S. aldehyde**. Fr., *succinaldéhyde*. A colorless liquid, $\text{C}_4\text{H}_2\text{O}_3$, derived from succinic acid. [B, 4.] —**S. anhydride**. Fr., *anhydride succinique*. Ger., *Bernsteinsäureanhydrid*, *Succinianhydrid*. A colorless crystalline body, $\text{C}_4\text{H}_2\text{O}_3$. [B, 4.]

SUCCINIFER (Lat.), adj. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-si}^3\text{n}(\text{ki}^3\text{n})\text{-i}^3\text{f}(\text{u}^3\text{r})\text{-e}^3\text{r}$. From *succinum*, amber, and *ferre*, to bear. Productive of amber.

SUCCINIMIDE, n. $\text{Su}^3\text{k-si}^3\text{n-i}^3\text{m-id}(\text{id})$. A substance, $\text{C}_4\text{H}_3\text{NO}_2$, occurring as transparent crystals. [B, 3 (a, 38).]

SUCCININ, n. $\text{Su}^3\text{k-si}^3\text{n-i}^3\text{n}$. 1. A dark-brown substance, $\text{C}_8\text{H}_8\text{O}_4$, obtained by heating equal parts of succinic acid and glycerin to about 230° C. 2. The part of amber which is insoluble in most solvents. [B, 270 (a, 38).]

SUCCINIT (Ger.), n. *Zuk-tsen-et'*. Amber. [a, 35.]

SUCCINONE, n. $\text{Su}^3\text{k-si}^3\text{n-on}$. A brown, oily liquid of empyreumatic odor, obtained in the dry distillation of calcium succinate. [B, 38, 93 (a, 14).]

SUCCINUM (Lat.), n. n. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-si}^3\text{n}(\text{ki}^3\text{n})\text{-u}^3\text{m}(\text{u}^3\text{m})$. From *succus*, juice. Fr., *succin*, *karaké*, *ambre jaune* [Fr. Cod.]. Ger., *Bernstein*. Sp., *succino*, *ambar amarillo* [Sp. Ph.]. Amber. See *AMBRA flava*. —**Acidum succini**. See *Succinic acid*. —**Æthroleum succini**. See *Oleum succini* (2d def.). —**Alcohol cum succino**. See *Tinctura succini* (1st def.). —**Balsamum succini**. Ger., *Bernsteinbalsam*. See *Balsam of AMBER*. —**Essentia succini**. See *Tinctura succini* (1st def.). —**Oleosaccharum succini**. Ger., *Bernsteinölzucker*. A mixture of two drops of oil of amber with 4 grammes of sugar, triturated together. [B, 119 (a, 38).] —**Oleum succini**. Fr., *huile (volatile) de succin*, *oléide de succin* (2d def.). Ger., *Bernsteinöl*, *Ambröl*. 1. Of the Pruss. Ph., 6th ed., crude oil of amber, a thick, brown oil, of strong, disagreeable bituminous odor, produced by the dry distillation of amber. 2. Of the U. S. Ph. and Swiss Ph., rectified oil of amber, a nearly or quite colorless, thin oil, becoming thick and dark with time and having a penetrating, fiery odor and taste. It is a crude mixture of two separate oils formed at different stages in the distillation, and is obtained by repeated distillation and the addition of water. It is a local irritant, and in large doses toxic. It is used as an excitant and antispasmodic, in flatulent dyspepsia, globus hystericus, and

hicough, and externally in rheumatism, convulsions, earache, and toothache. [A, 1; B, 95 (a, 38); L, 57 (a, 50); W. Murrell, "Brit. Med. Jour.," Apr. 1, 1893 (a, 38).] —**N. Y. Med. Jour.**, Apr. 15, 1893, p. 417.]

—**Oleum succini aetherum** (seu *depuratum*). See *Oleum succini* (2d def.). —**Oleum succini crudum**. See *Oleum succini* (1st def.). —**Oleum succini empyreumaticum**. See *Oleum succini* (2d def.). —**Oleum succini empyreumaticum cum crudum**. See *Oleum succini* (1st def.). —**Oleum succini oxydatum**. See *Artificial MUSK*. —**Oleum succini pyrogenicum**. See *Oleum succini* (1st def.). —**Oleum succini rectificatum**. See *Oleum succini* (2d def.). —**Pilule de succino**. A pill-mass consisting of 10 parts of Socotrine aloes with 6 of amber, 4 of mastic, and 1 part of round birchwood, made up with tincture of amber and sometimes with 3 parts of agaric lozenges; or of 6 parts of aloes, 3 of amber, 2 each of birchwood and agaric, made up with syrup of betonica. [B, 119 (a, 38).] —**Potestates succini**. An obsolete preparation of amber, sal ammoniac, and antimonial wine. [L, 94.] —**Pyroleum succini**. See *Oleum succini* (2d def.). —**Pyroleum succini crudum**. See *Oleum succini* (1st def.). —**Pyroleum succini rectificatum**. See *Oleum succini* (2d def.). —**Rasura succini**. Very small fragments of amber (*ambra flava*), amber shavings. [a, 35.] —**Resina succini balsamica**. See *Artificial MUSK*. —**Sal succini** (volatile). See *Succinic acid*. —**S. album et citrinum**. S. electricum. See *AMBRA flava*. —**S. facitium**. See *Facitium AMBER*. —**S. lavum**. See *AMBRA flava*. —**S. griseum**. See *AMBRA grisea*. —**S. musci**. See *Spermaceti*. [a, 35.] —**S. oxygenatum**. See *Artificial MUSK*. —**S. pulveratum**. Fr., *poudre de succin*. Amber triturated in an iron mortar and sifted through a No. 100 silk sieve [Fr. Cod.] (a, 100-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).] —**Tinctura succini**. Fr., *teinture de succin* [Fr. Cod.] (1st def.). Ger., *Bernsteinszug*, *Bernsteinessenz*, *Bernsteininctur*. 1. Of the Gr. Ph. and Netherl. Ph., a tincture made by digesting or macerating powdered amber with four times as much alcohol of sp. gr. 0.820 to 0.830 [Gr. Ph.], with eight times as much alcohol of sp. gr. 0.820 [Netherl. Ph.] with ten times as much 80-per-cent. alcohol [Fr. Cod.]. 2. Of the Swed. Ph., a preparation made by macerating powdered amber with five times as much spiritus ætheris for five days. [B, 95, 119 (a, 38).] —**Tinctura succini aetherea**. See *Tinctura succini* (2d def.). —**Tinctura succini alcalisata**. Ger., *alkalische Bernsteininctur*. A mixture of 12 parts of amber and 3 of aqueous solution of potassium carbonate with 48 of alcohol, filtered after some days. —**Tinctura succini alcoholica**. See *Tinctura succini* (1st def.). —**Tinctura succini aromatica** [Swed. Ph.]. A solution of each of the oils of cloves, cassia, lavender, and mace in 100 parts of ethereal tincture of amber. [B, 95 (a, 38).] —**Tinctura succini balsamica**. An alcoholic solution of artificial musk (see *Tinctura musci artificialis*). [a, 38.] —**Trochisci succini**. Ger., *Bernsteinäpfelchen*. Troches containing opium, amber, and other ingredients. [B, 48.]

SUCCINIC ACID, n. $\text{Su}^3\text{k-si}^3\text{n-u}^3\text{r-i}^3\text{k}$. Fr., *acide succinique*. Ger., *Succininsäure*. A body, $\text{C}_4\text{H}_2\text{O}_4$, forming lamellar crystals. [B, 4.]

SUCCINYL, n. $\text{Su}^3\text{k-si}^3\text{n-i}^3\text{l}$. Fr., *succinyle*. The radicle of succinic acid, not yet isolated. [B, 4.] —**S. chloride**. A substance, $\text{C}_4\text{H}_2\text{O}_2\text{Cl}_2$, obtained by distilling succinic acid with phosphorus perchloride; a fuming oil of highly refractive power and of suffocating smell, crystallizing at 0° C. and boiling at 190° C. [B, 48, 93 (a, 14).] —**S. diamide**. See *SUCCINAMIDE*.

SUCCISA (Lat.), n. f. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-si}^3\text{s}(\text{a}^3\text{s})$. 1. The *Seabiosa* s. 2. Of Mönch, the genus *Seabiosa*. [a, 35.]

SUCSE, adj. $\text{Su}^3\text{k-sis}$. Lat., *succinus* (from *succidere*, to cut away beneath). Fr., *succer*, having the appearance of being broken or cut off at the lower end. [a, 35.]

SUCCESTEARIN, n. $\text{Su}^3\text{k-si}^3\text{-ste-a}^3\text{-r-i}^3\text{n}$. Fr., *succistéarine*. 1. The white crystalline portion of a waxy substance obtained by the dry distillation of amber; inodorous and insipid. 2. Improperly, idrialin. [B, 93 (a, 14).]

SUCORY, n. $\text{Su}^3\text{k-o-r-i}^3$. See *CHICORY*. —**Wild s.** See *SAB-BATIA angularis*. —**Yellow s.** See *CATARANTHE lutea*.

SUCOSE, adj. $\text{Su}^3\text{k-os}$. Lat., *succosus* (from *succus*, juice). Ger., *saffvoll*. See *SUCCULENT*.

SUCCURA (Lat.), n. f. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-ku}^3\text{b}(\text{ku}^3\text{b})\text{-a}^3$. From *succubare*, to lie under. Fr., *succube*. See under *INCUBES* (1st def.).

SUCUBOUS, adj. $\text{Su}^3\text{k-u}^3\text{b-u}^3\text{s}$. Lat., *succubus*. Ger., *unter-schlächtig*. Having the anterior margin of each leaf pressing under the posterior margin of the leaf immediately succeeding it on the branch. [a, 35.] Cf. *INCUBOUS*.

SUCCUBUS (Lat.), n. m. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-ku}^3\text{b}(\text{ku}^3\text{b})\text{-u}^3\text{s}(\text{u}^3\text{s})$. Nightmare with the hallucination of the presence of a succuba.

SUCCULENT, adj. $\text{Su}^3\text{k-u}^3\text{-lnt}$. Lat., *succulentus* (from *succus*, juice). Fr., *suc.*, *saffit*. Juicy, abounding in juice. The *Succulentæ* are, of Linneus, an order comprising *Cactus*, *Mesembryanthemum*, *Sedum*, etc.; of Ventenat, the *Crusulaceæ*.

SUCCUS (Lat.), n. m. $\text{Su}^3\text{k}(\text{su}^4\text{k})\text{-ku}^3\text{s}(\text{ku}^3\text{s})$. From *sugere*, to suck. Fr., *suc*. Ger., *Saft*. 1. A juice. 2. A pharmacopoeial preparation made by squeezing out the juice from green plants and adding enough alcohol to preserve it. [D, 6.] —**Aqua succorum vegetabilium vulneraria**. See *Aqua pontificalis*. —**Aler s.** See *ATRABILIS*. —**S. antiscorbuticus**. Fr., *suc antiscorbutique*. Sp., *zummo antiescorbútico* [Sp. Ph.]. 1. A preparation made by crushing equal parts of the leaves of *Nasturtium officinale*, *Menyanthes trifoliata*, and either *Cocklebur officinalis* or *Lepidium latifolium* and radix armoraciac, expressing, adding a little water to the residue, repeating the process, mixing the two liquids, and filtering when settled. [B, 95 (a, 38).] —**S. carnis**. See *MEAT juice*. —**S. cyrenalicus antiquorum**. See *ASAFOETIDA*. —**S. entericus**. See *Intestinal JUICE*. —**S. gastricus**. See *Gastric JUICE*. —**S. hispanicus**. Licorice (extract). [a, 35.] —**S. insipissatus**. An old name for a pharmaceutical preparation made by inspis-

SUGAR, n. Shu'g'r. Gr., *sάκχαρον*. Lat., *saccharum*. Fr., *sucre*. Ger., *Zucker*. It., *zucchero*. Sp., *azúcar*. A name at first applied only to cane s. and beet s.; subsequently to any sweet crystalline substance, and more definitely to a class of chemical compounds of the general composition $C_6H_{12}O_6$ (see SACCHAROSE and GLUCOSE). [B.]—**Acid s. of milk**. Mucic acid. [B.]—**Acorn s.** See QUERCITE.—**Albin s.** See ARABINOSE.—**Barley s.** See under SACCHAROSE.—**Beet s.** Fr., *sucre de betterave*. Ger., *Rübenzucker*. Saccharose obtained from species of *Beta*, especially from *Beta vulgaris*. [B.]—**Brown s.** Cane s. not entirely freed from impurities and coloring matters; obtained in the first stages of the process of manufacture of s. from s.-cane juice. [B.]—**Burnt s.** Caramel. [B.]—**Cane s.** Lat., *saccharum (purificatum)*. Fr., *sucre de canne*. Ger., *Rohrzucker*. Sp., *azúcar de caña*. S. obtained from the juice of *Saccharum officinarum*. [B.]—**Cellulose s.** S. derived from cellulose; identical with glucose. [Fleischl. "Ztschr. f. phys. Chem.," xii, p. 525 (B).]—**Chestnut s.**, **Diabetic s.** Glucose. [B.]—**Ferment s.** S. formed from starch, glycogen, and other carbohydrates by the action of the animal ferments. It was at one time held to be identical with glucose, but is now considered by some to be a different body, probably maltose. [B. 12; Kratschmer and Seegen, "Wien. med. Wchnsch.," Feb. 19, 26, Mar. 5, Apr. 2, 9, 1881 (B).] Cf. INVERTIN.—**Fruit s.** See LEVULOSE.—**Granular s.** Glucose. [B. 2.]—**Grape s.** Fr., *sucre de raisin*. Ger., *Traubenzucker*. Glucose, especially when obtained in the solid form. [B.]—**Gum s.** See ARABINOSE.—**Honey s.** Glucose. [B. 2.]—**Invert s.** Fr., *sucre inverté*. Ger., *Invertzucker*. A product of the prolonged action of heat upon a solution of cane s. It is a mixture of dextrose and levulose, and receives its name because its solution rotates the plane of polarization to the left, while the solution of cane s. from which it is produced rotates that plane to the right. [B.]—**Jaggery s.** See JAGGERY.—**Liver s.** Glucose, so called because it is the form of s. elaborated in the liver from glycogen. [B.]—**Manna s.** Ger., *Mannazucker*. See MANNITE.—**Maple s.** Fr., *sucre d'érable*. Ger., *Ahornzucker*. S. obtained from *Acer saccharinum*. It is identical with saccharose, but contains a certain amount of coloring matter. [B. 5.]—**Milk s.** Lat., *saccharum lactis*, *lactis saccharum*. Fr., *sucre de lait*. Ger., *Milchzucker*. See LACTOSE.—**Muscle s.** See INOSITE.—**Nest s.** See under *Larinus nidificans*.—**Oil s.** See ELZEOSACCHARUM.—**Open-pore s.** S. prepared by concentration of the cane-juice in vessels under the ordinary atmospheric pressure. [B. 5.]—**Palm s.** See JAGGERY.—**Pectin s.** See ARABINOSE.—**Rag s.** Glucose. [B. 2.]—**Refined s.** Fr., *sucre raffiné*. Ger., *Hutzucker*, *Raffinade*. White s.; cane s. purified and deprived of coloring matter. [B.]—**Starch s.** See GLUCOSE.—**S. candy**. Ger., *Candizucker*. See ROCK CANDY.—**S. of lead**. See LEAD acetate.—**S. of milk**. See LACTOSE.—**S. of urine**. Glucose. [B. 2.]—**S. pods**. Carob beans. [B.]—**Uncrystallizable s.** See LEVULOSE.—**Vacuum-pan s.** S. prepared by concentration of the cane-juice under a pressure much less than that of the atmosphere; effected by the employment of closed vessels in which a partial vacuum can be produced by exhaustion of the air. [B. 5.]—**White s.** See Refined s.

SUGAR-CANE, n. Shu'g'r-kan. The *Saccharum officinarum* and other species of *Saccharum*. [a. 35.]—**Chinese s.-c.** The *Sorghum vulgare*. [a. 35.]—**Common s.-c.** The *Saccharum officinarum*.

SUGGESTIBLE (Fr.), adj. Su'g-zhe's-te-bl'. Of hypnotized persons, subject to the power of suggestion. ["N. Y. Med. Jour.," June 11, 1887, p. 659 (a. 50).]

SUGGESTION, n. Su'g-je'st-yun. Lat., *suggestio* (from *suggerere*, to excite). Fr., s. Ger., *S. Einbung*. 1. The act of suggesting. 2. The thing suggested. 3. See *Hypnotic s.*—**Hypnotic s.** Fr., *s. hypnotique*. The process by which a hypnotized person is made to accept a hint or statement, although it may be unfounded, and to act accordingly.

SUGILLATION, n. Su'g-jil'a-shu'n. More correctly, *sigillation*. Lat., *sigillatio* (from *sigillare*, to beat black and blue). Fr., s. *supon*. Ger., *S. Blutunterlaufung*. A black and blue mark, as of a bruise. [G. 49.] See VIBEX and LIVOR mortalis.

SUGGRUNDIUM (Lat.), n. n. Su'g-gru'nd-gru'nd (gru'nd)/i. n. s. m. n. m. Fr., s. The lower border of a roof, the eaves. [A. 312.]—**S. oculi**. See SUPERCILIARY RIDGE.

SUGILLATION, n. Su'j-il'a-shu'n. A preferable form of *sigillation* (q. v.).

SUICIDAL, adj. Su'z-i'e-si'd'l. Ger., *selbstmörderisch*. Characterized by a tendency to suicide. [D. 1.]

SUICIDE, n. Su'z-i'e-sid. From *sui*, of himself, and *caedere*, to kill. Gr., *αὐτοκτείνω* (1st def.), *αὐτοκτενία* (2d def.). Fr., s. Ger., *Selbstmörder* (1st def.), *Selbstmord* (2d def.). 1. One who takes his own life. 2. The act of self-murder. [D. 1.]

SUIE (Fr.), n. Sui. See SOON.—**Collyre de s.** A solution of 40 centigrammes of extract of soot and 4 drops of lemon-juice in 125 grammes of infusion of red roses; used for ophthalmia neonatorum. [B. 38, 92 (a. 14).]—**Crystal de s.** See *Fuligo splendens*.—**Eau de s.**, **Essence de s.** See *Tinctura fuliginis alcalina*.—**Extrait de s.** See *Extractum fuliginis*.—**Infusion de s.** See *Tinctura fuliginis alcalina*.

SUIF (Fr.), n. Suiet. See SUET.—**Savon de s.** Tallow soap. [B.]—**S. de boeuf**. Beef suet. [B.]—**S. de mouton**. See SEVUM (1st def.).—**S. de veau**. Veal suet. [B.]

SUILLA (Lat.), n. f. Su'z(su'z)-il-la. From *sus*, a hog. See SCROFULA.

SUILLUS (Lat.), adj. Su'z(su'z)-il-lus (lus). From *sus*, a hog. Obtained from the hog (see ADEPS s.). As a n. m., see BOLETTUS.

SUINT (Fr.), n. Swa'z'n. The sweat of sheep. It contains about one third of its weight of alkaline potassium salts, and is a source of the potash of commerce (which is obtained from the s. by wash-

ing the sheep), also of a fatty matter (see LANOLIN). [B.] Cf. CÉSPYUM.

SUINTEMENT (Fr.), n. Swa'z'n²-t'ma'z'n². See ÉCOULEMENT.—**S. par le mamelon**. See GALACTORRHEGA.

SUITES DE COUCHES (Fr.), n. pl. Swet d'kush. See Puer-peral PERIOD.

SULCATE, adj. Su'lk'at. Lat., *sulcatus* (from *sulcare*, to furrow). Fr., *silloné*. Ger., *gefurcht*. Grooved, furrowed. [a. 35.]

SULCATURE (Fr.), n. Su'lk-ka's-tu'r. A mark or furrow produced by pressure or erosion. [A. 385 (a. 48).]

SULCULUS (Lat.), n. m. Su'lk(su'lk)/u'p(u'l)-u's(u's). Dim. of *sulcus*, a furrow. Fr., *sulcule*. A small furrow or sulcus. [L. 50 (a. 14).]—**S. labii superioris**. See *SULCUS nasolabialis*.

SULCUS (Lat.), n. m. Su'lk(su'lk)/u'p(u's/u's). Gr., *ὄλκος* (from *ὄλλω*, to draw). Fr., *sillon*. Ger., *Furche*, *rinne*. A groove, furrow; a fissure, especially of the cerebrum. [C.]—**Anterior occipital s.** A s. separating the central fissure from the first occipital gyrus, connecting with the parietal fissure. [a. 34.]—**Anterior s. of Reil**. See *Pre-insular s.*—**Antero-temporal s.** See *Parallel fissure*.—**Ascending frontal s.** See *Precentral fissure*.—**Central s.** See *Central fissure*.—**Cerebral sulci**. See *Secondary fissures* (2d def.) and *Fissure of the cerebrum*.—**Ciliary sulci**. See *Stylus ciliares*.—**Crucial s.** See *Cruciate fissure*.—**External perpendicular s.** See *Occipital fissure* (3d def.).—**External s. of Reil**. A fissure separating the insula from the precentral, postcentral, and subfrontal gyri. [J. 1.]—**Fronto-marginal s.** Of Wernicke, a small longitudinal fissure on the ventral surface of the frontal lobe, which separates the orbital and frontal lobes. [L. 17 (K).]—**Inferior frontal s.** Lat., *s. frontalis inferior*. Fr., *scissure frontale inférieure*. Ger., *untere Stirnfurche*. See *Subfrontal fissure*.—**Inferior occipital s.** See *Inferior occipital fissure*.—**Inferior temporo-sphenoidal s.** See *Mediotemporal fissure*.—**Infero-frontal s.** See *Subfrontal fissure*.—**Infra-insular s.** A fissure separating the insula from the temporo-sphenoidal lobe. [L. 14.]—**Infra-orbital s.** See *Sub-orbital fissure*.—**Intermediate temporal s.** See *Mediotemporal fissure*.—**Intraparietal s.** See *Parietal fissure*.—**Lateral olivary s.** See *S. olive externus*.—**Middle temporo-sphenoidal s.** An unimportant fissure parallel to and below the parallel fissure. [L. 14.]—**Occipito-parietal s.** See *Occipital fissure* (2d def.).—**Occipito-temporal s.** See *Occipital fissure*.—**Oculomotor s.** See *Oculomotor furrow*.—**Olfactory s.** See *Olfactory fissure*.—**Orbital s.** See *Orbital fissure*.—**Paramedian s.** See *Sillon médian postérieur intermédiaire*.—**Parietal s.** See *Parietal fissure*.—**Peduncular s.** Fr., *sillon circonferentiel ou circulaire*. A transverse s. which commences close to the middle peduncle of the cerebellum around the outer border of which it passes backward. [L. 31, 142.]—**Postcentral s.** See *Postcentral fissure*.—**Posterior s. of Reil**. See *Infra-insular s.*—**Postero-parietal s.** See *Central fissure*.—**Postero-temporal s.** See *Collateral fissure*.—**Postfrontal s.** See *Cruciate fissure*.—**Pre-central s.** See *Precentral fissure*.—**Pre-insular s.** A fissure in front of the insula and separating it from the posterior orbital convolution. [L. 142.]—**Primitive sulci**. See *Primitive fissures* (2d def.).—**Secondary sulci**. See *Secondary fissures*.—**Straight s.** See *Olfactory fissure*.—**Subparietal s.** A shallow depression or inconstant fissure that is a continuation upward and outward of the callosal-marginal fissure. [a. 34.]—**S. ad acusticum vestibuli**. See *Fossula sulciformis s. alaris*. The furrow just above the ala nasi. [a. 34.]—**S. alveolaris anterior**. See *Anterior dental canal*.—**S. alveolo-buccalis**. The s. between the gums and the inside of the cheek. [a. 34.]—**S. alveolo-lingualis**. The s. between the gums and the mucous membrane of the tongue. [a. 34.]—**S. anterior corporum candicantium**. A furrow between the corpora albicantia and the tuber cinereum. [L. 7.]—**S. antero-temporalis** [Huxley]. See *Superfemoral fissure*.—**S. antibrachii radialis**. A s. on the radial side of the forearm, between the pronator and flexor muscles and the supinator longus. [a. 34.]—**S. antibrachii ulnaris**. A s. on the ulnar side of the forearm, between the flexor sublimis digitorum and the flexor carpi ulnaris. [a. 34.]—**S. aorticus**. A depression on the median surface of the left lung for the descending aorta. [L. 332.]—**S. arcuatus**. Of Arnold, an embryonic fissure to which the s. corporis callosi corresponds. [a. 34.]—**S. arcuatus præcuneus**. An inconstant fissure on the mesal surface of the cerebral hemisphere, between the parietal gyrus and the gyrus fornicatus. [L. 332.]—**S. arterie occipitalis**. A groove on the inner side of the internal aspect of the mastoid process of the temporal bone, which lodges the occipital artery. [L. 332.]—**S. arterie subclaviae**. See *S. subclaviae* (1st and 2d defs.).—**Sulci arteriosi**. Ger., *Arterienfurchen*. Furrows on the ental surfaces of the cranial bones for lodging arteries. [L. 31.]—**S. articulationis primæ manus**. A transverse furrow in the palm, seen in flexion, over the articulations between the two rows of carpal bones. [L. 329.]—**S. articulationis secundæ manus**. A transverse furrow in the palm of the hand, seen in flexion, extending from the level of the upper margin of the pisiform bone to the upper end of the first carpal bone. [L. 332.]—**S. atrioventricularis**. See *Atriculo-ventricular groove*.—**S. auri anterior**. See *Incisura trago-helicina*.—**S. auri posterior**. See *Incisura anthelica*.—**S. basilaris (pontis)**. The antero-posterior groove on the lower median surface of the pons Varolii. [L. 3 (K).]—**S. basilaris ossis occipitis**. A shallow depression in the occipital bone at the side of the clivus Rhomboidalis. [L. 332.]—**S. bicipitalis**. See *Bicipital groove*.—**S. bicipitalis internus**. A furrow between the brachialis internus and the anconæus tertius. [L. 1.]—**S. cæcus**. See *FORAMEN cæcum posterius*.—**S. calcanæi**. A furrow separating the two posterior articular surfaces of the sustentaculum tali. [L. 332.]—**S. calcarinus**. See *Calcarine fissure*.—**S. callosomarginalis**. See *Supercallosal fissure* (1st def.).—**S. callosus**. See *Callosal fissure*.—**S. carotico-mandibularis (ossis temporis)**. A groove leading into the canalis carotico-mandibularis. [L.]

—*S. medius substantiae perforatae anterioris*. A fissure extending between the anterior perforated space and the rostrum of the corpus callosum. [L.]—*S. medullae oblongatae*. See *Basilar groove*.—*S. medullae oblongatae caecus*. A depression between the pons Varolii and the anterior extremities of the olivary bodies. [L. 7 (a, 50).]—*S. medullae oblongatae decussatorius*. The upper part of the ventral median fissure of the medulla oblongata, where it is interrupted by the decussation of the pyramids. [L. 7.]—*S. medullae spinalis intermedius anterior*. Fr., *sillon intermédiaire antérieur*. An ill-defined furrow between the ventral and ventro-lateral fissures of the spinal cord. [L. 7.]—*S. medullae spinalis intermedius posterior*. See *Postero-intermediary fissure*.—*S. medullae spinalis lateralis*. See *Antero-lateral groove*.—*Sulci meningei*. Furrows for blood-vessels on the ental surface of the cranial bones. [L.]—*S. mentalis*. Fr., *sillon du menton*. Ger., *Kinnrinne*. The furrow separating the lower lip from the prominence of the chin. [L. 41 (a, 14).]—*S. mentolabialis*. A transverse depression between the lower lip and the chin. [L. 332.]—*Sulci minores pontis*. See *Sulci transversarii pontis*.—*S. Monroi*. A furrow (also called sulcus) on the mesal aspect of the thalamus between the foramen of Monro and the aqueduct and ventrad of the mediodorsal commissure; regarded by His and Minot as the boundary between the "dorsal and ventral zones of His." [I. 110.]—*S. muscularis flexoris longi hallucis*. See *INCISURA astragali*.—*S. muscularis tympani*. See *CANALIS pro tensore tympani*.—*S. musculi peronei longi*. A vertical groove lined with cartilage on the outer border of the cuboid bone, for the tendon of the peroneus longus. [L.]—*S. musculorum (ossis temporis)*. See *CANALIS pro tensore tympani*.—*S. mylo-hyoideus*. See *Mylo-hyoid groove*.—*S. nasalis posterior*. A shallow depression behind the posterior pillar of the fauces. [L.]—*S. nasolabialis*. The transverse groove between the nose and the upper lip. [L.]—*S. nasopalatinus*. The furrow for the nasopalatine nerve on the side of the vomer. [L. 31.]—*S. navicularis*. See *Fossa navicularis*.—*S. nervi petrosi profundus minoris (ossis temporis)*. A groove in the petrous portion of the temporal bone, lodging the nervus petrosus profundus minor. [L.]—*Sulci obliqui pontis*. See *Sulci transversarii pontis*.—*S. obturatorius (ossis coxae)*. See *INCISURA obturatoria*.—*S. occipitalis anterior*. Of Wernicke, a small vertical fissure in the anterior part of the occipital lobe. [I. 17 (K).]—*S. occipitalis (longitudinalis) inferior (seu medius)*. See *Inferior occipital fissure*.—*S. occipitalis superior (seu transversus)*. See *Transverse occipital fissure*.—*S. occipito-interparietalis*. See *Occipito-parietalis*. See *Occipital fissure*.—*S. occipito-parietalis*. See *Collateral fissure*.—*S. supra-orbitalis inferior*. See *Inferior occipital fissure*.—*S. occipito-temporalis lateralis*. Of Fowler, see *Collateral fissure*.—*S. oculomotorius*. See *Oculomotor furrow*.—*S. of Monro*. See *S. Monroi*.—*S. of the corpus callosum*. See *Callosal fissure*.—*S. olfactorius*. See *Olfactory fissure*.—*S. olivæ externus*. A furrow on the outer side of the olivary body. [L. 7.]—*S. olivæ internus*. A fissure, lying to the inner side of the olivary body, from which arise the roots of the hypoglossal nerve. [I. 6 (K).]—*S. opticus*. See *Optic groove*.—*S. orbitalis (cerebri)*. See *Orbital fissure*.—*S. orbitalis lateralis*. See *Subfrontal fissure*.—*S. orbitalis medialis*. See *Olfactory fissure*.—*S. orbitopalpebralis inferior*. The depression below the margin of the lower lid. [L.]—*S. orbitopalpebralis superior*. The depression immediately below the upper margin of the orbit. [L.]—*S. ossis carpalis primi*. A groove on the ulnar palmar side of the trapezium, for the tendon of the flexor carpi radialis. [L. 332.]—*S. ossis cuboidei*. See *S. musculi peronei longi*.—*S. multanguli*. See *S. ossis carpalis primi*.—*S. ossis navicularis*. A shallow groove on the plantar surface of the scaphoid bone. [L. 332.]—*S. ossis tarsalis quarti*. See *S. musculi peronei longi*.—*S. palatinus medianus*. An anomalous furrow over the intermaxillary suture. [L. 332.]—*S. palpebromalaris*. See *Oculozygomatic line*.—*S. paracentralis*. See under *Paracentral fissure*.—*S. paramedianus dorsalis*. See *Postero-intermediary fissure*.—*S. parietalis*. See *Parietal fissure*.—*S. parietalis oblongata* and extending forward as far as the border of the pons Varolii. [a. 34.]—*S. parietalis*. See *Parietal fissure*.—*S. parietofrontalis*. See *Central fissure*.—*S. parieto-occipitalis*. See *Occipital fissure* (2d def.).—*S. peduncularis* [Wilder]. See *Oculomotor furrow*.—*S. pedunculi lateralis*. The s. separating the crista pedunculi from the tegmentum. [a. 34.]—*S. pedunculi medialis*. See *Oculomotor furrow*.—*S. peronei*. See *S. musculi peronei longi*.—*S. perpendicularis*. See *Anterior occipital s.*—*S. perpendicularis externus*. See *FISSURA perpendicularis externa*.—*S. petrosquamosus*. A furrow over the petrosquamosal fissure. [L.]—*S. petrosus inferior ossis temporis*. See *Groove for the inferior petrosal sinus*.—*S. petrosus superficialis ossis temporis*. A groove on the anterior surface of the petrous portion of the temporal bone, running forward from the hiatus Fallopii. [L. 332.]—*S. petrosus superior*. See *Groove for the superior petrosal sinus* and *Groove for the superior longitudinal sinus*.—*S. pharyngeus lateralis*. See *Fossa laryngopharyngea*.—*S. pinnalis*. See *S. alaris*.—*S. pollicis*. A depression between the thenar eminence and the palm. [a. 34.]—*S. pontis basilaris*. See *S. basilaris*.—*S. postcentralis*. See *Postcentral fissure*.—*S. postolivaris*. See *S. olivæ externus*.—*S. postrolandicus*. See *Postcentral fissure*.—*S. preauricularis (ossis coxae)*. See *Fossa preauricularis*.—*S. precentralis*. See *Precentral s.*—*S. Precentralis*. The portion of the precentral fissure below the middle frontal convolution. [L. 332.]—*S. Precentral fissure*.—*S. precentralis superior*. The portion of the precentral fissure above the middle frontal convolution. [L. 332.]—*S. Precentral fissure*.—*S. preinsularis*. See *Pre-insular s.*—*S. preoccipitalis*. See *Anterior occipital s.*—*S. prerolandicus*. See *Precentral fissure*.—*S. presylvius*. In certain Carnivora,

a fissure lying anterior to the fissure of Sylvius. [J. 17 (K).] Cf. *Presylvian fissure*.—*S. promontorii*. See *S. Jacobsonii*.—*S. pro tuba eustachiana*. See *Groove for the Eustachian tube*.—*S. pterygoideus*. See *S. pterygopalatinus*. Ger., *Flügelgauenfurche*. A term applied indifferently to a groove on the anterior surface of the pterygoid process of the sphenoid bone, one upon the superior maxilla, or one on the nasal portion of the palate bone, all of which form the pterygo-palatine canal. [L.]—*S. pulmonalis*. Ger., *Lungenfurche*. The depression on either side of the vertebral column formed by the backward curvature of the ribs. [L. 31.]—*S. radialis humeri*. See *Musculo-spiral groove*.—*S. radio-ulnaris*. A groove on the anterior surface of the wrist at the lower ends of the radius and ulna, seen only in flexion. [L. 332.]—*S. rami auricularis (vagi)*. A furrow in the jugular fossa for the auricular branch of the pneumogastric nerve. [L. 31.]—*S. rectus*. See *Olfactory fissure*.—*S. retroglanularis*. See *S. glandis*.—*S. Rolandi*. See *Rolandic fissure*.—*S. rolandicus anterior*. See *Precentral fissure*.—*S. sagittalis*. The combined sulci longitudinalis of the os frontis, os occipitis, and os parietale. [L.]—*S. sclerae*. See *Scleroticæ*. Ger., *Sclerabrinne*. A depression of the anterior margin of the sclera at its junction with the cornea. [L. 332.]—*S. sigmoideus*. See *Fossa sigmoidea ossis temporalis* and *Cavernous groove*.—*S. sinus petrosi superioris*. See *S. petrosus superior*.—*S. sinus transversus*. See *Fossa sigmoidea ossis temporalis*.—*S. spheno-ethmoidalis*. A groove at the articulation of the sphenoid and ethmoid bones. [a. 34.]—*S. spiralis (cochleæ)*. The groove between the labium tympanicum and labium vestibulare. [L. 31.]—*S. spiralis externus*. See *S. ligamenti spiralis*.—*S. spiralis internus*. See *S. spiralis*.—*S. stapedis*. A slight concavity on the outer surface of the crus of the stapes. [L. 7.]—*S. subclaviae*. See *S. subclavius* (1st and 2d def's).—*S. subclavius*. 1. A groove on the first rib in which the subclavian artery rests, close to the tubercle for the insertion of the scalenus anticus. 2. A furrow on the apex of the lung formed by the subclavian artery. 3. A depression in the clavicle into which the subclavius muscle is inserted. [L. 31.]—*S. subfrontalis*. 1. Of Pansch, a small fissure on the mesal surface of the frontal lobe in the *Carnivora*. [I. 17 (K).] 2. See *Subfrontal fissure*.—*S. subparietalis*. Of Broca, a small fissure which forms the lower boundary of the præcuneus. [I. 17 (K).]—*S. subpinealis*. A transverse s. behind and below the pineal gland, crossing the upper surface of the optic thalamus. [I. 17 (K).]—*S. substantie perforatae mediae longitudinalis*. See *S. basilaris*.—*S. supercentralis*. See *Superior occipital fissure*.—*S. superior anterior*. See *S. cerebelli superior anterior*.—*S. superior cerebelli*. See *Peduncular s.*—*S. superior posterior*. See *S. cerebelli superior posterior*.—*S. supracallosus*. See *Callosal marginal fissure*.—*S. supra-insularis*. See *Externals of Reil*.—*S. supra-orbitalis*. Of Schwalbe, a s. arising from the callosal-marginal fissure at the point where it turns around the genu, and running horizontally forward to the anterior extremity of the frontal lobe. [J. 17 (K).]—*S. supra-orbitalis longitudinalis*. An anomalous longitudinal furrow replacing a missing orbital fissure. [L. 332.]—*S. supra-orbitalis transversus*. An anomalous fissure replacing the transverse element of the orbital fissure. [L. 332.]—*S. suprasylvius*. See *Supersylvian fissure*.—*S. tali*. A deep furrow on the lower surface of the astragalus, dividing its articular surface into two portions. [L.]—*S. temporalis inferior* [Ecker]. See *Collateral fissure*.—*S. temporalis intermedius*. Of Jensen, a s. extending between the upper end of the Sylvian fissure and the posterior extremity of the superfrontal fissure. [J. 17 (K).]—*S. temporalis medius* (seu secundus) a s. between the middle and inferior temporal convolutions. [a. 34.]—*S. temporalis primus*. See *Supertemporal fissure*.—*S. temporalis superior*. See *Supertemporal fissure* and *Paravallal fissure*.—*S. temporalis transversus*. Of Schwalbe, any one of certain secondary sulci in the parietal lobe which have a general direction transverse to the Sylvian fissure. [I. 17 (K).]—*Sulci tertiarii*. Those secondary fissures that are subject to individual variations in number and direction. [a. 34.]—*S. tractus occipitalis*. See *Olfactory fissure*.—*S. transversalis*. See *Peduncular s.*—*Sulci transversarii pontis*. Certain isolated transverse fissures on the inferior surface of the pons Varolii. [L. 7 (a, 50).]—*S. transversus*. See *Orbital fissure*.—*S. transversus ossis occipitis*. The groove in the occipital bone for the lateral sinus. [L. 31.]—*S. transversus ossis parietalis*. A broad flat groove on the inner surface of the postero-inferior angle of the parietal bone for the lateral sinus. [L. 332.]—*S. transversus ossis temporis*. See *Fossa sigmoidea ossis temporalis*.—*S. triradiatus*. See *Orbital fissure*.—*S. tube (Eustachii)*. See *tubarius*. See *Groove for the Eustachian tube*.—*S. tympanicus*. Ger., *Paukenring*. The groove-like furrow in the bony tympanic ring for the reception of the margin of the tympanic membrane. It exists on the perfect temporal bone only to the extent of the part taken by the tympanic ring in the formation of that bone. In the region of the Rivinian segment it is wanting altogether. [F. 32.]—*S. ulnaris (humeri)*. The groove on the posterior surface of the internal condylus of the humerus for the ulnar nerve. [L.]—*S. vena cava superior*. An anomalous furrow on the right lung for the vena cava superior. [L. 332.]—*Sulci venosi*. See *Cranial sinuses*.—*S. ventriculi cerebelli (seu quarti)*. See *Fissura fossae rhomboidalis longitudinalis media*.—*S. vermicularis*. A s. separating the vermis from a lobe of the cerebellum. [a. 34.]—*Sulci vertebrales*. Ger., *Wirbel-furchen*. The grooves seen on either side of the spinous processes of the vertebrae when viewed from behind. [L. 14.]—*S. vertebrales lateralis atlantis*. See *Sinus atlantis*.—*S. vomeris*. See *INCISURA vomeris*.—*S. superior frontalis*. See *Superior temporo-sphenoidal*.—*S. supero-frontalis*. See *Supero-frontal fissure*.—*Transverse s.* See *Cruciate fissure*.—*Triradiatus s.* See *Orbital fissure*.

SULFACÉTAMIDE (Fr.), n. $\text{Su}^1\text{-fa}^2\text{-sa-ta}^2\text{-med}$. See **SULPHACETAMIDE**. For various words in *Sulf*-, not here given, see the corresponding forms in *Sulph*-.
A, ape; A², at; A³, ah; A⁴, all; Ch, chin; Ch², loch (Scottish); E, he; E², ell; G, go; I, die; I², in; N, in; N², tank;

SULFAMMON (Fr.), n. $\text{Su}^1\text{-fa}^2\text{-mo}^2\text{n}^2$. See **SULPHAMIC ACID**.

SULFANTIMONIAS (Lat.), n. m. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-a}^2\text{n}^2(\text{a}^2\text{n}^2)\text{-i}^2\text{mon}^1(\text{i}^2\text{-a}^2\text{s})$. Gen., -*alis*. A thioantimonite. [B.]—**S. sesquicalicus**. Potassium thioantimonite. [B.]

SULFANTIMONITE (Fr.), n. $\text{Su}^1\text{-fa}^2\text{-n}^2\text{-te-mo-net}$. A thioantimonite, also a thioantimonate. [B. 119.]

SULFARSÉNATE (Fr.), n. $\text{Su}^1\text{-fa}^2\text{-s-a-ne-a}^2\text{t}$. See **SULPHARSENATE**.

SULFARSENITE (Fr.), n. $\text{Su}^1\text{-fa}^2\text{-s-a-net}$. See **SULPHARSENITE**.—**S. calcique**. See **Liquor probatorius wirttembergicus**.

SULFAS (Fr. Cod.) (Lat.), n. m. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-a}^2\text{s}(\text{a}^2\text{s})$. Gen., -*alis*. See **SULPHATE**, and for subheadings not here given, see under **SULPHAS**.—**Collyrium cum sulfate zincico**. See **Collyre au sulfate de zinc**.—**Collyrium cum sulfate zincico ex Sanchez**. A collyrium made by dissolving 2 parts of zinc sulphate in 500 of water, adding 4 of powdered Florentine iris-root, macerating for 3 days, and filtering. [A. 447 (a. 21).]—**Liquor sulfatis ferri**. See **Liquor ferri tersulphatis**.—**S. aluminicus**. Aluminium sulphate. [B.]—**S. aluminopotassicus**. Potassium sulphate; ordinary alum. [B.]—**S. aluminopotassicus desiccatus**. See **Alumen desiccatum**.—**S. cadmicus**. See **Cadmium sulphate**.—**S. cupro-ammonicus**. See **Copper ammoniosulphate**.—**S. eserinus**. See **Eserine sulphate**.—**S. hydrargyricus**. See **Mercury sulphate** (2d def.).—**S. potassicus**. Normal potassium sulphate. [B.]—**S. quiniacus**. **S. quiniacus**. Quinine bisulphate. [B.]—**S. strychnicus**. **S. strychnicus**. See **STRYCHNINE sulphate**.—**Syrupus cum sulfate quiniaco**. See **Sirup de sulfate de quinine**.—**Syrupus cum sulfate strychnico**. See **Sirup de sulfate de strychnine**.

SULFAT (Ger.), n. $\text{Zulf-a}^2\text{t}$. See **SULPHATE**.

SULFATE (Fr.), n. $\text{Su}^1\text{f-a}^2\text{t}$. See **SULPHATE**.—**S. acide**. An acid sulphate. [B.]—**S. aluminico-potassique**. Potash alum. See **ALUM**.—**S. ammonio-ferrique**. See **IRON and ammonium sulphate** (2d def.).—**S. antimonique**. Antimony sulphate. [B. 119.]—**S. barytique**. Barium sulphate. [B. 119 (a. 38).]—**S. basique**. A basic sulphate. [B.]—**S. biquinique**. See **QUININE sulphate**.—**S. cuprico-ammonique tribasique**. See **COPPER ammoniosulphate**.—**S. ferreux**. See **IRON sulphate** (1st def.) and **FERRI sulphas**.—**S. ferreux desséché**. See **FERRI sulphas exsiccatus**.—**S. ferreux du commerce**. See **FERRUM sulfuricum crudum**.—**S. ferreux officinal**. See under **FERRI sulphas**.—**S. ferreux précipité**. See **FERRI sulphas precipitatus**.—**S. ferrique**. See **IRON sulphate** (2d def.).—**S. ferrique ammoniacal**. See **IRON and ammonium sulphate** (2d def.).—**S. ferrique liquide**. See **Liquor ferri tersulphatis**.—**S. mercurique**. See **MERCURY sulphate** (2d def.).—**S. mercurique basique**. **S. trimercurique**. See **MERCURY sub sulphate**.

SULFHYDANTOÏNE (Fr.), n. $\text{Su}^1\text{-f-de-a}^2\text{n}^2\text{-to-en}$. See **THIOHYDANTOIN**.

SULFHYDRATE (Fr.), n. $\text{Su}^1\text{-f-de-a}^2\text{t}$. See **SULPHYDRATE**.—**S. ammonique**. Ammonium hydrosulphide. [B. 119 (a. 38).]—**S. persulfuré**. See **Liquor fumans Beguini**.

SULFHYDROMÈTRE (Fr.), n. $\text{Su}^1\text{-f-de-ro-m}^2\text{e}^2\text{tr}$. A device for testing the amount of sulphured hydrogen in the air of an inhalation chamber; consisting of papers impregnated with a solution of a salt of lead, arranged with other papers so tinted as to serve as a gauge of the blackening of the former by the sulphur compound; proposed by Isoard as a means of regulating patients' stay in these chambers. ["Nouv. rem." Oct. 1, 1885, p. 297.]

SULFID (Ger.), n. Zulf-id . A sulphide used generally in composition and applied to those sulphides which act as acids. [B.] Cf. **SULFURET**.—**Antimonigès** S. [Berzelius]. Antimony tetrasulphide. [B.]—**Arsenigès** S. [Berzelius]. Arsenic trisulphide. [B.]—**Untersanigès** S. Arsenic disulphide. [B.]

SULFIDE (Fr.), n. $\text{Su}^1\text{-f-id}$. See **SULPHIDE**.—**S. antimonieux**. Antimony pentasulphide. [B. 119.]—**S. arsénieux**. Orpiment. [B. 119.]—**S. carbonique**. See **CARBON disulphide**.—**S. hydrique**. See **HYDROSULPHURIC ACID**.—**S. hyparsénieux**. Realgar. [B. 119.]—**S. hypointimonieux**. Antimony trisulphide. [B. 119.]

SULFIS (Lat.), n. m. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-i}^2\text{s}$. Gen., -*is*. See **SULPHITE**.—**S. kaliacus**. See **POTASSIUM sulphite**.—**S. natriacus**. See **SODIUM sulphite**.—**S. potassicus**. See **POTASSIUM sulphite**.—**S. sodicus**. See **SODIUM sulphite**.

SULFIT (Ger.), **SULFITE** (Fr.), n's. Zulf-et , $\text{su}^1\text{-fet}$. See **SULPHITE**.

SULFO-ETHYLICUS (Lat.), adj. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-o}(\text{o})\text{-e}^2\text{th}(\text{a}^2\text{-e}^2\text{th})\text{-i}^2\text{p}(\text{u}^1)\text{i}^2\text{k-u}^2\text{s}(\text{u}^2\text{s})$. Sulphovincic (ethylsulphuric); with the name of a base, the ethylsulphuric of the base. [B. 95.]

SULFOBENZOLÈNE (Fr.), n. $\text{Su}^1\text{-fo-ba}^2\text{n}^2\text{-zo-le}^2\text{n}$. See **SULFOBENZIDE**.

SULFOCARBOLICUS (Lat.), adj. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-o}(\text{o})\text{-ka}^2\text{rb-o}^1\text{i}^2\text{k-u}^2\text{s}(\text{u}^2\text{s})$. Sulphocarbolic; with the name of a base, the sulphocarbolic of the base. [B.]

SULFOCARBOMÈTRE (Fr.), n. $\text{Su}^1\text{-fo-ka}^2\text{rb-o-m}^2\text{e}^2\text{tr}$. An instrument for estimating the amount of carbon disulphide contained in the alkaline sulphocarbonates. [Gélis and Thommeret-Gélis, "Compt. rend. de l'acad. des sci." xv, p. 967 (B).]

SULFODIPHTHÉROSE (Fr.), **SULPHOCUOSE** (Fr.), n's. $\text{Su}^1\text{-fo-de-fa-roz}$, $\text{mu}^2\text{-koz}$. See **BAREGIN**.

SULFONALUM (Lat.), n. n. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-o}^2\text{n}^2\text{a}^2(\text{a}^2)\text{-u}^2\text{m}(\text{u}^2\text{m})$. See **SULFONAL**.

SULFONAPHTHIDE (Fr.), n. $\text{Su}^1\text{-fo-na}^2\text{f-ted}$. See **SULFONAPHTHALENE**.

SULFONBERNSTEINSÄURE (Ger.), n. $\text{Zulf-on-be}^2\text{rn-stin-zo}^2\text{-er}$. Sulphonsuccinic acid. [B.]

SULFONSÄUREBENZOL (Ger.), n. $\text{Zulf-on-zo}^2\text{-er-e}^2\text{-be}^2\text{n-tso}^2\text{l}$. Benzenesulphonic acid. [B.]

SULFONZIMMITSÄURE (Ger.), n. $\text{Zulf-on-tsi}^2\text{mt-zo}^2\text{-er-e}$. Sulphocinnamic acid. [B.]

SULFOPHENAS (Lat.), n. m. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-o}(\text{o})\text{-fen}(\text{a}^2)\text{-a}^2\text{s}(\text{a}^2\text{s})$. Fr., *sulfophénate*. Gen., -*alis*. See **SULPHOCARBOLATE**.

SULFOPHÉNIQUE (Fr.), adj. $\text{Su}^1\text{-fo-fa-nek}$. Sulphocarbolic. [B.]

SULFOSEL (Fr.), n. $\text{Su}^1\text{-fo-se}^2\text{l}$. See **SULPHOSALT**.

SULFOXYSMUS (Lat.), n. m. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-o}^2\text{x-i}^2\text{z}(\text{u}^2\text{z})\text{-mu}^2\text{s}(\text{mu}^2\text{s})$. Poisoning with sulphuric acid. [A. 326 (a. 21).]

SULFUR (Lat.), n. n. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})$. Gen., *sulfuris*. See **SULPHUR**.—**Hepar sulfuris**. See **POTASSA sulphurata** (1st def.).—**Hepar sulfuris calcareum**. Calcium sulphide; calx sulphurata. [B. 270.]—**Ioduretum sulfuris**. Sulphur iodide. [a. 38.]—**Pastilla sulfuris**. See **Tabella sulphuris**.—**S. depuratum**. Washed sulphur. [B.]—**S. iodatum**. See **Sulphur iodide**.—**S. lotum**. Washed sulphur. [B. 95 (a. 38).]—**S. precipitatum**. Precipitated sulphur. [B.]—**S. sublimatum**. 1. Of the Ger. Ph., Finn. Ph., Hung. Ph., 2d ed., and Russ. Ph., sublimed sulphur. 2. Of the Austr. Ph., washed sulphur. [B. 95 (a. 38).]—**S. sublimatum elotum** [Finn. Ph., Russ. Ph.] (see *et lotum* [Fr. Cod.], *seu lotum* [Hung. Ph., 2d ed.]). Washed sulphur. [B. 95 (a. 38).]—**Tabella cum sulfure**, **Trochiscus sulfuris**. See **Tabella sulphuris**.—**Unguentum sulfuris compositum**. See **Unguentum sulphuris compositum**.

SULFURATION (Fr.), n. $\text{Su}^1\text{-fu-a}^2\text{-ra-se-o}^2\text{n}^2$. Fumigation and disinfection with sulphur. [a. 18.] Cf. *Fumigation à l'acide sulfureux*.

SULFURATUS (Lat.), adj. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-at}(\text{a}^2\text{t})\text{-u}^2\text{s}(\text{u}^2\text{s})$. Sulphureted; with the name of a base, the sulphide of the base.

SULFURE (Fr.), n. $\text{Su}^1\text{-fu-r}$. See **SULPHIDE**.—**S. ammonique**. Liquor fumans Boyllii. [B. 119 (a. 38).]—**S. antimonique**. An antimony sulphide, especially antimony trisulphide. [B. 119.]—**S. cuivreux**. See **Æs combustum**.—**S. ferreux**. See **IRON monosulphide**.—**S. mercurique**. See **RED MERCURY sulphide**.—**S. plombique**. Lead sulphide. [B. 119 (a. 38).]

SULFURÉ (Fr.), adj. $\text{Su}^1\text{-fu-r-a}$. See **SULPHURATED**.

SULFURÉE (Fr.), n. $\text{Su}^1\text{-fu-r-a}$. Sulphurea; thiourea. [B.]

SULFURET (Ger.), n. Zulf-u-r-et . A sulphide, more particularly a lower or basic sulphide. [B.] Cf. **SULFID**.

SULFURETUM (Lat.), n. n. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-et}(\text{at})\text{-u}^2\text{m}(\text{u}^2\text{m})$. See **SULPHIDE** and cf. **SULPHURETUM**.—**S. arsenicosum**. See **ARSENIC trisulphide**.—**S. carbonicum**. See **CARBON disulphide**.—**S. hydrargyricum**. See **RED MERCURY sulphide**.—**S. natrium**, **S. sodium**. Sodium monosulphide. [B.]—**S. stibicum**. See **ANTIMONY sulphide**.—**S. stibicum auratum**. See **ANTIMONY pentasulphide**.

SULFUREUS (Lat.), adj. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-e}^2\text{u}^2\text{s}(\text{u}^2\text{s})$. Sulphur-yellow. [a. 35.]

SULFUREUX (Fr.), adj. $\text{Su}^1\text{-fu-r-u}^2\text{s}$. See **SULPHUROUS**.

SULFURICUS (Lat.), adj. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-i}^2\text{k-u}^2\text{s}(\text{u}^2\text{s})$. Sulphuric; with the name of a base, the sulphate of the base. [B.]

SULFUREOSUS (Lat.), adj. $\text{Su}^1\text{f}(\text{su}^1\text{f})\text{-u}^2\text{r}(\text{u}^2\text{r})\text{-o}^2\text{s}(\text{u}^2\text{s})$. Sulphurous; with the name of a base, the sulphate of that base. [B.]

SULPHACÉTAMIDE, n. $\text{Su}^1\text{-fa}^2\text{-e}^2\text{-a}^2\text{m-i}^2\text{d}(\text{id})$. Fr., *sulfacétamide*. A substance, $\text{S}(\text{CH}_2\text{CO}_2\text{NH}_2)_2$, obtained by adding an alcoholic solution of ammonium sulphide to an alcoholic solution of chloracetamide. [B. 93 (a. 14).]

SULPHACETIC ACID, n. $\text{Su}^1\text{-fa}^2\text{-e}^2\text{-a}^2\text{e}^2(\text{et})\text{-i}^2\text{k}$. Fr., *acide sulfacétique*. See **SULPHONACETIC ACID**.

SULPHACETYLIC ACID, n. $\text{Su}^1\text{-fa}^2\text{-e}^2\text{-a}^2\text{e}^2\text{-i}^2\text{l-i}^2\text{k}$. See **ETHIONIC anhydride**.

SULFALDEHYDE, n. $\text{Su}^1\text{-f-a}^2\text{l-de}^2\text{-hid}$. Fr., *sulfaldéhyde*. See **THIOALDEHYDE**.

SULPHAMETHYLANE, n. $\text{Su}^1\text{-fa}^2\text{-m}^2\text{-e}^2\text{th-i}^2\text{p-an}$. Fr., *sulfaméthylane*. A substance, SO_2NH_2 , obtained by passing a current of dry ammonia gas over methyl sulphate. [B. 93 (a. 14).]

SULPHAMIC ACID, n. $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{k}$. Fr., *acide sulfamique*, *sulfammon*. Ger., *Sulfamid*, *schnelfeisures Amid*. A substance, SO_2NH_2 , not yet isolated, but existing in neutral ammonium sulphate. [B. 93 (a. 14).] See also **AMIC ACIDS**.

SULPHAMIDE, n. $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{d}(\text{id})$. Fr., *sulfamide*. Ger., *Sulfamid*, *schnelfeisures Amid*. An old name for ammonium sulphate. [B. 93 (a. 14).]

SULPHAMINEBARBITURIC ACID, n. $\text{Su}^1\text{-fa}^2\text{-m-en-ba}^2\text{r-i}^2\text{t-u}^2\text{r-i}^2\text{k}$. See **THIONIC ACID**.

SULPHAMINEBENZOLIC ACID, n. $\text{Su}^1\text{-fa}^2\text{-m-en-be}^2\text{nz-o-i}^2\text{k}$. Ger., *Sulfaminbenzoesäure*. One of the products formed in the excretion of saccharin, found in the urine. [E. Salkowski, "Ctbl. f. d. med. Wssnsch." April 23, 1887, p. 307 (B).]

SULPHAMINOL, n. $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{n-o}^2\text{l}$. Ger., *Sulfaminol*. Thioxidiphenylamine; a substance, $\text{C}_6\text{H}_5\text{NHSO}_2 = \text{NH}$; $(\text{C}_6\text{H}_5)_2\text{OH}$; S, forming a yellowish, tasteless and odourless powder, insoluble in water, soluble in solutions of the alkalis. In the liquids of the animal organism it decomposes with the evolution presumably of sulphur and phenol. According to Moritz, it acts like iodoform in diminishing suppuration. ["Ann. d. chim. e. d. pharm." July, 1890, p. 44 (B).]

SULPHAMYLIC ACID, n. $\text{Su}^1\text{-fa}^2\text{-m-i}^2\text{l-i}^2\text{k}$. See **AMYL sulphate**.

SULPHANILIC ACID, n. $\text{Su}^{\text{f}}\text{-a}^{\text{n}}\text{-i}^{\text{2}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfanilique* (ou *sulfanilique*). Ger., *Sulfanilsäure*, *Sulfonanilsäure*. Paramidobenzene-sulphonic acid (see under AMIDOBENZENE-SULPHONIC ACID). It is slightly soluble in water, and is used internally to prevent iodism. [B; Ehrlich, "Pharm. Rundsch." ("Am. Jour. of Pharm.," May, 1886); "N. Y. Med. Jour.," May 22, 1886, p. 534 (a, 50).]

SULPHANTIMONIC ACID, n. $\text{Su}^{\text{f}}\text{-a}^{\text{n}}\text{-ti}^{\text{2}}\text{-mo}^{\text{n}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfantimonique*. Ger., *Sulfantimonsäure*. See THIOANTIMONIC ACID.—**ANHYDROUS s. a.** See ANTIMONY PENTASULPHIDE.

SULPHANTIMONIOUS ACID, n. $\text{Su}^{\text{f}}\text{-a}^{\text{n}}\text{-ti}^{\text{2}}\text{-mon}^{\text{i}}\text{-i}^{\text{2}}\text{u}^{\text{s}}$. Antimony tetrasulphide. [B.]

SULPHANTIMONIOUS ANHYDRIDE, n. Antimony trisulphide. [B, 159.]

SULPHANTIMONITE, n. $\text{Su}^{\text{f}}\text{-a}^{\text{n}}\text{-ti}^{\text{2}}\text{-m}^{\text{o}}\text{-n}^{\text{i}}\text{-it}$. See THIOANTIMONITE.

SULPHARSENATE, n. $\text{Su}^{\text{f}}\text{-a}^{\text{s}}\text{-e}^{\text{n}}\text{-at}$. Fr., *sulfarséniate*. See THIOARSENATE.—**Basic s.** See *Tribasic s.*—**Diammonic s.** See AMMONIUM THIOARSENATE.—**Dibasic s's.** Of Watts, a class of salts now known as the pyrothioarsenates. [B.]—**Monammonic s.** See AMMONIUM THIOARSENATE.—**Monobasic s's.** Of Watts, a class of salts now known as meta-thioarsenates. [B.]—**Neutral s.** See *Dibasic s.*—**Triammonic s.** See AMMONIUM THIOARSENATE.—**Tribasic s's.** Of Watts, the class of salts known now as the thioarsenates or orthothioarsenates. [B.]

SULPHARSENIC ACID, n. $\text{Su}^{\text{f}}\text{-a}^{\text{s}}\text{-e}^{\text{n}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfarsénique*. Ger., *Sulfarsensäure*. An improper term for arsenic pentasulphide; properly thioarsenic acid (q. v.). [B.]

SULPHARSENIOUS ACID, n. $\text{Su}^{\text{f}}\text{-a}^{\text{s}}\text{-e}^{\text{n}}\text{-i}^{\text{2}}\text{u}^{\text{s}}$. Fr., *acide sulfarsénieux*. Ger., *Sulfarsensäure*. An improper term for arsenic trisulphide; properly thioarsenous acid (q. v.). [B.]

SULPHARSENITE, n. $\text{Su}^{\text{f}}\text{-a}^{\text{s}}\text{-e}^{\text{n}}\text{-it}$. See THIOARSENITE.

SULPHAS (Lat., n. m. $\text{Su}^{\text{f}}\text{f}(\text{su}^{\text{f}}/\text{a}^{\text{s}}/\text{a}^{\text{s}})$). Gen., *-phat'is*. See SULPHATE and cf. subheadings under SULFAS.—**Liquor sulphatis magnesi carbonici**. See LIQUOR MAGNESII CARBONATIS.—**Solutio sulphatis atropici** [Norw. Ph.]. A solution of 1 part of atropine sulphate in 200 parts of distilled water. [B, 95.] Cf. *Liquor atropinæ sulphatis*.—**Solutio sulphatis ferri**. See *Liquor Ferri tersulphatis*.—**Solutio sulphatis magnesi carbonici**. See *Liquor Magnesi carbonatis*.—**S. ethylis acidus cum alcoholo**. See *Mixtura sulphurica acida*.—**S. aluminaris**. See ALUM.—**S. aluminico-kalicus** (crudus). Crude alum. [B, 95 (a, 38).]—**S. aluminico-kalicus depuratus**. Alum purified by recrystallization. [B, 95 (a, 38).]—**S. aluminico-kalicus siccatus** (seu ustus). Burnt alum. [B, 95.]—**S. aluminico-natrius**. See ALUMINIUM and sodium sulphate.—**S. aluminico-potassius**. See ALUMINIUM and potassium sulphate.—**S. ammonio-ferrius**. See IRON and ammonium sulphate (2d def.).—**S. ammonicus**. See AMMONIUM sulphate.—**S. atropicus**. See ATROPINE sulphate.—**S. calcicus natus**. Gypsum. [B.]—**S. calcicus ustus**. See CALCIUM SULFURICUM USTUM.—**S. cinchicus**. See QUININE sulphate.—**S. cinchonius**. See CINCHONINE sulphate.—**S. cuprico-ammoniacus** (basicus). See COPPER ammoniosulphate.—**S. cupricus**. See COPPER sulphate.—**S. cupricus ammoniacalis**. See COPPER ammoniosulphate.—**S. cupricus purus**. See COPPER sulphate.—**S. cupricus venalis**. See CUPRUM SULFURICUM.—**S. crudus**. See *Supraammoniac acidus*.—**S. cupricus ammoniosulphate**.—**S. ferrius**. See IRON sulphate (2d def.).—**S. ferrosus**. See FERRI s. and IRON sulphate (1st def.).—**S. ferrosus exsiccatus** (seu siccatus). See FERRI s. *exsiccatus*.—**S. hydrargyricus flavus**. See MERCURY SUBSULPHATE.—**S. kalico-aluminicus**. Crude alum. [B, 95 (a, 38).]—**S. kalico-aluminicus exsiccatus**. Burnt alum. [B, 95.]—**S. kalicus**. See POTASSIUM sulphate.—**S. magneticus**. See MAGNESIUM sulphate.—**S. manganosus**. See MANGANESE sulphate (1st def.).—**S. mercurius**. See MERCURY sulphate (2d def.).—**S. morpheus**. See MORPHINE sulphate.—**S. natrius**. See SODIUM sulphate.—**S. natrius siccatus** (seu siccus). See DRIED SODIUM sulphate.—**S. quinicus**. See QUININE sulphate.—**S. sodicus**. See SODIUM sulphate.—**S. stibicus**. See ANTIMONY sulphate. [B.]—**S. superammoniaco-cupreus** (seu *-cupricus*). See COPPER ammoniosulphate.—**S. zincicus**. See ZINC sulphate.

SULPHATE, n. $\text{Su}^{\text{f}}\text{-at}$. Lat., *sulphas* (cf. SULPHURICUS). Fr., *sulfate*. Ger., *Sulfat*, *schwefelsaures Salz*. A salt of sulphuric acid (cf. *Normal s.* and *Acid s.*).—**Acid s.** A salt of sulphuric acid in which only one atom of hydrogen in the molecule of the acid is replaced by a metal or radicle. The general formula of the acid s is $\text{H}_2(\text{H}^{\text{a}}\text{H}^{\text{b}}\text{H}^{\text{c}})$, where H^{a} is a radicle whose combining power is 1. [B.]—**Basic s.** A compound of a s with an oxide or hydroxide. [B.]—**Dimetallic s.** A normal s so called because two atoms of a univalent metal are required to replace completely the hydrogen of the acid. [B.]—**Ferrous s.** See IRON sulphate (1st def.).—**Monohydric s.** See *Acid s.*—**Normal s.** A s in which all of the hydrogen of the acid is replaced by a metal or radicle. The general formula of these s 's is $\text{R}_2^{\text{a}}\text{SO}_4$, $\text{R}^{\text{b}}\text{SO}_4$, or $\text{R}_2^{\text{c}}(\text{SO}_4)_2$. [B.]—**Test solution of ferrous s.** A freshly prepared solution of ferrous s in ten times [U. S. Ph., Br. Ph.] (twice [Ger. Ph.]) as much water. [B, 81 (a, 38).]

SULPHAZOTIC ACID, n. $\text{Su}^{\text{f}}\text{-a}^{\text{z}}\text{-o}^{\text{2}}\text{-i}^{\text{2}}\text{k}$. See HYDROXYLAMINISULPHONIC ACID.

SULPHAZOTIZED, adj. $\text{Su}^{\text{f}}\text{-a}^{\text{z}}\text{-o}^{\text{2}}\text{-tizd}$. Fr., *sulfazoté*. Containing sulphur and nitrogen. [A, 385 (a, 45).]

SULPHETHERIN, n. $\text{Su}^{\text{f}}\text{-e}^{\text{th}}\text{-e}^{\text{r}}\text{-i}^{\text{2}}\text{n}$. Of Löwig and Weidmann, ethylene sulphide. [B, 3 (a, 38).]

SULPHETHIONIC ACID, n. $\text{Su}^{\text{f}}\text{-e}^{\text{th}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-n}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. See ETHIONIC ANHYDRIDE.

SULPHETHYLSULPHURIC ACID, n. $\text{Su}^{\text{f}}\text{-e}^{\text{th}}\text{-i}^{\text{2}}\text{-su}^{\text{f}}\text{-i}^{\text{2}}\text{k}$. See ETHYLSULPHONIC ACID.

SULPHYDRATE, n. $\text{Su}^{\text{f}}\text{-hid}^{\text{i}}\text{-rat}$. See SULPHYDRATE.

SULPHIDE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-d}$ (id). Lat., *sulphidum*, *sulphuretum* (cf. SULPHURATUS). Fr., *sulfure*, *sulfide*. Ger., *Sulphid*, *Schnefel*. A compound consisting of an element or radicle united directly with sulphur. [B.]—**Arsenious s.** See ARSENIC trisulphide.

SULPHIDE—**S. stibicum**. Antimony pentasulphide. [B.]—**S. stibiosum**. Antimony tetrasulphide. [B.]

SULPHINDIGOTATE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-n}^{\text{i}}\text{-d}^{\text{i}}\text{-g}^{\text{o}}\text{-t}^{\text{2}}\text{-at}$. Fr., *céruléo-sulfate*. A salt of sulphindigotic acid. [a, 17.]

SULPHINDIGOTIC ACID, **SULPHINDYLIC ACID**, n's. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-n}^{\text{i}}\text{-d}^{\text{i}}\text{-g}^{\text{o}}\text{-t}^{\text{2}}\text{-i}^{\text{2}}\text{k}$, $\text{-i}^{\text{2}}\text{-n}^{\text{i}}\text{-d}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. An acid, $\text{C}_{14}\text{H}_8\text{N}_2\text{O}_2(\text{SO}_2\text{H})_2$, occurring as an amorphous blue mass produced by the action of sulphuric acid upon indigo. [B, 4 (a, 38).]

SULPHINE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-en}$. Ger., *Sulfin*. Any one of a class of radicles, analogous to the amines, in which sulphur is present as a quadrivalent body. Such radicles have the composition $\text{R}^{\text{a}}\text{R}^{\text{b}}\text{S}$ or $\text{S}\text{R}^{\text{a}}\text{R}^{\text{b}}$, in which R^{a} and R^{b} represent respectively bivalent and trivalent single radicles or combinations of radicles. [B.]

SULPHINIC ACIDS, n. pl. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-n}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Ger., *Sulfinsäuren*. Monobasic acids, which may be regarded as derived from sulphurous acid by the replacement of one molecule of hydroxyl in the latter by a univalent radicle. Formula, $\text{H}\text{R}^{\text{a}}\text{S}\text{O}_2$. [B.]

SULPHIODE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-od}^{\text{i}}\text{-i}^{\text{2}}\text{k}$ (id). A compound of sulphur and iodine with the same base. [B.]

SULPHIS (Lat., n. m. $\text{Su}^{\text{f}}\text{f}(\text{su}^{\text{f}}/\text{i}^{\text{2}}/\text{s})$. Gen., *-phit'is*. See SULPHITE.—**S. calcicus**. See CALCIUM sulphite.—**S. magneticus**. See MAGNESIUM sulphite.—**S. natrius**, **S. sodicus**. See SODIUM sulphite.—**S. stibicus**. Antimony sulphite. [B.]

SULPHITE, n. $\text{Su}^{\text{f}}\text{-it}$. Lat., *sulphis*. Fr., *sulfite*. Ger., *Sulfit*. A salt of sulphurous acid. In the normal s 's all the hydrogen of the acid is replaced by a metal or radicle; in the acid s 's only one atom of hydrogen is so replaced. [B.]

SULPHMETHYLATE, n. $\text{Su}^{\text{f}}\text{-me}^{\text{th}}\text{-i}^{\text{2}}\text{-at}$. See THIOMETHYLATE.

SULPHONACETIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-a}^{\text{s}}\text{-et}^{\text{(e)}}\text{-i}^{\text{2}}\text{k}$. See SULPHONACETIC ACID.

SULPHOARSENITE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-a}^{\text{s}}\text{-e}^{\text{n}}\text{-it}$. See THIOARSENITE, and for various forms in Sulpho- not here given, see the corresponding forms in Thio-.

SULPHO-AZOTIZED, adj. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-a}^{\text{z}}\text{-ot}^{\text{-izd}}$. See SULPHAZOTIZED.

SULPHOBACTERIA (Lat., n. n. pl. $\text{Su}^{\text{f}}\text{f}(\text{su}^{\text{f}}/\text{i}^{\text{2}}/\text{o}^{\text{2}}/\text{ba}^{\text{2}}/\text{kt}^{\text{(ka)}\text{kt}}\text{-e}^{\text{a}}/\text{i}^{\text{2}}\text{-a}^{\text{s}})$. For deriv. see SULPHUR and BACTERIUM. Fr., *sulfobactéries*. See SCHWEFELBACTERIEN.

SULPHOBASE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-bas}$. See SULPHO-BASE.

SULPHOBENZENIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-be}^{\text{n}}\text{-z}^{\text{e}}\text{-n}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Benzenesulphonic acid. [B.]

SULPHOBENZIDE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-be}^{\text{n}}\text{-z}^{\text{e}}\text{-i}^{\text{2}}\text{k}$ (id). Fr., *sulfobenzide*. Ger., *Sulfobenzid*. See DIPHENYLSULPHONE.

SULPHOBENZIDIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-be}^{\text{n}}\text{-z}^{\text{e}}\text{-i}^{\text{2}}\text{k}$. See DIPHENYLSULPHONIC ACID.

SULPHOBENZOIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-be}^{\text{n}}\text{-z}^{\text{e}}\text{-o}^{\text{2}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfobenzoïque*. Ger., *Sulfobenzoësäure*. An acid, $\text{C}_7\text{H}_5\text{SO}_4$ = $\text{C}_6\text{H}_4\text{COOH}$, known in three isomeric forms: *Orthos*' acid, monoclinic tabular crystals; *metas*' acid, a colorless crystalline mass; and *paras*' acid, acicular crystals. [B, 3 (a, 38).]

SULPHOBENZOLIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-be}^{\text{n}}\text{-z}^{\text{e}}\text{-o}^{\text{2}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfobenzoïque*. Benzenesulphonic acid. [B.]

SULPHOBROMIDE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-brom}^{\text{i}}\text{-i}^{\text{2}}\text{k}$ (id). A compound of sulphur and bromine with the same base. [B, 2.]

SULPHOBUTYLIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-bu}^{\text{2}}\text{-t}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfobutylique*. See BUTYL sulphate.

SULPHOCAMPHIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-mf}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocamphique*. See SULPHOCYMENIC ACID.

SULPHOCAMPHORIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-m}^{\text{-fo}}\text{-r}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocamphorique*. Ger., *Sulfocamphersäure*. Of Walter, sulphocamphyllic acid.

SULPHOCAMPHYLIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-m}^{\text{-f}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocamphyligue*. A strong dibasic acid, $\text{C}_7\text{H}_5\text{SO}_4 + 2\text{H}_2\text{O}$, occurring as hexagonal asymmetric prisms. [B, 3 (a, 38).]

SULPHOCARBAMIDE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-a}}\text{-m}^{\text{-i}}\text{-d}$ (id). Fr., *sulfocarbamide*. Ger., *Sulfocarbamid*. See THIOUREA.

SULPHOCARBANILIDE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-a}}\text{-n}^{\text{-i}}\text{-i}^{\text{2}}\text{k}$ (id). Fr., *sulfocarbaniide*. See DIPHENYLTHIOUREA.

SULPHOCARBOL, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-o}}\text{-l}$. See ASEPTOL.

SULPHOCARBOLATE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-o}}\text{-l}^{\text{-at}}$. Lat., *sulphocarbolas*. Fr., *sulphophénate*. Ger., *phenylschwefelsaures Salz*. A salt of sulphocarbolic acid. [B.]

SULPHOCARBOLIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-o}}\text{-l}^{\text{-i}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocarbolicque* (ou *sulfo-phénique*). See PHENOLSULPHURIC ACID.

SULPHOCARBONIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-o}}\text{-n}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocarbonique*. 1. Thiocarbonic acid. 2. Carbon dioxide.

SULPHOCARBOVINIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-ka}^{\text{2}}\text{-rb}^{\text{-o}}\text{-vin}^{\text{i}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocarbovinique*. See XANTHIC ACID.

SULPHOCHLORIDE, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-klor}^{\text{i}}\text{-i}^{\text{2}}\text{k}$ (id). Fr., *sulfochlorsure*. A compound of sulphur and chlorine with the same base. [B.]

SULPHOCRESYLIC ACID, n. $\text{Su}^{\text{f}}\text{-i}^{\text{2}}\text{-o}^{\text{2}}\text{-kre}^{\text{s}}\text{-y}^{\text{l}}\text{-i}^{\text{2}}\text{k}$. Fr., *acide sulfocrésylique*. Ger., *Kresylschwefelsäure*. A monobasic acid, $\text{C}_6\text{H}_3(\text{CH}_3)\text{OH}\text{SO}_3\text{H}$. [B.]

SULPHOCUMINIC ACID, n. $\text{Su}^3\text{lf-o-ku}^2\text{-mi}^2\text{n}^2\text{ik}$. Fr. *acide sulfocuminique*. An acid, $\text{SO}(\text{O.C}_6\text{H}_4)_2(\text{OH})$, obtained by the action of sulphuric acid on cumene; known only in its salts.

SULPHOCYANHYDRIC ACID, **SULPHOCYANIC ACID**, n's. $\text{Su}^3\text{lf-o-si-a}^2\text{n}^2\text{-hid}^2\text{r}^2\text{ik}$, -a²n²/ik. See THIOCYANIC ACID.

SULPHOCYANIC ANHYDRIDE, n. See CYANOGEN sulphide.

SULPHOCYANIDE, n. $\text{Su}^3\text{lf-o-si-a}^2\text{n}^2\text{-id}^2(\text{id})$. See THIOCYANIDE.

SULPHOCYANOGEN, n. $\text{Su}^3\text{lf-o-si-a}^2\text{n}^2\text{-o-je}^2\text{n}$. A hypothetical radicle, CNS, of thiocyanic acid. [B. 93 (a, 14).]

SULPHOCYMENIC ACID, n. $\text{Su}^3\text{lf-o-si-me}^2\text{n}^2\text{ik}$. An acid, $\text{C}_6\text{H}_5\text{SO}_2\text{OH}(\text{CH}_2)(\text{C}_6\text{H}_5)$, derived from cymene. [B.]

SULPHODIAZO BENZENE, n. $\text{Su}^3\text{lf-o-di-a}^2\text{z-o-be}^2\text{nz/en}$. See DIAZO BENZENESULPHONIC ACID.

SULPHÖESSIGSÄURE (Ger.), n. $\text{Zulf-o-e}^2\text{s}^2\text{si}^2\text{g-zoir-e}^2$. See SULPHONACETIC ACID.

SULPHOFORM, n. $\text{Su}^3\text{lf-o-f}^2\text{orm}$. Fr. *sulfoforme*. Ger. *Sulfoform*. A yellowish crystalline substance, $(\text{CH}_3)_2\text{S}_2$, obtained by heating iodoform with sulphur in a closed vessel. [B. 93 (a, 14).]

SULPHOGLUCIC ACID, n. $\text{Su}^3\text{lf-o-glu}^2\text{-si}^2\text{ik}$. Fr. *acide sulfoglucique* (ou *sulfoglucose*, ou *sulfosaccharique*). Dextrose sulphuric acid; an unstable body, $\text{C}_6\text{H}_{12}\text{O}_4\text{S}_2\text{SO}_3$, formed by dissolving glucose (dextrose) in concentrated sulphuric acid. [B. 4, 9, 93.]

SULPHOGLYCERIC ACID, n. $\text{Su}^3\text{lf-o-gli}^2\text{-e}^2\text{r}^2\text{ik}$. Fr. *acide sulfoglycérique*. See GLYCERINSULPHURIC ACID.

SULPHOGLYCOLIC ACID, n. $\text{Su}^3\text{lf-o-gli}^2\text{ik-o}^2\text{r}^2\text{ik}$. Fr. *acide sulfoglycolique*. Basic ethylene sulphate. [B.]

SULPHOHYDRAS (Lat.), n. m. $\text{Su}^3\text{lf}(s\text{u}^3\text{lf-o}^2\text{-o}^2\text{-hid}^2(\text{hu}^2\text{d}^2\text{-ra}^2\text{sura}^2\text{s})$. Ger., -ratia. A hydrosulphide. [B. 95.]

SULPHOLIC ACID, **SULPHOLINIC ACID**, n's. $\text{Su}^3\text{lf-o}^2\text{-o}^2\text{ik}$, -i²e²/ik. Fr. *acide sulfolique*. An acid obtained by the action of sulphuric acid on vegetable oils. When concentrated it is a yellowish liquid with a neutral reaction. It possesses remarkable properties as a solvent, and has been recommended as a substitute for vaseline, oleic acid, glycerin, etc., for external use. [Therap. Gaz., "Nov., 1889, p. 763 (a, 50).]

SULPHOMANNIC ACID, n. $\text{Su}^3\text{lf-o-ma}^2\text{n}^2\text{-i}^2\text{ik}$. Fr. *acide sulfomannique*. A substance obtained by treating the product of the reaction of sulphuric acid on mannite with barium carbonate. [B. 38 (a, 14).]

SULPHONACETIC ACID, n. $\text{Su}^3\text{lf-on-a}^2\text{s}^2\text{e}^2(\text{e}^2\text{t}^2\text{ik})$. Fr. *acide sulfo-acétique* (ou *sulfo-acétique*). Ger. *Sulfonessigsäure*, *Sulfosäure*. A dibasic acid, $\text{C}_2\text{H}_4\text{SO}_6$, obtained by the action of sulphuric anhydride on hot acetic acid. [B. 4; B. 3 (a, 14, 38).]

SULPHONAL, n. $\text{Su}^3\text{lf-o}^2\text{-n}^2$. Ger. *Sulfonal*. Diethylsulphonedimethylmethane, $\text{C}_7\text{H}_{16}\text{S}_2\text{O}_6 = \text{C}_2\text{H}_5\text{HSO}_2\text{C}_2\text{H}_5$, occurring as colorless prismatic crystals. It is odorless and nearly or quite tasteless, and has decided hypnotic qualities. [B. 270 (a, 38); "Am. Jour. of Pharm.," June, 1888, p. 273; "N. Y. Med. Jour.," July 7, 1888, p. 9.]

SULPHONE, n. $\text{Su}^3\text{lf-on}$. 1. A bivalent radicle, $(\text{SO}_2)^2$, in which the sulphur is a hexad, $>\text{S}^{\text{vi}} = \text{O}$. 2. A compound of s. (1st def.) in which both free valences are satisfied by radicles containing carbon. [B. 270 (a, 38).]

SULPHONIC ACIDS, n. pl. Fr., *acides sulfoniques*. Ger., *Sulfonsäuren*. See SULPHONIC ACIDS.

SULPHOPHENATE, n. $\text{Su}^3\text{lf-o-fe}^2\text{n}^2\text{at}$. Lat., *sulphophenas*. Fr., *sulphophénate*. See SULPHOCARBOLATE.

SULPHOPHÉNOL (Fr.), n. $\text{Su}^3\text{lf-o-fa-nol}$. See ASEPTOL.

SULPHOPHENOLIC ACID, n. $\text{Su}^3\text{lf-o-fe}^2\text{n}^2\text{-o}^2\text{r}^2\text{ik}$. Phenol-sulphonic acid. [B. 2.]

SULPHOPURPURIC ACID, n. $\text{Su}^3\text{lf-o-pu}^2\text{r}^2\text{-pu}^2\text{r}^2\text{ik}$. Fr. *acide sulfopurpurique* (ou *sulphopénique*). Ger., *Phönichinschweifsteure*, *Purpuranschweifsteure*, *Phönichinsulphuric acid*, $\text{C}_{16}\text{H}_8\text{N}_2\text{O}_4(\text{SO}_2\text{H})$, a reddish-purple powder. [B. 93, 270 (a, 38).]

SULPHOQUINIC ACID, n. $\text{Su}^3\text{lf-o-kwi}^2\text{n}^2\text{ik}$. See QUININE-sulphuric acid.

SULPHOSALICYLIC ACID, n. $\text{Su}^3\text{lf-o-sa}^2\text{r}^2\text{-i}^2\text{s}^2\text{-i}^2\text{ik}$. Fr. *acide sulfosalicylique*. Ger., *Sulfosalicylsäure*. An acid, $\text{C}_6\text{H}_4(\text{SO}_2\text{H})(\text{OH})\text{CO.OH} = \text{C}_6\text{H}_4\text{SO}_3$, occurring as long, thin, hygroscopic, acicular crystals. [B. 3, 93 (a, 14, 38).]

SULPHO-SALT, n. $\text{Su}^3\text{lf-o-sa}^2\text{lt}$. Fr., *sulfosel*. A salt in which sulphur replaces an equivalent amount of oxygen. Designated by the prefix *sulpho-* or *thio-*. [B.]

SULPHOSINAPIC ACID, n. $\text{Su}^3\text{lf-o-si}^2\text{n}^2\text{-a}^2\text{p}^2\text{ik}$. Fr. *acide sulfosinapique*. Ger., *Sulfosinapsäure*. See ALLYLdithiocarbamic acid.

SULPHOSTIBIAS (Lat.), n. f. $\text{Su}^3\text{lf}(s\text{u}^3\text{lf-o}^2\text{-o}^2\text{-sti}^2\text{b}^2\text{-i}^2\text{a}^2\text{s-a}^2\text{s})$. Gen., -atias. See THIOANTIMONATE. [B.]—S. *calciicus*. See CALCIUM thioantimonate.—S. *natriicus* cum aqua. See Sodium thioantimonate.

SULPHOSULPHATE, n. $\text{Su}^3\text{lf-o-su}^3\text{r}^2\text{at}$. A thiosulphate. [B.]

SULPHOSULPHURIC, adj. $\text{Su}^3\text{lf-o-su}^3\text{r}^2\text{-i}^2\text{r}^2\text{ik}$. See THIO-SULPHURIC.

SULPHOVINATE, n. $\text{Su}^3\text{lf-o-vin}^2\text{at}$. Fr., *sulfovinate*. A salt of sulphovinic acid. [a, 14.]

SULPHOVINIC, adj. $\text{Su}^3\text{lf-o-vin}^2\text{ik}$. Produced by the action of sulphuric acid upon wine or alcohol. [B.]—S. *acid*. See under ETHYL sulphate.

SULPHOXAMIDE, n. $\text{Su}^3\text{lf-o}^2\text{x-a}^2\text{m-i}^2\text{d}^2(\text{id})$. See CYANOGEN disulphhydrate.

SULPHOXIARSENIC ACID, n. $\text{Su}^3\text{lf-o}^2\text{x-i}^2\text{-a}^2\text{rs-e}^2\text{n}^2\text{r}^2\text{ik}$. See ARSENIC oxydisulphide.

SULPHOXYBENZOIC ACID, n. $\text{Su}^3\text{lf-o}^2\text{x-i}^2\text{-be}^2\text{nz-o}^2\text{r}^2\text{ik}$. Benzoic acid in which one atom of hydrogen is replaced by hydroxyl and another by the radicle SO_2OH . *Orthos* acid is sulphosalicylic acid (q. v.). *Paras* acid is also known. [B.]

SULPHOXYMETHYLIC ACID, n. $\text{Su}^3\text{lf-o}^2\text{x-i}^2\text{-meth-i}^2\text{r}^2\text{ik}$. Fr. *acide sulfoxy-méthylque*. A very stable substance, $\text{CH}_2\text{OH-SO}_2\text{H}$, isomeric with methylsulphuric acid. [B. 93 (a, 14).]

SULPHUME, n. $\text{Su}^3\text{lf-u}^2\text{m}$. A proprietary name for a preparation which is "little else than an aqueous solution of some of the higher sulphides of sodium and potassium saturated with sulphur." [Squibb, "Ephemeres," etc., Feb., 1893, p. 63.]

SULPHUR (Lat.), n. n. $\text{Su}^3\text{lf}(s\text{u}^3\text{r}^2\text{f}) \text{u}^2\text{r}^2\text{u}^2\text{r}$. Gen., *sulph'uris*. Gr., *θειον*. Fr., *soufre*. Ger., *Schwefel*. It., *zolfo*. Sp., *azufre*. Written also *sulfur*, a non-metallic element occurring in nature both free and combined. As obtained in nature it forms yellow transparent rhombic crystals, insoluble in water, and only slightly soluble in alcohol or ether, but very soluble in carbon disulphide, in benzene, in petroleum, and in oil of turpentine. It has a slight taste, and on rubbing acquires a peculiar odor. The sp. gr. of this variety of s. is 2.05, and it melts at 114.5° C. to form a clear yellow liquid. When this liquid is cooled till a crust has formed over its surface, and the underlying liquid is poured off, the lining the sides of the vessel recrystallizes in long, thin, transparent, monoclinic prisms, constituting *monoclinic s.*, which has a sp. gr. of 1.96 and melts at 120° C. The s. of commerce (cf. *S. caballinum*) is obtained by fusing native s., and this in turn is purified by sublimation, condensing to form flowers of s. When s. is heated to over 300° C., the molten substance becomes dark and viscid (cf. *Plastic s.*), but the viscosity diminishes on subsequent increasing of the temperature. S. unites directly with many elements and radicles to form the sulphides. In combination with oxygen it enters into the formation of sulphurous, sulphuric, hyposulphurous, thiosulphuric, dithionic, trithionic, and pentathionic acids, as well as of the salts of these acids. In composition it acts usually as a bivalent radicle, and the compounds so formed have a marked analogy to the compounds of oxygen. In other respects it resembles the element and several radicle. Atomic weight, 31.98; symbol, S. [B. 3, 5.] See also *Insoluble s.*, *Roll s.*, and *Washed s.* 2. Of Paracelsus, the combustible part of the human body. [H.]—**Acidum sulphuris volatile**. See ANTIMONIUM chysus.—**Alcohol s., **Alcohol sulphuris**. 1. Carbon disulphide. [B. 81, 97.] 2. Flowers of s. in fine powder. [Sir H. Davy (B. 39).]—**Alkaline s. ointment**. See *Alkaline sulphuris albidum*.—**Alum s., **Alum sulphuris**. See *Sulphuris ASTRUM*.—**Balsam s., **Balsamum sulphuris**. Fr., *baume de soufre*. A solution of s. in linseed-oil. [B.]—**Balsamum sulphuris anisatum**. A solution of s. in oil of aniseed. [B. 119.]—**Balsamum sulphuris Kulandi**. A solution of s. in linseed-oil or nut-oil. [L. 45.]—**Balsamum sulphuris simplex**. A preparation made by digesting flowers of s. with from four to ten times as much almond-oil, nut-oil, or olive-oil, and filtering; or by digesting 2 parts of flowers of s. in 18 of oil of poppy, and 6 of wine for eight days, and boiling till the moisture is dissipated. [B. 119 (a, 38).]—**Balsamum sulphuris terebinthinatum**. See *Oleum TEREBINTHINAE sulfuratum*.—**Beguin's volatile spirit of s. See *Liquor fumans Boylei*.—**Ceratum s. sulphure**. See *CERAT soufre* and cf. *Unguentum sulphuris*.—**Confectio** (see *Electuarium*) **sulphuris** [B. 119]. Fr., *confé de soufre*, *opiat de soufre*. Ger., *Schwefelzucker*. A preparation made by rubbing together 4 oz. of sublimed s., 1 oz. of acid potassium tartrate in powder, 4 fl. oz. of syrup of orange-peel, and 18 grains of powdered tragacanth. [B. 81 (a, 21); B. 95.]—**Emplastrum sulphuris**. A plaster made by melting together 3 parts of flowers of s., 12 of olive-oil, and 15 of yellow wax, and adding 30 of myrrh; or by melting together 3 parts each of oleum terebinthinum, sulfuratum, yellow wax, and colophony, and adding 9 of myrrh. [B. 119 (a, 38).]—**Flores sulphuris**. See *Flowers of s.*—**Flores sulphuris loti**. See *Washed s.*—**Flowers of s.** Fr., *fleurs de soufre*. Ger., *Schwefelblumen*. Sublimed s. obtained in the form of light powdery flakes. [B.]—**Glyceritum cum sulphure** [Fr. Cod., 1866]. Fr., *glycéré de soufre*. A preparation made by thoroughly mixing 1 part of sublimed and washed sulphur with 4 parts of glycerinum amyli. [B. 119 (a, 14).]—**Golden s.** See *Wine of s.*—**Lac s. sulphuris**. See *POTASSA sulphurata* (1st def.).—**Hepar sulphuris volatile**. See *Liquor fumans Boylei*.—**Insoluble s.** A modification of s., being that portion of sublimed s. which is insoluble in carbon disulphide. [B.]—**Iodetum sulphuris cum sulphure**, **Iodetum sulphuris**. See *S. iodide*.—**Lac sulphuris**. See *Precipitated s.*—**Liver of s. See *POTASSA sulphurata*.—**Magisterium s.** See *Magisterium s.*—**Monoclinic s.** See *Monoclinic s.*—**Oil of s.** 1. Sulphurous acid obtained by concentrating spirit of s. 2. *Liquor fumans Boylei*. [B. 97, 98.]—**Oleum sulphuris**. 1. See *ANTIMONIUM chysus*. 2. Of Beguin, see *Liquor fumans Boylei*.—**Pilula e ammoniaco cum sulphure stibato**. Fr., *pilules pectorales*. Two-grain pills containing 1 part of antimony trisulphide made up of 8 parts of gum ammoniac and 5 parts of licorice [Bruns, Ph., 1777], or with 6 parts of gum ammoniac, 6 of extract of senega, and 3 of powdered senega [Hamb. Ph., 1835]. [B. 119.]—**Plastic s.** S. obtained by rapidly cooling the melted s. heated to above 300° C. It forms a tenacious, transparent, semi-solid mass so elastic that it can be drawn out into threads. [B.]—**Precipitated s.** Lat., *s. precipitatum* [U. S. Ph. Br. Ph.], *lac sulphuris*, *sulfur precipitatum* [Ger. Ph. Br. Cod.], Fr., *Soufre précipité*. Ger., *präcipitirter Schwefel*, *Schwefelniederschlag*. S. obtained as a whitish amorphous powder, devoid of taste and odor, by precipitation of a solution of s. in milk of lime with hydrochloric acid. [B.]—**Pulvis ex sulphure stibato************

S. 95, 119 (*a*, 38)—**Unguentum sulphuris alkalinum** [U. S. Ph., Fr., *pomade antiporisque*] [Fr. Cod.] Sp., *pomada antipsorica* [Sp. Ph.]. Helmerich's ointment; a preparation consisting of 20 parts of washed s. and 10 of potassium carbonate rubbed up with 5 of water and mixed with 65 of benzoinated lard [U. S. Ph.]. The Fr. and Sp. Ph.'s order 10 parts each of potassium carbonate, water, and olive-oil, 30 of washed s., and 70 of lard; and the Belg. Ph. orders 174 parts of washed s., 87 of potassium carbonate, 44 of water, and 45 of lard [Belg. Ph., 95 (*a*, 38)].—**Unguentum sulphuris compositum**. An ointment made of 3 parts of washed (sublimed) s., 1 part of Vaseline oil, 1 part of castor oil, 10 parts of vaseline glyceride [Br. Ph., Swed. Ph., Finn. Mil. Ph.], or 20 of prepared chalk, 60 each of lard and potash soap, and 80 of tar [Aust. Ph., Norw. Ph., Swed. Ph., Finn. Mil. Ph.] (with 20 each of prepared chalk and yellow wax, 40 of lard, 60 of potash soap, and 30 of tar [Hung. Ph.]; with 240 of lard [Ger. Ph.], or 195 of lard and 45 of olive-oil [Swiss Ph.], or 210 of lard and 30 of laurel-berries [Russ. Ph.] and 30 of zinc sulphate [Ger. Ph., Swiss Ph., Russ. Ph.]); consisting of 32 pts. of sublimed s., 16 of zinc sulphate, and 16 of Vaseline Oil [Netherl. Ph., B. 95 (*a*, 38)].—**Unguentum sulphuris e iodidi** [Br. Ph.]. An ointment of 5 parts of s. iodide, 15 of solid paraffin, and 55 of petrolatum. [B. 95 (*a*, 38)].—**Vegetable s.** See **vycoperium** (32 def.).—**Virgin s.** Native s. forming transparent crystalline masses. [B. 3.].—**Volcanic s.** Native s. forming opaque crystalline masses found in the volcanic districts of Sicily. [B. 3.].—**Washed s.** Lat., *s. lotum* [U. S. Ph.], *sulfur depuratum* [Ger. Ph.] (see *sublimatum et lotum* [Fr. Cod.]). Fr., *soufre sublímé lavé*; Ger., gereinigter Schwefel. Sublimed s. freed from traces of sulphuric acid, etc., by washing with dilute ammonia water. [B.]

SULPHURARIA (Lat.), n. n. pl. SuSf(su(fI'u)-u(r)-at(a*)a*(r)-ri-u(m)) *sulfures*. Gen. n. n. pl. *Algae*, of the *Cyanophyceae* (including *Bacillaria paxillaria*) [*Ulothrix*], blue-green group of sulphurous springs and partly constitute baregin. [B. 93 (*a*, 14).]

SULPHURATED, adj. SuSf(u(r)-ar-at-e'd. Lat., *sulphuratus*. Fr., *sulfuré*. Ger., geschwefelt, schwefelig. Containing or combined with sulphur. [a, 38.]

SULFATATO-STIBIATUS (Lat.), adj. SuSf(su(fI'u)-u(r)-(u(r)-at(at*)o(o')stib'z-at(at*)u(s'u)s)). Combined with sulphur and containing antimony. [B.]

SULPHURATO-TEREBINTHINATUS (Lat.), adj. SuSf(su(fI'u)-u(r)-u(r)-at(at*)y(o'o'-t(er)b'in'thin'-z-in-at(at*)u(s'u)s)). Containing sulphur and turpentine. [B.]

SULPHURATUM (Lat.), n. n. SuSf(su(fI'u)-u(r)-at(at*)u(s'm-u(m))). A sulphide.

SULPHURATUS (Lat.), adj. SuSf(su(fI'u)-u(r)-at(at*)u(s-u(s)). Sulphured; with the name of a base, the sulphide of that base.

SULPHEUA (Lat.), n. f. SuSf(su(fI'u)-u(r)(u(r)-e(a)/a'). See THIOUREA.

SULPHURO-ACIDUS (Lat.), adj. SuSf(su(fI'u)-u(r)(u(r)'/'o(o')-a(s'a*)(k'i)d-u(s'u)s)). Acid and containing sulphur. [B.]

SULPHURO-RENT. N. SuSf(u'r-re't. See SULPHIDE.

SULPHURED, adj. SuSf(u'r-e't-e'd. Combined with sulphur. [B.]

SULPHURETUM (Lat.), n. n. SuSf(su(fI'u)-u(r)(u(r)-et(at)*u(s-m-u(m))) See SULPHIDE.—**S. calcicum**. See CALX sulphureata.—**S. ferrosus**. Iron monosulphide obtained by melting sulphur in a vessel and stirring it with an iron rod heated to white heat [Swed. Ph.]; or by heating a bar of iron to white heat, applying sulphur, allowing the product to drop into water, and drying [Finn. Ph.]. [B. 95 (*a*, 38)].—**S. hydrargyricum**. See RED MERCURY sulphide.—**S. hydragrycum et stibidum** see sulphidum stibiosum. See ETHTOPS antidontialis.—**S. hydrargyricum et sulphur**, **S. hydrargyricum rubrum**. See RED MERCURY sulphide.—**S. hydrargyricum rufum** (see sublimation). See RED MERCURY sulphide.—**S. stibico-hydrargyricum**. See MERCURY and antimony sulphide.—**Unguentum sulphuretii calcici**. A mixture of calcium sulphide with eight times as much lard. [B. 95 (*a*, 38)].

SULPHURIC, adj. SuSf-u(r)'ik. Lat., *sulphuricus, sulfuricus*. Fr., *sulfurique*. Containing sulphur combined with three atoms of oxygen. [B.].—**S. anhydride**. The anhydride of s. acid; sulphur trioxide. [B.].—**S. ether**. See ETHYL THER.

SULPHURIC ACID, n. SuSf-u(r)'ik. Lat., *acidum sulphuricum* (see *sulfuricum*). Fr., *acide sulfurique* (ou vitriologique). Ger., *Schwefelsäure*. Oil of vitriol. The name was originally applied to sulphur trioxide (SO₃), still sometimes called anhydrous s. a., but is now given to the compound, H₂SO₄, of this substance with water. When obtained perfectly pure and free from water, boiling at 338° C., and having a strong affinity for water, melting at 105° C., and after fusion remaining liquid even when cooled below 0° C. As ordinarily obtained by distillation, it contains about 2 per cent. of water. It is a colorless, oily liquid, of strongly acid reaction, powerfully corrosive, and fuming when raised to a temperature of 30° C. It has a strong affinity for water, absorbing it from the atmosphere and from solids, with considerable evolution of heat. When hot, the strong acid attacks many metals (silver, mercury, copper, lead, tin, bismuth, and antimony), but does not attack gold or platinum. It forms official acids (arsenic, manganic, etc.), also combines with many organic radicles. Informing compounds with metals or radicles, s. a. acts as a powerful dibasic acid, producing a series of sulphates. Commercial s. a. (Lat., *acidum sulphuricum crudum* [Ger. Ph.]; Fr., *acide sulfurique du commerce* [Fr. Cod.]) contains various impurities, chiefly lead sulphate and other sulphates, arsenic traces of other elements, various oxides of nitrogen, and an excess of water. Official s. a. (Lat., *acidum sulphuricum* [U. S. Ph., Br. Ph.]), *acidum sulfuri cum purum* [U. S. Ph., Br. Ph.], *acide sulfurique officinale* (distilled) is distilled from the commercial acid, and contains not less than 96 per cent. [U. S. Ph.] (96·8 per cent. [Br. Ph.], 94 to 97 per cent. [Ger. Ph.]) of the pure acid. The Fr. preparation is 99 per

A, ape; **A**², at; **A**³, ah; **A**⁴, all; **Ch**, chin; **Ch**², loch (Scottish); **E**, he; **E**², ell; **G**, go; **I**, die; **I**², in; **N**, in; **N**², tank;

sented as nearly absolutely pure, but is probably of about the strength of the Br. s. a. The sp. gr. of these several preparations is 1.843 (Br. Ph., Fr. Cod.), and not below 1.840 [U. S. Ph.]. [B.]—**ANHYDROUS s. a.** See SULPHUR TRIOXIDE.—**AROMATIC s. a.** See ACIDUM SULPHURICUM AROMATICUM.—**DILUTE s. a.** Lat., *acidum sulphuricum* (seu sulphuricum) (Ger. Ph. Fr. Cod.) *dilutum* [U. S. Ph., Br. Ph.]. Fr., *acide sulfurique dilué* [Fr. Cod.]. Ger., *verdünnte Schwefelsäure*. A solution of pure s. a. in water. The U. S. and Fr. preparations contain about 9.8 per cent. of the pure anhydrous acid (10 per cent. of the official acid), the Br. preparation contains 14.5 per cent. of the pure acid (about 15 per cent. of the official acid), and the Ger. preparation about 16 per cent. of the pure acid. The sp. gr. of the U. S. and Fr. preparations is 1.067, that of the Br. preparation 1.004. [B.]—**ENGLISH s. a.** Ordinary s. a.; so called to distinguish it from the Nordhausen s. a. [B.]—**FUMING s. a.**, **Nordhausen s. a.** Ger., *Nordhäuser Schwefelsäure*, *Vitriolöl*. Fuming s. a., Nordhausen oil of vitriol; a substance prepared at Nordhausen, in the Hartz Mountains, Germany, by roasting ferrous sulphate. It is a thick, oily liquid, colorless when pure, but usually brownish from a slight admixture of organic matter. It consists essentially of ordinary s. a. containing a variable amount of dissolved sulphur trioxide, and it owes its name of fuming s. a. to the fact that this trioxide readily volatilizes and forms dense white fumes on coming into contact with the aqueous vapor of the air. [B.]—**S.-a. beer**. Lat., *cerevisia acidi sulphurici*, *cerevisia antioctica*. 1. Treacle beer or other mild beer with the addition of a drachm of concentrated s. a. to every gallon. 2. A beer made with water, 14 lb. of treacle, 1 lb. of bruised ginger, $\frac{1}{2}$ oz. of coriander, 12 gallons of water, and 1 pint of yeast, and adding $\frac{1}{2}$ oz. of s. a. mixed with 12 oz. of water and $\frac{1}{2}$ oz. of sodium bicarbonate. [B. 199.]

SULPHURIC (Lat.), adj. Su^lf(u^lf^u-u^r-u^r)¹k-u^su^s. Containing sulphuric acid; with the name of a base, the sulphate of that base.

SULPHUROCARBOLIC ACID, n. Su^lf^u-u^r-o-ka^srb-o^l-i¹k. A combination of sulphuric and carbolic acids. [a. 48.] Cf. *paenoulcarbolic acid* and *Asperol*.—**Red s. a.** Of Lepage, a mixture of equal parts of 25-per-cent. red carbolic acid and red sulphuric acid; a black, thick fluid, very soluble in water, and an energetic antiseptic. [N. Y. Med. Jour., May 4, 1889, p. 500 (a. 50).]

SULPHUROUS, adj. Su^lf^u-u^r-u^s. Lat., *sulphureus*, *sulphureus*. Fr., *sulfureux*. Ger., *schweflig*. Resembling sulphur; containing sulphur as a quadrivalent radicle. [B.]—**S. anhydride**, **S. oxide**. See SULPHUR DIOXIDE.

SULPHUROUS ACID, n. Su^lf^u-u^r-u^s. Lat., *acidum sulphureum* (seu *sulphureum*). Fr., *acide sulfureux*. Ger., *Schweflige Säure*. A name formerly applied to sulphur dioxide, or sulphurous anhydride, SO₂, but now applied to the compound of this substance with water, H₂SO₃. This is known in the form of an aqueous solution, which is prepared by passing into water the gas evolved by the action of wood-charcoal on sulphuric acid. A saturated aqueous solution contains rather less than 20 per cent. by weight (69 parts by volume) of the gas at 0° C. and a little more than 10 per cent. by weight (about 36 parts by volume) at 20° C. The official solution of the U. S. Ph. contains about 3.5 per cent. of the gas, and has a sp. gr. of 1.022; that of the Br. Ph. has a sp. gr. of 1.04 and contains 7.5 per cent. of the gas. The solution is a colorless liquid of sulphurous odor, acid sulphurous taste, and strongly acid reaction. In composition s. a. acts as a dibasic acid, forming salts called sulphites. [B.]—**ANHYDROUS s. a.**, **S.-a. gas**. Sulphur dioxide. [B.]

SULPHUR SPRING, n. Su^lf^u-u^r. A place in Inyo County, California, where there is a gaseous and sulphurous spring. [Anderson (a. 14).]

SULPHURYL, n. Su^lf^u-u^r-i¹l. A bivalent radicle, SO₂′, contained in sulphuric acid, which may be regarded as s. dihydrate (dihydroxide), SO₂·OH₂. [B.]—**S. bromide**. A white crystalline substance, SO₂Br₂. [B. 3.]—**S. chloride**. A colorless liquid, SO₂Cl₂, of pungent odor, emitting fumes when exposed to the air, and decomposing on coming into contact with water. [B. 3; B. 270 (a. 38).]—**S. hydroxychloride**. Chlorosulphonic acid; so called because it may be regarded as s. combined with a molecule of hydroxyl and an atom of chlorine. [B.]

SULPHYDRATE, n. Su^lf^u-i¹d^u-r^ut. 1. See HYDROSULPHIDE. 2. A compound of a metal or radicle with the univalent radicle (SH)′; so called because such compounds were regarded as salts of sulphuric acid. [B.]

SULPHYRIC ACID, n. Su^lf^u-i¹d^u-r^ui¹k. Lat., *acidum sulphydricum* [Fr. Cod.]. Fr., *acide sulphydrique*. Ger., *Schwefelwasserstoffsäure*. Sulphureted hydrogen, especially in aqueous solution. [B.]

SULPHYDRIN, n. Su^lf^u-i¹d^u-r^ui¹n. A compound of glycerin in which sulphydryl replaces hydroxyl. *Monosulphydryn* (glyceryl *thiodiethylhydrat*, C₃H₇(SH)(OH)₂) is a thick, colorless liquid, which when warmed emits an exceedingly disagreeable odor. *Disulphydryn* (q. v.) and *trisulphydryn* (thioglycerin), C₃H₇(SH)₃, are also liquids. [B. 4.]

SULPHYDRYL, n. Su^lf^u-i¹d^u-r^ui¹l. A univalent radicle, SH′. [B.]

SULPHYOSULFURIC, adj. Su^lf^u-i¹p-o-su^lf^u-u^r-i¹k. See THIONIC.

SULZ (Ger.), n. Zul^{ts}. 1. A place in the Black Forest district, Germany, where there is a saline spring. 2. A place in Eisenburg County, Hungary, where there is a gaseous and saline spring. [a. 14.]

SULZA (Ger.), n. Zul^{ts}-a². A place in Saxe-Weimar, Germany, where there are bromine and iodine springs. [a. 14.]

SULZBACH (Ger.), n. Zul^{ts}-ba²ch². 1. A place in Baden, Germany, where there is a gaseous and saline spring. 2. A place in Alsace-Lorraine where there are gaseous and ferruginous springs.

SULZBAD (Ger.), n. Zul^{ts}-ba²d. A place in Alsace-Lorraine where there are gaseous and saline springs. [L. 37, 49 (a. 14).]

SULZBRUNN (Ger.), n. Zul^{ts}-brun. A climatic resort in Swabia where there are gaseous and saline springs. [L. 30, 57 (a. 14).]

SULZBURG (Ger.), n. Zul^{ts}-burg. A place in Baden, Germany, where there is a saline spring. [L. 30, 37 (a. 14).]

SULZE (Ger.), **SULZE** (Ger.), n's. Zul^{ts}-e², zu^lts'e². See GELATINA (2d def.).—**Wharton'sche S.** See GELATIN of Wharton.

SULZMATT (Ger.), n. Zul^{ts}-ma²t. A place in Alsace-Lorraine where there are gaseous and alkaline springs. [L. 49, 57 (a. 14).]

SUMAC, n. Su^m-a²k. Lat., s. Fr., s. See SCAMCÆ.—**Extrait liquide de fruit de s. (Fr.)**. See *Extractum rhois glabre fluidum* (under Rhus).—**Folia et bacca (seu semina) s.** See under Rhus coriaria.—**S. & la gale (Fr.)**. See Rhus toxicodendron.—**S. des coriarys (Fr.)**. See Rhus coriaria.—**S. pernicieux (Fr.)**. See Rhus perniciosa.

SUMACH, n. Su^m-a²k. Lat., s., *sumac*, *sumachus*. Fr., *sumac*. Ger., s. See Rhus (2d def.).—**American**. See CÆCIPARIA coriaria and Rhus typhina.—**Dwarf s.** See Rhus pumila.—**Gifts' (Ger.)**. Poison s. See Rhus toxicodendron and Rhus venenata.—**Scarlet s.** See Rhus glabra.—**Sweet s.** See Rhus aromatica.

SUMBUL, n. (treated as Lat. in the ph's). Sum^u-bul. From Ar. s., an ear or spike. Fr., *racine de s.*, *somboul*. Ger., *S'wurzel*, *Moschuswurzel*. Of the U. S. Ph., musk-root (the root of *Ferula s.*), found in commerce in light, spongy transverse sections, having a pleasant musk-like smell and a bitter balsamic taste; used chiefly as an antispasmodic and nerve. It contains a soft, translucent balsamic resin, soluble in ether; a volatile oil having the taste of peppermint; another resin soluble in alcohol; a bitter substance soluble in water and alcohol; angelic acid accompanied by a small amount of valerianic acid; wax; gum; and starch. S. is also the name of various other fragrant roots or rhizomes, especially Indian sandal. [a. 35.]—**Bombay s.** The root of *Dorexia ammonitum*. [a. 24.]—**Tinctura s.** A tincture made by macerating 1 part of s. in No. 30 powder for a day with alcohol, then treating in a percolator with alcohol enough to make 10 parts of filtered percolate [U. S. Ph.]; by macerating 24 oz. of s. in No. 40 powder for two days with alcohol, then treating in a percolator with enough more alcohol to obtain 20 fl. oz. of filtrate [Br. Ph.]; or by macerating s. with five times as much 70-per-cent. alcohol for five days [Russ. Ph.]. [B. 95 (a. 38).]—**Racine de s. (Fr.)**, **Radix s.**, **s. radix**. See S.

SUMBULIC ACID, n. Sum^u-bul^ui¹k. Fr., *acide sumbulique*. Ger., *Sumbulsäure*. See ANGOLIC ACID.

SUMBULINE, n. Sum^u-bul^ui¹n. Fr., s. Ger., *Sumbulin*. An alkaloid obtained from sumbul; a whitish, semi-transparent, amber-like mass. [B. 18; B. 93 (a. 14).]

SUMBULOLIC ACID, n. Sum^u-bul^u-o^li¹k. Fr., *acide sumbulolique*. Ger., *Sumbuloläure*. See ANGOLIC ACID.

SUMEN (Lat.), n. n. Su^m-e² (sum)^ue²n. Gen., sum^u-i¹n^us. See HYPOGASTRIUM (1st def.).

SUMMATION, n. Su^m-a²-shu²n. From *summare*, to sum up. Fr., *summation*. Ger., *S. Summierung*. The production of tetanic contraction in a muscle by the combination of a number of single contractions. [K.]

SUMMEN (Ger.), n. Zum^u-me²n. A buzzing or tingling.

SUMMITAS (Lat.), n. f. Su^m-i¹ (su^m-i¹m)^um^ui¹t-a²s(a²s). Gen., -at^ui¹s. A top or flowering top of a plant. [a. 35.]—**Summitates acetariæ**. The flowering tops of *Artemisia dracunculæ*. [a. 35.]

SUMMIT MINERAL SPRING, n. Su^m-i¹m^ui¹t. An alkaline spring at Harrison, Cumberland County, Maine. [A. 363 (a. 21).]

SUMMIT SODA SPRINGS, n. Chalybeate springs in Placer County, California. [A. 363 (a. 21).]

SUMMUS (Lat.), adj., superl. of *superus*. Su^m-i¹m^u (su^m-i¹m)^us (mu²s). Highest; as a n., the uppermost muscle of a group (cf. *Armi s.*).

SUMPFBEERE (Ger.), n. Zump^uf^u-bar^ue². The *Vaccinium oxycoccus* and *Vaccinium uliginosum*. [B. 48 (a. 14); a. 35.]

SUMPFBEWOHNEND, **SUMPFFIG** (Ger.), adj. Zump^uf^u-be²-von-e²nd, -i¹g. See PALUDOSE.

SUMPFPOST (Ger.), n. Zump^uf^u-po²st. See *Sedum palustre*.

SUMPFSCHEIRM (Ger.), n. Zump^uf^u-scherm. The genus *Helosciadium*. [a. 35.]

SUMPFSTILGE (Ger.), n. Zump^uf^u-st^ulg-e². The genus *Thysellinum*. [a. 35.]

SUMPFWURZ (Ger.), n. Zump^uf^u-wurts. The genus *Epipactis*.

SUMPFZIEHT (Ger.), n. Zump^uf^u-tsest. See *Stachys palustris*.

SUNBURN, n. Suⁿ-bu²rn. A popular term for chloasma caloricum and for erythema caloricum. [G.]

SUNFLOWER, n. Suⁿ-flou²-u²-u²r. The genus *Helianthus*, especially *Helianthus annuus*, also the *Chrysanthemum segetum*, *Inula helenium*, *Calendula officinalis*, etc. [a. 35.]—**S.-oil**. See under *HELIANTHUS annuus* and *HELIANTHUS perennis*.

SUN-ROSE, n. Suⁿ-ro²z. See *HELIANTHEMUM* (1st def.).

SUNSTROKE, n. Suⁿ-stro²k. Lat., *insolatio*. Fr., *coup de soleil*. Ger., *Sonnenstich*. A morbid state due to exposure to great solar heat. It is usually of sudden onset, though it may be preceded by dizziness or a sensation of fullness in the head. In mild attacks there are faintness, syncope, nausea, and vomiting, marked muscular weakness, rapid and feeble pulse, and pyrexia. In severe cases there are loss of consciousness, a tense and irregular pulse, quickened or stertorous respiration, hyperpyrexia, and death from interference with the medullary centres. [a. 34.] Cf. INSOLATION.

SUPELLECTILE DIOGENIS (Lat.), n. n. $Su^2p(su^4p)^{e2}l^e$ le $kt^2i^2(a)$ di (e) -o 2j (o 2g)e n^2i^2s . Gen., *lec'tilis*. The pain of the hand. [A, 332 (a, 21).]

SUPERABDUCTION, n. $Su^2p-u^6r-a^2b-dn^2k'shu^2n$. From *super*, in excess, and *abductio*, abduction. Excessive abduction. [a, 34.] For various words in *Super*, not here given, see the corresponding forms in *Supra*.

SUPERALIMENTATION, n. $Su^2p-u^6r-a^2l-i^2-me^2nt-a'shu^2n$. From *super*, in excess, and *alimentum*, nourishment. Fr., *suralimentation*. Ger., *Uebernahrung*. Of Debove, see *FORCED ALIMENTATION* (2d def.).

SUPERAXILLAIRE (Fr.), adj. $Su^2p-e^2r-a^2x-el-la^2r$. See *SUPRA-AXILLARY*.

SUPERBINE, n. $Su^2p-u^6r'b^n$. Ger., *Superbin*. A poisonous, amorphous alkaloid, $C_{55}H_{80}N_2O_7$, obtained from the bulb of *Gloriosa superba*. [B, 270 (a, 38).]

SUPERBUS (Lat.), adj. $Su^2p(su^4p)^{e2}rb(e^2rb)^{u3}s(u^4s)$. From *super*, above, Fr., *superbe*. Proud, haughty; as a n. m., of Leber, the rectus oculi superior muscle, so called because its action gives the face a haughty expression. [L, 41 (a, 14).]

SUPERCARBONAS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{ka}rb^n$ on $a^2s(a^2s)$. Gen., *at'is*. See *SUPERCARBONATE*.—*Liquor supercarbonatis ammoniaci pyroleosus*. See *Liquor Ammonii carbonici pyro-oleosus*.—*Solutio supercarbonatis natri*. See *Liquor sodæ effervescentis*.—*S. ammonicus*. Ammonium sesquicarbonate. See under *AMMONIUM CARBONATE*.—*S. ammoniacus pyroleosus*. See *AMMONIUM CARBONICUM PYRO-OLEOSUM*.

SUPERCARBONATE, n. $Su^2p-u^6r-ka^2rb^n$ on a^2t . Lat., *supercarbonas*. Fr., *surcarbonate*. See *BICARBONATE*.

SUPERCHLORIDUM (Lat.), n. n. $Su^2p(su^4p)^{e2}r(e^2r)^{klor}$ (ch 2lor)i $^2d-u^2m(u^4m)$. See *PERCHLORIDE*.

SUPERCLILIARIS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{si^2l(ki^2l)^2i^2}$ ar $(a^2r)^2is$. Fr., *surcilier*. See *CORRUGATOR SUPERCILLI*.

SUPERCILUM (Lat.), n. n. $Su^2p(su^4p)^{e2}r(e^2r)^{si^2l(ki^2l)^2i^2}$ u $^2m(u^4m)$. From *super*, above, and *cilium*, an eyelid or eyelash. Fr., *surcil*. Ger., *Augenbraue*. The eyebrow; an arched eminence of integument which surmounts the upper border of the orbit and supports numerous short, thick hairs, directed obliquely to the surface. It consists of thickened integument connected beneath with the orbicularis palpebrarum, corrugator supercilli, and occipitofrontalis. [F, 1—*S. acetabuli*. The lip or elevated margin of the acetabulum. [L.]

SUPERCOSTALES (Lat.), n. m. pl. $Su^2p(su^4p)^{e2}r(e^2r)^{ko^2st}$ al (a^2s) (ez a^2s). From *super*, above, and *costa*, a rib. See *TRANSVERSOCOSTALES*.

SUPERDISTENTION, n. $Su^2p-u^6r-di^2s-te^2n'shu^2n$. From *super*, in excess, and *distentio*, a stretching out. Excessive distention. [a, 34.]

SUPEREXTENSION, n. $Su^2p-u^6r-e^2x-te^2n'shu^2n$. From *super*, in excess, and *extensio*, a stretching. Excessive extension. [a, 34.]

SUPER-FAMILY, n. $Su^2p-u^6r-fa^2m^2i^2i^2$. From *super*, above, and *familia*, a family. A group containing one or more families, yet not of ordinal rank. [L, 343.]

SUPERFECUNDATION, n. $Su^2p-u^6r-fe^2k'u^2nd-a'shu^2n$. Lat., *superfecundatio* (from *super*, in excess, and *fecundare*, to make fruitful). Fr., *superfécondation*, *super-impregnation*. Ger., *Ueberschwängerung*. The fecundation of more than one ovule of the same ovulation as the result of separate acts of coitus with one or more males. [A, 61.] Cf. *SUPERFETATION*.

SUPERFIBRATION, n. $Su^2p-u^6r-fib-ri^2n-a'shu^2n$. From *super*, in excess, and *fibrina*, fibrin. See *HYPERINOSIS* (2d def.).

SUPERFICIALIS (Lat.), adj. $Su^2p(su^4p)^{e2}r(e^2r)^{fi^2s(fi^2k)^2i^2}$ al $(a^2l)^2is$. Superficial; as a n., in the m. or f., an organ situated on or close to the surface. [a, 48.]—*S. colli*. See *PLATYSMA MYOIDEUS*.—*S. costarum*. See *LUMBOCOSTALIS*, n.

SUPERFICIES (Lat.), n. f. $Su^2p(su^4p)^{e2}r(e^2r)^{fi^2s(ki^2l)^2i^2}$ ez (as) . Gen., *-ei*. From *super*, above, and *facies*, a face. Fr., *superficie*. See *SURFACE*.—*S. articularis arytenoidea*. The surface upon the cricoid cartilage for articulation with the arytenoid cartilage. [L, 34.]—*S. articularis externa*. See *S. articularis thyroidea*.—*S. articularis fibularis (lateralis)*. A rounded or triangular articular surface on the tibia for articulation with the fibula. [L.]—*S. articularis superior*. See *S. articularis arytenoidea*.—*S. articularis thyroidea*. A depression on the cricoid cartilage for articulation with the thyroid cartilage. [L, 31.]—*S. auricularis*. Fr., *face (ou facette) auriculaire*. 1. The ear-shaped area by which the sacrum articulates with the ilium. 2. The corresponding area of the ilium.—*S. cardiaca*. The inner surface of the lung. [L.]—*S. convexa*. *S. costalis*. The outer surface of the lung. [L.]—*S. diaphragmatica*. The lower surface of the lung. [L.]—*S. externa*. See *S. convexa*.—*S. inferior*. See *S. diaphragmatica*.—*S. mediastinalis*. See *S. cardiaca*.—*S. lunata (ossis coxae)*. That part of the acetabulum that is covered with cartilage. [L, 31 (a, 50).]—*S. lunata radii*. The sigmoid cavity of the radius. [L.]—*S. peronea*. See *S. articularis lateralis*.—*S. petro-occipitalis (ossis temporis)*. The deepened surface covered with cartilage, between the pyramidal portion of the temporal bone and the occipital bone. [L.]—*S. symphyseos* of the temporal bone and the occipital bone. [L.]—*S. symphyseos* of the surface of the horizontal ramus of the os pubis where it unites with its fellow of the opposite side in the symphysis. [L, 332.]

SUPERFLEXION, n. $Su^2p-u^6r-fe^2k'shu^2n$. From *super*, in excess, and *flexio*, a bending. Excessive flexion. [a, 34.]

SUPERFETATION, n. $Su^2p-u^6r-fe^2t-a'shu^2n$. Written also, *superfetation*. Lat., *superfœtatio* (from *super*, in excess, and *fœtus* [q. v.]). Fr., *superfœtation*. Ger., *Ueberfruchtung*, *Nachempf-*

angniß. The supposed fecundation (now held to be impossible) of an ovule proceeding from one ovulation while a fecundated ovum proceeding from a previous ovulation is still in course of uterogestation. [A, 61.] Cf. *SUPERFECUNDATION*.

SUPERFUSIO (Lat.), n. f. $Su^2p(su^4p)^{e2}r(e^2r)^{fu^2z(fu^2zhi^2}$ (si 2)-o. Gen., *-on'is*. From *super*, in excess, and *fusio*, a pouring out. See *SUPFUSION*.—*Fellis* s. Jaundice.

SUPERGENUAL, adj. $Su^2p-u^6r-je^2n^2u^2l$. Lat., *supergenualis* (from *super*, above, and *genu*, the knee). Situated above the knee. [a, 48.]

SUPÉRIEUR (Fr.), adj. $Su^2p-a-re-u^6r$. See *SUPERIOR*.—*S. de l'oreille*. See *ATTOLLENS aurem*.

SUPERIMPOSED, adj. $Su^2p-u^6r-i^2m-pozd'$. Lat., *superimpositus* (from *superimponere*, to place upon). Fr., *surimposé*. Ger., *übereinandergestellt*. Placed one above the other. [a, 35.]

SUPERINVOLUTION, n. $Su^2p-u^6r-i^2n-vo^2l-u^2z'shu^2n$. From *super*, in excess, and *involutio*, a rolling up. See *HYPERINVOLUTION*.

SUPERIOR, adj. $Su^2p-e^2r^2i^2-o^2r$. Lat., *s.* (comp. of *superus*) [1st def.], *superus* (2d and 3d def.). Fr., *supère*, *supérieur*. Ger., *ober* (1st def.), *oberständig* (3d def.). Situated on the upper portion of a part or organ; situated on the side next the axis. 2. Placed above another organ; of floral organs, epigynous; of an ovary, not at all adherent to the calyx. [a, 35.] 3. As a Lat. n. m., a muscle occupying a relatively high position. [a, 48.]—*Half-s.* Lat., *semisuperus*. Ger., *halboberständig*. Partially superior (said of the floral whorls when the ovary is half-inferior). [a, 35.]—*S. auricule*, *S. auris*. See *ATTOLLENS aurem*.—*S. mallei*. See *LAXATOR tympani minor*.

SUPERLACTATION, n. $Su^2p-u^6r-la^2kt-a'shu^2n$. From *super*, in excess, and *lactare*, to give suck. Excessive lactation.

SUPERLIGAMEN (Lat.), n. n. $Su^2p(su^4p)^{e2}r(e^2r)^{li^2g-a(a^2y^2me^2n}$. Gen., *-am'nis*. From *super*, above, and *ligare*, to bind. See *EPIDESMUS*.

SUPERLIGULA (Lat.), n. f. $Su^2p(su^4p)^{e2}r(e^2r)^{li^2g-u^2l(u^4l)^2a^2}$. From *super*, above, and *ligula* (q. v.). See *EPIGLOTTIS* (1st def.).

SUPERMAXILLOLABIALIS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{ma^2x(ma^2x)^2i^2lo(la^2b)-lab(la^2b)-i^2-al(a^2l)^2is}$. From *super*, above, *maxilla*, the jaw, and *labium*, the lip. Fr., *surmaxillo-labial*, *sur-maxillo-labial*. The analogue of the levator labii superioris proprius of man found in most of the lower mammals. [L.]

SUPERMAXILLONASALIS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{ma^2x(ma^2x)^2i^2lo(la^2b)-na^2s(na^2s)-al(a^2l)^2is}$. From *super*, above, *maxilla*, the jaw, and *nasus*, the nose. Fr., *sur-maxillo-nasal*. Ger., *größer (oder pyramidenförmiger) Kiefer der Nase*. Connected with the nose and upper jaw; as a n., a muscle so connected. [L.]—*S. magnus*. 1. See *DILATOR NARIS LATERALIS*. 2. The analogue of the levator anguli oris in man found in most of the lower mammals. [L.]—*S. parvus*. A small muscle of the lower mammals, arising from the supermaxillary bone or the internal face of the supermaxillabials, and inserted into the skin of the false nostril and into the inferior turbinate bone. It dilates the nostril. [L, 13.]

SUPERNASOLABIALIS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{na^2s(na^2s)^2o(o^2b)-lab(la^2b)-i^2-al(a^2l)^2is}$. From *super*, above, *nasus*, the nose, and *labium*, the lip. Fr., *sur-naso-labial*. The analogue of the levator labii superioris alæque nasi of man found in most of the lower mammals. [L.]

SUPERINATION, n. $Su^2p-u^6r-ni^2d-a'shu^2n$. From *super*, in excess, and *nidus*, a nest. See *HYPERINATION*.

SUPERNUTRITION, n. $Su^2p-u^6r-nu^2t-ri^2i^2shu^2n$. From *super*, in excess, and *nutrire*, to nourish. See *HYPERTROPHY*.

SUPER-ORDER, n. $Su^2p-u^6r-o^2rd^2u^6r$. From *super*, above, and *ordo*, an order. A group containing one or more orders, yet not of the taxonomic rank of a class. [L, 343.]

SUPEROXALAS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{o^2x-a^2l(a^2l)^2a^2s(a^2s)}$. Gen., *-at'is*. See *SUPEROXALATE*.—*S. kalicus*, *S. potasius*. See *POTASSIUM BINOXALATE*.

SUPEROXALATE, n. $Su^2p-u^6r-o^2x-a^2l-at$. Lat., *superoxalas*. Fr., *sucoxalate*. An acid oxalate. [B.]

SUPEROXIDIZED, adj. $Su^2p-u^6r-o^2x^2i^2d-izd$. Fr., *sur-oxy-géné*. Containing an excess of oxygen (said of certain bodies which contain more oxygen united with other elements than the ordinary combining capacities of those elements will allow of). [C. A. Cameron, "Dublin Jour. of Med. Sci.," June, 1882 (B).]

SUPEROXIDUM (Lat.), n. n. $Su^2p(su^4p)^{e2}r(e^2r)^{o^2x^2i^2d(u^4d)^2u^2m(u^4m)}$. Fr., *sur-oxyde*. See *PEROXIDE*.—*S. manganicum*. See *MANGANESE DIOXIDE*.—*S. plumbosum*. See *RED LEAD OXIDE*.

SUPEROXYGENATED, adj. $Su^2p-u^6r-o^2x^2i^2je^2n-at-e^2d$. See *SUPEROXIDIZED*.

SUPERPHOSPHATE, n. $Su^2p-u^6r-pho^2s^2fat$. A dihydric phosphate. [B.]

SUPERPOSED, adj. $Su^2p-u^6r-pozd'$. Lat., *superpositus* (from *superponere*, to place over). Fr., *superposé*, *superposé*. Ger., *obenstehend*, *darübergestellt*. Placed above another; of a member of a flower, placed vertically over another member. [a, 35.]

SUPERPOSITION, n. $Su^2p-u^6r-po^2z-i^2shu^2n$. Lat., *superpositio* (from *superponere*, to place over). Ger., *Uebergreifen*. 1. See *CHEVATCHEMENT*. 2. The opposition of successive flower-whorls normally alternate. [a, 35.]

SUPERBIOFEMORALIS (Lat.), n. m. $Su^2p(su^4p)^{e2}r(e^2r)^{pu^2b(pu^2b)^2i^2-o^2i^2-fe^2m-o^2r-al(a^2l)^2is}$. From *super*, above, *pubes* (q. v.), and *femur* (q. v.). Fr., *sur-pubio-fémoral*. In solpeds, a muscle representing the pectineus and adductor femoris brevis of man. [L, 13.]

SUPRAPHOLIACEOUS, adj. Su²p-ra³-fol-i²-a³-shu²s. Lat., *suprapholiaceus* (from *supra*, above, and *folium*, a leaf). Situated above a leaf. [a, 35.]

SUPRAPHOLIAR, adj. Su²p-ra³-fol-i²-a³r. From *supra*, above, and *folium*, a leaf. Growing upon a leaf. [a, 35.]

SUPRAGENUAL, adj. Su²p-ra³-je-nu²-l. From *supra*, above, and *genu*, the knee. Situated above the knee. [a, 48.]

SUPRAGLENOID, adj. Su²p-ra³-glen-oid. From *supra*, above, and *γλυνοειδής* (see GLENOID). Situated above the glenoid cavity. [a, 48.]

SUPRAGLUTEAL, adj. Su²p-ra³-glu²-te²-a²l. From *supra*, above, and *γλυνός*, the rump. Situated above the gluteal region.

SUPRAHYOID, adj. Su²p-ra³-hi-oid. From *supra*, above, and *υοειδής*, hyoid. Fr., *supra-hyoidien*. Situated above the hyoid bone. [C.]

SUPRA-INGUINAL, adj. Su²p-ra³-in²-gwi²-n¹l. From *supra*, above, and *ingen*, the groin. Situated above the groin. [a, 48.]

SUPRALABIALIS [Coes] (Lat.), n. m. Su²p(sup)-ra³-lab-(la²b)-i²-al(a²l)¹s. From *supra*, above, and *labium*, the lip. See *LEVATOR labii superioris proprius*.

SUPRAMARGINAL, adj. Su²p-ra³-ma²-rj¹-i²n¹l. From *supra*, above, and *margo*, a margin. Situated above an edge or margin (said of a cerebral convolution or fissure). [L.]

SUPRAMAXILLARY, adj. Su²p-ra³-ma²-x¹-i²-ar-i². From *supra*, above, and *maxilla*, the jaw. Fr., *supra-maxillaire*. Ger., *supramaxillar*. Pertaining to the superior maxilla. [L, 41 (a, 14).]

SUPRA-OBLIQUUS [Coes] (Lat.), n. m. Su²p(sup)-ra³-o²b-i²-le(kw²u²s(kw²u²s)). From *supra*, above, and *obliquus*, slanting. See *OBLIQUUS oculi superior*.

SUPRA-OCCIPITAL, adj. Su²p-ra³-o²k-si²p-i²-t¹l. From *supra*, above, and *occiput* (q. v.). Situated above the occipital bone. [a, n.], the lower portion of the tabular part of the parietal bone. [C.]

SUPRA-OMPHALOMYIA (Lat.), n. f. Su²p(sup)-ra³-o²m²-a²l(a²l)-o²(a²)-di²m(du²m)¹2-a². From *supra*, above, *ὀμφαλός*, the navel, and *διδυμός*, twin. See *THORACOPHAGIA*.

SUPRA-ORBITAL, **SUPRA-ORBITAR**, adj's. Su²p-ra³-o²r²b-i²-t¹l. -ta²r. Lat., *supraorbitalis* (from *supra*, above, and *orbita*, the orbit). Fr., *supra-orbitaire*. Situated above the orbit. [C.]

SUPRAPONTINE, adj. Su²p-ra³-po²n²-i²n. From *supra*, above, and *pons*, a bridge. Situated above the pons Varoli. [a, 48.]

SUPRAPUBIC, adj. Su²p-ra³-pu²b-i²p²k. From *supra*, above, and *pubes* (q. v.). Fr., *sup-pubien*. Situated above the pubes, affecting parts so situated. [a, 48.]

SUPRARECTUS [Coes] (Lat.), n. m. Su²p(sup)-ra³-re²kt-(rak²t)¹u²s(u²s)). From *supra*, above, and *rectus*, straight. See *RECTUS oculi superior*.

SUPRARENAL, adj. Su²p-ra³-re²n¹l. Lat., *suprarenalis* (from *supra*, above, and *ren*, the kidney). Fr., *surrenal*. 1. Situated above the kidney. 2. Pertaining to the s. capsule; as a n., the s. capsule.

SUPRARYGLOTTIDEUS [Coes] (Lat.), n. m. Su²p(sup)-ra³-r²(ar²)-i²(u²)-glo²t(glot)-ti²d(e²-u²s(u²s)). From *supra*, above, *ἀρύταινα*, a pincer, *γλωττις*, the glottis, and *εἶδος*, resemblance. See *ARYTENO-EPIGLOTTIDEUS superior*.

SUPRASCAPULA (Lat.), n. n. Su²p(sup)-ra³-ska²p(ska²p)-u²l(u²l)-a²s. From *supra*, above, and *scapula*, the shoulder. Of Gegenbaur, the portion of the upper posterior portion of the scapula which arises from the centres of ossification distinct from those of the main portion of the bone. [L.]

SUPRASCAPULAK, adj. Su²p-ra³-ska²p-u²l-a²r. From *supra*, above, and *scapula* (q. v.). Fr., *supra-scapulaire*. Situated above the scapula. [C.]

SUPRASCAPULARIS (Lat.), adj. Su²p(sup)-ra³-ska²p(ska²p)-u²l(u²l)-a(a²l)¹ri²s. See *SUPRASCAPULAK*; as a n., see *SUPRASPINATUS*.

SUPRASSERRATUS [Coes] (Lat.), n. m. Su²p(sup)-ra³-se²r-rat(rat²t)¹u²s(u²s)). From *supra*, above, and *serra*, a saw. See *SERRATUS posticus superior*.

SUPRASPINAL, adj. Su²p-ra³-spi²n¹l. Lat., *supraspinalis* (from *supra*, above, and *spina*, a spine). Fr., *sur-épineux*. Situated above or upon a spine or spinous process. [C.]

SUPRASPINATUS (Lat.), adj. Su²p(sup)-ra³-spi²n(spi²n)-at-(a²p)¹u²s(u²s)). From *supra*, above, and *spina*, a spine. *Supraspinal*; as a n. (Ger., *Obergrätenmuskel*), a muscle which arises from the surface of the supraspinous fossa of the scapula and is inserted into the great tuberosity of the humerus. [L, 332.]

SUPRASPINOUS, adj. Su²p-ra³-spi²n¹u²s. See *SUPRASPINAL*.

SUPRASTERNAL, adj. Su²p-ra³-stu²r²n¹l. Lat., *suprasternalis* (from *supra*, above, and *sternum* [q. v.]). Situated above the sternum. [a, 48.]

SUPRASTERNALIS (Lat.), adj. Su²p(sup)-ra³-stu²r²n(ste²rn)-al(a²l)¹ri²s. See *SUPRASTERNAL*; as a n., see *STERNALIS*.

SUPRATROCHLEAR, adj. Su²p-ra³-tro²k²-le²-a²r. From *supra*, above, and *trochlea* (q. v.). Situated above the trochlea.

SUPRAVAGINAL, adj. Su²p-ra³-va²g-i²-n¹l. From *supra*, above, and *vagina* (q. v.). Fr., *sup-vaginal*. Situated above the vagina, affecting parts so situated. [a, 48.]

SURA (Lat.), n. f. Su²r(sur)²-a². 1. An old name for the calf of the leg. [L, 50 (a, 14).] 2. See *FIBULA*.

SURAL, adj. Su²r²-al¹. Lat., *suralis* (from *sura* [q. v.]). Fr., s. Pertaining to the sura. [C.]

SURALES (Lat.), n. m. pl. Su²r(sur)-al(a²l)¹ez(e²s). See *TARCEPS suraz*.

SURANAL (Fr.), adj. Su²r-a²-na²l. Above the anus.

SURBANDE (Fr.), n. Su²r-ba²-nd. An outer bandage to sustain a dressing. [L, 41 (a, 14).]

SURCILIER (Fr.), n. Su²r-se-le-a. See *CORRUGATOR supercilii*.

SURCINGLE, n. Su²r-si²-n²-g²l. For deriv., see *Sur**, and *CINGULUM*. The cord-like prolongation of the corpus striatum described by Dalton as "running forward in the roof of the inferior horn of the ventricle, to reach the amygdala at the base of the brain." [L, 23 (K).]

SURCULATION, n. Su²rk-u²l-a²-sh²n. From *surculus*, a sprout. Fr., s. Propagation by grafts or suckers. [a, 35.]

SURCULOSE, adj. Su²rk²-u²l-os. Producing suckers (surculi). [Gray (a, 35).]

SURCULUS (Lat.), n. m. Su²rk(sur²k)¹u²l(u²l)-u²s(u²s). Ger., *Fpfroffreis* (1st def.), *Moosstengel* (3d def.), *Stränkchen* (3d def.). 1. A graft. 2. A sucker. 3. The stem of a moss or of a liverwort; also the creeping stem of a lycopod. [a, 35].—*S. transversus*. A band of fibres that connects the two branches into which the processus medullaris divides after reaching the corpus striatum.

SURCURRENT, adj. Su²r-ku²-r²nt. For deriv., see *Sur**, and *currere*, to run. Running up upon a part (cf. *DECURRENT*). [a, 48.]

SURDI-MUTISME (Fr.), **SURDI-MUTITÉ** (Fr.), n's. Su²r-de-mu²-tezun¹, -e²a. See *DEAF-MUTISM*.

SURDITAS (Lat.), n. f. Su²rd(sur²d)¹-i²t-a²s(a²s). Gen., -i²t-is. From *surdus*, deaf. Fr., *surdité*. See *DEAFNESS*.

SURDITÉ (Fr.), n. Su²rd-e²a. See *DEAFNESS*.—*S. paradoxale*. See *PARACUSIS Willisii*.—*S. verbale*. See *Word-DEAFNESS*.

SURDOMUTITAS (Lat.), n. f. Su²rd(sur²d)¹-o²(o²)-mu²t²(mut²)-i²t-a²s(a²s). Gen., -i²t-is. From *surdus*, deaf, and *mutitus*, dumbness. Fr., *surdo-mutité*. Ger., *Taubstummeit*. Deaf-mutism.

SURDUS (Lat.), adj. Su²rd(sur²d)¹-u²s(u²s). Fr., *sourd*. See *DEAF*.

SUREAU (Fr.), n. Su²r-o. See *SAMBUCUS* and *Fructus SAMBUCI*.

—*Eau de s.*, *Eau distillée (de fleurs) de s.* See *Aqua SAMBUCI*.

—*Écorce de s.* See *ELDER-bark*.—*Éléolé de s.* See *Oleum SAMBUCI*.—*Fleurs de s.* See *ELDER-flowers*.—*Fomentation avec la fleur de s.* Sp., *fomentación de flor de saico*. A preparation made by pouring upon 30 grammes of elder-flowers enough boiling water to make a litre of infusion to be filtered after standing an hour [Fr. Cod.]; or by pouring 345 parts of water upon 5 of elder flowers and straining [Sp. Ph.]. [B, 95 (a, 38).]—*Grand s.* See *SAMBUCUS nigra*.—*Huile de s.* See *Oleum SAMBUCI*.—*Mellite de s.* See *DIAMORON*.—*Miel de s.* See *Mel SAMBUCI*.—*Petit s.* See *SAMBUCUS ebulus*.—*Pommade de s.* See *Unguentum SAMBUCI*.—*Suc d'écorce de s.* The reddish-brown, sweetish juice of the inner fleshy bark of fresh elder-roots; used as an emeto-cathartic in acetos. [B, 95 (a, 14).]—*Suc de s.* [Fr. Cod.]. Sp., *zumo de fruto de saico* [Sp. Ph.]. The fermented and filtered juice of elder berries. Cf. *Succus sambuci inapissatus*.—*S. à grappes*. See *SAMBUCUS racemosa*.—*S. commun*. See *SAMBUCUS nigra*.—*S. d'eau*. The *Viburnum opulus*. [a, 35].—*S. de montagne*. See *SAMBUCUS racemosa*.—*S. du Canada*. See *SAMBUCUS canadensis*.—*S. écorce* [Fr. Cod.]. The inner bark of *Sambucus nigra*. [a, 38].—*S. en herbe*, *S. hieble*. See *SAMBUCUS ebulus*.—*Tisane de s.* Sp., *infusión de flor de saico*. A preparation made by infusing 2 parts of elder-flowers in 400 of boiling water for half an hour [Fr. Cod.] (in 345 of boiling water [Sp. Ph.]), and straining. [B, 95 (a, 38).]

SURELLE (Fr.), n. Su²r-e²l. 1. See *RUMEX acetosa* and *RUMEX acetosella*. 2. The *Oxalis acetosella* and other species of *Oxalis*. [a, 35.]

SURÉPINEUX (Fr.), adj. Su²r-ap-en-u²s. See *SUPRASPINOUS*.

SURETTE (Fr.), n. Su²r-e²t. 1. The *Rumex acetosa*. 2. The *Oxalis acetosella*. [a, 35.]

SURFACE, n. Su²r-fas. Gr., *ἐπιφάνεια*. Lat., *superficies*. Fr., s. *superficie*. Ger., *Oberfläche*. The outside or limiting part of a solid body; hence the face or one of the faces of a body. [a, 35, 48].—*Auricular s. (of the ilium or of the sacrum)*. See *SUPERFICIES auricularis*.—*Demarcation s.* (Hermann). The cut s. of a muscle, which is electro-negative to the uninjured portion of the muscle. [Landois (K).]—*Glenoid s.* See *Glenoid CAVITY*.—*Nasal s. (of the superior maxilla)*. The s. of the superior maxilla that is directed toward the nose. [C.]—*Nuclear s.* An imaginary plane passing through the nuclear point, perpendicular to the visual direction. [C.]—*Orbital s. (of the superior maxilla)*. The upper s. of the superior maxilla. [C.]—*Popliteal s. of the femur*. A triangular s. of the femur included between the internal and external supracondylar lines. It forms the floor of the upper part of the popliteal space. [C, 3].—*Spheno-maxillary s.* The portion of the ala magna of the sphenoid bone that enters into the formation of the spheno-maxillary fossa. [L, 31].—*Temporal s.* A somewhat flat surface on the parietal bone, bounded by the temporal line.

SURFEIT, n. Su²r-f²it. From *super*, above, and *facere*, to make. Gr., *ὑπερβολή*, *ὑπερβολή*. Fr., *excès de table*. Ger., *Ueberladung*. Excess in eating or drinking; also, the condition of fullness and nausea occasioned thereby. [a, 48.]

SURGEON, n. Su²r-ju²n. Formerly spelled *chirurgéon* or *chirurgéon*. Gr., *χειρουργός* (from *χεῖρ*, the hand, and *εργον*, work). Lat., *chirurgus*, *vulnerum medicus*. Fr., *chirurgien*. Ger., *Wundarzt*, *Chirurg*. One who practices surgery. —*S. apothecary*. A medical practitioner that has passed the examinations of the Royal College of Surgeons and the London Apothecaries' Society. [a, 34.]

—*S. dentist*. An old term for a s. whose practice was limited to dentistry. [a, 34.]—*Veterinary s.* Fr., *vétérinaire*. Ger., *Thierarzt*. A s. who devotes himself to diseases of the domestic animals. [E.]

SUTORIUS (Lat.), n. m. $\text{Su}^2(\text{sut})\text{-or}^2\text{-u}^2\text{s(u}^4\text{s)}$. From *sutor*, a shoemaker. See **SARTORIUS**.

SUTUR (Ger.), n. *Zut-ur*. See **SUTURE**.—**Schuppens'**. See **SQUAMOSAL SUTURE**.

SUTURA (Lat.), n. f. $\text{Su}^2(\text{sut})\text{-u}^2\text{r(ur)}^2\text{a}^2$. See **SUTURE**.—**S. abdominalis**. See **GASTRORHAPHY** (1st def.).—**S. arcualis**. See **CORONAL SUTURE**.—**S. bimaxillaris**. See **INTERMAXILLARY SUTURE**.—**S. binasalis**. See **INTERNAL SUTURE**.—**S. biparietalis**. See **SAGITTAL SUTURE**.—**S. bregmatomastoidea**. See **OCCIPITO-MASTOID SUTURE**.—**S. bursae**. See **S. scroti**.—**S. chirurgica**. See **SUTURE** (2d def.).—**S. circumvoluta**. See **Twisted SUTURE**.—**S. clavata**. See **Quilled SUTURE**.—**S. coronalis**. See **CORONAL SUTURE**.—**S. corporis callosi**. See **STRIA LONGITUDINALIS MEDIALIS**.—**S. cruenta**. Fr., *suture sanglante*. Ger., *blutige Suture*. 1. The closure of a wound by sutures actually passed through the tissues, as distinguished from the dry suture. 2. Suture after refreshing the surfaces that are to be brought together (e. g., the borders of a fistulous opening).—**S. cutanea**. See **PALATINE RHAPHY**.—**S. dentata**. See **Dentated SUTURE**.—**S. dorsalis**. See **DORSAL SUTURE**.—**S. ethmoidomaxillaris**. The articulation between the ethmoid bone and the superior maxilla. [L.]—**S. externae corporis callosi**. See **STRIA LONGITUDINALIS LATERALES**.—**S. harmonialis**. See **HARMONY** (1st def.).—**S. imperfecta Weberi**. See **S. longitudinalis imperfecta**.—**S. incisiva**. See **INCISOR FISSURE**.—**S. infra-orbitalis (longitudinalis)**. See **INFRA-ORBITAL SUTURE**.—**S. infra-orbitalis transversa**. In young subjects, the remains of a furrow separating the lower border of the orbit from the rest of the superior maxilla. [L.]—**S. interparietalis**. See **SAGITTAL SUTURE**.—**S. interscissae**. See **INTERRUPTED SUTURE**.—**S. Button SUTURE**.—**S. jugalis**. See **SAGITTAL SUTURE**.—**S. lacrimomaxillaris**. The suture between the lacrymal bone and the superior maxilla. [L.]—**S. lambdoidea**. See **LAMBDOIDAL SUTURE**.—**S. lepidoides**. See **SQUAMO-PARIETAL SUTURE**.—**S. limbosa**. Ger., *Saumnahrt*. A variety of articulation by suture in which the bones are beveled at their line of junction.—**S. longitudinalis**. See **SAGITTAL SUTURE**.—**S. longitudinalis imperfecta**. A groove upon the outer surface of the frontal process of the superior maxilla in front of the lacrymal crest, usually lodging a small vein. [L.]—**S. mastoidea**. See **OCCIPITO-MASTOID SUTURE**.—**S. mendosa**. See **False SUTURE**.—**S. naso-frontalis**. See **FRONTO-NASAL SUTURE**.—**S. nodosa**. See **ETHMO-SPHENOIDAL SUTURE**.—**S. sphenofrontalis**. See **FRONTO-SPHENOIDAL SUTURE**.—**S. sphenozygomatica**. The suture between the ala magna of the sphenoid bone and the malar bone. [L.]—**S. spuria**. See **False SUTURE**.—**S. squamosa**. See **SQUAMO-PARIETAL SUTURE** and **False SUTURE**.—**S. ventralis**. See **VENTRAL SUTURE**.—**S. vera**. See **True SUTURE**.—**S. wormiana anterior**. In the fetus, the upper part of the lambdoid suture. [L.]—**S. wormiana posterior**. See **S. occipitis transversa**.—**S. zygomaticofrontalis**. See **FRONTO-MALAR SUTURE**.—**S. zygomaticomaxillaris**. The suture between the malar bone and the superior maxilla. [L.]—**S. zygomaticosphenoidalis**. See **S. sphenozygomatica**.

SUTURAL, adj. $\text{Su}^2\text{-u}^2\text{r}^2\text{L}$. Lat., *suturalis* (from *sutura*, a suture). Fr., s. Ger., *nahtständig*. Pertaining to a suture or taking place along a suture. [A. 35.]

SUTURATUS (Lat.), adj. $\text{Su}^2(\text{sut})\text{-u}^2\text{r(ur)}^2\text{-at}^2(\text{a}^2\text{t}^2)\text{u}^2\text{s(u}^4\text{s)}$. Ger., *benähtet*. Provided with a suture or with sutures. [A. 35.]

SUTURE, n. $\text{Su}^2\text{u}^2\text{r}$. Gr., $\rho\acute{\alpha}\phi\eta$. Lat., *sutura* (from *suere*, to sew), *sutela*, *rhaphie*. Fr., s., *engrenure*. Ger., *Suture*, *Fuge* (1st def.), *Naht*, *Verbindung* (2d def.). 1. That variety of synarthrosis in which the bones are articulated by their edges, generally by means of serrations; a dovetail joint. 2. The procedure of stitching parts together, particularly the lips of a wound. 3. The thread or other like material, together with the method of inserting it, in the operation of stitching parts together. 4. In botany, a line of junction or of opening, i. e. a seam, especially of a capsule or pod. [A. 35.]—**Antiseptic s.** See **ANTISEPTIC LIGATURE**.—**Appolito's s.** An intestinal s. made with a double-threaded needle, the first stitch being passed from within outward and the first longitudinal running stitch being made in the opposite side parallel with the line of the wound. The needle is then carried to the opposite side and a similar longitudinal stitch made, and so on back and forth. [R. P. Harris, "Med. News," Aug. 23, 1886, p. 236 (A. 34).]—**Baseball s.** A continuous s. all around a wound, in the case of the intestine penetrating the entire intestinal coat. ["Medical Record," Nov. 5, 1892, p. 551 (A. 34).]—**Basilar s.** The s. between the occipital bone and the body of the sphenoid bone. [L. 172.]—**Béclard's s.** A modification of Bertrandi's s. in which the needle is

threaded with both a black and a white thread, so that, when it is removed, the threads are pulled in opposite directions. [Morris (A. 63).]—**Bertrandi's s.** Fr., s. *à points passés*. A continuous s. passed "through and through," as in basting.—**Bifrontal s.** See **CORONAL s.**—**Biparietal s.** See **SAGITTAL s.**—**Buried s's.** Ger., *versteckte Nähte*. S's (2d def.) that are completely covered by skin and do not involve that structure at all. [A. 34.]—**Button s.** Ger., *Knopfnahrt*. A modification of the quilled s. in which buttons are used instead of quills. [E.]—**Circular s.** Fr., s. *circulaire*. Ger., *circuläre Naht*. A s. applied to the entire circumference of a divided organ (e. g., the intestine). [A. 34.]—**Circumvolut s.** See **Twisted s.**—**Clamp s.** Ger., *Klammernahrt*. A modification of the quilled s. in which two pieces of perforated lead or silver are used, through which the wire s's are passed. [E.]—**Clavate s.** Ger., *Flockennahrt*. See **Quilled s.**—**Coaptation s.** Ger., *Vereinigungsnahrt*. A uniting or coapting s., as distinguished from a s. intended to relieve tension. Cf. **Relief s.**—**Cobbler's s.** A form of s. in which a double-threaded needle is passed through both lips of a wound and one end of the thread is caught, pulled through the needle, and withdrawn; when the needle is passed back in taking a second stitch the remaining thread is removed from the needle and the thread left on the opposite side is inserted and the needle withdrawn. [A. 34.]—**Compound s.** See **Quilled s.**—**Continued s.**, **Continuous s.** The closure of a wound by means of one continuous thread, usually by transfixing first one lip and then the other, alternately, from within outward.—**Coronal s.** Lat., *sutura coronalis*. Fr., s. *coronale* (ou *fronto-pariétale*). Ger., *Kranznahrt*, *Kronennahrt*. The s. between the frontal and parietal bones. [L.]—**Cranial s's.** The s's between the bones of the skull. [L.]—**Cuneal s.** See **FRONTO-SPHENOIDAL s.**—**Czerny-Lembert s.** An intestinal s. in which the Czerny s. is employed to unite the mucous and the Lembert s. to unite the peritoneal coat. [A. 34.]—**Czerny's s.** An intestinal s. in which the thread passes through the mucous membrane alone, so as to bring that membrane and the connective tissue upon which it rests together. [A. 34.]—**Dentated s.**, **Dentate s.** Ger., *Zahnnahrt*. An articulation by s. into the formation of which long and tooth-like processes and deep indentations enter.—**Dorsal s.** The somewhat prominent line or ridge, corresponding to the midrib of the carapace leaf, opposite to the ventral s. [A. 35.]—**Double s. de l'utérus** (Fr.). See **Sänger's s.**—**Duverger's s.** A variety of the s. des quatre maîtres in which a piece of prepared calf's trachea was used as the supporting body.—**Dry s.** Ger., *Trockennahrt*. The application of adhesive plaster to each side of a wound and the subsequent stitching of the edges of the plasters together. [A. 34.]—**Ethmoido-frontal s.** The s. between the ethmoid and frontal bones. [L.]—**Ethmo-lacrymal s.** The s. between the ethmoid and lacrymal bones. [L.]—**Ethmo-sphenoidal s.** The s. between the ethmoid and sphenoid bones. [L.]—**False s.** Lat., *sutura notha*. Fr., *fausse s.* Ger., *falsche Naht*. Any form of s. (1st def.) in which the bones do not interlock by serrations.—**Figure-of-eight s.** See **Twisted s.**—**Frontal s.** Lat., *sutura frontalis*. Fr., s. *frontale*. Ger., *Stirnnahrt*. An occasional s. in the frontal bone continued forward from the sagittal s. to the root of the nose. [L.]—**Fronto-ethmoidal s.** See **Ethmoido-frontal s.**—**Fronto-lacrymal s.** The s. between the frontal and lacrymal bones. [C. 3.]—**Fronto-malar s.** Ger., *Stirnbeinmangennahrt*. The s. between the frontal and malar bones. [L.]—**Fronto-maxillary s.** The s. between the frontal bone and the superior

CONTINUOUS SUTURE.

CROSS SUTURE.

DOUBLE-NEEDED SUTURE.

maxilla. [C. 3.]—**Fronto-nasal s.** Ger., *Stirnasennahrt*. The s. between the frontal and nasal bones. [C. 3.]—**Fronto-parietal s.** See **CORONAL s.**—**Fronto-sphenoidal s.** Lat., *sutura sphenofrontalis*. Ger., *Keinnahrt*. The s. between the frontal bone and the ala of the sphenoid bone. [L. 332.]—**Fronto-temporal s.** The s. between the frontal and temporal bones. [L.]—**Furrier's s.** See **Glover's s.**—**Gely's s.** A continuous s. for wounds of the intestine, made with a thread having a needle at each end, so that a succession of cross-stitches may be made to extend from one end of the wound to the other. [E. 4.]—**Glover's s.** Ger., *Kürschner-nahrt*. A continuous s. in which the needle is, after each stitch, passed through the loop of the preceding stitch. [A. 34.]—**Grande s.** (Fr.). See **Sagittal s.**—**Grooved s.** See **SCHINDLYSIS**.—**Hare-lip s.** Ger., *Hasenschartennahrt*. See **Twisted s.**—**Harmonic s.** See **HARMONY** (1st def.).—**Implanted s.** A s. formed by implanting pins opposite each other on the two sides of a wound, and approximating the lips by winding thread or other similar material about the pins.—**Incisor s.** See **INCISOR FISSURE**.—**India-rubber s.** A

variety of the twisted s. in which rubber rings are used instead of the figure-of-eight turns of silk, etc.—**Infra-orbital s.** An anomalous s. in the orbit following the course of the infra-orbital canal. [L. 332.]—**Inner s.** See *Ventral s.*—**Internasillary s.** The s. between the superior maxilla. [L.]—**Internasal s.** The s. between the nasal bones. [L.]—**Interparietal s.** See *Sagittal s.*—**Interrupted s.** Fr. *à points séparés, s. entrecoupée*. Ger. *Knopfnah*. A s. formed by single stitches inserted separately, the needle being usually passed through one lip from without inward, and through the other from within outward.—**Jobert's s.** 1. An interrupted s. used for uniting the cut ends of a divided intestine, the upper being invaginated into the lower. [E.] 2. A form of intestinal s. with inversion of the peritoneal coat. 3. A form of s. for complete division of the intestine in which a fold of omentum is interposed between the edges of the wound, which are united around it by Ledran's s. [Morris (A. 63).]—**Jugal s.** See *Sagittal s.*—**Knotted s.** See *Interrupted s.*—**Lambda s.** **Lambdoidal s.** **Lambdoid s.** Ger. *Lambdanah*, *Hinterhauptsnah*. The s. between the parietal bones and the two superior borders of the occipital bone. [C.]—**Lapeyronie's s.** A modification of Palfyn's s., in which the thread is passed through the mesentery and then attached to the skin. [Morris (A. 63).]—**Lead-plate s.** A s. consisting of wire that is attached at each end to lead plates, about an inch in diameter, placed some distance from the edges of a wound. ["Med. Rec." Oct. 26, 1889, p. 449 (a. 34).]—**Ledran's s.** A form of interrupted s. applied to wounds of the intestine. The threads, having all been introduced, were twisted together on each side of the wound, so as to pucker it, and then attached to the skin. [Morris (A. 63).]—**Leubner's s.** A s. as to invert the edges of the gut when traction is made, so that the serous surfaces are brought together.—**Lepidoid s.** See *Squamo-parietal s.*—**Littre's s.** Ligation of the inferior end of the intestine in cases of gangrene, in order to obliterate it, and the attachment of the upper end to the inguinal ring so as to form an artificial anus. [a. 34.]—**Longitudinal s.** See *Sagittal s.*—**Loop s.** See *Interrupted s.*—**Malo-maxillary s.** See *Sutura zygomatico-maxillaris*.—**Masto-occipital s.** See *Occipito-mastoid s.*—**Masto-parietal s.** See *Parieto-mastoid s.*—**Mattress s.** Ger. *Matratzennah*. A continuous s. in which a stitch is taken with a needle, the thread is tied, and then the needle is inserted upon the same side as that from which it emerged and passed in the opposite direction through both lips of the wound, the direction of the needle being reversed at each stitch. ["Med. Rec." Oct. 26, 1889, p. 449 (a. 34).]—**Maxillo-lacrimal s.** The s. between the superior maxilla and the lacrimal bone. [L.]—**Maxillo-premaxillary s.** A s. between the premaxillary portion of the superior maxilla and the rest of the bone. [L. 153.]—**Medio-frontal s.** See *Frontal s.*—**Metallic plate s.** See *Button s.*—**Metallic s.** S. (2d def.) with wire.—**Metopic s.** See *Frontal s.*—**Naso-maxillary s.** The s. between the nasal bone and the superior maxilla. [L.]—**Nerve s.** The union of the distal ends of a nerve by fine threads or catgut s. [a. 31.]—**Neurocentral s.** The cartilaginous interval separating the portion of the bodies of the dorsal vertebra posterior to the points of the articulation of the ribs from the main portion. [L. 142.]—**Noose s.** See *Interrupted s.*—**Occipital s.** See *Lambdoidal s.*—**Occipito-mastoid s.** Ger. *Warzenah*. The s. between the occipital bone and the mastoid portion of the temporal bone. [C.]—**Occipito-sphenoidal s.** See *Lambdoidal s.*—**Ovular s.** Ger. *Gaumennah*. The s. between the palate bones. [L.]—**Palatine transverse s.** A s. between the palate processes of the palate bone and the superior maxilla. [L. 332.]—**Palfyn's s.** That variety of interrupted s. of a partially divided intestine in which a loop is passed at the middle of the wound, and the threads are fixed to the skin with plaster, thus approximating the bowel to the external wound. [Morris (A. 63).]—**Pancoast's s.** See *Plastic s.*—**Parietal s.** See *Sagittal s.*—**Parieto-mastoid s.** The s. between the parietal bone and the mastoid portion of the temporal bone. [C.]—**Petro-occipital s.** The s. between the petrous portion of the temporal bone and the occipital bone. [L.]—**Petro-sphenoidal s.** The s. between the petrous portion of the temporal bone and the ala magna of the sphenoid bone. [L.]—**Pin s.** See *Twisted s.*—**Plastic s.** A form of s. devised by J. Pancoast, and so named by him, for use in his method of increasing the chances of union in superficial wounds by enlarging the extent of the surfaces approximated. A groove is formed along one lip of the wound, on its cut surface, and the other lip is beveled in such a manner that it will fit into the groove. The thread is passed from without inward through (1) the outer lip of the groove, (2) the beveled lip, (3) the deep lip of the groove; then, forming a loop on the deep surface of the grooved lip, it is passed through the same structures again, traversing them at a different place and in inverse order. The two free ends are then tied over a

INTERRUPTED SUTURE.

method of uniting a divided intestine by means of s's so inserted as to invert the edges of the gut when traction is made, so that the serous surfaces are brought together.—**Lepidoid s.** See *Squamo-parietal s.*—**Littre's s.** Ligation of the inferior end of the intestine in cases of gangrene, in order to obliterate it, and the attachment of the upper end to the inguinal ring so as to form an artificial anus. [a. 34.]—**Longitudinal s.** See *Sagittal s.*—**Loop s.** See *Interrupted s.*—**Malo-maxillary s.** See *Sutura zygomatico-maxillaris*.—**Masto-occipital s.** See *Occipito-mastoid s.*—**Masto-parietal s.** See *Parieto-mastoid s.*—**Mattress s.** Ger. *Matratzennah*. A continuous s. in which a stitch is taken with a needle, the thread is tied, and then the needle is inserted upon the same side as that from which it emerged and passed in the opposite direction through both lips of the wound, the direction of the needle being reversed at each stitch. ["Med. Rec." Oct. 26, 1889, p. 449 (a. 34).]—**Maxillo-lacrimal s.** The s. between the superior maxilla and the lacrimal bone. [L.]—**Maxillo-premaxillary s.** A s. between the premaxillary portion of the superior maxilla and the rest of the bone. [L. 153.]—**Medio-frontal s.** See *Frontal s.*—**Metallic plate s.** See *Button s.*—**Metallic s.** S. (2d def.) with wire.—**Metopic s.** See *Frontal s.*—**Naso-maxillary s.** The s. between the nasal bone and the superior maxilla. [L.]—**Nerve s.** The union of the distal ends of a nerve by fine threads or catgut s. [a. 31.]—**Neurocentral s.** The cartilaginous interval separating the portion of the bodies of the dorsal vertebra posterior to the points of the articulation of the ribs from the main portion. [L. 142.]—**Noose s.** See *Interrupted s.*—**Occipital s.** See *Lambdoidal s.*—**Occipito-mastoid s.** Ger. *Warzenah*. The s. between the occipital bone and the mastoid portion of the temporal bone. [C.]—**Occipito-sphenoidal s.** See *Lambdoidal s.*—**Ovular s.** Ger. *Gaumennah*. The s. between the palate bones. [L.]—**Palatine transverse s.** A s. between the palate processes of the palate bone and the superior maxilla. [L. 332.]—**Palfyn's s.** That variety of interrupted s. of a partially divided intestine in which a loop is passed at the middle of the wound, and the threads are fixed to the skin with plaster, thus approximating the bowel to the external wound. [Morris (A. 63).]—**Pancoast's s.** See *Plastic s.*—**Parietal s.** See *Sagittal s.*—**Parieto-mastoid s.** The s. between the parietal bone and the mastoid portion of the temporal bone. [C.]—**Petro-occipital s.** The s. between the petrous portion of the temporal bone and the occipital bone. [L.]—**Petro-sphenoidal s.** The s. between the petrous portion of the temporal bone and the ala magna of the sphenoid bone. [L.]—**Pin s.** See *Twisted s.*—**Plastic s.** A form of s. devised by J. Pancoast, and so named by him, for use in his method of increasing the chances of union in superficial wounds by enlarging the extent of the surfaces approximated. A groove is formed along one lip of the wound, on its cut surface, and the other lip is beveled in such a manner that it will fit into the groove. The thread is passed from without inward through (1) the outer lip of the groove, (2) the beveled lip, (3) the deep lip of the groove; then, forming a loop on the deep surface of the grooved lip, it is passed through the same structures again, traversing them at a different place and in inverse order. The two free ends are then tied over a

LEMBERT-CZERNY SUTURE.

small roll of adhesive plaster laid on the cutaneous surface of the grooved lip.—**Quilled s.** **Quill s.** Lat. *sutura clavata*. Fr. *s. enchevilée*, *s. emplumée*, *s. empennée*. Ger. *Balkennah*, *Keilfingelnah*, *Knopfnah*, *Zapfenah*, *Zapfenah*. An interrupted s. in which a double thread is passed deep into the tissues, even quite below the bottom of the wound, the needle being so withdrawn as to leave a loop hanging from one lip and the two free ends of the thread from the other. A quill, or, more commonly, a piece of bougie is passed through the loops, which are tightened upon it, and the free ends of each separate thread are then tied together over a second quill. The object is to bring the deep parts into firm coaptation.—**Randohr's s.** An intestinal s. in which the upper portion of the intestine is invaginated into the lower and the peritoneal surfaces are stitched together. [a. 34.]—**Rat-tail s.** S. Material made from fine fibres obtained from the rat's tail. ["Med. News," Dec. 5, 1891, p. 660 (a. 34).]—**Relief s.** Ger. *Entspannungnah*. A row of supplementary s's including the tissues to the extent of 1 or 1½ inch on each side of a fistula or a deep wound, for the purpose of lessening the strain on the coaptation s's. [a. 35.]—**Reyard's s.** An intestinal s. by means of thin oval wooden plates having threads and needles attached. The plates, placed within the intestine, served to keep the latter in apposition with the abdominal parietes, through which the needle and thread were passed. [a. 34.]—**Rigal's s.** India-rubber s., so called because first practiced by Rigal. [a. 34.]—**Royal s.** Fr. *point royal*, Ger. *königlicher Stich*. Syn.: *royal stitch*. An old operation for the cure of femoral hernia, consisting of ligation of the sac close to the ring. [a. 34.]—**Sabatier's s.** A variety of the s. des quatre maitres in which a piece of card or of St. John's wort, smeared with oil of turpentine or varnished, was used for the supporting body. [Morris (A. 63).]—**Sagittal s.** Fr. *grande s.* Ger. *Pfeilnah*. The s. between the upper margins of the parietal bones. [L.]—**Säuger's s.** In the Cesarean operation, the insertion of eight or ten deep s's of soft silver wire through the incised uterine peritoneum and muscle in such a manner as to invert the serous surfaces and approximate them, after which twenty or more superficial s's are passed through the peritoneum alone. [a. 34.]—**Scaly s.** See *Squamous s.*—**Seminiferous s.** See *Ventral s.*—**Sero-serous button s.** See *Säuger's s.*—**Sero-serous s.** Fr. *s. séro-séreuse*. Ger. *symptomatische Nah*. The s. of two peritoneal surfaces to each other. [a. 32.]—**Serrated s.** Ger. *Sägenah*. An indication by s. in which the bones are joined by serrated projections and indentations that are fine and delicate as compared

PIN SUTURES.

with those of the dentated s.—**Shotted s.** A form of s. in which both ends of the wire are passed through the perforated shot that is then compressed tightly over them. [a. 34.]—**Spheno-malar s.** See *Sutura sphenozygomatica*.—**Spheno-parietal s.** The s. between the parietal bone and the ala magna of the sphenoid bone. [L.]—**Spheno-petrosal s.** See *Petro-sphenoidal s.*—**Spheno-squamous s.** See *Squamo-sphenoidal s.*—**Spheno-temporal s.** The s. between the sphenoid and temporal bones. [L. 88 (a. 50).]—**Spiral s.** See *Glover's s.*—**Spiroidal s.** A spiral continuous s. for wounds of the intestine. [Morris (A. 63).]—**Squamo-parietal s.** **Squamosal s.** Fr. *s. écailleuse*. Ger. *Schuppennah*, *Schläfenschuppennah*. The s. between the parietal bone and the squamous portion of the temporal bone. [L.]—**Squamo-sphenoidal s.** The s. between the squamous portion of the temporal bone and the great wing of the sphenoid bone. [L.]—**Squamous s.** See *Squamo-parietal s.*—**Staple s.** A sharpened wire shaped like a staple that is passed through both lips of a wound and then bent back. [a. 34.]—**Subcuticular s.** A buried continuous catgut s. in which the needle is passed horizontally beneath the epidermis into the cutis vera, emerging at the angle of the wound, then in a similar manner passed through the cutis vera of the opposite side of the wound, and so on until the other angle of the wound is reached. ["Brit. Med. Jour." Feb. 22, 1890, p. 414 (a. 34).]—**Sunk s.** See *Abadie's s.*—**Superficial s.** 1. See *HARMONY* (1st def.). 2. A stitch passed merely through the skin to secure nice coaptation of the edges of a wound, in contradistinction to deep s's.—**S. à anse** (Fr.). Ger. *Schlingennah*. A form of interrupted s. in which the ends of the threads are collected and tied in a single knot, instead of each being tied separately. [E.] Cf. *Ledran's s.*—**S. à étages** (Fr.). Ger. *Etagenah*. See *Interrupted s.*—**S. à plaques** (Fr.). See *Button s.*—**S. à plaques latérales** (Fr.). See *Quilled s.*—**S. à points passés** (Fr.). See *Brandt's s.*—**S. à points séparés** (Fr.). See *Interrupted s.*—**S. by harmony**. See *HARMONY* (1st def.).—**S. continue en spirale** (Fr.). See *Glover's s.*—**S. cunéiforme** (Fr.). See *Fronto-sphenoidal s.*—**S. des quatre maitres** (Fr.). A method of uniting a divided intestine practiced in the thirteenth century by four monks of Paris.

O, no; O², not; O³, whole; Th, thin; Th², the; U, like oo in too; U², blue; U³, hull; U⁴, full; U⁵, urn; U⁶, like ü (German).

A hollow cylinder (of wood, or of the windpipe or dried intestine of an animal) was introduced into the intestine so as to support it, and the edges of the wound were stitched together over it. [Morris (A. 63).] —**S. empenée** (Fr.). **S. emplumée** (Fr.). **S. enchevillée** (Fr.). See *Quilled s.* —**S. en surjet** (Fr.). That form of continuous s. in which the thread is carried back after the last insertion and tied to the other end, left long for the purpose. —**S. entortillée** (Fr.). See *Twisted s.* —**S. entrecoûpée** (Fr.). See *Interrupted s.* and *Button s.* —**S. of the four masters**. See *S. des quatre maîtres* —**S. par cellules**. An anatomical s. such as that of the ethmoid with the adjacent bones. [A. 301 (a. 34).] —**S. par harmonie** (Fr.). See *HARMONY* (1st def.). —**S. perdue** (Fr.). See *Buried s.* —**S. primo-secondaire** (Fr.). Of Rohmer, the insertion of s's in a wound at the time of the operation, tamponing the wound, and fastening the s's from twelve to forty-eight hours later. [Union méd., June 19, 1888, p. 928 (a. 34).] —**S. sanglante** (Fr.). See *SUTURA cruenta*. —**S. sèche de Goyrand** (Fr.). A form of dry s. in which a strip of cloth saturated with collodion is placed on each side of the long axis of a wound, each strip having attached to it strings which, when tied together, approximate the edges of the wound. [a. 34.] —**S. sèche de Mazier**. A modification of the s. sèche de Goyrand in which the edges of the strips are stitched together. [a. 34.] —**S. séro-séreuse**. See *Sero-serous s.* —**S. twister**. An instrument used to twist together the ends of a wire. [a. 34.] —**Symptomatic s.** —**S. serous** —**S. of the peritoneum** —**Temporo-occipital s.** See *Occipito-mastoid s.* —**Temporo-parietal s.** The s. between the temporal and parietal bones, made up of the squamosal and parieto-mastoid s's. [L.] —**Transverse (frontal) s.** See *Coronal s.* —**Triangular s. of Simon**. A form of s. for closing lacerations of the perinaum involving the sphincter and in which separate sets of s's are inserted in the rectal mucous membrane, the vaginal mucous membrane, and the skin. —**True s.** Lat., *sutura vera*. Fr., *vraie s.* Ger., *echte Naht*. That form of s. (1st def.) in which the bones actually interlock by indentations and projections. See *Serrated s.* and *Dentated s.* —**Twisted s.** Fr., *s. entortillée*. A s. in which pins are passed through the opposite lips of a wound, at right angles to the direction of the wound, and thread, floss, or other like material is wound about the pins, crossing them first at one end and then at the other in a figure-eight fashion, thus holding the lips of the wound firmly together. —**Uninterrupted s.** See *Continuous s.* —**Uterine s.** See *Hysteroorrhaphy* (1st def.). —**Utero-parietal s.** Of Pilleau, suturing of the uterus to the internal surface of the abdominal wall after the Cesarean operation. [Gaz. des hôp., 1854, p. 595 (a. 34).] —**Ventral s.** The inner s. on which the ovules are normally borne; the line of juncture of the edges of the carpel or adjacent carpels. [a. 35.] —**Viscero-parietal s.** The operation of stitching a wounded organ (like the uterus after the Cesarean operation) to the abdominal incision. —**Wölher's internal s.** An interrupted s. for the intestines in which three fourths of the threads are tied with the knot free in the lumen of the bowel, and the rest with the knot outside. [Med. Rec., Oct. 26, 1889, p. 449 (a. 34).] —**Zygomatic s.** A s. between the zygomatic process of the superior maxilla and the temporal bone. [L.]

SUTURE, v. tr. Su'tu'r. To sew up a wound.

SWAB-STICK, n. Swo'b/stik'. A shaft one end of which is to be wrapped with cotton, for making applications of medicinal substances. It may be plain or notched at the end.

SWALLOW, n. Swo'l'o. See *HIREUDO*. —**Chinese s's' nests**. The gelatinous, edible nests of *Hirundo esculenta*, formed of a secretion from the mouth of the bird. [B. 19 (a. 35).]

SWALLOWING, n. Swo'l'o-i'n'. See *DEGLUTITION*.

SWALLOWWORT, n. Swo'l'o-wu't. See *ASCLEPIAS* (2d def.) and *CHELIDonium* (1st def.).

SWAMPWOOD, n. Swa'mp/wu'd. See *DIRCA palustris* and *CERPALANTHUS occidentalis*.

SWARTZIA (Lat.), n. f. Swa'trts/i'z-a. From *Swartz*, a Swedish botanist. Fr., *Swartzia*. A genus of the Leguminosae. The *Swartzia* are a tribe of the *Papilionaceae*. [a. 35.] —**S. tomentosa**. A tree of the forests of Guiana, furnishing a bitter, sudorific bark (panococco-bark) which exudes a reddish sap hardening into a dark resin. The flowers are antispasmodic. [a. 35.]

SWEAT, n. Swe't. A. S., *swát*. Gr., ἰδρῶς. Lat., *sudor*. Fr., *sueur*. Ger., *Schweiss*. 1. The product of secretion from the perspiratory glands, perspiration (3d def.); a clear, colorless, acid, and, when first secreted, odorless liquid, the chief constituents of which are water, chlorides (especially sodium chloride), fatty substances, and urea. 2. In popular language, sensible perspiration. —**Bloody s.** See *Hæmaturia*. —**Bluish s.** Perspiration communicating a bluish or green tint to the underclothing. [L. 41 (a. 14).] —**Cold s.** Lat., *epidrosis diaphoretica* (seu *syncopea*). Perspiration accompanied with a sensation of cold, as in syncope. —**Colored s.** See *CHROMIDROSIS* and *BLEPHARO-CHROMIDROSIS*. —**Critical s.** See *EPIDROSIS febrilis*. —**Diaphoretic s.** See *Cold s.* —**Night-s.** See the major list. —**S. house**. An inclosed space containing means for subjecting an inmate to the sudorific effect of steam. [a. 34.] —**Syncopeal s.** See *Cold s.*

SWEATING, n. Swe't/i'n'. See *PERSPARATION* (1st def.). —**Morbid s.** See *CHROMIDROSIS*. —**Unilateral s.** Lat., *transpiration unilateralis*, *hemidiaphoresis*. S. upon one lateral half of the body; usually due to nervous disease.

SWEET CHALYBEATE SPRINGS, n. Sweet ka'l'i'z'b/æ't. A place in Alleghany county, Virginia, where there are chalybeate springs. [Anderson (a. 14).]

SWEET SPRINGS, n. Sweet. 1. A place in Monroe County, Virginia, where there are sulphurous springs. [L. 30, 57 (a. 14).] 2. Mineral springs in Saline County, Missouri. [A. 309 (a. 21).]

SWEET WILLIAM, n. Sweet wi'l'i'y'm. See *DIANTHUS barbatus* and *CHEIRANTHUS cheiri*.

SWEET-WOOD, n. Swet/wu'd. The *Croton eleuteria* and certain other plants. [a. 35.] —**White s.-w.** See *NECTANDRA leucantha* and *NECTANDRA sanguinea*.

SWELLING, n. Swe'l'i'n'. Gr., ὄγκος, φῦμα. Lat., *tumiditas*. Fr., *gonflement*. Ger., *Geschwulst*. A traumatic, inflammatory, or other morbid enlargement. [a. 34.] —**Albuminous s.** See *Cloudy s.* —**Biennorrhagic s. of the knee**. See *Gonorrhoeal RHEUMATISM*. —**Cloudy s.** Fr., *tuméfaction trouble*. Ger., *trübe Schwellung*. Of Virchow, a s. of cells due to nutritive irritation; they increase in bulk while the added material is not properly assimilated, but deposited in visible albuminous granules. [a. 34.] —**Dorsal s.** See *Medullary ridges*. —**Embryonic s.** Ger., *Keimwulst* (Kölliker), *Randwulst* (Götte), *Keimwulst* [His]. A thickening of that portion of the blastoderm that forms the margin of the blastopore. [A. 5.] —**Glassy s.** Of Weber, amyloid degeneration and degeneration of muscular fibres, etc. [B. 1, a. 34.] —**Lactéal s.**, *Lactiferous s.* [Cooper]. A s. of the breast from obstruction of the lactiferous ducts. [a. 34.] —**White s.** See *FUNGUS ARTHRITIS* and *SPINA ventosa*.

SWERTIA (Lat.), n. f. Swe'tr/i'z-a. From *Swert*, an herbalist. Fr., *swertie*. A genus of herbs, of the *Swertia*, which are a tribe of the *Genitianeae*. [a. 35.] —**S. alata**. A Himalayan species said to be the source of a false chirata devoid of bitter properties. [a. 35.] —**S. angustifolia**. The *Agathotes angustifolia*. It furnishes a chirata inferior in bitterness to the true chirata. [a. 35.] —**S. chirata**, **S. chirayta**. True chirerta, the *Agathotes chirayta*; an herb furnishing the chirata of the U. S. Ph., a pure, bitter tonic consisting chiefly of the dried stems with portions of the root attached. The drug is recommended in gonorrhea and other forms of indigestion; it does not constipate; it is a cholagogue; and it checks acidity of the stomach. In India it is also used, especially along with the seeds of *Casalpinia bonducella*, as a febrifuge. [a. 35.] —**S. difformis**. See *FRASERA Walteri*. —**S. elegans**. The *salarias* of India. The bitter stems are tonic and febrifuge. [a. 35.] —**S. multiflora**. An East Indian species substituted for chirata. The root is especially used. [a. 35.] —**S. perennis**. Fr., *s. vivace*. Marsh yellowroot (or gentian) of Europe. The leaves are used like those of *Pleurogyne rotata*. [a. 35.] —**S. rotata**. Fr., *s. en rose*. See *PLEUROGYNE rotata*.

SWIETENIA (Lat.), n. f. Swet-an/i'z-a. From *van Swieten*, an Austrian physician. Fr., *swietenie*. A genus of trees, of the *Swietenae* or *Swietenia*, which are a tribe of the *Meliaceae*. [a. 35.] —**Cortex swietenia**. See under *S. mahagoni*. —**S. chloroxylon**. See *CHLOROXYLON s.* —**S. febrifuga**. See *SOYMDA febrifuga*. —**S. mahagoni**, **S. mahogoni**. Fr., *acajou à bous*, *cèdre des Antilles*. Ger., *Mahagonibaum*. The mahogany-tree of Central America and the West Indies. The bitter, astringent bark, *cortex mahagoni* (seu *swietenie*, seu *ligni mahagoni*), contains catechol in dysenteric use, and was formerly used as a febrifuge. The seeds yield a purgative fixed oil (carabai-oil). [a. 35.] —**S. senegalensis**. See *KHAYA senegalensis*. —**S. soymda**. See *SOYMDA febrifuga*. —**S. sureni**. See *CEDRELA febrifuga* (1st def.).

SWIMMERET, n. pl. Swi'm/et'r-e't. One of the limbs of the Crustacea, which are adapted for swimming. [B. 28 (a. 27).]

SWINEBREAD, n. Swin/bre'd. The *Tuber cibarium*. [a. 35.]

SWINE-POX, n. Swin/po'x. Lat., *variola suilla*. Ger., *Schweinepocken*. 1. A disease peculiar to swine, characterized by hard inflammatory tubercles on the legs and thighs. 2. Variella, especially variella globata. [D. 1.]

SWING, n. Swi'n'. A seat suspended so as to admit of a to-and-fro motion. [a. 48.] —**Salter's s.** An apparatus for treating fractures of the lower extremity. It consists of a cradle attached by support to wheels that run along a horizontal rod on an iron framework. [a. 34.]

SWOLLEN, adj. Swo'l'n. Gr., ἐμφυσῶμενος. Lat., *inflatus*. Fr., *gonflé*. Ger., *geschwollen*. Affected with swelling. [D.]

SWOON, n. Swun. Gr., ληθθυμία. Lat., *animi deliquium*. Fr., *défaillance*, *évanouissement*. Ger., *Ohnmacht*. The act of swooning; syncope. [a. 34.]

SWOONING, n. Swun/i'n'. See *SYNCOPE*.

SYAGRUS (Lat.), n. f. Si(su)'a'g(a'g)-ru's(ru's). See *Cocos* (1st def.).

SYCAMORE, n. Si'k'a'mor. From σῦκον, a fig, and μῦσα, the mulberry. Fr., *sycomore*. 1. The *Acer pseudo-platanus*. [a. 35.] 2. See *FICUS sycamoros*. —**American s.** See *PLATANUS occidentalis*.

SYCARPUS (Lat.), n. m. Si'k(su'k)-a'-ka-rp'u's(u's). From σῦκον, a fig, and καρπός, fruit. A genus of the *Myricaceae*, referred to *Guarea*. [a. 35.] —**S. Rusbyi**. An undetermined species of *Guarea*; a Bolivian tree yielding cocillaña (q. v., in Supplement). [a. 35.]

SYCE (Lat.), **SYCEA** (Lat.), n's f. Si(su'k)(e'a), si's(su'k)(e'a)-a. Gr., σῦκη, σῦκα. See *FICUS* (2d def.).

SYCÉPHALE (Fr.), n. Se-sa-fa'z-le. Of Geoffroy St.-Hilaire, a form of double monstrosity in which there are two bodies, distinct below the umbilicus and surmounted by two more or less incomplete heads intimately united. [L. 41, 49 (a. 14).]

SYCHNOCARPOUS, adj. Si'k-no-ka-rp'u's. From συχρός, frequent, and καρπός, fruit. Capable of fruiting many times without perishing. [a. 35.]

SYCHNURESIS (Lat.), n. f. Si'k(su'k)-ch'z-nu'r(nur)-e(a)'s. Ger., *sychnurie* (q. v.). Fr., *sychnurie*, frequent, and *osmure*, urination. Fr., *sychnurie*. Morbid frequency of urination. [A. 385 (a. 48).]

SYCITES (Lat.), n. m. Si's(su'k)(e'a)-it(e'a)'s. Gen., *-it'u (-æ)*. Gr., σῦκίτης (from σῦκον, a fig). See *CATORCHITES*.

SYCOCERYL ALCOHOL, **SYCOCERYL HYDRATE**, n's. Si'k-os-er'i'al. An aromatic monatomic alcohol, C₁₈H₃₆O (or C₁₈H₃₄O = C₁₈H₃₆.OH); a natural crystalline acetic ether found in the resin

O, no; O¹, not; O², whole; Th, thin; Th², the; U, like oo in too; U¹, blue; U², lull; U³, full; U⁴, urn; U⁵, like ü (German).

SYMPETALOUS, adj. $\text{Si}^2\text{m-pe}^2\text{t}^2\text{a}^2\text{u}^2\text{s}$. Lat. *sympetalus*. Fr., *sympétale*. See GAMOPETALOUS. The *Sympetala* are the *Gamopetala*. [a, 35.]

SYMPEXION (Lat.), n. f. $\text{Si}^2\text{m-pe}^2\text{x-e-o}^2\text{n}^2$. A concretion. **SYMPEXIS** (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-pe}^2\text{x}(pax)^2\text{is}$. Gen., *-es* (-is). Gr., *συμπεξίς* (from *συμπεγνάναι*, to put together). Fr., *sympexis*. See CONCRETION.

SYMPHORA (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-fo}^2\text{r-a}^2$. Gr., *συμφόρα* (from *συμφέρειν*, to bring together). See CONGESTION.

SYMPHOREMA (Lat.), n. n. $\text{Si}^2\text{m}(su^2\text{m})\text{-fo}^2\text{r-em}(am)^2\text{a}^2$. Gen., *-ematos* (-atis). Gr., *συμφόρημα*. Fr., *symphorème*. The condition of being congested. [L, 50 (a, 48).]

SYMPORESIS (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-fo}^2\text{r-e}(a)^2\text{si}^2\text{s}$. Gen., *-es-eos* (-is). Gr., *συμφορσις*. Fr., *symporèse*. See CONGESTION.

SYMPORETICUS (Lat.), adj. $\text{Si}^2\text{m}(su^2\text{m})\text{-fo}^2\text{r-e}^2\text{t}(at)^2\text{ik-u}^2\text{s}(u\text{'s})$. Caused by congestion. [L, 50 (a, 14).]

SYMPHORICARPUS (Lat.), n. m. $\text{Si}^2\text{m}(su^2\text{m})\text{-fo}^2\text{r-i}^2\text{-ka}^2\text{rp-u}^2\text{s}(u\text{'s})$. From *συμφόρειν*, to bear together, and *καρπός*, fruit. Fr., *symporphine*, *symporhica*. Ger., *Petersstrauch*. A genus of caprifoliaceous shrubs, of the *Lonicerae*; snow-berry. [L, 35.]—**S. vulgaris**. Fr., *arbutus* de l'Amérique. Ger., *gemeiner Felsenstrauch*. Coral-berry, Indian currant; a shrub found in the central and southern parts of the United States. The root and branches are used as a febrifuge. [a, 35.]

SYMPHYCARPUS (Lat.), adj. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-ka}^2\text{rp-e}^2\text{u}^2\text{s}(u\text{'s})$. From *συνφύς*, growing together, and *καρπός*, fruit. Ger., *symphykarpisch*. See SYNCARPUS.

SYMPHYSE (Fr., Ger.), n's. $\text{Se}^2\text{a}^2\text{-fi}^2\text{-ez}$, $\text{zu}^2\text{m-fu}^2\text{z-e}^2$. See SYMPHYSES.—**S. cardiaque** (Fr.). See *Cardiac SYMPHYSIS*.—**S. uteropariétale** (Fr.). Of second, see HYSTEROPEXIA.

SYMPHYSEOTOMY, n. $\text{Si}^2\text{m-fi}^2\text{-e}^2\text{-o}^2\text{-t}^2\text{o}^2\text{m-i}^2$. See SYMPHYSISOTOMY.

SYMPHYSION (Lat.), n. n. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-s-i}^2\text{o}^2\text{n}^2$. From *σύνφύσις*, a growing together. Of Török, the superior portion of the symphysis menti. [a, 34.]

SYMPHYSIOTOMY, n. $\text{Si}^2\text{m-fi}^2\text{-s-i}^2\text{-o}^2\text{-t}^2\text{o}^2\text{m-i}^2$. Lat., *symphyseotomia*, *symphysiotomia* (from *σύνφύσις* [see SYMPHYSIS], and *τομή*, a cutting). Fr., *symphyseotomie*. Ger., *Symphysiotomie*, *Symphysiotomie*. The operation of cutting through a symphysis (2d def.) so as to separate the bones that serves to join.—**Pubic s.** Ger., *Schanfugenschnitt*. The Sigaultian operation, proposed by Sigault in 1768 and soon almost abandoned, but recently revived; division of the pubic symphysis during labor, for the purpose of allowing the ossa innominata to spread apart so as to increase the conjugate diameter of the pelvis in dystocia due to contraction (to not less than 2½ inches). Morisani makes an incision from about 2 inches above the symphysis down to the articulation, and then cuts through the interosseous cartilage from below upward with a bistoury. [a, 15.]

SYMPHYSIS (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-s-i}^2\text{s}$. Gen., *-phys-eos*, *symp'h'ysis*. Gr., *σύνφύσις* (from *συνφύειν*, to grow together). Fr., *symphyse*. Ger., *Symphyse*, *Verwachsung*. 1. In general, any sort of articulation of bones. 2. More especially, that one of the three orders of articulation (arthrosis) which includes all joints, whether movable or immovable, in which the bones are held together by some structure interposed between them. As commonly employed, the word refers more particularly to the pelvic joints, especially to that formed by the two pubic bones. 3. The growing together of parts normally distinct. 4. In botany, see COALESCENCE.—**Cardiac s.** Fr., *symphyse cardiaque*. See CONCRETIO *pericardii*.—**Pubic s.** Lat., *s. (ossium) pubis*. Fr., *symphyse pubienne* (ou du pubis). Ger., *Schambeinverbindung*, *Schanfuge*, *Schambein-symphyse*. The union of the pubic bones in the middle line. [L.]—**Renal s.** More or less complete fusion of the two kidneys. [a, 34.]—**Sacro-coccygeal s.** See *Sacro-coccygeal ARTICULATION*.—**Sacro-iliac s.** See *Sacro-iliac ARTICULATION*.—**S. cartilaginea**. See SYNCONDROSIS.—**S. ligamentosa**. See SYNCONDROSIS.—**S. menti**, *S. of the inferior maxilla*, *S. of the jaw*. Ger., *Unterkiefernaht*, *Kinnnaht*. An anterior median vertical ridge upon the outer surface of the lower jaw indicating the line of union of its two halves. [L.]—**S. (ossium) muscularis**. See SYSSARCOISIS.—**S. (ossium) pubis**. See *Pubic s.*

SYMPHYSDACTYLIA (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-s-i}^2\text{o}^2\text{-da}^2\text{kt}(da)^2\text{kt-i}^2\text{p}(u\text{'l})^2\text{-a}^2$. From *σύνφύειν*, to grow together, and *δάκτυλος*, a finger. Fr., *symphyseodactylie*. See SYNDACTYLISM.

SYMPHYOPSIA (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-s-i}^2\text{o}^2\text{-ps-i}^2\text{-a}^2$. From *σύνφύσις*, a growing together, and *ὄψις*, the eye. Fr., *sympophysie*. See OCULOPIA.

SYMPHYOSKELIA (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-s-i}^2\text{o}^2\text{-skel}(skel)^2\text{-a}^2$. From *σύνφύσις*, a growing together, and *σκέλος*, the leg. The condition of a symphysis. [a, 34.]

SYMPHYOTOMY, n. $\text{Si}^2\text{m-fi}^2\text{-s-i}^2\text{-o}^2\text{-t}^2\text{o}^2\text{m-i}^2$. See SYMPHYSISOTOMY.

SYMPHYSTEMONOUS, adj. $\text{Si}^2\text{m-fi}^2\text{-ste}^2\text{m-o}^2\text{n-u}^2\text{s}$. From *σύνφύειν*, to grow together, and *στήμων*, a filament. Having united stamens. [a, 35.]

SYMPHYTOS (Lat.), adj. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-t-o}^2\text{s}$. Gr., *σύνφύτος* (from *σύνφύειν*, to grow together). 1. Congenital, innate, natural. 2. Grown together. [A, 311 (a, 21).]

SYMPHYTUM (Lat.), n. n. $\text{Si}^2\text{m}(su^2\text{m})\text{-fi}^2\text{(fu)}^2\text{-t-u}^2\text{m}(u\text{'m})$. Gr., *σύνφύτος*. Fr., *consoude*, *Beinwurz*. A genus of the *Boraginaceae*; of the ph's *S. officinale*. The *Symphytæ* are a tribe of the *Boraginæ*. [a, 35.]—**Conserva symphyti**. A preparation made by boiling the root of *S. officinale* in water, pounding in a mortar, sitting through a silk sieve, and boiling with twice the amount of sugar. [B, 119 (a, 38).]—**Decoctum symphyti** (Belg. Ph.). A decoction made by macerating 1 part of the root of *S. officinale* for an hour with water enough to make 20 parts after boiling for a quarter of an hour and straining. [B, 95

(a, 38).]—**Radix symphyti** (Belg. Ph.). Fr., *consoude* (grande, racine) [Fr. Cod.]. Sp., *sinjito mayor*, *consuelva mayor* [Sp. Ph.]. The root of *S. officinale*. [B, 95 (a, 38).]—**S. maculosum**. See *PULMONARIA officinalis*.—**S. majus**. See *S. officinale*.—**S. medium**. See *AJUGA genevensis*.—**S. minimum**. See *BELLIS perennis*.—**S. minus**. See *PRUNELLA vulgaris*.—**S. officinale**. Fr., *consoude officinale*, *grande consoude* [Fr. Cod.] (ou *consygre*), *herbe à la consue*, *langue de vache*, *pecton*. Ger., *gebräuchlicher* (oder *gemeiner*) *Beinwurz*, *Wulfwurz*, *Wulfwurk*, *Schwarzwurzkraut*, *Heilwurzel*, *Beinwurzel*. The *σύνφύτον ἔτερον* of Dioscorides, alum, blackwort, black root, boneset, kniback, common comfrey; a mucilaginous plant of Europe and northern Asia, naturalized in North America. The root, leaves, and flowers, *radix*, *herba*, et *flores consolida* (seu *symphyti majoris*), are official, but the root is the part chiefly used. It was formerly reputed a vulnerary, but is now used as a demulcent and pectoral. [a, 35.]—**S. tuberosum**. Tuberos-root comfrey; a European species used like *S. officinale*. [a, 35.]—**Syrupus symphyti**. Fr., *sirap de grande consoude*. A preparation made by macerating 8 parts of the root of *S. officinale* with 45 of cold water for twelve hours, straining, adding 250 parts of syrup, and boiling to a syrup. [B, 119 (a, 38).]

SYMPIESIS (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-pi}^2\text{(pi)}^2\text{-e}^2\text{s-i}^2\text{s}$. Gen., *-es-eos* (-esis). Gr., *συμπιέσις*. Fr., *sympièse*. Ger., *Zusammendrücken*. Compression, pressure. [L, 50 (a, 14).]

SYMPIESOMETER, SYMPIEZOMETER, n's. $\text{Si}^2\text{m-pi}^2\text{-e}^2\text{-s-i}^2\text{o}^2\text{m-e}^2\text{t-u}^2\text{r}$, $\text{-e}^2\text{-z-i}^2\text{o}^2\text{m-e}^2\text{t-u}^2\text{r}$. Lat., *sympiesometrum* (from *συμπιέειν*, to compress, and *μέτρον*, a measure). Fr., *sympiezomètre*. Ger., *Luftdruckmesser*. A barometer in which the changes of volume in a quantity of confined air indicate the fluctuations of the atmospheric pressure. [L, 49, 87 (a, 50).]

SYMPLAST, n. $\text{Si}^2\text{m-pla}^2\text{st}$. From *σύν*, with, and *πλάσσειν*, to mold. Fr., *symplaste*. See PLASMODIUM.

SYMPLOCARPUS (Lat.), n. m. $\text{Si}^2\text{m}(su^2\text{m})\text{-plo}^2\text{(plo)}^2\text{-ka}^2\text{rp-u}^2\text{s}(u\text{'s})$. From *σύν*, *καρπός*, entwined, and *καρπός*, fruit. Fr., *symplocarpe*. Ger., *Pachkolben*. A genus of the *Aroideæ*. [a, 35.]—**S. foetidus**. Ger., *stinkender Pachkolben*. *Sium*, *maimow*, or polecat cabbage (or weed) of North America, the *diacanthum* of the U. S. Ph., 1870. Its disgusting odor, due to an extremely volatile oil, is dissipated by heat. The rhizome, including the radicles, *radix symplocarpi* (seu *diacanthi*), is stimulant, antispasmodic, and narcotic, and is used in chronic catarrh, rheumatism, chorea, hysteria, and dropsy. The acrid seeds are used in dropsy and rheumatism. The leaves are applied to ulcers. [a, 35.]

SYMPLOCIA (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-plo}^2\text{(plo)}^2\text{-si}^2\text{(ki)}^2\text{-a}^2$. From *σύν*, with, and *πλοκή*, a twining. Fr., *symplocie*. Ger., *Verflechtung*. A morbid intertwining of parts. [L, 50 (a, 14).]

SYMPOCLOCUM (Lat.), n. n. $\text{Si}^2\text{m}(su^2\text{m})\text{-plo}^2\text{(plo)}^2\text{-si}^2\text{(ki)}^2\text{-u}^2\text{m}(u\text{'m})$. Fr., *symplocion*. The sporangium of a fern. [a, 35.]

SYMPOCLOS (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-plo}^2\text{(plo)}^2\text{-k-o}^2\text{s}$. From *σύν*, *πλοκος*, interwoven. Fr., *symplocie*. A genus of trees and shrubs giving name to a tribe (the *Symplocæe*, or *Symplocineæ*) of the *Symplocææ*, at first considered as a distinct order. [a, 35.]—**S. alstonia**. Fr., *thé de Santa Fé* (ou de Bogotâ). A shrub of New Granada with leaves resembling tea leaves, for which they are substituted in South America. They are considered diaphoretic and stomachic. [a, 35.]—**S. racemosa**. An East Indian tree. The bark (lodh or lotur bark) is used as a mild astringent and in menorrhagia. [a, 35.]—**S. tinctoria**. Ger., *Süssblatt*. Horse-sugar, sweet-leaf of the southern United States; a tree with a bitter aromatic root used as a digestive and alterative. [a, 35.]

SYMPODIA (Lat.), n. f. $\text{Si}^2\text{m}(su^2\text{m})\text{-pod}(po)^2\text{-di}^2\text{-a}^2$. From *σύν*, with, and *ποδία*, the foot. Ger., *Sympodie*, *Sirenenbildung*. The condition of a symposium.

SYMPODIUM (Lat.), n. n. $\text{Si}^2\text{m}(su^2\text{m})\text{-pod}(po)^2\text{-di}^2\text{-u}^2\text{m}(u\text{'m})$. Fr., *s.* A stem, resembling a simple axis, composed of a series of axes arising successively as branches one from the other. [a, 35.] Cf. MONOPodium.

SYMPTOM, n. $\text{Si}^2\text{m-pt}^2\text{m}$. Gr., *σύνπτωμα* (from *συνπίπτειν*, to fall together). Fr., *symptôme*. Ger., *S.* Any perceptible change in the body or its functions which may be taken as an indication of the nature, situation, severity, etc., of a morbid process. See also SIGN.—**Argyll Robertson s.** See *Robertson s.*—**Branch's s.** See *Romberg's sign*.—**Chevestek s.** In tetany, an increase of the mechanical excitability of the nerves elicited by stroking or pinching a muscle. [a, 84.]—**Direct s.** A s. that depends directly upon the disease. [D, 3.]—**Graefe's s.** See *Von Graefe's s.*—**Guyon's s.** Renal ballotement.—**Indirect s.** A s. which is the indirect consequence of the disease.—**Labyrinthine s's.** A group or complex of s's supposed to be due to some disease of the internal ear and characterized by irritative phenomena, such as subjective sensations of hearing, hyperæsthesia acustica, giddiness, staggering, or vomiting, and by paralytic phenomena, such as diminution of the sense of hearing or total deafness. [F, 32.]—**Negative pathognomonic s.** A s. which seldom or never occurs in a certain disease, and consequently, if present, shows that the case is not one of that disease.—**Parrot's s.** Dilatation of the pupil on pinching the skin; observed in meningitis.—**Passive s.** See *Statical s.*—**Pathognomonic s.** A s. which undeniably indicates the existence of a certain disease. [D, 3.]—**Physical s's.** See *Physical signs*.—**Robertson s.** Immobility of the pupil under the stimulus of light, associated with normal reaction to accommodative movements.—**Romberg's s.** See *Romberg's sign*.—**Rosenbach's s.** Abolition of the abdominal reflex.—**Statistical s.** A s. which indicates only a condition localized in an organ. [D, 3.]—**Sympathetic s's.** S's which appear with the essential ones, but for the presence of which no cause can be assigned except that of sympathy.—**Von Graefe's s.** Dissociation of the movements of the globe of the eye and those of the upper lid.—**Westphal's s.** See *Westphal's sign*.—**Wittrich's percussion s.** Ger., *Schallwechsel*. The

change produced in the percussion note over a pulmonary cavity by the opening and shutting of the patient's mouth (the sound being rendered higher and louder when the mouth is open). A free communication between the cavity and the mouth is necessary to the production of this phenomenon. [*"Wien. med. Wochenschr."*, July 6, 1889 (a, 18).]

SYMPTOMATIATRIA (Lat.), n. f. $\text{Si}^2\text{mp}(\text{su}^2\text{mp})\text{-to}^2\text{m}(\text{tom})\text{-a}^2\text{t}(\text{a}^2\text{t})\text{-i}^2\text{a}^2(\text{a}^2\text{t})\text{-ri}(\text{re})/\text{a}^2$. From $\sigma\upsilon\mu\pi\tau\omega\mu\alpha$, a symptom, and $\iota\alpha\tau\rho\epsilon\iota\alpha$, medical treatment. Symptomatic treatment; of Leonhardi, homoeopathy. [L, 50 (a, 14).]

SYMPTOMATIC, SYMPTOMATICAL, adj's. $\text{Si}^2\text{mp}\text{-to}^2\text{m}\text{-a}^2\text{t}(\text{a}^2\text{t})\text{-i}^2\text{a}^2$. Ger., *symptomatisch*. Fr., *symptomatique*. Ger., *symptomatisch*. According to or pertaining to symptoms; of the nature of a symptom. [D, 20.]

SYMPTOMATOGRAPHY, SYMPTOMATOLOGY, n's. $\text{Si}^2\text{mp}\text{-to}^2\text{m}\text{-a}^2\text{t}(\text{a}^2\text{t})\text{-o}^2\text{g}(\text{ra}^2\text{f})\text{-i}^2$, $\text{-o}^2\text{lo}(\text{g})/\text{i}^2$. From $\sigma\upsilon\mu\pi\tau\omega\mu\alpha$, a symptom, and $\gamma\rho\alpha\phi\acute{\iota}\nu$, to write, or $\lambda\omicron\gamma\omicron\varsigma$, understanding. Fr., *symptomatographie*, *symptomatologie*. Ger., *Symptomatologie*, *Krankheitsfällebeschreibung*, *Krankheitszeichenlehre*. The science or study of symptoms.

SYMPTÔME (Fr.), n. $\text{Sa}^2\text{n}^2\text{p}\text{-tom}$. See **SYMPTOM**.—**S's procedures**. Of Lacassagne, such cerebral symptoms as develop in a person, usually an employee injured at his work or the victim of some accident, who is seeking indemnity for the real or supposed injury. These apparently morbid phenomena are most noticeable while the legal process (Fr. *procedure*) is pending, and usually disappear promptly when the indemnity claim is awarded. [*"Sem. méd."*, Aug. 21, 1889, p. 305 (a, 18).]

SYMPTOSIS (Lat.), n. f. $\text{Si}^2\text{pm}(\text{su}^2\text{pm})\text{-ptos}(\text{ts})$. Gen., $\text{-tos}(\text{eos})\text{-is}$. Gr., $\sigma\upsilon\mu\pi\tau\omega\sigma\iota\varsigma$ (from $\sigma\upsilon\mu\pi\tau\epsilon\iota\nu$, to fall together). Fr., *symplose*. See **COLLAPSE**. 2. Rapid emaciation. [L, 41, 50 (a, 14).]

SYMPUS (Lat.), n. m. $\text{Si}^2\text{pm}(\text{su}^2\text{pm})\text{-pus}$ (pus). From $\sigma\upsilon\nu$, with, and $\pi\upsilon\varsigma$, the foot. A monster in which the lower extremities are more or less completely united. [a, 34].—**S. apus**. A s. in which there is no trace of the feet. [a, 34].—**S. dipus**. A s. in which there are two distinct feet. [a, 34].—**S. monopus**. A s. in which there is but one distinct foot. [a, 34].

SYNACMY, n. $\text{Si}^2\text{n}^2\text{a}^2\text{k}^2/\text{mi}^2$. From $\sigma\upsilon\nu$, with, and $\acute{\alpha}\kappa\mu\eta$, maturity. See **SYNATHEBIS**.

SYNACTIC, adj. $\text{Si}^2\text{n}^2\text{a}^2\text{k}^2/\text{i}^2\text{k}$. Ger., *synaktisch* (from $\sigma\upsilon\nu\acute{\alpha}\gamma\epsilon\iota\nu$, to bring together). Lat., *synacticus*. Fr., *synactique*. Ger., *sammelnd*, *ansammelnd*. Accumulative; condensing. [L, 50 (a, 48).]

SYNADELPHUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-ad}(\text{a}^2\text{d})\text{-el}(\text{e}^2\text{f})/\text{u}^2\text{s}$ (u's). From $\sigma\upsilon\nu$, with, and $\delta\epsilon\lambda\phi\acute{\iota}\varsigma$, a brother. Fr., *synadelphie*. Of Geoffroy St. Hilaire, a monster having one head and one trunk, but eight distinct limbs, instead of the normal four. [L, 41, 49 (a, 14).]

SYNEREMA (Lat.), n. n. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-er}(\text{a}^2\text{e}^2\text{r})\text{-em}(\text{am})/\text{a}^2$. Gen., $\text{-em}(\text{atos})\text{-atis}$. From $\sigma\upsilon\nu\alpha\rho\epsilon\iota\nu$, to bring together. See **CORUGATION**.

SYNAGOGE (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{g}(\text{a}^2\text{g})\text{-o}(\text{je})/\text{ga}$. Gen., $\text{-o}(\text{ges})$. Ger., *synagogē* (from $\sigma\upsilon\nu\acute{\alpha}\gamma\epsilon\iota\nu$, to bring together). See **CONTRACTION**.

SYNALGIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-al}(\text{ja})/\text{i}^2\text{a}^2$. From $\sigma\upsilon\nu\alpha\lambda\gamma\epsilon\iota\nu$, to share in suffering. Fr., *syngalie*. Of Fromental, sympathetic pain.

SYNANASTOMOSIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{n}(\text{a}^2\text{n})\text{-a}^2\text{st}(\text{a}^2\text{st})\text{-o}^2\text{m}\text{-os}(\text{os})/\text{ps}$. Gen., $\text{-os}(\text{eos})\text{-is}$. For deriv., see **Syn-** and **ANASTOMOSIS**. Fr., *synanastomose*. Ger., *Synanastomose*. Of Galen, the anastomosis of several vessels. [L, 50 (a, 14).]

SYNANCHE (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{n}^2\text{k}(\text{a}^2\text{n}^2\text{ch})/\text{e}(\text{a})$. Gen., $\text{-an}(\text{ches})$. Ger., *synanche* (from $\sigma\upsilon\nu$, with, and $\acute{\alpha}\gamma\chi\epsilon\upsilon$, to strangle). Fr., *synanche*. See **CYNANCHE**.

SYNGEUM (Lat.), n. n. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{g}(\text{a}^2\text{g})\text{-i}(\text{ge})/\text{i}^2\text{a}^2$. $\text{u}^2\text{m}(\text{u}^2\text{m})$. From $\sigma\upsilon\nu$, with, and $\acute{\alpha}\gamma\gamma\epsilon\upsilon$, a vessel. A compound sporangium; a sorus formed of sporangia growing together.

SYNTHEÆ (Lat.), n. f. pl. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{nth}(\text{a}^2\text{nth})/\text{e}^2\text{-a}^2$ ($\text{a}^2\text{-e}^2$). From $\sigma\upsilon\nu$, with, and $\acute{\alpha}\nu\theta\omicron\varsigma$, a flower. Fr., *synthées*. Of Viviani, plants the flowers and leaves of which are developed simultaneously. [a, 35.]

SYNANTHEMA (Lat.), n. n. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{nth}(\text{a}^2\text{nth})\text{-em}(\text{am})/\text{a}^2$. Gen., $\text{-em}(\text{atos})\text{-atis}$. From $\sigma\upsilon\nu\alpha\nu\theta\epsilon\iota\nu$, to blossom together. Ger., *Synanthem*. A cluster of efflorescences on the skin. [G.]

SYNANTHERÆ (Lat.), **SYNANTHEREÆ** (Lat.), n's f. pl. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{nth}(\text{a}^2\text{nth})\text{-er}(\text{ar})/\text{e}^2\text{a}^2$, $\text{-er}(\text{ar})/\text{e}^2\text{a}^2\text{-e}^2$ ($\text{a}^2\text{-e}^2$). Fr., *synanthérées*. The Compositæ. [a, 35.]

SYNANTHEROUS, adj. $\text{Si}^2\text{n}^2\text{-a}^2\text{nth}\text{-er}(\text{ar})/\text{u}^2\text{s}$. From *syn-*, with, and *anthera*, an anther. Lat., *synantheræ*, *synanthericus*. Fr., *synantheré*, *synantherique*, *synantheréal*. Having the stamens coalescent by their anthers. The *Synantheria* are a class so characterized. [a, 35.]

SYNANTHESIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{nth}(\text{a}^2\text{nth})\text{-e}(\text{a})/\text{si}^2\text{s}$. Gen., $\text{-es}(\text{eos})\text{-is}$. From $\sigma\upsilon\nu\alpha\nu\theta\epsilon\iota\nu$, to blossom together. The simultaneous ripening of the stamens and pistils of a flower. [a, 35.]

SYNANTHIE (Fr.), n. $\text{Sen}\text{-a}^2\text{n}^2\text{-te}$. The abnormal union of two or more flowers. [a, 35.]

SYNANTHOCARPOUS, adj. $\text{Si}^2\text{n}^2\text{-a}^2\text{nth}\text{-o}\text{-ka}^2\text{rp}(\text{u}^2\text{s})$. Lat., *synanthocarpus* (from $\sigma\upsilon\nu$, with, $\acute{\alpha}\nu\theta\omicron\varsigma$, a flower, and $\kappa\alpha\rho\pi\acute{\omicron\varsigma}$, a fruit). Fr., *synanthocarpe*. Of a fruit, resulting from the aggregation of a number of flowers into one mass, as in the cone. [a, 35.]

SYNANTHROSE, n. $\text{Si}^2\text{n}^2\text{-a}^2\text{nth}\text{-ros}$. Ger., *S. a carbohydrate*, $\text{C}_{12}\text{H}_{20}\text{O}_{11}$, found in *Helianthus tuberosus* and other *Compositæ*. [B, 4.]

SYNAPHMENTIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{f}(\text{a}^2\text{f})/\text{i}^2\text{a}^2$. Gen., $\text{-i}^2\text{a}^2$ (idis). From $\sigma\upsilon\nu\alpha\phi\acute{\iota}$, connection, and $\mu\epsilon\mu\eta\eta$, a membrane. An old term for conjunctivitis.

SYNAPTASE, n. $\text{Si}^2\text{n}^2\text{-a}^2\text{p}(\text{as})$. From $\sigma\upsilon\nu\acute{\alpha}\pi\tau\epsilon\iota\nu$, to bind together. See **EMULSIN**.

SYNARTHRODIA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-a}^2\text{rth}\text{-rod}(\text{i}^2\text{a}^2)$. See **SYNARTHROSIS**.

SYNARTHRODIAL, adj. $\text{Si}^2\text{n}^2\text{-a}^2\text{rth}\text{-rod}(\text{i}^2\text{a}^2)$. Fr., *synarthrodial*. Ger., *synarthrodisch*. Having the character of synarthrosis.

SYNATHRESIS (Lat.), **SYNATHRESMUS** (Lat.), n's f. and m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{th}(\text{a}^2\text{th})\text{-res}(\text{ro}^2\text{e}^2\text{s})/\text{i}^2\text{s}$, $\text{-mu}^2\text{s}(\text{mu}^2\text{s})/\text{s}$. Gr., $\sigma\upsilon\nu\acute{\alpha}\theta\rho\omicron\varsigma\iota\varsigma$, $\sigma\upsilon\nu\acute{\alpha}\theta\rho\omicron\varsigma\iota\varsigma$ (from $\sigma\upsilon\nu\acute{\alpha}\theta\rho\omicron\varsigma\iota\varsigma$, to gather together). Fr., *synathrōse*. See **CONGESTION**.

SYNARTHROSIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-a}^2\text{rth}\text{-ros}(\text{i}^2\text{s})$. Gen., $\text{-thros}(\text{eos})\text{-is}$. Gr., $\sigma\upsilon\nu\acute{\alpha}\theta\rho\omicron\varsigma\iota\varsigma$ (from $\sigma\upsilon\nu$, with, and $\acute{\alpha}\theta\rho\omicron\varsigma$, a joint). Fr., *synarthrose*. Ger., *Synarthrose*, *Gelenkverbindlichkeit*. That one of the three orders of articulation (arthrosis) which includes the immovable joints. Its varieties are suture, harmony, and gomphosis. [L, 115.]—**Diarthrodial**. See **AMPHIARTHROSIS**.

SYNCAMPE (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-ka}^2\text{mp}(\text{ka}^2\text{mp})/\text{e}(\text{a})$. Gen., $\text{-camp}(\text{es})$. Gr., $\sigma\upsilon\nu\kappa\alpha\mu\pi\eta$ (from $\sigma\upsilon\nu\kappa\alpha\mu\pi\epsilon\iota\nu$, to bend). Fr., *S. a*. A very flexible joint; of Hippocrates, the elbow joint. [L, 50 (a, 14).]

SYNCANTHUS (Lat.), n. m. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-ka}^2\text{nth}(\text{ka}^2\text{nth})/\text{u}^2\text{s}$ (u^2s). From $\sigma\upsilon\nu$, with, and $\kappa\alpha\theta\acute{\omicron\varsigma}$, a canthus. An old term for an abnormal adhesion between the ocular conjunctiva and the orbital margin. [F.]

SYNCARP, n. $\text{Si}^2\text{n}^2\text{-ka}^2\text{rp}$. Lat., *syncarpium* (from $\sigma\upsilon\nu$, with, and $\kappa\alpha\rho\pi\acute{\omicron\varsigma}$, a fruit). Fr., *syncarpe*. Ger., *Kindelbeere* (1st def.), *Fruchthausen* (1st def.). 1. See **Collective fruit**. 2. See **Aggregated fruits** (2d def.).

SYNCARPOUS, adj. $\text{Si}^2\text{n}^2\text{-ka}^2\text{rp}(\text{u}^2\text{s})$. Fr., *syncarpe*. Of a pistil or fruit, made up of two or more united carpels. The *Syncarpæ* of Lindley are a cohort of the *Polypetalæ* consisting of the *Malvales*, *Meliaceæ*, *Rhamnaceæ*, *Euphorbiaceæ*, and *Silenaceæ*. [a, 35.]

SYNCARPY, n. $\text{Si}^2\text{n}^2\text{-ka}^2\text{rp}(\text{u}^2\text{s})$. The accidental adhesion of several fruits. [a, 35.]

SYNCAUSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-ka}^2\text{s}(\text{ka}^2\text{s})/\text{u}^2\text{s}$. Gen., $\text{-caus}(\text{eos})\text{-is}$. Gr., $\sigma\upsilon\nu\kappa\alpha\upsilon\sigma\iota\varsigma$ (from $\sigma\upsilon\nu\kappa\alpha\iota\epsilon\iota\nu$, to burn up). Fr., *S. Combustion*. [A, 322, 325 (a, 48).]

SYNCEPHALUS (Lat.), n. m. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-se}^2\text{f}(\text{ke}^2\text{f})/\text{a}^2\text{i}^2$ (a^2i^2). $\text{u}^2\text{s}(\text{u}^2\text{s})$. From $\sigma\upsilon\nu$, with, and $\kappa\epsilon\phi\alpha\lambda\acute{\iota}$, the head. Fr., *syncéphalien*. Of Veit, that variety of the cephalothoracopagus in which the heads are united. [a, 34.]

SYNCHEILIA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-kil}(\text{ch}^2\text{e}^2\text{f})/\text{i}^2\text{a}^2$. From $\sigma\upsilon\nu$, with, and $\chi\epsilon\iota\lambda\omicron\varsigma$, a lip. Labial atresia. [a, 34.]

SYNCHITON (Lat.), n. m. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-kit}(\text{ch}^2\text{et})/\text{o}^2\text{n}(\text{on})$. Gen., $\text{-on}(\text{os})\text{-is}$. From $\sigma\upsilon\nu$, with, and $\chi\iota\tau\omega\acute{\nu}$, a tunic. Fr., *S. See CONJUNCTIVA*.

SYNCHITONITIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-kit}(\text{ch}^2\text{et})\text{-o}^2\text{n}(\text{ie})/\text{ti}^2\text{s}$. Gen., $\text{-it}(\text{idis})\text{-itis}$. See **CONJUNCTIVITIS**.

SYNCHONDROSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-ko}^2\text{nd}(\text{ch}^2\text{e}^2\text{nd})\text{-ros}(\text{i}^2\text{s})$. Gen., $\text{-os}(\text{eos})\text{-is}$. Gr., $\sigma\upsilon\nu\chi\omicron\text{nd}\rho\omicron\varsigma\iota\varsigma$ (from $\sigma\upsilon\nu$, with, and $\chi\omicron\text{nd}\rho\omicron\varsigma$, cartilage). Fr., *synchondrose*. Ger., *Synchondrose*, *Knorpelband*, *Knorpelverbindung*, *Knorpelbeinfügung*. That variety of symphysis in which the bones are articulated by means of cartilage interposed between them.—**Pubic s.** See **Pubic symphysis**.—**Sacro-iliac s.** See **Sacro-iliac articulation**. As Luschka has shown it to be a movable joint, the use of the term should be given up. *S. arytoid*, *artrioide*, *S. arytoid*, *artrioide*. The s. between the arytoid cartilages and the cartilages of Santorini. [L, 332.]—**S. intersphenoidal**. The fetal s. between the basisphenoid and presphenoid bones. [L.]—**S. pubis**. See **Pubic symphysis**.—**S. sacrococcygea**. The s. between the sacrum and the coccyx. [L.]—**S. sphenobasilaris**. See **S. sphenooccipitalis**.—**S. sphenoidalis**. See **S. intersphenoidal**.—**S. sphenooccipitalis**. The s. between the basilar process of the occipital bone and the body of the sphenoid bone. [L.]

SYNCHONDROTOMY, n. $\text{Si}^2\text{n}^2\text{-ko}^2\text{nd}\text{-ro}^2\text{t}(\text{om})\text{-i}^2$. From $\sigma\upsilon\nu$, with, $\chi\omicron\text{nd}\rho\omicron\varsigma$, cartilage, and $\tau\omicron\mu\eta$, a cutting. Fr., *synchondrotomie*. Ger., *Knorpelschnitt*. 1. See **SYMECTOMY**. 2. Section of a synchondrosis. [L, 41, 50 (a, 14).]

SYNCHRONISM, n. $\text{Si}^2\text{n}^2\text{-kro}^2\text{n}^2\text{-i}^2\text{zm}$. Gr., $\sigma\upsilon\nu\chi\rho\omicron\text{no}^2\text{sm}(\text{os})$ (from $\sigma\upsilon\nu$, with, and $\chi\rho\omicron\text{nos}$, time). Simultaneity.

SYNCHRONOUS, adj. $\text{Si}^2\text{n}^2\text{-kro}^2\text{n}^2\text{-u}^2\text{s}$. Gr., $\sigma\upsilon\nu\chi\rho\omicron\text{nos}$. Simultaneous.

SYNCHYSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-ki}^2\text{s}(\text{ch}^2\text{u}^2\text{s})/\text{i}^2\text{s}$. Gen., $\text{-chys}(\text{eos})\text{-is}$. Gr., $\sigma\upsilon\nu\chi\upsilon\sigma\iota\varsigma$ (from $\sigma\upsilon\nu\chi\epsilon\iota\nu$, to pour together). Fr., *s. Ger.*, *S. Commixture*, *confusion*. [A, 311 (a, 48).]—**S. corporis vitrei**. Ger., *Glaskörperauflösung*. Fluidity or liquefaction of the vitreous humor, a pathological condition found in many diseases of the interior coats of the eyeball. [F. s. *scintillans*.]—**S. vitrei**. Ger., *Flüssigkeit*. A fluid condition of the vitreous humor in which it is filled with crystals of cholesterol that sparkle brilliantly under the ophthalmoscope. [F.]—**S. simplex**. A softened or fluid state of the vitreous humor with small floating opacities; very often a senile change. [F.]

SYNCHYTECPHLOGIA (Lat.), **SYNCHYTECPHLOGIOSIS** (Lat.), n's f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-kit}(\text{ch}^2\text{u}^2\text{s})\text{-e}^2\text{k}(\text{flog})/\text{i}^2\text{a}^2$, $\text{-flog}(\text{flog})/\text{i}^2\text{a}^2$. From $\sigma\upsilon\nu\chi\upsilon\tau\epsilon$, to coningle, and $\acute{\epsilon}\kappa\phi\lambda\epsilon\gamma\epsilon\iota\nu$, to set on fire. Fr., *synchytécphlogie*. Confuent small-pox. [L, 50 (a, 14).]

SYNCHYTRIUM (Lat.), n. n. $\text{Si}^2\text{n}^2(\text{su}^2\text{n})\text{-ki}^2\text{t}(\text{ch}^2\text{u}^2\text{s})/\text{ri}^2\text{a}^2$ (u^2m). From $\sigma\upsilon\nu$, with, and $\chi\upsilon\text{pt}\rho\iota\omega\kappa$, a little pot. A genus of the *Chytridæ*. [a, 35.]—**S. aureum**. A species forming little orange-red spots on the leaves and stalks of plants. [A, 386 (a, 21).]—**S. miescherinum**. Ger., *Miescher'sche (Rainey'sche) Schläuche*. Ovoid bodies found in the muscles of many vertebrates (in swine sometimes mistaken for *Trichinae*) consisting of a capsule including a granular substance with sickle- or kidney-shaped spores, regarded as belonging to the *Sporozoa*. [Braun (L).]

SYNCLEISIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-klis}^2(\text{kle}^2\text{i}^2\text{s})\text{-i}^2\text{s}$. Gen., *-cleis'eos (-is)*. Gr., *συνκλείσις* (from *συνκλείειν*, to shut up). Fr., *syncléisis*. See **OCCULSION**.

SYNCLINAL, adj. $\text{Si}^2\text{n-kl-i}^2\text{n'l}$. From *συνκλίνειν*, to lean together. Fr., *synclitique*. Inclining toward each other.

SYNCLISTUS (Lat.), adj. Ger., *geschlossen/früchtig*. Of fruits, not dehiscing at maturity. [A, 35.]

SYNCLITIC, adj. $\text{Si}^2\text{n-kl-i}^2\text{t}^2\text{ik}$. See **SYNCLINAL**.

SYNCLITISM, n. $\text{Si}^2\text{n-kl-i}^2\text{t}^2\text{i}^2\text{zm}$. See *Synclitic movement of the foetal head*.

SYNCLONESIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-klo}^2\text{n-e}(\text{a})^2\text{si}^2\text{s}$. Gen., *-es'eos (-is)*. From *συνκλίνειν*, to dash together. Fr., *synclonése*. See **General convulsion**.

SYNCLOUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-klo}^2\text{n-u}^2\text{s}(\text{u}^2\text{s})$. From *σύν*, with, and *κλόνος*, a violent confused motion. See **General convulsion**. —S. *ballismus*. Of J. M. Good, see **PARALYSIS agitans**. —S. *beriberia*, S. *indicus*. See **BERIBERI**. —S. *saltans*. See **CHOREA Sancti Viti**. —S. *tremens*. General tremor. [L, 50 (a, 14).]

SYNCOBAL, adj. $\text{Si}^2\text{n-ko}^2\text{-p}^2\text{l}$. Pertaining to, affected with, or of the nature of syncope. [D, 36.]

SYNCOPE (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-ko}^2\text{-p}^2\text{e}(\text{a})$. Gen., *syn'copes*. Gr., *συνκοπή* (from *συνκρίπτειν*, to cut short). Fr., s. Ger., *Synkope*. Fainting; pallor and loss of consciousness from sudden weakness of the heart's action. —Laryngeal s. See *Laryngeal syncope*. —Local s. Syn., *suspended life in local surfaces* (Richardson). Of B. W. Richardson, a sudden and temporary blanching and loss of sensibility in a part, generally one or more of the fingers. [¹Asclepiad, Jan., 1885, p. 1.] Cf. *Local ASPHYXIA*. —S. (cardiac) *anginosa*. See **ANGINA PECTORIS**.

SYNCOPTIC, adj. $\text{Si}^2\text{n-ko}^2\text{-pt}^2\text{ik}$. Gr., *συνκοπτικός*. Lat., *syn-coticus*. Pertaining to or causing syncope.

SYNCOTYLEDONOUS, adj. $\text{Si}^2\text{n-ko}^2\text{-t}^2\text{i}^2\text{-e}^2\text{d}^2\text{o}^2\text{n-u}^2\text{s}$. From *σύν*, with, and *κωτυλίδων*, a cavity. See **CONFERRIMATE**.

SYNCRANUS (Lat.), adj. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-kra}^2\text{n}(\text{kra}^2\text{n})^2\text{i}^2\text{s}(\text{u}^2\text{s})$. From *σύν*, with, and *κρανίον*, the skull. Connected with the skull; as a n., the superior maxilla. [L, 50 (a, 14).]

SYNCRISIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-kri}^2\text{s}^2\text{i}^2\text{s}$. Gen., *-cris'eos*, *syn'crisis*. Gr., *συνκρίσις* (from *συνκρίνειν*, to compound). Fr., *syn-crisie*. In ancient chemistry, the passage of a body from the liquid into the solid state. [B, 38, 78 (a, 14).]

SYNCRITIC, adj. $\text{Si}^2\text{n-kri}^2\text{t}^2\text{i}^2\text{ik}$. Lat., *syn-criticus*. Fr., *syn-critique*. Ger., *verbündend*. Condensing, astrigent. [A, 14.]

SYNCYTIUM (Lat.), n. n. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-si}^2\text{k}(\text{ku}^2\text{s})^2\text{shi}^2(\text{ti}^2\text{s})\text{-u}^2\text{m}$ (u'm). From *σύν*, with, and *κύτος*, a hollow. 1. See **PLASMODIUM**. 2. Of Haeckel, the transparent ectoderm of a calcareous sponge at a time when the nucleated cells have become indistinct. [A, 12.]

SYNDACTYLE, adj. $\text{Si}^2\text{n-da}^2\text{-kt}^2\text{i}^2\text{l}$. From *σύν*, with, and *δάκτυλος*, a finger. Fr., s. Affected with syndactylism (q. v.). [L.]

SYNDACTYLISM, n. $\text{Si}^2\text{n-da}^2\text{-kt}^2\text{i}^2\text{l-i}^2\text{zm}$. Lat., *syndactylia* (from *σύν*, with, and *δάκτυλος*, a finger). Fr., *syndactylie*. Ger., *Syndactylie*. A condition in which two or more fingers or toes are coherent for the greater part of their extent. [L, 221.]

SYNDECTOMY, n. $\text{Si}^2\text{n-de}^2\text{-kt}^2\text{om-i}^2\text{t}$. From *σύνδεσμος*, a bond, and *ἐκτέμνειν*, to cut out. Fr., *syndectomie*. Ger., *Syndektomie*. See **PERITOMY**.

SYNDENDRIUM (Lat.), n. n. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{n}(\text{ri}^2\text{i})^2\text{-u}^2\text{m}$ (u'm). From *σύν*, with, and *δένδρον*, a tree. A quadrate disc beneath the umbrella of a *Hydrozoan* suspended by four pillars (dendrostyles) to which are attached the stomatodendra. [L, 147.]

SYNDESIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{i}^2\text{s}$. Gen., *-des'eos*, *synd'esis*. Gr., *σύνδεσις* (from *σύνδεν*, to bind together). Mechanical union by means of a bandage or of ligaments. [L, 50 (a, 14).]

SYNDESMETOPIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-me}^2\text{k-top}^2\text{-i}^2\text{a}$. From *σύνδεσμος*, a bond, and *ἐκτόπιος*, out of a place. Abnormal position of a ligament. [L, 50 (a, 14).]

SYNDESMITIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mi}^2(\text{me})^2\text{ti}^2\text{s}$. Gen., *-mit'idis (-idis)*. From *σύνδεσμος*, a bond. Fr., *syndesmite*. Ger., S. 1. See **DESMITIS**. 2. An old term for conjunctivitis. [F.] —**Blepharo-s**. See the major list.

SYNDESMODIASTASIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mo}^2(\text{mo}^2)\text{-di}^2(\text{di}^2)\text{-a}^2\text{st}^2(\text{a}^2\text{st})^2\text{-i}^2\text{s}$. Gen., *-as'eos (-ast'asis)*. From *σύνδεσμος*, a bond, and *διάστασις*, separation. Abnormal separation or divergence of ligaments. [L, 50 (a, 14).]

SYNDESMOGRAPHY, SYNDESMOLOGY, n's. $\text{Si}^2\text{n-de}^2\text{s}^2\text{-mo}^2\text{g}^2\text{ra}^2\text{f}^2\text{i}^2\text{-i}^2\text{-mo}^2\text{lo}^2\text{-g}^2\text{i}^2\text{-i}^2\text{s}$. Lat., *syndesmographia*, *syndesmologia* (from *σύνδεσμος*, a bond, and *γράφειν*, to write, or *λόγος*, understanding). Fr., *syndesmographie*, *syndesmologie*. See **DESMOLOGY** (1st def.).

SYNDESMOM (Ger.), n. $\text{Zu}^2\text{n-de}^2\text{s}^2\text{-mom}^2$. A neoplasm in which there is a large amount of connective-tissue formation. [A, 319 (a, 34).]

SYNDESMOPATHIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mo}^2(\text{mo}^2)\text{-pa}^2\text{th}^2(\text{pa}^2\text{th})\text{-i}^2\text{e}(\text{a})^2$. From *σύνδεσμος*, a bond, and *πάθος*, disease. See **DESMOPATHY**.

SYNDESMOPHARYNGEUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mo}^2(\text{mo}^2)\text{-fa}^2\text{r}^2\text{i}^2\text{-g}^2\text{i}^2\text{-u}^2\text{s}$ (u's). From *σύνδεσμος*, a bond, and *φάρυγξ*, the pharynx. Fr., *syndesmo-pharyngien*. A fasciculus of the constrictor pharyngis medius arising from the body of the hyoid bone and the thyreo-hyoid ligament. [L.]

SYNDESMOSIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mos}^2\text{i}^2\text{s}$. Gen., *-os'eos (-is)*. Fr., *syndesmose*. Ger., S., *Bandgelenk*, *Bandbeinfügung*. That variety of articulation by symphysis in which the bones are united by ligaments. —S. *basilaris*. The articulation of the pe-

trous portion of the temporal bone with the basilar process of the temporal bone and the body of the sphenoid bone. [L, 332.] —S. *petro-occipitalis*. The occipital portion of the basilaris. [L, 31.]

SYNDESMO-THYREODEUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mo}^2\text{-thi}^2\text{ru}^2\text{-e}^2\text{-o}^2\text{-i}^2\text{-o}^2\text{-i}^2\text{-d}^2\text{e}^2\text{-u}^2\text{s}$ (u's). From *σύνδεσμος*, a bond, and *θυρεός*, thyreoid. An anomalous form of the subthyreoides. [L, 332.]

SYNDESMOTOMY, n. $\text{Si}^2\text{n-de}^2\text{s}^2\text{-mo}^2\text{-t}^2\text{om-i}^2\text{-t}$. From *σύνδεσμος*, a bond, and *τομή*, a cutting. Fr., *syndesmotomie*. Ger., *Gelenk-bandzertrennung*. Section or dissection of a ligament.

SYNDESMUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-de}^2\text{s}^2\text{-mu}^2\text{s}(\text{mu}^2\text{s})$. Gr., *σύνδεσμος*. See **BANDAGE** and **LIGAMENT**.

SYNDROME (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-dro}^2\text{n-m}^2\text{-e}(\text{a})$. Gen., *synd'romes*. Gr., *σύνδρομος*. Fr., s. 1. A concomitant symptom, especially the concurrence of several symptoms not indicating a disease with well-determined anatomical lesions, as in fever, epilepsy, and seasickness. 2. Any well-defined complex of symptoms; the totality of symptoms characterizing a disease. [D; J, a, 18.]

SYNDYASMUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-di}^2\text{du}^2\text{-a}^2\text{-s}^2\text{-mu}^2\text{s}(\text{mu}^2\text{s})$. Gr., *συνδυασμός* (from *σύν*, with, and *ἐνδάσσειν*, to couple). Fr., *syndiasme*. Of Hippocrates, copulation. [L, 50 (a, 14).]

SYNECHES (Lat.), adj. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{k}^2(\text{e}^2\text{ch}^2\text{-e}^2\text{z})$. Gr., *συνεχής* (from *συνέχειν*, to hold together). Continuous; as a n., see **Continued fever**. —S. *Gorriæ*. See **AMPHETERIA**.

SYNECHIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{k}^2(\text{e}^2\text{ch}^2\text{-i}^2\text{e})^2\text{a}^2$. Gr., *συνέχεια* (from *συνέχειν*, to hold together). Fr., *synéchie*. Ger., *Synechie*. Continuity, union, adhesion. [L, 41, 50 (a, 14).] —**Anterior s.** Adhesion of the iris to the posterior surface of the cornea. [F.] —**Posterior s.** Adhesion of the posterior surface of the iris, usually the sphincter margin, to the anterior capsule of the lens. [F.] —S. of the **pericardium**. Union of the parietal and visceral layers of the pericardium by adhesive inflammation. [D, 70.]

SYNECHOTOMY, n. $\text{Si}^2\text{n-e}^2\text{k}^2\text{-o}^2\text{-t}^2\text{om-i}^2\text{-t}$. From *συνέχεις*, continuous, and *τομή*, a cutting. Fr., *synéchetomie*. Ger., *Synechotomie*. The loosening or detachment of adherent parts of the membrane tympani from the inner wall of the tympanum by means of little rounded knives. [F.]

SYNECTEROTOME, n. $\text{Si}^2\text{n-e}^2\text{kt-e}^2\text{-o}^2\text{-t}^2\text{om-i}^2\text{-t}$. From *συνέχεις*, continuous, and *τομή*, a cutting. Fr., *synectérotomie*. Ger., *Synectérotomie*. A variety of Dupuytren's enterotomy invented by Delpech.

SYNEDRAL, SYNEUDROUS, adj's. $\text{Si}^2\text{n-ed}^2\text{-r}^2\text{l-r}^2\text{u}^2\text{s}$. From *σύν*, with, and *ἑδρα*, a seat. Growing on the angle of a seat. [A, 35.]

SYNEDREUONTA (Lat.), n. n. pl. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{d-r}^2\text{-u}^2\text{-o}^2\text{n-t}^2\text{-a}^2$. From *συνεδρεύειν*, to sit together. Accidental and abnormal symptoms. [L, 50 (a, 14).]

SYNEMA (Lat.), n. n. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-em}(\text{am})^2\text{a}^2$. Gen., *-em'atos (-atis)*. From *σύν*, with, and *νῆμα*, a thread. Fr., *synème*. A column of united stamens; of Richard, that part of the column of orchids that represents the filaments of the stamens. [A, 35.]

SYNENCEPHALIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n}(\text{e}^2\text{n})^2\text{-se}^2\text{f}^2(\text{ke}^2\text{f})\text{-al}^2(\text{al})^2\text{i}^2\text{a}^2$. From *σύν*, with, and *ἐνκεφάλαιος*, the brain. Fr., *synencephalie*. Ger., *Synencephalie*. A form of double monstrosity in which there are two fully developed bodies with only a single head.

SYNENCEPHALOCLE (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n}(\text{e}^2\text{n})^2\text{-se}^2\text{f}^2(\text{ke}^2\text{f})\text{-al}^2(\text{al})^2\text{-o}^2\text{-o}^2\text{-se}^2\text{f}^2(\text{ke}^2\text{f})\text{-le}^2\text{a}^2$. In Eng., *syn-e-n-e-se-f'al-o-sel*. Gen., *-cel'es*. From *σύν*, with, and *ἐνκεφάλαιος*, the brain, and *κλίμα*, a tumor. Fr., *synencephalocèle*. Of Spring, a foetal encephalocèle with adhesions to the placenta, the umbilical cord, or the membranes. [A, 301 (a, 34).]

SYNENCEPHALUS (Lat.), n. m. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n}(\text{e}^2\text{n})^2\text{-se}^2\text{f}^2(\text{ke}^2\text{f})\text{-al}^2(\text{al})^2\text{-u}^2\text{s}(\text{u}^2\text{s})$. From *σύν*, with, and *ἐνκεφάλαιος*, the brain. Fr., *synencephalus*. An individual affected with synencephalia.

SYNERGERIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{n-u}^2\text{-tr}^2\text{j}^2(\text{e}^2\text{rg})\text{-i}^2\text{e}(\text{a})^2$. See **SYNERGY**.

SYNERGIDE, n. $\text{Si}^2\text{n-u}^2\text{-tr}^2\text{j}^2\text{-id}$. Lat., *synergida* (from *συνεργός*, working together). Fr., s. *cellule adjuvante*. Ger., *Hilfszelle*. One of the two naked, nucleated bodies at the upper end of the embryo sac forming with the oosphere the egg-apparatus. [A, 35.]

SYNERGIST, adj. $\text{Si}^2\text{n-u}^2\text{-tr}^2\text{j}^2\text{-i}^2\text{st}$. Co-operating; as a n., a muscle that co-operates with another, also a drug that acts like another drug. [L, 115 (a, 48).]

SYNERGY, n. $\text{Si}^2\text{n-u}^2\text{-tr}^2\text{j}^2\text{-i}^2\text{g}$. Gr., *συνέργεια* (from *συνεργεῖν*, to work together). Lat., *synergia*, *synergie*. Fr., *synergie*. Ger., *Synergie*, *Mitwirkung*. Associated activity. [A, 17.]

SYNESTECOS (Lat.), adj. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-e}^2\text{st-ek}^2(\text{ak})^2\text{o}^2\text{s}(\text{os})$. From *συνεστάναι*, to set together. Firm, cohesive (said especially of faeces). [L, 50 (a, 14).]

SYNEUROISIS (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-u}^2\text{-r}^2\text{o}^2\text{-s}^2\text{i}^2\text{s}$. Gen., *-os'eos (-is)*. Fr., *syneurose*. See **SYNEUROISIS**.

SYNGENESIA (Lat.), n. f. $\text{Si}^2\text{n}(\text{su}^2\text{n})\text{-je}^2\text{n}(\text{ge}^2\text{n})\text{-e}^2\text{z}^2(\text{e}^2\text{s})^2\text{i}^2\text{-a}^2$. From *σύν*, with, and *γένεσις*, generation. Gr., *βλῆθενverein* (2d def.). 1. Of Linnaeus, a class of plants characterized by having the stamens united by their anthers. [A, 35.] 2. Of later taxonomists, S. *polygamia*. (S. 1st def.) exclusive of the subdivision *Monogamia*. [A, 48.] —S. *aëqualis*, S. *frustranea*. See under S. *polygamia*. —S. *monogamia*. See **MONOGAMIA**. —S. *necessaria*. See under S. *polygamia*. —S. *polygamia*. Ger., *Blüthenverein*, *Vereinzelkolbig*. S. in which the flowers are in heads, comprising five orders: *aëqualis*, in which the florets are all hermaphrodite; *superflua*, in which the marginal flowers are pistillate only; *frustranea*, in which the marginal flowers neutral, the others perfect; *necessaria*, with the marginal flowers pistillate and fertile, and the central staminate and sterile; and *segregata*, in which each floret has a separate involucre. [A, 35.] —S. *segregata*, S. *superflua*. See under S. *polygamia*.

SYNGENIC, adj. $\text{Si}^2\text{n-je}^2\text{n}^1\text{ik}$. Gr., *συγγενικός* (from *συγγί-ναι*, to be born with). Lat., *syngenicus*. See CONGENITAL.

SYNGONIUM (Lat.), n. n. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-gon}(\text{go}^2\text{n})^1\text{-u}^2\text{m}(\text{u}^2\text{m})$. From *syn*, with, and *γίγναι*, to be born. Fr., *syngonie*. A genus of the *Araceae*. The *Syngonium* of Schott are a subtribe of the *Caladieae*. [a, 35.]—*S. auritum*, S. Plumieri. West Indian five-fingers. The juice is used as an application to the bites of venomous serpents and as a remedy for dropsy. One variety, *S. neglectum*, is found in Mexico. [a, 35.]

SYNYMENSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-him}(\text{hu}^2\text{m})\text{-e}^2\text{ns}^1\text{is}^2$. Gen., *-en-sis* (-is). See SYNYMENSIS.

SYNDEOSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-i}^2\text{d}(\text{ed})\text{-ros}^1\text{is}^2$. Gen., *-ros* (-is). From *syn*, with, and *ὑδωρ*, perspiration. Perspiration associated with another condition. [a, 34.]

SYNZESIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-i}^2\text{z}(\text{ez})\text{-e}^2(\text{a})\text{si}^2\text{s}^2$. Gen., *-es* (-is). Gr., *σύνθεσις* (from *σύνθεω*, to sit together). Fr., *synthèse*. Ger., *Augensperre*. See CONOCLISIS and MYOSIS (1st def.).

SYNKINESIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-ki}^2\text{n}^2(\text{ken})\text{-e}^2(\text{a})\text{si}^2\text{s}^2$. Gen., *-es* (-is). From *syn*, with, and *κίνησις*, motion. Of Ross, an involuntary movement of a paralyzed part; occurring in conjunction with voluntary movements of other parts. [a, 34.]

SYNEUROSIOS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-nu}^2\text{r-}^2\text{os}^1\text{is}^2$. Gen., *-os* (-is). From *syn*, with, and *νεῦρον*, a nerve. Fr., *syneurose*. Ger., *Synneurose*, *Baueingefügung*. Of the anastomosis, any one of various white structures of the body such as nervous tendons, ligaments, and aponeuroses. [Plenck (A. 314).] See SYNEDESMOSIS.

SYNOCHA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{k}(\text{o}^2\text{ch}^2)\text{-a}^2$. Gr., *συνόχη* (from *σύνειναι*, to hold together). See SYNOCHEUS.

SYNOCHORIUM (Lat.), n. n. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{k}(\text{o}^2\text{ch}^2)\text{-or}(\text{o}^2\text{r})^1\text{-u}^2\text{m}(\text{u}^2\text{m})$. From *synochus*, joined together, and *χόριον*, a membrane. Fr., *synochorion*. See DIZERISILIS.

SYNOCHUS (Lat.), n. m. and f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{k}(\text{o}^2\text{ch}^2)\text{-u}^2\text{s}^2(\text{u}^2\text{s})$. From *σύνειναι*, to hold together. 1. Of Galen, putrid fever. 2. Any fever that lasts a certain time without well-marked remissions or intermissions. [a, 34.]—*S. annuaria*. A. s. that returns on the same date for several years. [a, 34.]—*S. ardens*. Typhoid fever. [a, 34.]—*S. a scabie*. S. caused by scabies. [a, 34.]—*S. biliosa*. Of Galen, *S. ardens*. [a, 34.]—*S. biliosa*. See *Typhoid fever*.—*S. dysenterioide*. Of Sauvages, continued fever with diarrhoea. [a, 34.]—*S. pleuritica*. Of Sauvages, a disease prevalent at one time in Montpellier, in which the symptoms were those of continued fever and pleurodynia. [a, 34.]—*S. putris*. See *Typhoid fever*.—*S. rheumaticus*. Of Sydenham, a continued fever with general rheumatic pains. [a, 34.]—*S. sanguinea*. Of Galen, typhoid fever. [a, 34.]—*S. scorbutica*. Of Semmets, a. s. caused by scurvy. [a, 34.]—*S. spermatica*. Of Sibinalse, a. s. attributed to the retention of semen in continent persons. [a, 34.]—*S. sudatoria*. See *Sweating sickness*.—*S. tarantata*. Of Sauvages, s. that is cured by music. [a, 34.]—*S. variolodes*, *S. variolosis*. See *VARIOLA*.

SYNOCILS, n. pl. $\text{Si}^2\text{n}^2\text{-o}^2\text{s}^1\text{il}^2\text{z}$. See PALPOCILES.

SYNOCREATE, adj. $\text{Si}^2\text{n}^2\text{-o}^2\text{r}^2\text{e}^2\text{-a}^2$. From *syn*, with, and *οὐρεα*, a sheath. Having the stipules united so as to form a sheath.

SYNECIOUS, **SYNOICIOUS**, adj's. $\text{Si}^2\text{n}^2\text{-e}^2\text{shu}^2\text{s}^2\text{-o}^2\text{ik}^2\text{u}^2\text{s}^2$. Lat., *synoicus* (from *συνοικεῖν*, to dwell together). Fr., *synoïque*. Of cryptogams, having antheridia and archegonia on the same receptacle. [a, 35.]

SYNOLCE (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{s}^1\text{ik}(\text{o}^2\text{ik})\text{-e}^2(\text{a})$. Gen., *-olce*. Fr., *synolce* (from *συνολκείν*, to draw together). A cramp, especially of the calf of the leg. [L, 50 (a, 14).]

SYNOPHRYS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{p}^2\text{-ri}^2\text{e}^2(\text{pu}^2\text{s})$. Gen., *-ophrys* (-ophrys). From *syn*, with, and *ὄφρυς*, the eyebrow. Union of the eyebrows by their growing continuously across the root of the nose. [F.]

SYNOPHTHALMIA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{f}^2\text{-tha}^2\text{li}^2(\text{tha}^2\text{li})\text{-m}^2\text{i}^2\text{-a}^2$. See CYCLOPIA (1st def.).

SYNOPHTHALMUS (Lat.), n. m. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{f}^2\text{-tha}^2\text{li}^2(\text{tha}^2\text{li})\text{-m}^2\text{us}^2(\text{mu}^2\text{s})$. From *syn*, with, and *ὀφθαλμός*, the eye. See CYC OPS.

SYNOPHYTY, n. $\text{Si}^2\text{n}^2\text{-o}^2\text{f}^2\text{-it}^2\text{-i}^2$. From *syn*, with, and *φύτον*, a plant. In botany, the union or adhesion of embryos. [a, 35.]

SYNOQUE (Fr.), n. Sen-ok. See *SYNOCHA*.—*S. accompagnée*. Synocha accompanied with a local inflammation as distinguished from simple synocha. [Marrotte, "Union méd." Jan. 1, 1885, p. 6.]

SYNORRHIZOUS, adj. $\text{Si}^2\text{n}^2\text{-o}^2\text{r}^2\text{-iz}^2\text{-u}^2\text{s}^2$. Lat., *synorrhizus* (from *syn*, with, and *ρίζα*, a root). Fr., *synorrhize*. Ger., *verwachsenwurzlig*. Having the radicle united or apparently united to the tissue of the albumen, as in the *Synorrhizae* (of Richard, a subdivision of the *Embryonate*, consisting of the *Coniferae* and *Cycadeae*). [a, 35.]

SYNOSCHEOS (Lat.), n. m. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{s}^1\text{ik}(\text{o}^2\text{sch}^2)\text{-e}^2\text{-o}^2\text{s}^2$. From *syn*, with, and *σῆχος*, the scrotum. The condition in which the skin of the penis is adherent to that of the scrotum. [a, 34.]

SYNOSTEOGRAPHY, **SYNOSTEOLOGY**, n's. $\text{Si}^2\text{n}^2\text{-o}^2\text{st-}^2\text{e}^2\text{-o}^2\text{g}^2\text{-ra}^2\text{fi}^2\text{-i}^2\text{-o}^2\text{-i}^2$. Lat., *synosteo-graphia*, *synosteo-logia* (from *syn*, with, and *ὀστέον*, a bone, and *γράφειν*, to write, or *λογεω*, understanding). Fr., *synostéographie*, *synostéologie*. Ger., *Gelenkbeschreibung*, *Gelenklehre*. See ARTHROLOGY.

SYNOSTEPHYTUM (Lat.), n. n. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{st-}^2\text{e}^2\text{-o}^2\text{f}^2\text{-i}^2\text{-t}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$. From *syn*, with, and *ὀστέον*, a bone, and *φύτον*, a growth. Fr., *synostéophyte*. See *SYNOSTOSIS congenita*.

SYNOSTEOSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{st-}^2\text{e}^2\text{-o}^2\text{-is}^2\text{is}^2$. Gen., *-os* (-is). From *syn*, with, and *ὀστέον*, a bone. See *SYNOSTOSIS*.

SYNOSTEOTOMY, n. $\text{Si}^2\text{n}^2\text{-o}^2\text{st-}^2\text{e}^2\text{-o}^2\text{-ot}^2\text{-om}^2\text{-i}^2$. Lat., *synosteotomia* (from *syn*, with, and *ὀστέον*, a bone, and *τομή*, a cutting). Incision into a joint. [E.]

SYNOSTOSIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{st-}^2\text{os}^1\text{is}^2$. Gen., *-os* (-is). From *syn*, with, and *ὀστέον*, a bone. This form is more commonly used than *synostosis*, and is equally justifiable, since in many of the classical Greek derivatives of *ὀστέον* the *e* is omitted. Fr., *synostose*. Ger., *Synostose*, *Knochenverschmiegung*. 1. That variety of articulation by symphysis in which the bones actually become fused together without the intervention of any other structure. 2. Premature and abnormal obliteration of the cranial sutures as a cause of deformity and irregularity of the skull. [A, 313.]—*S. congenita*. Congenital bony ankylosis.—*S. iliopubica*, *S. pubo-ischiatica*. The articulation of the os pubis with the ilium.—*S. pubo-ischiatica*. The articulation of the os pubis with the ischium.

SYNOTIA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{shi}^2\text{-i}^2\text{-a}^2$. Fr., *synotie*. Ger., *Synotie*. The condition of a synotus. [a, 34.]

SYNOTUS (Lat.), n. m. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{shi}^2\text{-u}^2\text{s}^2(\text{u}^2\text{s})$. From *syn*, with, and *ὤς*, the ear. Fr., *synote*. Of L. Geoffroy St. Hilaire, a monster that has two bodies closely united above a common umbilicus, and an incompletely double head presenting a face on one side and one or two ears on the other. [A, 301 (a, 34).]

SYNOVETOMIE (Fr.), n. Sen-ov-e²kt-om-e. The operation of excising a portion of the synovial membrane. [a, 34.]

SYNOVIA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{vi}^2\text{-wi}^2\text{-a}^2$. Fr., *synovie*. Ger., *Gelenkschmiere*, *Gelenksaft*, *Gelenkflüssigkeit*. A tenacious, colorless, stringy, alkaline fluid composed of water, sodium chloride, calcium phosphate, mucin, albumin, and traces of fat, which lubricates a joint. [a, 34.]

SYNOVIAL, adj. $\text{Si}^2\text{n}^2\text{-ov}^2\text{-i}^2\text{-l}^2$. 1. Pertaining to or resembling synovia. [C.] 2. Possessed of a s. membrane.

SYNOVIN, n. $\text{Si}^2\text{n}^2\text{-o}^2\text{v}^2\text{-i}^2\text{-n}^2$. Fr., *synovine*. Of Hünefeld, mucosin obtained from synovia. [L, 41, 49 (a, 14).]

SYNOVITE (Fr.), n. Sen-ov-et. See *SYNOVITIS*.—*S. à grains riziformes*. Synovitis in which corpora arthralgiae are formed. [a, 34.]—*S. fongueuse d'une gaine tendineuse*. Inflammation of the synovial sheath of a tendon accompanied by the production of fungosities.—*S. podo-sésamoïdienne*. See *MALADIE podoculaire*.—*S. sèche*. See *DRY*.—*S. tuberculeuse des gaines tendineuses*. Tubercular synovitis. [Jamin, "Progr. méd." May 13, 1882, p. 359.]

SYNOVITIS (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-o}^2\text{-vi}^2\text{-wi}^2\text{-tis}^2$. Gen., *-itis* (-idis). Fr., *synovite*. Ger., *S. Gelenkentzündung*, *Gliedwasser-entzündung*. Inflammation of the synovial sac of a joint or of that of a tendinous sheath.—*Chronic purulent*. S. See *FUNGUS ARTHRITIS*.—*Chronic serous*. S. See *HYDRARTHROSIS*.—*Crepitant*. S. See *AL*.—*Dry*. S. S. in which the effusion is so small as to be imperceptible. [a, 29.]—*Exanthematosa*. S. due to the poison of the exanthemata, especially scarlatina and measles; generally mistaken for acute rheumatism. [E.]—*Fibrinous*. S. See *DRY*.—*Fungous*. S. See *FUNGUS ARTHRITIS*.—*Gonorrhoeal*. S. See *URETHRAL*.—*Metritic*. S. S. due to some form of uterine disturbance which causes the absorption of deleterious materials in the blood. [E, 17.]—*S. cartilaginea*, *S. ciliaris*. S. that has resulted in intercartilaginous fibrous ankylosis. [a, 34.]—*S. crouposa*. See *S. serofibrinosa crouposa*. [L, 87, 221.]—*S. diphtherica*. S. characterized by diphtheritic patches. [M. Schüller (A. 319 (a, 21)).]—*S. fungosa*. See *FUNGUS ARTHRITIS*.—*S. gonorrhoeica*. See *GONORRHOEAL RHEUMATISM*.—*S. hyperplastica fungosa*, *S. hyperplastica granulosa*. A form of fungous arthritis in which the hyaline cartilage is transformed into processes which creep in over the cartilage as pannus does on the cornea. [A, 520 (a, 29).]—*S. lipomatosa*. S. with fatty degeneration of the neoplastic tissue. [a, 34.]—*S. papillaris*. S. with the formation of small papillae on the diseased membranes. [a, 34.]—*S. prolifer simplex*. S. with the proliferation of fibrous bands from the membranes of the joint. [a, 34.]—*S. puerperalis*. S. due to septic infection during the puerperium. [a, 34.]—*S. pseudomembranacea*. See *S. diphtherica*.—*S. purulenta*. S. in which there is purulent degeneration of the synovia. [a, 34.]—*S. pyemica*. S. due to pyemic infection. [a, 34.]—*S. rheumatica ankylopoetica*. S. with incipient ankylosis caused by rheumatism. [a, 34.]—*S. scarlatina*. S. occurring during scarlet fever and usually affecting several joints. [a, 34.]—*S. septic*. S. caused by septic infection. [a, 34.]—*S. serofibrinosa*. S. in which there is a mixture of sero-fibrous exudate with the synovia. [a, 34.]—*S. serofibrinosa crouposa*. S. in which a sero-fibrous deposit forms on the synovial membrane. [a, 34.]—*S. seropurulenta*. S. in which the effusion is sero-purulent. [a, 34.]—*S. serosa*. S. See *ARTERDEMA* and *HYDRARTHROSIS*.—*S. serosa tuberculosa*. Serous s. caused by tuberculous. [a, 34.]—*S. suppurativa granulosa*. Chronic suppurative s. with the formation of granulation tissue. [a, 34.]—*S. vertebralis*. See *SPONDYLARTHROSIS*.—*Syphilitic*. S. S. caused by syphilitic inflammation. [a, 34.]—*Tendinous*. S. Inflammation of the synovial sheath of a tendon. [L, 87 (a, 50).]—*Tubercular*. S. S. attended by the deposit of tubercle.—*Tubercular tendinous*. S. Tuberculosis of the sheath of a tendon. [L, 88 (a, 50).]—*Urethral*. S. See *GONORRHOEAL RHEUMATISM*.

SYNSEPALMIA, adj. $\text{Si}^2\text{n}^2\text{-se}^2\text{p}^2\text{-a}^2\text{l-}^2\text{u}^2\text{s}^2$. See *GAMOSEPALOUS*.

SYNSOMATIA (Lat.), n. f. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-som-}^2\text{a}^2\text{-f}^2\text{-shi}^2\text{-i}^2\text{-a}^2$. From *syn*, with, and *σώμα*, the body. Fr., *synsomatie*. Of Winter, the combination of two or more bodies of the same class (e. g., two acids or two bases). [B, 78 (a, 14).]

SYNSPERMY, n. $\text{Si}^2\text{n}^2\text{-spe}^2\text{-m}^2\text{-i}^2$. From *syn*, with, and *σπέρμα*, seed. The union of seeds. [a, 35.]

SYNSPOREÆ (Lat.), n. f. pl. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-spo}^2\text{-spo}^2\text{-r}^2\text{-e}^2\text{-a}^2\text{-e}^2\text{-is}^2$. Fr., *synsporeæ*. *Alge* which are reproduced by conjugation; the *Conjugatæ*. [B, 52.]

SYNTAGMA (Lat.), n. n. $\text{Si}^2\text{n}^2(\text{su}^2\text{n}^2)\text{-ta}^2\text{-g}^2\text{-ma}^2$. Gen., *-tag-matos* (-atis). Gr., *σύνταγμα*. Of Pfeiffer, a body composed of tagmata. [a, 35.]

SYNTASIS (Lat.), n. f. *Si²n(suⁿn)ta²s(ta²s)ⁱs*. Gen. *-tasⁱeos*, *synⁱtasis*. Gr. *σύντασις* (from *συντείνειν*, to stretch together). 1. Tension. 2. Of Galen, cohesion. [L, 50 (a, 14, 48).]

SYNTATIC, adj. *Si²n-ta²tⁱk*. Gr. *συντατικός*. Lat. *syntacticus*. Tonic. [L, 50 (a, 14).]

SYNTAXIS (Lat.), n. f. *Si²n(suⁿn)ta²x(ta²x)ⁱs*. Gen. *-taxⁱeos* (-is). Gr. *σύνταξις* (from *συντάσσειν*, to arrange). Fr. *syntaxe*. Ger. *S.* 1. See **ARTICULATION**. 2. See **TAXIS**. 3. Of Galen, the reduction of a dislocation or fracture. [L, 50 (a, 14).] 4. See **SUTURE** (2d def.)—*S. serrata*. See *Serrated suture*.

SYNTOPYRA (Lat.), n. f. *Si²n(suⁿn)teⁱk(tak)-o²pⁱ²r(uⁱr)ⁱs*. From *συντρυπεω*, to waste away, and *πυρ*, fire. Fr. *syntécopyre*. See *Colligative fever*.

SYNTENOSIS (Lat.), n. f. *Si²n(suⁿn)te²n-osⁱs*. Gen. *-osⁱeos* (-is). From *σύν*, with, and *τένωσις*, a tendon. Fr. *synténose*. 1. See **SYNDENOSIS**. 2. Of Spigel and Bartholin, the syndesmosis of the patella. [L, 41, 50 (a, 14).]

SYNTERESIS (Lat.), n. f. *Si²n(suⁿn)te²r(tar)-e(a)ⁱs*. Gen. *-esⁱeos* (-is). Gr. *συντήρησις* (from *συντηρείν*, to preserve closely). Ger. *Bewahren*. Conservation, preservation. [L, 50 (a, 14).]

SYNTERETICA (Lat.), n. f. *Si²n(suⁿn)te²r(tar)-e²t(at)ⁱk*. Of Blacardus, see **HYGIENE** and **PROPHYLAXIS**.

SYNTEXIS (Lat.), n. f. *Si²n(suⁿn)te²x(tax)ⁱs*. Gen. *-texⁱeos* (-is). Gr. *σύντηξις* (from *συντίξω*, to waste away). Fr. *synlexie*. See **COLLIGATION** and **CONSUMPTION**.

SYNTHEA (Lat.), n. Of Paracelsus, a kind of epilepsy. [A, 323 (a, 48).]

SYNTHESIS (Lat.), n. f. *Si²n(suⁿn)the²sⁱs*. Gen. *-thesⁱeos*, *synⁱthesis*. Gr. *σύνθεσις* (from *συντίθειν*, to place together). Fr. *synthèse*. Ger. *Synthese*. 1. An old term for any operation by which parts were united after division. [E, 2] 2. The building up of a single complex substance out of two or more substances. [B, 3]

SYNTHETICAL, adj. *Si²n-the²tⁱk*. Gr. *συνθετικός*. Fr. *synthétique*. Ger. *synthetisch*. Pertaining to or obtained by synthesis. [B, 3]

SYNTHETISMUS (Lat.), n. m. *Si²n(suⁿn)the²tⁱ²zⁱs* (*muⁱs*). Gr. *συνθετισμός*. Fr. *synthétisme*. The combination of operations necessary for reducing a fracture. [L, 41, 50 (a, 14).]

SYNTHORAX (Lat.), n. m. *Si²n(suⁿn)thorⁱa²x(a²x)*. Gen. *-acⁱos* (-acⁱis). From *σύν*, with, and *θώραξ*, the thorax. See **THORACOPAGUS**.

SYNTONIN, n. *Si²n-to²n-i²n*. Fr. *syntonine*. Ger. *S.* *Muskel fibrin*. An acid albumin, especially that obtained from muscular tissue. It forms gelatinous, transparent flakes. [B, 4, 12.]

SYNTRIMMA (Lat.), **SYNTRIPSIS** (Lat.), n's n. and f. *Si²n(suⁿn)-tri²m(ma²)-tri²psⁱs*. Gen. *-trimⁱm(atⁱs)-tripsⁱeos* (-is). Gr. *συντρίμμα*, *συντρίψις* (from *σύν*, with, and *τρίβω*, to rub). See **COMMINUTION**.

SYNTROPHICUS (Lat.), adj. *Si²n(suⁿn)-tro²pⁱ²k-uⁱs(uⁱs)*. Gr. *συντροφικός* (from *συντρέφω*, to feed together). Fr. *syntrophique*. Ger. *mitelhäuserisch*. Growing upon other plants without drawing sustenance from them (said of mosses, lichens, etc.). [a, 35.]

SYNULOSIS (Lat.), n. f. *Si²n(suⁿn)-u²l(uⁱl)-osⁱs*. Gen. *-osⁱeos* (-is). Gr. *συνολωσις* (from *σύν*, with, and *ὀλῆ*, a cicatrix). See **CICATRIZATION**.

SYNYMENSIS (Lat.), n. f. *Si²n(suⁿn)-i(uⁱt)-meⁱnsⁱs*. Gen. *-enⁱeos* (-is). From *σύν*, with, and *μῆνις*, a membrane. Ger. *häutige Knochenverbindung*. 1. A connection of bones by membrane, as in the foetal skull. 2. See **SYNDENOSIS**.

SYNZYGIA (Lat.), n. f. *Si²n(suⁿn)-zi²zⁱ(zu²g)ⁱs*. From *σύν*, with, and *ζυγόν*, a yoke. Fr. *synzygie*. Of Richard, the point of junction of two opposite cotyledons. [a, 35.]

SYPHILECOS (Lat.), n. n. *Si²f(suⁱf)-i²l-e²lⁱk-osⁱs*. Gen. *-elⁱeos*. From *sypphilis* (q. v.), and *ελεος*, an ulcer. A syphilitic ulcer. [L, 50 (a, 14).]

SYPHILECOSIS (Lat.), n. f. *Si²f(suⁱf)-i²l-e²lⁱk-osⁱs*. Gen. *-cosⁱeos* (-is). Fr. *sypphilécose*. Syphilitic ulceration. [G, 5.]—*S. primaria*. See **SYPHILITIC CHANCERE**.—*S. secundaria*. Ulceration due to secondary syphilis. [G, 5.]

SYPHILICOME (Fr.), n. Se-fe-le-kom. From *sypphilis* (q. v.), and *κομῆν*, to take care of. A hospital for syphilitic patients. [L, 41 (a, 14).]

SYPHILID (Ger.), n. Zu²f-el-ed-el. See **SYPHILIDE**.—**Fressendes Knotens**ⁱ. An ulcerating tubercular syphilide. [G, 34].—**Gross-knotiges S.** See **GUMMATOUS SYPHILIDERM**.—**Hauts**ⁱ. See **SYPHILIDERM**.—**Kleinknötchen**ⁱ. See **MILIARY SYPHILIDERM**.—**Knotens**ⁱ. See **TUBERCULAR SYPHILIDERM**.—**Figments**ⁱ. See **PIGMENTARY SYPHILIDERM**.—**Schuppens**ⁱ. See **POPULO-SQUAMOUS SYPHILIDERM**.

SYPHILIDE, n. *Si²fⁱ²l-i²d*. Fr. *s.* Ger. *Syphilid*. 1. A cutaneous disease symptomatic of syphilis; a syphilitic disease of the skin. For various subheadings not here given, see the corresponding expressions under **SYPHILIDERM**. [G, 2] A syphilitic lesion on a mucous membrane, more especially near one of the mucous orifices. [G, 7].—**Annular** s. See **Circinate papulo-squamous s.**—**Bullous** s. See under **PERIPHEROUS SYPHILIDERM**.—**Circinate papulo-squamous s.** Lat. *sypphiloderma papulosquamosum circinatum*. Fr. *s. circinée squameuse (ou psoriasiforme)*. A squamous s. in which gyrate and circinate patches are formed resembling psoriasis. [G, 84].—**Corymbiform s.** See **CORYMBIFORM papular SYPHILIDERM**.—**Erythematous s.** See **SYPHILITIC ROSEOLA**.—**Flat papular s.** See **Lenticular papular SYPHILIDERM**.—**Follicular s.** See **Miliary SYPHILIDERM**.—**Gyrate s.** See **Circinate papulo-squamous s.**—**Lichenoid s.** See **Miliary SYPHILIDERM**.—**Macular s.** 1. See **SYPHILITIC ROSEOLA**. 2. Pig-

mentary stains following a syphilitic exanthem. [G, 3] See **Pigmentary SYPHILIDERM**.—**Maculo-papular s.** See **Papular sypphilitic ROSEOLA**.—**Marmoraceous pigimentary s.** A form of pigimentary s. occurring, usually upon the sides of the neck, in persons of fair skin, and characterized by the appearance of whitish spots due to loss of pigment, while at the periphery of these spots the skin appears darkened, as though the pigment displaced from the central spots had accumulated at the borders. [“N. Y. Med. Jour.” Feb. 18, 1893, pp. 177, 179 (G).]—**Nodular s.** See **Tubercular SYPHILIDERM**.—**Nummular s.** See **Circinate papulo-squamous s.**—**Orbicular s.** See **Circinate papulo-squamous s.**—**Papular s.** A papular syphilitic eruption affecting either the skin (see **SYPHILIDERM papulosum**) or the mucous membrane. [G, 5].—**Pustulo-crustaceous s.** See **Pustular SYPHILIDERM**.—**Retiform pigimentary s.** Fr. *s. pigmentaire à dentelles*. A form of pigimentary s. that begins with the production of brown patches on the skin, most commonly of the neck, but also on other parts of the body, and is followed by disappearance of the superpigmentation in spots over the surface of the dark patches, producing a number of white areas which gradually increase in size, giving the part at first a dappled and later a retiform appearance. The disease may resemble vitiligo, but is said to differ from it in the absence of the sharply marked pigmented border that surrounds the leucodermatous spots in vitiligo. [G, 3].—**Scaling papular s.** See **Populo-squamous sypphilid.—**Sealing papular s. of the palms and soles.** See **Squamous SYPHILIDERM of the palms and soles**.—**Serpiginous tubercular s.** A tubercular s. having a serpiginous arrangement or mode of extension. [a, 34].—**Subcutaneous circinate s.** Annular syphilitic roseola; so called because the efflorescences are not elevated. [G, 3].—**S. à forme d'eczéma** (Fr.). A variety of herpes-like syphilid in which the efflorescences are minute and very closely aggregated. [G, 84].—**S. circinée psoriasiforme (ou squameuse)** (Fr.). See **Circinate papulo-squamous s.**—**S. cornée** (Fr.). See under **SYPHILIS cutanea cornea**.—**S. cutanée** (Fr.). See **SYPHILIDERM**.—**S. en coarée** (Fr.). Coarée s.; a variety of circinate papular syphilid in which two or more concentric papular rings are formed. [G, 84].—**S's gommeuses ulcéraires** [Fournier] (Fr.). See **Ulcerating tubercular SYPHILIDERM**.—**S. granulée des ailes du nez** (Fr.). See under **Frambesiaform papular SYPHILIDERM**.—**S. hypertrophique de la vuive** (Fr.). Hypertrophy of the vulva due to syphilitic infiltration, often taking the form of an indurating oedema. [G, 3].—**S. mucosae** (Fr.). Syphilitic lesions on a mucous membrane. [G, 3].—**S. muqueuse papulo-hypertrophique** (Fr.). See **CONDYLOMA latum**.—**S. papuleuse en nappe** (Fr.). A form of papular syphilid in which the papules are closely aggregated together or coalescent so as to form circumscribed reddish patches with a roughened surface resembling the texture of coarse cloth. [G, 85].—**S. papuleuse humide** (Fr.). Mucous patches of the skin. [G, 85].—**S. papulo-croûtée** (Fr.). A papular syphilid in which the papules are covered by yellowish, brownish, or grayish friable crusts without ulceration beneath. When the crusts are removed the surface exposed is dry and not excoriated, or but very superficially eroded. Its most common situations are the face (especially the forehead and about the lips and ale nasi) and the parts of the body covered by hair. [G, 85].—**S. papulo-érosive** (Fr.). See **Mucous PATCH**.—**S. pigmentaire à dentelles** (Fr.). Of Fournier, see **Retiform pigmentary s.**—**S. pityriasique** (Fr.). A form of papulo-squamous syphilid attended with furfuraceous desquamation. [G, 3].—**S. puro-crustacée ulcéreuse** (Fr.). The deep variety of ethymatous syphilid. [G, 3].—**S. pustulante** (Fr.). See **SYPHILIS pustulans**.—**S. pustuleuse exanthématique** (Fr.). A pustular syphilid occurring in an early stage of secondary syphilis and representing a pustular modification of the papular syphilid. [G, 3].—**S. squameuse cornée** (Fr.). See **SYPHILIS cutanea cornea**.—**S. tuberculeuse rougeante** (Fr.). Of Bonhomme, a serpiginous tubercular s. [a, 34].—**S. tuberculeuse érosive** (Fr.). See **Tubercular SYPHILIDERM**.—**S's tuberculo-croûtées et tuberculo-ulcéreuses** (Fr.). See **Ulcerating tubercular SYPHILIDERM**.—**S. tuberculo-ulcéraire gangréneuse** (Fr.). Lat. *carbunculus venereus*. A tubercular syphilid attended with gangrenous ulceration. A small black slough forms in the centre of the tubercle, extends rapidly, and, on being loosened by the secretions beneath, leaves a deep ulcer with hard, everted edges surrounded by a deep-red areola and discharging a foul secretion. It is said to be most common on the face, the extremities, the shoulders, and the buttocks. [G, 84].—**Vegetating s.** **Verrucous s.** See **Frambesiaform papular SYPHILIDERM**.—**Wasting secondary s.** See **Abdominal STREAKS**.**

SYPHILIDERMIE (Fr.), n. Se-fe-le-de²r-me. See **SYPHILIDERM**.—**S. dyschromateuse**. A pigimentary syphilid. [a, 34].

SYPHILIDIATRIA (Lat.), n. f. *Si²f(suⁱf)-i²l-i²d-i²a²t(a²t)-ri(re)ⁱs*. From *sypphilis* (q. v.), and *ιατρεία*, medical treatment. Fr. *sypphilidatrie*. The therapeutics of syphilis. [L, 50 (a, 14).]

SYPHILIDOCHTHUS (Lat.), n. m. *Si²f(suⁱf)-i²l-i²d-o²k(-o²ch²)thⁱs(thⁱs)*. From *sypphilis* (q. v.), and *ὄγκος*, a tumor. See **Tubercular SYPHILIDERM**.—**S. confertus**. See **CORYMBIFORM papular SYPHILIDERM**.—**S. disseminatus**. A disseminated tubercular syphilid. [G, 3].—**S. rodens**. An ulcerating tubercular or gummatous syphilid. [G, 3].—**S. serpinosus**. An ulcerating serpinous syphilid. [G, 5.]

SYPHILIDOCCLINICE (Lat.), n. f. *Si²f(suⁱf)-i²l-i²d-o²(-o²)-kli²n(-klen)ⁱs(i²k)-e(a)*. Gen. *-clinⁱces*. From *sypphilis* (q. v.), and *κακῆς*, clinical medicine. Clinical instruction in regard to syphilis.

SYPHILIDOLCOPITIS (Lat.), n. f. *Si²f(suⁱf)-i²l-i²d-o²(-o²)-kō²lⁱpⁱe(i²tⁱs)*. Gen. *-itⁱdos (-idis)*. From *sypphilis* (q. v.), and *κολῶσις*, the vagina. Gonorrhoea in women. [L, 50 (a, 14).]

SYPHILIDOGRAPHY, SYPHILIDIOLOGY, n's. *Si²f-i²l-i²d-o²gⁱ²rⁱa²²(-i²), -o²lⁱgⁱ²(-i²)*. Lat. *sypphilidographia, sypphilidologia* (from *sypphilis* [q. v.], and *γράφειν*, to write, or λόγος, understanding). The pathology, etc., of syphilis. [a, 48.]

viscera are especially subject to the inflammatory process. [a, 34.] —Zeugungs^s (Ger.). See Hereditary s.

SYPHILISME (Fr.), n. Sef-el-es-m'. Susceptibility to inoculation with the syphilitic virus. [L, 41 (a, 14).]

SYPHILISMUS (Lat.), n. m. Si2f(su)f-i2l-i2s(i2s)/mu2s(mu2s). See SYPHILIS.

SYPHILITIC, adj. Si2f-i2l-i2t-i2k. Lat., *siphiliticus*. Fr., *siphilitique*. Ger., *siphilitisch*. 1. Affected with syphilis. 2. Pertaining to or having the nature of syphilis. [G.]

SYPHYLIZATION, n. Si2f-i2l-i2z-a/sh'n. Fr., *siphylisation*. The act of inoculating the system with the virus of syphilis, or the condition of being thus inoculated. The practice of s. as employed by Sperino, Bidekap, Boeck, and others, consisted in making multiple inoculations of virus (supposed at the time to be syphilitic, but now known to have been simply inoculable pus from soft venereal sores or from syphilitic chancres that had been irritated and made to suppurate freely), which were continued until the skin ceased to react and no further sores could be produced, when the individual was supposed to be syphylized and to be proof against further syphilitic effects. [G.]

SYPHYLIZED, adj. Si2f-i2l-izd. Fr., *siphylisé*. Affected with hereditary or constitutional syphilis. [a, 34.] Cf. SYPHYLIZATION.

SYPHILOCELIS (Lat.), n. f. Si2f(su)f-i2l-o(o2)-sel(kal)i2s(es). Gen., *celidos* (-idis). See Macular SYPHILIDE.

SYPHILOCOMIE (Ger.), n. Zu2f-el-o-kome-e'. See SYPHILOCOME.

SYPHILODERM, n. Si2f-i2l-o-du2s-rm. Lat., *siphiloderma* (from *siphilis* [q. v.], and *derma*, the skin). See SYPHILIDE (1st def.). —**Aeneiform** s. Aeneiform s. Lat., *acne siphilitica*, *siphilodermis lenticularis*. A pustular s. characterized by acuminated, usually discrete pustules, varying in size from that of a pin-head to that of a split pea, affecting especially the sites of the sebaceous follicles, and resembling acne, from which it differs in its more general distribution, in the presence of the characteristic syphilitic infiltrations at the bases of the pustules, in its tendency to more superficial suppuration and to rapid desiccation of the pus (forming little crusts), in the absence of comedones, and in leaving pigmented spots. [Julien (G, 84).] —**Corymbiform** papular s. Lat., *siphiloderma papulosum corymbiforme*. Fr., *siphilide en corymbes*. A papular s. in which the efflorescences are clustered in groups. [G.] —**Ecthymatous** s. Lat., *ecthyma siphiliticum*, *siphilodermis latus*. Fr., *siphilide ecthymateuse*. A pustular s. characterized by large flat pustules of about the size of a finger-nail seated upon a deep-red base and tending rapidly to form dark-colored crusts. A "superficial" variety and a "deep" variety are described. Both occur most commonly on the legs. The superficial form also frequently occurs on the forehead and neck near the border of the hair, and on the back, nates, scrotum, labia majora, etc. Sometimes the efflorescences are disseminated, often clustered in curvilinear or circular forms. The deep variety, which usually belongs to a later period of the disease than the superficial form, occurs as irregularly distributed, roundish pustules which ulcerate and form thick, rough, brownish or greenish-black crusts (see *Siphilitic rostra*) followed by permanent cicatrices. [G.] —**Erythematous** s. See *Siphilitic roseola*. —**Frambesiform** papular s. Fr., *siphilide papuleuse végétante*. A circumscribed papular or tubercular s. in which the surface becomes irregularly elevated, with little warty prominences resembling the surface of a raspberry. The corneous layer of the epidermis has a granular or rugous appearance, and is sometimes covered by a viscid secretion that dries and forms a loosely adherent crust. Its most common situations are the back, the face, especially in the angle of the alae nasi (the *siphilide grande des ailes du nez* of Voornier), and the cheeks. [G, 85.] —**Gummatous** s. Fr., *siphilide gommeuse*. Ger., *tiefiegendes grossknotiges Syphilid*. A gummy tumor which, beginning in the subcutaneous connective tissue, tends to involve the true skin gradually. It appears first in the form of a small, deep-seated nodule, which gradually enlarges and approaches nearer the surface, which latter becomes of a dusky-red color, and when softening of the gumma takes place ulceration may occur and be followed by the production of a deeply excavated ulcer, or the tumor may disappear by resolution without the aid of the surface. [G.] —**Herpetiform** s., **Herpetoid** s. Fr., *siphilide herpétiforme*. A s. consisting of small, millet-sized papular efflorescences surmounted by minute vesicles or pustules, usually closely clustered or arranged in circular or other figures like the groups of herpes. The secretion rapidly dries up, leaving little adherent brownish or yellowish crusts. [G.] —**Impetiginiform** s., **Impetiginous** s. A form of pustular s. in which small, flat pustules surrounded by a red areola occur in clusters, most commonly about the face or scalp. They soon dry up, forming thick, granular, dark-colored crusts, beneath which there is usually an eroded surface, but slightly depressed, often somewhat elevated. [G.] —**Large flat pustular** s. See *Ecthymatous* s. —**Lenticular** papular s. An early syphilitic eruption, usually disseminated over the greater portion of the body, consisting of dark-red or copper-colored, round or oval papules, with a rounded or flat, smooth surface, upon which during the process of involution a thin whitish scale of epidermis is formed. [G.] —**Miliary** (papular) s. An eruption of small, dark-red, acuminated papules situated about the mouths of the hair follicles, frequently clustered, sometimes forming determinate figures; one of the earlier manifestations of secondary syphilis. [G.] —**Miliary pustular** s. See *Herpetiform* s. —**Palmar and plantar** s. See *Squamous* s. of the palms and soles. —**Papular** s. See *SYPHILODERMA papulosum*. —**Papulo-squamous** s. Lat., *siphilolepis*, *psoriasis siphilitica*. Ger., *Schuppensyphilid*. A scaling papular syphilide; a modified form of the papular s. in which the efflorescences are covered by whitish, adherent scales and have a certain resemblance to psoriasis. [G.] —**Pigmentary** s. A form of chromatosis of the skin observed in

siphilitic patients and regarded by many as a symptom of syphilis. Its most frequent situation is upon the sides of the neck, and it occurs most commonly in women. It sometimes appears in the form of small spots or macules disseminated over the surface, producing a mottled appearance, or in larger patches of the character of a leucoma. Between the pigmented portions the intervening skin may appear either normal or unusually white, as if from deficiency of pigment (see VITILIGO). [G.] —**Pustular eczemaform** s. See *Impetiginous* s. —**Pustular** s. See *Ecthymatous* s., *Impetiginous* s., and *Herpetiform* s. —**Serpiginous** s. A pustular or ulcerating s. that advances in a serpiginous or creeping manner. It may start from a pustule which gradually extends at the periphery while healing at the centre, presenting a ring of dark, greenish crust with ulceration beneath, while the centre is red, darkly pigmented, blanched, and atrophic. Sometimes the advance of the disease is only upon one side, with cicatrization upon the other. Another form, attended with deeper ulceration, usually starts from one of the later cutaneous lesions of syphilis, such as the tubercular, ecthymatous, or gummatous s., and the ulceration often assumes a horseshoe or kidney shape, with cicatrization in the centre. [G.] —**Small acuminated pustular** s. See *Herpetiform* s. —**Small flat pustular** s. See *Impetiginous* s. —**Squamous** s. See *Papulo-squamous* s. —**Squamous** s. of the palm and soles. A s. characterized by rough, dry, scaling patches on the palmar and plantar surfaces of the hands and feet. The patches may be roundish, crenate, or horseshoe-shaped, or may occur in irregular curved or gyrate lines, and often manifest a tendency to advance in one direction while healing in the others. The surface is usually most roughened at the periphery, where the process is sharply defined, and is generally marked by a line of ragged, partly detached epidermis. Other parts of the patch may be scaly or smooth, shiny, and somewhat reddened. [G.] Cf. *SYPHILOSIS cutanea cornea*. —**Tubercular** s. Lat., *siphilide cutanea nodosa* (seu *tuberculosa*), *tubercula siphilitica*. Fr., *siphilide tuberculeuse* (*résolutive*). Ger., *Knotensyphilid*. A form of cutaneous syphilis usually occurring at an advanced stage of the disease, characterized by circumscribed deep-seated infiltrations involving the entire thickness of the skin. The eruption is commonly confined to particular regions, and is not generally symmetrical. The efflorescences may be grouped in irregular clusters, in the form of rings or curves, or be horseshoe-shaped or kidney-shaped patches. [G.] —**Ulcerating tubercular** s. A tertiary or late manifestation of syphilis in which tubercular lesions, occurring in several more or less isolated patches, undergo ulceration, usually with a tendency to spread in a serpiginous manner and often producing thick, dark crusts. When of long duration it is sometimes called *lupus siphiliticus*. [G.] —**Varicellaform** s. A pustular (sometimes described as vesicular) s. characterized by rounded or globular, millet-sized bluish-brown vesicles filled with serous fluid, which rapidly dries up and forms brown crusts. [G.] Cf. *Varicellaform* s. —**Varicellaform** s. A pustular s. in which the efflorescences begin in the form of red spots which turn into pustules, at first acuminated and afterward becoming slightly depressed or umbilicated in the centre, and are followed by greenish-brown crusts beneath which there is usually slight ulceration or erosion. [G.] —**Vesicular** s. Ger., *Blasensyphilid*. A s. characterized by the presence of vesicles or vesico-pustules. Herpetiform s., varicellaform s., and syphilitic eczema are examples. [G.]

SYPHILODERMA (Lat.), n. n. Si2f(su)f-i2l-o(o2)-du2s-rm. (de2rm)2. Gen., *dermata* (-idis). See SYPHILIDE. —**S. erythematousum**. See *SYPHILOTIC ROSEOLA*. —**S. erythematousum palmare et plantare**. See *Squamous* SYPHILODERM of the palms and soles. —**S. maculosum**. See *SYPHILOTIC ROSEOLA*. —**S. papulo-squamousum**. See *Circinate papulo-squamous* SYPHILIDE. —**S. papulosum**. A syphilitic exanthem of the skin occurring in the form of papular efflorescences, and produced by circumscribed cellular infiltrations in the corium. [G.] —**S. pigmentosum**. See *Pigmentary* SYPHILODERM. —**S. pustulosum**. See *Pustular* SYPHILODERM. —**S. roseolatum**. See *SYPHILOTIC ROSEOLA*.

SYPHILOGRAPHY, n. Si2f-i2l-o2g-ra2f-i2. See SYPHILIDOGRAHY.

SYPHILOID, adj. Si2f-i2l-oid. Lat., *siphiloides* (from *siphilis* [q. v.], and *eidos*, resemblance). Relating to or resembling syphilis; as v. n., any one of certain epidemic diseases more or less resembling syphilis. [G.] —**Canadian** s. Lat., *radysyge canadensis*. Fr., *mal anglais* (ou des éboulements, ou de chicot). A disease which prevailed in Canada "from 1760 to 1780 and upward," and was probably syphilis, though formerly believed to be an independent form of disease resembling syphilis. [G, 16.] —**Hessian** s. A disease resembling radysyge, observed in Hesse, Germany. [G.] —**Juliland** s. A disease resembling radysyge that at one time prevailed in Juliland, Denmark. [G.] —**S. of Courland**. A disease resembling radysyge observed in Courland, Russia. [G.]

SYPHILOJONTHUS (Lat.), n. m. Si2f(su)f-i2l-o(o2)-jo2nth-(ro2nth)2(us)2s. From *siphilis* (q. v.), and *joncus* (see LONJUS). See *Pustular* SYPHILODERM. —**S. confertus**. See *Impetiginous* SYPHILODERM. —**S. latus**. See *Ecthymatous* SYPHILODERM. —**S. lenticularis**. See *Aeneiform* SYPHILODERM.

SYPHILOKELIS (Lat.), n. f. Si2f(su)f-i2l-o(o2)-kel(kal)i2s(es). Gen., *kelidos* (-idis). From *siphilis* (q. v.), and *kelos*, a spot. Fr., *siphilocèle*. See Macular SYPHILIDE. —**S. fugax**. See *SYPHILOTIC ROSEOLA*. —**S. perstans**. A macular syphilide (2d def.); perhaps also the pigmentary syphiloderm (q. v.). [G.]

SYPHILOLEPIS (Lat.), n. f. Si2f(su)f-i2l-o2l-e2p-i2s. Gen., *lep'idus* (-idis). From *siphilis* (q. v.), and *lepis*, a scale. See *Papulo-squamous* SYPHILODERM. —**S. exulcerans**. A pustulo-squamous syphiloderm attended with ulceration. [G.] —**S. exulcerans centralis**. A squamous syphiloderm attended with ulceration beneath the scale or crust. [G.] —**S. exulcerans peripherica**. A serpiginous ulcerating syphiloderm. [G.] —**S. guttata**. Papulo-squamous syphiloderm resembling psoriasis guttata. [G, 5.] —**S.**

SYRINGOCYSTADENOMA (Lat.), n. n. $\text{Si}^2(\text{su}^2\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$ (o^2)- $\text{si}^2\text{a}^2(\text{ku}^2\text{st})\text{-a}^2\text{a}^2(\text{a}^2\text{d})\text{-o}^2\text{n}^2\text{o}^2\text{m}^2\text{a}^2$. Gen., -*om'atos* (-atis). From *syngy*, a pipe, *kyrtos*, a bladder, and *dein*, a gland. Of Unna, a hydradenoma. [*J*. Disch. med. Ztg., 11 Nov. 4, 1889, p. 1023 (a, 34).]

SYRINGOID, adj. $\text{Si}^2\text{-i}^2\text{n}^2\text{g}\text{-oid}$. Lat., *syringoides* (from *syngy*, a tube, and *eidos*, resemblance). See **FISTULOUS**.

SYRINGOMENINGOCLE (Lat.), n. f. $\text{Si}^2(\text{su}^2\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$ (o^2)- $\text{me}^2\text{n}^2(\text{man})\text{-i}^2\text{n}^2\text{g}\text{-o}$ (o^2)- $\text{se}^2(\text{ka})\text{le}^2(\text{la})$: in Eng., *si'r-i-n'g'g'-o-me'n'-i'g'-o-sel*. Gen., -*cel'es*. From *syngy*, a tube, *menyng*, a membrane, and *klela*, a tumor. A meningocle presenting the characteristics of a syringo-myelocle. [A, 34.]

SYRINGOMYELIA (Lat.), n. f. $\text{Si}^2(\text{su}^2\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$ (o^2)- $\text{mi}^2(\text{mu}^2)\text{-el}^2(\text{e})\text{le}^2(\text{e})\text{le}^2$. Gen., -*myelias*. From *syngy*, a fistula, and *myelos*, marrow. Ger., *Syringomyelie*. See **MYELOSIRINGOSIS**.

SYRINGOMYELITIS (Lat.), n. f. $\text{Si}^2(\text{su}^2\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$ (o^2)- $\text{mi}^2(\text{mu}^2)\text{-el}^2(\text{e})\text{le}^2(\text{e})\text{le}^2$. Gen., -*myelitis* (-idis). See **ECCHORDAL MYELITIS**.

SYRINGOMYELOCELE (Lat.), n. f. $\text{Si}^2(\text{su}^2\text{r})\text{-i}^2\text{n}^2\text{g}\text{-o}$ (o^2)- $\text{mi}^2(\text{mu}^2)\text{-el}^2(\text{e})\text{le}^2(\text{e})\text{le}^2$ - $\text{se}^2(\text{ka})\text{le}^2(\text{la})$: in Eng., *si'r-i-n'g'g'-o-mi'e'l'-o-sel*. Gen., -*cel'es*. From *syngy*, a fistula, *myelos*, marrow, and *klela*, a tumor. See **HYDROMYELOCELE** (1st def.).

SYRINGOTOME, n. $\text{Si}^2\text{-i}^2\text{n}^2\text{g}\text{-o}$ -*tom*. Gr., *συριγγοτόμιον*, *syri'ngyotómi-on*. Lat., *syringotomus*, *syringotomum*, *syringotomum*. Fr., s. Ger., *Syringotom*, *Fistelmesser*. A curved bistoury with a flexible probe point for the operation on fistula in ano. [E.]

SYRINGOTOMY, n. $\text{Si}^2\text{-i}^2\text{n}^2\text{g}\text{-o}$ -*tom-i*. Gr., *συριγγοτομία* (from *syngy*, a fistula, and *tomein*, to cut). Lat., *syringotomia*. Fr., *syringotomie*. Ger., *Syringotomie*, *Fistelschnitt*. A cutting operation for fistula in ano. [E.]

SYRINX (Lat.), n. f. $\text{Si}^2(\text{su}^2\text{r})\text{-i}^2\text{n}^2\text{g}$. Gen., -*ing'os* (-ing'is). Gr., *συριγξ*. 1. A tube. 2. A tube. 3. The lower part of the lungs, where the voice is formed. It is at the bottom of the trachea, where the bronchi bifurcate. [I, 12, 343.]

SYRMA (Lat.), n. n. $\text{Su}^2\text{m}^2(\text{su}^2\text{r})\text{-m}^2\text{a}^2$. Gen., *sy'r-matos* (-atis). Gr., *σύνμα* (from *symp*, to drag). The faces in dysentery; so called because they were thought to contain scrapings or particles of the inner coat of the intestines. [L, 50 (a, 14).]

SYRMÆA (Lat.), n. f. $\text{Su}^2\text{m}^2(\text{su}^2\text{r})\text{-e}^2(\text{a}^2)\text{e}^2\text{-a}^2$. Gr., *σύνμα* (from *symp*, vomiting). 1. The radish. Its juice, mixed with salt water, was used by the Egyptians as a purgative and emetic. 2. A purge. 3. A mixture of honey and suet. [A, 311 (a, 21).]

SYRMAISMUS (Lat.), n. m. $\text{Su}^2\text{m}^2(\text{su}^2\text{r})\text{-a}^2\text{-i}^2\text{z}$ (*i*z)- mu^2s (*mu*s). Gr., *σύνμαισμος*. Fr., *syrmæisme*. Of Hippocrates, catharsis or emesis. [L, 41, 50 (a, 14, 43).]

SYRO (Lat.), n. m. $\text{Si}^2(\text{su}^2\text{r})\text{-o}$. See **SIRO**.

SYRUP, n. $\text{Si}^2\text{-u}^2\text{p}$. Lat., *syrupus*, Fr., *sirop*. Ger., *Siro*, *Sirop*. It., *siropo*. Sp., *jaraibe*. 1. A concentrated solution of cane sugar (saccharose) in water, forming a thick, ropy, transparent liquid of very sweet taste. See also, **SYRUPUS**. 2. A class of pharmaceutical preparations consisting of ordinary s. containing some medicinal principle in solution. [B, 1. Amussat's laxative s. See **SIROP laxatif d'Amussat**.—Branner's s. (Ger.). See **Syrupus lacturæ** and **MOLASSES**.—Eaton's s. See **Syrupus ferri, quinae et strychninae phosphatum**.—Gibert's s. See **SIROP Gibert**.—Hive s. See **Syrupus scillæ compositus**.—Iodocalcic s. Fr., *sirop iodo-calcaire*. A s. containing soluble calcium phosphate and calcium iodide; employed in tuberculosis, scrofula, and rickets. [L, 41 (a, 14).]—Simple s. See **SYRUPUS** (1st def.).

SYRUPUS [U. S. Ph., Br. Ph.] (Lat.), n. m. $\text{Si}^2(\text{su}^2\text{r})\text{-u}^2\text{p}$ (*u*p)- u^2s (*u*s). Fr., *sirop de sucre*, et *sirop de sucre à froid* [Fr. Cod.]. Sp., *jaraibe simple* [Sp. Ph.]. 1. A concentrated solution of cane sugar in water, containing 10 parts of water and 20 [Br. Ph., Gr. Ph.] (1837 [U. S. Ph.], 1838 [Netherl. Ph.], 18 [Dan. Ph., Russ. Ph., Swed. Ph.], 1778 [Belg. Ph.], 19 [Hun. Ph.], 13 [Swiss Ph.], 16 [Austri. Ph., Roum. Ph.], 15 [Ger. Ph., Norw. Ph., Finn. Ph.]) of sugar. The Fr. Cod. has two syrups: the *sirop de sucre*, prepared with 17 parts of sugar to 10 of water brought to a boil, and the *sirop de sucre à froid*, prepared with 18 parts of sugar to 10 of cold water. The Sp. Ph. also has two syrups, one containing 16 parts of sugar to 10 of hot water, the other 18 of sugar to 10 of cold water. [B, 95 (a, 38).] 2. A medicinal preparation containing enough sugar to give it the consistency of syrup.—**S. acetius**. See **S. ACETI**.—**S. albus**. See **SYRUP** (1st def.).—**S. alcalinus**. A solution of 11 parts of potassium carbonate in 180 of sugar. [B, 119 (a, 38).]—**S. anodynus**. A syrup made by treating 3 parts of the seeds of *Datura stramonium* with 36 of vinegar, straining, and adding 72 of sugar. [B, 119 (a, 38).]—**S. antiscorbuticus**. Fr., *sirop antiscurbutique de Portal* [Fr. Cod.]. Sp., *jaraibe antiscurbutico* [Sp. Ph.]. A syrup made by expressing and filtering the juice of 100 parts each of cochlearia-leaves and cress and 80 of horseradish, adding to 120 parts of this juice 500 of a mixture of 5 of calisaya-bark, 20 of gentian-root, and 10 of the root of *Rubia tinctoria*, macerating for 12 hours with 500 parts of water, expressing, filtering, dissolving in the whole 1,180 of sugar, and straining when cold [Fr. Cod.]; or by macerating 100 parts each of brook-lime, cochlearia, cress, and horseradish, 6 of orange-peel, and 1 part of cinnamon in 300 of stronger white wine, expressing, clarifying, straining, and for each 5 parts adding 8 of sugar [Swiss Ph.]; or by macerating 3 parts of calisaya-bark, 12 of gentian-root, and 6 of the root of *Rubia tinctoria* in 340 of water, expressing, filtering, adding 8 parts of sugar for 5 of filtrate, straining, and adding 168 of compound syrup of cochlearia [Belg. Ph.]; or by dissolving 620 parts of sugar in 345 of succus antiscorbuticus. [B, 95 (a, 38).] See also **S. ARMORACIE COMPOSITUS**.—**S. antiscorbuticus Jodatus** [Swiss Ph.]. Sp., *jaraibe de rábano jodado* [Sp. Ph.]. A syrup made by adding to 1,000 parts of s. antiscorbuticus 12 part of iodine and 1 part of potassium iodide [Swiss Ph.], or 4 of iodine and 1 of potassium iodide [Sp. Ph.] triturated with [Swiss Ph.] (dissolved in [Sp. Ph.]) a little water. [B, 95 (a, 38).]—**S. aperiens com-**

positus. A preparation made by digesting 221 parts each of the purified juice of agrimony, *Chærophylum sativum*, and *Pimpinella saxifraga* and the roots of iris, parsley, horseradish, and sulphurwort and 88 each of sassafras and the roots of elecampane and sweet flag in 996 of vinegar of squill, distilling 332 parts, and adding a syrup made of the expressed liquid from the residue with 1,992 of sugar. [B, 119 (a, 38).]—**S. aperiens Pechii**. A preparation made by boiling 25 parts each of the berries of allspice and the roots of *Apium graveolens*, asparagus, elecampane, birdlock, confrey, sweet lowwort, fennel, iris, strawberry, licorice, poppyodium, and common eryngo in enough water, and adding 11 parts each of the juice of *Pimpinella saxifraga*, chicory, fennel, fumitory, parsley, and licorice, 496 of vinegar of squill, and 1,328 of sugar. [B, 119 (a, 38).]—**S. aperitivus**. See **Syrupus de quinque radicibus compositus** (under **RADIX**).—**S. aromaticus**. See **S. ARTEMISIE COMPOSITUS**.—**S. balsamicus** (de Tolu). See **S. tobitanus**.—**S. benzoïnus**. A syrup made by digesting 250 grammes of benzoin with 1,000 of water for twelve hours, filtering, and adding twice as much white sugar. [B, 119 (a, 38).]—**S. cardiacus**. A syrup made of 11 parts of cinnamon, 4 of cloves, 2 of ginger, 75 of rose-water, 240 of strong wine, and 540 of sugar. [B, 199 (a, 38).]—**S. chalybeatus**. A syrup of 664 parts each of vinous tincture of iron and simple syrup and 14 of alcoholic cinnamon-water; or of 15 of aperient tincture of iron and 860 of syrup of chicory. [B, 119 (a, 38).]—**S. communis** [Pruss. Ph., 7th ed., Finn. Ph., Netherl. Ph.]. See **MOLASSES**.—**S. compositus Læffleji**. See under **Syrupus sarsaparillæ compositus**.—**S. copaiivus**. Fr., *sirop de baume de copahu*. Syrup of balsam of copaiiba; made by mixing 3 parts of powdered gum arabic with enough water to form a mucilage, incorporating 12 parts of copaiiba, and adding gradually 144 of syrup [Linc. Disp., 1792]; or by stirring 1 part of tincture of copaiiba into 24 parts of warm syrup [Frankf. Disp., 1791]. [B, 97 (a, 21).]—**S. cordialis**. A syrup made of 665 parts of Madeira wine, 1,320 of sugar, and 40 of cinnamon-water; or of 120 of sweet almonds, 45 of cinnamon, 900 of sugar, 860 of brandy, 720 of Madeira wine, and 1/2 part each of musk and ambergris. [B, 119 (a, 38).] Cf. **HYPOCRAS**.—**S. Cuisinieri**. See **S. SARSAPARILLÆ COMPOSITUS**.—**S. cum monosulfure sodico**. See **Sirof de monosulfure de sodium**.—**S. emeticus**. A syrup made by digesting 7 parts of powdered glass of antimony with 360 of white Rhine wine for three days at a gentle heat, adding 960 of white sugar, and boiling. [B, 119 (a, 38).]—**S. emulsivus**. See **Sirof amygdalin** and **S. AMYGDALARUM**.—**S. fuscus**. See **MOLASSES**.—**S. gummosus**. See **S. ACACIÆ**.—**S. hollandicus**. See **MOLASSES**.—**S. hordeatus**. See **Sirof amygdalin** and **S. AMYGDALARUM**.—**S. iodo-tannicus** [Netherl. Ph.]. A syrup made by dissolving 1 part of iodine in a little alcohol, and 4 parts of extract of rhatany in water, mixing the two, allowing the mixture to stand some days until it no longer turns starch-paste blue, filtering, bringing up to 170 parts by washing with water, and adding 330 of sugar. [B, 95 (a, 38).]—**S. kermesinus**. A syrup made by macerating 3 times with three times as much sugar and expressing; or by boiling together equal parts of kermes-jule and sugar; or by macerating 1/2 part of purified potassium carbonate, 28 parts of kermes, 166 of rose-water, and 111 each of water of lemon and water of cinnamon, and adding 1/3 part of alum and 664 parts of sugar; or by infusing over night 15 parts of cochineal and 1/2 part of purified potassium carbonate in 360 parts each of rose-water and cinnamon-water, and adding 960 of sugar and 360 of kermes-jule. [B, 119 (a, 38).]—**S. Lobelii**. See **Sirof d'Exysium composit**.—**S. longi vitæ**. See **S. ACACIÆ**.—**S. magistralis**. A preparation made by macerating 1 part of root, 30 of dried gentian-root, and 367 of white wine, expressing, and adding 1,000 of mercurialis-juice, 345 each of the juice of borage and ox-tongue, and 1,500 of white honey. [B, 119 (a, 38).]—**S. magistralis** [Swiss Ph.]. A syrup consisting of 1 part of extractum ferri pomatum dissolved in 4 parts of alcoholic cinnamon-water, 20 of syrup of orange-peel, 50 of compound syrup of rhubarb, 24 of syrup, and 1 part of tincture of Chinese cinnamon. [B, 95 (a, 38).]—**S. manna**. See **Syrupus exsuum manna**.—**S. masticinum**. A preparation made by infusing 3 parts of mastic in 18 of water of mastic, straining, and adding 24 of sugar. [B, 119 (a, 38).]—**S. mineralis**. See **S. ACIDI SULPHURICI**.—**S. opiatius**. **S. opii** [Belg. Ph.]. Fr., *sirop d'opium* (ou *thébaïque*). Sp., *jaraibe de extracto de opio* [Sp. Ph.]. A syrup made of extract of opium [Swiss Ph., Russ. Ph.] (dissolved in water [Fr. Cod., Belg. Ph., Roum. Ph., Sp. Ph.], in strong wine [Ger. Ph., Gr. Ph.]), mixed with syrup and evaporated, so that the preparation contains in 100 grammes about 20 centigrammes of extract of opium (1 gramme of the tincture [Finn. Ph., Norw. Ph., Swed. Ph.], or 2 grains of the wine [Netherl. Ph.]) (1 grain of the extract [Gr. Ph.]) to the oz. [B, 95 (a, 38).]—**S. pectoralis** [Fr. Cod.]. Fr., *sirop d'espèces pectorales* [Fr. Cod.]. A syrup made by infusing 1,000 parts of species florum pectoralium in 12,000 of boiling water, expressing, filtering, adding to 10,000 parts of the product 3 of extract of opium dissolved in 500 of water of orange-flowers and 20,000 of sugar, and straining. [B, 95 (a, 38).]—**S. pectoralis comitis Christiani**. A syrup made by boiling 14 grammes each of sassa-parilla, china-root, *Smilax aspera*, and guaiac, 21 of pearl barley, and 24 of ivory-flings in 1,992 of water until reduced one half, and adding a handful each of violets, ox-tongue, roses, and borage, and 664 grammes of white sugar. [B, 119 (a, 38).]—**S. sacchari**. See **S. S. scilliticus**. See **Syrupus scillæ**.—**S. simplex**. See **S.** (1st def.).—**S. spleneticus**. A syrup made by boiling 60 parts each of the roots of *Apium graveolens*, *Pimpinella saxifraga*, chicory, fennel, and parsley, the herbs of scolopendria, cochlearia, water-cress, *Chærophylum sativum*, and *Asperula dorata*, and the seeds of nettle and cress, 15 of the seeds of *Apium graveolens*, 22 of juniper, and 11 each of the roots of galangal and sweet flag in water enough to make 1,080, expressing, clarifying, adding 1,260 parts of white sugar, boiling, and adding 720 parts of a mixture made by boiling 90 parts of astacolith, 60 of cream of tartar, and 7 of hydrochloric acid in 720 of white Rhine wine. [B, 119 (a, 38).]—**S. temperans**. A mixture of equal parts of syrup of lemon-juice and syrup of poppy. [A, 447 (a, 38).]—**S. thebaicus**. See **S.**

which arises a hollow stem that receives a fine silver wire which may be held in place by a thumb-screw. The end of the wire is bent at an angle and tipped with a bead. The warmed convex side of the disc is attached over the region of the apex-beat of the heart by means of a plaster. The wire records the systole, and, tapping against a stethoscope, gives a systolic sound. [*N. Y. Med. Jour.*, Mar. 10, 1888, p. 277 (a, 34).]

SYSTEMMA (Lat.), n. n. $Si^2s(su^2s)-tre^2m^2ma^2$. Gen., *trem-matos* (-atis). Gr., *συστήμμα* (from *συστρέπειν*, to twist up). 1. A glomerule; a convolution. 2. Cramp. [*L.*, 50 (a, 14).]

SYSTROPHE (Lat.), n. f. $Si^2s(su^2s)/tro^2p^2-e(a)$. Gen., *systrôphes*. Gr., *συστροφή*. A sprain; also the resulting inflammation. [*L.*, 50 (a, 14).]

SYZYGIUM (Lat.), n. n. $Si^2z(su^2z)-j^2i(u^2g)/i^2-u^2m(u^2m)$. From *συσύγιος*, yoked (from *σύν*, with, and *συνίναμι*, to yoke). Fr., *syzygium*. Ger., *Mützenblume*. 1. A genus of the *Myrtaceæ*, regarded by some as a section of *Eugenia*. [*a.*, 35.] 2. Conjunction of organisms in pairs, without fusion of substance. [*L.*, 121.]—*S. beluta*. A Malabar tree with aromatic leaves which are used for diarrhoea and in baths for rheumatism. [*a.*, 35.]—*S. caryophyllæum*. Ger., *gewürzreiche Mützenblume*. A Ceylon species. The mildly aromatic and astringent bark, East Indian clove-bark, formerly known in Europe as *cassia caryophyllata* seu *cortex cassie caryophyllata*, is used as a spice and as a medicine. [*a.*, 35.]—*S. caryophyllifolium*. Ger., *neldenbaumblättrige Mützenblume*. An East Indian species. The astringent, bitterish, aromatic bark is used in fevers and in abdominal diseases. The berries are of the shape and taste of olives. [*a.*, 35.]—*S. guineense*. A species used in Senegal for rheumatism. The ripe fruits are edible. [*a.*, 35.]—

TABAC (Fr.), n. Ta^2b-ba^2k . 1. The genus *Nicotiana*. [*a.*, 35.] 2. Of the Fr. word, see **TABACUM**.—*Acérolé de t.* See *Nicotiana*.—*Écrolé de t.* See *Oleum nicotianæ*.—*Éthérolé de t.* See *Tinctura nicotianæ atheræ*.—*Extrait de t.* See *Extractum nicotianæ*.—*Grand t.* See *Nicotiana tabacum*.—*Huile de t.* See *Oleum nicotianæ*.—*Hydrolé de t.* See *Infusum de t.* See *Infusum nicotianæ*.—*Lavement de t.* See *Enema tabaci*.—*Enolé de t.* See *Vinum nicotianæ*.—*Oxérolé de t.* See *Acetum nicotianæ*.—*Oxmyel de t.* See *Oxymel nicotianæ*.—*Petit t.* See *Nicotiana rustica*.—*Sirop de t.* See *Syrupus nicotianæ*.—*T. de montagne*. T. des Savoyards, T. des Vosges. The *Arnica montana*. [*a.*, 35.]—*Teinture éthérée de t.* See *Tinctura nicotianæ atheræ*.—*Vin de t.* See *Vinum nicotianæ*.

TABACIC ACID, n. $Ta^2b-a^2s^2i^2k$. Fr., *acide tabacique*. Ger., *Tabaksäure*. A substance obtained from tobacco-leaves, formerly considered a dibasic organic acid, but now known to be a mixture of malic and citric acids. [*B.*, 38, 48, 93 (a, 14).]

TABACOSIS (Lat.), n. f. $Ta^2b-ta^2b-a^2k(a^2k)/a^2k$. Gen., *-os* (-is). From *tabacum*, tobacco. Infiltration of a part or region with tobacco-dust. [*a.*, 34.]—**T. pulmonis**, **T. pulmonum**. Pulmonary atrophy caused by the inhalation of tobacco-dust. [*a.*, 34.]

TABACUM [U. S. Ph.] (Lat.), n. n. $Ta^2b(ta^2b)/a^2k(a^2k)/u^2m(u^2m)$. Fr., *nicotiane, tabac* [Fr. Cod.]. Ger., *Tabak, Tabakblätter* [Ger. Ph.]. Sp., *nicotiana* [Sp. Ph.]. The dried leaves of *Nicotiana t.* [*B.*, 95 (a, 38).]—**Enema tabaci**. Fr., *lavement de tabac*. Ger., *Tabakklister*. Sp., *clister de tabaco* [Sp. Ph.]. A preparation made by treating tobacco-leaves with 175 times as much boiling water for 1 hour [Fr. Ph.] with 64 times as much boiling water for 1 hour [Fin. Ph.], with 240 times as much boiling water for 1 hour [Sp. Ph.], and straining. [*B.*, 95 (a, 38).]

TABAGISME (Fr.), n. $Ta^2b-ba^2zhez-m^2$. Chronic tobacco poisoning. [*R. Longuet*, "Union méd.," June 23, 1885, p. 1053.]

TABAK (Ger.), n. Ta^2b-a^2k . 1. The genus *Nicotiana*. 2. Tobacco-leaves. [*a.*, 35.]—**T. lunge**. See **TABACOSIS pulmonum**.—**T. vergiftung**. See **NICOTINISM**.

TABANUS (Lat.), n. m. $Ta^2b(ta^2b)/an(a^2n)-u^2s(u^2s)$. A genus of blood-sucking *Diptera*. [*a.*, 43.]—**T. bovinus**. See **CESTRUS bovis**.

TABASHEER, n. $Ta^2b-a^2sher^2$. Said to be from Sans, *tabak-shiri*, cow's milk. Written also *tabashir*, *tabaxir*, and *tabaschir*. Fr., *tabashir*. Ger., *Tabascheer*. A bluish-white substance found in the fruits of various species of the *Bambuseæ*. It consists of silica and small quantities of lime, potash, and vegetable matter. It is reputed astringent and tonic, and is used medicinally. [*a.*, 35.]

TABATIÈRE (Fr.), n. $Ta^2b-a^2t-e-e^2r$. A snuff-box. [*a.*, 14.]—**T. anatomique**. See **FOVEOLA radialis**.

TABEFACTIO (Lat.), n. f. $Ta^2b(ta^2b)-e^2fa^2k(fa^2k)/shi^2(ti^2)-o$. Gen., *-onis*. From *tabefacere*, to melt. See **CHANCRE** (1st def.).

TABELLA (Lat.), n. f. $Ta^2b(ta^2b)-e^2l(a^2l)$. Dim. of *tabula*, a board. See **TABULÆ**.—**Tabellæ carbonaceæ**. Fr., *tablettes de charbon*. Sp., *tabletas de carbón*. Lozenges of 600 parts of purified charcoal with 2,382 of sugar, 18 of tragacanth, and enough water [Belg. Ph.] with 600 of sugar and 150 of tragacanth mucilage [Fr. Cod.], with 1,720 of sugar and enough tragacanth mucilage [Sp. Ph.]. The Belg. lozenges contain 30 centigrammes each, the Fr. 50 centigrammes each, and the Sp. 30 centigrammes each of charcoal. [*B.*, 95 (a, 38).]—**Tabellæ manus Christi**. See *Conserva rosarii sicca*.—**Tabellæ martiales** (seu *restaurantes*). Lozenges consisting of 30 parts of iron-flings with 5 of cinnamon, 180 of sugar, and 120 of water, or with $\frac{7}{8}$ of cinnamon and about 306 of sugar, each containing 12 centigrammes of iron; or of 28 parts

S. jambolanum. Fr., *myrte pédonculé*. Jambolan tree, Java plum; a species identified by some with *S. caryophyllifolium*. The root-bark is used as an astringent, the bark of the stem and branches in apthas, and the austere, acidulous berries in gargles and in preparing an astringent and stomachic syrup. The bark and the seed (called in India *jumbo*, or *jambol*) have been used in diabetes. [*a.*, 35.]—**S. zeylanicum**. An edible-fruited Ceylon tree. The leaves, which have a pleasant, aromatic, somewhat astringent taste, are used in syphilis. [*a.*, 35.] Cf. **MARANDA**.

SZALATHNYA, n. A place in Suhl County, Hungary, where there is an alkaline saline spring. [*L.*, 30, 49 (a, 14).]

SZCAWNICZA, n. A place in Austrian Galicia where there are saline springs, with bathing and where-cure establishments. [*L.*, 30, 37, 49, 57 (a, 14).]

SZKLENO, n. A place in Bars County, Hungary, where there are hot sulphurous springs. [*L.*, 30, 49, 57, 135 (a, 14).]

SZLIACS, n. A place in Zolyom County, Hungary, where there are warm gaseous, ferruginous, alkaline, and sulphurous springs. [*L.*, 30, 37, 49, 57 (a, 14).]

SZOBRAN CZ, n. A place in Ung County, Hungary, where there are saline and sulphurous springs. [*L.*, 30, 49, 57 (a, 14).]

SZOLYMA, n. A place in Marmaros County, Hungary, where there are sulphurous springs. [*L.*, 30 (a, 14).]

SZOLYVA, n. A place in Bereg County, Hungary, where there is a gaseous and chalybeate spring. [*L.*, 30 (a, 14).]

SZULIN, n. A place in Zips County, Hungary, where there is a ferruginous spring. [*L.*, 30, 49 (a, 14).]

T

of iron-flings with 7 of cinnamon and 338 of sugar, or with $\frac{3}{8}$ of cinnamon, 138 of sugar, and enough tragacanth mucilage, each containing 9 centigrammes of iron; or of 32 parts each of iron-flings and cinnamon-water, 8 of powdered cinnamon, 4 of tragacanth, and 324 of sugar, each containing 5 centigrammes of iron; or of 19 parts of iron-flings, 6 of cinnamon, 180 of sugar, 30 of sweet almonds, and 2 each of cardamom and orange-peel. [*B.*, 119 (a, 38).]—**Tabellæ rosatæ**. See *Conserva rosarii sicca*.

TABERNEMONTANA (Lat.), n. f. $Ta^2b(ta^2b)-u^2rn(e^2rn)-e(a^2e^2)-mo^2nt-an(a^2n)/a^2$. From *Tabernemontanus*, a German botanist. Fr., *taberne, tabernemontane*. A genus of tropical apocynaceous trees and shrubs. The *Tabernemontanea* are a tribe of the *Apocynæ*. [*a.*, 35.]—**T. alba**. Fr., *bois laiteux*. A West Indian species. The bark is used like that of *T. citrifolia*. [*a.*, 35.]—**T. angustifolia**. A plant growing in South Carolina and Georgia. The root and bark are said to be antisyndetic. [*a.*, 35.]—**T. citrifolia**. Fr., *bois de lait* (ou *laiteux franc*), *taberne à feuilles de citronnier*. 1. Of Linnaeus, a West Indian tree with a caustic, poisonous juice. The bitter bark is used as a tonic, febrifuge, and anthelmintic, and the leaves are reputed vulnerary and febrifuge. [*a.*, 35.] 2. Of Jacquin, see *T. alba*.—**T. coronaria**. Adam's apple. East Indian rose-bay, wax-flower plant. The juice is used in ophthalmia and skin diseases, and the root-bark as an anthelmintic and in odontalgia. [*a.*, 35.]—**T. crispata**. An East Indian species. The acid juice of the root-bark is used in diarrhoea and as an application to abscesses. [*a.*, 35.]—**T. dichotoma**. Ger., *Evaupfelbaum*. A tree of Ceylon. Its fruit is poisonous. [*a.*, 35.]—**T. mauritiana**. A shrub with a poisonous milky sap. [*Nouv. rem.*, May 8, 1889, p. 242.]—**T. orientalis**. See *T. crispata*.—**T. persticaria**. An Isle-of-France species. The juice is considered poisonous. [*a.*, 35.]—**T. semperiferous**. A species found in the Philippine Islands; used in dysentery and for the stings of venomous reptiles. [*a.*, 35.]—**T. utilis**. Fr., *arbre à lait*. Ger., *Milchbaum*. The *hya-hya* (or cow-tree) of British Guiana. The stem yields a sweet, milky juice, highly esteemed as food, though containing some caustic juice. The bark is used medicinally. [*a.*, 35.]

TABES (Lat.), n. f. $Tab(ta^2b)/ez(az)$. Gen., *tabis*. Gr., *φθίσις*. Fr., *t.* Ger., *Auszehrung*. 1. A wasting away, especially atrophy of the muscles; also t. dorsalis. [*D.*] 2. In botany, a wasting, a gradual decay of the powers of growth. [*a.*, 35.]—**Painful t. See **Abortive locomotor ataxia**.—**T. anglica**. Of De Garacenières pulmonary tuberculosis. [*a.*, 34.]—**T. atactica**, **T. ataxica** (Fr.). See **Locomotor ataxia**.—**T. cerebellaris**. Of Remak, posterior spinal sclerosis associated with cerebellar symptoms. [*A.*, 319 (a, 34).]—**T. cerebitalis**. Of Remak, posterior spinal sclerosis associated with cerebral symptoms. [*A.*, 319 (a, 34).]—**T. cervicalis**. Of Remak, posterior spinal sclerosis affecting the cervical segment of the spinal cord. [*A.*, 319 (a, 34).]—**T. comburée** (Fr.). Syn.: *t. ataxospasmodique, sclérose postéro-latérale de la moëlle*. Sclerosis of the posterior and lateral columns of the spinal cord. [Grasset, "Arch. de neurol.," July, 1886, p. 27.]—**T. coxaria**. Tuberculous coxitis. [*a.*, 34.]—**T. diabetica**. See **DIABETOPHTHISIS**.—**T. dolorosa**. See **Abortive locomotor ataxia**.—**T. dorsalis**, **T. dorsualis**. Ger., *Rückenmarkszehrung, Darrsucht, Rückendarré*. Consumption of the spinal cord (see **Locomotor ataxia**); so called from the peculiar lesion in the posterior columns. [*D.*]—**T. dorsualis cervicalis**. See *T. cervicalis*.—**T. dorsualis ilio-sacra**. A condition more or less completely simulating locomotor ataxia; acquired through fear of the disease, but not dependent on an anatomical lesion. [Knowliewsky, "Ctbl. f. Nervenheilk.," 1885, No. 15; "Ctbl. f. klin. Med.," Jan. 2, 1886, p. 15; "Irrenfreund," 1886, No. 7, p. 108.]—**T. dorsualis spasmodica**. See **Spasmodic spinal paralysis**.—**T. fruste** (Fr.). A variety of locomotor ataxia which**

may remain without change until death, or may develop into the ordinary form of locomotor ataxia. [Rummo, "Union méd.", June 5, 1884, p. 986 (D).]—**T. hamorrhoidalis.** Neurasthenia with tabetic symptoms caused by hemorrhoids. [a. 34.]—**T. incipiens.** The first stage of *t. dorsalis*. [L. 57 (a. 50).]—**T. lactea.** An impairment of the general health resulting from an excessive or too prolonged secretion of milk.—**T. lumbaris.** Of Remak, posterior sclerosis of the lumbar segment of the spinal cord. [A. 319 (a. 34).]—**T. mesenterica.** **T. meseraica.** See **PACHIS meseraica**.—**T. moteur** (Fr.). Of Dierret, *t.* caused by inflammation of the cerebral motor centres. ["Lyon méd.", June 12, 1887, p. 208 (a. 34).]—**T. neurasthenica.** See **NEURASTHENIA**.—**T. oculaire** (Fr.). *T. dorsalis* affecting especially the functions of the eye, amblyopia, ptosis, diplopia, lagophthalmia, nystagmus, etc., being developed. [a. 18.]—**T. peripherica.** See **PERIPHERIC NEUROSTASIS**.—**T. pulmonalis.** See **PULMONARY TUBERCULOSIS**.—**T. purulenta.** See **ARTHOPOYOSIS**.—**T. salivaris.** Marasmus associated with and attributed to salivation. [a. 34.]—**T. saturnina.** The general marasmus caused by saturnism. [a. 34.]—**T. scrofulosa.** See **T. meseraica**.—**T. spasmodica.** See **SPASMODIC SPINAL PARALYSIS**.—**T. ulcerosa.** See **APOSTEMATOUS NEURASTHENIA**.—**T. urinalis.** See **DIABETES mellitus**.

TABESCANT, adj. Ta²b-e²s'n't. Lat., *tabescens* (from *tabere*, to moulder away). Ger., *verkümmern*. In botany, wasting; affected with tabes. [a. 35.]

TABETIC, adj. Ta²b-e²t'ik. Lat., *tabeticus*. Fr., *tabétique*. Ger., *tabetisch*, *abzehrnd*. Pertaining to or affected with tabes dorsalis; as a n. (Ger., *Tabetiker*, *Tabiker*), a person so affected.

TABIANO (It.). n. Ta²b-e-a²n'o. A place in Parma, Italy, where there are alkaline and sulphurous springs. [L. 49, 57 (a. 14).]

TABID, adj. Ta²b'id. Lat., *tabidus*. Fr., *tabide*. Pertaining to or affected with tabes. [a. 48.]

TABIFIQUE (Fr.), adj. Ta²b-e-fek. Causing or inducing tabes. [L. 41 (a. 14).]

TABIKER (Ger.). n. Ta²b-ek'e²r. See **TABETIC**.

TABITUDO (Lat.). n. f. Ta²b'ta²b'it'u²d'ud'yo. Gen., *-ud'inis*. From *tabidus*, melting. The condition of being tabetic. [a. 48.]

TABLE, n. Ta²b'l. Gr., *ράβηλα*, *ράβηλα*. Lat., *tabula*. Fr., *t. Ger. Tisch, Tafel*. A flat-topped article of furniture; a structure resembling a *t.* or its flat top. [a. 48.]—**Bed-t.** Of Isaacs, a *t.* fixed to the frame of an ordinary bedstead, so as to be folded away beneath it when necessary. ["Lancet," 1872, i, p. 764.]—**Inner t.** (of the cranial wall). The inner solid osseous part of the bones of the cranial wall. [C.]—**Operating t.** A chain of *t.* used in surgical operations. [E.]—**Outer t.** (of the cranial wall). The outer solid osseous portion of the bones of the walls of the cranium. [C.]—**T's of the skull.** The condensed inner and outer layers of the cranial bone which include the diploe. [L.]—**Vitreous t. of the skull.** See *inner t.* (of the cranial walls).

TABLET, n. Ta²b'le²t. Lat., *tabella*, *trochiscus*, *tabula*, *pastillus*. Fr., *tablette*. Ger., *Täfelchen*. Sp., *tableta*, *trocisco*. A lozenge having for its basis finely powdered sugar brought to the proper consistence with the aid of mucilage. The Ger. Ph., Finn. Ph., and Russ. Ph. sometimes order chocolate as a basis. [B; B, 95 (a. 38).] See also **LOZENGE**, **PASTILLE**, and **TROCHEE**.

TABLETTE (Fr.). n. Ta²b'le²t. See **TABLET**.—**T's antichlorotics.** See **TABELLE martiales**.—**T's antimonialis.** See **TROCHISCI stibiatii**.—**T's antiperiodiques.** See **MORSUM chinati**.—**T's chalybees.** See **TABELLE martiales**.—**T's de Kunkel.** See **TROCHISCI stibiatii**.—**T's de santonine.** See **Pastilli** (see *trochisci*) **SANTONINI**.—**T's de tribus.** See **SACCHARUM nigratum**.—**T's de Tronchin** (Swiss Ph.). Lozenges containing each 4 milligrammes of extract of opium and 8 of kermes mineral, and made from a mass consisting of 2 grammes of extract of opium, 4 each of kermes mineral and anise, 8 of licorice-juice, 30 of gum arabic, 10 of tincture of balsam of Tolu, and 125 of sugar. [B, 95 (a. 38).] See also **Tronchin's anticatartharal LOZENGES**.—**T's gommeuses kermésifères.** See **Tronchin's anticatartharal LOZENGES**.—**T's impériales.** See **MORSUM imperatoris**.—**T's pectorales.** See **TABELLE sulphuris**.—**T's vermifuges.** 1. Lozenges consisting of 14 parts of santonium, 7 of myrrh, 166 of sugar, and enough mucilage; or of 15 parts each of santonium and Corsican moss, 11 of ethiops mineral, 7 of cinnamon, 2½ of jalap resin, and 210 of sugar. 2. Lozenges consisting of 7 parts of chalk, 4 each of santonium, burned stag's horn, and Caroline thistle, 2 of diacrydium sulphuratum, 30 of sugar, 3 parts of cinnamon, and enough gum-arabic mucilage. [B, 119 (a. 38).]

TABLER (Fr.). n. Ta²b'le-a. See **APRON**.—**T. des Hottentotes.** See **Pudendal APRON**.—**T. élastique.** See **TUNICA abdominalis**.

TABLOID, n. Ta²b'loid. A tablet. [B.]

TABOURET (Fr.). n. Ta²b-bu-ra. See **THLASEPI**.

TABULA (Lat.). n. f. Ta²b'ta²b'u²l'u²l'a². See **TABLE** and **TABLET**. [a. 17.]—**Tabula cranii.** The tables of the skull.

TABULAI, adj. Ta²b'u²l'a²r. From *tabula*, a board. Resembling a table. [a. 48.]

TABULET, n. Ta²b'u²l'e²t. A lozenge or troche. [B, 117.]

TABUM (Lat.). n. n. Tab(ta²b'u²m'u²m). From *tabes*, a wasting away. See **ICOR** (3d def.) and **SANIES**.

TAC (Fr.). n. Ta²k. An old name for influenza. ["Rev. de thérap." Mar., 1892, p. 117 (a. 50).]

TACAMAHAC, n. Ta²k'a²m-a²-ha²k. Lat., *tacamahaca*. Fr., *tacamahac*, *tacamahague*, *tacamahaca*. Ger., *Takamahak*, *Takamahackharz*, *Holz und Tak*, *Schwammholzgummi*. 1. Any one of various bitter balsamic resins, especially American *t.* (1st def.) and East Indian *t.*, analogous to the turpentine in properties; formerly much used, but now only as a constituent of plasters and ointments.

[a. 35.] 2. See **North American t.**—**American t.** 1. A product of *Bursera tomentosa* or (according to some) of *Iceia heptaphylla* and *Iceia tacamahaca*. It occurs in light-yellowish or reddish-brown brittle pieces, irregularly shaped, varying in size from that of a mustard-seed to two inches in diameter, and often covered with powder. It consists of a resin and a small proportion of a volatile oil. [a. 35.] 2. See **West Indian t.** (3d def.). 3. See **North American t.** A soft, dark-green oleo-resin said to be derived from *Calophyllum tacamahaca*; not now known to commerce. [a. 35.]—**East Indian t.** Lat., *tacamahaca orientalis* (see *ostindica*, seu in *testis*, seu *sublimis*). Ger., *ostindisches Takamahak*, *Takamahak in Schalen*. A rather soft, yellowish or greenish variety, occurring rarely in commerce in gourd-shells covered with rush-leaves. It is ascribed to *Calophyllum inophyllum*. [a. 35.]—**North American t.** Lat., *tacamahaca communis* (see *vulgaris*), *balsamum Focot* (see *populi*). Ger., *nordamerikanisches Takamahak*. The balsamic resin obtained from the buds of *Populus balsamifera*. [a. 35.]—**West Indian t.** 1. See **American t.** (1st def.). 2. The resinous balsam of *Calophyllum calaba*. [a. 35.]

TACAMAHACA (Lat.). n. f. Ta²k'a²m-a²-ha²k'a². 1. Of Spach, a section of the genus *Populus*. 2. See **TACAMAHAC**.—**Emplastum tacamahacae.** Sp., *emplastro de tacamaca* [Sp. Ph.]. A plaster consisting of 2 parts of white wax, 4 of turpentine, and 8 of American tacamahac (1st def.). [B, 95 (a. 38).]—**Gummi t.** [Beslin].—**Tacamahac.**—**T. complanatum.** See **North American TACAMAHAC** and **American TACAMAHAC** (1st def.).—**T. carbagua.** See **CARABA**.—**T. in testis.** See **East Indian TACAMAHAC**.—**T. occidentalis.** See **West Indian TACAMAHAC**.—**T. orientalis.** See **East Indian TACAMAHAC**.—**T. résine** [Fr. Cod.] (Fr.). Sp., *tacamaca*, *tacamaca oficial* 6 *rajiza* [Sp. Ph.]. See **American TACAMAHAC** (1st def.).—**T. vulgaris.** See **North American TACAMAHAC** (1st def.).

TACAMAHQUE (Fr.), **TACAMAQUE** (Fr.). n's. Ta²-ka²-ma²-a²k, *ma²k*. See **TACAMAHAC**.—**FRAUK t.** The *Calophyllum calaba*. [a. 35.]—**T. terreuse** [Fr. Cod.]. See **TACAMAHACA (résine)**.

TACCA (Lat.). n. f. Ta²k'a²k'a²k'a². Fr. t. A genus of herbs, of the *Taccaceae*, which are an order of monocotyledons closely related to the *Amariyllideae*. [a. 35.]—**T. oceanica.** A Sandwich-Islands species furnishing Tahiti arrow-root. [a. 35.]—**T. palmata.** A species found in Java and the Moluccas. The tubers furnish a nourishing farina inferior to that of *T. pinnatifida*. [a. 35.]—**T. pinnatifida.** Fr. t. *pinnatifida*. Otaheite salep-plant, a plant, a species cultivated in the Sandwich Islands. Its tubers yield a variety of arrow-root especially suitable to cases of diarrhoea and dysentery. [a. 35.]

TACHE (Fr.). n. Ta²sh. See **MACULA** and **SPOT**.—**Meningeal t's.** See **Cerebral MACULE**.—**T. acoustique.** **T. auditive.** See **MACULA acustica**.—**T. aveugle.** See **Optic disc**.—**T's ardoisées.** See **MACULE ceruleae**.—**T's bleuâtres.** See **PELIOMA typhosum**.—**T's bleues.** See **MACULE ceruleae**.—**T. café au lait.** See **NEVUS t. brunus**.—**T. concolor.** See **LOCUS niger**.—**T. concolorale.** **T. congenitale.** See **NEVUS t. cribelle**.—**T. cribelle.** See **MACULE cribelle**.—**T. de brûlure.** See **EPRHELI ab igne**.—**T. de feu.** See **NEVUS flammeus**.—**T's de grossesse.** See **CHLOASMA gravidarum**.—**T. de la corne.** See **MACULA corneae**.—**T's de lait.** See **STROPHULUS**.—**T. de Mariotte.** See **Optic disc**.—**T's de mort.** See **MELASMA maculosum**.—**T. de naissance.** See **NEVUS**.—**T's de roussure.** See **SENTIO**.—**T. embryonnaire.** Of Coste, the embryonic area.—**T. germinative.** See **Germinial spot**.—**T. hémorrhagique.** See **NEVUS**.—**T's hépatiques.** See **MACULE hepaticae**.—**T. jaune.** See **MACULA lutea**.—**T's laiteuses.** 1. See **Lymphangial nodules**. 2. Of Ranvier, the white spots found in the omentum of new-born rabbits, composed of groups of hæmatopoietic cells. [K, 17.]—**Cf. Milk spot**.—**T's lentillaires.** See **MACULE lentillares** (3d def.).—**T's médico-légales.** See **MACULE medicinales forensis**.—**T. mélanienne.** See **NEVUS** and **Cf. MACULE nigre**.—**T's méningiennes.** See **Cerebral MACULE**.—**T. motrice.** See **Motorial-nerve END-PLATE**.—**T. noire.** **T. noirâtre.** **T. noir.** See **LOCUS niger**.—**T's ombrées.** See **MACULE ceruleae**.—**T. pigmentaire.** See **NEVUS pigmentosus**.—**T's polaires.** See **Extrusion GLOBULE**.—**T's rosées** (lentillaires). **T. rouges.** See **ROSEOLA typhosa**.—**T. rudimentaire.** Of Bizot, a superficial yellow spot symptomatic of a beginning atheromatous arterial degeneration. [L. 57 (a. 50).]—**T. sanguine.** See **NEVUS**.—**T. spermatique.** A spot or stain of semen on clothing, etc. [L. 49 (a. 14).]—**T's syphilitiques.** A pigmentary syphiloderm. [L. 87 (a. 50).]—**T. vasculaire.** **T. vineuse.** See **NEVUS flammeus**.

TACHETÉ (Fr.), adj. Tu²sh-ta. Spotted, macular.

TACHIA (Lat.). n. f. Ta²k'a²ch'ia². Fr., *tachie*, *tachi*. A genus of the *Gentianaceae*. [a. 35.]—**T. gujanensis.** A shrub of Guiana and the Rio Negro. The root is used as a febrifuge. [a. 35.]

TACHISTOSCOPE, n. Ta²k'ist'o-skop. From *τάχιστος*, most swift, and *σκοπεῖν*, to examine. Of Volkman, a sort of stereoscope in which a falling lid or diaphragm opens for a moment one or both of the holes through which the observer looks. [F.]

TACHOMETER, n. Ta²k'o-m'e²t-ur. From *τάχος*, swift, and *μέτρον*, a measure. See **HÆMOTACHOMETER**.

TACHYCARDIA (Lat.). n. f. Ta²k'a²ch'ia²-i²u²-ka²rd'i²a². From *τάχος*, quick, and *καρδία*, the heart. Fr., *tachycardie*, *Tachycardie*. Abnormally rapid action of the heart; especially the over-action of the heart observed during digestion or as the result of dyspepsia, etc. [Ott, "Wien. med. Woch.", Apr. 15, 1882.]—**Essential paroxysmal t.** Fr., *tachycardie essentielle paroxysmale*. Of Bouvier, *t.* due to a functional perturbation of cardiac innervation, and occurring in attacks of longer or shorter duration, the function of the heart becoming normal during the intervals between the attacks. ["Rev. de méd.", ix, 1889, p. 753 (a. 34).]—**Paroxysmal t.** Occurring at intervals; it may be due to reflex irritation. [a. 34.]—**T. strumosa exophthalmica** [Lebert]. See **Exophthalmic GOÏTRE**.

TACHYCARDIE (Fr.), n. Ta³-ke-ka³-r-de. See TACHYCARDIA. — **T. atropinique**. Tachycardia due to the action of atropine. [a, 18]. — **T. fébrile**. Tachycardia with fever. [a, 18].

TACHYGRAPH, n. Ta²k¹-gra³f. From ταχύς, swift, and γραφειν, to write. See HEMOTACHYROMETER.

TACHYATRIA (Lat.), n. f. Ta²k¹(ta²k¹)-i²(u²)-i²(e)-a²t(a²t)-ri-(re)²a². From ταχύς, swift, and ιατρία, medical treatment. Fr., tachyatrie. The art of healing speedily. [L, 50 (a, 14)].

TACHYPHRASIA (Lat.), n. f. Ta²k¹(ta²ch²)-i²(u²)-fraz(fra³s)-i²a². From ταχύς, rapid, and φράσις, speech. Ger., Poltem (2d def.), Brudeln (2d def.), Tachyphrasie. 1. Great rapidity of speech; observed in some forms of mental disease. [a, 34]. Cf. PARAPHRASIA prolepsis. 2. Very rapid, stammering speech. [L, 57 (a, 50)].

TACHYPNEA (Lat.), n. f. Ta²k¹(ta²ch²)-i²(u²)-p-ne²(no²-e)²a². From ταχύς, swift, and πνοή, breath. Fr., tachypnée. Ger., Tachypnoe. Abnormally rapid respiration.

TACHYTHANATOUS, adj. Ta²k¹-i²-tha²n²a²t-u²s. Gr., ταχύθαντος (from ταχύς, swift, and θάνατος, death). Lat., tachythanas. Fr., tachythanas. 1. Of Hippocrates, killing quickly. 2. Dying suddenly. [L, 50 (a, 14)].

TACHYTOME, n. Ta²k¹-i²om-i². From ταχύς, swift, and τμήν, a cutting. The art of operating quickly. [E, 6.]

TACON (Fr.), n. Ta²-ko²n². A parasitic disease of the *Crocus sativus* in which the bulb is converted into a blackish powder; also a disease of the vine, produced, according to De Bary, by the mycelium of *Sphaceloma ampelinum* attacking the tissues. [a, 35].

TACT (Fr.), n. Ta²kt. See TOUCH. — **T. médicale**. Instinctive ability to judge of the character of a disease and the means of attacking it. [L, 41 (a, 14)].

TACTILE, adj. Ta²kt¹i². Gr., αἰσῆς. Lat., tactilis (from tangere, to touch). Fr., t., tangible. Ger., fühlbar, empfindbar. Pertaining to the sense of touch. [L, 343].

TACTUS (Lat.), n. m. Ta²kt¹(ta²kt)¹u²s. Gen., tact¹us. From tangere, to touch. See TOUCH.

TEDIUM (Lat.), n. n. Ted¹(ta²3'e²d)-i²-u²m(u²m). From tædēf, it wearies me. Ger., Ekel, Ueberdross. Weariness, loathing. [L, 50 (a, 14)]. — **T. vitæ**. The condition of being weary of life (a symptom of insanity). [a, 48].

TENIA (Lat.), n. f. Ten¹(ta²3'e²n)-i²a². Gr., τενία (from τενειν, to stretch). Fr., t. Ger., Leisten, Leiste (1st def.), Bandwurm (2d def.). 1. A ribbon or bandlet; a bandage; a tape-like structure; in the pl., teniae, the ligamenta coli. [E, 16 (K)]. 2. The typical genus of the *Teniada*, or *Teniadæ* (Ger., Bandwürmer), which are a family, order, etc., of the *Cestoda*, characterized by a distinct head (or attached extremity) with four suckorial discs with or without a double or single row of hooks, and by a band-like body divided into segments which, when mature, are bisexual. The adults inhabit the intestinal canal of vertebrates, nearly every genus of which has its specific T. In their larval state (cysticercus) they are found in both vertebrates and invertebrates. [L.] — **T. à anneaux courts** (Fr.). See BOTRIOCEPHALUS latus. — **T. arietina** (Weinland). A doubtful species, properly referred to *T. solium* or *T. mediocanellata*. [L, 24]. — **T. acanthothorax**. An unknown species of the cysticercus of which has been found in man. [L, 16]. Cf. CYSTICERCUS acanthothorax. — **Tænia acustica**. See AUDITORY STRIE. — **T. ægyptica**. See *T. nana* (1st def.). — **T. à épines** (Fr.). — **T. à longs anneaux** (Fr.). — **T. à longues articulations** (Fr.). See *T. solium* (1st def.). — **T. à mamelons ombilicæux** (Fr.). See BOTRIOCEPHALUS latus. — **T. aprî**. See *T. marginata*. — **T. armata** (humana). — **T. armé** (Fr.). — **T. articulés demittens**. — **T. bandelette** (Fr.). See *T. solium* (1st def.). — **T. bovinæ**. See *T. marginata*. — **T. canina**. See *T. elliptica*. — **T. capensis**. See *T. solium* (1st def.). — **T. caprina**. See PENTASTOMA denticulatum and *T. marginata*. — **T. cateniformis**. See *T. elliptica*. — **T. cateniformis lupi**. See *T. marginata*. — **T. cellulosa**. See CYSTICERCUS cellulose and *T. solium* (1st def.). — **T. cerebialis**. See *T. cœnurus*. — **T. cinerea** foveæ rhomboideæ. See LAMINA cinerea. — **T. cœnurus**. A variety found in the intestine of the dog. The larva is the *Cœnurus cerebialis*. [B, 82; L, 16]. — **Tænia coli**. See LIGAMENTA coli. — **T. cornæ**. — **T. corporis striati** (fibrosa). See *T. semicircularis*. — **T. cucumerina**. Ger., Hundebandwurm, Hundekirbiswurm. 1. See *T. elliptica*. 2. The *T. elliptica* as found in dogs, sometimes considered a distinct species or variety. [L.] — **T. cucumerina elliptica**. A species including both *T. cucumerina* (2d def.) and *T. elliptica* regarded as varieties of one species. [B, 82]. — **T. cucurbitina** (Block). See *T. solium* (1st def.) and *T. marginata*. — **T. cucurbitina**. See *T. mediocanellata*. — **T. cucurbitina plana**. See *T. solium* (1st def.). — **T. cuneiceps**. See *T. elliptica*. — **T. degener**. See *T. solium* (1st def.). — **T. de la première espèce** (Fr.). See BOTRIOCEPHALUS latus. — **T. de la seconde espèce** (Fr.). See *T. solium* (1st def.). — **T. dentata**. See BOTRIOCEPHALUS latus. — **T. mediocanellata**. — **T. solium (1st def.). — **T. denticulata**. Fr., t. du bœuf. A species found in cattle in France and Germany. [L, 17]. — **T. des tropiques** (Fr.). See BOTRIOCEPHALUS tropicus. — **T. du bœuf** (Fr.). See *T. denticulata*. — **T. du mouton** (Fr.). See *T. expansa*. — **T. e Capite Bonne Spel**. See *T. solium* (1st def.). — **T. echinococcus** (scolecipariens). A small species inhabiting the dog and the wolf. The larva is the echinococcus of man. It is seldom more than $\frac{1}{2}$ inch long, and has only four segments. The head has a double row of hooks, thirty to forty in number, and four suckers. [L, 16]. — **T. elliptica**. Ger., Katzenbandwurm, Einsiedlerwurm. A species closely related to the *T. cucumerina* of the dog, and found in cats and dogs, also in one case (by Eschricht) in man. It is from six to**

eight inches long, with an uncinated head with four suckers. The reproductive organs are double in each segment and situated on the margin. The joints are ovoid. The scolices are probably found in insects. They have been found in the dog-louse. [L, 16]. — **T. eminentia pyramiformis**. See *T. semicircularis*. — **T. en échelle** (Fr.). See *T. solium fenestrata*. — **T. en sole** (Fr.). See *T. serrata*. — **T. equina**. See *T. perfoliata*. — **T. ex cysticercus tenuicollis**. See *T. marginata*. — **T. expansa**. A species found in sheep in Germany. [L, 17]. — **T. felis**. See *T. elliptica*. — **T. fenestrata**. See *T. solium* (1st def.). — **T. fibrosa striati**. See *T. semicircularis*. — **T. finna**. See CYSTICERCUS cellulose and *T. solium* (1st def.). — **T. flavomaculata**. — **T. flavopunctata**. A species with yellowish spots in the middle of the segments. Only incomplete specimens have been observed, and in one case only. [L, 17]. — **T. fornicis**. The lateral edges of the body of the fornix. [L, 332]. — **T. fossæ** (see foveæ) rhomboideæ. See ALA pontis. — **T. globosa**. See CYSTICERCUS tenuicollis and *T. marginata*. — **T. granulosa**. See ECHINOCOCCUS hominis. — **T. grisea**. See BOTRIOCEPHALUS latus. — **T. hippocampi**. See CORPUS fimbriatum. — **T. hirudinacea**. See ECHINORHYNCHUS gigas. — **T. humana armata**. See *T. solium* (1st def.). — **T. humana inermis**. See BOTRIOCEPHALUS latus. — **T. hydatigena**. See *T. marginata and CYSTICERCUS cellulose. — **T. hydatigena anomala** (see analla). See CYSTICERCUS cellulose and *T. solium* (1st def.). — **T. hydatula**. See *T. marginata*. — **T. lanceolata**. See PENTASTOMA tenuicollis. — **T. lata**. See BOTRIOCEPHALUS latus and *T. solium* (1st def.). — **Tænia ligamentosa coli**. See LIGAMENTA coli. — **T. lophosoma**. A species described by Cobbold, probably a deformed *T. solium* or *T. mediocanellata*. [L, 16, 20]. — **T. lupina**. See *T. marginata*. — **T. madagascariensis** [Davaline]. A species infesting man found in Madagascar. [L, 24]. — **T. magna**. See *T. plicata*. — **T. mamillaria**. A species found in the large intestine of the horse. [L, 17]. — **T. marginata**. A species found in the dog and the wolf. The larval form is the *Cysticercus tenuicollis*. [L, 16]. — **T. mediocanellata**. Beef tapeworm; a species formerly regarded as a *T. solium* (1st def.), but it differs from that in being larger and having a non-uncinate head, with four large suckers surrounded by dark spots. Its cysticercus (*Cysticercus bovis*) inhabits the muscles of cattle. [L, 16]. — **Tænia medullares**. See AUDITORY STRIE. — **T. membranacea**. See BOTRIOCEPHALUS latus. — **T. nana** (Fr.). — **T. nana**. 1. Dwarf tapeworm; an Egyptian species found in the small intestine; it is from 8 to 10 lines long, and has from 150 to 170 segments, with an uncinated quadrangular head. Its cysticercus is unknown. [L, 16, 19]. 2. Of Van Beneden, see *T. echinococcus*. — **T. osculis marginalibus solitariis**. See *T. solium* (1st def.). — **T. ovilla**. See *T. marginata*. — **T. ovina**. See *T. expansa*. — **T. perfoliata**. A species found in the small intestine of the horse. [L, 17]. — **T. pinealis**. See RECESSUS suprapinealis. — **T. plus choroidei ventriculi quarli**. See ALA pontis. — **T. plicata**. — **T. plissée** (Fr.). A species found in the small intestine, and at times in the stomach, of the horse. [L, 17]. — **T. pontis**. Of Henle, a small lamina of white substance arising in the white centre of the cerebellum, encircling on each side the crus cerebri, at the anterior edge of the pons Varoli, and losing itself in the fibres of the crus on its medial surface. [L, 16 (K)]. — **T. prima**. See BOTRIOCEPHALUS latus. — **T. proglottina**. A species found in fowls. [L, 17]. — **quadratohe**. See *T. perfoliata. — **T. recessus pinealis**. The peduncle of the pineal gland. [L, 16 (K)]. — **T. recessus suprapinealis**. The prolongation of the choroid plexus of the third ventricle into the recessus pinealis. [L, 332]. — **T. rhinaria**. See PENTASTOMA tenuicollis. — **T. saginata**. See *T. medio-canellata*. — **T. sans épine** (Fr.). See BOTRIOCEPHALUS latus and *T. solium* (1st def.). — **T. secunda**. See *T. solium* (1st def.). — **T. semicircularis**. Fr., bandelette striée (ou demi-circulaire). Ger., Grenzstreif, Horyndel. A narrow, semi-transparent, light-colored streak in the lateral ventricle between the nucleus caudatus and the optic thalamus. It is continuous with the white tissue of the roof of the descending cornu. [L, 142, 332]. — **T. serrata**. A species infesting dogs. [B, 82]. — **T. simie**. See *T. marginata*. — **T. sinus rhomboidei**. See ALA pontis. — **T. solitaria**. See *T. solium* (1st def.). — **T. solium**. Fr., vers solitaire, t. bandelette, t. armé, t. à épine. Ger., Menschenbandwurm, Kettenwurm, laing-**

TENIA SOLIUM (WITH DIFFERENT VIEWS OF THE HEAD). [A, 327.]

gliedriger (oder kurbisförmiger, oder gezählter, oder bewaffneter) Bandwurm. 1. Solitary (or armed, or pork tapeworm; a cestode zoon found in the intestines of man. In its mature condition it is said to have attained the length of over sixty yards. It has a globular head of about the size of a pin-head, provided with a double row of hooks and with four sucking discs. The neck is about half an inch long and continuous with the body, which is at first marked with transverse lines that, gradually separating more and more, leave interspaces. These parts finally become distinct segments, which when mature are twice as broad as they are long, and are each provided with complete male and female organs of generation. After impregnation of a segment, embryos are developed in its interior, and it passes out of the intestine, when the embryos are scattered by its rupture. The embryos, still in their

envelopes, are swallowed by a pig, where they rupture their shells and bore in the tissues of their host, causing measles (q. v., 2d def.). There, losing their hooks, they are quiescent, and are known as the *Cysticercus cellulosus*. After being ingested by man, they develop hooks, and, having attached themselves to the intestinal walls, begin to grow, increasing at the free extremity until they assume the above-mentioned form. [L.] 2. Of Bremser, see *T. mediocanellata*.—*T. solum fenestrata* (see *scalariformis*). A variety of *T. solum* (first observed by Mazars de Cazelles in 1780, and regarded by him as a distinct species) in which some of the segments are completely or partially perforated. The defect of substance is not associated with any demonstrable pathological change in the surrounding tissues, but the genital apparatus is wanting in the completely perforated segments. [M. Notta and Marfan, "Progr. méd." 1886 ("Cribl. f. d. med. Wissensch." Sept. 18, 1886, p. 616) (B.).]—*T. stigmatibus lateralibus*. See *T. solum* (1st def.).—*T. striata*. See *T. semicircularis*.—*T. Tarini*. See *Lamina cornea* (1st def.).—*T. tecta*. See *LIGAMENTUM tectum*.—*T. tenella*. 1. A species which, according to Cobbold, develops the *Cysticercus ovis*. According to Stein, it is only a variety of *T. solum*. [B. 82.] 2. Of Pallas, see *BOTHRIOPHEALUS latus*.—*T. terminalis*, *T. thalassii* optict. See *T. semicircularis*.—*Tenias*. Valsalva. See *LIGAMENTA coli*.—*T. ventriculi tertii*. See *CORPUS fimbriatum*.—*T. vermicularis*.—*T. marginata*.—*T. vesicularis*. See *T. caenurus*.—*T. vesiculosa socialis cerebri*. See *CENURUS cerebri*.—*T. veterum*. See *BOTHRIOPHEALUS latus*.—*T. visceralis socialis granulosa*. See *T. echinococcus*.—*T. vulgaris*. See *T. solum* and *BOTHRIOPHEALUS latus*.—Unarmed *T.* See *BOTHRIOPHEALUS latus*.

TENIACIDE, n. Ten¹²-a²-sid. From *ravia*, a tapeworm, and *cadere*, to slay. A medicine destructive to tapeworms. [A. 35.]
TENIÆFORMIS (Lat.), adj. Ten(ta²-e²m)-i²-e²(a²-e²)-fo²rm'-is. From *ravia*, a ribbon, and *forma*, form. Fr., *rubané* (1st def.). Ger., *tenienig* (1st def.). *Entenienig* (2d def.). Resembling a narrow band or ribbon. 2. Flat, long, and constricted at intervals; shaped like a tapeworm. [A. 35.]

TENIAFUGE, n. Ten¹²-a²-fu²j. From *ravia*, a tapeworm, and *fugare*, to put to flight. A medicine expelling tapeworms. [A. 35.]

TENIARRHYNCUS (Lat.), n. f. Ten(ta²-e²m)-i²-a²(a²r)-ri²n²k-(ru²n²k)'us(u)s. From *ravia*, a band, and *rhynx*, a snout. See *TENIA* (2d def.).—*T. mediocanellata*. See *TENIA mediocanellata*.

TENICIDE, n. Ten¹²-i²-sid. See *TENIACIDE*.

TENIFUGE, n. Ten¹²-i²-fu²j. See *TENIAFUGE*.

TENIN, n. Ten¹²-i²-n. Fr., *ténine*, *ténine*. Ger., *Täniin*. See *KOSIN*.

TENIOLA (Lat.), n. f. Ten(ta²-e²m)-i²(i²)-o²l-a². Dim. of *ténia* (q. v.). 1. See *FASCIOLA* (1st def.). 2. The peduncle of the pineal gland. [J. 3 (K).] 3. The genus *Torula*. 4. The genus *Ornithogalum*. [A. 35.]—*T. cinerea*. Of Wenzel, a projection on the lower lateral boundary of the fourth ventricle. It is continuous with the restiform body just before its entrance into the cerebellum. [J. 6 (K).]—*T. conarii*. The peduncle of the pineal gland. [J. 2 (K).]—*T. teniate corporis callosi*. Ger., *Entenienig* (2d def.). The denunciations forward of the peduncles of the septum lucidum to the stria longitudinalis. [L. 332.]

TENIOPHOBIA (Lat.), n. f. Ten(ta²-e²m)-i²-o²(o²)-fo²b(fa²b)'i²-a². From *ravia*, a tapeworm, and *phóbos*, fear. A morbid dread of being the subject of tapeworm. [A. 34.]

TAFEL (Ger.), n. Ta²sf'e²l. See *TABLE* and *TABLET*.—*Lister's Schutzt*. See *LISTERIAN DRESSING*.—*Rückent*. Of Remak, the upper wall of the protovertebral vesicle (the muscular plate) after its separation from the rest of the protovertebral structure. [A. 8.]

TÄFELCHEN (Ger.), n. Täf'e²l-chē²e²n. See *PASTILLE*, *TABLET*, and *TROCHE*.

TAFFET (Ger.), n. Ta²sf'fe²t. See *TAFFETA*.—*Klebert*, *Klebt*. See *COURT PLASTER*.—*Schutzt*. Protective silk. [A. 14.]

TAFFETA, n. Ta²sf'e²t-a². Lat., *taffetas*. Fr., *t. taffetas*. Ger., *Taffet*, *Taft*. A thin silk fabric. [A. 48.]—*T. d'Angleterre* (Fr.). See *COURT PLASTER*.

TAFFETAS (Lat.), n. n. Ta²sf(ta²sf'e²t-a²s(a²s)). Fr., *t.* See *TAFFETA*.—*T. adhesivum*. See *COURT PLASTER*.—*T. épispassique* (Fr.). See *SPARADRAP vesicans*.—*T. gommé* (Fr.). See *COURT PLASTER*.—*T. vesicans*. See *SPARADRAP vesicans*.

TAFIA, n. Ta²sf'i²-a². Fr., *t.* An inferior kind of rum. [B. 97 (A. 14).]

TAFT (Ger.), n. Ta²sf't. See *TAFFETA*.—*Gichtt*. Tafteta covered with a layer of varnish prepared by mixing 1 part of turpentine, 2 parts of resin, 4 of minium, and 12 of litharge with 48 of boiling linseed-oil; used to cover limbs affected with gout. [B. 49 (A. 14).]

TAGETES (Lat.), n. f. Ta²j(ta²j)-et(at)'ez(as). From *Tages*, a Tuscan divinity. Fr., *tagète*. Ger., *Sammthlume*. Marigold; a genus of composite herbs. The *Tageteæ* (Fr., *tagétées*) are: Of Reichenbach, a division of the *Amphimanthas*; of De Candolle, a division of the *Tagetinesæ* (a division of the *Helianthoides* (Cassin) or a subtribe [Bentham and Hooker] of the *Helentoides*). [A. 35.]—*T. erecta*. Fr., *tagète droite*, *grand aillet* (ou *rose d'Inde*). Sp., *flor de muerto*, *zenpolzochochil* (Mex. Ph.). African marigold; indigenous to Mexico, but now widely cultivated. The capitules are stimulating, emmenagogue, and anthelmintic, and are often substituted for calendula. The roots and fruits are purgative. [A. 35.]—*T. glandulifera*, *T. glanduligera*, *T. glandulosa*. The *chinchin* of Peru. It contains a vermifuge oleosin. The aromatic and bitter leaves are used as a tonic. [A. 35.]—*T. lucida*. Fr., *tagète luisante*. Sp., *periquillo*, *yerba de Santa Maria de tierra dentro* (Mex. Ph.). Sweet-scented Mexi-

can marigold; used as an antiperiodic and sometimes instead of hypericum. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601; A. 35.]—*T. patula*. Fr., *tagète touffue*, *petit aillet* (ou *rose d'Inde*). Ger., *gemeine Samthlume*, *Studentenblume*, *Todtenblume*. French marigold; a native of Mexico, used like *T. erecta*. The flowers were formerly official as *flores africanæ*. [A. 35.]

TAGMA (Lat.), n. n. Ta²g(ta²g)'ma². Gen., *tag'matos* (-*matia*). From *τάγμα*, a company. Of Pfeffer, an aggregate of molecules (e. g., a pleon or a micella). [A. 35.]

TAIE (Fr.), n. Te². See *LEUCOMA* (4th def.).

TAILE, n. Tal. Gr., *τάπος*, *οὐρά*. Lat., *cauda*, *ura*. Fr., *queue*. Ger., *Schweanz*. In the human embryo, a conical caudal appendage visible during the fifth and sixth weeks; in other mammals, the vertebrae posterior to the sacrum, together with their muscles and integument; in birds, the feathers, or rectrices, taken collectively; in serpents, the part of the body posterior to the vent; in fishes, (usually) the part of the body posterior to the anal fin; in general, any slender terminal prolongation. [A. 27. 35.]—*T. of a muscle*. The portion near its insertion when considerably attenuated. [L.]—*T. of the epididymis*. See *GLOBUS minor* of the *epididymis*.—*T. of the pancreas*. The left and smaller portion of that gland. [L.]

TAILLADE (Fr.), n. Ta²-el-ya²d. A cut; a gash. [A. 34.]

TAILE (Fr.), n. Ta²-el-y'. See *CYSTOTOMY* and *LAPAROTOMY*.—*T. biliaire*. See *CHOLECYSTOTOMY*.—*T. cébrairienne*. See *CEREBRO-OPERATION*.—*T. du rein*. See *NEPHROTOMY*.—*T. hypogastrique*. See *Suprapubic cystotomy*.—*T. intestinale*. See *COLOTOMY*.—*T. latérale*, *T. latéralisée*. See *Lateral cystotomy*.—*T. périnéale médiane*. See *Median cystotomy*.—*T. postérieure*. See *Rectal cystotomy*.—*T. quadrilatérale*. An operation for large vesical calculi which consists in dividing the prostate obliquely. [E. 21.]—*T. rénale*. A variety of nephrotomy in which an opening is made into the pelvis of the kidney for the purpose of establishing a renal fistula. [D. Mollière, "Lyon méd.," Feb. 15, 1885, p. 207.]—*T. stomacale*. The operation of making a temporary opening into the stomach, as for the extraction of a foreign body or in order to dilate the pyloric orifice (as opposed to *gastrostomy*, in which the opening is designed to be permanent). [L. H. Petit, "Union méd.," April 10, 1886, p. 577.]—*T. suspubienne*. See *Suprapubic cystotomy*.—*T. vésicale*. See *CYSTOTOMY*.

TAKAMAHAK (Ger.), n. Ta²k-a²-ma²-ha²k'. See *TACAMAHAC*.

TALA, n. 1. In Brazil, the *Celtis tala* or a variety of it. 2. In Ceylon, the *Cassia abuss*. 3. The genus *Opuntia*. [A. 35.]

TALALGIA (Lat.), n. f. Ta²l(ta²l)-a²l(a²l)'g-i²-a². From *talus* the heel, and *algos*, pain. Fr., *talgalgie*. A pain in the heel, caused by osteitis or rheumatism. [A. 34.]

TALAMONACCIO (It.), n. Ta²-a²l-mo²n-a²t'che-o. A place in Grosseto, Italy, where there is a sulphurous spring. [L. 49 (A. 14).]

TALAUMA (Lat.), n. f. Ta²l-a²m(a²)-u²m-a². Fr., *t.*, *taloume*. A genus of the *Magnoliacæ*. [A. 35.]—*T. Plumieri*. Fr., *bois-cachiman* (ou *pin*). A West Indian tree. The bark and seed are used as tonics; the aromatic buds, shoots, and leaves in scurvy, gout, dropsy, etc.; and the flowers to aromatize liqueurs. The fruit-cones exude an acid balsam used in catarrhs. [A. 35.]

TALC, n. Ta²lk. Lat., *talcus*, *talcum*. Fr., *t.* Ger., *Talk*. A mineral consisting chiefly of tetramagetic pentasilicate, Mg₃Si₄O₁₀, and containing traces of iron and alumina. It is a colorless or grayish substance, unctuous to the touch, and insoluble in water and in alcohol. It is used, powdered, as a lubricant, as a polishing material, and as a constituent of dusting powders. [B.]

TALCIUM (Lat.), n. n. Ta²ls(ta²l)'k-i²-u²m(u²m). Fr., *t.* Ger., *T.* See *MAGNESIUM*.

TALCUM (Lat.), n. n. Ta²lk(ta²l)'k-i²-u²m(u²m). See *TALC*.—*Pulvis talci salicylicus*. See *PULVIS salicylicus cum talco*.—*T. nephriticum*. See *NEPHRITIS*.—*T. pulveratum*. See *TALC*.

TALG (Ger.), n. Ta²lg. See *SUET* and *TALLOW*.—*Gallent*. See *CHOLESTERIN*.—*Ochsent*. See *SERBUM bovinum*.—*Tartig*. See *SEACIOUS*.—*T'säure*. Stearic acid. [B.]—*T'seife*. See *SAPON ANIMALIS*.—*T'stein*. See *STEARITE*.

TALGBAUM (Ger.), n. Ta²lg(ba²)-u²m. 1. See *MYRICA cerifera*. 2. Any one of several species of *Stillingia*. [A. 35.]

TALGDRÜSE (Ger.), n. Ta²lg'dru²s'e². A sebaceous gland. [L.]—*Meibomische T'n*. See *MEIBOMIAN GLANDS*.

TALIERA (Lat.), n. f. Ta²l-i²-er(a²)'a². See *CORYPÆA*.—*T. silvestris*. A sago-yielding palm of the southern Asiatic islands. The juice of the leaves is used as an emetic, and the root-fibres, in combination with those of *Emilia sonchifolia*, are chewed in diarrhoea. [A. 35.]

TALPEDIC, adj. Ta²l-i²-ped'i²k. Pertaining to or affected with talipes. [A. 48.]

TALIPES (Lat.), n. m. Ta²l(ta²l)'i²-p-ez(as). Gen., -i²-p'edis. From *talus*, the ankle, and *pes*, the foot. Fr., *piéd bot*. Ger., *Klumpfuß*. A distorted shape of the foot.—*Spasmodic* *T.* A variety of non-congenital *T.* due to the spasm or paralysis of certain muscles. [E. 14.]—*T. arcuatus*. See *T. curvus*.—*T. calcaneovalgus*. The condition in which the foot is everted with depression of the heel. [E.]—*T. calcaneo-varus*. A variety in which the foot is inverted with depression of the heel.—*T. calcaneus*. See *CALCANEA*.—*T. curvus*. An exaggerated curvature of the arch of the foot, the anterior part of the foot being drawn backward. [A. 520 (A. 29).]—*Arch. of Ped.* Nov., 1891, p. 864.]—*T. equino-valgus*. A variety in which the foot is everted as well as extended. [E.]—*T. equino-varus*. A variety in which the foot is inverted, torsion, and depression of the forepart of the foot with elevation of the heel. [A. 520 (A. 29).]—*T. equinus*. Fr., *piéd équín*. Depression of the anterior portion of the foot to a

greater or lesser degree, so that the patient walks without touching the ground with the heel. [a, 29].—**T. planus**, **T. spurio-valgus**. See **FLAT-FOOT**.—**T. valgus**. Splay-foot; a deformity characterized by depression of the arch of the foot, so that the inner side of the sole touches the ground. The sole may be everted. The deformity is an alteration in the positions of the astragalus, the os calcis, and the scaphoid bone. [Reeves (a, 34).]—**T. varus**. Cross-foot; a t. in which the foot is twisted inward. [a, 34.]

TALIPOMANUS (Lat.), n. f. $Ta^{2l}(ta^{2l})ip\text{-}o^{2m}a^{2n}(a^{2n})u^{2s}$ (u^{2s}). From *talipes*, club-foot, and *manus*, the hand. Club-hand; a more or less permanent deviation of the hand at the wrist in flexion, extension, adduction, or some intermediate posture. [Reeves (a, 34).]—**Cubital t.** See **Ulnar t.**—**Dorsal t.** See **T. extensa**.—**Dorso-radial t.** T. in which the hand is in a state intermediate between extension and adduction. [a, 34].—**Palmar t.** See **T. flexa**.—**Radial t.** T. in which the hand is in a state of adduction. [a, 34].—**Radio-palmar t.** T. in which the hand is in a state intermediate between adduction and flexion. [a, 34].—**T. extensa**. T. with the hand in a state of extension. [a, 34].—**T. flexa**. T. with the hand in a state of flexion. [a, 34].—**T. pronata**. T. with the hand in a state of pronation. [a, 34].—**T. supinata**. T. with the hand in a state of supination. [a, 34].—**T. vara**. See **T. pronata**.—**Ulnar t.** T. with the hand in the state of adduction. [a, 34.]

TALKERDE (Ger.), n. $Ta^{2l}lk\text{-}e^{2rd}\text{-}e^{2}$. See **MAGNESIA**.—**Kohlensaure T.** Medicinal magnesium carbonate. See under **MAGNESIUM carbonate**.—**Reine T.** See **Calcined MAGNESIA**.

TALLINE (Fr.), n. $Ta^{2l}en$. Thalline.

TALLOISES (Fr.), n. $Ta^{2l}lwa^{2r}$. A place in the department of Haute-Savoie, France, where there is a sulphurous spring. [L, 49 (a, 14).]

TALLOW, n. $Ta^{2l}o$. See **SEBUM** (1st def.).—**Chinese t.** The waxy substance covering the seeds of *Stillingia sebifera*. [a, 35].—**Mafuna t.** See **MAFUNA**.—**T. tree**. The *Stillingia sebifera* (of China) and the *Pentadesma butyracea* (of Sierra Leone). [a, 35].—**Vegetable t.** A t.-like substance extracted from a plant. [a, 35].

TALO-CALCANEAL, adj. $Tal\text{-}o\text{-}ka^{2l}\text{-}kan\text{-}e^{2l}$. From *talus*, the ankle, and *calcaneum* (q. v.). See **ASTRAGALO-CALCANEAL**.

TALON (Fr.), n. $Ta^{2l}lo^{2n}$. See **HEEL**.

TALONNIÈRE (Fr.), n. $Ta^{2l}lo^{2n}\text{-}e\text{-}e^{2r}$. A small cushion of hair, used to prevent pressure on the heel in treating fracture of the leg. [E.]

TALO-SCAPHOID, adj. $Tal\text{-}o\text{-}ska^{2l}\text{-}oid$. See **ASTRAGALO-SCAPHOID**.

TALPA (Lat.), n. f. $Ta^{2l}p(ta^{2l}p)/a^{2}$. Gr., σκάλοψ, σπάλαξ. Fr., *taupe*. Ger., *Maulwurf* (1st def.). A genus of soft-furred burrowing mammals of the *Talpidae*, or moles (a family of the *Insectivora*). [a, 35].—**T. europæa**. The common European mole. Formerly the entire animal carbonized (*talpe combustæ*) was used in scrofula, goitre, etc., and the blood (*sanguis talpæ*) in various diseases. [a, 35.]

TALPAFOLIE (Fr.), n. $Ta^{2l}pa^{2}\text{-}fo\text{-}le$. For deriv., see **TALPA** and **FOLIE**. Of Guislain, a variety of mania in which the patient digs up the earth like a mole. [a, 34.]

TALUS (Lat.), n. m. $Tal\text{-}(ta^{2l})u^{2s}(u^{2s})$. See **ASTRAGALUS** (3d def.).

TALUSROLLE (Ger.), n. $Ta^{2l}u^{2s}\text{-}ro^{2l}\text{-}le^{2}$. See **SPRUNGROLLE**.

TAMARACK, n. $Ta^{2m}a^{2r}\text{-}a^{2k}$. See **LARIX americana**.

TAMARACEOUS, adj. $Ta^{2m}a^{2r}\text{-}i^{2p}\text{-}ka\text{-}shu^{2s}$. Resembling the genus *Tamarix* of the *Tamaricaceæ*. *Tamariceæ*, *Tamaricina*, or *Tamariceina*, which are essentially the *Tamariceæ* of Bentham and Hooker. [a, 35.]

TAMARIN (Fr.), n. $Ta^{2m}ma^{2r}\text{-}a^{2n}$. See **TAMARIND** and **TAMARINDUS**.—**Conserve de t's** [Fr. Cod.]. A preparation made by evaporating 50 parts each of purified pulp of tamarinds and water and 120 of powdered sugar till reduced to 200. [B, 95 (a, 38).]—**Pulpe brute de t's**. See **TAMARINDUS** (2d def.).—**Pulpe de t's**. See **PULPA TAMARINDORUM depurata**.—**Tisane de t's**. See **Decoctum TAMARINDORUM**.

TAMARIND, n. $Ta^{2m}a^{2r}\text{-}i^{2nd}$. Lat., *tamarindus*. Fr., *tamarin*. Ger., *Tamarinde*. The genus *Tamarindus*; also the fruit of *Tamarindus indica* or its preserved pulp. The *Tamarindeæ* are a division of the *Cassiopeæ*. [a, 35].—**Bastard-t.** See *ACACIA Julibrissin*.—**Black t.** 1. See **DIALIUM guineense**. 2. See *East Indian t.*—**Brown t.** See *West Indian t.*—**East Indian t.** The fruit of *Tamarindus indica* preserved without the use of sugar, this giving it a strong acid taste. [a, 35].—**Egyptian t's**. Flat-tined black cakes prepared in Arabia and on the upper Nile from the softer part of t's. [a, 35].—**Guinea t.** The fruit of *Adansonia digitata*. [a, 35].—**Manilla t.** The fruit of *Pithecolobium dulce*. [a, 35].—**Red t.** See *West Indian t.*—**T. pulp**. 1. See **TAMARINDUS** (2d def.). 2. See **PULPA TAMARINDORUM depurata**.—**T. tree**. See *Tamarindus indica*.—**T. water**. A drink made by infusing *West Indian t.* in cold water; used to allay thirst in fevers.—**Vetivet t.** See **DIALIUM guineense**.—**West Indian t.** The form of t, usually occurring in the shops, consisting of the pulpy internal portion of the fruit mixed more or less with syrup. The sugar with which it is preserved tempers the acidity of the pulp. [a, 35.]

TAMARINDA (Lat.), n. f. $Ta^{2m}(ta^{2m})a^{2r}(a^{2r})i^{2nd}a^{2}$. See **TAMARINDUS** (2d def.).

TAMARINDE (Ger.), n. $Ta^{2m}a^{2r}\text{-}i^{2nd}\text{-}e^{2}$. See **TAMARINDUS**.—**Tamus**. See **TAMARINDUS** (2d def.).

TAMAR INDIEN (Fr.), n. $Ta^{2m}a^{2r}\text{-}i^{2nd}\text{-}de\text{-}a^{2n}$. A proprietary purgative confection consisting apparently of a pasty cake containing senna, inclosed in chocolate and sugared on the outside.

TAMARINDUS (Lat.), n. f. $Ta^{2m}(ta^{2m})a^{2r}(a^{2r})i^{2nd}u^{2s}(u^{2s})$. Fr., *tamarin* (1st def.), *tamarinier* (1st def.), *tamarinier (pulpe)*

(2d def.), *pulpe brute de tamarins* (2d def.). Ger., *Tamarinde* (1st def.), *Tamarindenbaum* (1st def.), *Tamarindenmus* (2d def.). Sp., *tamarindo*. 1. A genus of the *Leguminosæ*. 2. The preserved pulp of the fruit of *T. indica*. [B, 95 (a, 38); a, 35].—**Conserve tamarindorum**. See **PULPA TAMARINDORUM depurata** and **Conserve de TAMARINS**.—**Decoctum tamarindorum**. Fr., *tisane de tamarins*. A decoction made by boiling 1 part of purified tamarind pulp for a quarter of an hour with water enough to make 20 parts [Belg. Ph.]; by digesting 1 part of East Indian tamarinds without the seeds for half an hour with water enough to make 12 parts [Finn. Ph.]; or by letting 1 part of tamarind pulp stand an hour after stirring in 50 parts of boiling water, and straining [Fr. Cod.]. [B, 95 (a, 38).]—**Decoctum tamarindorum compositum** [Belg. Ph.]. A decoction made by boiling 1 part of tamarinds without the seeds and 2 parts of Corinthian raisins with water enough to make 20 parts. [B, 95 (a, 38).]—**Electuarium tamarindorum Fulleri** [Belg. Ph.]. An electuary consisting of 21 parts each of the pulp of tamarinds and cassia, 40 of manna, 2 of cream of tartar, and 8 each of senna-leaves and water. [B, 95 (a, 38).]—**Fructus tamarindi** (seu *tamarindorum*). The fruit of *T. indica* or its pulp. [a, 35].—**Fructus tamarindi crudus**. See **T.** (2d def.).—**Pulpa** (e fructu) *tamarindi* (seu *tamarindorum*). See **PULPA TAMARINDORUM depurata**.—**Pulpa tamarindorum cruda**. See **T.** (2d def.).—**Pulpa tamarindorum depurata**. Fr., *pulpe de tamarins*. Ger., *gereinigtes Tamarindenmus*. Sp., *pulpa de tamarindos*. The pulp of tamarinds purified by boiling or digesting with water, and evaporating. Most of the ph's add sugar at some stage in the process: 1 part to 3 parts of pulp, evaporating to the consistence of gruel [Aust. Ph., Hung. Ph., Norw. Ph., Roum. Ph.] (of tough pap [Dan. Ph.], of an extract [Swed. Ph.]); 1 part to 4 parts of pulp, evaporating to the consistence of a conserve [Swiss Ph.]; 1 to 5, evaporating to a thick extract [Ger. Ph., Finn. Ph.]; or 1 to 6, evaporating to a thick extract [Russ. Ph., Gr. Ph.] (to a pulp [Netherl. Ph.]). [B, 95 (a, 38).]—**T. amboinensis**. See *INTSIA amboinensis*.—**T. indica**. Fr., *tamarinier (des Indes)*. Ger., *indischer Tamarindenbaum*. Tamarind, Indian date; a tree 70 to 80 feet in height, cultivated in tropical Asia and America, and found wild in north-western Australia, but probably indigenous to eastern tropical Africa. The fruit (the tamarind), a broad, compressed, reddish ash-colored pod, from 2 to 6 inches in length, deprived of its brittle epicarp and preserved, constitutes the tamarind pulp of the ph's (see *East Indian Tamarind* and *West Indian TAMARIND*), which is used as a laxative and refrigerant. It contains tartaric acid, acid potassium tartrate, traces of citric and malic acids, gum, jelly, etc. It weakens the action of the resinous cathartics, while increasing that of cassia and manna. In the Mauritius it is used, mixed with salt, as a liniment in rheumatism. In India the seeds and bark are repurific and antidiabetic, and the cotyledons (which are sometimes eaten) are made into a paste for poultices. The acid leaves are used as an anthelmintic for jaundice, and for preparing a collyrium and a wash for foul ulcers. In Ceylon a confection prepared from the flowers is used in obstructions of the liver and spleen. [a, 35].—**T. occidentalis**. The West Indian variety of *T. indica*; considered by De Candolle a distinct species. [a, 35].—**T. officinalis**. See **T. indica**.

TAMARINDUS INDICA. [A, 327.]

TAMARINER (Fr.), n. $Ta^{2m}ma^{2r}\text{-}re\text{-}ne\text{-}a$. 1. See **TAMARINDUS**. 2. Of the Fr. Cod., see **TAMARINDUS indica**.—**T. (pulpe)**. See **TAMARINDUS** (2d def.).—**T. des Indes**. See **TAMARINDUS indica**.

TAMARISCUS (Lat.), n. m. and f. $Ta^{2m}(ta^{2m})a^{2r}(a^{2r})i^{2sk}\text{-}u^{2s}(u^{2s})$. See **TAMARIX**, **TAMARIX gallica**, and **MYRICARIA germanica**.—**Cortex tamarisci**. Sp., *tamarisco*, *taray (corteza del tallo)*. The bark of *Tamarix gallica*. [B, 95 (a, 38).]—**T. decandrus**. See **MYRICARIA germanica**.—**T. fruticosa**, **T. gallica**, **T. gallicus**. See **TAMARIX gallica**.—**T. germanica**, **T. germanicus**. See **MYRICARIA germanica**.—**T. pentandrus**. See **TAMARIX gallica**.

TAMARISK, n. $Ta^{2m}a^{2r}\text{-}i^{2sk}$. See **TAMARIX** and **TAMARIX gallica**.—**Common t.**, **French t.** See **TAMARIX gallica**.—**German t.** See **MYRICARIA germanica**.

TAMARIX (Lat.), n. f. $Ta^{2m}(ta^{2m})a^{2r}(a^{2r})i^{2x}$. Fr., *tamaris*, *tamarisc*. Ger., *Tamariske*. *Tamarisk*; a genus of shrubs or undershrubs giving name to the *Tamaricaceæ* (Fr., *tamariscinées*), which are: (1) The *Tamariceæ*; (2) an order of dialypetalous dicotyledons (including the *Tamariceæ*, *Elaeagnaceæ*, and *Fouquieriaceæ*) readily distinguished in the cohort *Caryophyllina* by the ovary containing three placentas, free in the centre of the cavity, or cohering with the walls or more or less with each other so as to form three imperfect cells, and by the erect seed being comose at the apex or all over the testa, or at the margin in the form of a wing. The *Tamariceæ* (containing two genera [*T.* and *Myricaria*] with exalbuminous seed comose at the apex) are a distinct order or (Bentham and Hooker) a tribe of the *Tamaricaceæ*.—**T. africana**. The *T. gallica*, var. γ , of Willdenow; a shrub of the Mediterranean regions having the same uses as *T. gallica mannifera*. [a, 35].—**T. anglica**. See **T. gallica**.—**T. articulata**. See **T. orientalis**.—**T. decandra**. See **MYRICARIA**

germanica.—*T. gallica*. Fr., *tamarisc commun* (ou de Narbonne). Ger., *französische Tamariske*. *Complanata* (or *Trachy*) *tamarisk*, the *myrica* (myrica) of the ancients; found in southern Europe, northern and tropical Africa, and southern and eastern Asia. The bitter, balsamic, astringent bark and the leafy branches, *cortex et folia tamarisci* (gallici, seu gallicae, seu fruticosae), *cortex et folia myricis* (seu myricae), were formerly used, especially in obstructions of the spleen. The leaves, together with the galls (see *Tamarix galls*), were used in ophthalmia and hemorrhages. One variety, *T. gallica*, var. *manuifera*, furnishes tamarisk manna. [a, 35.]—*T. germanica*. See MYRICARIA *germanica*.—*T. germanica caspica*, *T. herbacea*. See MYRICARIA *herbacea*.—*T. hispida*. Ger., *steifhaarige Tamariske*. A shrub growing on the Volga and other streams in Tartary, where the astringent branches are used in rheumatism and gout. [a, 35.]—*T. indica*. See *T. gallica*.—*T. manuifera*. The *T. gallica*, var. *manuifera*. [a, 35.]—*T. orientalis*. Fr., *tamarise d'Orient*. Ger., *morgenländische Tamariske*. Atlee gall-tree, tamarisk salt-tree, of northern and middle Africa, Persia, etc., extending to the East Indies. It grows in saline soils, and, becoming incrustated with salt, is used to season food. The wood, which emits a fetid odor when burned, is used in syphilis and skin diseases, and the leaves in splenic disorders. The bark is astringent and tonic. Astringent galls are formed on this species. [a, 35.]—*T. pentandra*. See *T. hispida*.

TAMBANGAN, *n.* A place in Java where there is a saline spring. [L, 49 (a, 14).]

TAMBOR, *n.* A Central American species of *Onchophora* yielding a purgative oil. [a, 35.]

TAMBOUR (Fr.), *n.* *Ta³n²-bur*. Ger., *T.* (2d def.), *Lufttrommel* (2d def.). 1. See *Drum* (2d def.). 2. An apparatus devised by Bert to demonstrate the respiratory movements of small animals and other movements of great delicacy. It consists of a capsule-like metal dish covered with sheet rubber. On the centre of the rubber cover is placed a disc of aluminium, which in turn is connected with another disc. This last disc, being applied firmly against the part, communicates the movement to the rubber head and the air within is alternately increased and lessened in density. The interior of the t. being connected by a tube with a registering t., a tracing of the movements is obtained. For some purposes the t. is mounted upon one limb of a caliper-like apparatus. The limbs being adjusted to the diameter of a part, any variation in the diameter is registered by the registering t. [J, 3, 5.]—*Marey's t.*, *Registering t.* Fr., *t. enregistreur*. An instrument for registering on a kymograph various movements (e.g., those of circulation and respiration). It consists essentially of a shallow metal dish covered by thin sheet rubber. On the centre of the rubber rests an aluminium disc connected by a rod to a lever bearing a style for making the tracing. The interior of the t. is connected by a tube with a receiving ampulla.

TAMIER (Fr.), *n.* *Ta³-me-a*. The genus *Tamus*, especially *Tamus communis*. [a, 35.]

TAMNUS (Lat.), *n. f.* *Ta²m(ta³m)ⁿus*(*nu*s). See *TAMUS*.

TAMPICAC ACID, *n.* *Ta²m²-p²a²-ik*. Fr., *acide tampicac*. An acid, *C₂₄H₄₀O₁₇*, obtained from tampicin. [B, 93 (a, 14).]

TAMPICIN, *n.* *Ta²m²-p²a²-in*. Fr., *tampicine*. Ger., *T.* A purgative glucoside, *C₂₄H₄₀O₁₇*, obtained from the root of *Ipomoea simularis*, similar to convolvulin and jalapin. [B, 93, 270 (a, 14, 38).]

TAMPON, *n.* *Ta²m²-p²a²-on*. Fr., *t.* Ger., *T. Pflöpfen*. A plug of some soft material for closing a wound, a cavity, or an orifice. [E.]—*Kite-tail*. A t. consisting of a number of pledgets tied at intervals on a string, as in the tail of a kite. [a, 34.]—*Probet* (Ger.). A vaginal t. impregnated with a solution of tannin in glycerin used to collect the uterine discharge for examination. [L, 57 (a, 14).]—*T. de Gariel* (Fr.). An inflatable vaginal pessary. —*Trendelenburg's tracheal t.* A t. for closing the trachea in operations upon the mouth, consisting of a tracheotomy tube sur-

TRENDLENBURG'S TAMPON.

rounded by a bag of rubber which can be inflated by a bulb at the end of a rubber tube. The tracheotomy tube with its rubber casing is introduced into the tracheal wound, and the rubber casing is then inflated sufficiently to close the trachea completely and prevent the passage of blood by the side of the tube. [E.]

TAMPON-CANNULA, *n.* *Ta²m²-p²a²-on-ka²n²-u²-a²*. A tracheotomy tube devised by Semon, having a distensible rubber attachment at the inner end of the outer tube, which, being inflated, fills the trachea and tends to prevent erosion.

TAMPONING, *n.* *Ta²m²-p²a²-on-ia²n*. Gr., *ἐμβράσις, στήλωνσις*. Lat., *obturatio*. Fr., *tamponnement*. Ger., *Tamponieren*, *Tamponade*. The process of plugging by the use of a tampon. [a, 48.]

TAMUS (Lat.), *n. f.* *Ta²m(ta³m)ⁿus*(*nu*s). Fr., *tamne*, *tamier*, *taminier*. Ger., *Schmerzrauz*. A genus of the *Dioscoreaceae*. [a, 35.]—*T. communis*. Fr., *tamier*, *taminier commun*, *racine vierge*,

seaeu Notre-Dame (ou de la Vierge), *herbe aux femmes battues*, *vigne noire*. Ger., *gemeine Schmerzrauz*, *schwarze Zwirnraute*. The *amarac* *apoc* of Dioscorides, beaten woman's herb, black bryon, murrain-berries, ox-berry; a climbing plant of Europe, northern Africa, and temperate Asia. The acid tuberous root, *radix tami* (seu *bryoniae nigrae*), is diuretic and purgative and in large doses emetic, and was formerly considered resolvent. The fruits, steeped in gin, are applied to chilblains. The shoots are eaten after being boiled. [a, 35.]

TANACETIC ACID, *n.* *Ta²n²-a²s-et²-ik*. Fr., *acide tanacétique*. Ger., *Tanacetisäure*. An acid obtained from the flowers of *Tanacetum vulgare*. [B, 48, 93 (a, 14).]

TANACETIN, *n.* *Ta²n²-a²s-et²-in*. Fr., *tanacétine*. Ger., *T.* A bitter principle, *C₁₁H₁₆O₄*, contained in the leaves and flowers of *Tanacetum vulgare*. [B, 48, 93 (a, 14).]

TANACETOL, *n.* *Ta²n²-a²s-et²-ol*. A liquid, *C₁₀H₁₆O*, obtained from oil of tansy. [B, 3 (a, 38).]

TANACETUM (Lat.), *n. n.* *Ta²n(ta³n)-a²s(a²ik)-et(a²l)ⁿus*(*nu*m). For deriv., see *TANSY*. Fr., *tanaïsie* (Fr. tanaisie). Ger., *Rainfarn*, *Wurmkraut* (2d def.). 1. A genus of plants included by some authors in *Chrysanthemum*. The *Tanacetum* are a section of the *Compositae*. The *Tanacetum* are: Of Cassini, a subdivision of the *Chrysanthemum*; of Schultz, a division of the *Senecionideae*. 2. The leaves and tops [U. S. Ph.] (tops [Eun. Ph.], flowering tops [Sp. Ph.], hds [Belg. Ph.], flowering herb [Gr. Ph.], flowering plant [Fr. Ph.]) of *Chrysanthemum vulgare*; an aromatic, bitter, and irritant narcotic. It contains tanacetin, tartaric, citric, malic, and metarabic acids, a variety of tannic acid, traces of oxalic and gallic acids, a wax-like substance, a resin, parabin, and a volatile oil (oil of tansy). [a, 35.]—*Aqua tanacetii*. Fr., *eau (ou hydrolat) de tanaïsie*. A preparation made by distilling 2 parts of a mixture of 1 part of tansy and 4 parts of water. [B, 19 (a, 38).]—*Flores tanacetii*. The flowers of *T. vulgare*. [B, 95 (a, 38).]—*Flores tanacetii pulverati*. The powdered flowering tops of *T. vulgare*. [B, 95 (a, 38).]—*Oleum tanacetii*. See *Oil of tansy*.—*Summitates tanacetii*. The tops of *Chrysanthemum vulgare* and *Chrysanthemum balsamita*.—*T. annuum*. See *CHRYSAETHMUM annuum*.—*T. balsamita*, *T. femina*, *T. gentilis*. The *Chrysanthemum balsamita*. [a, 35.]—*T. vulgare*. See *CHRYSAETHMUM vulgare*.

TANACETYL ALCOHOL, *n.* *Ta²n²-a²s-et²-i²l*. A liquid, *C₁₀H₁₆O*, obtained from oil of tansy. [B, 3 (a, 38).]

TANACETYL HYDRIDE, *n.* See *TANACETOL*.

TANACIUM (Lat.), *n. n.* *Ta²n(ta³n)-es*(*a²e²ik*)-i²-u²m(*u*m). Fr., *tanaïsie*. A genus of bigonaceous shrubs. The *Tanaciae* are a subtribe of the *Crescentineae*. [a, 35.]—*T. albitorum*. A Jamaica species. The fruits are used for poultices. [a, 35.]—*T. jaroba*. The *Jaroba* of the West Indies and Brazil. The fruits are pectoral. [a, 35.]

TANAISE (Fr. Cod.) (Fr.), *n.* *Ta³-ne²-ze*. See *TANACETUM*.—*Huile volatile de t.* (Fr. Cod.). See *Oil of tansy*.—*T. commune*. See *CHRYSAETHMUM vulgare*.—*T. sauvage*. The *Potentilla asperula* and other species of *Potentilla*. [a, 35.]

TANASIMONOSPHOBOMANIE (Fr.), *n.* *Ta³-na³-ze-mo-no-so-fa-bo-na²-ne*. Of Michéa, hypochondriasis. [A, 540 (a, 34).]

TANG, *n.* *Ta²n²*. Ger., *T.* See *Fucus vesiculosus*.—*Haute* (Ger.). See *HALYMEIA*.—*Knorpelt* (Ger.). See *CHONDROS crispus*.—*Riement* (Ger.). See *LAMINARIA* (1st def.).—*Schwarz* (Ger.). See *FUCOIDES*.—*Tasche* (Ger.). See *KELP*.—*Tsoda* (Ger.). See *KELP*.—*Wurmt* (Ger.). *Helminthochorton*.

TANGHIN, *n.* *Ta²n²-gi²-n*. Lat., *tanghinia*. Fr., *t.*, *tanghin*. 1. See *CERBERA* t. 2. Its seed, the ordeal bean of Madagascar. It increases reflex excitability, produces convulsions, and affects the activity both of the heart and of respiration. It has been used in paralysis and visceral atony. [B, 3, 35.]

TANGHINIA (Lat.), *n. f.* *Ta²n²-gi²-n*(*a²*). Fr., *tanghinie* (1st def.). 1. A genus of plants referred by Bentham and Hooker to *Cerbera*. [a, 35.] 2. See *TANGHIN*. [a, 35.]—*T. madagascariensis*, *T. venenifera*. Fr., *tanghinie vénéneuse*. See *CERBERA tanghin*.

TANGHININ, *n.* *Ta²n²-gi²-n*. Fr., *tanghinine*, *tanghine*, *tanguine*. Ger., *T.* The active principle of tanghin (the seed), obtained as bitter colorless scales, efflorescing in air and dissolving in alcohol, in ether, and in acetic acid. It acts as a cardiac and respiratory poison, and destroys the muscular irritability. [B, 5, 93 (a, 14, 35).]

TANG-KWANG (Chin.), *n.* Gambooge. [a, 35.]

TANGLE, *n.* *Ta²n²-g²l*. See *LAMINARIA conica*.—*Sweet t.* See *LAMINARIA saccharina*.

TANGUIN, *n.* *Ta²n²-gi²-n*. See *TANGHIN*.

TÂNIE (Ger.), *n.* *Tan²-i²-e²*. See *TENIA*.

TANIN (Fr.), *n.* *Ta²-na²-n²*. See *TANNIN*.

TANNAS (Lat.), *n. m.* *Ta²n(ta³n)ⁿa²s(na²s)*. Gen., *-nat²is*. See *TANNATE*.—*T. pelletierinus* (Fr. Cod.). See *PELLETIERINE tannate*.—*T. plumbicus*. See *LEAD tannate*.—*T. quincius*. See *QUININE tannate*.—*Unguentum tannatis plumbici*. See *Glycerinum tannatis plumbi*.

TANNASPIDIC ACID, *n.* *Ta²n²-a²s-p²d²-ik*. See *FILICITANNIC ACID*.

TANNATE, *n.* *Ta²n²-at*. Lat., *tannas*. Fr., *t.* Ger., *Tannat*. A salt of tannic acid. [B.]

TANNE (Fr.), *n.* *Ta²n*. 1. See *COMEDO*. 2. The oil of *Camellia oleifera*. [a, 35.]

TANNE (Ger.), *n.* *Ta²n²-ne²*. See *ARIES*.—*T²nstoff*. See *DADYL*.—*T²nzapfenöl*. Oil of pine-cones. [L, 57 (a, 14).]

TANNECORTEPINIC ACID, n . $\text{Ta}_2\text{n}^{\text{e}2}\text{-ko}^{\text{r}2}\text{-e}^2\text{-pin}^{\text{f}2}\text{k}$. Fr. *acide tannecortépinique*. A variety, $\text{C}_{28}\text{H}_{20}\text{O}_{12}$, of tannin obtained from the bark of *Pinus silvestris*. [B. 93 (a, 14).]

TANNENHARZ (Ger.), n . $\text{Ta}_2\text{n}^{\text{ne}2}\text{-ha}^2\text{r}^2\text{ts}$. See *Burgundy PITCH*.—**T'ssiure**, Abietic acid.

TANNES (Fr.), n . pl. Ta_2n . See *ACNE punctata*.

TANNIC, adj. $\text{Ta}_2\text{n}^{\text{f}2}\text{k}$. Lat., *tannicus*. Fr., *tannique*. Ger., *gerbstoffartig*. Derived from tan; containing t. acid.

TANNIC ACID, n . $\text{Ta}_2\text{n}^{\text{f}2}\text{k}$. Fr., *acide tannique*. Ger., *Gerbstoff, Tanninsäure*. Tannin, galloitanic acid; an acid, $\text{C}_{12}\text{H}_8\text{O}_6 = \text{C}_6\text{H}_4(\text{OH})_2\text{CO}_2\text{OC}_6\text{H}_4(\text{OH})_2\text{CO}_2\text{OH}$, obtained from nutgalls and sumach-leaves, and occurring as a colorless amorphous mass, brittle and glassy when evaporated, turning yellow in the light, having a very astringent taste, easily soluble in water, less soluble in alcohol, nearly insoluble in absolute ether, and decomposing at 215°C . It has been used as a dressing. In a wider sense, the term t. a., or tannin, comprehends a large number of vegetable astringent principles, all of them glucosides, resembling each other in properties, and designated by a prefix indicative of their origin, e. g., caffeotannic acid, quercitanic acid, etc. [B. 3 (a, 38); B. 14.] See also **ALCIDUM TANNICUM** and subheadings there.

TANNICUS (Lat.), adj. $\text{Ta}_2\text{n}^{\text{f}2}(\text{ta}^2\text{n}^{\text{f}2})^{\text{u}2}\text{k}^2\text{-u}^2\text{s}^2(\text{u}^2\text{s}^2)$. See **TANNIC**; as n , in the neut., *tannicum*, an astringent that contains tannic acid.—**Tannicum amarum**. An astringent containing tannic acid and bitter principles.—**Tannicum anthelminticum**. An astringent containing tannic acid and having anthelmintic properties.—**Tannicum mucilaginosum**. An astringent containing tannic acid and mucilaginous substances.—**Tannicum purum**. A pure astringent containing tannic acid.

TANNIN, n . $\text{Ta}_2\text{n}^{\text{f}2}\text{n}$. Lat., *tanninum*. Fr., *t.* Ger., *T. Tannic acid*; more particularly, crude tannic acid as it occurs in vegetable tissues combined with glucose. [B. 5.] *Crayons de t.* [Fr. Cod.] Cylindrical sticks made by mixing t . with $\frac{1}{2}$ of its weight of powdered gum arabic, adding glycerin and water in equal amounts, and rolling into shape. [B.]—*Glycéré de t.* (Fr.). *Glycérôle de t.* (Fr.). See *Glyceritum acidi tannici*.—*Pommade de t.* (Fr.). See *Unguentum acidi tannici*.—*Suppositoires de t.* (Fr.). See *Suppositoria acidi tannici*.—*T. lozenges*. See *Trochisci acidi tannici*.—*T. officinal* (Fr.). See **TANNIC ACID**.—**T. oriental** (Fr.). See **BABLAH**.—**T'ssiure** (Ger.). See **TANNIC ACID**.—**T'stäbchen** (Ger.). See **BACILLI tannico-opiati**.

TANNINBLEI (Ger.), n . $\text{Ta}_2\text{n}^{\text{f}2}\text{nen}^{\text{b}2}\text{il}$. See **LEAD tannate**.—**T'salbe**. See *Glyceritum tannatis plumbi*.

TANNINGENIC ACID, **TANNINGIC ACID**, n 's. $\text{Ta}_2\text{n}^{\text{f}2}\text{-jn}^2\text{e}^2\text{n}^2\text{f}^2\text{k}$, -jn²f²k. Ger., *Tanningensäure, Tanningersäure*. See **CATECHUTANNIC ACID**.

TANNINUM (Lat.), n . $\text{Ta}_2\text{n}^{\text{f}2}\text{-nin}^2(\text{nen}^2)^{\text{u}2}\text{m}^2(\text{u}^2\text{m}^2)$. See **TANNIC ACID**.—**Bacilli tannini**. See *Crayons de TANNIN*.—**Glyceritum cum tannino**. See *Glyceritum acidi tannici*.

TANSY, n . $\text{Ta}_2\text{n}^{\text{f}2}\text{z}^2\text{f}$. From *ἀθανασία*, immortality. The genus *Tanacetum*, especially *Tanacetum vulgare* (*Chrysanthemum vulgare*) and its leaves and tops; also *Potentilla anserina*, *Senecio jacobææ*, *Achillea millefolium*, etc. [a. 35.]—**Common t.** The *Chrysanthemum vulgare*. [a. 35.]—**Dog's t.**, **Goose-t.** See **POTENTILLA anserina**.—**Oil of t.** Lat., *oleum tanacetii*. Fr., *huile volatile de tanaiste*. Ger., *Reinfarnöl*. A volatile oil obtained from tanacetum (2d def.). The Fr. Cod. directs the tops to be used, the Russ. Ph. the flowers, the Pruss. Ph. the flowers and herb, and the Gr. Ph. the flowering herb. It consists of 1 per cent. of a terpene ($\text{C}_{15}\text{H}_{24}$), boiling at 155 to 180°C , 70 per cent. of an aldehyde ($\text{C}_{15}\text{H}_{16}\text{O}$) boiling at 195 to 196°C , and 26 per cent. of an alcohol ($\text{C}_{15}\text{H}_{20}\text{O}$) boiling at 203 to 205°C . In large doses it produces violent convulsions, coma, and even death. [B. 95 (a, 38); Broylants (a, 35).]

TANTAL (Ger.), n . $\text{Ta}_2\text{n}^{\text{f}2}\text{nt}^2(\text{a}^2)$. See **TANTALUM**.—**T'erde**, **T'ssiure**. See **TANTALIC ACID**.

TANTALATE, n . $\text{Ta}_2\text{n}^{\text{f}2}\text{a}^2\text{l-at}$. Fr., *colombate*. A salt of tantalum acid. [B.]

TANTALIC ACID, n . $\text{Ta}_2\text{n}^{\text{f}2}\text{a}^2\text{l}^2\text{f}^2\text{k}$. Fr., *acide tantalique*. Ger., *Tantalsäure*. A monobasic acid, HTaO_3 (or $\text{Ta}_2\text{O}_5 + \text{H}_2\text{O} = 2\text{HTaO}_3$), occurring as a crystalline powder. [B.]

TANTALUM (Lat.), n . $\text{Ta}_2\text{n}^{\text{f}2}(\text{ta}^2\text{n}^{\text{f}2})^{\text{u}2}(\text{a}^2\text{l}^2)^{\text{u}2}\text{m}^2(\text{u}^2\text{m}^2)$. Fr., *tantale*. Ger., *Tantal*. A metallic element discovered by Ekeberg in 1802. It occurs in several minerals, and is almost always associated with niobium. It has not been isolated in a perfectly pure state, but has been obtained approximately free from admixture as a black powder, capable of assuming a metallic lustre, and readily oxidizing on the application of heat. It is not attacked by any acid except hydrofluoric, and to this immunity it owes its name from the fable of Tantalus being unable to quench his thirst. In composition it acts usually as a pentad radicle, occasionally as a tetrad. Symbol, Ta ; atomic weight, 182. [B. 3.]

TANZ (Ger.), n . $\text{Ta}_2\text{n}^{\text{f}2}\text{ts}$. See **DANCE**.—**T'krämpfe**. Choreic spasm. [L. 57 (a, 30).]—**T'sucht**, **T'wuth**. See **EPIDEMIC CHOREA**.

TAPEINOCEPHALUS (Lat.), n . m . $\text{Ta}_2\text{p}^2(\text{ta}^2\text{p}^2)^{\text{in}^2}(\text{e}^2\text{-jn}^2)^{\text{o}^2}(\text{o}^2)\text{-se}^2(\text{ke}^2\text{f}^2/\text{a}^2\text{l}^2\text{a}^2)^{\text{u}2}\text{s}^2(\text{u}^2\text{s}^2)$. A person characterized by tapeinocephaly.

TAPEINOCEPHALY, n . $\text{Ta}_2\text{p}^2\text{-in-o-se}^2\text{f}^2\text{a}^2\text{l}^2\text{-i}^2$. From *ταπεινός*, low, and *κεφαλή*, the head. Fr., *tapeinocephalie*. The condition of having the vault of the skull depressed. [L. 149 (a, 50).]

TAPETAL, adj. $\text{Ta}_2\text{p}^2\text{-e}^2\text{t}$. Pertaining to the tapetum. [a. 35.]

TAPETE (Ger.), n . $\text{Ta}_2\text{p}^2\text{-at}^2$. See **TAPETUM**.—**Farbent'**. See **LAMINA pigmenti**.—**T. der Seitenhöhlen**. The choroid plexus of the lateral ventricle. [I. 30 (K).]

TAPETUM (Lat.), n . n . $\text{Ta}_2\text{p}^2(\text{ta}^2\text{p}^2)^{\text{e}2}(\text{at}^2)^{\text{u}2}\text{m}^2(\text{u}^2\text{m}^2)$. From *tapete*, a carpet. Fr., *tapis*. Ger., *Tepele*, *T.* 1. A layer or lamina.

[a. 17.] 2. The epithelium lining the pollen sac. [a. 35.] Cf. *Tape-tal CELL*. 3. A layer made up of bundles of nerve-fibres which curve backward from the body of the fornix to the posterior portion of the hemisphere. [I. 6 (K).]—**Augent'** (Ger.). See **LAMINA pigmenti (retinae)**.—**T. alveoli**. See *Peri-odontal MEMBRANE*.—**T. cerebri**. See *T. (3d def.)* and *T. corporis callosi*.—**T. chorioides** (see *nigrum*). See **LAMINA pigmenti (retinae)**.—**T. corporis callosi**. Fr., *étui de l'hippocampe*. Of Reil, radiating fibres of the corpus callosum which are prolonged into the posterior cornua of the lateral ventricles. [J. 28 (K).]—**T. der Mittelöhle** (Ger.). The choroid plexus of the third ventricle. [I. 30 (K).]—**T. nigrum**. See **LAMINA pigmenti (retinae)**.—**T. Reilii**. See *T. corporis callosi* and cf. *TAPIS de Reil*.

TAPEWORM, n . $\text{Ta}_2\text{p}^2\text{wu}^2\text{rm}$. See **TENIA** (2d def.).—**Armed t.** See **TENIA solium** (1st def.).—**Beeft**. See **TENIA medicamentata**.—**Broad t.** See **BOTHRIOCEPHALUS latus**.—**Common t.** See **TENIA solium** (1st def.).—**Dwarf t.** See **TENIA nana**.—**Hydatid t.** See **TENIA echinococcus**.—**Long t.**, **Pork t.**, **Solitary t.** See **TENIA solium** (1st def.).—**Swiss t.** See **BOTHRIOCEPHALUS latus**.—**T. plant**. See **BRAYERA anthelmintica**.—**Unarmed t.** See **TENIA medicamentata**.

TAPHOBIA (Lat.), **TAPHIPHOBIA** (Lat.), n 's f . $\text{Ta}_2\text{f}^2(\text{ta}^2\text{f}^2)\text{-fo}^2\text{b}^2(\text{fo}^2\text{b}^2)^{\text{i}2}\text{a}^2\text{-i}^2\text{fo}^2\text{b}^2(\text{fo}^2\text{b}^2)^{\text{i}2}\text{a}^2$. From *τάφος*, burial, and *φόβος*, fear. Fr., *taphéobie*. Of Morselli, morbid fear of being buried alive. [a. 34.]

TAPHRENCHYMA (Lat.), n . n . $\text{Ta}_2\text{f}^2(\text{ta}^2\text{f}^2)\text{-re}^2\text{m}^2\text{-ki}^2\text{m}^2(\text{ch}^2\text{u}^2\text{m}^2)\text{-a}^2$. Gen., *-chym(-atos)*. From *τάφος*, a ditch, and *ἐνχυμα*, an infusion. See *Pitted TISSUE*.

TAPINOCEPHALY, n . $\text{Ta}_2\text{p}^2\text{-i}^2\text{n-o-se}^2\text{f}^2\text{a}^2\text{l}^2\text{-i}^2$. See **TAPEINOCEPHALY**.

TAPINOCRANIUM (Lat.), adj. $\text{Ta}_2\text{p}^2(\text{ta}^2\text{p}^2)^{\text{in}^2}(\text{en}^2)\text{-o}^2(\text{o}^2)\text{-kran}^2(\text{kr}^2\text{a}^2\text{n}^2)^{\text{u}2}\text{s}^2(\text{u}^2\text{s}^2)$. From *ταπεινός*, low, and *κρανιον*, the skull. Having the greatest height of the cranial cavity from $74\frac{1}{2}$ to $85\frac{1}{2}$ per cent. of its greatest length. [Lissauer, "Arch. f. Anthropol.," xv, Supp. (a, 50).]

TAPINOISTHUS (Lat.), adj. $\text{Ta}_2\text{p}^2(\text{ta}^2\text{p}^2)^{\text{in}^2}(\text{en}^2)\text{-o}^2\text{-i}^2\text{sth}^2\text{-i}^2\text{u}^2\text{s}^2(\text{u}^2\text{s}^2)$. From *ταπεινός*, low, and *ισθμους*, behind. Having the radius flxus making an angle of from $24\frac{1}{2}$ to 33° with the line connecting the punctum occipitale with the punctum alae vomeris. [Lissauer, "Arch. f. Anthropol.," xv, Supp. (a, 50).]

TAPIOCA (Lat.), n . f . $\text{Ta}_2\text{p}^2(\text{ta}^2\text{p}^2)^{\text{i}2}\text{-o}^2\text{-ka}^2$. Fr., *tapioka* [Fr. Cod.]. Sp., *t.* [Sp. Ph.]. An easily digested food, occurring in round, hard pellets, prepared from cassava starch. [a. 35.]—**Chocolate**. A French preparation containing 3 parts of starch with 100 of chocolate. [B. 10.]—**Gelatina tapioca**. Sp., *jalea de t.* [Sp. Ph.]. A jelly made by triturating 15 parts of t . with a little cold water, adding $\frac{1}{2}$ of sugar boiled up with 230 of water, and keeping at a boil for a few minutes. [B. 95 (a, 38).]—**Pearl t.** A spurious t . occurring as small round grains, formed probably from potato-starch. [B. 5.]—**T. meal**. Fr., *moussache*. T . dried without heat, forming a fine powder, identical with ordinary t . in microscopic structure, but not soluble in cold water. [B. 5.]

TAPIS (Fr.), n . $\text{Ta}_2\text{-pe}$. See **TAPETUM** and **TAPETUM chorioideæ**.—**T. de Reil**. See **INSULA** and cf. **TAPETUM Reilii**.

TAPOTEMENT (Fr.), n . $\text{Ta}_2\text{-pot-ma}^2\text{n}^2$. Ger., *Fingerklopfung*. That variety of massage which consists in tapping or percussion of the affected part. [B.]

TAPPING, n . $\text{Ta}_2\text{p}^2\text{-i}^2\text{n}^2$. See **PARACENTESIS**.

TAR, n . Ta^2r . Lat., *pix liquida* [U. S. Ph. Br. Ph., etc.], *pyro-leum pini* [Dan. Ph., Swed. Ph., Norw. Ph.]. Fr., *goudron* (*regéat* [Fr. Cod.]), *poix liquide*. Ger., *Teer, Holzteer, Fichtenheer*. 1. A highly complex material produced by the destructive distillation of various organic substances. 2. As commonly used, wood-tar; a very thick, shining, black liquid, having a peculiar empyreumatic odor and a bitter taste, derived from the wood of conifers by destructive distillation. On distillation it yields oil of t . and an acid liquid (impure pyroigneous acid), the residue being pitch. T . yields a small proportion of its constituents, especially pyrocatechin, to water, imparting to it an acid reaction and a peculiar taste (see *T-water*). It is readily soluble in alcohol, in ether, and in solutions of the caustic alkalies. In medicinal properties it resembles the turpentine, but is much less irritant. [B. a. 35.]—**Archangel t.** See **Stockholm t.**—**Barbadoes t.** See **Barbadoes PETROLEUM**.—**Beech-t.** Ger., *Buchenheer*. A t . made from the wood of *Fagus silvatica*; official in some ph's as the best source of creasote. [a. 35.]—**Birch-t.** Lat., *pix betule*. The *dagget* of the Russians; a t . containing much pyrocatechin, obtained from *Betula alba*. [a. 35.]—**Coal-t.** Lat., *pix lithantracis*. Fr., *goudron de houille*. Ger., *Kohlentheer*. A dark, semi-liquid substance obtained in the dry distillation of coal. It is highly complex in composition, yielding by distillation and rectification the following products: Naphthalenes, fluorene, anthracene, carbazol, chrysene, and other solids; benzene, toluene, cymene, and other neutral hydrocarbons; phenol, orthocresol, phlorol, pyrocatechin, and other alcohol-like bodies; ammonia, methylamine, ethylamine, phenylamine, picoline, collidine, and other bases; illuminating gases, such as acetylene, ethylene, etc.; heating gases, hydrogen, marsh-gas, and carbon monoxide; and certain impurities, carbon dioxide, hydrogen sulphide, nitrogen, thyoxyanic acid, etc. [B. 5 (a, 35).]—**Coal-t. saponatum**. **Coal't saponiné** (Fr.). **Coal't savonneux** (Fr.). Of the veterinarians, a liquid made by mixing 1 part of coal-t. with 2 parts of black soap, and adding (with gentle heat and stirring) 1 part of alcohol and 24 parts of water. [B. 95, 113 (a, 21).]—**Emulsion de coal't** [Fr. Cod.] (Fr.). A preparation made by mixing one part of the *teinture de bois de Panama coallorée* with 4 parts of distilled water. It contains 4 per cent. of coal-t. [B.]—**Cast-t.** See **COAL-t.**—**Glycerate of t.** See *Glyceritum pice liquidæ* (under *Pix*).—**Infusion of t.** See *Infusum pice liquidæ*.—**Juniper t.** See *Oil of CADE*.—**Kohl't** (Ger.). See **COAL-t.**

Mineral t. See **MALTA**.—**Oil of t.** Lat., *oleum picis liquidæ* [U. S. Ph.]. Fr., *essence (huile) de goudron*. Ger., *Theeröl, Pechöl*. The volatile oily liquid obtained in the distillation of wood-t; almost colorless when freshly prepared, but becoming dark on standing, having the odor of t., and dissolving freely in alcohol. In chemical composition it is very complex, containing various hydrocarbons of the paraffin series, hydrocarbons of the aromatic series, and the alcohols of the latter series, including carboic acid and the mixture of phenols constituting creosote. It is less offensive in taste than t., and hence is preferred for medicinal use. [B; 4, 35].—**Poudre de coati** [Fr. Cod.] (Fr.). Ger., *Coat-t-Gypspulver*. Of the veterinarians, a mixture of 1 part of coat-t and 30 parts of gypsum. [B; 113 (a, 21)].—**Rangoon t.** See **Rangoon PETROLEUM**.—**Saccharated t.** Syrup of t. See **Syrupus PICIS**.—**Stockholm t.** A trade name in Europe for wood-t, most of which is prepared in Finland, central and northern Russia, and Sweden. [a, 35].—**T. beer.** Lat., *cervisia picis (liquida)*. A beer made by heating gently with 1 pint of yeast 2 pints of bran, 1 pint of t., 1 pint of honey, and 6 pints of water, and fermenting. [B; 1].—**T.-oil.** See **Oil of t.**.—**T. ointment.** See **Unguentum PICIS liquidæ**.—**T.-water.** See **Infusum picis liquidæ** (under **Pix**).—**Vegetable t.** **Wood-t.** See **T.** (2d def.).

TARACANA (Lat.), n. f. $Ta^2r(ta^2r)^2a^2k(a^2k)^2an(a^2n)^2a^2$. A kind of cockroach found in Russia.—**Pulvis taracanæ.** Powdered Russian cockroach (*Blatta lapponica*), used in dropsy (cf. **ANTHYDROPIN**). [B, 5.]

TARACHE, TARAGMA (Lat.), **TARAGMUS** (Lat.), n's f, n., and m. $Ta^2r(ta^2r)^2a^2k(a^2k)^2a^2n(a^2n)^2a^2$. Gen., *taraches*. *ag'malos* (*-atis*), *-ag'mi*. Gr., *taraxi, rapysia, racyyos*. See **TARAXIS**.

TARANTISM, n. $Ta^2r^2ant^2izm$. Lat., *tarantismus* (from *Taranto* [Gr., *Tapas*, Lat., *Tarentum*], a city of Greece). Fr., *tarantisme*. Ger., *Tarantismus*. An epidemic chorea that appeared in Apulia in the fifteenth century and spread through Italy and southern France; supposed to be caused by the bite of *Lycosa tarantula*. [a, 34.]

TARANTULA (Lat.), n. f. $Ta^2r(ta^2r)^2a^2nt(a^2nt)^2u^2l(u^2l)^2a^2$. From *Taranto* (see **TARANTISM**). Fr., *tarentule*. Ger., *Tarentel*. See **LYCOSA t.**

TARASCON (Fr.), n. $Ta^2r^2a^2sk^2on^2$. A place in the department of the Ariège, France, where there is a chalybeate spring.

TARASP (Ger.), n. $Ta^2r^2a^2sp^2$. A place in the canton of the Grisons, Switzerland, where there are gaseous springs. [a, 14.]

TARASSIS (Lat.), n. f. $Ta^2r(ta^2r)^2a^2s(a^2s)^2a^2s$. Gen., *-as'seos* (*-sis*). From *rapasceus*, to trouble. Of Lanoaille de Lachèse, the anger of symptoms commonly known as hysteria in the male. [Gaz. des hôp. 1884, p. 1036 (a, 34).]

TARAXACERIN, n. $Ta^2r^2a^2x^2a^2ser^2in$. A crystalline principle, $C_{12}H_{14}O_6$, obtained from the milky juice of the root of *Taraxacum officinale*. [B, 5 (a, 38).]

TARAXACIN, n. $Ta^2r^2a^2x^2a^2in$. Fr., *taraxacine*. Ger., *T.* A bitter principle obtained from the juice of the root of *Taraxacum officinale*, as white, bitter crystals. [B, 5, 93, 270 (a, 14, 38).]

TARAXACUM (Lat.), n. n. $Ta^2r(ta^2r)^2a^2x^2a^2k(a^2k)^2u^2m(u^2m)$. Fr., *pissenlit* (2d and 3d def's), *dent-de-lion* (*racine*) [Fr. Cod.] (2d def.), *dent-de-lion* [Fr. Cod.] (3d def.). Ger., *Pflaenzröhren* (1st def.), *Löwenzahnmurzel* (2d def.), *Löwenzahn*. Sp., *diente de león* [Sp. Ph.] (3d def.). 1. A genus of the *Taraxaceæ* (a tribe of the *Compositæ*). 2. Dandelion root. U. S. Ph. The root in the Br. Ph. the fresh and dried roots of *T. officinale* gathered in autumn. [a, 35.] 3. Of the Austr. Ph. and Hung. Ph., the leaves of *T. officinale*. [B, 95 (a, 38).]—**Compound elixir of t.** A preparation made of 6 oz. of t.-root, 4 of wild-cherry bark, 2 of orange-peel, 1 oz. each of gentian-root, cinnamon, coriander, and licorice, 2 drachms each of anise, cardamom, and caraway, 10 pints of syrup, and enough of mint. U. S. Ph. 3 parts of water and 1 part of alcohol to produce 10 pints of elixir by treatment in a percolator; or of 6 fl. oz. of fluid extract of t., 1 fl. oz. of fluid extract of gentian, 100 drops of oil of orange, 12 of oil of cinnamon, 10 of oil of anise, 5 of oil of caraway, 20 of oil of coriander, 1 oz. of extract of licorice, 32 pints of syrup of wild cherry, 14 of alcohol, and 4 of water. [B, 5 (a, 38).]—**Decoction taraxaci** [Br. Ph., Belg. Ph.]. Fr., *biscane de pissenlit*. Ger., *Löwenzahnmurzelabkud*. A decoction made by boiling 1 oz. of dry t.-root for ten minutes in water enough to make 1 pint after straining and washing [Br. Ph.]; or by macerating 1 part of the root an hour with water enough to make 20 parts after boiling a quarter of an hour and straining [Belg. Ph.]; or by boiling 1 part of dried t.-leaves a quarter of an hour with water enough to make 46 parts and strained [U. S. Ph.]. [B, 95 (a, 38).]—**Decoction taraxaci compositum.** A preparation made by boiling together 120 parts of dandelion-root, 15 of *Menyanthes trifoliata*, and 1,440 of water till the liquid is reduced one half, and adding 30 of potassium sulphate and 7 of ether; or by boiling 75 grammes each of dandelion, chicory, and *Triticum repens* with water enough to make 360, and adding 7 of potassium sulphate, 90 of syrup des cinq racines, and 26 drops of Hoffman's solution. [B, 119 (a, 38).]—**Extractum taraxaci** [Fr. Cod., Extr. de pissenlit]. Ger., *Löwenzahnextrakt*. Sp., *extracto de taraxacón*. 1. An extract made from the root [U. S. Ph., Br. Ph., Finn. Ph., Swiss Ph.] (from the herb and root [Ger. Ph., Dan. Ph., Norw. Ph., Swed. Ph., Russ. Ph., Netherl. Ph., Belg. Ph., Gr. Ph.]) from the leaves [Fr. Cod., Sp. Ph.] of *T. officinale*. [B, 2.] 2. Of the Austr. Ph. and Hung. Ph., see *Extractum taraxaci liquidum* (3d def.).—**Extractum taraxaci liquidum.** An extract made by exhausting 100 grammes of t.-root in No. 30 powder with a mixture of 2 parts of alcohol and 3 of water, reserving 85 c. c. distilling off the alcohol from the remainder and evaporating it to a soft extract, mixing the two, and bringing up to 100 c. c. with the menstruum [U. S. Ph.]; or by macerating 40 oz. of t.-root in No. 20 powder

with 4 pints of alcohol of sp. gr. 0.920, expressing 20 fl. oz., macerating the residue with water for 48 hours, evaporating to 18 fl. oz., adding the reserved 20, and bringing up to 40 with water [Br. Ph.]. [B, 95 (a, 38).]—**Extractum taraxaci liquidum.** 1. Of the Br. Ph., see *Extractum taraxaci liquidum*. 2. An extract made by dissolving 3 parts of extract of t. in 1 part of water [Dan. Ph., Russ. Ph., Pruss. Ph. (1846)]; or by treating equal weights of the leaves and the root of *T.* with warm water and evaporating to a thin extract [Austr. Ph., Hung. Ph.]. [B; B, 95 (a, 38).]—**Infusum taraxaci** [U. S. Ph., 1870]. Infusion of dandelion, made by macerating 2 oz. of t.-root in 1 pint of boiling water and straining. [B, 5 (a, 21).]—**Mellago taraxaci.** See *Extractum taraxaci liquidum* (2d def.).—**Pilule de fulminate de t.** (Fr.). An old name for a placebo.—**Radix taraxaci.** See **T.** (2d def.).—**Radix taraxaci cum herba** [Ger. Ph., Gr. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (*recens* [Russ. Ph.]). Roum., *taraxacu* [Roum. Ph.]. The *T. officinale* gathered in the spring before blooming. [B, 95 (a, 38).]—**Radix taraxaci pulverata.** A powder of t.-root sifted through a 1,000-mesh sieve [Russ. Ph., 1858, 1859, 38].—**Succus taraxaci** [Br. Ph.]. Dandelion juice; made by crushing t. (2d def.) in a stone mortar, expressing, adding 1 volume of alcohol for 3 volumes of juice, allowing to stand a week, and filtering. [B, 95 (a, 38).]—**T. dens leonis.** **T. officinale.** **T. officinarum.** Fr., *t. commun, chopine, cochet, couronne de moine, dent-de-lion, laitue de chien, liondent, pissenlit, salade de taupe*. Ger., *genienkraut, Pflaenzchen, Pflaenzlein, Löwenzahn, Hundebium, Maibium, Butterbium, Pflaenzkraut, Bompaswurzel, Wiesenlattig, Eterbium, Eterkraut*. Dandelion (lion's-tooth), priest's-crown, swine's-snout; a polymorphous herbaceous plant (see cut under **LEONTODON t.**) found over the whole of Europe, central and northern Asia, and North America. The perennial, tapering, simple or nearly simple, fleshy root (see **T.** (2d def.)) is rich in an inodorous juice which is bitter and neutral when fresh, but soon acquires an acid reaction and coagulates. A number of principles (inulin, levulin, taraxacin, and taraxacerin) have been obtained from it, but what part they have in its medicinal virtues is not known. The intracellular substance of the root consists, according to Vogel, chiefly of pectose. The juice, if exposed to the air, undergoes a kind of fermentation resulting in the formation of mannite. It is somewhat tonic, diuretic, and laxative, and is used especially in hepatic disorders. Dried, ground, and roasted, it is sometimes used with or as a substitute for coffee. The fresh leaves or entire herb, *herba taraxaci* (*seu dentis leonis, seu leontodontis [taraxaci]*, *seu lactuca pratensis*), are less active than the root, though the juice obtained from the flower-stalks is highly recommended by Barton. The young leaves are eaten as a salad and pot-herb. [a, 35.]

TARAXIS (Lat.), n. f. $Ta^2r(ta^2r)^2a^2x^2a^2x^2i^2s$. Gen., *-ax'leos* (*-is*). Gr., *taraxia* (cf. *taraxaceus*, to trouble). A disorder of sight arising from a blow or from compression of the eye. 2. A mild ophthalmia. [F.]

TARCHONANTHUS (Lat.), n. m. $Ta^2rk(ta^2rch^2n)^2o^2n^2a^2nth(a^2nth)^2u^2s(u^2s)$. A genus of the *Compositæ*. The *Tarchonanthæ* (Fr., *tarchonanthées*) are a division of the *Vernioniceæ*. [a, 35].—**T. camphoratus.** Shrubby fleabane of southern Africa; an aromatic, stimulant species, used like sage. [a, 35.]

TARCONINE, n. $Ta^2r^2ko^2n^2en$. Fr., *t.* A derivative, $C_{11}H_{13}NO_3$, of cotarine. [B, 270 (a, 38).]

TARDIF (Fr.), adj. Ta^2r^2def . See **SEROTINOUS**.

TARTEMISM, n. $Ta^2r^2ent^2izm$. Lat., *tartemismus*. Fr., *tartemisme*. See **TARTEMISM**.

TARIÈRE (Fr.), n. $Ta^2r^2re^2er$. See **OVIPOSITOR** and **DRILL**.

TARIRI (Lat.), n. n. indecl. $Ta^2r^2re^2re$. Fr., *t.* Of Aublet, a genus of the *Quassiceæ*; tropical American bitter, tonic, and febrifuge trees or shrubs. [a, 25.]

TARLATANE (Fr.), n. $Ta^2r^2la^2tan^2en$. Fine gauze (used for dressings). [a, 18.]

TARO, n. In Hawaii, kalo. [a, 35.]

TAROLI, n. An old term for chance. [G.]

TARRA, n. In Lima, dividivi. [a, 35.]

TARRAGON, n. $Ta^2r^2a^2ro^2gn$. See **ARTEMISIA druncunculus**.—**Oil of t.** An essential oil closely resembling oil of anise.

TARSAL, adj. $Ta^2r^2s^2al$. Lat., *tarsalis, tarsesus* (from *tarsus* [g. v.], Fr., *tarsien*. Ger., *t.* Pertaining to the tarsus.

TARSALGIA (Lat.), n. f. $Ta^2r^2s^2al^2g(a^2l^2g)^2i^2a^2$. From *rapas*, the tarsus, and *algos*, pain. Fr., *tarsalgie*. Ger., *Tarsalgie, Fusswurzelkmerz*. 1. Pain in the tarsus. [a, 17.] 2. Painful valgus.

TARSALIS (Lat.), adj. $Ta^2r^2s^2al(a^2l^2s)^2i^2a$. Tarsal; as a n., of Coues, the tensor tarsus. [L.]

TARSECTOMY, n. $Ta^2r^2s^2e^2kt^2om^2i$. From *rapas*, the tarsus, and *ektomē*, excision. Fr., *tarsectomie*. Excision of the tarsus.

TARSECTOPIA (Lat.), n. f. $Ta^2r^2s^2e^2kt^2op^2i^2a^2$. From *rapas*, the tarsus, and *ektrosis*, out of place. Fr., *tarsectopie*. Displacement of the tarsus. [L, 50 (a, 14).]

TARSEUS (Lat.), **TARSIIEN** (Fr.), adj's. $Ta^2r^2s^2e^2u^2s(u^2s)$, $ta^2r^2se^2a^2n^2i$. See **TARSAL**.

TARSITIIS (Lat.), n. f. $Ta^2r^2s^2i^2e^2ti^2s$. Gen., *-it'idos* (*-idis*). From *tarsus* (g. v.). Fr., *tarsite*. Ger., *t.* Inflammation of the tarsal cartilages. [F.]

TARSOACE (Lat.), n. f. $Ta^2r^2s^2o^2k(a^2s^2k)^2e^2a$. Gen., *-oc'aces*. From *rapas*, the tarsus, and *karos*, evil. Fr., *t.* See **PANTHROACE**.

TARSO-CHEILOPLASTIC, adj. $Ta^2r^2s^2o^2k^2il^2o^2pla^2st^2ik$. From *rapas* (see **TARSUS**), *χείλος*, a lip, and *πλασσειν*, to mold. Plastic and performed on the border of the eyelid (said of an operation for trichiasis). [a, 34.]

TARSOCLASIS (Lat., n. f. $\text{Ta}^2\text{rs-o}^2\text{k}^2\text{la}^2\text{s}(\text{la}^2\text{s})^2$. Gen., *-claseos* (*-oclasia*). From *tarpos*, the tarsus, and *κλάσις*, a breaking. The operation of breaking a deformed tarsus by force. [V. P. Gibney, "N. Y. Med. Jour.," Apr. 17, 1886, p. 437 (a, 50).]

TARSO-METATARSAL (Lat., n. f. $\text{Ta}^2\text{rs-o}^2\text{ma}^2\text{la}^2(\text{ma}^2\text{la}^2)\text{-as}(\text{a}^2\text{k})^2$. Gen., *-claseos* (*-oclasia*). From *tarpos* (see TARSUS), and *μαλακία*, softness. Ger., *Lidknorpelweichung*. Softening of the palpebral cartilages. [a, 34.]

TARSO-METATARSAL, adj. $\text{Ta}^2\text{rs-o}^2\text{me}^2\text{a}^2\text{ta}^2\text{rs}^2$. Fr., *tarso-metatarsien*. Pertaining to the tarsus and the metatarsus.

TARSO-METATARSUS (Lat., n. m. $\text{Ta}^2\text{rs-o}^2\text{me}^2\text{a}^2\text{ta}^2\text{rs}^2$. u^s(u^s). That bone which reaches from the tibia to the toes in a bird; really nearly all metatarsus, but having at its top one of the small tarsal bones confluent with it, so that in itself it comprehends part of the tarsus as well as all the metatarsus. [L, 343.]

TARSO-MÉTATARSIS-PHALANGIEN DU DOUCÉ (Fr.), n. $\text{Ta}^2\text{rs-so-ma}^2\text{ta}^2\text{rs}^2\text{-se-fa}^2\text{a}^2\text{ph}^2\text{-zhe-a}^2\text{n}^2\text{du}^2$ pus. See *ADDUCTOR hallucis*.

TARSPHYMA (Lat., n. n. $\text{Ta}^2\text{rs-o}^2\text{fm}^2(\text{u}^2\text{m})^2$. From *tarpos*, the tarsus, and *φύμα*, a growth. Fr., *tarso-plyme*. 1. A swelling of the ankle. 2. A swelling of the tarsal cartilages. [L, 50 (a, 14).]

TARSO-PRÉPHALANGEUS (Lat., n. m. $\text{Ta}^2\text{rs-o}^2\text{pre}^2(\text{pra}^2\text{a}^2)\text{-fa}^2\text{a}^2\text{ph}^2\text{-zhe-a}^2\text{n}^2$) $\text{je}^2\text{a}^2(\text{ge}^2)\text{-u}^2\text{s}^2(\text{u}^2\text{s})^2$. From *tarpos*, the tarsus, *præ*, before, and *phalanx* (q. v.). A small muscle in solids arising from the extensor tendons and attached to the lower end of the os calcis. It aids in extending the digits and keeping the tendons tense. [L, 13.]

TARSORRHAPHY, n. $\text{Ta}^2\text{rs-o}^2\text{rrh}^2\text{af}^2$. From *tarpos*, the tarsus, and *ρᾶφῃ*, a seam. Fr., *tarso-rrhaphie*. Ger., *Tarso-rrhaphie*. Any operation for shortening and narrowing the palpebral fissure. [F.]

TARSO-SOUS-PHALANGIEN (Fr.), n. $\text{Ta}^2\text{rs-so-su-fa}^2\text{a}^2\text{ph}^2\text{-zhe-a}^2\text{n}^2$. A flexor muscle extending from the tarsus to the lower surface of the phalanx of a toe. [a, 48.] **T.-s.-p. du gros orteil**. See *Flexor hallucis brevis*. **T.-s.-p. du petit orteil**. See *Flexor digiti minimi pedis brevis*.

TARSTOMY, n. $\text{Ta}^2\text{rs-o}^2\text{om}^2$. From *tarpos*, the tarsus, and *τομή*, a cutting. Fr., *tarstomie*. Ger., *Tarstomie*. 1. A cutting operation on the tarsus of the foot. 2. The removal of a portion of the whole of the tarsal cartilage. [F.] **Anterior t.** Of Poinet, t. (1st def.) in which the anterior row of tarsal bones is removed. [a, 34.] **Cuneiform t.** Excision of a wedge-shaped piece of bone, which may include portions of any of the tarsal bones. [a, 34.] **Posterior t.** T. in which the posterior row of tarsal bones, including the astragalus, is excised. [a, 34.] **Subcutaneous linear t.** Of Reeves, t. (1st def.) without injury to the tendons, vessels, or nerves by means of a chisel introduced through a small incision on the dorsum of the foot. [a, 34.]

TARSUS (Lat., n. m. $\text{Ta}^2\text{rs-u}^2\text{s}^2(\text{u}^2\text{s})^2$. Gr., *ταρσός* (lit., any broad, flat surface). Fr., *tarse*. Ger., *Tarsus* (lit. def.). The bony structure constituting the greater part of the arch of the foot, consisting of the os calcis, the astragalus, the scaphoid bone, the cuboid bone, and the three cuneiform bones. 2. In birds, see *TARSO-METATARSUS*. 3. The so-called cartilage of the eyelid (tarsal cartilage), which forms the skeleton or support of the lid. It is properly only dense connective tissue, interspersed with numerous elliptical nuclei. The one in the upper lid is much thicker, broader, and denser than that in the lower lid. Its shape is crescentic, with the ciliary border sharply cut off. The tarsal bone thinned toward the orbital margin, and finally merges in a fascia, which is firmly attached to the orbital margin. The tarsus contains the Meibomian glands. [F.] **T.-palpebralis**. See *T.* (3d def.).

TARTAR, n. Ta^2rt^2 . Lat., *tartarum*, *tartarus* (connected in some obscure way with *Tátrapos*, Hades). Fr., *tartre*. Ger., *Weinstein* (1st def.). Sp., *tártaro*, *rasuras del vino* (1st def.). 1. A substance deposited as a whitish or reddish crystalline crust on the sides of wine-casks, consisting of a mixture of acid and normal tartarates, especially those of potassium and calcium. [B, 35 (a, 38).] 2. See *Sordes* (1st def.). **Acid of t.** Tartaric acid. [B.] **Ammoniated soluble t.** Potassium and ammonium tartrate. [B.] **Cream of t.** Lat., *cremor tartari*. Fr., *crème de tartre*. Ger., *Weinsteinarhm*. Commercial acid tartrate of potassium, usually containing more or less calcium tartrate; so called because when it is mixed with water a fine creamy film of minute crystals floats on the top. [B, 5, 8.] **Crude t.** See *T.* (1st def.). **Crystals of t.** Cream of t., especially as obtained in the crystalline form. [B.] **Emetic t.** See *ANTIMONY and potassium tartrate*. **Ointment of t.** Emetic. See *ANTIMONY and potassium tartrate*. **Red t.** The reddish t. deposited from red wine. [B, 5.] **Salt of t.** Potassium carbonate obtained by decomposing cream of t. [B.] **Soluble (cream of t.) t.** See *TARTARUS borazatus*. **Stibiated t.** **T.** **Emetic**. See *ANTIMONY and potassium tartrate*. **T.** **Emetic substitute**. See *ANTIMONY and potassium ozalate*. **Tartrated t.** See *TARTARUS tartarizatus*. **Vitriolated t.** Potassium sulphate. [B, 91.] **White t.** Crude t. deposited from white wine and having a dirty-whitish color. [B, 5.]

TARTAREOUS, adj. $\text{Ta}^2\text{rt}^2\text{-ar}^2\text{-e}^2\text{-u}^2\text{s}^2$. Lat., *tartareus*. Ger., *weinsteinarthig*. Having a rough, tartar-like surface. [a, 35.]

TARTARIC, adj. $\text{Ta}^2\text{rt}^2\text{-ar}^2\text{-e}^2\text{-u}^2\text{s}^2$. Lat., *tartaricus*. Fr., *tartrique*. Derived from or contained tartar. [B.] **T. acid**. Lat., *acidum tartaricum* (see *TARTARUM* [Fr. Cod.]), and *essentielle tartari*. Fr., *acide tartrique*, *acide du tartre*. Ger., *Weinsäure*, *Weinsteinsäure*. A dibasic acid, $\text{C}_4\text{H}_4\text{O}_6$ or $\text{C}_2\text{H}_2(\text{OH})_2\text{CO}_2\text{H}$. In chemical structure t. acid is both a dibasic acid and a dihydric alcohol, and so contains four atoms of replaceable hydrogen, all of which are replaceable by metals and two by acid radicals. Four isomeric varieties are known: (1) *dextrotartaric acid*, ordinary t. acid (Lat., *acidum tartaricum* [U. S. Ph.]; Fr., *acide dextrotracé-*

mique; Ger., *Rechtsweinensäure*), a body forming large prismatic crystals of acidulous taste, readily soluble in water, the solution having a specific dextrotratory power of 9.6°; (2) *levotartaric acid*, *antitartaric acid* (Fr., *acide antitartrique*; Ger., *Antiwinsäure*), a body forming rhombic crystals which have in general the same properties as ordinary t. acid, but in solution have a specific levotatory power of 9.6°; (3) *mesotartaric acid*, *optically inactive t. acid* (Ger., *Mesowinsäure*), a body forming crystals resembling those of ordinary tartaric acid, but having in solution no effect upon the plane of polarization; (4) *metatartaric acid* (Ger., *Metawinsäure*), an amorphous substance produced by heating ordinary t. acid to 170° C. A mixture of dextrotartaric and levotartaric acids constitutes *racemic acid*, also called *paratartaric acid*. [B, 4, 5.] **T. anhydride**. Ger., *Weinsäureanhydrid*. A white or yellowish powder, $\text{C}_2\text{H}_2\text{O}_3$, isomeric with tartaric acid. [B, 3 (a, 38).] **(Test-) solution of t. acid**. A solution of t. acid in 5 parts [U. S. Ph. 4 parts (foliate)] of water or in 8 of water and 2 of alcohol [Br. Ph.]. [B, 81 (a, 38).]

TARTARICUS (Lat., adj. $\text{Ta}^2\text{rt}^2\text{-ar}^2(\text{a}^2\text{r}^2)\text{-u}^2\text{s}^2(\text{u}^2\text{s})^2$. Tartaric; with the name of a base, the tartrate of that base. [B.]

TARTARIMÉTRIE (Fr.), n. $\text{Ta}^2\text{rt}^2\text{-ar}^2\text{-e-ma}^2\text{-tre}$. Analysis by means of potassium carbonate obtained by calcination of cream of tartar. [a, 14.]

TARTARIZED, adj. $\text{Ta}^2\text{rt}^2\text{-r}^2\text{-izd}$. Lat., *tartaratus*, *tartarizatus*. Containing tartar or tartaric acid.

TARTAROUS ACID, n. $\text{Ta}^2\text{rt}^2\text{-r}^2\text{-u}^2\text{s}^2$. Tartaric acid. [B.]

TARTARUM (Lat., n. n. $\text{Ta}^2\text{rt}^2\text{-ar}^2(\text{a}^2\text{r}^2)\text{-u}^2\text{s}^2(\text{u}^2\text{s})^2$. A term originally applied to tartar; now supplanted by *tartarus*. [B.] **T. antimoniales**, **T. antimoniatum**, **T. emeticum**. See *ANTIMONY and potassium tartrate*.

TARTARUS (Lat., n. m. $\text{Ta}^2\text{rt}^2\text{-ar}^2(\text{a}^2\text{r}^2)\text{-u}^2\text{s}^2(\text{u}^2\text{s})^2$. See *TARTAR*. **Alkali tartari**. An old term for potassium tartrate and for purified potassium carbonate. [a, 38.] **Arsenum tartari**. See *T. regeneratus*. **Cremon tartari**. See *Cream of tartar*. **Cremon tartari solubilis**. See *T. borazatus*. **Crystalli tartari**. See *Crystals of tartar*. **Decoctum crystallorum tartari**, **Decoctum tartari citratum**. See *Solutio tartari depurati*. **Emplastrum tartari sibiati**. A plaster consisting of 2 parts of antimony and potassium tartrate and 14 of emplastrum resinae pini [Russ. Ph.]; or of 14 parts of the tartrate, 6 of olive-oil, and 80 of Burgundy-pitch plaster [Belg. Ph.]. [B, 95 (a, 38).] **Globuli tartari ferruginosi** (see *mariales*). [B.] **Liquor salis tartari**. The liquor kali carbonici of the Ger. Ph. [B, 10.] **Liquor tartari empyreumaticus**. See *Liquor pyrotartaricus*. **Liquor tartari solubilis chalybeatis**. Fr., *eau de boue*, *eau martiale*. A preparation made by dissolving 1 part of iron and potassium tartrate in 2 parts of water [Brunsw. Ph., 1777] (in 1,000 parts of water [Fr. Milit. Hosp. Ph., 1839]). **Liquor tartari sibiati**. See *Liquor ANTIMONY tartarizati*. **Liquor terra foliata tartari**. The liquor kali acetic of the Ger. Ph. [B.] **Lotio tartari sibiati**. A solution of 4 parts of tartar emetic in 80 of boiling water, with the addition of 15 of camphorated brandy. [B, 119 (a, 38).] **Oleum tartari per deliquium**. The oily liquid formed by the deliquescence of potassium carbonate in moist air; also a solution of potassium carbonate in 2 parts of water, corresponding to the liquor kali carbonici of the Ger. Ph. [B.] **Pulvis tartari compositus**. 1. Of the Swed. Ph., see *Pulvis dentifricus* (1st def.). 2. A mixture of 5 parts of cream of tartar with 7 of potassium sulphate. [B, 95, 119 (a, 38).] **Sal essentielle tartari**. Tartaric acid. [B.] **Sal tartari**. Normal potassium carbonate. [B.] **Sal tartari essentielle** (see *essentials*). Tartaric acid. [B, 97.] **Solutio tartari depurati**. Fr., *hydrolé tartrique*. Solution of superhydrate of potassium; a preparation consisting of 11 parts of cream of tartar, 960 of warm water, and 60 of raspberry syrup; or of 15 of cream of tartar, 36 of warm water, and 30 of raspberry syrup; or made by boiling 30 parts of cream of tartar with 600 of water till reduced to 450, and adding 15 of lemon-juice. [B, 119 (a, 38).] **Spiritus tartari**. Pyrotartaric acid obtained by the distillation of tartar. [B, 97.] **Spiritus tartari vitriolatus**. A preparation made by treating 3 parts of cream of tartar with 8 of calcined iron sulphate, and distilling over the sand bath. [B, 119 (a, 38).] **T. acetosus**. Potassium tartrate. [B, 119 (a, 38).] **T. acidus lapillatus**. Potassium bitartrate. [L, 53.] **T. ammoniacalis**, **T. ammoniatum**. See *Potassium and ammonium tartrate*. **T. antimoniales**. Antimony and potassium tartrate. [B.] **T. borazatus**. Fr., *tartare borico-potassique*. Ger., *Natriumkaliumtartrat*, *Borazweinstein*. Sp., *tartrato bórico-potásico*. A preparation made by dissolving 2 parts of borax and 4 [Dan. Ph., Swiss Ph., Netherl. Ph., Norw. Ph., Swed. Ph.] (5 [Ger. Ph., Finn. Ph., Russ. Ph.], 6 [Gr. Ph.], 8 [Belg. Ph., Fr. Cod. Sp. Ph.]) of acid potassium tartrate in 20 parts of water (16 [Dan. Ph., Russ. Ph.]), filtering, drying or evaporating, and sometimes powdering. [B, 95 (a, 38).] **T. chalybeatus**. See *Iron and potassium tartrate*. **T. crudus**. See *Tartarus* (1st def.). **T. depuratus**. Acid potassium tartrate. [B.] **T. depuratus pulverisatus**. Cream of tartar powdered and sifted through a No. 1 hair sieve [Fr. Cod.] (a 1,600-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).] **T. emeticus**. See *ANTIMONY and potassium tartrate*. **T. ferratus**. 1. Of the Ger. Ph., 1st ed., crude iron and potassium tartrate. [B, 95 (a, 38).] 2. Of the Swiss Ph., see *IRON and potassium tartrate*. **T. ferruginosus**, **T. martialis**, **T. martiatum**. See *IRON and potassium tartrate*. **T. mercurialis**. See *MERCURY tartrate*. **T. natronum**. See *Potassium and sodium tartrate*. **T. regeneratus**. Potassium acetate; so called because prepared by the ignition of cream of tartar. [B, 3.] **T. solubilis**. See *T. borazatus*. **T. solubilis ammoniacalis**. See *POTASSIUM and ammonium tartrate*. **T. sibiatus**. See *ANTIMONY and potassium tartrate*. **T. tartarizatus**. Tartrated tartar; normal potassium tartrate. [B.] **T. vitriolatus**. Vitriolated tartar, normal potassium sulphate; first prepared by treating tartar, or acid potassium tartrate, with sulphuric (vitriolic) acid. [B.] **T.**

vitriolatus depuratus. Purified potassium sulphate. [B.]—**Tinctura (salis) tartari.** See *Tinctura ANTIMONII aurata*.—**Tinctura tartari composita.** A preparation made by distilling 4,320 parts of tartar, 1,620 of guaiac-wood, and 540 each of sassafras, sarsaparilla, and china-root, separating the liquid from the oil swimming on the surface, digesting in it 180 parts of cream of tartar, 240 of guaiac-wood, 45 each of sassafras-wood, ash-wood, and sarsaparilla, 75 of china-root, 30 of red sandal-wood, and 11 of sulphuric acid, and straining after some days. [B, 119 (a, 38).]—**Unguentum tartari emetici** (see *stibiati*). See *Unguentum ANTIMONII tartarati*.

TAIRTAUFE (Fr.), n. $\text{Ta}^{\text{a}}\text{r}$ -tof. See *SOLANUM tuberosum* (esculentum).

TARTRALIC ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -tra²l¹ik. Fr., *acide tartrique*. Ditartrale acid, $\text{C}_4\text{H}_6\text{O}_{11}$. [B, 3 (a, 38).]

TARTRAMIC ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -tra^mm¹ik. A monobasic acid, $\text{C}_4\text{H}_5\text{NO}_6$. [B, 53 (a, 14).]

TARTRAMIDE, n. $\text{Ta}^{\text{a}}\text{r}$ -tra^m-i^d(id). Fr., t. Ger., *Tartramid*. A body, $\text{C}_4\text{H}_5(\text{OH})_2\text{CONH}_2$, forming rhombic crystals. [B, 4, 93.]

TARTRAS (Lat.), n. f. $\text{Ta}^{\text{a}}\text{r}$ -tra^s(ra^s). Gen., -rat^{is}. See *TARTRATE*.—**Pulvis tartaratis stibicopotassici** [Fr. Cod.]. Antimony and potassium tartrate pounded in a porcelain mortar and reduced completely to powder on a hard slab. [B, 113 (a, 38).]—**Solutio tartaratis kali** [Dan. Ph.]. A filtered solution of 1 part of potassium tartrate in 3 parts of distilled water. [B, 95.]—**Syrupus tartaratis ferri et potassii**. See *Syrupus tartaratis ferri et potassii*.—**T. antimonio-potassicus**. See *ANTIMONY and potassium tartrate*.—**T. bicalicus**, **T. bipotassicus**. Normal potassium tartrate. [R.]—**T. borico-potassicus**. See *TARTARUS boraxatus*.—**T. ferrico-ammonicus**. See *IRON and ammonium tartrate*.—**T. ferrico-kalici**, **T. ferrico-potassicus**. See *IRON and potassium tartrate*.—**T. ferri-potassicus**. See *IRON and potassium tartrate*.—**T. kalico-ammonicus**. See *POTASSIUM and ammonium tartrate*.—**T. kalico-natrius**. Potassium and sodium tartrate. [B, 95 (a, 38).]—**T. kalico-stibiati**, **T. kalico-stibicus**. Antimony and potassium tartrate. [B, 95, 119.]—**T. kalicus**. See *POTASSIUM tartrate*.—**T. kalicus acidus**. Acid potassium tartrate. [a, 38.]—**T. natrio-kalici**. See *POTASSIUM and sodium tartrate*.—**T. potassio-ferricus**. Iron and potassium tartrate. [B.]—**T. potassio-sodici**. Potassium and sodium tartrate. [B.]—**T. potassicus**. See *POTASSIUM tartrate*.—**T. sodico-potassicus**. See *POTASSIUM and sodium tartrate*.—**T. stibico-kalici**, **T. stibico-potassicus**. Antimony and potassium tartrate. [B, 95 (a, 38).]—**Tinctura tartaratis ferri-potassici** [Belg. Ph.]. A preparation made by stirring 2 parts of iron filings and 5 of cream of tartar into a pap with water, allowing to digest, boiling for two hours with 15 parts of water, the amount of water which is thus evaporated being replaced, decanting the clear part of the liquid when cold, evaporating to a sp. gr. of 1.26, adding 1 part of 93-per-cent. alcohol, and, after some days, filtering. [B, 95 (a, 38).]—**Unguentum tartaratis kalico-stibici** (see *stibico-kalici*). See *Unguentum ANTIMONII tartarati*.—**Vinum tartaratis kalicoferri**. Sp., *vinu de tartarato ferrico-potassico*. A preparation made by stirring 1 part of powdered iron and 4 parts of cream of tartar into a pap with water, evaporating almost to dryness, repeating the operation on the residue with more water until it becomes black, homogeneous, and almost wholly soluble in water, macerating with 40 parts of water, filtering, evaporating to dryness, powdering, adding 10 times as much white wine, and, after some days, filtering [Netherl. Ph.]; or by dissolving 12 parts of powdered iron and 40 parts of cream of tartar in 400 parts of white wine [Sp. Ph.]. [B, 95 (a, 38).]—**Vinum tartaratis stibico-kalici**. See *Vinum ANTIMONII*.

TARTRATE, n. $\text{Ta}^{\text{a}}\text{r}$ -tra^t. Lat., *tartras*. Fr., t. Ger., *Tartrat*, *weinsaueres Salz*. A salt of tartaric acid. Three classes of t's are known: (1) *neutral t's*, in which both the replaceable hydrogen atoms of the acid constituent are replaced by a metal; (2) *acid t's*, in which one of those atoms is so replaced; and (3) *basic t's*, in which the hydrogen of the alcoholic hydroxyl as well as that of the acid constituent is replaced. Tartaric emetic is a basic t. [B.]—**Potassic antimonylic t.** Antimony and potassium t. [B, 159.]—**Poudre de t. borico-potassique** [Fr. Cod.] (Fr.). Tartarus boraxatus powdered and sifted through a No. 1 hair sieve. [B, 113 (a, 38).]—**Sirup de t. ferrico-potassique** (Fr.). Lat., *syrupus tartaratis ferri et potassii*. Sp., *jarabe de tartarato ferrico-potassico*. A preparation containing 1 part each of iron and potassium tartrate and water (cinamon water [Belg. Ph.]) and 36 parts of syrup [Fr. Cod., Belg. Ph.]; or 3 parts of the tartrate dissolved in water and 200 of syrup [Sp. Ph.]. [B, 95 (a, 38).]—**T. antimonio-potassique** (Fr.). Antimony and potassium t. [B, 119.]—**T. borico-potassique** (Fr.). See *TARTARUS boraxatus*.—**T. droit** (Fr.). A t. derived from dextrotartaric (ordinary tartaric) acid. [B.]—**T. ferrico-ammonique** [Fr. Cod.] (Fr.). Iron and ammonium t. [B.]—**T. ferrico-potassique** (Fr.). Iron and potassium t. [B.]—**T. mercurieux** (Fr.). See *MERCURY t.*—**T. potassio-ammonique** (Fr.). See *POTASSIUM and ammonium t.*—**T. potassio-sodique** (Fr.). See *POTASSIUM and sodium t.*—**Test solution of potassio-cupric t.** [U. S. Ph.]. A preparation made by slowly adding a solution of 0.93 grammes of selected crystals of copper sulphate in 200 c. c. of water to a solution of 36 grammes of potassium t. in 140 c. c. of solution of soda, and bringing up to 200 c. c. with solution of soda. [B, 5 (a, 38).]

TARTRE (Fr.), n. $\text{Ta}^{\text{a}}\text{r}$ -tr. See *TARTAR*.—**Acide du t.** See *TARTARIC ACID*.—**Sel de t.** See *POTASSIUM carbonate*.—**Solution de crème de t.** See *Solutio TARTARI depurati*.—**T. antimonie**. Antimony and potassium tartrate. [B, 119.]—**T. méphitique**. See *POTASSIUM carbonate*.—**T. stygié**. Of Fatin, a sarcastic name for tartar emetic. [B.]

TARTRELIC ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -tre²l¹ik. Fr., *acide tartrélique*. Gr., *Tartrelsäure*. A substance, $\text{C}_4\text{H}_5\text{O}_{10}$, isomeric with tartaric anhydride, occurring as deliquescent crystals. [B, 3 (a, 38).]

TARTROMEL, n. $\text{Ta}^{\text{a}}\text{r}$ -ro-me²l. A solution of tartaric acid in honey slightly diluted with water. [B, 14.]

TARTROMETHYLIC ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -ro-me²th-i²l¹ik. See *METHYLtartaric acid*.

TARTRONIC ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -troⁿa²l¹ik. Fr., *acide tartronique*. Ger., *Tartronsäure*. A dibasic crystalline acid, $\text{C}_2\text{H}_4\text{O}_6 = \text{CH}(\text{OH})\text{COOH}$ forming large transparent crystals. [B, 4.]

TARTRONYL, n. $\text{Ta}^{\text{a}}\text{r}$ -troⁿa²l¹ik. The bivalent radicle of tartaric acid, $\text{CH}(\text{OH})\text{CO}$. [B.]—**T^urea**. See *DIALURIC ACID*.

TARTROPHthalic ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -tro^{ph}tha²l¹ik. Fr., *acide tartrophthalique*. Ger., *Tartrophthalsäure*. An acid, $\text{C}_8\text{H}_6\text{O}_8$, $\text{O}_2 = \text{C}_6\text{H}_4(\text{OH})_2(\text{COOH})_2$, occurring as colorless prismatic crystals containing two molecules of water. [B, 3 (a, 38).]

TARTROVINIC ACID, n. $\text{Ta}^{\text{a}}\text{r}$ -tro-vin¹ik. Fr., *acide tartrovinique*. Ger., *Tartrovinensäure*. See *ETHYLtartaric acid*.

TARTUFLE (Fr.), n. $\text{Ta}^{\text{a}}\text{r}$ -tu^f-fl. See *SOLANUM tuberosum* (esculentum).

TASCHE (Ger.), n. $\text{Ta}^{\text{a}}\text{sch}$ -e². 1. A pocket. [a, 14.] 2. See *SINUS*.—**Bauchfelln**. See *RECESSUS peritonæi*.—**Duodenalt¹**. See *Duodeno-jejunal FOSSA*.—**Haart¹**. See *HAIR* and *HAIR-FOLLICLE*.—**Hypophysent¹**. 1. The depression in the primitive brain which becomes the vesicle of the hypophysis cerebri. [I, 17 (K).] 2. See *Pituitary DIVERTICULUM*. 3. See *ISTHMIUM* (2d def.).—**Keihkopf¹**. Morgagni'sche T. See *VENTRICLE of the larynx*.—**T¹nörmig**. Purse-like, pouch-like. [I, 31.]

TÄSCHELKRAUT (Ger.), n. $\text{Ta}^{\text{a}}\text{sch}$ -el¹-kra³-ut. The genus *Capsella*, especially *Capsella bursa pastoris*. [a, 35.]

TASIS (Lat.), n. f. Tas (ta^s)¹is. Gen., *tas'eos*, *tas'is*. Gr., *τάσις* (from *ταίω*, to stretch). See *EXTENSION*.

TASMANNIA (Lat.), n. f. $\text{Ta}^{\text{a}}\text{sm}$ -maⁿ-i²a³. Fr., *tasmannie*. A genus of the *Magnoliaceæ* included by Benth and Hooker in *Drimys*. [a, 35.]—**T. aromatica**. The pepper-tree of Tasmania, where the berry-like fruits are used in place of pepper and the leaves as an aromatic. The aromatic bark resembles Winter's bark, and is used like it. [a, 35.]

TASSENFÖRMIG (Ger.), adj. $\text{Ta}^{\text{a}}\text{ss}$ -e²en-fu²m-i²g. Disc-shaped. [a, 35.]

TASTBALLEN (Ger.), n. pl. $\text{Ta}^{\text{a}}\text{st}$ -ba²l¹-leⁿ. See *PELOTES tactiles*.

TASTE, n. Tast . Gr., *γεῦσις*. Lat., *gustus*. Fr., *goût*. Ger., *Geschmack*. The sensation of flavor due to the action of certain exciting substances upon special nerve-endings in the tongue. [K.]—**After-t¹**. Fr., *après-goût*. Ger., *Nachgeschmack*. A t. perceived after the direct action of the rapid substance has ceased. [K, 3.]—**T-beakers**, **T-buds**, **T. bulbs**, **T. cups**. See *T-BUDS*.—**T-discs**. Ger., *Geschmackscheiben*. Patches of modified epithelia on the tongues of *Amphibia*. They are usually surrounded by a narrow girdle of ciliated cells, and are abundantly supplied with nerves from the glossopharyngeal. The epithelium is of two kinds: supporting cells, called *cup-cells*, and the true sensorial cells (forked-cells), which are supposed to be connected with nerve-fibres. [J, 30, 35.]—**T-pore**. The narrow end or summit of a t-bud seen on a free surface, usually on the side of a fungiform or foliate papilla. [J, 31, 35.]—**T-ridges**. See *PAPILLÆ foliatae*.

TASTERZIRKEL (Ger.), n. $\text{Ta}^{\text{a}}\text{st}$ -e²r-tserk-e²l. See *CALIPERS*.

TASTGEFÜHL (Ger.), n. $\text{Ta}^{\text{a}}\text{st}$ -ge²-fu²l. See *TORCH*.

TASTMENISKEN (Ger.), n. pl. $\text{Ta}^{\text{a}}\text{st}$ -man-esk-eⁿ. See *Tactile MENISCI*.

TASTPAPILLEN (Ger.), n. pl. $\text{Ta}^{\text{a}}\text{st}$ -pa²p-el-leⁿ. See *Nerve PAPILLÆ* and *Tactile CORPUSCLES*.

TASTSINN (Ger.), n. $\text{Ta}^{\text{a}}\text{st}$ -ziⁿ. The sense of touch.

TASTUNG (Ger.), n. $\text{Ta}^{\text{a}}\text{st}$ -un². Examination with the finger.

TATAEIVWEISS (Ger.), n. $\text{Ta}^{\text{a}}\text{t}$ -a²i-vis. See under *Egg ALBUMIN*.

TATENHAUSEN (Ger.), n. $\text{Ta}^{\text{a}}\text{t}$ -eⁿ-ha²-u²-eⁿ. A place in Westphalia where there is a chalybeate spring. [L, 135 (a, 14).]

TATOOING, TATTOOING, n's. $\text{Ta}^{\text{a}}\text{t}$ -u²-i²n². Fr., *tatouage*. Ger., *Tatowirung*. The process of introducing particles of coloring matter into the skin by punctures or incisions, so as to produce indelible stains. [G, 30.]—**T. of the cornea**. Artificial pigmentation of the cornea (usually with India-ink) for the removal of the cosmetic defect produced by a dense leucoma: done either with several very fine needles bound together or with a single grooved needle. [F.]

TATZMANNSDORF (Ger.), n. $\text{Ta}^{\text{a}}\text{ts}$ -maⁿ-z-do²rf. A place in Eisenburg County, Hungary, where there is a chalybeate spring.

TAUBENKROPF (Ger.), n. $\text{Ta}^{\text{a}}\text{u}$ -b-eⁿ-kro²p. See *SILENE inflata*.—**Ackert¹**. See *SILENE otites*.

TAUBENNEST (Ger.), n. $\text{Ta}^{\text{a}}\text{u}$ -b-eⁿ-ne²st. See *NIDUS* (4th def.).

TAUBENWEIZEN (Ger.), n. $\text{Ta}^{\text{a}}\text{u}$ -b-eⁿ-vi²ts-eⁿ. See *Sedum album*.

TAUBHEIT (Ger.), n. $\text{Ta}^{\text{a}}\text{u}$ -b-hit. See *DEAFNESS*.—**Seelent¹**. See *Psychical DEAFNESS*.

TAUBSTUMMER (Ger.), n. $\text{Ta}^{\text{a}}\text{u}$ -b-stum-me^r. See *DEAF-MUTE*.

TAUBSTUMMHEIT (Ger.), n. $\text{Ta}^{\text{a}}\text{u}$ -b-stum-hit. See *DEAF-mutism*.

TAUMEL (Ger.), n. $Ta^3u^m-e^l$. See REELING.—**T'wahn**. See DRUNKENNESS.

TAUPE (Fr.), n. Top. Any soft tumor of the scalp.

TAURINE, n. $Ta^r'en$. Fr. t. Ger., *Taurin*, *Gallenasparagin*. Amidsethionic acid; a substance, $C_2H_5NH_2SO_2H = C_2H_5N_2O_3$, found in the bile and in various animal tissues. It crystallizes in transparent monoclinic prisms. [B; 3 (a, 38).]

TAUROCARBAMIC ACID, n. $Ta^r-o-ka^3rb-a^2m^l/k$. A crystalline acid, $C_2H_5N_2O_4 = C_2H_5(NH.CO.NH_2)SO_2H$, occurring in the urine after the administration of taurine. [B, 3.]

TAUROCHOLIC ACID, n. Ta^r-o-ko^l/k . Fr., *acide taurocholique*. Ger., *Taurocholsäure*. A monobasic and univalent acid, $C_{25}H_{49}NO_8$, occurring in bile, forming fine, silky, brilliant and deliquescent needles. [B; 3, 93 (a, 14).]

TAUROCOLLA (Lat.), n. f. $Ta^r-(ta^3u^r)-o(o^3)-ko^l/la^3$. From $\tau\alpha\upsilon\rho\acute{o}s$, a bull, and $\kappa\acute{o}\lambda\lambda\alpha$, glue. Fr., *taurocolle*. Animal glue, especially that prepared from the ears, etc., of cattle. [L, 50 (a, 14).]

TAURUS (Lat.), n. m. $Ta^r-(ta^3u^r)-u^3s(u^3)$. Gr., $\tau\alpha\upsilon\rho\acute{o}s$. Fr., *taureau* (1st def.). Ger., *Stier* (1st def.). 1. A bull. 2. Of Galen, that part of the penis which extends backward of the scrotum, together with the perineum. [A, 530.]—**Oleum pedum tauri**. See *Neat's-foot oil*.

TAURYLIC ACID, n. $Ta^r-i^2/l^2/k$. See CRESOL.

TÄUSCHUNG (Ger.), n. $Toish'un^2$. See ILLUSION and DELUSION.

TAUSENDGÜLDENKRAUT (Ger.), n. $Ta^3u^z-e^2nd-gu^l'd-e^2n-kra^2-ut$. See ERYTHREA and ERYTHREA *centaurium*.—**T'extract**. See *Extractum centaurii*.

TAVELÉ (Fr.), adj. Ta^2-v^l-a . Spotted. [L, 41 (a, 14).]

TAVERNIERA (Lat.), n. f. $Ta^3v^e-r^2e-e^2r^2/a^3$. Fr., *tavernière*. A genus of the Leguminosae. [a, 35.]—**T. nummularia**. East Indian moneywort. The leaves are applied to sloughing ulcers. [a, 35.]

TAXACEOUS, adj. $Ta^2x-a'shu^3s$. Resembling the genus *Taxus*; belonging to the *Taxaceae*, which are an order of gymnosperms (yews, etc.), now made a series or tribe of the *Coniferae*. The *Taxaceae* (Fr. *taxées*) are: Of Sprengel, the *Taxaceae*; of Reichenbach, a family of the *Inconspicuae*, consisting of the *Cuscarineae*, *Ehedeae*, *Taxineae* (*Taxaceae*), and *Myricaceae*. The *Taxideae*, the *Taxineae*, and the *Taxineae* are the *Taxaceae*. [a, 35.]

TAXIDERMY, n. $Ta^2x-i^2-du^2rm-i^2$. From $\tau\acute{\alpha}\xi\iota s$, arrangement, and $\delta\acute{\epsilon}\rho\mu\alpha$, the skin. The art of preparing and preserving skins so as to represent the appearance of the living animal. [L, 343.]

TAXINE, n. $Ta^2x'en$. Ger., *Taxin*. A resinous alkaloid obtained from the leaves and berries of *Taxus baccata*. [B, 93 (a, 14).]

TAXIS (Lat.), n. f. $Ta^2x(ta^2x)^2/s$. Gen., *taxeos* (-is). Gr., $\tau\acute{\alpha}\xi\iota s$ (from $\tau\acute{\alpha}\xi\iota\sigma\alpha\iota$, to arrange). Fr. t. Ger., *T. Lit.*, arrangement; a reduction, especially a methodical pressure by the hand for the purpose of reducing a hernia or other prolapsed structure. [E.]—**Bipolar t.** A form of manipulation employed for reducing a retroverted uterus, in which pressure upward is made upon the body of the organ through the rectum, and the cervix is drawn down through the vagina. [A, 59.]

TAXODIUM (Lat.), n. n. $Ta^2x(ta^2x)-od^2-i^2-u^2m(u^2m)$. From $\tau\acute{\alpha}\xi\iota s$, yew, and $\delta\acute{\iota}\delta\alpha\varsigma$, resemblance. Fr., *taxodier*. A genus of the *Taxodiaceae* (a tribe of the *Coniferae*). [a, 35.]—**T. distichum**. Fr., *cyprès chauve* (ou de la Louisiane). Ger., *virginische Cypressse*. Bald (or black, or deciduous) cypress of the southern United States, Mexico, etc., recommended for destroying malarial germs. The tree yields an essential oil, also a resin which is used as an external stimulant. The leaves are applied to tumors, inflamed surfaces, etc., and, together with the seed, are used internally in hepatic disorders. The bark is applied to burns and ulcers. [a, 35.]—**T. mucronatum**. Montezuma cypress; a Mexican species. The bark is emmenagogue and diuretic; the leaves are used in scabies and as a resolvent. A liquid pitch obtained from the wood is used in skin diseases. [*Proc. of the Am. Pharm. Assoc., xxiv, p. 770 (a, 50); a, 35.]

TAXOLOGY, n. $Ta^2x-o^2l^2-o^2-i^2$. From $\tau\acute{\alpha}\xi\iota s$, arrangement, and $\lambda\acute{o}\gamma\omicron s$, understanding. See *TAXONOMY*.

TAXONOMIC, adj. $Ta^2x-o-no^2m^l/k$. Classificatory. [L, 343.]

TAXONOMY, n. $Ta^2x-o^2n^2-o^2m^l/k$. Lat., *taxonomia* (from $\tau\acute{\alpha}\xi\iota s$, arrangement, and $\nu\acute{o}\mu\omicron s$, a law). Fr., *taxonomie*. The science of classification; the arrangement of living organisms in groups according to their degrees of likeness. [L, 11.]

TAXUS (Lat.), n. f. $Ta^2x(ta^2x)^2/u^3s(u^3s)$. Gr., $\tau\acute{\alpha}\xi\iota s$. Fr., *if*. Ger., *Eibe*, *Eibenbaum*. 1. Yew (tree); the typical genus of the *Taxaceae* (see under *TAXACEOUS*). [a, 35.] 2. See *T. baccata*.—**T. baccata**. Fr., *if* (commun, ou d'Europe). Ger., *gemeine Eibe*. The common yew of middle and southern Europe and of Asia. The leaves and green branches, formerly official as *folia* (see *summitates taxi* (*baccate*)), contain tannin and miltosin, and (in sufficient quantity) are a deadly poison; they are still used as an emmenagogue, and in India as an expectorant. The red, succulent cups (*baccæ taxi*) containing the seeds are edible, and were formerly used in the preparation of a pectoral syrup. The seeds, however, are highly poisonous, acting like digitalis. The wood and bark (*hignum et cortex taxi*), formerly official, are no longer used. [a, 35.]—**T. nucifera**. Fr., *if à amande*. A yew of China and Japan with edible fruits, the stones of which yield a nutritious oil. [a, 35.]

TAYNIA, n. In Brazil, a cucurbitaceous plant (probably *Bryonia ficifolia*) used as an evacuant under the name of *abopora do matto*. [a, 35.]

TAUYUA, n. In Brazil, the *Bryonia ficifolia* and perhaps other plants; also the drastic fruit and the root (t. root) of *Bryonia ficifolia*. The latter is used as an antispasmodic. [a, 35.]

TEA, n. Te. Chin., *cha*. N. Gr., $\tau\acute{\epsilon}\iota$, $\tau\acute{o}\alpha$. Lat., *thea*. Fr., *thé*. Ger., *Thee*. 1. The dried leaves of *Camellia thea* and its varieties, often further aromatized with the flowers or leaves of the rose, jasmine, sweet-scented olive, etc. T. contains a volatile, citron-yellow oil (from 0.4 to 1 per cent, or more, according to the age of the leaf), tannin, from 0.43 to 5 per cent, of theine (combined, according to Mulder, with tannic acid), boheic acid, quercetin, quercitannic, gallic, and oxalic acids, gum, wax, resin, coloring matter, etc. It is astringent (especially if long infused) and gently exhilarating. Its excessive use produces dyspepsia and nervous derangements. It is sometimes used medicinally in diarrhoea and nervous headache, and in China the leaf is used in fevers. [a, 35.] See *Black t.* and *Green t.* 2. An infusion prepared like that of tea. [a, 46.]—**Abyssinian t.** The leaves and leafy twigs of *Catha edulis*. [a, 35.]—**African t.-plant** (or tree). See *LYCIUM afrum*.—**Australian t.-plant** (or tree). 1. See *MELALEUCA*. 2. A name for various species of *Leptospermum*. [a, 35.]—**Bencoolen t. (-plant)**. See *GLAPHYRIA nitida*.—**Black t.** T. of a dark-brown color; prepared from leaves which have been allowed to remain in heaps for some hours and undergo a kind of fermentation, and afterward slowly dried. It is less pungent and fragrant than green t. [a, 35.]—**Blankenheim t.** Ger., *Blankenheimer Thee*. A proprietary remedy sold in Europe; the principal ingredients of which were species of *Galeopsis*. [L, 65 (a, 50).]—**Bohea t.** Ger., *Bohithee*. A variety of black t., so called from the Chinese name (*wu-i*) of the mountains in Fuh-keen, where it is cultivated. [a, 35.]—**Bush t.** The leaves of *Cyclopia genistoides* and other species of *Cyclopia*. [a, 35.]—**Canadian t.** See under *GAULTHERIA procumbens*.—**Carolina t.-plant**. The *Ilex vomitoria*. [a, 35.]—**Cochin-China t.-plant**. The *Teucrium thea*. [a, 35.]—**Gout-t.** See *COMBIA globosa*.—**Green t.** T. of a dark-green color; prepared from leaves which have undergone no fermentation, and have been so rapidly dried as not to undergo change in their chlorophyll. Its color, however, is often due to an artificial coloring matter, chiefly a mixture of gypsum and Prussian blue, with which it is glazed. It contains more volatile oil and tannin than black t. [a, 35.]—**Jersey t.** The genus *Ceanothus*, especially *Ceanothus americanus*. [a, 35.]—**Jesuit's t.** 1. The herb of *Chenopodium ambrosioides*. 2. The *Boerhaavia glandulosa*. [a, 35.]—**Labrador t.** A t. made from the leaves of *Ledum latifolium*. [a, 35.]—**Marsh t.** See *LEDUM palustre*.—**Mexican t.-plant**. See *Jesuit's t.*—**Mountain t.** See *GAULTHERIA procumbens*.—**New Zealand t.-plant**. The *Leptospermum flavescens* and *Leptospermum scoparium*. [a, 35.]—**Oswego t.** See *MONARDA didyma*.—**Paraguay t.** See *Ilex paraguensis*.—**Pectoral t.** See *SPECIES pectorales*.—**T'berry**. The *Gaultheria procumbens*. [a, 35.]—**Teamster's t.** See *EPHEDRA antisyphilitica*.—**T. oil**. A fixed oil obtained from the seeds of *Camellia oleifera* and *Camellia japonica*. [a, 35.]—**T.-tree**. See *THEA* (2d def.). *THEA assamica*, and *Lycium barbarum*.—**Whorehouse t.** See *EPHEDRA antisyphilitica*.

TEAK, n. Tek. The *Tectona grandis*; also (in Africa) the *Oldfieldia africana*, (in New Zealand) the *Vitex littoralis*, and (in New South Wales) the *Endiandra glauca*. [a, 35.]

TEAR, n. Ter. Gr., $\delta\acute{\alpha}\kappa\upsilon\sigma$, $\delta\acute{\alpha}\kappa\upsilon\sigma\alpha\iota$. Lat., *lacrima*. Fr., *larme*. Ger., *Thräne*. A drop of the liquid which is secreted by the lacrymal gland and moistens the eyeball. [a, 48.]

TEASEL, n. $Te^2z'l$. A plant of the genus *Dipsacus*, also the *Eupatorium perfoliatum*. [a, 35.]

TEASING, n. $Te^2z'p^2n$. In microscopy, the process of tearing a specimen into small pieces with needles.

TEAT, n. Ti^2t . A.-S., *tif*. Gr., $\theta\eta\acute{\alpha}\lambda$. Lat., *papilla*. Fr., *trayon*, *tétine* (tétin being applied to rudimentary teats). Ger., *Euterzitze*. See NIPPLE.

TEAZEL, n. $Te^2z'l$. See *TEASEL*.

TECHNOCAUSIS (Lat.), n. f. $Te^2k(te^2ch^2)-no^2(n^3)-ka^3s(ka^3-u^3s)^2/s$. Gen., *-caus-eos* (-is). From $\tau\acute{\epsilon}\chi\eta$, art, and $\kappa\alpha\upsilon\sigma\iota s$, a burning. The actual cautery. [L, 50 (a, 14).]

TECHNOLOGY, n. $Te^2k-no^2l^2-o^2-i^2$. From $\tau\acute{\epsilon}\chi\eta$, art, and $\lambda\acute{o}\gamma\omicron s$, understanding. The science of the industrial arts. [a, 48.]

TECNOCTONIA (Lat.), n. f. $Te^2k-no^2k-ton(t^2n)^2-i^2-a^3$. Gr., *teknoktonia* (from *teknoktonai*, to murder children). Fr., *tecnoctonie*. Ger., *Teknoktonie*. Infanticide. [L, 50 (a, 14).]

TECNOGONIA (Lat.), n. f. $Te^2k-no^2(n^3)-gon(g^2n)^2-i^2-a^3$. Gr., *teknogonia* (from *teknogonai*, to bear children). Fr., *tecnogonie*. See *GENERATION* (1st def.).

TECOLITHUS (Lat.), n. m. $Te^2k(tak)-o^2l^2-i^2th-u^3s(u^3s)$. From $\tau\acute{\epsilon}\chi\eta$, to melt, and $\lambda\acute{i}\theta\omicron s$, a stone. Fr., *tecolithe*. Ger., *Judenstein*. A fossil calcareous concretion found in sponges; so called because it was supposed to dissolve urinary calculi. [L, 41, 50 (a, 14).]

TECOMA (Lat.), n. f. $Ta-kom^2/a^3$. From the Mex. name *Tecomatl*. Fr., *tecome*. Trumpet-flower (or creeper); a genus of the *Tecomeae* (a tribe of the *Bignoniaceae*). [a, 35.]—**T. impetiginosa**. An astringent species. The bark is used in lotions and baths for debility and inflamed joints. [a, 35.]—**T. ipé**. A Brazilian species having properties like those of *T. impetiginosa*. The bark is used as an astringent wash and the leaves in ophthalmia. [a, 35.]—**T. leucocxydon**. Fr., *cédré blanc des Antilles*. False ebony, white-wood of the West Indies, white-wood cedar. The flowers and root are said to be alexipharmac and to be used especially against the manchineel poison. The wood yields a green dye. [a, 35.]—**T. pentaphylla**. Fr., *poirier des îles* (ou des Antilles, ou de la Martinique). A species found in the Caribbean Islands. The bark is febrifuge. [a, 35.]—**T. radicans**. Fr., *jasmin de Virginie*. Virginian trumpet-flower, trumpet-creeper; a North American climber, considered poisonous. The leaves and branches are used as dyes. [a, 35.]—**T. stans**. Fr., *bois pissant*. Shrubby trumpet-flower, yellow elder of the West Indies. The root is reputed diuretic. [a, 35.]

TECTICUS (Lat.), adj. *Te'tikt(akt)'i'k-us* (u's). Gr., *τεκτικός* (from *τεκεν*, to melt). Fr., *tectique*. Ger., *schmelzend*. Colloquative. [L, 50 (a, 14).]

TECTOCEPHALIC, adj. *Te'kt-o-sep'a's'i'* (u's). From *tectum*, a roof, and *κεφαλή*, the head. Pertaining to or possessing a roof-shaped skull (*crâne en toit*). [a, 34.]

TECTONA (Lat.), n. f. *Te'kt-on'a's*. Fr., *teck*. Ger., *Tekbaum*. A genus of the *Verbenaceae*. [a, 35.]—*T. grandis*, *T. theka*. Fr., *teck élevé*, *bois de tek*, *chêne des Grandes-Indes*. Ger., *riesiger Tekbaum*. East Indian teak-tree (or oak); a tree valued for its hard and durable wood. The aciculous and bitterish leaves are used as an astringent. The flowers and seeds are diuretic. An aromatic oil obtained from the wood is used medicinally. [a, 35.]

TECTORIAL, adj. *Te'kt-or'i-a'l*. From *tectum*, a roof. Roofing, covering. [a, 48.]

TECTRIX (Lat.), n. f. *Te'kt(akt)'ri'x*. Gen., *tec'tricis*. From *tectere*, to cover. Fr., *couverlure*. A covert (feather); one of the smaller feathers of either the wing or the tail. [L, 343.]—**Tectrices** *also*. The coverts of the wings.—**Tectrices caudæ**. Tail-coverts, the small feathers overlapping the bases of the tectrices. [L, 341 (a, 27).]—**Tectrices inferiores**. Under-coverts, the tectrices also on the lower surface of the wings; also the tail coverts similarly situated. [L, 221.]—**Tectrices majores**. Greater coverts; the outermost row of small feathers, arising most from the forearm, which overlie the bases of nearly all the remiges except the first nine or ten. [L, 221.]—**Tectrices mediae**. A short row of small feathers immediately above the tectrices majores. [L, 221.]—**Tectrices minores**. Lesser coverts, the uppermost of the tectrices *also*. They are irregularly disposed. [L, 221.]—**Tectrices perversæ**. See *Tectrices mediae*.—**Tectrices superiores**. The coverts on the upper surface of the wing; also the tail coverts similarly situated. [L, 221.]—**Upper primary tectrices**. The coverts of the primaries; the feathers growing upon the pinion, which cover the bases of the outer nine or ten remiges. [L, 221.]

TECTUM (Lat.), n. n. *Te'kt(akt)'u'sm(u'm)*. From *tectere*, to cover. A roof or covering. [a, 48.]—*T. fosse* rhomboidalis. The roof of the fourth ventricle. [I, 73 (K).]—*T. ventriculi quarti*. See *VALVE of Vieussens*.

TECTUS (Lat.), adj. *Te'kt(akt)'u's(u's)*. From *tectere*, to cover. Fr., *couvert*. Ger., *bedeckt*. Covered, concealed by other parts or organs. [a, 35.]

TEEL, n. In Abyssinia, the *Sesamum orientale*. [a, 35.]—**T.-oil**. Oil of sesamum. [a, 35.]

TEETHING, n. *Teth'z'n*. See *DENTITION* (2d def.).

TEGENARIA (Lat.), n. f. *Te'g-e'n'a'r'i-a's* (u's). Fr., *tégénarie*. Ger., *Hausspinne*. A genus of the *Araneida*; the house-spiders. [a, 35.]—*T. domestica*. The common European house-spider. This and the larger species, *T. scalaria*, and their web are official as *aranea et tela araneorum*, and were formerly used as a febrifuge (see also *TELA aranea*). [a, 35.]—*T. medicinalis*. 1. An American species used like *T. domestica*. [a, 35.] 2. See *CANTHARIS vesicatoria*.

TEGMEN (Lat.), n. n. *Te'g-me'n*. Gen., *teg'minis*. From *tegere*, to cover. Ger., *Decke*. 1. Any covering or integument, especially the inner coat of an ovule or seed; of De Beauvois, the glume of grasses; a perule or bud-scale; an amphigastrium. [a, 35.]—*T. caudicis cerebri*. See *TEGMENTUM*.—*T. mastoideum*. The lower hollow tympani covering the mastoid antrum. [L, 57 (a, 14).]—*T. secundale*. Of Averothes, the pia. [I, 3 (K).]—*T. tympani*. Ger., *Paukdecke*. The superior wall or roof of the tympanic cavity, formed by an osseous plate continuous with the superior surface of the pyramid. This plate extends beyond the boundaries of the tympanic cavity, forming part of the superior lamella of the osseous meatus, of the upper wall of the cells of the mastoid process, of the roof of the canal for the tensor tympani, and of the osseous portion of the Eustachian tube. It is pierced by several apertures, and may be in great part wanting. [F, 32.]—*T. ventriculorum*. See *CENTRUM ovale majus*.

TEGMENT [Wilder], n. *Te'g-m'nt*. See *TEGMENTUM*.

TEGMENTUM (Lat.), n. n. *Te'g-me'nt(u'm)* (u'm). From *tegere*, to cover. Fr., *t. tegment*, *coiffe*, *calotte*. Ger., *Haube*, *Deckplatte*. 1. The dorsal portion of the crus cerebri, made up of longitudinal bundles of white nerve-fibres interlaced with numerous transverse and arching fibres. In the interstices are collections of gray matter containing ganglion cells (see *NUCLEUS of the f.*). Certain tracts of fibres in the f. have received distinct names (see *Posterior longitudinal fasciculus* and *Arcuate fibres*). The f. may be regarded as the prolongation upward of the reticular formation. To one side of it lies the lemniscus. [I, 6 (K).] 2. See *TEGMEN*.—*T. auris*. See *MEMBRANA tympani*.—*T. caudicis*, *T. cerebri*, *T. cruris* (cerebri). See *T.* (1st def.).—*T. tympani*. See *TEGMEN tympani*.—*T. ventriculi lateralis* (seu *ventriculorum cerebri*). See *CENTRUM ovale*.

TEGMINATE, a. j. *Te'g-mi'n-at*. Lat., *tegmatus* (from *tegmen*, a cover). Fr., *tegmé*. Having an inner coat (tegmen).

TEGMENT, n. *Te'g-m'nt*. Lat., *tegumentum* (from *tegere*, to cover). Fr., *tegment*. See *INTEGUMENT*.

TEGUMENT (Fr.), n. *Ta-gu'ma'n*. See *INTEGUMENT*.—*T. externe*. The skin. [A, 335.]—*T. interne*. See *Mucous MEMBRANE*.

TEGUMENTAL, **TEGUMENTARY**, adj's. *Te'g-u'e'nt(u'm)* (u'm). Pertaining to, connected with, or constituting an integument. [B, 28 (a, 27).]

TEICHOPSIA (Lat.), **TEICHOSCOPIA** (Lat.), n's f. *Tik-(te'z'ch'op'si-a)* (u's), *-o'skop'i-o'skop'i-a's*. From *τεῖχος*, a wall, and *ὄψis*, vision, or *σκοπέω*, to examine. Fr., *teichopsie*. Ger., *Teichopsie*, *Teichoscopia*. See *HEMIOPIA temporaria*.

TEIGNE (Fr.), n. *Te'n-y'*. 1. See *CUSCUTA europæa*. 2. See *PORRIGO* and *TINEA*.—*T. achromateuse*. See *VITILIGO*.—*T. amiantacée*. See *SEBORRHEGA amiantacea*.—*T. annulaire*. See *MYCOSIS trichophytina*.—*T. aréatée*, *T. décalvante*. See *ALOPECIA areata*.—*T. faveuse*. See *FAVUS*.—*T. faveuse acutiforme*. *Favus* in circumscribed rounded patches. [G.]—*T. faveuse squarreuse*. See *Favus granulatus*.—*T. furfuracée*. See *PITYRIASIS capitis*.—*T. granulée*. Of Albert, *eczema impetiginosum* and *eczema papulosum*. [G.] See also *PORRIGO granulata*.—*T. jaune*. See *FAVUS*.—*T. lycoperdoidale*. A tinea observed in the rabbit, characterized by crusts seated chiefly about the anus and causing death by obstructing defecation. The disease is very contagious among animals, but does not seem capable of development in man. [Mégnin, "Progr. méd.", Apr. 23, 1882, p. 321.]—*T. mucueuse*, *T. muqueuse*. Lat., *impetigo*. Impetiginous eczema of the head attended with free discharge and crusting. [G.]—*T. nummulaire*. See *MYCOSIS trichophytina*.—*T. pelade*. See *ALOPECIA areata* and *C. PELADE achromateuse* and *PELADÉ décalvante*.—*T. porrigineuse*. See *PITYRIASIS* and *PITYRIASIS capitis*.—*T. sycoïque*. See *SYCOSIS parasitaria*.—*T. tondante*. See *TRICHOMYCOSIS circinata*.

TEIGNEUX (Fr.), adj. *Te'n-yu'*. See *FARREUS*.

TEINACH (Ger.), n. *Tin'a'ch*. A place in the Black Forest district, Germany, where there are chalybeate springs. [a, 14.]

TEINESMUS (Lat.), n. m. *Tin-(te'z'p'n)-e'z'g(e's)'mu's(mu's)*. Gr., *τενεσμός* (from *τενειν*, to stretch). See *TENSUS*.

TEINODYNIA (Lat.), n. f. *Tin-(te'z'p'n)-o-(o's)-di'n(du'n)'i'a-s*. From *τενειν*, to stretch, and *δύνη*, pain. Fr., *teinodynie*. Pain in the tendons. [L, 50 (a, 14).]

TEINOPHLOGOSIS (Lat.), n. f. *Tin-(te'z'p'n)-o-(o's)-flog'o-sis'* (s). Gen., *-o's'eos(-is)*. From *τενειν*, to stretch, and *φλόγωσις*, a burning. Fr., *teinophlogose*. Inflammation of a tendon. [E.]

TEINTURE (Fr.), n. *Ta'n'tu'r*. See *TINCTURE* and *DYE*.—*T. alcoolique*. A tincture; of the Fr. Cod., an alcoholic solution either of a fixed or of a volatile principle, thus corresponding both to the tincture and the spirit of the U. S. Ph. [B.]—*T. amère*. See *Tinctura gentianæ composita* and *Tinctura amara*.—*T. antiscorbutique*. See *Tinctura cathartica composita*.—*T. antistomatique* de Jacobi. See *Tinctura ANTIMONIUM saponata*.—*T. antiscorbutique*. See *T. de RAIFFORT composée*.—*T. antivénérienne*. A preparation made by dissolving 5 parts of corrosive sublimate in 480 of rectified alcohol, mixing with a solution of 120 parts each of Venice turpentine and gualac resin in 480 of alcohol, and adding 28 of oil of sassafras. Sometimes Canadian turpentine was used, and the amount of alcohol varied. [B, 19 (a, 35).]—*T. antistomatique sulfurique*. See *ACIDUM SULPHURICUM aromaticum*.—*T. balsamique*. See *Tinctura BENZOINI composita*.—*T. bleue*. See *COPPER ammoniosulphate*.—*T. de Bestuscheff*. See *Tinctura FERRI chlorati æthereæ*.—*T. de Panama* [Fr. Cod.]. A preparation made by macerating quillaia-bark with 5 times as much 80-per cent. alcohol for ten days, expressing, and filtering. [B, 35 (a, 35).]—*T. de Williams*. See *Vinum COLCHICI seminis*.—*T. gingivale*. See *ETRIEROLÉ*.—*T. française*. See *DROUQUE amère*.—*T. gingivale*. See *Tinctura CATECHU composita* (3d def.).—*T. noire*. See *Black DYE*.—*T. thébaïque*. See *Tinctura opii*.—*T. thériacale composée*. See *Aqua SCORDI composita*.—*T. tonique* (de Whytt). See *Tinctura CINCHONÆ composita*.—*T. vulnéraire*. See *ALCOOLATURE vulnéraire*.—*T. vulnéraire* de Stahl. See *BALSAMUM vulnerarium* Stahl.

TEISSIÈRES-LES-BOULIES (Fr.), n. *Te'se-e'r-la-bu-le*. A place in the département of Cantal, France, where there is an alkaline and sulphurous spring. [L, 41, 49 (a, 14).]

TEKBAUM (Ger.), n. *Te'k'ba-u'm*. See *TECTONA*.

TELA (Lat.), n. f. *Tel'(tal)'a's*. Probably from *texere*, to weave. 1. A web. 2. See *TISSUE*.—*T. aranea*, *T. aranearum*. Spider's web, especially that of *Tegenaria domestica* and *Tegenaria medicinalis*; a cobweb. It has been used as a febrifuge and antispasmodic, also as a hemostatic application. [a, 35.]—*T. cartilaginea*. See *CARTILAGE*.—*T. cellularis*. See *AREOLAR TISSUE* and *CELLULAR TISSUE*.—*T. chorioidea*. Ger., *Gefässvohang*. See *VELUM interpositum*.—*T. chorioidea cerebelli*. See *T. chorioidea inferior*.—*T. chorioidea cerebri*. See *T. chorioidea superior*.—*T. chorioidea inferior*. Ger., *unterer Gefässvohang*. The portion of the pia mater which covers the floor of the fourth ventricle springs. [L, 32.] See *VALVE of Vieussens*.—*T. chorioidea media*. The chorioid plexus of the third ventricle. [I, 44 (K).]—*T. chorioidea superior*. The portion of the chorioid plexus which enters the cavities of the cerebrum through the transverse fissure. [I, 6 (K).]—*T. chorioidea ventriculi quarti*. See *T. chorioidea inferior*.—*T. conjunctoria*, *T. connectiva*. See *CONNECTIVE TISSUE*.—*T. connectiva*. See *TEGMENTUM*.—*T. foveolæ*. See *CONNEC-TIVE TISSUE*.—*T. flava*. See *Elastic TISSUE*.—*T. fulcrans*. See *CONNECTIVE TISSUE*.—*T. Gauthieri*. See *SPARADRAP DIAPALME*.—*T. hamalis* [Hæckel]. A term for lymph-cells and blood-corpuscles, also for the tissue of the spleen and other so-called blood-glands. ["Jena. Zeit.", 1884, p. 206 (J).]—*T. hymenochondroides*, *T. hymenochondroides*. See *CARTILAGE*.—*T. intermedia*. See *TEGMENTUM*.—*T. medullaris*. See *MEDULLARY TISSUE* and *MEDULLARY SUBSTANCE*.—*T. nervæ*. See *Nervous TISSUE*.—*T. ossea*. See *OSSEOUS TISSUE*.—*T. sexualis*. Ger., *Germinalgewebe*. Germinal tissue; ova and spermatozooids. [Hæckel, "Jena. Zeit.", 1884, p. 206 (J).]—*T. subcutanea*. See *Subcutaneous connective TISSUE*.—*T. subserosa*. Subserous connective tissue. [L.]—*T. tegmentalis* [Hæckel]. Ger., *Deckgewebe*. A general term for the epidermis and its appendages (hair, nails, etc.) and the epithelium and endothelium of the body. ["Jena. Zeit.", 1884, p. 206 (J).]—*T. vasculosa*. See *CHORIOID PLEXUS*.—*T. vesicatoria* [Swed. Ph., 1879]. See *SPARADRAP vesicans*.

TELÆSTHESIA (Lat.), n. f. $\text{Te}^2\text{l}(\text{tal})\text{-e}^2\text{s}(\text{a}^2\text{-e}^2\text{s})\text{-thez}(\text{thas})\text{-i}^2\text{-a}^3$. From $\tau\eta\lambda\alpha$, afar, and $\alpha\iota\sigma\theta\eta\sigma\iota\varsigma$, sensation. See **TELEPATHY**.

TELANGEICTASIA (Lat.), **TELANGEICTASIS** (Lat.), n's f. $\text{Te}^2\text{l-a}^2\text{n}(\text{a}^2\text{n}^2)\text{-ji}(\text{ge}^2\text{-i}^2)\text{-e}^2\text{kt-az}(\text{a}^2\text{s})\text{-i}^2\text{-a}^3$. $\text{-e}^2\text{kt/a}^2\text{s}(\text{a}^2\text{s})\text{-i}^2\text{s}$. Gen., $\text{-as}^2\text{i}^2\text{-e}$, $\text{-as}^2\text{i}^2\text{os}(\text{-ect/as}^2\text{i}^2)$. From $\tau\epsilon\lambda\omicron\varsigma$, the end, $\alpha\gamma\gamma\epsilon\iota\omicron\nu$, a vessel, and $\epsilon\kappa\tau\alpha\sigma\iota\varsigma$, extension. Fr., *telangieclasiæ*. Ger., *Telangieclasiæ*. A dilatation of the extremities of blood-vessels or of the capillary vessels. [E.] Cf. **NÆVUS**.

TELANGIEIOSIS (Lat.), n. f. $\text{Te}^2\text{l-a}^2\text{n}(\text{a}^2\text{n}^2)\text{-ji}(\text{ge}^2\text{-i}^2)\text{-os}^2\text{i}^2\text{s}$. Gen., $\text{-os}^2\text{eos}(\text{-is})$. From $\tau\epsilon\lambda\omicron\varsigma$, the end, and $\alpha\gamma\gamma\epsilon\iota\omicron\nu$, a vessel. Fr., *telangiose*. A diseased condition of the capillary blood-vessels. [a. 37.]

TELANTHERA (Lat.), n. f. $\text{Te}^2\text{l-a}^2\text{nth}(\text{a}^2\text{nth})\text{-er}(\text{ar})\text{-a}^3$. A genus of the *Amarantaceæ*. [a. 35.]—**T. polygonoides**. A plant found in the southern United States; used as a diuretic and in stranguary. [a. 35.]

TELEAMORPHA (Lat.), n. f. $\text{Tel}(\text{te}^2\text{l})\text{-e}^2\text{a}^2\text{-m}^2\text{o}^2\text{r}^2\text{f-a}^3$. From $\tau\epsilon\lambda\omicron\varsigma$, complete, and $\alpha\mu\omicron\phi\omicron\varsigma$, misshapen. See **ACMEAMORPHA**.

TELANGEICTASIS (Lat.), n. f. $\text{Tel}(\text{te}^2\text{l})\text{-e}^2\text{a}^2\text{n}(\text{a}^2\text{n}^2)\text{-ji}(\text{ge}^2\text{-i}^2)\text{-e}^2\text{kt/a}^2\text{s}(\text{a}^2\text{s})\text{-i}^2\text{s}$. Gen., $\text{-tus}^2\text{eos}(\text{-ect/as}^2\text{i}^2)$. See **TELANGEICTASIS**.

TELEGRAPH, n. $\text{Te}^2\text{l-e}^2\text{-gr}^2\text{a}^2\text{f}$. From $\tau\eta\lambda\epsilon$, afar, and $\gamma\alpha\phi\epsilon\iota\nu$, to write. Ger., *T*. An apparatus for conveying information to a distance, especially for conveying it very rapidly. [e. 48.]—**Muscle-t**. Of Du Bois-Reymond, an apparatus for recording muscular contractions. The muscle is fixed by one of its ends to a vise, while to the other end is fastened a thread which is passed around a wheel. As the muscle contracts, the wheel revolves and carries around an indicator which is attached to it. [K. 35.]

TELEIANTHIS (Lat.), adj. $\text{Te}^2\text{l-i}(\text{e}^2\text{-i}^2)\text{-e}^2\text{a}^2\text{n}(\text{a}^2\text{n}^2)\text{-thi}^2\text{s}$. From $\tau\epsilon\lambda\omicron\varsigma$, complete, and $\alpha\iota\omega\theta\omicron\varsigma$, a flower. Having perfect flowers. [a. 35.]

TELEOLOGY, n. $\text{Te}^2\text{l-e}^2\text{-o}^2\text{l-o}^2\text{-ji}^2$. Lat., *teleologia* (from $\tau\epsilon\lambda\omicron\varsigma$, the end, and $\lambda\omicron\gamma\omicron\varsigma$, understanding). Fr., *téléologie*. Ger., *Teleologie*. The doctrine of design or of adaptation to purpose. [L. 146.] Cf. **DYSTHEOLOGY**.

TELEOTHERAPEUTICS, n. $\text{Te}^2\text{l-e}^2\text{-o}^2\text{-the}^2\text{er-a}^2\text{-p}^2\text{-u}^2\text{-t}^2\text{-i}^2\text{s}$. From $\tau\eta\lambda\epsilon$, afar, and $\theta\epsilon\alpha\pi\epsilon\upsilon\tau\iota\kappa\eta$, therapeutics. The treatment of disease by bringing near the affected persons stoppered bottles containing the remedies usually employed. A form of suggestive therapeutics. [*"The Med. Gaz."* 1888, p. 761 (a. 34).]

TELETYPE, n. $\text{Te}^2\text{l-e}^2\text{-o}^2\text{-tip}$. From $\tau\epsilon\lambda\omicron\varsigma$, the end, and $\tau\acute{\upsilon}\pi\omicron\varsigma$, a type. Of Cunes, a type existing at the present time, its precedent forms being its prototypes, and it itself being the prototype of forms derived from it. [L. 221.]

TELEPATHY, n. $\text{Te}^2\text{l-e}^2\text{p-a}^2\text{th-i}^2$. From $\tau\eta\lambda\epsilon$, afar, and $\pi\acute{\alpha}\theta\omicron\varsigma$, feeling. A sympathetic sensation felt by one person in fancied connection with an occurrence happening to another at a distance. [A. Carver, "*Boston Med. and Surg. Jour.*," Apr. 2, 1885, p. 329.]

TELEPHIC, adj. $\text{Te}^2\text{l-e}^2\text{f-i}^2\text{k}$. For deriv., see **TELEPHIUM**. Fr., *téléphic*. Ger., *telephisch, unheilbar*. See **MALIGNANT**.

TELEPHIUM (Lat.), n. n. $\text{Te}^2\text{l}(\text{tal})\text{-e}^2\text{f-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m})$. Gr., $\tau\eta\lambda\epsilon\phi\iota\omicron\nu$ (3d def.). From the mythical Telephus, son of Hercules, said by Homer to have suffered from t. (1st def.) after being wounded by Achilles. 1. An old ulcer (cf. **ACHILLEUM** [1st def.]). [E.] 2. A genus of the *Portulacaceæ*. 3. An old name for the genus *Sedum*. [a. 35.]

TELEPHONE, n. $\text{Te}^2\text{l-e}^2\text{-f}^2\text{on}$. From $\tau\eta\lambda\epsilon$, afar, and $\phi\omega\eta\eta$, a sound. Fr., *téléphone*. Ger., *Telephon*. An apparatus for conveying articulate sounds to a distance, especially by means of electricity. [a. 48.]

TELEPHORESIS (Lat.), n. f. $\text{Te}^2\text{l-e}^2\text{-fo}^2\text{r-e}(\text{a})\text{-si}^2\text{s}$. Gen., $\text{-es}^2\text{os}(\text{-is})$. Gr., $\tau\epsilon\lambda\epsilon\phi\omicron\rho\omicron\sigma\iota\varsigma$ (from $\tau\epsilon\lambda\omicron\varsigma$, the end, and $\phi\omega\epsilon\iota\nu$, to bear). Fr., *téléphorèse*. Complete foetal maturation. [L. 60 (a. 14).]

TELESTEREOSCOPE, n. $\text{Te}^2\text{l-e}^2\text{-ste}^2\text{r-e}^2\text{-o}^2\text{-skop}$. From $\tau\eta\lambda\epsilon$, afar, $\sigma\tau\epsilon\rho\epsilon\acute{\omicron}\varsigma$, solid, and $\sigma\kappa\omicron\pi\epsilon\iota\nu$, to examine. Fr., *téléstéréoscope*. Ger., *Telestereoskop*. A stereoscope for viewing very distant objects by the artificial increase of the interocular distance by means of four plane mirrors so fixed in a box as to admit of slight rotation, and thus bring the images into coincidence. [F.]

TELEUTOSPORES, n. pl. $\text{Te}^2\text{l-u}^2\text{-t}^2\text{-o-spor}^2\text{-z}$. From $\tau\epsilon\lambda\epsilon\upsilon\tau\eta$, a finishing, and $\sigma\pi\omicron\rho\acute{\alpha}$, a spore. Ger., *Teleutosporen*. Secondary spores produced by the *Uredineæ* late in the season. [a. 35.] See under **CORN-MILDREW**.

TELFAIRA (Lat.), n. f. $\text{Te}^2\text{l-fa}^2\text{-r-i}^2\text{-a}^3$. Fr., *telfairie*. A genus of climbing shrubs constituting a tribe (*Telfairiæ*) of the *Cucurbitaceæ*. [a. 35.]—**T. pedata**. Fr., *liane de joliff*. A bitter, tonic species indigenous to eastern tropical Africa, cultivated for the bland edible oil extracted from its seeds. [a. 35.]

TELLENHYDRIC, adj. $\text{Te}^2\text{l-e}^2\text{n-hid}^2\text{-i}^2\text{k}$. Hydrotelluric. [B.]

TELLERFLECHTE (Ger.), n. $\text{Te}^2\text{l}^2\text{le}^2\text{r-fl}^2\text{e}^2\text{ch}^2\text{t-e}^2$. See **LECIDEA**.

TELLERFÖRMIG (Ger.), adj. $\text{Te}^2\text{l}^2\text{le}^2\text{r-f}^2\text{u}^2\text{rm-i}^2\text{g}$. See **HYPOCRATERIFORM**.

TELLUR (Ger.), n. $\text{Te}^2\text{l-lur}^2$. See **TELLURIUM**.—**T'wasserstoff**. See **HYDROTELLURIC ACID**.

TELLURAMYL, n. $\text{Te}^2\text{l-u}^2\text{r-a}^2\text{m-i}^2\text{l}$. See **AMYL telluride**.

TELLURATE, n. $\text{Te}^2\text{l-u}^2\text{r-at}$. A salt of telluric acid. [B. 3.]

TELLUR-ETHYL, n. $\text{Te}^2\text{l-u}^2\text{r}$. Fr., *telluréthyle*. See **ETHYL telluride**.

TELLURETED, adj. $\text{Te}^2\text{l-u}^2\text{r-e}^2\text{t-e}^2\text{d}$. Containing or combined with tellurium. [B.]

TELLURIC ACID, n. $\text{Te}^2\text{l-u}^2\text{r-i}^2\text{k}$. Fr., *acide tellurique*, Ger., *Tellursäure*. A dibasic acid, H_2TeO_6 . When combined with water it forms the crystalline hydrated acid, $\text{H}_2\text{TeO}_4 \cdot 2\text{H}_2\text{O}$. [B. 3.]

TELLURIDE, n. $\text{Te}^2\text{l-u}^2\text{r-i}^2\text{d}(\text{id})$. Fr., *tellurure*, *tellurure*. Ger., *Tellurid*. A compound of an element or radicle directly with tellurium. [B.]

TELLURISME (Fr.), n. $\text{Te}^2\text{l-u}^2\text{-r-es-m}^2$. The induction of disease by emanations from the soil. [A. 385 (a. 48).]

TELLURITE, n. $\text{Te}^2\text{l-u}^2\text{-r-it}$. A salt of tellurous acid. [B.]

TELLURIUM (Lat.), n. n. $\text{Te}^2\text{l-lu}^2\text{-r-i}^2\text{ur-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m})$. From *tellus*, the earth. Fr., *tellure*. Ger., *Tellur*. A non-metallic element, first identified as an elementary body toward the close of the last century, but known to mineralogists earlier. Its name was given to it by Klaproth in 1798. T. occurs in nature in the free state, and also combined with the metals. It is a bluish-white, brittle substance, of metallic lustre, which can be obtained in the crystalline form. In combination it acts as a bivalent, quadrivalent, or sexvalent radicle, its compounds bearing a close chemical relation to those of sulphur. It melts at about 500° C. Symbol, Te ; atomic weight, 128; sp. gr., 6.24. [B.]

TELLURO-HUMAIN (Fr.), adj. $\text{Te}^2\text{l-u}^2\text{-r-o-u}^2\text{-m-a}^2\text{n}^2$. Of tetanic infection, conveyed from the earth or the soil to man. [a. 18.] Cf. **INTERHUMAN**.

TELLUROSEL (Fr.), n. $\text{Te}^2\text{l-u}^2\text{-r-o-zel}$. A salt in which the acid element is tellurium. [B. 38 (a. 14).]

TELLUROUS ACID, n. $\text{Te}^2\text{l-u}^2\text{-r-u}^2\text{s}$. Fr., *acide tellureux*. Ger., *tellurige Säure*, *Telluroxyd*. A dibasic acid, H_2TeO_5 , a white solid, soluble with difficulty in water. [B. 3.]

TELLURURE (Fr.), n. $\text{Te}^2\text{l-u}^2\text{-r-u}^2\text{r}$. See **TELLURIDE**.

TELOCEITHAL, adj. $\text{Te}^2\text{l-o-le}^2\text{-s-i}^2\text{-th}^2\text{l}$. From $\tau\epsilon\lambda\omicron\varsigma$, the end, and $\lambda\iota\epsilon\kappa\epsilon\theta\omicron\varsigma$, the alk. of an egg. Having the nutritive yolk concentrated at the vegetative pole of an ovum. [L. 201.]

TELOSASIS (Lat.), n. f. $\text{Tel}(\text{te}^2\text{l})\text{-e}^2\text{-a}^2(\text{a}^2)\text{-si}^2\text{s}$. Gen., $\text{-as}^2\text{eos}(\text{-is})$. From $\tau\eta\lambda\epsilon$, afar, and $\delta\pi\alpha\sigma\iota\varsigma$, a seeing. Fr., *télorsase*. See **PRESTYPIA**.

TÉMOIN (Fr.), n. $\text{Ta-mwa}^2\text{n}^2$. Lit., a witness: a person or animal that has been subjected to experiment to test the process; a test-animal; a test-case.

TEMPE (Fr.), n. $\text{Ta-n}^2\text{p}$. See **TEMPLE**.

TEMPERAMENT, n. $\text{Te}^2\text{m-pe}^2\text{-r-a}^2\text{-m}^2\text{-nt}$. Lat., *temperamentum*. Fr., *tempérament*. Ger., *Beschaffenheit, Körperanlage*. Peculiarity of constitution, embracing the nature or frame of mind, the mode of manifestation of the activity of the brain, etc. [D. 3.]—**Atrabiliary t.** See *Melancholic t.*—**Biliosanguine t.** A combination of the bilious and sanguine t's. [a. 48.]—**Bilious t.** Of the humorists, a mental condition ascribed to the influence of bile on the brain's action. [a. 34.]—**Choleric t.** A t. in which there are great activity of the voluntary muscles, a tense, firm habit of body, great irritability, and strong passions. [D. 3.]—**Insane t.** A neurotic condition in which there is a tendency to insanity. [a. 34.]—**Leucophlegmatic t.** A systemic condition characterized by a tendency to and symptoms of leucopneumonia. [a. 34.]—**Lymphatic t.** See *Pneumatic t.*—**Lymphatico-sanguine t.** **Lymphatic-sanguine t.** A t. that is in part phlegmatic and in part sanguine. [a. 48.]—**Melancholic t.** A t. marked by slight irritability united with strong capacity for reacting to sensory excitations, and by great persistence of the frame of mind, especially that of dullness or sullenness. [D. 3.]—**Nervous t.** A t. characterized by marked sensitiveness of the nervous system. [a. 48.]—**Phlegmatic t.** **Quiet t.** A t. characterized by flabby muscles (when in repose), want of energy in the involuntary muscles, turgescence of the tissue, a disposition to adipose deposit, small or slow reaction to psychic excitation, slightly developed passions, and little sensibility to bodily suffering. [D. 3.]—**Sanguine t.** A t. characterized by marked irritability, great liability of the nervous system to exhaustion, and sudden changes in the activity of the special senses and in humor. [D. 3.]—**Sentimental t.** See *Melancholic t.*

TEMPERAMENTUM (Lat.), n. n. $\text{Te}^2\text{m-pe}^2\text{-r-a}^2(\text{a}^2)\text{-me}^2\text{-nt}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m})$. From *temperare*, to regulate. A proper measure, moderation, temperament. [a. 48.]—**Torile t.** Of Tertullian, an ancient screw-like instrument for dilating the vagina. [A. R. Simpson, "*Brit. Med. Jour.*," Dec. 13, 1884, p. 1178.] See *COCHLEA* (4th def.).

TEMPÉRANT (Fr.), adj. $\text{Ta-n}^2\text{-pa-ra-n}^2$. Tending to modify excessive activity of the circulation. [A. 385 (a. 48).]

TEMPERATURE, n. $\text{Te}^2\text{m-pe}^2\text{-r-a}^2\text{-u}^2\text{-r}$. Gr., $\kappa\alpha\theta\alpha\upsilon\sigma\iota\varsigma$. Lat., *temperatura, temperies* (from *temperare*, to regulate). Fr., *température*. Ger., *temperatur*. The degree of the heat of a body expressed in terms of some recognized standard. [D.]—**Absolute t.** T. measured from the absolute zero (i. e., °C). [B.]—**Animal t.** Ger., *Körpertemperatur*. The normal t. of the healthy adult. It is nearly constant in warm-blooded animals. [B.]—**Body-t.** T. of the body. It may be external or surface t. (measured, e. g., in the axilla) or internal, the latter being indicated by the t. in one of the cavities of the body (e. g., the mouth or the rectum). [D.]—**Hyperpyretic t.** An axillary t. between 41° C. and 41.5° C. [D. 3.]—**Non-febrile t.** An axillary t. between 38.1° C. and 38.5° C. [D. 3.]—**Normal t.** See *Animal t.*—**Postmortem t.** The temporary production of increased heat in the dead body. It is said to be caused by the solidification of the muscles, by a series of chemical processes, or by diminution of the loss of heat after death. [a. 25.]—**T-regulator**. See *Cold-water coil*.

TEMPLE, n. $\text{Te}^2\text{m-p}^2\text{l}$. Gr., $\kappa\alpha\theta\alpha\upsilon\sigma\iota\varsigma$. Lat., *templum*. Fr., *temple*. Ger., *Schläfe*. The flattened or slightly hollowed area on the side of the head just above the zygomatic arch. [C. 1.]

TEMLIN-OIL, n. $\text{Te}^2\text{m-p}^2\text{l-i}^2\text{n}$. Fr., *huile de templin*. Ger., *Templinöl*. See *OLEUM templinum* and *KRUMHOLZÖL*.

TEMPORAL, adj. $\text{Te}^2\text{m-p}^2\text{-o}^2\text{-r}^2\text{-l}$. Lat., *temporalis*. Fr., *t.* Pertaining to, or in relation with the temples. [C.]

TEMPORALIS (Lat.), adj. $\text{Te}^2\text{mp-or}^2\text{-al}^2(\text{a}^2)\text{is}$. See **TEMPORAL**; as a n., the temporal muscle, a strong, flat, fan-shaped muscle which arises from the inferior temporal line, the larger part of the temporal fossa, and the inner surface of the temporal fascia, and is inserted by a tendon into the internal surface and anterior border of the coronoid process of the inferior maxilla. Its action is to close the jaws. [L. 142, 332.]—**T. minor**. A small anomalous muscle attached to the interarticular fibro-cartilage of the temporo-maxillary joint, and arising from the inferior maxilla or as an offshoot of the masseter or t. [L. 332.]

TEMPORALKANTE (Ger.), n. $\text{Te}^2\text{mp-or}^2\text{-a}^2\text{l}^2/\text{ka}^2\text{nt}^2\text{-e}^2$. The edge of a temporal convolution. [K.]—**Oberer T.** The edge of the superior temporo-sphenoidal convolution. [L. 17 (K).]—**Untere T.** The edge of the inferior temporo-sphenoidal convolution. [L. 17 (K).]

TEMPORALLAPPEN (Ger.), n. $\text{Te}^2\text{mp-or}^2\text{-a}^2\text{l}^2/\text{la}^2\text{p}^2\text{-pe}^2\text{n}$. See **Temporo-sphenoidal LOBE**.

TEMPORO-AURICULAIRE (Fr.), n. $\text{Ta}^2\text{n}^2\text{-po-ro-ro-re-ku}^2\text{-la}^2\text{r}$. See **ATTOLLENS aurem**.

TEMPORO-AURICULAR, adj. $\text{Te}^2\text{mp-or}^2\text{-o-a}^2\text{r}^2/\text{i}^2\text{k}^2/\text{u}^2\text{l}^2\text{-a}^2\text{r}$. Lat., *temporo-auricularis*. Fr., *temporo-auriculaire*. Pertaining to or connected with the temporal bone or region and the ear. [L.]

TEMPORO-AURICULARIS (Lat.), n. m. $\text{Te}^2\text{mp-or}^2\text{-o-o}^2(\text{o}^2)\text{-a}^2\text{r}^2/\text{i}^2\text{k}^2/\text{u}^2\text{l}^2\text{-a}^2\text{r}^2/\text{i}^2\text{s}$. From *tempus*, the temple, and *auricula*, the auricular ear. See **TEMPORO-AURICULAR**, adj. n., sup. **ZYGOMATO-AURICULARIS**.—**T. -a. externus**. Fr., *adducteur de l'oreille*. Ger., *Einwärtszieher des Ohres*. A muscle of the lower animals, arising from the parietal crest and attached to the scutal and conchiform cartilages of the ear. It adducts the ear. [L.]—**T. -a. internus**. Fr., *élevateur moyen de l'oreille*. Ger., *mittlerer Heber des Ohres*. *Vorderhauptmuskel der Muschel*. A muscle of the lower animals, arising from the sagittal ridge of the parietal bone and attached to the inner side of the concha of the ear. It adducts the ear. [L.]

TEMPORO-CONCHINIEN (Fr.), n. m. $\text{Ta}^2\text{n}^2\text{-po-ro-ko}^2\text{-n}^2\text{-ke-ne-a}^2\text{n}^2$. See **ATTOLLENS aurem**.

TEMPORO-FACIAL, adj. $\text{Te}^2\text{mp-or}^2\text{-o-fa}^2\text{s}^2/\text{i}^2\text{l}^2$. From *tempus*, the temple, and *facies*, the face. Pertaining to the temple and the face. [a. 48.]

TEMPORO-FRONTAL, adj. $\text{Te}^2\text{mp-or}^2\text{-o-fr}^2\text{n}^2/\text{s}^2\text{t}^2\text{-l}$. From *tempus*, the temple, and *frons*, the forehead. Pertaining to the temple and the forehead. [a. 48.]

TEMPORO-GENAL, **TEMPORO-MALAR**, adj's. $\text{Te}^2\text{mp-or}^2\text{-o-je}^2\text{n}^2\text{-l}$, $\text{-ma}^2\text{la}^2\text{r}$. From *tempus*, the temple, and *gena*, the cheek, or *mala*, the cheek-bone. Pertaining to or connected with the temporal and malar bones or regions. [L.; a. 48.]

TEMPOROMAXILLARIS (Lat.), n. m. $\text{Te}^2\text{mp-or}^2\text{-o-o}^2(\text{o}^2)\text{-ma}^2\text{x}^2/\text{i}^2\text{la}^2\text{r}^2/\text{i}^2\text{s}$. From *tempus*, the temple, and *maxilla* (q. v.). Fr., *temporo-maxillaire*. See **TEMPORALIS**.

TEMPORO-MAXILLARY, adj. $\text{Te}^2\text{mp-or}^2\text{-o-ma}^2\text{x}^2/\text{i}^2\text{la}^2\text{r}^2/\text{i}^2\text{s}$. Lat., *temporomaxillaris*. Fr., *temporo-maxillaire*. Pertaining to or connected with the temporal bone or region and the maxilla. [L.]

TEMPORO-OCCIPITAL, adj. $\text{Te}^2\text{mp-or}^2\text{-o-o}^2\text{-ci}^2\text{p}^2/\text{i}^2\text{t}^2\text{-l}$. From *tempus*, the temple, and *occiput*, the occiput. Pertaining to the temporal and occipital bones or regions. [L.; a. 48.]

TEMPORO-PARIETAL, adj. $\text{Te}^2\text{mp-or}^2\text{-o-pa}^2\text{r}^2/\text{i}^2\text{e}^2\text{-t}^2\text{l}$. Pertaining to the temporal and parietal bones. [a. 48.]

TEMPORO-SPHENOIDAL, adj. $\text{Te}^2\text{mp-or}^2\text{-o-sfe}^2\text{n}^2\text{-oi}^2\text{d}^2\text{l}$. Pertaining to the temporal and sphenoid bones. [a. 48.]

TEMPS (Fr.), n. Ta^2n^2 . Ger., *Zeit* (2d def.). 1. Time. 2. A stage or step in a process.—**Cinquième t. d'accouchement**. 1. That step in the process of parturition by which the expulsion of the foetus is completed after the presenting part has been expelled. [A. 24.] 2. The movement of restitution of the presenting part.—**Deuxième t. d'accouchement**. That step in the process of parturition that includes the descent of the presenting part of the foetus to the lower portion of the pelvic canal. [A. 24.]—**Premier t. d'accouchement**. That step in the process of parturition by which the presenting part of the foetus is so compressed and directed as to facilitate its engagement. [A. 15, 24.]—**Quatrième t. d'accouchement**. 1. That step in the process of parturition by which the expulsion of the presenting part of the foetus is accomplished. 2. According to P. Dubois, that step which consists in the extension of the child's head. [A. 24.]—**Sixième t. d'accouchement**. Syn.: *expulsion du tronc*. Of Tarnier, that step in the process of parturition which consists in the expulsion of the trunk. [A. 24.]—**T. d'accouchement**. The several steps in the process of parturition.—**T. d'amoinissement**. See **Premier t. d'accouchement**.—**T. de déflexion**, **T. de dégagement**. See **Quatrième t. d'accouchement** (3d def.).—**T. de descente**. See **Deuxième t. d'accouchement**.—**T. de flexion**. See **Premier t. d'accouchement**.—**T. d'engagement**. See **Deuxième t. d'accouchement**.—**T. de restitution**, **T. de rotation extérieure**. See **Cinquième t. d'accouchement**.—**T. de rotation interne**. See **Troisième t. d'accouchement**.—**T. d'extension**. See **Quatrième t. d'accouchement** (3d def.).—**T. secret**. The premonitory stage of labor. [A. 85.]—**Troisième t. d'accouchement**. The rotation of the foetus as it passes through the pelvic canal. [A. 24.]

TEMULENCE, n. $\text{Te}^2\text{m-u}^2\text{l-e}^2\text{ns}$. Lat., *temulentia* (from *temulentus*, intoxicated). See **DRUNKENNESS**.

TEMULENTIC ACID, n. $\text{Te}^2\text{m-u}^2\text{l-e}^2\text{nt}^2/\text{i}^2\text{k}$. Ger., *Temulentinsäure*. A crystalline acid, $\text{C}_{12}\text{H}_{10}\text{NO}_6$, contained in the alcoholic extract of the seeds of *Lolium temulentum*. It is the agent to which the vertiginous symptoms produced by *Lolium temulentum* are due. In rabbits it causes dyspnea, lowering of the temperature, enfeebled heart's action, and in doses of 4 centigrammes, death. [P. Antze, "Ctbl. f. d. med. Wssnsh.," Apr. 26, 1890, p. 317 (B).]

TEMULENTINE, n. $\text{Te}^2\text{m-u}^2\text{l-e}^2\text{nt}^2/\text{en}$. Fr., t. Ger., *Temulentin*. A base produced by boiling temulentic acid with alkalis. [P. Antze, "Ctbl. f. d. med. Wssnsh.," Apr. 26, 1890, p. 317 (B).]

TENACULUM (Lat.), n. n. $\text{Te}^2\text{n-a}^2\text{k}^2(\text{a}^2\text{k})^2/\text{u}^2\text{l}^2(\text{u}^2\text{l})^2\text{-u}^2\text{m}^2(\text{u}^2\text{m})$. From *teneo*, to hold. Fr., *tenaculum*, *crochet* (2d def.), *tenaille* (2d and 3d defs.). Ger., *Haltzange* (3d def.). 1. An instrument recommended by Hieronymus Mercurialis for extracting the foetus by the breech. [A. 20.] 2. A sharp pointed hook with a handle; used for seizing an artery. [E. 6.] 3. A holder, especially one made like a forceps.—**Assalini's t.** An instrument similar to the

TENACULUM.

DOUBLE TENACULUM.

modern artery forceps. [E.]—**Byrne's double-spring t.** A slender t. with four hooks, opening and shutting like the blades of a forceps; generally used in the rectum. [E.]—**Keith's t.** A t. that unscrews at the handle. [a. 34.]—**Knife-blade t.** A t.-like instrument having a blade instead of a hook. ["N. Y. Med. Jour.," June 23, 1888, p. 658 (a. 34).]—**T. nervi by poglossi**. See **LIGAMENTUM nervi**.—**Tenacula tendinum**. See **VINCULA tendinum**.

TENDILEMMA (Lat.), n. m. $\text{Te}^2\text{nd}^2/\text{i}^2\text{le}^2\text{m}^2/\text{ma}^2$. Gen., *lem-matos* (-is). From *tendo*, a tendon, and *lemma* (q. v.). The amorphous elastic covering of the inoblast. [L. 333.]

TENAILE (Fr.), n. $\text{T}^2\text{-na}^2\text{-el}^2\text{-y}$. See **TENACULUM** (2d and 3d defs.).—**T. incisive**. See **Bone FORCEPS**.

TENALGIA (Lat.), n. f. $\text{Te}^2\text{n-a}^2\text{l}^2/\text{i}^2\text{a}^2\text{g}^2/\text{i}^2\text{-a}^2$. From *ténav*, a tendon, and *álgos*, pain. Fr., *ténalgie*. Ger., *Tenalgie*. Pain in the tendons. [a. 17.]—**T. crepitans**. See **TENOSYNOVITIS** (3d def.).

TENASMUS (Lat.), n. m. $\text{Te}^2\text{n-a}^2\text{z}^2(\text{a}^2\text{s})^2/\text{mu}^2\text{s}^2(\text{mu}^2\text{s})$. See **TENESMUS**.

TENAX (Lat.), n. m. $\text{Ten}^2(\text{te}^2\text{n})^2/\text{a}^2\text{x}^2(\text{a}^2\text{x})$. Gen., *-acis*. Okum a little better carded and slightly more tarred than the ordinary commercial article; used as a dressing for wounds. [E.]

TENDER, adj. $\text{Te}^2\text{nd}^2/\text{u}^2\text{r}$. Gr., *ἀσάλες*. Lat., *tener*. Fr., *tendre*. Ger., *zart*, *empfindlich*. 1. Delicate, easily broken. 2. Susceptible to painful impressions; especially, painful to the touch. [D.]

TENDINOSUS (Coeus) (Lat.), n. m. $\text{Te}^2\text{nd}^2/\text{i}^2\text{n}^2\text{-os}^2/\text{u}^2\text{s}^2(\text{u}^2\text{s})$. From *tendo*, a tendon. See **SEMITENDINOSUS**.

TENDINOUS, adj. $\text{Te}^2\text{nd}^2/\text{i}^2\text{n}^2\text{-u}^2\text{s}^2$. Lat., *tendineus*, *tendinosus* (from *tendo*, a tendon). Fr., *tendineux*. Ger., *sehnig*. Pertaining to, resembling, or constituting a tendon; made up of tendon-like tissue. [C.]

TENDO (Lat.), n. m. $\text{Te}^2\text{nd}^2/\text{o}$. Gen., *tend'inis*. See **TENDON**.—**Quintus t. extensoris longi digitorum pedis**. See **PHLO-KÆUS quintus**.—**T. Achillis**. Fr., *corde d'Hippocrate*. Ger., *Achillessehne*. The thickest and strongest tendon of the body, made up by the union of the tendons of the gastrocnemius and solæus muscles, and inserted into the middle of the posterior surface of the tuberosity of the os calcis. [C.]—**Tendines coronarii**. Fibrous rings surrounding the openings of the aorta and the pulmonary artery. [C.]—**T. intermedium**. See **INTERMEDIUS**.—**T. Cordiform tendon**.—**T. oculi**, **T. palpebræ**. See **LIGAMENTUM palpebrale internum**.—**T. valvule Eustachii**. A ligamentous band in the valvula Eustachii. [L. 332.]

TENDON, n. $\text{Te}^2\text{nd}^2/\text{n}$. Gr., *τένον*. Lat., *tendo*. Fr., t., *nerf*. Ger., *Sehne*. A bundle of fibrous tissue of varying shape, which serves as an origin or attachment for a muscle or is interposed between portions of it. [L.]—**Accessory t's of the extensor communis digitorum**. The offshoots of the t. of the extensor digitorum manus communis which pass to those of the ring and little fingers. [L.]—**Central t. of the diaphragm**, **Cordiform t.** The white aponeurotic centre of the diaphragm, having a posterior concave margin and an anterior convex margin slightly notched on each side so as to give it the shape of a trefoil. [L.]—**Ham-string t.** The t. of the biceps flexor cruris and that of the semimembranosus and the semitendinosus. [L.]—**T. cartilage**. In the embryo, a tissue, resembling true cartilage, by which the junction of t. with bone is effected. ["Jour. of Anat. and Phys.," xvi, p. 178 (a. 32).]—**T. of origin**. A t. by which a muscle arises. [L.]—**T. of Zinn**. See **LIGAMENTUM ZINN**.—**T. réfléchi du droit antérieur** (Fr.). The reflected t. of the rectus femoris. [L.]

TENDOPHONY, n. $\text{Te}^2\text{nd-of}^2\text{-on-P}$. From *tendo*, a tendon, and *φωνή*, a sound. Ger., *Tendophonie*, *Sehnenklängen*. The occurrence of auscultatory sounds ascribed to the chordæ tendineæ.

TENDOVAGINITIS (Lat.), n. f. $\text{Te}^2\text{nd-o}^2(\text{o}^2)\text{-va}^2\text{i}^2/\text{wa}^2\text{g}^2/\text{i}^2\text{n}^2\text{-en}^2(\text{-e})^2/\text{i}^2\text{s}$. Gen., *-itidos* (-idis). From *tendo*, a tendon, and *vagina*, a scabbard. See **TENOSYNOVITIS** (1st def.).—**T. crepitans**. T. in which the fibrous deposit on the tendon and sheath causes crepitation when the tendon is moved. [a. 34.]—**T. hydropica** (serous chondritis). See **HYDROPS vaginae tendinis**.—**T. hypertrophica**. T. with circumscribed hypertrophy of the tendon and its sheath. [a. 34.]—**T. serosa**. T. with serous effusion within the sheath. [a. 34.]—**T. suppurativa**. T. with suppuration. [a. 34.]

TENDRIL, n. $\text{Te}^2\text{nd}^2/\text{r}^2/\text{i}^2\text{l}$. A body, usually filiform, by which a plant climbs. It may be a modified branch, as in the grape, or a modified leaf (leaf-t.), as in the pea, or a modified stipule, as in *Smilax*. It usually climbs by coiling its tip around the object of support, but sometimes, as in the Virginia creeper, holds fast by means of an adhesive disc into which its tip expands. [a. 35.]

TENESMUS (Lat.), n. m. *Te'n*(tan)-e's-mu's(mu's). Gr., *τενεσμός* (from *τενέω*, to stretch). Fr., *ténisme*, *épreintes*. A persistent inclination to defecate or urinate, accompanied by painful straining efforts, mostly ineffectual. [D; E.]—**Faucial and pharyngeal t.** Of L. Browne, a continual inclination to void or to swallow an imaginary foreign body, accompanied by more or less cough, straining, and pain, either after or independent of functional exercise of the voice. ["Brit. Med. Jour.," 1890, ii, p. 621 (a, 34).]—**Rectal t.** Ger., *Aftersperre*, *Aftersperre*, *Stuhlzwang*. T. in the rectum. [a, 48.]—**T. vesicæ mucosus.** See *Cystorrhæa Vesicalis*. Ger., *Drang zum Uriniren*, *Harndrang*. T. in urination. [a, 48.]

TENETTE (Fr.), n. *T*'-ne't. An old term for a dressing-forces, especially one for removing vesical calculi. [A, 44 (a, 14).]

TÉNIA (Fr.), n. *Tan*-a-é. See *TENIA*.

TENNSTÄDT (Ger.), n. *Te'n*'stat. A place in Prussian Saxony where there is a sulphurous spring. [L, 30, 37, 49, 57 (a, 14).]

TENOGRAPHY, TENOLOGY, n's. *Te'n*-o-g'ra'f-i, -o'l'o-j'i. See *TENOTOLOGY*.

TÉNO-MYOTOMIE (Fr.), n. *Ta*-no-me-o-to-me. Of Abadie, an operation for enfeebling one of the recti muscles of the eye. It consists in incising the lateral parts of its tendon near its sclerotic insertion, and in excising a small portion of the muscle on each side. ["Rev. des sci. méd.," Oct. 15, 1888, p. 622 (a, 18).]

TENONITIS (Lat.), n. f. *Ten*(te'n)-o'n-i(e)-ti's. Gen., -it'idis (-idis). Fr., *ténonite*. Ger., *T.* Inflammation of Tenon's capsule. [F.]

TENONTAGRA (Lat.), n. f. *Te'n*-o-nt'a'g(a'g)-ra. Gr., *τενονταγρα* (from *τενω*, a sinew, and *αγρα*, a suture). Fr., *ténon-agre*. Rheumatism of the tendons, especially of those in the neck. [L, 50 (a, 14).]

TENONTODYNE (Lat.), **TENONTODYNIA** (Lat.), n's f. *Te'n*-o-nt-o'd'i'nu(n'u'n)-e(a), -o(o's)-di'ni-du(n'u'n)i's-a. From *τενω*, a sinew, and *δύναμις*, pain. Fr., *ténontodynie*. Pain in the tendons.

TENOGRAPHY, TENOLOGY, n's. *Te'n*-o-nt-o'g-ra'f-i, -o'l'o-j'i. Lat., *tenontographia* (from *τενω*, a tendon, and *γραφειν*, to write), *tenontologia* (from *τενω*, a tendon, and *λόγος*, understanding). Fr., *ténontographie*, *ténontologie*. Ger., *Sehnenlehre*. The anatomy, etc., of the tendons. [L, 50 (a, 14).]

TENONTOMIA (Lat.), n. f. *Te'n*-o-nt-om(o'm)-i'a. Ger., *T.* See *TENOTOMY*.

TENOTOPHYMA (Lat.), n. n. *Te'n*-o-nt-o'f-i'nu'f'ma. Gen., -phym'a(-atis). From *τενω*, a tendon, and *φύμα*, a growth. A tumor of a tendon. [L, 50 (a, 48).]

TENOTOPHYTE, n. *Te'n*-o-nt-o'f-i't. Lat., *tenontophyton* (from *τενω*, a tendon, and *φυτόν*, a growth). Fr., *ténontophyte*. An abnormal outgrowth on a tendon. [L, 50 (a, 14).]

TENOSTOSTOMA (Lat.), n. f. *Te'n*-o-nt-o'f-i'stom'a. From *τενω*, a tendon, and *στόμα*, a bone. Ossification of a tendon. [L, 50 (a, 14).]

TENOPHONY (Ger.), n. *Tan*-o-fon-e'. See *TENDOPHONY*.

TENOPLASTIK (Ger.), n. *Tan*-o-pla'st-ek'. See *TENOTOMY*.

TENORRHAPHY, n. *Te'n*-o'r-ra'f-i. Lat., *tenorrhaphia* (from *τενω*, a tendon, and *ραφή*, a seam). Fr., *ténorrhaphie*. Ger., *Sehnennaht*, *Tenorrhaphie*. The suture of a divided tendon.

TENOSITIS (Lat.), n. f. *Te'n*-o-s-i'ti's. Gen., -it'idis (-idis). Fr., *ténosite*. Inflammation of a tendon. [a, 34.]

TENOSYNTITIS (Lat.), **TENOSYNOVITIS** (Lat.), n's f. *Te'n*-o-s-i'ti's(-u'n)-i'ti's, -i'ti's(-u'n)-o-vi'te'i'ti's. Gen., -it'idis (-idis). From *τενω*, a tendon, and *synovia* (q. v.). Fr., *ténosynite*. Inflammation of the sheath of a tendon and of the contiguous surface of the tendon; "An affection usually occurring in the forearm and characterized by a peculiar creaking of the tendons as they move in their sheaths, depending upon a particular kind of strain to which the muscles belonging to these tendons have been subjected." [Hopkins, "Boston Med. and Surg. Jour.," July 27, 1882, p. 81.]—**Crepitant t.** See *AT*.—**T. hyperplastica.** A painless swelling of the extensor tendons over the wrist joint; caused by the irritation to which they may be exposed or by trophic disturbances arising from paralysis of the radial nerve. [D, 35.]

TENOTOMANIA (Lat.), n. f. *Te'n*-o-t'om(-o)-ma(m'a's)-ni'a-a. From *τενω*, a tendon, *τέμνω*, to cut, and *μανία*, mania. An inordinate propensity to perform tenotomy, especially on the ocular muscles. ["Med. News," Sept. 16, 1893, p. 323.]

TENOTOME, n. *Te'n*-o-tom. Lat., *tenotomus* (from *τενω*, a tendon, and *τέμνω*, to cut). Fr., *ténotome*. Ger., *Tenotom*. A small, narrow-bladed knife for dividing tendons subcutaneously. [E.] See also *APONEUROTOME*.—**Gruber's t.** A t. consisting of a simple blade, slightly curved at the end, inserted in an adjustable handle so that it may be used for either ear. [F.]—**Hartmann's t.** A t. consisting of a small knife, curved at the flat and on the edge; used in dividing the tendon of the tensor tympani. [F, 32.]

TÉNOTOMIE (Fr.), n. *Tan*-o-tom-e. See *TENOTOMY*.—**T. à ciel ouvert.** Open, as opposed to subcutaneous, tenotomy. [Léval, "Prov. méd.," 1888, No. 43, p. 609.]

TENOTOMY, n. *Te'n*-o-t'om-i. Lat., *tenotomia* (from *τενω*, a tendon, and *τομή*, a cutting). Fr., *ténotomie*. Ger., *Tenotomie*, *Tenoplastik*, *Sehnenchnitt*. The operation of dividing a tendon.—**Abadie's partial t. for muscular asthenopia.** An operation in which the conjunctiva is opened in the usual way, the hook introduced beneath the tendon, and the tendon divided from one side by little cuts to near the centre of the tendon. The tendon is then divided in the same way on the other side, and there are left a few median fibres undivided from their attachment to the sclera.

["Ann. d'ocul.," May-June, 1880 (F).]—**Graduated t.** A partial t. of one or more of the ocular muscles for the purpose of relieving overaction. ["N. Y. Med. Jour.," Apr. 21, 1888, p. 440 (a, 34).]—**Kessel's t. of the stapedius.** An operation which consists in making an incision through the membrana tympani, and then dividing the muscle by an incision perpendicular to its length, in order to relieve the shortening produced in the muscle by cicatricial shrinking of the sheath of the tendon. ["Arch. f. Ohrenheilk.," xi (F).]—**Snelles's t. for strabismus.** An operation which consists in dividing the conjunctiva horizontally between the two margins of the muscle, and then dissecting up the conjunctiva on both sides as far as the caruncle. The tendon sheath is then opened by a small cut and the tendon divided subconjunctivally. ["Klin. Monatsbl.," Jan., 1870 (F).]—**Tarsal t.** Of the veterinarians. t. of the peroneus tendon for the relief of spavin. [L, 41 (a, 14).]—**T. of the tensor tympani.** An operation for diminishing the excessive tension of the membrana tympani and of the ossicula and the abnormal increase of pressure in the labyrinth connected therewith. The tenotomy is introduced through an incision in the posterior segment of the membrana tympani into the tympanic cavity. The knife, having entered for about 3 mm., lies below the tendon of the tensor tympani between the handle of the malleus and the long crus of the incus. By slightly sinking its handle, the sharp joint of the tenotomy is forced so far toward the upper part of the tympanic cavity that the tendon is obliquely divided as the knife is withdrawn. [F, 32.]—**Von Graefe's t. for strabismus.** An operation in which the conjunctiva bulbi is divided vertically just in front of the line of insertion of the tendon of the muscle, and the sheath is opened. Then a large blunt hook (strabismus hook) is introduced beneath the conjunctiva and sheath close to the upper border of the tendon, and the hook swept round and downward between the sclera and tendon so as to engage the entire width of the tendon in its grasp. Then the muscle is dissected free from the sclera backward for a considerable distance before being divided close to its insertion. ["Arch. f. Ophth.," iii, 11 (F).]

TENSEUR (Fr.), n. *Ta*'n-su'r. See *TENSOR*.—**T. de la muqueuse alvéolo-labiale.** A small muscle lying beneath the levator labii superioris alaeque nasi, attached to the superior maxilla, and inserted into the alveolo-labial mucous membrane. It forms part of the compressor naris. [L.]

TENSION, n. *Te'n*-shu'n. Gr., *τάσις*. Lat., *tensio* (from *tendere*, to stretch). Fr., *t.*. Ger., *Spannung*, *Spannkraft*, *Strahkraft*. 1. The state of being stretched or distended. 2. A feeling of fullness or resistance in the pulse. [K.]—**Elastic t.** The application of traction to a part by means of an elastic material. [Roberts, "Illustr. Quart. of Med. and Surg.," July, 1882, p. 77.]—**Elastic t. of the lung.** The distention of the lung by gas or fluid due to the elasticity of the organ. [Landois (a, 34).]—**Intra-ocular t.** See *Intra-ocular pressure*.—**Muscular t.** The state of moderate contraction of muscles or groups of muscles which occurs when they are stretched by passive movements or by the voluntary contraction of their antagonizing muscles. [D, 35.]—**Residual t. of the lung.** See *Elastic t. of the lung*.

TENSOR (Lat.), n. m. *Te'n*-s'or. Gen., -or'is. From *tendere*, to stretch. Fr., *tenseur*. Ger., *Spannmuskel*. A muscle having the function of rendering a part tense.—**Brevis digitorum t.** See *EXTENSOR digitorum pedis brevis*.—**T. aponeuroseos perinalis.** See *ISCHIO-BULBOSUS*.—**T. capsulae (humeralis).** See under *CORACOCAPSULARIS*.—**T. capsulae tibiotarsalis.** See *TIBIALIS secundus*.—**T. pes capsularum articulationum.** Ger., *Kapselspanner*. Muscles inserted into the capsules of joints, which they are supposed to render tense. [L, 339.]—**T. chorioidei** (Bridges). See *Ciliary muscle*.—**T. digitorum.** See *EXTENSOR digitorum manus communis*.—**T. fasciæ deltoideus.** See under *ACCESSORY DELTOID*.—**T. fasciæ dorsalis pedis.** See *TIBIOFASCIALIS*.—**T. fasciæ et cutis foveæ axillaris.** An anomalous muscle arising from the tendon of the subscapularis and inserted into the skin of the axilla. [L, 31.]—**T. fasciæ latæ.** A muscle arising from the anterior margin of the crest of the ilium and a portion of the bone extending to the origin of the sartorius, and, after passing down between two folds of the fascia lata, inserted into its upper third. [L, 31, 332.]—**T. fasciæ pelvis.** See *RECTO-COCYGEUS*.—**T. fasciæ plantaris.** An anomalous muscle arising from the tibia beneath the origin of the soleus, and inserted into the plantar fascia or some of the structures in the sole. [L.]—**T. fasciæ suralis.** An anomalous offshoot of the semimembranosus inserted into the fascia of the leg. [L.]—**T. ligamenti annularis radii anterior.** An anomalous muscle arising from the coronoid process of the ulna and inserted into the annular ligament of the wrist. [L, 332.]—**T. ligamenti annularis radii dorsalis (anterior posterior).** An anomalous muscle arising from the dorsal surface of the ulna and inserted into the dorsal and radial aspect of the annular ligament of the wrist. [L, 332.]—**T. ligamenti annularis radii volaris.** See *T. ligamenti annularis radii anterior*.—**T. membrani synovialis tarsi.** See *TIBIALIS secundus*.—**T. of the capsular ligament** [Leyh]. See *SCAPULO-HUMERALIS parvus*.—**T. of the capsule of the ankle.** See *TIBIALIS secundus*.—**T. palati (molles).** See *Anterior of the Eustachian tube*.—**T. semivaginae articulationis humerocapitatis.** An anomalous muscle arising from the cartilages of the two or three upper ribs and inserted into the sheath of the biceps flexor cubiti. [L, 31.]—**T. tarsi.** Ger., *Thränensockelmuskel*. A small, thin muscle, situated at the inner side of the orbit, behind the tendo oculi. It arises from the crest and adjacent part of the orbital surface of the lacrymal bone, and, passing across the lacrymal sac, divides into two slips, which cover the canaliculi and are inserted into the tarsi near the lacrymal punctum. [F.]—**T. tibiotarsalis.** See *TIBIALIS secundus*.—**T. tympani.** Ger., *Pauken-fellschneider*, *Hammermuskel*. A muscle arising in front of the anterior surface of the canalis pro tensore tympani, on the osseous wall of the pyramid adjacent to the carotid canal, and from the cartilaginous Eustachian tube. The tendon leaves the canal at

the rostrum cochleare, extends across the tympanic cavity, and is inserted on the inner margin of the handle of the malleus, at the anterior edge of the rhomboidal surface, in an oblique direction to the longitudinal axis of the malleus. It acts to increase the tension of the membrana tympani and also the pressure in the labyrinth. [F. 3.]—**T. vagine**. See *LIOAPONEUROTICUS*.—**T. vagine femoris**. See *T. fasciae latae*.—**T. velli palati** (seu palatini). See *ABDUCTOR of the Eustachian tube*.

TENT, n. *Tēnt*. Gr., *τέντω*, *λεμνίσκος*. Lat., *tenta*, *tentum*. Fr., *tente*, *mèche*. Ger., *Meissel*. A substance to be introduced into a wound or canal, so as to prevent it from closing or to dilate it slowly by its expansion when moistened. [E.]—**Cornstalk** t. A t. made of the compressed pith of the cornstalk. [A. 24.]—**Laminaria** t. Sea-tangle t. A t. made of the dried stems of *Laminaria conica*. [E.]—**Sponge** t. Fr., *cône d'éponge préparée*, *tente éponge*. Ger., *Pressschwamm*, *Presskegel*. A t. made of compressed sponge. [E.]

TENTACLE, n. *Tēnt*/a³-k'l. Lat., *tentaculum* (from *tentare*, to handle). Fr., *tentacule*, *harbillon* (1st def.). Ger., *Tentakel*, *Ankerhäuschen* (1st def.), *Fühlfaden* (1st def.), *Randzaser* (3d def.), *Ragfaser* (3d def.). 1. One of the long and slender appendages that certain animals use as feelers or for prehension. [a. 45.] 2. One of the glandular hairs clothing the leaves of certain insectivorous plants. 3. A filiform or hair-like fringe to the border of the thallus of some lichens. [a. 35.]—**Prestomial** t. Fr., *antenne médiane*. One of the smaller anterior pair of t's situated in front of the mouth in crustaceans. [L. 37 (a. 14).]

TENTACULAR, adj. *Tēnt*-a³-k'l/-u¹-a³r. Resembling the feelers of a snail. [a. 35.]

TENTACULUM (Lat.), n. n. *Tēnt*-a³-k'l/a³k'l/-u¹(u⁴)-u³m(u⁴m). See *TENTACLE*.

TENTE (Fr.), n. *Tān*tē. See *TENTORIUM*.—**T. du cercelet**. See *TENTORIUM cerebelli*.

TENTIGO (Lat.), n. f. *Tēnt*-ig(e)g'o. Gen., *-tig'inis*. From *tendere*, to stretch out. Lecherousness, lust. [a. 312 (a. 21).]—**T. prava**. An old name for lupus. [G.]—**T. venerea**. An old term for syphilis. [a. 42.]

TENTORIUM (Lat.), n. n. *Tēnt*-or'/(u⁴)-u³m(u⁴m). From *tendere*, to stretch out. Fr., *plancher du cerveau*. Lit., a tent; see *T. cerebelli*.—**T. cerebelli**. Fr., *repli transverse du faux du cercelet*. Ger., *Querfortsatz der harten Hirnhaut*. A fold of dura which separates the cerebrum and cerebellum, supporting the occipital lobes. [K.]

TENUIFLORUS (Lat.), adj. *Tēn*-u⁴(u⁴)-f'lōr/(u⁴s)(u⁴s). From *tenuis*, slender, and *flos*, a flower. Fr., *tenuiflore*. Formed of minute flowers. [a. 35.]

TENUIROSTRAL, **TENUIROSTRATE**, adj's. *Tēn*-u⁴(u⁴)-rōs'trāl, -rōs'trāl. Lat., *tenuirostris* (from *tenuis*, slender, and *rostrum*, the beak). Fr., *tenuirostre*. Having a long slender bill with a short cleft; in botany, having a thin rostellum. [L. 231; a. 35.]

TENUS (Lat.), adj. *Tēn*-u⁴(u⁴)-i's. Thin, delicate; as a n., a slender muscle. [a. 17.]—**T. femoris**. See *GRACILIS anterior*.

TEPAL, n. *Tēp*/p'l. A transposition of *petal* (cf. *SEPAL*). Lat., *tepalum*. Fr., *tépale*. Ger., *Perigonblatt*, *Blüthenhüllblatt*. A division of the perianth; either a sepal or a petal. [a. 35.]

TEPHRA (Lat.), n. f. *Tēp*/ra³. Gr., *τέφρα*. Dust, ashes. [L. 50 (a. 14).]

TEPHROMYELITIS (Lat.), n. f. *Tēp*-rōf'rōr's/-mī(mu⁴)-e²l/(e)²-tī's. Gen., *-it'idōs* (-itis). From *tephra*, ashes, and *μυελός*, marrow. Fr., *tephromyélite*. See *POLIOMYELITIS*.—**Acute anterior** t. See *Acute anterior POLIOMYELITIS*.

TEPHROSIA (Lat.), n. f. *Tēp*-rōz/(rō's)(i'a)³. From *τεφρός*, ash-colored. Fr., *téphrosie*. A genus of the *Leguminosae*. [a. 35.]—**T. apollinea**. Indigo-plant of Egypt and Nubia. The seed-vessels and the bitter leaves were formerly used to adulterate senna. An ointment prepared from the seeds is used for wounds in camels. The plant yields a variety of indigo. [a. 35.]—**T. cinerea**. Fr., *bois d'envier*. Goat's rue of the West Indies; a species used like *T. toxicaria*. [a. 35.]—**T. emarginata**. An Orinoco species with a purgative root. [a. 35.]—**T. leptostachya**. An African species. The root is purgative. [a. 35.]—**T. purpurea**. An East Indian and Ceylon species. The juice is applied to pustular eruptions of the face. The bitter roots, which are considered alterative, tonic, laxative, anthelmintic, febrifuge, and antemetic, are used in diarrhoea, dysentery, dyspepsia, elephantiasis, etc., and in a wash for the mouth. [a. 35.]—**T. spinosa**. An East Indian shrub. Its root is used as a stomachic. [a. 35.]—**T. toxicaria**. Indigo-plant of the Niger, West Indian fish-poison plant, Surinam poison; a native of Africa, naturalized in the West Indies. The roots are used in skin diseases, and the leaves and branches as a fish-poison. [a. 35.]—**T. virginiana**. Turkey pea, catgut, Virginian goat's rue; found in various parts of the United States. The roots, which are said to be anthelmintic, are aperient and tonic, and are recommended in typhoid fever. [a. 35.]

TEPHROSIS (Lat.), n. f. *Tēp*-rōs'/(s). Gen., *-rōs'eos* (-is). Gr., *τέφρωσις* (from *τεφρός*, to burn to ashes). Fr., *téphrose*. See *INCERATION*.

TEPHRLOMETER, n. *Tēp*-r'l/-ōm'e²t/-u³r. From *τέφρα*, ashes, *λίαν*, matter, and *μέτρον*, a measure. Of H. C. Major, a graduated thin glass tube, open at both extremities, that is plunged into the cerebral convulsions so as to remove a segment of tissue that will permit of the measurement of the thickness of the gray matter. ["Lancet," 1872, ii, p. 623 (a. 34).]

TEPIDARIUM (Lat.), n. n. *Tēp*-i'd/-ar(a³r)/(i'a)³m(u⁴m). Gr., *τέπιδάριον*. Fr., *tepidaire*, *étuve sèche*. See under *ROMAN BATH*.

TEPLITZ-SCHÖNAU, n. A place in Bohemia, famous as a watering resort, where there are hot alkaline, saline, and sulphurous springs. [L. 30, 37, 49, 57 (a. 14).]

TEPLITZ-WARASDIN, n. A place in Warasdin County, Croatia, where there is a hot alkaline and sulphurous spring.

TEQUEZUITE (Sp.), n. In Mexico, saline efflorescences found especially in the valley of Mexico, and consisting chiefly of sodium carbonate. [B. 234 (a. 14).]

TERABDELLA (Lat.), n. f. *Tē*-r(ār)-a³b(a³b)-de²l'a³. Perhaps from *τέρας*, a marvel, and *πέδαια*, a leech. Fr., *terabdelles*. Of Damoiseau, a cupping apparatus. [L. 41, 57 (a. 14).]

TERACRYLIC ACID, n. *Tē*-r-a³k'-rīl'/(ā). Fr., *acide téra-crylique*. A homologous C₁₁H₁₁O₂ of acrylic acid, formed by the distillation of terpenic acid. [B. 3.]

TERAMNUS (Lat.), n. m. *Tē*-r-a³m(a³m)/nu³s(nu³s). Ger., *Hakenhilse*. A genus of leguminous herbs. [a. 35.]—**T. uncinatus**. A West Indian species. The leaves are a mild evacuant and the farina of the seed is used in cataplasms. [a. 35.]

TERAS (Lat.), n. n. *Tē*-r(ē'r)/a³s(a³s). Gen., *ter'atos* (-atis). Gr., *τέρας*. See *MONSTER*.—**T. anacatadidymum**. A double monster in which the two individuals are joined by the trunks, but have separate heads and limbs. [a. 34.]—**T. anadidymum**. A double monster in which the individuals are joined from the buttocks downward and separate above. [a. 34.]—**T. catadidymum**. A double monster in which the individuals are joined from the neck or trunk upward and separate below. [a. 34.]

TERATOCARDIE (Ger.), n. *Tar*-a³t-o-ka³r'd-e'. Any monstrosity of the heart. [L. 57 (a. 14).]

TERATOGENY, n. *Tē*-r-a³t-oj'/(e²n)-i². From *τέρας*, a monster, and *γένεσις*, generation. Fr., *teratogénèse*, *teratopénite*. Ger., *Teratogenie*. The production of monsters. [L. 41, 49 (a. 14).]

TERATOID, adj. *Tē*-r'a³t-oid. Gr., *τεράτoids* (from *τέρας*, a monster, and *είδος*, resemblance). Resembling or of the nature of a monster. [a. 17.]

TERATOLOGY, n. *Tē*-r-a³t-oj'/(o)-i². From *τέρας*, a monster, and *λόγος*, understanding. Fr., *teratologie*. Ger., *Teratologie*. The science of monstrosities. [a. 35.]

TERATOMA (Lat.), n. n. *Tē*-r-a³t-(a³t)-ōm'a³. Gen., *-om'atos* (-atis). From *τέρας*, a monster. Fr., *teratome*. Ger., *Teratom*. Of Virchow, a tumor containing various structures of the body, as if from a malformed fetus. They arise by the abnormal inclusion of a whole embryo or a portion of one. [a. 34.] Cf. *Fœtus inclusus*.

TERATOPHOBIA (Lat.), n. f. *Tē*-r-a³t-(a³t)-ō(-ō³)-fob(fō³b)/i²-a³. From *τέρας*, a monster, and *φόβος*, fear. Of Venanzio, morbid fear of monsters, both actual and mythological, of deformed or physically pester in persons, or of caricatures. ["Gazz. degli ospit.," 1893, No. 12, p. 106 (a. 34).]

TERATOSIS (Lat.), n. f. *Tē*-r-a³t-(a³t)-ōs'/(i'a). Gen., *-os'eos* (-is). From *τέρας*, a monster. Properly, the formation of a monstrosity; a congenital deformity. The *Teratoses* of Fuchs are a family of the *Morphonosis* of the skin, including *Dysmorphoses* and *Heteromorphoses*. [G.]

TERBASIC, adj. *Tur-bas'/(ā). See *TRIBASIC*.*

TERBIUM (Lat.), n. n. *Tē*-r'bī-(u⁴)-u³m(u⁴m). From *Ytterby*, a place in Sweden. Fr., t. Ger., T. A metallic element not yet isolated, acting in compounds as a trivalent radicle. Symbol *Tr* or *Tb*. Its existence has been disputed. [B. 3, 8.]

TERCHLORIDE, n. *Tu*-r-klōr'/(i'd)id. A trichloride. [B.]

TERCINE, n. *Tu*r's/en. From *tertius*, third. Fr., t. The outer layer of cells of the nucleus of a vegetable ovule. [a. 35.]

TERCIS (Fr.), n. *Tē*-r'se. A place in the department of the Landes, France, where there is a hot alkaline, saline, and sulphurous spring. [L. 41, 49, 57 (a. 14).]

TEREBELLA (Lat.), n. f. *Tē*-r-e²b-e²l'a³. Dim. of *terebrā*, a borer. See *TEREPHNE*.

TEREBELLUM (Lat.), n. n. *Tē*-r-e²b-e²l'u³m(u⁴m). From *terebrā*, a borer. Fr., *craniotome tébrante*. 1. An instrument invented by Dugès for perforating the vault of the cranium in the operation of craniotomy, or for boring into the base of the skull for the purpose of breaking it up or of making traction. Its end was in the form of a conical screw. [A. R. Simpson, "Brit. Med. Jour.," Dec. 13, 1884, p. 1173.] 2. The working blade of Hubert's transforateur.

TEREBENE, n. *Tē*-r'e²b-en. Fr., *terébène*. Ger., *Tereben*. A mixture of optically inactive terpenes obtained by distilling oil of turpentine with 5 per cent. of concentrated sulphuric acid, washing with soda solution, drying with calcium chloride, and then distilling the portion which boils between 156° and 160° C. It has an agreeable odor, and is used medicinally instead of oil of turpentine when the odor of the latter is objectionable, also as a surgical dressing and antiseptic. [B. 270 (a. 38).]

TEREBENTENE, n. *Tē*-r-e²b-e²n't/en. Fr., *terébenthène*. Ger., *Terebenten*. Levopine; a liquid hydrocarbon. C₁₀H₁₆, being one of the modifications of oil of turpentine, found also in the oils of thyme and anise. [B. 3 (a. 38).]

TERÉBENTHINE (Fr. Cod.) (Fr.), n. *Tar*-a-ba³n²-t'en. Turpentine. [a. 35.]—**Épèvre de t.** *Essence de t.* *Huile essentielle* (ou volatile) de t. See *Oil of TURPENTINE*.—**Onguent de t. camphré**. See *BALSAMUM Genuerive*.—**Pilules de t.** (Fr. Cod.). Sp., *píldoras de trementina* (Sp. Ph.). A pill-mass consisting of 10 grammes each of Strassburg turpentine and magnesium carbonate [Fr. Cod.] (of 5 grammes of common turpentine and 7 of magnesium carbonate [Sp. Ph.]), divided into 50 pills. [B. 95 (a. 38).]—**Pilules de t. cuite** (Fr. Cod.). Thirty-centigramme pills made from terebinthina cocta (2d def.), and either rolled in powdered magnesium carbonate or kept under water. [B. 95 (a. 38).]—**Pilules de t. magnésiées**. See *Pilules de t.-Savon de t.* *Savon rétinolique* à lat. See *Sapo starkeyanus*.—**Sirope de t.** See *Syrupus*

TEREBENTHINE.—**T. au citron** [Fr. Cod.]. See **Strassburg Turpentine**.—**T. commune**. See **Terebinthina** (1st def.).—**T. cuite**. See **Terebinthina cocta** (1st def.).—**T. d'Alsace**. See **Strassburg Turpentine**.—**T. de Bordeaux**. See **Terebinthina** (1st def.).—**T. de Boston**. See **American Turpentine**.—**T. de Gilead**. Canadian turpentine. [a. 35.]—**T. de sapin**. See **Strassburg Turpentine**.—**T. de Suisse**. **T. de Venise**. Larch turpentine. [a. 35.]—**T. des Vosges**. See **Strassburg Turpentine**.—**T. du térébenthin**. Chian turpentine. [a. 35.]—**T. officinale**. Larch turpentine. [a. 35.]—**T. purifiée** [Fr. Cod.]. Turpentine purified by being gently heated in a copper vessel until melted, and then pressed through a cloth. [B. 113 (a. 38).]

TEREBENZIC, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-e}^{\text{2n}}\text{I}^{\text{2k}}$. Paratoluic acid (see under **TOLUIC** ACID).

TEREBIC ACID, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2k}}$. Fr., *acide térébique*. Ger., *Terebinsäure*. A monobasic crystalline acid, $\text{C}_9\text{H}_7\text{O}_4$, produced by the action of nitric acid on oil of turpentine. [B. 4 (a. 38).]

TEREBILENE, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}$. Fr., *térébène*. Ger., *Terebin, Kienstoff*. An optically inactive liquid obtained by treating the liquid hydrochlorides of oil of turpentine with heated lime. [B. 4 (a. 38).]

TEREBINIC ACID, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}\text{I}^{\text{2k}}$. See **TEREBIC ACID**.

TEREBINTH, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-bi}^{\text{2n}}$ nth. See **TEREBINTHUS**.

TEREBINTHACEOUS, adj. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}\text{th-a}^{\text{2}}\text{shu}^{\text{s}}$. 1. Terebinthine, resembling turpentine in properties. 2. Resembling the genus *Terebinthus* (*Pistacia*); of the *Terebinthaceae*, or *Terebintheae*, an order of dicotyledons, including *Rhus*, *Pistacia*, and other genera now referred to the *Anacardiaceae*. [a. 35.]

TEREBINTHINA (Lat.), n. f. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}\text{th-in}^{\text{en}}\text{I}^{\text{2a}}$. Fr., *térébenthine de Bordeaux* (ou commune) [Fr. Cod.] (1st def.). It., *Sp., trementina* [Sp. Ph. (1st def.)]. 1. Of the U. S. Ph., Ger. Ph., Austr. Ph., and Netherl. Ph., turpentine, a resinous juice obtained from the trunk of *Pinus australis* [U. S. Ph.] (*Pinus pinaster* [Fr. Cod.], *Pinus pinaster* and *Pinus laricina* [Ger. Ph.], *Pinus pinaster* and *Pinus palustris* [Swed. Ph.], *Pinus silvestris* [Sp. Ph., Netherl. Ph., Roum. Ph., Russ. Ph.], this and *Pinus maritima* [Gr. Ph.], *Pinus silvestris*, other varieties of *Pinus*, and various species of *Picea* [Austr. Ph., Hung. Ph., various species of *Pinus* [Dan. Ph., Finn. Ph., Norw. Ph.]]. [B. 95 (a. 38)]. See also **Bordeaux Turpentine**. 2. Of the Belg. and Netherl. Ph.'s, see **Larch Turpentine**.—**Ætheroleum terebinthinum** [Fr. Cod.]. See **Rectified oil of turpentine**.—**Ætheroleum terebinthinum crudum**. See **Oil of turpentine**.—**Ætheroleum terebinthinum depuratum** (see **rectification**). See **Rectified oil of turpentine**.—**Alcohol terebinthinus**. See **Oil of turpentine**.—**Balsamum t. communis**, **Balsamum terebinthinus**. See **T.** (1st def.).—**Balsamum t. laricina**, **Balsamum t. veneta**. See **Larch Turpentine**.—**Confectio terebinthinus** [Br. Ph.]. Fr., *électuaire (ou opiat) térébenthiné*. Ger., *Terpenzinklöstler*. A preparation made by rubbing together 1 fl. oz. of oil of turpentine and 1 oz. of powdered licorice-root, and adding 2 oz. of clarified honey. [B. 81 (a. 21)].—**Enema terebinthinus** [Br. Ph.]. Fr., *lavement térébenthiné*. Ger., *Terpenzinklöstler*. An enema consisting of 1 fl. oz. of oil of turpentine and 15 fl. oz. of starch mucilage. [B. 95 (a. 38)].—**Essentia terebinthinus**. 1. Of the Belg. Ph., see **Oil of turpentine**. 2. A solution of larch turpentine in four times as much 35-per-cent. alcohol, filtered after a fortnight. [B. 119 (a. 38)].—**Essentia terebinthinus rectificata** [Fr. Ph.]. See **Rectified oil of turpentine**.—**Essentia terebinthinus sulphurata**. See **Oilum terebinthinus sulphuratum**.—**Linimentum terebinthinus**. Syn.: **Linimentum terebinthinatum** [Ger. Ph., 2d ed.]. A liniment made by mixing 65 parts of cerate of resin with 35 of oil of turpentine [U. S. Ph.]; by mixing 2 oz. of sago mollis with the same amount of water, and adding a solution of 1 oz. of camphor in 16 fl. oz. of oil of turpentine [Br. Ph.]; or by mixing 6 parts of potassium carbonate with 54 of green soap, and adding 40 of oil of turpentine [Ger. Ph.]. [B. 95 (a. 38)].—**Linimentum terebinthinus acetatum** (see **aceticum**, see **Stoekes**). A liniment consisting of 4 fl. oz. each of camphor liniment and oil of turpentine and 1 oz. of glacial acetic acid [Br. Ph.]; of 60 grammes of oil of turpentine, 5 of oil of lemon, 10 of glacial acetic acid, 20 of rose water, and the yolk of 1 egg (Swiss Ph.); or of 90 grammes of crude oil of turpentine, 15 of acetic acid, the yolk of 1 egg, and water enough to make 200 grammes (Swed. Ph.). [B. 95 (a. 38)].—**Oilum terebinthinus** (crudum). Oil of turpentine. [a. 35.]—**Oilum terebinthinus depuratum**. See **Rectified oil of turpentine**.—**Oilum terebinthinus empyreumaticum**. See **Tar**.—**Oilum terebinthinus rectificatum**. See **Rectified oil of turpentine**.—**Oilum terebinthinus sulfuratum**. Sp., *aceite de trementina sulfurado* [Sp. Ph.]. A solution of oleum lini sulfuratum in three times as much (purified) [Russ. Ph., Swed. Ph.] oil of turpentine [Ger. Ph. (1st ed.)], Gr. Ph., Swiss Ph., Russ. Ph., Swed. Ph.], or of 6 parts of washed sublimed sulphur in 48 of rectified oil of turpentine [Belg. Ph.], or a preparation made by heating a part of sublimed sulphur in 99 parts of linseed-oil to 185° C., maintaining the heat until a drop on a glass slab becomes clear and jelly-like when cold, and adding 15 parts of oil of turpentine [Dan. Ph.], or by digesting 6 parts of sublimed sulphur with 23 of oil of turpentine till the oil becomes red and syrupy, clarifying, and decanting [Sp. Ph.]. [B. 95 (a. 38)].—**Pilule cum t.** See **Pilule de terebinthina**.—**Pilule cum t. cocta**. See **Pilule de terebinthina cocta**.—**Sapo terebinthinus liquidus**. A preparation made by mixing 3 parts of sodium carbonate, 4 of Castile soap, 6 of oil of turpentine, and 60 of water, and adding 6 parts each of compound spirit of mastic and compound spirit of juniper. A very similar preparation is the *buume de vie externe spiritueuse*, or *liqueur nerveine spiritueuse de Pereboom*, of French writers, made up of 3 parts of potassium carbonate and 4 of white soap dissolved in 40 parts of water and mixed with 6 of oil of turpentine, 1 part of oil of cajuput, and 4 parts of spirit of juniper [Hannover Ph., 1835]; or of a solution of 1 part

each of oil of turpentine and soap in 8 parts of alcohol. [B. 119; "Proc. of the Am. Pharm. Assoc.," xxx, p. 106 (B).]—**Spiritus terebinthinus**. See **Oil of turpentine**.—**Syrupus terebinthinus**. Fr., *sirop de térébenthine*. Sp., *jirabe de trementina*. A preparation made by digesting 100 parts of syrup with 10 of larch turpentine [Belg. Ph.] (*Strassburg turpentine* [Fr. Cod.]), bringing up with water if necessary to the original weight, and separating the liquid from the undissolved turpentine [Fr. Cod. Belg. Ph.]; by digesting 6 parts of *Strassburg turpentine* with 24 of water for twelve hours over the water-bath, filtering when cold, and adding 45 parts of sugar [Sp. Ph.]; or by digesting 5 parts of larch turpentine with 60 of boiling water for twelve hours and adding, when cold, 9 parts of sugar for each 5 of filtered liquid [Roum. Ph.]. [B. 95 (a. 38)].—**T. abiegna**, **T. abietina**, **T. argentoratensis**. *Strassburg turpentine*. [a. 35.]—**T. cocta**. Fr., *térébenthine cuite* (1st def.), *poix résine jaune* (3d def.). 1. Of the Pruss. Ph., 6th ed., the residue from the distillation of oil of turpentine (beaten up with water). 2. Of the Belg. Ph., larch (*Strassburg* [Fr. Cod., Sp. Ph.]) turpentine boiled with water until it has a stiffly plastic consistence if plunged into cold water. [B. 95 (a. 38)].—**T. communis**. See **T.** (1st def.).—**T. cypria**, **T. de Chio**, **T. de Cypro**, **T. e Chio**. Chian turpentine. [a. 35.]—**T. empyreumatica**. See **Tar**.—**T. gallica**. *Bordeaux turpentine*. [a. 35.]—**T. laricina**, **T. laricis**, **T. larigna**, **T. officinalis**. See **Larch Turpentine**.—**T. pistacina**. Chian turpentine. [a. 35.]—**T. veneta**. See **Larch Turpentine**.—**T. vulgaris**. See **T.** (1st def.).—**Unguentum de t. et adipibus**. See **Unguentum elemi compositum**.—**Unguentum de t. camphoratum**. See **Balsamum Gennepieve**.—**Unguentum terebinthinus**. Syn.: **Unguentum terebinthinatum** [Dan. Ph., Norw. Ph.]. An ointment consisting of 24 parts each of yellow wax and lard, 6 of colophony, and 48 fluid parts of oil of turpentine [Br. Ph.]; of equal parts of yellow wax, oil of turpentine (rectified) [Russ. Ph.], and larch [Gr. Ph., Russ. Ph.] (common [Ger. Ph.]) turpentine [Ger. Ph., Gr. Ph., Russ. Ph.]; of equal parts of simple ointment and common turpentine [Roum. Ph.]; of 35 parts each of common turpentine and oil of turpentine with 30 of yellow wax [Norw. Ph.]; or of 36 each of oil of turpentine and common turpentine and 27 of yellow wax [Dan. Ph.]. A similar preparation was the old *Balsamum Frahmii*, or *linimentum digestivum*, made by mixing 1 part of molten yellow wax with 1 part of oil of turpentine and 1 part [Batav. Ph., 181, Bay Ph., 1823] (2 parts [Schleswig Ph., 1831, Hamb. Ph., 1835]) of larch turpentine. [B. 95 (a. 38); B. 119.]—**Unguentum terebinthinus compositum**. An ointment consisting of 96 parts of larch turpentine with 3 each of aloes and myrrh, 24 of olive-oil, and enough yolks of eggs [Ger. Ph., Russ. Ph.], or with 96 parts of olive-oil, 8 of red sandal-wood, 64 of yellow wax, and 4 of balsam of Peru [Netherl. Ph.]; or of 35 parts of larch turpentine, 18 of yellow wax, 12 of oil of turpentine, and 3 each of theunctures of aloes and myrrh [Swiss Ph.]. [B. 95 (a. 38)].—**Unguentum terebinthinus resinosum**. See **Unguentum basilicum**.

TEREBINTHINATE, adj. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}\text{thI}^{\text{2n}}$ -at. Lat., *terebinthinatus*. Fr., *térébenthiné*. Composed of or containing turpentine. [a. 35.]

TEREBINTHINE, adj. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}\text{thI}^{\text{2n}}$. See **TEREBINTHACEOUS** (1st def.).

TEREBINTHUS (Lat.), n. f. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-i}^{\text{2n}}\text{th-u}^{\text{s}}\text{I}^{\text{2n}}$. The genus *Pistacia*, especially *Pistacia t.* The *Terebinthaceae* are a family of resinous plants (including *Pistacia*, *Juglans*, *Bursaria*, *Rhus*, etc.). The *Terebinthaceae*, or *Terebintheae*, are a class of gymnoclastous plants consisting of the *Ochnaceae*, *Simarubaceae*, *Diosmeae*, *Rutaceae*, etc. [a. 35.]—**T. lentiscus**. See **PISTACIA lentiscus**.—**T. vulgaris**. See **PISTACIA t.**

TEREBRA (Lat.), n. f. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-ra}^{\text{2}}$. From *terere*, to rub. See **TREPINE**.—**T. occulta**. A concealed perforator invented by Sir Fielding Ould.

TERÉBRANT (Fr.), adj. $\text{Ta-ra-bra}^{\text{2n}}$. Boring or penetrating (said of pain). [E.]

TEREBRATION, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-ra}^{\text{2}}\text{shu}^{\text{n}}$. Lat., *terebratio* (from *terebrare*, to bore through). Perforation.

TERECAMPHENE, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-e}^{\text{2a}}\text{m}^{\text{f}}$ -en. Fr., *térécamphène*. Ger., *Terecamphen*. A terpene, $\text{C}_{15}\text{H}_{24}$, occurring as feathery crystals. [B. 4, 270 (a. 38).]

TERECHRYSIC ACID, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-kr}^{\text{2k}}\text{I}^{\text{2k}}$. Fr., *acide téréchrysique*. An acid, $\text{C}_9\text{H}_7\text{O}_4$, obtained by Cailliot in the oxidation of oil of turpentine by diluted nitric acid. It forms a pasty, orange-yellow, uncrystallizable mass of a sour, afterward astringent and bitter, taste, soluble in all proportions in water, in alcohol, and in ether. [B. 93 (a. 14).]

TERED (Lat.), n. f. $\text{Te}^{\text{r}}\text{-ed}$ (ad)^o. Gen., *-edinis*. Gr., *τερεδών*. 1. A wood-bore. [a. 45.] 2. See **CARIES** (1st def.).—**T. ossium**. See **CARIES** (1st def.).

TEREPHTHALIC ACID, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-tha}^{\text{2}}\text{I}^{\text{2n}}\text{-I}^{\text{2k}}$. Fr., *acide téréphthalique*. An acid, $\text{C}_8\text{H}_4(\text{CO}_2\text{NH}_2)_2$, occurring as microscopic crystals. [B. 3 (a. 38).]

TEREPHTHALIC ACID, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-tha}^{\text{2}}\text{I}^{\text{2k}}$. Fr., *acide téréphthalique*. Ger., *Terephthalsäure*. See under **PHTHALIC ACID**.

TEREPHTHALYL, n. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-tha}^{\text{2}}\text{I}^{\text{2l}}$. Ger., *Terephthalyl*. A bivalent radical, $\text{C}_6\text{H}_4\text{O}_2\text{C}_6\text{H}_4\text{O}_2\text{H}$, $\text{C}_6\text{H}_4\text{O}_2\text{H}$, found in terphthalic acid. [B. 3.]—**T. chloride**. A crystalline mass, $\text{C}_8\text{H}_4(\text{COCl})_2$, of rather sharp cinnamon-like smell. [B. 3, 4 (a. 38).]

TERES (Lat.), adj. $\text{Te}^{\text{r}}\text{-e}^{\text{2b}}\text{-e}^{\text{2a}}$ (as). Terete: as a n., round, slender muscle. [a. 17.]—**T. antibrachii**. See **PRONATOR radii f.**—**T. major**. A muscle arising from the posterior surface of the inferior angle of the scapula and its anterior margin and inserted into the lesser tuberosity of the humerus. [L.]—**T. minimus**. An anomalous offshoot from the lower portion of the *t. minor*, inserted into the humerus below the insertion of the latter. [L. 332.]—**T. minor**. Fr., *petit rond*. Ger., *kleiner runder Arm-muskel*. 1. A

muscle arising from the infraspinous fossa of the scapula, its anterior margin, and the overlying fascia, and inserted into the greater tuberosity of the humerus. [L.] 2. Of Percival, see *SCAPULO-HUMERALIS minor*.

TERETE, adj. $\text{Te}^2\text{r}^1\text{-et}^1$. Lat., *teres* (from *terere*, to rub). Fr., *terète*. Ger., *stielrund, drahtrund*. Cylindrical. [A. 35.]

TERETINIC ACID, n. $\text{Te}^2\text{r}^1\text{-et}^1\text{-i}^2\text{nk}$. Fr., *acide térébintique*. A crystallizable acid, $\text{C}_{10}\text{H}_{16}\text{O}_6$, obtained by gently heating oil of turpentine with lead protoxide. [B. 93 (a, 14).]

TEREPHONATOR (Couses) (Lat.), n. m. $\text{Te}^2\text{r}^1\text{-e}^2\text{t}^1\text{-i}^2\text{-pro}$ (pro^2) $\text{nat}^2\text{a}^2\text{u}^2\text{r}$ Gen., $\text{-or}^1\text{us}$. See *PRONATOR radii teres*.

TEREPHONAPARIS (Couses) (Lat.), n. m. $\text{Te}^2\text{r}^1\text{-e}^2\text{t}^1\text{-i}^2\text{-ska}^2\text{p}$ (ska^2p^2) u^2r (u^2) $\text{a}^2\text{a}^2\text{r}^2\text{is}$. From *teres*, rounded, and *scapula* (q. v.). See *TERES major*.

TERETRION (Lat.), **TERETRUM** (Lat.), **TERETRON** (Lat.), n's n. $\text{Te}^2\text{r}^1\text{-e}^2\text{t}^1\text{-ro}^2\text{a}^2\text{n}$, $\text{-u}^2\text{m}$ (u^2m), $\text{te}^2\text{r}^1\text{-e}^2\text{t}^1\text{-ro}^2\text{a}^2\text{n}$. Gr., *τερετριον* (*teretripion* from *terepion*, to rub hard). See *TEREPHINE*.

TERGAL, adj. $\text{Tu}^2\text{r}^1\text{-g}^1$. See *DORSAL*.

TERGEMINAL, **TERGEMINATE**, **TERGEMINOUS**, adj's. $\text{Tu}^2\text{r}^1\text{-je}^2\text{m}^2\text{-i}^2\text{n}$, nat^2 , u^2s . Lat., *tergeminatus, tergeminus* (from *ter*, three times and *geminus*, twin-born). Fr., *tergeminé, germinal, dreifach-zweizählig, dreimal-gezweit, dreifach-gepaart*. Thrice geminate; of a compound leaf, having the common petiole terminating in three pairs of leaflets. [A. 35.]

TERGISPERMUS (Lat.), adj. $\text{Tu}^2\text{r}^1\text{-je}^2\text{r}^1\text{-g}^1\text{-i}^2\text{-spu}^2\text{m}^2\text{-spe}^2\text{r}^1\text{m}^2\text{-u}^2\text{s}$ (u^2s). From *tergum*, the back, and *sperma*, a seed. Fr., *tergisperme*. Having the fructification occupying the back of the leaf (frond). [A. 35.]

TERGUM (Lat.), n. n. $\text{Tu}^2\text{r}^1\text{-g}^1\text{-i}^2\text{-u}^2\text{m}$ (u^2m). Gr., *ῥῆστρον*. The back; the dorsal arc of the somite of an arthropod. [B. 28 (a, 27); L. 196.]

TERHYDRIDE, n. $\text{Tu}^2\text{r}^1\text{-hid}^1\text{-i}^2\text{-d}$ (rid). A combination of an element or radicle with 3 atoms of hydrogen. [B.]

TERIODIDE, n. $\text{Tu}^2\text{r}^1\text{-i}^2\text{-od}^1\text{-i}^2\text{-d}$ (id). A triiodide. [B.]

TERM, n. $\text{Tu}^2\text{r}^1\text{-m}$. Lat., *terminus* (from *terminare*, to limit). Fr., *terme*. Ger., *Zeitraum*. 1. A limited or specified time or period. 2. The menstrual period. [a. 48.] 3. The proper time for the cessation of gestation. At (full) t. Fr., 3 (*born*) *terme*. Ger., *rechzeitig*. At the proper time (said of a birth that takes place at the end of the normal period of gestation). [a. 48.]

TERMA (Wildier) (Lat.), n. f. $\text{Tu}^2\text{r}^1\text{-me}^2\text{-a}^2\text{-z}^2\text{o}^2\text{n}^2$. A lamina of nerve-substance extending between the anterior commissure of the brain and the optic chiasm. [J. 80 (K).]

TERMATIC, adj. $\text{Tu}^2\text{r}^1\text{-ma}^2\text{-i}^2\text{nk}$. Supplying the terms. [J.]

TERMINAISON (Fr.), n. $\text{Te}^2\text{r}^1\text{-me}^2\text{-ne}^2\text{-z}^2\text{o}^2\text{n}^2$. A termination, an extremity. [a. 48.] — **T's hédériformes** (Ranvier). The sum of the tactile menisci. [J. 31.] — **T. motrice**. See *MOTORIAL NERVE END-PLATE*. — **T's nerveuses**. See *NERVE-ENDINGS*.

TERMINAL, adj. $\text{Tu}^2\text{r}^1\text{-i}^2\text{-n}$. Lat., *terminalis* (from *terminus*, a limit). Fr., *t. Ger., gipfelständig, endständig*. Pertaining to or situated at the end or apex. [A. 35.]

TERMINALIA (Lat.), n. f. $\text{Tu}^2\text{r}^1\text{-m}$ ($\text{te}^2\text{r}^1\text{-m}$) $\text{-i}^2\text{-n}$ -al (a^2l) $\text{-i}^2\text{-a}^2$. From *terminalis*, terminal. Fr., *badamier, terminalier*. Ger., *Catapappbaum*. A genus of the *Terminaliaceae* (a family referred by Benthams and Hooker to the genus *T.*) The *Terminaliae*, or *Terminalia*, are a tribe of the *Combretaceae*, corresponding essentially to the suborder *Combretes*. [a. 35.] — **T. alata**. Fr., *badamier ailé*. An East Indian species. The bark is febrifuge, and the juice of the leaves is injected into the ear in otitis. [a. 35.] — **T. angustifolia**. Fr., *faux benjoin, bien-joint, badamier benjoin*. Ger., *falscher Benzoebaum, schmalblättriger Catappanbaum*. A species found in the East Indies and the Mauritius, yielding a resin which contains benzoic acid and is much employed as a cosmetic and as incense. The fruits are used like those of *T. chebuli*; and their almond-like seeds, containing a bland oil, are eaten. [a. 35.] — **T. argentea**. A Brazilian species yielding a purgative gum-resin. [a. 35.] — **T. arjuna**. An East Indian species. The astringent bark is used as a cholagogue and vulnerary. The juice of the leaves is used in ophthalmia, and the fruit as a deobstruent and tonic. [a. 35.] — **T. bellieria**. *T. bellieria*. A large Ceylon and East Indian tree. The fruits, bellier myrobala, are astringent and tonic. Their kernels, which yield an oil used as a hair-tonic, are edible, though narcotic in large quantities; mixed with honey, they are used in ophthalmia. The bark yields by incision an insipid gum. The leaves are astringent. [a. 35.] — **T. benzoin. See *T. angustifolia*. — **T. catappa**. Fr., *badamier de Malabar, arbre à huile, bois-camote*. Ger., *echter Catappanbaum*. Country (or Indian, or Malabar) almond tree; a native of the Moluccas, cultivated in the East and West Indies. The kernels yield a straw-colored oil which has the odor and taste of almond-oil. The astringent bark and leaves yield a black pigment used to color teeth and to prepare Indian ink. The leaves are used in fevers and as an emollient. [a. 35.] — **T. chebuli**. Fr., *badamier chebule, olivier des nègres*. Ger., *Hispiger Myrobalaenbaum*. Negroes' olive-tree; found in the tropics in both hemispheres. The highly astringent bark, known to old authors as *myrobalani indae* (seu *indica*, seu *indici*, seu *nigra*) when unripe, and as *myrobalani chebuli* (seu *chebuli*) when ripe, are used in tanning, as a purgative, and as an application to ulcers and in skin diseases; combined with galls and catechu, they are also used for aphthous affections. The astringent galls produced on the leaves (which have the properties of those of *T. catappa*) are used in infantile diarrhoea. The highly astringent fruit. [a. 35.] — **T. citrina**. Fr., *badamier citrin*. Ger., *gelber Myrobalaenbaum*. Hara-nut tree; a native of Bengal. The fruits, *myrobalani citrina* (seu *lutei*, seu *flavæ*), resemble and are used like those of *T. chebuli*, but are more bitter. [a. 35.] — **T. latifolia**. A South American and West Indian species. The bark and seed**

are used like those of *T. catappa*. [a. 35.] — **T. macroptera**. Fr., *badamier paniculé*. A Senegambian species furnishing a very astringent gall. The root is purgative. [a. 35.] — **T. tomentosa**. An East Indian tree yielding a gum used as a cosmetic and as an incense. The astringent bark is used for indolent ulcers and in atonic diarrhoea; it contains much calcareous matter, yielding an ash used in place of lime by the chewers of betel-leaf. [a. 35.]

TERMINALIS (Lat.), adj. $\text{Tu}^2\text{r}^1\text{-m}$ ($\text{te}^2\text{r}^1\text{-m}$) $\text{-i}^2\text{-n}$ -al (a^2l) $\text{-i}^2\text{-a}^2$. See *TERMINAL*.

TERMINATION, n. $\text{Tu}^2\text{r}^1\text{-i}^2\text{-n}$ $\text{-a}^2\text{-shu}^2\text{n}$. Lat., *terminatio* (from *terminare*, to limit). Fr., *termination*. 1. The end or issue. 2. An extremity, an ending. [a. 48.] — **Browne t.** See *BROWNE BODY*. — **Nerve t's**. See *NERVE-ENDINGS*.

TERMINI (It.), n. $\text{Te}^2\text{r}^1\text{-me}^2\text{-ne}$. A place in the province of Palermo, Sicily, where there are hot alkaline, saline, and sulphurous springs. [L. 30, 37, 49 (a, 14).]

TERMINTHANTHRAEX (Lat.), n. m. $\text{Tu}^2\text{r}^1\text{-m}$ ($\text{te}^2\text{r}^1\text{-m}$) $\text{-i}^2\text{-nth}$ $\text{-a}^2\text{nth}$ (a^2nth) ra^2x (ra^2x). Gen., $\text{-anti}^2\text{-ra}^2\text{cos}$ (-is). See *TERMINTHUS* (2d def.).

TERMINTHUS (Lat.), n. f. $\text{Tu}^2\text{r}^1\text{-m}$ ($\text{te}^2\text{r}^1\text{-m}$) $\text{-i}^2\text{-nth}$ $\text{-u}^2\text{s}$ (u^2s). Gr., *τέρμινθος* (= *τερεβινθος*), the turpentine-tree. Ger., *Hundsblatter, Erbsenblatter* (1st def.), *schwarze Auswuchs* (2d def.). 1. An ancient name for carbuncle or other inflammatory disease of the skin; so called because of a fancied resemblance to the fruit of *Pistacia terebinthus*. 2. Of Plencq, "large, dark-colored inflammatory pustules, observed especially on the legs of women." [G. 11.] — **Terminthi neonatorum**. Of Plencq, a disease of new-born infants characterized by large "pustules" upon the skin containing a dark-colored fluid and surrounded by a red areola, sometimes occurring as an epidemic; pemphigus neonatorum. [G. 11.]

TERNANT (Fr.), n. $\text{Te}^2\text{r}^1\text{-na}^2\text{-n}$. A place in the department of the Puy-de-Dôme, France, where there is a chalybeate and alkaline spring. [L. 49 (a, 14).]

TERNATE, adj. $\text{Tu}^2\text{r}^1\text{-at}$. Lat., *ternatus, ternus* (from *terni*, three each). Fr., *terné*. Ger., *dreizählig* (1st def.), *gedreit* (1st def.), *dreiständig* (2d def.). 1. Consisting of three leaflets inserted upon the petiole at the same point (said of a compound leaf). 2. Of leaves, arranged on a stem or branch in whorls of three. 3. In threes (applied to three similar parts forming any compound organ). [a. 35.]

TERNSTROEMIA (Lat.), n. f. $\text{Te}^2\text{r}^1\text{-stru}^2\text{m}$ ($\text{i}^2\text{-a}$). From *Ternström*, a Swedish naturalist. A genus of tropical or subtropical evergreen trees or shrubs of the *Ternstroemiaceae* (or *Ternstroemiaceae*, or *Geraniaceae*) which are an order of the *Guttiferales*. The *Ternstroemiae* are also a tribe of that order, comprising *T. Visnea*, *Anneslea*, etc. [a. 35.] — **T. altamirania**, *T. silvatica*. Sp., *yerba del cura* [Mex. Ph.]. A tropical American species. In Mexico the leaves are used in preparing baths for rheumatism and gout. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]

TEROXIDE, n. $\text{Tu}^2\text{r}^1\text{-o}^2\text{x}^1\text{-i}^2\text{-d}$ (id). A trioxide. [B.]

TERPENE, n. $\text{Tu}^2\text{r}^1\text{-p}^1\text{-en}$. Fr., *terpène*. C. r., *Terpen*. Any one of a series of hydrocarbons having the composition $\text{C}_{10}\text{H}_{16}$, and occurring very widely in the vegetable kingdom. They are found in all volatile oils except oil of rose, and often form the chief ingredient. They include the *pinenes* (australene, eucalyptene, and terebentene), the *camphenes* (terecamphene, borneocamphene, and inactive camphene), the *limonene* group (hesperidene, carvone, citrene, isoterpene, inactive limonene, cajuputene, cinene, disoprene, isoterbentene, and caoutchene), *terpinolene*, *silvestrene*, *terpinene*, and *phellandrene*. [B. 270 (a, 38).]

TERPENTHIN (Ger.), n. $\text{Te}^2\text{r}^1\text{-p}^1\text{-ent}^1\text{-en}$. See *TERPENTINE*.

TERPENTIC ACID, n. $\text{Tu}^2\text{r}^1\text{-e}^2\text{nt}^1\text{-i}^2\text{nk}$. An acid, $\text{C}_9\text{H}_{14}\text{O}_4$, formed by the oxidation of oil of turpentine by chromic acid. [B. 3.]

TERPENTIN (Ger.), n. $\text{Te}^2\text{r}^1\text{-p}^1\text{-ent}^1\text{-en}$. See *TERPENTINE*. — **Deutscher T.** Common European turpentine. [a. 35.] — **Elaesser T.** Strasbourg turpentine. [a. 35.] — **Französischer T.** Bordeaux turpentine. [a. 35.] — **T-gallen**. See *Pistacia GALLS*. — **T-gil** [Ger. Ph.]. See *Oil of TURPENTINE*. — **T-seife**. See *SAPO terebinthinatus*.

TERPILENE, n. $\text{Tu}^2\text{r}^1\text{-p}^1\text{-i}^2\text{-en}$. Fr., *terpiline*. 1. A mixed liquid substance consisting chiefly of terpinene. [B. 270 (a, 38).] 2. See *TEREBILENE*.

TERPINE, n's. $\text{Tu}^2\text{r}^1\text{-p}^1\text{-en}$. Lat., *terpina, terpinum*. Fr., *t. Ger., Terpin*. A substance, $\text{C}_{10}\text{H}_{16}\text{O}_2$, probably a dihydroxy-derivative of dipentene. It is optically inactive, and is formed by the action of an alcoholic solution of sulfuric acid on (OH). [B. 2, 4 (a, 98).] — **T. hydrate**. A substance, $\text{C}_{10}\text{H}_{16}\text{O}_2$ (OH), H_2O , occurring as large, transparent, prismatic crystals. When distilled, it boils at 258°C . after becoming anhydrous, and cools to a hard mass. It is used as an expectorant, and in hay fever and asthma. [B. 3 (a, 38).]

TERPINENE, n. $\text{Tu}^2\text{r}^1\text{-p}^1\text{-i}^2\text{-en}$. Fr., *terpinène*. A liquid terpene, $\text{C}_{10}\text{H}_{16}$, obtained from the oil of Ceylon cardamom and in other ways, having a lemon-like odor and boiling at about 160°C . [B. 3, 270 (a, 38).]

TERPINEOL, n. $\text{Tu}^2\text{r}^1\text{-p}^1\text{-i}^2\text{-n}$ $\text{-e}^2\text{-o}^2\text{l}$. Fr., *terpineol*. Ger., *T.* A substance, $\text{C}_{10}\text{H}_{16}\text{O}$ (or $\text{C}_{10}\text{H}_{14}\text{O}$), derived from terpene by boiling with dilute mineral acids and in other ways, and occurring as a very thick liquid of pleasant odor, sparingly soluble in water. ["Am. Jour. of Pharm.," June, 1888, p. 307 (B); B. 3, 98, 270 (a, 38).]

TERPINOL, n. $\text{Tu}^2\text{r}^1\text{-p}^1\text{-i}^2\text{-n}$ $\text{-o}^2\text{l}$. Fr., *t. Ger., T.* 1. Of List, an impure variety of terpineol. 2. A mixture of terpineol with terpinene, terpinolene, and dipentene, which has been used in bronchial catarrh. [B. 3, 270 (a, 38).]

TERPINOLENE, n. $\text{Tu}^{\text{r}}\text{p}^{\text{r}}\text{i}^{\text{n}}\text{o}^{\text{l}}\text{-en}$. A liquid terpene, $\text{C}_{10}\text{H}_{18}$. [B. 3, 270 (a, 38).]

TERPINYLENE, n. $\text{Tu}^{\text{r}}\text{p}^{\text{r}}\text{i}^{\text{n}}\text{p}^{\text{l}}\text{-en}$. See TERPYLENE.

TERRA (Lat.), n. f. $\text{Te}^{\text{r}}\text{r}^{\text{a}}$. Fr. *terre*. Ger. *Erde*. See EARTH.—**Liquor terre foliata tartari**. See *Liquor potassii acetici cydus*.—**Liquor terra ponderosa salita**. See *Solutio muriatis barytæ*.—**Melia t.** See CHALK.—**Oleum terre**. See PETROLEUM.—**T. absorbens**. An alkaline earth. [B.]—**T. alana**. Tripoli. [a, 35].—**T. alba**. See *Philosopher's stone*.—**Terre alcaline**. See *Alkaline earths*.—**T. argilla alba**. See *White bole*.—**T. argillacea pura**. The precipitate (washed and dried) obtained by adding a solution of potash to one of alum. [L, 85.]—**T. bolaria**. See *T. argillacea pura*.—**T. calcarata**. See CHALK.—**T. calcaracea lactiformis**. See *Mineral agaric*.—**T. calcaracea pura** (seu usta). See *Quick-lime*.—**T. cariosa**. Rotten stone. [B.]—**T. cimolia**. See *Fuller's earth*.—**T. damnata**. See *Caput mortuum*.—**T. de Malta**. See *T. sigillata melitensis*.—**T. etretia**. See *Erettria*.—**T. fetida**. Of *Paracelsus*, sublimed sulphur. [H.]—**T. foliata**. See *Potassium acetate*.—**T. foliata mercurialis**. See *Mercurii acetate*.—**T. foliata minuralis**. See *Sodium acetate*.—**T. foliata tartari**. See *Potassium acetate*.—**T. foliata tartari crystallisabilis** (seu crystallisatæ). See *Sodium acetate*.—**T. japonica**. See *Catechu*.—**T. lemmia**. *T. lemmiana*. See *Lemnian bole*.—**T. merita**. Fr. *terre mirite*. The *Curcuma longa* or its root (turmeric). [a, 35].—**T. miraculosa Saxoniae**. Ger. *Eisensteinmark*. An earth, formerly official, composed of iron and aluminium silicates and water. [L, 30 (a, 14)].—**T. oriana**. *T. orleana*. See *Ankotto*.—**T. ponderosa**. Native barium sulphate. [a, 35].—**T. ponderosa acetata**. See *Barium acetate*.—**T. ponderosa aerata** (seu carbonata). See *Barium carbonate*.—**T. ponderosa muriata**. See *Barium chloride*.—**T. ponderosa pura**. See *Baryta*.—**T. ponderosa salita**. See *Barium chloride*.—**T. ponderosa sulphurica** (seu vitriolata). Native barium sulphate. [a, 35].—**T. sancta Rulandi**. See *ANTIMONY ash*.—**T. Sancti Pauli**. See *T. sigillata melitensis*.—**T. selinusia**. A friable earth resembling Chian earth and used like it. [L, 105 (a, 50)].—**T. sicula**. See *Bazar mineral*.—**T. sigillata**. Fr. *terre sigillée*. See *Bole*.—**T. sigillata melitensis**. Ger. *malteser Siegelerde*. A white serpentine bole from Malta and Italy. [a, 35].—**T. umbria**. Umber. [B.]

TERRALINE, n. $\text{Te}^{\text{r}}\text{r}^{\text{a}}\text{l-in}$. See VASELINE and PETROLATUM.

TERRIAN (Fr.), n. $\text{Te}^{\text{r}}\text{r}^{\text{a}}\text{n}$. A place in the department of Cantal, France, where there is a chalybeate spring. [L, 49 (a, 14).]

TERRE (Fr.), n. Te^{r} . See EARTH.—**T. à foulon**. See *Clay and Fuller's earth*.—**T. amère**. See *Magnesium carbonate*.—**T. à porcelaine**. See *Kaolin*.—**T. bolaire**. See *Armenian bole*.—**T. calcaire**. See *Lime*.—**T. de Lemnos**. 1. See *Lemnian bole*. 2. The pulp of the fruit of *Adansonia digitata*. [a, 35].—**T. de Saint-Paul**. See *Terra sigillata melitensis*.—**T. de Sedlitz**. See *Magnesium carbonate*.—**T. de Sienne**. See *Iron oxide*.—**T. des os**. Normal calcium phosphate. [L, 105 (a, 50)].—**T. douce de vitriol**. See *Colcothar*.—**T. s'feuilletes**, **T. s'folées**. A name formerly given to the crystallizable acetates. [L, 105 (a, 50)].—**T. magnésienne**. See *Magnesium carbonate*.—**T. pesante**. See *Baryta*.—**T. pesante aérée**. See *Barium carbonate*.—**T. pesante salée**. See *Barium chloride*.—**T. sigillée**. See *Bole*.—**T. verte**. See *Copper carbonate*.—**T. verte de Véron**. Iron and aluminium silicate, containing magnesium and sodium. [B, 93 (a, 14)].—**T. vitrifiable**. Pure silica. [B, 93 (a, 14).]

TERRESTRIAL, adj. $\text{Te}^{\text{r}}\text{-re}^{\text{st}}\text{r}^{\text{i}}\text{-l}$. Lat. *terrestris*. Fr. *terrestre*. Pertaining to the land; living or growing on land. [a, 35].

TERRIUS (Lat.), adj. $\text{Te}^{\text{r}}\text{-re}^{\text{u}}\text{s}$ ($\text{u}^{\text{a}}\text{s}$). Fr. *terreux*. See EARTHEN and EARTHY.

TERROR, n. $\text{Te}^{\text{r}}\text{-o}^{\text{r}}$. Lat. *t.* Fr. *terreur*. An intense degree of fear. [a, 48].—**Night t.**, **Night t's**. See *PAVOR nocturnus* (2d def.).

TERSULPHATE, n. $\text{Tu}^{\text{r}}\text{-su}^{\text{l}}\text{f}^{\text{at}}$. Lat. *tersulphas*. A sulphate containing three molecules of the sulphuric-acid radicle. [B.]

TERSULPHIDE, **TERSULPHURET**, n's. $\text{Tu}^{\text{r}}\text{-su}^{\text{l}}\text{f}^{\text{id}}\text{id}$ (id), $\text{-su}^{\text{l}}\text{f}^{\text{id}}\text{-re}^{\text{t}}$. See *TRISULPHIDE*.

TERTIAN, adj. $\text{Tu}^{\text{r}}\text{-sh}^{\text{n}}$. Lat. *tertius* (from *tertius*, third). Recurring on the third day (both days of occurrence being reckoned); occurring at intervals of two days, or characterized by such occurrence. [a, 48].

TERTIANA (Lat.), n. f. $\text{Tu}^{\text{r}}\text{-(te}^{\text{r}}\text{)-sh}^{\text{i}}\text{-(ti}^{\text{2}}\text{)-an}^{\text{(a)}}\text{-(a}^{\text{3}}\text{)-l}$. From *tertius*, third. See *Tertian fever*, and cf. *FEBRIS t. accidentalis* to *FEBRIS t. verminosa*, inclusive.—**T. continua duplex**. See *Double tertian intermittent fever* (1st def.).—**T. duplex**. See *Double tertian intermittent fever*.—**T. duplicata**. See *Double tertian intermittent fever* (1st def.).—**T. pleuritica**. Of *Sauvages*, pleuritis periodica. [a, 34].—**T. triplex**. See *Triple tertian fever*.

TERTIANARIA (Lat.), n. f. $\text{Tu}^{\text{r}}\text{-(te}^{\text{r}}\text{)-sh}^{\text{i}}\text{-(ti}^{\text{2}}\text{)-an}^{\text{(a)}}\text{-(a}^{\text{3}}\text{)-l}$. From *tertianus*, tertian. Fr. *tertianaire*. The *Scutellaria galericulata*; so called because it was said to cure intermittent fevers. [B, 200 (a, 35).]

TERTIARISME (Fr.), n. $\text{Te}^{\text{r}}\text{-se}^{\text{-a}^{\text{3}}}\text{-resm}$. A tertiary condition or stage, such as occurs in syphilis. [Fournier, "Arch. gén. de méd.," Sept., 1889 (B).]

TERTIARY, adj. $\text{Tu}^{\text{r}}\text{-sh}^{\text{i}}\text{-a}^{\text{-ri}^{\text{3}}}$. Lat. *tertiarius* (from *tertius*, third). Fr. *tertiaire*. 1. Of organic compounds, having a radicle substituted in a hydrocarbon attached to a carbon atom which itself is connected with three other carbon atoms: of amines and amides, phosphines, stibines, and arsines, having all three hydrogen atoms of ammonia, phosphoreted hydrogen, etc., replaced by radicles. [B.] 2. In botany, of the third order (said of a branch of a secondary branch). [a, 35.] 3. Of a disease, in the

third stage (said especially of syphilis in the gummatous stage). 4. As a n., one of the remiges growing on the humerus of birds. Sometimes the feathers from the scapula are included. [L, 221.]

TERTIPARA (Lat.), n. f. $\text{Tu}^{\text{r}}\text{-(te}^{\text{r}}\text{)-i}^{\text{p}}\text{-(a}^{\text{3}}\text{)-r}^{\text{a}^{\text{3}}}$. From *tertius*, third, and *parere*, to bring forth. Fr. *tertipare*. A female parturient for the third time. [a, 48.]

TERTIUS (Lat.), adj. $\text{Tu}^{\text{r}}\text{-(te}^{\text{r}}\text{)-sh}^{\text{i}}\text{-(ti}^{\text{2}}\text{)-u}^{\text{s}}\text{-(u}^{\text{a}}\text{)-s}$. From *ter*, three times. Third; as a n., the third in a series of muscles.—**T. compositi**. See *TRACHELOMASTOIDEUS* (1st def.).—**T. laryngis**. See *CRICO-ARTENOIDEUS lateralis*.—**T. movens caput**, **T. Spigelii**, **T. trigemini**. See *TRACHELOMASTOIDEUS* (1st def.).

TERVALENCE, n. $\text{Tu}^{\text{r}}\text{-va}^{\text{l}}\text{-e}^{\text{ns}}$. From *ter*, three times, and *valere*, to be worth. See *TRIVALENCE*.

TERVALENT, adj. $\text{Tu}^{\text{r}}\text{-va}^{\text{l}}\text{-l}^{\text{nt}}$. See *TRIVALENT*.

TESCALAMA (Sp.), n. $\text{Ta}^{\text{s}}\text{-ka}^{\text{2}}\text{la}^{\text{3}}\text{ma}^{\text{3}}$. A resinous extract obtained from the bark of *Ficus nymphaefolia*, used in plasters, etc. [a, 35.]

TESSELLATED, adj. $\text{Te}^{\text{s}}\text{-e}^{\text{l}}\text{-at}^{\text{-e}^{\text{2}}}\text{-d}$. Lat. *tessellatus* (from *tessella*, a small square tile). Fr. *tessellé*, en damier. Ger. *würfelig*, *gewürfelt*, *schachbrettartig*. Marked with little squares: checkered. [a, 35.]

TESSERA (Lat.), n. f. $\text{Te}^{\text{s}}\text{-se}^{\text{r}}\text{-a}^{\text{3}}$. Lit., a cube (from *τετραερες*, four). See *Cuboid bone*.

TESSULAR, adj. $\text{Te}^{\text{s}}\text{-u}^{\text{l}}\text{-a}^{\text{3}}$. Lat. *tessularis*. Ger. *tesularisch*. Having the length, breadth, and thickness equal or nearly so (said of cells and of tissue composed of such cells). [a, 35.]

TEST, n. Te^{st} . Gr. *κρίσις* (1st def.). Lat. *testamen*, *testimonium* (1st def.), *testa* (2d def.). Fr. *épreuve* (1st def.), *preuve* (1st def.), *t* (2d def.), *têt* (2d def.). Ger. *Probe* (1st def.). 1. A trial or experiment made for ascertaining some particular fact or condition; also the substance employed in such an experiment. [a, 48.] 2. See *TESTA*.—**Bond-Utzmann t.** The use of phenylhydrazine hydrochloride as t. for glucose. ["N. Y. Med. Jour.," Jan. 7, 1893, p. 12 (a, 50)].—**Böttger-Nylander t.** A t. for glucose, consisting of a solution made up of 2 parts of a basic salt of potassic bismuth nitrate, 4 of potassic sodium tartrate, and 100 of an 8-per-cent. solution of caustic soda. Of this solution, 1 part is boiled with 10 parts of urine for from 1 to 2 minutes, when a dark solution will be obtained, on cooling, from the oxidation of the bismuth. ["Therap. Gaz.," Oct. 15, 1890, p. 488 (a, 50)].—**Böttger's t.** A t. by which the presence of glucose in urine is shown by the blackening of the white deposit made when the urine is treated with sodium carbonate and boiled with bismuth subnitrate or hydroxide. [B, 270 (a, 38)].—**Breslau t.** A t. of little value, used in medico-legal examinations to determine, by the floating or sinking of the stomach of a fetus in water on its removal from the body, whether or not it has been born alive. [K.]—**Brücke's bismuth-iodide t.** A t. by which the presence of glucose is shown by the brown or black coloration it causes in a solution made by boiling for ten minutes 54 grammes of freshly precipitated bismuth subnitrate and 30 of potassium iodide with 150 c. c. of water, and adding 5 grammes of a 25-per-cent. solution of hydrochloric acid. [B, 270 (a, 38)].—**Bryce's t.** The repetition of a vaccination after four or five days. If first vaccination has affected the whole system, the second vesicle pursues an accelerated course and disappears as soon as the first; otherwise it follows the usual course.—**Catoptry t.** A t. formerly employed for the detection of cataract, by observing the upright reflections of a candle flame from the surfaces of the cornea and the anterior capsule of the crystalline lens, and noting the absence, in cases of cataract, of the inverted image reflected from the posterior capsule of the lens.—**Crucial t.** A t. which determines the matter in question decisively one way or the other. [a, 48].—**Diazobenzol t.** See *Ehrlich's t.*—**Differential-density t.** A t. for glycosuria. Two specimens of the urine are kept in a warm place for twenty-four hours in loosely corked bottles, yeast having been added to one of them. The density of the fermented specimen will then be found to be diminished, each 100 lbf representing the original presence of a grain of glucose in each fl. oz. of the urine. ["N. Y. Med. Jour.," July 5, 1890, p. 28 (a, 48)].—**Donné's t. for pus**. A t. which consists in adding a strong alkali to the sediment of a suspected urine. If pus is present, a viscid mass is formed. [K, 16].—**Ehrlich's t.** A t. by which the presence of bilirubin in the urine is shown by the violet color produced when the urine has been treated with dilute acetic acid and some drops of a solution of 1 gramme of sulphuric acid, 10 centigrammes of sodium nitrate, and 15 c. c. of hydrochloric acid in a litre of water have been added. [B, 270 (a, 38)].—**Fehling's t.** See *Fehling's solution*.—**Fleitmann's t.** The same as *Marsh's t.*, with zinc and caustic soda or potash solution substituted for zinc and sulphuric acid. [B, 270 (a, 38)].—**Garrod's t.** A t. for uric acid in the blood. One or two drachms of blood-serum are put into a flat dish and six minims of strong acetic acid are added to each drachm of serum; a fine thread is then introduced into the fluid and the uric acid crystallizes on it within forty-eight hours. [a, 34].—**Gmelin's t.** A t. for bile-pigments by adding a drop of nitroso-nitric acid to a drop of diluted bile. A change of colors will be produced in the following order: green, blue, violet, red, and yellow. [K.]—**Grahe's t.** A t. for distinguishing genuine from false cinchona barks, the vapor of the former being carmine and that of the latter brown when heated in a tube. [B, 270 (a, 38)].—**Grandeau's t.** A t. by which the presence of digitalin or digitalin is shown by the rich rose color produced by introducing a trace of bromine into their solution in concentrated sulphuric acid. [B, 270 (a, 38)].—**Green's t.-objects**. A series of t.-diagrams for the determination of astigmatism. The one probably most frequently used consists of a circle traversed by a set of twelve triple lines, like the spokes of a wheel, the figures being placed at the extremity of the sets of lines. Each line is designed to be distinctly seen at a distance of about 20 feet. The circle is 12½ inches in diameter. [F.]—**Group t.** A t.

by which the presence of some one of a group of substances is shown without indication of particular substance. [B.]—**Guaiaic t. for blood.** A. t. made by adding to an alcoholic solution of guaiac a few drops of ozonized oil of turpentine and of the liquid to be examined. If the latter contains hæmoglobin, the guaiac solution becomes blue from the oxidation of the guaiac by the ozone liberated by the hæmoglobin. [B., 270.]—**Guaiaic t. for hydrocyanic acid.** A. t. made by adding a few drops of a solution of copper sulphate to the tincture of guaiac and treating this with the substance to be tested. If the latter contains hydrocyanic acid, the guaiac tincture becomes blue. [B., 270.]—**Gunzberg's t.** A. t. to estimate approximately the digestive quality of gastric juice. A capsule containing 15 grm. of potassium iodide is swallowed an hour after a meal, and at intervals of fifteen minutes the saliva is tested for the iodide. [a, 34.]—**Harmonium t.** A. t. for non-perception of tones, arranged by furnishing the cavity of the harmonium with an opening for the insertion of an auscultation tube. By inserting its olive-shaped nozzle into the external meatus of the ear to be examined, the tones of the instrument will be conducted immediately to the membrana tympani. [F, 32.]—**Hartmann's t. for hearing.** A. t. based upon the length of electric flashes along a wire. It is possible to graduate a sound created in the telephone with great exactitude, as the electric flashes transmitted to the patient are produced by means of a variable resistance, the interpolation of different kinds of resistance. [F, 32.]—**Heller's albumin t.** A. t. made by introducing concentrated nitric acid into urine, and thus producing a white ring at the point of contact if the urine contains albumin. [B., 270 (a, 38).]—**Heller's blood t.** See *Heller's t. for hæmaturia.*—**Heller's sugar t.** A. t. by which the presence of glucose or sugar in the urine is shown by the yellow color produced by copper sulphate and caustic potash solution. [B., 270 (a, 38).]—**Hellö's t. for hæmaturia.** A. t. in which a portion of urine is made decidedly alkaline with caustic potash and boiled in a reagent glass. The phosphates are precipitated as very delicate floccules that look like mucus, and are colored brown or red-yellow by the blood-pigment. [Vierordt (a, 34).]—**Holmgren's t's for color-blindness.** Skeins of colored worsted, a large number of which are placed on a white cloth before the patient, who is required to select all the skeins of the same color, or of different tints of the same color. [F.]—**Horsley's t. for sugar.** A. t. by which the presence of glucose or sugar in urine is shown by the green color produced by boiling with a mixture of caustic potash and potassium chromate. [B., 270 (a, 38).]—**Hume's t. for arsenic.** A. t. made by adding, drop by drop, a weak solution of ammonia to a solution of ferrous nitrate until the brown precipitate first produced is nearly dissolved, decanting the clear liquid, and adding it to the suspected liquid. If arsenic is present, a bright-yellow precipitate of silver arsenite is produced, that must be collected and heated with a reducing agent so as to form a sublimate of metallic arsenic. [Woodman and Tidy (a, 34).]—**Hydrostatic t.** Ger., *Lungenschwimmprobe.* A. t. made by placing the lungs of a dead infant in water; if unœrated they sink; if the infant has breathed or the lungs have been otherwise aerated they float. [a, 34.] Cf. *DOCMASIA hæmatopulmonaria.*—**Indigo-carmin soda t.** See *Mulder's t.*—**Jendrassik's t.** A. t. for the patellar reflex. The patient locks his fingers together and endeavors to pull the hands apart. This tension of the muscles of the upper extremities prevents voluntary innervation of the muscles of the lower extremities while the usual t. for the reflex is applied. [a, 34.]—**Knappe's t.** For glucose. A. t. by which the presence of the latter, heated with mercuric cyanide and caustic soda, reduces the former and precipitates metallic mercury. [B.]—**Lieben's t. for acetoneuria.** A. t. made by adding iodine dissolved in a solution of potassium iodide and a few drops of caustic potash to distilled urine, when the presence of acetone is shown by the formation of iodoform. [B., 270 (a, 38).]—**Lowe's t. for glucose.** A. solution of 100 c. c. of glycerol and 10 c. c. of cuprous sulphate and 80 c. c. of caustic-soda solution in 64 grammes of water. [B., 270 (a, 38).]—**Maggie's t.** A. t. by which the presence of mercury is shown by the formation of a white precipitate of calomel and its rapid reduction to a grayish mass of metallic mercury when tin dichloride is introduced into a solution containing that metal. [B., 8 (a, 38).]—**Marsh's t.** A. t. for arsenic, made by generating hydrogen in a wide-mouthed bottle by the action of sulphuric acid on zinc and passing the hydrogen which escapes in a jet through a delivery tube, dropping the solution to be tested into the bottle, and immediately applying a piece of cold porcelain to the flame at the mouth of the tube. If arsenic is present it combines with the hydrogen, forming arseniureted hydrogen, which is again decomposed by the flame, and is deposited on the porcelain as a brown spot of metallic arsenic. [B., 8.]—**Maumene's t. for glucose.** A. t. by which glucose is shown by the formation of a brick-red precipitate of cuprous oxide when heated to 33° C. after having been soaked in the solution to be tested. [B., 270 (a, 38).]—**Méhu's t.** A. t. by which the presence of albumin in urine is shown by the precipitate formed when the urine has been treated with nitric acid or sodium sulphate, and a mixture of 1 part each of carbolic acid and caustic soda and 2 parts of alcohol has been added. [B., 270 (a, 38).]—**Milton's t. (for salicylic acid).** A solution of mercury in nitric acid, used to show aromatic compounds which contain one hydropxyl group (or a methoxyl group derived from one) united with a benzene or naphthalene nucleus with which no nitrogen group is connected. Such compounds are colored red by 1 or 2 drops of the reagent to a c. c. of the solution containing the compound. [B., 270 (a, 38).] See also *Milton's reagent.*—**Moore's t.** A. t. by which the presence of sugar is shown by the changing of color of the liquid to be tested through yellow, red-brown, and deep brown to black, caused by boiling with enough caustic-soda or potash solution to give a strong alkaline reaction. The value of the t. is lessened by the fact that other substances produce a like result. [B., 270 (a, 38).]—**Mulder's t.** A. t. by which the presence of sugar is shown by mixing with the liquid to be tested a

few drops of indigo carmin solution, made alkaline with sodium carbonate, and heating, when the color changes through green, red-purple, and violet to bright yellow. [B., 270 (a, 38).]—**Murexide t. for uric acid.** A. t. which consists in adding moderately concentrated nitric acid to the suspected body and evaporating to dryness. Any uric acid present is converted into alloxan, urea, and volatile constituents. If now the residue is moistened with ammonia solution the alloxan is converted into murexide, and a purple color is developed. [B.]—**Musculus's t. for urea.** A. t. by which the presence of urea is shown by the brown color its neutral solution produces upon paper prepared by filtering through it urine of a sufferer from catarrh of the bladder, washing, drying, coloring with alcoholic tincture of turmeric, and drying again. [B., 270 (a, 38).]—**Nessler's t.** See *Nessler's REAGENT.*—**Oliver-Mulder's t.** See *Mulder's t.*—**Oliver's t.** A. t. by which the presence of bile in the urine is said to be shown by a cloudiness produced by an aqueous solution of peptone, salicylic acid, and acetic acid. [B., 270 (a, 38).]—**Ozone t.** See *Guaiaic t. for blood.*—**Pettenkofer's t.** A. t. for bile-acids, especially cholic acid, by the deep reddish-purple color obtained by adding sugar to a solution of the bile-salts and then dropping sulphuric acid into it. [Bischoff (K).]—**Picric-acid t.** 1. A. t. for glycosuria in which 3 parts of a saturated solution of picric acid and 1 part of potassium hydrate are added to 5 of urine, and the whole is boiled for 5 minutes. If glycosuria is present a dark mahogany-red color will result. [“N. Y. Med. Jour.,” Jan. 7, 1893, p. 12 (a, 50).] 2. A. t. for albumin, performed by heating the suspected liquid with picric acid, when, if albumin is present, the latter is precipitated. [B.]—**Pray's t.-letters for astigmatism.** T.-letters composed of stripes running at different angles. [F.]—**Purdy's t. for glycosuria.** A solution is made of 4½ grammes of copper sulphate and 10 grammes of caustic potash dissolved in glycerin in 250 c. c. of distilled water, and added to 250 c. c. of distilled water containing 20½ grammes of caustic potash; when the mixture is cold 300 c. c. of strong ammonia are added, together with enough water to make a litre, and the solution is carefully filtered; 25 c. c. of this solution is heated with 50 c. c. of distilled water, and the urine is added drop by drop until the solution produces a cloud, a small number of minims being added to decolorize the solution contain just a quarter of a grain of sugar. [“N. Y. Med. Jour.,” 1890, p. 261 (a, 34).]—**Rinne's t.** A. t. for acuteness of hearing, made by estimating how long a tuning-fork is heard when brought near the external auditory meatus after its vibration has ceased to be perceived when it touches the cranium. [a, 34.]—**Schmidt's t.** A. t. for glucose by the red-brown color its presence produces in a liquid boiled with a solution of iron in ammonia. [B., 270 (a, 38).]—**Schönbein's t.** A. t. for hydrocyanic acid by the blue color its presence gives to a strip of filtering paper when dipped into a ½-per-cent. solution of copper sulphate after having been soaked in a 1-per-cent. solution of tincture of guaiac-resin and dried. [B., 270 (a, 38).]—**Shadow-t.** See *SKIASCOPY.*—**Snellen's t.-lines for astigmatism.** Lines arranged in the form of rays or spokes of a wheel. Their deviation from the vertical is expressed in degrees. [F.]—**T.-letters.** T.-types. See *T.-TYPES.*—**Trommer's t.** A. t. for glycosuria in which the presence of glucose is shown by its redissolving the precipitate formed when 1 or 2 drops of copper-sulphate solution and afterward 4 or 5 c. c. of caustic-soda solution are added to the urine. If the solution is heated, copper hemioxide is precipitated. [B., 270 (a, 38).]—**Weber's t.** A. t. for the hearing power. A vibrating tuning-fork is placed on the vertex of the head, and the observer, with the eyes closed, notes more or less loud by the ear under examination when it is stopped by the finger. [a, 34.]—**Worm-Müller t. for glycosuria.** A filtered solution of 2½ grammes of cupric sulphate in 100 c. c. of distilled water and a filtered solution of 10 grammes of potassium-sodic tartrate and 4 grammes of sodic hydrate in 100 c. c. of distilled water are used. Five c. c. of clear urine is mixed with 25 c. c. of the second and 10 c. c. of the first, and the mixture is boiled; if sugar is present, cuprous hydrate is formed. [a, 34.]—**Zaleski's t.** A. t. for determining whether a dead child has breathed or not, depending on the larger quantity of blood, and therefore of iron, in the lungs, if it has. [“Lancet,” May 12, 1888, p. 938 (a, 50).]

TESTA (Lat.), n. f. *Te'st'a*. Fr., *test, têt.* 1. Of De Candolle and others, a seed-shell; the outer coat of the two integuments covering the seed. 2. Of some authors, see *SPERMATOPHYTES* (1st def.). [a, 35.] 3. Any hard covering; a shell. [a, 48.]—**T. ovi.** *T. ovorum.* See *Egg-shell.*—**T. preparata.** A very fine, tasteless powder made from oyster shells by boiling with water, freeing from foreign substances, washing, drying, finely powdering, rinsing with water, and drying again. [B., 95 (a, 38).]

TESTACEOUS, adj. *Te'st-a'shu's*. Lat., *testaceus* (from *testa*, a shell). Fr., *testacé*. Ger., *hartschalig* (1st def.), *schalenhart* (2d def.), *scherbengebig* (3d def.). 1. Having or consisting of a hard shell. 2. Hard and firm like the shell of a mussel. 3. Having the color of unglazed pottery; pale brownish-yellow. [a, 35.]

TESTES (Lat.), n. m., pl. of *testis* (q. v.). *Te'st'ez(e's)*. 1. The testicles. 2. The posterior pair of the corpora quadrigemina. [I, 6 (K).]

TESTIBRACHIUM (Lat.), n. n. *Te'st'ib-ra'sk(bra'sch'2)u'm(u'm)*. From *testis*, the testicle, and *brachium*, the forearm. Of Spitzka, the anterior brachium of the corpora quadrigemina. [K.]

TESTICLE, n. *Te'st'ib'2k'l*. Lat., *testis*. Fr., *testicule*. Ger., *Hoden*. 1. The sexual gland of the male, the office of which is to produce spermatozoa, and to secrete an glandular body (one on each side) measuring about ½ inch vertically, 1 inch transversely, and ½ inch antero-posteriorly, suspended in the scrotum by its posterior border by the spermatic cord. It is contained within the tunica vaginalis and intimately invested with a fibrous capsule (the tunica albuginea) which divides into numerous compartments containing the seminiferous tubules. Up to about the eighth month of fetal life it is in the abdominal cavity, but then passes down through the

inguinal canal into the scrotum. 2. Any structure furnishing spermatozooids. [L.]—**Displaced t.** Fr. *testicule renoué*. A t. abnormally situated, as within the pelvis or in the inguinal canal. [a, 34.]—**Inverted t.** A condition in which the attitude of the t. in the scrotum is reversed, so that the free surface presents posteriorly, and the epididymis is attached to the anterior instead of the posterior part of the gland. [E. 18.]—**Irritable t.** Neuralgia of the t. [L. 87 (a, 50).]—**Pulpy t.** [Baillie]. Medullary sarcoma of the t. [A, 42.]—**Scrofulous t.** See *Tubercular orchitis*.—**Swelled t.** See *Epididymitis*.—**Symphitic t.** See *Symphitic orchitis*.—**Undescended t.** A congenital malformation in which one or both t.s remain in the abdominal cavity or in the inguinal canal. [E.] Cf. *MONORCHIS* and *CRYPTORCHIS*.

TETRICONDUS (Lat.), n. m. Te'tr-i'k-on'd'u's(u's). From *testis*, the testicle, and *condere*, to conceal. See *CREMASTER* and *CRYPTORCHIS*.

TETRICULAR, adj. Te'tr-i'k'u'l-a'r. From *testiculus*, a testicle. Pertaining to or derived from the testicle. [a, 48.]

TETRICULATE, adj. Te'tr-i'k'u'l-a't. Lat., *tetricalatus* (from *testiculus*, the testicle). Fr., *tetriculaé*. Ger., *hodenförmig*. Consisting of two nearly spherical or ellipsoid bodies in close proximity. The roots of many orchids are examples. [a, 35.]

TETRICULE (Fr.), n. Te'ts-te-ku'l. 1. The testicle. 2. Formerly, also, the ovary. [A, 44.]—**T. de chien**. See *ORCHIS MASCUA*.—**T. femelle**. See *OVARY* (1st def.).—**T. ourlien**. See *PAROTITIC ORCHITIS*.—**T. tuberculeux**. See *TUBERCULAR ORCHITIS*.

TETRICULUS (Lat.), n. m. Te'tr-i'k'u'l(u's)-u's(u's). Dim. of *testis*, the testicle. 1. See *TESTIS*. 2. In the pl., *testiculi*, see *TESTES* (2d def.).—**Tetculic caballinorum in clibano siccatis** [Edinb. Ph., 1699]. Horses' testicles dried in an oven. [A, 69.]—**T. caninus**. See *ORCHIS MASCUA*.—**T. odoratus**. The genus *Spiranthes*. [a, 35.]—**T. venereus**. See *EPIDIDYMITIS* and *ORCHITIS urethralis*.

TESTIS (Lat.), n. m. Te'st-i's. Gen., *testis*. See *TESTICLE*.—**Caput t.** See *EPIDIDYMITIS*.—**Female testis**. An old term for the ovaries.—**Testes minores** [Varolius]. See *PROSTATE*.—**Testes muliebres**. See *Female testes*.

TESTITIS (Lat.), n. f. Te'st-i'ti's. Gen., *-it'idis* (-idis). From *testis*, the testicle. See *ORCHITIS*.

TEST-TYPES, n. pl. Te'st-tips. Fr., *lettres d'essai*. Ger., *Probebuchstaben*. Letters of various sizes for trying the acuteness of vision. The most suitable objects are black letters of the block character on a white background, of sizes so arranged that they are seen plainly by the normal eye under an angle of 5'. The thickness of the lines is exactly one-fifth of the height of the letters, so that the different parts of the letter are included in an angle of 1', while the whole letter is included in an angle of 5'. [F.]—**Burchard's t.-t.** A series of figures formed by groups of circles, which are reproduced by photographs in diminishing sizes until they become dots of extreme minuteness. [F.]—**Green's t.-t.** Types of different sizes forming an arithmetical series, the simplest form of Roman letters being used instead of the ordinary block letters. For testing the vision, the number of the smallest size of letters on the test-card should be less than the number of feet in the available distance. [F.]—**Jaeger's t.-t.** A series of letters and words of varying size, from No. 1, the equivalent of English brilliant, to No. 20, the equivalent of English 8-line. For the use of the illiterate, a cross (+) and horizontal (+) of corresponding size were printed with each of the twenty varieties of type. [F.]—**Snellen's t.-t.** Letters and figures of various shapes and sizes. The formula usually employed is $S = d + D$, where S denotes sight or vision; d , the distance at which a given type is seen under an angle of 5', and D the size of type seen at that distance. $S = 1$ was assumed by Snellen as normal vision. The principles of Snellen's types are: (1) detached, separate letters, black on a white ground, in irregular sequence; (2) the letter large Roman square, the vertical strokes being $\frac{1}{2}$ the horizontal $\frac{1}{2}$ of the breadth of the letter; (3) exclusion of some letters which are much more difficult to distinguish than others; (4) ascending magnitudes from I to C C, the magnitude being proportional to the number; (5) the several magnitudes distinguishable by a sharp eye, in good light, at the distance of as many feet as the number amounts to. [F.]

TESTUDINATIO CRANII (Lat.), n. f. Te'st-u'd(u'd)-j'n-a-(a')/shi'2(t'i')-o. See *CAMAROSTIS*.

TESTUDO (Lat.), n. f. Te'st-u'd(u'd)-o. Gen., *-ud'inis*. From *testa*, a shell. Lit., a tortoise. 1. Of Paracelsus, an atheromatous tumor. [H.] 2. See *FORNIX cerebri*.—**T. cerebri**. See *T.* (2d def.).—**T. scapulae**. See *DORSUM of the scapula*.

TÉT (Fr.), n. Te't. See *TEST* and *TESTA*.

TETANIC, adj. Te't-a'n'i'k. Gr., *τετανικός*. Lat., *tetanicus*. Fr., *tétanique*. Ger., *tetanisch*, *starrkrampfähnlich*. Pertaining to, due to, or resembling tetanus; as a n., an agent capable of causing a tetanus-like state.

TÉTANIE (Fr.), n. Ta-ta'n-é. See *TETANY*.—**T. essentielle**. Tetany without observable cause; non-symptomatic tetany; thought by some to be a manifestation of hysteria. [Zaldivar (a, 18).]

TETANIE (Ger.), n. Tat-a'n-e'. See *TETANUS* and *TETANY*.

TETANIFORM, adj. Te't-a'n'i'f-o'r'm. From *tetanus*, tetanus, and *forma*, form. Fr., *tétaniforme*. See *TETANOID*.

TETANILLA (Lat.), n. f. Te't-a'n(a'n)-i'll(a')-a. Dim. of *tetanus* (q. v.). Of Trousseau, tetany. [a, 34.]

TETANINE, n. Te't/a'n-en. Fr., *tétanine*. Ger., *Tetanin*. A yellow, poisonous alkaloid, $C_{12}H_{11}N_9O_4$, found in cultivations made to isolate the poison of tetanus and in limbs which have been amputated for tetanus. [Briegleb, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cxv, p. 483 (B).]

TETANIUM (Lat.), n. n. Te't-a'n(a'n)-i'2-u'm(u'm). Of Magendie, strychnine. [B, 48, 78 (a, 14).]

TETANIZATION, n. Te't-a'n-i'2-z-a'shu'n. The production of tetanus. [a, 48.]

TETANOCANNABINE, n. Te't-a'n-o-ka'n-a'b-en. An alkaloid, resembling strychnine in its physiological properties, derived from *Cannabis indica*. [B, 81.]

TETANOID, adj. Te't-a'n-oid. Gr., *τετανώδης* (from *tetanus*, tetanus, and *είδος*, resemblance). Resembling tetanus. [D.]

TETANOMOTOR, n. Te't-a'n-o-mo't-o'r. From *tetanus* (q. v.), and *motor* to move, of Heidenhain, a small ivory hammer attached to an induction machine, and arranged so as to deliver a rapid series of blows on a nerve to induce tetanus. [Landois (K).]

TÉTANOS (Fr.), n. Ta-ta'n-os. See *TETANUS*.—**T. alternant**. See *TETANY*.—**T. avec prodromes**. See *Clinic tetanus*.—**T. des nouveau-nés**. See *TRISMUS neonatorum*.—**T. intermittent**. See *TETANY*.—**T. opératoire**. See *Surgical tetanus*.—**T. utérin**. See *TETANUS uteri*.

TETANOTOXINE, n. Te't-a'n-o-to'2-x'en. Fr., *tétanotoxine*. Ger., *Tetanotoxin*. A poisonous ptomaine, $C_{24}H_{41}N$, found in cultures of *Bacillus tetani*. It is less active than tetanine. [Briegleb, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," 1886; "Ann. di chim. e di farmacol.," Sept., 1890, p. 144 (B).]

TETANUS (Lat.), n. m. Te't-a'n(a'n)-u's(u's). Gr., *τετανος*. Fr., *tétanos*. Ger., *T. Starrkrampf*, *Todtenkrampf*, *Tetanie*. 1. An infectious disease characterized by tonic spasms of the muscles with marked exacerbations. It is caused by the *Bacillus tetani*. It may occur either idiopathically or traumatically. It is more common in hot than in temperate climates, and in the colored than in the white race. It begins within fifteen days after an injury, with chills accompanied by stiffness of the neck and jaws that gradually develops into a tonic spasm. Eventually all the muscles are affected. Death may occur from heart failure, asphyxia, or exhaustion. [Osler (a, 34).] 2. A tonically contracted state of a muscle (e. g., when induced experimentally).—**Apyretic t.**, **Benign t.** See *TETANY*.—**Breaking t.** A t. (2d def.) occurring at the moment of breaking the circuit in a muscle through which a galvanic current is passing. [B, 12.]—**Cathodal-closure t.** A t. (2d def.) occurring at the cathode on closure of a galvanic circuit. Symbol, CaCtE, KaCtE, or, in German works, KaStE. [B, 24.]—**Cathodal-duration t.** See *GALVANOTONUS* (2d def.).—**Cathodal-opening t.** A t. (2d def.) taking place at the cathode at the opening of a galvanic circuit. Symbol, CaCoE, or, in German works, KaCoE. [B, 24.]—**Centric t.** Of M. Hall, t. in which the irritating cause was supposed to act directly upon the spinal cord. [a, 34.]—**Cephalic t.** Ger., *Kopft.* Hydrophobic t.; so called because it only occurs in connection with injuries situated in the distribution of the cranial nerves. [a, 34.]—**Clonic t.** Of Juon, t. initiated by spasm of the tissues about the wound. [a, 34.]—**Closing t.** See *Making t.*—**Dysphagic t.** Hydrophobic t.; so called because of the dysphagia. [a, 34.]—**Eccentric t.** Of M. Hall, t. in which the irritating cause is in some part of the body distant from the spinal cord. [a, 34.]—**Electric t.** Tetanoid spasm produced by strong electrization of all the muscles of the body. [a, 34.]—**Expiratory t.** A permanent expiratory effort, the inspiratory impulses being inhibited. It may be produced by stimulating the superior laryngeal nerve. [J.]—**Extensor t.** A general tetanic spasm; so called because in it the extensors act more powerfully than the flexors. [Landois (K).]—**Faradate t.** Electric t. produced by the faradic current. [a, 34.]—**Head-t.** See *Cephalic t.*—**Heat t.** Tetanoid spasm caused by heat. ["Jour. of Phys.," xiii, p. 122 (a, 34).]—**Holotonic t.** See *HOLOTETANUS*.—**Hydrophobic t.** Of Rose, a variety of t., characterized by violent spasms of the pharynx and oesophagus. [a, 34.]—**Hyperalgic t.** Of Frastour, t. in which the pain is very acute. [L, 87 (a, 50).]—**Hysterical t.**, **Imitative t.** A variety of hysteria which simulates t. and is distinguished from it by the age and sex of the individual, absence of pain, occasional clonic spasms, and the occasional intermission of all muscular rigidity. [D, 47.]—**Idiopathic t.** See *Rheumatic t.*—**Infantile t.** See *T. neonatorum*.—**Infectious t.** See *T.* (1st def.).—**Inspiratory t.** See *Inspiratory STANDSTILL*.—**Intermittent t.** See *TETANY*.—**Kochsalszt.** (Ger.). *T.* (2d def.) due to irritation with a solution of common salt. [a, 32.]—**Kopft.** (Ger.). See *Cephalic t.*—**Localized t.** Tetanoid spasm affecting a part or region. [a, 34.]—**Making t.** 1. A t. (2d def.) occurring at the moment of making the circuit in a muscle through which a galvanic current is passing. [B, 12.] 2. See *GALVANOTONUS* (2d def.).—**Malignant t.** T. that rapidly terminates fatally. [a, 34.]—**Obstetrical t.** See *Puerperal t.* and *T. neonatorum*.—**Opening t.** See *Breaking t.*—**Partial t.** See *Localized t.*—**Physiological t.** Of Marey, the contraction of a stimulated muscle that persists as a result of a number of fused contractions. [L, 89 (a, 34).]—**Puerperal t.** See *Uterine t.*—**Pyretic t.** See *T.* (1st def.).—**Remittent t.** [Moxon]. See *TETANY*.—**Respiratory t.** See *Respiratory STANDSTILL*.—**Rheumatic t.** A rare form of t. usually due to exposure to cold. [D.]—**Ritter's t.** See *Breaking t.*—**Secondary t.** The t. induced in a muscle when its nerve is brought in contact with a tetanized muscle. [Landois (K).]—**Spontaneous t.** See *Rheumatic t.*—**Strychnint.** (Ger.). See *T. toxicus*.—**Surgical t.** See *Traumatic t.*—**Symptomatic t.** An affection due to spinal disease in which there are tetanoid spasms. [D, 47.]—**T. anticus**. T. in which there is emprosthotonos. [a, 34.]—**T. apolonic infantum**. See *LARYNGISMUS stridulus*.—**T. completus**. See *T.* (1st def.).—**T. dorsalis**. See *OPISTHOTONUS*.—**T. emprosthotonos**. See *T. anticus*.—**T. endemicus**. T. apparently endemic in certain localities. [A, 319 (a, 34).]—**T. febricitans**. See *FEBRIS tertiana asthmatica*.—**T. hystericus**. See *Hysterical t.*—**T. idiopathicus**. See *Rheumatic t.*—**T. intermittens**. See *TETANY*.—**T. lateralis**. T. with pleurothotonos. [a, 34.]—**T. nascentum**, **T. neonatorum**. T. or trismus occurring in newborn children.—**T. of the head**. See *Cephalic t.*—**T. posticus**,

T. postterganeus. See *Opisthotonus*.—**T. rheumatica.** See *Rheumatica*.—**T. toxicus.** *T. toxicus* induced by overdoses of iux vomica or its preparations. [D, 70.]—**T. trismus.** *T. trismus* in which trismus is a prominent or only symptom. [a, 34.]—**T. universalis.** See *T.* (1st def.).—**T. uteri.** An abnormally strong, steady, and uninterrupted contraction of the uterus on its contents without inflammatory phenomena. [A, 20.] Cf. *Constrictio uteri spastico-inflammatoria*.—**Traumatica t.** *Traumatica t.* T. supervening upon some bodily injury. [a, 34.]—**Tumultuaria t.** Of Heidenhain, tetanoid spasm of a muscle caused by electricity. [1st Jour. of Phys., xiii, p. 132 (a, 34).]—**Uramic t.** *Uramia* with tetanoid spasms. [L, 87 (a, 34).]—**Uterine t.** 1. *T.* occurring during and in consequence of the puerperium; often observed in hot climates. [a, 34.] 2. See *T. uteri*.—**Voluntary t.** See *Physiological t.*

TETANY, n. *Te't-a-ni*. Lat., *tetanilla* (from *tétanos*, tetanus). Fr., *tétanie*. Ger., *Tetanie*. A neurosis affecting especially children and young persons, characterized by attacks of tonic spasm of certain groups of muscles, generally of the limbs, with excessive sensitiveness of the peripheral motor nerves to electrical and mechanical stimuli. [Eulenburg (A, 319).]—**Acute relapsing t., Epidemic t.** Of von Jaksch, an acute infectious *t.*, lasting only a few weeks and occurring among the working classes in Germany. [a, 34.]—**Gutturo-t.** A variety of stammering caused by a tetanoid spasm of the glottis. [a, 34.]—**Rheumatic t.** See *Epidemic t.*

TETATEUS (Lat.), adj. *Te't-a-tet(a)t(e)-e'(a)u's(u)s* (u's), Gr., *tetapates*. Quarant; as a n. f., *tetartus* (Gr., *tetapates* [rvpates]), a quartan fever. [a, 48.]

TETARTOPHYIA (Lat.), n. f. *Te't-a-rt-op'h(i)u's-a*. From *tetartos*, fourth, and *physis*, to produce. Of Sauvages, a quartan fever having short or imperfect intermissions. [a, 34.]

TÊTE (Fr.), n. *Te'te*. See *HEAD*.—**T. de la corne postérieure.** See *CAPUT cornu posterioris*.—**T. de l'épididyme.** See *GLOBUS major of the epididymis*.—**T. dernière.** See *After-coming HEAD*.—**T. du corps strié.** See *CORPUS colliculi striati*.—**T. glénoïdale.** See *Basihyal bone* (1st def.).—**T. restée (ou retenue) la dernière.** See *After-coming HEAD*.

TÊTE (Fr.), n. *Ta-ta*. The act of taking the breast, also the amount of milk taken by the infant at each draught. [A, 385.]

TÉTRELLE (Fr.), n. *Ta-tre*. A nursing-bottle or its nipple; also a sort of breast-pump devised by Tier. [A, 96; L, 41 (a, 14).]—**T. blasphematoire.** A glass cup to fit over the nipple, having near the apex two caoutchouc tubes, one of which the mother can suck, the other the child; used to facilitate feeding for weak infants. [a, 34.]

TEILLA (Lat.), n. f. *Te'te-ill'a*. Fr., *tétille*. Of De Candolle, a genus of the *Saxifragaceae*, consisting of a Chilean annual herb (*culantrillo*) the leaves of which are used as an astringent. [a, 85.]

TETIN (Fr.), n. *T'-ta-n*. A nipple or teat. [L, 41 (a, 14).]

TETINE (Fr.), n. *T'-ten*. The udder. [a, 48.]

TETON (Fr.), n. *T'-to-n*. A woman's breast or nipple. [A, 385 (a, 48).]

TETRABASIC, adj. *Te't-ra's-bas'ik*. Fr., *tétrabasique*. Having a basicity of four, of an acid or acid salt, containing four atoms of replaceable hydrogen. [B.] Cf. *TETRAHYDRIC*.

TETRABENZOPINITE, n. *Te't-ra's-be'nz-o-pin'it*. A compound, $C_6H_5 \begin{smallmatrix} \diagup \\ \diagdown \end{smallmatrix} \begin{smallmatrix} O \\ O \end{smallmatrix} \begin{smallmatrix} \diagdown \\ \diagup \end{smallmatrix} C_6H_5$, of benzoic acid and pinite. [B, 158 (a, 38).]

TETRABRACHIUS (Lat.), n. m. *Te't-ra's-brak'h(bra)ch'us* (u's u's). From *terpa*, four, and *brachion*, the arm. A monster having four arms. [a, 34.]

TETRABROMAMIDOBENZENE, TETRABROMANILINE, n's. *Te't-ra's-brom-a'm-i'd-o-be'nz-en, -a'n'i-l'en*. Fr., *tétrabromaniline*. Ger., *Tetrabromanilin*. A substitution compound of aniline, $C_6H_4Br_4NH_2 = C_6(H, Br, Br, Br, NH_2, Br)_7$. [B, 4.]

TETRABROMBENZENE, n. *Te't-ra's-brom-be'nz-en*. Ger., *Tetrabrombenzol*. A four-atom bromine substitution product of benzene, $C_6H_2Br_4$. [B, 3 (a, 38); B, 4.]

TETRABROMETHENE, TETRABROMETHYLENE, n's. *Te't-ra's-brom-e'th-en, -e'th'i-l'en*. A substance, C_2Br_4 , crystallizing from alcohol as laminae of aromatic odor and burning taste. [B, 3 (a, 38).]

TETRABROMHYDROQUINONE, n. *Te't-ra's-brom-hid-rokw'i'n'on*. Ger., *Tetrabromhydrochinon*. A substitution product, $C_6Br_4(OH)_2$, of hydroquinone. [B, 4.]

TETRABROMIDE, n. *Te't-ra's-brom'i'd* (id). Fr., *tétrabromure*. A bromine compound analogous to a tetrachloride. [B.]

TETRABROMMETAXYLENE, n. *Te't-ra's-brom-me't-a-sz'il-en*. Ger., *Tetrabrommetaxylol*. A substance, $C_8H_6Br_4 = C_6(Br, CH_3, Br, CH_3, Br, Br)$, melting at 341° C. [B, 4.]

TETRABROMMETHANE, n. *Te't-ra's-brom-me'th'an*. Ger., *Tetrabrommethan*. The compound CBr_4 . [B, 4.]

TETRABROMPHthalic ACID, n. *Te't-ra's-brom-tha'ti'k*. An acid, $C_8Br_4(CO_2OH)_2$, crystallizing from boiling water as acicular crystals, from benzene as prismatic crystals. [B, 3 (a, 38).]

TETRABROMPYROCATECHIN, n. *Te't-ra's-brom-pir-o-ka'te'ch'i-n*. Fr., *acide tétrabromo-pyrocatechine*. Ger., *Tetrabrompyrocatechin*. A substance, $C_8Br_4(OH)_2 = C_6(Br, OH, Br, Br, Br, OH)_7$, prepared by the action of an excess of bromine on pyrocatechin. [B, 4.]

TETRABROMQUINONE, n. *Te't-ra's-brom-kw'i'n'on*. Ger., *Tetrabromchinon*. A four-atom bromine substitution product, $C_6Br_4O_2$, of quinone. [B, 4.]

TETRABROMSTEARIC ACID, n. *Te't-ra's-brom-ste-a'r'ik*. Fr., *acide tétrabromo-stéarique*. An acid, $C_{18}H_{32}Br_4O_2$, occurring as large tabular crystals. [B, 3 (a, 38).]

TETRABROMTHIOPHENE, n. *Te't-ra's-brom-thi'o-fen*. A four-atom bromine substitution compound, C_4Br_4S , of thiophene. [B, 3.]

TETRACARBON, n. *Te't-ra's-ka'r'b'o'n*. A radicle containing four atoms of carbon. [B.]

TETRACARPELLARY, adj. *Te't-ra's-ka'r'p'e'l-a-ri'*. Lat., *tetracarpellaris* (from *terpa*, four, and *carpellum*, a carpel). Composed of four carpels. [a, 35.]

TETRACERA (Lat.), n. f. *Te't-ra's(ka'r'k)'e'r-a*. From *terpa*, four, and *céras*, a horn. Fr., *tétracère*. Ger., *Raspelstrauch*. A genus of tropical climbing plants, of the *Dilleniaceae*. [a, 35.]—**T. breyniana.** A Brazilian shrub used like *T. oblongata*. [a, 35.]—**T. oblongata.** A Brazilian species having the properties of *Davillia brasiliensis*. Baths and fumigations of the plant are used in swellings of the limbs and testicles. [a, 35.]—**T. Rheedii.** A Malabar and East Indian species, used as an astringent, especially in aphthae. [a, 35.]—**T. tigarea.** Fr., *tétracère rude*. Red creeper (*liane rouge*) of Guiana and the Antilles. Used as a sudorific and diuretic and in syphilis, intermittent fever, chlorosis, and scurvy. [a, 35.]

TETRACETATE, n. *Te't-ra's'e't-at*. Ger., *Tetracetat*. An acetate containing four molecules of the acetic acid radicle. [B.]

TETRACETOSALICIN, n. *Te't-ra's-e't-o-sa't'i's-i'n*. Ger., *Tetracetatsalicin*. A crystalline body, $C_{12}H_{14}(C_2H_3O_4)_2 \cdot O_7$. [B, 4.]

TETRACETYLENE, n. *Te't-ra's'e't'i-l'en*. See under *ACETYLENE*.

TETRACETYLMORPHINE, n. *Te't-ra's-e't-i-l-mo'r'f'en*. A substitution compound, $C_{16}H_{34}(C_2H_3O)_2N_2O_6$, of morphine, formed by the action of acetic anhydride in excess. [B, 2.]

TETRACHENIUM (Lat.), n. n. *Te't-ra'ch'ka'ch'z-e'(a')e-ni'* (*u'm(u)m*). For deriv., see *Tetra-* and *ACHENIUM*. Fr., *tétrakène*. A fruit formed by four united achenes. [a, 35.]

TETRACHEIRUS (Lat.), n. m. *Te't-ra'ch-ir(ch'e't'i'r)'u's(u)s*. From *terpa*, four, and *cheir*, the hand. A monster having four hands. [a, 34.]

TETRACHLORACETAMIDE, n. *Te't-ra's-klor-a-s'e't'i's-m-i'd* (id). A four-atom chlorine substitution compound, $C_2HCl_4NO = C_2Cl_4O.NHCl$, of acetamide. [B, 2.]

TETRACHLORACETONE, n. *Te't-ra's-klor-a-s'e't-on*. See under *CHLORACETONE*.

TETRACHLORANILINE, n. *Te't-ra's-klor-a'n'i-l'en*. A substance, $C_6H_5NCl_4$, found in three isomeric forms, all occurring as acicular crystals: *asymmetric t.*, $C_6(H, Cl, Cl, Cl, NH_2, Cl)_7$; *symmetric t.*, $C_6(H, Cl, Cl, NH_2, Cl, Cl)_7$; and *adjacent t.*, $C_6(H, Cl, Cl, Cl, NH_2, Cl)_7$. [B, 3 (a, 38).]

TETRACHLOROBENZENE, n. *Te't-ra's-klor-be'nz-en*. Ger., *Tetrachlorbenzol*. A four-atom chlorine substitution compound, $C_6H_2Cl_4$, of benzene. [B, 4.]

TETRACHLORETHANE, n. *Te't-ra's-klor-e'th'an*. Fr., *tétrachlor-éthane*. Ger., *Tetrachloräthan*. A colorless, oily liquid, $C_2H_2Cl_4 = CH_2Cl.CCl_2$. [B, 4.]

TETRACHLORÉTHER, n. *Te't-ra's-klor-e'th'ér*. Ger., *Tetrachloräther*. A thick liquid, $C_2H_2Cl_4O = CCl_2.CHCl.O.C_2H_5$, having a fennel-like odor. [B, 4 (a, 38).]

TETRACHLORÉTHYL, n. *Te't-ra's-klor-e'th'i-l*. A radicle, C_2HCl_4 . [a, 38.]

TETRACHLORÉTHYLENE, n. *Te't-ra's-klor-e'th'i-l-en*. A mobile liquid, C_2Cl_4 . [B, 3 (a, 38).]

TETRACHLORHYDROQUINONE, n. *Te't-ra's-klor-hid-rokw'i'n'on*. A derivative of tetrachlorquinone, $C_6Cl_4(OH)_2$. [B, 4.]

TETRACHLORIDE, n. *Te't-ra's-klor'i'd* (id). Fr., *tétrachlorure*. A compound consisting of an element or radicle united with chlorine in the proportion of four atoms of the latter to a certain definite quantity of the former assumed as the unit of comparison. [B.]

TETRACHLORMETHANE, n. *Te't-ra's-klor-me'th'an*. Ger., *Tetrachlormethan*. An oily liquid, CCl_4 , of ethereal odor. [B, 4.]

TETRACHLORNAPHTHALENE, n. *Te't-ra's-klor-na'p'th'a-l'en*. A crystalline substance, $C_{10}H_6Cl_4$, known in five isomeric forms. [B, 4 (a, 38).]

TETRACHLOROXETHYL, n. *Te't-ra's-klor-o'x-e'th'i-l*. A univalent radicle, C_2HCl_4O . [B.]

TETRACHLOROPHTHALIC ACID, n. *Te't-ra's-klor-tha'ti'k*. The compound $C_2Cl_4(CO_2OH)_2$. [B, 3 (a, 38).]

TETRACHLORQUINOHYDRONE, n. *Te't-ra's-klor-kw'i'n-hid'ron*. The compound $C_6H_2Cl_4O_2 + 2H_2O$. [B, 3 (a, 38).]

TETRACHLORQUINOL, n. *Te't-ra's-klor-kw'i'n'o-l*. The compound $C_6Cl_4(OH)_2$. [B, 3.]

TETRACHLORQUINONE, n. *Te't-ra's-klor-kw'i'n'o-n*. A four-atom chlorine substitution compound, $C_6Cl_4O_2$, of quinone. [B; B, 3 (a, 38).]

TETRACHLORTOLUENE, n. *Te't-ra's-klor-to'l'i-n*. Ger., *Tetrachlortoluol*. A substitution product, $C_6HCl_4CH_3$, of toluene. [B, 3 (a, 38); B, 4.]

TETRACHOTOMOUS, adj. *Te't-ra's-ko't'o'm'u's*. Lat., *tetrachotomus* (from *terpa*, in four parts, and *répave*, to cut). Dividing into four parts or branches. [a, 35.]

TETRACHROMATE, n. *Te't-ra's-krom'at*. A compound of a basic oxide with four molecules of chromium trioxide. Such compounds may also be regarded as salts of a dibasic tetrachromic acid. [B.]

TETRACHROMIC ACID, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-krom}^{\text{t}}\text{ik}$. Fr., *acide tétrachromique*. A hypothetical dibasic acid, $\text{H}_2\text{Cr}_4\text{O}_{13} = 4\text{CrO}_5 + \text{H}_2\text{O}$. [B.]

TETRAOCOCCUS (Lat.), n. m. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ko}^2\text{k}/\text{ku}^3\text{s}(\text{ku}^3\text{s})$. From *terpa*, four, and *coccus* (see Coccus). A micrococcus occurring in clusters divided in two directions, forming groups of four. [a, 34.]
—T. variolus. Of Klebs, the *Streptococcus variolus*. [a, 34.]

TETRACODEINE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-kod}^{\text{t}}\text{-en}$. A base, $\text{C}_{14}\text{H}_{168}\text{N}_2\text{O}_2 = 4(\text{C}_3\text{H}_5\text{N}_2\text{O})_2$, polymeric with codeine, and formed from the latter by the action of phosphoric or sulphuric acid. Administered to animals, it produces vomiting, diarrhoea, and salivation, with great vital depression. [B, 2.]

TETRACRYLIC ACID, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ri}^2\text{t}^{\text{t}}\text{ik}$. 1. An oily liquid, $\text{C}_8\text{H}_{10}\text{O}_2$, smelling somewhat like caproic and valeric acids. 2. Monobasic crotonic acid. [B, 3 (a, 38); B, 93 (a, 14).]

TETRAD, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-d}$. 1. An element having an atomicity of four; a quadrivalent element. [B.] 2. See TETRAOCOCCUS.

TETRADYNAMOUS, adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-di}^2\text{n}^2\text{a}^2\text{m}^2\text{-u}^2\text{s}$. Lat., *tetradynamus* (from *terpa*, four, and *dynamis*, power). Fr., *tétradynane*. Ger., *viermächtig*. Of an androecium, having four long and two short stamens, as in the *Tetradynamia* (a family of the *Cruciflorae*) and the *Tetradynamia* (the 15th class in the Linnean System). [a, 35.]

TETRAEDRAL, adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ed}^{\text{t}}\text{r}^{\text{t}}$. Lat., *tetraedrus* (from *terpa*, four, and *edra*, a seat). Fr., *tétraèdre*. Ger., *tetraedrisch*, *vierfödig*. Having four triangular sides. [a, 35.]

TETRAETHYL, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-eth}^{\text{t}}\text{t}^{\text{t}}$. See TETRETHYL.—**T-tetrazone**. A hydrazine derivative, $(\text{C}_2\text{H}_5)_2\text{N} = (\text{C}_2\text{H}_5)_2\text{N} - \text{N} - \text{N} : (\text{C}_2\text{H}_5)_2$, an oily liquid having a garlicky odor, acting as a base, and forming unstable salts. [B.]

TETRAETHYLAMMONIUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-eth}^{\text{t}}\text{t}^{\text{t}}(\text{ath}^{\text{t}})\text{-i}^2(\text{u}^2)\text{-a}^2\text{m}^2(\text{a}^2\text{m}^2)\text{-mon}^{\text{t}}\text{-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. Fr., *tétréthylammonium*. Ger., *Tetraethylammonium*. A univalent radicle, $\text{C}_8\text{H}_{18}\text{N}^+ = (\text{C}_2\text{H}_5)_4\text{N}^+$, obtained by Hofmann in 1851 by decomposing its iodide; very deliquescent hair-like crystals. It absorbs carbon dioxide from the air, is strongly alkaline, and saponifies fats. Concentrated, it burns the tongue. It is as bitter as quinine, but odorless. It has a caustic action upon the epidermis, and an unctuous alkaline feel between the fingers. It is not decomposed by galvanism. It forms numerous salts, including a sulphate, nitrate, phosphate, carbonate, hydrochloride, hydrobromide, iodide, and bromide, and beautiful double salts with platinum, gold, mercury, etc. It was discovered by T. A. Edison and F. Peterson in 1891 to be a remarkably good solvent of uric acid and its salts, and was first employed in medicine ("N. Y. Med. Jour.," 1893) in rheumatic and gouty affections, both internally and by cataphoresis. [B, 3, 31.]

TETRAFLUORIDE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-flu}^2\text{o}^2\text{-r}^2\text{id}^2(\text{id})$. A fluorine compound analogous to a tetrachloride (q. v.). [B.]

TETRAGONANTHUS (Lat.), n. m. $\text{Te}^{\text{t}}\text{-ra}^3\text{-go}^2\text{n}^2(\text{gon})\text{-a}^2\text{nth}^2(\text{a}^2\text{nth})\text{-u}^2\text{s}(\text{u}^2\text{s})$. From *terpa* yavos, four-cornered, and *anthos*, a flower. A genus of the *Gentianeae*. [a, 35.]—**T. elatior**. A bitter North Siberian herb used as a domestic remedy. [a, 35.]

TETRAGONIA (Lat.), n. f. $\text{Te}^{\text{t}}\text{-ra}^3\text{-gon}^2\text{-i}^2\text{-a}^2$. From *terpa*, four, and *yavia*, an angle. Fr., *tétragone*, *tétragonie*. A genus of the *Ficoideae*. The *Tetragnoniaceae* are the *Ficoideae*; the *Tetragnoniaceae*, a division of that order. [a, 35.]—**T. cornuta**, **T. expansa**, **T. halimifolia**. Fr., *tétragone* (ou *tétragone*) *étalée*, *épinard* de la Nouvelle-Zélande. Ger., *neuseeländischer Spinat*. New Zealand ice-plant (or spinach), found also in Australia, Tasmania, China, Japan, etc.; a culinary herb used as an antiscorbutic and pectoral. [a, 35.]—**T. implexicoma**. Tasmanian ice-plant, Australian (or New Zealand) spinach, Victorian bower spinach; a frutescent species having the same properties as *T. expansa*. [a, 35.]

TETRAGONUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-gon}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. A four-sided figure. [a, 48.]

TETRAGONUS (Lat.), adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-gon}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$. Gr., *τετράγωνος* (from *terpa*, four, and *yavia*, an angle). Four-cornered: as a n. m., a quadrilateral structure.—**T. febris flavæ**. See *Micrococcus versatilis*.—**T. gene** [Cowan]. See *PLATYSSA myoides*.

TETRAGYNIAN, **TETRAGYNOUS**, adj's. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ji}^2\text{n}^2/\text{t}^2\text{-a}^2\text{n}^2\text{-i}^2\text{u}^2\text{s}$. Lat., *tetragnynus* (from *terpa*, four, and *yavi*, a woman). Fr., *tétragynique*. Ger., *neuseeländischer Spinat*. Having four carpels or styles, belonging to *Tetragnynia* (Fr., *tétragynie*), a Linnean class of plants with a gynoceum thus characterized. [a, 35.]

TETRAHIT (Lat.), n. n. indecl. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hi}^2\text{t}$. Fr., *tétrahit*. The genus *Galeopsis*. [a, 35.]

TETRAHYDRATE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-rat}$. See TETRAHYDROXIDE.

TETRAHYDRIC, adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-rik}$. Lat., *tetrahydricus*. Fr., *tétrahydrique*. Ger., *tetrahydric*. Of acids or acid salts, containing four replaceable atoms of hydrogen. [B.]

TETRAHYDRIDE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-rid}^2(\text{id})$. A compound of an element or radicle with four atoms of hydrogen. [B.]

TETRAHYDROCINCHONINE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-si}^2\text{n}^2\text{-kon}^2\text{-en}$. Ger., *Tetrahydrocinchonin*. An amorphous substance, $\text{C}_{20}\text{H}_{19}\text{N}_3\text{O}_4$. [B, 4 (a, 38).]

TETRAHYDROMETAXYLENICACARBONIC ACID, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-me}^2\text{-t}^2\text{-a}^2\text{-zil}^2\text{-en}^2\text{-di}^2\text{-ka}^2\text{-br}^2\text{-o}^2\text{-n}^2\text{-i}^2\text{ik}$. See CAMPHORIC ACID.

TETRAHYDROPARAMETHYLOXYQUINOLINE, **TETRAHYDROPARAQUINANISOL**, n's. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-pa}^2\text{-r}^2\text{-a}^2\text{-me}^2\text{-th}^2\text{-i}^2\text{-o}^2\text{-x}^2\text{-i}^2\text{-kw}^2\text{-i}^2\text{-n}^2\text{-o}^2\text{-l}^2\text{-en}$, $\text{kw}^2\text{-i}^2\text{-n}^2\text{-a}^2\text{-m}^2\text{-i}^2\text{-o}^2\text{-l}^2\text{-en}$. See THALLINE.

TETRAHYDROPAROXYQUINOLINE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-pa}^2\text{-r}^2\text{-o}^2\text{-x}^2\text{-i}^2\text{-kw}^2\text{-i}^2\text{-n}^2\text{-o}^2\text{-l}^2\text{-en}$. A poisonous and antipruritic artificial alkaloid, $\text{C}_8\text{H}_8\text{N}_2\text{O}$, in the form of a very soluble, somewhat sweetish powder. [Ruchard, "Union méd.," Jan. 3, 1886, p. 13.]

TETRAHYDROPHthalic ACID, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-tha}^2\text{-i}^2\text{ik}$. The compound $\text{C}_8\text{H}_8(\text{CO.OH})_2$. [B, 3 (a, 38).]

TETRAHYDROXYMELLITIC ACID, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-pi}^2\text{-o}^2\text{-me}^2\text{-t}^2\text{-i}^2\text{-t}^2\text{-ik}$. The compound $\text{C}_{10}\text{H}_4\text{O}_8$. [B, 4 (a, 38).]

TETRAHYDROXIDE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-hid}^{\text{t}}\text{-ro}^2\text{-x}^2\text{-i}^2\text{-d}^2(\text{id})$. A compound of an element or radicle with four molecules of hydroxyl. [B.]

TETRAIODIDE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-i}^2\text{-od}^2\text{-i}^2\text{-d}^2(\text{id})$. An iodine compound analogous to a tetrachloride (q. v.). [B.]

TETRAISOPROPYLPHOSPHONUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-i}^2\text{-s}^2\text{-o}^2\text{-p}^2\text{-ro}^2\text{-p}^2\text{-i}^2\text{-l}^2(\text{pu}^2\text{l})\text{-fo}^2\text{s}^2(\text{fos})\text{-fon}^2\text{-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. A radicle, $\text{P}(\text{C}_3\text{H}_7)_4$. [B.]

TETRAKYL, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ki}^2\text{l}$. Ger., **T**. A compound consisting of 4 alkyl molecules. [B, 4.]—**T-ammonium**. A univalent radicle, consisting of ammonium in which all 4 hydrogen atoms are replaced by alkyls. [B, 4.]

TETRALLYLARSONIUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-(ra}^3\text{)}\text{-li}^2\text{-l}^2\text{-(lu}^2\text{)}\text{-a}^2\text{-rs}^2\text{-on}^2\text{-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. A univalent radicle, $\text{As}(\text{C}_2\text{H}_5)_4$. [B.]

TETRAMASTHOUS, adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ma}^2\text{-sth}^2\text{-u}^2\text{s}$. Lat., *tetramasthus* (from *terpa*, four, and *mastris*, the breast). Fr., *tétramaze*. Ger., *vierbrüstig*. Having four mammae. [a, 34.]

TETRAMERA (Lat.), n. n. pl. $\text{Te}^{\text{t}}\text{-ra}^3\text{-(ra}^3\text{)}\text{-me}^2\text{-r}^2\text{-a}^2$. From *terpa*, four, and *meros*, a part. Fr., *tétramère*. A division of the *Coleoptera* in which the tarsi are made up of four joints. [a, 48.]

TETRAMEROUS, adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-me}^2\text{-r}^2\text{-u}^2\text{s}$. Of a flower, having four members in a circle. [a, 35.]

TETRAMETAPHOSPHATE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-me}^2\text{-t}^2\text{-a}^2\text{-fo}^2\text{s}^2\text{-at}$. A polymeric derivative of a metaphosphate. [B.]

TETRAMETHYL, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-me}^2\text{-th}^2\text{-i}^2\text{l}$. A chemical group, $(\text{CH}_3)_4$. [a, 38.]—**T-alloxantin**. See **AMALIC ACID**.—**T-ammonium**, **T-paronium**. See the major list.—**T-benzene**. A hydrocarbon, $\text{C}_{10}\text{H}_{14}$, isomeric with ethylbenzene, diethylbenzene, butylbenzene, and cymene. It is itself known in three isomeric forms: *symmetrical-t*, or *durene*, $\text{C}_6(\text{CH}_3)_2\text{CH}_2\text{H.C}_6\text{H}_4\text{CH}_3$, a crystalline solid of camphor-like odor; *asymmetrical-t*, or *isodurene*, $\text{C}_6(\text{CH}_3)_2\text{H.C}_6\text{H}_4\text{CH}_3$, a slightly aromatic liquid; and *adjacent-t*, or *prehnitene*, $\text{C}_6(\text{CH}_3)_2\text{CH}_2\text{CH}_2\text{H.C}_6\text{H}_4$, also a liquid. [B, 4; B, 3 (a, 38).]—**T-benzole acid**. An acid, $\text{C}_8\text{H}_7\text{O}_2$, of which two isomeric varieties are known: *adjacent-t* acid, $(\text{CH}_3)_2\text{C}_6\text{H}_3\text{COOH}$, an oily liquid; and *symmetrical-t* acid, tabular crystals having a silvery lustre. [B, 3 (a, 38).]—**T-cenadiamine**. See **PUTRESCINE**.—**T-ethylene glycol**. See **PINACON** (1st def.).—**T-isovalylene**. See **HEPTENE** (2d def.).—**T-lucothionine**. See **METHYLENE WHITE**.—**T-murexide**. See **MUREXON**.—**T-paraphenylenediamine**.

A substance, $\text{C}_8\text{H}_9\text{N}_3 = \text{C}_6\text{H}_5\text{-N}(\text{CH}_3)_2$, occurring as foliate crystals. It has been used by Wurster to prepare a test paper, *Tetrapapier*, by the deep violet coloring of which the presence of ozone, hydrogen peroxide, or various other substances can be shown. [B, 270 (a, 38).]—**T-phosphonium**. A radicle, $\text{P}(\text{CH}_3)_4$. [B.]—**T-putrescine**. A very poisonous base, $\text{C}_8\text{H}_{17}\text{N}_3 = \text{C}_6\text{H}_5\text{-CH}_2\text{N}_3$, obtained by the substitution of methyl in putrescine. [Briegleb, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cxv, p. 483 (B).]—**T-pyridine**. See **PARVOLINE**.—**T-stibonium**. See the major list.—**T-succinic acid**. A dibasic crystalline acid, $\text{C}_8\text{H}_7\text{O}_4 = \text{C}_6\text{H}_5\text{-COOH}$, isomeric with suberic acid. [B, 4.]—**T-thionine**. See **METHYLENE WHITE**.—**T-thionine chloride**. See **METHYLENE BLUE**.

TETRAMETHYLAMMONIUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-me}^2\text{-th}^2\text{-i}^2(\text{u}^2)\text{-a}^2\text{m}^2(\text{a}^2\text{m}^2)\text{-mon}^{\text{t}}\text{-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. Fr., *tétraméthylammonium*, *triméthylamine*. Ger., **T**. A univalent radicle, $-\text{N} \equiv (\text{CH}_3)_3 = \text{NC}_2\text{H}_5$. [B.]—**T-hydrate**, **T-hydroxide**. Ger., *T-hydrat*. A crystalline body, $\text{N}(\text{CH}_3)_3\text{OH}$, acting as a powerful caustic. [B.]—**T-iodide**. A body, $\text{N}(\text{CH}_3)_3\text{I}$, forming white acicular crystals. [B.]

TETRAMETHYLARSONIUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-me}^2\text{-th}^2\text{-i}^2(\text{u}^2)\text{-a}^2\text{-rs}^2\text{-on}^2\text{-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. A univalent radicle, $\text{As}(\text{CH}_3)_4$. [B.]—**T-hydrate**. A substance, $\text{As}(\text{CH}_3)_3\text{OH}$, occurring as tabular crystals. [B.]—**T-iodide**. A substance, $\text{As}(\text{CH}_3)_3\text{I}$, occurring as colorless prismatic or laminar crystals. It combines with iodine to form t. periodide, $\text{As}(\text{CH}_3)_4\text{I}_2$. [B, 4.]

TETRAMETHYLBISAMMONIUM (Lat.), n. n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-me}^2\text{-th}^2\text{-i}^2(\text{u}^2)\text{-a}^2\text{-rs}^2\text{-on}^2\text{-i}^2\text{-u}^2\text{m}^2(\text{u}^2\text{m}^2)$. A univalent radicle, $\text{Sb}(\text{CH}_3)_4$, analogous to tetramethylammonium. [B.]—**T-hydrate**, **T-hydroxide**. A mass of white, deliquescent crystals, $\text{Sb}(\text{CH}_3)_3\text{OH}$, acting as a powerful base. [B, 3.]—**T-iodide**. Ger., *T-jodür*. A crystalline body, $\text{Sb}(\text{CH}_3)_3\text{I}$. [B, 3.]

TETRAMINE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-m}^2\text{-en}$. See under **AMINE**.

TETRAMOLYBDATE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-mo}^2\text{-l}^2\text{-yb}^2\text{-at}$. A molybdate containing four atoms of molybdenum. [B.]

TETRAMORPHINE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-mo}^2\text{-r}^2\text{-fi}^2\text{-en}$. A base, $\text{C}_{138}\text{H}_{152}\text{N}_8\text{O}_{24}$, polymeric with morphine. [B, 2.]

TETRAMYLENE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-m}^2\text{-i}^2\text{-en}$. A polymeric modification, $\text{C}_{50}\text{H}_{40} = 4\text{C}_5\text{H}_8$, of amylenes, a brownish oily liquid. [B, 2.]

TETRANDROUS, adj. $\text{Te}^{\text{t}}\text{-ra}^3\text{-nd}^{\text{t}}\text{-ru}^2\text{-s}$. Lat., *tetrandrus* (from *terpa*, four, and *andrus*, a n. m.). Fr., *tétrandre*. Ger., *viermännig*. Having four stamens. The *Tetrandria* of Linnaeus are a class of plants having the flowers perfect and t. [a, 35.]

TETRANE, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-n}$. Ger., *Tetran*. Butane; so called because it contains four carbon atoms. [B.]

TETRANEURA (Lat.), n. f. $\text{Te}^{\text{t}}\text{-ra}^3\text{-nu}^2\text{-r}^2\text{-a}^2$. From *terpa*, four, and *neipor*, a nerve. A genus of the *Hemiptera* having wings marked with four nervures. [a, 48.]—**T. ulmi**. An insect that produces nut-galls on the elm. [a, 48.]

TETRANITROARBUTIN, n. $\text{Te}^{\text{t}}\text{-ra}^3\text{-ni}^2\text{-ro}^2\text{-a}^2\text{-rb}^2\text{-u}^2\text{-i}^2\text{-n}$. Ger., **T**. The compound $\text{C}_2\text{H}_5(\text{NO}_2)_4\text{O}_{14}$. [B, 4.]

TETRANITROMETHANE, n. $\text{Te}^2\text{-ra}^3\text{-nit-ro-me}^2\text{'th'an}$. A colorless oily liquid, $\text{C}(\text{NO}_2)_4$. [B. 4.]

TETRANTOXIDE, n. $\text{Te}^2\text{-ra}^2\text{nt-o}^2\text{'x'ld'id}$. A combination consisting of several atoms of one radicle with one fourth of the same number of atoms of oxygen. [B. 3.]

TETRAOPHTHALMUS (Lat.), n. m. $\text{Te}^2\text{-ra}^3\text{-o}^2\text{'th-a}^2\text{'l(mu)s'}$. From *tetra-*, four, and *ophthalmos*, the eye. A monster having four eyes. [A. 34.]

TETROXYANTHRAQUINONE, n. $\text{Te}^2\text{-ra}^3\text{-o}^2\text{'x-i}^2\text{'a}^2\text{'nth-ra}^3\text{-kw'i'n'on}$. A variety of oxyanthraquinone, $\text{C}_{14}\text{H}_4(\text{OH})_4\text{O}_2$, of which two isomeric varieties are known, anthrachryson and rufoplin. [B. 2.]

TETRAPAPIER (Ger.), n. $\text{Te}^2\text{-ra}^3\text{-pa}^2\text{'p-er'}$. See under *TETRAMETHYLparaphenylenediamine*.

TETRAPETALOUS, adj. $\text{Te}^2\text{-ra}^3\text{-pe}^2\text{'t-a}^2\text{'l-u}s$. Lat., *tetrapetalus* (from *tetra-*, four, and *petala*, a leaf). Fr., *tétrapétale*. Ger., *vierblättrig*, *vierblumenblättrig*. Of a corolla, having four petals. The *Tetrapetalas*, *Tetrapetalas* incomplete, and *Tetrapetalas irregulares* are (Hill) each a class of *Herbæ* having as types respectively the genera *Eriotheca*, *Clematis*, and *Lupinus*. The *Tetrapetalas uniformes* are the *Cruciferae* of Adanson. [A. 35.]

TETRAPHARMACON (Lat.), **TETRAPHARMACUM** (Lat.), n's n. $\text{Te}^2\text{-ra}^3\text{-fa}^2\text{'rm-a}^2\text{'k(a)k'}$ -o-n, -u(m'u'm). From *tetra-*, four, and *pharmakon*, a drug. Of the old ph's, a remedy, especially an ointment, composed of four ingredients. [B. 38, 78 (A. 14).]

TETRAPHENOL, n. $\text{Te}^2\text{-ra}^3\text{-fo}^2\text{'n-o}^2\text{'l}$. See *TETROL*.

TETRAPHENYL, n. $\text{Te}^2\text{-ra}^3\text{-fe}^2\text{'n'i}^2\text{'l}$. The chemical group C_6H_5 . [A. 38.] — **Tetthane**. The compound $\text{C}_6\text{H}_4\text{CH}_2\text{CH}_2\text{C}_6\text{H}_4$. [B. 3, 4, 93 (A. 38).] — **Tetethylene**. A hydrocarbon, C_8H_{16} . [B. 4, 93 (A. 38).] — **Tetguanidine**. Fr., *tétrahénilguanine*. Ger., *Tetguanidin*. A monacid base, $\text{C}_8\text{H}_4\text{N}_8 = \text{H}_2\text{N}:\text{C}:\text{N}(\text{C}_6\text{H}_5)_2$. [B. 3 (A. 38); B. 4.] — **T'methane**. The compound $\text{C}_{12}\text{H}_{20} = \text{C}(\text{C}_6\text{H}_5)_4$. [B. 4 (A. 38).] — **T'tetrazone**. A colorless crystalline substance, $(\text{C}_2\text{H}_3\text{N}_3)_2$. $\text{N}:\text{N}(\text{C}_6\text{H}_5)_2 = \text{C}_2\text{H}_3\text{N}_4$. [B. 3 (A. 38); B. 4.]

TETRAPHSOPHIDE, n. $\text{Te}^2\text{-ra}^3\text{-fo}^2\text{'s'f'id'id}$. A phosphorus compound analogous to a tetrachloride (q. v.). [B.]

TETRAPHSOPHIDIMETHYL, n. $\text{Te}^2\text{-ra}^3\text{-fo}^2\text{'s-fo}^2\text{'r-di-me}^2\text{'th'i}^2\text{'l}$. See under *Methyl phosphide*.

TETRAPHSOPHORIC ACID, n. $\text{Te}^2\text{-ra}^3\text{-fo}^2\text{'s-fo}^2\text{'r'i}^2\text{'k}$. A hexabasic acid, $\text{H}_6\text{P}_4\text{O}_{13}$, known only through its salts, the tetraphosphates. [B. 3.]

TETRAPHYLLOUS, adj. $\text{Te}^2\text{-ra}^3\text{-fi}^2\text{'l-u}s$. Lat., *tetraphyllus* (from *tetra-*, four, and *phyllon*, a leaf). Fr., *téraphylle*. Ger., *vierblättrig*. Having four leaves (sepals or petals). [A. 35.]

TETRAPLEURA (Lat.), n. f. $\text{Te}^2\text{-ra}^3\text{-plu}^2\text{'r-a}^2$. From *tetra-*, four, and *πλευρά*, a rib. Fr., *tétrapleure*. 1. Of Bentham, a genus of the *Leguminosae*, formerly referred to *Adenanthra*. 2. Of Parlatore, the genus *Tornabentia*. [A. 35.] — **T. heteropleura**. The only species of T. (1st def.); a West African tree. The seed pulp is used as a detergent. [A. 35.]

TETARGETIC, adj. $\text{Te}^2\text{-ra}^3\text{-e}^2\text{'nt'i}^2\text{'k}$. For deriv. see *Tetra-* and *ARGENTUM*. Containing four atoms of silver in the molecule. [B.]

TETRASCELUS (Lat.), n. n. $\text{Te}^2\text{-ra}^3\text{'s(ra)s'se}^2\text{'l(ke)l-u}s^2\text{'s(u)s}$. From *tetra-*, four, and *σκέλος*, the leg. A monster having four lower extremities. [A. 34.]

TETRASPALOUS, adj. $\text{Te}^2\text{-ra}^3\text{-se}^2\text{'p-a}^2\text{'l-u}s$. From *tetra-*, four, and *sepalum*, a sepal. Having four sepals. [A. 35.]

TETRASPORE, n. $\text{Te}^2\text{-ra}^3\text{-spo}^2\text{'r}$. From *tetra-*, four, and *σπορά*, a spore. Fr., *tétraspore*. A spore belonging to one of the groups that contain four spores each. [A. 35.]

TETRASTER (Lat.), n. m. $\text{Te}^2\text{-ra}^3\text{'st(r)a}^2\text{'st'i}^2\text{'u}^2\text{'r(ar)}$. Fr., *tétra-ster*. From *tetra-*, four, and *αστήρ*, a star. A cross-shaped figure formed in the ovum by the junction of a portion of the rays of four adjacent astra. [A. 15.] See also *Auerbach's VACUOLE*.

TETRASTICHIASIS (Lat.), n. f. $\text{Te}^2\text{-ra}^3\text{'sti}^2\text{'k(sti)ch'2'i}^2\text{'s(a)s'i}^2\text{'s}$. Gen., -*as'os(-as'is)*. From *τετράστιχος*, in four rows. That form of congenital anomaly of the eyelids in which the lashes are arranged in four rows. [F.]

TETRASTICHIOUS, adj. $\text{Te}^2\text{-ra}^3\text{'st'i}^2\text{'k-u}s$. From *tetra-*, four, and *στίχος*, a row. In phylloclax, arranged in four vertical ranks. [A. 35.]

TETRASTOMA (Lat.), n. n. $\text{Te}^2\text{-ra}^3\text{'st(r)a}^2\text{'st'i}^2\text{'o}^2\text{'m(a)s}$. Gen., -*stom'atos(-atis)*. From *tetra-*, four, and *στόμα*, the mouth. An entozoon of the order *Trematoda*. [L. 16.] — **T. renale**. A species found rarely in the urine. It is ovoid, about $\frac{1}{4}$ inch long, and provided with four suckers at the caudal extremity. [L. 16.]

TETRASULPHIDE, n. $\text{Te}^2\text{-ra}^3\text{-su}^2\text{'l'f'id'id}$. A sulphur compound analogous to a tetrachloride (q. v.). [B.]

TETRAPELLURITE, n. $\text{Te}^2\text{-ra}^3\text{'te}^2\text{'l'u}^2\text{'r-it}$. A compound of a normal tellurite with tellurium dioxide, containing four atoms of tellurium. [B. 3.]

TETRATHIONIC ACID, n. $\text{Te}^2\text{-ra}^3\text{'thi-o}^2\text{'n'i}^2\text{'k}$. A dibasic acid, $\text{H}_2\text{S}_4\text{O}_6$. [B. 3.]

TETRAOMIC, adj. $\text{Te}^2\text{-ra}^3\text{'o-m'i}^2\text{'k}$. Lat., *tetra-atomicus* (from *tetra-*, four, and *άτομος*, uncut). Fr., *tétratomique*. Ger., *vieratomig*. Containing four atoms; of a compound, containing four atoms of replaceable hydrogen; of a radicle, having its combining capacity saturated by union with four hydrogen atoms. [B.]

TETRAVALENT, adj. $\text{Te}^2\text{-ra}^3\text{'va}^2\text{'l-nt}$. See *QUADRIVALENT*.

TETRETHYL, n. $\text{Te}^2\text{-re}^2\text{'th'i}^2\text{'l}$. Fr., *tétréthyle*. Ger., *Teträthyl*. The chemical group $(\text{C}_2\text{H}_5)_4$. [A. 38.] — **T. benzene**. A

liquid, $\text{C}_8\text{H}_{18}(\text{C}_2\text{H}_5)_4$, of slight aromatic odor. [B. 3 (A. 38).] — **T'-ethylenediamine**. The compound $\text{C}_2\text{H}_4\text{N}_2$. [B. 4.] — **T'phosphonium**. A radicle, $\text{P}(\text{C}_2\text{H}_5)_4$. [B.] — **T'urea**. See under *ETHYLUREA*.

TETRETHYLARSONIUM (Lat.), n. n. $\text{Te}^2\text{-re}^2\text{'th-i}^2\text{'l(u)l'}$ -*ars-on'i}^2\text{'u}^2\text{'m(u)m}. A univalent radicle, $\text{As}(\text{C}_2\text{H}_5)_4$. [B.] — **T. chloride**. A substance, $\text{As}(\text{C}_2\text{H}_5)_4\text{Cl}+4\text{H}_2\text{O}$, occurring as deliquescent crystals. [B.] — **T. hydrate**. A deliquescent white mass, $\text{As}(\text{C}_2\text{H}_5)_4\text{OH}$. [B.] — **T. iodide**. The compound $\text{As}(\text{C}_2\text{H}_5)_4\text{I}$. [B.]*

TETRETHYLENE, n. $\text{Te}^2\text{-re}^2\text{'th-i}^2\text{'l-en}$. A radicle, $(\text{C}_2\text{H}_4)_4 = \text{C}_8\text{H}_{16}$. [B.] — **T. alcohol**. **T. trioxydihydrate**. A liquid, $(\text{C}_2\text{H}_4)_4\text{O}_2(\text{OH})_2$. [B. 2.]

TETRETHYLIC, adj. $\text{Te}^2\text{-re}^2\text{'th-i}^2\text{'l-i}^2\text{'k}$. Containing four molecules of ethyl. [B.]

TETRETHYLSTIBONIUM (Lat.), n. n. $\text{Te}^2\text{-re}^2\text{'th-i}^2\text{'l(u)l'}$ -*stib-on'i}^2\text{'u}^2\text{'m(u)m}. A univalent radicle, $\text{Sb}(\text{C}_2\text{H}_5)_4$. [B.] — **T. iodide**. The compound $\text{Sb}(\text{C}_2\text{H}_5)_4\text{I}$. [B. 4.]*

TETRINIC ACID, n. $\text{Te}^2\text{-ri}^2\text{'n'i}^2\text{'k}$. A monobasic crystalline acid, according to Demogay, $\text{C}_4\text{H}_4\text{O}_2$ or $(\text{C}_2\text{H}_3\text{O})_2$; according to more recent observations, $\text{C}_8\text{H}_4\text{O}_2 = \text{C}_2\text{H}_3\text{O} \cdot \text{COOH}$. [B. 3.]

TETROL, n. $\text{Te}^2\text{'r-o}^2\text{'l}$. Fr., *tétrol*. Ger., *T*. A colorless liquid, $\text{C}_8\text{H}_{10}\text{O}$, of peculiar odor, obtained by the distillation of the salts of tetrachloric acid, and also found in the distillate from pine-wood. [B. 3, 4.]

TETROLIC ACID, n. $\text{Te}^2\text{-ro}^2\text{'l-i}^2\text{'k}$. A monobasic acid, $\text{C}_4\text{H}_4\text{O}_2 = \text{CH}_3\text{C} \equiv \text{C} \cdot \text{CO} \cdot \text{OH}$. [B. 3 (A. 38); B. 4.]

TETRONAL, n. $\text{Te}^2\text{'r-o}^2\text{'n-a}^2\text{'l}$. A substance, $\text{C}_8\text{H}_8\text{N}_2 \cdot \text{C} \cdot \text{SO}_2 \cdot \text{C}_8\text{H}_8$, occurring as shining tabular crystals. It acts as a hypnotic. [B. 270 (A. 38).]

TETROXIDE, n. $\text{Te}^2\text{-ro}^2\text{'x'ld'id}$. Fr., *tétroxyde*. An oxygen compound analogous to a tetrachloride (q. v.). [B.]

TETROXYBENZOIC ACID, adj. $\text{Te}^2\text{-ro}^2\text{'x-i}^2\text{'be}^2\text{'nz-o}^2\text{'i}^2\text{'k}$. Benzoic with the addition of four atoms of oxygen. [B.]

TETROXYCHLORIC ACID, n. $\text{Te}^2\text{-ro}^2\text{'x-i}^2\text{'klor'i}^2\text{'k}$. See *PERCHLORIC ACID*.

TETRURET, n. $\text{Te}^2\text{-ru}^2\text{'r-et}$. A substance, $\text{C}_2\text{H}_7\text{N}_3\text{O} = \text{H}_2\text{N}-\text{CO}-(\text{NH})-\text{CO}-(\text{NH})-\text{CO}-(\text{NH})-\text{CO}$ formed from biuret by decomposition in hydrochloric acid gas. [B.]

TETRYL, n. $\text{Te}^2\text{'r-i}^2\text{'l}$. See *BUTYL-Hydrated t. oxide*, *T. alcohol*, *T. hydrate*. See *BUTYL alcohol*.

TETRYLENE, n. $\text{Te}^2\text{'r-i}^2\text{'l-en}$. Fr., *tétrylène*. See *BUTYLENE*. — **T'dicarboxic** (or **T'dicarboxylic**) acid. The compound $\text{C}_6\text{H}_4(\text{CO} \cdot \text{OH})_2$. [B. 3 (A. 38).]

TETRYLIC, adj. $\text{Te}^2\text{'r-i}^2\text{'l-i}^2\text{'k}$. Fr., *tétrylque*. Containing or derived from tetryl. [B.] — **T. alcohol**. See *BUTYL alcohol*.

TETTER, n. $\text{Te}^2\text{'t-u}^2\text{'r}$. Ger., *étters*. A-S., *teter*, *tetr*. Lat., *serpigo*, *herpes*. Fr., *dartre*. Ger., *Zitter*, *Zittermal*, *Flechte*. A popular term for various common skin eruptions, especially the different forms of eczema. [G.] — **Brawny t.** See *Sporraea capitis*. — **Crusted t.** See *ECZEMA impetiginodes*. — **Dry t.** Dry or scaly eczema; eczema siccum, eczema squamosum. [G.] — **Eating t.** See *LUPUS* (2d def.). — **Honeycomb t.** See *ECZEMA impetiginodes*. — **Humid t.** See *ECZEMA*. — **Milky t.** See *CRUSTA lactea*. — **Moist t.** See *ECZEMA*. — **Pustular t.** See *IMPETIGO* (5th def.). — **Running t.** Eczema, especially eczema impetiginodes. — **Scaly t.** See *ECZEMA squamosum* and *PSORIASIS* (1st def.).

TETTER, v. tr. $\text{Te}^2\text{'t-u}^2\text{'r}$. To affect with tetter.

TETTERWORT, n. $\text{Te}^2\text{'t-u}^2\text{'r-wu}^2\text{'rt}$. See *CHELIDonium majus* (1st def.) and *Sanguinaria canadensis*.

TETY, n. A pustulo-crustaceous affection of the skin, chiefly about the nostrils and the mouth, among the natives of Madagascar, all of whom are said to have it sooner or later, but no one more than once. [Lacaze, "Jour. de méd. de Paris," June 17, 1882, p. 725.]

TEUCRIN, n. $\text{Teu}^2\text{'k-r'i}^2\text{'n}$. 1. A non-nitrogenous substance obtained from *Teucrium fruticans*. ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 128 (A. 50).] 2. Of Mosetig, an aqueous extract prepared from *Teucrium scordium*. Injected subcutaneously, it produces a sudden rise of temperature. T. injections have been used for cold tuberculous abscesses, fungous adenitis, actinomycosis, and lupus. ["Med. Record," March 4, 1893, p. 274 (A. 50).]

TEUCURIUM (Lat.), n. n. $\text{Teu}^2\text{'k-r'i}^2\text{'u}^2\text{'m(u)m}$. Ger., *Teukerion* (from *Teukos*, Teucer, king of Troy). Fr., *germandrée*. Ger., *Gamander*; *Gamander*; a genus of the *Ajaceae*. [A. 35.] — **T. aureum**. Ger., *goldgelber Gamander*. Golden germander (or poly) of southern Europe. It and the related species *T. flavescens* were formerly official as *herba polii lutei*. [A. 35.] — **T. botrys**. Fr., *botrys*, *germandrée femelle*. Ger., *Traubengamander*. Jerusalem oak, the jagged germander of middle and southern Europe; a balsamic, aromatic species (formerly official as *herba botrys thamedrioides*), used as a tonic, stimulant, and febrifuge. [A. 35.] — **T. campanulatum**. Bell-shaped germander; a procumbent, smooth, square-stemmed herb sometimes confounded with other species of the genus. It is found in moist places in the Levant, Balearic Islands, Spain, Sicily, etc. [B. 35.] — **T. canadense**. American germander, wood-sage. It has a garlic-like odor, and is used like *T. scordium*. [A. 35.] — **T. capitatum**. Fr., *germandrée en tête*. Ger., *köpfiger Gamander*. A European and Siberian shrub. The herb, *herba polii montani* (*Anglorum*), is used like that of *T. polium*, of which Koch regards this as a variety. [A. 35.] — **T. chamædrys**. Fr., *calamendrier*, *chêneau*, *chénétte*, *germandrée officinale*, *herbe des fièvres*, *petit chêne*, *sauge amère*, *thériaque d'Angleterre*. Ger., *gemeiner* (oder *ächter*, oder *edler*) *Gamander*, *Erdwurmkrautkraut*, *Frauenbiss*, *Bergscholderkraut*. Wall (or

wild) germander, the *χαμαίδρις* of Dioscorides; an undershrub with a bitter, aromatic, slightly astringent taste, growing in southern and central Europe. The leaves and tops (*herba chamædryos*, seu *teucrii chamædryos*) were formerly used in uterine diseases, and as an alternative and febrifuge, etc. [a. 35.]—*T. creticum*. Ger., *cretischer Gamander*. A shrub of Candia, Egypt, and the Orient; perhaps the *κακόν* trepo of Dioscorides. The leafy flowering tops, *summitates polii cretici* (seu *polii angustifolii*, seu *rosmarini stachadis facies*), were formerly used like those of *T. polium*. [a. 35.]—*T. flavescens*. Ger., *gelblicher Gamander*. A species growing in southern Europe, especially southern France, used like *T. aureum*. [a. 35.]—*T. flavum*. Fr., *germandrée* (ou *pouliot*) *jaune*. Ger., *gelber Gamander*. A fragrant, balsamic, bitter shrub found in southern Europe. The herb, *herba teucrii flavi*, was formerly used like that of *T. chamædryos*. [a. 35.]—*T. fruticosum*. Ger., *strauchiger Gamander*. Tree-germander of northern Africa and parts of southern Europe. The Neapolitans, who call it *erba di Santo Lorenzo*, used it as a vulnerary. [a. 35.]—*T. inflatum*. Fr., *germandrée renflée*. A species found in the Antilles, having the properties of *T. capitatum*. [a. 35.]—*T. iva*. See *AUGUA IVA* and *AUGUA chamæpitys*.—*T. lucidum*. 1. Shining germander; a very smooth herbaceous species with tall, erect, square stems, crimson flowers in whorls, and shining leaves, closely allied to, but distinct from, *T. chamædryos*. 2. Of Sibthorp. *T. flavum*. [a. 35.]—*T. maritimum*. *T. marum*. Fr., *germandrée maritime*, *marum vrai*, *herbe au chat*. Ger., *Katzengamander*, *Katzenkraut*, *Moschuskraut*, *Mastichkraut*, *Mastizkraut*. Catthyme, Syrian herb-mastic; a plant of southern and middle Europe, Egypt, and Asia Minor, containing a peculiar stearoptene and having bitter, aromatic, stimulant properties. The flowering tops, *herba* (seu *summitates*) *mari veri* (seu *mari syriaci*), *herba Cyriaci* (seu *Syriaci*, seu *norisii*, seu *montanae*), *fruticulus teucrii mari foridus*, were formerly used in hysteria, amenorrhoea, nervous prostration, etc., and more recently, in the form of syrup and confection, in spasmodic cough. It was formerly substituted for lavender flowers in the preparation of pulvis asari compositus. It acts as an antispasmodic and emmenagogue. [a. 35.]—*T. massiliense*. Sweet-scented (or apple-scented) germander of Mediterranean regions. All parts are clothed with a soft, velvet-like pubescence, and exhale, if touched, a peculiar spicy odor compared to that of mallow apples. [a. 35.]—*T. montanum*. Fr., *germandrée de montagne*, *thym blanc*. Ger., *Berggamander*, *Bergpolei*. An undershrub of middle and southern Europe. The leaves and tops, *herba* (seu *summitates*) *polii montani* (*Germanorum*), were formerly used like those of *T. polium*. [a. 35.]—*T. officinale*. See *T. chamædryos*.—*T. palustre*. See *T. scorodum*.—*T. polium*. Ger., *Polei-Gamander*, *Bergpolei*. The *καδή* of the Arabs, probably the *πύλον* of Dioscorides, cat-thyme, huiwort, poly germander; a Mediterranean species, with aromatic leaves and flowering tops, *herba* (vel *summitates*) *polii montani* (seu *montani saliorum*, seu *monspeliaci*, seu *maritimi*, seu *erecti*), were formerly used in catarrh and asthma and in aromatic fomentations, and more recently, it is said, successfully, in cholera. [a. 35.]—*T. pyrenaicum*. Pyrenean germander; a creeping or diffusely branched species with orbicular, crenate, hairy leaves, and with flowers in dense tufts variegated with pale-yellow and purple. [a. 35.]—*T. scorodoides*. A species growing in southern Europe, having the properties of *T. scorodum*. [a. 35.]—*T. scorodum*. Fr., *germandrée scorodum*, *chamarras*, *germandrée aquatique* (ou *d'eau*). Ger., *Knoblauchgamander*, *Lachenknoblauch*, *Wasserlauch*, *Wasserbengel*, *Skordien-Gamander*, *Skordienkraut*. Garlic- (or water-) germander of Europe; a species with a garlic-like smell and a bitter, somewhat pungent taste. It is not now used, but the entire plant (excluding the root), was formerly employed as a tonic, diaphoretic, and antelmintic, as an antidote, and as an application to foul ulcers, under the name *herba scorodii vulgaris*, seu *nostrati*, *herba chamædryos aquaticae* (seu *palustris*). [a. 35.]—*T. scorodonia*. *T. silvestre*. Fr., *germandrée des bois*, *baume* (ou *sauge*, ou *germandrée sauvage*, *fausse sauge des bois*, *fauz chamarras* (ou *scorodum*). Ger., *gemeine Skordonia*, *wilde Salbei*, *Ackersalbei*, *Ackersalbeikraut*. Hind-head, mountain- (or garlic- or wood-) sage, wood-germander of western and southern Europe; formerly official as *herba scorodonia* (seu *salvia agrestis*, seu *salvia silvestris*), and used like *T. scorodum*, though less active. [a. 35.]—*T. thea*. Fr., *germandrée thé*, *thé commun des Cochinchinois*. Cochinchina tea; used as a digestive. [a. 35.]—*T. tomentosum*. A variety of *T. montanum*. [a. 35.]—*T. verum*. See *T. fruticosum*.

TEUFELSBUT-KIELKOPF (Ger.). n. *Toif'cels-brut-kelkopf*. The translation of an ancient term for the fleshy or blood mole.

TEVETOSIN, n. *Te've-et-or'in*. See **THEVETOSIN**.

TEXTURAL, adj. *Te'xt'u'ál*. From *textura*, texture. Fr., *t. Ger., geweblich*. Pertaining to the structure or texture of a tissue or part. [J.]

TEXTURE, n. *Te'xt'u'ál*. Gr., *ίστός*. Lat., *textura* (from *texere*, to weave). Fr., *t. Ger., Textur*. Bau. 1. See **TISSUE**. 2. The arrangement of the elements of the various forming tissues and organs. The t is also dependent on the character of the structural elements. [J. 16, 21, 23.] 3. Of mineral waters, the quality which causes them to impart a sensation of smoothness or roughness to the skin on its contact with them. [B. 5.]—**Alimentary t.** That portion of a body which is affected by the process of digestion; the digestible portion of a substance. [K.]

TEXTUS (Lat.), n. m. *Te'xt'u's* (u's). Gen., *te'xt'us*. From *texere*, to weave. See **TISSUE**.—**T. cellularis intermedius** (seu *laxus*). The part of the areolar tissue which does not penetrate the various organs. [J. 16.]—**T. cellularis parenchymalis** (seu *slipatus*). That part of the areolar tissue which penetrates the various organs and gives the proper tissue-elements support and connection. [J. 16.]—**T. cellularis strictus**. Connective tissue

which forms envelopes for various organs. [J. 16.]—**T. fibrosi**. See **STROMA** (1st and 2d def.).—**T. organicus**. See **T. cellularis parenchymalis**.—**T. papillaris**. See **CORPUS papillare**.

THÆRIA (Lat.), n. f. *Ther'* (tha'²e'r):i²-a². See **RADESYGE**.

THAL (Ger.), n. *Tha'l*. See **VALLECULA Reilii**.

THALAMENCEPHALON, n. *Tha'l-a'm-e'n-se'ff'a'l-o'n*. From *θάλαμος*, an inner room, and *ἐγκεφαλος*, the brain. Ger., *Zwischenhirn*. That portion of the embryonic brain which includes the region of the third ventricle, the primary ocular vesicles, and the infundibulum. [A. 5.]

THALAMIFLORAL, **THALAMIFLOUS**, adj's. *Tha'l-a'm-i²-fl'o'r'ál*, *-fl'o'r'u's*. Lat., *thalamiflorus* (from *θάλαμος*, an inner chamber, and *flos*, a flower). Fr., *thalamiflore*. Ger., *bodenblüthig*, *fruchtbodenblüthig*. Having the petals and stamens inserted upon the receptacle, as in the *Thalamiflora* (Fr., *thalamiflores*), which are De Candoille's first subclass of dicotyledons. The *Thalamiflora* (of Dumortier, an order of the *Bitegmia*) comprise the *Nymphaeaceae*, *Hydrophyllaceae*, etc. [a. 35.]

THALAMIUM (Lat.), n. n. *Tha'l(tha'l)-a'm(a'm)-i²-u's(m)u'm*. From *θάλαμος*, an inner chamber. Fr., *thalamion*. Ger., *Fruchtkörper* (1st def.). In lichens, (1) the thecium; (2) an organ of the apothecium, consisting of erect colorless threads, arising from the hypothecium and containing protoplasm; they press upon the theca and thus assist in expelling the spores. [a. 35.]

THALAMUS (Lat.), n. m. *Tha'l(tha'l)-a'm(a'm)-u's(u's)*. Gr., *θάλαμος*. Fr., *thalamé*. Ger., *T.* 1. See *Optic t.* 2. In botany, a receptacle; of some authors, a calyx. [a. 35.]—*Optic t.* Fr., *couche optique*. Ger., *Sehhügel*. An oval, grayish mass seen on the floor of the lateral ventricle, after removing the fornix and velum interpositum. It is bounded anteriorly and externally by the corresponding corpus striatum, from which it is separated by the tænia semicircularis. To its inner side lies the third ventricle of which it forms the lateral wall. Its lower surface forms the covering of the descending cornu of the lateral ventricle. Posteriorly it ends in two rounded masses, the geniculate bodies. The optic t. consists essentially of gray matter, with a thin external covering of white. In its interior are several distinct ganglionic masses or nuclei. [I. 15 (K).] Cf. *MEDIAN CENTRE of Luys*, *T. corporum cavernosorum*. See *Ceras penis*.—*T. fasciæ*. Ger., *Haube*. Certain nerve-fibres of the tectum which enter the optic thalamus. [I. 17 (K).]—*T. fructificationis*. Ger., *Befruchtungsstühl*. 1. The torus of a flower. 2. The hymenium of *Fungi*. 3. The hypothecium of lichens. [a. 35.]—*T. nervi optici* (seu *optico-rum*). *T. opticus*. See *Optic t.*—*T. regalis*. See *PERICARDIUM*.—*T. wurzel des Tractus opticus* (Ger.). Those fibres of the optic tract which may be traced directly to the optic t. [I. 6 (K).]

THALAMUSTIEL (Ger.), n. *Tha'l-a'm-us-stiel*. The reflected portion of the anterior pillar of the fornix, which turns upward from the corpora albicantia to enter the corresponding optic thalamus. [I. 17 (K).]—*Unterer T.* The inferior peduncle of the optic thalamus. [I. 17 (K).]—*Vorderer T.* The anterior peduncle of the optic thalamus. [I. 10 (K).]

THALASSIOPHYTES, n. pl. *Tha'l-a's-i²-o-fiz*. Lat., *thalassophyta*, *thalassophyta* usom *θαλασσιος*, marine, and *φύτον*, a plant). Fr., *t. Marine algæ*. [a. 35.]

THALASSOPHOBIA (Lat.), n. f. *Tha'l(tha'l)-la's(la's)-o(o)-fob(tho'b)²-i²-a²*. Fr., *thallasphobie*, the sea, and *φόβος*, panic fear. A morbid dread of the sea. [a. 34.]

THALASSOTHÉAPIE (Fr.), **THALASSOTHERAPIE** (Ger.), n's. *Tha'l-a's-o-tha's-o-pi-e*, *-pe'*. From *θάλασσα*, the sea, and *θεραπεία*, treatment by means of residence near the sea, sea-bathing, or a sea-voyage. [A. 319 (a. 21).]

THALGUT (Ger.), n. *Tha'l'gut*. A place in the canton of Berne, Switzerland, where there are saline, chalybeate, and gaseous springs. [L. 30, 41, 49 (a. 14).]

THALICTRINE, n. *Tha'l-i²-k'tren*. An alkaloid found in *Thalictrum macrocarpum*, giving that plant its toxic properties. It acts as a cerebro-spinal poison. [Dousmans (B).]

THALICTRUM (Lat.), n. n. *Tha'l(tha'l)-i²-k'tru'm(ru'm)*. Gr., *θάλκτρον*, *θαλκίτρον*. Fr., *pigamon*. Ger., *Wiesenraute*. Meadow-rue; a genus of ranunculaceous herbs. [a. 35.]—*T. anemonides*. See *ANEMONE thalictroides*.—*T. angustifolium*. *T. angustissimum*. A diuretic European species. [a. 34.]—*T. aquilegifolium*. *T. aquilegium*. *T. atro-purpureum*. Fr., *pigamon à feuilles d'ancolie*, *colombine plumée* (ou *plumacée*). Feathered (or tufted) columbine, Spanish-tuft, columbine meadow-rue; an Alpine species having the properties of *T. angustifolium*. [a. 35.]—*T. confertum*. *T. Cornuti*. Fr., *pigamon du Canada*. Canadian tall meadow-rue; a North American species, regarded as a powerful alexipharmic. [a. 35.]—*T. flavum*. Fr., *pigamon* (*des prés*), *fausse rhubarbe*, *piéd de Milan*, *rhubarbe des pauvres* (ou *des paysans*), *thalictro commun*. Ger., *gelbe Wiesenraute*, *Wasserraute*, *Feldrhabarber*, *Feldraute*. False (or poor man's) rhubarb, yellow-flowered (or maiden-hair, or small) meadow-rue of Europe and northern Asia. The root and herb, *radix et herba thalictri* (seu *rhabarbari pauperum*, seu *rhei pauperum*, seu *pseudo-rhabarbari*, seu *ruta pratensis*), are diuretic and purgative, and color the secretions yellow. The root is used in jaundice and as a febrifuge, and, together with the herb, as an application in cœcagia and backache. [a. 35.]—*T. foliolosum*. An East Indian species. The root is tonic and aperient, and is used for atonic dyspepsia and as a febrifuge; it is sometimes substituted for opium-root. [a. 35.]—*T. macrocarpum*. A species found in the Pyrenees. The root contains a neutral principle (macrocarpin) and a poisonous principle (thalictrine). [a. 35.]—*T. mexicanum*. 1. Of Hernandez, a species the root of which is used in ophthalmia and as a diuretic. Cf. *T. revolutum*. 2. Of De Candoille, an imperfectly known Mexican species, used like the preceding. [a. 35.]—*T. revolutum*. Ger., *umgerollte*

—**T. de la Terre-Neuve, T. rouge.** See *GAULTHERIA procumbens*. —**T. suisse.** 1. See *FALLTIANE* (2d def.). 2. Of the Fr. Cod. See *SPECIES VULNERARIAE*. —**Tisane de t.** [Fr. Cod.]. An infusion of 10 parts of tea-leaves in 1,000 of boiling water, strained after half an hour. [B, 95 (a, 38).]

THEA (Lat.), n. f. The(*the*)²/a². Fr., *thé*. Ger., *Theestrauch* (2d def.). 1. See *TEA*. 2. The tea-tree (or shrub); a genus of the *Ternstroemiaceae*, included by Bentham and Hooker in the genus *Camellia*. The *Theaceae* (of De Candolle, an order of plants including *T. Ternstroemia*, and *Gordonia*) are included by Bentham and Hooker in the tribe *Gordoniaceae*. [a, 35.] 3. The dried leaves of *T. viridis* [Aust. Ph., 1st ed. Hung. Ph.], of *T. chinensis* [Fr. Cod., Sn. Ph.], [B, 95 (a, 39).] —**Plos theae.** Ger., *Blumenthee, Kaiserthee*. The choicest variety of green tea. [a, 35.] —**T. assamensis, T. assamica.** Assam tea-tree, a form of *Camellia t.*, considered the parent species of all the cultivated varieties of the tea-plant. [a, 35.] —**T. chinensis.** See *CAMELLIA t.* —**T. helvetica.** See *SPECIES VULNERARIAE*. —**T. hungarica, T. mexicana.** See *CHENOPODIUM AMBROSIOIDES*. —**T. nigra.** Black tea. [a, 35.] —**T. romana, T. silesiaca.** See *CHENOPODIUM AMBROSIOIDES*. —**T. sinensis.** See *CAMELLIA t.* —**T. viridis.** 1. A form of *Camellia t.* [a, 35.] 2. See *GREEN TEA*.

THEAL, adj. The'l. Resembling *Thea*; belonging to the *Theales*, which are Lindley's t. alliance (Lat., *nixus thealis*) of the *Carycoaceae*, consisting of the *Ternstroemiaceae*. [a, 35.]

THEATRE, n. The'a²-tr'. Gr., *θέατρον* (from *θεᾶσθαι*, to look on). Lat., *theatrum*. Fr., *théâtre*. Ger., *Theater*. See *AMPHITHEATRE*.

THEBAIC, adj. Theb-a²/ik. Lat., *thebaicus* (from *Θήβαι*, Thebes, a city of Egypt). Fr., *thébaïque*. Pertaining to, composed of, or containing opium. [a, 17.]

THEBAINE, n. Theb'a²-en. Lat., *thebaina, thebainum* [Russ. Ph.], Fr., *thébaïne*. Gen., *Thebaica*. A very poisonous alkaloid, C₁₅H₁₇NO₄, found in opium, forming colorless, shining, foliate or prismatic crystals or a white crystalline powder, having no taste. The symbol Tb is sometimes used for it. [B, 93, 95, 118, 270 (a, 14, 38).]

THEBAÏSME (Fr.), n. Ta-ba²-es-m'. Opium poisoning. [B, 93 (a, 14).]

THEBENINE, n. Theb'en²-en. Fr., *thébéine*. Ger., *Thebenin*. An amorphous base isomeric with and obtained from thebaine. [B, 93 (a, 14).]

THEBOLACTIC ACID, n. Theb'o-l-a²/k'ti²k. Fr., *acide thébolactique*. A variety of lactic acid found in opium; identical with ethylenelactic acid. [a, 3.]

THECA (Lat.), n. f. Thek(thak)²/a². Gr., *θήκη* (from *τιθέναι*, to place). Fr., *thèque*. Ger., *T. Theka*. 1. A sheath, envelope, receptacle, case, or capsule. 2. The cup-like part of a goblet-cell. [J.] 3. See *CELL-MEMBRANE*, 4. In botany, a case; especially an anther-sac (of Grew, the anther itself), a capsule of *Musci*, or one of the oblong, cylindrical, or ovoid vesicles containing the spores in lichens. [a, 35.] —**T. cerebri.** See *CANIUM*. —**T. cordis.** See *PERICARDIUM*. —**T. folliculi.** Of von Baer, an envelope formed around a Graafian follicle by the fibrillation of a layer of young connective tissue following the heightened vascularity that accompanies the process of maturation. The internal layer (*tunica propria*) is vascular, and the external (*tunica fibrosa*) fibrillated. [A, 92.] —**T. medullaris spinalis, T. vertebralis.** See *SPINAL DURA*.

THECAPHORE, n. Thek'a²-for. Lat., *thecaphorum* (from *θήκη*, a chest, and *φορέω*, bearing). Fr., *thécaphore*. See *GYNOPHORE* (1st def.).

THECAPODIUM (Lat.), n. n. Thek(thak)²-a²-pod(po²d)/i²-u²m(u²m). From *θήκη*, a chest, and *πους*, the foot. Fr., *thécapode*. The support of the fruit in caryophyllaceous plants. [a, 35.]

THECASPORES, n. pl. Thek'a²-sporz. From *θήκη*, a chest, and *σπορά*, a spore. Spores (sporida) produced in *Asci*. [a, 35.]

THECEITIS (Lat.), **THECEITIS** (Lat.), n's f. The(*the*)²-e²/i²e²/ti²s, thes(thak)²-i²e²/ti²s. Gen., -i²-idos (-idis). From *θήκη*, a case. See *TENOSTYNOVITIS* (1st def.).

THECIDIUM (Lat.), n. n. The²s(thak)²-i²d/i²-u²m(u²m). Dim. of *θήκη*, a case. Fr., *thécidium*. A one-seeded fruit with an adherent pericarp; now included under the term *achenium*. [a, 35.]

THECIUM (Lat.), n. n. The(*the*)²/i²-u²m(u²m). From *θήκη*, a case. The portion of an apothecium (of lichens) containing the thecae and thalamium. [a, 35.]

THECODONT, adj. Thek'o-do²nt. From *θήκη*, a case, and *ὀδόντος*, a tooth. Having the teeth lodged in alveoli. [L, 12.]

THECOSTENOSIS (Lat.), n. f. Thek(thak)²-o²(o²)-ste²g-nos²/i²s. Gen., -nos²/eos (-is). From *θήκη*, a case, and *στεγνωσις*, contraction. Fr., *thécosténose*. Contraction of the sheath of a tendon.

THEE (Ger.), n. Ta. See *TEA*. —**Abführender T.** [Ger. Ph.]. See *SPECIES LAXANTES* (3d def.). —**Bittert.** See *SPECIES AMARANTICAE*. —**Europäischer T.** The *Veronica officinalis*. [a, 35.] —**Kaisert.** See *FLOSTHEE*. —**Südsiet.** Maté. [B.] —**T'gemische.** See *SPECIES* (2d def.). —**T'strauch.** See *TEA* (2d def.) and *CAMELLIA thea*.

THEER (Ger.), n. Tar. See *TAR*. —**Holz't.** See *TAR* (2d def.). —**Norwegischer T.** Norway tar. [a, 38.] —**Rangoont.** See *RANGON PETROLEUM*. —**T'bäder.** Baths in which soap is used. [B, 108 (a, 14).] —**T'farbstoff.** See *ANILINE DYE*. —**T'glycerin.** A mixture of 3 parts of glycerin and 1 part of tar; used for dressing ulcers. [B, 108 (a, 14).] —**T'krätze.** Scabies occurring in laborers in tar-works. [B, 108 (a, 14).] —**T'krebs.** See *CHIMNEY-SWEEPS' CANCER*. —**T'mittel.** A medicine containing tar. [B, 108 (a, 14).]

—**T'pflaster.** See *EMPLASTUR PICIS LIQUIDÆ* (under *PIC*). —**T'pulver.** A mixture of 2 parts of coarsely powdered coal with 1 part of tar. [B, 108 (a, 14).] —**T'salbe.** See *UNGUENTUM PICIS LIQUIDÆ* (under *PIC*). —**T'seife.** See *SAPON PICEUS*. —**T'syrup.** See *SYRUPUS PICIS*. —**T'tinctur.** A solution of 1 part of tar in 12 parts of alcohol. [B, 8, 10 (a, 14).] —**T'werg.** Tarred oakum. [a, 14.]

THEIL (Ger.), n. Til. See *PART*. —**Felsen't.** See *PETROUS PORTION OF THE TEMPORAL BONE*. —**Gaument'.** The horizontal plate of the palate bone. —**Gelenkt'.** See the major list. —**Infundibular T. des Vorderhirns.** The portion of the primitive prosencephalon from which the infundibulum springs. [L, 10 (K).] —**Medialer T. der Schleienschicht** [Forel]. The medial fibres of the lemniscus area. [L, 17 (K).] —**Oecipital't.** des Gehirns. See *OCCIPITAL LOBE*. —**Orbitalt'.** The orbital surface of the frontal lobe. [L, 17 (K).] —**T'wandel.** See *MEROTROPE* (1st def.). —**Unterer T. der Hirnstiele.** See *SEGMENTUM* (1st def.). —**Vorderer lateraler T. des Abducenskerns.** The antero-lateral portion of the nucleus of the abducens nerve. [K.] —**Vorderer T. der Seisurs des Hippocampus** [Gratiolet]. See *HIPPOCAMPAL FISSURE*. —**Zitzent'.** See *MASTOID PROCESS*.

THEILBLATT (Ger.), n. Til'bla²t. See *FOLIOLÆ*.

THEILFRUCHT (Ger.), n. Til'fruch²t. See *MERICARP*. —**T'chen.** See *CARPEL*.

THEILFURCHEND (Ger.), adj. Til'furch²-e²nd. See *MEROBLASTIC*.

THEILING (Ger.), n. Til'un². See *CLEAVAGE, DIVISION* (1st def.), and *SEGMENTATION*. —**T'swandel.** See *MEROTROPE* (1st def.).

THEINE, n. The'en. Lat., *theina, theinum*. Fr., *théine*. Ger., *Thein*. The active principle of tea (*Camellia thea*); an alkaloid isomeric (by chemists considered identical) with caffeine but differing in its action, having but half the toxic power and producing more wakefulness and convulsive disturbance and less cardiac stimulation. It has been used subcutaneously in neuralgia. [Cassle, "Cincinnati Lancet and Clinic," Feb. 6, 1886; "N. Y. Med. Jour.," July 10, 1888, p. 58 (a, 50); "Proc. of the Am. Pharm. Assoc.," xv, p. 173 (a, 50); a, 17.]

THEION (Lat.), n. n. Thi²(the²)/i²-o²n. Gr., *θειον*. See *SULPHUR*.

THEIOTHERMA (Lat.), n. n. Thi²(the²)/i²-o²(o²)-thu²rm-(the²rm)/a². Gen., *therm(a)os (-atis)*. From *θεῖον*, sulphur, and *θερμα*, a hot spring. Fr., *théiotherme*. Ger., *Theiotherme*. A hot sulphurous spring. [L, 50 (a, 14).]

THEIOTHERMIN, n. Thi-o-thu²rm/i²zn. See *BAREGIN*.

THEISM, n. The'i²zm. From *thea, tea*. Fr., *théisme*. Chronic poisoning by tea; characterized by insomnia, cephalalgia, nervous trembling, irritable weakness of the heart, dyspepsia, and cachexia. [C. Éloy, "Union méd.," June 5, 1886, p. 917 (a, 50).]

THÉLALGIE (Fr.), p. Tal-a²/zhe. From *θήλη*, the nipple, and *άλγος*, pain. Pain in the nipple. [L, 41 (a, 14).]

THELASIS (Lat.), **THELASMUS** (Lat.), n's f. and m. The²l-(thal)/a²s(a²s)/i²s, the²l(thal)-a²/a²s(mu²s)/mu²t's. Gen., -a²/eos (the²lasis), -a²/mi. Gr., *θηλασμός* (from *θηλάειν*, to give suck). Fr., *thélasme*. Ger., *Säugen*. The act of suckling. [L, 50 (a, 14).]

THELASTRIA (Lat.), n. f. The²l(thal)-a²st(a²st)/ri²-a². Gr., *θηλάστρια* (from *θηλάειν*, to give suck). Fr., *thélastrie*. Ger., *Amme*. A wet-nurse. [L, 50 (a, 14).]

THELE (Lat.), n. The²l(thal)/e(a). Gen., *thel'es*. Gr., *θήλη*. See *MAMMA* and *NIPPLE*.

THELEPHORA (Lat.), n. f. The²l(thal)-e²(af²)/o²r-a². From *θήλη*, the nipple, and *φορέω*, bearing. Fr., *théléphore*. Ger., *Warzenpilz* (2d def.). 1. See *PALMELLA*. 2. A genus of *Fungi* typical of a group (the *Thelophoreae* [Fr., *théléphorées*], or *Thelopherei* [Fr., *théléphores*]), comprising the simplest forms of the *Hymenomyces*. [a, 35.] —**T. puteana.** A species causing dry-rot, especially in pine-wood. [a, 35.] —**T. sanguinea.** See *HYPOCHYNUS RUBRO-CINCTUS*.

THELIGONUM (Lat.), n. n. The²l(thal)-i²g/o²a²-u²m(u²m). Gr., *θηλιγόνον* (from *θήλυς*, female, and *γίγνυσθαι*, to come into being). Written also, preferably, *Theligionum*. A genus of the *Theligiaceae* (a tribe of the *Urticaceae*). [a, 35.] —**T. alsinoidemum, T. cynocrambe.** Fr., *chou de chien*. The *κυνοκράμβης* of Dioscorides, dog's cabbage; an aperient potherb of Mediterranean regions. [a, 35.]

THELITIS (Lat.), n. f. The²l(thal)-i²e²/ti²s. Gen., -i²-idos (-idis). From *θήλη*, the nipple. Fr., *thélite*. Ger., *Brustwarzenentzündung*. Inflammation of the nipple.

THELONCUS (Lat.), n. m. The²l(thal)-o²n²k/u²s(u²s). From *θήλη*, the nipple, and *γκνος*, a tumor. Fr., *théloncus*. Swelling of the nipple or breast.

THELOPHLEBOSTEMMA (Lat.), n. n. The²l(thal)-o²(o²)-fle²b-o²(o²)-ste²m/ma²s. Gen., -stem/ma²os (-atis). From *θήλη*, the nipple, *φλέψ*, a vein, and *στέμμα*, a wreath. Fr., *thélophlébostemme*. See *CIRCULUS VENOSUS MAMMÆ*.

THELORRHAGIA (Lat.), n. f. The²l(thal)-o²r-raj(r'a²g)/i²-a². From *θήλη*, the nipple, and *ρῑγνυσθαι*, to burst forth). Fr., *thélorrhagie*. Hemorrhage from the nipple. [L, 41 (a, 14).]

THELOSPASMUS (Lat.), n. m. The²l(thal)-o²(o²)-spa²z(spa²s)/mu²s(mu²s). From *θήλη*, the nipple, and *σπασμός*, a spasm. Fr., *thélospasme*. Spasm in the nipple. [L, 50 (a, 14).]

THELOSTEOPHYTE, n. The²l-o²st/e²-o²-fit. Lat., *thelostoeophytum* (from *θήλη*, the nipple, *ὀστέον*, a bone, and *φυτόν*, a growth). Fr., *thélostéophyte*. Ger., *Thelostoeophyt*. Of Lobstein, a nipple-shaped exostosis. [L, 50 (a, 14).]

THÉLOTHISME (Fr.), **THÉLOTHISME** (Fr.), n's. Tal-ot-es-m'. From *θήλη*, the nipple, and *ὠθισμός*, a thrusting forward. Erection of the nipple. See under *ERECTIO*.

THELOTREMA (Lat.), n. n. *The(thal)-o(-s)-trem(tram)/a^s*. Gen., *-trem/atos (-atis)*. Fr., *thélotrème*. Ger., *Brustflechte*. A genus of lichens typical of the *Thelotrema* (a tribe of the *Placodes*). [a, 35.]—**T. cinchonarum**. A species occurring on yellow cinchona-bark. [a, 35.]—**T. myriocarum**. A species found on red cinchona-bark. [a, 35.]—**T. urceolae**. A species found on the bark of *Cinchona lancifolia*. [a, 35.]

THELYBLAST, n. *The(ly)-blast*. Of Minot, the ovum after the extrusion of the polar globules. The oospore of Balfour. [G.]

THELYCUS (Lat.), adj. *The(ly)(th)(u^s)-k(-u^s)/a^s*. Gr., *θηλυκός*. Fr., *thélyque*. See FEMALE (1st def.).

THELYGONIA (Lat.), n. f. *The(ly)(th)(u^s)-gon/(-goⁿ)/a^s*. Gr., *θηλυγονία* (from *θηλυς*, female, and *γενεσθαι*, to come into being). 1. The procreation of female children. 2. Nymphomania. [A, 540 (a, 34).]

THELYGONUM (Lat.), n. n. *The(ly)(th)(u^s)-g(-goⁿ)/a^s-u(-u^m)*. See THELYGONUM.

THELYTOCIA (Lat.), n. f. *The(ly)(th)(u^s)-tos/(-to^s)/a^s*. Gr., *θηλυτοκία* (from *θηλυκός*, to bear females). Parthenogenesis (1st def.) with the production of females only. [a, 32.]

THENAL, adj. *Then'al*. From *θένα*, the palm of the hand. Pertaining to the anterior surface of the arm. [L.]

THENAR (Lat.), n. n. *Then(thēn)/a^r*. Gen., *then/aros (-aris)*. Gr., *θέναρ*. Fr., *thénar*. The palm of the hand; improperly used as an Eng. adj. for palmar and plantar.—**T. pollicis**. See T. EMNENCE.

THEOBROMA (Lat.), n. f. and n. *The(thē)-o(-s)-brom/a^s*. Gen., *-brom/ia^s, -brom/atos (-is)*. From *θεός*, a god, and *βρώμα*, food. Fr., *théobrome*. Ger., *Kakaobaum*. A genus of tropical American trees of the *Sterculiaceae*. All the species apparently furnish some variety of cacao. [a, 35.]—**Oil of lat.** *oleum theobromae* (see *theobromatis*, seu cacao), *oleum concretum e semine theobromae cacao*. Fr., *beurre de cacao*. Sp., *aceite de cacao* [Sp. Ph.]. Ger., *Cacaobutter*. Cacao-butter; a yellowish-white, solid fat obtained from cacao. It melts between 30° and 35° C. It is used in pomades, etc., for coating pills and making suppositories, and, smeared on the skin, as a protective and to reduce fever. [B; a, 35.]—**Semen theobromatis**, *Semina theobromae*. See CACAO (1st def.).—**T. angusta**. See *Asroma angusta*.—**T. bicolor**. Fr., *théobrome de deux couleurs*. Ger., *zwei/farbiger Kakaobaum* [Sp. Ph.]. Of Colombia, Brazil, and especially the warmer parts of New Granada. The seeds constitute Caraca cacao. [a, 35.]—**T. cacao**. Fr., *théobrome cultivé, cacaoier, cabasse*. Ger., *düchter Kakaobaum*. Cacao (or cocoa) tree, chocolate-nut tree; a species found wild in tropical America and cultivated in most tropical countries, especially Venezuela, for its seeds (see CACAO, 1st def.), which yield oil of t. and are a stimulating, nutritive article of diet. The seed-shells are tonic, and a gum exuding from the stem of the tree is employed in diarrhoea and dysentery. [a, 35.]—**T. guazuma**. See *GUAZUMA ulmifolia*.—**T. guianense**. A Guiana species, probably the source of Cayenne cacao. The fruit yields a vinous beverage and, by distillation, a spirit. [a, 35.]

THEOBROMIC ACID, n. The o-brom/¹²k. A monobasic crystalline acid, C₁₈H₁₂O₆ of the fatty-acid series, occurring in cacao-butter. It is not certainly known to exist. [B, 3.]

THEOBROMINE, n. The o-brom/en¹². Lat., *theobrominum*, *theobromina*. Fr., *théobromine*. Ger., *Theobromin*. An alkaloid, C₁₇H₁₅N₃O₆, obtained from the fruit and rind of the *Theobroma cacao* found also in small amount in the young leaves of Himalaya tea. [B, 3 (a, 38); B.]

THEODORETUS (Lat.), n. m. *The(thē)-o(-s)-dor-et(at)/u^s*. Gr., *θεοδωτήρης* (from *θεός*, a god, and *δωρῆς*, freely given). An old anticephalalgic remedy. [L, 50 (a, 14).]

THEOMANIA (Lat.), n. f. *The(thē)-o(-s)-man(mān)/a^s*. From *θεός*, a god, and *μανία*, madness. Fr., *théomanie, théomaniac*. Ger., *religiöser Wahnsinn*. Religious monomania, often accompanied by hallucinations of sight, hearing, and touch. The patient believes himself to be under direct and immediate divine influence or inspiration, or even to be God himself. [Ball, "Bull. méd.," June 17, 1889, p. 795 (a, 18).]

THEOPHILLUM (Lat.), n. n. *The(thē)-o(-s)-phill/(-u^m)*. From *θεός*, a god, and *φίλος*, loved. Of Trallianus, a certain collyrium containing saffron, etc. [B, 78 (a, 14).]

THEOPHRASTA (Lat.), n. f. *The(thē)-o(-s)-fra/sti/ra^s*. From *Θεόφραστος*, a Greek philosopher. Of Jussieu, a genus of the *Theophrasteae* (a tribe of the *Myrsineae*). The T. of Linnaeus is referred to *Clavija*. [a, 35.]—**T. americana**. Fr., *coquemollier, arbre de Théophraste*. A tree of the Antilles (referred to the genus *Clavija*). The leaves are used in fowl ulcers and in farcy. [a, 35.]

THEOPHYLLA (Lat.), n. f. *The(thē)-o(-s)-phill/(-u^s)/a^s*. For deriv., see THEA and PHYLLOM. Of Rafinesque, the genus *Thea*. [a, 35.]

THEOPHYLLINE, n. The o-phill/en¹². A substance, C₇H₈N₄O₆, isomeric with theobromine and paraxanthine, obtained from an alcoholic extract of tea. It forms thin, narrow, colorless crystals. ["N. Y. Med. Jour.," Feb. 8, 1890, p. 148 (a, 50).]

THEOPLEGIA (Lat.), **THEOPLESIA** (Lat.), n's. *The(thē)-o(-s)-pleg/(-plas)/a^s*. From *θεός*, a god, and *πληγή*, to strike. See APOPLEXY.

THEORIA (Lat.), n. f. *The(-o^r)-ia^s*. Gr., *θεωρία* (from *θεωρεῖν*, to look at). See THEORY.

THEORIE (Ger.), n. *Ta(-o^r)-eⁱ*. See THEORY.—**Kratzt¹**. See PSOROTHERIA.—**Wirbelt¹** des Schädels. The theory that the skull is made up of modified vertebrae. [L, 115 (a, 50).]

THEORY, n. *The(-o^r)-i²*. Gr., *θεωρία* (from *θεωρεῖν*, to look at). Lat., *theoria*. Fr., *théorie*. Ger., *Theorie*. An idea or hypothesis

sufficient to serve as a basis for an explanation or for action. [a, 48.]—**Apposition** t. The t. of the growth of a tissue by the deposit of cells from without. [a, 34.]—**Atomic** t. 1. Of the ancients, the t. that all matter consists of very minute, hard, absolutely indestructible bodies called atoms. 2. Of Dalton and succeeding chemists, the t. that molecules of substances are built up of one or more atoms, each of which represents a certain definite amount of a chemical element, which amount always remains constant, going into and out of combination without suffering increase or decrease. [B.]—**Binary** t. In chemistry, that t. of the composition of salts which regards them as made up of two constituents, acid and basic. [B, 2.]—**Cell** t. See CELL t.—**Darwinian** t. See EVOLUTION (2d def.).—**Diblastic** t. Of Nägeli, the t. that the presence, successively or simultaneously, of two different kinds of microbes is requisite to explain the nature and progress of great epidemics. [L, 164 (a, 27).]—**Difference** t. A t. proposed by Hermann to explain the presence of electrical currents in muscles and nerves. The normal, intact muscle or nerve is said to be electro-positive, and a dying muscle or nerve electro-negative. [Landois (K).]—**Dualistic** t. See BINARY t.—**Erysipelatous** t. Ger., *erysipelatöse* (oder *rosige*) *Theorie*. Of Eisenmann, Pouteau's modification of the phlogistic t., according to which puerperal fever was due to any erysipelatous inflammation within the abdomen. [a, 37.]—**Gastric** t. A theory in which every villus's t. of the causation of disease by the accumulation of biliary and mucous materials in the primæ viæ. [A, 57.]—**Genetic** t. The t. of the psychical perception of distance, form, etc. [a, 34.]—**Germ** t. 1. See BIOGENESIS. 2. The t. of the production of certain diseases by living micro-organisms or their products.—**Goltz's statical** t. A t. with reference to the function of the sensils according to which a primary specific alteration of the head, pressure is exerted by the endolymph on some portion of the canals, the ampullar nerve-terminations being thus excited and sensations of position transmitted to the cerebrum. [Landois (K).]—**Graft** t. A t. that disease is caused by means of organic particles from diseased persons becoming ingrafted in healthy individuals. [a, 34.]—**Hæmatic** t. Ger., *Hämatotheorie*. A t. of the origin of fevers in which a general alteration of the blood. [A, 57.]—**Kinetic** t. Of Brown, a t. of the functions of the semicircular canals which assumes that the corresponding canals on both sides are symmetrical organs which are together concerned with the movement of the head in a certain direction. [Landois (K).]—**Kirchhoff's** t. The t., now generally accepted, that the black lines of the spectrum are caused by the passage of light through the vapors of bodies which by themselves would give bright lines in the same position when incandescent. [a, 49.]—**Mechanical** t. of medicine. See IATROMATHEMATICS.—**Monoblastic** t. of disease. Of Nägeli, a t. that disease is due to microphytes that must pass through a developmental stage in some medium after leaving the body of those affected in order to reinfect. [a, 34.]—**Neuro-muscle** t. A t. that a central ganglionic cell, its nerve-fibre, and the muscle connected therewith are developed from a single cell. [a, 34.]—**Neuropathic** t. of glaucoma. Of Donders, a t. that irritation of the choroidal nerves caused a neurosis of secretion that resulted in glaucoma. [a, 34.]—**Phlogistic** t. A t. of febrile diseases which accounted the local inflammations as the cause of the general disturbance. [A, 57.] See also *Erysipelatous* t.—**Physiological** t. Of Autenrieth, a t. of the causation of certain diseases really a t. of metastasis, as of the lochia or the milk. It was held that during pregnancy there was an internal accumulation of the juices, especially affecting the uterus, but that after delivery they had a tendency to pass outward by the sweat, the lochia, and the milk; in case the latter secretions were impeded, the stream took some other direction, as to the head, the chest, or most frequently, the abdomen. [A, 57.]—**Pre-existence** t. Of Du Bois-Reymond, the t. that electric currents are normally present in muscles and nerves before they are divided. [K, 3.] Cf. *Difference* t.—**Telluric** t. Of Pettenkofer and Nägeli, the t. that epidemic diseases are due to microbes of the soil penetrating into the lungs and digestive organs, and thence into the blood. [L, 164 (a, 27).]—**Transmutation** t. The t. of the change of one species or element into another species or element. [a, 34.]

THEQUE (Fr.), n. Tēk. See THECA.

THERANTHROPISMUS (Lat.), n. m. *The^r(thar)-a²nth-(a²nth)-ro²p(-trop)-/a^s*. From *θηρ*, a wild beast, and *άνθρωπος*, a man. See ZOANTHROPY.—**T. fictus**. Of Krause, lycanthropy. [a, 34.]

THERAPEIOLOGY, n. *The^r-a²p(-i²)-o²/o²-i²*. From *θεραπεία*, medical treatment, and *λόγος*, understanding. Of M'Lachlan, therapeutics. [a, 34.]

THERAPEUTIC, adj. *The^r-a²p(-u²)/a^s*. Gr., *θεραπευτικός* (from *θεραπεύω*, to do service). Pertaining to therapeutics. [D.]

THERAPEUTICS, n. sing. *The^r-a²p(-u²)/a^s*. Gr., *θεραπευτική* (from *θεραπεύω*, to do service). Fr., *thérapeutique*. Ger., *Therapie, Therapeutik*. It., *terapeutica*. Sp., *terapéutica*. The science and practice of the application of remedies for disease. [a, 48.]—**Mediate** t. The medication of an infant through the medium of its mother's milk.—**Suggestive** t. Fr., *thérapeutique suggestive*. The treatment of disease by hypnotic suggestion. [a, 34.]

THERAPEUTIQUE (Fr.), n. *Ta(-a²)-p(-u²)-ēk*. See THERAPEUTICS.—**T. paradoxale**. Paradoxical therapeutics; a collective term for paradoxical and unexpected effects of drugs. ["Rev. méd.," Oct. 17, 1885, p. 616.]—**T. thermale**. The treatment of disease by the use of hot mineral waters internally and externally. [a, 34.]

THERAPEUTIST, n. *The^r-a²p(-u²)/a^s*. Fr., *thérapeutiste*. Ger., *Therapeutiker, Therapeutiker*. A practitioner of therapeutics.

THERAPIE (Ger.), n. *Ta(-a²)-p(-ē)*. See THERAPEUTICS.—**Kinesit¹**. See MEDICAL GYMNASIACS.—**Pneumatische** T. See PNEUMATIC TREATMENT.

THERAPY, n. *The^r-a²p(-i²)-ē*. Gr., *θεραπεία*. See THERAPEUTICS.

THERENCEPHALUS (Lat.), adj. Ther²(thar)-e²n(e²n²)-se²f. (ke²f/a²l(a²l)-u²s(u²s)). From *thēp*, a wild beast, and *ἐγκεφαλος*, the brain. Having the radius fixus making an angle of from 116° to 129° with the line uniting the punctum nasofrontale and the punctum alae vomeris. [Lissauer, "Arch. f. Anthropol.", xv, Supp. (a, 50).]

THERENABIAN, n. Ther²e²n-i²a²b²i²n. Oriental manna.

THEREOBROMA (Lat.), n. n. Ther²e²(a)-o(o²)-brom²a². Gen., -brom²atos (-atis). From *thēpos*, of summer, and *βρώμα*, food. Fr., *thérobrome*. Ger., *Sommerkost*. Summer-diet, a variety of chocolate. [L, 50 (a, 14).]

THEREOCATARRHUS (Lat.), n. m. Ther²e²(a)-o(o²)-ka²t- (ka²t)-a²r(ā²r)ru²s(ru²s)). From *thēpos*, of summer, and *κατάρρῃος*, catarrh. Fr., *thérocattarrhe*. Ger., *Sommerkatarrh*. See *HAY FEVER*.

THERIACA (Lat.), n. f. Ther²(thar)-i²(i²a²k(a²k)-a²). From *θηριακή* (*thēriakos*), an antidote against animals' bites. Fr., *thériacque*. Ger., *Theriak*. 1. An old name for opium flavored with nutmeg, cardamom, and mace, or with saffron and ambergris; afterward for other confections of opium (see *Confectio opii*). 2. See *ÉLECTUAIRE thériacal*. 3. Of the Br. Ph. see *MOLASSES*. 4. Of the Austr. and Hung. Ph's a mixture of powdered opium with 120 times as much electuarium aromaticum. [B, 81 (a, 35); B, 95 (a, 38).]—*Radix theriaca*. The root of *Valeriana phu*. [a, 35].—*T. Andromachi*. See *ÉLECTUAIRE thériacal*.—*T. celestis*. See *LAUDANUM*.—*T. electuarium*. See *Confectio opii*.—*T. londonensis*. See *Cataplasma CUMIN*.

THERIAQUE (Fr.), n. T²e²r²-a²k. See *THERIACA* and *Confectio opii*.—*T. des pauvres*, *T. des paysans*. See *ALLIUM SATIVUM*.—*T. diatessaron*. See *DIATESSARON*.—*T. du foie*. Rhubarb. [A, 35.]

THERIODECTOS (Lat.), adj. Ther²(thar)-i²(i²a²k)-de²kt(dakt)-u²s(u²s). Gr., *θηριοδεκτος* (from *thēpion*, a wild beast, and *δάκνειν*, to bite). Fr., *thériodecte*. Bitten by a venomous animal, especially a snake. [L, 50 (a, 14).]

THERIODIC, adj. Ther²-i²-od²i²k. Gr., *θηριώδης* (from *thēp*, a wild beast, and *είδος*, resemblance). Malignant. [D.]

THERIOMA (Lat.), n. n. Ther²(thar)-i²-om²a². Gen., -om²atos (-atis). Gr., *θηρίωμα* (from *thēpion*, a wild beast). A chronic and malignant or semi-malignant ulcer. [E.]

THERIOMORPHIA (Lat.), n. f. Ther²(thar)-i²-o(o²)-mo²r²f-i²a². See *THERIOMORPHA*.

THERIOTOMY, n. Ther²-i²-o²t²/om²-i². Lat., *theriotomia* (from *thēpion*, a wild beast, and *τομή*, a cutting). Fr., *thériotomie*. See *ZOOTOMY*.

THERMA (Lat.), n. f. Ther²rm(thē²rm)/a². Gr., *θερμα* (from *θερμός*, hot). 1. See *HEAT* (1st def.). 2. A warm spring. [L, 50 (a, 14).]

THERMACOGENESIS (Lat.), n. f. Ther²rm(thē²rm)-a²k(a²k)-o(o²)-je²n(ge²n²e²s)-i²s. Gen., -genes²eos (-gen²esis). From *θερμὸν*, heat, *ἀεός*, remedy, and *γένεσις*, creation. Of Alvarenga, the action of a remedy on the temperature. [A, 319 (a, 34).]

THERMÆMUS (Lat.), adj. Ther²rm(thē²rm)-em²(a²s²e²m)-u²s(u²s). From *θερμός*, hot, and *αἷμα*, blood. Fr., *thermène*. Ger., *warmblütig*. Warm-blooded.

THERMÆSTHESIMETER, n. Ther²rm-e²s-thez-i²-o²m²-e²t-u²r. From *θερμὸν*, heat, *αἰσθητός*, feeling, and *μέτρον*, a measure. Ger., *Thermæsthesiometer*. An instrument for testing the power of an individual to appreciate differences in temperature. [D, 35.]

THERMAL, adj. Ther²rm²l. Lat., *thermalis*. Fr., *t*. Ger., *t*. Pertaining to heat or to hot springs. [a, 48.]

THERMAL ACID SPRINGS, n. Ther²rm²l. A place in Inyo County, California, where there are hot springs flowing between banks of crystallized sulphur. [Anderson (a, 14).]

THERMALBRUNNEN (Ger.), **THERMALQUELLE** (Ger.), n's. Te²rm-a²l²brun-ne²n, -kwe²l²le². A hot spring.

THERMALWASSER (Ger.), n. Te²rm-a²l²va²s-se²r. The water of a hot spring.

THERMANTERION (Lat.), n. n. Ther²rm(thē²rm)-a²nt(a²nt)-er(ar)²-i²-o²n. Gr., *θερμαντήριον*. Fr., *thermanterion*. A vessel for heating a liquid. [L, 50 (a, 14).]

THERMANTIC, adj. Ther²rm-e²nt²i²k. Gr., *θερμαντικός* (from *θερμαίνω*, to heat). Lat., *thermanticus*. Fr., *thermantique*. Ger., *erwärmend*. Promoting warmth. [L, 50 (a, 14).]

THERMANTIDOTUM (Lat.), n. n. Ther²rm(thē²rm)-a²nt(a²nt)-i²d²-o²t²-u²m(u²m). From *θερμὸν*, heat, and *ἀντιδότης*, an antidote. Ger., *Thermantidot*. A remedy against heat, or against fever-heat. [L, 50 (a, 14).]

THERMASIA (Lat.), n. f. Ther²rm(thē²rm)-az(a²s)/i²-a². Gr., *θερμασία*. Warmth, heat. [A, 311 (a, 21).]

THERMASMA (Lat.), n. n. Ther²rm(thē²rm)-a²z(a²s)/ma². Gen., -as²ματος (-atis). Gr., *θερμασμα*. A warm fomentation. [A, 311 (a, 21).]

THERMESTHÉSIE (Fr.), n. Te²rm-e²st-az-e. Capability of feeling heat.

THERMIC, adj. Ther²rm²i²k. From *θερμὸν*, heat. Fr., *thermique*. Pertaining to or due to heat. [L, 41 (a, 14).]

THERMO-ANÆSTHESIA (Lat.), n. f. Ther²rm(thē²rm)-o(o²)-a²n²(a²n)-e²s(a²s)-thez(i²s)/i²-a². From *θερμὸν*, heat, and *ἀναίσθησία*, want of feeling. Fr., *thermoanesthésie*. Insensibility to heat or cold or to variations of temperature. [D, 35.]

THERMO-CAUTERY, n. Ther²rm-o-ka²t²e²r-i². From *θερμὸν*, heat, and *καυτήριον*, a branding iron. Fr., *thermo-cautére*. Ger., *Thermokauter*. See *THERMO-CAUTERY*.

THERMOCHEMISTRY, n. Thu²rm-o-ke²m²/i²st-ri². From *θερμὸν*, heat, and *χημεία*, chemistry. Fr., *thermochimie*. The science of heat in its chemical relations. [B, 38, 93 (a, 14).]

THERMOCHORTON (Lat.), n. n. Thu²rm(thē²rm)-o(o²)-ko²rt-(ch²o²rt)/o²n. From *θερμὸν*, heat, and *χόρτος*, grass. In the time of Hippocrates, the *Erythraea centaurium*, which is still employed in the chronic fevers of Oriental countries. [X. Landerer, "Am. Jour. of Pharm.", xlviii, p. 193 (a, 21).]

THERMOCHROSIS (Lat.), n. f. Thu²rm(thē²rm)-o(o²)-kros-(ch²ros)/i²s. Gen., -chro²eos (-is). From *θερμὸν*, heat, and *χρῶσις*, a coloring. Fr., *thermochose*. Ger., *Thermochrose*, *Wärmefärbung*. The property of absorbing heat-rays of a certain degree of refrangibility and allowing others to pass through. [B.]

THERMO-DIFFUSION, n. Thu²rm-o-di²f-fu²zhu²n². From *θερμὸν*, heat, and *diffusio*, a spreading out. Gaseous diffusion as the result of the unequal heating of a gaseous mass. [B, 2.]

THERMODYNAMICS, n. sing. Thu²rm-o-di²n-a²m²/i²ks. From *θερμὸν*, heat, and *δυναμικός*, powerful. Fr., *thermodynamique*. The science of the relations of heat to mechanical work. [a, 48.]

THERMO-ELECTRICITY, n. Thu²rm-o-e²-le²kt-ri²s/i²t-i². From *θερμὸν*, heat, and *ἤλεκτρον*, amber. Fr., *thermo-électricité*. Ger., *Thermoëlektrizität*. Electricity produced by an increase or decrease of temperature. [a, 48.]

THERMOGENESIS (Lat.), n. f. Thu²rm(thē²rm)-o(o²)-je²n(ge²n²e²s)-i²s. Gen., -es²eos (-gen²esis). From *θερμὸν*, heat, and *γένεσις*, production. The production of heat, especially in the animal organism. [a, 34.]

THERMOGENIC, THERMOGENOUS, adj's. Thu²rm-o-je²n²/i²k, -o²j²e²n²-u²s. Lat., *thermogen* (from *θερμὸν*, heat, and *γεννᾶν*, to engender). Heat-producing. [L, 41 (a, 14).]

THERMO-INHIBITORY, adj. Thu²rm-o-i²n-hi²b²/i²t-or-i². From *θερμὸν*, heat, and *inhibere*, to keep back. Preventing or retarding thermogenesis. [a, 34.]

THERMOLE (Lat.), n. f. Thu²rm(thē²rm)-o²le(la). Gen., -ol²es. Gr., *θερμολή*. Of Hippocrates, feverish heat. [A, 311 (a, 21).]

THERMOLUSIA (Lat.), n. f. Thu²rm(thē²rm)-o(o²)-lu²z(lus)/i²-a². From *θερμὸν*, hot, and *λούειν*, to wash. A hot bath. [a, 14.]

THERMOLYSIS (Lat.), n. f. Thu²rm(thē²rm)-o²l²/i²(u²s)-i²s. Gen., -ys²eos (-ol²ysis). From *θερμὸν*, heat, and *λύσις*, a loosing. 1. The decomposition of a body under the influence of a high temperature, with a subsequent recombination on cooling. [B, 6.] 2. The dissipating of animal heat. [a, 34.]

THERMOLYTIC, adj. Thu²rm-o-li²t²/i²k. Pertaining to thermolysis. [a, 34.]

THERMOMAGNETISM, n. Thu²rm-o-ma²g²-ne²t-i²zm. From *θερμὸν*, heat, and *μάγνης*, a magnet. Fr., *thermomagnétisme*. Magnetism produced by heat. [L, 41 (a, 14).]

THERMOMETER, n. Thu²rm-o²m²-e²t-u²r. From *θερμὸν*, heat, and *μέτρον*, a measure. Fr., *thermomètre*. Ger., *T*. An instrument or apparatus for measuring degrees or variations of sensible heat. Its construction is based on the property possessed by certain substances of expanding or contracting regularly as the temperature is increased or diminished. The ordinary t. consists of a bulb communicating with a tube of very small bore, the bulb and adjacent part of the tube containing mercury, while the distant part of the tube is empty. With a rise of temperature the mercury expands so as to fill more and more of the tube. The temperature is indicated by a scale attached to the tube. The scale is graduated by marking off equal intervals as degrees, the unvarying distance between the marks that indicate the freezing point and boiling point of water being divided into 180 of these degrees in the *Fahrenheit* t., 100 degrees in the *centigrade* t., or *Celsius*'s t., and 80 in *Réaumur*'s t. The freezing point of water is the zero in the centigrade t. and *Réaumur*'s t., but *Fahrenheit* put his zero 32° below that point, and the boiling points of water in the three are thus 100°, 80°, and 212°. The *Fahrenheit* scale (symbol, Fahr. or F.) is that in general use, especially for meteorological and clinical observations; but in some countries the centigrade (symbol C.), which is that now chiefly employed in scientific research, takes its place; they are connected by the formula F = 3/2 C. + 32°. For very low temperatures alcohol is used instead of mercury, and very high temperatures are measured by the pyrometer. [a, 48].—*Air t.* Ger., *Luft t.* A t. in which the temperature is measured by the expansion of air. [a, 48].—*Bréguet's t.* A t. for measuring small differences of temperature by the expansion of a metallic spiral. [B.].—*Celsius's t.* As commonly used, the centigrade t., but *Celsius* made the boiling point of water 0° and the freezing point 100°.

CLINICAL THERMOMETER.

[a, 48].—*Centigrade t.* See under *T. Cerebral t.* An instrument for taking the temperature of the surface of the head. [D.] Cf. *Cerebral thermometry*.—*Clinical t.* A t. for ascertaining the temperature of the body. It has a thin bulb and is usually self-registering. Cf. *Surfact.*.—*De Lisle's t.* A t. formerly used in Russia, having the boiling point of water marked zero and the freezing point placed at 150°. [a, 35].—*Fahrenheit t.* Ger.,

Fahrenheit's T. See under *T.*—**Fever t.** See *Clinical t.*—**Hermann and Pfister's t.** A t. for simultaneously registering maximum and minimum temperatures measured by the expansion of a spiral strip made up of steel and brass. [B.]—**Immich's metallic t.** An exceedingly sensitive t. of small size, the action of which depends on the expansion or contraction of a metallic tube filled with a highly expansive liquid. The instrument is practically self-registering, as several seconds elapse before the indicator moves backward after a temperature has been taken. No shaking down is necessary, for it accommodates itself readily to an altered temperature. ["N. Y. Med. Jour." Apr. 24, 1886, p. 480 (a, 50).]—**Maximum t.** A t. that registers the highest temperature reached. [a, 48.]—**Metastatic t.** A t. invented by Walfertin, used in noting the temperature of the blood. It consists of a capillary tube of such length and delicacy that it is possible to read off hundredths of a degree. [A, 30.]—**Minimum t.** A t. that registers the lowest temperature reached. [a, 48.]—**Réaumur's t.** See under *T.*—**Recording t.** A t. which makes automatically a tracing indicative of the variations of temperature to which it has been subjected. [B.]—**Registering t.** Self-registering t. An automatic maximum or minimum t. The maximum or minimum is shown by some indicator remaining in position after the mercury falls or rises. [a, 48.]—**Surface t.** A t. for taking the temperature of the surface of the body. [D.]

THERMOMETRIC, adj. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{me}^{\text{t}}/\text{r}^{\text{i}}\text{k}$. Pertaining to the thermometer or its use. [D.]

THERMOMETROGRAPH, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{m}}-\text{e}^{\text{t}}/\text{ro}-\text{gr}^{\text{a}}\text{f}$. From *θερμῶν*, heat, *μέτρον*, a measure, and *γράφειν*, to write. A recording thermometer. [B.]

THERMOMETRY, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{m}}-\text{e}^{\text{t}}/\text{r}^{\text{i}}$. Fr., *thermométrie*. Ger., *Thermometrie*. The use of the thermometer; also the body of facts and theories connected with its use. [D.]—**Cerebral t.** Of Broca, a method of diagnosing certain diseases of the brain by taking the surface temperature upon certain parts of the head. [D.]

THERMONEUROSIS (Lat.), n. f. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{nu}^{\text{r}}-\text{o}^{\text{s}}/\text{r}^{\text{s}}$. Gen., *-os/eos* (-is). Fr., *thermonévrose*. From *θερμῶν*, heat, and *νεῦρον*, a nerve. An old term for fever due to disturbance of the nervous centres. [a, 34.]

THERMO-NEUTRALITY, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{nu}^{\text{t}}-\text{ra}^{\text{l}}/\text{t}^{\text{r}}-\text{i}$. From *θερμῶν*, heat, and *neutrality*, neuter. Fr., *thermoneutralité*. Of certain salts, the property of neither losing nor gaining heat by being dissolved. [L, 41 (a, 14).]

THERMONÉVROSE (Fr.), n. $\text{Te}^{\text{r}}\text{m}-\text{mo}-\text{na}-\text{vroz}$. See *THERMONEUROSIS*.

THERMONOSUS (Lat.), n. f. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}^{\text{n}}/\text{o}^{\text{s}}-\text{u}^{\text{s}}(\text{u}^{\text{s}})$. From *θερμῶν*, heat, and *νόσος*, disease. Fr., *thermonose*. Ger., *Wärmerkrankheit*. A disease due to heat. [L, 50 (a, 14).]

THERMOPALPATION, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{pa}^{\text{l}}-\text{p}-\text{a}/\text{shu}^{\text{s}}$. From *θερμῶν*, heat, and *palpato*, a stroking. The determination of the bodily temperature by palpation. [a, 34.]

THERMOPATHOGENIE (Ger.), n. $\text{Te}^{\text{r}}\text{m}-\text{o}-\text{pa}^{\text{t}}-\text{o}-\text{gan}-\text{e}^{\text{r}}$. Of Alvarenga, the generation of abnormal bodily heat. [L, 57 (a, 14).]

THERMOPHAGY, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{t}}/\text{a}^{\text{t}}-\text{i}$. Lat., *thermophagia* (from *θερμῶν*, heat, and *φαγείν*, to eat). Ger., *Heissessen*. The habit of swallowing excessively hot food. [L, 50 (a, 14).]

THERMOPHEUSCOPE, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{f}^{\text{eug}}-\text{o}-\text{skop}$. From *θερμῶν*, heat, *φύειν*, to flee, and *σκοπεῖν*, to observe. Ger., *Thermophenyskop*. A pocket apparatus for the determination of the loss of heat from the surface of the skin. [a, 18.]

THERMOPILE, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{pil}$. From *θερμῶν*, heat, and *pila*, a ball. Fr., t. Ger., *Thermosäule*. See *Thermo-electric pile*.

THERMOPOSIA (Lat.), n. f. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{poz}(\text{po}^{\text{s}})/\text{i}^{\text{s}}$. From *θερμῶν*, heat, and *πόσις*, a drinking. Fr., *thermoposie*. Ger., *Heissstrinken*. The habit or practice of swallowing very hot drinks. [L, 50 (a, 14).]

THERMOPYLÆ (Lat.), n. f. pl. $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{p}}/\text{i}^{\text{l}}-\text{e}(\text{a}^{\text{s}}-\text{e}^{\text{s}})$. From *θερμῶν*, heat, and *πύλη*, a gate. A place in Greece where there are hot sulphurous springs. [L, 49 (a, 14).]

THERMOSCOPE, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{skop}$. From *θερμῶν*, heat, and *σκοπεῖν*, to observe. Fr., t. Ger., *Thermoskop*. An instrument for registering changes of temperature without indicating the degree or amount of heat. [D, 25.]

THERMOSIMULOGIE (Ger.), n. $\text{Term}-\text{o}-\text{zam}-\text{e}-\text{lo}-\text{g}-\text{e}^{\text{r}}$. Of Alvarenga, the science of the significance of changes of bodily temperature in symptomatology. [L, 57 (a, 14).]

THERMOSTAT, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{sta}^{\text{t}}$. From *θερμῶν*, heat, and *στάσις*, to set. Ger., T. An apparatus for the automatic regulation of temperature. [a, 48.]

THERMOSTERESIS (Lat.), n. f. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{ste}^{\text{r}}-\text{e}(\text{a}^{\text{s}})/\text{i}^{\text{s}}$. Gen., *-es/eos* (-is). From *θερμῶν*, heat, and *στερησις*, deprivation. Fr., *thermostérèse*. Deprivation of heat; lowering of temperature. [L, 50 (a, 14).]

THERMOSYSTALTIC, adj. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{si}^{\text{st}}-\text{a}^{\text{l}}/\text{t}^{\text{i}}-\text{k}$. Contracting under the action of heat (said of a muscle). [K.]

THERMOSYSTALTISM, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{si}^{\text{st}}-\text{a}^{\text{l}}/\text{i}^{\text{s}}-\text{m}$. From *θερμῶν*, heat, and *συστάλιν*, to contract. The contractility of muscular tissue due to sudden changes of temperature. [L, 49 (a, 14).]

THERMOTAXIC, adj. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{ta}^{\text{x}}/\text{i}^{\text{k}}$. Pertaining to thermotaxis. [a, 34.]

THERMOTAXIS (Lat.), n. f. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{ta}^{\text{x}}/\text{i}^{\text{s}}(-\text{ta}^{\text{x}})/\text{i}^{\text{s}}$. Gen., *-tax/eos* (-is). From *θερμῶν*, heat, and *τάξις*, arrangement. The influence of the production of animal heat. [a, 34.]

THERMOTERION (Lat.), n. n. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{te}(\text{ta}^{\text{s}})/\text{r}^{\text{i}}-\text{o}^{\text{n}}$. From *θερμῶν*, heat. An apparatus consisting of a glass

vessel surrounded by a hot-water chamber outside of which is an air-space that retards the loss of heat. Used to keep food warm. ["Lancet," 1867, 1, p. 104 (a, 34).]

THERMOTHERAPEIA (Lat.), n. f. $\text{Thu}^{\text{r}}\text{m}(\text{the}^{\text{r}}\text{m})-\text{o}(\text{o}^{\text{s}})-\text{the}^{\text{r}}-\text{a}^{\text{p}}(\text{a}^{\text{p}})/\text{i}^{\text{s}}-\text{a}^{\text{s}}$. From *θερμῶν*, heat, and *θεραπεία*, medical treatment. Fr., *thermothérapie*. Ger., *Thermotherapie*. The therapeutic use of heat, especially of hot baths. [L, 57 (a, 14).]

THERMOTONOMETEER, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{to}^{\text{n}}-\text{o}^{\text{m}}-\text{e}^{\text{t}}-\text{u}^{\text{r}}$. From *θερμῶν*, heat, *τόνος*, a stretching, and *μέτρον*, a measure. An instrument devised by Gruenhagen for measuring the amount of muscular contraction induced by various thermic stimuli. [K.]

THERMO-TRACHEOTOMY, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}-\text{tra}^{\text{c}}-\text{h}-\text{e}-\text{o}^{\text{t}}-\text{o}^{\text{m}}/\text{i}^{\text{s}}$. Tracheotomy with the actual cautery.

THERMOTROPISM, n. $\text{Thu}^{\text{r}}\text{m}-\text{o}^{\text{t}}-\text{ro}^{\text{p}}/\text{i}^{\text{s}}-\text{m}$. From *θερμῶν*, heat, and *τροπή*, a turning. Ger., *Thermotropismus*. The phenomenon observed in some plant-organs of bending toward or away from a source of heat, as in curvatures produced by the ultra-red or dark heat rays of the spectrum. [a, 35.]

THERMORPHIA (Lat.), n. f. $\text{The}^{\text{r}}(\text{thar})-\text{o}(\text{o}^{\text{s}})-\text{mo}^{\text{r}}/\text{f}^{\text{i}}-\text{a}^{\text{s}}$. From *θῆρ*, a wild beast, and *μορφή*, form. A monstrosity characterized by resemblance to a lower animal. [A, 319 (a, 34).]

THEROTYPIA (Lat.), n. f. $\text{The}^{\text{r}}(\text{thar})-\text{o}(\text{o}^{\text{s}})-\text{ti}^{\text{p}}(\text{tu}^{\text{p}})/\text{i}^{\text{s}}-\text{a}^{\text{s}}$. From *θῆρ*, a wild animal, and *τύπος*, an impression. Fr., *therotypie*. See *THEROMORPHIA*.

THESAURUS (Lat.), n. m. $\text{The}^{\text{s}}(\text{thas})-\text{a}^{\text{r}}/\text{u}^{\text{s}}(\text{u}^{\text{s}})-\text{u}^{\text{s}}(\text{u}^{\text{s}})$. Gr., *θησαυρός*, treasure, also a storehouse. [a, 48.]—**T. medicamentorum**. Ger., *Arzneischatz*. The drugs collectively that are used in medicines and found in shops (nearly identical with *material medica*). [B, 270.]

THESPIA (Lat.), n. f. $\text{The}^{\text{s}}-\text{pez}(\text{pe}^{\text{s}})/\text{i}^{\text{s}}-\text{a}^{\text{s}}$. From *θεσπίσιος*, divinely sounding. A genus of *Thalassaceae* trees or herbs of the *Thespieae* (a division of the *Hibisceae*). [a, 35.]—**T. macrophylla**. A tree found in the islands of the Indian Ocean; used like *T. populnea*. [a, 35.]—**T. populnea**. Mahoe of Demerara, portia-unt oil plant, umbrella-tree; found in India, western Africa, the West Indies, etc. The unripe capsules and the flower buds yield a viscid yellow dye-juice, which is used, as is also a decoction of the bark, as a wash in skin diseases. The seeds furnish a thick oil. The root is used in low fevers, pleurisy, etc., and the inner bark as an oxytocic. [a, 35.]

THETISMUS (Lat.), n. m. $\text{The}^{\text{t}}-\text{i}^{\text{s}}/\text{i}^{\text{s}}(\text{i}^{\text{s}})/\text{m}^{\text{s}}(\text{m}^{\text{s}})/\text{i}^{\text{s}}$. Lispering. **THEVERESIN**, n. $\text{Te}^{\text{v}}-\text{e}^{\text{r}}-\text{e}^{\text{s}}/\text{i}^{\text{s}}-\text{m}$. Fr., *thévéresine*. Ger., T. A poisonous substance, $\text{C}_8\text{H}_{10}\text{O}_2 + 2\text{H}_2\text{O}$, found in *Thevetia nerifolia*, and also obtained by decomposing thevetin with dilute mineral acids; a rather cohesive white powder. [B, 270 (a, 38).]

THEVETIA (Lat.), n. f. $\text{T}^{\text{e}}-\text{v}^{\text{e}}/\text{i}^{\text{s}}-\text{a}^{\text{s}}$. From *Thevet*, a French monk and traveler. Fr., *thévetie*. 1. The genus *Genipa*. 2. A genus of American apocynaceous shrubs. *Thevetia* of De Candolle are a subtribe of the *Carissaceae*. [a, 35.]—**T. ahovali**. Ger., *Ahovalbaum*. Serpent's-bane; a Brazilian tree having acid and narcotic properties. The kernels are used as an emetic, an extract of the plant as a febrifuge, and the wood to stupefy fish. [a, 35.]—**T. iccotti**. The *yoyote* or *narciso amarillo*, a large tree of the valleys of the Mexican Cordilleras. The seeds, known as *huesos de fraile*, contain thevetosin, which is said to be stimulant to the circulation and respiration in moderate doses, but in large quantities to be emetic and to cause paralysis of the heart and some part of the respiratory apparatus. In Mexico the seeds are used for rattlesnake-bites and hemorrhoids, but their use is said to be dangerous. The poisonous milky juice of the plant has been used in deafness and skin diseases. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168; "Proc. of the Am. Pharm. Assoc.," xxv (a, 14); a, 35.]—**T. nerifolia**. A native of South America, naturalized in the East Indies, where it is known as exile tree (or oil-plant). It is closely allied to *T. iccotti* and, like that, contains a highly poisonous juice. The seeds, used in snake-bites, contain thevetin and theveresin, and in toxic doses produce vomiting, a feeble pulse, delirium, and coma. A clear yellow oil extracted from them is a powerful acro-narcotic poison. The bitter, purgative bark is considered febrifuge. ["Proc. of the Am. Pharm. Assoc.," xxx (a, 50); a, 35.]

THEVETIN, n. $\text{Te}^{\text{v}}-\text{e}^{\text{t}}/\text{i}^{\text{s}}-\text{m}$. Fr., *thévéline*. 1. A poisonous glucoside, $\text{C}_{26}\text{H}_{40}\text{O}_{24} + 3\text{H}_2\text{O}$, obtained from the seeds of *Thevetia nerifolia*, and occurring as a white crystalline powder. [B, 5, 63, 270 (a, 14, 38).] 2. Of Herrera, see *THEVEROSIN*.

THEVETOSIN, n. $\text{Te}^{\text{v}}-\text{e}^{\text{t}}/\text{o}^{\text{s}}/\text{i}^{\text{s}}-\text{m}$. A crystalline poisonous glucoside, perhaps identical with thevetin, obtained from the seeds of *Thevetia iccotti*. [B, 270.]

THIACETIC, adj. $\text{Thi}-\text{a}^{\text{s}}-\text{e}^{\text{t}}/\text{c}^{\text{e}}/\text{i}^{\text{s}}-\text{k}$. From *θειον*, sulphur, and *acetum* (q. v.), *thiaceutic*. Containing acetyl with sulphur replacing oxygen.—**T. acid**. Fr., *acide thiactique*. Ger., *Thiactessäure*, *Thiessigsäure*. An acid, $\text{C}_2\text{H}_2\text{SO} = \text{CH}_2\text{CO}_2\text{H}$. It is a colorless liquid, having an odor of both acetic acid and sulphureted hydrogen. [B, 3, 4.]—**T. aldehyde**. Fr., *aldéhyde thiactique*. Ger., *Thiactaldehyd*. Ethylidene sulphide, $\text{C}_2\text{H}_4\text{S}$; not yet perfectly isolated. Thioparaldehyde is a polymeric form. [B.]—**T. anhydride**. Fr., *anhydride thiactique*; a colorless oily liquid, $(\text{C}_2\text{H}_2\text{O})_2\text{S}$. [B, 3, 4.]

THIACETONE, n. $\text{Thi}-\text{a}^{\text{s}}/\text{e}^{\text{t}}-\text{o}^{\text{n}}$. Ger., *Thiacteton*. A yellowish oily liquid, $\text{C}_2\text{H}_4\text{S}_2$, having a very disagreeable odor. [B, 4.]

THIACETYLENIC ACID, n. $\text{Thi}-\text{a}^{\text{s}}-\text{e}^{\text{t}}-\text{i}^{\text{s}}-\text{e}^{\text{n}}/\text{i}^{\text{s}}-\text{k}$. See *THIACETIC acid*.

THIALDINE, n. $\text{Thi}-\text{a}^{\text{l}}/\text{d}^{\text{e}}\text{n}$. Fr., t. Ger., *Thialdin*. A body of the formula $(\text{C}_2\text{H}_5)_2\text{NH}_2\text{S}$; when used without qualification, ethylidene t., $(\text{C}_2\text{H}_5)_2\text{NH}_2\text{S}_2 = \text{C}_2\text{H}_5\text{NHS}_2$. [B, 3 (a, 38); B, 4.]

THIALÖL (Ger.), n. $\text{Te}^{\text{a}^{\text{l}}}/\text{u}^{\text{l}}$. Ethyl persulphide. [B.]

THIANILINE, n. $\text{Thi-a}^2\text{n}^1\text{l}^2\text{-en}$. Fr., t. A colorless, very stable, crystalline substance, $\text{C}_{12}\text{H}_{12}\text{N}_2\text{S}$, obtained by the direct action of sulphur on aniline. [B, 38 (a, 14).]

THIER (Ger.), n. Ter. See ANIMAL.—**Sament'**. See SPERMATOZOON.—**Tarzneikunst**, **Theilkunde**. See *Veterinary medicine*.—**Tarz**. See *Veterinary surgeon*.—**T'kein**. See EMBRYO (1st def.).—**T'lymph**. Vaccine taken from an animal. [L, 57 (a, 14).]—**T'pocken**. See COX-POX.—**T'seuche**. See EPIZOOTY.—**T'wahn**. See ZOANTHEROPY.

THIERCHEN (Ger.), n. Ter. $\text{ch}^2\text{e}^2\text{n}$. An animalcule.

THIERS (Fr.), n. Te- e^2r . A place in the department of the Puy-de-Dôme, France, where there is a chalybeate spring. [a, 14.]

THIGH, n. Thi. Gr., unpós . Lat., *femur, meros*. Ger., *Oberschenkel*. The upper portion of the lower limb between the knee and the hip. [L.]

THIMBLE, n. $\text{Thi}^2\text{m}^1\text{b}^1$. A cap used to protect the finger which pushes the needle in sewing. [a, 43].—**Burr t.** A dental drill which rests upon a socket connected with an open ring worn around the index finger. [E.]

THIOACETIC, adj. $\text{Thi-o-a}^2\text{s-et}^2(\text{e}^2\text{b})^1\text{i}^2\text{k}$. See THIACTIC.

THIOALCOHOL, n. $\text{Thi-o-a}^1\text{l}^1\text{k-o-ho}^1\text{l}$. See MERCAPTAN.

THIOALDEHYDE, n. $\text{Thi-o-a}^1\text{l}^1\text{de}^2\text{-hid}$. An aldehyde in which sulphur replaces the oxygen. The formula of the t^1s is $\text{C}_2\text{H}_5\text{S}$. [B, 6.]

THIOANHYDRIDE, n. $\text{Thi-o-a}^2\text{n-hi}^1\text{dri}^1\text{d}^2(\text{drid})$. An anhydride in which sulphur replaces oxygen. [B, 4.]

THIOANTIMONIC ACID, n. $\text{Thi-o-a}^2\text{n-ti}^2\text{m-on}^1\text{i}^2\text{k}$. 1. Antimony pentasulphide. 2. A hypothetical acid, SbH_5S_4 . [B, 270 (a, 38).]

THIOANTIMONIOUS ACID, n. $\text{Thi-o-a}^2\text{n-ti}^2\text{-mon}^1\text{i}^2\text{u}^2\text{s}$. A hypothetical acid, SbH_5S_3 . [B, 270 (a, 38).]

THIOANTIMONITE, n. $\text{Thi-o-a}^2\text{n-ti}^2\text{m-on}^1\text{i}^2\text{-it}$. A salt formed by the combination of antimony trisulphide with a basic metallic sulphide. When the latter is the protosulphide of an alkali metal, the compound salt is termed *iter* of antimony.

THIOARSENATE, n. $\text{Thi-o-a}^2\text{rs-e}^2\text{n-at}$. Also called *sulphoarsenate*. A salt of thioarsenic acid, or an arsenate in which sulphur replaces the oxygen. [B.]

THIOARSENIC ACID, n. $\text{Thi-o-a}^2\text{rs-e}^2\text{n-i}^2\text{k}$. Also called *sulphurarsenic acid*. Arsenic acid in which sulphur takes the place of oxygen. H_3AsS_3 , known through its salts, the thioarsenates. [B.]

THIOARSENIOUS ACID, n. $\text{Thi-o-a}^2\text{rs-e}^2\text{n-i}^2\text{-u}^2\text{s}$. Arsenious acid in which sulphur replaces oxygen, H_3AsS_2 ; known through its salts, the thioarsenites. [B.]

THIOARSENITE, n. $\text{Thi-o-a}^2\text{rs-e}^2\text{n-it}$. A salt of thioarsenic acid, or an arsenite in which sulphur replaces the oxygen (*i. e.*, a compound sulphide of arsenic and another element). [B.]

THIOBENZAMIDE, n. $\text{Thi-o-be}^2\text{n-a}^2\text{m-i}^2\text{d}(\text{id})$. The compound $\text{C}_6\text{H}_5\text{CS.NH}_2$. [B, 3 (a, 38).]

THIOBENZOIC ACID, n. $\text{Thi-o-be}^2\text{n-z-o-i}^2\text{k}$. A crystalline acid, $\text{C}_6\text{H}_5\text{CO.SH}$. [B, 3 (a, 38).]

THIOBROMIDE, n. $\text{Thi-o-brom}^1\text{i}^2\text{d}(\text{id})$. A compound of bromine and sulphur with the same element or radicle. [B.]

THIOCAMF, n. $\text{Thi}^1\text{o-ka}^2\text{mf}$. A liquid disinfectant consisting apparently of a mixture of camphor and sulphur dioxide. [B, 270 (a, 38).]

THIOCARBAMIC ACID, n. $\text{Thi-o-ka}^2\text{rb-a}^2\text{m-i}^2\text{k}$. An acid, CS.NH_2 , occurring as colorless acicular crystals. [B, 270 (a, 38).]

THIOCARBANILIDE, n. $\text{Thi-o-ka}^2\text{rb-a}^2\text{n-i}^2\text{l-i}^2\text{d}(\text{id})$. See DIPHENYLTHIOUREA.

THIOCARBIMIDE, n. $\text{Thi-o-ka}^2\text{rb-i}^2\text{m-i}^2\text{d}(\text{id})$. See ISOTHIOCYANATE.

THIOCARBONATE, n. $\text{Thi-o-ka}^2\text{rb-o}^2\text{n-at}$. A salt of thio-carbonic acid. Such salts have the formulae of the carbonates with sulphur replacing the oxygen. [B.]

THIOCARBONIC ACID, n. $\text{Thi-o-ka}^2\text{rb-o}^2\text{n-i}^2\text{k}$. Ger., *Kohlenschwefelwasserstoffsäure*. An unstable substance, H_2CS_2 ; a deep-yellow, oily liquid of exceedingly disagreeable odor. [B, 3.]

THIOCARBONYL, n. $\text{Thi-o-ka}^2\text{rb-o}^2\text{n-i}^2\text{l}$. A radicle, CS^1 , found in thiocarbonic acid. [B.]

THIOCHLORIDE, n. $\text{Thi-o-klor}^1\text{i}^2\text{d}(\text{id})$. A compound of chlorine and sulphur with the same element or radicle. [B.]

THIOCHRESOL, n. $\text{Thi-o-kre}^2\text{s-o}^2\text{l}$. Fr., *thiochresol*. A substance, $\text{C}_6\text{H}_4(\text{CH}_3)_2\text{SH}$, known in three isomeric forms: *ortho*¹, small tabular crystals; *meta*², a liquid; and *para*³, large tabular crystals. [B, 3 (a, 38).]

THIOCYANACETIC ACID, n. $\text{Thi-o-si-a}^2\text{n-a}^2\text{s-et}^2(\text{e}^2\text{t})^1\text{i}^2\text{k}$. A monobasic acid, $\text{CH}_3(\text{SCN}).\text{COOH} = \text{C}_2\text{H}_3\text{SNO}_2$. [B, 3.]

THIOCYANIC ACID, n. $\text{Thi-o-si-a}^2\text{n-i}^2\text{k}$. Fr., *acide thiocyanique*. An acid, SCN.H , occurring as an unstable colorless liquid of persistent odor. [B, 270 (a, 38).]

THIOCYANURIC ACID, n. $\text{Thi-o-si-a}^2\text{n-u}^2\text{r-i}^2\text{k}$. An acid, $(\text{N} \equiv \text{C}-\text{SH})_2 = \text{C}_2\text{S}_2\text{N}_2\text{H}_2$, derived from cyanuric acid by substituting sulphur for oxygen; a yellow granular powder. [¹ Am. Jour. of Sci., ¹ Dec., 1885 (B).]

THIOCYMENE, **THIOCYMOL**, **THIOCYMOPHENOL**, n's. $\text{Thi-o-si}^1\text{men}$, $\text{-si}^1\text{mo}^1\text{l}$, $\text{-sim-o-fe}^2\text{n-o}^2\text{l}$. Cymophenol in which sulphur replaces oxygen; a liquid, $\text{C}_6\text{H}_4(\text{CH}_3)(\text{C}_6\text{H}_7).\text{SH}$. [B, 3 (a, 38).]

THIODIGLYCOLLIC ACID, n. $\text{Thi-o-di-gli}^2\text{k-o}^2\text{l}^1\text{i}^2\text{k}$. A dibasic acid, $\text{S}(\text{CH}_2\text{CO.OH})_2$. [B.]

THIOETHER, n. $\text{Thi-o-eth}^1\text{u}^2\text{r}$. An ether in which an atom of sulphur replaces an atom of oxygen; a sulphide of a double hydrocarbon molecule. The general formula of the thioethers is $\text{C}_n\text{H}_{2n+2} + \text{C}_m\text{H}_{2m+1}.\text{S}$. [B.]

THIOETHYLENE, n. $\text{Thi-o-e}^2\text{th}^1\text{i}^2\text{-at}$. A compound of a metal with ethyl thioalcohol (ethyl mercaptan); a mercaptide of ethyl. [B.]

THIOFORMALDEHYDE, n. $\text{Thi-o-f}^2\text{o-rm}^1\text{i}^2\text{k a}^1\text{l}^1\text{de}^2\text{-hid}$. See METHYLENE sulphide.

THIOGLYCERIN, n. $\text{Thi-o-gli}^2\text{s-e}^2\text{r-i}^2\text{n}$. Trisulphhydrin. [B.] See SULPHYDRIN.

THIOGLYCOL, n. $\text{Thi-o-gli}^2\text{k-o}^2\text{l}$. A compound of a bivalent hydrocarbon with two molecules of the univalent radicle (SH^1), and hence regarded as a glycol (diatomic alcohol) in which oxygen atoms in both of the molecules of hydroxyl are replaced by sulphur. General formula: $\text{C}_n\text{H}_{2n}(\text{SH})_2$. [B, 4.]

THIOGLYCOLLIC ACID, n. $\text{Thi-o-gli}^2\text{k-o}^2\text{l}^1\text{i}^2\text{k}$. See MERCAPTOACETIC ACID.

THIOHYDANTOIN, n. $\text{Thi-o-hid-a}^2\text{n-to}^1\text{-i}^2\text{n}$. A crystalline body, $\text{C}_5\text{H}_4\text{N}_2\text{OS} = \text{CH}_2\text{CO} : \text{N}_2\text{H}_2.\text{CS}$. [B, 4.]

THIOL, n. $\text{Thi}^1\text{o-l}$. An artificial mixture of sulphureted hydrocarbons closely resembling lichenol in chemical character and medicinal action. It occurs in commerce in liquid form (a 40-per cent. solution) and in powder or thin layers. [B, 270 (a, 38).]

THIOLACTIC ACID, n. $\text{Thi-o-la}^2\text{kt}^1\text{i}^2\text{k}$. A monobasic acid, $\text{C}_3\text{H}_6\text{SO}_2 = \text{CH}_3.\text{CH}(\text{SH}).\text{COOH}$. [B, 3.]

THIOMETHYLATE, n. $\text{Thi-o-me}^2\text{th}^1\text{i}^2\text{-at}$. A compound of methyl mercaptan with a metal; a methylic mercaptide. [B.]

THIOMOLYBDATE, n. $\text{Thi-o-mo}^2\text{l-i}^2\text{b-dat}^1$. A compound of a basic sulphide with molybdenum trisulphide, or a molybdate in which sulphur replaces oxygen. [B, 3.]

THION (Lat.), n. n. $\text{Thi}^1(\text{the})^1\text{o}^2\text{n}$. Gr., $\theta\epsilon\iota\omega\nu$. See SULPHUR.

THIONINE, n. $\text{Thi}^1\text{o-n-en}$. An alkaloid, $\text{C}_{12}\text{H}_8\text{N}_2\text{S}$, obtainable as a black crystalline powder or as small acicular crystals of a slight green lustre. [B, 3 (a, 38).]—**T. hydrochloride**. Lauth's violet, $\text{C}_{12}\text{H}_8\text{N}_2\text{S.HCl}$, occurring as small acicular or prismatic crystals having a metallic green lustre. [B, 3 (a, 38).]

THIONOL, n. $\text{Thi}^1\text{o-n-o}^2\text{l}$. Dioxithiodiphenylimide, $\text{C}_{12}\text{H}_7\text{NSO}_2$. [B, 3 (a, 38).]

THIONOLINE, n. $\text{Thi-o-n-o}^2\text{l-en}$. The compound $\text{C}_{12}\text{H}_8\text{N}_2\text{SO}$. [B, 3 (a, 38).]

THIONURIC ACID, n. $\text{Thi-o-n-u}^2\text{r-i}^2\text{k}$. Fr., *acide thionurique*. Ger., *Thionursäure, Thiokarnsäure*. A dibasic crystalline acid, $\text{C}_4\text{H}_2\text{N}_2\text{SO}_4$. [B, 3.]

THIONYL, n. $\text{Thi}^1\text{o-n-i}^2\text{l}$. Fr., *thionyle*. Ger., *T.* A bivalent radicle, $(\text{Sn}^1\text{O})^2$. [B.]—**Diamyl t.** See AMYL sulphoxide.—**T. chloride**. A colorless fuming liquid, SOCl_2 . [B, 3.]

THIOOXAMIDE, n. $\text{Thi-o-o}^2\text{x-a}^2\text{m-i}^2\text{d}(\text{id})$. An acid, $(\text{CS})_2.(\text{NH}_2)_2$, occurring as reddish-yellow crystals. [B, 3 (a, 38).]

THIOOXYCARBONATE, n. $\text{Thi-o-o}^2\text{x-i}^2\text{-ka}^2\text{rb-o}^2\text{n-at}$. A salt of the general constitution $\text{O} : \text{C} \begin{smallmatrix} \text{O.R}^1 \\ \text{S.R}^1 \end{smallmatrix}$. [B.]

THIOOXYDIPHENYLAMINE, n. $\text{Thi-o-o}^2\text{x-i}^2\text{-di-fe}^2\text{n-i}^2\text{l-a}^2\text{m-en}$. See SULPHAMINOL.

THIOPARALDEHYDE, n. $\text{Thi-o-pa}^2\text{r-a}^2\text{l-d}^2\text{-e}^2\text{-hid}$. A substance, $\text{C}_6\text{H}_5\text{S}_2$, known in two isomeric forms. α -t, white prismatic or tabular crystals, and β -t, shining acicular crystals. [B, 3 (a, 38).]

THIOPHENE, n. $\text{Thi}^1\text{o-fen}$. Fr., *thiophène*. Ger., *Thiophen*. A colorless, strongly-refracting, oily liquid, $\text{C}_4\text{H}_4\text{S}$, found in benzene obtained from coal-tar. [B, 3].—**T. diiodide**. An aromatic, non-toxic, and non-irritant body, used as an antiseptic. [¹ Brit. Med. Jour., ¹ March 19, 1892 (a, 50).]

THIOPHENIC ACID, n. $\text{Thi-o-fe}^2\text{n-i}^2\text{k}$. A crystalline acid, $\text{C}_6\text{H}_5\text{S.COOH} = \text{C}_6\text{H}_5\text{SO}_2$, analogous in structure and properties to benzoic acid. [B, 3.]

THIOPHENITRILE, n. $\text{Thi-o-fe}^2\text{n-it}^1\text{i}^2\text{-n-i}^2\text{l}$. A liquid, $\text{C}_6\text{H}_5\text{S-CN} = \text{C}_6\text{H}_5\text{NS}$, resembling closely benzonitrile. [B.]

THIOPHENOL, n. $\text{Thi-o-fe}^2\text{n-o}^2\text{l}$. See PHENYL mercaptan.

THIOPHOSPHATE, n. $\text{Thi-o-f}^2\text{o-s}^2\text{-fat}$. A salt of thiophosphoric acid; a phosphate that has one atom of its oxygen replaced by sulphur. [B.]

THIOPHOSPHORIC ACID, n. $\text{Thi-o-f}^2\text{o-s}^2\text{-fo}^2\text{r-i}^2\text{k}$. An acid, H_3PSO_3 , known only through its salts, the thiophosphates. [B.]

THIOPHOSPHORYL, n. $\text{Thi-o-f}^2\text{o-s}^2\text{-fo}^2\text{r-i}^2\text{-l}$. The trivalent radicle of thiophosphoric acid, S^2P^3 . [B.]

THIOPICRIC ACID, n. $\text{Thi-o-pi}^2\text{k-r-i}^2\text{k}$. Fr., *acide thiopicroique*. α -trinitrothiophenol; an acid, $\text{C}_6\text{H}_3(\text{NO}_2)_3\text{SH}$, occurring as yellowish acicular crystals of bitter taste. [B, 3 (a, 38).]

THIOSINAMINE, n. $\text{Thi-o-si}^1\text{n-am-en}$. Fr., *thiosinamine*. Ger., *Thiosinamin*. See ALLYL-thiourea.

THIOSTANNIC ACID, n. $\text{Thi-o-sta}^2\text{n-i}^2\text{k}$. A dark powder, H_2SnS_3 , of waxy appearance. [B, 3.]

THIOSULPHATE, n. $\text{Thi-o-su}^1\text{l-fat}$. Syn.: *sulphosulphate, hypsulphite*. A salt of thiosulphuric acid. The t^1s include the normal t^1s , $\text{R}_2(\text{S}_2\text{O}_3)$, or $\text{R}^1(\text{S}_2\text{O}_3)$, and the acid t^1s , $\text{Rm}(\text{HS}_2\text{O}_3)_n$, where Rm is a radicle whose combining power is n . [B.]

THIOSULPHURIC ACID, n. $\text{Thi-o-su}^1\text{l-i}^2\text{u}^2\text{r-i}^2\text{k}$. An acid, $\text{S}_2\text{O}_3\text{H}_2$, known only in its salts, the thiosulphates. [B, 46 (a, 39).]

THIO-THIO, n. $\text{Thi-o-thi}^1\text{o}$. Palm oil (from *Elaeis guineensis*). [B, 121 (a, 35).]

THIOUREA, n. $\text{Thi-o-u}^2\text{-re}^2\text{-a}^2$. A crystalline solid, CSNH_2 , or urea in which sulphur replaces oxygen. [B, 4.]

THIOURIC ACID, n. Thi-o-u-r²i²k. See THIONURIC ACID.

THIOXYDIPHENYLAMINE, n. Thi-o-x-i²-di-fe-n-i²-a²m-²n. See SULPHAMINOL.

THIRST, n. Thir²st. Gr. *δίψα*. Lat., *sitis*. Fr., *soif*. Ger., *Durst*. A desire to drink; an uneasy sensation of craving for drink. [K.]

THISTLE, n. Thi²s²l. A prickly composite plant, especially one belonging to any of the genera *Carduus*, *Cnicus*, or *Onopordion*. [a. 35.]—**Blessed t.** 1. See *Centaurea benedicta* and *Silybum marianum*.—**Canada t.** See *Cnicus arvensis*.—**Carline t.**, *Carolina t.*, *Caroline t.* The genus *Carolina*. [a. 35.]—**Corn-t.** See *Cnicus arvensis*.—**Cotton-t.** See *Onopordion acanthium*.—**Friar's t.** See *Cnicus eriphorus*.—**Fuller's t.** See *Dirisacus fullonum*.—**Globe-t.** See the major list.—**Gum-t.** One of various species of *Euphorbia*. [a. 35.]—**Melon-t.** The genus *Melocactus*. [a. 35.]—**Milk-t.** See *Silybum marianum* and *Sonchus oleraceus*.—**Plumed t.** The genus *Cnicus*, especially *Cnicus lanceolatus*. [a. 35.]—**Sow-t.** The genus *Sonchus*, also the genus *Athyrium* and species of *Mulgedium*. [a. 35.]

THLASIS (Lat.), n. Thlas(thl²s²)i²s. Gen., *thlas'eos* (-is). Gr., *θάλας* (from *θαλά*, to bruise). A contusion; of Vogel, a depression of the calvaria near a fracture of the skull. [a. 34.]

THLASMA (Lat.), n. n. Thlas²z(thl²s²)ma²s. Gen., *thlas'matos* (-is). Gr., *θάλαμα*. A contusion; of Galen, an injury, such as a contusion or contusion, in which there is no solution of tissue continuity. [a. 34.]—**T. strema**. See SPRAIN.

THLASPI (Lat.), n. n. Thlas²sp(thl²sp)i²i²s. Gr., *θάλασπι*. Gen., *thlas'pēos* or *thlas'pi* (indecl.). Fr., *t. tabouret* (1st def.). Ger., *Täschelkraut* (1st def.). 1. Bastard-cress, besom-weed; a genus of cruciferous herbs. 2. Of Adanson, a section of the *Cruciferae*. The *Thlaspidæ*, *Thlaspidæ* (Fr., *thlaspidées*), or *Thlaspidæ* are a tribe of cruciferous plants, containing *T.* (1st def.), *Capsella*, etc. [a. 35.]—**Herba thlaspeos** (sen t.). The herb of *Capsella bursa pastoris*. [a. 35.]—**Semen thlaspeos**. The seed of *T. arvense* and *Lepidium campestre*. [a. 35.]—**T. alliacum**. Fr., *tabouret à odeur d'ail*. Ger., *lauchduftiges Täschelkraut*. A European species closely allied to *T. arvense*; formerly official as *herba scorodithlaspeos*. [a. 35.]—**T. alpestre**, *T. alpinum*. Fr., *tabouret des Alpes*. Ger., *Alpentasche*. A European species. The leaves are used as a salad. [a. 35.]—**T. arvense**. Fr., *t. (ou tabouret)*, *tabouret à grande tige* (ou *arvensis* des champs), *monardère*. Ger., *Acker-täschelkraut*, *Bauernkrasse*. Boor's mustard, dish-mustard, penny-(or wild) cress; found throughout Europe. The seeds, formerly official as *semen t.* (see *thlaspeos*, see *thlaspeos arvensis*), are stimulant, diuretic, and alterative, but are not now used. The leaves are astringent and antiscorbutic. [a. 35.]—**T. bursa pastoris. See *Capsella bursa pastoris*.—**T. campestre**. See *Lepidium campestre*.—**T. maritimum**. See *Lobelia maritima*.—**T. perfoliatum**. Fr., *tabouret perfolié*, *moucelte*, *piosselle siliculuse*. A European salad species. The seeds were formerly official, like those of *T. arvense*, as *semen thlaspeos*, etc. [a. 35.]—**T. rudérale**. See *Lepidium rudérale*.—**T. sativum**. See *Lepidium sativum*.**

THLIBODEODERMIS (Lat.), n. f. Thli²b(thl²b)-od-e²-o(-o²)-du²rm(de²rm)-i(e²)t²i²s. Gen., *thli'dos* (-idis). From *thli*, to press, *eidos*, resemblance, and *dema*, the skin. Fr., *thlibodermite*. A cutaneous inflammation resembling a bruise. [L. 50 (a. 14).]

THLIPENCEPHALUS (Lat.), n. m. Thli²ps(thl²ps)-en²-e(n²)p-se²(ke²f)al²(a²l)-u²s(u²s). From *thli*, pressure, and *enkephalos*, the brain. Fr., *thlipencephale*. Of G. St. Hilaire, a monster in which the brain has remained undeveloped in consequence of intra-uterine compression of the fetal head. [a. 34.]

THLIPSIS (Lat.), n. f. Thli²ps(thl²ps)i²s. Gen., *thlips'eos* (-is). Gr., *θλίψις*. Fr., *thlipsis*. Ger., *Thlissendruckung*. Compression. [L. 41, 50, 56 (a. 14).]

THNEOBlaste (Fr.), n. Thnat-o-bla²st. See *Cancer CELL*.

THOMSEAN, adj. To²ms-en²e²n. Pertaining to Thomson's disease (q. v.). [C. H. Hughes, "N. Y. Med. Jour.," July 17, 1886, p. 70.]

THOMSONIAN, adj. To²ms-on²i²n. Pertaining to Thomsonism; as a n., a believer in or practitioner of it. [D.]

THOMSONIANISM, **THOMSONISM**, n's. Tho²ms-on²i²n-i²zm, to²ms-u²n-i²zm. From Thomson (see below). A system of medicine devised by Samuel Thomson, of Massachusetts. It maintains that the human body is composed of four elements—earth, air, fire, and water; also that, since metals and minerals are heavy and are obtained from the earth, their employment for therapeutic purposes will tend to draw those who use them downward toward the earth, whereas, as vegetables develop upward, the use of them tends to develop and benefit those who employ them. [D. 20.]

THON (Ger.), n. Ton. See ARGH and CLAY.—**Tähnlich**, **T-artig**. See ARIOLEACEOUS.

THONERDE (Ger.), n. Ton²e²rd-e². See ALUMINA and CLAY.—**Arsenauere T.** See ALUMINUM arsenate.—**Essigsaure T.** See ALUMINUM acetate.—**Gerbsaure T.** See ALUMINUM tannate.—**Salzsaure T.** See ALUMINUM chloride.—**Thydrat.** See ALUMINUM trihydrate.—**Tolcat.** An oleate of aluminum, used for mucopurulent cutaneous exudations and as dressing for fetid ulcers. [B. 108 (a. 14).]—**Weinsaure T.** See ALUMINUM tartrate.

THORA (Lat.), n. f. Thor²a²s. 1. An old term for *Aconitum napellus*. 2. See RANUNCULUS *z*.

THORACENTESIS (Lat.), n. f. Thor-a²-se²nt(ke²nt)-e(a²)si²z. Gen., *-es'eos* (-is). See THORACOCENTESIS.

THORACHYPEROTROMUS (Lat.), n. m. Thor-a²k(a²ch²)-ip(-u²p)-u²r(e²r)tro²m-u²s(u²s). From *thorapē*, the chest, *hyper*, in excess, and *trōmos*, a trembling. Fr., *thorachypertrome*. Abnormally increased vocal fremitus. [L. 50 (a. 14).]

THORACIC, adj. Tho²r-a²s'i²k. Gr., *θωρακικός*. Lat., *thoracicus*. Fr., *thoracique*. Ger., *thoracisch*. Pertaining to the chest. [L. 343.]

THORACICO-ABDOMINAL, adj. Tho²r-a²s'i²k-o-a²b-do²m'i²n-l. Fr., t.-a. Pertaining to the thorax and the abdomen.

THORACICO-LUMBAR, adj. Tho²r-a²s'i²k-o-lu²mb'a²r. From *thorax*, the chest, and *lumbus*, the loin. Thoracic and lumbar. [L. 153.]

THORACICUS (Lat.), adj. Tho²r(thor)-a²s(a²k)'i²k-u²s(u²s). See THORACIC; as a n. m., see STERNALIS *brutiorum*.

THORACI-SPINAL, adj. Tho²r-a²s-i²sp'i²n-l. From *thorax*, the chest, and *spina*, the spine. Pertaining to the thoracic region and the spinal cord. [E. Coues, "Med. Record," July 30, 1887 (L. 1).]

THORACOCENTESIS (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-se²nt-(ke²nt)-e(a²)si²z. Gen., *-es'eos* (-is). From *thorapē*, the chest, and *κέντρος*, a pricking. Fr., *thoracocentèse*. Ger., *Brusthöhlentest*. Perforation of the chest to evacuate fluid from the pleura. [E.]

THORACOCYLOSIS (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-si²l-(ku²l)-los'i²s. Gen., *-los'eos* (-is). From *thorapē*, the thorax, and *κύλωση*, a crippling. Fr., *thoracocyclose*. Deformity of the thorax.

THORACOCYMECHOS (Lat.), n. m. Tho²r-a²k(a²k)-o(-o²)-si²pm(ku²m)-ek(ach²)y'o²s. From *thorapē*, the chest, *κύμα*, a wave, and *ἦχος*, a sound. Ger., *Brustschülpen*. An undulating sound in the chest heard on succussion. [L. 50 (a. 34).]

THORACOCYRTOMA (Lat.), **THORACOCYRTOSIS** (Lat.), n's n. f. Tho²r-a²k(a²k)-o(-o²)-su²rt(ku²rt)-om'a²-os'i²s. Gen., *-om'atos* (-atis), *-os'eos* (-is). From *thorapē*, the chest, and *κύρτωμα*, a curve, or *κύρσις*, curvosity. Fr., *thoracocyrto*. Ger., *Brustbuckel*. Gibbosity of the thorax or sternum. [L. 50 (a. 14).]

THORACOCYSTIS (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-si²st-(ku²st)'i²s. Gen., *-cyst'ios*, *-cyst'ios* (-is). From *thorapē*, the chest, and *κύστις*, a bladder. Fr., *thoracocyste*. 1. See HYDROTHORAX. 2. A hydatid of the thorax. [L. 50 (a. 14).]

THORACODIDYMUS (Lat.), n. m. Tho²r-a²k(a²k)-o(-o²)-di²d-i²pm(u²m)-u²s(u²s). From *thorapē*, the chest, and *δίδυμος*, twin. Fr., *thoracodidyme*. See THORACOPAGUS.

THORACODYNIA (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-di²n-(du²n)'i²a². From *thorapē*, the chest, and *δύνν*, pain. Fr., *thoracodynie*. Ger., *Brustschmerz*. Pain in the thorax. [L. 41, 50 (a. 14).]

THORACO-FACIAL (Fr.), n. Tor-a²-ko-fa²-se-a²l. See *FLATYSMA myoides*.

THORACOGASTROSCHISIS (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-ga²st(ga²st)-ro²sch'i²o(-sch'i²)s. Gen., *-sch'i'seos* (-sch'i'sis). From *thorapē*, the thorax, *γαστήρ*, the belly, and *σχίζω*, a cleaving. Congenital fissure of the thorax and abdomen. [a. 34.]

THORACOGRAPE (Fr.), n. Thor-a²-ko-gra²p. An instrument for making an outline of the body, especially of the vertebral column in cases of deformity. ["Rev. mens. des mal. de l'enfance," Dec., 1885, p. 574 (D).]

THORACOMETER, n. Tho²r-a²k-o²m'e²t-u²r. From *thorapē*, the chest, and *μετρον*, a measure. Of Sibson, an apparatus, consisting of a spring connected with an index, for indicating variations in the volume of the thorax. [J.] See also STETHOMETER.

THORACOMONODIDYMUS (Lat.), n. m. Tho²r-a²k(a²k)-o(-o²)-mo²n-o(-o²)-di²d-i²pm(u²m)-u²s(u²s). From *thorapē*, the chest, *μόνος*, alone, and *δίδυμος*, double. See THORACOPAGUS *parasiticus*.

THORACOMYODYNIA (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-mi-(mu²)-o(-o²)-di²pm(du²n)'i²a². From *thorapē*, the chest, *μύς*, a muscle, and *δύνν*, pain. Fr., *thoracomyodynie*. Pain in the pectoral muscles. [L. 50 (a. 14).]

THORACOPAGIA (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-pa²j(pa²j)-i²a². The condition of a thoracopagus. [a. 48.]

THORACOPAGUS (Lat.), n. m. Tho²r-a²k(a²k)-o(-o²)-pa²j(-u²s(u²s)). From *thorapē*, the chest, and *πάγος*, anything fixed. Fr., *thoracopage*. That form of double monster in which the individuals are joined by the thorax, having two heads and four upper limbs. [Veit, "Samml. klin. Vortr.," gynäk. No. 48 (a. 50).]—**T. parasiticus**. A t. in which one of the individuals is not fully developed, or is only rudimentary. [L. 57 (a. 14).]

THORACOPATHIA (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-pa²th-(pa²th)-i(e²)a². From *thorapē*, the chest, and *πάθος*, disease. Ger., *Brustkastentende*. Any disease of the thorax. [L. 50 (a. 14).]

THORACOPLASTY, n. Tho²r-a²k-o-pla²st-i². From *thorapē*, the chest, and *πλάσσω*, to mold. Ger., *Rippenresection*. Thoracoplasty. See EXSTENDER'S RESECTION.

THORACOSCHISIS (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-sch'i²y'i²s-i²s. Gen., *-is'eos* (-sch'i'sis). From *thorapē*, the chest, and *σχίζω*, a cleaving. Fr., *thoracoschisis*. See FISSURE of the thorax.

THORACOSCOPY, n. Tho²r-a²k-o²sk'op-i². From *thorapē*, the chest, and *σκοπεῖν*, to examine. Fr., *thoracoscopie*. Exploration of the thoracic cavity, especially by means of the stethoscope.

THORACOSPHYGMUS (Lat.), n. m. Tho²r-a²k(a²k)-o(-o²)-sf'i²g(sfu²g)/mu²si(mu²s). From *thorapē*, the chest, and *σφύγμης*, the pulse. Fr., *thoracosphygme*. See BRUSTPCL.

THORACOSTENOSIS (Lat.), n. f. Tho²r-a²k(a²k)-o(-o²)-ste²n-os'i²s. Gen., *-os'eos* (-is). From *thorapē*, the chest, and *στενός*, stenosis. Fr., *thoracosténose*. Stenosis of the thorax. [L. 50 (a. 14).]

THORACOTOMY, n. Tho²r-a²k-o²t'om-i². From *thorapē*, the chest, and *τομή*, a cutting. Fr., *thoracotomie*. See THORACOCENTESIS.

THORACOTROMUS (Lat.), n. m. Tho²r-a²k(a²k)-o²t'ro²m-u²s(u²s). From *thorapē*, the chest, and *τρώμος*, a trembling. See *Pectoral FREMITUS*.

THORACULUM (Lat.), n. n. Tho²r(thor)-a²k(a²k/u²l(u²l)-u²m(u²m). From *thorax*, the chest. Ger., *Schnürbrust*. See CONSET.

THORADELPHUS (Lat.), n. m. Tho²r-a²d(a²d)-e²l(u²s(u²s)). From *thorax*, the chest, and *adelphos*, a brother. Fr., *thoradelphie*. A double monster, divided below the umbilicus but united above so as to have but a single thoracic cavity and head and two arms. [L. 41, 49 (a, 14)]. Cf. *SYNADELPHUS*.

THORAX (Lat.), n. m. Tho²r-a²x(ax). Gen., -a²os(-is). Gr., *thorax* (lit., a breastplate). Fr., t. Ger., *T. Brustkasten*. It., *torace*. Sp., *tórax*. 1. The cavity bounded by the diaphragm below, the ribs and sternum in front, and the ribs and vertebral column behind, and closed in above by the structures in the lower part of the neck. It contains the heart and lungs and the vessels connected with them, the oesophagus, the sympathetic and the pneumogastric nerves and their ganglia and plexuses, and a portion of the thoracic duct. 2. In arthropods, that portion of the body to which the appendages concerned in motion are almost exclusively, if not wholly, attached. [L.]—**T. paralyticus**. A t. that is deformed in consequence of paralysis of some of the thoracic muscles. [a, 34.]

THOREXIS (Lat.), n. f. Tho²r(thor)-e²x(ax)-i²s. Gen., -e²os(-is). Gr., *thorax* (lit., a breastplate), to intoxicate. Ger., *Berausung*. See INTOXICATION.

THORIA (Lat.), **THORINA** (Lat.), n's f. Tho²r-i²a², tho²r-(thor)-in(en)-a². Fr., *thorine*. Thorium oxide. [B.]

THORIUM (Lat.), n. n. Tho²r-i²-u²m(u²m). Fr., t. Ger., *T.* Also written *thorium*. A metallic element discovered by Berzelius in 1828. It occurs in certain rare minerals. It has been prepared in the pure state as a gray lustrous powder of sp. gr. 7.66 to 7.95. In composition it acts as a tetrad. Symbol, Th; atomic weight, 231.5. [B.]

THORN, n. Tho²rn. A spine; also the genus *Crataegus* and other spiny plants. [a, 35.]—**Leaf t.** A leaf which is contracted into a spine or a petiole which is hardened into a spine after the fall of the blade of the leaf. [a, 35.]—**Purging t.**, **Rhineberry t.** See *RHAMNUS catharticus*.

THORNAPPLE, n. Tho²rn-a²p-l. See *DATURA* and *DATURA stramonium*.

THOROFUORIDE, n. Tho²r-o-flu²-o²r-i²d(id). A compound of thorium fluoride with the fluoride of another element or radicle. [B, 3.]

THOROUGHPIN, n. Tho²r-ro-pi²n. In solipeds, a synovial effusion into a bursa. [L.]

THOROUGHWORT, n. Tho²r-ro-wu²rt. See *EUPATORIUM perfoliatum*.

THORUS (Lat.), n. m. Tho²r(thor)-u²s(u²s). Gr., *thorós*. See SEMEN.

THRÆNINE (Fr.), n. Tra-nen. See *DACRYLIN*.

THRÄNCHEN (Ger.), n. Tran'ch'e²n. See *DACRYDIUM* (1st def.).

THRÄNE (Ger.), n. Tran'e². See *DACRYON* (1st and 2d def's) and *TEAR*.—**T'n'bucht**. See *LACUS lacrimalis*.—**T'neiterfluss**. See *DACRYOPORRHEA*.—**T'nistel**. See *Lacrymal fistula*.—**T'n-furche**. 1. See *Lacrymal groove*. 2. The lacrymal furrow of the embryo, subsequently developed into the lacrymal canal.—**T'ngang**. See *Lacrymal canal* and *Nasal duct*.—**T'ngeschwulst**. *Dacryoma*. [a, 34.]—**T'ngeschwür**. See *DACRYELOSIS*.—**T'n-hügel**. See *Lacrymal caruncle*.—**T'nkanälchen**. See *LACRIMAL lacrimæ*.—**T'nlicher**. See *PUNCTA lacrimalia*.—**T'nnuskel**. See *TENSOR tarsi*.—**T'nrinne**. See *Lacrymal groove*.—**T'nrröhren**. See *CANALICULI lacrimales*.—**T'nischlauch**. The lacrymal sac.—**T'nischlauchentzündung**. See *DACRYOCYSTITIS*.—**T'nischleimfluss**. See *DACRYOLENORRHEA*.—**T'nischwamm**. See *MERULUS lacrimans*.—**T'nsee**. See *LACUS lacrimalis*.—**T'nstein**. See *Lacrymal calculus*.—**T'nwärrchen**. See *Lacrymal caruncle* and *Lacrymal papillæ*.

THRÄNENDRÜSE (Ger.), n. Tran'e²n-dru²s-e². See *Lacrymal gland*.—**T'ngeschwulst**. See *DACRYOPS* and *ENCANTHIS*.—**T'ngrube**. See *Lacrymal fossa*.

THRÄNENSACK (Ger.), n. Tran'e²n-za²k. See *Lacrymal sac*.—**T'bruch**. See *Lacrymal hernia*.—**T'grube**. See *Lacrymal fossa*.

THRASYDEILUS (Lat.), n. m. Tho²r-a²s(thra²s)-i²u²-dil'(de²l'i²l)-u²s(u²s). From *thrasos*, bold, and *deilos*, cowardly. Of Aristotle, a physician who employs very energetic drugs, but with very great caution. [A, 322 (a, 48)].

THREADER, n. Thre²d. Lat., *filum*. Fr., *fil*. Ger., *Faden*. A very slender cord, a filament. [a, 48.]—**Achromatic t's**, **Cell t's**. See *ACHROMATIC FIBRILS*.—**Central epidermal t.** See *SUBSTANTIA gelatinosa centralis*.—**Chromatic t's**. See *Nervous fibres*.—**Daughter t's**. See *Daughter nucleus*.—**Myelial t's**. The hyphae of the mycelium. [a, 35.]—**Nucleus-communication t.** Of Mayer, the t.-like band connecting the two nuclei of a sympathetic-nerve cell whenever there are two. [J, 35.]—**Primary (chromatic, or chromatin) t's**. See *Primary fibres*.—**Protoplasma t's**. Delicate t's or strings of protoplasm, such as those passing from the follicular epithelium through the vitelline membrane in the ova of some fishes. [J, 35.]—**Secondary (chromatic, chromatin, or nuclear) t's**. See *Secondary chromatic fibres*.—**T.-indicator**. See under *AUXANOMETER*.

THREPSIS (Lat.), n. f. Tho²r-ps²i²s. Gen., *threps²eos* (-is). Gr., *threpsis* (from *τρέφειν*, to nourish). Nutrition. [L, 50 (a, 14)].

THREPSOLOGY, n. Tho²r-ps²-o²l'o²j². Lat., *threpsologia* (from *threpsis*, nutrition, and *λόγος*, understanding). Fr., *threpsologie*. The physiology, etc., of nutrition. [L, 50 (a, 14)].

THRESHOLD, n. Thresh'old. See *LIMEN*.

THRIDACE (Fr.), n. Tred-a²s. See *EXTRACTUM LACTUCE* (2d def.) and *LACTUCARIUM*.—**Sirap de t.** See *Syrupus LACTUCARII*.

THRIDACIUM (Lat.), n. n. Thr²i²d-as(a²k)/i²-u²m(u²m). From *thridax*, lettuce. Fr., *thridace*. See *LACTUCARIUM*.

THRIDAX (Lat.), n. f. Thrid(thr²i²d)/a²x(a²x). Gen., *thrid'acos* (-acis). Gr., *thridax*. 1. Of the ancients, lettuce. [a, 35.] 2. See *EXTRACTUM LACTUCE* and *LACTUCARIUM*.—**Syrupus thridacis**. See *Syrupus LACTUCARII*.

THRIFT, n. Thr²ift. See *ARMERIA vulgaris*.

THRILL, n. Thr²ill. Lat., *frémilus*. Fr., *frémissement*. Ger., *Schwirren*, *Zittern*. A tremor discerned by palpation or auscultation. [a, 34.]—**Aortic t.** A t. heard over the aortic aperture in lesions of the orifice or valves. [a, 34.]—**Arterial t.** A t. perceived over an artery. [a, 34.]—**Hydatid t.** The t. felt by palpation over a hydatid cyst. [a, 34.]—**Mitral t.** A t. discerned over the mitral orifice. [a, 34.]—**Presystolic t.** A t. which can sometimes be felt before the systole when the hand is placed over the position of the apex beat. [a, 34.]—**Purring t.** Ger., *Katzenschnurren*. A rough cardiac t. resembling the purring of a cat; often heard in mitral stenosis. [a, 34.]

THRIX (Lat.), n. f. Thr²ix. Gen., *trich'os*, *trich'is*. Gr., *θήξ*. See *HAIR*.

THROAT, n. Tho²rat. Gr., *φάρυγξ*. Lat., *gula*, *guttur*, *jugulum*. Fr., *gorge*. Ger., *Schlund*, *Kehle*. 1. The cavity extending from the arch of the palate to the glottis and the superior opening of the oesophagus; also popularly the front of the neck. 2. The gorge or orifice in a gamophyllous corolla or calyx, including any portion between the limb and the proper tube. [a, 35.]—**Sore t.** See the major list.

THROATWORT, n. Tho²r-wu²rt. The genera *Trachelium* and *Liatris*; also species of *Campanula*, the *Digitalis purpurea*, and the *Scrophularia nodosa*. [a, 35.]

THROBBING, n. Tho²r-b'ib²ing. Gr., *φώνημις*. A rhythmic beating movement, such as that of an inflamed part. [a, 48.]

THROMBOARTERITIS (Lat.), n. f. Tho²rmb-o²(o²)-a²rt-e²r-(ar)-i²(e²)t²is. Gen., -i²idos (-idis). From *thrombos*, a clot, and *arteria*, an artery. Arteritis with thrombosis. [a, 34.]

THROMBOLYMPHANGITIS (Lat.), n. f. Tho²rmb-o²(o²)-l²ymf(u²m)-f(u²m)-a²n(a²n)-i²(e²o²)-i²t²is. Gen., -i²idos (-idis). From *thrombos*, a clot, *lymphæ*, lymph, and *angion*, a cell. Lymphangitis with thrombosis. [a, 34.]

THROMBOPHLEBITIS (Lat.), n. f. Tho²rmb-o²(o²)-fle²b-i²(e²)t²is. Gen., -i²idos (-idis). From *thrombos*, a vein. Phlebitis with thrombosis. [a, 34.]—**T. purulenta**. Suppurative phlebitis with thrombosis. [a, 34.]

THROMBOSIS (Lat.), n. f. Tho²rmb-o²s(i²s). Gen., -o²s(-is). Gr., *θρόμβωσις* (from *θρομβώσθαι*, to become clotted). Fr., *thrombose*. Ger., *Thrombose*, *Propfbildung*. Clogging of blood-vessels by coagulation of the blood within them.—**Atrophic t.** See *MARASMIC t.*—**Cerebral arterial t.** A narrowing of the calibre of an artery in the brain caused by a deposit of fibrin from the blood. [D, 34.]—**Coagulated t.** T. produced by fibrous coagulation in a vessel. [a, 34.]—**Compression-t.** Ger., *Compressionsthrombose*. T. due to dilatation of the affected vein as the result of compression between it and the heart. [A, 57.]—**Conglutination t.** Of Eberth and Schimmelbusch, t. in which the clot is formed by the accumulation and fusion of the blood-plates. [a, 34.]—**Dilatation t.** T. due to pouches or dilations in the vessels, from the fact that the peripheral or lateral layers of a flowing current move more slowly, meet with more obstruction, and hence are more favorable to coagulation than the central ones. [D, 3.]—**Embolie t.** T. following obstruction of a vessel by an embolus. [D, 3.]—**Hæmorrhagic t.** T. which follows hæmorrhages, the coagulum of extravasated blood continuing through the opening into the injured vessel. [D, 3.]—**Lymphatic t.** See *THROMBOLYMPHANGITIS*.—**Marantic t.**, **Marasmic t.** Fr., *thrombose marasmique*. T. due to a very feeble circulation. It commonly affects the crural and iliac veins, the venous plexuses of the pelvis, the cranial sinuses, etc. [D, 3, 4.]—**Placental t.** T. of the uterine veins due to an extension of the physiological t. from the placental site into the substance of the uterus. [A, 57.]—**Plate-t.** Of Eberth and Schimmelbusch, t. produced by a conglutination of blood-plates pre-existing in the blood. [N. Y. Med. Jour., Aug. 4, 1888, p. 126 (a, 34).]—**Puerperal venous t.** Ger., *puerperale Venenthrombose*, *Metrophlebothrombose*, *Gebärmuttervenenthrombose*. Puerperal t. of the uterine veins.—**Sinus t.** T. of one or more of the sinuses in the petrous portion of the temporal bone. [F.]—**Traumatic t.** 1. T. secondary to concussion or contusion of a part. [a, 17.] 2. See *Placental t.*—**Venous t.** T. of a vein. [a, 34.]

THROMBOTIC, adj. Tho²rmb-o²t'ik. Pertaining to or due to thrombosis. [a, 48.]

THROMBUS (Lat.), n. m. Tho²rmb-u²s(u²s). Gr., *θρόμβος*. Fr., *thrombus*. Ger., *Thrombus*, *Blutpfropf*. The clot formed in thrombosis. [D, 3.]—**Autochthonous t.**, **Blood-plate t.** See *PLATE THROMBOSIS*.—**Laminated t.** A t. formed in strata or laminae by slow and continuous coagulation, with an intermittent force of condensation.—**Primitive t.** A t. which remains at the place of its formation.—**Progressive t.** A t., usually stratified, which grows continuously into the lumen of the vessel. [D, 3.]—**Pudental t.** See *T. vulvæ*.—**Red t.** A t. formed by the coagulation of blood which is at rest. It is dark-red or brown in color, and contains few white corpuscles. A t. which is formed from blood in motion contains a larger number of white corpuscles, and may be white, gray, pale-red, or mottled. [D, 48.]—**Secondary t.** 1. A t. following inflammation of the vessels or of the tissues immediately surrounding them. 2. A t. which is continuous between vessels of different kinds (e. g., from capillaries into veins or arteries). [D, 3.]—**T. neonatorum**. See *CEPHALÆMATOMA*.—**T. vaginalis**. Hæma-

toma beneath the mucous membrane of the vagina. [a. 34].—**T. vulvæ.** Hematoma of the labium pudendi majus. [a. 34].—**White t.** See under **Red t.**

THROTTLING, n. *Thro'tli'ng*. Choking, strangulation.

THRUMWORT, n. *Thru'm'wurt*. The genus *Actinocarpus*, also the genus *Alisma* and *Amarantus caudatus*. [a. 35.]

THRUSH, n. *Thru'sh*. 1. See **APHTHE**. 2. In solids, a disease of the frog, characterized by a foul-smelling secretion. [L.]—**Milk t.** See **APHTHA infantum**.

THRYPSIS (Lat.), n. f. *Thri'ps*(*thru'ps*)/'s. Gen., *thryps'eos* (-is). Gr., *θρῦψις*. See **COMMUNION**.

THRYPTICUS (Lat.), adj. *Thri'pt*(*thru'pt*)/'ik-n's(u's). Gr., *θρῦπτικός*. Fr., *thryptique*. 1. Able to break or crush, especially lithontriptic. 2. Easily broken, fragile. [A. 311, 322 (a. 48).]

THUIA (Lat.), n. f. *Thu(thu)'i'*-a'. See **THUJA**.

THUIA (Fr.), n. *Tu'*-e-en. See **THUJIN**.

THUJA (Lat.), n. f. *Thu(thu)'ja*(*ya*)/'s. Gr., *θῦια* (1st def.), *θῦιον* (1st def.). Fr., t. Ger., *Lebensbaum* (2d def.). Written also *thuya* and, preferably, *thujia*. 1. Of the ancients, an African tree with fragrant wood; according to Schousboe, the *Callitris quadrivalvis*; of the very late Latin authors, probably the *Citrus medica*. 2. Arbor-vitæ; a genus of evergreen trees and shrubs of the Cupressaceæ, 3 of the U. S. and 1 of Hung. Ph. [a. 35.]—**Oleum thujæ.** A yellowish-green volatile oil, of camphoraceous odor, obtained from the leaves and twigs of *T. occidentalis*; a mixture of thujol and terpene. [a. 35.]—**Resina thujæ articulata.** Sandarac. [B.]—**T. articulata.** See **CALLITRIS quadrivalvis**.—**T. gigantea.** California (or British Columbia) cedar, the yellow cypress of northwestern America. [a. 35.]—**T. obtusa.** **T. occidentalis.** Fr., t. d'occident, arbre de vie (ou de Paradis), cèdre américain, Lebensbaum (oder abendländischer) Lebensbaum. American arbor-vitæ, white cedar. The fresh tops (leaves and twigs), the t. of the U. S. Ph., are used in coughs, rheumatism, intermittent fever, etc., as an application to venereal warts, cancerous ulcers, etc., and as an embrocation for rheumatic pains. A saturated tincture is recommended as an emmenagogue and in small-pox, and a distilled water in dropsy. The oil (see **Oleum thujæ**) is anthelmintic. The resinous wood, *lygnum arboris vitæ* (see *thujæ*), was formerly used like the tops. [a. 35.]—**T. orientalis.** Chinese or Japanese arbor-vitæ; a species having a pungent aromatic odor.

THUJA OCCIDENTALIS.
[A. 327.]

The oily seeds are used as a stimulating tonic and purgative, and the young branches furnish a yellow dye. The leaves are used in small-pox like those of *T. occidentalis*. [a. 35.]—**Tinctura thujæ.** A tincture made by macerating 5 parts of t. with 6 of alcohol for eight days [Ger. Ph.]; by digesting 5 parts of t. with 15 of alcohol or three days [Hung. Ph.]; or by macerating 5 parts of dried t. with 50 of dilute alcohol for a week [T. A.]. [B. 95 (a. 38).]

THUJENE, n. *Thu'jen*. Fr., *thuiène*, *thujène*. A colorless, acrid fluid, $C_{10}H_{16}$, obtained by treating oleum thujæ with iodine. [B. 93 (a. 14).]

THUJETIC ACID, n. *Thu'jet'ik*. A substance, $C_{22}H_{34}O_{13}$, obtained by boiling thujetin with barium water. [B. 93 (a. 14).]

THUJETIN, n. *Thu'jet'in*. Fr., *thuiétine*. Ger., *T.* A decomposition product, $C_{14}H_{14}O_4$, of thujin. [B. 270 (a. 38).]

THUJIGENIN, n. *Thu'ij'e'n*-i-n. Fr., *thuigénine*. Ger., *T.* A substance, $C_{14}H_{14}O_4$, obtained from the green parts of *Thuja occidentalis* as microscopic acicular crystals. [B. 270 (a. 38).]

THUJIN, n. *Thu'jin*. Fr., *thuiine*, *thujine*. Ger., *T.* A substance, $C_{20}H_{30}O_{12}$, obtained from the green parts of *Thuja occidentalis*, and occurring as lemon-yellow microscopic tubular crystals. [B. 270 (a. 38).]

THUJOL, n. *Thu'jol*. Fr., *thuiol*. A substance, $C_{10}H_{16}O$, forming the chief constituent of the oil of *Thuja occidentalis*, and known in two forms, one a levorotatory and the other a dextrorotatory liquid. In warm-blooded animals it acts so as to quicken the respiration, raise the blood-pressure, and lower the temperature. [B. 270 (a. 38); *Therap. Gaz., 1885, p. 827 (a. 50).]

THUMB, n. *Thu'm*. Gr., *δύκτις*. Lat., *poller*. Fr., *pouce*. Ger., *Daumen*. The digit on the radial side of the hand. It differs from the others in being broader and shorter, in having only two phalanges, and in its metacarpal bone being separately movable. [L.]

THUMP, n. *Thu'mp*. Palpitation of the heart, especially in horses. [L.]

THUNBERGIA (Lat.), n. f. *Tun-be'rg'i'*-a'. From *Thunberg*, a Swedish botanist. 1. The genus *Gardenia*. 2. A genus of the *Thunbergiæ*, or *Thunbergiæ* (a tribe of the *Acanthaceæ*). [a. 35.]—**T. fragrans.** A native of the East Indies, the West Indies, where it is cultivated, it is used as an aromatic tonic. [a. 35.]

THURANGEL (Ger.), n. *Tu'r'a'n'g'*-el. See **GINOLYMUS**.

THÜRE (Ger.), n. *Tu'r'e'*. A door. [L. 46 (a. 21).]—**Flügel'n**. The valves of a vein.

THURIFEROUS, adj. *Thu'r-i'f'e'r'u's*. From *thurs*, incense, and *ferre*, to bear. Fr., *thurifère*. Producing incense. [a. 48.]

THURM (Ger.), n. *Turn*. A tower, a spire. [L. 46 (a. 21).]—**T'kopf**, **T'schädel**. See **OXYCERPHALIA**.

THUS (Lat.), n. n. *Thu's*(*thru's*). Gen., *thuri's*. Gr., *θῦος*. 1. Incense, common frankincense; of the Russ. Ph., oilbanum. 2. Of the Netherl. Ph., a white, yellow, or reddish resin exuding from the branches of *Pinus sylvestris* and *Abies excelsa*. [B. 95 (a. 38); a. 35.]—**Confectio de thure.** Fr., *confection de l'encens*. Confection of frankincense; a preparation containing 4 parts of prepared coarander-seeds, 3 parts each of white frankincense and nutmegs, 2 parts each of licorice and mastic, 1 part each of cubeb and prepared hartshorn, 8 parts of conserve of red roses, and enough white sugar, made into little balls or lozenges. [L. 94 (a. 21).]—**Cortex thuris.** See **CASCARIATA-bark** and **STORAX-bark**.—**Resina thuris.** See **OLIBANUM**.—**T. americanum.** See **COMMON FRANKINCENSE**.—**T. arabicum.** Oilbanum. [a. 35.]—**T. libycum.** Gum-ammoniac. [a. 35.]—**T. vulgare.** 1. Common frankincense. [a. 35.] 2. See **OLIBANUM sylvestre** (1st def.).

THUYA (Lat.), n. f. *Thu(thu)'ya*. See **THUJA**.

THYLACITIS (Lat.), n. f. *Thil(thu)'ci'*-a's(a'sk)-i'(e)'tis. Gen., *-it'id*os (-idis). From *θυλάκιον*, a little bag. See **ACNE** (1st def.).

THYLLE (Ger.), n. *Tu'l'le*. See **TYLOSIS**.

THYM (Fr.), n. *Ta'm'*. 1. See **THYMUS**. 2. Of the Fr. Cod., see **THYMUS vulgaris**.—**Eau distillée de t.** [Fr. Cod.]. A preparation made by distilling the fresh flowering tops of thyme with water. [B. 95 (a. 38).]—**Essence de t.** **Huile volatile de t.** See **OIL of THYME**.—**T. de Candie**, **T. de Dioscoride**, **T. des anciens.** See **THYMUS creticus**.

THYMA (Lat.), n. n. *Thim(thu)'ma*(*a*)/'s. Gen., *thym'a'tos* (-atis). A corruption of *ecthyima* (q. v.) and of *thymion* (q. v.).

THYMASTHMA (Lat.), n. n. *Thim(thu)'m*-a'sth(a'sth)'ma's. Gen., *-asth'matos* (-atis). From *θύμος*, the thymus gland, and *ἀσθμα*, asthma. See **THYMIC ASTHMA**.

THYMATE, n. *Tim'at*. A derivative of thymol in which a metallic base replaces the hydrogen in its molecule of hydroxyl. [B.]

THYME, n. *Tim*. 1. The genus *Thymus*, especially *Thymus vulgaris*. [a. 35.] 2. See **THYMUS** (4th def.).—**Camphor of t.** **Thymol**. [a. 35.]—**Essence of t.** See **OIL of t.**—**Ground-t.** See **THYMUS serpyllum**.—**Lemon-t.** See **THYMUS citriodorus**.—**Oil of t.** Lat., *atheroleum* (see *oleum*) [U. S. Ph., Ger. Ph., Netherl. Ph., Russ. Ph., Swed. Ph.], seu essentia [Belg. Ph.], *thymi* [Dan. Ph., Norw. Ph., Swed. Ph.], Fr., *huile volatile de thym* [Fr. Cod.], Ger., *Thymianöl*, Sp., *esencia de tomillo* [Sp. Ph.]. An essential oil, of sp. gr. about 0.880, readily soluble in alcohol, obtained from *Thymus vulgaris*. It is deep-reddish brown after one distillation (red oil of t.), but becomes colorless (white oil of t.) if re-distilled. It consists of thymol and a mixture of cymene and thymene. It is antiseptic and stimulating, and is recommended in depression or collapse. Its chief use is as an external stimulant in veterinary medicine. [a. 35.]—**Water-t.** See **ANACHARIS albinastrium** and **FONTINALIS antipyrretica**.—**Wild t.** See **THYMUS serpyllum**.

THYMELEA (Lat.), n. f. *Thim(thu)'m*-e'le(a'e')-a's. From *θύμος*, thyme, and *λαία*, the olive-tree. Fr., *thymélee*. 1. The *Daphne* t. 2. A genus of plants of the *Thymelæaceæ*, or *Thymelæaceæ*, which are an order of dicotyledons including *Daphne*, *Dirca*, *Aquilaria*, etc. The *Thymelæaceæ* of Reichenbach are a family of the *Ambigua*, including the *Darwinia*, *Daphnææ*, and *Aquilaria*. The *Thymelææ* are: Of Adanson, a family including genera (*Eriocaulon*, *Conocarpus*, *Samamunda*, etc.) now referred to various orders; of Jussieu, the *Thymelæaceæ*; of Endlicher, a class of apetalous *Acrampohryba* consisting of the *Monimiaceæ*, *Laurineæ*, *Gyrocarpeæ*, *Santalaceæ*, *Daphnoidææ*, etc. The *Thymelææ* are the *Thymelææ*. The *Thymelææ* of the *Daphnoidææ* consisting of the *Passerineæ* and *Daphnææ*. The *Thymelææ* are the *Thymelæaceæ*. [a. 35.]—**Cortex thymelææ.** The bark of *Daphne mezereum* and *Daphne gnidium*. [a. 35.]—**Semen thymelææ.** The dried fruits of *Daphne gnidium*. [a. 35.]—**T. cneorum.** See **DAPHNE cneorum**.—**T. mezereum.** See **DAPHNE mezereum**.

THYMELCOSIS (Lat.), n. f. *Thim(thu)'m*-e'lik-os'tis. From *θύμος*, the thymus gland, and *ἐλκος*, ulceration. Ulceration of the thymus gland. [L. 50 (a. 48).]

THYMÉELE (Fr.), n. *Te-ma-lé*. See **THYMELEA** and **MEZEUREUM** (3d def.).

THYMENE, n. *Tim'en*. Fr., *thymène*. Ger., *Thymen*. A levorotatory liquid, $C_{10}H_{16}$, found in oil of thyme. [B. 93 (a. 14).]

THYMHYDROQUINONE, n. *Thim-hid-ro-kw'i'n'*-on. Fr., *thymhydroquinone*. Ger., *Thymhydrochinon*. A substance, $C_{12}H_8O_2$, $(C_6H_4)_2$, obtained by the reduction of thymquinone and bearing the same relation to that body that hydroquinone bears to quinone. [B. 93 (a. 14).]—**Dimethylether of t.** See **DIMETHYLTHYMHYDROQUINONE**.

THYMIAMA (Lat.), n. n. *Thim(thu)'m*-i'a-m(a's'm)'a's. Gen., *-am'a'tos* (-atis). Gr., *θυμιάμα* (from *θύμα*, to burn incense). Anything burned as incense or for fumigation. [A. 311 (a. 48).]—**Cortex thymiatis.** See **STORAX-bark**.

THYMIAN (Ger.), n. *Tu'm*-e-a'n'. See **THYMUS** and **THYMUS vulgaris**.—**Töl**. See **OIL of THYME**.

THYMIASIS (Lat.), n. f. *Thim(thu)'m*-i'a(a's')-si's. Gen., *-as'eos* (-is). Gr., *θυμιάσις* (from *θύμα*, to burn incense). Fr., *thymiase*. Fumigation. [L. 50 (a. 14).]

THYMIC, adj. *Thim'ik*. Lat., *thymicus* (from *θύμος*, the thymus gland). Fr., *thymique*. Pertaining to the thymus or dependent on disease of the thymus (e. g., *t. asthma*).

THYMIC ACID, n. Tim'ik. See THYMOL.

THYMICO-CYANOTICUS (Lat.), adj. Thi²m(thu^m)/i²k-o(ō)-sik(u^a)-aⁿ(aⁿ)-o⁴t(ot)/i²k-u^s(u^s). From *thymus*, the thymus gland, and *cyanus*, cyanosis. Dependent on disease of the thymus gland and accompanied by cyanosis. See *ASTHMA thymico-cyanoticum*.

THYMINÉ, n. Thim'en. See LEUCINE.

THYMION, n. Thi²m(thu^m)/i²-ō'n. Gr., *θύμιον* (from *θύμος*, thyme). 1. A large wart. 2. Of Celsus, a little wart (*condyloma verrucosum*) that projects considerably above the skin, has a slender base, and is colored at the top like the blossom of thyme (cf. MYRMECIA, 2d def.). It splits up easily, is raw, and readily bleeds. The worst forms occur about the genitals. [G. 8, 13.]

THYMIOSIS (Lat.), n. f. Thim(thu^m)-i²-ō's/i²s. Gen., -ō's/eōs (-is). From *thymus*, a warty excrescence. 1. Of Swediaur, see FRAMBESIA (2d def.). 2. Any fungiform or warty growth. The *Thymioses* of Fuchs are a family of the specific *Dermatopostases*, including frambesia, radesyge, and contagious anthrax. [G. 5.]—**T. fungoides**. See FRAMBESIA (2d def.).—**T. morus**. See CONDYLOMA latum.—**T. rubroides**. See FRAMBESIA (2d def.).—**T. scotica**. See SIBBENS.

THYMITIS (Lat.), n. f. Thim(thu^m)-i²(e)/ti²s. Gen., -it'idōs (-idis). Ger., *Thymusentzündung*. Inflammation of the thymus gland. [L. 60 (a, 14).]

THYMIUM (Lat.), n. n. Thi²m(thu^m)/i²-u^m(u^m). See THYMION.

THYMOÏLE (Fr.), n. Te-mo-el. Of Lallemand, thymoquinone. [B. 3 (a, 38).]

THYMOQUINOL (Fr.), n. Te-mo-e-lol. 1. Of Lallemand, thymoquinol. [B. 3 (a, 38).] 2. Of Decembre, thymhydroquinone. [B. 93 (a, 14).]

THYMOL, n. Tim'ol. Lat., *thymolum, acidum thymicum*. Fr., t. Ger., *T. Propylmethylphenol*. C₁₀H₁₄O = C₆H₄(C₃H₇)(CH₃). OH, structurally probably C₆(H₅CH₂CH₂OH.CH₃.CH₃). It is isomeric with carvacrol, and is derived from oil of thyme, though most of the t. of commerce is said to be obtained from the fruit of *Carum ajowan*. It forms colorless hexagonal crystals of aromatic odor and pungent taste, soluble with great difficulty in water (in from 1,300 to 900 parts), readily soluble in alcohol, in ether, and in chloroform. It melts at 50° C. and after fusion frequently remains liquid even when cooled considerably below this point. Like carboic acid, it forms compounds with metallic bases, called *thymates*. It possesses marked antiseptic properties, and is used in medicine both internally and locally. [B. 3 (a, 38); B. 4, 5.]—**T-yquecksilber** (Ger.). An unstable substance, C₁₀H₁₄HgOH, occurring as a blue-green precipitate. Recommended by Neisser in syphilis. [B. 270 (a, 38).] See MERCURY thymolate.

THYMPATHY, n. Thim-ō'p'a²th-i². Lat., *thymopathia* (from *θύμος*, the spirit, and *πάθος*, a disease). Fr., *thymopathie*. Any mental affection or derangement. [A. 34.]

THYMOQUINHYDRONE, n. Thim-o-kw'i²n-hid'ron. Fr., t., *thyméide*. A substance, C₂₀H₃₀O₄ = C₆H₇.C₆H₃(OH)₂.CH₃ + C₈H₇.C₆H₃OH₂.CH₃, occurring as shining black or dark-violet acicular crystals. [B. 3, 93 (a, 14, 38).]

THYMOQUINOL, n. Thim-o-kw'i²n'ol. A substance, C₆H₇.C₆H₃(OH)₂.CH₃ = C₁₀H₁₄O₂, occurring as colorless prismatic crystals. [B. 3 (a, 38).]

THYMOQUINONE, n. Thim-o-kw'i²n'on. Fr., t., *thymoïle*. Ger., *Thymochinon*. A substance bearing the same relation to thymol that quinine bears to phenol; a yellow crystalline body, C₁₀H₁₄O₂, of pungent odor. [B. 4.]

THYMOTIC ACID, n. Thim-ō't'i²k. Ger., *Thymotinsäure*. An acid, C₆H₄(OH)C₆H₃(CH₃)COOH.OH = C₆(C₆H₇.OH.CO.OH.CH₃).H.H., occurring as silky crystals. [B. 3 (a, 38).]

THYMOXYCUMINIC ACID, n. Thim-ō'x-i²-ku²-m'i²n'i²k. Of Barth, methoxyhydrocuminic acid. See HYDROXYCUMINIC ACID.

THYMIUM (Lat.), n. n. Thim(thu^m)/u^m(u^m). Gr., *θύμιον*. The *Thymus vulgaris*; of the ancients, *Thymus creticus*. [A. 35.]

THYMUS (Lat.), n. m. Thim(thu^m)/u^s(u^s). Gr., *θύμος*, *θύμιον*. Fr., *thym*. Ger., *Thymian*. 1. of the ancients, *T. creticus*. 2. Thyme, a genus of the *Labiatae*; also *T. vulgaris*. [A. 35.] 3. See T. GLAND. 4. *Condyloma acuminatum*; so called because of a fancied resemblance to the flower of thyme (cf. TAYMUS). [G.]—**A**ccessory t. Ger., *Nebent*. One of the lobules frequently met with belonging to the t. gland, but isolated from the mass of the organ. [L. 87 (a, 50).]—**A**etheroleum thymi. See Oil of THYME.—**A**lcohol thymi. See Spiritus thymi (2d def.).—**E**ssentia thymi. See Oil of THYME.—**H**erba thymi. Fr., *thym*. Sp., *tomillo*. See under *T. vulgaris*.—**O**leum thymi. See Oil of THYME.—**S**piritus thymi. A preparation made by dissolving 1 part of oil of thyme in 99 parts of 80-per-cent. alcohol (Belg. Ph.). or by distilling 1 part of thyme with 3 parts each of water and alcohol, as to obtain 4 parts (Swiss Ph.). [B. 95 (a, 38).]—**T. albus**. See *T. creticus*.—**T. alpinus**. Ger., *Alpen-Quendel* (1st def.), *Thymian* (1st def.). 1. Alpine thyme of Europe; an aromatic undershrub. The leafy twigs (*herba cinopodii montani*) are used like those of *T. serpyllum*. 2. The *Calamintha acinos*. [A. 35.]—**T. citriodorus**. Lemon-thyme; an aromatic lemon-scented variety of *T. serpyllum*; used as a condiment and stimulant. [A. 35.]—**T. creticus**. Fr., *thyme de Candie* (*de Crète, ou des anciens, ou de Dioscoride* (1st def.)). Ger., *Küppel Thymian* (1st def.). 1. The *thymus* and *thymus* of the ancients; a pungent, fragrant shrub of Mediterranean regions, formerly official as *herba thymi cretica*, *seu albi, seu capitati, seu veri*, and still used in southern Europe as an aromatic. 2. The *Satureia thymbra*. [A. 35.]—**T. mastichina**. Ger., *Mastix-Thymian*. Herb-mastic; a shrub of southern Europe and northern Africa, having an odor like that of mastic; still used like garden thyme under the name of *herba mastichina* (*seu mastichina*

Gallorum, seu mari, seu mari vulgaris). [A. 35.]—**T. pannonicus**. Ger., *ungarischer Thymian*. An undershrub of southern and central Europe, considered by Koch a variety of *T. serpyllum*, like which it is used. [A. 35.]—**T. serpyllum**, *T. serpyllum*. Fr., *thym serpolet* (*ou sauvage*), *pillolet*. Ger., *Feld-Thymian*, *Quendel*, *Hühnerklee*, *Kundelkrantz*, *Feldkümmel*, *Kümmelkrantz*. Mother-of-thyme, hill-wort, pellamountain, serpolet-oil plant, wild thyme of Europe and northern Asia. The flowering leafy branches, *herba serpylli minoris*, *seu silvestris*, *seu vulgaris*, *herba satyriae agrestis*, contain an essential oil, bitter extractive, tannin, etc., and are used as an external stimulant, and internally in whooping-cough. They also form a part of the species *aromatica*, *species ad fomentum*, and *sympus ipecacuanhae compositus*. [A. 35.]—**T. tragoriganum**. Ger., *wohtriechender Thymian*. The *trayopigavos* of Dioscorides, goat's-morjoran; an aromatic shrub of Greece and the Grecian islands. [A. 35.]—**T. verus**. See *T. creticus*.—**T. vulgaris**. Fr., *thym commun*, *mignotise des Genevois, tin, pouilleux*. Ger., *dächel* (*oder Garten*) *Thymian*, *römischer* (*oder welscher*) *Quendel*, *Bienenkraut*, *Immenkraut*, *Dummkraut*. Sp., *tomillo* (Mex. Ph.). Common thyme; a highly aromatic undershrub indigenous to southern Europe, often cultivated as a condiment. The leafy and flowering branches, *herba thymi* (*seu vulgaris*, *seu hortensis*, *herba serpylli romani*), are used like those of *T. serpyllum*, and furnish oil of thyme. [A. 35.]

THYMUS SERPYLLUM. [A. 327.]

THYREADENOSCIARRHUS (Lat.), n. m. Thi²r(thu^r)/e²-a²d(a²)-e²n-o(ō)-si²r(ski²r)/ru^s(ru^s). For deriv., see THYREOID, ADEN, and SCIARRHUS. Fr., *thyreadenosquirhe*. Scirrhus of the thyroid gland. [L. 50 (a, 14).]

THYRÉAL (Fr.), n. Te-ra-a². Of G. St. Hilaire, the hypobranchial bone in fishes. [L. 14.]

THYREARYTENODES (Lat.), adj. Thi²r(thu^r)-e²-a²r(a²)-i²(u²)-te²n(ta²-e²n)-ō(ez/as). Pertaining to the arytenoid and thyreoid cartilages. [L. 50 (a, 14).]

THYREICHTHYOSIS (Lat.), n. f. Thi²r(thu^r)-e²-i²k(i²ch²)-thi²(thū^s)-ō'i²s. Gen., -ō's/eōs (-is). From *θύρεος*, an oblong shield, and *ιχθύος*, ichthyosis. See ICHTHYOSIS scutellata.

THYREMPHRAXIS (Lat.), n. f. Thi²r(thu^r)-e²-m-fra²x(fra²x)/i²s. Gen., -phra²x/eōs (-is). For deriv., see THYREOID and EMPHRAXIS. See GÖFTRÉ.

THYREADEN (Lat.), n. m. and f. Thi²r(thu^r)-e²-o(ō)-a²d(a²)-e²n(an). Gen., -ad'amos (-is). From *θύρεος*, thyreoid, and *ἀδών*, gland. See Thyreoid GLAND.

THYREADENTITIS (Lat.), n. f. Thi²r(thu^r)-e²-o(ō)-a²d(a²)-e²n(-e)/ti²s. Gen., -it'idōs (-idis). See THYREOTIS.

THYREO-ADENOIDEUS (Lat.), n. m. Thi²r(thu^r)/e²-o(ō)-a²d(a²)-e²n-o(ō)-i²d(e²)-e²(a²)-e²u^s(u^s). For deriv., see THYREOID and ADENOIDE. Fr., *thyreo-adénoïdien*. A fasciculus of the inferior constrictor of the pharynx inserted on the side of the thyreoid gland. [Winslow (L).]

THYREO-ARY-EPIGLOTTICUS (Lat.), **THYREO-ARY-TENO-EPIGLOTTICUS** (Lat.), **THYREO-ARYTENO-EPIGLOTTIDEUS** (Lat.), n's m. Thi²r(thu^r)/e²-o(ō)-a²ria²a²-i²(u²)-e²p-i²-glo²t(glot)/i²(u²)-u^s(u^s). Gen., -a²ria²a²-i²(u²)-e²p-i²-glo²t(glot)/i²(u²)-u^s(u^s). Gen., -a²ria²a²-i²(u²)-e²p-i²-glo²t(glot)/i²(u²)-u^s(u^s). Ger., *Schildgiessbeckenkehldrückmuskul*. The thyreo-epiglottideus and the aryteno-epiglottideus regarded as one muscle. [L. 31.]

THYREO-ARYTENOÏD, adj. Thi²r-e²-o-a²-r-i²-ten'oid. Pertaining to the thyreoid and arytenoid cartilages. [C.]

THYREO-ARYTENOÏDEUS (Lat.), n. m. Thi²r(thu^r)/e²-o(ō)-a²ria²a²-i²(u²)-e²p-i²-glo²t(glot)/i²(u²)-u^s(u^s). Fr., *thyreo-aryténoïdien*. Ger., *Schildgiessbeckenmuskul*. The t.-a. internus and the t.-a. externus regarded as one muscle. [L.]—**T.-a. ascendens**. See *T.-a. inferior*.—**T.-a. descendens**. See *T.-a. superior*.—**T.-a. externus**. A muscle arising from the inner surface of the thyreoid cartilage close to the t.-a. internus and the cricothyreoid membrane and inserted into the border of the arytenoid cartilage, its muscular process, the aryteno-epiglottidean fold, and the false vocal band, some fibres passing up toward the epiglottis. [L. 31, 142, 332.]—**T.-a. inferior**. 1. The oblique fibres of the t.-a. 2. See *T.-a. —T.-a. internus*. Ger., *Stimmbandmuskul*. A muscle which arises from the inner surface of the ala of the thyreoid cartilage and the interior of the false vocal cord and is inserted into the false vocal cord and the vocal process of the arytenoid cartilage. [L. 31, 142, 332.]—**T.-a. major**. See *T.-a. —T.-a. minor*. See *T.-a. superior*.—**T.-a. obliquus**. The portion of the thyreo-aryteno-epiglottideus inserted into the posterior portion of the muscular process of the arytenoid cartilage. [L. 31.]—**T.-a. superior**. Ger., *oberer Schildgiessbeckenmuskul*. The portion of the t.-a. externus inserted into the muscular process of the arytenoid cartilage. [L. 31.]—**T.-a. superior lateralis**. See *T.-a. superior*.—**T.-a. superior medialis**. Ger., *Taschenbandmuskul*. The portion of the t.-a. externus extending between the border of the arytenoid cartilage and the false vocal band. [L. 332.]

THYREOCÉLE (Lat.), n. f. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-se}(\text{ka})^1\text{le}(\text{la})$; in Eng., $\text{thi}^2\text{r}^2\text{-e}^2\text{-o}^2\text{-sel}$. Gen., *cel'es*. From *thyreocēlē*, thyreoid, and *κῆλη*, a tumor. Fr., *thyrocèle*. Ger., *Kehlbuch*. A tumor of the thyreoid gland, especially a goitre. [E.]

THYREOCORNICULATUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-ko}^2\text{r}^2\text{-n}^2\text{-u}^2\text{gl}^2(\text{u}^2)\text{-a}^2\text{t}^2(\text{a}^2)\text{-u}^2\text{s}^2(\text{u}^2)$. An anomalous insertion of fibres of the thyreo-arytenoideus into the cartilage of Santorini. [L. 332.]

THYREOCRICOPHARYNGEUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-kri}^2(\text{kr}^2)\text{-ko}^2(\text{ko}^3)\text{-fa}^2\text{r}^2(\text{fa}^2)\text{-i}^2\text{n}^2(\text{u}^2\text{n}^2)\text{-j}^2\text{e}^2(\text{go}^2)\text{-u}^2\text{s}^2(\text{u}^2)$. See *CRICOPHARYNGEUS*.

THYREOCUNEIFORMIS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-ku}^2\text{n}^2(\text{ku}^2\text{n})\text{-e}^2\text{-i}^2\text{-fo}^2\text{r}^2\text{m}^2(\text{is})$. An anomalous insertion of the fibres of the thyreo-arytenoideus into the cartilage of Wrisberg. [L. 332.]

THYREODEOCYNANCHE (Lat.), **THYREODITIS** (Lat.), n's f. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-od}^2(\text{o}^3)\text{-si}^2\text{n}^2(\text{ku}^2\text{n})\text{-a}^2\text{n}^2\text{k}^2(\text{a}^2\text{n}^2\text{ch}^2)\text{-e}^2(\text{a})\text{-o}^2\text{d}^2(\text{od})\text{-i}^2\text{e}^2(\text{is})$. Gen., *-anch'es*, *-it'idos* (-idis). From *thyreocēlē*, thyreoid, and *κυνάγχη*, cynanche. See *THYREODITIS*.

THYREO-EPIGLOTTIC, adj. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-o}^2\text{-ep}^2\text{-i}^2\text{-gl}^2\text{ot}^2\text{-i}^2\text{k}$. Pertaining to the epiglottis and the thyreoid gland or cartilage.

THYREO-EPIGLOTTICUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-ep}^2\text{-i}^2\text{-gl}^2\text{ot}^2\text{-i}^2\text{gl}^2\text{ot}^2(\text{t})^2\text{k}^2\text{-u}^2\text{s}^2(\text{u}^2)$. Ger., *Schildkehledeckelmuskel*. See *THYREO-EPIGLOTTICUS*. T.-e. *longus*. An anomalous muscle arising from the inner surface of the thyreoid cartilage near its inferior cornu and blending with the t.-e. [L. 332.]

THYREO-EPIGLOTTIDEUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-ep}^2\text{-i}^2\text{-gl}^2\text{ot}^2\text{-i}^2\text{gl}^2\text{ot}^2(\text{t})^2\text{k}^2\text{-u}^2\text{s}^2(\text{u}^2)$. A few fibres on the upper edge of the thyreo-arytenoideus which are spread out upon the membrane between the epiglottis and the arytenoid cartilage. [Douglas (L).]—T.-e. *inferior*, T.-e. *major*. See T.-e. T.-e. *minor*, T.-e. *superior*. An anomalous muscle arising from the thyreoid cartilage and passing along the thyreo-epiglottic ligament to the epiglottis. [L. 331.]

THYREO-GLOTTIDEUS (Coves) (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-gl}^2\text{ot}^2\text{-i}^2\text{gl}^2\text{ot}^2(\text{t})^2\text{k}^2\text{-u}^2\text{s}^2(\text{u}^2)$. See *THYREO-EPIGLOTTIDEUS*.

THYREO-HYAL, n. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-o}^2\text{-hi}^2\text{a}^2\text{l}$. Pertaining to the hyoid bone and the thyreoid cartilage; as n., see T.-h. bone.

THYREO-HYOIDEUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-hi}^2(\text{hu}^2)\text{-o}(\text{o}^3)\text{-i}^2\text{d}^2(\text{ed})\text{-e}^2\text{-u}^2\text{s}^2(\text{u}^2)$. Fr., *thyroé-hyoïdien*. Ger., *Schildzungenbeinmuskel*. A flat quadrangular muscle arising from the outer surface of the thyreoid cartilage and inserted into the lower margin of the body and the cornu majus of the hyoid bone. [L. 332.]—T.-h. *accessorius*. An anomalous muscle extending between the superior cornu of the thyreoid cartilage and the greater cornu of the hyoid bone. [L. 332.]—T.-h. *azygos*, T.-h. *minor*, T.-h. *superior*. An anomalous offshoot of the t.-h. extending between the greater cornu of the hyoid bone and the upper margin of the thyreoid cartilage. [L. 332.]

THYREOID, adj. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-oid}$. Gr., *thyreocēlē* (from *thyreos*, an oblong [door-shaped or doornote-shaped] shield, and *είδος*, resemblance). Fr., *thyroïde*, *thyroïdien*. Ger., *thyreoidisch*. Pertaining to, connected with, or derived from the t. gland; as a n. (Lat., *thyreoides*), the gland itself. [a. 17.]

THYREODECTOMY, n. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-oid}^2\text{-e}^2\text{-kt}^2/\text{om}^2$. Lat., *thyreodectomia* (from *thyreocēlē*, thyreoid, and *τεμνω*, a cutting out). Fr., *thyroïdectomie*. Ger., *Thyreidektomie*. Removal of the thyreoid gland. [E.]

THYREOIDEA (Lat.), n. f. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-i}^2\text{d}^2(\text{ed})\text{-e}^2\text{-a}^2$. See *THYREOID GLAND*.

THYREOIDEUS (Lat.), adj. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-i}^2\text{d}^2(\text{ed})\text{-e}^2\text{-u}^2\text{s}^2(\text{u}^2)$. See *THYREOID*; as a n., a muscle connected with the thyreoid cartilage. [L.]—T. *incisura cartilaginis thyreoidæ medie transversæ*. See T. *transversus*.—T. *incisura medie obliquæ*. See T. *transversus impar* (1st def.).—T. *internus*. See *THYREOPRIVUS*.—T. *proprius*. A muscle extending near the middle line between the upper and lower margins of the thyreoid cartilage. [L. 332.]—T. *transversus (anomalus)*. An anomalous muscle extending between the two cricoid processes of the thyreoid cartilage. [L. 332.]—T. *transversus impar*. 1. An aberrant bundle of the cricothyroideus attached to the cricoid process of the thyreoid cartilage. [L. 332.] 2. See T. *transversus*.

THYREODITIS (Lat.), n. f. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-i}^2\text{d}^2(\text{ed})\text{-i}^2\text{e}^2(\text{e})\text{-t}^2\text{is}$. Gen., *-it'idos* (-idis). See *THYREODITIS*.

THYREODOPRIVUS (Lat.), adj. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-i}^2\text{d}^2(\text{ed})\text{-o}(\text{o}^3)\text{-pri}^2(\text{pre})^2\text{-vu}^2\text{s}^2(\text{wu}^2\text{s})$. From *thyreoides*, thyreoid, and *privus*, deprived. See *STRUMPRIVUS*.

THYREODOTOMY, n. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-oid}^2\text{-o}^2\text{-t}^2/\text{om}^2$. See *THYREOTOMY*.

THYREODITIS (Lat.), n. f. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-i}^2\text{e}^2(\text{e})\text{-t}^2\text{is}$. Gen., *-it'idos* (-idis). From *thyreocēlē*, thyreoid. Fr., *thyroïdite*. Ger., *Schilddrüsenentzündung*. Inflammation of the thyreoid gland.

THYREOMEMBROSUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-me}^2\text{m}^2\text{-br}^2\text{n}^2(\text{ra}^2\text{n})\text{-os}^2\text{-u}^2\text{s}^2(\text{u}^2)$. The portion of the thyreo-epiglotticus inserted into the aryteno-epiglottic fold. [L. 31.]

THYREONCUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}^2\text{n}^2\text{k}^2\text{-u}^2\text{s}^2(\text{u}^2)$. From *thyreocēlē*, thyreoid, and *γκυς*, a tumor. Fr., *thyroncie*. See *GOITRE*.

THYREO-ŒSOPHAGEUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-e}^2\text{s}^2(\text{o}^2\text{-e}^2\text{s})\text{-o}^2\text{-f}^2\text{-aj}^2(\text{a}^2\text{g})\text{-e}^2\text{-u}^2\text{s}^2(\text{u}^2)$. Muscular fibres between the œsophagus and the thyreoid cartilage. [L. 332.]

THYREOPALATINUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-pa}^2\text{l}^2(\text{pa}^2\text{l})\text{-a}^2\text{t}^2(\text{a}^2\text{t})\text{-in}^2(\text{en})\text{-u}^2\text{s}^2(\text{u}^2)$. From *thyreocēlē*, thyreoid, and *palatum*, the palate. See *CONSTRUCTOR isthmi faucium posterior*.

THYREOPHARYNGEUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-fa}^2\text{r}^2(\text{fa}^2)\text{-i}^2\text{n}^2(\text{u}^2\text{n}^2)\text{-g}^2\text{-e}^2\text{-u}^2\text{s}^2(\text{u}^2)$. From *thyreocēlē*, thyreoid, and *φάρυγξ*, the pharynx. Fr., *thyro-pharyngien*. Ger., *Schlundschleiser*. 1. Of Douglas, that portion of the inferior constrictor

of the pharynx that arises from the thyreoid cartilage. [L.] 2. Of Winslow and Valsalva, see *Inferior constrictor of the pharynx*. 3. See *Middle constrictor of the pharynx*.

THYREOPHARYNGOPALATINUS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-fa}^2\text{r}^2(\text{fa}^2)\text{-i}^2\text{n}^2(\text{u}^2\text{n}^2)\text{-g}^2\text{-e}^2\text{-o}(\text{o}^3)\text{-pal}^2(\text{pa}^2)\text{-a}^2\text{t}^2(\text{a}^2\text{t})\text{-in}^2(\text{en})\text{-u}^2\text{s}^2(\text{u}^2)$. From *thyreocēlē*, thyreoid, *φάρυγξ*, the pharynx, and *palatum*, the palate. See *PALATO-PHARYNGEUS*.

THYREOPHRAXIA (Lat.), n. f. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-fra}^2\text{x}(\text{fra}^2\text{x})\text{-i}^2\text{-a}^2$. From *thyreocēlē*, thyreoid, and *φράσσειν*, to fence in. Fr., *thyrophraxie*. Of Albert, see *GOITRE*.

THYREOPHYMA (Lat.), n. n. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-fim}^2(\text{fm}^2)\text{-a}^2$. Gen., *-phymat'os* (-itis). From *thyreocēlē*, thyreoid, and *φύμα*, a growth of the thyreoid gland. [L. 50 (a. 14).]

T. fugax, **T. sanguineum**, **T. spurium**. Of P. Frank, see *Inflammatory goitre*.

THYREOPRIVUS (Lat.), adj. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-pri}^2(\text{pre})\text{-vu}^2\text{s}^2(\text{wu}^2\text{s})$. See *STRUMPRIVUS*.

THYREOPROTEIN, n. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-o}^2\text{-prot}^2/\text{e}^2\text{-i}^2\text{n}$. Of Bunnoff, an albumin isolated from the thyreoid gland. [L. 50 (a. 14).]

THYREOTOMY, n. $\text{Thi}^2\text{r}^2\text{-e}^2\text{-o}^2\text{-t}^2/\text{om}^2$. From *thyreocēlē*, thyreoid, and *τομή*, a cutting. Ger., *Thyreotomie*. Fr., *thyroïctomie*. The operation of splitting the thyreoid cartilage (generally used for the removal of tumors). [E.]

THYREOTRACHEALIS (Lat.), n. m. $\text{Thi}^2\text{r}(\text{thu}^6)\text{-e}^2\text{-o}(\text{o}^3)\text{-tra}^2\text{k}^2(\text{tra}^2\text{ch}^2)\text{-e}^2\text{-al}^2(\text{a}^2\text{l})\text{-i}^2\text{s}$. For deriv., see *THYREOID* and *TRACHEA*. A muscle extending between the trachea and the thyreoid cartilage or region. [L.]—T. *profundus*. An anomalous offshoot of the crico-arytenoideus lateralis to the trachea. [L. 332.]—T. *superficialis*. An anomalous offshoot of the sternothyroideus to the trachea. [L. 332.]

THYROID, adj. $\text{Thi}^2\text{r}^2\text{-oid}$. A less correct form of *thyreoid*. For other words in *Thyro*-, see the corresponding words in *Thyreoo*.

THYRSE, n. $\text{Thu}^2\text{-rs}$. Lat., *thyrsus* (from *θύρσος*, a stem). Fr., *t.* Ger., *Strauss*, *Blüthenstrauss*. A compact panicle, such as the inflorescence of the grape. [a. 35.]

THYRSIFLOROUS, adj. $\text{Thu}^2\text{-rs-i}^2\text{-flor}^2\text{-us}$. From *thyrsus*, a thyrsus, and *flos*, a flower. Fr., *thyrsiflore*. Having the inflorescence in contracted or ovate panicles. [a. 35.]

THYSSELINUM (Lat.), n. n. $\text{Thi}^2\text{s}(\text{thu}^6)\text{-se}^2\text{l}^2\text{-in}^2(\text{en})\text{-u}^2\text{m}^2(\text{u}^2\text{m})$. Fr., *thysselin*. Ger., *Sumpfselig*. 1. Of Adanson, the genus *Selinum*. 2. Of Hoffmann, a genus of the Umbelliferae closely resembling *Peucedanum*. [a. 35.]—T. *palustre*. Ger., *Milchpeterling*, *Oelreich*, *vilder Bertram*. Genus *Sumpfselig*. A species found in Europe and Asia. The root, which has a strong, somewhat turpentine-like odor and a pungent, aromatic, bitterish taste, has been used in epilepsy and various spasmodic affections. In northern Asia it is used as a condiment in place of ginger. [a. 35.]

TIBIA (Lat.), n. f. $\text{Ti}^2\text{b}^2(\text{teb})\text{-i}^2\text{-a}^2$. Gr., *τίβη*, *τεμνίβη*. Fr., *t.* Ger., *T.* A long bone, the larger of the two of the leg, on the anterior and inner side of which it is placed. Its upper extremity bears two concave surfaces covered with cartilage, separated by the crucial spine, for articulation with the femur, and bears on each side two prominences, the external and internal tuberosities. The shaft is three-sided, smaller in the middle than at either end, its inner surface being subcutaneous. The lower extremity is enlarged transversely and projects downward on the inner side as the internal malleolus, presenting a concave surface for articulation with the astragalus; externally is a surface covered with cartilage for articulation with the fibula, and posteriorly are grooves for the tendons of the tibialis posticus and flexores digitorum pedis and pollicis longi. [L. 31, 142, 332.]—T. *minima*. See *FIBULA* (1st def.).

TIBIAD, adv. $\text{Ti}^2\text{b}^2/\text{i}^2\text{-a}^2\text{d}$. Toward the tibial aspect. [L. 141.]

TIBIÆUS (Lat.), n. m. $\text{Ti}^2\text{b}^2(\text{teb})\text{-i}^2\text{-e}^2(\text{a}^2\text{e}^2)\text{-u}^2\text{s}^2(\text{u}^2)$. See *TIBIALIS*.

TIBIAL, adj. $\text{Ti}^2\text{b}^2/\text{i}^2$. Lat., *tibi-alis*. Fr., *t.* Ger., *T.* Pertaining to or situated near or toward the tibia. [L. 343.]

TIBIAL (Fr.), adj. and n. *Te-be-a*. See *TIBIALIS*.—T. *antérieur*. See *TIBIALIS anticus*.—T. *postérieur*. See *TIBIALIS posticus*.

TIBIALIS (Lat.), adj. $\text{Ti}^2\text{b}^2(\text{teb})\text{-i}^2\text{-al}^2(\text{a}^2\text{l})\text{-i}^2\text{s}$. From *tibia* (q. v.). Tibial; as a n. m. $\text{Ti}^2\text{b}^2(\text{teb})\text{-i}^2\text{-al}^2\text{-i}^2\text{s}$. Ger., *Schienbeinmuskel*, a muscle connected with the tibia. [a. 48.]—T. *anticus*. Fr., *jambier antérieur*. Ger., *Schienbeinmuskel*. A muscle which arises from the lower part of the external tuberosity of the tibia and the upper half of the exterior surface of the bone from the interosseous membrane and the strong fascia of the leg; also from the intermuscular septum. It is inserted into a rounded area on the inner and inferior part of the internal condyle and the first metatarsal bones. [C.]—T. *anticus accessorius*, T. *anticus profundus*. See *TRIOFASCIALIS anticus*.—T. *gracilis*. See *PLANTARIS*.—T. *nauticus*,

T. posticus. A muscle which arises from the interosseous membrane; the outer part of the posterior surface of the tibia, the inner surface of the fibula and the aponeurosis covering it. It is inserted into the tubercle of the scaphoid bone and also into the three cuneiform bones, the cuboid, and the bases of the second, third, and fourth metatarsal bones, and also the sustentaculum tali. [C.]—**T. profundus.** See **TIBIOFASCIALIS**.—**T. secundus.** A muscle accessory to the *t. posticus*, arising from the lower part of the tibia and inserted into some of the ligaments near the ankle. [L. 382.]

TIBIO-APONÉVROTIQUE (Fr.), n. *Teb-e-o-a²p-o-nav-rot-ek.* See **TIBIOFASCIALIS**.

TIBIO-CALCANÉEN (Fr.), n. *Te-be-o-ka²l-ka²ne-a²n².* See **SOLÆUS** (1st def.).

TIBIOFASCIALIS (Lat.), adj. *Ti²b(heb)-i²-o(ō)-fa²s(fa²s)-si²-(ki²)-al(a²l)/i²s.* From *tibia*, the tibia, and *fascia*, a band. Fr., *tibio-aponévrotique*. Connected with the tibia and the fascia of the leg or foot; as a n., a muscle so connected. [L.]—**T. anticus.** An anomalous muscle which arises from the lower third of the anterior edge of the tibia and is inserted into the annular ligament and deep fascia. It is sometimes a part of the tibialis anticus. [C.]

TIBIO-FEMORAL, adj. *Ti²b-i²-o-fe²m-o²r-l.* Pertaining to the tibia and the femur. [a. 48.]

TIBIO-FIBULAR, adj. *Ti²b-i²-o-fi²b-u²l-a²r.* Lat., *peroneo-tibialis*. Fr., *peronéo-tibial*. Pertaining to the tibia and the fibula.

TIBIO-MALLÉOLAIRE (Fr.), n. *Te-be-o-ma²-le²-o-la²r.* See *Internal saphenous vein*.

TIBIO-NAVICULAR, adj. *Ti²b-i²-o-na²v-i²k-u²l-a²r.* From *tibia*, the tibia, and *navicula*, a boat. Pertaining to the tibia and the scaphoid bone. [a. 48.]

TIBIO-PÉRONÉO-CALCANIEN (Fr.), n. *Te-be-o-pa-ro-na-o-ka²l-ka²ne-a²n².* See **SOLÆUS** (1st def.).

TIBIO-PÉRONÉO-TARSIEN (Fr.), n. *Te-be-o-pa-ro-na-o-ta²r-se-a²n².* See **PERONEUS** longus.

TIBIO-PERONEAL, adj. *Ti²b-i²-o-pe²r-o²n-e²-l.* From *tibia*, the tibia, and *peronē*, the fibula. Fr., *tibio-peronier*. See **TIBIO-FIBULAR**.

TIBIO-PHALANGETIEN (Fr.), n. *Te-be-o-fa²l-a²n²-zhe²t-e-a²n².* See **FLEXOR digitorum pedis longus**.

TIBIOPHALANGIEN (Lat.), n. m. *Ti²b(heb)-i²-o(ō)-fa²l-(fa²l)-a²n(a²n²)/je²(ge²)-u²s(u²s).* Fr., *tibio-phalangen*. Ger., *langer (oder dicker) Hufbeinbeuger, hinterer Unterschenkelmuskel*. The analogue of the flexor hallucis longus and flexor peronos of man found in the lower animals. [L. 13.]—**T. magnus.** See **T. parvus**. See **PERONEOPHALANGIEN**.

TIBIOPRÆMETATARSEUS (Lat.), **TIBIOPRÆMETATARSUS** (Lat.), n's m. *Ti²b(heb)/i²-o(ō)-pre(pra²-a²)-me²t-a²-ta²r-s(e²-u²s(u²s))-ta²r-s(u²s(u²s)).* From *tibia* (q. v.), *præ*, before, and *metatarsus* (q. v.). Fr., *tibio-pré-métatarsien*. Ger., *Schien-beinbeuger, Wadenmuskel*. A muscle of solipedes, divided into two portions—the muscular, representing the tibialis anticus of man, and the tendinous, representing, according to Meckel, the peroneus tertius of man. [L. 13.]

TIBIOPRÆPHALANGIEN (Lat.), n. m. *Ti²b(heb)/i²-o(ō)-pre(pra²-a²)-fa²l-(fa²l)-a²n(a²n²)/je²(ge²)-u²s(u²s)).* From *tibia* (q. v.), *præ*, before, and *phalanx* (q. v.). See **PERONEOPRÆPHALANGIEN**.

TIBIO-SOUS-PHALANGIEN COMMUN (Fr.), n. *Te-be-o-su-fa²l-a²n²-zhe²t-e-a²n² ko²m-u²n².* Of Chausseier, see **FLEXOR digitorum pedis longus**.

TIBIO-SOUS-TARSIEN (Fr.), n. *Te-be-o-su-ta²r-se-a²n².* See **TIBIALIS posticus**.

TIBIO-SUS-TARSIEN (Fr.), n. *Te-be-o-su-ta²r-se-a²n².* See **TIBIALIS anticus**.

TIBIO-TARSAL, adj. *Ti²b-i²-o-ta²r-s-l.* Fr., *tibio-tarsien*. Pertaining to the tibia and the tarsus. [a. 48.]

TIBOUCHINA (Lat.), n. *Teb-ush-en-a².* Fr., *tibouchine*. A genus of the *Melastomaceæ*. [a. 35.]—**T. aspera.** A Guiana shrub. The aromatic leaves and flowers are used as a pectoral. [a. 35.]

TIC, n. *Ti²k.* Fr., t. A convulsive motion or fit, especially of certain muscles of the face. [D. 20.]—**Convulsive t.**, **Facial t.** Fr., *t. convulsif*. Ger., *Gesichtskrampf*. See *Gilles de la Tourette's disease*.—**Salaamst'** (Ger.). See **SALAAM CONVULSIONS**.—**Spasmodic t.** Paralysis of the muscles of one or both sides of the face, associated with tonic contraction of the same. [D. 1.] Cf. **Facial paralysis**.—**T. de salaam** (Fr.). See *Chorea rudans* and *Salaam convulsions*.—**T. douloureux** (Fr.). See *Neuralgia*, accompanied by an involuntary contraction of some of the facial muscles. [a. 34.]—**T. giratoire** (Fr.). Clonic spasm of the oblique capitis inferior. [a. 34.]—**T. non-douloureux** (Fr.). Of Troussier, myoclonus. [a. 34.]—**T. rotatoire** (Fr.). See *T. giratoire*.

TICK, n. *Ti²k.* Gr., *ἰξός*. Lat., *ixodes*. Fr., *tique*. Ger., *Zecke*. A name common to certain small parasitical *Arachnida* constituting the section *Ixodes* (called also *Suctorio*) of the family *Acaridae*. [G. 60.] See *Ixodes* and its subheadings.—**Itch t.** See *ACARUS scabiei*.

TICKLING, n. *Ti²k/l²n².* Fr., *chatouillement*. Ger., *Kitzeln*, *Kitzel*. A sensation of slight irritation of the peripheral ends of sensitive nerves, sometimes purely subjective. [D.]

TICKSEED, n. *Ti²k/se²d.* The genus *Ceropegia*, also any one of several species of *Desmodium*. [a. 35.]

TICKWEED, n. *Ti²k/we²d.* See *Hedysoma pulegioides*.

TICOREA (Lat.), n. f. *Ti²k-or-e²a².* Fr., *Hicorée*. A genus of rutaceous trees and shrubs. [a. 35.]—**T. febrifuga**. A Brazilian and Guiana tree. The astringent bark is used as a febrifuge. [a. 35.]

TIEFENBACH (Ger.), n. *Tef'e²n-ba²ch².* A climatic health resort, with a sulphurous spring, in Bavaria, near the Lake of Constance. [L. 57 (a. 14.)]

TIEFSTAND (Ger.), n. *Tef/sta²nd.* See **DESCENT** (1st def.).

TIEFSTECHE (Ger.), n. *Tef/stech²e²n².* See **ACUPUNCTURE**.

TIERCE (Fr.), adj. *Te-e²rs.* See **TERTIAN**.

TIERMAS (Sp.), n. *Te-e²m/a²s.* A place in Saragossa, Spain, where there is a hot saline and sulphurous spring. [L. 49, 57 (a. 14.)]

TIERS-ARGENT (Fr.), n. *Te-e²r-z-a²r-zha²n².* An alloy of 3 parts of silver and 2 of aluminium; used in France as a substitute for silver. [Bloxam (B).]

TIBUTE (Jav.), n. See **STRYCHNOS t.**

TIFLIS, n. A place in the Caucasus, Russia, where there are hot sulphurous springs. [L. 80, 49 (a. 14.)]

TIGE (Fr.), n. *Tehz.* 1. See **SREM** (1st def.). 2. See **OURA crebri**.—**T. de l'encéphale** [Huguenin]. The base of the brain. [L. 28 (K).]—**T. du calamus scriptorius**. The median furrow of the fourth ventricle. [I. 86 (K).]—**T. fœtale**. The long axis of the fœtus; its trunk. [A. 54.]—**T. pituitaire**. See **INFUNDIBULUM** (2d def.).—**T's souterraines** [Fr. Cod.]. See **RHIZOMA** (2d def.).—**T. sus-sphénoïdale**. See **HYPOPHYSSIS cerebri**.

TIGELLARY, adj. *Ti²g'e²l-ar-i².* Pertaining to the stem or to a tigella; of the sheath of a leaf, incorporated with the stem. [a. 35.]

TIGELLE, n. *Ti²g'e²l.* Lat., *tigella*, *tigellula*. Fr., *t. tigellule*. An initial or miniature stem; of some botanists, the stem of mosses and other cryptogams; also the plumule and the caulicle, and, of Richard, the part of the plumule connecting the radicle with the cotyledons. [a. 35.]

TIGLI (Fr.), n. *Ti-tye*. Ger., *T'baum*. See **CROTON tiglium**.—**Huile de t.** See **CROTON-oil**.

TIGLIC, adj. *Ti²g'l²ik.* Derived from *Tigium*. [B.]—**T. acid.** See **METHYLCROTONIC acid**.—**T. aldehyde**. See **GUAIACENE**.

TIGLINIC ACID, n. *Ti²g-l²in²'yk.* See **METHYLCROTONIC acid**.

TIGLIUM (Lat.), n. *Ti²g'l²u²m(u²m).* See **CROTON t.**—**Grana tiglii**. The seeds of *Croton t.* [a. 35.]—**Oleum tiglii** [U. S. Ph.]. See **CROTON-oil**.—**T. officinale**. See **CROTON t.**

TIGNASSE (Fr.), n. *Ten-ya²s.* See **PLICA polonica**.

TIGRETIER (Fr.), n. *Teg-r'i-te-a.* A convulsive affection resembling chorea, observed in Abyssinia. [L. 41 (a. 14.)]

TIGRIDIA (Lat.), n. f. *Ti²g'r²id-a².* From *tigris*, a tiger. A genus of the *Iridaceæ*. [a. 35.]—**T. pavonia**. Sp., *flor de la maravilla* [Mex. Ph.]. The tiger-flower of central Mexico. The edible, starchy bulbs are reputed febrifuge. [A. 447 (a. 21).]

TIKMEHL (Ger.), n. *Ti²k'mal.* See *Curcuma ARROW-ROOT*.

TIL (Hind.), n. Sans., *tila*. The *Sesamum orientale*. [a. 35.]—**T.-oil**. See *Oil of SESAMUM*.

TILGUNG (Ger.), n. *Ti²g'un².* See **ABOLITIO** and **EXTIRPATION**.

TILIA (Lat.), n. f. *Ti²l²i-a².* Fr., *tilleul*. Ger., *Linde*. 1. A genus of trees (the limes or lindens), of the *Tiliaceæ*, which are an order of the *Malesales*. The *Tilia* are a tribe of the *Tiliaceæ*. [a. 35.] 2. See *Flores tilieæ*.—**Aqua tilieæ**. Fr., *eau distillée de tilleul*. Sp., *agua de flor de tilo*. A preparation made by distilling flores tilieæ with water or [Russ. Ph.], by diluting aqua tilieæ concentrata with seven times as much water. [B. 95 (a. 38).]—**Aqua tilieæ concentrata**. A preparation made by mixing 100 parts of aqua tilieæ with 2 of alcohol and distilling 10 parts [Ger. Ph. (1st ed.)]. See *Ph.*; or by distilling 12 parts of flores tilieæ and 2 of alcohol with water enough to make 15 parts [Russ. Ph.]. [B. 95 (a. 38).]—**Cortex tilieæ**. The bark of *T. silvestris*. [B. 95 (a. 38).]—**Flores tilieæ**. Fr., *tilleul*. Ger., *Lindenblüthen*. Sp., *tilo*. The flowers of *T. mollis* [Austr. Ph., Hung. Ph., Ger. Ph., Swiss Ph.], of this and *T. vulgaris* [Russ. Ph., Swed. Ph.] (*T. intermedia* [Dau. Ph.]), of *T. argentea* [Roum. Ph.], of *T. europæa* [Gr. Ph., Netherl. Ph.], of *T. silvestris* [Sp. Ph.], or of *T. silvestris* and *T. mollis* [Fr. Cod.]. [B. 95 (a. 38).]—**Hydrolatum tilieæ**. See *Aqua tilieæ*.—**T. alba**. 1. See *T. argentea*. 2. See *T. heterophylla*.—**T. americana**. Fr., *tilleul d'Amérique*. 2. Ger., *kahle Linde*. American bass-wood (or linden, or white-wood). The flowers are used like those of *T. intermedia*. The inner bark is used for cataplasms. [a. 35.]—**T. argentea**. Ger., *silberweisse Linde*. Silver lime-tree of Hungary and southeastern Europe, identified by some authors with the *φύλας* of the ancients. The fragrant flowers are more mucilaginous than those of *T. intermedia*, and yield a valuable essential oil. [a. 35.]—**T. canadensis**. *T. caroliniana*. See *T. americana*.—**T. europæa**. The European lime-tree. *T. intermedia* is the common variety. *T. mollis* and *T. silvestris* are also considered by some authors as varieties of it. [a. 35.]—**T. heterophylla**. Fr., *tilleul blanc*. American white bass-wood. The flowers are used like those of *T. intermedia*. [a. 35.]—**T. intermedia**. Fr., *tilleul d'Europe* (ou de Hollande). Ger., *gemeine Linde*. Common European lime-tree, Russian bass-tree; a tree of Europe and northern Asia, by some authors considered a hybrid between *T. mollis* and *T. silvestris*. The flowers, *flores tilieæ europææ*, seu *femineæ*, are mildly stimulant, antispasmodic, and diaphoretic. A charcoal, *carbo tilieæ*, is prepared from the wood. The leaves and mucilaginous inner bark, *folia et cortex interior tilieæ*, were also formerly official. The sap of the tree yields sugar. The fruit contains a principle analogous to chocolate. [a. 35.]—**T. laxiflora**. Ger., *schlafblüthige Linde*. A North American tree (by Wood considered a variety of *T. americana*), used like *T. intermedia*. [a. 35.]—**T. macrophylla**. Lat., *T. heterophylla* and *T. intermedia*.—**T. mollis**. Ger., *weichhäutig* (oder *grossblättrige Linde*, *Sommerlinde*, *Frühlinde*, *Wasserlinde*, *holländische Linde*). Broad-leaved lime-tree of southern and central Europe; according to some authors, a variety of *T. intermedia*. The flowers are used like those of *T. intermedia*. [a. 35.]—**T. silvestris**. Ger., *wilde* (oder *kleinblättrig*

bined with water of crystallization, it forms a series of crystalline products, $\text{SnCl}_4 + 6\text{H}_2\text{O}$, $\text{SnCl}_4 + 5\text{H}_2\text{O}$, and $\text{SnCl}_4 + 8\text{H}_2\text{O}$. T. tetrachloride combines with a number of other chlorides to form double salts (sometimes called *chlorotinnates*). It is used as a mordant in dyeing, and was formerly called "composition," "physic," or "dyer's spirits," and commercially was known as "nitromuriate" of t. The compound $\text{SnCl}_4 + 5\text{H}_2\text{O}$ is commercially designated the "oxymuriate" of t. T. tetrachloride was official in the Sardinian Ph. of 1863. [B. 3, 10.]—**T. tetrafluoride.** Stannic fluoride, SnF_4 ; known only in solution. It forms with the fluorides of other metals compounds called *stannofluorides*. [B. 3.]—**T. telluride.** Stannic telluride, SnTe . [B. 3.]—**T. tetraethyl.** A liquid, $\text{Sn}(\text{C}_2\text{H}_5)_4$, of ethereal odor. [B. 3.]—**T. tetrethyl.** Stannic ethide (see under *T. ethide*). [B.]—**T. tree.** See *ARBOR JOVIS*.—**T. triethyl.** See *STANTRIETHYL*.

TINAGMUS (Lat.), n. m. $\text{Ti}^n\text{a}^2\text{g}(\text{a}^2\text{g})/\text{mu}^2\text{s}(\text{mu}^2\text{s})$. Gr., *τυνάγμος*. 1. See *CONCUSSION*. 2. Rectal tenesmus. [E.]

TINCA (Lat.), n. f. $\text{Ti}^n\text{a}^n/\text{ka}$. A genus of fresh-water fishes, of the *Cyprinidae*, the tencches. [a, 48.] Cf. *Os tinca*.

TINCAL, n. $\text{Ti}^n\text{a}^n/\text{k}^n\text{l}$. Lat., *tincalum*. Crude borax. [a, 35.]

TINCITORIAL, adj. $\text{Ti}^n\text{a}^n\text{kt}$ -or $\text{Ti}^n\text{a}^n\text{kt}$ -ad. Lat., *tincitorius* (from *tingere*, to dye). Used for dyeing. [a, 35.]

TINCTUR (Ger.), n. $\text{Ti}^n\text{a}^n\text{kt}$ -ur. See *TINCTURE*.—**Saure aromatische T.** See *MIXTURE sulfurica acida*.

TINCTURE (Lat.), n. f. $\text{Ti}^n\text{a}^n\text{kt}(\text{ten}^n\text{kt})/\text{u}^n\text{r}(\text{u}^n\text{r})/\text{a}^2$. See *TINCTURE* and *DYE*.—**T. acida aromatica.** See *MIXTURE sulfurica acida*.—**T. aetherea.** 1. Impure ether mixed with alcohol. [B. 97.] 2. See *Ethereal TINCTURE*.—**T. aetherea camphorata.** See *Solutio CAMPHORÆ aetherea*.—**T. alexipharmaca Huxhami.** See *Tinctura CINCHONÆ composita*.—**T. alkalica acris.** See under *T. ANTIMONIUM aurata*.—**T. aloetica alcalina.** See *ELIXIR proprietatis Paracelsi sine acido*.—**T. amara.** 1. Of the Ger. Ph., Austr. Ph., Dan. Ph., Hung. Ph. (3d ed.), Norw. Ph., Russ. Ph., a tincture consisting of 60 parts each of gentian-root and the herb of lesser century, 40 of bitter-orange peel, and 20 each of unripe oranges and rhizome of zedoary, macerated with 1,000 of dilute alcohol for a week [Ger. Ph.]. The Austr. and Hung. Ph.'s order with the gentian-root and lesser century 60 parts each of bitter-orange peel and the leaves of *Menyanthes trifoliata*, and 30 of sodium carbonate crystals [Austr. Ph.]. (18 of dried sodium carbonate [Hung. Ph.]), to be digested in 3,000 of alcoholic water of cinnamon for 3 days (6 [Hung. Ph.]). The Russ. Ph. orders with the gentian-root and lesser century 60 parts of unripe oranges and 30 of zedoary, with maceration in 1,050 of 70-per-cent. alcohol for five days. The Dan. and Norw. Ph.'s omit the lesser century and direct the use of 60 parts each of blessed thistle and unripe oranges, with 15 of anise and 240 of wormwood, digesting for three days in 2,175 of dilute alcohol [Dan. Ph.] (with 20 of anise and 200 of wormwood, digesting in 2,000 of dilute alcohol for half an hour and boiling [Norw. Ph.]). [B. 95 (a, 38).] See also *T. GENTIANÆ composita*, *T. ABSINTHI composita*, and *Tincture d'ABSINTHE composita*. 2. See *ELIXIR AURANTIORUM compositum*.—**T. amara ex Baumé.** See *GUTTÆ amarae Baumé*.—**T. ammoniata aromatica.** See *Spiritus AMMONIÆ aromaticus*.—**T. antifebrilis Warburgi.** See *Warburg's TINCTURE*.—**T. antihysterica** [Norw. Ph.]. A tincture made by mixing 20 parts of tincture of asafoetida with 2 each of tincture of castor and spiritus aethereus camphoratus. [B. 95 (a, 38).]—**T. antiphtisica.** A solution of lead acetate and iron sulphate described in the Augsburger Ph. used in the treatment of phthisis, hæmoptysis, and dysentery. [B. 70.]—**T. antiscorbatica** [Fr. Cod.]. See *Tincture de RAIFORT composita*.—**T. aromatica.** Fr., *alcoolé de cannelle et de cardamom composé*. A tincture made with 25 parts each of cloves, galangal, cardamom, and ginger (50 of ginger [Ger. Ph.]), 100 (125 [Ger. Ph.]) of cinnamon, and 1,000 (1,250 [Ger. Ph.], 1,200 [Ger. Ph.]) of dilute alcohol (1,200 of 70-per-cent. alcohol [Russ. Ph.], 1,900 of 80-per-cent. alcohol [Belg. Ph.]). [B. 95 (a, 38).]—**T. aromatica acida.** See *MIXTURE sulfurica acida*.—**T. aurea nervina.** See *T. aurea nervina*.—**T. balsamica.** See *Tinctura FERRI chlorati aetherea*.—**T. balsamica.** See *T. BENZOIN composita* and *T. tolutana*.—**T. balsamica aromatica.** See *MIXTURE oleoso-balsamica*.—**T. bezoardica.** See *MIXTURE pyrotartarica*.—**T. Bonvicini.** See *T. GENTIANÆ composita*.—**T. burgundica.** A preparation made by macerating for two days 22 parts of cinchona, 4 each of sweet flag and cinnamon, 7 of orange-peel, and 2 of cochineal in 900 of Portuguese white wine. [B. 119 (a, 38).]—**T. colombo** [Russ. Ph.]. See *Tinctura COLUMBÆ*.—**T. composita Whytii** [Netherl. Ph.]. A tincture closely resembling the t. chinæ composita of the Ger. Ph., but without the cinnamon (see *T. CINCHONÆ composita*). [B. 95 (a, 38).]—**T. Dahlbergii.** A mixture of 2 parts of star-anise with 16 of colocyth and 192 of alcohol, or with 12 of colocyth and 160 of alcohol, or with 24 of colocyth and 330 of brandy; filtered after three days. [B. 119 (a, 38).]—**T. Dorelli.** Fr., *vin de rhubarbe et d'aunée*. A tincture made with 60 parts of rhubarb and 720 of Malaga or Spanish wine, with 7 of cardamom, 90 of sugar, and either 15 each of orange-peel and extract of elecampane or 15 each of lemon-peel, icoric, and extract of elecampane with 30 of Corinthian raisins; or with 20 each of cardamom and extract of elecampane, 160 of sugar, 120 of raisins, 24 of mace, and 54 of potassium carbonate. [B. 119 (a, 38).] See also *Vinum REET*.—**T. diatrion.** See *MIXTURE pyrotartarica*.—**T. digestiva** [Norw. Ph.]. A preparation made by mixing equal parts of spiritus aethereus camphoratus, compound tincture of rhubarb, and a 20-per-cent. solution of potassium carbonate. [B. 95 (a, 38).]—**T. febrifuga acida.** See *MIXTURE pyrotartarica*.—**T. ging.** See *VINUM ALOES*.—**T. Huxhami** [Belg. Ph.]. A tincture made with 100 parts of pale cinchona-bark, 75 of bitter-orange peel, 4 of cochineal, 8 of saffron, and 20 of Virginia snake-root, macerated for six days in 1,000 of 60-per-cent. alcohol. [B. 95 (a, 38).] See also *T. CINCHONÆ composita*.—**T. japonica.** See *Tinctura CATECHU composita*

(2d def.).—**T. kalina.** A tincture made by treating fused caustic potash for two days with 6 times as much alcohol (if the sp. gr. of 0.840 [Gr. Ph.]) or by dissolving the potash in 10 times as much 95-per-cent. alcohol [Russ. Ph.], and separating the liquid from the residue. [B. 95 (a, 38).]—**T. laxativa.** See *Tincture d'ALOËS et de réglisse*.—**Tincture narcotica pharmacopœie gallicæ** [Swiss Ph.]. Tinctures made by treating 1 part of some freshly dried and powdered narcotic herb by displacement with dilute alcohol enough to make 5 parts. [B. 95 (a, 38).]—**Tincture narcotica pharmacopœie germanicæ** [Swiss Ph.]. Tinctures made by crushing 5 parts of some fresh narcotic herb in a stone mortar and macerating with 6 of alcohol. [B. 95 (a, 38).]—**T. nervina Bestucheffii.** See *Tinctura FERRI chlorati aetherea*.—**T. odontalgica** [Norw. Ph.]. A preparation consisting of 46 parts each of acetic ether and chloroform, 2 of oil of cassia, 34 of oil of cloves, and 72 of strong alcohol. [B. 95 (a, 38).]—**T. odontalgica Botot** [Swiss Ph.]. A preparation made by pouring 1,000 parts of alcohol and 500 of rose-water over a mixture of 10 parts each of cloves, cinnamon, and star-anise and 5 of peppermint-oil, adding 5 each of purified cream of tartar and cochineal rubbed up with water, allowing to stand eight days with frequent shaking up, and filtering. [B. 95 (a, 38).]—**T. purgans.** See *T. JALAPÆ composita*.—**T. pyrotartarica.** See *Tinctura pyrotartarica*.—**T. sacra.** See *Vinum ALOES* and *Tinctura RHEI et aloes*.—**T. stomachica.** See *ELIXIR AURANTIORUM compositum*.—**T. thebaica.** See *Tinctura OPII*.—**T. thebaica benzoica.** See *T. OPII camphorata*.—**T. tolutana.** Fr., *tincture de baume de Tolu*. Sp., *tinctura alcoholica de bálsamo de Tolu*. A tincture made by dissolving balsam of Tolu in nine parts of 60-per-cent. alcohol [U. S. Ph.], or by macerating 24 oz. of balsam of Tolu in 15 fl. oz. of alcohol [Br. Ph.], or by macerating (digesting [Dan. Ph.]) the balsam with 5 times as much strong (80-per-cent. [Fr. Cod.], 90-per-cent. [Sp. Ph.]) alcohol for 3 days [Dan. Ph.] (5 [Swed. Ph.], 8 [Sp. Ph.], 10 [Fr. Cod.]). [B. 95, 119 (a, 38).]—**T. tonica martialis lutea.** See *Tinctura MARTIS adstringens*.—**T. toniconervina Bestucheffii.** See *T. FERRI chlorati aetherea*.—**T. vulneraria rubra** [Swiss Ph.]. 1. A preparation made by digesting 2 parts each of chamomile flowers, lavender flowers, fennel seeds, wormwood, melissa, crisped mint, rosemary, rue, *Thymus serpyllum*, and red sandal-wood with 50 each of strong alcohol and water for 8 days, expressing, and filtering. [B. 95 (a, 38).] 2. Of the Fr. Cod., see *ALCOOLATURE vulnéraire*.—**T. Whytii** [Belg. Ph.]. A tincture closely resembling the t. chinæ composita of the Ger. Ph. (see *T. CINCHONÆ composita*). [B. 95 (a, 38).]

TINCTURE, n. $\text{Ti}^n\text{a}^n\text{kt}$ -ur. Lat., *tinctura* (from *tingere*, to wet), aer [Paracelsus]. Fr., *tinture*, t. Ger., *Tinctur*, *Tinktur*. A pharmaceutical preparation made by dissolving a drug in alcohol, especially by subjecting vegetable substances to the action of alcohol.—**Antidysenteric.** A solution of a medicinal substance in spirit of ammonia. [B.]—**Antiperiodic t.** See *Warburg's t.*—**Cordial solar t.** See under *Tinctura AURI*.—**Ethereal t.** A t. in the preparation of which an appreciable quantity of ether is used. [B. 95 (a, 38).]—**Huxham's t.** See *Tinctura CINCHONÆ composita*.—**Stomachic t.** See *ESSENTIA stomachica polychresta Gundelsheimeri* and *ELIXIR AURANTIORUM compositum*.—**Theriacal t.** See *ESSENTIA theriacalis*.—**Warburg's t.** A preparation made by digesting 1 lb. of Socotrine aloes, 4 oz. each of rhubarb, angelica root, and cochineal of Damocates, 2 each of elecampane, saffron, fennel, and prepared chalk, 1 oz. each of gentian, zedoary, cubeb, myrrh, camphor, and agaric, and 500 oz. of proof spirit for twelve hours, expressing, adding 10 oz. of quinine sulphate, and filtering when this is dissolved by aid of the water bath and the mixture cooled; used in obstinate cases of malarial poisoning. [B. 5 (a, 38).]

TINDER, n. $\text{Ti}^n\text{a}^n\text{kt}$ -ur. See *AMADOU*.

TINEA (Lat.), n. f. $\text{Ti}^n\text{a}^n/\text{e}^2\text{a}^3$. Fr., *teigne*, Ger., *Schorf*, *Grind*. A word used by the translators of Arabian writings as the equivalent of *al tin*, *al thin*, and *althin*, to designate various eruptions of the hairy scalp. It has been applied to many chronic, pustular, contagious skin diseases, but is now generally restricted to those depending on the presence of a vegetable parasite, and especially to those that affect the scalp. [G.]—**T. amiantacea.** See *SEBORRHEA sicca*.—**T. asbestina.** *Seborrhea capillitii* in which the crusts resemble asbestos. [G.]—**T. axillaris.** T. affecting the axilla.—**T. barbie.** See *SYCOSIS parasitaria*.—**T. benigna.** See *SCABIES capitis simplex*.—**T. capitis.** See *PITYRIASIS capitis*.—**T. ciliaris.** See *LIPITTUDO*.—**T. circinata.** See *MYCOSIS trichophytina* and *DERMATOMYCOSIS maculo-vesiculosa*.—**T. circinata tropica.** See *T. imbricata*.—**T. crustacea.** Porrigo larvalis. [G.]—**T. corporis.** See *DERMATOMYCOSIS maculo-vesiculosa*.—**T. decalvans.** See *ALOPECIA areata*.—**T. favina.** *T. favosa*. See *FAVUS*.—**T. furfuracea.** See *SEBORRHEA sicca*.—**T. granulata.** See *ACHOR granulatus*.—**T. imbricata** [Manson]. Chinese ringworm; a cutaneous disease occurring about the Straits of Malacca and the islands of the Malayan Archipelago, characterized by desquamation of the cuticle in the form of concentric flakes which present free edges toward the centre of the patch, while toward the circumference they are firmly attached. The disease is regarded by most authorities as a form of ringworm. [Med. Rep. of the Imp. Chinese Medical Commission, 1879, p. 10.] Cf. *T. trichophytina barbie*.—**T. kerion.** See *KERION*.—**T. lactea.** See *CRUSTA lactea*.—**T. lupina.** *T. lupinosa*. See *PORRIGO lupinosa*.—**T. muciflua** [Alibert]. See *ACHOR*.—**T. mucosa.** See *TEIGNE muqueuse*.—**T. neonatorum.** See *SEBORRHEA*.—**T. nodosa.** See *TRICHORRHEXIS nodosa*.—**T. porriginosa.** See *PITYRIASIS capitis*.—**T. polonica.** See *PLICIA polonica*.—**T. sycois.** See *SYCOSIS parasitaria*.—**T. tonsdens.** *T. tonsurans*. See *TRICHOMYCOSIS circinata*.—**T. trichophytina.** See *TRICHOPHYTOSIS*.—**T. trichophytina barbie.** See *SYCOSIS parasitaria*.—**T. trichophytina capitis.** See *TRICHOMYCOSIS circinata*.—**T. trichophytina corporis.** See *DERMATOMYCOSIS maculo-vesiculosa*.—**T. trichophytina cruris.** See *ECZEMA marginatum*.—**T. trichophytina sycois.** See *SYCOSIS parasitaria*.—**T. trichophytina tonsurans.** See *TRICHOMYCOSIS circinata*.—**T. trichophytina unguium.** See *ONYCHOMYCOSIS*.

T. vera. See FAVUS.—**T. versicolor.** See DERMATOMYCOSIS furfuracea.

TINEARIA (Lat.), n. f. $Ti^{2n}n^{-e}a(a)^3/r^{12}a^3$. From *tinea*, a moth. The *Helichrysum arenarium*. [a. 35.]

TINESMUS (Lat.), n. m. $Ti^{2n}(ten)^{-e}z(e)^3/mu^3(mu)^3$. See TINESMUS.

TINGUARKA (Lat.), n. f. $Ti^{2n}n^{-g}wa^3ra^3$. A genus of umbelliferous herbs. [a. 35.]—**T. cervariaefolia**, **T. montana**. Two species found in the Canary Islands; the second is closely related to *T. sicula*. [a. 35.]—**T. sicula**. A species indigenous to Mediterranean regions. The root is edible and celery-like. [a. 35.]

TINKAL, TINKAR, n. s. $Ti^{2n}n^{-k}l^{-ka}^3r$. See TINCAL.

TINKLING, n. $Ti^{2n}n^{-k}l^{12}n^2$. Fr., *tintement, cliquetis*. Ger., *Klingen*. A sharp, clear sound like that produced by one piece of metal striking lightly against another. [a. 34.]—**Auriculo-metallic t.** A t. heard over the cardiac apex, produced by a jarring of the chest-wall that is set in vibration by the impulse. [L. 20 (a. 34).]—**Metallic t.** A t. pulmonary sound produced in a large cavity having solid walls. [a. 34.]

TINKTUR (Ger.), n. $Ti^{2n}n^{-kt}ur$. See TINCTURE.

TINNITUS (Lat.), n. m. $Ti^{2n}n^{-nit}(net)^3u^3u^3$. Gen., *-it-us*. From *tinnire*, to ring. Fr., *tintement*. Ger., *Gebrause*. A ringing or tinkling sound. [A. 312 (a. 17).]—**Nervous t.** Fr., *tintement (ou bourdonnement) nerveux*. Ger., *nerwoses Ohrensausen* (oder *Ohrenbrausen*). A true neurosis, characterized by the subjective sensation of a humming or buzzing sound, varying considerably in character, and occurring mostly in excitable, nervous persons, during mental strain, or in states of exhaustion, anemia, or shock. It is also known as *t. without deafness*, and proves obstinate to every kind of treatment. [F. 3.]—**T. aurium**. Fr., *tintement (ou bourdonnement) d'oreille*. Ger., *Gellen der Ohren, Ohrensausen, Ohrensummen, Ohrenbrausen*. A subjective sound, varying in character, duration, and intensity, heard by patients suffering from various forms of ear disease, and also following the administration of large doses of certain drugs, notably quinine. It also occurs in certain febrile disorders and in marked anemia. [F.]

TINOSPORA (Lat.), n. f. $Ti^{2n}(te)^{-no}sp'o^3r^3a^3$. From *tinus*, the laurestinus, and *spora*, a seed. A genus of the *Tinosporaceae*, which are a tribe of the *Menispermaceae*. [a. 35.]—**T. bakis**. See *Cocculus bakis*.—**T. cordifolia**. A shrub growing in tropical India. Its stem, together with portions of the root, *caulis et radix tinosporae*, is official in the Ph. of India. For the medicinal properties, see *Cocculus cordifolia*. [a. 35.]—**T. crispa**. An East Indian species allied to *T. cordifolia* and possessing the same bitterness and probably the same tonic properties. [a. 35.] See also *Cocculus crispus*.—**T. malabarica**. See *Cocculus malabaricus*.

TINTE (Ger.), n. $Ti^{2n}n^{-t}e^3$. See INK.

TINTEMENT (Fr.), n. $Ta^{2n}n^{-t}ma^{2n}n^3$. See TINNITUS and TINKLING.—**T. des oreilles**. See TINNITUS aurium.

TINTENFISCH (Ger.), n. $Ti^{2n}n^{-e}n^{-fi}sh$. See SEPIA (1st def.).—**T. bein**. See OS SEPLA.

TIQUE (Fr.), n. Tek. See IXODES ricinus.

TIQUETÉ (Fr.), adj. Te-k'-ta. Marked with small spots. [L. 41 (a. 14).]

TIrage (Fr.), n. Ter-a-zh. The movement of forced or spasmodic inspiration observed in dyspnoea. [L. 49 (a. 14).]

TRAILLEMENT (Fr.), n. Ter-a-z'-el-y'-ma²ⁿ. A dragging sensation.

TRAILLEUR (Fr.), n. Ter-a-z'-el-yu^r. See BRACHINUS crepitans.

TIRE-BALLE (Fr.), n. Ter-ba³. See BULLET FORCEPS.

TIRE-DENT (Fr.), n. Ter-da²ⁿ. See DENTAL FORCEPS.

TIRE-FOND (Fr.), n. Ter-fo²ⁿ. A gimlet for screwing into and drawing up pieces of bone, such as the button of bone cut by the trephine. [E.]

THE TIRE-FOND.

TIRE-RACINE (Fr.), n. Ter-ra³-sen. A forceps for removing the roots of teeth. [L. 41 (a. 14).]

TIRE-TÊTE (Fr.), n. Ter-te²ⁿ. A term applied to a number of contrivances for making traction on the fetal head in artificial delivery. It seems to have been first employed by Mauriceau to designate a complicated instrument of his invention, consisting essentially of a disc of metal hinged at its centre to the end of a shaft. The disc being turned so that its plane was coincident with the shaft, it was plunged into the head, and a like disc, attached to a cannula, was then screwed down upon the exterior of the cranium, the bony wall of which, on either side of the wound, was thus held between the two discs. Traction was then made with the shaft. [A. 44.]—**T.-t. à bascule**. An instrument devised by Levret for extracting the head of the fœtus after its separation from the trunk.

TIRETOIRE (Fr.), n. Ter-twa³. A dental forceps for removing the lower incisors. [L. 41 (a. 14).]

TISANE (Fr.), n. Te-za³ⁿ. See PRISAN. Of the Fr. Cod., an infusion or decoction to be used as a regular drink by a sick person, prepared for immediate use by dissolving the medicinal substance or substances in water (or sometimes boiling or macerating

and boiling in water) and sweetening if necessary with a medicinal syrup or with sugar, honey, or licorice. [B. 95 (a. 38).]—**T. astrigenae**. See *LIMONACE sulfurique*.—**T. carnatiativa**. A preparation made by boiling gently 30 parts each of juniper anise and saffron, 57 of chamomile, and 750 of water, straining, and adding 345 of brandy. [B. 119 (a. 38).]—**T. de Feltz** [Fr. Cod.]. See DECOCTUM Feltz.—**T. de Pollini**. See DECOCTUM JUGLANDIS.—**T. impériale**. See AQUA IMPERIALIS.—**T. pectorale** [Fr. Cod., 1837]. Syn.: *hydromel composé*. A preparation made by infusing 8 parts of elecampane rhizome, 3 parts of licorice root in 256 of boiling water. [B. 119.] Cf. *T. d'AUNÉE*.—**T. royale**. See APOZEM LASALIF.—**T. sudorifique**. See DECOCTUM GUALACI COMPOSITUM and DECOCTUM SARSAPARILLÆ COMPOSITUM.

TISCH (Ger.), n. $Ti^{2n}sh$. See TABLE (1st def.).—**Krankent.** See BED-TABLE.—**Leichtent.** Section's^t. A table for post-mortem examinations.

TISSU (Fr.), n. Te-su³. See TISSUE.—**T. albuginé**. 1. Fibrous tissue. [J.] 2. In the pl., *t. albuginés*, the aponeuroses.—**T. allantoidien**, **T. annexiel**. The tissue intervening between the allantois and the chorion in a placental cotyledon. [A. 15.]—**T. blanc**. Fibrous tissue. [J.]—**T. chondroïde** (Broca). A variety of connective tissue closely resembling epiphyseal cartilage, immediately beneath which it is found. [L.]—**T. chondrigène**. See CARTILAGE.—**T. coalescent**. See AREOLAR TISSUE and FIBROUS TISSUE.—**T. colloïde**. See MUCOUS TISSUE.—**T. conjonctif**. See CONNECTIVE TISSUE.—**T. conjonctif adipeux**. See ADIPOSE TISSUE.—**T. conjonctif élastique**. See ELASTIC TISSUE.—**T. conjonctif embryonnaire**. See MUCOUS TISSUE.—**T. conjonctif interstitiel**. See COTYLION.—**T. corne**. See CORNEAL TISSUE.—**T. créné**. See ENDONEURUM.—**T. conjonctif lâche**. See AREOLAR TISSUE.—**T. conjonctif tendineux et ligamenteux**. See WHITE FIBROUS TISSUE.—**T. corné**. See CORNEAL TISSUE.—**T. cribreux**. See AREOLAR TISSUE and FIBROUS TISSUE and cf. CRIBROSE TISSUE.—**T. dentinaire**. See DENTIN.—**T. fongueux**. Fungous granulation tissue. [a. 34.]—**T. inter-annexiel**. See *T. muqueux inter-annexiel*.—**T. kératinisé**. See CORNEAL TISSUE.—**T. laqueux**. A connective tissue that is reticulated. [a. 34.]—**T. muco-dermique**. The corium of a mucous membrane. [J. 33.]—**T. muqueux**. 1. Mucoid connective tissue. 2. The tissue of a mucous membrane. [J. 33.]—**T. muqueux inter-annexiel**. Of Dastre, the tissue interposed between the allantois, the amnion, and the chorion, together with the mucoid tissue of the umbilical cord, the two being continuous. [A. 15.]—**T. musculo-élastique**. Consisting of muscular and elastic elements. [L.]—**T. périfasciculaire**. See EPINEURUM.—**T. pigmentaire**. Pigment-cells. [J.]—**T. réticulé des os**. See CANCELLOUS TISSUE.—**T. scléreux**. Embryonic tissue which develops into fibrous, cartilaginous, or osseous tissue. [J. 33.]—**T. unissant**. See CONNECTIVE TISSUE and AREOLAR TISSUE.—**T. unifié**. See CONNECTIVE TISSUE.

TISSUE, n. $Ti^{2n}shu^3$. Gr., *lóros*. Lat., *textus, textura, tela*. Fr., *tissu*. Ger., *Gewebe*. A collection of cells or structural elements as modified in form, size, and arrangement to have a constant and recognizable structure, wherever it may occur (being modified in different situations only so far as local connections and uses render necessary), and to be adapted to the performance of a special and definite function. All of one kind of t. in the body forms a system, such as the nervous or the muscular system, while the t.'s combined form organs. While the general idea of what constitutes a t. is quite definite, it has not been possible up to the present time to give a universally satisfactory classification of them. Two systems are used, the oldest and most common being based upon the appearance in the adult, and the other upon the origin from the different germ layers of the ovum. According to the first method, one of the most satisfactory classifications is the division into four groups—epithelium, connective t., muscular t., and nervous t.; according to the second, the t.'s are ectodermic, mesodermic, and endodermic. [J. 19, 21, 30, 31.]—**Adenoid t.** Of His, the reticular framework of the lymphatic glands, alimentary mucosa, etc., the meshes of the reticulum being filled with lymphoid cells. This framework is described by many authors as made up of anastomosing branched cells, which mostly retain their nuclei; by others as composed of connective-t. fibres united into a network, the appearance of nuclei being given by the presence of endothelial cells. Adenoid t. may occur with indefinite boundaries, as in the mucosa of the alimentary canal. It is then sometimes called diffuse adenoid t. In other situations, as in the spleen, pleura, and omentum, it may form cords, cylinders, or patches. In the tonsils, the spleen, and the alimentary mucosa it often occurs in well-defined masses, the lymph-follicles. [J. 21, 24, 30, 31, 32, 42.]—**Adipose t.** 1. Areolar t. in which the areolae are more or less distinct, and are a condition which may occur in any part of the body except the eyelids and parts of the male sexual apparatus. This accumulation of fat-cells is usually abundant in well-fed individuals, especially in the subcutaneous areolar t., which is then often called the *panniculus adiposus* (q. v.). Adipose t. is abundantly supplied with blood-vessels and lymphatics, but has no nerves. 2. The fat-cells exclusive of the areolar t. in which they are found. [J. 21, 30, 31, 35, 42.]—**Areolar t.** The t. forming the framework of the pulmonary alveoli. It consists of areolar t. in which the elastic fibres are numerous, and there are also a considerable number of muscular fibre-cells. [J. 35.]—**Amorphous connective t.** [Henle]. See AREOLAR t.—**Animal t.** The t. of an animal in contradistinction to that of a plant. [J.]—**Aqueous t.** Water (or water-storing) t.; t. such that in the succulent plant parts it contains parenchyma cells stored with sap and more or less mucilage. [a. 35.]—**Areolar t., Areolated connective t.** That part of the connective t. of the body in which white and yellow connective-t. fibres and bundles cross at all angles and continually unite to form larger bundles or divide to form smaller ones, thus making a kind of network. Except in the immature condition, the ground substance has partly disappeared, leaving irregular cleft-like spaces, the so-called cells or areolae, which are often filled with fat-cells. Areolar

t. in its most typical form is found just beneath the skin. It is also found beneath serous and mucous membranes, between muscles and blood-vessels, and connecting the various layers forming hollow viscera and the lobes and lobules of glands. [J. 21, 30, 33.] Cf. *Connective t.* **Basement t.** (of nerves) See *Neuroglia*. **Basis t.** See *STROMA*. **Bone t.** See *Oseous t.* **Botryoidal t.** A dark-brown t. consisting of hollow tubes composed of cells containing fine brown pigment. It is found in the leech, and has been shown by Leydig and Lankester to belong to the vascular system. ["Quart. Jour. of Micr. Sci.," 1880, p. 307 (J.).] **Boundary t.** Epidermal t. [a. 35.] **Canellous t.** Fr. *tissu réticulé des os*. The porous, spongy t. of the bones. **Cartilaginous t.** See *CARTILAGE*. **Cavernous t.** Ger. *Schwellnetze*. Fibrous and elastic t. containing in the areole a freely communicating plexus of veins or venous sinuses, all included in an elastic envelope and capable of great increase in bulk when the veins are distended with blood. [L.] **Cellular t.** 1. *Areolar t.* 2. A t. composed of cells, such as epithelium. [J. 36, 37.] **Compact oseous t.** See *Compact oseous SUBSTANCE*. **Complex t's**, **Composite t's**, **Compound t's**. T's composed of two or more simple t's in nearly equal proportions, as in blood-vessels, lymph-vessels, lymphatic glands, etc. [J. 30.] **Conducting t.** **Conductive t.** Fr. *tissu conducteur*. 1. Any t., such as latifibrous t., serving to convey fluids from one part of a plant to another. 2. A special name for the cellular t. through which the pollen tube descends into the cavity of the ovary. **Conjunctive t.**, **Connective t.** Lat. *tela connectiva* (seu *fulcralis*, seu *maltharis*). Ger. *Bindegebeue*, *Bindersubstanz*, *Füllgebeue*, *Stützgebeue*. Syn.: *skeletal t.*, *sustentacular t.* T. serving for the support or connection of other t's. It consists of soft masses, as in areolar t., in tendons, and in ligaments, or of more or less hard and rigid masses, as in cartilage, bone, and dentin. All these forms agree (1) in being derived from the mesoderm, (2) in gradually merging into one another in the adult, (3) in taking one another's place in the course of development, (4) in forming homologous parts in different animals, and (5) in yielding gelatin or a gelatinous substance when boiled. There are also always present a considerable number of protoplasmic cells. The term connective t. is sometimes limited to the soft connective substances in the body, excluding bone and cartilage. It has then been applied to the soft skeleton for every part is supported and connected by its fibres. In the soft connective substances the fibres and connective t. corpuscles are imbedded in a homogeneous jelly-like ground-substance which stains brown like cell-cement when treated with silver nitrate. [J.] See *White fibres of connective t.*, *Areolar t.*, *White fibrous t.*, *Elastic t.*, *Oseous t.*, and *CARTILAGE*. **Constituent areolar t.** Syn.: *penetrating t.*, *parenchymal t.* *Areolar t.* which binds together the lobes and lobules of glands, etc., and accompanies the vessels and nerves into those organs, giving them support and protection. [J. 30.] **Corneous t.** Compact masses of cells which are soft near their vascular bases, but near their free surface hard, flat, and often devoid of a nucleus; as found in the hair, nails, hoofs, horns, and epidermis. [J. 24, 33.] **Cribose t.** See *Sieve t.* **Cytogenous t.** See *Adenoid t.* **Dental t.**, **Dentinal t.** See *DENTIN*. **Elastic t.** That part of the connective t. of the body consisting of branched and anastomosing elastic fibres or of elastic membranes, and is unaffected by acetic acid and caustic potash, and is present in parts which are liable to sudden variations in size (e. g., the arteries and lungs). The ligamentum nuchæ of the ox and the ligamenta subflava of man are composed almost entirely of elastic t. [J. 30, 31, 142.] **Elementary t's.** See *Simple t's*. **Embryonal connective t.** See *Mucoid connective t.* **Embryoplastic t.** Fr. *tissu embryoplastique*. Embryonic connective t. before the fibres are developed. [J. 27, 33.] **Endothelial t.** The t. formed by the endothelia of the body. [J.] **Epidermic t.** Of Kölliker, the epidermis and its appendages, with the epithelium of mucous membranes. [J. 24.] **Epithelial t.** The t. formed by the epithelia of the body. [J.] **Erectile t.** See *Cavernous t.* **Fat-t.**, **Fatty t.** See *Adipose t.* **Fibrillar connective t.** See *White fibrous t.* **Fibrillated t.** See *Fibrous t.* **Fibro-cartilaginous t.** See *FIBRO-CARTILAGE*. **Fibrous cellular t.**, **Fibrous connective t.** See *White fibrous t.* **Fibrous t.** Ger. *fibröse Gebeue*. 1. Connective t. composed of elastic or white fibres and bundles of fibres which extend in nearly parallel directions, as in tendons and the ligamentum nuchæ. 2. Connective t. composed of fibres without regard to their nature or direction. [J. 30, 43.] 3. In botany, elongated, thick-walled and taper-pointed cells found in the fibro-vascular bundles, including bast-cells, wood-cells, and tracheids. [a. 24.] **Follicular t.** See *Adenoid t.* **Formative t.** Ger. *Bildungsgebeue*. A collection of cells which give rise, by becoming more or less modified, to a permanent or adult t. [J.] **Formed connective t.** See *Solid connective t.* **Formless connective t.** See *Areolar t.* **Fundamental t.** One of the t's forming a fundamental system (q. v.). [a. 35.] **Gelatinous (connective) t.** See *Mucoid connective t.* **Gelatinous nervous t.** Nervous t. composed of non-medullated nerve-fibres, as in the sympathetic nerve. [J. 43.] **Generating t.** See *MERISTEM*. **Germinal t.** T. giving rise to ova or spermatozooids. [J.] See *Germinal EPITHELIUM* and *GERM plasma*. **Glandular t.** See *Punctated t.* **Granular connective t.** See *NEUROGLIA*. **Granulation.** A mass of indifferent cell-cement, formed by a scanty amount of ground substance traversed by capillary blood-vessels. [E. 25.] **Gray nervous t.** Nervous t. containing nerve-cells. [J. 43.] See also *GRAY MATTER of the brain*. **Ground t.** See *STROMA*. **Hepatic t.** See *Botryoidal t.* **His's t.** Spindle t. **Homogeneous connective t.** Membranes, such as the coats of the Malpighian corpuscles of the spleen, which agree in chemical character with connective t., but do not contain bundles of fibres. [J. 24.] **Horny t.** See *Corneous t.* **Indifferent connective t.** See *Mucoid connective t.* **Indurated t.** Neoplastic t. formed during inflammation. [a. 34.] **Interlobular connective t. of the liver.** Connective t. between the acini of the liver, containing branches of the bile ducts, the hepatic artery, and the portal vein. [L.] **Intermediate areo-**

lar t. Connective t. lying between the muscles, blood-vessels, and other deep-seated parts. [J. 30.] See *Areolar t.* **Intermediate t.** The active t. immediately surrounding the pith of monocotyledonous plants. [a. 35.] **Intermuscular t.** See *Areolar t.* **Interstitial connective t.** See *Areolar t.* and *Tissu areolier*. **Investing areolar t.** A kind of sheath formed around the muscles, blood-vessels, nerves, etc., by the areolar t. [J. 30.] **Jelly-like t.** See *Mucoid connective t.* **Lamellar t.**, **Laminar t.**, **Laminated t.** See *Areolar t.* and *Fibrous t.* **Lardiform t.** T. that has undergone amyloid degeneration. [a. 34.] **Latiferous t.** *Cinchinoma*. [a. 35.] See *LATER-CELL*. **Ligamentous t.** See *White fibrous t.* **Lymphatic t.**, **Lymphoid t.**, **Lymph t.** See *Adenoid t.* **Mechanical t.** See *Supporting t.* **Medullary t.** See *Medullary SUBSTANCE*. **Mesothelial t.** T's formed from the mesothelium. [a. 34.] **Metabolic t.** Organic t. that is concerned in metabolism. [a. 34.] **Mucinous t.**, **Mucoid (connective) t.**, **Mucous t.** Ger. *Gallertgebeue*, *Schleimgewebe*, *Nabelstrangewebe*. Connective t., such as that in the umbilical cord of the fœtus, consisting of an abundant jelly-like, albuminous ground-substance (see *Mucoid basis-SUBSTANCE*) in which are imbedded numerous round and branched, anastomosing cells and comparatively few white and elastic connective t. fibres. [J. 30, 31.] **Muscular t.** T. composed of striated muscular fibres, of cardiac muscular fibre-cells, or of muscular fibre-cells. Its distinguishing characteristic is its power to contract in one direction, viz., along the long axis of the fibres composing it. [J. 17, 26, 28, 31.] **Nerve-t.** See *Nervous t.* **Nervous cineritious t.** See *Gray nervous t.* **Nervous t.** T. composed of nerve-fibres and nerve-cells. [J.] **Oseous t.** Ger. *Knochengewebe*. The combined structure consisting of the matrix of animal matter and the osseous granules deposited in it that constitutes bone. See also *Oseous basis-SUBSTANCE*, *Compact oseous SUBSTANCE*, and *Spongy oseous SUBSTANCE*. **Osteogenic t.** See *OSTEOGEN*. **Palisade t.** See *Palisade PARENCHYMA*. **Parenchymal areolar t.**, **Penetrating areolar t.** See *Constituent areolar t.* **Permanent t.** Cell t. not capable of multiplication and division. [a. 35.] **Planerogenous t.**, **Phanerophorous t.** A structure which may be said to bear some evident part, such as the papilla of a hair, which seems to bear the hair. [J. 16, 34.] **Pitted t.** In botany, both *parenchyma*, *tachenchyma*; t. in which pits or perforations occur on the cell-walls or upon the septa between superposed cells. [a. 35.] **Porous connective t.** See *NEUROGLIA*. **Porous t.** See *Areolar t.* **Primary t.**, **Primordial t.** A cell-t. of a plant from which its parts are developed, e. g., meristem. [a. 35.] **Pulp t.** T. forming the pulp of a gland or organ, such as the t. of the tooth-pulp. [J. 26.] **Punctated t.** See *Pitted t.* **Reicher's connective t.** See *Hogeneous connective t.* **Reticular t.** See *Adenoid t.* **Reticulated connective t.** See *Areolar t.* and *Adenoid t.* **Retiform (connective) t.** See *Adenoid t.* **Sarcous t.** See *Muscular t.* **Sclerous t.** A general term including osseous, cartilaginous, and fibrous t. [J. 16.] **Sieve-t.** A cellular t. made up of thin-walled cells having areas of sieve-like markings. It is characteristic of the phloem. [E. 91 (a. 35).] **Simple t's**. T's composed of but one structural element, or with but a slight admixture of others, as in blood, lymph, epithelium, the connective t., cartilage, bone, and muscular and nervous t's. [J. 21, 30.] **Skeletal t.** A general term for fibrous, adenoid, adipose, osseous, and cartilaginous t. [Lankester, "Quart. Jour. of Micr. Sci.," 1880, p. 307 (J.).] **Skeletotrophic t.** A general term for connective t., capillaries, embryonic blood-vessels, and the hæmoglobinous and colorless elements of the blood. [Lankester, l. c. (J.).] **Solid connective t.** Of Kölliker, a general term for tendons, ligaments, fibro-cartilage, and fibrous membranes. [J.] **Spindle t.** Of His, spindle-shaped elements in the ovary, which he supposed to be stunted muscular fibre-cells. [J. 35.] **Spongy t.** (of bone). See *Spongy bone substance*. **Subarachnoid t.** Trabeculae of fibrous t. between the arachnoid and pia, the surfaces of which have a covering of endothelia. [L.] **Subcutaneous adipose t.** The adipose t. inclosed in subcutaneous t. (q. v.). [a. 48.] **Subcutaneous (cellular, or connective) t.**, **Subdermic t.** Ger. *Unterhautgebeue*, *Unterhautzellgebeue*. The areolar t. just beneath the corium and merging insensibly into it. It is made up of fasciculi or loosely joined fibrous bundles that pass obliquely from the underlying muscular fascia or periosteum to unite with the t. of the corium and inclose more or less adipose t. in their meshes, together with the sweat-glands. In this layer are also found the follicles of the coarser hairs, also blood-vessels, lymphatics, and nerves. [G; J.] Cf. *Fat COLUMNS*. **Submucous (areolar) t.** Ger. *Unterschleimhautgebeue*. Areolar t. beneath a mucous membrane and serving to connect it with other parts. [J.] **Subperiosteal t.** See *Osteogenetic LAYER*. **Subserous areolar t.** The areolar t. serving to attach serous membranes to the parts they invest. [J. 30.] **Supporting t.** T. such as woody t., serving to strengthen a part or organ; mechanical t. [a. 35.] **Sustentacular t.** See *Connective t.* **Trabecular t.** Ger. *Balkengebeue*. T. especially connective t., arranged in trabeculae, which often form a network. [J. 35.] **Tubular nervous t.** Nervous t. composed of medullated nerve-fibres. [J. 43.] **Tubuliferous t.** Ger. *Segmentalstränge*. Of Balfour, the branched masses of epithelium forming cords or tubes in the vascular zone of the ovary in embryos and young animals. It is derived from the Wolffian body. ["Quart. Jour. of Micr. Sci.," 1878, p. 383 (J.).] **Ungual t.** See *Corneous t.* **Utricular t.** See *PSEUDOPARENCHYMA*. **Vascular t.** Fr. *tissu vasculaire*. In botany, t. composed of united tubes or vessels formed by the obliteration of septa between superposed cells. [a. 35.] **Vasifactive t.** T. giving rise to blood-vessels. [J.] See also *Vasoformative CELL*. **Vasiform t.** *Trachenchyma*. [a. 35.] **Vaso-fibrous t.** See *Botryoidal t.* **Vesicular nervous t.** Nervous t. containing nerve-cells, as in the ganglia and cerebral cortex. [J. 43.] **Water (storine) t.** See *Aqueous t.* **White fibrous t.** Ger. *fibrillöses Bindegebeue*. 1. Connective t. composed of white inelastic fibres and bundles of fibres extending in nearly parallel directions. It is exceedingly strong, and

forms tendons, ligaments, and resistant membranes (e. g., periosteum, perichondrium, and the dura). In its purest form it contains very few elastic fibres. It merges insensibly into areolar t., as in the fascia. 2. Connective t. composed of white, inelastic, and glue-yielding fibres without regard to the direction of the fibres. [J. 35.]—**White nervous t.** Nervous t. composed of medullated nerve-fibres. [J. 43.]—**Woody t.** T. forming the woody fibre of plants. [a. 35.] See **WOOD-CELL**.—**Yellow elastic t.**, **Yellow fibrous t.** See **Elastic t.**

TISSULAIRE (Fr.), adj. T. su^l-la^r. Pertaining to the tissues. [J. 33.]

TISWIN, n. Ti²s²wiⁿ. Among the Apaches of Arizona, a kind of liquor manufactured from wheat, barley, or maize, which produces intoxication of the worst type when used in considerable quantities. The grain is buried in the ground until it sprouts, then dried and ground, and then, after boiling in water, put aside to ferment. ["Med. Record," Sept. 24, 1892, p. 358 (a. 50).]

TITA, n. Written also *teita*. The *Copitis teita* or sybil. The roots of *Picrorrhiza kurroa* and some other plants are also known under this name in the Bengal bazaars. [a. 35.]

TITANATE, n. Ti²a²n^{-a}t. A salt of titanate acid. [B.]

TITANIC ACID, n. Ti²a²n²i²k. Ger., *Titansäure*. A white powder of uncertain composition, probably TiH₃O₃ = TiO(OH)₃, obtained by precipitating titanium dioxide from an acid solution by means of an alkali. [B. 3; B. 93 (a. 14).]—**Liquid t. a.**, **Soluble t. a.** A form of t. obtained in solution by dialysis after the fashion of soluble stannic acid. [B. 6.]

TITANIC ANHYDRIDE, n. Ti²a²n²i²k. See **TITANIUM DIOXIDE**.

TITANIUM (Lat.), n. n. Ti²t²(tet)-an(a)n²(i²)²m(u²m). From *Titan*, a Titan. Fr., *titan*, *métalline*. A. Ger., *Titan*. A metallic element discovered by Gregor in 1789. It occurs in several rare minerals, chiefly in combination with oxygen, and is often associated with iron. It is obtained in the form of an iron-gray, amorphous powder of metallic lustre. It is distinguished by the readiness with which it combines with nitrogen at a high temperature. In composition it acts as a dyad or tetrad, and occasionally as a hexad, replacing two, four, or six atoms of hydrogen. Symbol, Ti; atomic weight, 48; sp. gr., 5.3. [B. 3.]—**Basic t. sulphate**. A white mass, TiO(SO₄). [B. 3.]—**T. bromide**. See *T. tetrabromide*.—**T. chloride**. See *T. dichloride*, *T. trichloride*, *T. tetrachloride*, and *T. oxychloride*.—**T. dichloride**. A brownish powder, TiCl₂, which has a strong affinity for moisture and decomposes water. [B. 3.]—**T. dioxide**. A substance, TiO₂, occurring in nature in the form of several minerals and obtainable artificially both as an amorphous white powder and in crystalline forms corresponding to those observed in the natural dioxide. It is insoluble in water, hydrochloric acid, or dilute sulphuric acid. It unites with alkaline carbonates to form titanates. [B. 3.]—**T. fluoride**. See *T. tetrafluoride*.—**T. hydroxide**. A dark-brown substance corresponding to t. sesquioxide, precipitated by ammonia from a solution of titanate acid and copper or hydrochloric acid. The titan hydroxides are titanate and metatitanate acids. [B. 3.]—**T. iodide**. See *T. tetraiodide*.—**T. nitride**. Any one of a number of compounds of t. and nitrogen, formed by the action of nitrogen or ammonia on t. or its salts. [B. 3.]—**T. oxide**. See *T. dioxide* and *T. sesquioxide*.—**T. oxychloride**. A substance, Ti₂O₃Cl₂, forming reddish-brown crystals. [B. 3.]—**T. sesquichloride**. See *T. trichloride*.—**T. sesquioxide**. A crystalline substance, Ti₂O₃. [B. 3.]—**T. sesquiphosphate**. A crystalline body, Ti₂(SO₄)₃·3H₂O. [B. 3.]—**T. sulphate**. A compound of t. and sulphuric acid. *Titanic sulphate*, Ti(SO₄)₂·3H₂O, is a yellow, deliquescent, amorphous substance. [B. 3.] See also *Basic t. sulphate* and *T. sesquisulphate*.—**T. sulphide**. A body, TiS₂, forming shining, yellow scales. [B. 3.]—**T. tetrabromide**. A yellow crystalline mass, TiBr₄. [B. 3.]—**T. tetrachloride**. A colorless, mobile, fuming liquid, TiCl₄, of peculiar odor, boiling at 135° C. Combined with water, it solidifies like tin tetrachloride. It unites with the chlorides of other metals and radicles to form double salts. [B. 3.]—**T. tetrafluoride**. A colorless liquid, TiF₄, fuming on exposure to the air. It combines with the fluorides of other metals, forming the titanofluorides. [B. 3.]—**T. tetraiodide**. A reddish-brown substance, TiI₄, of metallic lustre. [B. 3.]—**T. trichloride**. A substance, TiCl₃, forming dark, violet-colored deliquescent scales. It has a strong affinity for oxygen, and so acts as an energetic reducing agent. [B. 3. 16.]

TITANOFLOURIDE, n. Ti²t²a²n²-o-flu²/o²r²-i²d(id). A compound of titanium tetrafluoride with the fluoride of another metal or radicle. [B. 3.]

TITHONIC, adj. Ti²th²-o²n²/i²k. From *Tithon*, Tithonus, a brother of Priam. See **ACTINIC**.

TITHYMALUS (Lat.), n. m. Ti²th²-i²m(u²m)-al(a²l)/u²s(u²s). Gr., *τιθύμαλος*. 1. Of Hippocrates, the *Euphorbia characias*. 2. The genus *Euphorbia*. The *Tithymaleæ*, the *Tithymali*, and the *Tithymaloideæ* correspond essentially to the *Euphorbiaceæ*. [a. 35.]—**Radix tithymali**. The root of *Euphorbia cyparissias*. [a. 35.]—**T. cyparissias**. 1. Of Dioscorides, perhaps the *Euphorbia alcyon*. 2. The *Euphorbia cyparissias*. [a. 35.]—**T. nigrum**. See *EUPHORBIA dendroidea*.—**T. maritimum**. See *APOCYNUM venetum*.—**T. myrtifolius**. See *PEDILANTHUS tithymaloideus*.—**T. nummularis**. See *EUPHORBIA chamaesyce*.

TITILLAMENTUM (Lat.), n. n. Ti²t²(tet)-i²-la²-i²-la²-me²nt(u²m)-u²m. A means of titillation. [B.]

TITILLATION, n. Ti²t²-i²-la²-shu²n. Lat., *titillatio*, *titillatus* (from *titillare*, to tickle). Fr., *t.* Ger., *Kitzel*, *Kitzeln*. The act of tickling, or the condition of being tickled. [D.]

TITILLATUS (Lat.), n. m. Ti²t²(tet)-i²-la²-i²-la²-u²s(u²s). Gen., -a²us. From *titillare*, to tickle. Tickling in the throat. [L. 57 (a. 14).]

TITRATED, adj. Ti²t²-rat^{-e}d. Fr., *titré*. Ger., *titrirt*. Subjected to titration.

TITRATION, n. Ti²t²-ra²-shu²n. From Fr., *titre*. Volumetric analysis by means of standard solutions. [A. 1.]

TITTHE (Lat.), n. Ti²t²-th²(the). Gen., *tit²thes*. Gr., *τίθη*. 1. The nipple. 2. A wet-nurse. [L. 50 (a. 14).]

TITTHOZA (Lat.), n. n. pl. Ti²t²-tho²(tho²)-zo²a². From *τίθος*, the nipple, and *ζῷον*, an animal. See **MAMMALIA**.

TITTHUS (Lat.), n. m. Ti²t²-thu²s(thu²s). Gr., *τίθος*. See **TITTHE** (1st def.).

TITUBATIO, n. Ti²t²-u²-ba²-shu²n. Lat., *titubatio* (from *titubare*, to stagger). Fr., *titubation*. Ger., *Taumeln*, *Wanken*. A stumbling, staggering gait. [a. 34.]

TIALPOPOLOTL [Mex. Ph.], n. See **FLOURENSIA thurifera**.

TLANEAQUELITE [Mex. Ph.], n. See **PIPER sanctum**.

TLATLANCUAYA, n. See **ACHYRANTHES calea** (in Supplement).

TMETICUS (Lat.), adj. Me²t²(tmat)/i²k-u²s(u²s). Gr., *τμητικός* (from *τμήναι*, to cut). Fr., *témétique*. See **RESOLVENT**.

TOAD-FLAK, n. To²d²/fla²z. 1. The genus *Linaria*, especially *Linaria vulgaris*. 2. The *Spergularia arvensis*. [a. 35.]—**Bastard t.-f.** The *Thesium linophyllum* and (in America) the genus *Conandra*. [a. 35.]

TOADROOT, n. To²d²/rut². See **ACTEA alba** and **ACTEA rubra**.

TOAD-SPIT, TOAD-SPITTLE, n's. To²d²/spi²t, -spi²t'l. See **LEMNA minor** and **CUCKOO-SPIT**.

TOADSTONE, n. To²d²-sto²n. See **BUFONITES**.

TOADSTOOLS, n. pl. To²d²/stulz. Species of *Agaricus*, especially *Agaricus muscarius* and other poisonous species; also *Polyporus* and *Boletus*. [a. 35.]

TOBACCO, n. To²-ba²k'o. The leaves of various species of *Nicotiana*, especially *Nicotiana tabacum*. [a. 35.]—**English t.** An old name for the genus *Hyoscyamus*. [a. 35.]—**Extract of t.** See **EXTRACTUM NICOTIANÆ**.—**Havana t.** See *Nicotiana repanda*.—**Indian t.** See *LOBELIA inflata* and *CANNABIS indica*.—**Latakia t.** See *Nicotiana rustica*.—**Oil of t.** 1. See under *Nicotiana tabacum*. 2. See **OLEUM NICOTIANÆ**.—**Poison-t.** See **HYOSCYAMUS niger**.—**T.-bush**. See **HYOSYOSM nutans**.—**T.-root**. The root of *Lewisia rediviva*. [a. 35.]—**Turkish t.** See under *NICOTIANA rustica*.—**Vinegar of t.** See **ACETUM NICOTIANÆ**.—**Virginian t.** See *Nicotiana tabacum*.—**Wild t.** See *Nicotiana rustica* and *LOBELIA inflata*.

TOBELBAD (Ger.), n. To²b²e²l-ba²d. A place in Styria, Austria, where there are warm sulphurous springs. [L. 30, 37, 57 (a. 14).]

TOBEN (Ger.), n. To²b²e²n. See **FUORO**.

TOC (Fr.), n. Tok. See **DANDO**.

TOCADMYCODORITIS (Lat.), n. f. To²k-a²d(a²d)-o(o²)-mi(mu²)-ko(ko²)-do²r²(e)²/ti²s. Gen., -i²idos (-idis). From *τόκας*, having just brought forth, *μύκος*, mucus, and *δόξα*, a hide. Fr., *tocadomycodorite*. Puerperal inflammation of a mucous membrane.

TOCAREXIS (Lat.), n. f. To²k-a²r(a²r)-e²x(ax)²/i²s. Gen., -e²-x(e²o² (-is)). From *τόκος*, childbirth, and *ἀρξίς*, assistance. See **OBSTETRICS**.

TOCHTERKNÄUEL (Ger.), n. To²ch²t²/e²r-knoi-e²l. See **DISPIREME**.

TOCHTERSTERN (Ger.), n. To²ch²t²/e²r-ste²rn. See **AMPHI-ASTER**.

TOCO-DYNAMOMETER, n. Tok²-o²-di²n-a²m-o²m-e²t-u²r. From *τόκος*, childbirth, *δύναμις*, power, and *μέτρον*, a measure. Of Schatz, an apparatus for measuring the force of the uterine contractions during labor. [A. 24.]

TOCOMYCODORITIS (Lat.), n. f. Tok²(to²k)-o(o²)-mi(mu²)-ko(ko²)-do²r²(e)²/ti²s. Gen., -i²idos (-is). See **TOCADMYCODORITIS**.

TOCOLOGY, n. Tok²-o²/o²-ji². From *τόκος*, childbirth, and *λόγος*, understanding. Fr., *tocologie*. See **OBSTETRICS**.

TOCOPHELIA (Lat.), n. f. Tok²(to²k)-o(o²)-fel(fel²)/i²a². From *τόκος*, childbirth, and *ἑσέως*, help. An apparatus for mitigating the suffering of a woman in labor; consisting of an abdominal and a sacral pad with which she can make pressure by pulling on ropes connected with them and passing over pulleys. ["Med. Times and Gaz.," 1875, i, p. 188 (a. 34).]

TOTOTHERMOMETRIE (Ger.), n. Tok²-o²-te²rm-o²-mat²-re². Thermometry as applied to obstetrics. [A. 24.]

TOD (Ger.), n. Tod. See **DEATH**.—**Herzt²**. Death from heart failure. [a. 34.]—**Schwarzer Tod**. See **BLACK DEATH**.

TODDALLIA (Lat.), n. f. To²d²-dal(da²l)/i²a². Fr., *toddali*, *toddalie*. A genus of the *Toddalieæ*, which are a tribe of the *Rutaceæ*. [a. 35.]—**T. aculeata**, **T. asiatica**. A tropical Asiatic shrub containing an aromatic, bitter, acid principle which makes it stimulant, carminative, and tonic. The bark, especially the root-bark, is used as a stomachic and febrifuge. The leaves are used in baths and fomentations and are eaten raw in intestinal complaints. The green fruits, together with the root, are used externally in rheumatism. The ripe fruits have the pungency of black pepper and are pickled. [a. 35.] See also **RADIX LOPEZ**.

TODDY, n. To²d²/i². 1. Sap from a wine palm. It yields arrack on fermentation. [a. 48.] 2. See **PUNCH**.

TODGEBOREN (Ger.), adj. Tod²/ge²-bo²-e²n. See **STILL-BORN**.

TODT (Ger.), adj. Tod. See **DEAD**.—**Tenblume**. See **CALENDULA officinalis**.—**Tenblumenkraut**. See *HYOSCYAMUS niger*.—**T'enflecke**. See **LIVOR emortualis**.—**T'enkrampf**. See

RIGOR mortis.—**T'enkranz**. Lit., a wreath for the dead; an anomaly of the obturator artery in which it is found on Gimbernat's ligament. [L. 57 (a. 34).]—**T'enschau**. See *Post-mortem EXAMINATION*.—**T'enschlummer**. See *TRANCE*.—**T'enschweiss**. The sweating that often precedes death. [a. 34.]—**T'efaul**. Fr., *mort et macéré*. Dead and macerated (said of a fetus which having been retained for a length of time after its death, is not putrid, but macerated and flattened at those parts on which it has rested for a long time). [A. 24.]—**T'geboren**. See *STILL-BORN*.

TÖDTUNG (Ger.), n. Tu^6/un^2 . See *DEATH*.—**Kindst'**. Infanticide. [a. 34.]

TOE, n. To. Ger., *äckerlaus* (röu möße). Lat., *digitus* (*pedis*). Fr., *doigt du pied, orteil*. Ger., *Zehe*. A digit of the foot.—**Flexed** t's. Fr., *orteils en marteau* (ou en Z, ou en griffe, ou en cou de cygne). Ger., *verkrümmte Zehe*. A permanent distortion of the t's in which they are unduly flexed at the last joint, so that the tips or even the nails rest on the ground, while the first joints are drawn up above the proper level. [A. 33.]—**Glossy t's**. See *Glossy SKIN*.—**Great t.** Lat., *hallux*. Fr., *grös orteil*. Ger., *grosse Zehe*. The innermost and largest of the t's. [L.]—**Hammer t's**. See *FLEAS*.—**Lazy t.** See *OVER-T*.—**Morton's t.** A peculiar and painful disorder pertaining to the metatarsal-phalangeal joint of the fourth t. ["N. Y. Med. Jour.," Oct. 8, 1892, p. 410 (a. 34).]—**Talon t's**. See *FLEXED t's*.

TOFU (Jap.), n. A jelly prepared from the *Soja hispida*. [a. 35.]

TOILE (Fr.), n. Tw^2/al . See *CLOTH*.—**T.** *chériodienne* (*supérieure*). See *SEPTIMUM LUCIDUM*.—**T.** *d'araignée*. See *CORWEB*.—**T.** *de mal*. See *SPARADRAP DE CIRE*.—**T.** *d'hôpital*. Rubber cloth, used to protect ulcers or cutaneous affections from the air. [L. 49 (a. 14).]—**T.** *Dieu*. See *SPARADRAP DE CIRE* and *SPARADRAP DIAPALME*.—**T.** *farciminale*. The alantoids. [A. 45.]—**T.** *médicamenteuse*, *T.* *sparadrapp*. See *SPARADRAP*.

TOILET, n. Toil^6/et . 1. The methodical cleansing of a part or region after a surgical operation. [a. 48.] 2. Clearing the axilla of diseased lymphatic glands in cases of mammary tumor. [A. 94.]—**T.** *of the peritonæum*. Ger., *Bauchfelltoilette*. The aseptic measures tending to remove all extraneous substances from the peritonæum after laparotomy. [a. 34.]

TOIT (Fr.), n. Tw^2/a . A roof. [a. 30.]—**T.** *des pédoncules cérébraux*. See *TEGMENTUM* (1st def.).

TOKAY (Hung.), n. $\text{To}^3/\text{k'ol}$. A Hungarian white wine.

TOLA (Lat.), n. f. $\text{To}^1/\text{to}^1/\text{a}^2$. See *TONSIL*.

TOLANE, n. To^1/an . Fr., t. Ger., *Tolan*. Diphenylacetylene, $\text{C}_{14}\text{H}_{10} = \text{C}_6\text{H}_5\cdot\text{C} \equiv \text{C}_6\text{H}_5$. [B. 3, 4, 270 (a. 38).]

TOLENAS SPRINGS, n. $\text{To}^1/\text{an}^2/\text{as}$. A place in Solano County, California, where there are gaseous mineral springs. [Anderson (a. 14).]

TOLENE, n. To^1/en . Fr., *tolène*. Ger., *Tolen*. A terpene, $\text{C}_{10}\text{H}_{18}$, obtained from balsam of Tolu. [B. 270 (a. 38).]

TOLERANCE, n. $\text{To}^1/\text{er}^2/\text{ns}$. G., *etópia*. Lat., *tolerantia* (from *tolerare*, to bear). The quality of being able to endure the action of a deleterious agent, especially when acquired by the habitual use of the agent. Cf. *ACCOUTUMANCE*.

TOLES (Lat.), n. m. pl. $\text{To}^1/\text{to}^1/\text{ez}$ (*as*). Gen., *tol'ium*. 1. The tonsils. 2. Goitre. [A. 312, 325 (a. 48).]

TOLIDINE, n. $\text{To}^1/\text{id}^2/\text{en}$. A substance, $\text{C}_6\text{H}_5(\text{CH}_3)_2\text{NH}_2$, known in three isomeric forms; used extensively in the manufacture of the dyes made from coal-tar. [B. 270 (a. 38).]

TOLL (Ger.), adj. To^1/l . See *INSANE*.

TOLLBEERE (Ger.), n. $\text{To}^1/\text{bar}^2/\text{e}$. The *Atropa belladonna*.

TOLLES (Lat.), n. m. pl. To^1/lez (*las*). Gen., *tol'lium*. See *TOLES*.

TOLLHEIT (Ger.), n. To^1/hit . See *INSANITY*.—**Mannt'**. See *NYMPHOMANIA*.—**Weint'**. See *DIPSOMANIA*.

TOLLKIRSCH (Ger.), n. $\text{To}^1/\text{kersch}^2/\text{e}$. See *ATROPA* and *BELLADONNA*.—**T'npflaster**. See *EMPLASTRUM CUM EXTRACTO BELLADONNE*.

TOLLSUCHT (Ger.), n. $\text{To}^1/\text{zucht}^2/\text{e}$. See *RABIES*.

TOLLWURM (Ger.), n. To^1/wurm . See *CYNOLYSSA* (2d def.) and *SEPTUM LINGUÆ*.

TOLLWUTH (Ger.), n. To^1/wut . See *RABIES*.

TÖLPELKRANKHEIT (Ger.), n. $\text{To}^1/\text{p}^1/\text{el}^2/\text{kra}^2/\text{n}^2/\text{a}^2/\text{hit}$. See *MUMPS*.

TOLU, n. To^1/lu . See *BALSAM OF T.*—**Syrup of t.** See *SYRUPUS TOLUTANUS*.—**Tincture of t.** See *TINCTURA TOLUTANA*.

TOLUENE, n. $\text{To}^1/\text{u}^2/\text{en}$. Fr., *toluène*. Ger., *Toluen*. *Toluol*. Methylbenzene, dracyl; a colorless liquid, $\text{C}_7\text{H}_8 = \text{C}_6\text{H}_5(\text{CH}_3)$, occurring in light coal-tar oils, having a benzene-like odor; used in the manufacture of dyes. [B. 3 (a. 38); B. 4.]—**T'isulphonic acid**. An acid, $\text{C}_6\text{H}_5\text{SO}_3\text{H} = \text{C}_6\text{H}_4(\text{CH}_3)\text{SO}_3\text{H}$, known in three isomeric forms, one of which, *o'*-acid, $\text{C}_6\text{H}_4(\text{CH}_3)\text{SO}_3\text{H}$, is a thick liquid. [B. 3 (a. 38).]—**T'sulphonic acid**. An acid, $\text{C}_6\text{H}_5\text{SO}_3\text{H} = \text{C}_6\text{H}_4(\text{SO}_3\text{H})\text{CH}_3$, known in three isomeric forms; *o'*-acid, thin deliquescent tabular crystals containing 2 molecules of water; *p'*-acid, very deliquescent crystalline crusts; and *t'*-acid, thick deliquescent tabular or flat prismatic crystals. The meta-compounds and para-compounds contain each 1 molecule of water. [B. 3 (a. 38); B. 4.] See also *T'isulphonic acid* and *T'risulphonic acid*.—**T'sulphonic acid**. An acid, $\text{C}_6\text{H}_5\text{SO}_3\text{H} = \text{C}_6\text{H}_4(\text{CH}_3)\text{SO}_3\text{H}$, occurring as long acicular crystals containing six molecules of water. [B. 3 (a. 38).]

TOLUENYL ALCOHOL, n. $\text{To}^1/\text{u}^2/\text{e}^2/\text{n}^2/\text{al}$. Paraxylyl alcohol. [a. 38.] See *XYLYL alcohol*.

TOLUHYDROQUINONE, n. $\text{To}^1/\text{u}^2/\text{hid-ro-kwi}^2/\text{on}$. See *METHYLHYDROQUINONE*.

TOLUIC ACID, n. $\text{To}^1/\text{u}^2/\text{ik}$. Fr., *acide toluïque* (ou *toluyligue*). Ger., *Toluylsäure*. An acid, $\text{C}_6\text{H}_4(\text{CH}_3)\text{CO}_2\text{H}$, known in three isomeric forms: *Ortho'* a., long shining acicular crystals melting at 102°C ; *meta'* a., forming long acicular crystals from a quickly cooled solution, prismatic crystals if evaporated slowly, melting at about 109°C ; and *para'* a., acicular crystals melting at 180° and boiling at about 275°C . An isomeric acid, *o'*-*t'* a., or *phenylacetic acid*, $\text{C}_6\text{H}_5\text{CH}_2\text{COOH}$, forms shining laminar crystals, melting at 76°C , and boiling at 265°C with a vapor which produces coughing. [B. 3 (a. 38); B. 4.]

TOLUIC ALDEHYDE, n. $\text{To}^1/\text{u}^2/\text{ik}$. A substance, $\text{C}_6\text{H}_4(\text{CH}_3)\text{CHO}$, known in three isomeric forms: *Ortho'* a., $\text{C}_6\text{H}_4(\text{CH}_3)\text{CHO}$, a yellowish, very refractive liquid having an odor like that of benzoic aldehyde; *meta'* a., $\text{C}_6\text{H}_4(\text{CH}_3)\text{CHO}$, a liquid of like odor; and *para'* a., $\text{C}_6\text{H}_4(\text{CH}_3)\text{CHO}$, a liquid having a peppermint-like odor. [B. 3 (a. 38); B. 4.]

TOLUIDINE, n. $\text{To}^1/\text{u}^2/\text{id}^2/\text{en}$. Fr., t. Ger., *Toluidin*. Amidotoluene; a substance, $\text{C}_6\text{H}_5\text{N} = \text{C}_6\text{H}_4(\text{CH}_3)\text{NH}_2$, known in three isomeric forms: *Ortho'*, a colorless liquid which quickly turns brown in the light or the air; *meta'*, a colorless oily liquid, turning to a brown resinous mass in the air; and *para'*, large colorless tabular crystals having an aromatic, aniline-like odor. [B. 3 (a. 38).]

TOLUIFERA (Lat.), n. f. $\text{To}^1/\text{u}^2/\text{if}^2/\text{er}^2/\text{a}^2$. From *tolu* (q. v.), and *ferre*, to bear. Fr., *toluifère*. The genus *Myrsine*. [a. 35.]—**T.** *balsamum*. **T. *Pereire*. See *MYRSINOL TOLUIFERUM*.**

TOLUIFEROUS, adj. $\text{To}^1/\text{u}^2/\text{if}^2/\text{er}^2/\text{u}^2/\text{s}$. Lat., *toluiferus* (from *tolu* q. v.), and *ferre*, to bear). Fr., *toluifère*. Producing balsam of Tolu. [a. 35.]

TOLUNITRIL, n. $\text{To}^1/\text{u}^2/\text{nit}^2/\text{r}^2/\text{il}$. Fr., *tolunitrile*. A substance, $\text{C}_6\text{H}_5\text{N} = \text{CH} \cdot \text{C}_6\text{H}_4\text{CN}$, known in three isomeric forms: *Ortho'*, a very refractive colorless liquid boiling at about 204°C ; *meta'*, a liquid having an odor of benzonitril; and *para'*, a very refractive liquid having an odor of benzonitril and boiling at 217°C . [B. 3 (a. 38).]

TOLUOL (Ger.), n. $\text{To}^1/\text{u}^2/\text{ol}$. See *TOLUENE*.

TOLUQUINOL, n. $\text{To}^1/\text{u}^2/\text{kwi}^2/\text{ol}$. See *METHYLHYDROQUINONE*.

TOLUQUINONE, n. $\text{To}^1/\text{u}^2/\text{kwi}^2/\text{on}$. See *METHYLQUINONE*.

TOLURHETIN, n. $\text{To}^1/\text{u}^2/\text{ret}^2/\text{in}$. From *tolu* (q. v.), and *prurin*, resin. Fr., *tolurétine*. Of Gerhardt, a resin extracted from balsam of Tolu. [B. 93 (a. 14).]

TOLURIC ACID, n. $\text{To}^1/\text{u}^2/\text{ik}$. Fr., *acide toluurique*. Paratoluylamidoacetic acid, an acid, $\text{CH}_3\text{C}_6\text{H}_4\text{CO}_2\text{NH} \cdot \text{C}_6\text{H}_4\text{CO}_2\text{OH} = \text{C}_{10}\text{H}_7\text{NO}_5$, occurring as pearly tabular crystals. [B. 3 (a. 38).]

TOLUYL, n. $\text{To}^1/\text{u}^2/\text{il}$. Fr., *toluyle*. 1. The hypothetical radicle, C_6H_4 , of toluyllic acid. 2. An improper term for cresyl. [B. 93 (a. 14).]—**T'säure**. See *TOLUIC ACID*.

TOLUYLENE, n. $\text{To}^1/\text{u}^2/\text{il}^2/\text{en}$. Fr., *toluylène*. Ger., *Toluylen*. Stilbene; a bivalent radicle, $\text{C}_6\text{H}_4(\text{CH}_3)_2$, contained in some of the derivatives of toluene—**T'blue**. A substance, $\text{C}_7\text{H}_7\text{N}_3\text{HCl} + \text{H}_2\text{O}$ (or $\text{C}_{12}\text{H}_{11}\text{N}_3$), occurring as a resinous mass which acquires a coppery lustre when exposed to the air. [B. 3, 270 (a. 38).]—**T'diamine**. A substance, $\text{C}_6\text{H}_5\text{N}_2 = \text{C}_6\text{H}_4(\text{CH}_3)\text{N}_2$, known in several isomeric forms, such as *ortho'diamine*, or *o'-diamidotoluene*, $\text{C}_6\text{H}_4(\text{CH}_3)\text{NH}_2\text{NH}_2$, shining white scales; *meta'diamine*, or *o'-diamidotoluene*, $\text{C}_6\text{H}_4(\text{CH}_3)\text{NH}_2\text{NH}_2$, long acicular crystals; *para'diamine*, or *o'-diamidotoluene*, $\text{C}_6\text{H}_4(\text{CH}_3)\text{NH}_2\text{NH}_2$, massive of tabular crystals; and *o'-diamidotoluene*, $\text{C}_6\text{H}_4(\text{CH}_3)\text{NH}_2\text{NH}_2$, red crystals having an odor of acetamide. [B. 3 (a. 38).]—**T'hydrate**. A substance, $\text{C}_{11}\text{H}_{11}\text{O} = \text{C}_6\text{H}_5\text{CH}_2\text{CH}(\text{OH})\text{C}_6\text{H}_5$, occurring as brittle acicular crystals. [B. 4 (a. 38).]—**T'red**. A substance, $\text{C}_{11}\text{H}_{11}\text{N}_3$, occurring as orange-colored acicular crystals containing 4 molecules of water but becoming anhydrous and blood-red at about 160°C . According to some, the dye is the hydrochloride of this, $\text{C}_{11}\text{H}_{11}\text{N}_3\text{HCl}$. [B. 3, 270 (a. 38).]—**T'violet**. A substance, $\text{C}_{11}\text{H}_{11}\text{N}_3$, occurring as red crystals having a green reflection. [B. 3 (a. 38).]

TOLYL, n. To^1/yl . Fr., *tolyl*. Ger., *Tolyl*. 1. Methyl-benzyl, or *para'*, a univalent radicle, $\text{C}_6\text{H}_4(\text{CH}_3)\text{CH}_2$. 2. The group C_6H_7 . [B. 3 (a. 38).]—**T'acetamide**. The compound $\text{C}_6\text{H}_4(\text{CH}_3)\text{NH} \cdot \text{C}_6\text{H}_5\text{O}$. [B. 2.]—**T'alcohol**. A substance, $\text{C}_6\text{H}_5\text{O} = \text{C}_6\text{H}_4\text{CH}_2\text{OH}$, known in two isomeric forms, one of which forms acicular crystals. [B. 4; B. 270 (a. 38).]—**T'chloracetamide**. The compound $\text{C}_6\text{H}_4(\text{CH}_3)\text{CONH} \cdot \text{C}_6\text{H}_4\text{CH}_3$. [B. 2.]—**T'urethane**. A substance, $\text{C}_{10}\text{H}_{13}\text{NO}_2 = \text{NH}(\text{C}_6\text{H}_5)\text{CO}_2\text{C}_6\text{H}_5$, known in three isomeric forms: *ortho'urethane*, crystals; *meta'urethane*, a liquid; and *para'urethane*, or *ethyl' carbonate*, long prismatic crystals. [B. 3 (a. 38).]

TOLYLENE, n. $\text{To}^1/\text{yl}^2/\text{en}$. Fr., *tolylène*. The radicle, $\text{C}_6\text{H}_4\text{CH}_2$, of t. alcohol. [B. 2.]—**T. alcohol**. **T. glycol**. Fr., *glycol tolylique*. A substance, $\text{C}_6\text{H}_4(\text{CH}_2\text{OH})_2$, resulting from the substitution of a molecule of hydroxyl for one atom of hydrogen in the methyl group of tolyl alcohol. [B. 270 (a. 38).]

TOMATO, n. $\text{Tom}^2/\text{a}^2/\text{o}$. Fr., *tomate*. Ger., *Liebesapfel*. Sp., *jitomate* (Mex. Ph.), *tomate*. The *Lycopersicon esculentum*, also its fruit, which is used in Mexico as an anodyne. [a. 35.]—**Strawberry-t.** See *PHYSALIS ALKEKENGI*.

TOMBA, n. In Brazil, the *Perianthopodus espalina* and other purgative species. [B. 121 (a. 35).]

TOMBAC, n. $\text{To}^2/\text{m}^2/\text{ba}^2/\text{k}$. Fr., t. Ger., *Tombach*. An alloy of 97 parts of copper and 3 of zinc, having a gold-like appearance. [B. 270 (a. 38).]

TOMBÉ (Fr.), adj. $\text{To}^2/\text{m}^2/\text{ba}$. Prolapsed. [A. 44.]

TOME (Lat.), n. f. Tom(to'm)/e(a). Gen., tom'es. Gr., *τομή* (from *τέμνω*, to cut). Ger., *Schnitt*. Section, a cutting; of Galen, venesection. [A, 325 (a, 48).]

TOMELLINE (Fr.), n. To-mel'-len. See GLOBULIN.

TOMENTOSE, adj. Tom'e-nt-os. Lat., *tomentosus* (from *tomentum* [q. v.]). Fr., *tomentueux*, *cotonneux*, *drapé*. Ger., *filzig*. Covered with tomentum, densely pubescent. [A, 35.]

TOMENTOSULUS (Lat.), adj. Tom'e-nt-o's/(os)/(u'l)-u's-(u's). Covered with a short delicate tomentum. [A, 35.]

TOMENTUM (Lat.), n. n. Tom'e-nt'u'm/(u'm). Fr., *t. Ger.*, *Filz*, *Filzüberzug* (1st def.). 1. In botany, a dense, more or less matted pubescence. [A, 35.] 2. The shaggy mass constituted by the villi of the chorion. [A, 45.]—**T. cerebri**. The inner surface of the pia. [L.]

TOMIPAROUS, adj. To'm-i'p/a'r-u's. From *τομός*, a cut, and *parere*, to bring forth. Fr., *tomipare*. Of plants, reproducing by the separation of parts. [A, 35.]

TOMIS (Lat.), n. f. Tom(to'm)/is. Gen., tom'idōs (-idis). Gr., *τομή* (from *τέμνω*, to cut). See SOISORS.

TOMIUM (Lat.), n. n. Tom(to'm)/i'u-m/(u'm). From *τομός*, cutting. The cutting edge of either mandible of a bird. [L, 221.]

TOMOGYNIA (Lat.), n. n. Tom(to'm)/o-(o's)-jān/(u'n)/i'a-a. From *τομός*, cutting, and *γυνή*, a woman. Of Richard, the gyno-sperms. [A, 35.]

TOMOMANIA (Lat.), n. f. Tom(to'm)/o-(o's)-man/(ma'n)/i'a-a. From *τομός*, a cutting, and *μανία*, madness. Fr., *tomomanie*, *bis-tourmanie* (1st def.). Ger., *Schneidesucht*. 1. A mania for performing surgical operations. [L, 50 (a, 14).] 2. A mania for being operated on for purely imaginary ailments. [V Rev. de laryng. et d'otol., Dec., 1892.]

TOMOTOCIA (Lat.), n. f. Tom(to'm)/o-(o's)-tos/(to'sk)/i'a-a. From *τομός*, a cutting, and *τόκος*, childbirth. Fr., *tomotocie*. See Cæsarian OPERATION.

TON (Ger.), n. Ton. See TONE and SOUND.—**Eigent'**. The timbre peculiar to each individual voice. [K, 16.]—**Hertzöne**. See HEART-SOUNDS.—**Pulmonalt'**. See Vesicular MURMUR and Respiratory MURMUR.—**Taubheit**. Inability to hear particular sounds. [L, 57 (a, 14).]

TONALITÉ (Fr.), n. To-na'l-i-te. Pitch in percussion.

TONGA, n. To'n'g'a. See Tonka BEAN.

TONIC ACID, n. To'n'i's'ik. See COUMARIN.

TONCO, n. To'n'k'o. See Tonka BEAN.

TONE, n. Ton. Gr., *τόνος* (from *τείνω*, to stretch). Lat., *tonus*. Fr., *ton*. Ger., *Ton*, *Spannung* (1st def.). 1. A distinct definite sound; also the character or quality of a sound. 2. The normal state of tension in healthy tissues; in physiology, the normal contraction of the arteries.—**Harmonic t.** See HARMONIC, n.—**Reflex t.** See REFLEX TONUS.

TÖNEND (Ger.), adj. Tu'n'e'nd. See SONOROUS.

TONGA, n. To'n'g'a. 1. A drug prepared in the Fiji Islands from the bark, leaves, and fibres of *Rhaphidophora vitensis*, *Premna taitensis*, etc. It has been recommended in neuralgia. [A, 35.] 2. See under DATURA stramonium.

TONGINE, n. To'n'j'en. A volatile alkaloid obtained in tonga (1st def.). [A, 270 (a, 48).]

TONG-PANG-CHONG (Chin.), n. The *Rhinacanthus com-munis*, also a drug prepared from its root and leaves. [B, 270 (a, 48); A, 35.]

TONGRES (Fr.), n. To'n'z-gr'. A place in the province of Limburg, Belgium, where there is a gaseous chalybeate spring. [A, 14.]

TONGUE, n. Tu'n'g. Gr., *γλῶσσα*. Lat., *lingua*. Fr., *langue*. Ger., *Zunge*. A muscular mass attached to the floor of the mouth and susceptible of protrusion from that cavity. It takes part in sucking, mastication, and articulation speech, and the mucous membrane covering its upper surface is the seat of the organs of taste.—**Adherent t.** A t. pathologically attached by folds of mucous membrane to the floor and sides of the mouth. [A, 34.]—**Bifid t.** A t. having a longitudinal fissure that divides the fore part into two equal parts. [A, 34.]—**Black t.** 1. See GLOSSOPHYLLA (1st def.). 2. See EPIDEMIC erysipellatous PEYER.—**Dotted t.** See STIPPLED t.—**Earthy t.** A t. on which there are white, dry, and rough deposits of calcareous matter. [A, 34.]—**Fish-t.** In dentistry, an instrument resembling the t. of a fish, formerly used in extracting the wisdom teeth. [A, 34.]—**Geographical t.** A t. affected with a serpiginous epithelial affection (e. g., leukoplakia) that makes it look like a map. [A, 34.]—**Hairy t.** See TRICHOLOSLIA.—**Parrot t.** A black shagreen that can not be protruded, because it catches behind the lower teeth, observed in typhus fever. [A, 34.]—**Plastered t.** A coated t. in which the coat is recent and superabundant. [A, 34.]—**Shaggy t.** A furred t. having the papillae elongated by horny epithelium. [A, 34.]—**Split t.** See BIFID.—**Stippled t.** Of W. H. Dickinson, a t. in which the papillae are separately capped each with a minute white patch of epithelium. [A, 34.]—**Strawberry t.** A t. that is hyperemic and shows fungiform papillae, as in scarlet fever. [A, 34.]—**T. holder**. See T. DEPRESSOR.—**Wooden t.** See ACTINOMYCOSIS.

TONGUE-TIE, n. Tu'n'g'ti. Fr., *soubrelangue*. See ANKYLOGLOSSUM (1st def.).

TONGUE-TIED, adj. Tu'n'g'tid. Ger., *mundfaul*. Affected with ankyloglossum. [A, 48.]

TONIC, adj. To'n'i'k. Gr., *τονικός* (from *τείνω*, to stretch). Lat., *tonicus*. Fr., *tonique*. Ger., *tonisch*. 1. Possessing the property of maintaining or promoting the tone of the system; as a n., a drug possessing that property. 2. Characterized by continuous contraction (said of muscular spasm). [D, A, 48.]

TONICITY, n. To'n-i's'i'ty. Fr., *tonicité*. Ger., *Tonicität*. The condition of a tissue, organ, etc., in relation to tone, especially its normal elasticity. [A, 48.]

TONKA, n. To'n'k'a. Fr., *t. Ger.*, *T'bohnen*. See Tonka BEAN.—**T'stearoptene**. See COUMARIN.

TÖNNISSTEIN (Ger.), n. Tu'n'n'i's'stein. A place in the Rhine province, Prussia, where there is a gaseous, alkaline, and saline spring. [L, 49, 57 (a, 14).]

TONOMETER, n. To'n-o'm'e't'r. From *τόνος*, tension, and *μέτρον*, a measure. Fr., *tonomètre*. Ger., *T.* An instrument for estimating tension, especially the tension of the eyeball or the pressure of the ventricles. [K.]—**Dors and Lecomte's t.** A t. constructed on the same principle as Hamer's t., but having the position of the peg regulated by a screw. The spiral spring is replaced by a straight steel spring, which is not very long, so that the tension rapidly increases with the deep pushing of the peg. [F.]—**Graefe's t.** A t. consisting of a small rod which is pressed against the eye by means of a loaded lever. A scale shows the degrees to which the peg or style can overcome the tension of the eye with various degrees of loading. [F.]—**Hamer's t.** A t. consisting of a metallic tube out of which a peg or style projects. The latter is connected with a wound-up watch-spring, so that by pressing upon the eye it has to overcome the constantly increasing tension. [F.]—**Monnik's t.** A modification of Hamer's t. in which the immovable tube is replaced by two pegs, which can be pushed in with the slightest possible friction. The two pegs act together upon an index which shows on a dial-plate the change in position of the two pegs. A second index moves with the middle peg, which is under the increasing pressure of a short spring. [F.]—**Roy's t.** A t. for estimating the varying pressure of the ventricles during contraction and dilatation. It consists essentially of an air-tight tube containing oil, in which works a cylinder carrying a registering index. [K, 19.]—**Verlath's t.** A t. consisting of a tubular vessel, in which a steel peg can be pushed in or out. The middle peg is connected with a spiral spring the tension-power of which increases with the pressure. The two outer pegs may be moved with the slightest possible friction, and carry scales which run on a vernier connected with the middle peg. [F.]—**Weber's t.** A t. consisting of a peg which acts with increasing spring power on the sclerotic until its curvature to a certain extent is flattened to a plane. [F.]

TONOPSYCHOAGOGIA (Lat.), n. f. Ton(to'm)/o's-ps'ik'h'e'n'a-a'g'o's'i'o-(o's)/i'a. From *τόνος*, a tone, *ψυχή*, the mind, and *ἀγωγή*, a leading. Fr., *tonopsychoagogie*. The characteristic action of certain sounds on the mind. [L, 50 (a, 14).]

TONSIL, n. To'n's'i'l. Gr., *ἀμυγδαλή*, *αμυγδαλον*. Lat., *tonsilla*, *tonsillum*, *amygdala*. Fr., *tonsille*, *amygdale*. Ger., *Tonsille*, *Halsdrüse*, *Mandel*. A prominent body situated (one on each side) between the pillars of the fauces, about half an inch long and a third of an inch wide and thick. On its free surface are numerous openings leading into lymphoid crypts, between which are a number of lymph follicles together with lymphoid tissue. [L, 31, 332.]—**Cerebellar t's.** See AMYGDALAE CEREBELLI.—**Luschka's t.** See PHARYNGEAL t.—**Palatine t.** See T.—**Pharyngeal t.** Lymphoid tissue on the posterior superior wall of the pharynx, limited on each side by the Eustachian tube. [L, 31.]

TONSILLA (Lat.), n. f. To'n's'i'l'a. See TONSIL.—**Tonsillae cerebelli**. See AMYGDALAE CEREBELLI.—**T. palatina**. See TONSIL.—**T. pendula**. A pedunculated tonsil.—**Tonsillae pestilentes**. See MALIGNANT ANGINA.—**T. tubalis Gerlachii**. See PHARYNGEAL ROUS.—**T. tubaria**. Ger., *Tubenmandel*. Lymph follicles in the cartilaginous portion of the Eustachian tube. [L, 332.]

TONSILLAR, **TONSILLARY**, adj's. To'n's'i'l'-ar, -ar-i'. Lat., *tonsillaris* (from *tonsilla*, a tonsil). Fr., *tonsillaire*. Ger., *tonsillar*. Pertaining to the tonsils. [C.]

TONSILLE (Fr., Ger.), n. To'n's'i'l'-y', ton-z'i'l'i'e. See TONSIL.

TONSILLITIC, adj. To'n's'i'l'-i't'ik. Pertaining to amygdalitis.

TONSILLITIS (Lat.), n. f. To'n's'i'l'-i't'e)/(i't'is). Gen., -i't'idōs (-idis). Fr., *tonsillite*. See AMYGDALITIS.

TONSILLOMATE, n. To'n's'i'l'-o-m. From *tonsilla*, a tonsil, and *τέμνω*, to cut. Ger., *Tonsillotom*. See AMYGDALOTOME.—**Billings's t.** A t. with a guillotine blade and a sharp vulsellula which slides along the shaft for holding the piece amputated. [E.] See under AMYGDALOTOME.—**Hamilton's t.** A t. provided with a sharp forceps for holding the part which does not slide along the shaft, but is simply applied to it. [E.]—**Mackenzie's t.** A t. in which the knife-edge is pushed against the tonsil by the thumb of the hand holding the instrument. [E.]—**Mathieu's t.** A t. provided with a two-pronged spear sliding along the shaft. [E.]—**Tiemann's t.** A t. in which both blade and forceps are worked simultaneously by closing or opening the handles of the instrument. [E.]

TONSILLOTOMY, n. To'n-si'l'-o't'o-m'i'. See AMYGDALOTOMY.

TONSILLUM (Lat.), n. n. To'n's'i'l'/u'm/(u'm). See TONSIL.

TONSURANS (Lat.), adj. To'n's-u'r/(u'r)/a'uz(a'ns). Gen., -ant'i's. From *tondere*, to shear. Fr., *tonsurant*. 1. Causing baldness (used chiefly in terms relating to parasitic skin diseases). [G.] 2. In botany, glabrous from loss of pubescence. [A, 35.]

TONUS (Lat.), n. m. Ton(to'n)/u's/(u's). Gr., *τόνος* (from *τείνω*, to stretch). Ger., *T.* See TONE.—**Reflex t.** Of Brondgeest, a slight contraction observed in the muscles of one leg of a decapitated frog when the sciatic nerve is divided on the opposite side; due to the reflex irritation conducted through the intact sensory nerves of the wounded limb. [K, 16.]—**Schluslessness** (Ger.). See GALVANOTONUS.—**T. trismus. See TRISMUS.**

TOOTH, n. See DENGUE.

TOOTH, n. Tu'th. Pl., *teeth*. Gr., *ὀδόν*. Lat., *dens*. Fr., *dent*. Ger., *Zahn*. 1. A hard bone-like organ implanted in man and most

mammals, in the inferior and superior maxillæ, which serves for the mastication of food. It consists of a central cavity containing t. pulp, dentin, enamel, and cement. In many lower vertebrates they are fixed in the bones surrounding the mouth. [L.] Cf. *Dental formula*. 2. In botany, any small marginal lobe. [A, 35.]—**Anterior molar teeth.** See *Bicuspid teeth*.—**Auditory teeth (of Huschke).** Cylindrical horizontal processes on the labium vestibulare. [A, 34.]—**Back teeth.** See *Molar teeth*.—**Barred t.** See *Dent barrée*.—**Bicuspid teeth.** The teeth in each jaw that are placed next the canine teeth. Their crowns are compressed in front and behind, and are convex on the outer and inner sides. They have two points, or cusps, whence the name. [C.]—**Butter-teeth.** See *Incisor teeth*.—**Canine teeth, Carnassial teeth.** Fr., *dents angulaires (ou canines)*. Ger., *Eckzähne, Spitzzähne*. Four teeth, one above and one below on each side, next to the lateral incisors. They are long and strong, with a thick conical crown, convex in front and concave behind, with one single central point. [C.]—**Chisel teeth.** The incisor teeth of rodents. [L.]—**Celliform teeth.** See *Setiform teeth*.—**Complicated teeth.** Fr., *dents compliquées*. Teeth in which the crown consists of alternate layers of cement and enamel. [L.]—**Compound t.** See *Dents agrégées* and *Dents composées*.—**Conical teeth.** Teeth that are modifications of a cone in shape. [Owen (L).]—**Convulsion t.** See *Tidal-mark t.*—**Craggy teeth.** Irregular projections of dentin on the t. giving them a crag-like appearance. They are not necessarily significant of any diathesis. [A, 34.]—**Cuticular teeth.** Teeth formed from the ecderyon. [A, 12.]—**Deciduous teeth.** Teeth which are shed, especially those of the first dentition. [L.]—**Dental teeth.** Teeth, such as those in man and most vertebrates, in which the main part is composed of dentin; distinguished from t.-like structures composed mostly of a horny substance. [J, 35.]—**Eighteen-year molar t.** The molar (or wisdom t.) which makes its eruption between the seventeenth and the twenty-fifth year. [L.]—**Elephant's t.** See *Dens elephantis*.—**Eye teeth.** Fr., *œilères*. Ger., *Kronzähne*. The two upper canine teeth. [C.]—**False molar teeth.** See *Bicuspid teeth*.—**Fore-teeth, Front teeth.** See *Incisor teeth*.—**Gastric teeth.** Calcareous nodules in the stomach of crustaceans. [L.]—**Greater molar teeth.** See *Molar teeth*.—**Gymnosomatous teeth.** See *Dents gymnosomes*.—**Honeycombed teeth.** Teeth in which there are circumscribed areas of decay and deficient dentin development, causing a honeycombed appearance. [A, 34.]—**Horny teeth.** See under *Dental teeth*.—**Huschke's teeth.** See *Auditory teeth*.—**Hutchinsonian (or Hutchinson's) teeth.** A malformation of the teeth, especially the upper central incisors, supposed to be peculiar to children having hereditary syphilis, in which the teeth are short, narrow from side to side at their edges, very thin, and displaying a central cleft on their free edge. [A, 34.]—**Incisor teeth.** Lat., *dentes sectorii*. Ger., *Schneidezähne*. The four median teeth of each jaw, having single roots and wide, thin, chisel-like cutting edges. [L.]—**Lanary teeth.** See *Canine teeth*.—**Lesser molar teeth.** See *Bicuspid teeth*.—**Milk molar teeth.** The molar teeth of the first dentition. [L.]—**Maxillary teeth.** The teeth that are implanted in the inferior or superior maxillæ. [L.]—**Milk teeth.** Lat., *dentes infantiles*. Ger., *Milchzähne*. Those teeth which appear in early childhood, to be replaced at various ages by the permanent teeth. They are twenty in number, five in the forward part of each side of each maxilla, as follows: Two molars, one canine, and two incisors. [C.]—**Molar t., Multicuspidate t., Multicuspid t.** Lat., *mylodus*. Ger., *Mahlzahn, Kauzahn, Backenzahn*. A t. having more than one root and a rounded quadrangular crown with several cusps. In adult dentition there are (including the bicuspid) ten molar teeth in each jaw. [L.]—**Palatine teeth.** Teeth attached to the palate bones. [L.]—**Pectinate teeth.** Teeth with the edges notched so as to resemble a comb. [L.]—**Pegged (or Peg-shaped, or Peg-top) teeth.** Teeth, observed in various diatheses, in which the loss of enamel and exposure of the dentin present a series of small peg-like excrescences. [A, 34.]—**Permanent molar teeth.** The six-year, twelve-year, and eighteen-year molar teeth. [L.]—**Permanent teeth.** See *Second teeth*.—**Pharyngeal teeth.** Teeth situated in the pharynx or attached to its osseous framework. [L.]—**Pitted teeth.** Teeth in which, owing to deficient development of dentin or enamel, pits occur on the surface. [A, 34.]—**Posterior molar teeth.** See *Molar teeth*.—**Prehensile teeth.** In certain animals, teeth that grasp and retain objects, but are of secondary importance in mastication. [L.]—**Premolar teeth.** See *Bicuspid teeth*.—**Principal teeth.** The first molar teeth of man, whose homologues De Blainville assumed to trace through lower animals. [L, 14.]—**Pug teeth.** See *Canine teeth*.—**Rasp teeth.** Sharp, conical teeth closely set so as to resemble the surface of a rasp or file. [L.]—**Scalpriform teeth.** See *Chisel teeth*.—**Screw-driver teeth.** See *Hutchinson's teeth*.—**Second teeth.** The teeth of the second dentition, normally thirty-two in number. [L.] Cf. *Dental formula*.—**Sectorial teeth.** The bicuspid teeth of the Carnivora.

HUTCHINSON'S TEETH.

[L.]—**Maxillary teeth.** The teeth that are implanted in the inferior or superior maxillæ. [L.]—**Milk teeth.** Lat., *dentes infantiles*. Ger., *Milchzähne*. Those teeth which appear in early childhood, to be replaced at various ages by the permanent teeth. They are twenty in number, five in the forward part of each side of each maxilla, as follows: Two molars, one canine, and two incisors. [C.]—**Molar t., Multicuspidate t., Multicuspid t.** Lat., *mylodus*. Ger., *Mahlzahn, Kauzahn, Backenzahn*. A t. having more than one root and a rounded quadrangular crown with several cusps. In adult dentition there are (including the bicuspid) ten molar teeth in each jaw. [L.]—**Palatine teeth.** Teeth attached to the palate bones. [L.]—**Pectinate teeth.** Teeth with the edges notched so as to resemble a comb. [L.]—**Pegged (or Peg-shaped, or Peg-top) teeth.** Teeth, observed in various diatheses, in which the loss of enamel and exposure of the dentin present a series of small peg-like excrescences. [A, 34.]—**Permanent molar teeth.** The six-year, twelve-year, and eighteen-year molar teeth. [L.]—**Permanent teeth.** See *Second teeth*.—**Pharyngeal teeth.** Teeth situated in the pharynx or attached to its osseous framework. [L.]—**Pitted teeth.** Teeth in which, owing to deficient development of dentin or enamel, pits occur on the surface. [A, 34.]—**Posterior molar teeth.** See *Molar teeth*.—**Prehensile teeth.** In certain animals, teeth that grasp and retain objects, but are of secondary importance in mastication. [L.]—**Premolar teeth.** See *Bicuspid teeth*.—**Principal teeth.** The first molar teeth of man, whose homologues De Blainville assumed to trace through lower animals. [L, 14.]—**Pug teeth.** See *Canine teeth*.—**Rasp teeth.** Sharp, conical teeth closely set so as to resemble the surface of a rasp or file. [L.]—**Scalpriform teeth.** See *Chisel teeth*.—**Screw-driver teeth.** See *Hutchinson's teeth*.—**Second teeth.** The teeth of the second dentition, normally thirty-two in number. [L.] Cf. *Dental formula*.—**Sectorial teeth.** The bicuspid teeth of the Carnivora.

[L, 34] (a, 27).—**Serrated teeth.** Teeth with notched edges, like a saw. [L.]—**Setiform teeth.** Teeth shaped like fine bristles. [L.]—**Simple teeth.** Of Cuvier, teeth forming a cone of nearly even or only slightly curved surface, and having cement or enamel only on the outer peripheral portion, as in man and dogs. [L, 158 (a, 14).]—**Six-year molar t.** The molar t. which makes its eruption about the seventh year. [L.]—**Stomach teeth.** See *Canine teeth*.—**Superadded teeth.** The six back teeth on either jaw. [C.]—**Syphilitic teeth.** See *Hutchinson's teeth*.—**Teeth of succession.** The teeth which take the places of the milk teeth. [L.]—**Temporary molar teeth.** The molar teeth of the first dentition. [L.]—**Temporary teeth.** See *Milk teeth*.—**Tidal-mark t.** A malformed t., observed in epileptics, in which the dentin projects beyond the enamel edge, resembling tide-marks on the sand. [N. Y. Med. Jour., Aug. 13, 1887, p. 195 (a, 34).]—**T-bone.** An old term for dentin. [J.]—**True molar teeth.** See *Molar teeth*.—**Twelve-year molar t.** The molar t. which makes its eruption during the thirteenth year. [L.]—**Vertebral teeth.** In certain snakes, inferior spinous processes of several cervical vertebrae, covered with cement. [Owen (L).]—**Villiform teeth.** Fr., *dents en velours*. See *Pegged teeth*.—**Vomerine teeth.** Teeth attached to the vomer. [L.]—**Warty teeth.** Teeth in which the tissues are hypertrophied and folded into an irregular mass. [E, 12.]—**Wisdom teeth.** Lat., *dentes serotini*. The most posterior of the molar teeth, which appear about the eighteenth year. [L.]

TOOTHACHE, n. Tuth'ak. See ODONTALGIA.—**T-root.** See DENTARIA *diphylla*.—**T-tree.** 1. See *ARALIA spinosa*. 2. The *Xanthoxylum fraxineum*. [a, 35.]

TOOTHED, adj. Tuth'd. See DENTATE.

TOOTHEDGE, n. Tuth'ej. See HÆMODIA (1st def.).

TOOTHWORT, n. Tuth'wurt. See LATHRÆA, DENTARIA, CAPSELLA *bursa pastoris*, and PLUMBAGO *scandens*.

TOOT-PLANT, TOOT-POISON, n's. Tut'pla'snt, -poiz'n. See CORIARIA *ruscifolia*.

TOPÆSTHESIA (Lat.), n. f. To'pæ'st(æ)s(æ)-thes(æ)s/'iæ-s. From *tópos*, a place, and *αἰσθησις*, sensation. The capacity for discerning locality by the touch. [a, 48.]

TOPHACEOUS, adj. To'pæ'shu's. Lat., *tophaceus*. Fr., *topacé*. Consisting of, pertaining to, or resembling tophi. [D, 1.]

TOPHUS (Lat.), n. m. Toft(otf)'u's(u's). Fr., *tophe*. Ger., *Tuff, Kalkbeule*. 1. A nodular gouty deposit of sodium urate, most common in the knuckles. [D, 1.] 2. See CHALAZION.—**Syphilitic t.** See SYPHILOMA.

TOPHYPERIDROSIS (Lat.), n. f. Toft(otf)'ip(u'p)-u's(e'p)-p(æd)-ros/'iæ. Gen., *-ros'eus (-is)*. From *tópos*, a place, *ὑπέρ*, in excess, and *ἰδρῶς*, perspiration. Local hyperidrosis. [L, 50 (a, 14).]

TOPICAL, adj. To'p'ik'l. Gr., *τοπικός* (from *τόπος*, a place). Lat., *topicus*. Fr., *topique*. Ger., *topisch*. Local. [E.]

TOPICUS (Lat.), adj. To'p'ik-u's(u's). See TOPICAL: as a n., in the n., *topicum*, a remedy directly applied locally. [A, 326 (a, 21).]

TOPINAMBOUR (Fr.), n. To-pe-na'n²-bur. See HELIANTHUS *tuberosus*.

TOPIOS (Lat.), n. m. Top(ot)'i²-o's. From *τόπος*, a place, and *ἰός*, a poison. Of Ritgen, miasm. [L, 50 (a, 14).]

TOPIQUE (Fr.), adj. To-pek. See TOPICAL: as a n., a local application.

TOPLITZ (Ger.), n. Tu'p'li'ts. See TEPLITZ-SCHÖNAU.

TÖPÄLGIA (Lat.), n. f. Top(ot)p'-o(ot)-a²l(a²l)g/'iæ-s. From *τόπος*, a place, and *ἀλγος*, a pain. Of F. Blocq, a local pain due to general disease. [A, 34.]

TOPOGRAPHICAL, adj. To'p-o-gra'f'i²-k'l. Lat., *topographicus*. Fr., *topographique*. Pertaining to topography. [a, 48.] See T. ANATOMY.

TOPOGRAPHY, n. To'p-o-gra'f'i². Lat., *topographia* (from *τόπος*, a place, and *γράφω*, to write). Fr., *topographie*. Ger., *Topographie, Ortsbeschreibung*. See TOPOGRAPHICAL ANATOMY.

TOPOLOGY, n. To'p-o'lo-'jī. From *τόπος*, a place, and *λόγος*, understanding. Fr., *topologie*. Ger., *Topologie*. 1. See TOPOGRAPHICAL ANATOMY. 2. Of Künke, the relative position of the presenting part of the fetus in regard to the pelvic canal. [A, 91.]

TOPONARCOSIS (Lat.), n. f. To'p-o(ot)-na'rk-os/'iæ. Gen., *-cos'eus (-is)*. From *τόπος*, a place, and *νάρκωσις*, a numbing. See LOCAL ANÆSTHESIA.

TOPONEUROSIS (Lat.), n. f. To'p-o(ot)-nu'r-os/'iæ. Gen., *-ros'eus (-is)*. From *τόπος*, a place, and *νεῦρον*, a nerve. Fr., *toponérose*. Ger., *topisches Nervenleiden*. A topical neurosis. [L, 50.]

TOPONYMY, n. To'p-on'i'm-i². From *τόπος*, a place, and *ὄνομα*, a name. The terminology of the local relations of bodily organs. [a, 48.]

TOPOPHOBIA (Lat.), n. f. To'p-o(ot)-fob(fob²)'i²-s. From *τόπος*, a place, and *φῶβος*, fear. Fr., *topophobie*. Ger., *Topophobie*. A morbid fear of particular places. [D.]

TOPUSZKO, n. A place in Croatia where there are hot gaseous mineral springs. [L, 30, 49, 57 (a, 14).]

TOQUE (Fr.), n. Tok. The genus *Scutellaria*. [a, 35.]

TORCULAR (Lat.), n. n. To'r'ku'l(u'l)-a's. Gen., *-ar'is*. From *torquere*, to twist. 1. A press for making oil or wine, also an oil-cellar. [A, 312 (a, 48).] 2. See TORQUINET.—**T. Herophil.** Fr., *pressoir d'Hérophile*. Ger., *Kelter*. An irregularly shaped venous sinus over the internal occipital protuberance to which the longitudinal, straight, posterior occipital, and lateral sinuses converge. [L.]

TORCULUM (Lat.), n. n. To'r'ku'l(u'l)-u'm(u'm). From *torquere*, to turn. See TORQUINET.—**T. volvens. Of Rhazes, see COCHLEA (4th def.).**

TORDA, n. A place in Hungary where there is a saline spring.
TORDYLUM (Lat.), n. n. To²rd-i(u1)/i²-u²m(u²m). Gr., τὸρδύλιον, τὸρδύλιον. Fr., *tordyle*. Ger., *Zirnet*. A genus of the *Peucedaneae*. [a, 35.]—**T. minus**, **T. officinale**. Fr., *séseli de Candide* (ou de Crète). Ger., *gebräuchlicher Zirnet, Drehkraut, kretischer Sesel, Bergkümmel, Rosenkümmel*. Heartwort; a species indigenous to southern Europe, England, and the Orient. The long, thin fibrous root and the yellowish-white fruits were formerly official as *radix et semen tordyliti* (seu *tordyliti minoris*, seu *séseli* [seu *séselios*] *cretici*, seu *montani*). The fruits are mildly aromatic and were used especially in urinary diseases and amenorrhoea. [a, 35.]

TORENIA (Lat.), n. f. Tor-en(an)/i²-a². Fr., *torène, torénie*. An East Indian and Chinese genus of scrophulaceous herbs. [a, 35.]—**T. asiatica**. A species the sap of the leaves of which is used in gonorrhoea, and the entire plant as an application in skin diseases. [a, 35.]—**T. crustacea**. A species used externally in ulcers, skin diseases, etc. [a, 35.]—**T. hirsuta**. A species used in gonorrhoea and externally in abscesses. [a, 35.]—**T. minuta**. A species the sap of which is emetic and purgative. [a, 35.]

TORF (Ger.), n. To²rf. See PEAT.—**T²mull**. Powdered peat, used as a dressing. [L, 57 (a, 14).]

TORFMOS (Ger.), n. To²rf²mos. See SPHAGNUM.

TORMEN (Lat.), n. sing. of *tormina* (q. v.). To²rm/e²n. Gen., *torm²in²*.

TORMENTIL, n. To²rm/e²nt-i²l. The *Potentilla tormentilla*, *Geranium maculatum*, and *Lamium purpureum*. [a, 35.]

TORMENTILLA (Lat.), n. f. To²rm/e²nt-i²l/a². 1. The *Potentilla* t. 2. A section of the genus *Potentilla*. [a, 35.]—**Decocum tormentillae** [Belg. Ph.]. A preparation made by macerating 1 part of t.-root for an hour with water enough to make 20 parts after boiling a quarter of an hour and straining. [B, 95 (a, 38).]—**Extractum tormentillae** [Belg. Ph.]. A thick extract prepared with cold water from the rhizome of t. [B, 95 (a, 38).]—**Radix tormentillae**. The root of *Potentilla* t. [a, 35.]—**Radix tormentillae pulverata**. T.-root crushed, dried at 40° C., powdered and sifted through a No. 120 silk sieve [Fr. Cod.] (through a 1,000-mesh sieve, leaving no residue [Swed. Ph.]). [B, 95 (a, 38).]—**T. erecta**, **T. officinalis**. See *Potentilla* t.

TORMENTILLE (Fr.), n. Tor-ma²n²-t²el-y. See *Potentilla tormentilla*.—**Poudre de t. (racine)**. See *Radix tormentillae pulverata*.

TORMENTUM (Lat.), n. n. To²rm-e²nt/u²m(u²m). From *torquere*, to twist. A violent pain. [L, 50 (a, 14).]—**T. acutum**. Stercoraceous vomiting. [L, 50 (a, 14).]—**Tormentum intestinum**. See *TORMINA*.

TORMINA (Lat.), n. n. pl. of *tormen*. To²rm/i²na². Gen., *torm²in²*. From *torquere*, to twist. Gripping pain. [D, 1.—**T. alvi**. Colic. [L, 50 (a, 14).]—**T. Celsi**. Dysentery. [L, 50 (a, 14).]—**T. hysterica**. Hysterical pain. [L, 50 (a, 14).]—**T. parturientium**. False labor pains. [L, 50 (a, 14).]—**T. post partum**. The after-pains of parturition. [L, 50 (a, 14).]—**T. ventriculi nervosa**. Of Kussmaul, a gastroenteritis causing symptoms like those of gastrotrastasia. [A, 319 (a, 34).]

TORNACULUM (Lat.), n. n. To²rn-a²k(a²k)/u²l(u²l)-u²m(u²m). From *torquere*, to twist. See *TOURNIQUE*.

TORNELLA (Lat.), n. f. To²rn-el(e²l²)/i²-a². The genus *MONTANA*. [a, 35.]

TOROSE, adj. Tor'os. Lat., *torosus* (from *torus*, a protuberance). Ger., *wulstig, torös*. 1. Bulging. [a, 48.] 2. Cylindrical with swellings at intervals. [a, 35.]

TORP A, n. A place in the province of Göteborg, Sweden, where there is a strong saline spring. [L, 57 (a, 14).]

TORPEDO (Lat.), n. f. To²rp-ed/o. Gen., *ped²inis*. From *torpere*, to be stiff. A genus of the *Batoidei* and of electric rays, which are a family of the *Batoidei*. These fishes have an electric organ composed of hexagonal prisms situated on each side between the pectoral fins and the head. [L, 30 (a, 14) and L, 207.]

TORPID, adj. To²rp/i²d. Gr., *ὑπαρκτός*. Lat., *torpidus*. Fr., *torpide*. Ger., *erstarrt*. Sluggish, inactive, numb. [D, 20.]

TORPIDITY, **TORPOR**, n's. To²rp-i²d/i²-i² To²rp/o²r. Gr., *ὑπαρκτός*. Lat., *torpor* (from *torpere*, to be stiff or numb). Fr., *torpeur, engourdissement*. Ger., *Erstarrung*. 1. Numbness, drowsiness, sluggishness; insensibility to stimuli; functional inactivity. 2. Deficient susceptibility to the various influences and irritants that act more or less continuously on the organism. [D, 3.]

TORQUAY, n. To²r-ke'. A sea-bathing and climatic resort in Devonshire, England. [L, 30, 37, 49, 57 (a, 14).]

TORRE DE SAN-MIGUEL (Sp.), n. To²r-ra da sa²n-meg-u-e²l. A place in Saragossa, Spain, where there is a saline and sulphurous spring. [L, 49 (a, 14).]

TORREFACTION, n. To²r-e²a²k/shu²n. From *torrefacere*, to dry by heat. Fr., *torréfaction*. Ger., *Dörrung, Röstung*. Roasting, drying by artificial heat. [L, 30, 41, 49, 50 (a, 14).]

TORRES (Sp.), n. To²r-re's. A place in the province of Madrid, Spain, where there is a sulphurous spring. [L, 57 (a, 14).]

TORREYA (Lat.), n. f. To²r-i²a². From *Torrey*, an American botanist. Fr., *Stinking-yew*; a genus of evergreen trees of the *Taxaceae*. [a, 35.]—**T. californica**. Wild or stinking or Californian nutmeg (tree). The leaves emit an unpleasant odor if burned or bruised. The nutmeg-like fruit tastes like turpentine. [a, 35.]—**T. grandis**. Large stinking-yew, the *kaya* of China. The nuts yield a nutritious oil. [a, 35.]—**T. nucifera**. A Japanese species. The kernels are astringent. [a, 35.]

TORRICELLIAN, adj. To²r-i²-che²/i²-n. Investigated by or named from E. Torricelli, an Italian mathematician. [a, 48.]

TORRUBIA (Lat.), n. f. To²r-rub/i²-a². A genus of *Fungi*, of the *Sphaeriaceae*. [B, 61.]—**T. sinensis**. A species developed on dead caterpillars; highly valued as a tonic in China, and recommended in constipation, impotence, coryza, etc. [a, 35.]

TORSION, n. To²r-shu²n. Gr., *σπέρψης*. Lat., *torso* (from *torquere*, to twist). Fr., *t. Ger., Drehung, Umdrehen*. The act or process of twisting. [E.]—**Free t.** Of the free end of a divided artery. [a, 34.]—**Limited t.** T. in which the artery is held some distance from its end, with a forceps that limits the extension of the twisting. [a, 34.]—**T. of the umbilical cord**. A twisting of the cord to such a degree as to interfere with the flow of blood through its vessels.

TORSIONCLUSION, n. To²rs-o²-klu²/zhu²n. From *torquere*, to twist, and *cludere*, to close. Acupuncture (q. v.) by the second variety of the fifth method. [E.]

TORTELE (Fr.), n. To²rt-e²l. Of the Fr. Cod., the leaves or the flowering plant of *Sisymbrium officinale*. [B, 95 (a, 38).]

TORTICOLLIS (Lat.), n. m. To²rt-i²-ko²/l'i²s. From *tortus*, twisted, and *collum*, the neck. Fr., *torticollis*. Ger., *Schiefhals, Halsstarre, Krummhals, Halsverkrümmung*. Wry neck, a distortion of the neck which causes the head to be held awry. [L, 52 (a, 18).]—**Intermittent t.** See *Spasmodic t.*—**Occipito-atloldian t.** Of Dally, a subluxation of the atlas on the occipital bone in such a way that the lateral masses are transverse to the vertical plane. [A, 520 (a, 29).]—**Ocular t.** Of Guignet, t. developed from inequality in the sight of the two eyes. [A, 520 (a, 29).]—**Spasmodic t.** Due to a lesion of the spinal accessory nerve and characterized by recurrent violent contractions of the muscles of the neck and especially of the sterno-cleido-mastoid. [L, 70; L, 87 (a, 50).]

TORTILIS (Lat.), adj. To²rt-i²l-i²s. From *torquere*, to twist. Fr., *tortile*. Twisted like a rope; also susceptible of twisting. [a, 35.]

TORTUE (Fr.), n. To²r-tu². See *ASATHEROMA*.

TORTULA (Lat.), n. f. To²rt-u²l(u²l)-a². A genus of mosses. [a, 35.]—**T. muralis**. A European species, considered astringent and used as a hemostatic. *T. castiva*, *T. ambigua*, *T. goettingensis*, and *T. pilosa* (*T. vermalis*) are varieties. [a, 35.]

TORTUOUS, adj. To²rt-u²-u²s. Lat., *tortuosus* (from *tortus*, twisted). Fr., *tortueux*. Irregularly twisted, bent or twisted in different directions. [a, 35.]

TORULA (Lat.), n. f. To²rt-u²l(u²l)-a². Fr., *torule*. A genus of *Fungi* typical of a division (the *Torulaceae* or *Torulacei*) of the *Coniomycetes* in which the entire plant is reduced to a chain of spores without a definite stroma. [a, 35.]—**T. cerevisiae**. See *SACCHAROMYCES cerevisiae*.—**T. fusidioides**. See *CHALARA fusidioides*.

TORULOSE, adj. To²r-u²l-os. Lat., *torulosus*. Fr., *toruleux*. Ger., *knorrig*. Torose; also slightly torose. [a, 35.]

TORULUS (Lat.), n. m. To²rt-u²l(u²l)-u²s(u²s). Dim. of *torus* (q. v.). Fr., *torule*. A slight swelling or prominence.—**T. glandis**. See *CORONA glandis*.

TORUS (Lat.), n. m. Tor(to²r)/u²s(u²s). Fr., *t. Ger., Wulst* (1st def.), *Blumenboden* (2d def.). 1. A swelling or prominence. [L, 50 (a, 48).] 2. In botany, the shortened stem on which the floral leaves are inserted. [a, 35.]—**T. manus**. See *METACARPUS*.—**T. marginalis**. Ger., *Randwulst*. A cerebral convolution. [I, 3 (K).]—**T. palatinus**. A protuberance found on the surface of the hard palate at the point of union of the intermaxillary and palatamaxillary sutures. [Jahresbericht der gesammten Medicin, 1861, Bd. I, p. 7 (a, 50).]—**T. uteri**. A slight upward projecting elevation of the posterior wall of the uterus where the peritoneum is reflected upward. [L.]

TOTUM CARNOSUM (Lat.), n. n. Tot(u²m)/u²m(u²m) ka²rn-os²-u²m(u²m). See *PANCREAS*.

TOUCH, n. Tu²ch. Gr., *ἥψυς*. Lat., *tactus*. Fr., *tact* (1st def.), *toucher* (2d def.). Ger., *Tastsinn* (1st def.). *Gefühlssinn* (1st def.), *Touchiren* (2d def.). 1. The act, sense, or function of judging of the presence or character of external objects by means of direct contact. [K.] 2. A digital examination by the vagina.—**After-t.** A sensation which remains for a short time after the cessation of contact with an object. [K.]—**Double t.** Combined vaginal and rectal digital exploration. [a, 34.]—**Royal t.** Lat., *manus regalis*. The t. of a king, formerly in repute as a cure for scrofula (the "king's evil"). [a, 48.]

TOUCHING, n. Tu²ch/i²n². See *TOUCH* (2d def.).

TOUCH-ME-NOT, n. Tu²ch/me-no²t. The genus *Impatiens*. [a, 35.]

TOUCHWOOD, n. Tu²ch/wu²d. See *AMADOU*.

TOUFFE (Fr.), n. Tuf. See *CAMPES* and *FLOCCULUS* (2d def.).

TOULEMA, n. See *CANNA starch*.

TOULOUCOUNIN, n. Tu-lu-kun/i²n. Fr., *touloucoumine*. A bitter principle contained in the bark of *Tarapa guineensis*; a non-nitrogenous amorphous, resinous mass. [B, 93 (a, 14).]

TOUMBOUTAY, n. See *TEPLY*.

TOUR (Fr.), n. Tur. A turn; a circular movement. [L, 41, 49 (a, 14).]—**T. de lune**. See *Periosteal osteomyelitis* (2d def.).—**T. de maître**. Catheterism in which the instrument is introduced with the shaft between the legs until its point is arrested at the bulb of the urethra, when the handle is turned in a semicircle until it reaches a vertical position and is then at once depressed between the thighs, causing the point to pass through the prostatic urethra. [a, 34.]—**T. de reins**. A lumbar sprain. [a, 34.]—**T. de White**. White's dental drill. [a, 34.]

TOURBETTE (Fr.), n. Tur-be²t. See *SPHAGNUM*.

TOURBILLON (Fr.), n. Tur-bel-yo²n². A vortex. [a, 48.]—**T. vasculaire**. See *Vasa vortiosa*.—**T. vital**. Of Cuvier, the con-

stant interchange of nutritious and waste materials which occurs in the tissues. [K, 31.] Cf. METABOLISM.

TOURLOUROU-OIL, n. Tur-lu-ru'. Ger., *Tourlourouöl*. A fixed animal oil used as an embrocation in rheumatism (see under *BIRGUS latro*). [a, 35.]

TOURNANTÖL (Ger.), n. Turn-a'nt-u'l. See *HUILE tournante*.

TOURNEFORTIA (Lat.), n. f. Turn-fort-i'2-a'. From J. P. de *Tournefort*, a French botanist. Fr., *pittonie* (2d def.), *tournefortie* (2d def.). 1. See *ANTHOSPERMUM*. 2. Of Linnaeus, a genus of the *Heliotropiaceae*. The *Tournefortiaceae* are a division of the *Boraginaceae*. [a, 35.]—*T. hirsutissima*. Fr., *herbe à chiques* (ou *a malinages*), *pittonie très velue*. A tropical American species of *T.* (2d def.). The leaves are used as a cataplasm to kill chiques. The roots are diuretic. [a, 35.]—*T. umbellata*. A Mexican shrub used in fevers and as an application to tumors, ulcers, and skin lesions. [a, 35.]

TOURNESOL (Fr.), n. Tur-n'so'l. 1. See *HELIOTROPIMUM europaeum* and *CHROZOPHORA tinctoria*. 2. See *LITMUS*.—*Dutch t.* The *Lecanora tartarea* and *Rocella tinctoria*. [a, 35.]—*T. en drapau*. The dye (litmus) obtained from *Chrozophora tinctoria*. [a, 35.]

TOURNESOLIA (Lat.), n. f. Tur-n'sol-i'2-a'. The genus *Chrozophora*. [a, 35.]

TOURNOLE (Fr.), n. Tur-ne-ol'. Paronychia affecting the base and sides of the nail and the neighboring skin.

TOURNIQUET, n. To-urn'i'2-ke't. Fr., t. Ger., *T. Aderpresse*, *Schraubenbinde*. An instrument for making continuous pressure upon a part, usually consisting of two metal plates which may be approximated or separated by a thumb screw, and of a strap connecting them and long enough to be buckled around the limb, together with a pad. The pad is placed over the part to be compressed, the vessel to be occluded, and fastened in place by the strap, which is then tightened by separating the metal plates with the thumb-screw. [E, 4.]—**Dupuytren's t.** A t. for making pressure on the abdominal aorta, consisting of a semicircle of metal with a pad on one end, which fits upon the spine, and a screw working vertically through the other end so as to press down another pad upon the aorta. [E, 4.]—**Field t.** A t. consisting merely of a strap and buckle with a pad to go over the artery. [E, 4.]—**Hoe's clamp t.** A semicircular t. with a pad at one extremity and another pad at the end of a screw working vertically through the other extremity. [E, 4.]—**Lip t.** An instrument consisting of a piece of hard and polished steel, bent like the letter U, one arm having a vulcanite-covered oval steel plate attached to it, and a similar plate steadied by steel rods and moved by a central screw being connected with the other arm. ["Brit. Med. Jour.," 1865, i, 222 (a, 34).]—**Lister's t.** See *Hoe's clamp t.*—**Pancoast's abdominal t.** See *Skey's t.*—**Petit's screw t.** An instrument consisting of a metal plate having on each lateral border two pivoted rollers, a similar plate having but one roller being superposed over the lower plate and separated from it by means of a screw; a band of webbing passes over the rollers that is fastened by means of a buckle and has a pad on it to place over the artery. [a, 34.]—**Signoroni's t.** A t. shaped like a horse-shoe with a pad at each end and a hand-screw at the joint on the centre of the bar. [E, 4.]—**Skey's t.** A t. shaped like a stirrup, with one pad on the foot-piece and the other on the end of a vertical hand-screw working through the top. [E, 4.]—**Tiemann's t.** A modification of Petit's t. by which a greater amount of pressure is concentrated upon the artery, while the circulation in the vein is not embarrassed. The pad is placed either horizontally or crosswise upon the vessel, and the strap, carried around the limb, is passed through two side apertures in a metallic plate, after which the ends are drawn very tight and fastened upon protruding hooks. [E.]

TOURNIS (Fr.), n. Tour-ne. See *GID*.

TOURNOIEMENT (Fr.), n. Tur-nwa'-ma'n. See *VERTIGO*.

TOUS-LES-MOIS (Fr.), n. Tu-la-mwa'. See *CANNA starch*.

TOUTE-ÉPIQUE (Fr.), n. Tut-a-pes. 1. The *Nigella sativa* or its seed. 2. The *Pimenta officinalis* or its berries. [a, 35.]

TOUX (Fr.), n. Tu. See *COUGH* and *TUSSIS*.—**T. auriculaire**. See *Ear cough*.—**T. cardiaque**, **T. cardiopathique**. A reflex cough due to heart disease. [a, 34.]—**T. convulsif**. See *PERUSSIS*.—**T. d'oreille**. See *Ear cough*.—**T. érucante**. Cough with eructations. [a, 34.]—**T. éternue**. Cough without perceptible noise. [L, 87 (a, 50).]—**T. féline**. See *TUSSIS felina*.—**T. grasse**, **T. humide**. See *Mucous cough*.—**T. intestinale**. Reflex cough due to intestinal trouble. [a, 34.]—**T. ovarique**. Reflex cough associated with ovarian disease. [a, 34.]—**T. pleurale**. Reflex cough due to pleural irritation. [a, 34.]—**T. qui houe**. A provincial name for whooping-cough. [D.]—**T. sèche**. See *Dry cough*.—**T. splénique**. Reflex cough due to disease of the spleen. [a, 34.]—**T. sympathique**. Cough caused by reflex irritation of the pneumogastric nerve. [a, 34.]—**T. trachéale**. Cough due to tracheal irritation. [a, 34.]—**T. vermineuse**. Reflex cough due to intestinal worms. [a, 34.]

TOVOMITA (Lat.), n. f. To-vo(w)-mit(met)'a'. Ger., *Geibfrucht*. A genus of tropical American clusiaceous plants. The

Tovomitaceae are a section of the *Clusiaceae*. [a, 35.]—**T. fructipendula**. A species found in the Peruvian Andes. The bark is used in medicine. [a, 35.]

TOW, n. To. Gr., στῆλη. Lat., *stupa*. Fr., *étoupe*. Ger., *Werg*. The coarser part of flax or hemp. [a, 43.]

TOXA (Lat.), n. n. pl. To'x'a'. From τοξικόν, poison. Of Eiseiann, diseases produced by poisons. [L, 50 (a, 14).]

TOXÆMIA (Lat.), n. f. To'x-em'(a's'e'm)-i'2-a'. From τοξικόν, poison, and αἷμα, blood. Fr., *toxémie*. See *Blood-poisoning*.

TOXÆMIC, adj. To'x-e'm'i'2-k. Fr., *toxémique*. Ger., *toxämisch*. Pertaining to or affected with toxæmia. [D.]

TOXALBUMIN, n. To'x-a'l-bu'2-mi'n. Of Brieger and Fraenkel, any one of the toxic substances resulting from the action of the various bacilli on the albumins of the tissues, and resembling either serum-albumin or globulin. [a, 27.] Cf. *Toxic ALBUMIN*.

TOXIC, adj. To'x-i'2-k. From τοξικόν, poison (TOXICON). Fr., *toxique*. Ger., *toxisch*. 1. Pertaining to poisons. 2. Poisonous. [a, 48.]

TOXICÆMIA (Lat.), n. f. To'x-i'2-k-(i'2-k)-em'(a's'e'm)-i'2-a'. Ger., *Toxicämie*. See *Blood-poisoning*.

TOXICANT, adj. To'x-i'2-k-nt. From *toxicare*, to poison. Poisonous. [a, 48.]

TOXICATMUS (Lat.), adj. To'x-i'2-k-a't'(a't')-mi'2-k-u's(u's). From τοξικόν, poison, and ἀτμός, vapor. Fr., *toxicatmique*. Containing or yielding poisonous vapors. [L, 50 (a, 14).]

TOXICATION, n. To'x-i'2-k-a'shu'n. Lat., *toxicatio* (from *toxicare*, to poison). Fr., t. See *POISONING*.

TOXICHÆMATOSIS (Lat.), **TOXICHÆMIA** (Lat.), n's f. To'x-i'2-k(i'2-k)-e'm(a's'e'm)-a't'(a't')-os'i's, -em'(a's'e'm)-i'2-a'. Gen., -os'eos (-is), -æmie. Fr., *toxicohématose*. See *Blood-poisoning*.

TOXICITY, n. To'x-i'2-s'i'2-t-i'2. From τοξικόν, poison. Fr., *toxicité*. Ger., *Giftigkeit*. The property of being poisonous. [a, 48.]

TOXICODENDRIC ACID, n. To'x-i'2-k-o-de'nd'r'i'2-k. A volatile acid forming, according to Maisch, the active principle of the juice of *Rhus toxicodendron*, acting as a vesicant. [B, 92, 93 (a, 14).]

TOXICODENDRON (Lat.), **TOXICODENDRUM** (Lat.), n's n. To'x-i'2-k-o-(i'2-k)-de'nd'r'o'n, -ru'm(ru'm). From τοξικόν, poison, and δένδρον, a tree. 1. See *Rhus t.* 2. The genus *Schmidelia*. 3. A genus of the *Euphorbiaceae*. [a, 35.]—**Infusum toxicodendri** [Russ. Ph.]. A preparation made by pouring over 18 centigrammes of leaves of *Rhus t.* enough boiling water to make 80 grammes of strained infusion after 5 minutes' steaming. [B, 95 (a, 58).]—**Tinctura toxicodendri**. A tincture made by macerating 5 parts of the fresh leaves of *Rhus t.* with 6 of alcohol of sp. gr. 0.832 for eight days [Ger. Ph., 1st ed.] (5 parts of dried leaves with 50 of 70-per-cent. alcohol for five days [Russ. Ph.]), or by digesting the dry leaves with 5 times as much dilute alcohol for a week [Swiss Ph.]. [B, 95, 119 (a, 38).]—**T. capense**. See *HYENANCHE globosa*.

TOXICODERMATITIS (Lat.), n. f. To'x-i'2-k-o-(i'2-k)-du'e'm-(de'e'm)-a't'(a't')-i'e'y(i'2)s. Gen., -i'2-dos (-idis). From τοξικόν, poison, and δέρμα, the skin. Fr., *toxicodermite*. Ger., *Gifthauteinflammung*. Cutaneous inflammation caused by a poison. [L, 50 (a, 14).]

TOXICODERMIE (Fr.), n. Tox-e-k-o-de'r-me. A skin disease due to the action of a poison.

TOXICODERMITIS (Lat.), n. f. To'x-i'2-k-o-(i'2-k)-du'e'm-(de'e'm)-i'e'y(i'2)s. Gen., -i'2-dos (-idis). See *TOXICODERMATITIS*.

TOXICOHÆMIA (Lat.), n. f. To'x-i'2-k-o-(i'2-k)-hem'(ha's'e'm)-i'2-a'. Fr., *toxicohémie*. See *Blood-poisoning*.

TOXICOLOGY, n. To'x-i'2-k-o'l'o'2-i'2. Lat., *toxicologia* (from τοξικόν, poison, and λόγος, understanding). Fr., *toxicologie*. Ger., *Giftkunde*, *Giftlehre*. The science of the nature and action of poisons and of the detection and treatment of poisoning. [a, 48.]

TOXICOMANIA (Lat.), n. f. To'x-i'2-k-o-(i'2-k)-man(ma'n)-i'2-a'. From τοξικόν, poison, and μανία, madness. See *TOXIPHOBIA*.

TOXICON (Lat.), n. n. To'x-i'2-k-o'n. Gr., τοξικόν, poison, originally poison for smearing arrows (from τόξον, a bow). Arrow poison; hence, any poison. [a, 34.]

TOXIPHLEA (Lat.), n. f. To'x-i'2-k-o-(i'2-k)-fle'(flo'e'e)-a'. From τοξικόν, poison, and φλοιόν, bark. See *ACOCANTHERA*.

TOXICOPHTHISIS (Lat.), n. f. To'x-i'2-k-o't'(o't')-i'2-s(i's)-i'2-s. From τοξικόν, poison, and φθίσις, consumption. Fr., *toxicophthisie*. Phthisis induced by poison. [L, 50 (a, 14).]

TOXICORRHEUMATISMUS (Lat.), n. m. To'x-i'2-k-o'r-ru'2-r-a'2'(a't')-i'2-z(i'2-s)/mu's(mu's). From τοξικόν, poison, and ρευματισμός, rheumatism. Rheumatism caused by poison. [L, 50 (a, 14).]

TOXICOSIS (Lat.), n. f. To'x-i'2-k-o-s'i's. Gen., -os'eos (-is). From τοξικόν, poison. Poisoning.—**Antot'**. Of von Jaksch, t. caused by toxic substances formed in the system. [a, 34.]—**Exogenic t.** Induced by substances taken into the system. [a, 34.]—**Nosot'**. T. referable to the presence of basic products that are formed in the system in disease and eliminated with the urine. [a, 34.]—**Retention t.** Depending upon the retention of a substance that should be excreted. [a, 34.]

TOXICUM (Lat.), n. n. To'x-i'2-k-u'm(u'm). See *TOXICON*.

TOXIFERUS (Lat.), adj. To'x-i'2-f'e'r-u's(u's). From *toxicum*, poison, and *ferre*, to bear. Fr., *toxifère*. Bearing or producing poison. [L, 41 (a, 14).]

TOXIHÆMIA (Lat.), n. f. To'x-i'2-hem'(ha's'e'm)-i'2-a'. See *Blood-poisoning*.

TOXINE, n. To'x-i'2-n. From τοξικόν, poison. Ger., *T.* Any poisonous ptomaine. [Brieger (B, 270).]

TOXINICIDE, n. To²x-i²n²/i².sid. From *toxicum*, poison, and *cedere*, to slay. Of E. Moany, a substance that destroys a toxine. [a, 34.]

TOXIPHOBIA (Lat.), n. f. To²x-i²/ob(i²o²b²y²/i²a². From *toxi-*, poison, and *phobos*, fear. Of Cameron, monomania characterized by fear of being poisoned. [a, 34.]

TOXIPHOBIA, n. To²x-i²/ob(i²a²k². Of Cameron, a person affected with toxiphobia. [a, 34.]

TOXIRESIN, n. To²x-i²re²z²/i²n. Fr., *tozirésine*. An uncrystallizable, yellowish, poisonous resin produced by decomposing digitoxin with dilute acids or by heating it to 240° C. [B, 93 (a, 14).]

TOXONOS (Ger.), n. pl. Tox-o-nos²/e²n. Diseases caused by poison. [L, 57 (a, 14).]

TOXOPHYLAXIN, n. To²x-o²-fi²a²-x²/i²n. Of Hankin, a defensive proteid produced in the body of an animal which has an acquired immunity, and acting by neutralizing the toxic products of the pathogenic bacteria to which the disease is due. [Boston Med. and Surg. Jour., Jan. 12, 1893, p. 31 (a, 50).]

TO-YAK, n. A bitter Japanese drug obtained from *Pleurogyne rotata*; used as a tonic. [B, 108 (a, 14).]

TRABECULA (Lat.), n. f. Tra²b(trab²b)-e²k²/u²(u²l)-a². Dim. of *trabs*, a beam. Fr., *trabécule*. Ger., *Trabekel*, *Balken*, *Dilichen*, *Querbalkchen*. Any one of various beam-like or string-like masses of tissue arranged in bands or cross-bars. [K.]—Cell-(or Cortical) *trabeculae*. See *CELL-trabeculae*.—*Lateral trabeculae* of the embryonic cranium. See *TRABECULAE CRANII*.—*Trabeculae carnae* (cordis). See *COLUMNAE CARNAE* (1st def.).—*Trabeculae corporeum cavernosum*. Prolongations inward of the fibrous tissue covering the corpora cavernosa of the penis, dividing them into a large number of small cavities. [L.]—*Trabeculae cranii*. The axial part of the basi-facial axis of the embryo; of Rathke, certain cartilaginous rudiments which stretch forward, in the development of the basis cranii, from the region of the sella turcica to that of the olfactory pits, in the form of two bars more or less united. [A, 5.]—*T. magna cerebri*. See *CORPUS CALLOSUM*.—*T. medullaris cerebelli*. See *INCREMENTA FIBROSA*.—*Trabeculae of the spleen*. The reticular framework of connective tissue which runs in the substance of the spleen. [O.]—*Trabeculae of the testis*. Processes of the albuginea testis extending into the testicle and joining similar processes given off from the front and sides of the corpus Highmori. They inclose the separate lobules of the testis. [O, L.]

TRABECULAR, adj. Tra²b-e²k²/u²l-a²r. Fr., *trabéculaire*. Pertaining to or constituting trabeculae. [J.]

TRABECULATE, **TRABECULATED**, adj's. Tra²b-e²k²/u²l-at-e²l. Lat., *trabeculatus*. Ger., *querbalkig*. Cross-barred, having trabeculae. [a, 35.]

TRABERKRANKHEIT (Ger.), n. Tra²b²/e²r-kra²n²k-hit. See DREHKRANKHEIT.

TRABES (Lat.), n. f. Tra²b(trab²b)/ez(as). Gen., *trab'is*. See TRABECULA.

TRABS (Lat.), n. f. Tra²bz(trab²bs). Gen., *trab'is*. See PENIS.—*T. cerebri*, *T. medullaris*. See *CORPUS CALLOSUM*.

TRACE, n. Tras. Fr., *tracé*. A track, mark, or impression. [a, 48.]—Primitive *t*. See *PRIMITIVE STREAK*.

TRACHEA (Lat.), n. f. Tra²k(trach²ch)/e²a/a². Gr., *τραχεΐα*, for *τραχεΐα ἀσπρία* (*arteria asperia*), the rough artery (from *τραχύς*, rough). Fr., *trachée*. Ger., *T. Trachee*, *Luftröhre* (1st def.). 1. The windpipe; a tube 4 to 4½ in. long, ½ to 1 in. in diameter, in man, continuous with the larynx above and dividing about opposite the intervertebral fibro-cartilage between the fourth and fifth dorsal vertebrae into the two bronchi. It consists of cartilaginous rings incomplete behind, united by fibrous tissue, and is lined with mucous membrane. [L, 31, 142, 332.] 2. The respiratory tube in vertebrates; the air-tube of tracheate insects. [L, 196; L, 206 (a, 27).] 3. In botany, a duct. [a, 35.]

TRACHEAECTASY, n. Tra²k-e²a²-e²2k²/a²s-i². From *trachea*, the trachea, and *ektasis*, extension. Tracheal dilatation. [a, 34.]

TRACHEAL, adj. Tra²k²/e²a². Pertaining to the trachea or to tracheae. [a, 48.]

TRACHEALIA (Lat.), n. f. Tra²k(trach²ch)-e²(a)-al(a²l)/i²a². From *trachea*, the trachea. Of Farr, group. [D.]

TRACHEARY, adj. Tra²k²/e²a²-i². Pertaining to or resembling tracheae (cf. *T. CELLS*). [a, 35.]

TRACHEID, n. Tra²k²/e²a²-i²d. Fr., *trachéide*. An elongated cell with markings resembling those of a duct. [a, 35.]

TRACHEITIS (Lat.), n. f. Tra²k(trach²ch)-e²(a)-i²(e)/ti²s. From *tracheia*, the trachea. Fr., *trachéite*. Inflammation of the trachea. [a, 17.]—*T. maligna*. See *CAUPE* (1st and 2d def's).

TRACHELÉMATOMA (Fr.), n. Tra²k-al-am-a²-tom. A hematoma of the neck.—*T. des nouveau-nés*. Of E. Tordens, a hematoma of the sheath of the sternno-cleido-mastoid muscle sometimes observed in the new-born infant after difficult labor. [Progr. méd., Mar. 8, 1884, p. 199.]

TRACHELAGRA (Lat.), n. f. Tra²k(trach²ch)-e²(al)/a²g²(a²g)-ra². From *trachylos*, the neck, and *άγρα*, a seizure. Fr., *trachélaire*. Rheumatic pain in the neck. [L, 50 (a, 14).]

TRACHELALIS (Lat.), n. m. Tra²k(trach²ch)-e²(al)-al(a²l)/i²s. From *trachylos*, the neck. Of Coues, see *TRACHELOMASTOIDES* (1st def.).

TRACHELECTOMPEXIA (Lat.), n. f. Tra²k(trach²ch)-e²(al)-e²2k²-to²m(o²)-pe²x(pax²)/i²a². From *trachylos*, the neck, *εκτομή*, a cutting out, and *πῆξις*, a fixing. Trachelopexia with partial excision of the cervix uteri. [a, 34.]

TRACHELECTOMY, n. Tra²k-e²l-e²2k²/om-i². From *trachylos*, the neck, and *εκτομή*, a cutting out. Excision of the cervix uteri. [a, 34.]

TRACHELIAN, adj. Tra²k-el²/i²a². From *trachylos*, the neck. Fr., *trachelien*. Pertaining to the neck, especially to its back part. [L, 41, 49 (a, 14).]

TRACHÉLI-ATLÓIDO-BASILARE (Fr.), n. Tra²-sha-le-a²-lo-ed-o-ba²-se-la²r. See *RECTUS CAPITIS LATERALIS*.

TRACHELISM, n. Tra²k-el²/i²zm. Gr., *τραχηλισμός* (from *trachylos*, the neck). Lat., *trachelismus*. Fr., *trachelisme*. Of M. Hall, spasmodic contraction of the muscles of the neck. [K, 3.]

TRACHELITIS (Lat.), n. f. Tra²k(trach²ch)-e²(al)-i²(e)/ti²s. Gen., *-it'idis (-idis)*. From *trachylos*, the neck. Inflammation of the neck or of the cervix uteri.

TRACHELO-ACROMIALIS (Lat.), n. m. Tra²k(trach²ch)-el(al)/o²(o²)-a²k(a²k)-rom-i²-a²l(a²l)/i²s. From *trachylos*, the neck, and *ακρόμιον*, the acromion. In solipeds, the posterior portion of the mastoido-humeralis. It arises from the transverse processes of the first four cervical vertebrae. [L, 13.]

TRACHELO-ANGULI-SCAPULARE (Fr.), n. Tra²-ka-lo-a²n²-gu²-le-ska²-pu²-la²r. See *LEVATOR ANGULI SCAPULAE*.

TRACHÉLO-ATLÓIDO-OCIPITALIS (Fr.), n. Tra²-ka-lo-a²-lo-e-do-o²-k²-se-pe-ta²l. See *OBLIQUUS CAPITIS MINOR*.

TRACHÉLO-BASILARE (Fr.), n. Tra²-ka-lo-ba²-se-la²r. See *RECTUS CAPITIS ANTERIOR MAJOR*.

TRACHELOCAMPYLUS (Lat.), n. m. Tra²k(trach²ch)-el(al)-o²(o²)-ka²mp(ka²mp)/i²l(u²l)-u²s(u²s). From *trachylos*, the neck, and *καμπύλος*, crooked. A cysticerous found once in the human brain; probably a degenerated cysticerous of some known species. [L, 17.]

TRACHELOCLAVICULARIS (Lat.), adj. and n. Tra²k(trach²ch)-el(al)/o²(o²)-kla²(kla²)-vi²2k(wi²k)-u²l(u²l)-a²ri(a²ri)/i²s. From *trachelus*, the neck, and *clavicula*, the clavicle. See *CLEIDOCERVICALIS*—*T. minor*. See *CLEIDOCERVICALIS MINUS*.—*T. superior*. See *LEVATOR CLAVICULAE*.

TRACHELOSTALIS (Lat.), n. m. Tra²k(trach²ch)-el(al)/o²(o²)-ko²st-al(a²l)/i²s. From *trachelus*, the neck, and *costa*, a rib. The analogue of the sacrolumbalis of man found in nearly all the lower mammals. [L, 13.]

TRACHELOSTOCCAPULARIS (Lat.), n. m. Tra²k(trach²ch)-el(al)/o²(o²)-ko²st²/o²(o²)-ska²p(ska²p)-u²l(u²l)-a²ri(a²ri)/i²s. From *trachylos*, the neck, *costa*, a rib, and *scapula* (q. v.). The serratus magnus and the levator anguli scapulae considered as a single muscle. [a, 34.]

TRACHELOCYLLOSIS (Lat.), n. f. Tra²k(trach²ch)-el(al)-o²(o²)-yl(kyl)/i²os(i²s). Gen., *-i²os(i²s (-is))*. From *trachylos*, the neck, and *κύλλωσις*, a crooking. See *TORTICOLLIS*.

TRACHELOCYPHOSIS (Lat.), n. f. Tra²k(trach²ch)-el(al)-o²(o²)-si²l(kuf²)/e²os(i²s). Gen., *-os'eos(-is)*. From *trachylos*, the neck, and *κύφωσις*, or *κύρτωσις*, kyphosis. Fr., *trachelocyphose*, *trachelocyphose*. Ger., *Halsbuckel*. An abnormal curvature of the cervical portion of the vertebral column. [L, 50 (a, 14).]

TRACHELO-DIAPHRAGMATIC, adj. Tra²k-el²/o²-di-a²-fra²g-ma²t/i²2k. From *trachylos*, the neck, and *διάφραγμα*, the diaphragm. Pertaining to the neck and the diaphragm. [L.]

TRACHÉLO-DORSAL (Fr.), adj. Tra²-ka-lo-dor-sa²l. Cervico-dorsal. [L.]

TRACHELODYNIA (Lat.), n. f. Tra²k(trach²ch)-e²(al)-o²(o²)-di²2n(du²n)/i²a². From *trachylos*, the neck, and *δύσιν*, pain. Fr., *trachelodynie*. Ger., *Halschmerz*. Pain in the neck.

TRACHELOMASTOIDES (Lat.), n. m. Tra²k(trach²ch)-el(al)/o²(o²)-ma²st(ma²st)-o²(o²)-i²d(ed²/e²-u²s(u²s)). From *trachylos*, the neck, and *μαστοειδής*, mastoid. Fr., *trachelo-mastoidien*. Ger., *Halswirbelsäule*. 1. The upward continuation of the longissimus dorsi which arises from the transverse processes of a varying number of the upper dorsal vertebrae and the articular processes of the three or four lower cervical vertebrae, and is inserted into the posterior border of the mastoid process of the temporal bone. [L, 31, 142, 332.] 2. In solipeds, see *DORSOMASTOIDEUS*.—*T. accessorius*, *T. minor*. An anomalous muscle arising from the transverse processes of the upper two dorsal and the lower two or three cervical vertebrae, and inserted into the mastoid process of the temporal bone or the transverse process of the atlas. [L, 332.]

TRACHELOMYTIS (Lat.), n. f. Tra²k(trach²ch)-e²(al)-o²(o²)-mi(mu²)/i²(e)/ti²s. Gen., *-it'idis (-idis)*. From *trachylos*, the neck, and *μῦς*, a muscle. Fr., *trachelomyélite*. Inflammation of the muscles of the neck. [L, 50 (a, 14).]

TRACHÉLO-OCIPITALIS (Fr.), n. Tra²-ka-lo-o²-k²-se-pe-ta²l. See *COMPLEXUS*.

TRACHELO-OCIPITALIS (Lat.), n. m. Tra²k(trach²ch)-el(al)/o²(o²)-o²k²-si²p(ki²p)/i²t-a²l(a²l)/i²s. From *trachylos*, the neck, and *occiput* (q. v.). A muscle of solipeds corresponding to the rectus capitis anticus major of man. It arises from the transverse processes of the third, fourth, and fifth cervical vertebrae, and is attached to the body of the sphenoid bone and the basilar process of the occipital bone. It flexes the head and carries it to one side. [L, 13.]

TRACHELOPANUS (Lat.), n. m. Tra²k(trach²ch)-e²(al)-o²(o²)-pan(pa²n)/u²s(u²s). From *trachylos*, the neck, and *panus*, a swelling. Fr., *trachelopane*. Ger., *Halsdrüsengeschwulst*. Inflammation of the cervical glands. [L, 50 (a, 14).]

TRACHELOPEXIA (Lat.), n. f. Tra²k(trach²ch)-e²(al)-o²(o²)-pe²x(pax²)/i²a². From *trachylos*, the neck, and *πῆξις*, a fixing. Fixation of the cervix uteri. [a, 34.]

TRACHELOPHYMA (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2\text{l}(\text{al})\text{-o}(\text{o})\text{-fim}(\text{fu}^2\text{m})\text{-a}^2$. Gen., *-phym'atos (-atis)*. From tráxhlos , the neck, and $\phi\acute{\upsilon}\mu\alpha$, a growth. Fr., *trachelophymie*. A swelling of the neck. [L, 50 (a, 14).] See also *GOITRE* and *TRACHELOPANS*.

TRACHELOPLASTY, n. $\text{Tra}^2\text{k}\text{-el}^1\text{-o-pla}^2\text{-st}^2\text{-ek}$. From tráxhlos , the neck, and $\pi\lambda\acute{\alpha}\sigma\tau\epsilon\upsilon$, to mold. The plastic surgery of the cervix uteri.

TRACHELORRHAPHY, n. $\text{Tra}^2\text{k}\text{-el}^1\text{-o-rh}^2\text{-a}^2\text{f}^1\text{-i}^2$. From tráxhlos , the neck, and $\rho\acute{\alpha}\phi\eta$, a stitching. Fr., *trachelorrhaphie*. See *HYSTERO-TRACHELORRHAPHY*.

TRACHELOS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-el}(\text{al})\text{'o}^2\text{s}$. Gr., tráxhlos . See *NECK*.

TRACHELO-SCAPULAIRE (Fr.), n. $\text{Tra}^2\text{-ka-lo-ska}^2\text{-pu}^2\text{-la}^2\text{r}$. See *ANGULARIS scapulae*.

TRACHÉLO-SOUS-OCCIPITAL (Fr.), adj. $\text{Tra}^2\text{-ka-lo-suz-o}^2\text{-k-se-pe-ta}^2\text{l}$. Cervico basilar; as a n., a muscle of the neck connected with the suboccipital region. [L.]—*T-s-o-o. grand*. See *RECTUS CAPITIS ANTERIOR MAJOR*.—*T-s-o-o. petit*. See *RECTUS CAPITIS ANTERIOR MINOR*.

TRACHELOSTROPHOSIS (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2\text{l}(\text{al})\text{'o}(\text{o})\text{-sturo}^2\text{-s'os}^2\text{f}^2\text{s}$. Gen., *-phos'eos (-is)*. From tráxhlos , the neck, and $\sigma\tau\acute{\rho}\phi\omicron\varsigma$, a twisting. Fr., *trachelostrophose*. Torsion of the neck. [L, 50 (a, 14).]

TRACHELOSUBOCCIPITALIS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-el}(\text{al})\text{'o}(\text{o})\text{-su}^2\text{b}(\text{sub})\text{-o}^2\text{k-si}^2\text{p}(\text{ki}^2\text{p})\text{-i}^2\text{st-al}^2\text{a}^2\text{l}^2\text{i}^2\text{s}$. From tráxhlos , the neck, *sub*, under, and *occiput* (q. v.). See *TRACHELO-OC-CIPITALIS*.

TRACHELOSUBSCAPULARIS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-el}(\text{al})\text{'o}(\text{o})\text{-su}^2\text{b}(\text{sub})\text{-ska}^2\text{p}(\text{ska}^2\text{p})\text{-u}^2\text{l}(\text{u}^2\text{l})\text{-ar}^2(\text{a}^2\text{r})\text{'i}^2\text{s}$. From tráxhlos , the neck, *sub*, under, and *scapula* (q. v.). Fr., *trachelo-sous-scapulaire*. See *ANGULARIS scapulae*.

TRACHELOMY, n. $\text{Tra}^2\text{k}\text{-el}^1\text{-o}^2\text{-t}^2\text{-om}^2\text{-i}^2$. From tráxhlos , the neck, and $\tau\omicron\mu\eta$, a cutting. 1. Decapitation. 2. The operation of enlarging the canal of the cervix uteri by incision.—*Uterine t*. See *T*. (2d def.).

TRACHELUS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-el}(\text{al})\text{'u}^2\text{s}(\text{u}^2\text{s})$. Gr., tráxhlos . See *NECK*.

TRACHENCHYMA (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2\text{n}^2\text{u}^2\text{m}^2\text{-k}^2\text{i}^2\text{m}^2\text{-}(\text{ch}^2\text{u}^2\text{m})\text{-a}^2$. Gen., *-ym'atos (-atis)*. From tráxhlos , rough, and $\epsilon\chi\chi\upsilon\mu\alpha$, an infusion. Tissue composed of tracheal cells. [a, 35.]

TRACHEOAEROCELE (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-a}^2\text{er}^2\text{-o}^2\text{-o}^2\text{-se}(\text{ka})\text{'le}(\text{la})\text{;}$ in Eng., $\text{tra}^2\text{k}\text{-e}^2\text{o}^2\text{-a}^2\text{-er}^2\text{-o}^2\text{-sel}$. Gen., *-cel'es*. From tráxhlos , the trachea, $\alpha\epsilon\rho$, air, and $\kappa\eta\lambda\eta$, a tumor. A tracheal diverticulum. [L, 50 (a, 14).]

TRACHEOBLENNORRHEA (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-ble}^2\text{n-no}^2\text{r-re}^2(\text{ro}^2\text{e}^2)\text{-a}^2$. For deriv., see *TRACHEA* and *BLENNORRHEA*. Fr., *trachéoblenorrhée*. Ger., *Luftröhrenschleimfluss*. Bleorrhoea of the trachea. [L, 50 (a, 14).]

TRACHEO-BRONCHIAL, adj. $\text{Tra}^2\text{k}\text{-e}^2\text{'o-bro}^2\text{n}^2\text{-k}^2\text{i}^2\text{e}^2\text{'l}$. From tráxhlos , the trachea, and $\beta\rho\acute{o}\chi\chi\omicron\varsigma$, a bronchus. Pertaining to the trachea and a bronchus. [L]

TRACHEOBRONCHITIS (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-bro}^2\text{n}^2\text{-k}^2\text{i}^2\text{ch}^2\text{'e}^2\text{is}$. Gen., *-it'idis (-idis)*. Fr., *trachéobronchite*. Inflammation of the trachea and bronchii. [a, 34.]

TRACHEOCLE (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-c}^2\text{'-(ka)'}\text{-le}(\text{la})\text{;}$ in Eng., $\text{tra}^2\text{k}\text{-e}^2\text{'o-sol}$. Gen., *-cel'es*. From tráxhlos , the trachea, and $\kappa\eta\lambda\eta$, a tumor. Fr., *trachéocèle*. 1. A hernial protrusion of the mucous membrane of the trachea through the cartilaginous structure, either between two of the rings or through a branchial fistula. 2. Goitre.

TRACHEOCHOLELOSIS (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-ko}^2\text{l}(\text{ch}^2\text{o}^2)\text{-os}^2\text{'i}^2\text{s}$. Gen., *-os'eos (-is)*. From tráxhlos , the trachea, and $\chi\acute{o}\lambda\omicron\varsigma$, bile. Fr., *trachéocholose*. Catarrh of the trachea, attributed to biliary derangement. [L, 50 (a, 14).]

TRACHEOCYNANCHE (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-si}^2\text{n}(\text{ku}^2\text{n})\text{-a}^2\text{n}^2\text{k}(\text{a}^2\text{n}^2\text{ch}^2)\text{'e}(\text{a})$. Gen., *-anch'es*. From tráxhlos , the trachea, and $\kappa\upsilon\text{ná}\chi\eta$, cynanche. Fr., *trachéocynanche*. See *TRACHEITIS*.

TRACHEO-LARYNGEAL, adj. $\text{Tra}^2\text{k}\text{'e-o-la}^2\text{r-i}^2\text{n}^2\text{'je}^2\text{-l}$. Fr., *trachéo-laryngien*. Pertaining to or involving the trachea and the larynx.

TRACHEOLARYNGOTOMY, n. $\text{Tra}^2\text{k}\text{-e}^2\text{'o-la}^2\text{r-i}^2\text{n}^2\text{-go}^2\text{t}^2\text{-om}^2\text{-i}^2$. See *LARYNGOTRACHEOTOMY*.

TRACHEO-CEPHAGEUS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-e}^2\text{is}(\text{e}^2\text{o}^2\text{-e}^2\text{s})\text{-o}^2\text{f}^2\text{-a}^2\text{l}^2(\text{a}^2\text{g})\text{'e}^2\text{-u}^2\text{s}(\text{u}^2\text{s})$. From tráxhlos , the trachea, and $\epsilon\epsilon\phi\acute{\alpha}\gamma\omicron\varsigma$, the gullet. A bundle of anomalous muscular fibres extending between the cesophagus and the trachea. [L, 332.]

TRACHEO-PHARYNGEUS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-fa}^2\text{r-i}^2\text{n}^2\text{-u}^2\text{n}^2\text{'je}^2\text{(ge}^2\text{z)-u}^2\text{s}(\text{u}^2\text{s})$. From tráxhlos , the trachea, and $\phi\acute{\alpha}\rho\upsilon\gamma\acute{\epsilon}$, the pharynx. An anomalous offshoot of the inferior constrictor of the pharynx inserted into the trachea. [L, 332.]

TRACHEOPHONY, n. $\text{Tra}^2\text{k}\text{-e}^2\text{'o}^2\text{-f}^2\text{'on}^2\text{-i}^2$. From tráxhlos , the trachea, and $\phi\acute{\omega}\nu\eta$, the voice. The sound heard on auscultation over the trachea (cf. *LARYNGOPHONY*). [D, 1.]

TRACHEOPHYMA (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-fim}(\text{fu}^2\text{m})\text{'a}^2$. Gen., *-phym'atos (-atis)*. From tráxhlos , the trachea, and $\phi\acute{\upsilon}\mu\alpha$, a growth. See *GOITRE*.

TRACHEOPLASTIK (Ger.), n. $\text{Tra}^2\text{ch}^2\text{-a-o-pla}^2\text{-st-ek}$. The plastic surgery of the trachea. [L, 197.]

TRACHEOPYOSIS (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-pi}^2\text{(pi}^2\text{u}^2)\text{'os}^2\text{'i}^2\text{s}$. Gen., *-os'eos (-is)*. From tráxhlos , the trachea, and $\pi\omega\acute{\upsilon}\sigma\iota\varsigma$, suppuration. Fr., *trachéopyose*. Purulent tracheitis. [L, 50 (a, 14).]

TRACHEOPYRA (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}^2\text{p}^2\text{-i}^2\text{-}(\text{u}^2\text{r})\text{-a}^2$. From tráxhlos , the trachea, and $\pi\acute{\upsilon}\rho$, fever. See *CYNANCHE trachealis*.

TRACHEORRHAGIA (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}^2\text{-ra}^2\text{(ra}^2\text{g})\text{'i}^2\text{-a}^2$. From tráxhlos , the trachea, and $\rho\acute{\eta}\gamma\gamma\upsilon\sigma\theta\alpha\iota$, to burst forth. Fr., *trachéorrhagie*. Ger., *Luftröhrenblutfluss*. Hemorrhage from the trachea. [L, 50 (a, 14).]

TRACHEOSCOPY, n. $\text{Tra}^2\text{k}\text{-e}^2\text{'o-sk}^2\text{'op}^2\text{-i}^2$. From tráxhlos , the trachea, and $\sigma\kappa\omicron\pi\epsilon\iota\text{r}$, to examine. Fr., *trachéoscopie*. Inspection of the trachea. [L, 87 (a, 50).]

TRACHEOSTENOSIS (Lat.), n. f. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-ste}^2\text{-o-s}^2\text{'i}^2\text{s}$. Gen., *-os'eos (-is)*. From tráxhlos , the trachea, and $\sigma\tau\epsilon\upsilon\sigma\iota\varsigma$, stenosis. Fr., *trachéosténose*, *trachéosténose*. Ger., *Tracheostenose*. Morbid constriction of the trachea. [E.]

TRACHEOTOME, n. $\text{Tra}^2\text{k}\text{'e-o-tom}$. From tráxhlos , the trachea, and $\tau\acute{\epsilon}\mu\epsilon\upsilon\omicron$, to cut. Fr., *trachéotome*. Ger., *Halsschnittzette*. An instrument for opening the trachea in tracheotomy. Langenbeck's t. is a double hook with a cutting edge, separating by the pressure of the thumb on one handle, and closing with a wire spring. Pithe's t. and dilator is an instrument shaped like a forceps, with cutting surfaces on the back of the points. Hanks's t. is a sharp trocar working in an ordinary tracheotomy tube for a cannula. [E.]—*Mandrin t*. An instrument invented by Philippeaux, consisting of a steel shaft having the length and curve of the ordinary tracheal cannula, into which it passes. At each end the shaft is much thicker and accurately fits the cannula, having three or four longitudinal grooves for the passage of air. The distal end of the shaft projects beyond the end of the tube and is wedge-shaped, with a cutting edge. [Philippeaux, "Ann. de gyn.", Apr., 1883 (E).]

TRACHEOTOMY, n. $\text{Tra}^2\text{k}\text{-e}^2\text{'o-t'om}^2\text{-i}^2$. From tráxhlos , the trachea, and $\tau\omicron\mu\eta$, a cutting. Lat., *tracheotomia*. Fr., *trachéotomie*. Ger., *Luftröhrenschnitt*, *Tracheotomie*. The operation of making an opening into the trachea. [E.]—*Inferior t*. Lat., *tracheotomia inferior*. T. in which the incision is made below the thyroid gland. [a, 34.]—*Superior t*. Lat., *tracheotomia superior*. T. in which the incision is made above the isthmus of the thyroid gland. [a, 34.]

TRACHEOTYPHUS (Lat.), n. m. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-e}^2(\text{a})\text{'o}(\text{o})\text{-t}^2\text{if}^2\text{(n}^2\text{f})\text{'u}^2\text{s}(\text{u}^2\text{s})$. From tráxhlos , the trachea, and $\tau\acute{\upsilon}\phi\omicron\varsigma$, typhus. Of Eisenmann, malignant angina. [L, 50 (a, 14).]

TRACHOMA (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-om}^2\text{'a}^2$. Gen., *-om'atos (-atis)*. Gr., tráxhoma (from tráxhlos , rough). Fr., *t. trachome*. Ger., *Trachom*, *Trakom*, *Augenliderkätze*. An old name for granular conjunctivitis. It is characterized by slowly progressive changes in the conjunctiva of the eyelids, which becomes thickened, vascular, and roughened by firm elevations. The change begins in the follicular structure of the conjunctiva, extending to the papillae and submucous tissue of both lids, and giving rise here to the growth of much new tissue. The disease is first shown by the presence of round, pale, semi-transparent bodies like grains of boiled sago, sometimes looking like vesicles. The conjunctiva does not ulcerate, and the prominences are not real granulations. [F.]—*Follicular t*. Chiefly affecting the Meibomian glands, and associated with the presence of *Neisseria rebellis* (q. v.). [a, 17.]—*T. carunculosum*. Ger., *warzige Augenliderunruheit*. An old term for a so-called variety of t. in which fleshy excrescences are met with in the conjunctiva. [F.]—*T. diffusum*. An affection of the conjunctiva in which the submucous tarsal regions of the conjunctiva, especially near the canthi, are changed into gray or grayish-yellow brawny masses from infiltration of the tissue with lymphoid cells and proliferation of the connective-tissue elements. [F.]—*T. herpeticum*. An old term for an affection of the conjunctiva in which pustules or vesicles are found on the inner surface of the eyelids. [F.]—*T. mixtum*. Granular conjunctivitis with secondary inflammation of the surrounding tissue. [F.]—*T. pseudodermum*. Of Farnowsky, a chronic granular inflammation of the vulva. ["Cribi. f. Gyn.", May 28, 1887, p. 860 (a, 34).]—*T. sabulosum*. An old term for t., so called from being characterized by a sensation as of sand beneath the lids. [F.]

TRACHOMATICON (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-o}^2\text{m}(\text{om})\text{-a}^2\text{t}^2\text{(a}^2\text{t})\text{'i}^2\text{k-o}^2\text{n}$. Gr., tráxhomatikon (from tráxhoma , roughness). Of Galen, a collyrium. [L, 50 (a, 14).]

TRÁCHTIG (Ger.), adj. $\text{Tra}^2\text{ch}^2\text{'t}^2\text{i}^2\text{g}$. See *PREGNANT*.—*T'keit*. See *GESTATION*.

TRACHYLOBIUM (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-i}^2\text{(u}^2\text{e})\text{-lob}(\text{lo}^2\text{b})\text{'-i}^2\text{-u}^2\text{m}(\text{u}^2\text{m})$. From tráxhys , rough, and $\lambda\omicron\beta\omicron\varsigma$, a pod. Fr., *trachylobe*. Ger., *Rauhhihle*. A genus of leguminous trees. [a, 35.]—*T. courbaril*. See *HYMENÆA courbaril*.

TRACHYSMA (Lat.), n. n. $\text{Tra}^2\text{k}(\text{tra}^2\text{ch}^2)\text{-i}^2\text{z}^2(\text{u}^2\text{s})\text{'ma}^2$. Gen., *-ys'matos (-atis)*. Gr., tráxhsma (from tráxhys , rough). See *TRACHOMA*.

TRACT, n. $\text{Tra}^2\text{k}^2\text{t}$. Lat., *tractus*. Fr., *tractus*, *cordon*. Ger., *Tractus*, *Bahn*, *Strang*. An extent of surface, usually of considerable length as compared with its breadth. [a, 48.]—*Aberrant t. of the lateral column*. Of Monakow, a t. originating in the peripheral portion of the lateral column, lying against the corpus trapezoides, between the facial nucleus and the ascending root of the fifth nerve, and finally passing over into the fillet. [a, 34.]—*Anterior cerebro-pontine t*. A t. of internal (mesial) fibres of the crus cerebri extending from the anterior part of the frontal lobe to the pons. [a, 34.]—*Anterior cortical t*. Bundles of fibres from the cortex of the frontal lobe running to the ganglion cells of the pons varolii. [a, 34.]—*Anterior fundamental t*. The anterior fundamental fasciculi of the anterior column of the spinal cord. [a, 34.]—*Anterior pyramidal t*. The longitudinal bundles of nerve-fibres in the ventral half of the pons which represent the prolongation of the anterior pyramids of the medulla oblongata. [I, 29 (K).]—*Anterolateral descending t*. A few long fibres, scattered in the anterior and lateral ground bundles of

the spinal cord. [a, 34].—**Ascending antero-lateral t.** See *Gowers's t.*—**Basal longitudinal t.** A t. of fibres extending along the outer wall of the posterior and inferior horns of the lateral ventricle, apparently connecting the occipital and temporal lobes. [a, 34].—**Basirrhinal t.** The olfactory t. in the marsupials. [1, 14 (K)].—**Bechterew's t.** See *Tegmental t.*—**Bulbar t.** Ger., *Nervenkerntractus*. One of the t's of fibres occupying the bulb. [a, 34].—**Central medullary t.** The gray matter in the spinal cord which immediately surrounds the central canal. [1, 14 (K)].—**Central vagus t.** A t. of fibres passing from the layer of the fillet to the nucleus of the vagus of the opposite side. [a, 34].—**Cerebellar t.** See *Kleinhirnschneckenstrangbahn*.—**Cerebello-olivary t.** A t. supposed by Meynert to be a continuation of the fibres of the posterior column of the spinal cord, passing through the olivary body and reaching the cerebellum through the restiform body. Edinger thinks it arises from the outer side of the floculus. [a, 34].—**Cerebro-pontine t.** A t. of fibres starting from the brain cortex and passing through the internal capsule and the upper part of the cerebral peduncles to the pons. [a, 34].—**Comma-shaped t.** A t. shaped like a comma, observed in descending degeneration in the middle of the anterior third of the dorsal spinal cord. [a, 34].—**Commissural t.** Of Owen, the cerebellar peduncles. [1, 14 (K)].—**Communicating quintus t.** Ger., *Quintusstrang*. A t. of fibres derived from the motor root of the fifth nerve, which at first surrounds the upper part of the Sylvian aqueduct, and then widens, the fibres radiating through the tegmentum, and a portion of them curving around the lower border of the red nucleus as the *fibre arcuata*. This t. is brought into connection with the motor t's of fibres through the agency of intervening multipolar ganglion cells. [1, 31 (K)].—**Conario-hypophyseal t.** Of Owen, the sympathetic plexus through the pituitary body, the infundibulum, the third ventricle, and the epiphysis cerebri. [A, 5].—**Crossed thalamo-tegmental t.** A t. of fibres connecting the thalamus with the spinal cord by way of the tegmentum. [E. C. Spitzka, "Boston Med. and Surg. Jour." Apr. 16, 1885, p. 385 (a, 34)].—**Dendritic t's.** T's of fibres that arise from all parts of the cerebral cortex, diverging from each other like the limbs of a tree, and pass into the white substance. [a, 34].—**Digestive t.** Ger., *Digestivtractus*. The alimentary canal. [a, 34].—**Direct cerebellar t.** See *Kleinhirnschneckenstrangbahn*.—**Direct lateral cerebellar t.** A t. of nerve-fibres situated in the lateral column of the spinal cord, between the lateral pyramidal t. and the external surface. It appears at the level of the second or third lumbar nerve as a narrow area, which extends as it ascends. It may be traced through the medulla oblongata and restiform body into the cerebellum. [1, 15 (K)].—**Direct melo-cerebellar t.** See *Kleinhirnschneckenstrangbahn*.—**Direct t.** A bundle of nerve-fibres in the antero-median column of the spinal cord which may be traced upward in the crura as far as the point where the crus cerebri is crossed by the optic t. [1, 1 (K)].—**Fillet t.** A t. that emerges from the fillet and may be found on the upper and outer side of the nucleus ruber in its course to the cortex of the upper part of the parietal lobe by way of the internal capsule. [a, 34].—**First projection t.** Of Meynert, the corona radiata. [a, 34].—**Formative t.** Of Owen, the formative and commissural t's of the cerebellum described as two different bundles of nerve-fibres which unite to form the peduncles. [1, 14].—**Frontal pontine t.** See *Anterior cerebro pontine t.*—**Frontal t.** Of Owen, the frontal lobe of the brain. [1, 14 (K)].—**Fronto-cerebellar t.** A t. of white fibres connecting the frontal lobe of the cerebrum with the cerebellum. [a, 34].—**Funicular t's.** See *Funiculi graciles cerebelli*.—**Ganglionic association t.** Association fibres connecting different cerebral ganglia. [a, 34].—**Genal t.** See *GNA-THOGRAMMA*.—**Geniculate t.** See *FAISSEAU geniculé*.—**Genito-urinary t.** The genito-urinary apparatus. [a, 34].—**Goll's t.** A t. in the posterior column of the spinal cord, which may be traced only as far as the middle of the dorsal region. [1, 15 (K)].—**Gowers's t.** A t. formed of fibres derived from the posterior roots that, having crossed in the posterior commissure and been interrupted in nerve-cells, collect in the lateral column to pursue a cerebral course. One portion of the fibres, it is stated, disappears in the upper cervical cord, and another portion ends in the nucleus lateralis of the medulla oblongata. [a, 34].—**Habenula t.** A leaving the habenula and passing toward the base of the brain, running between the central gray lining and the substance of the thalamus and appearing to end on the mesial side of the red nucleus. [a, 34].—**Indirect t.** A bundle of nerve-fibres in the lateral column of the spinal cord which joins the direct t. near the posterior edge of the crus cerebri. The two t's are united. [1, 1 (K)].—**Intellectual t.** See *Fronto-cerebellar t.*—**Intermediary lateral t.** *Intermedio-lateral t.* Fr., *colonne intermédiaire*. A pyramidal t. of nerve-fibres in the posterior portion of the spinal cord, midway between the anterior and posterior gray columns and in front of the reticular process. [1, 1, 6 (K)].—**Internodal t's.** Of Spitzka, the t's of fibres extending from the mid of the third, fourth, and sixth cranial nerves. [a, 34].—**Intervolvary t.** A t. of arcuate fibres extending from the nuclei of the posterior columns ventrally toward the middle line; it terminates on the dorsal side of the pyramids in the opposite intervolvary region or fillet layer. [a, 34].—**Intestinal t.** The large and small intestine. [a, 34].—**Lateral cerebellar t.** *Lateral longitudinal t.* See *Lateral t. of the cerebellum*. [a, 34].—**Lateral t. of the medulla oblongata of the cerebellum.** A t. receiving its fibres from the direction of Clarke's vesicular column, at the medulla inclining obliquely toward the dorsal surface, across the ascending root of the fifth nerve, the other fibres of the inferior cerebellar peduncle gradually applying themselves to it, and the t. terminating in the vermis. It is a centripetal conducting system connecting the posterior roots and the cerebellum. [a, 34].—**Lateral t. of the medulla oblongata.** The continuation in the medulla oblongata of the lateral t. of the spinal cord. [a, 34].—**Lemniscus t.** Ger., *Schleifenbündel*. A

bundle of nerve-fibres which begins in the upper part of the pons Varoli, below the reticular formation, and separates into three portions (the superior, median and inferior lemnisci). [1, 15 (K)].—**Lissauer's t.** A small t. of fibres at the junction of the tip of the posterior horn and lateral column; the fibres come from the posterior roots, course upward for a short distance, and then enter the posterior horn. [a, 34].—**Lymphangeal t's.** See *Lymphatic nodules*.—**Medial t.** A portion of the cerebral hemisphere in *Carnivora* adjoining the great longitudinal fissure, marked off by the posterior limb of the Sylvian fissure and other sulci which are continuous with or parallel to it. [1, 14 (K)].—**Motor t.** Ger., *motorisches Feld*. The motor path from the cortex of the brain to a muscle. It consists of an upper (cerebro-spinal) and a lower (spino-muscular) segment. The former consists of the t. of fibres from the brain cortex that end in the gray substance of the spinal cord, and the lower of the spinal motor cell and the fibres proceeding from this through the anterior root and nerve trunk to the muscle. [a, 34].—**Myelo-cerebellar t.** See *Kleinhirnschneckenstrangbahn*.—**Myelonal t.** Of Owen, one of the separate columns of the spinal cord. [1, 14 (K)].—**Nuclear t. of the spinal cord.** Ger., *Kernstrang*. See *Goll's t.*—**Olfactory t.** The bundle of fibres forming the olfactory nerve. [a, 34].—**Olivary t.** See *Olivary body*.—**Ophthalmic t.** *Optic t.* The continuation of the optic nerve from the optic chiasm backward to its point of connection with the brain each optic t. divides into two bands which are continued into the optic thalami, the corpora geniculata, and the corpora quadrigemina. The fibres of origin from the thalamus arise partly from its surface and partly from its interior. Thence the t. winds obliquely across the lower surface of the crus cerebri, in the form of a flattened band destitute of neurilemma, and is attached by the posterior limb of the anterior margin to its point forward it receives fibres from the tuber cinereum and lamina cinerea. It is also connected with the tenia semicircularis and the anterior termination of the gyrus fornicatus. It finally joins with the t. of the opposite side to form the commissure. [F.]—**Peduncular t.** A t. of nerve-fibres in the crus cerebri. [Science, Jan. 15, 1881, p. 14 (K)].—**Posterior cortical t.** Of Edinger, bundles of fibres running upward in the cortex of the occipital lobe and passing into the ganglion cells of the pons varoli. [a, 34].—**Postfrontal t.** The region of the frontal lobe, in *Carnivora*, immediately behind the frontal fissure. [1, 14 (K)].—**Postpyramidal t.** See *Posterior pyramid*.—**Postrestiform t.** See *Lateral column*.—**Prefrontal t.** The portion of the frontal lobe, in *Carnivora*, lying in front of the frontal fissure. [1, 14 (K)].—**Prepyramidal t.** See *Anterior pyramid*.—**Principal t.** of the spinal cord. Ger., *vordere Hauptbahn*. Of Flechsig, that portion of the anterior column of the spinal cord which does not belong to the anterior pyramidal t. Quain suggests that it may serve to "connect the gray matter of different segments of the cord." [1, 15 (K)].—**Pyramidal t.** A collection of nerve-fibres in the spinal cord which may be traced from the point of origin of the lower sacral nerves upward in the posterior part of the lateral column to the lower part of the medulla oblongata, where they cross to the opposite side, enter the pyramid, and may be followed through it and the pons to the corresponding crus cerebri. Many of the fibres do not decussate, but run throughout their course in the anterior pyramidal t. [1, 15 (K)].—**Quintus t.** Of Meynert, a t. of fibres that crosses in the dorsal segment of the rhaphe, comes from the root of the fifth nerve, sweeps in a fine curve around the outer side of the descending root of the fifth nerve, curls in beneath the posterior longitudinal bundle, and so traverses the tegmentum toward the middle line. It was formerly supposed that the t. originated in the cells of the descending root of the fifth nerve. [a, 34].—**Respiratory t.** The respiratory organs. [J.] See also *AIR-PASSAGES*.—**Restiform t.** See *Restiform body*.—**Sagittal medullary t.** The t. of fibres in the medulla oblongata, the anterior limb of the internal capsule, skirts the outer side of the posterior horn of the lateral ventricle, and runs to the cortex of the hinder portion of the cerebrum. [a, 34].—**Second projection t.** Of Meynert, the t. of fibres extending from the basal ganglia to the gray matter surrounding the central cavities in the peduncular system. [a, 34].—**Semilunar t.** A crescentic t. of fibres in the external portion of the cerebellar hemisphere. [a, 34].—**Sensory t.** Fr., *portion sensitive*. A t. of fibres that conducts sensations from without to the brain. Those portions of the cord conducting different varieties of sensation, as well as those portions of the brain that are the centres for these varieties, have not yet been positively determined. [a, 34].—**Speech t.** A t. of fibres passing from the cortex of the third frontal convolution through the white substance outside the tail of the nucleus and crossing the midline in the nuclei of the nerves in the oblongata that are associated in producing speech. [a, 34].—**Spiral t.** See *Lamina cribrosa anterior inferior*.—**Sylvian t.** The region of the brain around the fissure of Sylvius. [1, 14 (K)].—**Tegmental t.** A medullary t. occupying a position in the midst of the tegmentum dorsad of the olivary body and in the vicinity of the posterior accessory olivary nucleus. It probably connects the olivary body with the spinal cord. [a, 34].—**Temporo-occipital t. of the crura.** A t. of fibres on the outer side of the crura that pass under the lenticular nucleus, or between the latter and the external geniculate body, to the temporal and the occipital lobes. [a, 34].—**Tertiary projection t's.** Of Meynert, the peripheral nerves that have their origin in the gray matter bordering the cavities from the aqueduct of Sylvius down to the end of the spinal cord. [a, 34].—**Tenial t.** The t. of the crus. Certain bundles of nerve-fibres which pursue a similar course in the cord, and appear to have similar functions. [1, 15 (K)].—**Teretial t's.** See *FASCICULI teretes*.—**Transverse peduncular t.** Of Gudden, a delicate lamina of gray matter extending on each side laterally from the anterior pair of corpora quadrigemina, crossing over the internal geniculate body, and passing around the corresponding crus cerebri to unite with the tenia semicircularis or to enter the crus. It is found only exceptionally in man. [1, 6 (K)].—**Arch. f. Psych.** "ii, p. 364 (K)].—**Uro-genital t.** See *Genito-urinary t.*

Uveal t. See **UYEA**.—**Voluntary motor t.** The entire t. of fibres from the cortex cerebri to the anterior horns. [a, 34.]

TRACTION, n. Tra'k/shu'n. From *trahere*, to draw. Fr., t. Ger., Zug, T. The act or process of drawing. [a, 48.]—**Axis-t.** Ger., *Axen traction*. T. in a line with the direction of the channel through which a body (e. g., the fetus) is to be drawn.—**Elastic t.** T. by an elastic force.—**Elastic t. of the lung.** See **ELASTIC TENSION** of the lung.

TRACTOR, n. Tra'k't'r. From *trahere*, to draw. 1. An apparatus for making traction, especially a vectis. 2. See under **PERKINS**.—**Air-t.** Ger., *Luftzieher*. A suction t. devised by Sir J. Y. Simpson for extracting the fetus; used by him also for elevating depressed bones of the new-born infant's skull. Its construction was like that of a breast-pump, and its cup was covered with wire gauze and thin sponge or flannel, to prevent injury to the scalp. Simpson applied it to the breech also. [A, 69.]—**Lever-t.** An instrument devised by Levis for reducing dislocations of the phalanges. It consists of a piece of board perforated at one end so that the distal phalanx may be laid upon it and strapped to it. When firmly fastened, the board gives increased power both in leverage and in traction. [E.]—**Metallic t.'s**, Perkins's t.'s. See under **PERKINS**.—**Poulet's t.** A traction apparatus to be used either with the obstetrical forceps or with the sericeps (q. v.). [A, 15.]

TRACTUS (Lat.), n. m. Tra'k't(tra'k't)'u's(u's). See **TRACT**.—**T. alimentarius.** See **ALIMENTARY CANAL**.—**T. arteriosus anterior.** The tract of the anterior median artery of the spinal cord. [a, 34.]—**T. arteriosus postero-laterales.** The tract of the postero-lateral arteries of the spinal cord. [a, 34.]—**T. ethmoides.** See **GYRUS rectus**.—**T. genalis.** See **GNATHOGRAMMA**.—**T. gris** (Fr.). See **FASCICULI teretes**.—**T. longitudinalis.** See **STRIAE longitudinales mediales**.—**T. longitudinalis de Lancisi.** See **STRIAE longitudinales Lancisi**.—**T. lymphaticus jugularis.** The system of lymphatic vessels accompanying the jugular vein from the brain to the cervical ganglia. [a, 34.]—**T. medullaris glandulae pinealis.** The peduncle of the pineal gland. [I, 3 (K).]—**T. medullaris transversus.** See **INCREMENTA fibrosa**.—**T. motorius.** See **MOTOR TRACT**.—**T. nervi optici.** See **OPTIC TRACT**.—**T. olfactorius.** See **OLFACTORY TRACT**.—**T. parietalis anterior.** See **Ascending frontal convolution**.—**T. parietalis medius.** See **Ascending parietal convolution**.—**T. peduncularis.** See **Peduncular TRACT**.—**T. peduncularis transversus.** See **Transverse peduncular TRACT**.—**T. rhinalis** (Wilder). See **OLFACTORY TRACT**.—**T. semicircularis.** See **Semilunar TRACT**.—**T. solitarius.** The descending fibres of a posterior spinal nerve-root. [a, 34.]—**T. spiralis foraminulatus.** A spot in the fossa cochleae of the internal auditory meatus, at the base of the cochlea, in which may be seen the spirally arranged orifices (for the entrance of the fibres of the cochlear nerve) which open into the fossula inferior. [Fr, 32, 46 (a, 29).]—**T. supracallosus.** See **Marginal convolution**.—**T. supracallosus inferior.** See **GYRUS fornicatus**.—**T. supracallosus superior.** See **Marginal convolution**.

TRADESCANTIA (Lat.), n. f. Tra'd(tra'd)-e's-ka'n(ka'n)'shi'k(t'i')a's. From *Tradescantia*, gardener to Charles I of England. Fr., *tradescantie*. Spiderwort; a genus of the *Tradescantieae* (a tribe of the *Commelinaceae*). [a, 35.]—**T. axillaris.** A Malabar species, used externally in ascites. [a, 35.]—**T. diuretica.** A diuretic and emollient Brazilian species. [a, 35.]—**T. malabarica.** Grass-leaved spiderwort. In India its herbage, cooked in oil, is used in leprosy, ringworm, etc. [a, 35.]—**T. virginica.** Fr., *tradescantie de Virginie*, *éphénère*, *éphémère*, *fleur d'un jour*, *moly de Virginie*. A sweet-of-day, Virginian spiderwort; used in Jamaica for the bites of venomous spiders. [a, 35.]

TRAGACANTH, n. Tra'g'a'-ka'nth. From *τραγάκανθα*, a plant producing t. Lat., *tragacantha*, *tragacanthum*, *gummi tragacantha* (seu *tragacanthum*) (Belg. Ph.), *tragacantha gummi* (Gr. Ph.). Ger., *Tragant*, *Traganth*. The concrete exuded juice of various species of *Astragalus*, occurring in whitish, reddish, or yellowish pieces of various shapes, brittle and hard, odorless and almost tasteless. It swells up in water without dissolving, forming a viscous mass. It contains two principal constituents, tragacanthin (q. v.) and a substance resembling arabin and soluble in water. T. is demulcent, but is chiefly used for imparting firmness to troches, etc., and for suspending heavy powders in mixtures. [B, 10, a, 35.]—**Black t.** The inferior varieties of t., containing bark, earth, etc. [B, 15, a, 35.]—**False t.** A gum probably identical with Caramania gum. [B, 5 (a, 21).]—**Flake t.** The most valuable variety of t., occurring in thin, whitish, foliate pieces or flakes, from 1 to 4 inches long. [B, 15.]—**Gum t.** See **T.—Hogwood t.** See **Bassora gum**.—**Senegal t.** The gum of *Sterculia tragacantha*. [a, 35.]—**Smyrna t.** Ger., *Smyrnatraganth*, *Blät-tertraganth*. T. imported from Smyrna. It is whitish, and consists of somewhat large, thin, flat or (rarely) vermiform pieces. [a, 35.]—**Syracusan variety of t.** obtained from Persia and Kurdistan. [B, 15.]—**Vermicelli t.** T. occurring in more or less contorted, vermiform pieces. [a, 35.]

TRAGACANTHA (Lat.), n. f. Tra'g'a(tra'g)-a'k(a'k)-a'nth(a'nth)'a's. See **TRAGACANTH**.—**Glycerinum tragacanthae** (Br. Ph.). A preparation made by triturating a transparent, homogeneous jelly 3 parts of powdered tragacanth, 15 of glycerin, and 2 of water. The Ger. Ph., Finn. Ph., and Hung. Ph. (2d ed.) have a similar preparation made of 1 part of tragacanth, 5 parts of alcohol, and 50 (49 [Hung. Ph.]) of glycerin. [B, 95 (a, 38).]—**Gummi t.** (seu *tragacanthae*). See **TRAGACANTH**.—**Mucilago eum gummi t.** (Fr. Cod.). **Mucilago (gummi)** (Belg. Ph., Gr. Ph.) *tragacanthae* [U. S. Ph., Br. Ph., Netherl. Ph., Russ. Ph.]. Fr., *mucilage de gomme adragante* [Fr. Cod.]. Ger., *Tragant schleim*. A tenacious, viscous mass formed by mixing tragacanth with water. The U. S. preparation contains 6 parts of tragacanth, 18 of glycerin, and water up to 100. The Br. Ph. directs that 12 parts of tragacanth be triturated with 22 fluid parts of alcohol, and 875 parts of water

stirred in. The Fr. preparation contains 9, the Netherl. 12, the Gr. 80, and the Belg. 824 parts of water to 1 part of tragacanth. The Russ. Ph. orders 48 parts of boiling water to 1 part of tragacanth if the mucilage is to be used for troches, otherwise 480 parts of water to 4 of tragacanth and 1 part of gum arabic. The Belg. Ph. has also a *mucilago spissa*, containing 86 parts of tragacanth with water up to 1,000. [B, 95 (a, 38).]—**Pulvis tragacanthae compositus** (Br. Ph.). Fr., *poudre mucilagineuse* (ou *de gomme adragante composée*). A preparation consisting of 1 part each of tragacanth, gum arabic, and starch, and 3 parts of sugar. Various old ph's had similar preparations, sometimes containing other substances, such as licorice, marsh-mallow, poppy seeds, oil of rose, etc. [B, 95, 119 (a, 38).]—**Tragacanthae gummi.** See **TRAGACANTH**.—**T. electa.** Selected tragacanth. [a, 35.]—**T. in sortis.** Common tragacanth, containing brownish and whitish pieces and flake and vermicelli t. [a, 35.]—**T. massiliensis.** See **ASTRAGALUS massiliensis**.—**T. media.** See **T. in sortis**.—**T. pulverata.** Selected and purified tragacanth, crushed, dried at 40° C., reduced to a white powder, and sifted through a No. 100 silk sieve [Fr. Cod.] (a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]

TRAGACANTHIN, n. Tra'g'a'-ka'nth'in. Ger., T., *Tragacanthstoff*. A proximate principle existing in tragacanth; a vegetable mucilage insoluble in water, thought to be identical with bassorin, but regarded by some as distinct. [B, 5, 10.]

TRAGACANTHUM (Lat.), n. n. Tra'g(tra'g)-a'k(a'k)-a'nth(a'nth)'u'm(u'm). See **TRAGACANTH**.

TRAGANT (Ger.), **TRAGANTH** (Ger.), n's. Tra'g-a'snt'. See **TRAGACANTH** and **ASTRAGALUS** (5th def.).—**Bäckerf.** See *Smyrnia TRAGACANTH*.—**T'schleim.** See *Mucilago TRAGACANTHAE*.—**T'stoff.** See *TRAGACANTHIN*.—**T'wurzel.** The root of *Astragalus escapus*. [a, 35.]

TRAGANTHIN, n. Tra'g-a'nth'in. See **TRAGACANTHIN**.

TRAGBAHRE (Ger.), n. Tra'g'ba'r'e's. See **Hand-LITTER**.

TRAGBAND (Ger.), n. Tra'g'ba'nd. A sling, a truss. [a, 48.]

TRAGBAR (Ger.), adj. Tra'g'ba'r. 1. Portable. 2. Fertile, also pregnant. [A, 315 (a, 48).]

TRAGBEUTEL (Ger.), n. Tra'g'boit'e'l. A suspensory bandage for the scrotum. [a, 14.]

TRAGBINDE (Ger.), n. Tra'g'bi'nd'e's. See **Suspensory BANDAGE**.

TRAGEA (Lat.), n. f. Traj(tra'g)-e'a's. Gr., *τραγέα* (from *τράγειν*, to eat). A stomachic powder. [L, 50 (a, 14).]—**T. aromatica Gabelcheverli.** A powder of 40 parts of cinnamon, 20 each of red and white sandal-wood and ginger, 9 each of cloves, smaller galangal, mace, nutmeg, and grana Paradisi, and 2,400 of white sugar. [B, 119 (a, 34).]—**T. aromatica officinalis.** A powder of 30 parts of cinnamon, 11 each of cloves, ginger, and nutmeg, 7 of mace, 15 of red sandal-wood, and 900 of sugar. [B, 119 (a, 38).]

TRACEMA (Lat.), n. n. Tra'j(tra'g)-e'm(am)'a's. Gen., *em'atos* (-atis). Gr., *τράγμα* (from *τράγειν*, to eat). A sweetmeat (cf. *Dragee*). [A, 311 (a, 48).]

TRÄGER (Ger.), n. Tra'g'e'r. A bearer or holder; of Selenka, the trophodisc or trophoblast; in compos, the atlas.

TRÄGERIN (Ger.), n. Tra'g'e'r'in. A pregnant woman.

TRÄGHEIT (Ger.), n. Tra'g'hait. See **INERTIA**.—**Heizt.** See **LEXTOR cordis**.—**T. der Gebärmutter.** See **UTERINE INERTIA**.—**T. der Muskeln.** See **MYONAROSIS**.

TRAGIA (Lat.), n. f. Traj(tra'g)-i'a's. From *Tragus*, the Latinized name of H. Boek, a German botanist. Fr., t., *tragie*. A genus of the *Euphorbiaceae*. [a, 35.]—**T. cannabina.** Fr., *t. à feuilles de chanvre*. An Indian shrub. The root is diaphoretic, diuretic, febrifuge, and alterative. [a, 35.]—**T. chamaelea.** Fr., t., *chaméléa*. A species used in various cachexiae. The juice is diuretic, and, mixed with wine or oil, is used as an astringent and tonic. [a, 35.]—**T. involucreta.** A species the root of which is used as an alterative and diuretic, and its juice in fever and itch. [a, 35.]—**T. mercurialis.** A species the root of which is used in chronic syphilis, etc. [a, 35.]—**T. urens.** Fr., *liane brillante*. A variety of *T. cannabina*. [a, 35.]—**T. volubilis.** Twinning cowitch; a West Indian species. The root is laxative and diuretic, and the juice, mixed with sea-salt, is used in frambosia. [a, 35.]

TRAGICUS (Lat.), adj. Tra'j(tra'g)-i'k-n's(u's). From *tragus* (q. v.). Pertaining to the tragus; as a n. m., a short, flattened muscle on the outer surface of the tragus. [F, 31.]

TRÄGIG (Ger.), adj. Tra'g'ig. See **PREGNANT**.

TRAGOMASCHALIA (Lat.), n. Tra'g(tra'g)-o(o's)-ma'sk(-ma'sch)-a'al(a'i')z'a's. From *τράγος*, a goat, and *μασχάλη*, the armpit. See **HIRCUS alarum**.

TRAGOPHONIA (Lat.), n. f. Tra'g(tra'g)-o(o's)-fon'i'a's. From *τράγος*, a goat, and *φωνή*, the voice. See **ÆGOPHONY**.

TRAGOPODIA (Lat.), n. f. Tra'g(tra'g)-o(o's)-pod(po'd)'i'a's. From *τράγος*, a goat, and *πῶς*, the foot. See **GENU valgum**.

TRAGOPOGON (Lat.), n. m. and n. Tra'g(tra'g)-o(o's)-pog'o'o(n). Gen., *on'o'a'* (-o'i'). From *τράγος*, a goat, and *πῶγος*, a beard. Fr., *salsifis*. Ger., *Bocksbart*, *Geissbart*. A genus of the *Tragopogoneae*, which are a subtribe of the *Cichoraceae*. [a, 35.]—**T. major.** Ger., *grosser Bocksbart*. The larger goat's-beard of Europe. The root contains a bitter juice, and is perhaps more active than those of other species of T. [a, 35.]—**T. porrifolius.** Fr., *cervicif à feuilles de poiréau*, *barbebon*, *salsifis blanc* (ou *des jardins*). Ger., *lauchblättriger Bocksbart*. Star-of-Jerusalem, vegetable oyster, salsify, purple goat's-beard, the *τραγοπόγων* of Dioscorides; a species found in Europe and Asia, cultivated for its edible root, *radix tragopogonis* (seu *tragopogi*, seu *barba hirci*, seu *barbula hirci*), which is mucilaginous and bitter, and is used like that of *T. pratensis*. [a, 35.]—**T. pratense,**

T. pratensis. Fr., *cercifis des prés* (ou sauvage), *thalibeu, ratibout, cochet, barbe de bouc*. Ger., *Wiesenbockbart, wilde Haferwurzel* (oder *Scorzonere*), *Josephblume, Habermerkwurzel*. Go-to-bed-at-noon, noon-tide, shepherd's-clock, yellow (or meadow) goat's-beard of Europe. The bitter, mucilaginous, mildly aperient root, *radix tragopogonis* (seu *tragopogon*, seu *barbe hirci*, seu *barbulus hirci*, seu *scorzonera silvestris*), is used like that of *Taraxacum officinale*. [a, 35.]

TRAGOPUS (Lat.), adj. Tra^g(tra^g/'o/p-u^s(u)s). Gr., τραγόπους (from *tragos*, a goat, and *pous*, the foot). Fr., *tragope*. Ger., *bocksfüssig*. Knock-kneed. [L, 50 (a, 14).]

TRAGOSELINUM (Lat.), n. n. Tra^g(tra^g/'o(o)-se^l-in(en)/u^m(u)m). From *tragos*, a goat, and *selinus*, parsley. Fr., *trago-selin*. 1. A genus of the *Umbelliferae*. [a, 35.] 2. See *PIMPINELLA saxifraga*. — **T. angelica.** See *ÆGOPODIUM podagaria*. — **T. magnum.** See *PIMPINELLA magna*. — **T. saxifraga.** See *PIMPINELLA saxifraga*.

TRAG-SITZ (Ger.), n. Tra^g/'zi^ts. See BEARING-SEAT.

TRAGULINA (Lat.), n. n. pl. Tra^g(tra^g/'u(l)-in(en)/a². From *tragos*, a goat. A family of deer-like ruminants, the chevrotains. [a, 48.]

TRAGUS (Lat.), n. m. Tra^g(tra^g/'u(s)(u)s). Gr., τράγος. Fr., *t. Ger., Bock* (1st def.), *Orhbeck* (1st def.). 1. A nipple-like projection of the cartilage of the auricle, directed backward and in front of the orifice of the external auditory canal. [F.] 2. See *HIRCUS* (2d def.). 3. See *CESTRUTION*. 4. A genus of grasses; of *Dioscorides*, the *Ephedra distachya*; of *Hippocrates*, a species of astringent *Fucus*; also the *Salsola* t., *Salsola kali*, and *Sedum album*. [a, 35.] — **Herba tragi.** See *SALSOLA kali* and *SALSOLA t.* — **T. auriculæ.** See *T.* (1st def.).

TRAHENS (Lat.), adj. Tra^h(tra^h/'heⁿ(hans). Gen., -hent'is. Pres. part. of *trahere*, to draw. Drawing; used of a muscle that has a drawing action. [a, 48.] — **T. urethram.** See *BULBO-CAVERNOSUS*, n.

TRAILING, adj. Tra^l'iⁿ2. See PROCUMBENT.

TRAINING SCHOOL, n. Traⁿ'iⁿ2-skul. Fr., *école d'infirmières*. An institution in which nursing is taught. [a, 34.]

TRAIT (Fr.), n. Tre². See LINE (3d def.). — **T. génal.** See GNATHOGRAMMA.

TRAITEMENT (Fr.), n. Tre²-maⁿ2. See TREATMENT.—**T. marin.** The treatment of disease by residence at the sea-shore, sea baths, etc.

TRAJECTUS (Lat.), n. m. Tra²(tra²/'je²kt'(ye²kt')u^s(u)s). Gen., -je²us. From *trajicere*, to throw across. Fr., *trajet*. See TRACT.—**T. abdominis.** **T. inguinalis.** See *INGUINAL CANAL*.

TRAJET (Fr.), n. Tra²-zhe². See TRACT.—**T. des fibres dans l'écorce** [Huguenin]. The white fibres of the cerebral cortex, described by Gerlach. [I, 28 (K).] — **T. inguinal.** See *INGUINAL CANAL*.

TRAMA (Lat.), **TRAME** (Lat.), n's f. Tra^m(tra^m/'a²-e(a). Gr., τράμα (3d def.), τράμης (3d def.). Fr., *trame*. 1. The tissue separating the two surfaces of the gills of the *Hymenomyces*. [a, 35.] 2. Tissue, usually some form of connective tissue, forming the framework of an organ or part. [J, 33.] 3. See RHAPHE.

TRAMESAIGUES (Fr.), n. Tra^m-s'e²g. A place in the department of the Hautes-Pyrénées, France, where there is a hot sulphurous spring. [L, 49 (a, 14).]

TRAMIS (Lat.), n. f. Tra^m(tra^m/'i^s. Gr., τράμης. See RHAPHE.

TRANCE, n. Traⁿs. Gr., έκστασις. From *transitus*, a passing over. Fr., *trance*. Ger., *Entzückung* (2d def.). 1. A protracted syncope. [A, 42.] 2. A state of insensibility to ordinary external surroundings, together with suspension of volitional power and to a great extent of the vital functions. It is often associated with intense mental exaltation and preoccupation, and may simulate death. [D, 20.] Cf. ECSTASY.—Hysterical t.** The t.-like condition sometimes occurring in hysteria. [D, 35.]**

TRANCHÉES (Fr.), n. pl. Traⁿ2-sha. See COLIC and AFTER-PAINS.—**T. utérines.** See AFTER-PAINS.

TRANK (Ger.), n. Traⁿ2'k. See BEVERAGE and PROPOMA.—**Wiener T.** [Ger. Ph.] See *INFUSUM SENNÆ compositum*.

TRANSDUCTOR [Coves] (Lat.), n. m. Traⁿs(tran^s/'du²kt'(du²kt')o²r. Gen., -or'is. From *transducere*, to lead across. See TRANSVERSUS *pedis*. — **T. hallucis.** See *T.*

TRANSFER, **TRANSFERENCE**, n's. Traⁿs(tran^s/'fu²r, traⁿs/'fu²r-eⁿs. From *transfere*, to bear across. See TRANSFERT.—**Thought-t.** A supposed overmastering influence exerted by one person over the thoughts of another through the instrumentality of the so-called psychic force. [a, 48.]

TRANSFERENT (Fr.), n. Traⁿs2-fe²r. A phenomenon observed in experiments in magnetism and analogous investigations, consisting in the transfer of abnormalities of sensation and motility (of hysterical origin or induced artificially) from a given region of one lateral half of the body to the same region on the opposite side.

TRANSFIXION, n. Traⁿs2-'fik/shuⁿ. From *transfigere*, to pierce through. See under AMPUTATION by t.

TRANSFORATEUR (Fr.), n. Traⁿs2-'for-a²-tu²r. An instrument devised by Hubert for boring through the sphenoid bone in the operation of craniotomy. It consists of a perforator (*terebellum*, *perce-crâne perforateur*) and a guard, the former ending in an olive-shaped piece of steel with screw-threads cut on it, tipped with a trocar point. [A, 15, 22.]

TRANSFORMATION, n. Traⁿs2-'fo²-r-a²-shuⁿ. From *transforare*, to pierce through. Lat., *sphenotroica*. Fr., *t. sphénotroisie*. Of Hubert, a procedure for breaking up the base of the frontal skull by repeated perforation with the transforateur. [A, 23, 24.]

TRANSFORMATION, n. Traⁿs2-'fo²-r-m-a²-shuⁿ. Gr., μεταμόρφωσις. Lat., *transformatio* (from *transformare*, to change in shape). Fr., t. Ger., *T. Verwandlung*. Change of form, condition, or character; especially morbid change, degeneration. [a, 48.] — **Cheesy t.** See CASEATION.—**Hæmatis t.** Of Burdach, the t. into pus-cells of blood-cells that have passed into the ordinary secretions. [a, 34.] — **T. colloide** (Fr.). See *Colloid DEGENERATION*. — **T. graisseuse** (Fr.). See *Fatty DEGENERATION*.

TRANSFORMISM, n. Traⁿs2-'fo²-r-m-'i²2'm. From *transformare*, to change. See DARWINISM.

TRANSFUSION, n. Traⁿs2-'fu²-zhuⁿ. Gr., διάχυσις. Lat., *transfusio* (from *transfundere*, to pour out). Fr., t. Ger., *T. Ueberleitung*. The act of pouring from one vessel to another; the introduction into the vessels of the body of fluid material, especially of blood taken from another body; also the act of causing a fluid to pass through the skin into the body.—**Autot.** See the major list.—**Direct t.** The t. of blood from vessel to vessel without its exposure to the air. [E.] Cf. *AVELING'S APPARATUS*. — **Galvanic t.** See CATAPHORESIS.—**Hypodermic t.** The t. of blood, milk, or a saline solution by hypodermic injection. [a, 34.] — **Indirect t.** — **Mediate t.** The process of injecting blood which has first been drawn into an open vessel (and sometimes defibrinated). [E.] — **Nervous t.** The hypodermic injection of an extract made from the brain or spinal cord. [a, 34.] — **Peritoneal t.** Fr., *t. péritonéale*. T. into the peritoneal cavity. [a, 34.] — **Reciprocal t.** Of Brunton, a proposed exchange of equal volumes of blood between a fever patient and a healthy person who has recovered from the fever and is therefore proof against it, and whose blood is likely to contain an element (antitoxine) destructive to the micro-organisms of the blood of the patient. [N. Y. Med. Jour., Aug. 17, 1889, p. 184 (a, 17).] — **T. by Aveling's method.** See *Direct t.* and *AVELING'S APPARATUS*. — **T. infusoire** (Fr.). See *INFUSION* (1st def.). — **Venous t.** The t. of blood by injecting it into a vein. [a, 34.]

TRANSITUS (Lat.), n. m. Traⁿs2-'tu²-s(u)s(u)s. Gen., *transitus*. From *transire*, to go over. Gr., μετάβασις. See PASSAGE (1st def.). — **T. ad ventriculum quartum.** See *AQUEDUCT of Sylvius*.

TRANSLUCENT, **TRANSLUCID**, adj's. Traⁿs2-'lu²-s'e²nt, -i²d. From *trans*, through, and *lucere*, to shine. Transmitting light, but not transparent. [a, 48.]

TRANSLUMINATION, n. Traⁿs2-'lu²-m-i²n-a²-shuⁿ. From *trans*, through, and *luminare*, to light up. See *DERCHLEUCHUNG*.

TRANSMISSIBILITY, n. Traⁿs2-'mi²-s-i²b-i²l'i²2-i². From *transmittere*, to send across. Capability of being communicated or passed on from one to another. [a, 48.]

TRANSMISSION, n. Traⁿs2-'mi²-shuⁿ. Gr., διαγωγή, παραγωγή. Lat., *transmissio*. Fr., t. The act or process of sending over or through. [a, 48.] — **Duplex t.** The power possessed by nerves of transmitting impulses in two directions. [K, 35.]

TRANSMUTATION, n. Traⁿs2-'mu²-t-a²-shuⁿ. Gr., μεταβολή, μεταλλαγή, μεταμόρφωσις. Lat., *transmutatio* (from *transmutare*, to change). Ger., T. 1. Conversion into another substance or form. [a, 48.] 2. In botany, constructive metabolism. [a, 35.] — **Doctrine (or Theory) of t.** Ger., *T.slehre*. See DARWINISM.

TRANSOCULAR, adj. Traⁿs2-'o²k'u²l-a²r. From *trans*, across, and *oculus*, the eye. Extending across the eye (said of a line on a bird's head). [L, 221.]

TRANSPALMARIS [Coves] (Lat.), n. m. Traⁿs2-'pa²-l-m-a²-ris. From *trans*, across, and *palma*, the palm. See *PALMARIS brevis*.

TRANSPARENT, adj. Traⁿs2-'pa²-r'e²nt. Gr., διαφανής. Lat., *transparens* (from *trans*, through, and *parere*, to appear). Ger., *durchsichtig*. That can be seen through; transmitting light so as to render objects visible that are beyond the t. medium. [a, 48.]

TRANSPIERINÆUS [Coves] (Lat.), n. m. Traⁿs2-'pi²-er-i²næ-²e(a²)-u²s(u)s. From *trans*, across, and *perinæum* (q. v.). See TRANSVERSUS *perinei*.

TRANSPIALES [Coves] (Lat.), n. m. pl. Traⁿs2-'pi²-a²-les. From *trans*, across, and *spina*, the spine. The intertransversarii muscles. [a, 50.]

TRANSPIRATIO (Lat.), n. f. Traⁿs2-'pi²-ra²-ti²-o(a²)-u²s(u)s. Gen., -on'is. Transpiration.—**T. unilatera.** Unilateral sweating.

TRANSPIRATION, n. Traⁿs2-'pi²-r-a²-shuⁿ. Lat., *transpiratio* (from *trans*, through, and *spirare*, to breathe). Fr., t. Ger., *Ausdünstung*. 1. The act of passing off, or the matter passed off, through an investing or lining membrane, especially through the skin; cutaneous exhalation; perspiration. 2. The exhalation or evaporation of water from vegetable tissues, especially the leaves. — **Cutaneous t.** See *PERSPIRATION*. — **Insensible t.** See *INSENSIBLE PERSPIRATION*. — **Pulmonary t.** The exhalation of watery vapor by the lungs. [J, 17, 18.]

TRANSPIRATORY, adj. Traⁿs2-'pi²-r-a²-or-i². Lat., *transpiratorius*. Fr., *transpiratoire*. See *PERSPIRATION*.

TRANSPLANTATION, n. Traⁿs2-'pla²-nt-a²-shuⁿ. Gr., μεταβύτεια. Lat., *transplantatio* (from *transplantare*, to transplant). Ger., *Ueberpflanzen*. The absolute removal of a portion from one part of the body and its implantation into another part, or the transfer of an organ or tissue from one part to another. Introduced by Wolfe, in which flaps, broad at the base and converging toward the cornea, are taken from the ocular conjunctiva on each side and dissected up to the cul-de-sac. They are turned over on the cornea and secured in the usual way. A stop-lance knife is introduced into the limbus, so as not to injure the conjunctival flap, as for the stop. The director is passed through one of the openings and pushed in front of iris and lens out through the opposite side. The double-bladed knife is placed in the grooves and the corneal

flap separated and placed in tepid water. A similar conjunctival and corneal flap is then removed from a second patient, but here the lance-knife must be used so as not to interfere with the pillars of the iris, and it must be rapidly withdrawn, so as to prevent, as much as possible, the escape of the aqueous humor and consequent prolapse of the iris. The transparent graft is then placed in position and secured by sutures in the corners of the conjunctival flaps. [*Med. Times and Gaz.*, Nov. 22, 1879 (F).]—**T. of pterygium.** An operation, introduced by Desmarres, in which the pterygium is carefully detached from the cornea and for a distance of 5 to 6 mm. from the sclera also. Then from the lower margin of the wound surface an incision is made through the conjunctiva for several millimetres, and in this triangular gaping space the detached pterygium is inserted and fastened by sutures. Knapp's operation (for broad pterygia) consists in dissecting the pterygium completely from head to base, cutting off the hard, cartilaginous head, and then dividing the growth longitudinally into a lower and an upper half. Then incisions are made in the conjunctiva above and below, parallel to the corneal margin (the conjunctiva being dissected up) and their edges brought down and approximated by sutures so as to close in the vacant space originally occupied by the pterygium. The divided halves are then transplanted upward and downward into the conjunctival incisions and fastened by sutures. [*Arch. f. Ophth.*, xiv, p. 267 (F).]—**T. of skin.** Ger. *Entimplantation*. The t. of large thin shavings of skin from a healthy portion of the body to an exposed wound or a granulating surface. [a, 34.]—**T. of teeth.** See ALLOTRIODONTIA (1st def.).

TRANSPOSITIO (Lat.), n. f. Tra²ns(tras²ns)-po²z-i²/shi²(ti²)-o. Gen., -on²is. See TRANSPOSITION.—**T. cordis.** See DEXICORDIA.

TRANSPOSITION, n. Tra²ns(tras²ns)-po²z-i²/shu²n. Gr., *peráthesis*. Lat., *transpositio* (from *transponere*, to remove). An interchange of situation.—**T. of the viscera.** Visceral t. T. of the viscera so that those normally situated in the right are placed in the left half of the body and vice versa. [a, 34.]

TRANSUBSTANTIATION, n. Tra²ns-su²b-sta²n-shi²-a²-shu²n. From *trans*, through, and *substantia*, substance. Of Vetter and Burdach, the absorption of a tissue and its replacement by another. It is said to be *regressive* when a special tissue is replaced by a more general one, and *progressive* when a general is replaced by a special tissue. [J, 33.]

TRANSUDATE, n. Tra²ns-u²d-at. From *trans*, through, and *sudare*, to perspire. Ger., *Transsudat*. The product of transudation. [D.]

TRANSUDATION, n. Tra²ns-u²d-a²/shu²n. From *trans*, through, and *sudare*, to perspire. Fr., *transsudation*. Ger., *Durchschwitzen*. 1. The passage of a liquid through a membrane or tissue, especially the filtration of blood-serum through the capillaries; also a transudate. [D, 3.] Cf. EXUDATION and DIAPYCNESIS. 2. The irrigation of cells by the nutritive plasma exuded from blood capillaries. [J.]—**Engorgement t.** Ger., *Stauungst.* A t. due to engorgement. In Auspitz's classification of skin diseases, the engorgement t's are a family of "engorgement dermatoses," in which there is serous effusion into the tissues of the skin, with the consequent production of either simple oedema, or, from excess of nutritive supply, induration and hypertrophy of the connective tissue of the skin (see ERYTHRASTASIS *Arum*), or, from pressure, atrophy of the connective tissue (see SOLICEMA *cutis*). [G, 4.]—**Oedematous t.** T. that results in oedema; the transudate of oedema. [D.]

TRANSVERSA (Lat.), n. f. Tra²ns(tras²ns)-vu²rs(we²rs)/a². The transverse diameter of the pelvis.

TRANSVERSAIRE (Fr.), n. Tra²ns-tras²-ve²r-se²r. See TRANSVERSALIS.—**T. cervical.** See TRACHELOMASTOIDEUS.—**T. de la nuque.** See OCCIPITALIS minor.—**T. du cou.** See TRANSVERSUS colli.—**T. épineux.** 1. See TRANSVERSOSPINALIS. 2. See MULTIFIDUS spine, SEMISPINALIS colli, and SEMISPINALIS dorsi.—**T. épineux antérieur.** See RECTUS capitis anticus major.

TRANSVERSAL, adj. and n. Tra²ns-vu²rs'a². Fr., t. See TRANSVERSALIS.—**Short t.** See LILIO-SPINAL (2d def.).—**T. du nez** (Fr.). See COMPRESSOR naris.

TRANSVERSALIS (Lat.), adj. Tra²ns(tras²ns)-vu²rs(we²rs)-al(a²l)y²as. Lying crosswise; as a n. m., a muscle lying transversely. [C.]—**T. abdominis.** See TRANSVERSUS abdominis and LUMBO-ABDOMINALIS.—**T. capitis.** See TRACHELOMASTOIDEUS (1st def.).—**T. cervicis.** See TRACHELOMASTOIDEUS.—**T. cervicis anticus.** 1. The longus colli see ERYTHRASTASIS *Arum*, or, from pressure, atrophy of the connective tissue (see SOLICEMA *cutis*). [G, 4.]—**T. cervicis medius.** An anomalous muscle extending between the transverse processes of the second and sixth or seventh cervical vertebrae. [L, 332.]—**T. cervicis posterior major.** See TRACHELOMASTOIDEUS (1st def.).—**T. cervicis posticus minor.** See TRACHELOMASTOIDEUS accessorius.—**T. colli.** See TRACHELOMASTOIDEUS.—**T. costarum.** See TRACHELOCAUSTALIS.—**T. digitorum.** See TRANSVERSUS pedis.—**T. dorsi.** See LONGISSIMUS dorsi.—**Transversales hyoides.** A short band of muscular fibres, found in some of the lower mammals, uniting the superior extremities of the styloid cornua, and in its contraction approximating them. [Bourgelat (L, 13).]—**T. lumborum.** The portion of the quadratus lumborum arising from the transverse processes of certain of the lumbar vertebrae. [L, 332.]—**T. nasi.** 1. See COMPRESSOR naris. 2. A small single muscle of most of the lower mammals, which passes from one nasal cartilage to the other. It is a dilator of the nostrils. [L, 13.]—**T. pedis.** **T. plantae.** See TRANSVERSUS pedis.

TRANSVERSE, adj. Tra²ns-vu²rs'a². Lat., *transversus*, *transversalis* (from *transvertere*, to turn athwart). Fr., *t. transversal*. Ger., *quer*, *querlaufend*, *querliegend*. Crosswise, in a direction at right angles to the length of a body. [a, 35.]

TRANSVERSE (Fr.), adj. and n. Tra²ns²-ve²rs. See TRANSVERSALIS.—**T. cervical.** See TRACHELOMASTOIDEUS.—**T. de l'abdomen.** See TRANSVERSUS abdominis.—**T. de la langue.** See TRANSVERSUS linguae.—**T. de la mâchoire inférieure.** See MYLOHYOIDEUS (2d def.).—**T. de l'auricule.** **T. de l'oreille.** See TRANSVERSUS auricular.—**T. du menton.** See TRANSVERSUS menti.—**T. du nez.** See COMPRESSOR naris.—**T. du périnée.** See TRANSVERSUS perinei.—**T. profond du périnée.** See TRANSVERSUS perinei profundus.—**T. superficiel du périnée.** See TRANSVERSUS perinei superficialis.

TRANSVERSE-ANALIS (Lat.), n. m. Tra²ns(tras²ns)-vu²rs(we²rs)/o(o²)-a²n(a²n)-al(a²l)y²as. See TRANSVERSUS perinei superficialis.

TRANSVERSOCOSTALES (Lat.), n. m. pl. Tra²ns(tras²ns)-vu²rs(we²rs)/o(o²)-ko²st-al(a²l)y²ez(e²s). From *transversus* (q. v.), and *costa*, a rib. Ger., *Quermskeln der Rippen*. Analogues of the levatores costarum of man found in the lower mammals. [L.] Cf. COSTOSTERNALIS.

TRANSVERSO-ILIAQUE (Fr.), n. Tra²ns²-ve²r-so-e-le-a²k. See QUADRATUS lumborum.

TRANSVERSOSPINALIS (Lat.), n. m. Tra²ns(tras²ns)-vu²rs(we²rs)/o(o²)-spín(spen)-al(a²l)y²as. From *transversus* (q. v.), and *spina*, the spine. 1. A muscle extending between the transverse and spinous processes of a vertebra. [L, 332.] 2. All of the muscles so attached regarded as one. [L, 31.] 3. **T. breves.** The obliquus capiti minor, rotatores dorsi, and rotatores dorsi longi. [L, 332.] 4. **T. longi.** The semispinalis capitis, semispinalis cervicis, semispinalis dorsi, and the multifidus spine. [L, 332.]—**T. lumborum.** See MULTIFIDUS spine.

TRANSVERSO-URETHRALIS (Lat.), n. m. Tra²ns(tras²ns)-vu²rs(we²rs)/o(o²)-u²r(ur)-e²th(ath)-ra²(ra²l)y²as. From *transversus* (q. v.), and *urethra* (q. v.). See GUTHRIE'S MUSCLE.

TRANSVERSUS (Lat.), adj. Tra²ns(tras²ns)-vu²rs(we²rs)/u²s(u²s). From *transvertere*, to turn athwart. See TRANSVERSE; as a n., see *T. perinei superficialis*.—**T. abdominis.** Ger., *querer Bauchmuskel*, *Breitmuskel des Abdomens*. A muscle lying beneath the obliquus abdominis internus which arises from the inner surfaces of the six lower ribs, the lumbodorsal fascia, the inner lip of the anterior two thirds of the crest of the ilium, and the outer portion of Poupart's ligament, and is inserted into the transversalis fascia and the fibres of the os pubis and the pectineal line. [L, 31, 141, 332.]—**T. auricular.** **T. auris.** A muscle which lies on the convex or posterior surface of the pinna. It consists of radiating fibres, partly tendinous and partly muscular, extending from the convexity of the concha to the prominence corresponding with the groove of the helix. [F, 31.]—**T. bulbi.** Transverse fibres of the t. perinei profundus behind the urethra above the bulb. [L, 31.]—**T. colli.** An anomalous muscle behind the manubrium sterni which arises from the first costal cartilage and unites in the middle line with its fellow and the deep layer of the cervical fascia. [L, 332.]—**T. costarum.** See COSTOSTERNALIS.—**T. linguae.** Transverse muscular fibres between the linguales inferior and superior which are attached in the median line to a vertical fibrous septum and pass outward to the borders and dorsum of the tongue. [L, 31, 332.]—**T. mandibulae.** See MYLOHYOIDEUS (2d def.).—**T. manus.** The outer portion (often separated from the rest of the muscle) of the adductor pollicis. [L, 332.]—**T. menti.** Ger., *Doppelkinnmuskel*. Muscular fibres uniting in front the depressor anguli oris of one side with that of the other. [L, 332.]—**T. nasi.** See COMPRESSOR naris.—**T. orbitae.** An anomalous muscle arising from the os planum which passes across the orbit either above or below the levator palpebrae and is inserted into the outer margin of the orbit. [L, 332.]—**T. pectoris.** Of Arnold, see TRIANGULARIS sterni.—**T. pedis.** Fr., *couvereur*. A muscle arising from the lateral metatarsal-phalangeal ligaments, and inserted into the first phalanx of the great toe in common with the adductor pollicis pedis, of which some consider it a part. [L.]—**T. perinæ.** Ger., *querer Darmmuskel*. The t. perinei profundus and the t. perinei superficialis. [L.]—**T. perinei anterior.** **T. perinei medius.** **T. perinei posterior inferior.** See *T. perinei superficialis*.—**T. perinei profundus.** 1. All the muscular fibres between the two layers of the deep perineal fascia arranged transversely, obliquely, and perpendicularly, arising on each side from the inferior ramus of the ischium and its tuberosity and the fascia, and meeting in the middle line of the perinaeum. 2. The transverse fibres of the same arising from the tuberosities of the ischia. [L, 31, 142, 332.] 3. In women, the most posterior and most clearly defined bundle of t. perinei profundus (2d def.). [L.]—**T. perinei superficialis.** A bundle of fibres which arises from the tuberosity of the ischium or the adjacent fascia and meets its fellow of the opposite side in the middle line, blending with the sphincter ani externus, the bulbo-cavernosi, or one or another of the perineal muscles. [L, 31, 332.]—**T. plantae (pedis).** See *T. pedis*.—**T. prostaticae.** 1. See COMPRESSOR prostaticae. 2. Fibres of the lateral and inferior surface of the prostate, attached to the anterior surface of the ischium. [L, 176 (a, 50).]—**T. Santorini.** See *T. menti*.—**T. thoracis anterior.** See TRIANGULARIS sterni.—**T. thoracis posterior.** The infracostales taken as a whole. [L, 332.]—**T. urethrae.** Perpendicular fibres of the t. perinei profundus (1st def.) which surround the urethra close to the bulb. [L, 31.]—**T. vaginae.** The t. perinei profundus (2d def.) in woman. [L.]

TRAP, n. Tra²p. An apparatus, usually consisting of one or more bent pipes, with or without valves, filled with water, used to prevent the escape of gases from soil-pipes into dwellings. [a, 48.]

TRAPA (Lat.), n. f. Tra²p(tras²p)/a². Fr., *macre*. Ger., *Wasernuss*, *Stachelnuss*. Water-caltraps (or nut) a genus of floating herbs, forming the *Trapaceae* (a family of the *Onagraceae*) or *Trapa* (a series of the *Haloragaceae*). [a, 36.]—**T. bispinosa.** The water-chestnut of middle and southern Asia, Ceylon, Japan, etc. ;

cultivated for its farinaceous seed. [a, 35].—**T. natans**. Fr., *corniche*, *corniole*, *cornuelle*, *galarin*, *noix aquatique* (ou d'eau), *traffe d'eau*, *noix de fontaine*. Gr., *gemeine Wassernuss* (oder *Stachelnuss*), *Wasserkastanie*, *Jesuitennuss*. Jesuit's nut of Venice, water-chalrops, water-chestnut, the *trifoliosus* of Dioscorides, a species found in southern and middle Europe, middle Asia, and northern and central Africa. The fruits, *nucis* (see *castaneae aquatice* (see *palustres*, see *cornutae*), and their edible seed, *semina nucis aquatice* (see *tribuli aquatici*), were formerly official. The upper, leafy portion of the stem was used in poultices as a discutient, and the expressed juice in eye diseases. [a, 35.]

TRAPEZE (Fr.), n. Tra²-pe²z. See **TRAPEZOID** and **TRAPEZIUS**.—**T. dorsal**. See **DORSO-ACROMIALIS**.—**T. du cou**. See **CERVICO-ACROMIALIS**.

TRAPEZIA (Lat.), n. f. Tra²p(tras²p)-ez(e²z)/i²-a². Of Galen, the superior portion of the trapezius muscle. [L, 2.]

TRAPEZIUM (Lat.), n. n. Tra²p(tras²p)-ez(e²z)/i²-u²m(u²m). From *trapeza*, a table. Fr., *trapeze*, *corps rhomboïdal* (ou *rhomboid*, ou *trapezoïde*) [2d def.], Gr., *Trapez*, *Trapezbein* (1st def.), *vielwinkeltiger Knochen* (1st def.), *grosses viereckiges Bein* (1st def.), *trapezoid Körper* (2d def.). 1. The outermost of the second row of the carpal bones. It is irregularly six-sided and grooved on its anterior surface for the tendon of the flexor carpi radialis, and articulates with the trapezoid, at the first and second and second metacarpal bones. [L, 37, 142, 333.] 2. A tract of nerve-fibres at the lower part of the pons Varolii below the prolongations of the anterior pyramids. It comes below the superior olivary nucleus and extends upward to be continuous with the middle cerebellar peduncle. [L, 15 (K).]—**T. minus**. See **TRAPEZOID** none.—**T. pontis**. See **T** (2d def.).

TRAPEZIUS (Lat.), n. m. Tra²p(tras²p)-ez(e²z)/i²-u²s(u²s). From *trapeza*, a table. Fr., *trapeze*, *capuchon*, Gr., *Kuppenmuskul*. 1. A muscle arising from the external protuberance of the occipital bone, the ligamentum nucha, the spinous processes of the last cervical and all the dorsal vertebrae, and the supraspinous ligaments, and inserted into the posterior border of the outer third of the clavicle and the inner border of the acromion process and the upper edge of the spine of the scapula. 2. In solipeds, a muscle which arises from the cervical column and the transverse processes of the first dorsal vertebrae and is attached to the acromial spine of the scapula. It raises the shoulder and carries it forward and backward. [L, 13.]

TRAPEZOID, adj. Tra²p(e²z)-oid. Lat., *trapezoides* (from *trapeza*, a table, and *eidos*, resemblance). Fr., *trapezoïde*. Table-shaped; as a n., the t. bone. [a, 48.]

TRAPEZO-MÉTACARPIEN (Fr.), n. Tra²-pa-zo-ma-ta²-ka²-pe-a²n². See **OPPONENS POLICIS**.

TRAUBSCHEN (Ger.), n. Troib/ch²e²n. See **RACEMULUS**.—**Fett²**. See **Fat** LOBULES.

TRAUBE (Ger.), n. Tra²-u²b-e². See **RACEME** and **GRAPPE**.—**T²nure**. See **GRAPPE-CURE**.—**T²ngeschwulst**. See **STAPHYLOMA**.—**T²n²sure**. See **RACEMIC ACID**.—**T²nschimmel**. See **BOTRYTIS**.

TRAUBENBAUM (Ger.), n. Tra²-u²b-e²-ba²-u²m. The genus *Uvaria*. [a, 35.]

TRAULISMUS (Lat.), n. m. Tra²l(tras²l)-i²z(i²s)/mu²s(mu²s). Gr., *τραυλισμός*. See **BLUESIAS**.

TRAUM (Ger.), n. Tra²-u²m. See **DREAM**.

TRAUMA (Lat.), n. n. Tra²m(tras²u²m)-a². Gen., *traum/atos* (-atis). Gr., *τραύμα* (from *τραύω*, to wound). A wound. [E.]

TRAUMATIC, adj. Tra²m-a²t/i²k. Gr., *τραυματικός*. Lat., *traumaticus*. Fr., *traumatique*. Gr., *traumatisch*. Pertaining to or due to mechanical injury. [E.]

TRAUMATICIN, **TRAUMATICINUM**, n's. Tra²m-a²t/i²s-i²n, -en. Lat., *traumaticinum* [Hung. Ph., 1st ed.]. A fanciful name applied to a 10-per-cent. solution of gutta-percha in chloroform; used like collodion. Cf. **Liquor GUTTA-PERCHÆ**.

TRAUMATISM, n. Tra²m-a²t-i²z-m. Fr., *traumatisme*. Gr., *Traumatismos*. 1. The infliction of an injury. 2. The state or condition of the system produced by a serious injury; it may include the symptoms of shock and of septicæmia. [a, 34.]

TRAUMATOCACE (Lat.), n. f. Tra²m(tras²u²m)-a²t(a²t)-o²-k-a²s(a²k-a²). Gen., *-o²caces*. From *trauma*, a wound, and *kakos*, bad. See **HOSPITAL GANGRENE**.

TRAUMATOLOGY, n. Tra²m-a²t-o²l-o²-j². From *trauma*, a wound, and *λόγος*, understanding. Fr., *traumatologie*. The pathology, etc., of wounds. [a, 48.]

TRAUMATONESIS (Lat.), n. f. Tra²m(tras²u²m)-a²t(a²t)-o² (o²s)-ne(na)/si²s. Gen., *-es²eos* (-is). From *trauma*, a wound, and *νῆσις*, a suture. Suture of a wound. [a, 48.]

TRAUMATOPNEA (Lat.), n. f. Tra²m(tras²u²m)-a²t(a²t)-o² (o²s)-pne(pno²e²)a². From *trauma*, a wound, and *πνεῖν*, to breathe. The passage of air through a perforating chest-wound in consequence of respiratory movements. [a, 34.]

TRAUMATOPIRYA (Lat.), n. f. Tra²m(tras²u²m)-a²t(a²t)-o²-p-i²ri²(u²r)-a². From *trauma*, a wound, and *πύρ*, fever. See **TRAUMATIC FEVER**.

TRAUMATOSAPROSI (Lat.), **TRAUMATOSEPSIS** (Lat.), n's. Tra²m(tras²u²m)-a²t(a²t)-o² (o²s)-sa²p(sa²p)-ros/i²s, -se²ps(-saps)/i²s. Gen., *-ros²eos* (-is), *-se²ps²eos* (-is). From *trauma*, a wound, and *σάπρος*, putrid, or *σψήξ*, putrefaction. See **HOSPITAL GANGRENE**.

TRAUMATOSIS (Lat.), n. f. Tra²m(tras²u²m)-a²t(a²t)-o²-si²s. Gen., *-os²eos* (-is). From *trauma*, a wound. Traumatism. The *Traumatoses* are, in Fuchs's classification of skin diseases, a family of the *Morphonosis* including excoriation and dermatotrauma. [G.]

TRAUMOTYPHUS (Lat.), n. m. Tra²m(tras²u²m)-o² (o²s)-tif(-tu²f)/u²s(u²s). From *trauma*, a wound, and *τύφος*, typhus. Of Eisenmann, hospital gangrene. [L, 50 (a, 14).]

TRAVAIL (Fr.), n. Tra²-va²-y². See **LABOR**.—**Petit t**. A term applied by some authors to manipulations intended to hasten or facilitate the expulsion of the child's head when it is resting upon the perineum, such as pressing back the pelvic floor. [a, 15.]—**T. insensible**. The premonitory stage of labor. [a, 88.]—**T. manqué**. See **Missed LABOR**.—**T. trop prompt**. See **Precipitate LABOR**.—**T. vesiculaire**. See **DEHISCENCE** (2d def.).

TRAVEMÜNDE (Ger.), n. Tra²s²e²-mu²-nd-e². A sea-bathing resort on the Baltic in the vicinity of Lubeck, Germany. [a, 14.]

TREACLE, n. Tre²-a²-k²l. 1. An antidote to venomous bites (cf. *Theriac*, whence the word is derived); a panacea. [a, 48.] 2. See **MOLASSES**.—**Countryman's t**. See **ALLIUM SATIVUM** and *Ruta graveolens*.—**Venice t**. See **TREAE FAROUK**.

TREAD, n. Tre²-d. A vulgar term for the cicatrula of an egg. See **ARCHBLAST**.

TREAE FAROUK, n. "Venice treacle"; a Japanese secret remedy said to be identical with the *theriac* *Andromachi* of the Lond. Ph. of 1746. [Gordon, "Brit. Med. Jour." Apr. 5, 1884.]

TREATMENT, n. Tre²-m²nt. Gr., *θεραπεία* (1st def.). Lat., *medela* (1st def.). Fr., *traitement*. Gr., *Behandlung*. 1. Means employed for the relief of the sick or injured. 2. The subjection of the patient to the action of certain agencies. [D.]—**Antiphlogistic t**. T. intended to prevent or limit inflammation. [a, 34.]—**Antiseptic t**. T. tending to prevent sepsis. [a, 34.]—**Banting t**. See **BANTINGISM**.—**Colony t**. See **COLONIZATION** (2d def.).—**Dietetic t**. The t. of disease by special diet. [a, 34.]—**Electric t**. The t. of wounds and certain skin diseases by the application of finely powdered sterilized clay. [a, 34.]—**Empirical t**. Routine t. founded on experience. [a, 34.]—**Expectant t**. T. directed against symptoms as they arise, not based on any fixed plan of therapeutics. [a, 34.]—**Hueter's t. for knock-knee**. Retention of the knee in a flexed position by means of a plaster-of-Paris bandage. [a, 520 (a, 39).]—**Hysterical t**. The t. of disease by the application of hygienic principles, involving environment, clothing, food, and exercise. [a, 34.]—**Lowering t**. T. intended to depress the chief characteristics of a sthenic inflammation. [a, 34.]—**Mechanical t**. 1. T. by mechanical appliances. 2. See **MASSAGE**.—**Mitchell's t**. The t. of certain neuroses by absolute and complete rest in bed, isolation except for the presence of the nurse and the physician, massage, hydrotherapy, and electricity and the application of mixed t. A phrase used in reference to the t. of syphilis by the contemporary administration of potassium iodide and mercury. [a, 34.]—**Palliative t**. T. intended to modify or limit the severer manifestations of a disease, but not to cure. [a, 34.]—**Pneumatic t**. See **PNEUMATOTHERAPY**.—**Rest t**. See **MASKUR**.—**Scarcenzio's t**. The t. of syphilis by the hypodermic injection of mercury. [a, 35.]—**Symptomatic t**. T. of disease by attention to the symptoms as they arise. [D.]—**Valsalva's t. for aneurysm**. T. which consists in rest, low diet, venesection, and other general means of reducing the force of the circulation. [E.]

TREBAS (Fr.), n. Tra²-ba². A place in the department of the Tarn, France, where there is a gaseous, alkaline, and ferruginous spring. [L, 49, 88, 135 (a, 14).]

TREBIZOND, n. Tre²b/i²z-o²nd. A place in Asia Minor where there are hot mineral springs. [L, 49 (a, 14).]

TRECHOMA (Lat.), **TRECHYSMA** (Lat.), n's n. Tre²-k(-trach²)-om-a², -i²z(u²s)/ma²s. Gen., *-om/atos* (-atis), *-ys²matos* (-atis). See **TRACHOMA**.

TREE, n. Tre. Gr., *δένδρον*. Lat., *arbor*. Fr., *arbre*. Gr., *ἄρμον*. A plant with a woody, single stem rising to the height of 30 feet or more. [a, 35.]—**Vascular t**. Fr., *arbre vasculaire*. Mixed t. The arborescent appearance of the blood-vessels when isolated in entirety from the body. [a, 34.]

TREFFLE (Fr.), n. Tre²-f²l. See **TRIFOLIUM**.—**T. d'eau**. 1. The *Mentha trifoliata*. 2. See *Folia trifolii fibrini*.—**Extrait de t. d'eau**. See *Extractum trifolii fibrini*.—**T. tendineux du diaphragma**. The central tendon of the diaphragm. [L.]

TREFOIL, adj. Tre²-foi². From *tres*, three, and *folium*, a leaf. Having three segments or leaves; as a n., the genus *Trifolium*, also the *Medicago lupulina*, *Stylosanthes procumbens*, *Anemone hepatica*, *Mentha trifoliata*, etc. [a, 35.]

TREHALA, n. Tre²-ha²-la². See **TURKISH MANNA**.

TREHALOSE, n. Tre²-ha²-l-os. Fr., *tréhalose*. A sugar, C₁₂H₂₂O₁₁ + 2H₂O, obtained from trehala manna and found also in various fungi; identical with the mycose contained in ergot of rye. [B, 3 (a, 38).]

TREIBEISEN (Ger.), n. Trib/i²-ze²n. See **REPOUSSOIR** (1st def.).

TREIBEND (Ger.), adj. Trib/e²nd. See **EVACUANT**.

TREIBMITTEL (Ger.), n. Trib/mi²-te²l. See **PURGATIVE**, n.

TREIBMUSKEL (Ger.), n. Trib/musk²-el. See **ACCELERATOR** (2d def.).—**T. des Harns**. See **BULBOCAPVERNUS**, n.

TREMA (Lat.), n. n. Trem(tram)/a. Gen., *trem/atos* (-is). Gr., *τρήμα* (from *τρηάω*, to bore). See **FORAMEN**.

TREMA (Lat.), n. f. Trem(tram)/a². A genus of the *Ulmaceae*. [a, 35.]—**T. orientalis**. Indian nettle-tree; a species found in southern Asia, yielding a gum like that of the cherry-tree. The aromatic bark, leaves, and root are said to be remedial in epilepsy. [a, 35.]

TREMATODA (Lat.), n. n. pl. Tre²m(tram)-a²t(a²t)-o²-d-a². From *τρηάω*, porous. Fr., *trématodes*. Gr., *Saugwürmer*, *Trematoden*. The flukes; a suborder of the *Stereiminthia*. They are hermaphrodite, and have a soft, round or flat body, and an indistinct head with suckorial foramina. [L, 1.]

TREMBLEMENT (Fr.), n. $\text{Tra}^{\text{a}}\text{n}^{\text{a}}\text{b}^{\text{a}}\text{ma}^{\text{a}}\text{n}^{\text{a}}$. See TREMOR.
TREMABLES, n. $\text{Tre}^{\text{a}}\text{m}^{\text{a}}\text{b}^{\text{a}}\text{z}$. Fr., *maladie tremblante*. See PARALYSIS agitans.

TREMBLING, n. $\text{Tre}^{\text{a}}\text{mb}^{\text{a}}\text{li}^{\text{a}}\text{n}^{\text{a}}$. See TREMOR.

TREMBLOTEMENT (Fr.), n. $\text{Tra}^{\text{a}}\text{n}^{\text{a}}\text{b}^{\text{a}}\text{lot}^{\text{a}}\text{ma}^{\text{a}}\text{n}^{\text{a}}$. A trembling, a vibration; of Barth, the sound heard in true croup when a stethoscope is placed over the larynx, caused by the vibration of the false membrane in the larynx. [D. 1.]

TREMELLA (Lat.), n. f. $\text{Tre}^{\text{a}}\text{m}^{\text{a}}\text{e}^{\text{a}}\text{li}^{\text{a}}$. Fr., *tremelle*. 1. The genus *Nostoc*. The *Tremellaceae* are a section of *Algae*. 2. The typical genus of a division (*Tremellaceae*, *Tremellales*, *Tremellineae*, *Tremellinaceae*, *Tremelliniferae*) [Ger., *Zitterpilze*, *Gallertpilze*] of basidiomycetous *Fungi*. [a. 35.]—**T. mesenterica**. A species of *T.* (2d def.) forming orange tints on dead hedges, etc. Distilled water poured over it was formerly used in eye diseases and the palsy of gout. [a. 35.]—**T. verticalis**, *T. violacea*. Fr., *tremelle verticale*. An edible species of *T.* (2d def.) yielding a blue dye. [a. 35.]

TREMENTINA (Sp.), n. $\text{Tra}^{\text{a}}\text{m}^{\text{a}}\text{e}^{\text{a}}\text{ten}^{\text{a}}$. At Bogotá, the resin of *Euphorbia grandiflora*; used medicinally. [a. 35.]—**T. comān** [Mex. Ph.]. A thick, granular turpentine obtained from *Pinus teocote*; used as a balsamic stimulant. [B. 224 (a. 14); J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (a. 50).]

TREMOR (Lat.), n. m. $\text{Trem}^{\text{a}}(\text{tre}^{\text{a}}\text{m})^{\text{a}}\text{o}^{\text{a}}$. Gen., -*or*-is. From *tremere*, to tremble. Fr., *tremblement*. Ger., *Zittern*. A quivering or trembling, especially a more or less continuous quivering of a convulsive character. [D.]—**Arseñical t.** T. caused by arsenical neuritis. [a. 34.]—**Continuous t.** A form of t. that resembles that of paralysis agitans, but may be remittent. Muscular tension is not exaggerated, as in intermittent t., and the t. may be diminished or arrested by a voluntary effort. [D. 35.]—**Convulsive t.** 1. Of Hammond, a paroxysmal affection characterized by frequent attacks of violent trembling, lasting fifteen or twenty minutes, and leaving the subject in a profuse perspiration. There are also headache, vertigo, anxiety, hyperaesthesia of the skin of the face, arms, and trunk (the parts usually involved in the paroxysms), and sometimes unconsciousness. 2. Any short shaking of the body, such as occurs occasionally after urination. Hammond includes all cases of non-rhythmic t., or clonic convulsive movements which are paroxysmal in character, but are not attended with loss of consciousness. [D. 25, 34.]—**Épileptoid t.** Intermittent clonus with t.—**Fibrillary t.** T. caused by the consecutive contractions of separate muscular fibrillae, rather than of a muscle or the muscles as a whole. [D. 36.]—**Forced t.** See *T. coactus*.—**Hysterical t.** T. due to the instability of nervous impulse existing in hysteria. [a. 34.]—**Intermittent t.** T. common to paralyzed muscles in hemiplegia. It is induced when the muscles are put upon the stretch by attempts at voluntary movement. [D. 35.]—**Mercurial t.**, **Metallic t.** A volitional t. due to mercurialism. [D. 25.]—**Muscular t.** Slight oscillating muscular contractions following each other in rhythmic order. [L. 20 (a. 34).]—**Purring t.** See *Purring THRILL*.—**T. capitis**. T. affecting the muscles of the neck and head. [a. 34.]—**T. coactus**. Forced t.; of Van Swieten, the convulsive movements which persist during repose after voluntary exercise; attributed to an intermittent and rhythmic irritation of the nervous centres. [D. 35.]—**T. saturninus**, "t. due to lead poisoning." [L. 57 (a. 14).]—**T. tendinum**. See *SUBSULTUS tendinum*.—**Vibratile t.** See *FREMITUS*.—**Volitional t.** Trembling of the limbs or of the entire body when a voluntary effort is made. It occurs in connection with multiple sclerosis and other nervous diseases. [D. 63.]

TREMULATION (Fr.), n. $\text{Tra}^{\text{a}}\text{mu}^{\text{a}}\text{e}^{\text{a}}\text{li}^{\text{a}}\text{se}^{\text{a}}\text{o}^{\text{a}}\text{n}^{\text{a}}$. The tremor of paralysis agitans. [A. 385 (a. 48).]

TREMULENCE (Fr.), n. $\text{Tra}^{\text{a}}\text{mu}^{\text{a}}\text{e}^{\text{a}}\text{li}^{\text{a}}\text{n}^{\text{a}}$. See TREMOR.—**T. paralytica**. See PARALYSIS agitans.

TREMULIN, n. $\text{Tre}^{\text{a}}\text{m}^{\text{a}}\text{u}^{\text{a}}\text{li}^{\text{a}}$. Fr., *tremuline*. See POPULIN.

TRENCIN, n. A place in T. County, Hungary, where there are saline and sulphurous springs. [L. 37, 49, 57 (a. 14).]

TREPAN, n. $\text{Tre}^{\text{a}}\text{pa}^{\text{a}}\text{n}^{\text{a}}$. See TREPHINE.—**Schiefer T.** (Ger.). See ECLIPSE TREPHANON.

TREPANATO (Lat.), n. f. $\text{Tre}^{\text{a}}\text{p}^{\text{a}}\text{a}^{\text{a}}(\text{a}^{\text{a}}\text{n})^{\text{a}}(\text{a}^{\text{a}}\text{y})\text{shi}^{\text{a}}(\text{ti}^{\text{a}})\text{o}$. Gen., -*on*-is. See TREPHINING.—**T. corneae**. An operation for the relief of conical cornea. It consists in removing a small circular piece from the centre of the cornea by means of a conical trephine. Bowman employs small trephines, penetrating only as far as the membrane of Descemet. The cut disc is removed, and the membrane of Descemet immediately presents as a hernia. This is punctured, and the puncture must be repeated every day or two for several weeks, until the cicatricial process is complete. In De Wecker's operation his conical trephine is used to cut a round disc out of the entire thickness of the cornea, the object being to maintain a permanent fistula in cases of partial staphyloma and total leucoma. ["Ann. d'Ocul.," xlviii, p. 137 (F).]

TREPANATION, TREPPANNING, n's. $\text{Tre}^{\text{a}}\text{p}^{\text{a}}\text{a}^{\text{a}}\text{n}^{\text{a}}\text{shu}^{\text{a}}\text{n}^{\text{a}}$, -*a*-n². Lat., *trepantatio*. See TREPHINING.

TREPHINE, n. $\text{Tre}^{\text{a}}\text{p}^{\text{a}}\text{in}^{\text{a}}$. Gr., *τροπήνη*, *τρόπανον* (from *τροπήναι*, to bore). Lat., *trepantum*, *tropanum*. Fr., *trepine*, *trepán*. Ger., *Schädelbohrer*, *Drehbohrer*, *Drehbohr*, *Trepheina*, *Trepán*. An instrument for cutting or sawing a circular opening, generally for sawing such an opening in the skull; consisting of a crown (a steel tube with saw-teeth at its free end), a shaft, and a handle. [E.]—**Brace t.** A t. fitted into an ordinary carpenter's brace. [E.]—**Conical t.** A t. the crown of which has the shape of a truncated cone, and is provided with oblique ridges on its outer surface, so that its progress ceases as soon as the bone has been cut through. [a. 34.]—**Corneal t.** Of Bowman, a small cutting drill or t. designed to excise a defined circular portion of the apex of a conical cornea. The instrument is rotated by the finger and thumb. De Wecker's

corneal t. is constructed on the principle of Heurteloup's artificial leech. The tubular cutting blade is inclosed in a solid tube, and protrudes by pressure on a spring. [F.]—**Galt's t.** See *CONICAL t.*—**Nasal t.** An instrument consisting of a steel shaft terminating in a small fenestrated tube having a knife-edge or saw-edge. ["N. Y. Med. Jour.," May 28, 1887, p. 596 (a. 34).]—**Tympanic t.** An instrument consisting of a steel shaft terminating in a small, polished tube 2 mm. in diameter, having a cutting edge. [Burnett, "Trans. of the Am. Ot. Assoc.," 1873, p. 109 (a. 34).]

CONICAL TREPHINE.

TREPHINING, n. $\text{Tre}^{\text{a}}\text{p}^{\text{a}}\text{in}^{\text{a}}$. Gr., *τροπήναι*. Lat., *trepantatio*. Fr., *trepantation*. Ger., *Trepantung*. The operation of using the trephine. [E.]

TREPIDATIO (Lat.), n. f. $\text{Tre}^{\text{a}}\text{p}^{\text{a}}\text{d}^{\text{a}}(\text{a}^{\text{a}}\text{y})\text{shi}^{\text{a}}(\text{ti}^{\text{a}})\text{o}$. Gen., -*on*-is. From *trepidae*, to be agitated. Fr., *trepidation*. A condition of agitation, a violent trembling. [a. 48.]—**T. cordis**. See PALPITATION of the heart.

TREPIDATIO (Fr.), n. $\text{Tra}^{\text{a}}\text{pe}^{\text{a}}\text{da}^{\text{a}}\text{se}^{\text{a}}\text{o}^{\text{a}}\text{n}^{\text{a}}$. See TREPIDATIO.—**T. épileptoïde**. An epileptoid paroxysm of violent tremulous movements occurring in the lower extremities in certain affections of the spinal cord. ["Cribl. f. klin. Med.," Dec. 8, 1886, p. 899 (a. 34).]—**T. provoquée**. T. produced by bringing certain muscles into action. [A. 319 (a. 34).]

TRÉPIED (Fr.), n. $\text{Tra}^{\text{a}}\text{pe}^{\text{a}}$. A tripod.—**T. cœliaque**. See *TRIPUS Halleri*.—**T. vital**. Of Bichat, the combined functions of circulation, respiration, and brain-action. [A. 385 (a. 48).]

TREPOT (Fr.), n. $\text{Tra}^{\text{a}}\text{p}^{\text{a}}$. See LE TRÉPOT.

TREPPE (Ger.), n. $\text{Tre}^{\text{a}}\text{p}^{\text{a}}\text{pe}^{\text{a}}$. See SCALA and *Staircase* pulsation.—**Bowditch's t.** The contractions, gradually increasing in intensity until they reach a certain maximum, from which they as gradually decrease, observed when a bundle of smooth muscle fibres is stimulated by an induced current. [K.]—**Paukent**, **Trommelhöhle**. See SCALA tympani.

TRESCLEOUX (Fr.), n. $\text{Tre}^{\text{a}}\text{se}^{\text{a}}\text{cla}^{\text{a}}$. A place in the department of the Hautes-Alpes, France, where there is a sulphurous spring. [L. 49, 88 (a. 14).]

TRESCORE (It.), n. $\text{Tre}^{\text{a}}\text{se}^{\text{a}}\text{ko}^{\text{a}}$. A place in Bergamo, Italy, where there is an alkaline, saline, and sulphurous spring. [a. 14.]

TRESIS (Lat.), n. f. $\text{Tre}^{\text{a}}(\text{tra})^{\text{a}}\text{si}^{\text{a}}$. Gen., *tres'es* (-is). Gr., *τρήσις* (from *τρέπειν*, to pierce). See WOUND.—**T. causis**. See BURN.—**T. punctura**. A puncture. [E.]—**T. vulnus**. A wound. [E.]

TRESSAILLEMENT (Fr.), n. $\text{Tre}^{\text{a}}\text{se}^{\text{a}}\text{el}^{\text{a}}\text{y}^{\text{a}}\text{ma}^{\text{a}}\text{n}^{\text{a}}$. See SUBSULTUS.

TRESTER (Ger.), n. $\text{Tre}^{\text{a}}\text{st}^{\text{a}}\text{er}^{\text{a}}$. See MARE (3d def.).

TREVOA (Lat.), n. f. $\text{Tra}^{\text{a}}\text{vo}^{\text{a}}\text{a}^{\text{a}}$. A genus of the *Rhamneae*. [a. 35.]—**T. trinervis**. A shrub found from Bolivia to Chile. In Chile it is reputed vulnerary. [a. 35.]

TREWIA (Lat.), n. f. $\text{Tra}^{\text{a}}\text{wi}^{\text{a}}\text{a}^{\text{a}}$. Fr., *trévère*. A genus of the *Euphorbiaceae*. [a. 35.]—**T. macrophylla**, *T. macrostachya*, *T. nudiflora*. An East Indian tree. The root-bark is used as a diuretic and externally in podagra. [a. 35.]

TRIACANTHIN, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{k}^{\text{a}}\text{a}^{\text{a}}\text{th}^{\text{a}}\text{n}^{\text{a}}$. Of A. L. Metz, an alkaloid obtained from *Gleditschia triacanthos*; probably identical with gleditschin. [v. 2d def.]. [B. 270 (a. 38).]

TRIACETALDANE, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{a}^{\text{a}}\text{ld}^{\text{a}}\text{n}^{\text{a}}$. See under ALDANE.

TRIACETAMIDE, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{a}^{\text{a}}\text{m}^{\text{a}}\text{id}^{\text{a}}$ (heating triaceticamide. A substance, $(\text{C}_2\text{H}_3\text{O})_2\text{N}$, obtained by acetic anhydride with acetic anhydride. [B. 3, 4, 270 (a. 38).]

TRIACETIN, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{in}^{\text{a}}$. Fr., *triacétine*. Ger., *T. 1*. An oily liquid, $\text{C}_2\text{H}_5(\text{C}_2\text{H}_3\text{O}_2)_2$, found in the oil of *Euonymus europaeus*, in cod-liver oil, and in some of the fats, and obtainable from a mixture of glycerin and glacial acetic acid. It has a slightly bitter and pungent taste. 2. A rather thick liquid, $\text{C}_2\text{H}_5(\text{C}_2\text{H}_3\text{O}_2)_2$, obtained by heating butenyl alcohol with acetic anhydride. It has an agreeable odor. [B. 4; B. 3 (a. 38).]

TRIACETOGALLIC ACID, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{o}^{\text{a}}\text{ga}^{\text{a}}\text{li}^{\text{a}}$. Ger., *Triacetatgallussäure*. An acid, $\text{C}_2\text{H}_3(\text{O}.\text{C}_2\text{H}_3\text{O}_2)_3.\text{COOH}$, forming colorless actular crystals. [B. 4.]

TRIACETONALKAMINE, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{o}^{\text{a}}\text{n}^{\text{a}}\text{a}^{\text{a}}\text{k}^{\text{a}}\text{m}^{\text{a}}\text{en}^{\text{a}}$. A base, $\text{C}_2\text{H}_3\text{O}.\text{N}$, representing a molecule of triacetone to which two atoms of hydrogen have been added. It has an isomeric form, "pseudot." [B. 2.]

TRIACETONAMINE, TRIACETONHYDRAMINE, n's. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{o}^{\text{a}}\text{n}^{\text{a}}\text{a}^{\text{a}}\text{m}^{\text{a}}\text{en}$, -*hid*^{\text{a}}\text{ra}^{\text{a}}\text{m}^{\text{a}}\text{en}. See under ACETONAMINE.

TRIACETYL, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{yl}^{\text{a}}$. The compound $\text{C}_2\text{H}_3\text{O}$. [B.]—**Tissuelin**. A substitution product, $\text{C}_2\text{H}_3(\text{C}_2\text{H}_3\text{O})_2$, formed by the action of acetic anhydride on resacetin. [B. 2.]—**T'amine**. See TRIACETAMIDE.

TRIACETYLENE, n. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{e}^{\text{a}}\text{t}^{\text{a}}\text{yl}^{\text{a}}$. See BENZENE.

TRIACHENIUM (Lat.), n. n. $\text{Tri}^{\text{a}}(\text{tri})^{\text{a}}\text{a}^{\text{a}}\text{k}^{\text{a}}(\text{a}^{\text{a}}\text{ch}^{\text{a}})\text{en}^{\text{a}}(\text{a}^{\text{a}}\text{e}^{\text{a}}\text{n}^{\text{a}})$. [a. 35.]—**Triachium**. From *tres*, three, and *achenium* (q. v.). A fruit resembling a cremocarp except that it is composed of three carpels. [a. 35.]

TRIACID, adj. $\text{Tri}^{\text{a}}\text{a}^{\text{a}}\text{id}^{\text{a}}$. Having an acidity of three; of an acid or an acid salt, containing three atoms of replaceable hydrogen; capable of replacing three atoms of hydrogen in an acid.

TRIAD, *n.* *Tri*-a²d. 1. A combination of three. 2. A trivalent element or radical. [*a*, 48.]—**Hutchinson's t.** The conjunction of notched teeth, interstitial keratitis, and otitis; observed in hereditary syphilis. [*"Ann. méd. et sci. du Nord-Est"*; "Province méd.," Oct. 6, 1888, p. 77.]

TRIADÉLPHOUS, *adj.* *Tri*-a²d-*e*l'f'u^s. *Lat.*, *triadelphus* (from *trēs*, three, and *ἀδελφός*, a brother). *Fr.*, *triadelphe*. *Ger.*, *dreibrüdiger*, *triadelphe*. Having the stamens united by their filaments into three sets. [*a*, 35.]

TRIÉNE (*Lat.*, *n.* *Tri*-(*tri*)-*en*-(a³)*e*-n-(e)-a). *Gr.*, *τρίαινα*. A trident, a three-pronged structure, especially a three-pronged sponge-spicule. [*a*, 48.]

TRIAIDÉKAPHOBIA (*Lat.*, *n.* *Tri*-(*tri*)-a³-ka³-i³-d-ek-a³-fob-(fob³)ⁱ/i³-a³. From *trēs*, three, *καί*, and *δέκα*, ten, and *φόβος*, fear. A morbid or superstitious dread of the number thirteen. [*a*, 34.]

TRIALKALAMIDE, *n.* *Tri*-a²l-ka²l'a²m-i²d-(id). See under **ALKALAMIDE**.

TRIALKYL, *n.* *Tri*-a²l'ki²l. *Ger.*, *T.* A triple molecule of an alkyl; a compound consisting of 3 alkyl molecules united together. [*B*, 4.]

TRIALKYLAMINE, *n.* *Tri*-a²l-ki²l'a²m-i²n. *Ger.*, *Trialkylamin*. See under **ALKYLAMINE**.

TRIALKYLIC, *adj.* *Tri*-a²l-ki²l'i²k. Pertaining to a trialkyl; containing 3 molecules of an alkyl. [*B*, 4.]

TRIALLYLAMINE, *n.* *Tri*-a²l'i²l'a²m-en. The compound (C₃H₅)₃N. [*B*, 3 (a, 38).]

TRIALLYLIN, *n.* *Tri*-a²l'i²l-i²n. Oxide of allyl and glyceryl, C₁₂H₂₀O₃ = (C₃H₅)₂ O₂. [*B*, 2.]

TRIAMIDOAZOBENZENE, *n.* *Tri*-a²m'i²d-o-a²z-o-be'nz'e-n-e. A substance, C₁₂H₁₃N₃ = (NH₂)₂C₆H₅—N=N—C₆H₅(NH₂), constituting the dye known as Bismarck-brown, occurring as tabular crystals. [*B*, 3 (a, 38); *B*, 4.]—**T. hydrochloride**. Manchester-brown, vesuvium; a dyestuff, C₁₂H₁₃N₃(ClH), occurring as a brown crystalline mass. [*B*, 3 (a, 38).]

TRIAMIDOBENZENE, *n.* *Tri*-a²m'i²d-o-be'nz'e-n-e. A substance, C₆H₃(NH₂)₃, known in two isomeric forms: α-*t.*, C₆(NH₂)₃NH₂.H₂H₂H₂, occurring as a red or brown crystalline mass; and β-*t.*, C₆(NH₂)₃NH₂.H₂NH₂.H₂NH₂, a crystalline mass turning red in the air. [*B*, 3 (a, 38).]

TRIAMIDOBENZOIC ACID, *n.* *Tri*-a²m'i²d-o-be'nz'o-i²z'k. A monobasic crystalline acid, C₆H₃(NH₂)₃CO₂OH, produced by the action of reducing agents on dimtramidobenzoic acid. [*B*, 2.]

TRIAMIDOPHENOL, *n.* *Tri*-a²m'i²d-o-fe'n'o²l. *Fr.*, *triamidophénol*. *Ger.*, *T.* A very unstable triacid base, C₆H₃(NH₂)₃OH. [*B*, 3 (a, 38); *B*, 4.]—**T. hydrochloride**. A substance, C₆H₃(NH₂)₃OH.3HCl = C₆H₃N₃Cl₃O, forming colorless acicular crystals. [*B*, 4.]

TRIAMINE, *n.* *Tri*-a²m'en. See under **AMINE**.

TRIAMMONIC, *adj.* *Tri*-a²m-mo²n'i²z'k. *Fr.*, *triammoniacal*. Containing three molecules of ammonium. [*B*, 1.]

TRIAMYLAMINE, *n.* *Tri*-a²m'i²l'a²m-en. Tertiary amine of amyl, N(C₅H₁₁)₃. [*B*, 1.]

TRIAMYLENE, *n.* *Tri*-a²m'i²l-en. *Fr.*, *triamylène*. *Ger.*, *Triamylen*. A liquid, C₁₅H₂₄, of terebinthine odor, a polymeride of the amylene derived from fermentation amyl alcohol. [*B*, 2, 4.]

TRIAMYLIN, *n.* *Tri*-a²m'i²l-i²n. A substance, C₂H₅(C₅H₁₁)₂O₃, produced by heating amyl alcohol and acrolein with a little acetic acid. [*B*, 2.]

TRIAMYLPHOSPHINE, *n.* *Tri*-a²m'i²l-fo's'fen. The compound (C₅H₁₁)₃P. [*B*, 3 (a, 38).]

TRIAMYLSTIBINE, *n.* *Tri*-a²m'i²l-st'i²b'en. *Ger.*, *Triamylstibin*. The compound Sb(C₅H₁₁)₃. [*B*, 3.]

TRIANDROUS, *adj.* *Tri*-a²nd'ru's. *Lat.*, *triandrus*, *triandrus* (from *trēs*, three, and *ἀνδρ*, a man). *Fr.*, *triandre*. *Ger.*, *dreimännig*, *triandrisch*. Having three stamens. The *Triandra* (*Fr.*, *triandre*) are a Linnean class of plants with t. flowers. [*a*, 35.]

TRIANGLE, *n.* *Tri*-(a²)n²-g²l. *Gr.*, *τρίγωνον*. *Lat.*, *trigonum*, *triangulum*, *triangulus* (from *tres*, three, and *angulus*, an angle). *Fr.*, *t.* *Ger.*, *Dreieck*. A three-cornered and three-sided figure, an area or space of three-cornered shape. [*a*, 48.]—**Anterior t. of the neck.** The space bounded by the middle line of the neck, the anterior border of the sterno-cleido-mastoid, and a line running along the lower border of the inferior maxilla and continued to the mastoid process of the occipital bone. [*L*.]—**Assézat's t.** A t. bounded by lines uniting the projection of the nasion on the alveolo-condylar plane and the alveolar and nasal points and one uniting the two latter. [*a*, 34.]—**Cephalic t.** A t. on the antero-posterior plane of the skull formed by lines joining the occiput and forehead and chin, and one uniting the two latter. [*Ann. de gynec.*, "Mar. 1892, p. 165 (a, 34)."]—**Cervical t.** *Ger.*, *Halsdreieck*. See **TRIANGULAR CERVICAL**.—**Facial t.** A t. bounded by lines uniting the basion and the alveolar and nasal points and one uniting the two latter. [*a*, 34.]—**Frontal t.** A t. bounded by the maximum frontal diameter and lines joining its extremities and the glabella. [*a*, 34.]—**Hesselbach's t.** The space on the posterior surface of the anterior wall of the abdomen bounded by Poupart's ligament, the epigastric artery, and the rectus abdominis. [*L*.]—**Inferior carotid t.** *Lat.*, *trigonum caroticum inferius*. The space bounded by the middle line of the neck, the anterior border of the sterno-cleido-mastoid, and the anterior belly of the omohyoid. [*L*.]—**Inferior occipital t.** Of Welcker, a t. having the bimastoid diameter for its base and theinion for its apex. [*a*, 34.]—**Inguinal t.** See *Scarpa's t.*—**Lumbo-costo-abdominal t.** The space bounded in front by the obliquus abdominis externus, above by the lower

border of the serratus posticus inferior and the point of the twelfth rib, behind by the outer edge of the erector spinae, and below by the obliquus abdominis internus. [*"Ctbl. f. Chir."*, Sept. 15, 1888, p. 688 (*L*.)].—**Mento-condylar t.** Of A. v. Török, a t. having its base extending between the condyles of the inferior maxilla and its apex at the gnathion. **Mento-gonial t.** Of T. v. Török, a t. having the bigonial diameter as its base and the gnathion as the apex. [*a*, 34.]—**Mento-mastoid t.** Of A. v. Török, a t. having the bimastoid diameter as its base and the gnathion as its apex. [*a*, 34.]—**Mylo-hyoid t.** The triangular space formed by the mylo-hyoid muscle and the two bellies of the digastric muscle. [*a*, 34.]—**Occipital t. of the neck.** The space bounded by the sterno-cleido-mastoid, the trapezius, and the omohyoid. [*L*.]—**Omo-clavicular t.** See **Subclavian t.—**Omo-hyoid t.** See **Superior carotid t.—**Palatal t.** *Lat.*, *trigonum palatinum*. *Ger.*, *Gaumendreieck*. Of A. v. Török, a t. having the width of the palate for its base and the alveolar point for its apex. [*a*, 34.]—**Petit's t.** See **TRIANGULUS PETITII**.—**Posterior cervical t.** *Posterior t. of the neck.* See **Superior carotid t.—**Pubo-urethral t.** A t. having its base in the perineum bounded by the ischio-cavernosus muscle externally, the bulbo-cavernosus muscle internally, and the transversus perinei muscle posteriorly. [*a*, 34.]—**Scarpa's t.** A t. with its apex below, bounded by Poupart's ligament, the adductor longus, and the sartorius. [*L*.]—**Subclavian t.** A space bounded by the posterior belly of the omohyoid, the upper border of the clavicle, and the posterior margin of the sterno-cleido-mastoid. [*L*.]—**Submaxillary t.** The space between the lower border of the inferior maxilla, the parotid gland, and the mastoid process of the temporal bone above, the posterior belly of the digastric and the stylohyoid below, and the middle line of the neck in front. [*L*.]—**Superior carotid t.** *Lat.*, *trigonum caroticum superius*. *Ger.*, *oberes Halsdreieck*. The space bounded by the sterno-cleido-mastoid, the posterior belly of the digastric, and the anterior belly of the omohyoid. [*L*.]—**Superior occipital t.** Of Welcker, a t. having the biparietal diameter for its base and theinion for its apex. [*a*, 34.]—**Superior t. of the neck.** See **Superior carotid t.**—**T. de lumière (Fr.)**, **T. lumineux (Fr.)**. See **Light spot on the membrana tympani**.—**T. médullaire (Fr.)**. See **FORNIX CEREBRI**.—**T. omo-trachéal (Fr.)**. See **Inferior carotid t.**—**Upper cervical t.** See **Superior carotid t.********

TRIANGULAIRE (Fr.), *adj.* *Tri*-a²n²-gu-la'ir. See **TRIANGULAR**, as a *n.*, see **TRIANGULARIS**.—**T. des lèvres**. See **RISORII** and **DEPRESSOR ANGULI ORIS**.—**T. du coccyx**. See **COCYCGEUS** (2d def.).—**T. du nez**. See **COMPRESSOR NASII**.—**T. du menton**. See **DEPRESSOR ANGULI ORIS**.—**T. interne**. See **CORRUGATOR LABII INFERIORIS**.

TRIANGULAR, *adj.* *Tri*-a²n²-gu-la'ir. *Gr.*, *τρίγωνος*. *Lat.*, *triangularis*, *triangulatus*. *Fr.*, *triangulaire*, *triangulé*. *Ger.*, *dreieckig*, *dreikantig*, *dreiseitig*. Having three angles; having a three-cornered shape. [*a*, 35, 48.]

TRIANGULARE (*Lat.*, *n.* *Tri*-(*tri*)-a²n²-g(a²)n²-gu-la²l-(u²)l-ar(a²)r'e(a). *Gen.*, *aris*. See **Pyramidal bone**.

TRIANGULARIS (*Lat.*, *adj.* *Tri*-(*tri*)-a²n²-g(a²)n²-gu-la²l-(u²)l-ar(a²)r'i²s. See **TRIANGULAR**; as a *n.*, see **DEPRESSOR ANGULI ORIS**.—**T. cerebri**. See **FORNIX CEREBRI**.—**T. coccygis**. See **COCYCGEUS** (2d def.).—**T. inferior**. See **DEPRESSOR ANGULI ORIS**.—**T. labii superioris**. See **LEVATOR ANGULI ORIS**.—**T. menti**. See **T. n.**—**T. nasi**. See **COMPRESSOR NASII**.—**T. oris**. See **T. n.**—**T. sterni**. *Ger.*, *dreieckig* (oder *innerer*) *Brustmuskel*. A thin, flat muscle arising by fleshy digitations from the inner surfaces of the cartilages of the second to the sixth ribs, and inserted into the posterior surface of the sternum, its xiphoid process, and the cartilages of the lower one or two true ribs. [*L*, 31, 142, 332.]

TRIANGULUS (*Lat.*, *n.* *Tri*-(*tri*)-a²n²-g(a²)n²-gu-la²l-(u²)l-u²s-(u²)s. See **TRIANGLE**.—**T. inguinalis**. See **Scarpa's triangle**.—**T. Petiti**. A triangular space between the anterior border of the latissimus dorsi, the posterior border of the obliquus abdominis externus, and the crest of the ilium. [*a*, 17.]—**T. subinguinalis**. See **Scarpa's triangle**.

TRIANTHESCULETIN, *n.* *Tri*-a²n²-i²l-c²o-ku²-le²t-i²z'n. A 8-molecule aniline substitution compound, C₈H₈O(C₆H₅N)₈, as esculetin. [*B*, 2.]

TRIANOSPHERMA (*Lat.*, *n.* *Tri*-(*tri*)-a²n²-o(a²)n²-o(a²)-spu²rrm-(spe²)rrm'a². See **ABOBORA** (2d def.).—**T. ficifolia**. See **BRYONIA ficifolia**.

TRIANTHEMA (*Lat.*, *n.* *Tri*-(*tri*)-a²n²-th(a²)n²-em(am)a². From *trēs*, three, and *ἀνθος*, a flower. *Fr.*, *trianthème*. *Ger.*, *Dreiblume*. A genus of the *Azoidae*. [*a*, 35.]—**T. decandra**. A common weed in India. The root is used in hepatitis and asthma, and its bark as an aperient. [*a*, 35.]—**T. monogyna**. *Fr.*, *trianthème d'un seul pistil*. *Ger.*, *portulakblüttrige Dreiblume*. Horse-mustard; a weed of India and tropical South American species. The entire plant has an unpleasant bitter taste, and is used as a stimulant to the mucous membranes and in disturbances of digestion and respiration. [*a*, 35.]—**T. oboordata**. A plant official in the Ph. of India, used as an astringent. The nauseous roots are cathartic. The herb is eaten, but is said to produce diarrhoea and paralysis. [*a*, 35.]

TRIANTHOUS, *adj.* *Tri*-a²n²th'u²s. Three-flowered. [*a*, 35.]

TRIARACHIN, *n.* *Tri*-a²r'a²ch-i²n. A substitution compound, C₈H₈(C₆H₅O)₈, of glycerin. [*B*, 2.]

TRIARSENATE, *n.* *Tri*-a²rs'e²n-at. See under **ARSENATE**.

TRIATHLODOME (*Fr.*, *n.* *Tri*-a²l-lo-dom. A monster similar to an atlododymus, but having three heads. [*a*, 48.]

TRIATOMIC, *adj.* *Tri*-a²t-o²m'i²z'k. *Lat.*, *triatomicus* (from *trēs*, three, and *ἄτομος*, an atom). *Fr.*, *triatomique*. *Ger.*, *dreiatomig*. 1. Of molecules of elementary bodies, containing three atoms. 2. Of compounds, containing three atoms of replaceable hydrogen. 3. Of radicles, having a combining capacity that is saturated by union with three hydrogen atoms. [*B*, 1.]

TRIBADE (Fr.), n. Tre-ba'd. See **TRIBAS**.

TRIBADISM, n. Tri-ba'd-i-z'm. Lat., *tribadismus* (from *tribās* [see **TRIBAS**]). Fr., *tribadisme*. Ger., *Tribadie*, *Tribadismus*. Unnatural sexual indulgence between two women, in which an abnormally large clitoris takes the part of a penis. [D.]

TRIBARYTIC, adj. Tri-ba'r-y'ti'k. Containing three atoms of barium. [B.]

TRIBAS (Lat.), n. f. Trib(tre)b/a's(a's). Gen., *trib'ados* (-adis). Gr., *tribās* (from *tribēu*, to rub). Fr., *tribade*. A woman who practises tribadism.

TRIBASIC, adj. Tri-bas'i'k. Fr., *tribasique*. Ger., *dreibasisch*. 1. Of acids and alcohols, containing in the molecule three atoms of hydrogen replaceable by bases. See **T**. acid and **T**. atomic alcohol. As regards alcohols, the term is superseded by *trihydric*. 2. Of salts, formed from a t. acid by the replacement of three atoms of hydrogen by bases. [a, 38.]

TRIBE, n. Trib. Lat., *tribus*. Fr., *tribu*. Ger., *Gruppe*. In botany, a division of an order (or suborder); a group superior to a genus and subordinate to a family. [a, 35.]

TRIBENZOYIN, n. Tri-be'n'o-i'n/a-i'n. Fr., *tribenzoycine*, *tribenzoïne*. A glyceride of benzoic acid, $C_{24}H_{20}O_6 = C_3H_5(C_6H_5CO.O)_3$. [B, 93 (a, 14).]

TRIBROMACETIC ACID, n. Tri-brom-a'se't(e't)'ik. A monobasic acid, $C_2Br_3HO_2 = CBr_3 - COOH$, derived from acetic acid, forming transparent prismatic crystals. [B, 3 (a, 38); B, 4.]

TRIBROMACETOXYL, **TRIBROMACETYL**, n's. Tri-brom-a's'e't-o'x'i'l, a's'e't'i'l. Ger., *Tribromacetyl*. A radicle, $CBr_3CO = C_2Br_3O$, derived from acetyl (acetoxy). [B, 4.]

TRIBROMALDEHYDE, n. Tri-brom-a'l'de'hid. Ger., *Tribromaldehyd*. See **BROMAL**.

TRIBROMAMIDOBENZENE, **TRIBROMANILINE**, n's. Tri-brom-a'm-i'd-o-be'n'zen'e, a'm'i'l'i'n. A substitution compound of aniline, $C_6H_3Br_3NH_2$. Two isomeric varieties are known, both forming crystalline solids. [B, 4.]

TRIBROMBENZENE, n. Tri-brom-be'n'zen'e. Ger., *Tribrombenzol*. A triatomic bromine substitution-product of benzene, $C_6H_3Br_3$. There are three isomeric modifications, all crystalline. [B, 4.]

TRIBROMMETHYLENE, n. Tri-brom-e'th'i'l'en. Ger., *Tribromäthylen*. See **ETHYNYL tribromide**.—**T**. dibromide. See **ETHYNYL pentabromide**.

TRIBROMHYDRIN, n. Tri-brom-hi'd'r'i'n. Fr., *tribromhydrine*. Ger., *T*. A body, $C_2H_4Br_3 = CHBr - CHBr - CH_2Br$, isomeric with brompropylene dibromide. [B, 3 (a, 38); B, 4.]

TRIBROMHYDROQUINONE, n. Tri-brom-hi'd-ro-kiw'i'n'on. A substitution-product, $C_6HBr_3(OH)_2$, of hydroquinone. [B, 4.]

TRIBROMIDE, n. Tri-brom'i'd'id. Fr., *tribromure*. Ger., *Tribromür*. A bromine compound analogous to a trichloride (q. v.). [B.]

TRIBROMORCIN, **TRIBROMORCINOL**, n's. Tri-brom-o'r's'i'n, -o'r's'i'n-o'l. Fr., *tribromorcine*. Ger., *T*. The compound $C_9H_7Br_3(OH)_2$. [B, 3 (a, 38); B, 4.]

TRIBROMOXALIN, n. Tri-brom-o'x'a'l'i'n. An acid, $C_9Br_3N(H)$; the only acid, except hydrocyanic acid, which contains carbon without either sulphur or oxygen. [B, 3 (a, 38).]

TRIBROMPHENOL, n. Tri-brom-fe'n'o'l. Ger., *T*. The compound $C_6H_3Br_3(OH)$. [B, 3 (a, 38); B, 4.]

TRIBROMSALICYLIC ACID, n. Tri-brom-sa'l'i's'i'l'i'k. The compound $C_7H_3Br_3O_3$. [B.]

TRIBROMTOLUENE, n. Tri-brom-to'l'u'e'n. Ger., *Tribromtoluol*. A substitution compound, $C_7H_3Br_3CH_3$, of toluene, of which six isomeric varieties are known, all crystalline solids. [B, 3 (a, 38); B, 4.]

TRIBULUS (Lat.), n. m. Tri'b'u'l(u'l)'u's(-u's). Ger., *tribullos*. Fr., *herse*, *tribule*. Ger., *Burzelorn*. Caltrop; a genus of the *Zygophylleae*. The *Tribuleæ* are a subdivision of the *Zygophylleae*. [a, 35].—*T. cistoides*. Fr., *herse cistioïde*. Turkey-blossom; a West Indian species. The roots are used as an aperient, and the bruised leaves as a maturant. [B, 35].—*T. lanuginosus*. An East Indian species. The leaves and root are used as a diuretic, the seeds in gonorrhoea and dropsy, and the herb as an astringent and antelmintic. [a, 35].—*T. maximus*. Ger., *grosser Burzelorn*. A West Indian species. The root is used in laxative potions, and the leaves in emollient poultices or in salves in skin diseases. [a, 35].—*T. terrestris*. Fr., *herse (hérissé)*, *croix de chevalier* (ou de Malle), *herbe (ou saligot, ou tribule) terrestre*, *tribule commun*. Ger., *gemeiner Burzelorn*, *Eristachnus*. Land-caltrops, the *sp. Bores* of horses; found in southern Europe, Asia Minor, and northern Africa. It was formerly used as an astringent tonic in dysentery, hæmorrhages, etc. [a, 35].

TRIBUTUM (Lat.), n. n. Tri'b'u't(u't)'u'm(u'm). From *tribuere*, to render. A tribute.—*T. lunare*. See **MENSTRUATION**.

TRIBUTYLAMINE, n. Tri-bu't'i'l'a'm'i'n. Fr., *t*. Ger., *Tributylamin*. An oily liquid, $N(C_4H_9)_3$, boiling at 208° C. [B.]

TRIBUTYRIN, n. Tri-bu't'i'r'i'n. Fr., *tributyryne*. Ger., *T*. A substance, $C_{24}H_{40}(C_4H_7O_2)_3$, forming one of the constituents of butter, and occurring as a liquid of sharp and bitter taste. [B, 3 (a, 38); B, 4.]

TRICE (Lat.), n. f. pl. Tris(trek)'e(a's-e's). From *tri*, hair. See **PLICA** (2d def.).

TRICAPRIN, **TRICAPRININ**, n's. Tri-ka'p'r'i'n, -r'i'n-i'n. See under **GLYCERYL caprate**.

TRICAPROIN, **TRICAPRONIN**, n's. Tri-ka'p'ro-i'n, -ka'p'ron-i'n. Ger., *T*. See under **GLYCERYL caproate**.

TRICAPRYLIN, n. Tri-ka'p'p-ri'l'i'n. See under **GLYCERYL caprylate**.

TRICARBON, n. Tri-ka'r'b'o'n. A radicle composed of three atoms of carbon. [B.]

TRICARPELLARY, adj. Tri-ka'r'p'e'l-a-ri'i'. Lat., *tricarpellaris*. Having three carpels. [a, 33.]

TRICARPOUS, adj. Tri-ka'r'p'u's. Lat., *tricarpus* (from *treis*, three, and *καρπός*, fruit). Composed of three united fruits. [a, 33.]

TRICAUDALIS (Lat.), n. m. Tri(tri)'ka'd(k'a'd)(ka'd)-al(a'l)'i's. From *tres*, three, and *cauda*, the tail. See **RETRAHENS aurem**.

TRICEPHALOUS, adj. Tri-se'p'a'l'u's. Lat., *tricephalus* (from *treis*, three, and *κεφαλή*, the head). Fr., *tricéphale*. Ger., *dreiköpfig*. Having three heads; of a fruit, having three beaks. [a, 35.] The *tricephalus* (Fr., *tricéphale*; Ger., *Dreikopf*) of Veit is that form of double monster in which there is only one body below the umbilicus, two chests and necks with separate lungs, hearts, and tracheæ, but three heads with three distinct larynges. [L, 49 (a, 14).]

TRICEPS (Lat.), adj. Tri(tri)'se'ps(ke'ps). Gen., *tricip'itis*. From *tres*, three, and *caput*, the head. Fr., *T*. Three-headed; as n. m., a muscle that has three heads. [a, 48].—*T. auris*. See **RETRAHENS aurem**.—*T. biceps brachii*. A muscle in solids formed by the union of the scapulo-olecranon, scapulo-olecranon major, humero-olecranon internus, and humero-olecranon externus. [L].—*T. brachialis* (Coue), *T. brachii*. Fr., *t. brachial*. See *T. EXTENSOR cubiti*.—*T. cruris*. 1. See *EXTENSOR cruris quadriceps*. 2. In solids, the rectus, vastus internus, and vastus externus muscles regarded as one. [L].—*T. femoris*. Fr., *t. fémoral*. See *EXTENSOR cruris quadriceps*.—*T. magnus*. See *ADDUCTOR femoris magnus*.—*T. minor*, *T. primus*. See *ADDUCTOR femoris longus*.—*T. secundus*. See *ADDUCTOR femoris brevis*.—*T. suræ*. The combined gastrocnemius and soleus muscles. [L, 31.]

TRICERASTES (Lat.), n. f. Tri(tri)'se'r(ke'r)'a'st(a'st)'ez(as). Fr., *triceraste*. The genus *Datisca*. [a, 35].—*T. glomerata*. Durango plant; a California species; a stomachic and cardiac stimulant. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 608 (a, 14).]

TRICHADENIA (Lat.), n. f. Tri'k(tri'ch)'a-d(a'd)-en(an)'i'a-s. From *tri*, a hair, and *ἀδών*, a gland. Fr., *trichadénia*. [a, 35].—*T. zeylanica*. The *tettigaha* of Ceylon; a large tree the seeds of which yield an oil used for burning and in the skin diseases of children. [a, 35.]

TRICHAMOMILLOL, n. Tri-ka'm'o-mi'l'o'l. A deep-blue, viscid substance, $C_{20}H_{34}O_8$, of slight odor. It is one of the constituents of oil of chamomile, ethereal oil of wormwood, oil of ricinus beans, and the oil obtained from galbanum by dry distillation. [B, 3 (a, 38).]

TRICHANGIELECTASIA (Lat.), n. f. Tri'k(tri'ch)'a-ŋ(a'ŋ)-i'a-s. *ŋi'a*(ge'i'-ŋ)-e't'k-taz(ta's)'i'a-s. From *tri*, a hair, *ἀγγειον*, a vessel, and *ἐκτασις*, extension. See **TELANGELECTASIS**.

TRICHANGIUM (Lat.), n. n. Tri'k(tri'ch)'a-ŋ(a'ŋ)-i'ŋ(-ge'i'ŋ)-u'm(u'm). From *tri*, a hair, and *ἀγγειον*, a vessel. See **CAPILLARY** (3d def.).

TRICHASMU (Lat.), n. m. Tri'k(tri'ch)'a-ŋ(a'ŋ)-mu's(mu's). From *tri*, a hair. See **HYPERTRICHOSIS**.

TRICHATROPHIA (Lat.), n. f. Tri'k(tri'ch)'a-t'ro'phi'a(-ro'ro'ŋ)-i'a-s. From *tri*, a hair, and *ἀτροφία*, atrophy. Atrophy of the hair. [a, 34.]

TRICHAUXE (Lat.), **TRICHAUXIS** (Lat.), n. f. Tri'k(tri'ch)'a-t'x'(-u'x)-e(a), -is. Gen., *-u'x'es*, *-u'x'eos* (-is). From *tri*, a hair, and *αὔξη*, growth. See **HYPERTRICHOSIS**.

TRICHIA (Lat.), n. f. Tri'k(tri'ch)'i'a-s. From *tri*, a hair. 1. An old term for entropion. [F.] 2. See **TRICHIASIS**.

TRICHIASIS (Lat.), n. f. Tri'k(tri'ch)'i-a(s)'i's. Gen., *-as'eos* (-is). Ger., *trichiasis* from *tri*, a hair. Fr., *t*. Ger., *T*. It., *trichiasi*. Sp., *triquiasis*. 1. See **TRICHOSSIS**. 2. That condition of the eyelids in which, owing to long-continued marginal blepharitis or to chronic trachoma, some of the eyelashes are inverted and rub over and irritate the eyeball. It is frequently complicated by spasm of the orbicularis muscle. T. passes into entropion by imperceptible degrees. [F.] 3. Of Hippocrates, a voiding of hair with the urine. 4. An abscess of the mamma. [L, 50 (a, 14).]—*T. caruncule*. The development of long, stout hairs in the caruncle of the inner canthus of the eye. [F.]—*T. of the anus*. Inversion of the hairs which grow about the anus. [D.]

TRICHILIA (Lat.), n. f. Tri'k(tri'ch)'i-l'i'a-s. From *trichia*, three-lipped. Fr., *trichilie*. A genus of tropical African and American trees. The *Trichilieæ* are a tribe of the *Meliaceæ*. [a, 35].—*T. cathartica*. A Brazilian tree. The bark is purgative and emetic and is used in dropsy. [a, 35].—*T. emetica*. The roka-tree of Arabia. The bark and fruits are emetic; a decoction of the fruits is used as a hair-wash, and an ointment made from the seeds is used in itch. [a, 35].—*T. havanensis*. A Cuban and Mexican species with a purgative bark. [a, 35].—*T. moschata*. Musk-wood; a Jamaica species; according to Hancock, found also in Guinea, and a source of jural-bark. [a, 35].—*T. trifoliata*. A West Indian and South American shrub, all parts of which have an offensive odor. The bark, which is a drastic purgative and uterine stimulant, is used in amenorrhoea, intestinal catarrh, and asthma, and as an abortifacient. [a, 35.]

TRICHINA (Lat.), n. f. Tri'k(tri'ch)'i-n(e'n)'a-s. From *tri*, a hair. Fr., *trichine*. Ger., *Haarwurm*, *Trichine*. A genus of parasitic worms, of the *Nematoidæ*. [a, 48].—*T. cystica*. See *FILARIA medinensis*.—*T. spiralis*. Fr., *trichine*. Ger., *Trichine*. A small viviparous species from $\frac{1}{16}$ to $\frac{1}{8}$ inch in length (the female

being somewhat the larger), having a pointed, narrow, and unarmed head with a small oral aperture. The larvae are very tenacious of life, having been kept alive for a month. They present the form of spirally coiled worms, in the interior of small globular or oval cysts, about $\frac{1}{16}$ inch long, and are usually found in the voluntary muscles. In some cases they are found free. The flesh containing the larvae having been eaten, they are set free during digestion and attain maturity rapidly, sometimes within forty-eight hours, and after a week the young are discharged from the uterus of the female, and, piercing the intestines, burrow into the tissues, producing trichiniasis. [L.]

TRICHINATOUS, adj. $\text{Tri}^2\text{-ki}^2\text{-n}^2\text{-a}^2\text{-t}^2\text{-u}^2\text{s}$. See TRICHINOUS.

TRICHINIASIS (Lat.), n. f. $\text{Tri}^2\text{-k}$ (tri^2ch^2)- i^2n (en)- $\text{i}^2\text{-a}$ (a)- s (is). Gen., - as (eas - i asis). From *trichina* (q. v.). The disease produced by the entrance of trichinae into the organism. The initial symptoms are those of gastro-intestinal disturbance (a sense of pressure in the epigastrium, nausea, and vomiting, followed usually by violent diarrhoea), followed in a week or two by excessive pain and soreness of the muscles to which the trichinae may have gained access. [A, 446.]

TRICHINOPHOBIST, n. $\text{Tri}^2\text{-k}$ - i^2n - o^2f - b - i^2st . From *trichina* (q. v.), and $\phi\epsilon\phi\epsilon\iota\sigma$, to fear. One who has a morbid dread of trichiniasis in himself or in others. [Shoemaker. "N. Y. Med. Jour.," May 10, 1884, p. 528 (D).]

TRICHINOSIS (Lat.), n. f. $\text{Tri}^2\text{-k}$ (tri^2ch^2)- i^2n (en)- o^2s (is). Gen., - as (eas - i is). See TRICHINIASIS.

TRICHINOUS, adj. $\text{Tri}^2\text{-k}$ - i^2n - u^2s . Infested with trichinae, due to the presence of trichinae.

TRICHOTIS (Lat.), n. f. $\text{Tri}^2\text{-k}$ (tri^2ch^2)- i^2o (is). Gen., - os (eas - i is). From $\phi\tau\iota\varsigma$, a hair. See TRICHOSIS and TRICHIASIS (2d def.).—**T. distrix**. See DISTRIX and cf. FRAGILITAS crinium and TRICHORHINX nodosa.

TRICHISMUS (Lat.), n. m. $\text{Tri}^2\text{-k}$ (tri^2ch^2)- i^2s (is)- m (us)- s (mus). Gr., $\tau\rho\iota\chi\iota\sigma\mu\varsigma$ (from $\phi\tau\iota\varsigma$, a hair). Fr., trichisme. Ger., Haarspalt, Haarbruch. See Linear FRACTURE.

TRICHITIS (Lat.), n. f. $\text{Tri}^2\text{-k}$ (tri^2ch^2)- i (e)- ti (s). Gen., - i (idos - i idis). From $\phi\tau\iota\varsigma$, a hair. Ger., Haarentzündung. Inflammation of the hair. [A, 34.]

TRICHLORACETAL, n. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$. A colorless liquid, $\text{CCl}_3-\text{CH}(\text{O})_2\text{H}_5$, formed by the action of chlorine on alcohol. An isomeric variety, $\text{CHCl}_2\text{CCl}(\text{O})_2\text{C}_2\text{H}_5$, is a crystalline solid obtained by the action of alcohol on tetrachlorethyl oxide. [B, 2.]

TRICHLORACETAMIDE, n. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$ - a^2m - i^2d (id). A body, $\text{CCl}_3\text{CO}(\text{NH}_2) = \text{C}_2\text{Cl}_5\text{H}_2\text{NO}$, forming shiny laminar or prismatic crystals, of sweetish taste and aromatic odor. [B, 3 (a, 38); B, 4.]

TRICHLORACETIC, adj. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$ - i^2k . Acetic and containing three substituted atoms of chlorine. [B, 1.—**T. acid**. A monobasic acid, $\text{CCl}_3\text{COOH} = \text{C}_2\text{Cl}_3\text{H}_2\text{O}_4$, forming colorless rhomboedral crystals. Used as a caustic. [B, 4.]—**T. phosphide**. A colorless substance, $\text{C}_2\text{Cl}_3\text{O.PH}_3 = \text{CCl}_3-\text{CO.PH}_3$, analogous in structure to trichloroacetamide. [B, 2.]

TRICHLORACETONITRIL, n. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$ - o - nitr - i^2k . An oily liquid, $\text{C}_2\text{Cl}_3\text{N} = \text{CCl}_3\text{CN}$, of penetrating odor. [B, 4.]

TRICHLORACETOPHOSPHAMIDE, n. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$ - o - fos (ph)- a^2m - i^2d (id). See TRICHLORACETIC phosphide.

TRICHLORACETYL, n. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$ - i^2k . Syn.: *trichloroacetyl*. A radicle, $\text{CCl}_3\text{CO} = \text{C}_2\text{Cl}_3\text{O}$.—**T. bromide**. A yellowish fuming liquid, $\text{C}_2\text{Cl}_3\text{O.Br}$. [B, 4 (a, 38).]—**T. carbamide**. See **T. urea**.—**T. chloride**. An oily liquid, $\text{CCl}_3\text{COCl} = \text{C}_2\text{Cl}_3\text{O}$, of powerful odor. [B, 4.]—**T. hydrate**. Trichloroacetic acid. [B, 1.—**T. hydride**. See CHLORAL.—**T. nitride**. See TRICHLORACETAMIDE.—**T. phosphide**. See TRICHLORACETIC phosphide.—**T. urea**. A substance, $\text{CCl}_3\text{CO}-\text{NH.CO.NH}_2 = \text{C}_2\text{H}_2\text{Cl}_3\text{N}_2\text{O}_4$, formed by the substitution of t for hydrogen in urea. [B, 2.]

TRICHLORACETYPHIDE, n. $\text{Tri}^2\text{-klor}$ - a^2s - $\text{e}^2\text{-t}$ - i^2k - i^2d (id). See TRICHLORACETIC phosphide.

TRICHLORALDEHYDE, n. $\text{Tri}^2\text{-klor}$ - $\text{a}^2\text{-i}^2\text{d}$ - $\text{e}^2\text{-h}$ - id . See CHLORAL.

TRICHLORANILINE, n. $\text{Tri}^2\text{-klor}$ - $\text{a}^2\text{-n}$ - $\text{i}^2\text{-l}$ - en . A substitution product of aniline, $\text{C}_6\text{H}_3\text{Cl}_3\text{NH}_2$. Three isomeric crystalline varieties are known. [B, 3 (a, 38); B, 4.]

TRICHLORBENZENE, n. $\text{Tri}^2\text{-klor}$ - $\text{be}^2\text{-nz}$ - en . A substitution product of benzene, $\text{C}_6\text{H}_3\text{Cl}_3$. There are three isomeric modifications, all crystalline substances, differing in appearance and in their fusing points. [B, 4.]

TRICHLORBENZOIC ACID, n. $\text{Tri}^2\text{-klor}$ - $\text{be}^2\text{-nz}$ - o - i^2k . A crystalline acid, $\text{C}_6\text{H}_2\text{Cl}_3\text{CO}_2\text{H}$, known in three isomeric forms. [B, 3 (a, 38).]

TRICHLORBENZOIC ALDEHYDE, n. $\text{Tri}^2\text{-klor}$ - $\text{be}^2\text{-nz}$ - o - i^2k . A solid substance, $\text{C}_6\text{H}_2\text{Cl}_3\text{CHO}$, known in two isomeric forms. [B, 3 (a, 38); B, 4.]

TRICHINA SPIRALIS.
[A, 327.]

TRICHLORBUTIDENE, **TRICHLORBUTYLIDENE**, n's. $\text{Tri}^2\text{-klor}$ - $\text{bu}^2\text{-t}$ - i^2d - en , - $\text{bu}^2\text{-t}$ - i^2k - en . A bivalent radicle, $\text{C}_4\text{H}_5\text{Cl}_3$. [B, 3.]—**T. alcohol**. **T. glycol**. See BUTYLCHLORAL hydrate.—**T. oxide**. See BUTYLCHLORAL.

TRICHLORBUTYRIC ACID, n. $\text{Tri}^2\text{-klor}$ - $\text{bu}^2\text{-t}$ - i^2k - en . A monobasic crystalline acid, $\text{C}_4\text{H}_2\text{Cl}_3\text{O}_2 = \text{CH}_3\text{CHCl.CCl}_2\text{CO.OH}$, occurring as acicular crystals. [B, 3.]

TRICHLOROCROTONIC ACID, n. $\text{Tri}^2\text{-klor}$ - kro - to - n - i^2k . A monobasic crystalline acid, $\text{C}_4\text{H}_2\text{Cl}_3\text{O}_2$. [B, 4, 158.]

TRICHLORETHANE, n. $\text{Tri}^2\text{-klor}$ - $\text{e}^2\text{-th}$ - an . Fr., *trichloréthane*. Ger., *Trichloräthan*. Acetyl trichloride; a colorless liquid, $\text{C}_2\text{H}_2\text{Cl}_3$, of an odor like that of chloroform. [B, 3 (a, 38); B, 4.]

TRICHLORETHER, n. $\text{Tri}^2\text{-klor}$ - eth - $\text{u}^2\text{-r}$. The compound $\text{C}_2\text{H}_2\text{Cl}_3\text{O} = \text{CHCl}_2\text{CHCl.O.C}_2\text{H}_5$. [B, 4 (a, 38).]

TRICHLORETHIDENE, n. $\text{Tri}^2\text{-klor}$ - $\text{e}^2\text{-th}$ - i^2d - en . Fr., *trichlorethidène*. Ger., *Trichlorethiden*. See TRICHLORETHYLIDENE.

TRICHLORETHYL, n. $\text{Tri}^2\text{-klor}$ - $\text{e}^2\text{-th}$ - i^2k . The chemical group $\text{C}_2\text{H}_2\text{Cl}_3$. [a, 38.]

TRICHLORETHYLENE, n. $\text{Tri}^2\text{-klor}$ - $\text{e}^2\text{-th}$ - i^2k - en . See ETHYL trichloride.—**T. dichloride**. See ETHYL pentachloride.

TRICHLORETHYLIDENE, n. $\text{Tri}^2\text{-klor}$ - $\text{e}^2\text{-th}$ - i^2k - en . A bivalent radicle, $\text{C}_2\text{H}_2\text{Cl}_3$. [B, 1.—**T. alcohol**. See CHLORAL hydrate.—**T. diacetamide**. A substance, $\text{CCl}_3\text{CH}(\text{O})_2\text{C}_2\text{H}_5$, produced by heating chloral with acetonitril. It occurs as shining acicular crystals. [B, 3 (a, 38).]—**T. diacetate**. An oily liquid, $\text{CCl}_3\text{CH}(\text{O}-\text{C}_2\text{H}_5)_2 = \text{C}_2\text{H}_2\text{Cl}_3\text{O}_4$, of peculiar odor. [B, 3 (a, 38); B, 4.]—**T. diethylate**, **T. diethyl ether**. See TRICHLORACETAL.—**T. ethylacetin**. A liquid, $\text{CCl}_3\text{CH}(\text{O.C}_2\text{H}_5)(\text{O.C}_2\text{H}_5) = \text{C}_4\text{H}_5\text{Cl}_3\text{O}_4$, of agreeable odor. [B, 3 (a, 38).]—**T. ethyl ether**. See CHLORAL alcoholate.—**T. hydramine**, **T. hydrate amide**. Chloral ammonia; a body, $\text{CCl}_3\text{CH}(\text{OH})\text{NH}_2 = \text{C}_2\text{H}_4\text{Cl}_3\text{NO}$, forming white acicular crystals, produced by the action of ammonia on cooled chloral. [B, 3.]—**T. hydrate ethylate**. See CHLORAL alcoholate.

T. oxide. See CHLORAL.—**T. thiohydrin**. A substance, $(\text{CCl}_3\text{CH}(\text{OH})_2)_2$, occurring as rhomboidal crystals, having an odor like that of mercaptan; produced by treating an ethereal solution of chloral or an aqueous solution of chloral hydrate with sulphureted hydrogen. [B, 3 (a, 38).]—**T. urea**. A substance, $\text{CO.NH}_2(\text{NH}.\text{CH}(\text{OH}).\text{CCl}_3)$, produced by treating urea solution with chloral, and occurring as rhombic crystals. [B, 3 (a, 38).]

TRICHLORHYDRIN, n. $\text{Tri}^2\text{-klor}$ - hid - i^2k - n . Glyceryl or propenyl trichloride; a colorless, oily liquid, $\text{C}_3\text{H}_2\text{Cl}_3 = \text{CH}_2\text{Cl.CHCl.CH}_2\text{Cl}$, isomeric with tripropylene trichloride and chloropropylene dichloride. It smells like alcohol. [B, 3 (a, 38); B, 4.]

TRICHLORHYDROXYPENTENOIC ACID, n. $\text{Tri}^2\text{-klor}$ - hid - o - x - $\text{i}^2\text{-pe}$ - n - o - i^2k . An acid, $\text{C}_5\text{H}_2\text{Cl}_3\text{Cl}(\text{OH}).\text{CO.OH}$, occurring as tabular crystals resembling gypsum. [B, 3 (a, 38).]

TRICHLORIDE, n. $\text{Tri}^2\text{-klor}$ - $\text{i}^2\text{-d}$ (id). A compound consisting of an element or radicle united directly with chlorine in the proportion of three atoms of the latter to a definite amount of the former assumed as the unit of comparison. [B.]

TRICHLORINATED, adj. $\text{Tri}^2\text{-klor}$ - $\text{i}^2\text{-n}$ - at - $\text{e}^2\text{-d}$. Lat., *trichloratus*. Fr., *trichloriné*. Ger., *trichlorinirt*. Combined with three atoms of chlorine. [B, 2.]

TRICHLORLACTIC ACID, n. $\text{Tri}^2\text{-klor}$ - $\text{la}^2\text{-k}$ - i^2k . An acid, $\text{CCl}_3\text{CH}(\text{OH})\text{CO.OH}$, forming prismatic crystals, and readily decomposable by weak bases into chloral and formic acid, and by the strong alkalis into chloroform. [B, 3.]

TRICHLORALACTONITRIL, n. $\text{Tri}^2\text{-klor}$ - $\text{la}^2\text{-kt}$ - o - nitr - i^2k . A crystalline substance, $\text{CCl}_3\text{CH}(\text{OH}).\text{CN}$, formed by the direct union of chloral and hydrocyanic acid. [B, 3.]

TRICHLORNAPHTHALENE, n. $\text{Tri}^2\text{-klor}$ - $\text{na}^2\text{-p}$ ($\text{na}^2\text{-f}$)- tha - l - en . The compound $\text{C}_{10}\text{H}_3\text{Cl}_3$. [B, 4 (a, 38).]

TRICHLORODIMETHYLANILINAMIDOPHENOL, n. $\text{Tri}^2\text{-klor}$ - o - di - me - th - $\text{i}^2\text{-l}$ - i - n - $\text{a}^2\text{-m}$ - $\text{i}^2\text{-d}$ - o - fe - n - o - l . See INDOPHENOL.

TRICHLOROPHENATE, n. $\text{Tri}^2\text{-klor}$ - o - fe - n - at . A compound of trichlorophenol with a metallic radicle. The t's are said to have the same antiseptic properties as trichlorophenol. [B, 4.]

TRICHLORORCIN, **TRICHLORORCINOL**, n's. $\text{Tri}^2\text{-klor}$ - o - r - $\text{i}^2\text{-n}$, - o - r - $\text{i}^2\text{-n}$ - o . A chlorine substitution product, $\text{C}_6\text{Cl}_3(\text{CH}_3)(\text{OH})$, of orcin. [B, 3 (a, 38); B, 4.]

TRICHLOROSTRYCHINE, n. $\text{Tri}^2\text{-klor}$ - o - stri - k - n - en . Fr., *t*. A substance, $\text{C}_{12}\text{H}_3\text{Cl}_3\text{N}_2\text{O}_4$, obtained by treating a diluted solution of strychnine with a current of chlorine; it is neutral, crystallizable, and very bitter. [B, 38 (a, 14).]

TRICHLORPHENOL, n. $\text{Tri}^2\text{-klor}$ - fe - n - o - l . A solid substance, $\text{C}_6\text{H}_2\text{Cl}_3$, prepared by the action of chlorinated lime on carbolic acid, aniline and other aromatic substances. It has a peculiar odor, and in substance exerts a feeble caustic action, but in solution is not irritant. It is said to act as a very energetic disinfectant, deodorizer, and antiseptic. It occurs as acicular crystals, and forms salts called *trichlorophenates* [Dianin, "St. Petersburg. med. Wechnscr.," No. 88, 1882 (B).]—**T. blue**. A coloring matter, $\text{C}_{12}\text{H}_3\text{Cl}_3\text{N}_2\text{O}_4$, occurring as acicular crystals which appear green by reflected light if the beam falls in the plane of the longer axis, but deep red if the beam is perpendicular to this axis. In solution it colors animal fibres a deep greenish blue. [B, 3 (a, 38).]

TRICHLORPYROGALLOL, n. $\text{Tri}^2\text{-klor}$ - pir - o - ga - l - o - l . A substance, $\text{C}_6\text{Cl}_3(\text{OH})_2$, produced when dry chlorine is passed through a cold mixture of pyrogallol and acetic acids, and occurring as acicular crystals containing three molecules of water. [B, 3 (a, 38).]

TRICHLORQUINOL, n. $\text{Tri}^2\text{-klor}$ - kw - i - n - o - l . A crystalline substance, $\text{C}_6\text{HCl}_3(\text{OH})_2$. [B, 3.]

TRICHLORQUINONE, n. Tri-klor-kwí²n'on. A substance, $C_6HCl_3O_2$, occurring as large yellow tabular crystals. [B, 3 (a, 38); B, 4.]—**T**dimethylanilanimide. See **TRICHLORPHENOL blue**.

TRICHLORRESORCIN, TRICHLORRESORCINOL, n's. Tri-klor-rez-2-o's²i²n-o²l. A substance, $C_6HCl_3(OH)_2$, occurring as acicular crystals. An isomeric form, *isotrichlorresorcin*, is also known. [B, 3.]

TRICHLORSALICIN, n. Tri-klor-sa-lí²s-i²n. Fr., *trichlorosalicine*. Ger., *T*. A substance, $C_9H_5Cl_3O_2$, forming yellowish acicular crystals of very bitter taste. [B, 93 (a, 14).]

TRICHLORSALIGENIN, n. Tri-klor-sa-lí²s-e²n-i²n. Fr., *trichloro-saligénine*. A substance produced by decomposing trichlorosalicin with synaptase. [B, 93 (a, 14).]

TRICHLORSILICOMETHANE, n. Tri-klor-si-lí²k-o-me²th'an. See **SILICOCHLOROFORM**.

TRICHLORTOLUENE, n. Tri-klor-to-lí²n-u²en. Ger., *Trichlortolulol*. A substitution product, $C_6H_2Cl_3.CH_3 = C_7H_5Cl_3$, of toluene, known in two isomeric forms. [B, 3 (a, 38); B, 4.]

TRICHOBLAST, n. Tri²k'o-o-blá²st. From *thí²ξ*, a hair, and *βλαστός*, a sprout. A hair occurring in the interior tissues of a plant. [a, 35.]

TRICHOCARDIA (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-ka²rd'í²-a². From *thí²ξ*, a hair, and *καρδία*, the heart. Fr., *trichocardie*. See **COR hirsutum**.

TRICHOCAPOUS, adj. Tri²k-o-ka²p'u²s. Lat., *trichocarpus* (from *thí²ξ*, a hair, and *καρπός*, a fruit). Having the fruit hairy. [a, 35.]

TRICHOCEPHALE (Fr.), n. Tre-ko-sa-fa²l. See **TRICHOCEPHALUS**.—**T. de l'homme**. See **TRICHOCEPHALUS dispar**.—**T. des ruminants**. See **TRICHOCEPHALUS affinis**.—**T. sans pareil**. See **TRICHOCEPHALUS dispar**.—**T. voisin**. See **TRICHOCEPHALUS affinis**.

TRICHOCEPHALUS (Lat.), n. m. Tri²k(trí²ch²)-o(o²)-se²f-(ke²)²/a²l(a²l)-u²s(u²s). From *thí²ξ*, a hair, and *κεφαλή*, the head. Fr., *trichocéphale*. Ger., *Haarkopfswurm*. A genus of nematoid worms, of the *Filariidae*. [L, 18.]—**T. affinis**. Fr., *trichocéphale voisin* (ou des ruminants). A worm found in the cæcum of sheep and other ruminants. It closely resembles *T. dispar*. [L, 15.]—**T. apri**, **T. castoris**. A species found in the beaver. [L, 87 (a, 50).]—**T. crenatus**. Fr., *trichocéphale crénelé*. A species found in the large intestine of the hog; possibly *T. dispar*. [L, 17.]—**T. depressusculus**. Fr., *trichocéphale déprimé*. A species found in the cæcum of the dog and fox. [Rudolphi (L, 17).]—**T. dispar**. Fr., *trichure, trichuride*. Ger., *Peitschenwurm*. Long thread-worm, whip-worm; a species 1 to 2 inches in length (the female being somewhat longer) and having a long filiform neck. The surface has transverse striae and a longitudinal band of small wart-like papillae. For a parasite appendage of the male, see **APPENDIX copulatoria**. The worm, introduced into the human body by drinking water, is an irritant parasite of the small intestine. In its larval stage some consider it identical with the *Trichina spiralis*. [L, 1.]—**T. equi**. See *Oxyuris curvula*.—**T. hominis**, **T. lemuris**, **T. palaeformis**. See *T. dispar*.

TRICHOCIRCUUS (Lat.), n. m. Tri²k(trí²ch²)-o(o²)-su²rs(kí²rs)-u²s(u²s). From *thí²ξ*, a hair, and *κύκλος*, a varix. Of Dzondi, an abnormal dilatation of capillary vessels. [L, 50 (a, 14).]

TRICHOCLASIS (Lat.), n. f. Tri²k(trí²ch²)-o²k(o²ch²)²la²s-(la²s)-í²s. Gen., -as'eos (-is). From *thí²ξ*, a hair, and *κλάσις*, a breaking. Of Wilson, pathological brittleness of the hair. [a, 34.]

TRICHOCTYPTOSIS (Lat.), n. f. pl. Tri²k(trí²ch²)-o(o²)-krí²pt(kru²pt)-os'e²z(e²s). From *thí²ξ*, a hair, and *κρυπτός*, hidden. Diseases of the hair follicles. [a, 34.]

TRICHO CYST, n. Tri²k'o-sí²st. From *thí²ξ*, a hair, and *κύστις*, a cyst. Fr., *trichocyste*. One of the peculiar cells found in certain *Infusoria*, very nearly identical with the nematocysts of the *Ctenophora*. [B, 28 (a, 27).]

TRICHODANGAIA (Lat.), n. n. pl. Tri²k(trí²ch²)-od-a²n-(a²n²)-í²l'(ge²l'í²)-a². From *trichodangia*, hair-like, and *αγγείο*, a vessel. The capillaries. [L, 50 (a, 14).]

TRICHODANGIITIS (Lat.), n. f. Tri²k(trí²ch²)-od-a²n-(a²n²)-í²l'(ge²l'í²)-i(e)²tí²s. Gen., -it'idos (-idis). Fr., *trichodangiite*. Inflammation of the capillaries. [L, 50 (a, 14).]

TRICHODARTERIA (Lat.), n. f. Tri²k(trí²ch²)-od-a²rt-er-(ar)²í²-a². From *trichodangia*, hair-like, and *αρτηρία*, an artery. Ger., *Haarschlagader*. An arteriole. [L, 50 (a, 14).]

TRICHODARTERITIS (Lat.), n. f. Tri²k(trí²ch²)-od-a²rt-er-(ar)²í²-i(e)²tí²s. Gen., -it'idos (-idis). Fr., *trichodartérite*. Inflammation of the arterioles. [L, 50 (a, 14).]

TRICHODERMATIS (Lat.), n. n. Tri²k(trí²ch²)-o(o²)-de²z(de²s)-ma². Gen., -des'matos (-atis). From *thí²ξ*, a hair, and *δέρμα*, a bond. A genus of the *Boraginaceae*. [a, 35.]—**T. indicum**. An East Indian species used as an alterative and diuretic and in snakebites. The leaves are employed as an emollient poultice. [a, 35.]

TRICHODOPHLEBITIS (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-fle²b(i)e²tí²s. Gen., -it'idos (-idis). From *trichodangia*, hair-like, and *φλέψ*, a vein. Inflammation of the venules. [L, 50 (a, 14).]

TRICHOGENOUS, adj. Tri²k-o²í²e²n-u²s. From *thí²ξ*, a hair, and *γεννῶ*, to engender. Hair-forming; promoting the growth of hair. [G.]

TRICHOGLOSSIA (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-glo²s(glo²s)-sí²-a². From *thí²ξ*, a hair, and *γλῶσσα*, the tongue. Fr., *trichoglossie*. A hyperplastic condition of the epithelium of the tongue in which hair-like processes project from the tips of the lingual papillae. [D.]

TRICHOGYNE, n. Tri²k'o-o-ji²n. From *thí²ξ*, a hair, and *γυνή*, a woman. The receptive portion of a procarp; a thread-like appendage to the carpogonium of certain *Carpophyta*. [a, 35.]

TRICHOID, adj. Tri²k'oí²d. Gr., *τριχιδής* (from *thí²ξ*, a hair, and *εἶδος*, resemblance). Fr., *trichoiðe*. Resembling a hair. [L, 41, 50 (a, 14).]

TRICHOLEPIS (Lat.), n. f. Tri²k(trí²ch²)-o²le²p-i²s. From *thí²ξ*, a hair, and *λεπίς*, a husk. Fr., *tricholépidie*. A genus of the *Compositae*. [a, 35.]—**T. procumbens**. An East Indian herb, referred by Benthams and Hooker to the genus *Voluarella*. According to some, it is used medicinally in Persia. [a, 35.]

TRICHOLEUCOSIS (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-lu²k-os'í²s. Gen., -os'eos (-is). From *thí²ξ*, a hair, and *λευκός*, whiteness. Fr., *tricholeucose*. See **CANTITIES**.

TRICHO LITHUS (Lat.), n. m. Tri²k(trí²ch²)-o²l'í²th-u²s(u²s). From *thí²ξ*, a hair, and *λίθος*, a stone. Fr., *tricholithie*. A hairy concretion. [L, 50 (a, 14).]

TRICHOLOGIA (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-loj(ló²g)²í²-a². From *thí²ξ*, a hair, and *λόγος*, to pick out (1st def.), or *λόγος*, understanding (2d def.). 1. See **CARPOLOGY**. 2. See **TRICHOLOGY**.

TRICHOLOGY, n. Tri²k-o²l'-o-ji². Lat., *trichologia*. The anatomy, etc., of the hair.

TRICHOMA (Lat.), n. n. Tri²k(trí²ch²)-om'a²s. Gen., -om'atos (-atis). Gr., *τριχώμα* (from *thí²ξ*, hair). Fr., *trichome*. Ger., *Trichom*. 1. See **PILICA polonica**. 2. See **TRICHOMA**.—**T. evolutum**. Plica that develops normally. [G.]—**T. laevius**, **T. occultum**. Latent plica; a term for various general symptoms supposed to be due to the diathesis that causes plica polonica. [G.]—**T. spurium**. Plica due to accidental causes, such as filth and pediculi. [G, 7.]

TRICHOMAPHYTE, n. Tri²k'om-a²sít. From *τριχώμα*, a trichoma, and *φύτον*, a plant. A vegetable parasite formerly supposed to be the cause of plica polonica. [G.]

TRICHOME, n. Tri²k'om. Lat., *trichoma* (from *thí²ξ*, hair). A hair, scale, or other outgrowth of the epidermis of a plant. [a, 35.]

TRICHOMONAS (Lat.), n. f. Tri²k(trí²ch²)-o²m'o²n-a²s(a²s). Gen., -mon'atos (-adis). From *thí²ξ*, a hair, and *μονάς*, a unit. Gr., *Haarmonade*. A genus of infusorians. [L, 17.]—**T. vaginalis**. An infusorian, about 0.03 mm. long, found in the vagina of women affected with gonorrhoea or an abundant vaginal secretion, and in the lochia discharge. It resembles the mucous corpuscles, but has a long filament (flagellum) or tail. It is provided with cilia. [L, 15.]

TRICHOMYCES (Lat.), n. m. Tri²k(trí²ch²)-o²m'í²(n'í²)-se²z(kas). Gen., -et'os (-etis). From *thí²ξ*, a hair, and *μύκης*, a mushroom. See **TRICHO MYCOTON**.

TRICHOMYCOSIS (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-mi²(mu²)-kos'í²s. Gen., -os'eos (-is). Fr., *trichomycose*. Ger., *Trichomykosis*. Any disease of the hair due to a vegetable parasite. [G.]—**T. barbae**. See *Sycosis parasitaria*.—**T. capillitii**. 1. See *KEILION*. 2. See *T. circinata*.—**T. capillitii sycosiformis**. See *KEILION*.—**T. circinata**. Fr., *teigne tondante, trichophyte tonsurante, porrigne tondante*. Ger., *scherende Flechte*. Ringworm of the hairy scalp; the disease produced by invasion of the epidermis and hair of the scalp by *Trichophyton tonsurans*. It is characterized by round, slightly reddened, scaly patches of skin upon which the hairs are usually broken off at a little distance from the cutaneous surface, leaving stumps the extremities of which appear more or less split and ragged. [G, 4.]—**T. favosa**. See *Favus*.—**T. nodosa**. **T. nodularis**. Fr., *t. nodularis*. Sp., *pedra*. A disease of the hair occurring in the province of Cauca in Colombia. It is characterized by the formation of hard (stone-like), black, nodular concretions upon the hairs of the scalp, which are distributed at regular intervals along the shafts and produce a rattling noise when the hair is combed or shaken. It is usually met with in women. It is due to a fungous growth said to be caused by the use of a mucilaginous oil resembling linseed oil. [G, 4.]—**T. pustulosa**. A pustular parasitic disease affecting hairy regions, such as the scalp or bearded portions of the face; in Auspitz's classification of skin diseases, a subdivision of *Mycosis pustulosa*. It includes the varieties *T. barbae* and *T. capillitii*. [G, 4.]—**T. pustulosa barbae**, **T. trichophytina**. See *Sycosis parasitaria*.

TRICHONOSIS (Lat.), **TRICHONOSUS (Lat.)**, n's f. Tri²k(trí²ch²)-o²n'o²s'í²s, -u²s(u²s). Gen., -on'os (-is), -on'osi. From *thí²ξ*, a hair, and *νόσος*, disease. See **TRICHOSIS**.—**T. cana** (Wilson). **T. discolor**. See **CANTITIES**.—**T. furfuracea**. See **TRICHOMYCOSIS circinata**.—**T. pilica**. See **PILICA polonica**.

TRICHOPATHY, n. Tri²k-o²p-a²th-í². Lat., *trichopathia* (from *thí²ξ*, a hair, and *πάθος*, disease). Fr., *trichopathie*. Ger., *Trichopathie, Haarkrankheit*. See **TRICHOSIS**.

TRICHO PHORE, n. Tri²k'o-for. From *thí²ξ*, a hair, and *φορέω*, bearing. A row of cells of the procarp on which the trichogyne is borne in certain *Algae*. [a, 35.]

TRICHO PHYTISIA (Lat.), n. f. Tri²k(trí²ch²)-o(o²)-fit(fu²t)-í²t'í²a²s(a²s)-í²s. Gen., -as'eos (-asie). From *thí²ξ*, a hair, and *φύτον*, a plant. See **TRICHO PHYTOSIS**.

TRICHO PHYTIE (Fr.), n. Tre-ko-fe-tie. See **TRICHO PHYTOSIS**.—**T. circinée**. See **DERMATOMYCOSIS maculo-vesiculosa**.—**T. cutanea**. See **DERMATOMYCOSIS trichophytina**.—**T. sycosique**. See *Sycosis parasitaria*.—**T. tonsurante**. See *Trichomycosis circinata*.—**T. unguéale**. See *ONYCHOMYCOSIS trichophytina*.

TRICHO PHYTINUS (Lat.), adj. Tri²k(trí²ch²)-o(o²)-fit(fu²t)-in(en)²u²s(u²s). Pertaining to or due to the presence of *Trichophyton tonsurans*. [G.]

TRICHO PHYTON (Lat.), n. n. Tri²k(trí²ch²)-o²f'í²t'í²u²t'í²-o²n. From *thí²ξ*, a hair, and *φύτον*, a plant. Fr., *t.*. A genus of *Fungi* of uncertain botanical affinities; considered by some as only stages in the development of a more highly organized fungus. [B, 64.]—

TRICUSPIS (Lat.), n. f. Tri(tri²)-ku³sp(ku³sp)¹/s. Gen., -*cusp*-*idis*. 1. The tricuspid valve of the right auriculo-ventricular osium. 2. Of Harvey, one of the semilunar valves of the pulmonary artery. [H, 12.]

TRICYANATE, n. Tri-si²a²n-at. A salt of tricyanic acid. [B.]

TRICYANHYDRIN, n. Tri-si²a²n-hid¹ri²n. A polymer, C₃H₃N₃, of hydrocyanic acid. [B, 93 (a, 14).]

TRICYANIC ACID, n. Tri-si²a²n-i²k. Ger., *Tricyanäure*. A polymeric form of cyanic acid, H₃C₃N₃O₃ = (C₃N₃O)₃. [B.]

TRICYANODIAMIDE, n. Tri-si²a²n-o-di²a²m-i²d(id). A univalent radical, (C₃N₃)₃ $\begin{matrix} \text{NH}_2 \\ | \\ \text{H} \end{matrix}$. [B.]—**T. hydrate**. See AMMELINE.

TRICYANOGEN, n. Tri-si²a²n'o-je²n. Ger., *Tricyan*. A hypothetical polymeric form, C₃N₃ = $\begin{matrix} \text{CN} \\ | \\ \text{CN} \end{matrix}$ —, of cyanogen. [B.]—**T.**

diamide-imide. See MELAM.—**T. tribromide**. Ger., *Tricyantribromür*. A polymeric form, C₃N₃Br₃, of cyanogen bromide. [B.]—**T. trichloride**. Ger., *Tricyantrichlorür*, *festes Chlorcyan*. A polymeric form, C₃N₃Cl₃, of ordinary cyanogen chloride. [B.]

TRICYANOTRIAMIDE, n. Tri-si²a²n-o-tri²a²m-i²d(id). Ger., *Tricyanotriamid*. Melamine; a polymer, C₃H₃N₃ = (C₃N₃(NH₂)₃)₃, of cyanamide. [B.]

TRIDECAIOIC ACID, **TRIDECYLIC ACID**, n's. Tri-dek-a²-o-i²k, -de²s-i²l²k. A crystalline monobasic acid, C₁₃H₂₆O₂. [B, 4.]

TRIDENTATE, adj. Tri/de²nt-at. From *tres*, three, and *dens*, a tooth. Three-toothed. [a, 35.]

TRIDÉROATOLYDOME (Fr.), n. Tre-da-ro-a²t-lo-dem. Of Geoffroy Saint-Hilaire, a rare variety of triple monster presenting features of the derodidymus and of the atolymus. [a, 34.]

TRIDESMIS (Lat.), n. f. Tri(tri²)-de²s(de²s)¹/m²s. Fr., t. 1. A genus of the *Euphorbiaceae*, referred by some to *Croton*. 2. The genus *Cratogeomys*. The *Tridesmea*, or *Tridesminea*, are a section of the *Desmodium*. [a, 35.]—**T. hispid**. A species of *T.* (1st def.) found in southern China; a low shrub the root of which is used as a tonic. [a, 35.]

TRIDIGITATE, adj. Tri-di²g²/t-at. Lat., *tridigitatus* (from *tres*, three, and *digitus*, a finger). Fr., *tridigité*, *dreifingrig*, *dreifingert*. 1. Having three fingers. 2. Thrice digitate; digitately trifoliate, as in the common clover-leaf. [a, 35.]

TRIDYMUS (Lat.), n. m. Tri²d²/m(u²m)-u²s(u²s). Gr., *τρίδυμος*. See TRIPLET.

TRIEB (Ger.), n. Treb. See NISUS and TURION.—Gipfelt's, *Jahrest'e*. See INNOVATIONS.—**T'lager**. Of Link, the thallus of lichens and *Algae*. [a, 35.]

TRIEFAUGE (Ger.), n. Tref/a²s-u²g-e². Blear-eye. See BLEPHARITIS *intermarginalis*.

TRIEFAUGIG (Ger.), adj. Tref/oig-i²g. See BLEAR-EYED.

TRIEFAUGIGKEIT (Ger.), n. Tref/oig-i²g-ig-keit. See BLEAREDNESS.

TRIELCON (Lat.), n. n. Tri(tri²)-elk/o²n. From *trēs*, three, and *elkēre*, to draw. In old surgery, a forceps with three branches, for extracting balls, etc. [L, 49, 50 (a, 14).]

TRIENCEPHALUS (Lat.), n. m. Tri(tri²)-e²n(e²n²)-se²f(ke²f²)-a²l(a²l)-u²s(u²s). From *trēs*, three, and *ἐγκέφαλος*, the brain. Of Geoffroy St.-Hilaire, a genus of otocephalic monsters devoid of three of the principal cephalic parts, the buccal, nasal, and ocular. [a, 34.]

TRIENNAL, adj. Tri-e²n²/i²-l. Lat., *triennus* (from *tres*, three, and *annus*, a year). Fr., *triennal*, *trisanuel*. Lasting three years. [a, 35.]

TRIENTALIS (Lat.), n. f. Tri(tri²)-e²nt-al(a²l)¹/s. From *triens*, a third part. Fr., *trientale*. Ger., *Trientale*. Chickweed-wintergreen; a genus of the *Primulaceae*. [a, 35.]—**T. americana**. Black wintergreen-chickweed, star-flower; common in rocky woods in North America. [a, 35.]—**T. europaea**. Fr., *trientale d'Europe*, *pirolle*. European chickweed-wintergreen. The herb is astringent and the root emetic. [a, 35.]

TRIEHYL, n. Tri-e²th²/l. The chemical group (C₃H₅)₃. [a, 38.]—**T'azonium**. A univalent radical, (C₃H₅)₃NH₂ = NH₂⁺; N⁺; (C₃H₅)₃, containing three molecules of ethyl substituted in hydrazine. [B.]—**T'benzene**. A 3-molecule ethyl substitution compound, C₃H₅(C₂H₅)₃ = C₃H₅H₉, of benzene. [B, 4.]—**T'bismuthine**. See BISMUTH².—**T'börine**. A liquid, B(C₃H₅)₃, having a penetrating and highly irritant odor and taking fire spontaneously in the air.—**T'carbinal**. See under HEPTYL ALCOHOL.—**T. hydrin**. See TRIETHYLIN.—**T'methane**. See under HEPTANE.—**T'methyl**. See under HEPTYL.—**T'methylphosphonium**. A radical, P(C₃H₅)₃. CH₃. [B.]—**T'phosphine**. See TERTIARY ETHYLPHOSPHINE.—**T. phosphinamine**. A substance, SCN(C₃H₅)₃P(C₃H₅)₃, occurring as tabular crystals. It is isomorphous with thiosinamine. [B, 3 (a, 38).]—**T. propenyl ether**. See TRIETHYLIN.—**T. pseudocyanurate**. See ETHYL isocyanurate.—**T'siliccol**. See SILICOHEPTYL ALCOHOL.—**T'sillicolate**. A salt or substitution compound of silicoheptyl alcohol. [B, 4.]—**T'silicomethane hydride**. See SILICOHEPTANE.—**T'silicoyl**. See SILICOHEPTYL.—**T'stibine**. A colorless, spontaneously inflammable liquid, Sb(C₃H₅)₃, of garlicky odor. [B.]—**T'sulphine**. A univalent radical, (C₃H₅)₃S—, [B.]—**T'turea**. See under ETHYLUREA.—**T'tvinylammonium**. A univalent radical, (C₃H₅)₃N≡N-CH₂.CH₃. [B, 4.]

TRIEHYLAMINE, n. Tri-e²th²-i²a²m-en. A substance, N(C₃H₅)₃ = NC₃H₅, isomeric with hexylamine; alkaline, of an oily consistence, and of an agreeable odor. [B.]—**T. hydrochloride**.

A substance, N(C₃H₅)₃.HCl, forming feathery laminar crystals. [B.]—**T. sulphate**. The compound [N(C₃H₅)₃]₂H₂SO₄. [B.]

TRIEHYLARSINE, n. Tri-e²th²-i²a²rs-en. A colorless liquid, As(C₃H₅)₃. [B.]—**T. bromide**, **T. dibromide**. A deliquescent crystalline body, As(C₃H₅)₃Br₂. [B.]—**T. diiodide**, **T. iodide**. A yellow solid, As(C₃H₅)₃I₂. [B.]—**T. oxide**. A yellow, oily liquid, As(C₃H₅)₃O, of a disagreeable odor. [B.]—**T. sulphide**. A body, As(C₃H₅)₃S, occurring as prismatic crystals. [B.]

TRIEHYLENE, n. Tri-e²th²/l-en. A radical, (C₃H₅)₃ = C₃H₁₂. [B.]—**T. alcoh**. A liquid, C₃H₅: O₂; (C₃H₅OH)₃ = C₃H₁₂O₂. [B, 3 (a, 38).]—**T. diamine**. An oily liquid, (C₃H₅)₃N₂ = B⁺: (C₃H₅)₃: N⁻. [B, 4.]—**T. dioxyhydrate**. See *T. alcohol*.

TRIEHYLIC, adj. Tri-e²th²-i²l²k. Containing or derived from three molecules of ethyl. [B.]

TRIEHYLIDENE, n. Tri-e²th²-i²l²-den. A polymeric form, (C₃H₅)₃, of ethylidene. [B.]—**T. oxide**, **T. trioxide**. See PARALDEHYDE.

TRIEHYLIN, n. Tri-e²th²/l-i²n. Ger., *Triäthylin*. A liquid, C₃H₅(OC₃H₅)₃ = C₃H₂₀O₃, of pleasant smell. [B, 3 (a, 38); B, 4.]

TRIEHYLOSANILINE, n. Tri-e²th²-i²-roz-a²n²/i²-en. A substance, C₃H₅(C₆H₅)₃N₂, obtained by heating rosaniline or its salts with ethyl iodide and alcohol. [B, 93 (a, 14).]—**T. hydrochloride**. The salt of a commonly known base, which it occurs as a semicrystalline, golden-yellow mass. [B, 93 (a, 14).]—**T. hydriodide**. A salt, C₃H₅(C₆H₅)₃N₂HI, forming one of the colors known as Hofmann's violet. [B, 49.]

TRIFACIAL, adj. Tri-fa²/s-i²-l. From *tres*, three, and *facies*, the face. Fr., t. 1. Triple and pertaining to the face. 2. Pertaining to or affecting the t. nerve. [a, 48.]

TRIFARIOUS, adj. Tri-fa²/i²-u²s. Gr., *τρίφασιος*. In three vertical rows. [a, 35.]

TRIFÉMORO-ROTULIEN (Fr.), n. Tre-fa-mo-ro-to-*tu*²-le-a²n². See TRICEPS *cruris*.

TRIFID, adj. Tri/fi²d. Lat., *trifidus* (from *tres*, three, and *findere*, to cleave). Ger., *dreispaltig*. Three-cleft. [a, 35.]

TRIFLUORIDE, n. Tri-flu²/o-i²-d(id). A fluorine compound analogous to a trichloride (q. v.). [B, 49.]

TRIFOLIATE, adj. Tri-fol²/i²-at. Lat., *trifoliatus* (from *tres*, three, and *folium*, a leaf). Fr., *trifolié*. Ger., *dreiblättrig*. 1. Possessing three leaves. 2. Trifoliate. The *Trifoliatae* are a section of the *Leguminosae*. [a, 35.]

TRIFOLIOLATE, adj. Tri-fol²/i²-ol-at. Lat., *trifoliolatus* (from *tres*, three, and *folium*, a leaf). Fr., *trifoliolé*. Ger., *dreiblättrig*. Of a compound leaf, having three leaflets. [a, 35.]

TRIFOLIUM (Lat.), n. n. Tri(tri²)-fol(fol)²/i²-u²m(u²m). Gr., *τρίφυλλον*, *τρίφυλλον*. Fr., *trèfle*, *tremaïne*, *triole* (1st def.). Ger., *Klee* (1st def.). 1. Clover, trefoil; a genus of leguminous herbs. The *Trifoliceae* (Fr., *trifoliées*) are a tribe of the *Papilionaceae*. [a, 35.] 2. Of the Netherl. Ph., see *Folia trifolii fibrini*.—*Essentia trifolii fibrini*. See *Tinctura trifolii fibrini*.—*Extractum trifolii aquaticum* (Belg. Ph., 1854, Finn. Ph.) (see fibrini [Ger. Ph., Austr. Ph., Gr. Ph., Swiss Ph., Hung. Ph., Netherl. Ph.]). Fr., *extrait de trèfle d'eau* [Fr. Cod.]. Ger., *Bitterkleeextrakt*. A thick (soft [Fr. Cod.]) aqueous extract made from the leaves of *Menyanthes trifoliata*. Most of the ph's direct the use of warm or boiling water to extract the drug. [B, 95 (a, 38).]—*Folia trifolii fibrini* (Ger. Ph., Swiss Ph.). Fr., *ményanthe (ou trèfle d'eau)* [Fr. Cod.]. Sp., *trébol acudico* [Sp. Ph.]. The leaves of *Menyanthes trifoliata*. [B, 95 (a, 38).]—*Tinctura trifolii fibrini*. A tincture made by treating *Menyanthes trifoliata* with four or six times as much alcohol for six days, and filtering. [B, 119 (a, 38).]

T. acetosum. See *Oxalis acetosella*.—**T. agrarium**. Fr., *trèfle houblon (ou jaune)*, *minette dorée*, *trance*. Ger., *Hopfenklee*. Hop- (or yellow, or golden) clover of Europe, western Asia, and New England; a fodder herb. [a, 35.]—**T. alpestre**. **T. alpinum**. Fr., *trèfle des Alpes*, *reglisse de montagne (ou des Alpes)*. Ger., *Alpenklee*. Mountain-licorice; found in Europe and western Asia. The sweet juiced root is used like licorice. [a, 35.]—**T. amarum**. **T. anticserbicum**. **T. aquaticum**. See *MENYANTHES trifoliata*.—**T. arvense**. Fr., *trèfle des champs*, *herbe à vache*, *patte de lièvre*, *minots*, *mignonnet (blanc)*, *piéd de lièvre (ou de lion)*. Ger., *Ackerklee*, *Hasenpfüthen*. Haré's-foot clover (or trefoil) of Europe, rabbit-foot of North America, stone-clover, the *λαγώπους* of Dioscorides. The entire plant, formerly official as *herba et flores lagopi* (see *lagopodis*), is now used as a domestic remedy for diarrhoea and dysentery. It was formerly recommended in Asiatic cholera. [a, 35.]—**T. bituminosum**. See *FORALIA bituminosa*.—**T. ceruleum**. See *MELILOTUS carulea*.—**T. cervinum**. See *EUPATORIUM cannabinum*.—**T. coniculatum**. See *LOTUS corniculatus*.—**T. creticum**. See *TRIGONELLA fœnum græcum*.—**T. dentatum**. See *MELILOTUS dentata*.—**T. fibrinum**. 1. See *MENYANTHES trifoliata*. 2. Of the Austr. Ph. and Hung. Ph., see *Folia trifolii fibrini*.—**T. fragiferum**. Fr., *trèfle capiton (ou fraise)* [2d def.]. Ger., *Blasenklee*, *Erdbærklee* [3d def.]. 1. See *FRAGARIA vesca*. 2. Strawberry (or strawberry-headed) clover; a perennial clover of Europe, northern Africa, and middle and northern Asia. [a, 35.]—**T. hepaticum**. See *ANEMONE hepatica*.—**T. hydropicum**. See *MENYANTHES trifoliata*.—**T. incarnatum**. Fr., *farouche*, *lupinette*, *trèfle incarnat*, *flour de chair*. Ger., *Blutklee*, *Incarnatklee*. Carnation-clover, crimson (or Italian) clover (or trefoil); a European species recommended as a valuable plant for hay. [a, 35.]—**T. medium**. Cow-grass, red zigzag clover of Europe and northern and middle Asia; a perennial species. [a, 35.]—**T. mellilotum**, **T. odoratum**. See *MELILOTUS officinalis*.—**T. minus**. 1. See *Oxalis acetosella*. 2. A variety of *T. procumbens*. [a, 35.]—**T. ochroleucum**. Sulphur-clover, pale-yellow clover; a native of middle and southern Europe and western Asia, much cultivated in upper Italy. [a, 35.]—**T. odoratum**. See MELI-

TRIODOPHENOL, n. $\text{Tri-1''-o}^2\text{-d-o-fe}^2\text{-n}^0\text{'o}^2$. Ger., *Trijodphenol*. The compound $\text{C}_6\text{H}_3\text{I}_3\text{OH}$. [B, 3 (a, 38); B, 4.]

TRIODOSALICYLIC ACID, n. $\text{Tri-1''-o}^2\text{-d-o-sa}^1\text{-1}^2\text{-s}^1\text{'i}^2\text{'k}$. Fr., *acide triiodosalicylique* (ou *salicylique triiodé*). Ger., *Trijodsalicylsäure*. The compound $\text{C}_7\text{H}_3\text{I}_3\text{O}_5$. [B, 3 (a, 38).]

TRISOBUTYLENE, n. $\text{Tri-i}^2\text{-s-o-bu}^2\text{'i}^2\text{'en}$. The compound $\text{C}_{12}\text{H}_{24}$. [B, 3 (a, 38).]

TRIJUGATE, **TRIJUGOUS**, adj's. $\text{Tri-ju}^2\text{'g-at, -u}^2\text{'s}$. Lat., *trijugatus, trijugus* (from *tres*, three, and *jugum*, a yoke). Fr., *trijugé*. Ger., *dreitpaarig* (2d def.). 1. Of a fruit, having three jugae or ridges. 2. Having three pairs of leaflets. [a, 35.]

TRIJUMEAU (Fr.), n. *Tre-zh'e-mo*. See **TRIPLET** and **Trigeminal NERVE**.

TRILAUIN, n. $\text{Tri-la}^2\text{'r-i}^2\text{'n}$. See **LAURIN**.

TRILLIUM (Lat.), n. n. $\text{Tri-1}^2\text{'i}^2\text{-u}^2\text{'m}^2\text{'m}$. From *tres*, three. Fr., *trillie*. American wood-lily, three-leaved nightshade, wake-robin; a genus of the *Liliaceae*. The *Trillioceae*, or trilliads (of Lindley, an order of the *Dictyogonae*), include genera (*T.*, *Paris*, etc.) referred by Bentham and Hooker to the *Medeoleae*. [a, 35.]—**T. cernuum**. 1. Drooping wake-robin (or wood-lily); a North American species. The root is aconitic. 2. Of Torrey and Gray, see *T. pendulum*. [a, 35.]—**T. erectum**. Bath-flower, birthroot, bethe-root, Indian balm, lamb's-quarters. The astringent and emetic root is considered tonic, expectorant, emmenagogue, and alterative, and has been used in diarrhoea, hæmorrhages, and skin diseases and externally in chronic ulcers. [a, 35.]—**T. erythrocarpum**. Smiling wake-robin, painted t. (or wood-lily); found from Canada to Georgia. The root is used like that of *T. erectum*. [a, 35.]—**T. pendulum**. Indian balm; said to be used in menorrhagia. Some identify it with *T. erectum*. [a, 35.]—**T. stylosum**. A species growing in North Carolina and Georgia. Its root has probably the properties of that of *T. erectum*. [a, 35.]

TRILLO (Sp.), n. *Tre-ly'o*. A place in Guadalajara, Spain, where there are hot chalybeate, saline, and sulphurous springs. [a, 14.]

TRILOBATE, **TRILOBED**, adj's. $\text{Tri-lob}^2\text{'at, tri-lob}^2\text{'ad}$. Lat., *trilobatus* (from *treis*, three, and *lobos*, lobe). Fr., *trilobé*. Ger., *dreilappig*. Having three lobes. [a, 35.]

TRILOCULAR, **TRILOCLATE**, adj's. $\text{Tri-lo}^2\text{'k-u}^2\text{'a}^2\text{'r}$, -at. Three-celled. [a, 35.]

TRIMARGARIN, n. $\text{Tri-ma}^2\text{'rg-a}^2\text{'r-i}^2\text{'n}$. Fr., *trimargarine*. Ger., *T*. See under **MARGARIN**.

TRIMELLITIC ACID, n. $\text{Tri-me}^2\text{'l-i}^2\text{'t-i}^2\text{'k}$. Fr., *acide trimellitique* (ou *trimellique*). Ger., *Trimellithsäure*. An acid, $\text{C}_6\text{H}_2\text{O}_4 = \text{C}_6(\text{CO.OH.CO.OH.OH.H})_2$, isomeric with hemimellitic acid and trimelic acid. [B, 3 (a, 38).]

TRIMERCURIC, adj. $\text{Tri-mu}^2\text{'r-ku}^2\text{'r-i}^2\text{'k}$. Containing three atoms of bivalent mercury. [B.]—**T.-diamine**. Written, also, *trimercuro-diamine*. Mercury nitride. [B.]

TRIMEROUS, adj. $\text{Tri-m}^2\text{'e-r-u}^2\text{'s}$. Lat., *trimerus* (from *treis*, three, and *μῆρος*, a part). Fr., *trimère*. Consisting of three parts; of a flower, having three members in each circle. [a, 35.]

TRIMESIC ACID, n. $\text{Tri-me}^2\text{'s-i}^2\text{'k}$. Ger., *trimesinsäure*. Fr., *acide trimésique*. An acid, $\text{C}_6\text{H}_2\text{O}_4 = \text{C}_6(\text{CO.OH.H.CO.OH.H.CO.OH.H})_2$, isomeric with trimellitic acid and hemimellitic acid. [B, 3 (a, 38).]

TRIMESTRIS (Lat.), adj. $\text{Tri(tri}^2\text{'s-me}^2\text{'st-tri}^2\text{'s}$. From *tres*, three, and *mensis*, a month. Ripening in or lasting for three months. [a, 35.]

TRIMETALLIC, adj. $\text{Tri-me}^2\text{'t-a}^1\text{'i}^2\text{'k}$. From *tres*, three, and *metallum*, a metal. Containing in the molecule three atoms of a metallic element. [B.]

TRIMETAPHOSPHATE, n. $\text{Tri-me}^2\text{'t-a}^2\text{'s-f}^2\text{'o}^2\text{'s-fat}$. A polymeric derivative of a metaphosphate, having the general formulae $\text{R}'''(\text{PO}_3)_3$, $\text{R}'\text{R}''(\text{P}^2\text{O}_3)_3$, and $\text{R}_3(\text{P}^2\text{O}_3)_3$. [B, 3.]

TRIMETHACETIC ACID, n. $\text{Tri-me}^2\text{'t-h-a}^2\text{'s-et(e}^2\text{'t-i}^2\text{'k}$. Pseudovaleric acid. [B.] See under **VALERIC ACID**.

TRIMETHENE, n. $\text{Tri-me}^2\text{'th-en}$. Fr., *triméthène*. Ger., *Trimethen*. A radicle, C_3H_6 , consisting of three molecules of methene. [B, 4.]

TRIMETHYL, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l}$. The chemical group $(\text{CH}_3)_3$.

TRIMETHYLAMINE, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-a}^2\text{'m-en}$. A tertiary amine of methyl, $\text{N}:(\text{CH}_3)_3 = \text{N}_3\text{C}_3\text{H}_9$, metameric with propylamine; a mobile liquid having a peculiar fishy odor, boiling at about 10° C., and readily inflaming. It occurs naturally in *Arenopodium vulvaria*, *Mercurialis annua*, *Arnica montana*, etc., and in ergot. It is also found in cadavers, rotten fish, and animal liquids (e. g., herring brine), and may be prepared by distillation from various alkaloids and other organic matters. [B.]

TRIMETHYLAMMONIUM (Lat.), n. n. $\text{Tri(tri}^2\text{'s-me}^2\text{'th-i}^2\text{'l-u}^2\text{'l-a}^2\text{'m-in-en}^2\text{'m}^2\text{'m}^2\text{'m}$. A 20-per-cent. aqueous solution of trimethylamine [Russ. Ph.]; an 8- or 9-per-cent. solution [Swiss Ph.] of the anhydrous substance. [B, 95 (a, 38).]

TRIMETHYLAMMONIUM, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-a}^2\text{'m-mon}^2\text{'i}^2\text{'u}^2\text{'m}$. A univalent radicle, $(\text{CH}_3)_3\text{N}^+ = \text{N}^+\text{H} = \text{N}_3\text{C}_3\text{H}_9$. [B.]

TRIMETHYLARSINE, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-a}^2\text{'s-en}$. A colorless liquid, $\text{As}(\text{CH}_3)_3$. [B.]

TRIMETHYLATED, adj. $\text{Tri-me}^2\text{'th-i}^2\text{'l-at-ed}$. Fr., *triméthylé*. Combined with three molecules of methyl. [a, 38.]

TRIMETHYLENE, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-en}$. Fr., *triméthylène*. A substance, C_3H_6 , isomeric with propylene, known only in the form of *t. bromide*, $\text{C}_3\text{H}_5\text{Br}$, and *t. chloride*, $\text{C}_3\text{H}_5\text{Cl}$, both liquids. [B, 93 (a, 14).]—**T. alcohol**. Primary propylene glycol; a thick liquid, $\text{C}_3\text{H}_8(\text{OH})_2$, having a sweet taste. [B, 3 (a, 38).]—

T'disulphonic acid. A dibasic acid, $\text{C}_6\text{H}_4\text{S}_2\text{O}_4 = \text{CH}_2(\text{SO}_2\text{H})-\text{CH}_2-\text{CH}_2(\text{SO}_2\text{H})$, isomeric with propylene-disulphonic acid; a yellowish syrupy liquid of strongly acid reaction, which upon dehydration solidifies to form amber-colored acicular crystals; deliquescent in the air and soluble in alcohol and in ether. [A. Monari, "Ann. di chim. medico-farm. e di farmacol.," April-May, 1885, p. 253 (B).]

TRIMETHYLIC, adj. $\text{Tri-me}^2\text{'th-i}^2\text{'l-i}^2\text{'k}$. Containing three molecules of methyl, or derived by substitution from a body consisting of a triple molecule of methyl. [B.]

TRIMETHYLIN, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-i}^2\text{'n}$. A substance, C_6H_6 , $(\text{CH}_3)_3\text{O}_3$, produced by heating methyl alcohol and acrolein with a little acetic acid. [B, 2.]

TRIMETHYLPHOSPHINE, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-f}^2\text{'o}^2\text{'s'en}$. See under **METHYLPHOSPHINE**.

TRIMETHYLOSANILINE, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-roz-a}^2\text{'n-i}^2\text{'l-en}$. A substitution product of rosaniline, $\text{C}_{18}\text{H}_{16}(\text{CH}_3)_3\text{N}_3$. [B, 2.]—**T. hydriodide**. The compound $\text{C}_{18}\text{H}_{16}(\text{CH}_3)_3\text{N}_3\cdot\text{HI}$. [B.]

TRIMETHYSTIBINE, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-sti}^2\text{'b'en}$. A stibine, $\text{Sb}(\text{CH}_3)_3$, which occurs both in the free state and in combination as a bivalent radicle. In the former case it is found as a heavy colorless liquid of very unpleasant odor, and taking fire spontaneously on exposure to the air. [B, 4.]

TRIMETHYLXANTHIN, n. $\text{Tri-me}^2\text{'th-i}^2\text{'l-za}^2\text{'nth-i}^2\text{'n}$. A compound of three molecules of methyl and one of xanthin. [A, 319 (a, 34).]

TRIMEZIA (Lat.), n. f. *Tre-me-z'i-a*. A genus of the *Iridaceae*. [a, 35.]—**T. lurida**, **T. martinicensis**. Fr., *trimezie de la Martinique*. A species of tropical America. The root is said to be tonic, astringent, and emmenagogue and the juice sternutatory. [a, 35.]

TRIMOLYBDATE, adj. $\text{Tri-mo}^2\text{'l-i}^2\text{'b-dat}$. A molybdate containing three atoms of molybdenum. [B.]

TRIMORPHINE, n. $\text{Tri-mo}^2\text{'r-i}^2\text{'en}$. A polymer, $\text{C}_{102}\text{H}_{114}\text{N}_6\text{O}_{18}$, of morphine. [B, 2.]

TRIMORPHISM, n. $\text{Tri-mo}^2\text{'r-i}^2\text{'z-m}$. From *treis*, three, and *μῆρῳ*, form. A threefold heterogonism, such as the production, on the same species of plant, of three different kinds (long-styled, mid-styled, and short-styled) of flowers. [a, 35.]

TRIMORPHOUS, adj. $\text{Tri-mo}^2\text{'r-i}^2\text{'u}^2\text{'s}$. Lat., *trimorphous*. Occurring under three forms, exhibiting trimorphism. [a, 35.]

TRIMYRISTIN, n. $\text{Tri-mi}^2\text{'r-a}^2\text{'t-i}^2\text{'n}$. A crystalline substance, $\text{C}_{72}\text{H}_{120}\text{O}_{24}$, found in butter. [B, 3 (a, 38); B, 4.]

TRINERVATE, **TRINERVED**, adj's. $\text{Tri-nu}^2\text{'v-er-at, tri-nu}^2\text{'v-er-d}$. Lat., *trinervatus, trinervis, trinervis* (from *tres*, three, and *nervus*, a nerve). Fr., *trinervé*. Ger., *dreinervig*. In botany, having three nerves or ribs. [a, 35.]

TRINITRANILINE, n. $\text{Tri-nit-r-a}^2\text{'n-i}^2\text{'l-en}$. Picramide, $\text{C}_6\text{H}_5(\text{NO}_2)_3 = \text{C}_6(\text{H.N.O}_2.\text{H.N.O}_2.\text{H.N.O}_2)_3$. [B, 3 (a, 38); B, 4.]

TRINITRANISIC ACID, n. $\text{Tri-nit-r-a}^2\text{'n-i}^2\text{'s-i}^2\text{'k}$. A substitution derivative, $\text{C}_7\text{H}_5(\text{NO}_2)_3\text{O}_3$, of anisic acid.

TRINITRANISOL, n. $\text{Tri-nit-r-a}^2\text{'n-i}^2\text{'s-o}^2\text{'l}$. Methyl picrate; a substitution derivative, $\text{C}_7\text{H}_5(\text{NO}_2)_3\text{OCH}_3$, of anisol, occurring as yellow tabular crystals. [B, 2; B, 3 (a, 38).]

TRINITRATE, n. Tri-nit-rat . A nitrate containing three molecules of nitryl. [B, 3.]

TRINITRIN, n. $\text{Tri-nit-r-i}^2\text{'n}$. Fr., *trinitrine*. Ger., *T*. See **NITROGLYCERIN**.

TRINITROACETONITRILE, n. $\text{Tri-nit-r-o-a}^2\text{'s-e}^2\text{'t-o-nit-r-i}^2\text{'l}$. A camphor-like crystalline mass, $\text{C}_6\text{H}_5\text{O}_6 = \text{C}(\text{NO}_2)_3\text{CN}$. [B, 4.]

TRINITROAMIDOBENZENE, n. $\text{Tri-nit-r-o-a}^2\text{'m-i}^2\text{'d-o-be}^2\text{'nz-en}$. See **TRINITRANILINE**.

TRINITROAZOBENZENE, n. $\text{Tri-nit-r-o-a}^2\text{'z-o-be}^2\text{'nz-en}$. A substance, $\text{C}_{12}\text{H}_7\text{N}_3\text{O}_6$, known in three isomeric forms: *a-t*, $\text{C}_{12}\text{H}_7(\text{NO}_2)_3\text{N}_3$, built or sulphur-colored acicular crystals; *β-t*, crystals melting at 180° C.; and *γ-t*, $\text{C}_6\text{H}_5\text{N}_3\text{C}_6\text{H}_5$, deep-red prismatic crystals. [B, 3 (a, 38).]

TRINITROBENZOIC ACID, n. $\text{Tri-nit-r-o-be}^2\text{'nz-o-i}^2\text{'k}$. A monobasic acid, $\text{C}_7\text{H}_5\text{N}_3\text{O}_8 = \text{C}_6\text{H}_4(\text{NO}_2)_3\text{COOH}$. [B, 2.]

TRINITROCARBOLIC ACID, n. $\text{Tri-nit-r-o-ka}^2\text{'rb-o}^2\text{'l-i}^2\text{'k}$. See **TRINITROPHENOL**.

TRINITROCELLULIN, **TRINITROCELLULOSE**, n's. $\text{Tri-nit-ro-se}^2\text{'l-i}^2\text{'l-i}^2\text{'n, -os}$. Gun-cotton; a substitution compound, $\text{C}_6\text{H}_7\text{O}_8(\text{NO}_2)_3$, of cellulose, produced by the prolonged action of concentrated nitric acid with a little sulphuric acid on cotton-wool. It resembles ordinary cotton-wool, is insoluble in alcohol, but soluble in ether, and is inflammable and highly explosive. [B, 3, 4, 5, 8, 9.] Cf. **PYROXYLIN**.

TRINITROCHLOROBENZENE, n. $\text{Tri-nit-r-o-klor-be}^2\text{'nz-en}$. A derivative, $\text{C}_6\text{H}_4(\text{NO}_2)_3\text{Cl}$, of picric acid. [B, 3.]

TRINITROCRESOL, **TRINITROCRESYLIC ACID**, n's. $\text{Tri-nit-r-o-kre}^2\text{'s-o}^2\text{'l, -i}^2\text{'k}$. The compound $\text{C}_7\text{H}_4(\text{NO}_2)_3\text{OH}$. [B.]

TRINITROSTIBYLENE, n. $\text{Tri-nit-r-o-me}^2\text{'s-i}^2\text{'t-i}^2\text{'l-en}$. The compound $\text{C}_6(\text{NO}_2)_3(\text{CH}_3)_3 = \text{C}_6\text{H}_3\text{N}_3\text{O}_9$. [B, 3 (a, 38); B, 4.]

TRINITROMETHANE, n. $\text{Tri-nit-r-o-me}^2\text{'th-an}$. See **NITROFORM**.

TRINITRONAPHTHALENE, n. $\text{Tri-nit-r-o-na}^2\text{'p-tha}^2\text{'l-en}$. A substance, $\text{C}_{10}\text{H}_7(\text{NO}_2)_3$, existing in three isomeric forms. [B, 93 (a, 14).]

TRINITRO-ORCIN, n. $\text{Tri-nit-r-o-or}^2\text{'ci-n}$. A substance, $\text{C}_7\text{H}_2(\text{NO}_2)_3(\text{OH})_3 = \text{C}_7\text{H}_2\text{N}_3\text{O}_9$, acting as a dibasic acid, and forming large yellow prismatic crystals. [B, 4.]

TRINITRO-ORNIC ACID, n. Tri-nit/'ro-o-rs-i2'n/i2k. A dibasic crystalline acid, $C_7H_3N_3O_8 = C_7H_2(NO_2)_3O_8$, formed by the action of nitric acid on orcin at a temperature of $-10^\circ C$. [B. 2.]

TRINITROPHENATE, n. Tri-nit/'ro-fe'n/'at. See PICRATE.

TRINITROPHENOL ACID, **TRINITROPHENOL**, n's. Tri-nit/'ro-fe'n/'ik. -fe'n/'ol. A substance, $C_6H_3N_3O_7$, known in three isomeric forms: α -t, or picric acid ($q. v.$); β -t, $C_6H_3(NO_2)_3O_7$, white acicular or laminar crystals; and γ -t, $C_6H_3(NO_2)_3O_7$, white acicular crystals. [B. 3 (a, 38).]

TRINITROPHOROLUCOL, n. Tri-nit/'ro-flor-o-plu2/'kol. A derivative, $C_6(NO_2)_3(OH)_2 = C_6H_2N_3O_9$, of phloroglucin, crystallizing from hot water as yellow prismatic crystals containing a molecule of water, becoming anhydrous at 100° , beginning to sublime at 130° , melting at $158^\circ C$, and exploding at a higher temperature. [B. 3 (a, 38); B. 4.]

TRINITRORESORCIN, **TRINITRORESORCINOL**, n's. Tri-nit/'ro-re2-z-o-rs/'sin. -o-rs/'sin-o'l. See STYPHENIC ACID.

TRINITROTOLUENE, n. Tri-nit/'ro-to'l-u2/'en. A substance, $C_7H_5(NO_2)_3$, known in three isomeric forms: α -t, $C_7H_4(NO_2)_3$, H_2NO_2 , H_2CH_3 , tabular or acicular crystals of a golden color; β -t, transparent prismatic or white tabular or acicular crystals; and γ -t, yellowish crystals. [B. 3 (a, 38); B. 4.]

TRINITY SPRINGS, n. Tri-ni2/'t-i2. A place in Martin County, Indiana, where there are sulphurous springs. [a. 14.]

TRINKEUR (Ger.), n. Tri-ni2/'n-k/'kur. A course of treatment by drinking mineral waters.

TRINKEN (Ger.), n. Tri-ni2/'n-k/'en. See DRINK.—Heis2't'. See THERMOPOLIA.

TRIOCEPHALUS (Lat.), n. m. Tri-(tri2)-o-(o2)-se2f/(ke2f/a2l-(a2l)-u2s(u2s)). From *tripes*, three, and *kephala*, the head. Of I. Geoffroy St.-Hilaire, triencephalus. [a. 34.]

TRIOCIOSUS, **TRIOCIOSUS**, adj's. Tri-es2'u2s. -oik'u2s. Lat., *trioeios*, *trioeios* (from *tripes*, three, and *oikos*, a house). Fr., *trioique*. Ger., *dreihüsig*. Having staminate, pistillate, and perfect flowers on three distinct individuals. The *Triocia* of Linnæus are an order of the class *Polygama* so characterized. [a. 35.]

TRIOLEIN, n. Tri-o'l-e2/'i2n. See OLEIN.

TRIONAL, n. Tri-o2/'n-l. A substance, $C_6H_5 > C < SO_2 \cdot C_2H_5 = C_6H_5SO_2C_2H_5$, occurring as shining tabular or foliate crystals; a hypnotic. [B. 370 (a, 38).]

TRIOPODYMUS (Lat.), n. m. Tri-(tri2)-op-o2-d/(2m(u2m)-u2s(u2s)). From *tripes*, three, *ops*, the face, and *didymos*, double. A monster with a single head, but three faces. [L. 49 (a, 14).]

TRIOCHIS (Lat.), n. m. Tri-(tri2)-o-rk/(o2rch2)/i2s. Gen., *-orch'ios*, *-orch'eos*. From *tripes*, three, and *chys*, a testicle. Ger., *Dreihödiger*. An individual having three testicles. [L. 50 (a, 14).]

—*T. alba odorata*. The *Spiranthes autumnalis*. [a. 35.]

TRIOSTEUM (Lat.), n. n. Tri-(tri2)-o-st/(e2-u2m(u2m)). From *tripes*, three, and *ostium*, a bone. Fr., *trioistée*. Ger., *Dreikern*. A genus of the *Caprifoliaceæ*. The *Triosteum* are a subtribe of the *Lonicereæ*. [a. 35.]—*T. angustifolium*. Horse-gentian; found in the southern United States. The root is used like that of *T. perfoliatum*. [a. 35.]—*T. perfoliatum*. Fr., *ipécacuanha de Virginie*. Ger., *durchwachsenblättriger Dreikern*. Wild pease, horse-gentian, fever-root, feverwort; a North American herb. The yellowish or brownish root, *radix triostei*, has a bitter, nauseous taste and a sickening odor, and is cathartic and emetic. [a. 35.]

TRIOVULATE, adj. Tri-o2-v/'ul-at. Lat., *triovulata* (from *tres*, three, and *ovulum*, an ovule). Having three ovules. [a. 35.]

TRIOXIDE, n. Tri-o2-x/'i2d-id. An oxygen compound analogous to a trichloride ($q. v.$). [B.]

TRIOXINDOL, n. Tri-o2-x/'i2nd-o'l. See ISATIC ACID.

TRIOXYADIPIC ACID, n. Tri-o2-x-i2-a2-d-i2p/'i2k. See under HYDROXYADIPIC ACID.

TRIOXYBENZENE, n. Tri-o2-x-i2-be2-nz-o2/'i2k. See TRIHYDROXYBENZENE.

TRIOXYBENZOIC ACID, n. Tri-o2-x-i2-be2-nz-o2/'i2k. See TRIHYDROXYBENZOIC ACID.

TRIOXYCHLORIC ACID, n. Tri-o2-x-i2-klor/'i2k. Of Kämmerer, chloric acid. [B. 2.]

TRIOXYNAPHTHALENE, n. Tri-o2-x-i2-na2f/'tha2l-en. See under OXYNAPHTHOL.

TRIPALMITIN, n. Tri-pa2l/'mi2t-i2n. Fr., *tripalmitine*. Ger., *T. Palmitin*. $C_51H_{103}(C_{17}H_{35}O_2)_3$, occurring as pearly laminar crystals; a constituent of nearly all the animal and vegetable fats. [B. 4.]

TRIPARTITE, adj. Tri-pa2r/'ti2. Lat., *tripartitus* (from *tres*, three, and *partiri*, to divide). Fr., *tripartit*. Ger., *dreitheilig*. Divided to (or nearly to) the base into three divisions. [a. 35.]

TRIBE DE ROCHE (Fr.), n. Trep d'rosh. Rock-tripe; a name given to *Arctia nictitans*, a noctuid moth, the larvae of the genera *Glyphora* and *Umbilicaria*, especially the latter. They are much used as food, but contain a bitter principle which often causes diarrhoea. [a. 35.]

TRIPES (Lat.), adj. Tri-(tri2)/pez(pas). Gen., *trip'edis*. Fr., *trépié*. Ger., *dreifüssig*. Three-footed. [A. 312 (a, 48).]

TRIPETALOID, adj. Tri-pe2t-a2l-o2'id. From *tripes*, three, *petalon*, a leaf, and *eidōs*, resemblance. Consisting of or containing three petaloid parts. The *Tripetaloideæ* of Linnæus are an order of plants, comprising *Calamus*, *Alisma*, *Sagittaria*, etc. [a. 35.]

TRIPETALOUS, adj. Tri-pe2t-a2l-u2s. Having three petals.

TRIPHARMACUM (Lat.), n. n. Tri-(tri2)-fa2rm/a2k(a2l)-u2m(u2m). From *tripes*, three, and *pharmacum*, a drug. Fr., *tripharmaque*. A medicine composed of three ingredients. [L. 41, 50 (a, 14).]

TRIPHENOL, n. Tri-fe2'n/'o2l. See TRIHYDROXYBENZENE.

TRIPHENYL, n. Tri-fe2'n/'i2l. The chemical group $(C_6H_5)_3$. [a. 38.]—*Trosaniline*. The compound $C_9H_7N_3 = C_{10}H_{11}(C_6H_5)_2N_3$. It constitutes *bleu de Lyon*, and probably also diphenylamine blue. [B. 2.]

TRIPHYLLOUS, adj. Tri-fi2l/'u2s. Three-leaved; of a corolla, tripetalous; of a calyx, trisepalous. [a. 35.]

TRIPINNATE, adj. Tri-pi2'n/'at. Lat., *tripinnatus* (from *tres*, three, and *pinna*, a feather). Fr., *tripinné*. Thrice pinnate (said of compound leaves in which the secondary pinnae are themselves pinnate). [a. 35.]

TRIPINNATIFID, adj. Tri-pi2'n-a2t/'i2-fi2d. Lat., *tripinnatifidus* (from *tres*, three, *pinna*, a feather, and *fendere*, to split). Fr., *tripinnatifide*. Ger., *dreifederspaltig*. Thrice pinnatifid. [a. 35.]

TRIPINNATISECT, adj. Tri-pi2'n-a2t/'i2-se2kt. Lat., *tripinnatisectus* (from *tres*, three, *pinna*, a feather, and *secare*, to cut). 1. Divided to the base in a tripinnate manner. 2. Tripinnate. [a. 35.]

TRIPLET, n. Tri2p/'le2t. Lat., *tergeminus*, *trigeminus*. Fr., *trijumeau*. Ger., *Drilling*, *Drillingsfrucht*. One of three born as the result of one gestation. [a. 48.]

TRIPLOIDES INSTRUMENTUM (Lat.), n. n. Tri2p-lo(2)-i2d(ed)ez/as(2)-in-stru2(stru)-me2nt'u2m(u2m). From *τρίπλος*, triple, and *eidōs*, resemblance. Fr., *triploïde*. A three-pronged instrument formerly used for raising depressed fragments of the skull in trephining. [L. 41, 50 (a, 14).]

TRIPLOPIA (Lat.), n. f. Tri2p-'lopi2-a2s. From *τρίπλος*, triple, and *ὤψ*, the eye. Fr., *triplopie*. The simultaneous formation of three visual images of an object. [a. 18.]

TRIPLUMBIC, adj. Tri-plu2'mb/i2k. Containing three atoms of lead in the molecule. [B.]

TRIPMADAM, n. Tri2p-'ma2d-'m. Ger., *T*. See *SEDUM reflexum*.

TRIPOD, n. Tri2p-'o2d. Gr., *τρίπους* (from *τρίς*, three, and *πούς*, the foot). Lat., *tripus*. Fr., *trépié*. Ger., *Dreifuss*. A support having three legs. [L.]—*Vital t*. The brain, heart, and lungs, so called as being the main supports of vitality. [a. 48.]

TRIPOLITH, n. Tri2p-'o2l-i2th. From *τρίς*, three, and *λίθος*, a stone. An artificial mixture of gypsum, magnesium sulphate, and powdered cork, used as a material for splints. ["Lancet," 1881, ii, p. 120 (a, 34).]

TRIPPER (Ger.), n. Tri2p-'pe2r. See GONORRHEA.—*Fuhrmannst'*. See GONORRHEA.—*Nacht'*. See GONORRHEA.—*Splittischer T*. See GONORRHOEPHILIS.—*Thode*. See EPIDIDYMITIS.—*T'*. *hodenentzündung*. See GONORRHOECITIS.—*T'*. *nebenhodenentzündung*. Gonorrhoeal epididymitis.

TRIPROPYLAMINE, n. Tri-pro2-pi2l/a2m-en. A tertiary amine of propyl, $N(C_3H_7)_3$, not yet obtained in the pure state. [B.]

TRIPROPYLARSINE, n. Tri-pro2-pi2l-a2rs'en. A body, $As(C_3H_7)_3$, having a very disagreeable odor. [B. 3.]

TRIPSINE (Fr.), n. Trep-sen. See TRYPsin.

TRIPSIS (Lat.), n. f. Tri2p-(s)trips/i2s. Gen., *trips'eos* (-is). Gr., *τρίψις* (from *τρίβω*, to rub). See COMMUNION.

TRIPTEOUS, adj. Tri2p-'te2r-u2s. From *τρίς*, three, and *πτερόν*, a wing. Having three wings or alae. [a. 35.]

TRIPTEOKORIA (Lat.), n. f. Tri2p-(o2)-kor2k(o2r)'i2-a2s. From *τρίς*, three, *πτέρον*, to fall, and *κόρη*, the pupil. That condition of the iris in which there are three distinct and separate pupils. [F.]

TRIPUDIATIO (Lat.), n. f. Tri-(tri2)-pu2d(pu2d)-i2-a(a2)'shi2-(ti2)-o. Gen., -on'is. From *tripudare*, to dance. Ger., *Tanzwuth*. See CHOREA (2d def.).—*T'*. *spastica*. See EPIDEMIC CHOREA.

TRIPUS (Lat.), n. m. Tri-(tri2)/pu2s(pus). Gen., *trip'odis*. Gr., *τρίπους* (from *τρίς*, three, and *πούς*, the foot). See TRIPOD.—*T. cæliacus*, *T. Halleri*. The three branches of the collic artery. [L. 31.]

TRIQUE-MADAME (Fr.), n. Trek-ma2-da2'm. The *Sedum album* and *Sedum acre*. [a. 35.]

TRIQUETROUS, adj. Tri-kwe2t-'ru2s. Lat., *triqueter*, *triquetrus* (from *tres*, three). Fr., *triquètre*. Ger., *dreiseitig*, *dreischneitig*, *dreikantig*. Having three salient angles; triangular-prismatic. [a. 35.]

TRIQUETRUM (Lat.), n. n. Tri-(tri2)-kwe2t/'ru2m(ru2m). The cuneiform bone of the hand. [L.]

TRIQUINOYL, n. Tri-kwi2'n-'o2i2l. See BENZOTRIQUINONE.

TRIRICINOLEIN, n. Tri-ri2's-i2n-o2l-e2-i2n. See RICINOLEIN.

TRISALT, n. Tri-sa2'l't. Fr., *trisel*. A salt containing three times as much base as acid. [L. 41, 49 (a, 14).]

TRISCAPULO-HUMERO-OLECRANIAN (Fr.), n. Tre-ska2-pu2-lo-u2-ma-ro-o-la-kra2-ne-a2n2. See *TRICEPS EXTENSOR cubiti*.

TRISECTED, adj. Tri-se2kt/'ad2d. Lat., *trisectus* (from *tres*, three, and *secare*, to cut). Ger., *dreischneitig*. Of a leaf, divided into three portions by incisions reaching to the midrib or base. [a. 35.]

TRISELENIDE, n. Tri-se2l'e2n-i2d(i2d). Fr., *triséleniure*. A selenium compound analogous to a trichloride ($q. v.$). [B.]

TRISERIAL, **TRISERIAL**, adj's. Tri-ser'i2-'l, -at. Lat., *triserialis*, *triserialis* (from *tres*, three, and *series*, a row). Arranged in three horizontal rows. [a. 35.]

TRISEPALOUS, adj. Tri-se2-pa2'l-u2s. From *tres*, three, and *sepalum*, a sepal. Composed of three sepals. [a. 35.]

TRISSETUM (Lat.), n. n. Tri-(tri2)-se2t(sat)-u2m(u2m). From *tres*, three, and *setum*, a bristle. Fr., *triséte*. A genus of grasses closely related to *Avena*. [a. 35.]—*T. havesceens*. Fr., *avenette blonde*.

petit fromental, avoine blonde. Ger., *Goldhafer, gelber Weizenhafer.* Yellow oat (-grass), having small yellow flowers, found in Europe, northern Asia, and North America. [B. 19, 173; a, 35.]

TRISILICIC ACID, n. $\text{Tri-si}^2\text{-i}^2\text{-}^2\text{k}$. An acid containing three atoms of silicon. Although the salts (called *trisilicates*) of several of these acids exist, the acids themselves, $8\text{SiO}_2 \cdot 2\text{H}_2\text{O} = \text{H}_4\text{Si}_3\text{O}_{10}$, $8\text{SiO}_2 \cdot 5\text{H}_2\text{O} = \text{H}_5\text{Si}_3\text{O}_{11}$, and $8\text{SiO}_2 \cdot 7\text{H}_2\text{O} = \text{H}_6\text{Si}_3\text{O}_{12}$, have not been isolated. [B. 3.]

TRISMOID, n. $\text{Tri-s}^2\text{-m}^2\text{-oid}$. From *τρισμός*, trismus, and *εἶδος*, resemblance. Of Sims, a chronic form of trismus nascentium attributed to depression of the occipital bone during labor. [Hartigan, "N. Y. Med. Jour.," Jan. 8, 1886, p. 16.] Cf. *White LOCK-JAW*.

TRISMUS (Lat.), n. m. $\text{Tri-s}^2\text{-mu}^2\text{-s}^2\text{-mu}^2\text{-s}$ (mu⁴). Gr., *τρισμός* (from *τρις*, to gnash). Fr., *trisme, mal de mâchoire*. Ger., *T., Klemme, Kieferklemme, Maulklemme, Mundklemme, Zähnerknirschchen*. Locked jaw, lock-jaw; tonic spasm of the muscles that close the jaws. [E.]-**T. capistratus**. Fr., *brédissure*. An impossibility of separating the jaws, in consequence of adhesion of the internal surface of the cheeks to the gums, following ulceration of those parts. [a, 34.]-**T. eanthialis maxillaris**. See *GNATHALGIA*.-**T. cynicus**. See *RISUS sardonius*.-**T. dolorificus**. Tic douloureux. [L, 128.]-**T. maxillaris**. See *GNATHALGIA*.-**T. nascentium**, **T. neonatorum**. Fr., *sarrété, mal de sept jours*. Nine-day fits; tetanus affecting infants, usually within the first two weeks of life. It begins with *t.*, and that remains one of the most prominent symptoms. [a, 34.]-**T. of cerebral origin** [Lépine]. See *Masticatory MONOSPASM*.-**T. sardonius**. See *RISUS sardonius*.-**T. uteri**. See *TETANUS uteri*.

TRISPLANCHNIA (Lat.), n. f. $\text{Tri-tri}^2\text{-spla}^2\text{-n}^2\text{k}(\text{spla}^2\text{-n}^2\text{ch}^2\text{-})$ -ni²-a². From *tri-s*, three, and *πλάνχνη*, the viscera. Fr., *tri-splanchnie*. Of Pinel, see *Asiatic CHOLERA*.

TRISPLANCHNIC, adj. $\text{Tri-spla}^2\text{-n}^2\text{k}/\text{ni}^2\text{k}$. Pertaining to the contents of the three great body-cavities. The nerve is the sympathetic. [L, 50 (a, 48).]

TRISTACHYOUS, adj. $\text{Tri-sta}^2\text{k}/\text{-i}^2\text{-u}^2\text{s}$. From *τρεῖς*, three, and *στάχυς*, an ear of corn. Having three spikes. [a, 35.]

TRISTEARIN, n. $\text{Tri-ste}^2\text{-a}^2\text{-r}^2\text{-i}^2\text{-n}$. Ger., *T. Stearin, C₁₈H₃₆O₂ (C₁₈H₃₄O₂)_n*, occurring as scaly crystals of pearly lustre; a constituent of most of the animal fats. [B. 3 (a, 38); B. 4.]

TRISTICHIASIS (Lat.), n. f. $\text{Tri-tri}^2\text{-ti}^2\text{-sh}^2(\text{ch}^2\text{-ti}^2\text{-})$ -i²-a²(s)/si²s. Gen., -as/eos (-is). From *τριστιχία*, a triple row. Of Cornaz, a form of congenital distichiasis in which there are three rows of cilia. ["Ann. d'ocul.," xxvii (R).]

TRISTICHIOUS, adj. $\text{Tri-s}^2\text{-ti}^2\text{k}-\text{u}^2\text{s}$. Arranged in three vertical rows. [a, 35.]

TRISTIGMATIC, adj. $\text{Tri-sti}^2\text{-g}^2\text{-ma}^2\text{-t}^2\text{-i}^2\text{k}$. From *τρεῖς*, three, and *στίγμα* (see *STIGMA*). Having three stigmata. [a, 35.]

TRISTIMANIA (Lat.), n. f. $\text{Tri-sti}^2\text{-i}^2\text{-ma}^2\text{-n}^2\text{-i}^2\text{-a}^2$. From *tristis*, sad, and *mania*, madness. Of Rush, melancholia. [D, 36.]

TRISTIS (Lat.), adj. $\text{Tri-sti}^2\text{-i}^2\text{s}$. In botany, of a dull color. [a, 35.]

TRISUBSTITUTED, adj. $\text{Tri-su}^2\text{-b}^2\text{-i}^2\text{-u}^2\text{-t}^2\text{-e}^2\text{-d}$. Having three elements replaced by equivalent elements. [B.]

TRISULCATE, adj. $\text{Tri-su}^2\text{-l}^2\text{-i}^2\text{-a}^2\text{-t}$. From *tres*, three, and *sulcus*, a furrow. Having three grooves. [a, 35.]

TRISULFURETUM (Lat.), n. n. $\text{Tri-tri}^2\text{-s}^2\text{-ul}^2\text{-f}^2(\text{su}^2\text{-l}^2\text{-f}^2)-\text{u}^2\text{-r}^2\text{-e}^2\text{-t}^2(\text{at})/\text{u}^2\text{-m}^2(\text{u}^2\text{-m})$. See *TRISULPHIDE*.-**T. potassicum**. See *POTASSA sulfurata* (1st def.).-**T. sodium**. See *SODIUM trisulphide*.

TRISULPHATE, n. $\text{Tri-su}^2\text{-l}^2\text{-f}^2\text{-a}^2\text{-t}$. See *TERSULPHATE*.

TRISULPHIDE, n. $\text{Tri-su}^2\text{-l}^2\text{-f}^2\text{-i}^2\text{-d}(\text{id})$. A sulphur compound analogous to a trichloride (q. v.). [B.]

TRISULPHURETUM (Lat.), n. n. $\text{Tri-tri}^2\text{-s}^2\text{-ul}^2\text{-f}^2(\text{su}^2\text{-l}^2\text{-f}^2)-\text{u}^2\text{-r}^2\text{-e}^2\text{-t}^2(\text{at})/\text{u}^2\text{-m}^2(\text{u}^2\text{-m})$. See *TRISULPHIDE*.-**T. kalium**. See *POTASSA sulfurata* (1st def.).-**T. kalium ad usum externum**. See *POTASSA sulfurata* (2d def.).

TRITAEOPHYA (Lat.), n. f. $\text{Tri-t}^2\text{-e}^2\text{-a}^2\text{-e}^2\text{-o}^2\text{-p}^2\text{-h}^2\text{-y}^2\text{-a}^2$. From *τρεῖς*, of the third day, and *δύειν*, to produce. Written also *tritoeophyia* and *tritoeophia*. Fr., *tritoeophyie*. See *TERTIAN FEVER*.-**T. americana**. Of Sauvages, the pernicious malarial fever of immigrants to Spanish America. [a, 34.]-**T. carotica**. See *FEBRIS tertiana lethargica*.-**T. causus**. See *ARDENT FEVER*.-**T. deceptiva**. See *INTERMITTENT FEVER*.-**T. hepatalgica**. See *FEBRIS quartana hepatica*.-**T. humerosa**. See *AMPEMERINA syncoptalis*.-**T. clodes**. See *SQUATING FEVER* (1st def.).-**T. lactea**. See *FEBRIS lactea*.-**T. leipryia**. See *AMPEMERINA phricodes*.-**T. maligna**. Of Lauter, see *PERNICIOUS malarial FEVER*.-**T. semitertiana**. See *AMPEMERINA semiquartana*.-**T. simplex**. See *T. splenialgica*. See *FEBRIS quartana splenica*.-**T. syncoptalis**. See *AMPEMERINA syncoptalis*.-**T. typhodes**. Of Mangetus, see *TYPHUS FEVER*.-**T. vratislaviensis**. See *Breslau FEVER*.

TRITEUS (Lat.), n. m. $\text{Tri-t}^2\text{-e}^2\text{-u}^2\text{-s}^2\text{-u}^2\text{-s}^2\text{-u}^2\text{-s}$ (u⁴s). Gr., *τρεῖς*. See *TERTIAN FEVER*.

TRITELLURIDE, n. $\text{Tri-tri}^2\text{-e}^2\text{-l}^2\text{-u}^2\text{-r}^2\text{-i}^2\text{-d}(\text{id})$. A tellurium compound analogous to a trichloride (q. v.). [B.]

TRITERNATE, adj. $\text{Tri-tri}^2\text{-e}^2\text{-r}^2\text{-n}^2\text{-at}$. *Lat., triternatus* (from *ter*, three, and *terni*, three each). Fr., *triterné*. Ger., *dreifach-dreizählig*. Thrice ternate, ternate with each of the divisions itself triply divided. [a, 35.]

TRITHIONIC ACID, n. $\text{Tri-thi}^2\text{-o}^2\text{-n}^2\text{-i}^2\text{k}$. An unstable dibasic acid, $\text{H}_2\text{S}_2\text{O}_6$, known only in aqueous solution. [B.]

TRITICEO-GLOSSUS (Lat.), n. m. $\text{Tri-t}^2\text{-i}^2\text{-c}^2\text{-e}^2\text{-o}^2\text{-g}^2\text{-l}^2\text{-o}^2\text{-s}^2\text{-u}^2\text{-s}$ (u⁴s). From *triticeum*, wheat, and *γλῶσσα*, the tongue. An anomalous muscle arising from the arytenoid cartilage and inserted into the side of the tongue. [L, 332.]

TRITICEUS (Lat.), adj. $\text{Tri-t}^2\text{-i}^2\text{-c}^2\text{-e}^2\text{-u}^2\text{-s}^2\text{-u}^2\text{-s}$ (u⁴s). From *triticeum*, wheat. Fr., *triticié*. Pertaining to wheat, resembling a grain of wheat. [B. 38 (a, 14).]

TRITICIN, n. $\text{Tri-t}^2\text{-i}^2\text{-c}^2\text{-i}^2\text{-n}$. Fr., *triticine*. Ger., *T. 1*. An amorphous and tasteless substance $\text{C}_{12}\text{H}_{22}\text{O}_{11}$ (or $\text{C}_{12}\text{H}_{20}\text{O}_{10}$), found in *Triticum repens*. [B. 3; B. 270 (a, 38).] 2. See *GLUTEN*.

TRITICINA (Lat.), n. f. $\text{Tri-t}^2\text{-i}^2\text{-c}^2\text{-i}^2\text{-n}^2\text{-in}^2\text{-en}^2\text{-a}^2$. From *triticeum*, wheat. See *Boiled FLOUR*.

TRITICUM (Lat.), n. n. $\text{Tri-t}^2\text{-i}^2\text{-c}^2\text{-u}^2\text{-m}^2\text{-u}^2\text{-m}$ (u⁴m). From *terere*, to rub. Fr., *froment* (1st def.), *blé* (1st def.), (*rhizome* de) *chénopode officinal* [Fr. Cod.] (2d def.), *petit chénopode (rhizome)* [Fr. Cod.] (2d def.). Ger., *Weizen* (1st def.), *Queckenwurz* (2d def.). 1. Wheat; a genus of gramineous herbs of the *Hordeae*. 2. Of the U. S. Ph., the rhizome of *T. repens*. [a, 35.]-**Amylum tritici**. See *Wheat STARCH*.-**Decoctum furfuris tritici**. A preparation made by boiling 1 part of wheat bran in 36 parts of water till reduced to 28 parts, and after it has cooled and settled, straining the liquid. [B. 119 (a, 14).]-**Extractum tritici fluidum** [U. S. Ph.]. Fr., *extrait liquide de chénopode*. Ger., *füssiges Queckenextrakt*. A preparation made by exhausting t. (2d def.) in a percolator with boiling water, evaporating to 80 c. c., shaking up with 20 c. c. of alcohol of sp. gr. 0.820, filtering after forty-eight hours, and bringing up to 100 c. c. with alcohol of sp. gr. 0.974. [B. 95 (a, 38).]-**Farina tritici** [Br. Ph.]. Fr., *farine de froment*. Ger., *Weizenmehl*. Wheat flour; the grain of *T. sativum* ground and sifted. [a, 35.]-**Farina tritici fosta**. See *Baked FLOUR*.-**Pitana de radice tritici**. See *Tisane de chénopode*.-**Saccharum tritici**. Ger., *Queckenwurzelzucker*. A sweetish crystalline substance obtained from the extract of *T. repens*, differing from other sugars in its greater solubility in alcohol. If dissolved in 120 parts of hot alcohol and cooled, it forms a solid mass. [B. 48 (a, 14).]-**T. acutum**. A European species. The root-stock is used like that of *T. repens*. [a, 35.]-**T. amyleum**, **T. atratum**. Fr., *épeautre*. Ger., *Emmerkorn, Emmerweizen, Reisdinkel*. Amel corn, starch wheat, the *Grain de coccos* (or two-grained wheat) of Dioscorides; a species (by Haecel considered a variety of *T. vulgare*) still cultivated in southern Europe as a summer wheat. It is suitable for starch-making. [a, 35.]-**T. caninum**. Awned wheat-grass, dog's-tooth (or couch)-grass. It probably has the same properties as *T. repens*. Dogs eat the blades to induce vomiting. [a, 35.]-**T. durum**. Fr., *froment corné*. Ger., *hartfruchtiger Weizen, Bartweizen*. Hard-grained wheat, cultivated especially in southern Europe. The seeds are richer in nitrogen than the soft wheats. [a, 35.]-**T. glaucum**. Ger., *seegrün* (oder *blaugrün*) *Weizen*. 1. A European species closely related to *T. repens*. The root-stock is used like that of the latter. [a, 35.] 2. See *T. polonicum*.-**T. monococcum**. Fr., *froment monococque*, *blé* (ou *épeautre*) *local, petit épeautre, riz sec*. Ger., *einkörniger Weizen, Einkorn, Peterskorn*. St. Peter's corn, single-grained wheat, the *Grain de Dioscorides*; the poorest species in cultivation with respect to the quality and quantity of flour yielded by the grain. It is found wild in Greece and Mesopotamia. [a, 35.]-**T. polonicum**. Fr., *froment* (ou *seigle*) *de Pologne*. Ger., *polnischer Weizen, Gomer*. Polish wheat; a species of unknown origin, cultivated in parts of Europe. The elongated, glassy seeds furnish a fine white flour having the properties of that of *T. vulgare*. [a, 35.]-**T. repens**. Fr., *froment rampant, agram, auge, laitue de chien, chéniend des boutiques, petit chéniend, sainte neige*. Ger., *kriechender Weizen, Quecken, Pöden, Queckweizen, Weizenquecken, Queckgras, Hundegrass, Reckgras, Couch-grass* (or wheat), dog- (or quack-, or scutch-, or shelly-, or skally-, or scutch-) grass; a weed, widely dispersed in Europe, northern Asia, and North and South America. Its sweetish rhizome, occurring in straw-colored fragments from 5 to 10 mm. long and 2 to 3 mm. thick, is used in cystitis and irritable bladder and as a diluent and a slightly nutritious drink. It contains acid malates, sugar, tritacin, and another gummy substance containing nitrogen. [a, 35.]-**T. sativum**. See *T. vulgare*.-**T. spelta**. Fr., *froment rouge, engrain, ingrain, spaute, spautre, grand épeautre*. Ger., *Dinkelweizen, Spelz, Speise, Vesen, Zwickmühl*. Dinkel (or spelt-) wheat, the *Grain* of Dioscorides; indigenous to the Persian mountains, and cultivated in Europe. The seeds yield an excellent flour, used especially for pastry. [a, 35.]-**T. vulgare**. Fr., *froment* (*cultivé*), *blé*, *bled*. Ger., *gemeiner Weizen*. Common wheat; according to Frédéric Houssay, found wild in the mountains to the east of Kurdistan, though generally believed to have arisen through culture from some species of *Agropyron*. Its seeds, ground and sifted, constitute flour, official in the ph's as *farina tritici*. Wheat flour chiefly contains starch (see *Wheat STARCH*), gluten, albumin, sugar, and a gummy substance which differs from ordinary gum in containing nitrogen and in not yielding mucic acid when treated with nitric acid. Flour is sometimes sprinkled on inflamed surfaces; boiled with milk, it forms an excellent emollient poultice. Wheat bread, toasted, infused, and flavored, is used as a nutritive drink in fevers. The husk of the seed (see *BRAN*) is also used medicinally. [a, 35.]-**T. zeae**. See *T. spelta*.

TRITOPINE, n. $\text{Tri-t}^2\text{-o}^2\text{-p}^2\text{-i}^2\text{-n}$. An alkaloid, $\text{C}_{10}\text{H}_{14}\text{N}_2\text{O}$, obtained from opium, and forming transparent prismatic crystals. Its tendency to cause convulsions contra-indicates its use as a narcotic. [B. 270 (a, 38).]

TRITOVUM (Lat.), n. n. $\text{Tri-t}^2\text{-o}^2\text{-v}^2\text{-u}^2\text{-m}^2\text{-u}^2\text{-m}$ (u⁴m). From *τρεῖς*, the third, and *ὄν*, an egg. In certain spiders, the innermost of three membranes covering the embryo. [L, 196.]

TRITUBERCULISM, n. $\text{Tri-tu}^2\text{-b}^2\text{-u}^2\text{-r}^2\text{-c}^2\text{-u}^2\text{-l}^2\text{-i}^2\text{-s}^2\text{-m}$. From *tres*, three, and *tuberculum*, a tubercle. The condition of having or consisting of three cusps or cones (said of molar teeth). ["Nature," March 20, 1890, p. 467 (a, 48).]

TRITURATE, n. $\text{Tri-tu}^2\text{-r}^2\text{-a}^2\text{-t}$. A substance or combination of substances reduced to a fine powder, especially by rubbing up in a mortar. [a, 38.]

TRITURATED, adj. $\text{Tri}^2\text{t}^2\text{u}^2\text{r}^2\text{-at-e}^2\text{d}$. Finely powdered, especially by being rubbed up in a mortar. [a, 38.]

TRITURATION, n. $\text{Tri}^2\text{t}^2\text{-u}^2\text{r}^2\text{-a}^2\text{shu}^2\text{n}$. Lat. *trituration* (from *tritura*, a rubbing). Fr. t. Ger. *Zerreibung*. In pharmacy, the act or process of rubbing up in a mortar or otherwise, so as to reduce to a fine powder; also the resulting powder; of the U. S. Ph., a preparation in which a medicinal substance is rubbed up with nine times as much powdered sugar of milk into a homogeneous powder. [B, 95 (a, 88).]

TRITUS (Lat.), n. m. *Trit*($\text{t}^2\text{r}^2\text{e}^2\text{t}^2/\text{u}^2\text{s}^2(\text{u}^2\text{s})$). Gen., *trit/us*. From *terere*, to rub. See **TRITURATION** and **FRICTION**.

TRITYL, n. $\text{Tri}^2\text{t}^2/\text{yl}$. Fr. *trityle*. Propyl; so called as containing three atoms of carbon. [B.]—**Hydrated t. oxide**, **T'-alcohol**, **T. hydrate**. See **PROPYL alcohol**.

TRITYLENE, n. $\text{Tri}^2\text{t}^2/\text{yl-at}$. A salt of trityl.

TRITYLIC, adj. $\text{Tri}^2\text{t}^2/\text{yl-i}^2\text{c}$. Containing trityl.

TRUMFETTA (Lat.), n. f. *Treum-fe-ta*/' ta '. From *Trionfetti*, an Italian botanist. Fr. *cousin*, *lappulier*. West Indian burweed, parrotque-bur of Jamaica; a genus of tillaceous plants. [a, 35.]—**T. elliptica**. A species with a mucilaginous root. The inner bark and the juice are used in the Antilles as detergents. [a, 35.]—**T. lappula**, **T. Plumieri**. Fr. *grand cousin*, *herbe à cousin*, *pou de moine*. Great-wort of the West Indies; a mucilaginous shrub. The root and inner bark are used in mucous discharges, hemorrhages, etc. [a, 35.]—**T. rhomboidea**, **T. semitriloba**. Two species (the first West Indian, the second [burbar-tree] distributed over the tropics of both hemispheres) used like *T. lappula*. [a, 35.]

TRIVALENCE, n. $\text{Tri}^2\text{v}^2\text{a}^2\text{l-e}^2\text{ns}$. Ger. *Dreivertheiligkeit*. The condition or property of being trivalent. [B.]

TRIVALENT, adj. $\text{Tri}^2\text{v}^2\text{a}^2\text{l-nt}$. From *tres*, three, and *valere*, to be worth. Fr. t. Ger. *dreiverthig*. Having an atomicity of three; i. e., being capable of replacing three atoms of hydrogen in a compound.

TRIVALERIN, n. $\text{Tri-val}^2\text{e}^2\text{r-i}^2\text{n}$. Fr. *trivalérine*. A substance, $\text{C}_8\text{H}_{10}(\text{O}_2\text{H}_2\text{O}_2)_2$, of disagreeable odor, found in the oil of certain marine mammals. [B, 3 (a, 38).]

TRIVIA (Lat.), n. f. $\text{Tri}^2\text{v}^2/\text{ia}^2(\text{w}^2\text{i}^2)\text{-a}^2$. From *tres*, three, and *via*, a way. The point where the three semicircular canals of the cochlea cross each other. [L, 221.]

TRIVIAL, adj. $\text{Tri}^2\text{v}^2/\text{ia}^2\text{-l}$. Lat. *trivialis* (from *trivium*, the meeting of three roads). Fr. t. Ger. *schlicht*. Of the name of an animal or plant, common or vulgar; also specific, as opposed to generic. [a, 35.]

TRIXIS (Lat.), n. f. $\text{Tri}^2\text{r}^2/\text{ix}^2\text{-is}$. Gen., *trixis(-is)*. Fr. *trixide*. 1. Of Gärtner, the genus *Proserpinaca*. 2. Of Browne, a genus of composite herbs or shrubs. The *Trixides* are a division of the *Nassauvices*. [a, 35.]—**T. antimenorrhoea**. A tonic and emmenagogue species found in tropical America. [a, 35.]—**T. brasiliensis**. A species used as an emmenagogue. [a, 35.]—**T. frutescens**. The *palo de Santa-Maria* of Panama; used as a vulnerary. [a, 35.]—**T. fruticosus**, **T. pipitzahuac**. A Mexican species used as a drastic purgative and recommended in cholera and dysentery. It contains pipitzaholic acid (q. v.). [a, 35.]

TRIZINCIC, adj. $\text{Tri-z}^2\text{n}^2/\text{ic}^2\text{-i}^2\text{c}$. Containing three atoms of zinc in the molecule. [B.]

TROCAR, n. $\text{Tro}^2\text{-ka}^2\text{r}$. Fr. t. *trocart*, *trois-quarts*. Ger. *T. Trocar*, *Trocar*, *Abzapper*, *Bauchstich*. An instrument for drawing off liquid from a cavity, consisting of a perforator and a cannula. [E.]—**Lancet-t.** A t. having a lancet-shaped point. [a, 34.]—**Piloting t.** A t. devised by Durham for introducing the articulated tracheotomy tube.—**Rectum t.** A t. with a large curve for the operation of tapping the bladder through the rectum. [E.]

TROCHAL, adj. $\text{Tro}^2\text{-k}^2\text{l}$. From τροχός , a wheel. Wheel-shaped. [a, 27.]

TROCHANTER (Lat.), n. m. *Trok*($\text{tro}^2\text{ch}^2\text{-a}^2\text{nt}^2(\text{a}^2\text{nt})^2/\text{u}^2\text{s}^2(\text{ar})$). Gen., *-er*⁹(-is). Gr. τροχαντήρ from τροχός , to run). Fr. t. Ger. *Rollhügel*. 1. Of Galen, the ball on which the hip bone turns in its socket. 2. One of two processes upon the upper end of the shaft of the femur. 3. In arthropods, the segment of a leg that is second from the body. [L.]—**Great t.** See *T. major*.—**Lesser t.** See *T. minor*.—**Third t.** See *T. tertius*.—**T. major**. A thick process at the upper end of the femur which projects upward externally to the union of the neck and shaft. [L.]—**T. minor**. A conical tubercle upon the inner and posterior surface of the upper end of the femur, at the junction of the shaft and neck. [L.]—**T. tertius**. An anomalous process upon the upper end of the platum popliteum of the femur. [L, 332.]

TROCHANTERIAN, **TROCHANTERIC**, adj's. *Trok-a-nt'er*⁹(-a-nt', er)⁹*ik*. Fr. *trochantérien*, *trochantérien*. Ger. *trochantersch*. Pertaining to or resembling a trochanter.

TROCHANTINE, n. *Trok-a-nt'en*. In certain insects, a small segment interposed between the coxa and the trochanter. [L, 196.]

TROCHANTINIANUS (Lat.), adj. *Trok*($\text{tro}^2\text{ch}^2\text{-a}^2\text{nt}^2(\text{a}^2\text{nt})^2/\text{i}^2\text{n}^2(\text{en})^2\text{-i}^2\text{a}^2\text{n}^2(\text{a}^2\text{n})^2/\text{u}^2\text{s}^2(\text{u}^2\text{s})$). Fr. *trochantinien*. Pertaining to the trochanter minor. [L, 50 (a, 14).]

TROCHANTINUS (Lat.), n. m. *Trok*($\text{tro}^2\text{ch}^2\text{-a}^2\text{nt}^2(\text{a}^2\text{nt})^2/\text{i}^2\text{n}^2(\text{en})^2\text{-u}^2\text{s}^2(\text{u}^2\text{s})$). Fr. *trochantin*. See **TROCHANTER minor**.

TROCHE, n. *Trok'e*. From τροχός , a round cake. Lat. *trochiscus*. Fr., *trochisque*. Ger., *Küchleichen*. A round lozenge. [D, 6.] See also **TROCHISCUS** and cf. **TABLET** and **PASTILLE**.

TROCHIA (Lat.), n. f. *Trok*($\text{tro}^2\text{ch}^2\text{-i}^2\text{a}^2$). From τροχός , a wheel. An old term for the orbit. [F.]

TROCHILIA (Lat.), n. f. $\text{Trok}^2(\text{tro}^2\text{ch}^2\text{-i}^2/\text{i}^2\text{a}^2\text{-a}^2)$. See **TROCHLEA**.

TROCHINUS (Lat.), n. m. *Trok*($\text{tro}^2\text{ch}^2\text{-i}^2\text{n}^2(\text{en})^2/\text{u}^2\text{s}^2(\text{u}^2\text{s})$). From τροχός , a wheel. Fr., *trochin*. The lesser tuberosity of the humerus. [L, 49, 50 (a, 14).]

TROCHISCANTHES (Lat.), n. m. *Trok*($\text{tro}^2\text{ch}^2\text{-i}^2\text{sk-a}^2\text{-n}^2\text{th}^2(\text{ez})^2\text{as}$). From τροχίσκος , a small wheel, and *ἄνθος*, a flower. Fr., *trochiscanthe*. A genus of the *Umbelliferae*. [a, 35.] **T. nodiflorus**. An herb sometimes confounded with *Levisticum officinale*. The roots are sold in southern France for those of *Archangelica officinalis*. [a, 35.]

TROCHISCUS (Lat.), n. m. *Trok*($\text{tro}^2\text{ch}^2\text{-i}^2\text{sk}^2/\text{u}^2\text{s}^2(\text{u}^2\text{s})$). Gr., τροχίσκος (from τροχός , a wheel). Fr. *trochisque*. See **TROCHE**.—**Trochisci albi**. See *Pulsis CERUSSÆ compositus*.—**Trochisci alexiterii nostri**. Cordial troches; a mixture of 1 part of Armenian bole, 2 parts each of dry citron-peel and angelica-seeds, 3 parts each of Virginia snake-root and crabs' claws, and 11 parts of white sugar, all finely powdered, and worked with a sufficient quantity of tragacanth mucilage into a paste for troches. [B, 200 (a, 14).]

—**Trochisci bechici** (Gr. Ph.). Lozenges consisting of 12 parts of purified licorice-juice, 36 of sugar, 1 part of fennel-seeds, and enough tragacanth mucilage. [B, 95 (a, 38).]—**Trochisci bechici albi**. Lozenges consisting of 45 parts of starch made into a paste with rose water and either 187 parts of gum arabic and 589 of sugar or 90 of gum arabic, 540 of sugar, and 3 of benzoic acid; or with tragacanth mucilage and either 45 parts of Florentine iris-root and 600 of sugar or 33 of licorice, 36 of iris, and 720 of sugar, or 240 of licorice, 120 of iris, and 180 of sugar. See also *Tablettes de gomme* and *Trochisci ALTHEÆ*.—**Trochisci bechici citrini**. Fr., *trochisques d'amidon safranés*. Lozenges consisting of 15 parts of starch, 12 of Florentine iris, 11 of licorice, 24 of saffron, and 240 of sugar, made into a paste with tragacanth mucilage. [B, 119 (a, 38).]—**Trochisci contra vermes**, **Trochisci hermetici**. Fr., *pastilles vermifuges purgatives*. Thirty-five-centigramme lozenges consisting of 5 parts each of castor oil and jalap, 14 each of scammony and 240 of sugar, made into a paste with tragacanth mucilage. [B, 119 (a, 38).]—**Trochisci imperatoris**. See *MORSUM imperatoris*.—**Trochisci pectorales**. Ger., *Brustkuchen*. See *Tablettes de gomme*.—**Trochisci pectorales Danorum**. Fr., *trochisques de réglisse opiacées*. Lozenges consisting of 150 parts each of licorice-juice and gum arabic, 7 of opium, 15 of tincture of balsam of Tolu, and 240 of syrup. [B, 119 (a, 38).]—**Trochisci reptici** (Gr. Ph.). A preparation consisting of 1 drachm each of magnesium lactate and sodium lactate, 4 drachms of sugar, and enough tragacanth mucilage, divided into 60 lozenges. [B, 95 (a, 38).]—**T. scillitici**. See *T. SCILLÆ Democratis*.—**Trochisci stibiaci**. Fr., *tablettes antimoniales (ou de sulfure d'antimoine)*. Ger., *Antimonmorsellen*. Troches containing antimony trisulphide in quantities varying from 1 grain (Gr. Ph.) (1837) to 15 grains (Gr. Ph.) (1838). Hess. Ph. (1837), and even to 75 grains (Bruns. Ph. (1777)), mixed with different ingredients, among which were sugar, cinnamon, lesser cardamom, almonds, orange-peel, and gum arabic or tragacanth. [B, 119.]

TROCHISQUE (Fr.), n. *Tro-shek*. See **TROCHE**.—**T's escarotiques**, **T's mercuriels au minium**. See *Trochisci de MINIO*.

TROCHITER (Lat.), n. m. $\text{Trok}^2(\text{tro}^2\text{ch}^2\text{-i}^2/\text{u}^2\text{r}^2(\text{e}^2\text{r})$. Fr. t. From τροχός , a wheel. The greater tuberosity of the humerus. [L, 49, 50 (a, 14).]

TROCHLEA (Lat.), n. f. *Trok*($\text{tro}^2\text{ch}^2\text{-le}^2\text{a}^2$). From τροχλία , a pulley. Fr., *trouée, poulie*. Ger., *T. Rolle*. A hook or ring over or through which a muscle or tendon slips. [L.]—**T. labyrinthi**. See **COCHLEA** (2d def.).—**T. of the astragalus**. The tibial articular surface of the astragalus. [L.]—**T. of the femur**. Fr., *trouée fémorale*. See *Fossa intercondylaris (femoris) anterior*.—**T. of the obliquus oculi superior**. **T. of the orbit**. The ligamentous ring or pulley attached by fibrous tissue to a depression beneath the internal angular process of the frontal bone. It transmits the tendon of the obliquus oculi superior. [F.]

TROCHLEAR, adj. $\text{Trok}^2/\text{le}^2\text{-a}^2\text{r}$. Lat., *troucléaire*. Fr., *troucléaire*. Ger., *rollenförmig*. Pulley-shaped, circular and contracted in the centre; pertaining to a trochlea; as a n., see *Obliquus oculi superior*. [a, 35.]

TROCHLEARIS (Lat.), adj. *Trok*($\text{tro}^2\text{ch}^2\text{-le}^2\text{a}^2\text{r}^2(\text{a}^2\text{r})^2/\text{i}^2\text{s}$). From τροχλία , a pulley. Trochlear; as a n., see *Obliquus oculi superior*.

TROCHOCARDIA (Lat.), n. f. *Trok*($\text{tro}^2\text{ch}^2\text{-o}^2\text{-i}^2\text{a}^2$). From τροχός , a wheel, and *καρδια*, the heart. Of Alvarenga, a cardiac displacement with a turning of the heart on its axis. [L, 57 (a, 34).]

TROCHOCEPHALIA (Lat.), n. f. *Trok*($\text{tro}^2\text{ch}^2\text{-o}^2\text{-e}^2\text{ph}^2\text{-a}^2\text{-le}^2\text{a}^2$). (See $\text{tro}^2\text{ch}^2/\text{a}^2\text{le}^2\text{-a}^2$) [B, 3]. From τροχός , a wheel, and *κεφαλή*, the head. Fr., *trouchocephalie*. Ger., *Trochocephalie*. A malformation of the skull caused by partial synostosis of the parietal and frontal bones in the middle of the coronal suture. [L, 57 (a, 14).]

TROCHOID, adj. *Trok'o'id*. Lat., *trouchoïdes* (from τροχός , a wheel, and *εἶδος*, resemblance). Fr., *trouchoïde*. Ger., *cykloïdisch*. Wheel-like; like the turning of a wheel on its axle; of shells, conical with a flat base. [B, 28 (a, 27).]

TROCHOIDES (Lat.), adj. *Trok*($\text{tro}^2\text{ch}^2\text{-o}^2\text{-i}^2\text{d}$ -(ed)⁹(ez)⁹(as). See **TROCHOID**; as a n., see **TROCHOID ARTICULATION**.

TROCHORIZCARDIA (Lat.), n. f. *Trok*($\text{tro}^2\text{ch}^2\text{-o}^2\text{-i}^2\text{z-o}^2\text{-i}^2\text{a}^2$). From τροχός , a wheel, *σπίζω*, to divide, and *καρδια*, the heart. See **TROCHOCARDIA**.

TROCKENAMME (Ger.), n. *Trok'e-n-a-m-me*. See **Dry-NURSE**.

TROCKENCUR (Ger.), n. *Trok'e-n-kur*. Treatment by the reduction of fluid elements in the diet. [L, 57 (a, 14).]

TROCKENHÄUTIG (Ger.), adj. *Trok'e-n-ho-it-i-g*. See **SCARIOUS**.

TROCKENÖLSÄURE (Ger.), n. Tro^keⁿ-u^l-zoi^r-e². See LINOLEIC ACID.

TROCKEN (Ger.), n. Tro^ke-neⁿ. See SCLEROSIS and SCLERODERMA.

TROCAR (Ger.), **TROIS-QUARTS** (Fr.), **TROKAR** (Ger.), n. Tro^k-a^r, trw^a3-ka^r, trok^ar. See TROCER.

TROLLIUS (Lat.), n. m. Tro^li^l-u^s-f^{sk}. Fr., *trolle*, *trollière*. Ger., *Trollblume*. Globe ranunculus; a genus of the *Helleborea*. [a. 35.]—**T. asiaticus**. Fr., *trolle d'Asie*. Asiatic globe-flower. The root is a drastic purgative. [a. 35.]—**T. europæus**. Fr., *trolle (ou trollière) d'Europe*, *botte d'or*, *renoncule de montagne*. Ger., *europäische Kugelblume*, *Kugelblume*, *Kugelranunkel*, *Knobbenblume*, *Engelblume*. 1. Common globe-flower (or troll-flower), golden ball, bolts, lapper, lopper, luckin-gowan; found throughout Europe. The somewhat acrid root, *radix hellebori nigri*, occurs in commerce. The root-leaves were formerly used as an antiscorbatic. [a. 35.] 2. See *T. asiaticus*.

TROMA (Lat., n. n. Trom^as. Gen., *trom^aatos* (-atis). Gr., τρῶμα, τράμμα. See TRAUMA.

TROMMEL (Ger.), n. Trom^m-me^l. See DRUM.—**Gehört**. See TYMPANUM.—**Luftt**. See TAMBOUR (2d def.).—**T^hbauch**. Tympanites. [a. 34.]—**T^höhle**. See TYMPANIC CAVITY.—**T^hsaite**, **T^hsehne**. See CHORDA tympani.

TROMMELFELL (Ger.), n. Trom^m-me^l-fe^l. See MEMBRANA tympani.—**Nebent**. See MEMBRANA tympani secundaria.—**T^hbeutel**. See POUCHES of the membrana tympani.—**T^hentzündung**. See MYRINGITIS.

TROMMELSUCHT (Ger.), n. Trom^m-me^l-zuch^t. See PERITONEAL TYMPANITES.—**Magnet**. See GASTROTYPANITES.—**T^h der Gebärmutter**. See PHYSOMETRA.

TROMOMANIA (Lat.), n. f. Trom^m-o^m-i^o (o²)-man (maⁿ)ⁱ. a². From τρῶμος, a trembling, and *mania*, madness. See DELIRIUM tremens.

TROMPE (Fr.), n. Tro^m-p^e. A trumpet-shaped tube.—**T^h de Fallopie**. See OVIDUCT.—**T^h de Eustache**. The Eustachian tube.—**T^h utérine**. See OVIDUCT.

TROMPETE (Ger.), n. Tromp^e-at^e. A trumpet, also a trumpet-shaped tube.—**Mutt^{er}**. See OVIDUCT.—**Ohrt**. See EUSTACHIAN TUBE and EAR-TROMPET.

TROMYLES (Fr.), n. pl. Trom^{-m}el. See CILIA (2d def.).

TROMUS (Lat.), n. m. Trom^u-u^s-f^{sk} (u^s). Gr., τρῶμος (from τρέμειν, to tremble). See TREMOR.

TRONA, n. Troⁿ-a². See under SODIUM sesquicarbonate.

TRONC (Fr.), n. Troⁿ-s. See TRUNK.

TRONQUÉ (Fr.), adj. Troⁿ-ka^e. See TRUNCATE.

TROPÆOLIN, n. Trop^e-o^l-iⁿ. A name given to certain azo-dyes on account of the resemblance of their colors to those of the flowers of *Tropæolum majus*. [B. 3 (a. 38).]

TROPÆOLUM (Lat.), n. n. Tro^p-e² (a²)ⁱ-o^l-u^s-m (u^m). From τρῶπιον, of a turning. Fr., *capucine*. Ger., *Kapuzinerkresse*. Indian cress, yellow larkspur, garden nasturtium; a genus of the *Pelargoniceæ*. The *Tropæolaceæ*, or trophyworts, of Lindley an order of the *Malvales*, are included by Bentham and Hooker in the *Geraniaceæ*. The *Tropæoleæ* (Fr., *tropéolées*; Ger., *Tropæoleen*) are: Of Lindley, a tribe of the *Tropæolaceæ* of Baillon and others, a tribe or series of *Geraniaceæ*. [a. 35.]—**T. majus**. Fr., *capucine cultivée*, *cresson du Mexique*, *grand cresson d'Inde* (ou du Pérou), *fleur sanguine* (ou de sang). Fr., *grosse Kapuzinerkresse*, *indische Kresse*, *falsche Kapper*. Indian cress, tall nasturtium; a Peruvian species. The buds and young fruits are used as a condiment. It is said to contain phosphorus, and is excitant, stomachic, and antiscorbatic. The leaves and flowers, *herba et flores nasturtii indicii* (seu *nasturtii hispanici*, seu *cardami majoris*, seu *tropæoli*), were formerly official. The ripe, dried fruit is recommended as a purgative. An acrid volatile oil may be obtained from the foliage. [a. 35.]—**T. minus**. Fr., *petite capucine*, *petit cresson d'Inde*. Ger., *kleine Kapuzinerkresse*. The dwarf nasturtium of Peru, having properties like those of *T. majus*. The herb and flowers, *herba et flores nasturtii indicii minoris* (seu *cardami minoris*), were formerly official. [a. 35.]—**T. tuberosum**. Peruvian (or tuberous-rooted) nasturtium. The farinaceous tubers are eaten. [a. 35.]

TROPFEN (Ger.), n. Tro^p-f^e-n. See DROP (1st def.).—**Bielt's arsenikalische T.** See LIQUOR AMMONII ARSENICI.—**Bittere Magent^h**, **Bittere T.** See TINCTURA ANARA (1st def.) and cf. *Bitter drops*.—**Donovan'sche T.** Donovan's solution. See LIQUOR ARSENI et HYDRARGYRI IODIDI.—**Fiebert^h**. See MIXTURA SIMPLEX LUDOVICI.—**Hoffmann's T.** See SPIRITUS ÆTHERIS.—**Schwarze Fiebert^h**. See TINCTURA CHINIDIOIDI.

TROPHE (Lat.), n. f. Tro^p-h^e (tro^p-h^e). Gen., *troph^es*. Gr., τροφή (from τρέφειν, to nourish). See ALIMENT.

TROPHENSY, n. Tro^p-h^e-sⁱ. From τροφή, nourishment. Defective nutrition of a part, resulting from withdrawal of the nervous supply. [K.]

TROPHIC, TROPHICAL, adj's. Tro^p-h^e-i^k, -i²-k^l. Gr., τροφικός. Fr., *trophique*. Pertaining to nutrition. [D.]

TROPHICITÉ (Fr.), n. Tro^{-f}-e-se-ta. From τρῶσις, a turn. A reversal of the proportion of phosphates to various other urinary constituents, said to be observed constantly in hysteria. [Gaz. des hôp., 31 Jan. 23, 1892, p. 90 (a. 50).]

TROPHIS (Lat.), n. f. Tro^p-hⁱ-s. From τροφίς, well-fed. Fr., *trophide*, *T.* The ramoon-tree, a genus forming a tribe (*Trophideæ*) of the *Moraceæ*. [a. 35.]—**T. americana**. A West Indian shrub or tree, used as a mild astringent and as an alternative. [a. 35.]—**T. aspera**. Fr., *t. rude*. Paper-tree of Siam and India. The

juice of the leaves and young shoots is used in ulcers and skin diseases, and the berries as an astringent and antiseptic. [a. 35.]

TROPHOBLAST, n. Tro^p-h^o-blast. From τροφή, nourishment, and βλαστός, a sprout. The epiblast of the blastocyst, in contradistinction to the epiblast of the germinal area, or the formative epiblast. [Hübner, "Quart. Jour. of Micr. Sci.," xxx, p. 298 (J.).]

TROPHODISC, n. Tro^p-h^o-di^{sk}. From τροφή, nourishment, and δίσκος, a disc. See TROPHOSPHERE.

TROPHOLOGY, n. Tro^p-h^o-lo^{-gi}. From τροφή, nourishment, and λόγος, understanding. Fr., *trophologie*. Ger., *Ernährungslehre*. The physiology, etc., of nutrition. [a. 48.]

TROPHONEUROSIS (Lat.), n. f. Tro^p-h^o-u²-o²-u²-s (u^s). Gen., -o²-e² (-is). From τροφή, nourishment, and νεῦρον, a nerve. Fr., *trophonévrose*. Ger., *Trophonévrose*. 1. A neurosis dependent on nutritive changes. [D.] 2. Failure in nutrition, due to impairment of the nervous action; in dermatology, a cutaneous disease characterized by nutritive changes in the skin depending on morbid conditions of the nerves. [G. 54; K.]—**Facial T.** [Romberg]. See *Progressive facial atrophy*.—**Muscular T.** A t. in which the muscles suffer nutritive changes in connection with certain diseases of the nervous system. [D. 35.]—**Romberg's T.** Unilateral atrophy of the face.—**T. disseminata**. See SCLERODERMA.

TROPHONEUROTIC, adj. Tro^p-h^o-u²-o²-i²-k. Fr., *trophonévrotique*. Ger., *trophonévrotisch*. Pertaining to or affected with a trophoneurosis. [D.]

TROPHONOSUS (Lat.), n. f. Tro^p-h^o-n^o-o²-s (u^s). From τροφή, nourishment, and νόσος, disease. Fr., *trophonose*. See TROPHOPATHY.

TROPHOPATHY, n. Tro^p-h^o-p^a-thⁱ. Lat., *trophopathia* (from τροφή, nourishment, and πάθος, disease). Fr., *trophopathie*. Any disease of nutrition.

TROPHOPLAST, n. Tro^p-h^o-plast. From τροφός, a feeder, and πλάσσειν, to form. Of Meyer, a plastid or leucite. [a. 35.]

TROPHOPYLE (Fr.), n. Tro^{-f}-o-pel. See HÉTÉROPYLE.

TROPHOSOME, n. Tro^p-h^o-som. From τροφή, nourishment, and σῶμα, the body. A collective term for the assemblage of the nutritive zooids of a hydrosome. [B. 28 (a. 27).] Cf. GONOSOME.

TROPHOSPERM, n. Tro^p-h^o-spu²-rm. Lat., *trophosperma*, *trophospermium* (from τροφή, nourishment, and σπέρμα, seed). Fr., *trophosperme*. See PLACENTA (4th def.).

TROPHOSPHERE, n. Tro^p-h^o-sfer. From τροφή, nourishment, and σφαῖρα, a sphere. A zone of modified cellular tissue interposed between the decidua stroma and the blastocyst. [Hübner, "Quart. Jour. of Micr. Sci.," xxx, p. 332 (J.).]

TROPHOTROPISM, n. Tro^p-h^o-t²-ro^p-i²-z^m. From τροφή, nourishment, and τρέφειν, to turn. Fr., *trophotropisme*. A tendency to motion induced in the particles of protoplasm by the presence of nutritive material near it. [Stahl, "Bot. Ztg.," 1884, pp. 145, 161, 187; "Proc. of the Roy. Micr. Soc.," 1884, p. 603 (B).]

TROPIC ACID, n. Tro^p-i^k. Fr., *acide tropique*. Ger., *Tropäusäure*. An acid, C₉H₉O₉ = C₉H₇.CH(CH₃).OH.CO.OH, obtained by decomposing atropine or hyoscyamine with baryta water or in other ways; colorless acicular or tabular crystals. [B. 3, 270 (a. 38).]

TROPIDIN, n. Tro^p-i²-dⁱ-n. Fr., *tropidine*. Ger., *T.* A substance, C₈H₉N₃, obtained by heating atropine to 180° C. with hydrochloric and glacial acetic acids; an oily liquid of intoxicating odor similar to that of the conin. [B. 38 (a. 14).]

TROPIDONOTUS (Lat.), n. m. Tro^p-i²-d^o-no^t-u^s (u^s). From τρῶπις, a keel, and νῶτος, the back. Fr., *tropidonote*. Ger., *Wassernatter*. A genus of fresh-water Colubrina. [a. 85.]—**T. natrix**. Ger., *gemeine Natter*, *Ringelnatter*. Common ring snake; a non-venomous European serpent. Its fat, *axungia serpentum*, which resembles fish-oil, was formerly official. The entire animal, dried, has been used in place of vipers. [a. 35.]

TROPIN, n. Tro^p-iⁿ. Fr., *tropine*. Ger., *T.* A body, C₈H₁₀N₂O = C₈H₉.(C₂H₅.OH)(N₂CH₃), of peculiar tobacco-like odor, obtained by decomposing atropine with baryta water, occurring as tabular crystals. [B. 270 (a. 38).]

TROPOMÈTRE (Fr.), n. Tro^{-p}-o-me²-tr^h. From τρέφειν, to turn, and μέτρον, a measure. An instrument devised by Broca for measuring the degree of torsion of the shaft of the humerus. See ANGLE of torsion.

TROU (Fr.), n. Tru. See FORAMEN and HOLE.—**T. anonyme**. See *Stylo-mastoid FORAMEN*.—**T^hs auditifs**. See *Auditory CANALS*.—**T. borgne**. See *FORAMEN CAECUM*.—**T. carotidien**. See *CAROTIC FORAMEN*.—**T. central**. See *FOVEA CENTRALIS*.—**T^hs condyliens**. See *Anterior condylar FORAMEN* and *Posterior condylar FORAMINA*.—**T. de Botal**. See *FORAMEN OF BOTALLO*.—**T. déchiré**. See *FORAMEN LACERUM*.—**T. déchiré antérieur**. See *Sphenoidal FISSURE*.—**T. déchiré postérieur**. See *FORAMEN LACERUM POSTERIUS*.—**T^hs de conjugaison**. See *Intervertebral FORAMINA*.—**T. de Ferrein**. See *Stylo-mastoid FORAMEN*.—**T^hs de l'oreille**. See *Auditory CANALS*.—**T. de Magendie**. See *FORAMEN OF MAGENDIE*.—**T. de Monro**. See *FORAMEN OF MONRO*.—**T. du milieu**. In Normandy, the habit of taking alcoholic drinks at the middle of a meal, to renew the appetite. [Dujardin-Beaumez, "Gaz. hebdomadaire de méd. et de chir.," Nov. 6, 1885, p. 733.]—**T. du nerf maxillaire**. See *FORAMEN ORALE* (2d def.).—**T. du nerf sus maxillaire**. See *FORAMEN ROTUNDUM*.—**T. épineux**. See *FORAMEN SPINOSUM*.—**T. ethmoidal**. **T. fronto-ethmoidal**. See *FRONTO-ETHMOIDAL FORAMEN*.—**T. grand rond**. See *FORAMEN ROTUNDUM*.—**T. ischio-pubien** [Vernieu]. See *Oburator FORAMEN*.—**T. jugulaire**. See *FORAMEN LACERUM POSTERIUS*.—**T. labyrinthique**. See *Internal auditory CANAL*.—**T. mastoïdien**. See *Mastoid FORAMEN*.—**T. maxillaire inférieur**. See *FORAMEN ORALE* (1st def.).—**T. maxillaire supérieur**. See *FORAMEN ROTUNDUM*.—**T. mentonnier**. See *Inferior dental FORAMEN*.—**T. nourricier**. See *Nu-*

trient FORAMEN.—**T. obturator.** See **Obturator FORAMEN.**—**T. occipital.** See **FORAMEN MAGNUM.**—**T. optic.** See **Optic FORAMEN.**—**T. orbitaire inférieur.** See **Intra-orbital FORAMEN.**—**T. orbitaire interne.** See **Anterior ethmoidal CANAL.**—**T. orbitaire supérieur.** See **Supra-orbital FORAMEN.**—**T. oval.** See **FORAMEN Ovale** (1st def.) and **Obturator FORAMEN.**—**T. ovale de Pacchioni.** The opening in the tentorium through which the crura centri pass. [L. 31.]—**T. pariétal.** See **Parietal FORAMEN.**—**T. petit rond.** See **FORAMEN SPINOSUM.**—**T. rhachidien.** See **Vertebral FORAMEN.**—**T. rond.** See **FORAMEN VERTICILLUM.**—**T's sacrés antérieurs.** See **Anterior sacral FORAMINA.**—**T's sacrés postérieurs.** See **Posterior sacral FORAMINA.**—**T's sciatiques.** See **Great sacro-sciatic FORAMEN** and **Small sacro-sciatic FORAMEN.**—**T. sourcilier.** See **Supra-orbital FORAMEN.**—**T. sous-orbitaire.** See **Suborbital FORAMEN.**—**T. sous-pubien.** See **Obturator FORAMEN.**—**T. sous-temporal.** **T. sphéno-épineux.** See **FORAMEN SPINOSUM.**—**T. sphéno-palatin.** See **Spheno-palatine FORAMEN.**—**T. stylo-mastoidien.** See **Stylo-mastoid FORAMEN.**—**T. sus-orbitaire.** See **Supra-orbital FORAMEN.**—**T. vitellaire.** See **Vitellar HOLE.**

TROUGH. **n.** **Trôff.** A receptacle, usually oblong in shape, for water and other liquids. [a. 48.]—**Hydragrogneumatic t.** See **CUVE HYDRAGROGNEUMATIQUE.**—**Pneumatic t.** **Fr. cuve hydropneumatique.** A t. by means of which gases can be collected and isolated over water or mercury in inverted vessels. [a. 48.]

TROUSSE (Fr.), **n.** **Trus.** A pocket case of surgical instruments. [E.]

TROUSSE-GALANT (Fr.), **n.** **Trus-ga²-la²n².** See **CHOLERA morbus.**

TROUSSEAU (Fr.), **n.** **Tru-so.** See **FASCICULUS.**—**T. musculoux.** A thin muscular layer. [L. 41 (a. 14).]

TROUTS, **n.** **Tru²u²t.** In Ireland, a form of chloasma occurring among the poor who use turf fires. [G.] Cf. **EHELIAS ab igne.**

TRÜBE (Ger.), **adj.** **Tru²b²e².** See **CLOUDY.**

TRÜBSINN (Ger.), **n.** **Tru²b²zi²n.** See **MELANCHOLIA.**

TRÜBUNG (Ger.), **n.** **Tru²b²u²n².** Cloudiness. [D. 4.]

TRUFFE (Fr.), **n.** **Truff.** See **TUBER.**—**T. à l'ail.** See **TUBER griseum.**—**T. blanche.** See **TUBER griseum** and **CHOIROMYCES magnus.**—**T. d'eau.** See **TRAPA natans.**—**T. de cerf.** See **ELAPHOMYCES cervinus.**—**T. d'hiver.** See **TUBER cibarium.**—**T. douce.** See **TRONCEA batatas.**—**T. jaune.** See **ELAPHOMYCES cervinus.**—**T. noire.** See **TUBER cibarium.**

TRUFFEL (Ger.), **n.** **Truff²fe²l.** See **TUBER.**—**Aechte T.** **Essbare T.** See **TUBER cibarium.**—**Graue T.** See **TUBER griseum.**—**Hirscht.** See **ELAPHOMYCES cervinus.**—**Schwarze T.** **Schweinett.** See **TUBER cibarium.**

TRUFFLE, **n.** **Tru²ff.** See **TUBER.**—**English t.** See **TUBER æstivum.**—**False t's.** The *Hypogae* (see under **HYPOGÆOUS**). [a. 35.]—**French t.** See **TUBER melanosporum.**—**Red t.** See **TUBER rufum** and **MELANOGASTER variegatus.**

TRUGDOLDE (Ger.), **n.** **Trug²do²ld-e².** See **CYME.**

TRUGGEBILD (Ger.), **n.** **Trug²ge²b²ild.** See **PHANTOM.**

TRUGSTIEL (Ger.), **n.** **Trug²st²el.** See **PSEUDOPODIUM** (1st def.).

TRUGWAHRNEHMUNG (Ger.), **n.** **Trug²wa²r-nam-un².** See **HALLUCINATION.**

TRUMBUS (Lat.), **n. m.** **Tru²mb**(tru²mb)/u²s(u²s). See **THROMBUS.**

TRUMPET, **n.** **Tru²mp²e²t.** **Gr. τράμπη.** **Lat. salpinx, tuba, cornu.** **Fr. trompette.** **Ger. Trompete.** A musical wind-instrument in which the sound issues through a flaring opening; also any t.-like instrument or apparatus. [a. 48.]—**Eat-t.** An instrument, usually of metal or of vulcanite, having a flaring mouth-piece or a paraboloid hearing-cup. The latter is a parabolic cup from the focal point of which the sound waves are collected by a second sound-collector projecting into the cup and connected with the ear-piece. [F.]—**Falloppian t.** See **ODUCT.**

TRUNCATE, TRUNCATED, **adj's.** **Tru²n²k²at, -at-e²d.** **Lat. truncatus** (from **truncare**, to mutilate). **Fr. tronqué.** **Ger. gestutzt, abgestutzt, abgeschnitten, abgestumpft.** Lopped, ending abruptly as if cut off. [a. 35.]

TRUNCUS (Lat.), **n. m.** **Tru²n²k²**(tru²n²k)/u²s(u²s). See **TRUNK.**—**T. anatomicus.** 1. See **Innominate ARTERY.** 2. In the pl., **trunci anatomici**, see **Innominate VEINS.**—**T. anatomicus iliacus.** See **Common iliac ARTERY.**—**T. arteriosus.** See **Cardiac AORTA.**—**T. brachio-cervical.** The common branch of the artery of the aorta and of the common carotid arteries spring. [L. 332.]—**T. brachialis.** See **Brachial ARTERY.**—**T. brachialis primarius inferior.** The cord formed by the union of the anterior branches of the eighth cervical or first dorsal nerve. [L.]—**T. brachialis primarius medius.** The anterior branch of the seventh cervical nerve. [L.] Cf. **Brachial PLEXUS.**—**T. brachialis primarius superior.** The cord formed by the union of the anterior branches of the fifth and sixth cervical nerves. [L.] Cf. **Brachial PLEXUS.**—**T. brachiocephalicus.** **T. brachiocephalicus.** See **Innominate ARTERY.**—**T. bronchomediastinalis dexter.** A branch of the right lymphatic duct into which the vasa efferentia of the bronchial and mediastinal glands and the internal mammary lymphatics empty. [L. 332.]—**T. cervicalis (posterior) profundus nervi sympathici.** See **Vertebral PLEXUS.**—**T. celiacus.** See **Celiac ARTERY.**—**T. cornu-cervicis pedunculus cerebelli.** See **CORPUS denticulatum.**—**T. corporis callosi.** See **CORPUS corporis callosi.**—**T. costocervicalis.** See **Costo-cervical ARTERY.**—**Trunci encephali.** See **CRURA cerebri.**—**T. facialis efferens.** A loop of communication between the adducens nucleus and the roots of the facial nerve near their exit from the medulla. [L. 31.]—**T. innominatus.** See **Innominate ARTERY.**—**T. intestinalis.** See **Celiac**

ARTERY.—**T. lumbosacralis.** See **Lumbo-sacral CORD.**—**T. lumbalis.** See **Lumbar lymphatic TRUNK.**—**T. lymphaticus abdominalis.** A large abdominal branch of the thoracic duct. [L.]—**T. lymphaticus (communis) dexter.** See **Right lymphatic DUCT.**—**T. lymphaticus communis sinister.** See **Thoracic DUCT.**—**T. lymphaticus jugularis dexter.** A lymphatic receiving the vasa efferentia of the right side of the head and neck, and emptying into the right lymphatic duct. [L. 332.]—**T. lymphaticus jugularis sinister.** A lymphatic receiving the vasa efferentia of the left side of the head and neck, and emptying into the thoracic duct. [L. 332.]—**T. lymphaticus lumbalis.** See **Lumbar lymphatic TRUNK.**—**T. lymphaticus major.** See **Thoracic DUCT.**—**T. lymphaticus minor.** See **Right lymphatic DUCT.**—**T. lymphaticus sinister.** See **Thoracic DUCT.**—**T. medullæ spinalis.** See **CAUDEX cerebri.**—**T. medullaris cerebelli.** See **CORPUS denticulatum.**—**T. subclavus.** See **Axillary lymphatic TRUNK.**—**T. tibio-peroneus.** The posterior tibial artery above the peroneal artery. [L.]—**T. venosus alveolaris.** See **Deep facial VEIN.**

TRUNK, **n.** **Tru²n²k.** **Gr. στῆλαι.** **Lat. truncus.** **Fr. tronc.** **Ger. Stamm.** The stem of a tree: the main body or stem of any branched structure; the body as distinguished from the limbs and head. [a. 17; a. 48.]—**Axillary lymphatic t.** The exterior branch of the right lymphatic duct, formed by the vasa efferentia of the axillary glands. [L.]—**Intestinal lymphatic t.** A lymphatic receiving the vasa efferentia of the mesenteric glands. [L.]—**Lumbar lymphatic t.** A large vessel which is formed by the union of the efferent vessels from the lumbar lymphatic glands, and empties into the thoracic duct or one of its branches. [L.]—**Lymphatic t's.** Large lymphatics formed by the union of the vasa efferentia of the lymphatic glands. [L.]—**Primary t's of the brachial plexus.** The primary cords which make up the brachial plexus. [L.]

TRUNKENHEIT (Ger.), **n.** **Tru²n²k²e²n-hit.** See **DRUNKENNESS** and **INTOXICATION** (2d def.).

TRUNKSUCHT (Ger.), **n.** **Tru²n²k²zuch²t.** See **CHRONIC ALCOHOLISM** and **DIPSOMANIA.**

TRUSKAWICE, **n.** A place in Galicia, Austria, where there are saline and chalybeate springs and a sulphurous spring. [a. 14.]

TRUSS, **n.** **Tru²s.** **Lat. subligaculum, subligatura.** **Fr. boyau.** **Ger. Bruchband, Bauchcompresse.** A pad and bandage or spring for keeping parts in place, especially a hernia. [E.]—**Carotid t.** A t. for compressing the carotid artery. [J. L. Corning, "Med. Record," Feb. 18, 1883.]—**French t.** A single or double t. for lacerated laceria which exerts pressure by its elasticity. [L.] The steel band that supports the pad. [E.]—**Hainsby's t.** A t. used for approximating the edges of the wound after the operation for harelip. [E.]—**Suspensory t.** **Ger. Heberband.** A suspensory bandage. [a. 34.]

TRUXILLIC ACID, **n.** **Tru²x²i²l²ik.** From *Truxillo*, the commercial source of coca. An acid, C₁₄H₁₀O₄, derived from cocaine. Three isomeric varieties are known, α-, β-, and γ-t. α, formerly known as γ-, δ-, and ε-isotropic acid. ["Ann. di chim. e di farmacol.," July, 1890, p. 39 (B).]

TRYMA (Lat.), **n. n.** **Trim**(tru²m)/a²s. **Gen. trym²atos (-atis).** From **τρυμα**, a hole. A drupaceous fruit with a thick eparp which at length separates from a bony nucleus, as in the walnut. [a. 35.]

TRYPANON (Lat.), **n. n.** **Tri²p²(tru²p)/a²n(a²n)-o²n.** **Gr. τρυπανον** (from **τρύπειν**, to bore). See **TREPHINE.**

TRYPESIS (Lat.), **n. f.** **Tri²p²(tru²p)-e²a²/si²s.** **Gen. -es/eos (-is).** **Gr. τρυπίσις** (from **τρύπειν**, to bore). **Fr. trypèse.** See **TREPHINING.**

TRYPETA (Lat.), **n. f.** **Tri²p²(tru²p)-e²t(a²)/a²s.** From **τρυπητής**, a borer. A genus of flies the larvae of various species of which are very destructive to fruit. [a. 48.]

TRYPTHELIUM (Lat.), **n. n.** **Tri²p²(tru²p)-e²thel**(thal)/i²u²m(u²m). From **τρυπτήν**, to bore, and **θηλή**, a nipple. **Fr. tryptélie.** **Ger. Löchervarzenflechte.** A genus of the *Trypetheliaceæ* (or *Trypetheliales*), which are a cohort of lichens. [a. 35.]—**T. cellatum.** **T. olivaceo-fuscum.** Species found on *Angustura* bark. [a. 35.]—**T. verrucosum.** A species found on ordinary Loxa-bark. [a. 35.]

TRYPHERA (Lat.), **n. f.** **Tri²p²(tru²f)-er(a²)/a²s.** From **τρυφήρος**, dainty. **Fr. tryphère.** A certain old cosmetic electuary. [L. 50.]

TRYPSIN, **n.** **Tri²p²si²n.** **Fr. trypsine.** **Ger. T.** A soluble proteolytic ferment which may be separated from the pancreatic juice and which acts in many respects like pepsin, but differs from it in being most potent in a neutral or slightly alkaline medium. The physiological difference between the two is not well understood, but it is now supposed that t. is even more powerful in digesting proteins than pepsin. The products of peptic and tryptic digestion differ, leucine and tyrosine being much the more prominent in tryptic digestion. [J.]

TRYPSINOGEN, **n.** **Tri²p²si²n-o²ge²n.** The zymogen of the pancreas, from which trypsin is formed. [L.]

TRYPTIC, adj. **Tri²p²t²ik.** Pertaining to trypsin. [a. 48.]—**TRYPTONE,** **n.** **Tri²p²ton.** Of Kühne, a peptone produced by the action of trypsin upon albuminates. [B. 270 (a. 38).]

TSCHÉLIK (Jav.), **n.** The *Strychnos tieute* or the poison (upas tieute) prepared from it. [a. 35.]

TSETSE, **n.** **Tse²tse².** **Fr. tsé-tsé.** See **GLOSSINA morsitans.**

TSIN, **n.** See **ARRACK.**

TSUCHIAKABI (Jap.), **n.** The fruit capsule of an orchid indigenous to Japan, used in affections of the urinary tract. ["Therap. Gaz.," Mar., 1886, p. 212.]

A, ape; A², at; A³, ah; A⁴, all; Ch, chin; Ch², loch (Scottish); E, he; E², ell; G, go; I, die; I², in; N, in; N², tank;

mus.—**T. cibarium.** Fr. *truffe* (tubéreuse, ou d'hiver, ou noire). Ger., *essbare* (oder *dichte*, oder *schwarze*) *Trüffel*. Earth-ball, true (or black) truffle; an esculent species found in middle and southern Europe, said to be aphrodisiac. [a, 35.]—**T. cinereum.** A tract of gray matter which extends from the corpora albicantia to the optic commisure, forming a portion of the floor of the third ventricle. [L, 15 (K).]—**T. corporis callosi.** See SPLENIUM (3d def.).—**T. Eustachii.** See PROMONTORY (2d def.).—**T. exterius.** See EMINENTIA *collateralis*.—**T. frontale.** See *Frontal eminence*.—**Tubera geniculata.** The external and internal geniculate bodies. [L, 30 (K).]—**T. griseum.** Fr., *truffe grise* (ou *à l'ail*, ou *blanche*). An esculent species, of alliaceous odor, found in Italy and France; said to be aphrodisiac. [a, 35.]—**T. gulosorum.** See *T. cibarium*.—**T. gutturosus.** See GOLTRE. **T. ischii.** See TUBEROSITY of the *ischium*.—**T. magnatum.** Piedmontese (or gray) truffle; an esculent species. [a, 35.]—**T. magnum.** See CHOIROMYCES *magnum*.—**T. maxillæ.** **T. maxillare.** See TUBEROSITY of the *superior maxilla*.—**T. melanosperrum.** A French species, much eaten. [B, 61.]—**T. moschatum.** Fr., *truffe musquée*. Ger., *Bismatrüffel*. A French species with a musk-like odor; sometimes eaten. [a, 35.]—**T. nigrum.** See *T. cibarium*.—**T. niveum.** Fr., *truffe blanche-neige*. Ger., *schneweisse Trüffel*. An edible species, found in northern Africa. [a, 35.]—**T. omentale hepatis.** An elevation on the left lobe of the liver corresponding to the lesser curvature of the stomach. [L, 332.]—**T. omentale pancreatis.** An elevation of the middle portion (corpus) of the pancreas corresponding to the lesser omentum. [L, 332.]—**T. parietale.** See *Parietal eminence*.—**T. rufum.** Fr., *truffe rousse*. Red truffle; found especially in vineyards in Italy, where it is used for food. [a, 35.]—**T. supracondyloideum.** A tuberosity on the fibula opposite the junction of the lateral border of the linea aspera. [L, 115 (a, 34).]—**T. supraorbitale.** See *Superciliary ridge*.—**T. syphiliticum.** See STERILOMA.—**T. tympani.** See PROMONTORY (2d def.).—**T. valvula (cerebelli).** See NODULE (2d def.).—**T. verrucosum.** Fr., *ognon, oignon*. A callosity, usually developed about the metatarso-phalangeal joint of the great toe. **T. zygomatium.** A protuberance on the lower border of the zygoma near the junction of the superior maxilla and the zygomatic projection. [L, 31 (a, 34).]

TUBERCLE, n. *Tub'ér-kul*. Lat., *tuberculum* (from *tuber* [g, v]). Fr., *tubercule*. Ger., *Tuberkel, Höcker, Höckerchen, Hügel, Knolle, Knötchen*. 1. In anatomy, a blunt and rounded end of a bone; also a small rounded eminence on a bone or other part. [C.] See also TUBEROSITY. 2. In dermatology, a little nodule in the skin produced by a morbid deposit or growth in the corium or subcutaneous tissue. [G, 3.] 3. In pathology, a small granular mass, varying in diameter from $\frac{1}{2}$ mm. to 3 mm.; its consistency is hard, and when fresh it is transparent, but it quickly becomes opaque, and yellowish at the centre. It is usually surrounded by a reddish vascular zone. These characteristics are commonly evident to the naked eye, but may not appear, especially if the granulations are confluent. In the latter case yellowish masses appear which can not be differentiated from a mass of caseous exudate, excepting with the aid of the microscope. When 'ts are developed in a mass of inflammatory tissue, as often occurs in the pleura and peritoneum, it is not always possible to distinguish them in the embryonal tissue in which they are imbedded. Thus they appear under two forms, the isolated and the confluent. [D, 24.] 4. In botany, (1) a wart or swelling on the surface of a part; (2) a small root or tumefied root; (3) of Acharius, see *Aspergillus verruciforme*. [a, 35.]—**Anterior t. of the femur.** A sharp projection at the lower termination of the internal supracondylar line of the femur, to which is attached the tendon of the adductor magnus. [C, 3.]—**Amygdaloid t.** A projection in the roof of the descending cornu of the lateral ventricle at its anterior extremity. [L, 15 (K).]—**Anatomical t.** See *Verruca necrogenica*.—**Anterior pair of t's.** See NATES (2d def.).—**Anterior t. (of a vertebra).** A t. at the anterior portion of the extremity of the transverse process of certain vertebrae. [L, 142.]—**Anterior t. of the atlas.** A prominence in the middle line upon the anterior arch of the atlas. [L, 332.]—**Anterior t. of the calcaneum.** A rough projection on the inferior anterior surface of the os calcis. [C, 3.]—**Anterior t. of the optic thalamus.** A rounded projection at the anterior extremity of the optic thalamus. [L, 23 (K).]—**Anterior t. of the vagina.** Lat., *tuberculum vaginæ*. A rugose, rounded prominence of the soft parts at the upper part of the orifice of the vagina, behind the meatus urinarius.—**Carotid t.** The anterior t. of the transverse process of the sixth cervical vertebra. [L.]—**Conoid t.** A broad t. on the posterior border of the clavicle at the junction of its middle and outer thirds to which the conoid ligament is attached. [C, 3.]—**Cuneate t.** Ger., *dreieckiger Kern des Kieferknorpels*. Of Schweigger, a slight projection on the cuneate fasciculus. [L, 15 (K).]—**Cuneiform t.** See *Painful t.*—**Deltoid t.** A prominence upon the anterior border of the clavicle where the deltoideus arises in part. [L, 172.]—**External supracondyloid t.** Lat., *tuberculum supracondyloideum laterale*. A prominence on the outer portion of the posterior surface of the lower end of the femur from which the plantaris muscle arises. [L, 31.]—**External t.** The most external of three t's at the extremity of the transverse process of several of the cervical vertebrae. [L, 142.]—**Fibrous t.** T. which has undergone modification chiefly by the formation of connective tissue within the (tuberculous) nodule. [D, 4.]—**Foot-t.** Lat., *parapodium*. A small lateral process, placed one on each side of a segment of an annelid, serving for locomotion. [L, 147.]—**Genial t's.** Double pairs of t's on the inner surface of the inferior maxilla (one pair on each side of the middle line), to which are attached the genio-hyoid and genio-hyoidel muscles. [L, 31, 142, 332.]—**Genital t.** A protuberance of the urino-genital region of the embryo, in front of the cloaca, being the rudiment of the penis or the clitoris. [A, 16.]—**Gray t.** See *Military t.*—**Gray t. of Rolando.** An eminence situated between the postero-lateral groove and the prolongation of the column of Burdach. [J, 15 (K).]—**Greater t. of the hu-**

manus. Its greater tuberosity. [G.]—**Hyaline t.** A military t. with hyaline degeneration of the reticulum. ["Lancet," 1882, i, p. 253 (a, 34).]—**Ilio-pubic t.** 1. See *Ilio-pectineal eminence*. 2. See *SPINE of the pubis*.—**Inferior obturator t.** A prominence opposite to the superior obturator t. on the pubic margin of the obturator foramen. [L, 31.]—**Inferior t.** The lowermost of the three t's on the extremity of the transverse process of several dorsal vertebrae. [L, 142.]—**Infrapleural t.** An eminence below the glenoid cavity of the scapula, from which the long head of the triceps arises. [L, 31, 332.]—**Internal supracondyloid t.** Lat., *tuberculum supracondyloideum mediale*. A prominence on the inner and posterior surface of the lower end of the femur from which the internal head of the gastrocnemius arises. [L, 31.]—**Internal t.** The innermost of the three t's at the extremity of several of the dorsal vertebrae. [L.]—**Intravascular t.** A t. developed in the intima of a blood-vessel. [a, 34.]—**Jugular t.** A ridge on the inner surface of the occipital bone close to the outer wall of the anterior condylar foramen. [L, 31, 332.]—**Lacrymal t.** The little papillary elevation in the inner or nasal third of the margin of the eyelid. In its centre is the opening of the punctum lacrimale. [F.]—**Laminated t.** See NODULE (2d def.).—**Leprous t's.** The t. of tubercular leprosy. [L, 49 (a, 14).]—**Lesser t. of the humerus.** See TUBEROSITY of the *humerus*.—**Lymphatic t.** Of Chiari, a military t. that consists of large and small round lymph-like cells. [a, 34.]—**Mamillary t's.** See *Corpus albicans* (2d def.).—**Mental t.** A prominence on the lower border of the inferior maxilla at the point where it changes from the transverse to the more or less antero-posterior direction. [L, 31.]—**Miliary t.** A minute, nearly globular t. occupying the stroma of an organ, and microscopically resembling at its peripheral edge a number of round cells like leucocytes, the centre of each containing a giant cell at its centre. [Coats (a, 34).]—**Mucous t.** See *Mucous PATCH*.—**Nuchal t.** The spinous process of the seventh cervical vertebra. [L.]—**Olfactory t.** See *Olfactory BULB* and *C. TUBERCULUM olfactorium*.—**Painful t.** Lat., *tuberculum dolorosum*. Fr., *angioime sous-cutané douloureux*. Of Wood, an isolated t. of a painful character slowly developed in the subcutaneous tissue, usually in the region of the limb. The precise nature of the growth is uncertain. ["Edinburgh Med. and Surg. Jour.," 1812 (G).] Cf. *NEUROMA*.—**Papillary t. (of the liver).** An overhanging projection of the Spiegelian lobe of the liver into the portal fissure. [L, 332.]—**Pathological t.** See *Verruca necrogenica*.—**Pearly t's.** See *MILIUM* (1st def.).—**Pharyngeal t.** See *Pharyngeal SPINE*.—**Pisiform t's.** The corpora albicantia. [J, 6 (K).]—**Plantar t.** A prominence on the metatarsal bone of the great toe to which the tendon of the peroneus longus is attached. [L, 332.]—**Posterior pair of t's.** See *TESTES* (2d def.).—**Posterior t. (of a vertebra).** A t. at the posterior portion of the extremity of the transverse process of certain vertebrae. [L, 142.]—**Posterior t. of the atlas.** Lat., *tuberculum atlantis posterius*. An elevation or a depression with raised margins on the outer surface in the middle line of the posterior arch of the atlas. [L, 31.]—**Posterior t. of the optic thalamus.** An elevation on the postero-lateral ventricular surface of the optic thalamus. [L, 31.]—**Pterygoid t.** A small t. on the internal surface of the inferior maxilla, for the attachment of the internal pterygoid muscle. [a, 34.]—**Quadrigenal t's.** See *CORPORA quadrigena*.—**Retrograde t.** A calcified t. [a, 34.]—**Scalene t.** A t. on the first rib for the attachment of the scalenus anticus. [C.]—**Secondary t.** Of Hamilton, t. that has followed the softening of a caseous mass, such as occurs in the lung in catarrhal pneumonia. [a, 34.]—**Subcutaneous t.** See *Painful t.*—**Superior obturator t.** A flat prominence on the margin of the obturator foramen near the acetabular notch. [L, 31.]—**Supraglenoid t.** A prominence above the glenoid fossa of the scapula from which the long head of the biceps arises. [L, 31.]—**Syphilitic t's.** See *Tubercular syphilodermis*.—**T. of a rib.** A prominence on the costal surface on a rib adjoining the sternum, directed backward, and articulating with the transverse process of the lower of the two vertebrae which the bone joins. [L, 31, 304.]—**T. of Darwin.** See *SPINE of Darwin*.—**T. of Lower.** A small projection on the wall of the right auricle, between the orifices of the superior and inferior venæ cavae, only slightly marked in man. [L, 15 (K).]—**T's of Montgomery.** The prominences formed on the surface of the areola of the nipple by the sebaceous glands. **T. of Rolando.** See *Gray t. of Rolando*.—**T. of Santorini.** An elevation of the mucous membrane of the larynx caused by the cartilage of Santorini. [L, 332.]—**T. of the calcaneum.** See *TUBEROSITY of the calcaneum*.—**T. of the cuboid.** See *TUBEROSITY of the cuboid bone*.—**T. of the epiglottis.** See *TUBERCULUM epiglottidis*.—**T. of the femur.** A prominence on the front part of the neck of the femur where it joins the shaft. **T. of the hyoid.**—**T. of the mesencephalon.** See *CORPORA quadrigena*.—**T. of the quadratus femoris.** See *LINEA quadrati*.—**T. of the radius.** See *Bicipital TUBEROSITY of the radius*.—**T. of the scaphoid bone.** A stout conical projection on the outer end of the scaphoid bone, which gives attachment to the annular ligament. [C.]—**T. of the thyroid cartilage.** A t. at the back part of the upper border of the outer surface of the ala of the thyroid cartilage. [L, 31.]—**T. of the tibia.** The anterior tuberosity of the tibia. [L.]—**T. of the ulna.** An elevation at the base of the coronoid process of the ulna upon which the brachialis anticus is inserted. [L, 31.]—**T. of the zygozoma.** A prominence at the beginning of the zygozoma to which the external lateral ligament of the temporo-maxillary articulation is attached. [L, 172.]

TUBERCULAR, adj. *Tub'ér-kul'* or *u'l*-a'r. Having the appearance of a tubercle; also tuberculate, tuberculous. [D; a, 35.]

TUBERCULATE, TUBERCULATED, adj's. *Tub'ér-kul'-u't*-at, -at-e'd. Lat., *tuberculatus*. Fr., *tuberculé*. Ger., *klein-höckerig*. Provided with tubercles; also tuberculous. [D; a, 35.]

TUBERULE (Fr.). n. *Tu'bé-ré-kul'*. See *TUBERCLE*.—**T's bijumeaux.** See *CORPORA quadrigena*.—**T. cendré.** See *Gray TUBERCLE of Rolando*.—**T. coracoidien** [Cuvier]. The

coracoid bone (1st def.) in mammals. [L. 14.]—*T. d'Aranzi*. See *Corpora Araniti*.—*T. de guérison* [Crucellier]. See *Fibrous TUBERCLE*.—*T. de l'apophyse*. See *TUBERCLE of the zygoma*.—*T. de la valvule*. See *Nodule (3d def.)*.—*T. du pubis*. See *SPINE of the pubes*.—*T. ischio-pubien interne* [Verneuil]. A tubercle situated on the inner surface of the pelvis, at the junction of the descending ramus of the pubic bone and the ascending ramus of the ischium. [A. 50.]—*T. moyen*. A small eminence on the upper surface of the optic thalamus near its middle. [L. 28 (K).]—*T. muqueux*. See *CONDYLOMA latum*.—*T. postérieur*. See *PULVINAR* (1st def.).—*T. les quadrimeaux*. See *Corpora quadrigemina*.—*T. tssus-sphénocaux*. See *Clinoid PROCESSES*.—*T. tardif à évolution rapide*. See *Tuberculous OSTEITIS*.—*T. vésiculaires*. See *Marginal bodies*.

TUBERCULIN (Lat.), n. *Tu²-b²-r²-ku²-l²-n*. A preparation invented by R. Koch and considered by him to be a means of diagnosing and curing tuberculosis. Said by Koch to be an extract made with glycerin of cultures of the tubercle bacillus. It is injected subcutaneously, and is thought to cause destructive inflammation of the tissue surrounding the tuberculous deposit, whereby the deposit is eliminated, with the production of fever. [B. 270 (a. 38); a. 34.]—**Crude t.** A glycerin extract of the toxic substances present in cultures of the tubercle bacillus in veal broth containing 1 per cent. of peptone and 4 or 5 per cent. of glycerin. The culture liquid is evaporated and the residue dried. [a. 34.]—**Modified t.** Crude t. has undergone various changes by the precipitation of certain constituents or filtration, or in which the mode of preparation is changed, as in Koch's first modification, in which a precipitate was obtained by adding alcohol to crude t. [a. 34.]

TUBERCULITIS (Lat.), n. f. *Tu²-b²-(tu²-b²-r²-ku²-l²-i²)-(e)²/i²s*. Gen., -i²-dos (-idis). Inflammation around a tubercular deposit. [a. 34.]

TUBERCULIZATION, n. *Tu²-b²-r²-ku²-l²-i²-z-a-shu²-n*. Lat., *tuberculisatio* (from *tuberculum*, a tubercle). *Tuberculisatio*. 1. The process of conversion into tubercle (3d def.). [D. 3.] 2. The treatment of a patient with tuberculin.

TUBERCULOCIDIN, n. *Tu²-b²-r²-ku²-l²-o-sid²/i²n*. A substance remaining in solution in crude tuberculin after the noxious bodies in the latter have been precipitated by platinum chloride. It may be precipitated from the solution by alcohol; used in treating tuberculosis. [a. 34.]

TUBERCULOSE (Fr., Ger.), n. *Tu²-be²-r²-ku²-loz*, *tub-er-ku-loz*/e². See *Tubercle*.—**Impit²** (Ger.). See *Inoculated TUBERCULOSIS*.—**Inhalationst²** (Ger.). Tuberculosis induced by the inhalation of tubercular matter. [Bertheau, "Dtsch. Arch. f. klin. Med.," xxvi, 5, 6; "Rev. des sci. méd.," Apr., 1882.]—**Knochen-t²** (Ger.). See *Tuberculous OSTEITIS*.—**Larynx²** (Ger.). See *Tubercular LARYNGITIS*.—**Spitzent²** (Ger.). Tuberculosis of a pulmonary apex. [a. 34.]—**T. artulaire** (Fr.). See *Tuberculous OSTEITIS*.—**T. aviaire** (Fr.). See *Avian TUBERCULOSIS*.—**T. calcifiée** (Fr.). Tuberculosis in which the final pathological condition is a calcification of the deposit. [Déjérine, "Rev. de méd.," Dec., 1884, p. 921.]—**T. caséo-calcifiée** (Fr.). The termination of a tubercular deposit partly by caseification and partly by calcification. [Déjérine, l. c.]—**T. entéro-mésentérique** (Fr.). Tuberculosis involving the intestine and mesenteric glands. [a. 34.]—**T. pulmonaire anthracosique** (Fr.). See *ANTHRACOSIS* (4th def.).

TUBERCULOSIS (Lat.), n. f. *Tu²-b²-(tu²-b²-r²-ku²-l²)-(u²)-(o²)/i²s*. Gen., -o²-s² (-is). From *tuberculum*, a tubercle. Fr., *tuberculose*. Ger., *Tuberculose*. The condition of being affected with tubercle (3d def.).—**Acute miliary t.** A sudden and violent general or local eruption of miliary tubercles in various parts of the body. It may simulate typhoid fever when the infection is general, or acute hydrocephalus when the infection is meningeal, or the pulmonary symptoms are most marked when the lungs are principally affected. [a. 34.]—**Anatomical t.** See *VERRUCA necrogenica*.—**Anthracotic t.** See *PNEUMONOCOITOSIS*.—**Avian t.** T. affecting birds. [a. 34.]—**Bovine t.** Fr., *pommelière*. Ger., *Perl-sucht*, *Franzosenkrankheit der Rinder*. Pearl disease, t. as it occurs in cattle. The lesion appears in nodes consisting largely of giant cells in a coarse reticulum. The nodes are usually much larger than in man, and show less inclination to cheesy degeneration or calcification. [D. 4.]—**Cerebral t.** See *Tubercular MENINGITIS* and *Acute tuberculous HYDROCEPHALUS*.—**Inoculated t.** T. produced by inoculation of tuberculous material. [a. 34.]—**Intestinal t.** T. affecting a part or all of the intestinal tract. [a. 34.]—**Laryngeal t.** See *Tubercular LARYNGITIS*.—**Meningeal t.** See *Cerebral t.*—**Miliary t.** An acute or chronic disease caused by infiltration of one or more parts of the body with miliary tubercles. [a. 34.]—**Pseudo-t. cladothrica**. Of Eppinger a multiple lesion, resembling tubercle, produced by a cladothrix-like organism. [a. 34.]—**Pulmonary t.** T. of the lungs, the ordinary form of t.—**Rapid t.** See *Acute miliary t.*—**Renal t.** Tubercular disease of the kidney. It is marked by a sediment of tuberculous matter in the urine, which is supposed to come from the ureters and pelvis of the kidneys, also by paroxysms of severe pain which resemble renal colic, by frequent and scanty urination, by hæmaturia, and by progressive emaciation. [D. 25.]—**Surgical t.** T. affecting a part that is susceptible to surgical interference. [a. 34.]—**T. cerebri**. See *Cerebral t.*—**T. cutis**. 1. A tubercular affection of the skin (commonly associated with general t. and usually in its later stages), attended with the formation of superficial, irregular, often seriginous ulcers with soft, slightly infiltrated, and usually jagged edges and reddish-yellow granular bases often covered by crusts. They are almost invariably situated in the immediate vicinity of one of the mucous orifices. 2. Any disease of the skin due to the presence of tubercle bacilli. In this sense the term is used to include, besides the disease mentioned in the 1st def., lupus t. verrucosa cutis, and scrofuloderma. [G.]—**T. of the joints**. Fr., *tuberculose articulaire*. Ger., *Gelenktuberculose*. See *Tuberculous OSTEITIS*.—**T. of the skin**. See *T. cutis*.—**T. pan-**

zootica contagiosa. Of Lydtin, bovine t.—**T. pulmonum**. See *Pulmonary t.*—**T. verrucosa cutis**. A chronic cutaneous disease occurring usually upon the hands of those who work about cattle or handle raw meat. It forms circumscribed patches containing pustules and warty outgrowths, surrounded by an erythematous border and due to the presence of tubercle bacilli. *Verruca necrogenica* is probably but one form of it. [Riehl and Faltant, "Vierteljahrsschr. f. Dermat. u. Syph.," 1886, p. 19 (G).]—**Zoölogie t.** See *Pseudo-t. cladothrica*.

TUBERCULOTIC, adj. *Tu²-b²-r²-ku²-l²-o²-t²/i²k*. Pertaining to or affected with tuberculosis. [D.]

TUBERCULOUS, adj. *Tu²-b²-r²-ku²-l²-u²-s*. Lat., *tuberculosus* (from *tuberculum*, a tubercle). Fr., *tuberculeux*. Ger., *tuberkulös*, *höckerig*. 1. Affected with, pertaining to, or after the manner of tubercle. [D.] 2. In botany, covered with tubercles. [a. 35.]

TUBERCULUM (Lat.), n. n. *Tu²-b²-(tu²-b²-r²-ku²)-(e²-r²-k²)-(u²)-(u²)-m* (u²m). Dim. of *tuber* (q. v.). See *TUBERCLE*. In the pl., *tubercula*, of Bateman, an order of skin diseases including phyma, molluscum, vitiligo, acne, syccosis, lupus, elephantioides, and frambæsia. [G. 12.] See also *GEMMULE Hobokeni*.—**T. acusticum**. Of Schwabe, a projection on the lateral wall of the fourth ventricle crossed by the auditory stria. [L. 17 (K).]—**T. adnosum**. See *MOLLUSCUM contagiosum*.—**T. annulare**. See *Pons Varolii*.—**Tubercula anteriora**. The anterior corpora quadrigemina. [L. 28 (K).]—**T. anterius atlantis**. See *Anterior TUBERCLE of the atlas*.—**T. anterius thalami optici**. See *Anterior TUBERCLE of the optic thalamus*.—**T. anticum humeri**. The lesser tuberosity of the humerus. [L.]—**Tubercula Araniti**. See *CORPORA Araniti*.—**Tubercula areola**. See *TUBERCLES of MONTGOMERY*.—**T. articulare ossis temporis**. See *ARTICULAR EMINENCE of the temporal bone*.—**T. atlantis anterius** (seu *anticum*). See *Anterior TUBERCLE of the atlas*.—**T. atlantis posterius** (seu *posticum*). See *Posterior TUBERCLE of the atlas*.—**T. baseos cartilagineæ arytenoideæ**. The muscular process of the arytenoid cartilage. [L.]—**Tubercula bigemina**. See *CORPORA quadrigemina*.—**T. calcaneum**. See *TUBEROSITY of the calcaneum*.—**T. capituli fibule laterale**. A not uncommon prominence on the upper end of the fibula from which the anterior head of the peroneus longus arises. [L. 332.]—**T. capituli fibule mediale**. An ill-defined anomalous prominence on the upper end of the fibula from which a portion of the soleus arises. [L. 332.]—**T. caroticum**. See *Carotid TUBERCLE*.—**T. cartilaginis thyreoideæ**. See *TUBERCLE of the thyrooid cartilage*.—**T. caudatum**. See *EMINENTIA caudata*.—**T. cerebelli minimum**. Of Tarini, see *FLOCCULUS* (3d def.).—**T. cerebri majus**. Of Scarpa, the corpora quadrigemina, especially in the lower animals. [L. 3 (K).]—**T. cerebri olivare**. See *CORPORA quadrigemina*.—**T. cervicale inferius**. See *T. colli femoris inferius*.—**T. cervicale superius**. See *TUBERCLE of the femur*.—**T. chalazinum**. Ger., *Nabelhöckerchen*. A name given to the chalaza (2d def.) when it appears on the perfected ovule (the seed) in the form of a tubercle. [a. 35.]—**T. cinereum** (Rolandi). See *Gray TUBERCLE of Rolando*.—**T. colli femoris**. See *TUBERCLE of the femur*.—**T. colli femoris inferius**. A prominence at about the middle of the anterior intertrochanteric line. [L. 332.]—**T. colli femoris superius**. See *TUBERCLE of the femur*.—**T. costæ**. See *TUBERCLE of a rib*.—**T. cuboidæ**. See *EMINENTIA ossis cuboidæ*.—**T. cuneatum**. See *Cuneate TUBERCLE*.—**T. Darwinii**. See *SPINE of Darwin*.—**T. deltoideum**. See *Deltoid TUBERCLE*.—**T. dolorosum**. See *Painful TUBERCLE*.—**T. ephippii**. See *T. sella*.—**T. epiglotticum**. **T. epiglottidis**. Ger., *Kehlkopfepistel*. The projection of the convex posterior surface of the epiglottis into the larynx. [L.]—**T. externum humeri**. The greater tuberosity of the humerus. [L.]—**T. externum processus condyloidei mandibulæ**. A prominence below the condyle of the inferior maxilla to which the ligamentum accessorium laterale is attached. [L.]—**T. fibulæ**. The styloid process of the fibula. [a. 34.]—**T. ganglii postici posterioris**. See *PULVINAR* (1st def.).—**T. gummatum**. See *SYPHILOMA*.—**T. hemisphericum**. See *FORNIX cerebri*.—**T. iliopectineum**. See *Ilio-pectineal EMINENCE*.—**T. impar** (His). In the embryo, a prominence in the middle line of the mouth from which the tongue is in part derived. [L. 294.]—**Tubercula intercondyloidea**. The anterior and posterior extremities of the tibial spine. [a. 34.]—**T. internum humeri**. The lesser tuberosity of the humerus. [L.]—**T. jugulare**. See *Jugular TUBERCLE*.—**T. labii superioris**. A prominence in the middle line of the inner surface of the upper lip of nurslings. [L. 332.]—**T. laminosum**. See *NOULE* (2d def.).—**T. laterale**. See *T. acusticum*.—**T. laterale posterius**. See *External geniculate body*.—**T. lineareum**. An anomalous protuberance below the external occipital crest. [L. 332.]—**T. Lisfranci**. See *Scalene TUBERCLE*.—**T. majus humeri**. The greater tuberosity of the humerus. [L.]—**T. mamillæ**. See *CORPUS albicans* (2d def.).—**T. mandibular**. The articular eminence of the temporal bone. [L.]—**T. medium**. The middle projection of the thalamus opticus. [L. 57 (a. 14).]—**Tubercula mentalia interna**. See *Genial TUBERCLES*.—**Tubercula mesencephali**. See *CORPORA quadrigemina*.—**Tubercula miliary**. See *MILIUM* (1st def.).—**T. minus humeri**. The lesser tuberosity of the humerus. [L.]—**T. nuchæ**. The t. on the occipital bone for the attachment of the ligamentum nuchæ. [a. 34.]—**T. obturatorium inferius**. See *Inferior obturator TUBERCLE*.—**T. obturatorium superius**. See *Superior obturator TUBERCLE*.—**T. olfactorium**. A small projection of gray matter in front of the anterior perforated space from which arise the roots of the olfactory nerve. [L. 6 (K).]—**T. opticum**. See *CORPORA quadrigemina*.—**T. ossis cuboidæ**. See *EMINENTIA ossis cuboidæ*.—**T. ossis hyoidei**. A slight elevation in the middle line of the anterior aspect of the body of the hyoid bone. [L.]—**T. ossis multanguli majoris**. The prominence on the plantar surface of the trapezium. [L.]—**T. ossis navicularis**. The tuberosity of the scaphoid bone. [L.]—**T. ossis pubis**. See *SPINE of the pubes*.—**T. ovale**. See *Olivary body*.—**T. papillare**. See *Papillary*

TUBERCLE.—**T. pharyngeum**. See *Pharyngeal spine*.—**T. plantare**. See *Plantar tubercle*.—**Tubercula posteriora**. See *Testes* (2d def.).—**T. posterior thalami optici**. See *Pulvinar* (1st def.).—**T. posterior verberis**. See *Posterior tubercle of a vertebra*.—**T. prostatica**. The middle lobe of the prostate gland. [**L.**]—**T. pterygoideum**. See *Pterygoid tubercle*.—**T. pubicum**. See *Spine of the pubes*.—**Tubercula quadrigenina**. See *Corpora quadrigenina*.—**T. Rolandi**. See *Gray tubercle of Rolando*.—**T. santorinianum**. See *Tubercle of Santorini*.—**T. scalenii**. See *Scalene tubercle*.—**Tubercula sebacea**. See *Milium* (1st def.).—**T. sellae** (equinae). An olive-shaped elevation between the optic groove and the sella turcica of the sphenoid bone. [**L.**]—**T. spinosum ossis sphenoidalis**. The infratemporal crest or a prominence at its anterior extremity. [**L.**]—**T. superius (anterior)**. The anterior tubercle of the optic thalamus. [**L.**]—**T. superius posterior thalami optici**. See *Pulvinar* (1st def.).—**T. supracondyloideum externum** (seu laterale). See *External supracondyloid tubercle*.—**T. supracondyloideum mediale**. See *Internal supracondyloid tubercle*.—**T. supracotyloideum**. An anomalous eminence upon the lip of the acetabulum beneath the anterior inferior spine of the ilium. [**L.**]—**T. supraglenoidale**. See *Supraglenoid tubercle*.—**Tubercula syphilitica**. See *Tubercular syphiloderma*.—**T. tali laterale**. An elevation upon the inner margin of the tibia as tragal. [**L.**]—**T. tali mediale**. A prominence upon the inner side of the incisura astragali. [**L.**]—**T. thalami anterior**. See *Anterior tubercle of the optic thalamus*.—**T. thalami inferior** (seu internum, seu magnum rotundum, seu posterius). See *Pulvinar* (1st def.).—**T. tibiae**. See *Spine of the tibia and Anterior tuberosity of the tibia*.—**T. trochleare**. See *Trochlea*.—**T. tympanicum anicum**. A protuberance on the upper anterior part of the annulus tympanicus. [**L.**]—**T. tympanicum posticum**. A protuberance on the middle and posterior part of the annulus tympanicus. [**L.**]—**T. vaginæ**. See *Anterior tubercle of the vagina*.—**T. wrisbergianum**. An elevation of the mucous membrane of the larynx caused by the cartilage of Wrisberg. [**L.**]

TUBER-ISCIO-TROCHANTERIEN (Fr.), n. *Tu^o-be^r-es-ke-to-ro-kaⁿ-²-ta-re-aⁿ*. See *Quadratus femoris*.

TUBERIVOROUS, adj. *Tu^b-e^r-iv^o-u^s*. Lat., *tuberivorus* (from *tuber*, a tuber, and *vorare*, to devour). Fr., *tuberivore*. Ger., *Knollenfressend*. Living on tubers, especially truffles. [**L.**]

TUBERKEL (Ger.), n. *Tu^b-e^r-ke^l*. See *Tubercle*.—**Aderhautⁿ**. See *Choroiditis tuberculosa*.—**Darmⁿ**. See *Enterosporidiosis*.—**Tⁿ des Scheidebenhinges**. See *Caruncule myrtiformes*.—**Lepröse T. der Regenbogenhaut**. See *Lepra iridis*.—**Mutter^t**. See *Metosphongoma*.—**Rückenmarkst^r**. Tuberculosis of the spinal cord. [**A.**]—**T^rkrankheit**. See *Tuberculosis*.

TUBERKULOSE (Ger.), n. *Tu^b-e^r-ku^l-ul-oz^e*. See *Tuberculosis*.—**Impf^t**. See *Inoculated tuberculosis*.—**Lymphdrüsen^t**. See *Tuberculous lymphadenitis*.

TUBEROSITAS (Lat.), n. f. *Tu^b(tu^b)-e^r-o^s(os)^t-a^s(a)s*. Gen., *at^{is}*. See *Tuberosity*.—**T. atlantis lateralis**. An eminence at the inner margin of that surface of the atlas which articulates with the occipital bone, to which the transverse ligament is attached. [**L.**]—**T. calcanei**. **T. calcis**. See *Tuberosity of the calcaneum*.—**T. clavicularis**. A roughened eminence on the lower surface of the clavicle, near its sternal end, for the attachment of the costoclavicular ligament. [**L.**]—**T. coracoidea**. See *Conoid tubercle*.—**T. costalis**. See *T. clavicularis*.—**T. deltoidea**. See *Deltoideus tubercle*.—**T. ephippii**. See *Prothoracum sella*.—**T. glutealis**. The tubercle on the upper end of the femur for the attachment of the gluteus maximus. [**A.**]—**T. iliaca**. **T. ilii**. A rough eminence behind that surface of the ilium which articulates with the sacrum, for the attachment of the sacro-iliac ligaments. [**L.**]—**T. ischii**. See *Tuberosity of the ischium*.—**T. malaris**. A small tuberosity near the maxillary process of the zygomatic bone. [**A.**]—**T. maxillæ**. **T. maxillaris**. See *Tuberosity of the superior maxilla*.—**T. metacarpi quinti**. A prominent tuberosity on the ulnar side of the fifth metacarpal bone, near its base. [**L.**]—**T. metatarsi hallucis**. See *Plantar tubercle*.—**T. metatarsi quinti**. A rough prominence upon the external surface of the tarsal end of the fifth metatarsal bone. [**L.**]—**T. olecrani**. A prominence on the olecranon process into which is inserted the extensor triceps brachii. [**L.**]—**T. ossis cuboidi**. See *Tuberosity of the cuboid bone*.—**T. ossis ilii**. See *T. iliaca*.—**T. ossis navicularis**. See *Tuberosity of the scaphoid bone*.—**T. ossis multanguli majoris**. See *T. ossis trapezii*.—**T. ossis palatini**. See *Pyramidal process of the palate bone*.—**T. ossis trapezii**. An oblique ridge on the volar surface of the trapezium. [**L.**]—**T. palmaris**. A tuberosity formed on the internal surface of the palatine bone, at the angle of the anterior and horizontal borders. [**A.**]—**T. patellaris**. See *Anterior tuberosity of the tibia*.—**T. pectoralis**. A tubercle near the sternal end of the clavicle for the attachment of the pectoralis muscle. [**A.**]—**T. pubo-ischiadica**. A rough eminence at the union of the ramus of the ischium and pubes. [**L.**]—**T. sacralis**. See *Tuberosity of the sacrum*.—**T. scapularis**. See *Conoid tubercle*.—**T. supracondyloidea ossis femoris**. The external or internal supracondyloid tubercle. [**L.**]—**T. tibiae**. See *Anterior tuberosity of the tibia*.—**T. tympani**. See *Promontory* (2d def.).—**T. ulnæ major**. A rough eminence at the base of the coronoid process of the ulna, for the attachment of the brachialis internus. [**L.**]—**T. ulnæ minor**. A small tuberosity occasionally found below the lesser sigmoid cavity of the radius. [**L.**]—**T. unguicularis phalangis**. A broad, horseshoe-shaped expansion of the distal end of a terminal phalanx. [**L.**]—**T. vertebralis (medialis)**. A rough eminence on the posterior surface of the transverse process (near its apex) of some of the dorsal vertebrae. [**L.**]—**T. zygomatica**. See *Tubercle of the zygoma*.

TUBÉROSITÉ (Fr.), n. *Tu^b-ba-ro-zé-té*. See *Tuberosity*.—**T^s de l'estomac (grande et petite)**. The two extremities of the stomach. [**A.**]—**T^s de l'os palatin**. See *Pyramidal process of the palate bone*.—**T^s des condyles**. The internal and external tubercles of the femur. [**L.**]—**T^s du maxillaire**. See *Tuberosity of the superior maxilla*.—**T. iliaque**. See *Tuberositas ilii*.—**T. ischiadique**. **T. sciaticque**. See *Tuberosity of the ischium*.

TUBEROSITY, n. *Tu^b-e^r-o^s(os)^t-i²*. Lat., *tuberositas* (from *tuber*, a hump). Fr., *tubérosité*. Ger., *Rauhligeit*. A rounded or blunt elevation on a bone or other organ. [**L.**]—**Anterior t. of the tibia**. A t. on the anterior aspect of the tibia, near its upper extremity, for the attachment of the ligamentum patellæ. [**C.**]—**Bicipital t. of the radius**. A t. on the superior part of the internal aspect of the shaft of the radius to the posterior rough portion of which is attached the tendon of the biceps flexor cubiti. [**C.**]—**External occipital t.** See *External occipital protuberance*.—**External t. of the femur**. A rough eminence above the external t. of the femur to which the external lateral ligament is attached. [**L.**]—**External t. of the tibia**. A rough eminence on the external side of the upper end of the tibia which articulates posteriorly with the fibula. [**L.**]—**Greater t. of the humerus**. Ger., *größerer Oberarmbeinhöcker*. An upward projection of the humerus on its outer side, separated from the head and lesser t. by grooves and serving as a point of attachment for the infraspinatus, supraspinatus, and teres minor muscles. [**L.**]—**Internal t. of the femur**. A t. on the inner side of the internal condyle of the femur to which the internal lateral ligament of the knee is attached. [**L.**]—**Internal t. of the tibia**. A massive rounded eminence on the inner side of the upper end of the tibia. [**C.**]—**Ischio-pubic t.** See *Tuberositas pubo-ischiadica*.—**Lesser t. of the humerus**. A small t. at the proximal end of the humerus, on the inner side of the bicipital groove, for the attachment of the subscapularis muscle. [**L.**]—**Maxillary t.** See *T. of the superior maxilla*.—**Pyramidal t. (of the palate bone)**. See *Pyramidal process of the palate bone*.—**T. of the calcaneum**. Ger., *Fersenhöcker*. The posterior extremity of the os calcis. [**L.**]—**T. of the cuboid bone**. A thick, oblique ridge on the inferior surface of the cuboid bone, near its anterior extremity. [**L.**]—**T. of the ilium**. See *Tuberositas ilii*.—**T. of the ischium**. Ger., *Sitzbeinhöcker*, *Sitzknorren*. The thick downward projection of the lower portion of the ischium upon which the body rests when sitting. [**L.**]—**T. of the olecranon**. See *Tuberositas olecrani*.—**T. of the sacrum**. A t. behind and internal to the lateral articular surface of the sacrum. [**A.**]—**T. of the scaphoid bone**. The prominence of the infero-external portion of the volar surface of the scaphoid bone of the hand. [**A.**]—**T. on the lower inner margin of the scaphoid bone of the foot**. [**L.**]—**T. of the superior maxilla**. A rough convexity on the posterior part of the external surface of the superior maxilla. [**L.**]

TUBEROUS, adj. *Tu^b-e^r-u^s*. Lat., *tuberosus*. Fr., *tubéreux*. Ger., *knollig*. 1. Resembling a tuber. 2. Bearing tubers.

TUBICOLA (Lat.), n. n. pl. *Tu^b(tu^b)-i²ko^l-a²*. From *tubus*, a tube, and *colere*, to inhabit. Fr., *enfermés*. An order of the Annelida, comprising those that live in tube-like structures. [**A.**]

TUBIFEROUS, adj. *Tu^b-i²-fe^r-u^s*. Lat., *tubifer* (from *tubus*, a tube, and *ferre*, to bear). Fr., *tubifère*. Ger., *röhrentragend*. Bearing a tube. The *Tubifera* of Lindley are a cohort of the Incomplete, comprising the *Santales*, *Daphinales*, *Proteales*, *Lamiales*, and *Penaeales*. [**A.**]

TUBIFLOROUS, adj. *Tu^b-i²-flo^r-u^s*. Lat., *tubiflorus* (from *tubus*, a tube, and *flos*, a flower). Fr., *tubiflore*. Ger., *röhrenblühig*. Having a tubular perianth. The *Tubifloræ* are: Of Batsch, a family of the *Coronales*, containing *Narcissus*, *Pancratium*, etc.; of Agardh, a class of the *Phanerocotyledonææ complete*, comprising the *Plantaginææ*, *Plumbaginææ*, *Convolvulææ*, etc.; of Reichenow, an order of the *Sympetalææ*, consisting of the *Aggregatææ* and *Campanacææ*; of Fries, a class of the *Corolliflorææ*, including the *Verbenacææ*, *Asclepiadææ*, *Solanacææ*, etc. [**A.**]

TUBIPORUS (Lat.), n. m. *Tu^b(tu^b)-i²p^o-r^o-u^s(u^s)*. From *tubus*, a tube, and *porus*, a pore. See *Boletus*.

TUBO-ABDOMINAL, adj. *Tu^b-o-a²b-do^m-i²-n^l*. From *tuba*, a trumpet, and *abdomen* (q. v.). Pertaining to the abdomen and the oviduct. [**L.**]

TUBO-OVARIAN, adj. *Tu^b-o-ov-a^r-i²-aⁿ*. From *tuba*, a trumpet, and *ovarium*, the ovary. Fr., *tubo-ovarien*, *tubo-ovarique*. Ger., *tubo-ovarial*. Pertaining to the oviduct and the ovary. [**L.**]

TUBO-UTERINE, adj. *Tu^b-o-ut²-e^r-i²-n^l*. From *tuba*, a trumpet, and *uterus* (q. v.). Pertaining to the oviduct and the uterus. [**L.**]

TUBULAR, adj. *Tu^b-u^l-a^r*. From *tubulus*, a small tube. Fr., *tubulaire*. Ger., *röhrenförmig*. 1. Hollow and nearly cylindrical, tube-shaped. [**A.**]—2. Of an auscultatory sound, suggestive of one produced by an air-current in a tube (cf. *Tracheal respiration* [1st def.]). [**D.**]

TUBULARIA (Lat.), n. f. *Tu^b(tu^b)-u^l(u^l)-a^r(a^r)-i²-a²*. From *tubulus*, a small tube. A genus of corals. [**A.**]—**T. acetabulum**. Ger., *Nadelköcher*. A coral found especially in the Mediterranean Sea on rocks and large crustaceans; formerly used as a diuretic and antelmintic under the names *umbilicus marinus*, *acetabulum marinum*, *cotyledon marinum*, and *bellericus marinus*. [**A.**]

TUBULE, n. *Tu^b-u^l*. Lat., *tubulus* (dim. of *tubus*, a tube). Fr., *A. Ger. Röhrenchen*. A small tube or tube-like structure. [**A.**]—**Collecting t.** *tubulus rectus*. Fr., *canalicule droit*, *tube collecteur*. Ger., *Sammelrohr*. The part of a uriniferous t. into which the junctional s. open. It is nearly straight, has a large lumen, is lined with clear, cuboidal cells, and joins with others, as it passes from the cortical to the medullary portion of the kidney,

to form a large excretory t. [J. 30, 32].—Communicating t. See *Junctional t.*—Collecting t. See *Second convoluted t.*—Convoluted t. 1. See *First convoluted t.* 2. Formerly, the uriferous t., from Bowman's capsule to the point where it enters a collecting t. [J. 24].—Curved collecting t. See *Junctional t.*—Dark-bordered nerve-t's. See *Medullated nerve-fibres.*—Dental t's. See *Dental canals.*—Distal convoluted t. See *Second convoluted t.*—Efferent t's of the testis. The vasa efferentia of the testicle. [L.].—Elementary t's. See t's of *Stilling.*—Excretory t's. Lat., *tubuli belliniani*. Fr., *tubes de Bellini*. Ger., *Hauptnieren*. The comparatively large uriferous t's in the medullary portion of the kidneys, formed by the union of many straight collecting t's. They are lined with columnar epithelium, and unite with others to form a papillary tube or duct which opens at the apex of a papilla into one of the renal calices or infundibula of the pelvis of the kidney. [J. 30, 32, 35].—First convoluted t. Lat., *tubulus contortus*. Fr., *tube contourné*. Ger., *bogig gewundenes Kanalstück, gewundenes Harnkanälchen*. The part of a uriferous t. that extends in a very tortuous manner a short distance beyond the capsule of Bowman, to which it is joined by the constricted part or neck of the tubule. The epithelium, according to Heidenhain, is fibrillated. It has been shown by Tuttle to be ciliated in man and in the cat. [J. 30, 32, 35].—Stud. from the Biol. Lab. of Johns Hopkins Univ., 1883, p. 447 (J.).—Gastric t's. See *Gastric glands.*—Henle's looped t. See *Henle's loop-tube.*—Intercalary t. [Schweiger-Seidel], *intercalated t.* See *Second convoluted t.*—Irregular t. The part of a uriferous t. between the termination of the ascending limb of Henle's loop-tube and the second convoluted t. It winds between the convoluted t's of the labyrinth, so that its course is irregular. The epithelium is distinctly fibrillated. [J. 30, 32].—Junctional t. The relatively short part of a uriferous t. extending from the second convoluted t. to a straight collecting t. It is narrow, but has a relatively large lumen and is lined with clear, cuboidal cells with a slight admixture of cells like those in the second convoluted t. [J. 30, 32]. See also *Connecting t.*—Second convoluted t.—Lactiferous t's. See *Galactophorous ducts.*—Liver t's. 1. A tubular ventral outgrowth of the duodenum from which the liver is developed. [L. 201]. 2. In some of the lower animals and perhaps in man, the membrana propria inclosing the tubular network of cells in the liver. 3. In fishes, birds, and reptiles, the tube-like arrangement of the hepatic cells. [J. 2, 35].—Looped t. of Henle. See *Henle's loop-tube.*—Proximal convoluted t. See *First convoluted t.*—Renal t's. See *Uriferous t's.*—Schachow's t. See *Spiral t. of Schachow.*—Second convoluted t. Fr., *canal d'union*. Ger., *Schaltstück, Schalthündung, Uebergangskanälchen*. The part of a uriferous t. between the irregular and the junctional t's. It is convoluted, and has an epithelium composed of long cells with large nuclei and processes that fit into depressions of neighboring cells. Some authors make this portion include the junctional t., and therefore terminate in a collecting t. [G. 2, 21, 30, 32, 42].—Seminiferous t's, *Seminiferous t's.* Lat., *tubuli seminiferi*. Fr., *tubes à ressort, canalicules (ou conduits) séminifères (ou séminipares, ou spermatiques)*. Ger., *Samenkanälchen*. Tubes from $\frac{1}{16}$ to $\frac{1}{32}$ inch in diameter, lined with epithelium, from which the spermatozooids develop. They occupy the spaces in the testicle formed by the processes of the tunica albuginea, within which they are highly convoluted, but as they pass toward the surface they become straighter and unite with each other to form the vasa efferentia. [L. 31, 142, 332].—Spiral t. of Schachow. The portion of a uniting t. beyond the junctional t. It extends to the junction of the cortex and medulla, where it is continued as the descending limb of Henle's loop-tube. Its epithelium is fibrillated. [J. 30, 32].—T's of Stilling. Ger., *Horngetist, Hornspongiosa*. A continuous, intricate, and connected network of similar minute t's or fibrils forming the entire substance of a nerve-fibre (neurilemma, medullary sheath, and axis-cylinder), supposed by Kühne and Ewald to be of a horny nature. Some of the t's also pass between neighboring nerve-fibres. Clarke denies their existence. [J. 10, 30, 32].—Clarke, "Quart. Jour. of Micro. Sci., 1880, p. 651 (J.).—Uriferous t's, *Uriferous t's.* Ger., *Harnkanälchen, Harnröhren*. Minute canals, consisting of a basement membrane and a lining of epithelium, which form the proper glandular substance of the kidney. They originate in Bowman's capsules, and, after extending in a tortuous manner for a considerable distance, finally join other t's to form a common t., which extends in a nearly straight direction, and, after joining others, empties into the pelvis of the kidney. While the uriferous t's may be properly said to be continuous from their origin to their termination, various parts of their length differ in size and course and in the character of the lining epithelium, and are named as if they were independent t's, as follows: (1) The capsule of Bowman; (2) the neck or constricted part joining the t. and capsule; (3) the first convoluted t.; (4) the spiral t. of Schachow; (5) the descending limb of Henle's loop-tube; (6) Henle's loop-tube; (7) the ascending limb of Henle's loop-tube; (8) the irregular t.; (9) the second convoluted t.; (10) the junctional t., the last uniting with other junctional t's to form (11) a collecting t., which unites with others to form (12) an excretory t., which finally opens into one of the calices of the pelvis of the kidney. [J. 30, 32, 35].

TUBULIFLOROUS, adj. *Tu^b-u^l-i²-flor^us*. Lat., *tubuliflorus* (from *tubulus*, a small tube, and *flos*, a flower). Fr., *tubuliflore*. Ger., *röhrenchenblühig*. Having flower-helds composed of tubular corollas. The *Tubuliflorae* are: Of De Candolle, a suborder of the *Compositae*, consisting of the *Vernoniaeae*, *Eupatoriaceae*, etc.; of Reichenbach, a section of the *Amphygynanthae*, consisting of the *Cotuleae*, *Gnaphalieae*, and *Conyzaceae*. [a. 35.]

TUBULOSE, **TUBULOUS**, adj's. *Tu^b-u^l-o^s, -u^s*. See **TUBULAR** (1st def.).

TUBULUS (Lat.), n. m. *Tu^b-u^l-u^s (u^l-u^s) (u^l-u^s) (u^l-u^s)*. 1. See **TUBULE**. 2. Of Malpighi, in the pl., *tubuli*, apparently the capillary blood-vessels. [Nock, "Brit. Med. Jour.," June 24, 1882, p. 960.] 3.

See **CANNULA**.—Dental tubuli. See *Dental canals.*—Tubuli belliniani, Tubuli Bellini. See *Excretory tubules.*—T. coligens. See *Collecting tubule.*—T. conjunctivus. See *Junctional tubule.*—T. contortus. See *First convoluted tubule.*—T. corticalis. See *Convoluted tubule* (2d def.).—T. henleanus. See *Henle's loop-tube.*—T. hirsutus. Hypertrichosis in the external auditory canal. [F.].—T. intercalaris. See *Second convoluted tubule.*—T. laqueiformis. See *Henle's loop-tube.*—T. nervorum. See *PERINEURIUM.*—Tubuli pelvis renalis [Heister]. The calices of the kidney. [L. 349.]—T. rectus. See *Collecting tubule.*—Tubuli renales. See *Uriferous tubules.*—Tubuli seminales contorti. Convoluted semiferous tubules within the compartments of the testicle. [L.].—Tubuli seminales recti. See *Vasa recta.*—T. spiralis modiolii. See *Spiral canal of the modiolus*.

TUBUS (Lat.), n. m. *Tu^b (tu^b) (u^s) (u^s) (u^s)*. See **TUBE**.—T. acusticus. See *Ear-trumpet.*—T. alimentarius. See *Alimentary canal.*—T. digestivus. The portion of the alimentary canal below the diaphragm. [L. 332].—T. ingestorius. The portion of the alimentary canal above the diaphragm. [L. 332].—T. medullaris. See *Medullary canal* (1st def.).

TUCH (Ger.), n. Tuch². Cloth, linen, linen cloth. [L. 46 (a, 21).]—Kinnt¹. See *Jaw-bandage*.

TUCKAHOE, **TUCKAHOO**, n's. *Tu³-k^a-h^o, -hu¹*. Indian loaf (or bread); an American Indian name for an underground tuberous production, consisting chiefly of pectic acid, formerly identified with a fungus (*Pachyma cocos*), but now regarded as a peculiar condition of the roots of certain trees on which it is found in North America, China, and Japan. It is used as food by the Indians, and in China as a medicine and in the manufacture of jelly. [a. 35.]

TUCUM, n. In Brazil, the *Astrocaryum vulgare*. [a. 35.]

TUFT, n. *Tu¹f*. A knot or bunch (e. g., of hairs, feathers, etc.). [a. 35].—Placental villi. See *Placentation*. The aggregated chorionic villi which form the fetal placenta.—Synovial t's. See *Synovial villi.*—T's of fetal vascular villi. Individual assemblages of the villi of the chorion separated by decidual septa.—Vascular t. Ger., *Gefässbüschel*. A t. made up largely of blood-vessels.

TUGGING, n. *Tu³-g²-i²n²*. A pulling or dragging. [a. 34].—Tracheal t. A sign of thoracic aneurysm consisting in the sense of downward traction of the larynx with the cardiac systole when the thyroid cartilage is gently raised between the finger and thumb. ["Lancet," Feb. 20, 1892, p. 435 (a, 30).]

TULBAGHIA (Lat.), n. f. *Tu^l-ba³-g²-hi²-a³*. Fr., *tulbaghie*. A genus of liliaceous herbs. The *Tulbaghieae* are a subsection of the *Anthericeae*. [a. 35].—T. alliacea (T. capensis). T. cepacea. Fr., *tulbaghie alliacea*.—South African species, of alliaceous odor. They are used as an anesthetic and in phthisis. [a. 35.]

TULIP, n. *Tu¹-i²p*. See **TULIPA**.—African t. The genus *Hemerocallis*. [a. 35].—Cheeked t. Drooping t. See *FRIILLARIA meleagris*.—T-tree. See *LIRIODENDRON tulipifera*.

TULIPA (Lat.), n. f. *Tu¹-li² (tu¹-li²) (i²p²-a³)*. Fr., *tulipe*. Ger., *Tulpe*, *Tulipane*. Tulip; a genus of the *Liliaceae*. The *Tulipaceae* (Fr., *tulipacées*) are a family of the *Campanales*, consisting of T. *Fritillaria*, *Imperialis*, etc. The *Tulipae* (Fr., *tulipées*) are a series of the *Liliaceae*. [a. 35].—T. gesneriana. Fr., *tulipe de Gesner*. Ger., *Gartentulpe*. The common tulip; a native of Armenia and Central Russia. The mucilaginous bulb, edible when cooked, is in its fresh state acid, emetic, and aphrodisiac. It contains tulipine. The *caripov* of Dioscorides is perhaps identical with this or some other species of T. [a. 35].—T. silvestris. Wild tulip; found in England and continental Europe. The bulb is emetic. [a. 35.]

TULIPIFERA (Lat.), n. f. *Tu¹ (tu¹) (i²p²-i²f²-e²-r²-a³)*. From *tulipa* (q. v.) and *ferre*, to bear. The genus *Liriodendron*. [a. 35.]

TULIPINE, n. *Tu¹-i²p²-e²n*. Ger., *Tulipin*. A poisonous alkaloid obtained from the bulb of *Tulipa gesneriana*. It is an energetic sialagogue. [a. 35.]

TUMBEGI, n. A sort of tobacco exported from Persia and Turkey, derived from *Nicotiana persica* or *Nicotiana rustica*. Several varieties are described, named from their place of origin (Shiraz t., Teheran t., etc.), and differing in composition. T. contains from 2 to 5 per cent. of nicotine and 10 to 10 per cent. of saccharine matter. ["Phar. Jour.," xvi (1886), p. 683; "Ann. di chim. e di farmacol.," Apr., 1886, p. 20 (B).]

TUMEFACATION, n. *Tu²-m²-e²-fa²-k²-shu²n*. From *tumefacere*, to cause to swell. Ger., *Anschwellung*. Swelling, puffiness. Cf. **BOUFFISSURE**.

TUMEFIED, adj. *Tu²-m²-e²-fi²*. Fr., *tuméfié*. Ger., *wulstig*. In a state of tumefaction.

TUMENOL, n. *Tu²-m²-e²-n²-o²l*. From *bitumen* (q. v.) and *oleum*, oil. A substance obtained from mineral oils, allied to ichthyol; used externally in eczema, burns, pruritus, ulceration, eczema due to psoriasis, and rhagades. ["Brit. Med. Jour.," Nov. 28, 1891, Supp., p. 173 (a, 50).]

TUMESCENCE, n. *Tu²-m²-e²-s²-e²n²s*. From *tumescere*, to begin to swell. The condition of swelling or of being swollen. [a. 48.]

TUMEUR (Fr.), n. *Tu²-m²-u²r*. See **TUMOR**.—T. adipociriforme. Lepreux, cholesteatoma. [a. 34].—T. à myéle. Plexus of Négaton, an osteosarcoma. [a. 34].—T. angiolithique. See **CHOLESTEATOMA**.—T. à ostéoblastes. A tumor resembling an osteoma. [L. 57 (a, 14)].—T. ascitique. See **ASCITES**.—T. blanche. See **TUMOR ALBA**.—T. cicatricielle. See **KELOID**.—T. composée. A t. containing elements of two or more neoplasms, as in a fibrosarcoma. [a. 34].—T. cornée. See **CORN CUTANEUM**.—T. cystique de la conjonctive. See *Conjunctival*

CYST.—**T. cystique de l'iris.** See *Cyst of the iris*.—**T. cystoïde.** See *Cystic tumor*.—**T. dentaire.** See *Odontoma*.—**T. des voies lacrymales.** See *Dacryops*.—**T. encéphaloïde.** See *ENCEPHALOID*.—**T. épithéliale.** See *EPITHELIOID*.—**T. érectile lymphatique.** See *Gondionar lymphangectasis*.—**T. fibreux.** See *Fibroma*.—**T. fluxionnaire.** A tumor that gives rise to hemorrhage (like a fibrous tumor of the uterus).—**T's folliculeuses.** See *MOLLUSCUM contagiosum*.—**T. gommeux.** See *SYPHILOMA*.—**T. graisseux.** See *LIPOMA*.—**T. hémattique.** See *HÆMATOMA*.—**T. hémorrhagique circonscrite.** See *Consecutive aneurysm*.—**T. hémorrhagique non circonscrite.** See *Traumatic aneurysm*.—**T. 139.]—T. cystic tumor.** See *T. lymphaticus*.—**T. articulations.** See *HYDRARTHROS*.—**T. myome.** See *MYOMA*.—**T. névrome.** See *NEUROMA*.—**T. ostéome.** See *OSTEOMA*.—**T. papillaire.** See *PAPILLOMA*.—**T. perlée.** See *CHOLESTEATOMA*.—**T. pulpeux.** See *T. spléniforme*.—**T. spongieux.** See *Medullary sarcoma*.—**T. tubuleux.** See *SIPHONOMA*.—**T. variqueuse.** See *Cavernous angioma*.—**T. verruqueuse des cicatrices.** See *Cicatricial keloid*.

TUMID, adj. *Tu'm'id*. Lat. *tumidus* (from *tumere*, to swell). Ger. *angeschwellen*, *aufgeschwollen*. Inflated, swollen. [a, 35.]

TUMOR (Lat.), n. m. *Tu'mor*(tu'm) 'or. Gen., -or'is. From *tumere*, to swell. Gr. *κῆλη*, *ôkos*. Fr. *tumeur*, Ger. *Geschwulst*, *Aufbildung*. A swelling, especially a new growth, cystic or solid. [D, 3; E, 1.]—**Adenoid t.** See *ADENOMA*.—**Adipose t.** See *LIPOMA*.—**Anal t.** See *ANAL*.—**Angioma.** See *ANGIO*.—**Anthraxoid t.** See *Melanotic t.*—**Benign t.** See *Innocent t.*—**Biliary t.** A t. formed by an enlargement of the gall bladder. [a, 34.]—**Blood t.** See *HÆMATOMA*.—**Bony t.** See *OSTEOMA*.—**Butyroid t.** A galactocoele with contents of the consistence of butter.—**Cancerous t.** A t. formed by a cancer (q. v., 3d def.).—**Cartilaginous t.** See *CHONDROMA*.—**Cavernous venous t.** See *Cavernous angioma*.—**Nævus vascularis tuberosus angioma.** Connective-tissue t. See *Fibroma*.—**Cystic t.** A t. consisting of a sac or of sacs containing liquid.—**Dentigerous t.** See *Dentigerous cyst*.—**Dermoid t.** See *Dermoid cyst*.—**Desmoid t.** A firm fibrous t. [E.]—**Embryoplastic t.** See *ENCEPHALOID SARCOMA*.—**Erectile t.** Ger. *Aufwulst*. A t. composed chiefly of vascular tissue which may become more or less prominent when the vessels are injected. [E.]—**Fibroid t.** See *FIBROID*.—**Fibrous t.** See *LIPOMA*.—**Fibrous t.** See *FIBROID*.—**Fibro-cellular t.** [Page]. A new growth made up of tissue more or less resembling the normal fibro-cellular or connective tissue of the body. The typical form is firm, with a homogeneous surface on section, and bands of delicate filamentous white fibrous tissue intersecting it irregularly. [E.]—**Fibro-cystic t.** See *ADENOMA*.—**Fibro-fatty t.** See *FIBRO-LIPOMA*.—**Fibro-muscular t.** See *FIBRO-MYOMA*.—**Fibro-nucleated t.** See *SARCOMA* (2d def.).—**Fibro-plastic t.** Fr. *tumeur fibro-plastique*. 1. Of Lebert, see *MYELOID*. 2. Of French writers, see *SARCOMA*.—**Fibrous t.** See *FIBROMA*.—**Fibro-vascular t.** See *FIBROMA teleangiectaticum*.—**Floating t.** A t. that is movable in some part of the body, e. g., the abdomen. [a, 34.]—**Follicular t.** See *ADENOMA* (1st def.).—**Fungating t.** A t. composed of exuberant granulations, generally growing from the inner surface of the wall of a cystic t. [E.]—**Gaseous t.** A t. containing gas. ("Rev. de chir." Feb., 1889, p. 97 (a, 34).)—**Gefäss't.** Ger. See *ANGIOEMA*.—**Glandular t.** See *ADENOMA*.—**Granulation t.** A t. formed by the proliferation of granulation tissue. [a, 24.]—**Gubler's t.** A t. of the back of the carpus sometimes observed in plasmia. [a, 24.]—**Gummatous t.** See *GUMMA*.—**Gummi.** See *SYPHILIS*; so called from either the softish semi-elastic consistence of the tumor or the peculiar character of its contents after the process of softening. [G.]—**Hair t.** See *HAIRY t.* A dermoid cyst containing hair. [a, 34.]—**Heteradenic t.** Fr. *tumeur hétéradénique*. Of Robin, a hyaline cylindroma. [L, 57 (a, 14).]—**Hæmorrhagous t.** Of Broca, a homologous t. [L, 41, 49 (a, 14).]—**Horny t.** See *CORYX cutanea*.—**Hyaline t.** See *HYALINE*.—**Hyaloid t.** See *HYALOID*.—**Idiopathic splenic t.** The enlargement of the spleen observed in pseudoleucocythemia. [D, 50.]—**Infectious granulation t's.** Ger. *infectiöse Granulationsgeschwülste*. Acute milary tubercles. [Déjérine, "Rev. de méd." Dec., 1884, p. 921 (a, 34).]—**Infiltrating t.** A t. that spreads by infiltration. [a, 34.]—**Innocent t.** A t. which affects the patient solely through its local influence, which has little disposition to soften or ulcerate, and has no tendency to multiplication in other tissues or to involve the absorbents with which it is connected. [E.]—**Irritable t. of the breast** [Cooper]. An affection of the breast, not necessarily a t., characterized by exquisite pain and tenderness of one or more of its lobes. [A, 42.]—**Of hysterical breast and irritable breast.**—**Lactæal t.** See *GALACTOCOELE*.—**Lymphadenoid t.** See *LYMPHADENOMA*.—**Lymphoid t.** See *LYMPHADENOMA*.—**Lymphatic t.** See *LYMPHADENOMA*.—**Melanotic t.** See *MELANOTIC SARCOMA* and *MELANOMA*.—**Meningeal blood-t.** A hæmatoma of the meninges. [a, 34.]—**Mesoblastic t.** A t. arising from the mesoblast. [a, 34.]—**Milk-like t.** [Monro]. Medullary sarcoma. [A, 42.]—**Molluscous t.** See *MOLLUSCUM contagiosum*.—**Movable t.** See *Floating t.*—**Mucoid t.** See *MUCOUS TISSUE t.*—**Mucous t.** See *MYXOMA*.—**Multiple fungoid t.** See *PILOMATOUS t.* See *MYCOSIS fungoides*.—**Muscular t.** See *MYOMA* (1st def.).—**Myelogenic t.** See *Giant-celled sarcoma*.—**Myeloid t.** See *MYELOID*.—**Myoid t.** See *LEIOMYOMA*.—**Nerve t.** See *NEUROMA*.—**Neurotic t.** A small t., not persistent, developing in the mamma and due to reflex nervous disturbance. ("N. Y. Med. Jour." Feb. 8, 1890, p. 163 (a, 34).)—**Ossæous t.** A t. containing bone, either cancellous or compact. [E.]—**Osteoid t.** See *CHONDROMA*.—**Papillary t.** See *PAPILLOMA*.—**Pearly t.** See *CHOLESTEATOMA*.—**Pearly t. of the iris.** A small cyst of the iris containing a pultaceous, tallowy substance. [a, 34.]

—**Perineal t.** A term sometimes applied to the bulging of the perineum caused by the pressure of the child's head in the expulsive stage of labor. [A, 43.]—**Phantom t.** Fr. *gonflement ou ballonnement hystérique de l'abdomen*. Ger. *Phantomgeschwulst*. An abdominal tumefaction due to flatulence or to circumscribed hysterical contraction of the abdominal muscles. [a, 34.]—**Pilocystic t.** A dermoid cyst containing hair. [a, 34.]—**Proliferation t.** A t. which develops by the process of proliferation. [D, 3.]—**Recurrent fibroid t.** [Page]. See *Spindle-celled sarcoma*.—**Recurrent fibro-vascular t.** A telangiectatic fibroma that recurs after excision of a primary t. [a, 34.]—**Recurrent t.** A t. approaching in structure the innocent t., but in habit the cancerous t., and tending to recur after removal. [E.]—**Rotated t.** A pediculated t. that has rotated on the pedicle. [a, 34.]—**Scalp-t.** See *CAPUT succedaneum*.—**Sebaceous t.** 1. See *ATHEROMA* (1st def.). 2. Of Toynebee, see *CHOLESTEATOMA*.—**Semi-malignant t.** See *Recurrent t.*—**Sero-cystic t.** [Brodie]. See *Proliferation cyst*.—**Special t's of the penis.** See *SCLEROSIS of the corpora cavernosa*.—**Stercoral t.** A t. formed by impaction. [E.]—**Teratoid t.** See *TERATOMA*.—**T. albus.** See *FUNGUS ARTHRITIS*.—**T. aquosa.** A cystic t. [a, 34.]—**T. capitis sanguineus neonatorum.** See *CAPUT succedaneum*.—**T. carneus.** See *SARCOMA* (2d def.).—**T. cavernosus.** See *Cavernous angioma*.—**T. fibrinosus.** See *FIBROMA*.—**T. flatulentus.** See *EMPHYSEMA*.—**T. fungosus articuli.** See *SPINA ventosa*.—**T. fungosus sanguineus.** See *Cavernous angioma*.—**T. gallicus.** See *Bubo*.—**T. gunnatus.** See *SYPHILIS*.—**T. humilis.** The swelling over the site of the lacrimal sac in purulent or phlegmonous dacryocystitis. [F.]—**T. lardosis.** See *Fatty t.*—**T. lymphaticus** [Lassur]. See *CEDEMOSARCOMA*.—**T. mucosus.** See *MYXOMA*.—**T. prædurns.** See *SYPHILIS*.—**T. sesipari.** See *MOLLUSCUM contagiosum*.—**T. splenis.** A t. or swelling of the spleen. [a, 34.]—**T. spili.** See *LIENOMYOMA*.—**T. squamiformis carnosus.** See *LEPIDOSARCOMA*.—**T. villus.** See *PAPILLOMA*.—**Uterine t.** Ger. *Uterusgeschwulst*. 1. A t. (neoplasm) of the uterus. 2. A tumidity due to enlargement of the uterus.—**Varicose t.** A t. composed of dilated and hypertrophied veins. [E.] See *Cavernous angioma*.—**Vascular t.** See *ANGIOEMA*.—**Vascular t. of the meatus urinaris** (or of the urethral orifice [Clarke]). See *URETHRAL PAPILLOMA* and *URETHRAL CARCINOMA*.—**Villous t.** See *PAPILLOMA*.—**Warty t.** See *WART*.—**Whitish t.** See *FUNGUS EXCRESCENCE of the umbilicus*.

TUMULTUS SERMONIS (Lat.), n. m. *Tu'm*(tu'm) 'u'st(u'lt) 'u's(u's) s'u'm(s'erm) 'u's. See *PAPHRASIA præceps*.

TUNBRIDGE WELLS, n. *Tu'n*'briz'. A place in Kent, England, where there are gaseous and chalybeate springs. [L, 30, 37, 49, 57 (a, 14).]

TUNDA OCULI (Lat.), n. f. *Tu'nd*(tu'nd) 'u's 'o'k(u'lt) 'u'le(i). An old term for the ocular conjunctiva. [F.]

TUNDUS CORDIS (Lat.), n. m. *Tu'nd*(tu'nd) 'u's(u's) ko'rd'is. The apex of the heart. [L.]

TUNGSTATE, n. *Tu'n*'stat. Lat. *tungstas*. A salt of tungstic acid.

TUNGSTEN, n. *Tu'n*'ste'n. Fr. *tungstène*. Ger. *Wolfram*. 1. A metallic element discovered in 1783. It occurs, usually as a tungstate, in various minerals. It has been obtained in the form of a light-gray lustrous powder, not readily oxidized except at high temperatures. Its sp. gr. is said to be 19.129, although by some it is put as low as 16.5, and by others is stated to be 18.0. In composition it is represented as a dyad, as a tetrad, penta-, and hexad. Symbol W (from *wolfram*), sometimes Tu; atomic weight, 183.5. 2. Calcium tungstate. [B, 3, 16.]

TUNGSTIC ACID, n. *Tu'n*'stik. A dibasic acid, H_2WO_4 . The anhydrous acid is a yellow powder insoluble in water and in most acids.—**Colloidal t. a.** A modification of t. a. prepared by acidulating a solution of sodium tungstate with hydrochloric acid, and then removing the sodium chloride by dialysis. The t. a. remains in solution and may be obtained by evaporation as a transparent gummy substance. [B, 3.]—**Hydrated t. a.** A white substance, $H_2WO_4 + H_2O$, soluble in water. [B.]—**Liquid t. a.** Soluble t. a. t. a. obtained in a soluble form by dialysis. [B, 6.]

TUNIC, n. *Tu'n*'ik. Gr. *τύνη*. Lat. *tunica*. Fr. *tunique*. Ger. *Haut*, *Hülle*. A coat, an investing membrane; in botany, a skin or covering membrane, such as the testa of a seed, or a thick or thin separable layer (Ger. *Schale*), such as one of the coats of an onion. [a, 35.]—**Chorioid t.** The chorioid membrane. [L.]—**External elastic t.** See *External elastic coat*.—**Inner muscular t. of the epididymis.** Of Kölliker, a layer of muscular tissue at the back of the testis and epididymis, beneath the fascia propria and opposite the lower two thirds of the testis. [C.]—**Internal elastic t.** See *Internal elastic coat*.—**Vaginal t.** See *TUNICA vaginalis*.

TUNICA (Lat.), n. f. *Tu'n*(tu'n) 'ik-a. 1. See *TUNIC*. 2. A section of the genus *Dianthus*. [a, 35.] 3. Of Jussieu, the perigynium of the *Cariceæ*. [B, 121.]—**Acetum tunice.** A preparation made by macerating clove-pink petals with 6 or 12 times as much alcohol for twelve days, and filtering. [B, 119 (a, 34).]—**Conserva tunice.** Fr. *conservé d'œillet*. A preparation made by triturating clove-pink petals with twice as much sugar. [B, 119 (a, 38).]—**Syrupus tunice (florum).** A preparation made by infusing clove-pink petals in twice as much boiling water for twelve hours, straining, and dissolving in the product twice its weight of sugar. [B, 119 (a, 38).]—**T. abdominalis.** Fr. *tablier élastique*. A deep layer of the abdominal fascia in animals, analogous to the transversalis fascia in man. It consists of yellow elastic tissue, and contributes to the support of the viscera. [C.]—**T. acinialis.** T. aciniformis. T. acinosa. See *UREA*.—**T. adiposa (renum).** See *CAPSULA adiposa*.—**T. adnata oculi.** 1. An old term for the ocular conjunctiva. [F.] 2. See *T. albuginea oculi* (2d def.).—**T. adnata testis.** See *T. vaginalis testis*.—**T.**

adventitia. Ger. *äußere Gefäßhaut* (1st def.), *äußere Eihaut* (3d def.). 1. See *ADVENTITIA* (1st def.). 2. See *ADVENTITIA* (3d def.). — **T. agnina.** See *AMNION*. — **T. alba.** An old term for the sclerotica. [F.] — **T. albuginea.** See *ALBUGINEA*, *ALBUGINEA testis*, and *Tenon's CAPSULE*. — **T. albuginea corporis cavernosi.** See *ALBUGINEA penis*. — **T. albuginea epididymidis.** See *ALBUGINEA epididymidis*. — **T. albuginea oculi.** 1. See *SCLEROTICA*. 2. The tendons of the recti of the eye and the connective tissue uniting them. [L. 31.] — **T. arachnoidea.** See *ARACHNOID*. — **T. arachnoidea oculi.** See *ARACHNOID of the eye*. — **T. araneae.** See *ARACHNOID*. — **T. arteriae elastica externa.** See *External elastic coat*. — **T. arteriae externa.** The adventitia of an artery. [L.] — **T. arteriae fenestrata.** See *Internal elastic coat*. — **T. arteriae intima.** The intima of an artery. [L.] — **T. arteriae media.** The middle coat of an artery. [L.] — **T. candida.** An old term for the sclerotica. [F.] — **T. carnea.** See *CREMASTER* and *DARTOS*. — **T. cellularis.** See *ADVENTITIA* (1st def.). — **T. cellulosa.** See *SUBMUCOSA*. — **T. cellulosa of the ovum.** Fr. *couche celluleuse*. See *T. granulosa* (1st def.). — **T. cellulosa Kruyschii.** See *MEMBRANA ruyshiana*. — **T. cerebri pia mater** (seu propria, seu vasculosa). See *PIA*. — **T. choriocapillaris.** See *MEMBRANA ruyshiana*. — **T. chorioidea.** See *CHORIOID*. — **T. conjunctiva.** See *CONJUNCTIVA*. — **T. cornea opaca.** See *SCLEROTICA*. — **T. cornea pellucida.** See *CORNEA*. — **T. dartos.** See *DARTOS*. — **T. demoursiana.** See *MEMBRANE of Descemet*. — **T. dura.** See *SCLEROTICA*. — **T. erythroidea.** See *CREMASTER*. — **T. exterior ovi.** Of Haller, the decidua vera. [A. 45.] — **T. externa.** See *ADVENTITIA* (1st def.). — **T. extima.** See *SCLEROTICA*. — **T. farcinallisi.** See *ALLANTOIS*. — **T. fibrosa (folliculi).** See *THECA folliculi*. — **T. fibrosa hepatis.** A layer of fibrous tissue covering the liver. [L.] — **T. fibrosa lienis.** See *ALBUGINEA lienis*. — **T. fibrosa membranae tympani.** The middle fibrous layer of the tympanum. [L.] — **T. fibrosa oculi.** The combined cornea and sclerotica. [L. 31.] — **T. fibrosa renum.** See *ALBUGINEA renis*. — **T. fibrosa testicul.** See *ALBUGINEA testis*. — **T. granulosa.** 1. See *MEMBRANA granulosa*. 2. Of Barry, "an investment of the ovum exterior to the zona pellucida," the existence of which, however, as a structure distinct from the membrana granulosa, is denied. [J. 16.] — **T. filamentosa.** See *SHAGGY CHORION*. — **T. hortensis.** See *DIANTEUS caryophyllus*. — **T. hyalina propria.** See *MEMBRANA propria*. — **T. innominata.** See *SCLEROTICA*. — **T. interna.** See *INTIMA*. — **T. interna oculi.** See *RETINA*. — **T. intima renis.** The deeper portion of the albuginea renum. [L.] — **T. Jacobii.** See *Bacillar layer of the retina*. — **T. media.** Ger. *mittlere Haut, Ringfaserhaut*. 1. See *PIA* (in Supplement). 2. Of Bischoff, a thin gelatinous layer found between the chorion and the amnion during the latter part of gestation; the remains of the albuminous liquid which previously existed between the two membranes; according to Müller, the same as the endochorion of Dutrochet. [A. 24, 43.] — **T. mucosa.** See *MUCOSA*. — **T. muscularis.** See *PERIMYSIUM* and *MUSCULARIS*. — **T. nervosa.** See *SUBMUCOSA*. — **T. nervi optici externa.** Ger. *Duraalshede*. The outermost layer of the sheath of the optic nerve, derived from the dura. [L. 332.] — **T. nervi optici interna.** Ger. *Pialshede*. The innermost layer of the sheath of the optic nerve, derived from the pia. [L. 332.] — **T. nervosa.** Ger. *Gehirnschicht*. The stratum granulosum, internal granule layer, stratum ganglium, and stratum fibrosum of the retina regarded as one layer. [L. 332.] — **T. oculi dura** [Vesalius]. See *SCLEROTICA*. — **T. perforata oculi.** See *CHORIOID*. — **T. peritonialis.** The peritoneum covering the viscera. [L.] — **T. prima.** See *DURA*. — **T. propria.** 1. See *MEMBRANA propria*. 2. See *PIA*. 3. The true capsule or covering of an organ or part. [L.] — **T. propria folliculi.** Of Henle, the ental layer of the theca folliculi. It forms the membrana propria of the Graafian follicle. [J.] — **T. propria hepatis.** See *T. fibrosa hepatis*. — **T. propria lienis.** See *ALBUGINEA lienis*. — **T. propria ovarii.** See *ALBUGINEA ovarii*. — **T. propria ovisacci.** See *THECA folliculi*. — **T. reflexa testis.** See *T. vaginalis reflexa*. — **T. reticularis** (seu retiformis) oculi. See *RETINA*. — **T. rhagoides.** See *CHORIOID*. — **T. ruyshiana.** See *MEMBRANA ruyshiana*. — **T. sclera bulbi.** See *SCLEROTICA*. — **T. serosa.** 1. See *SEROSUM*. — **T. serosa.** 2. The serous membrane covering a viscus. [L.] — **T. serosa testis.** See *T. vaginalis testis*. — **T. submucosa.** See *SUBMUCOSA*. — **T. tertia renum.** See *T. intima renis*. — **T. thoracis.** See *CORSET*. — **T. uvalis.** **T. uvea.** **T. uviformis.** See *UVEA*. — **T. vaginalis.** Ger. *Scheidenhaut*. 1. A membrane in sheathing a part. 2. A serous membrane, an offshoot of the peritoneum, which is forced into the scrotum by the descent of the testicle. It lines on each side one half of the inner surface of the scrotum (except posteriorly, where it is reflected on to the epididymis and testicle, which it covers except along the line of reflection), and incloses a varying extent of the spermatic cord. [L.] — **T. vaginalis bulbi.** See *Tenon's CAPSULE*. — **T. vaginalis communis** (testis et funiculi spermatici). See *INFUNDIBULIFORM FASCIA* and *T. vaginalis* (3d def.). — **T. vaginalis oculi.** See *Tenon's CAPSULE*. — **T. vaginalis propria** (testis). See *T. vaginalis testis*. — **T. vaginalis reflexa.** The portion of the *t. vaginalis* that lines the scrotum. [L.] — **T. vaginalis testis** (seu visceralis). The portion of the *t. vaginalis* which invests the epididymis and the testicle. [L.] — **T. vasculosa chorioidea.** See *UVEA*. — **T. vasculosa Halleri.** The chorioid. [A. 34.] — **T. vasculosa lentis.** A very vascular envelope, made up of the various vascular projections of the embryonic cephalic plate, completely surrounding the crystalline lens in the embryo. [F.] — **T. vasculosa oculi.** See *CHORIOID*. — **T. vasculosa testis.** A vascular network lining the albuginea testis. [L. 142.] — **T. vasorum interna.** See *INTIMA*. — **T. villosa.** The villous surface of the intestines. [A. 34.] — **T. vitrea.** See *HYALOID MEMBRANE*.

TUNICATE, adj. Tu'n'ik'-at. Lat. *tunicatus* (from *tunica* [q. v.]). Fr. *tuniqué*, *tuniqueux*. Ger. *schalig*. Provided with coats (tunicas). [A. 35.] The *Tunicata*, or tunicaries, are a class of the *Molluscoidea*, or a degenerate branch of the *Chordata*, which

more nearly than any other invertebrates approach the vertebrates. They consist of a double-layered sac inclosing an alimentary canal, with distinct oral and anal apertures at their free extremities, armarine, exist singly or in groups, possess a simple tubular heart open at each end, and are, as a rule, hermaphroditic. [L. 131, 147.]

TUNICIN, n. Tu'n'is'-i'n. Fr. *tunicine*. A substance, (C₈H₁₀O₆)_n, obtained from the mantles of ascidians, regarded by some as identical with vegetable cellulose, by others as identical with animal cellulose, and by Berthelot as a distinct body, convertible into sugar. [B. 3, 93, 270 (a, 14, 38).]

TUNICULA (Lat.), n. f. Tu'n'(tu'n)-i'k'u'l(u'l)a. Dim. of *tunica* (q. v.). See *CLITORIS*.

TUNIQUE (Fr.), n. Tu's'nek. See *TUNIC*. — **T. adventice.** See *ADVENTITIA*. — **T. commune de Bichat.** See *ENDOTHELIUM*. — **T. érythroide.** See *CREMASTER* and *DARTOS*. — **T. pourpre.** **T. séminale.** See *SPERMATODERM*.

TUNNEL, n. Tu'n'e'el. The space between the rods of Corti and the membrana basilaris. [L.] — **T. of Corti.** See *T*.

TUPELO, n. Tup'e'l-o. Fr. *tupéle*. See *NYSSA*. — **Large t.** **Swamp t.** See *NYSSA tomentosa*.

TUPPEL (Ger.), n. Tu'p'e'l. See *PUNCTUM*.

TUPPELFARN (Ger.), n. Tu'p'e'l'-fa'n. See *POLYPODIUM*.

TUPI-PYA, n. In Brazil, a form of insanity common among the Indians, characterized by sudden accesses of furious and destructive mania, following short stages of depression. [L. 57 (a, 14).]

TÜR, n. A place in Unterweissenburg, Transylvania, where there is a sulphurous spring. [L. 30, 49 (a, 14).]

TURA, n. A place in Neutra, Hungary, where there is an alkaline and chalybeate spring. [L. 63.]

TURACIN, n. Tu'r'a's-i'n. Fr. *turacine*. A red pigment obtained from the wing-feathers of the turaco. It contains 5.9 per cent. of copper. [B. 38, 93 (a, 14).]

TURBINAL, adj. Tu'r'b'i'l-n'l. From *turbo*, a top. See *TURBATE*; as a n., see *TURBINAL BONE*. — **Externe rückläufige T-bewegung.** See *MOVEMENT of restitution*. — **Interne rückläufige T-bewegung.** The rotation of the shoulders that follows the expulsion of the head in labor; being that movement of the shoulders which coincides with the "movement of restitution" of the head. [A. 91.] — **T-bewegung** (Ger.), *T'drehung* (Ger.). A movement of rotation (as of the fetus in its passage through the pelvis).

TURBINATE, **TURBINATED**, adj's. Tu'r'b'i'n-at, -at-e'd. Lat. *turbinatus* (from *turbo*, a spinning-top). Fr. *turbiné*. Top-shaped; scroll-like. [A. 35.]

TURBITH (Fr.), n. Tu'r'-bet. See *TURPETH*. — **Poudre de t. végétal** [Fr. Cod.]. A preparation made by drying the crushed root of *Ipomoea turpethum* at 40° C., powdering in a covered mortar, and sifting through a No. 120 silk sieve. [B. 95 (a, 38).] — **Résine-t.** *Turpeth.* [A. 35.] — **T. blanc.** **T. bleu.** See *GLOBULARIA alypum*. — **T. minéral.** See *MERCURY sub sulphate*. — **T. nitreux.** See *BIBACIC MERCURY nitrate*. — **T. noir.** See *EUPHORBIA palustris*. [A. 35.] 2. See *MERCURY* and *ammonium nitrate*. — **T. végétal.** See *IPOMOEA turpethum*.

TURBO (Lat.), n. m. Tu'r'b'(tu'r'b)-o. Gen. *turb'inis*. From *turbare*, to disturb. Fr. *trouble*. 1. A spinning-top; any top-shaped or scroll-like formation. [A. 48.] 2. A genus of molluscs. The opercula of several species (*T. cochlis*, *T. rugosus*, etc.) were once used as an aphrodisiac under the names *faba marina*, *umbilicus marinus* (seu *Veneris*), *belliculus* (seu *Veneris*) *marinus*, *acetabulum marinum*, and *concha veneris*. [A. 35.] — **T. cerebri.** The pineal gland. [L. 50 (a, 34).] — **Turbines nasi.** The inferior, middle, and superior turbinated bones. [L.]

TURFOL, n. Tu'r'f-o'l. Of Vohl, peat-oil (see *BRAUNKOHLNÖL*). [B. 93 (a, 14).]

TURGESCENCE, n. Tu'r'i'-es'-cens. From *turgescere*, to begin to swell. Fr. t. Ger. *Turgescenz*, *Vollsaftigkeit*. The act or process of swelling or enlargement (said especially of very vascular tissues); in botany, the distention of cells with sap. [D. 20; A. 35.]

TURGID, adj. Tu'r'j'id. Lat. *turgidus* (from *turgere*, to swell). Fr. *turgide*. Ger. *aufgeschwollen*. Swollen, congested, bloated. [D.]

TURGOR (Lat.), n. m. Tu'r'g(tu'r'g)-o'r. Gen. -o'-ris. From *turgere*, to swell. Congestion, turgescence. [D. 3.] — **T. vitalis.** That vital property without which the body becomes limp like a corpse.

TURION, n. Tu'r'(tu'r')i'o-o'n. Lat. *turio*. Fr. t. *turiobulbe*. Ger. *Schoss*, *Schössling*, *Stoeknospe*. 1. A subterranean budding shoot. 2. Of the Fr. Cod., young asparagus shoots. [B. A. 35.]

TURMERIC, n. Tu'r'm'e'r'-ik. 1. The genus *Curcuma*, especially *Curcuma longa* (q. v.) and its rhizome (see *Radic curcuma*). *Curcuma* root contains curcumin, a brown pigment, an odorous, very acid, dark-yellow, volatile oil (t.-oil), and, according to some, an alkaloid forming crystallizable salts. *T.* is chiefly used in pharmacy as a coloring agent. 2. The *Hydrastis canadensis* and *Sanguinaria canadensis*, also their roots. [A. 35.] — **African t.** The rhizome of *Canna speciosa*. [A. 34.] — **Bengal t.** A variety of *t.* preferred in dyeing for its deep tint. [A. 35.] — **China t.** Chinese *t.* The most esteemed variety of *t.*, but rarely met with in European or American commerce. [A. 35.] — **Cochin t.** A short, conical rhizome obtained from an undetermined species of *Curcuma*, grown chiefly at Alwaye. It occurs in slices or segments, and is used in making arrowroot. [A. 35.] — **Indian t.** The *Hydrastis canadensis* or its root. [A. 35.] — **Javat t.** The rhizome of a variety (minor) of *Curcuma longa*. It occurs in pieces dusted with its own powder, and is not highly esteemed. [A. 35.] — **Madras t.** A superior variety of *t.*, occurring in large pieces. [A. 35.] — **T.**

oil. Fr., *huile (ou essence) de curcuma*. Ger., *Curcumaöl*. 1. A volatile oil obtained by distilling *t.* with water, with dark yellow oil, obtained by treating *t.* with cold ligroin. [B. 81, 270 (a, 14).]—**T. paper.** Lat., *charta curcumae*. Fr., *papier de curcuma*. Filter paper impregnated with that portion of the coloring matter of *t.* which is insoluble in water but soluble in alcohol; used as a test for alkalies in solution, which change its tint to brown. [Proc. of the Am. Pharm. Assoc., xxii, p. 50 (a, 50); a, 17.] Cf. *Litmus paper*.—**Wild *t.*** See *CURCUMA aromatica*.

TURMEROLO, n. Tu^{tr}m^{er}o^l. A constituent of turmeric oil; an alcohol, C₁₅H₂₅O (or, according to some, C₁₅H₂₄O), boiling at 260° C. It differs from ceryl in not combining with hydrogen sulphide. [B. 81 (a, 14); a, 35.]

TURNERA (Lat.), n. f. Tu^{tr}n^{er}a^r. From *Turner*, an English physician. Fr., *turnère*. A genus of herbs or undershrubs of the *Turneraceae*, which are an order of the *Passiflorales*, considered by Baillon a series (*Turnereae*) of the *Biacceae*. [a, 35].—**T. aphrodisiaca**. A Mexican species. The leaves are now considered the genuine damiana. [a, 35].—**T. apifera**. Fr., *turnère excellent*. A Brazilian undershrub. The leaves are astringent and tonic. [a, 35].

T. microphylla. A Mexican species considered by some the source of damiana. [a, 35].—**T. ulmifolia**. Holly (or sage) rose of the West Indies. The leaves are tonic and expectorant. [a, 35].

TURNING, n. Tu^{tr}nⁱn^g. See **VERSION** (1st def.).—**Head *t.*** See **Cephalic version**.

TURNIP, n. Tu^{tr}nⁱp. The *Brassica rapa*. [a, 35].—**Indian *t.*** See *ANISIMUM atrocarbum*.—**Swedish *t.*** See under *BRASSICA campestris*.—**Wild *t.*** The *Arum triphyllum* and the *Asarum canadense*. [“*Jour. of Am. Med. Assoc.*,” Oct. 24, 1891, p. 616 (a, 47).]

TURNKEY, n. Tu^{tr}n^{ke}. See **TOOTH KEY**.

TURN OF LIFE, n. Tu^{tr}n^o lif. See **MENOPAUSE**.

TURNS, n. pl. Tu^{tr}nz. The menses.

TURNSICK, n. Tu^{tr}n^{si}ck. See **GDM**.

TURNSOLE, n. Tu^{tr}n^{so}l. Fr., *turnesol*. Ger., *Turnesol*. 1. Litmus, especially ribbon litmus. 2. An old name for *Euphorbia helioscopia*. 3. The genus *Heliotropium*. [a, 35.]

TURPENAY (Fr.), n. Tu^{tr}p^{er}-n^{ay}. A place in the department of the Indre-et-Loire, France, where there is a gaseous and chalybeate spring. [L. 49 (a, 14).]

TURPENTINE, n. Tu^{tr}p^{er}-tⁱⁿe. In Gr., *βύριν, respuβύριν*. Lat., *terebinthina*. Fr., *terébenthine* [Fr. Cod.]. Ger., *Terpenthin*, *Terpentin*. An oleous resin (consisting of a mixture of resin (copaiba) and an essential oil (see *Oil of t.*), obtained from various species of pine, larch, and fir. [a, 35]. Cf. **TEREBINTHINA**.—**American *t.*** Lat., *terebinthina* [U. S. Ph.], thus *americanum* [Br. Ph.]. Fr., *terébenthine de Boston*. White t.; a honey-like liquid of agreeable odor and bitterish taste, obtained from *Pinus australis* (palustris) and *Pinus taeda*. In its fresh state it yields 17 per cent. of volatile oil. When exposed to the air or to a low temperature it hardens. [a, 35].—**Balsam of *t.*** See **TEREBINTHINA** (1st def.).—**Bordeaux *t.*** Lat., *terebinthina* [Fr. Ph.], *terebinthina vulgaris* [Lond. Ph.] (see *communis*). Fr., *terébenthine de Bordeaux* (ou *commun*) [Fr. Cod.]. Ger., *gemeiner Terpentin*. Common European *t.*; obtained from several species of *Pinus*, especially *Pinus maritima*. In its fresh state it is whitish, turbid, and thick, but separates, on standing, into two portions, one transparent and fluid, the other viscid and honey-like. The commercial article often consists entirely of the latter part. It yields large quantities of resin and oil of *t.* [a, 35].—**Canada *t.***, **Canatian *t.*** Lat., *terebinthina canadensis* [U. S. Ph., Br. Ph.]. Fr., *terébenthine (ou baume) de Canada* [Fr. Cod.]. Ger., *Canada-Balsam*, *canadischer Terpentin*. Canada balsam, balsam of fir; a yellowish or greenish, viscid, transparent liquid, of bitterish, somewhat acid taste and terebinthinate odor, obtained from the resin on which form the young twigs of *Abies balsamea*. According to Flückiger, it contains 24 per cent. of essential oil, with a very small quantity of an oxygenated oil, 60 per cent. of resin soluble in boiling alcohol, and 16 per cent. of resin soluble only in ether. On evaporation of the oil, the resins are left as a transparent elastic mass. [a, 35].—**Chian *t.***, **Chio *t.***, **Cyprus *t.*** Fr., *terébenthine de Chio* [Fr. Cod.], *baume de Chio* (ou *de Chypre*). Ger., *cyprischer Terpentin*. *T.* obtained from *Pistacia terebinthus*; a thick, tenacious liquid of a greenish-yellow color or a soft solid of a dull brown hue, with little taste, and of a peculiar pleasant, mildly terebinthineous odor. It consists of resin (probably the resin of mastic) and an essential oil which contains a little oxygenated oil. In Greece, Chian *t.* is used as an agreeable addition to wines and cordials. It has been recommended in the form of emulsion as a local application in cancer of the uterus. [a, 35].—**Domey *t.*** A thick whitish, glutinous fluid of a strong smell and taste, derived from *Araruca imbricata*. [a, 35].—**European *t.*** See **Bordeaux *t.***—**Hungarian *t.*** Lat., *balsamum hungaricum* (see *carpathicum*, see *carpathicum natiuum*), *oleum carpathicum*. Ger., *Krummholz Balsam*, *ungarischer (oder karpathischer) Balsam*. Carpathian (or Hungarian, or Riga) balsam; a thin, white fluid with a strong smell that exudes from the young twigs of *Pinus cembra* and *Pinus pumilio*. It has the properties of ordinary *t.* [a, 35].—**Larch *t.*** Lat., *terebinthina* [Belg. Ph., Netherl. Ph.] (*laricina*). A thick, turbid, pale-yellowish fluid of bitter, aromatic taste, obtained from *Larix europaea*. It has the properties of ordinary *t.*, but a less powerful odor. It is much used by the veterinarians. [a, 35].—**Linnéum *t.*** and **acetic acid**. See **Linnéum terebinthina** and **acetic acid**.—**Oil of *t.*** Lat., *oleum terebinthinum* [U. S. Ph., Br. Ph., Ger. Ph.]. Fr., *essence de térébenthine* [Fr. Cod.]. Ger., *Terpentinöl*. Spirit (or spirits) of *t.*; a volatile colorless liquid, C₁₀H₁₆, of penetrating smell, pungent, bitterish taste, and neutral or faintly acid reaction, obtained by distillation from *t.* It varies in physical properties according to

its source. Its boiling point ranges from 159° to 179° C., and its sp. gr. from 0.856 to 0.870. American oil of *t.* is dextrogyrous, while that from Bordeaux *t.* is levogyrous. It is soluble in alcohol, especially in boiling alcohol, and in ether, benzol, other essential oils, and the fixed oils, and dissolves resins and caoutchouc. It is used as a stimulant, diuretic, antelmintic, cathartic, rubefacient, germicide, and antiseptic. [a, 35].—**Ointment of *t.*** See **Unguentum terebinthinæ**.—**Rectified oil of *t.*** Lat., *atheroleum terebinthinum* [Dan. Ph.] (*depuratum* [Swed. Ph.], *oil rectificatum* [Norw. Ph.]), *essentia terebinthinæ rectificata* [Belg. Ph.], *oleum terebinthinum depuratum* [Netherl. Ph.] (see *rectificatum* [Br. Ph., Ger. Ph., Austr. Ph., Hung. Ph., Finn. Ph., Russ. Ph., Swiss Ph., Gr. Ph.]). Sp., *esencia de trementina* [Sp. Ph.]. Oil of *t.* rectified by shaking up with water (lime-water [Ger. Ph., Finn. Ph.]), and distilling from about two thirds to three quarters. [B. 95 (a, 38)].—**Russian *t.*** Obtained from *Pinus silvestris*. “*Santas*” is produced by passing air through its essential oil in contact with warm water. [a, 35].—**Scio *t.*** See **Chian *t.***—**Spirit (or spirits) of *t.*** See **Oil of *t.***—**Strassburg *t.*** Lat., *terebinthina abietina* (see *argenteratensis*). Fr., *terébenthine d'Alsace* (ou *au citron* [Fr. Cod.]). A *t.* obtained from the vesicles of the bark of *Pinus picea*, closely resembling Canadian balsam, but of a more agreeable odor and without acid or bitter taste. It has the properties of common *t.* [a, 35].—**T. clyster**. See **Emula terebinthinæ**. *T. hydrochlorate*. See **Artificial camphor**.—**T. plant**. See **SILPHIUM laciniatum**.—**T. vapor bath**. Ger., *Terpentinampfbad*. A bath made by exposing the body to the vapor arising from the distillation of *t.*; used in rheumatic and pulmonary complaints. [B. 270.]—**Venetian *t.***, **Venice *t.*** See **Larch *t.***—**White *t.*** See **American *t.***

TURPETH, n. Tu^{tr}p^{er}eth. Lat., *turpethum*. Fr., *turbith*. Ger., *Turbith*. The *Ipomoea turpethum*, its root (t. root, white t., vegetable t.), or the resin (resin of *t.*) obtained from the root. *T.* root contains turpethin, a volatile oil, a yellow pigment, a fatty substance, iron oxide, etc. It acts like jalap, but is less powerful. [a, 35].—**T. mineral**. Mercury sub sulphate; so called from the resemblance of its color to that of the root of *Ipomoea turpethum*. [B. 5].—**T. root**. Lat., *radix turpethi* [Belg. Ph.] (veri). Fr., *turbith végétal* (racine) [Fr. Cod.]. Ger., *Turpethwurzel*. See under *T.*

TURPETHIC ACID, n. Tu^{tr}p^{er}-ethⁱc^{ik}. Fr., *acide turpéthique*. An amorphous acid, C₂₄H₄₀O₁₀, obtained by dissolving turpethin in hot baryta water. [B. 92, 93 (a, 14).]

TURPETHIN, n. Tu^{tr}p^{er}-ethⁱn. Fr., *turpéthine*. An amorphous glucoside, C₂₄H₄₀O₁₀, isomeric with jalapin, obtained from turpeth resin. [B. 92, 93, 270 (a, 14, 38).]

TURPETHOLIC ACID, n. Tu^{tr}p^{er}-ethⁱ-olⁱc^{ik}. A monobasic microcrystalline acid, C₁₂H₂₀O₄, obtained from turpethin. [B. 92, 93 (a, 14).]

TURPETHUM (Lat.), n. n. Tu^{tr}p^{er}(tu^{tr}p^{er})-ethⁱ(th)u^m(u^m). See **TURPETH**.—**Extractum turpethi** (Würt. Ph.). A preparation made by digesting 1 part of turpeth-root in 6 parts of alcohol and expressing, macerating and boiling the residue with 3 parts of water, clarifying with white of egg, mixing the decoction and tincture, distilling off the alcohol, and evaporating the residue to the proper consistence. [B. 97 (a, 14).]—**Radix turpethi** [Belg. Ph.] (veri). See **TURPETH**.—**T. minerale**. See **MERCURY sub sulphate**.—**T. nigrum**. See **MERCURY and ammonium nitrate**.—**T. nitricum**. See **BASIC MERCURY nitrate**.

TURPS, n. Tu^{tr}ps. See **Oil of TURPENTINE**.

TURRITIS (Lat.), n. f. Tu^{tr}(tu^{tr})-rⁱ(re)tⁱs. Gen., *-it'id*os (-idis). Fr., *turrite*. The genus *Arabis*. [a, 35.]

TURTLE-OIL, n. Tu^{tr}rⁱ-l^{oil}. An oil prepared in South America from the skin and the scaly scales from the fat of various turtles; said to equal cod-liver oil as a nutrient. [a, 35.]

TURUNDA (Lat.), **TURUNDULA** (Lat.), n. f. Tu^{tr}(tu^{tr})-und(und)a², und(und)u^la². See **TENT**.

TUSCAN SPRINGS, n. Tu^{tr}sⁱkⁱn. A place in Tehama County, California, where there are mineral springs some of which are called also Lick Springs. [Anderson (a, 14).]

TUSCARORA ACID (SOUR) SPRINGS, n. Tu^{tr}sⁱkⁱ-a²-rⁱ-o²-a². Cold, astringent mineral springs, situated in Canada, containing a large proportion of alumina and free sulphuric acid and having a styptic taste. [A. 363 (a, 21).]

TUSNAD, n. Tu^{tr}sⁱ-n^ad. A place in Csik, Transylvania, where there are gaseous, saline, and chalybeate springs. [L. 30, 57 (a, 14).]

TUSSAL, adj. Tu^{tr}sⁱsl. Pertaining to or due to a cough or coughing. [a, 48.]

TUSSICATION, n. Tu^{tr}sⁱ-i²kⁱ-u^l-a²/shuⁿ. From *tussis* (q. v.). See **Hacking COUGH**.

TUSSLILAGO (Fr.), n. Tu^{tr}sⁱ-el-a²zh. See **TUSSLILAGO**; of the Fr. Cod., see **TUSSLILAGO farfara**.—**Sirope de *t.*** Sp., *jarabe de tussilago*. A preparation made by infusing 10 parts of dried *t.* flowers in 150 of boiling water, expressing, adding 9 parts of sugar for each 5 of clarified colature, boiling up quickly, and straining [Fr. Cod.], or by infusing 100 parts of *t.* leaves in water enough to make 346, clarifying, and adding 630 of sugar [Sp. Ph.]. [B. 95 (a, 38)].—**Ti-sane de *t.*** [Fr. Cod.]. A preparation made by infusing 5 parts of the flowers of *Tussilago farfara* in 1,000 of boiling water for half an hour, and filtering. [B. 95 (a, 38)].—**T. (capitule)** [Fr. Cod.]. The dried flowers of *Tussilago farfara*. [B. 95 (a, 38)].

TUSSLILAGO (Lat.), n. f. Tu^{tr}sⁱ(tu^{tr}sⁱ)-sil-a²gⁱ(a²gⁱ)o. Gen., *-agⁱnis*. From *tussis*, a cough. Fr., *tussilage*. Ger., *Huflattig*. 1. A genus of the *Compositæ*. The *Tussilaginæ* (Fr., *tussilaginées*) are a tribe of the *Symphytaceæ* (*Compositæ*). 2. The *T. farfara*. [a, 35].—**T. farfara**. Fr., *tussilage* (*farfara*), *chou de vigne*, *herbe Saint-Quirin*, *pas d'âne*, *piéd de poulin*, *racine de peste*, *tacotnet*. Ger., *gemeiner Huflattig*, *Brustlattig*, *Feldlattig*, *Eselhut*, *Quirinkraut*. Colc's-foot, cough-wort, dove-dock, foal-foot, hoofs, horse-hoofs, clay-weed, cleats, bull's-foot, the βύριν of Dioscori-

des; an herb indigenous to the temperate regions of the northern hemisphere. It is bitter, astringent, and demulcent, and is used as a pectoral. The leaves, which are the most active, were smoked by the ancients in pulmonary affections, and are still so used in asthma; they have also been recommended for scrofula. [a, 35.] —*T. petasites*. See *PETASITES vulgaris*. —*T. vulgaris*. See *T. farfara*.

TUSSIS (Lat.), n. f. *Tu'ss*(tu's)si's. See CORON. —*T. arthritica*. Of Sauvages, a cough associated with and due to gout. [a, 34.] —*T. calculosa*. Of Schenck, a cough caused by pulmonary calculi. [Sauvages (a, 34).] —*T. catarrhalis*. Of Sauvages, a cough associated with laryngeal or bronchial catarrh. [a, 34.] —*T. clangosa*. *T. convulsiva*. See *PERTUSSIS*. —*T. convulsiva hepatica*. Of Sauvages, a cough consequent upon hepatic disorder. [a, 34.] —*T. ferina*. Of F. Hoffmann, pertussis. [Sauvages (a, 34).] —*T. tr. gravidarum*. Of Sauvages, a reflex cough due to pregnancy. [a, 34.] —*T. gutturalis*. Of Sauvages, a cough dependent upon chronic follicular pharyngitis or amygdalitis. [a, 34.] —*T. hysterica*. T. of hysterical origin. [a, 34.] —*T. metallicolurum*. Of Sauvages, a cough affecting workers in metals. [a, 34.] —*T. rheumatica*. Of Sauvages, a cough associated with pulmonary inflammation and pain. [a, 34.] —*T. sicca*. A cough without expectoration. [a, 34.] —*T. spasmodica*. See *PERTUSSIS*. —*T. stomachalis humida*. Of Sauvages, a moist cough following eating and due to gastric derangement. [a, 34.] —*T. stomachalis sicca*. Of Sauvages, a dry cough following eating and due to gastric derangement. [a, 34.] —*T. strangulans*. *T. suffocativa*. See *PERTUSSIS*. —*T. verminosa*. Of Sauvages, a reflex cough caused by larvae in the bronchi. [a, 34.] —*T. xerolaryngosa*. Of Sauvages, a cough caused by dryness of the larynx. [a, 34.]

TUSSIVE, adj. *Tu'ss*'iv. Lat., *tussivus* (from *tussis*, a cough). Pertaining to coughing. [J.]

TUTAMEN (Lat.), n. n. *Tu't*(tu't)-am(a'm)'e'n. From *tueri*, to protect. A protective structure. [a, 48.] —*Tutamina cerebri*. The skull and the meninges of the brain.

TUTE (Ger.), n. *Tu't*'e. A convoluted structure. [a, 34.] See *OCREA* (1st def.). —*T'n des Keilbeines*. The sphenoidal turbinated bone. [a, 34.] —*T'n förmig*. See *CONVOLUTE*.

TUTENAG, n. *Tu't*'e'n-a'g. An old name for zinc, especially for that brought to Europe from India and China. [a, 48.]

TUTIA (Lat.), n. f. *Tu't*(tu't)shi'ti'z'a'. Fr., *tuthie*, Sp., *tucia*. Tutty; an impure zinc oxide gathered from the fumes of furnaces used for working lead and zinc ores. Finely powdered or washed, it is used as a desiccant in excoarations. [B, 5, 10; B, 95 (a, 38).]

TUTTY, n. *Tu't*'i'. See *TUTIA*.

TUTU, n. See *CORIARIA ruscifolia*.

TVAKOSZCZA, n. A place in Saros, Hungary, where there are saline and chalybeate springs. [L, 63.]

TVER, n. A place in the government of T., Russia, where there is an alkaline spring. [L, 80, 49 (a, 14).]

TWAYBLADE, n. *Twa*'blad. The *Listera ovata*, *Listera lilifolia*, and other species of *Listera* and *Liparis*.

TWEENBRAIN, n. *Twen*'bran. See *MESENCEPHALON*.

TWIN, adj. *Twi'n*. Gr., *δίδυμος*. Lat., *geminus*, *didymus*. Fr., *jumeau*. Ger., *Zwilling* (n.), *Zwillingsfrucht* (n.). Double, paired, geminate; as a n., one of two children that are the product of one gestation. [a, 48.] —*Allantoido-angeiopagus* t's. T's of the same sex inclosed within a single chorion, one of them showing more or less grave developmental defects, and communicating with the other by means of the vessels of the umbilical cord in the neighborhood of the placenta. [Edinburgh Med. and Surg. Jour., March, 1893, p. 836 (a, 34).] —*Conjoined* t's. A double monster. [a, 34.] —*Homologous* t's. Of Albid, t's of the same sex inclosed within one chorion and drawing their nourishment from a single placenta. [a, 34.] —*Interlocking* of t's. *Locked* t's. The condition in which the birth of a t. is impeded by some part of it being held above its fellow, as when the first t. presents by the pelvic pole and its head can not pass the presenting head of the other t. —*Uniovular* t's. Fr., *jumeaux uniovulaires*. Ger., *eineiige Zwillinge*. T's developed from a single ovum containing a double germ, shown by the existence of only one chorion. [a, 34.]

TWINING, adj. *Twin*'ing. Climbing by twisting around a support. [a, 35.]

TWIN-LEAF, n. *Twi'n*'lef. See *JEFFERSONIA diphylla*.

TWIN-POLE, n. *Twi'n*'pol. See *HOLOPOLE*.

TWIST, n. *Twi'st*. A spiral turn, a spiral disposition produced by turning; that result of the action of gravity on the fœtus in utero which consists in a turning of the latter until its centre of buoyancy and its centre of gravity lie in one vertical line. [Neville, "Dublin Jour. of Med. Sci.," June, 1882, p. 54.]

TWO-AXED, adj. *Tu'o*'ax't. See *BIAXIAL*.

TYLARUS (Lat.), n. m. *Ti'l*(tu'l)'a'r(a's)'u's(u's). Gr., *τύλαρος*. Fr., *tylare*. Ger., *Zehenballe*. One of the pads under the toes in certain birds. [L, 343.]

TYLE (Lat.), n. f. *Til*(tu'l)'e(a). Gen., *tyl'es*. Gr., *τύλη*. See *CALLOSITY*.

TYLE-BERRY, n. *Til*'be'r-i'. See *JATROPHA multifida*.

TYLODES (Lat.), adj. *Til*(tu'l)-o'd'e's(a's). Gr., *τύλωδης* (from *τύλος*, a callus, and *είδος*, resemblance). Fr., *tylœux*. See *CALLUS*.

TYLOMA (Lat.), n. n. *Til*(tu'l)-o'm'a's. Gen., *-om'atos* (-atis). Gr., *τύλομα* (from *τύλος*, a callus). Fr., *tylome*, *opnon*. Ger., *Schwiele*. A callosity of the skin, usually appearing on the hands or feet, due to a diffuse thickening of the epidermis, of limited extent, producing a whitish, indurated, and horny elevation of the surface, with more or less obliteration of the natural lines of the

skin and impairment of the sense of touch, and sometimes marked by deep fissures. Usually it is the result of long-continued friction or pressure on the skin, but it sometimes originates spontaneously, and is then often congenital. [Unna (G.) Cf. *CLAVUS* (1st def.).]

TYLOPHORA (Lat.), n. f. *Til*(tu'l)-o'f'o'r-a's. From *τύλος*, a callus, and *φώρα*, to bear. Fr., *tylophore*. A genus of the *Asclepiadeæ*. The *Tylophoræ* are a section of the *Hoyecæ*. [a, 35.] —*T. asthmatica*. Fr., *ipecaacuanha d'Inde*, *ipeca du pays* (ou *sauvage*). Country (or East Indian) *ipecaacuanha*; a shrub of southern Asia and the adjacent islands. The root, *radix tylophoræ*, is emetic in large and cathartic in small, repeated doses, and is used like *ipecaacuanha* in dysentery, and also in most asthma. The leaves, *folia tylophoræ*, official in the Bengal Ph. of 1844 and the Ph. of India of 1868, are also used in dysentery and as a diaphoretic, emetic, and expectorant. [a, 35.]

TYLOSIS (Lat.), n. f. *Til*(tu'l)-o's'i's. Gen., *-o's'eos* (-is). Gr., *τύλωσις* (from *τύλος*, a callus). Fr., *tylose*. Ger., *Tylose*, *Thyille* (5th def.). 1. See *TYLOMA*. 2. A laminated corn. [G.] 3. See *LEUCOPOLAKIA buccalis*. 4. A chronic inflammation of the margin of the eyelid, in which the whole substance of the lid along the margin is thickened and hardened. [F.] 5. A protuberance of the wall of a plant-cell into the cavity of an adjacent duct. [a, 35.] —*T. callosæ* (Fr.). See *TYLOMA*. —*T. gomphæus* ad *bulbeus* (Fr.). *Clavus*, including the hard conical form (t. *gomphæus*) and a laminated form (t. *bulbeus*) resembling somewhat the structure of an onion, usually observed on the sole of the foot. [G., 7.] —*T. lingue*. See *LEUCOPOLAKIA buccalis* and *ICHTHYOSIS lingue*. —*T. palma manus plana*. Of Hebra, acquired *tyloma*. [a, 34.] —*T. palma manus verrucosa*. Of Hebra, *tyloma* in which there are millet-sized horny nodules imbedded in the epidermis. [a, 34.]

TYLOSTERESIS (Lat.), n. f. *Til*(tu'l)-o-o's'te'r-e's(a)'si's. Gen., *-e's'eos* (-is). From *τύλος*, a callus, and *στερείν*, to deprive. The removal of a callosity. [L, 50 (a, 14).]

TYLUS (Lat.), n. m. *Til*(tu'l)'u's(u's). Gr., *τύλος*. See *TYLOMA*.

TYMMA (Lat.), n. n. *Ti'm*(tu'm)'ma's. Gen., *ty'm'niatos* (-atis). Gr., *τύμμα* (from *τύπτειν*, to strike). See *WOUND*.

TYMPAN (Fr.), n. *Ta'n*'pa-n'a'n. See *TYMPANUM*. —*T. secondaire*. See *MEMBRANA tympani secundaria*.

TYMPANAL (Fr.), n. *Ta'n*'pa-n'a'n-l. The metapterygoid bone in fishes. [L, 14.]

TYMPANECTOMIA (Lat.), n. f. *Ti'mp*(tu'm'p)-a'n(a'n)-e'k-tom(to'm)'i'a-s. From *tympanon* (see *TYMPANUM*), and *ἐκτομή*, a cutting out. Of Brunner, excision of the membrana tympani. [a, 34.]

TYMPANIC, adj. *Ti'm*-pa'n'i'k. Lat., *tympanicus*. Fr., *tympanique*. Ger., *tympanisch*. Pertaining to or connected with the tympanum; as a n., see *T. BONE*.

TYMPANICOLINGUALIS (Lat.), adj. *Ti'mp*(tu'm'p)-a'n(a'n)'i'k-o-o's'-li'n-gw'al-gw'a'l'i's. From *tympanum* (q. v.), and *lingua*, the tongue. Pertaining to the tympanic region and the tongue. [a, 34.]

TYMPANISM, n. *Ti'mp*'a-n'i'z-m. Gr., *τυμπανισμός*. Lat., *tympanismus*. See *TYMPANITES*.

TYMPANITES (Lat.), n. m. *Ti'mp*(tu'm'p)-a'n(a'n)-it(et)'ez(-as). Gen., *-it'u* (-it'e's). Gr., *τυμπανίτης* (from *τυμπανον*, a cettledrum). Fr., *tympanite*. Ger., *T. Aufblähung*, *Aufreibung*. A distended condition of the abdomen due to paralysis of the muscular coat of the intestines and their inflation with gas generated within them. [D, 20.] —*Acute* t. A sudden and excessive t. in puerperal women, with intense pain and great depression, simulating peritonitis; a variety of the "intestinal irritation" of Marshall Hall. [a, 48.] —*Peritoneal* t. T. abdominalis. 1. T. due to an accumulation of air in the peritoneal cavity. [B.] 2. See *T. acuripertonitis*. See *Peritoneal* t. (1st def.). —*T. intestinalis*. See *T. — T. pericardii*. See *PNEUMOPERICARDIUM*. —*T. universalis*. General emphysema. [L.] —*T. uteri*. See *PHYSOMETRA*.

TYMPANITIC, adj. *Ti'mp*-a'n'i'-t'i'k. Gr., *τυμπανικός*. Lat., *tympaniticus*. Fr., *ballonné*. Ger., *tympanisch*. 1. Of the nature of or affected with tympanites. 2. Of a percussion-note, resembling in quality the note produced by percussing a tympanic abdomen.

TYMPANITIS (Lat.), n. f. *Ti'mp*(tu'm'p)-a'n(a'n)-it(et)'i's. Gen., *-it'idis* (-idis). See *OTITIS media*.

TYMPANO-EUSTACHIAN, adj. *Ti'mp*'a'n-o-u's-tak'i'a'n. For deriv., see *TYMPANUM* and *EUSTACHIAN*. Pertaining to the tympanum and the Eustachian tube. [a, 48.]

TYMPANOHYAL, adj. *Ti'mp*-a'n-o-hi'l. Pertaining to the tympanic region or bone and the hyoid apparatus; as a n., see *T. BONE*.

TYMPANO-KONTIANTRON (Lat.), n. n. *Ti'mp*(tu'm'p)'a'n(a'n)-o-o's'-kon(ko'n)'i-a'n(a'n)'i'o'n. From *τυμπανον*, a cettledrum, *κωνία*, dust, and *ἄντρον*, a cavity. Of Weber and Liel, a longitudinally perforated piece of vulcanite with a small lateral tube, used with a catheter for medication of the tympanic cavity. [Gruber.]

TYMPANOMAILLÉAL [Agassiz] (Fr.), n. *Ta'n*'pa-s'no-ma's-la-a'l. See *Symplectic* BONE.

TYMPANOMAILLEAREIS (Lat.), n. m. *Ti'mp*(tu'm'p)-a'n(a'n)-o-o's'-ma'il(ma'il)-le-a'r(a's)'i's. From *tympanum* (q. v.), and *mailleus* (q. v.). See *LAXATOR tympani minor*.

TYMPANOPETROSALPINGOTRYPICALATINUS (Lat.), n. m. *Ti'mp*(tu'm'p)-a'n(a'n)-o-o's'-pe't-ro-sal'p-i'g-o'tri'p-i'ca-latin'us. From *τυμπανον*, a cettledrum, *πέτρα*, a rock, *σάλπιγξ*, a trumpet, *πτερύξ*, a wing, and *palatum*, the palate. See *ABDUCTOR of the Eustachian tube*.

TYMPANOPHONIA (Lat.), n. f. *Ti'mp*(tu'm'p)-a'n(a'n)-o-o's'-fon'i'a-s. From *tympanum* (see *TYMPANUM*), and *φωνή*, sound. See *AUTOPHONY* (2d def.).

TYMPANOSTYLOÏDE (Fr.), n. $Ta^{2n} \cdot pa^0 \cdot no \cdot ste \cdot lo \cdot ed$. Of G. St.-Hilaire, the tympanic bone in birds. [L. 14.]

TYMPANUM (Lat.), n. n. $Ti^{2mp}(tu^{2mp})/a^{2n}(a^{2n}) \cdot u^{2m}(u^{2m})$. From *τύμπανον*, a kettledrum. Fr., *tympan*. Ger., *Pauke*. 1. The drum of the ear, the cavity of the middle ear; in a more restricted sense, the membrana tympani. [a. 48.] 2. Of Duvernoi, see **SEPTUM laticurium**.—**T. secundarium**, **T. secundum**. See **LIGAMENTUM obturatorium stapidis**.

TYMPANY, n. $Ti^{2mp}/a^{2n} \cdot i^2$. See **TYMPANITES**.

TYNEMOUTH, n. Ti^{2n}/u^{2th} . A sea-bathing resort in Northumberland, England, where there is a chalybeate spring. [a. 14.]

TYPE, n. Ti^0 . Gr., *τύπος*, Lat., *typus*. Fr., t. Ger., *Typus*, *Gepräg*, *Formbild*. 1. A model, a representative or ideal form, structure, or specimen; of a disease, its character as shown by the order, intensity, etc., of the symptoms. [D. 1.] 2. In chemistry, a substance the graphic formula of which serves as a model of construction for numerous other bodies whose graphic formula, accordingly, may be reproduced by substituting the appropriate radicles for the radicles of the typical formula. The principal substances used as t's are water, ammonia, hydrogen, and methane (see the subheadings). [B.] 3. In biology, (a) the ideal plan on which an organ or form is constructed; (b) the primitive pattern on which a group was first established; and (c) a group (species, genus, etc.) representing in its characters as completely as possible a higher group. [a. 35.]—**Ammonia t.** The t. of which ammonia is the characteristic example. Compounds formed on this t. have the composition of ammonia, $H-N \begin{smallmatrix} H \\ \vdots \end{smallmatrix}$ in which 2 or 3 of the hydrogen atoms are replaced by elements or radicles (see **AMINE**, **AMIDE**, and **ALKALOID**). Belonging to this t. are also compounds in which not only the hydrogen but also the nitrogen of the ammonia is replaced, forming the *arsines*, *bismuthines*, *stibines*, *phosphines*, *boranes*, or *compounds*. These t's are potassium, furnished by acting as unsaturated bodies, the nitrogen or replacing element being either trivalent or univalent, and the general formula of these compounds being either $R-N-R$ or $R-N-R$.

[B.]—**Benzene t.** The t. of which benzene is the characteristic example. The compounds formed on this t. are the substitution products of benzene, or the aromatic compounds. [B.]—**Marsh-gas t.**, **Methane t.** The t. of which methane is the characteristic example. Compounds formed on this t. may be regarded as

$\begin{matrix} H \\ | \\ H-O-H \end{matrix}$ in which 1, 2, 3, or 4 of the hydrogen atoms

are replaced by elements or radicles. This t. accordingly comprehends all the paraffins and their substitution compounds. [B.]—**Water t.** The t. of which water is the characteristic example. All compounds formed on this t. may be regarded as water, $H-O-H$, in which one or both of the hydrogen atoms are replaced by elements or radicles. Thus, $K-O-H$, caustic potash, C_2H_5-O-H , alcohol, and $NO-O-H$, nitric acid, and in general all hydrates, alcohols, and oxygen acids are formed on the water t., one atom of hydrogen being replaced; and $K-O-K$, potassium oxide, $C_2H_5-O-C_2H_5$, ether, and in general all oxides are formed on the same t., the 2 atoms of hydrogen being replaced. [B.]

TYPHA (Lat.), n. f. $Ti^{2f}(tu^{2f})/a^2$. From *τύφη*, cat's-tail. Fr., *masette*. Ger., *Rohrkolben*. A genus forming with *Sparganium* the typhaceae, with an order the *Typhaceae*, and a class the *Typhaceae* or *Typhaceae* of monocotyledonous herbs. The *Typhae* are also a tribe of the *Typhaceae*. [a. 35.]—**T. angustifolia**. Fr., *chandelle*, *quenouille*. Small bulrush, reed-plant; an Indian species, used like *T. latifolia*. [a. 35.]—**T. elephantina**, **T. elephantum**. Elephant-grass; an Indian species, used like *T. latifolia*. [a. 35.]—**T. japonica**. A Japanese species. The pollen (called *koh-oh*) is used as a desiccant, astringent, styptic, and sedative. [a. 35.]—**T. latifolia**, **T. major**. Fr., *chandelle*, *jonc de la passion*, *masse à bédan* (ou d'eau), *roseau des étangs* (ou de la passion), *quenouille*, *masette*. Ger., *breitblättriger* (oder *schwarzer*) *Rohrkolben*. (Great) cat's-tail (or reed-mace), blackcap, blackheads, bulrush, marsh beetle (or pestle), baccocods, dod, cat-o'-nine-tails. The astringent roots are used in dysentery, etc., and as a diuretic and antiscorbutic, and the pollen as a desiccant. [a. 35.]

TYPHLEMELETERIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/e^{2m}(a^{2e} \cdot e^{2m}) \cdot e^{2nt} \cdot e^{2r}(e^{2r})/i^2$. Gen., *typhle* (-idis). Fr., *typhle* fever-stupor, *alua*, blood, and *enteron*, an intestine. See **HÆMOTYPHLETERIS**.

TYPHÉMIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/em(a^{2e} \cdot e^{2m})/i^2 \cdot a^2$. From *τύφος*, fever-stupor, and *αἷμα*, blood. The depraved state of the blood characteristic of typhus.

TYPHAL, adj. Ti^{2f} . Lat., *typhalis*. Belonging to the *Typhales*, which are Lindley's t. alliance (Lat., *nixus typhalis*) of the *Imperfectæ*, consisting of the *Typhaceae*. [a. 35.]

TYPHANGONE (Lat.), n. f. $Ti^{2f}(tu^{2f})/a^{2n}(a^{2n})/go^{2n} \cdot e(a)$. Gen., *angones*. For deriv., see **TYPHUS** and **ANGONE**. Of Eisenmann, typhoid angina. [L. 50 (a. 14).]

TYPHCEPHALOGIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/e^{2k} \cdot floj(floj^2)/i^2 \cdot a^2$. For deriv., see **TYPHUS** and **ECCEPHALOGIA**. Fr., *typhcephalogie*. Ger., *typhöse Blattenkrankheit*. Typhoid variola. [L. 50 (a. 14).]

TYPHIC, adj. $Ti^{2f}ik$. Fr., *typhique*. Ger., *typhisch*. See **TYPHOS**.

TYPHINE, n. $Ti^{2f}en$. Of Farr, the morbid germ of typhoid fever.

TYPHINIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/i^{2n}/i^2 \cdot a^2$. See **RELAPSING FEVER**.

TYPHISATION (Fr.), n. $Te \cdot fe \cdot za^2 \cdot se \cdot o^{2n}$. The induction of such a depraved state of the blood or of the system as is characteristic of typhus.—**T. cholémique** [Peter]. See **ICTERUS gravis**.

TYPHISME (Fr.), n. $Te \cdot fe \cdot zm$. From *τύφος*, fever-stupor. See **TYPHOID state**.

TYPHLIATER (Lat.), n. m. $Ti^{2f}(tu^{2f})/li^2 \cdot a(a^2)/tu^{2r}(tar)$. Gen., *-atros* (-ris). From *τύφλος*, blind, and *ιατρία*, a physician. Fr., *typhliatre*. Ger., *Blindenarzt*.

TYPHLITIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/li^2 \cdot e(tis)$. Gen., *-itidos* (-idis). From *τύφλος*, the cæcum. Fr., *typhlite*. Ger., *Blind-darmentzündung*. Inflammation of the cæcum. [D. 70.] Cf. **PARATYPHLITIS** and **PERITYPHLITIS**.

TYPHLOCKE (Lat.), n. f. $Ti^{2f}(tu^{2f})/lo(lo^2) \cdot sel(kal)(e)a$; in Eng., *typhlock*. From *τύφλος*, blind, and *κῆλη*, a tumor. Of Treves, a hernia of the cæcum. [a. 34.]

TYPHLO-DICLIDITE (Fr.), n. $Te \cdot flo \cdot de \cdot kle \cdot dit$. From *τύφλος*, the cæcum, and *δικλῆς*, a double door. Inflammation of the ileo-cæcal valve. [L. 41 (a. 14).]

TYPHLO-ENTERITIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/lo(lo^2) \cdot e^{2nt} \cdot e^{2r}(le)(tis)$. Gen., *-itidos* (-idis). For deriv., see **TYPHLON** and **ENTERITIS**. See **TYPHLITIS**.

TYPHLOLITHIASIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/lo(lo^2) \cdot li^2 \cdot th(i^2 \cdot a(a^2)/li^2$. Gen., *-as* (-as'is). For deriv., see **TYPHLON** and **LITHIASIS**. Lithiasis of the cæcum. [a. 48.]

TYPHLON (Lat.), n. n. $Ti^{2f}(tu^{2f})/lo^{2n}$. From *τύφλος*, blind. Of Galen, the cæcum. [a. 81 (a. 48).]

TYPHLOPS (Lat.), adj. $Ti^{2f}(tu^{2f})/lo^{2ps}(lops)$. Gen., *-op'os* (-op'is). Gr., *τύφλωψ* (from *τύφλος*, blind, and *ὥψ*, the eye). Blind. [F.]

TYPHLOSIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/los(i^2)$. Gen., *-os'eos* (-os'is). Gr., *τύφλωσις* (from *τύφλος*, blind). See **BLINDNESS**.

TYPHOSOLE, n. $Ti^{2f}lo \cdot sol$. From *τύφλος*, blind, and *ὥλην*, a tube. A thick fold of the intestinal wall projecting into its cavity, found in some *invertebrata*. [L. 11.]

TYPHLOSTENOSIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/lo(lo^2) \cdot ste^{2n} \cdot os(i^2)$. Gen., *-os'eos* (-os'is). For deriv., see **TYPHLON** and **STENOSIS**. Stenosis of the cæcum. [a. 48.]

TYPHLOTES (Lat.), n. f. $Ti^{2f}(tu^{2f})/lo^{2t} \cdot ez(as)$. Gen., *-et'os* (-et'is). Gr., *τύφλωτες*. See **BLINDNESS**.

TYPHLOTOXY, n. $Ti^{2f}lo^{2t}/om(i^2)$. From *τύφλος*, the cæcum, and *τέμνειν*, to cut. Ger., *Typhlotomie*. An incision into the cæcum.

TYPHLOTROPHIUM (Lat.), n. n. $Ti^{2f}(tu^{2f})/lo(lo^2) \cdot trof(tro^{2f})/i^2 \cdot u^{2m}(u^{2m})$. From *τύφλος*, blind, and *τρέφειν*, to nourish. Ger., *Blindenanstalt*. An asylum for the blind. [L. 50 (a. 14).]

TYPHOBACILLOSIS (Lat.), n. f. $Ti^{2f}(tu^{2f})/o(o^2) \cdot ba^2s(ba^2k) \cdot i^2 \cdot los(i^2)$. Gen., *-os'eos* (-os'is). From *τύφος*, stupor (see also **BACILLUS**). Ger., *Typhobacillöse*. Of Landouzy, the systemic poisoning produced by the toxins formed by the *Bacillus typhosus*. [a. 34.]

TYPHODES (Lat.), adj. $Ti^{2f}(tu^{2f})/o^{2e}(eas)$. Gr., *τύφωδες* (from *τύφος*, fever-stupor, and *εἶδος*, resemblance). See **TYPHOID**.

TYPHODYSENTERIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/o(o^2) \cdot di^2 \cdot du^{2s}(du^{2s}) \cdot e^{2nt} \cdot e^{2r}(e^{2r})/i^2 \cdot a^2$. From *τύφος*, fever-stupor, and *δυσεντερία*, dysentery. Typhoid dysentery. [L. 50 (a. 14).]

TYPHOID, adj. $Ti^{2f}oid$. Gr., *τύφωδες* (from *τύφος*, fever-stupor, and *εἶδος*, resemblance). Fr., *typhoïde*. Ger., t. 1. Typhus. 2. Of the nature of or resembling t. fever; as a n. t. fever (see under **FEVER**). [D.]—Group t. Of E. Wagner, t. fever occurring in several persons in the same family, house, or locality, and presenting striking similarity in its phenomena. [a. 34.]—**Laryngeal t.** Laryngitis occurring in and due to t. fever. [a. 34.]—**Pig t.** See **TYPHUS de porc**.—**T. condition**, **T. state**. The state or condition in which t. symptoms are present. In addition to fever, this condition may exist in typhus fever, pneumonia, acute rheumatism, acute tuberculosis, pyæmia, uræmia, and some other diseases. [C.]

TYPHOID (Ger.), n. $Tu^{2f} \cdot o \cdot ed$. 1. An inflammation of a septic and malignant character. 2. In the pl., *Typhoide*, a family of the order of hematozoans of the skin, including anthrax contagiosus, traumatocace, noma, and filaria (the *neurophlogoses* of Schönlein). [G.]—**Geflügelt**. See **CHICKEN CHOLERA**.

TYPHOÏDQUE (Fr.), adj. $Te \cdot fo \cdot de \cdot kek$. Pertaining to or resembling typhoid fever or a typhoid condition. [D.]

TYPHOÏGÈNE (Fr.), adj. $Te \cdot fo \cdot e \cdot zhe^{2n}$. Productive of typhoid fever (applied to localities). [Cotin, quoted by Fayrer, "Brit. Med. Jour." May 6, 1882, p. 640.]

TYPHOÏQUE (Fr.), n. $Te \cdot fo \cdot ek$. A person affected with typhoid fever.

TYPHOMANIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/o(o^2) \cdot man(ma^{2n})/i^2 \cdot a^2$. For deriv., see **TYPHUS** and **MANIA**. Fr., *typhomanie*. Ger., *Typhomanie*. The low muttering delirium of typhus and typhoid fever.

TYPHONIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/on(i^2) \cdot a^2$. From *τύφος*, fever-stupor. See **COMA-rigil** (1st def.).

TYPHONIUM (Lat.), n. n. $Ti^{2f}(tu^{2f})/on(i^2) \cdot u^{2m}(u^{2m})$. Fr., *typhonie*. A genus of the *Aroidæ*. [a. 35.]—**T. divaricatum**. Indian kale. The leaves are used in the Fiji and Hawaiian Islands as a vegetable. The root resembles in properties the corn of *Arum maculatum*. [B. a. 35.]

TYPHOPHTHALMIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/o^{2f} \cdot th(i^2) \cdot m(i^2) \cdot i^2 \cdot a^2$. For deriv., see **TYPHUS** and **OPHTHALMIA**. Of Eisenmann, ophthalmotyphus. [L. 50 (a. 14).]

TYPHOPNEUMONIA (Lat.), n. f. $Ti^{2f}(tu^{2f})/o(o^2) \cdot nu^{2m}(pnu^{2m}) \cdot mon(mo^{2n})/i^2 \cdot a^2$. For deriv., see **TYPHUS** and **PNEUMONIA**. Pneumonia occurring in the course of typhoid or typhus fever.

TYPHOSE (Fr.), n. $Te \cdot fo \cdot z$. See **TYPHOID state**.—**T. syphilitique** [Fournier]. A typhoid state accompanied by continued fever, seen in the secondary period of syphilis. [a. 18.]

TYPHOSEPSIS (Lat.), n. f. *Tif*(tu⁶r)-o⁶s⁶se⁶ps⁶(saps)⁶i⁶s. Gen., -seps⁶eos⁶ (-is). From *typhos*, fever-stupor, and *σῆψις*, decay. Of L. Buzzoni, the systemic poisoning occurring in and caused by typhoid fever. [L, 50 (a, 34).]

TYPHOSUS (Lat.), adj. *Tif*(tu⁶r)-o⁶s⁶u⁶s(u⁶s). From *typhos*, fever-stupor. Typhous, typhoid. [A, 17.]

TYPHOTOXINE, n. *Tif*-o-tox⁶en. From *typhus* (q. v.), and *toxicum*, poison. A poisonous base, C₇H₇NO₂, isomeric with gadinine, found in cultures of the *Bacillus typhosus*. [Brieger, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cxv, p. 483 (B).]

TYPHOUS, adj. *Tif*u⁶s. From *typhus* (q. v.). Fr., *typhique*. Ger., *typhös*, *typhisch*. Of the nature of, pertaining to, or resembling typhus. [D.]

TYPHUS (Lat.), n. m. *Tif*(tu⁶r)u⁶s(u⁶s). From *typhos*, fever-stupor. Fr., t. Ger., T. See **TYFEVER**.—**Abdominal** t. See **TYPHOID FEVER**.—**Abortive** t. An incomplete form of t. with a sudden and favorable stop in the evolution of the disease. [L, 87 (a, 50).]—**Abortive t. with icterus**. See *Weil's disease*.—**Catarrhal** t. Irish fever; the peculiar type of t. fever prevalent in Ireland; it is characterized by thoracic complications. [D, 72.]—**Cerebral** t. (Ger.). See **TYPHOID FEVER**.—**Cerebro-spinal** t. See **Cerebro-spinal meningitis**.—**Congestive** t. A form of t. in which the seat of the pathological process was supposed to be in the veins. [B, 226.] Cf. *Inflammatory t.*—**Exanthematischer** t. (Ger.). *Fleckt* (Ger.). See **TYFEVER**.—**Ganglionic** t. See **TYPHOID FEVER**.—**Hungry** t. See **TYFEVER** and **Relapsing fever**.—**Indian** t. See **ASIATIC CHOLERA**.—**Inflammatory** t. A form of t. in which the seat of the pathological process was supposed to be in the arteries. [B, 226.] Cf. *Congestive t.*—**Irish** t. See **Catarrhal t.—**Knochen** t. See **OSTEOMYELITIS**.—*Krieges* t. (Ger.). See **TYFEVER**.—**Maculated** t. t. gravior accompanied with a macular eruption. [D.]—**Oriental** t. See **PLAGUE**.—**Pernicious** t. See **T. gravior**.—**Petechial** t. True t. fever. [D, 74.]—**Puerperal** t., **Puerpero**-t. Fr., *t. des femmes en couches*. 1. Puerperal fever. 2. The gangrenous and diphtheritic forms of puerperal fever. [A, 9, 15.]—**Sinking** t. Of T. Miner, the t. epidemic that occurred in New England in 1823, characterized by great depression. [a, 34.]—**Spotted** t. See *Maculated t.*—**T. abdominalis**. See **TYPHOID FEVER**.—**T. egyptiacus**. Probably typhoid fever occurring epidemically among the Egyptians. [a, 34.]—**T. amaril** (Fr.). **T. amaryl** (Fr.). See **YELLOW FEVER**.—**T. ambulatus**. Mild typhoid fever that allows the patient to pursue his usual avocations during the greater part of the disease. [a, 34.]—**T. aphthoides**. See *APHTHA infantum*.—**T. apoplectico-tétanique** (Fr.). See **Cerebro-spinal meningitis**.—**T. à rechutes** (Fr.). See **Relapsing fever**.—**T. bengalensis**. See *ASIATIC CHOLERA***.—**T. biliosus**. See *Bilious typhoid fever* and *YELLOW FEVER*.—**T. carbunculosus**. See *ANTHRACOTYPHUS*.—**T. carcerum**. See *Jail fever*.—**T. castrensis**. See *CAMP FEVER* and *T. fever*.—**T. cérébral** convulsif (Fr.). See *Electric chorea*.—**T. cerebri** apoplecticus, **T. cérébro-spinal** [Boudin] (Fr.). See **Cerebro-spinal meningitis**.—**T. charbonneux** (Fr.). See *Contagious anthrax*.—**T. cholériforme** (Fr.). See **TYPHOID FEVER**.—**T. comatosus**. T. with profound coma. [a, 34.]—**T. convulsif épidémique** (Fr.). See *Cerebro-spinal meningitis*.—**T. d'Afrique** (Fr.). See *PLAGUE*.—**T. d'Amérique** (Fr.). See *YELLOW FEVER*.—**T. d'écurie** (Fr.). See *T. equis*.—**T. de la faim** (Fr.). See *T. fever* and *Relapsing fever*.—**T. de pore** (Fr.). A term applied to contagious anthrax, also to measles in the pig. [A, 301 (a, 34).]—**T. des Antilles**. See *YELLOW FEVER*.—**T. des femmes enceintes** (Fr.). A generic term for t. and typhoid fever occurring during pregnancy. [A, 24.]—**T. des membres** (Fr.). See *Infectious osteomyelitis*.—**T. des tropiques** (Fr.). See *YELLOW FEVER*.—**T. equis**. Fr., *t. d'écurie*. Of Malignant influenza in the horse. [a, 34.]—**T. erysipé** (Ger.). Erysipelas observed during a typhus epidemic. [L, 57 (a, 50).]—**T. exanthematicus**. See *Exanthematic t. fever* and *T. fever*.—**T. exhaustorum**. T. affecting soldiers, sailors, prisoners, and others that have been subjected to privations, exposure, and exhaustion. [a, 34.]—**T. gangliaris**. See **TYPHOID FEVER**.—**T. gift** (Ger.). The poison of t. fever or of typhoid fever. [D, 18.]—**T. gravior**. T. fever of severe or malignant type.—**T. hépatique** (Fr.). Of Landouzy, infectious jaundice with wasting of the liver cells. [a, 34.]—**T. hysterico-venosus** (Sauvages). See **TYPHOID FEVER**.—**T. icterodes**. See *Bilious typhoid fever* and *YELLOW FEVER*.—**T. irritabilis**. See **TYPHOID FEVER.—**T. jaune** (Fr.). See *YELLOW FEVER*.—**T. levis**. Fr., *t. léger*. A form of typhoid fever in which the symptoms are regular, but very mild and of short duration.—**T. levisimus**. A**

febrile condition which presents more or fewer of the symptoms of typhus fever, but with great indistinctness. [Eloy, "Un. méd.," May 24, 1884, p. 913 (D).]—**T. malaricus** (Fr.). See **TYPHO-MALARIAL FEVER**.—**T. manipuera**. Of Sauvages, a disease resembling t., produced by taking the juice of the manihot. [a, 34.]—**T. mitior**. See **TYPHOID FEVER** and **T. levis**.—**T. nervosus**. See **TYPHOID FEVER**.—**T. nosocomialis**. See **T. fever**.—**T. odor**. The peculiar odor exhaled from the skin in t. fever. It is variously compared to the odor of rotten straw, mice, deer, certain reptiles, etc. It is strongest in damp weather and when the ventilation of the patient's room is bad. It is thought that the exhalation carries the poison of the fever. [D, 1.]—**T. petechialis gravior** [Cullen]. T. in which rigor and heat alternate without perspiration, and delirium is succeeded by stupor. [a, 34.]—**T. petechialis mitior** [Cullen]. T. with coma or quiet delirium, nausea, precordial oppression, and despondency. [a, 34.]—**T. pestilens**. See **T. fever**.—**T. putridus** [Cullen]. Severe t. fever. [a, 34.]—**T. recurrens**. See *Relapsing fever*.—**T. scarlatina**. See *Scarlet fever*.—**T. secundarius**. T. consequent upon some primary disease. [a, 34.]—**T. schorff** (Ger.). A crust-like slough shed from the intestinal glands in typhoid fever.—**T. sidérant** (Fr.). See *T. gravior*.—**T. syncopal**. See *Sinking t.*—**T. urinosus**. See *UREMIA*.—**T. vénérien** (Fr.). See *EQUINE SYPHILIS*.—**T. versatilis**. T. associated with great delirium. [a, 34.]—**T. vesicularis** [Cullen]. See *PEMPHIGUS*.—**Yellow** t. See *Pernicious yellow fever*.

TYPICAL, adj. *Ti*p⁶p⁶i⁶kl⁶ Gr., τυπικός. Lat., *typicus*. Fr., *typique*. Ger., *typisch*. Pertaining to or representing a type. [a, 35.]

TYPOSIS (Lat.), n. f. *Ti*p⁶(tu⁶p)-o⁶s⁶i⁶s. Gen., -o⁶s⁶eos⁶ (-o⁶s⁶i⁶s). Gr., τύπος (from τύω, an impression). Ger., *Typose*. A periodically recurring disease; intermittent fever. [G.]

TYPUS (Lat.), n. m. *Ti*p⁶(tu⁶p)u⁶s(u⁶s). Gr., τύπος (from τύω, to beat). See **TYPE**.—**T. intermittens anteponeus**. See *Anticipating intermittent fever*.—**T. intermittens postponens**. See *Postponing intermittent fever*.

TYRALINE, n. *Ti*r⁶a⁶l⁶en. See *MAUVE* and *MAUVEINE*.

TYRENE, n. *Ti*r⁶e⁶i⁶pn. Fr., *tyréine*, *tyrine*. See *CASEIN*.

TYREMESIS (Lat.), n. f. *Ti*r⁶(tu⁶r)-e⁶m⁶e⁶s⁶i⁶s. Gen., -e⁶s⁶eos⁶ (-e⁶m⁶esis). From *τύπος*, cheese, and *έμεσις*, vomiting. Vomiting of cheesy or curdy matter. [L, 30, 50 (a, 14).]

TYRIASIS (Lat.), n. f. *Ti*r⁶(tu⁶r)-i⁶(i⁶2⁶a⁶s⁶(a⁶s⁶i⁶s). Gen., -a⁶s⁶eos⁶ (-i⁶asis). See *ALOPECIA* and *ELFANTIASIS*.

TYRODES (Lat.), adj. *Ti*r⁶(tu⁶r)-o⁶d⁶e⁶(as). Gr., τυρώδης (from *τύπος*, cheese, and *έδος*, resemblance). Fr., *tyreux*. Cheesy.

TYROLEUCIN, n. *Ti*r-o⁶l⁶u⁶s⁶i⁶2⁶n. Fr., *tyroleucine*. A starchy compound, C₁₄H₂₂N₂O₄, obtained from the decomposition products of albumin. [B, 93 (a, 14).]

TYROMA (Lat.), n. n. *Ti*r⁶(tu⁶r)-o⁶m⁶a⁶s. Gen., -o⁶m⁶a⁶tos (-a⁶tis). Gr., τυρώμα (from *τύπος*, cheese). A tumor caused by caseation of the lymphatic glands. [A, 326 (a, 48).]

TYROSIN, **TYROSINE**, n's. *Ti*r-o⁶s⁶i⁶2⁶n, -en. Oxophenylamidopropionic acid, C₉H₁₁NO₃ = C₆H₅· $\frac{OH}{C}$ ·(NH₂)CO₂H, occurring as colorless, tasteless, and odorless acicular crystals. It dissolves in acids and solutions of the caustic alkalis, forming saline compounds with both. It is found uniformly among the products of proteid decomposition, and is thus produced in the intestines by the processes of pancreatic digestion. It is also said to occur normally in the spleen, pancreas, etc., but this is doubtful. Pathologically, it occurs in the urine, especially in acute yellow atrophy of the liver, and it has also been found in various parts of the body. [B, 12; B, 3, 270 (a, 38).]—**T. hydanotic acid**. A substance, C₆H₄· $\frac{OH}{C}$ ·H₂·NH₂·COONH₂·COOH = C₁₀N₂H₁₂O₄, forming large, transparent prismatic crystals, and bearing the same chemical relation to t. that hydanotic acid bears to glycocine. [Jaffe, "Ztschr. f. physiol. Chem.," vii, p. 306 (B).]—**T. hydanotin**. A substance, C₁₀H₁₀N₂O₄, forming yellow acicular crystals, found in the urine of dogs fed upon t. [Blendermann, "Ztschr. f. physiol. Chem.," v, 234; Jaffe, "Ztschr. f. physiol. Chem.," vii, p. 306 (B).]

TYROSIN (Lat.), n. f. *Ti*r⁶(tu⁶r)-o⁶s⁶i⁶s. Gen., -o⁶s⁶eos⁶ (-o⁶s⁶i⁶s). From *τύπος*, cheese. 1. Curdling. 2. See **TYREMESIS**. 3. See *CASEATION*.

TYROTOXICON, n. *Ti*r-o⁶to⁶x⁶i⁶2⁶-kon. From *τύπος*, cheese, and *τοξικόν*, poison. Ger., *Käsegift*. A poisonous substance, C₆H₅N₂, found by V. C. Vaughan, in 1886, in poisonous cheese and in poisonous vanilla ice-cream. [B, a, 35.]

U

UATERIUM (Lat.), n. n. U⁶(u)-a⁶t⁶(a⁶t)-e⁶(a)⁶ri⁶2⁶u⁶m(u⁶m). From *o⁶r*, the ear. Fr., *uatiéron*. A medicament for the ear. [L, 50 (a, 14).]

UDDER, n. U⁶d⁶u⁶r. Gr., *ὀσθα*. Lat., *uber*. Fr., *pis*. Ger., *Euter*. The consolidated mammary of the cow.

UDENIA (Lat.), n. f. U⁶2⁶(ud)-e⁶n⁶i⁶(e)⁶a⁶s. Gr., *οὐδένεα* (from *οὐδέν*, nothing). Worthlessness.

UDIKA, **UDIKA-BREAD**, n's. See *DIKA*.

UDOSADENITIS (Lat.), n. f. U⁶d⁶(ud)-o⁶s⁶a⁶2⁶d⁶(a⁶s⁶i⁶)-e⁶n⁶i⁶(e)⁶(ti⁶2⁶s. Gen., -i⁶idos (-idis). Fr., *udosadénite*. See *HIDROSADENITIS*.

UEBEL (Ger.), adj. and n. U⁶b⁶e⁶l. An evil, a malady, a complaint. [A, 521 (a, 21).]—*Königsu*. See *SCROFULA*.—*U'keit*. See *NAUSEA*.—*U'riechend*. See *FETID*.

UEBERBÄRTIGKEIT (Ger.), n. U⁶b⁶e⁶r-bart⁶i⁶2⁶g-kit. See *POGONIASIS*.

UEBERBEIN (Ger.), n. U⁶b⁶e⁶r-bin. See *GANGLION* (1st def.) and *EXOSTOSIS* (1st def.).

UEBERBINDEN (Ger.), v. tr. U⁶b⁶e⁶r-bi⁶2⁶nd-e⁶n. To bandage. [E.]

UEBERCHLORSÄURE (Ger.), n. U⁶b⁶e⁶r-klor-zöir-e⁶s. See *PERCHLORIC acid*.

UEBERDECKT (Ger.), adj. U⁶b⁶e⁶r-de⁶kt. See *OBTECTED*.

UEBERDEREHUNG (Ger.), n. U⁶b⁶e⁶r-dra⁶u⁶n⁶. An excessive turning or rotation.—**U. der Frucht**. Excessive rotation of the fetus in a breech delivery, after the expulsion of the breech, so that the back no longer occupies the oblique position it had before,

but is turned directly forward or backward or even somewhat into the opposite oblique diameter of the pelvis. [A, 61.]—U. der Schultern. See MOVEMENT OF RESTITUTION.

UEBEREINANDERGESETZT (Ger.), adj. U^be^r-in-ande^r-ge²-ste²lt. See SUPERIMPOSED.

UEBEREINANDERTRETEN (Ger.), n. U^be^r-in-ande^r-trat-e²n. See OVERRIDING.

UEBEREINSTIMMUNG (Ger.), n. U^be^r-e^r-in²sti²m-mun². See ANALOGY AND CONSISTENCE.

UEBEREMPFA²NGNISS (Ger.), n. U^be^r-e^r-mp-fan²-ni²s. See SUPERFETATION.

UEBERERNÄHRUNG (Ger.), n. U^be^r-e^r-nar-un². See UBERNÄHRUNG.

UEBERFRUCHTUNG (Ger.), n. U^be^r-e^r-frucht²-un². See SUPERFETATION AND HYPERCARPUS.

UEBERFÜLLUNG (Ger.), n. U^be^r-fu²ll-un². See EPILEPSIS AND HYPERPLESIS.—Partielle U. See MEREMPHRAXIS.

UEBERGANG (Ger.), n. U^be^r-ga²ng. A passing over (as from the maternal into the foetal circulation).—U²srücken. See ANNECTANT CONVOLUTIONS.—U²sfalte. A fold of an investing membrane where it passes from one structure to another; a fold of reflection (e. g., the fold formed by the peritoneum as it passes from the posterior vault of the vagina to the anterior wall of the rectum).

UEBERGLIEDERUNG (Ger.), n. U^be^r-g²lied-e²r-u²n. See HYPERARTHROSIS.

UEBERGREIFEN (Ger.), n. U^be^r-gr²if-e²n. See SUPERPOSITION.

UEBERHÄUTUNG (Ger.), n. U^be^r-h²u²t-un². See DERMATOPLASIA.

UEBERHÖRUNG (Ger.), n. U^be^r-h²u²r-un². See KERATOPLASIA.

UEBERIMPfung (Ger.), n. U^be^r-i²mpf-un². See INOCULATION.

UEBERKLEIDEND (Ger.), adj. U^be^r-kl²id-e²nd. See ENVELOPING.

UEBERLADUNG (Ger.), n. U^be^r-la²d-un². Surfeit, repletion. [A, 521 (a, 48).]

UEBERLASTET (Ger.), adj. U^be^r-la²st-e²t. Of a muscle, having a weight attached to it in such a manner as to extend it only to the degree natural during rest. [K, 3.]

UEBERLASTUNG (Ger.), n. U^be^r-la²st-un². The state of a muscle having such a weight attached to it that it is prevented from contracting with its usual rapidity and energy. [K, 16.]

UEBERLEITUNG (Ger.), n. U^be^r-le²it-un². See TRANSMISSION.

UEBERLINGEN (Ger.), n. U^be^r-li²ng-e²n. A bathing resort on Lake Constance, in Baden, where there is a gaseous and chalybeate spring. [L, 30, 49 (a, 14).]

UEBERMANGANSÄURE (Ger.), n. U^be^r-ma²ng-ga²ng-zö²r-e². See PERMANGANIC ACID.—U²-Anhydrid. See MANGANESE HEPTOZIDE.

UEBERNÄHRUNG (Ger.), n. U^be^r-nar-un². See FORCED ALIMENTATION (2d def.) AND HYPERTROPHY.

UEBERNÄHRUNG (Ger.), n. U^be^r-na²rb-un². See CICATRIZATION.

UEBEROSMIUMSÄURE (Ger.), n. U^be^r-os-me-un-zö²r-e². See OSMIUM TETRAZIDE.

UEBERPFLANZUNG (Ger.), n. U^be^r-pfla²nts-un². See TRANSPLANTATION.

UEBERPFROPFUNG (Ger.), n. U^be^r-p²pf-un². See SKIN-GRAFTING.

UEBERREIZ (Ger.), n. U^be^r-ri²ts. Excessive irritation or excitement. [A, 315 (a, 48).]

UEBERRÖTHE (Ger.), n. U^be^r-r²u²e². See ERYSIPELAS.

UEBERSCHLAG (Ger.), n. U^be^r-shla²g. A poultice or plaster. [A, 521 (a, 48).]

UEBERSCHMELZEND (Ger.), adj. U^be^r-shme²lts-e²nd. Of a liquid, cooled below the freezing point without solidifying. [B.]

UEBERSCHNAPPEN (Ger.), n. U^be^r-shna²p-pe²n. See PARAPHRONESIS.

UEBERSCHWÄNGERUNG (Ger.), n. U^be^r-shwe²ng-e²-un². See SUPERFETATION.

UEBERSICHTIGKEIT (Ger.), n. U^be^r-zi²cht²-i²g-ki²t. See HYPERMETROPIA.

UEBERSPANNUNG (Ger.), n. U^be^r-spa²ng-nun². See HYPERTONIA.

UEBERSTECHEN (Ger.), n. U^be^r-ste²ch²e²n. See INOCULATION.

UEBERSTRECKUNG (Ger.), n. U^be^r-stre²k-un². See DORSAL FLEXION.

UEBERTRAGBAR (Ger.), adj. U^be^r-tra²g-ba²r. Transferable, transmissible, contagious. [D.]

UEBERWANDERUNG (Ger.), n. U^be^r-va²nd-e²-un². See MIGRATION.

UEBERWEBT (Ger.), adj. U^be^r-vab²t. See OBTEXTUS.

UEBERWUCHERN (Ger.), v. Intr. U^be^r-vuch²e²-n. To become hypertrophied. [A, 521 (a, 21).]

UEBERZÄHLIG (Ger.), adj. U^be^r-za²l-i²g. Supernumerary.

UEBERZUG (Ger.), n. U^be^r-tsug. See INDUMENTUM.

UEBUNG (Ger.), n. U^be^r-un². See EXERCISE.

UEHKA (Ar.), n. Okra pods. [Schweinfurth (a, 35).]

UEPPIG (Ger.), adj. U^be^r-p²ig. See LUXURIANT.

UEFUN (Ar.), U^be^r-fun (Ar.), n. Opium. [a, 35.]

UKIAH VICHY SPRINGS, n. U²-ki²a. A place in Mendocino County, California, where there are gaseous alkaline and saline springs. [Anderson (a, 14).]

UL²MORRHAGIA (Lat.), n. f. U²l(ul)-e²m(a²-e²m)-o²-r-raj-(ra²g)²/i²a². From *ul²mor*, the gum, *ul²ma*, blood, and *py²rrho²sa*, to burst forth. Fr. *ulémorrhagie*. Ger. *Zahnfleischblutung*. Hemorrhage from the gums. [L, 50 (a, 14).]

ULAGANACTESIS (Lat.), n. f. U²l(ul)-ag(a²g)-a²n(a²n)-a²kt-(a²kt)-e(a²)/si²s. Ger. -e²s-eos (-e²sis). From *ul²mor*, the gum, and *ay²anakt²sis*, physical pain. Fr. *ulagane²ctese*. Tension and itching in the gums. [L, 50 (a, 14).]

ULATROPHIA (Lat.), n. f. U²l(ul)-a²t(a²t)-ro(ro²)/i²a². From *ul²mor*, the gum, a priv., and *tró²ph²eu*, to nourish. Atrophy of the gums. [a, 48.]

ULCER, n. U²ls²u²r. Gr. *ἔλκος*. Lat., *ulcus*. Fr., *ulcère*. Ger., *Geschwür*. A localized loss of substance following a destructive inflammation and ordinarily followed by the production of a cicatrix. The term is usually restricted to cases in which the loss of substance involves at least the entire thickness of the epidermis or of the epithelium of a mucous membrane. [G, 16.] Cf. SORE.—Aden u. Of J. Hardie, a cutaneous u. in which the base becomes incorporated with and adherent to the subjacent fascia, and there is a tendency to "indolence in cicatrization." [a, 34.]—Amputating u. An u. affecting a digit or a limb in which the cicatrix process destroys the tissue to the bone, virtually amputating the part. [a, 34.]—Arterial u. A cutaneous u. due to incompetency or disease of an artery. [a, 34.]—Atonic u. An u. having unhealthy granulations that cicatrize slowly. [a, 34.]—Autochthonous u. See CHANCER.—Cancerous u. An ulcerating cancer. [G.]—Carious u. A gangrenous u. [a, 34.]—Chancroidal u. See SIMPLE CHANCER.—Cochin u. A chronic u. occurring in Cochin-China. It usually results from a slight cutaneous lesion, and becomes phagedenic in consequence of heat, dirt, and privation. [A, 301 (a, 34).]—Cock's-comb u. Ger. *Hahnenkammgeschwür*. An u. with outgrowths resembling condylomata. [a, 34.]—Cold u. Of Paget, small inflammatory u.s occurring spontaneously on the extremities, especially at the ends of the fingers and toes. They resemble ulcerated chilblains, but are not due to exposure to cold. [E.]—Constitutional u. See SYPHILITIC CHANCER.—Contagious u. See SIMPLE CHANCER.—Contagious u. of Mozambique. See FRAMBESIA (2d def.).—Corrosive u. of Hippocrates. See GANGRENOUS STOMATITIS.—Crateriform u. A peculiar form of acute epithelial cancer of the face, of very rapid and extensive growth. It forms a bossy conoidal mass in the centre of which softening takes place and a cavity like a crater is developed. [Brit. Med. Jour., Feb. 23, 1889, p. 412 (a, 50).]—Creeping u. of the cornea. A serpinous circular u. [Pract., Mar., 1888, p. 226 (a, 34).]—Diphtheritic u. An u. that is covered with a false membrane. [a, 34.]—Egyptian u. An endemic u. observed in Egypt. [a, 34.]—Endemic u. A phagedenic u., usually affecting the lower limbs, observed in tropical countries. It is likely to follow any solution of continuity of the skin, and the seat of the lesion becomes inflamed, tumefied, and phagedenic. It is much more severe in debilitated subjects, and may end fatally. [a, 34.]—Fissured u. Of Whitehead, laceration of the cervix uteri. [a, 37.]—Fistulous u. Lat. *ulcus fistulosum*. An u. communicating with a fistula. [G.]—Follicular u. An u. due to inflammation of the lymph follicles of a mucous membrane. [D, 48.]—Fungiform u. See CANCER VERRUCOSUS.—Fungous u. An u. with fungous granulations. [a, 34.]—Gastric u. See PERFORATING u. of the stomach.—Gh²e-Han u. See COCHIN-CHINA u.—Gummatous u. An u. formed by the breaking down of a gumma. [a, 34.]—Gwallor u. An endemic u. observed at Gwallior. [a, 34.]—Hæmorrhagic u. An u. from which there is hæmorrhage. [a, 34.]—Indolent u. An u. observed in some dyscrasia or enfeebled condition of the system, that while not spreading, shows no disposition to heal. [a, 34.]—Inflamed u. An u. surrounded by an area of inflammation. [a, 34.]—Initial u. of syphilis. See CHANCER (2d def.).—Intractable u. See INDOLENT u.—Inveterate u. See INDOLENT u.—Irritable u. An u. that is painful. [a, 34.]—Jacobs's u. A rodent u. which begins as a small pimple on the skin of the near the inner canthus or over the lacrymal bone. It is shallow, with a well-defined indurated margin, and its progress is very slow. It may remain superficial, but it usually extends deeply. [F.]—Lupoid u. An u. that closely resembles lupus. [a, 34.]—Lupous u. See LUPUS.—Lymphatic u. An u. from which there is a lymphic exudate. [a, 34.]—Malignant u. See CANCER and HOSPITAL GANGRENE.—Malignant u. of the uterus. An old term for a form of cancer of the uterus characterized by softening and ulceration of the tissue. [a, 42.]—Marjolin's u. An u. probably cancerous, arising upon the site of an old cicatrix. [Pacif. Med. and Surg. Jour., viii, p. 209 (a, 34).]—Menstrual u. Any u. that gives evidence of sympathy, to a lesser or greater degree, with the menstrual function, especially one from which vicarious menstruation takes place. [a, 34.]—Mercurial u. An u. supposed to be caused by systemic enfeeblement due to mercurialism. [a, 34.]—Mozambique u. See ULCÈRE contagieux de Mozambique.—Neuralgic u. Painful u. See IRRITABLE u.—Peptic u. An u. of the stomach supposed to be produced by a highly acid gastric juice. [D, 25.]—Perforating u. An u. that perforates through the tissues of a part, as of the stomach, intestines, etc. [a, 34.]—Perforating u. of the foot. See MALUM PERFORANS PEDIS.—Perforating u. of the stomach.

Lat., gastrobrosis. An u. that perforates the gastric wall. [a. 34.]—**Persian u.** An u. endemic in Persia. [a. 34.]—**Phagedenic u.** An u. having the qualities of phagedæna. [E.]—**Phlegmonous u.** See *Inflamed u.*—**Plantar u.** See *MALUM perforans pedis.*—**Post-molar u.** An u. forming behind the last molar tooth, on one or both sides, frequently occurring in Bengal (especially in the rainy season) in persons having the malarial cachexia. [Ind. Med. Gaz., June, 1887, p. 130 (a. 50).]—**Putrid u.** 1. An u. accompanied with putrefaction or gangrene, especially chancre. [G.] 2. See *Hospital GANGRENE.*—**Rodent u.** A deeply ulcerating variety of epithelioma, differing from ordinary epithelioma chiefly in its very slow course and in its tendency to involve every tissue with which it comes in contact, including muscles and bones. It more commonly affects the upper portion of the face. [G.]—**Round u. of the stomach.** See *Perforating u. of the stomach.*—**Round u. of the uterus.** Of Clarke, a form of u. of the uterus, of rapid course, supposed by him to be epitheliomatous, and by others to be analogous to lupus or due to the action of an irritating secretion. [Zahn, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," Mar., 1884, p. 288.]—**Round u. of the vagina.** An u. of the vagina similar to the round u. of the stomach. [Zahn, l. c.]—**Sæmisch's u.** An infectious u. of the cornea. ["Un. méd. et sci. du Nord-Est," "Province méd.," Oct. 6, 1888, p. 577.]—**Scabious u.** See *PSORALECIS.*—**Scorbutic u.** An unhealthy, indolent u. occurring in scurvy. [a. 34.]—**Serofulous u.** An u. due to seroflu. [a. 34.]—**Seriginous u.** An u. which extends in a seriginous manner. Simple u. Any u. that is not dependent on systemic disease or poisoning, and that shows a tendency to heal. [a. 34.]—**Stercoral u.** An u. in the wall of the gut due to the presence of an accumulation of faeces following intestinal stenosis. [L. 57 (a. 50).]—**Sublingual u.** An ulceration about the frenum linguae observed during the course of whooping-cough, thought to be due to the part being forced against the lower incisor teeth during the paroxysms.—**Symptomatic u.** An u. indicative of a disease not limited to the ulcerated point. [E.]—**Syphilitic u.** 1. An u. due to syphilis. [G.] 2. See *SYPHILITIC CHANCERE.*—**Syriac u.** See *Malignant ANGINA.*—**Taschkent u.** An endemic u. observed at Taschkent. [a. 34.]—**Toenail u.** Of Martin, the u. caused by an ingrowing toenail. ["Toledo Med. and Surg. Jour.," iii, 1879 (a. 34).]—**Tubercular u.** An u. due to tubercular disease. [a. 34.]—**Turkestan u.** A form of ulceration observed in Russian soldiers while on the frontiers of Afghanistan, affecting the face, neck, abdomen and joints. In the first stage there appeared reddish spots, spreading, but limited by an induration and becoming rounded ulcerations with irregular edges. During the second period the ulcerations were augmented, tended to become confluent, and were accompanied by profuse suppuration, lymphangitis, and adenitis. The third period was that of cicatrization. ["Union méd.," Aug. 31, 1886, p. 371 (a. 50).]—**Varicose u.** An u. caused by varicose veins. [a. 34.]—**Veneræal u.** See *CHANCERE* (2d def.).—**Yemen u.** See *Cochin-China u.*

ULCERATE, v. intr. U³ls'u^r-at. Lat., *ulcerare*. Ger., *ulceren*. To undergo ulceration.

ULCERATED, adj. U³ls'u^r-at-e^d. Lat., *ulceratus*. Fr., *ulcéré*. Affected with ulceration.

ULCERATION, n. U³ls'u^r-a'shu'n. Gr., *ἔλκος*. Lat., *ulceratio*. Fr., *ulcération*. Ger., *Verschwörung*. The formation of an ulcer; of a part, the condition of being affected with an ulcer or with ulcers. [E.; a. 48.]—**Fissured u.** See *Fissured ULCER.*—**Follicular u.** Disease of the cervix uteri characterized by Nabothian follicles. [a. 37.]—**Hering's pharyngeal u.** An oblong ulcer of the hard palate and the pillars of the fauces, associated with a unilateral and isolated u. of the pharynx, covered by a grayish-white pellicle. It heals in ten or twelve days without leaving any trace. ["Rev. de laryng., d'otol., et de rhin.," Oct. 15, 1891, p. 625 (a. 50).]—**Malignant u.** U. due to cancer. [E.]—**Puerperal u.** U. of the genitals, consequent on puerperal traumatism, of a malignant character, usually accompanied by great oedema of the labia majora. [A. 24.]—**Syriac u.** See *Malignant ANGINA.*—**Tubercular u. of the larynx.** See *Tubercular LARYNGITIS.*

ULCERATIVE, adj. U³ls'u^r-at-iv. Lat., *ulcerans, ulcerosus, ulcerativus*. Fr., *ulcéraif, ulcéreux*. Ger., *geschwürig*. Pertaining to or characterized by ulceration.

ULCERE (Fr.), n. U³ls'e^r. See *ULCER.*—**U. annamite.** See *Cochin-China ULCER.*—**U. cancéreux.** See *LUPUS.*—**U. chancreux.** An ulcerating chancre. [G.]—**U. chancrolo-syphilitique.** See *Mixed CHANCER.*—**U. de Cochin-Chine.** See *Cochin-China ULCER.*—**U. contagieux de Mozambique.** A single, rarely double, ulcer secreting an abundant foetid, sero-sanious matter that is highly contagious. It presents some resemblance to pian. It occurs in Réunion Island. [A. 301 (a. 34).]—**U. de la baie.** An endemic ulcer observed in the Bay of Honduras. [A. 301 (a. 34).]—**U. de Penjde, U. d'Orient.** See *Aleppo BOIL.*—**U. de Saigon.** See *Cochin-China ULCER.*—**U. épidermique.** See *LUPUS.*—**U. malin.** A malignant phagedenic ulcer. [a. 34.]—**U. oeno-phagédénique.** Of Ricord, a simple chancre that becomes inflamed and gangrenous in consequence of the abuse of alcoholic liquors. [A. 301 (a. 34).]—**U. papillaire, U. papilliforme.** An ulcer with papillary granulations.—**U. perforant.** See *MALUM perforans pedis.*—**U. pianiforme.** See *U. contagieux de Mozambique.*—**U. pointillé.** One of the small corneal ulcerations observed in keratitis. [A. 301 (a. 34).]—**U. syriacque.** See *Malignant ANGINA.*

ULCÉROÏDE (Fr.), adj. U³l-sa-ro-ed. Having the appearance of an ulcer. [a. 48.]

ULCEROUS, adj. U³ls'u^r-u^s. Gr., *ἔλκος*. Lat., *ulcerosus*. Fr., *ulcéreux*. Ger., *ulcerös, geschwürigartig*. 1. Having the character of an ulcer. 2. Affected with ulcers. [E.]

ULCUS (Lat.), n. n. U³lks(u)k'u^s(u)s. Gen., *ulc'is*. See *ULCER.*—**U. abumbulans.** See *Phagedenic ULCER.*—**U. achilleum.** Ger., *achilleisches Geschwür*. A malignant, obstinate ulcer. [A.

805.]—**U. adenosum.** An ulcer involving a gland. [a. 34.]—**Ulcera aluminosa.** Of Paracelsus, ulcers preceded by swelling without heat and erosion, and readily undergoing resolution, but afterward discharging a foetid fluid. Alum was said to cure them, but sometimes accidentally to produce them. [H.]—**U. ambulativum.** A seriginous ulcer, especially a seriginous chancre. [G.]—**U. aperistation.** A simple u. [a. 34.]—**U. aphthosum.** An ulcer caused by aphthous inflammation. [a. 34.]—**U. araneum.** Of Paracelsus, a gangrenous ulcer. [D. 90.]—**Ulcera arsenicalia.** See *Ulcera realgarina.*—**U. arthriticum.** A cutaneous ulcer caused by the irritation of an arthritic concrement. [a. 34.]—**U. artificiale.** An issue. [a. 34.]—**U. cacoethes.** A malignant u. [G.]—**U. callosum.** See *Indurated ULCER.*—**U. cancrum.** See *CHANCER* (2d def.).—**U. cancrum fungosum.** See *CANCER verrucosum.*—**U. cancrum vulgare.** The common form of ulcerating chancre. [G.]—**Ulcera capitis manantia.** An old term for impetiginous eczema of the scalp. [G.]—**U. carcinomatousum.** A cancerous ulcer. [a. 34.]—**U. catarrhale.** An ulcer of the mucous membrane caused by acute or chronic catarrh. [a. 34.]—**U. chronicum cruris.** A chronic ulcer of the leg, usually varicose. [a. 34.]—**U. clysmaticum.** A roundish u. caused by the pressure of the point of a syringe used for rectal injections. [L. 57 (a. 50).]—**U. colpodæ.** See *U. sinusum.*—**U. complicatum.** An ulcer complicated by some disease or dyscrasia. [a. 34.]—**U. condylomatousum.** See *Cock's comb ULCER.*—**U. corneæ serpens.** 1. An u. beginning as such in the cornea and extending deeply into the corneal tissue. It is further characterized by a tendency to spread superficially in a certain definite direction. It usually appears in the centre of the cornea as a circular u. surrounded by a zone of gray infiltration, and its progress is rapid in the direction of slough and perforation. [F.] 2. See *HYPOPYON KERATITIS.*—**U. corrodens Clarkii.** A phagedenic ulcer of the vagina. [A. 328 (a. 34).]—**U. corrosivum.** See *Perforating ULCER of the stomach.*—**U. cum callositate** (see *duritie, seu duritie callosa*). See *Indurated CHANCER.*—**U. depascens.** See *Phagedenic ULCER.*—**U. diphthericum.** An ulcer caused by diphtheria. [a. 34.]—**U. durum.** See *Syphilitic CHANCER.*—**U. dysentericum.** An intestinal ulcer caused by dysentery. [a. 34.]—**U. eczematousum.** An ulcer caused by eczema. [a. 34.]—**U. elevatum.** 1. Simple chancre when attended with exuberant granulations that rise above the surrounding surface. [G.] 2. See *Raised Indurated CHANCER.*—**U. erythema.** See *Irritable ULCER.*—**U. ex digestionē.** See *Peptic ULCER.*—**U. ferinum.** See *Phagedenic ULCER.*—**U. fistulosum.** See *Fistulous ULCER.*—**U. granulosum.** An ulcer covered with a granular surface.—**U. grave.** See *Madura FOOT.*—**U. hæmorrhoidale.** See *Hæmorrhæcoma.*—**U. herpeticum.** See *LUPUS* (2d def.).—**U. hyperthemicum.** See *Irritable ULCER.*—**U. hypertrophicum.** See *U. elevatum.*—**U. impetiginosum.** An ulcer accompanied by impetigo. [a. 34.]—**U. induratum.** See *Indurated CHANCER.*—**U. infundibulum.** See *Simple CHANCER.*—**U. lentilare.** A lenticular ulcer, usually of tubercular origin. [a. 34.]—**U. leprosum.** Ulceration due to leprosy. [a. 34.]—**U. molle.** See *Simple CHANCER.*—**U. narium fetens.** See *OZENA.*—**U. neuroparalyticum.** An ulcer caused by paralysis of a nerve. [a. 34.]—**Ulcera nitri** (Paracelsus). Scrofulous ulcerations. [H.]—**U. perforans.** See *Perforating u. of the stomach.*—**U. profundum.** See *Sloughing PHAGEDENA.*—**U. puerperale.** An ulcer of the genital tract occurring during the puerperium. [a. 34.]—**U. pulmonum.** Ger., *Lungengeschwür*. A pulmonary abscess. [a. 34.]—**Ulcera realgarina.** Of Paracelsus, malignant ulcers, supposed to be due to the action of realgar.—**U. rodens.** See *Rodent ULCER.*—**U. rodens urethræ.** Of Landau, an ulcer of the urethra in women, probably of syphilitic origin, attacking, step by step, the walls of the urethra and spreading from the meatus, where it takes its origin. [a. 34.]—**U. rotundum.** A round ulcer, usually of the stomach. [a. 34.]—**Ulcera scabiosa.** Of Paracelsus, ulcers attributed to the corruption of the common salt in the body. They are at first moist, then dry up, are rather painful, but have no heat. [H.]—**U. serpens.** See *Seriginous ULCER.*—**U. simplex (venereum).** See *Simple CHANCER.*—**U. sinusum.** Ulceration of a sinusous or tortuous character; lupus seriginosus. [G.]—**U. sordidum.** A foul ulcer, especially a chancre. [G.]—**U. spachelousum.** A gangrenous ulcer. [a. 34.]—**U. spongiosum.** See *Pungous ULCER.*—**U. syphiliticum.** See *Syphilitic ULCER.*—**U. syphiliticum conjunctivæ.** Either a chancre or the ulcerated surface of a broken-down gumma or tubercular syphilide. In either case the u. usually occurs on the palpebral conjunctiva near the edge of the lid, though it may extend to the cul-de-sac and involve the ocular conjunctiva. [F.]—**U. syringodes.** See *Fistulous ULCER.*—**U. telephium.** See *TELEPHIUM* (1st def.).—**U. tuberculosum.** See *Tubercular ULCER.*—**U. typhosum.** One of the intestinal ulcers characteristic of typhoid fever.—**Ulcera urinosa** (see *urodialytica*). Ulcers attributed to suppressed or irregular urinary excretion. [G.] (Of Ulcuscosæ—*Ulcera variolosa.* Small flea ulcers seen in variolous esophagitis. [L. 57 (a. 50).]—**U. venereum.** See *CHANCER* (2d def.).—**U. ventriculi chronicum.** A chronic gastric ulcer. [a. 34.]—**U. ventriculi rotundum.** See *Perforating ULCER of the stomach.*—**U. virgæ.** See *CHANCER* (2d def.).

ULCUSCULUM (Lat.), n. n. U³lks(u)k-u^ssk(u)s'k(u)²(u)l-u^m(u)m. Dim. of *ulcus* (q. v.). A little ulcer. [G.]—**U. cancrum.** See *CHANCER* (2d def.).

ULE (Lat.), n. f. U³l(u)l'e(a). Gen., *ul'es*. Gr., *ὤλη*. See *CICATRIX*.

ULERYTHEMA (Lat.), n. n. U³l(u)l'e-r'i²(u)²-the(tha)'ma^s. Gen., *-em'atos (-atis)*. From *ὤλη*, a scar, and *ἐρύθημα*, erythema. Of Unna, an inflammatory condition of the skin in which persistent erythema tends to produce atrophy or cicatrization of the skin without ulceration. [G.]—**U. acneiformis.** Of Unna, a rare skin disease that affects the face and the ears. It is limited to the circumference of a certain number of hair follicles and begins with a permanent erythema and hyperkeratosis accompanied by the

production of comedones and terminating in atrophy of the skin. [a, 34].—*U. centrifugum*. Of Unna. See *Lupus erythematosus*.—*U. ophryogenes*. Of Tschernak, an inflammatory disease, usually beginning in infancy, affecting especially the region of the eyebrows, and attended with persistent erythema, permanent alopecia, and atrophy of the skin. It is said to be a form of folliculitis decalvans. [G.]—*U. sycoisiforme* [Unna]. Lupoid sycois of Milton, usually affecting the region of the beard, resembling sycois but attended with the formation of scars. It begins at the upper part of the whiskers, traveling slowly downward with a narrow erythematous margin and marked infiltration, and is followed by cicatricial atrophy and destruction of the hair follicles. [G.] Cf. *FOLLICULITIS decalvans*.

ULETIC, adj. *U*³-e²/i²k. Lat., *uleticus*. Pertaining to the gums. [L, 50 (a, 14).]

ULEX (Lat.), n. m. *U*²(ul)¹e²x. Gen., *ulicis*. Fr., *ajonc*. Ger., *Heckame*. Furze; a genus of leguminous shrubs. The *Ulitaceae* are a division of the *Genistaceae*. [a, 35].—*U. compositus*, *U. europaeus*, *U. grandiflorus*. Fr., *ajonc (marin)*, *ajonc, bruse*, *génépin épineux*, *lande (épineuse)*, *landier*, *sainfoin d'Espagne (ou d'hiver)*, *vigneau*. Common (or French) furze, gorse, thorn-broom, whin; a fodder plant of middle and southern Europe, the Azores, and the Canaries. The seeds contain ulexine. [a, 35].—*U. minor*, *U. nanus*, *U. parviflorus*. Fr., *ajonc nain*, *petit landin*. Dwarf-furze, cat-whin; a forage species. [a, 35].—*U. provincialis*. Fr., *arille de Provence*. Provence furze. It probably has the properties of *U. europaeus*. [a, 35.]

ULEXINE, n. *U*³-e²x'en. An alkaloid, C₁₇H₁₇N₃O, obtained from the seeds of *Ulex europaeus*; bitter, colorless crystals. It acts as a stimulant and then a depressor of respiration, and in large doses causes increased excitability of the peripheral nerves, with quivering movements or convulsions, followed by sleepiness and paralysis. It increases the blood-pressure and acts as a diuretic. [B, 270 (a, 38); "Am. Jour. of Pharm.," Sept., 1890, p. 454.]

ULIGINOSUS (Lat.), adj. *U*²(ul)¹i²k-u²s(u²a). See *ULETIC*.

ULIGINOSUS, adj. *U*²-i²j²/i²n-os. Lat., *uliginosus*, *uliginarius* (from *uligo*, moisture). Fr., *uliginair*, *uliginux*. 1. Marshy. 2. Growing or living in marshy places. [a, 35.]

ULITIS (Lat.), n. f. *U*²(ul)¹-i²e²/i²2s. From *ὤλον*, the gum. Fr., *ulite*. Inflammation of the gums. [E.]—*Aphthous u.* U. associated with aphthae. [a, 34].—*Fungous u.* U. in which the gums present a fungous appearance, as in scurvy. [a, 34].—*Mercurial u.* U. caused by mercurialism. [a, 34].—*Paronychiatus u.* Inflammation of the paronychia of the gums. [a, 34].—*Scorbutic u.* U. caused by scurvy. [a, 34].—*Ulcerative u.* U. with ulceration. [a, 34.]

ULEM, n. A species of pyrosis endemic in Lapland, attributed to the use of reindeer milk and smoked meat. [L, 41 (a, 14).]

ULERSDORF (Ger.), n. *U*¹le²r-sd²rf. A place in Moravia, Austria, where there are alkaline, saline, and sulphurous springs. [L, 30, 49 (a, 14).]

ULMACEOUS, adj. *U*²-l²-ma²shu²s. Resembling the genus *Ulmus* or belonging to the *Ulmaceae*, a family of apetalous dicotyledons included by Bentham and Hooker in the *Urticaceae*. [a, 35.]

ULMAIRE (Fr.), n. *U*²-l²-ma²r. See *Flores spirææ*.

ULMAL, adj. *U*²-l²-m²l. Lat., *ulmalis*. Pertaining to the *Ulmales*, Lindley's u. alliance (*Ulmus ulmalis*) of the *Retenbryce*, including the *Ulmaceae*. [a, 35.]

ULMARIA (Lat.), n. f. *U*²(ul)¹-ma²-ri²a²/i²2s. The genus *Spiræa*; also an old official name for *Spiræa u.* The *Ulmariæ* are a section of the *Rosaceæ*; the *Ulmariæ* are a subtribe of the *Spiræaceæ*. [a, 35].—*Flores ulmarie*. Ger., *Geissbartblumen*. The flowers of *Spiræa u.* [a, 35.]

ULMARIC ACID, **ULMARINE**, n's. *U*²-l²-ma²-r²/i²2k, *u*²-l²-ma²-r'en. Fr., *acide ulmarique*. See *SALICYLIC aldehyde*.

ULMIC ACID, n. *U*²-l²-mi²k. Fr., *acide ulmique*. Ger., *Ulminsäure*. An acid found in brown peat, apparently identical with humic acid. Its existence does not seem fully established. [B, 2; B, 270 (a, 38).]

ULMIN, n. *U*²-l²-mi²n. See *HUMUS*.

ULMUS (Lat.), n. f. *U*²(ul)¹-m²s(mu²s). Fr., *orme* (1st def.). Ger., *Ulm* (1st def.), *Rüster* (2nd def.). 1. The elm; the typical genus of the *Ulmaceae*. [a, 35.] 2. Of the U. S. Ph., see *ELM-bark*.—*Decoctum ulmi* [Br. Ph.]. Fr., *decôte d'orme*. Ger., *Ulmensindendecot*. A preparation made by boiling 24 oz. of elm-bark with 1 pint of distilled water, straining, and washing the residue with water until it makes 1 part. [B, 4 (a, 38).]—*Extractum ulmi* [Fr. Cod.]. See *Extrait d'écorce d'orme*.—*Mucilago ulmi* [U. S. Ph.]. A preparation made by macerating 6 parts of elm-bark in 100 of boiling water. [B.]—*Ulm cortex (interior)*. See *ELM-bark*.—*U. alata*. Wahoo (elm) of the southern United States, winged (or American small-leaved) elm. The inner bark is used like that of *U. fulva*. [a, 35].—*U. americana*. American white elm. The inner bark is used like that of *U. fulva* and as a hemostatic. [a, 35].—*U. campestris*. Fr., *orme*, *hampêtre*, *ou blanc*, *ou des champs*, *ou pyramidal* [Fr. Cod.], *orneau*, *ormille*, *umeau*, *arbre à pauvre homme*. Ger., *Feldrüster*, *gemeine Ulme*, *Weissrüster*. Common European (or English) elm, probably the *Ulmus* of Dioscorides (the bark of which was used as an astringent), indigenous to southern Europe and temperate Asia. The bark (see *ELM-bark*) is mucilaginous and slightly astringent, and was formerly used as an astringent. [a, 35].—*U. effusa*. Fr., *orme pédoncé*. Ger., *winperfrüchtige Ulme* (oder *Rüster*), *schwarze Rüster*, *Lindblat*, *Traubenrüster*, *Bastulme*, *Flatterrüster*. Spreading-flowered elm of Europe. It has the properties of *U. campestris*. [a, 35].—*U. fulva*. Fr., *orme fauve* (ou *rouge*). Ger., *schleimige Ulme*. Slippery (or red, or mossy) elm; abundant west of the Alleghany Mountains. The leaves are thicker, larger, and rougher than those

of *U. americana*. The mucilaginous, demulcent inner bark is the u. of the U. S. Ph. It has the property of preserving fats from rancidity. [a, 35].—*U. integrifolia*, Indian elm. The wood, boiled in water, is used to flavor arrack. [a, 35].—*U. montana*. Witch (or wych-) elm (or hazel), mountain- (or Scotch) elm; a species growing wild in northern England and Norway. [a, 35].—*U. racemosa*. Rock (or white, or cork-) elm; found from New Hampshire to New York and westward. It is used internally as a hemostatic. [a, 35.]

ULNA (Lat.), n. f. *U*²(ul)¹/na²s. Gr., *ὀλένη, πῆχυς* [Galen]. Fr., *u.* Ger., *Ellenbogenknochen*. A long bone on the inner side of the forearm. It articulates above with the humerus by the greater sigmoid cavity, with the head of the radius by the lesser sigmoid cavity, and below with the radius by an articular eminence. [L.]

ULNAD, adv. *U*²-l²-na²d. Toward the ulnar aspect. [L, 141.]

ULNAR, adj. *U*²-l²-na²r. Lat., *ulnaris*. Fr., *ulnaire*. Pertaining to or connected with the ulna. [L, 143.]

ULNARIS (Lat.), adj. *U*²(ul)¹-na²r(na²r)²/i²s. Ulnar; as a n. m., a muscle connected with the ulna. [a, 48].—*U. anterior*. See *EPITROCHLEO-SUPERCARPUS*.—*U. externus*. See *EXTENSOR carpi u.*—*U. externus brevis*. An anomalous muscle arising from the lower fourth of the ulna and the intermuscular septa of the forearm, and inserted into the bases of the fourth and fifth metacarpal bones and the tendon of the ulnaris externus. [Gruber (L).]—*U. gracilis*. See *PALMARIS longus*.—*U. internus*. See *FLEXOR carpi ulnaris*.—*U. internus brevis*. See *FLEXOR carpi ulnaris brevis*.—*U. lühmung* (Ger.). Paralysis of the ulnar nerve. [a, 34].—*U. posterior*. See *EPICONDYLIO-SUPRACARPUS*.—*U. quinti*. An accessory bundle of the extensor carpi u. running to the little finger. [L, 332.]

ULOCACE (Lat.), n. f. *U*²(ul)¹-o²k-a²s(a²k)-e(a). Gen., -o²-aces. From *ὀλον*, the gum, and *κακός*, evil. See *ULCERATIVE ULTIS*.

ULOCARCINOMA (Lat.), n. n. *U*²(ul)¹-o²(ul)-o²-ka²r-si²n(ki²n)-om'a²s. Gen., -om'a²tos (-atis). For deriv. see *ULON* and *CARCINOMA*. Fr., *ulocarcinome*. Ger., *Zahnhöhlenkrebs*. Carcinoma of the gums. [L, 50 (a, 14).]

ULON (Lat.), n. n. *U*²(ul)¹-o²n. Gr., *ὀλον*. The gum. [a, 48.]

ULONCUS (Lat.), n. m. *U*²(ul)¹-o²n²-k²/u²s(u²s). From *ὀλον*, the gum, and *γκυος*, a tumor. Fr., *ulonc*. Ger., *Zahnfleischgeschwulst*. A tumor of the gum. THE ULNA. [a, 34.]

ULORRHAGIA (Lat.), **ULORRHEA** (Lat.), n's f. *U*²(ul)¹-o²-ra(r)a²g²/i²2s. From *ὀλον*, the gum, and *ῥήνυσθαι*, to burst forth, or *ρῆναι*, to flow. Fr., *ulorrhagie, ulorrhée*. Ger., *Zahnfleischblutung*. Hemorrhage from the gums. [L, 50 (a, 14).]

ULOSIS (Lat.), n. f. *U*²(ul)¹-o²/i²2s. Gen., -o²-e²os (-is). From *ὀλῆς*, a scar. Fr., *ulose*. See *CICATRIZATION*.

ULOTIC, adj. *U*²-o²t²/i²2k. From *ὀλῆς*, a scar. Cicatrissant, vulnery. [L, 50 (a, 14).]

ULOTRICHOUS, adj. *U*²-o²t²-ri²k-u²s. From *ὀλῆς*, curly, and *τρίχης*, hair. Having crisp or woolly hair. The *Ulotrichi* (Fr., *ulotriches*; Ger., *Kraushaarige*) are a group of races so characterized, including the negroes, Hottentots, etc. [L, 12, 41, 50.] Cf. *LEIOTRICHOS*.

ULTIMATE, adj. *U*²-l²-i²m-at. Lat., *ultimus* (superl. of *ulter*, that is beyond). The most remote or elementary as distinguished from the immediate. [B.] Cf. *PROXIMATE*.

ULTIMUM MORIENS (Lat.), n. n. *U*²(ul)¹-i²m(u²m)-o²-ri²m(u²m)-i²2s. Lift. That which dies last; the auricular appendix of the right auricle, which is the last to contract after the cessation of the heart-beat. [K.]

ULTRA-BRACHYCEPHALIC, adj. *U*²-l²-tra²-bra²k-i²-e²2f. a²/i²2k. From *ultra*, beyond *βραχυς*, short, and *κεφαλή*, the head. Having the cephalic index 90° or more. [L, 150 (a, 48).]

ULTRA-DOLICHOCEPHALIC, adj. *U*²-l²-tra²-do²-l²-i²-e²2f. a²/i²2k. From *ultra*, beyond, *δολιχός*, long, and *κεφαλή*, the head. Having the cephalic index 64° or less. [L, 150 (a, 48).]

ULTRAMARINE, n. *U*²-l²-tra²-ma²-r'en. From *ultra*, beyond, and *mare*, the sea. A blue pigment formerly obtained from lapis lazuli and now artificially prepared by roasting a mixture of fine white clay, sodium carbonate, sulphur, and charcoal or rosin. [B, 8 (a, 27).]—*Cobalt u.* See *THEODOR'S BLUE*.—*Yellow u.* See *BARIIUM chromate*.

ULTRAMICROSCOPIC, adj. *U*²-l²-tra²-mi²-k²-ro-sko²p²/i²2k. From *ultra*, beyond, and *microscopic* (q. v.). Too small to be seen with a microscope. [L.]

ULTRAQUININE, n. *U*²-l²-tra²-kwi²n'en. Homoquinine. [B.]

ULULATION, n. *U*²-l²-u²-l²-a-shu²n. Lat., *ululatio* (from *ululare*, to howl). A howling or loud crying observed in hysteria. [a, 34.]

ULVA (Lat.), n. f. *U*²(ul)¹-va²-u²a². Fr., *u.*, *ulve*. Ger., *Schlauchfaden*. A genus of the *Ulvaceæ* (Fr., *ulvaceæ*; Ger., *Ulvaceen*), which are a division of the *Algae*. The *Ulvæ* are a tribe of the *Ulvaceæ*. [a, 35].—*U. lactuca*. Fr., *u. laitue*, *laitue de mer*. Ger., *Meerlattig*. Oyster-green, sea-lettuce, sloke, the *Blepn* of Theophrastus, the *βλεπόν θαλασσίαν* of Dioscorides; an edible species, used as a refrigerant in inflammations, headache, etc., and on account of the iodine it contains, in scrofula. [a, 35.]

THE ULNA.

UMÄNDERUNG (Ger.), n. Um'and-e'r-un². See **MUTATION**.

UMBELL, n. U'mb'e'l. Lat., *umbella* (dim. of *umbra*, a shadow). Fr., *ombelle*. Ger., *Dolde*, *Schirm*. 1. An indeterminate inflorescence consisting of several pedicels of nearly equal length radiating from the same point, like the rays of an umbrella. 2. The *Cypripedium pubescens*. [a, 35.]—**Compound u.** An u. in which the rays (primary pedicels) are themselves terminated by u's. [a, 35.]—**Cymose u.** A trichotomous (or polychotomous) cyme. [a, 35.]—**General u.** An u. formed by the branching of the primary axis. [a, 35.] Cf. **UMBELLULAE**.—**Partial u.** See **UMBELLULAE**.—**Simple u.** An u. in which the pedicels are not terminated by secondary u's. [a, 35.]

UMBELLAL, adj. U'm'be'l-l. Lat., *umbellalis*. Pertaining to the *Umbellales*, which are: (1) Of Lindley, the u. alliance (Lat., *nizus umbellalis*) of the *Albuminosae*, consisting of the *Umbelliferae* and *Araliaceae*; (2) of Bentham and Hooker, a cohort of the *Calyciflorae* consisting of the *Umbelliferae*, *Araliaceae*, and *Cornaceae*. [a, 35.]

UMBELLATE, adj. U'm'be'l-at. Lat., *umbellatus*. Fr., *ombellé*. Ger., *doldig*. Forming or arranged in an umbel; bearing umbels. The *Umbellate* or *Umbellati* of Linnaeus are the *Umbelliferae*. [a, 35.]

UMBELLIC ACID, n. U'm'be'l-i'k. Fr., *acide ombellique*. Ger., *Umbellsäure*. 1. Of Persoz, anisic acid. 2. An acid, $C_6H_5O_4 = C_6[OH.H.OH.CH : CH.CO.OH.H.H.]$, occurring as a yellowish powder. [B, 3 (a, 38).]

UMBELLIFERON, n. U'm'be'l-i'f'e'r-o'n. An oily alkaline substance, $C_26H_4O_3 = C_2[OH.H.H.CH : CH.O.CO.H.]$, obtained from the ethereal extracts of certain umbelliferous plants. [B, 3, 270 (a, 38).] Cf. **HYDROXYCUMARIN**.

UMBELLIFEROUS, adj. U'm'be'l-i'f'e'r-o'u's. Lat., *umbellifer* (from *umbella*, an umbel, and *ferre*, to bear). Fr., *ombellifère*. Ger., *doldentragend*, *schirmtragend*. Bearing umbels. The *Umbelliferae* (Fr., *ombellifères*; Ger., *Doldengewächse*) are the umbellifers, an order of the *Umbellales* consisting of herbs, or more rarely shrubs or trees, with small flowers in umbels. The petals are usually imbricate in aestivation, the ovary is 2-celled, and the fruit (cremocarp) separates into 2 dry one-seeded carpels (mericarps), which are provided with raised longitudinal ribs and tubular receptacles (vitae) containing essential oil. It is from the arrangement of these ribs and vittae and from the shape of the inclosed albumen that the characters are derived distinguishing the numerous genera (*Aptum*, *Carum*, *Cicuta*, *Conium*, *Cherophyltum*, *Daucus*, *Ferula*, *Galbanum*, *Peucedanum*, *Sanicula*, *Seseli*, *Thapsia*, etc.). They often contain, besides essential oil and resinous matter, a bitter or astringent and tonic principle, and in some cases acid poisonous alkaloids. [a, 35.]

UMBELLIFEROUS, adj. U'm'be'l-i'f'e-r-o'u's. From *umbella*, an umbel, and *flos*, a flower. Fr., *ombellifère*. Ger., *doldenblüthig*. Having the flowers in umbels. The *Umbelliferae* are: Of Bartling, a class of the *Gymnobiasti* consisting of the *Umbelliferae*, *Araliaceae*, *Hederaceae*, and *Hamamelidaceae*; of Spach, a class of dicotyledons consisting of the *Hamamelidaceae*, *Cornaceae*, *Araliaceae*, and *Umbelliferae*. [a, 35.]

UMBELLIFORM, adj. U'm'be'l-i'f'o-r'm. Lat., *umbelliformis* (from *umbella*, an umbel, and *forma*, shape). Ger., *doldenformig*. In the shape of an umbel. [a, 35.]

UMBELLULARIA (Lat.), n. f. U'm'b(u'm'b)-e'l-lu'l(ä'l)-ä-(ä')-l-i-ä. From *umbellula*, a little umbel. A genus of the *Laurineae*. [a, 35.]—**U. californica**. Bay- (or sassafras) laurel of California and Oregon; an evergreen with a strong spicy odor. The leaves are used as a condiment and as an excitant to the circulation, and the pungent, volatile oil contained in them is recommended for inhalation in nasal catarrh and nervous headache. [a, 35.]

UMBELLULE, n. U'm'b'e'l-u'l. Fr., *ombellule*. Ger., *Döldchen*, *Schirmchen*. A partial umbel; an ultimate umbel in a compound umbel. [a, 35.]

UMBIEGUNGSKANTE (Ger.), n. Um-beg'u'ng-kä'nt-e. The margin of that portion of the cerebellum which forms a part of the roof of the fourth ventricle. [I, 17 (K).]

UMBILDUNG (Ger.), n. U'm'b'i'ld-un². See **TRANSFORMATION**, **METAPLASIA**, and **ANAMORPHOSIS**.

UMBILICAL, adj. U'm'b-i'l-i'k-l. Lat., *umbilicalis* (from *umbilicus*, the navel). Fr., *ombilical*. Ger., *nabelartig*. Pertaining to the umbilicus. [C.]

UMBILICATE, **UMBILICATED**, adj's. U'm'b-i'l-i'k-at-, -at-e'd. Lat., *umbilicatus* (from *umbilicus*, the navel). Fr., *ombilicé*. Ger., *genabelt*. Provided with an umbilicus or with a central depression. [a, 35.]

UMBILICATION, n. U'm'b-i'l-i'k-a'sh'n. From *umbilicatus*, navel-shaped. Fr., *ombilication*. A condition in which there is a central depression resembling the navel, as in variculous and vaccinal poeks. [a, 34.]

UMBILICUS (Lat.), n. m. U'm'b(u'm'b)-i'l-i'k(ek)'u's(u's). Fr., *ombilic*, *nombril* (1st def.), *cicatrice ombilicale* (1st def.). Ger., *Nabel*, *Körperrnabel* (1st def.). 1. The navel: the depression caused by the contraction of the remains of the umbilical cord. 2. Any depression in the centre of an organ. Cf. *HILUM* (1st def.). 3. A section of the genus *Cotyledon*. [a, 35.]—**Folia umbilici** (*Veneris*). The herb of *Cotyledon* s. u. [a, 35.]—**Posterior u.** A depression or sinus in the spinal region, due to defective closure of the two borders of the vertebral groove.—**U. Veneris**. The *Cotyledon* s. u. [a, 35.]

UMBO (Lat.), n. U'm'b(u'm'b)-o. Fr., *mamelon* (3d def.). Ger., *Stippe*, *Buckel* (3d def.). Lit., a boss (as of a shield). 1. In dermatology, see **STIGMA** (2d def.). 2. In botany, a protuberance with a

projecting point at its centre. [a, 35.] 3. See *U. tympani*.—**U. femoris**. See *Fossa capitis femoris*.—**U. (membranae) tympani**. The deepest part of the funnel-shaped curvature or concavity of the *membrana tympani* which is turned toward the external auditory canal. It corresponds with the inferior extremity of the handle of the malleus, by the traction of which inward the membrane appears hollowed out. [F, 32.]

UMBONATE, adj. U'm'b'on-at. Lat., *umbonatus* (from *umbo*, a boss). Ger., *gebuckelt*. Provided with an umbo. [a, 35.]

UMBONULATE, adj. U'm'b-on-u'l-at. From *umbo*, a boss. Ger., *kleinbuckeltig*. Provided with a small umbo or nipple. [a, 35.]

UMBRA-CULIFORM, adj. U'm'b-ra'k-ul-i'f'o-r'm. Lat., *umbraculiformis* (from *umbraculum*, a little shade, and *forma*, form). Like an umbrella in shape. [a, 35.]

UMBRASCOPY, n. U'm'b-ra'sk'op-i². From *umbra*, a shadow, and *σκοπεῖν*, to examine. Fr., *umbrascopie*. Ger., *Umbraskopie*. See **RETINOSCOPY** (2d def.).

UMBROSE, adj. U'm'b'ros. Lat., *umbrosus* (from *umbra*, shade). Fr., *ombreux*. Ger., *schattig*. 1. Shady. 2. Growing in shady places. [a, 35.]

UMDREHER (Ger.), n. Um'dra-e'r. See **ROTATOR**.

UMDREHUNG (Ger.), n. Um'dra-un². Rotation, torsion. [L, 30 (a, 14).]

UMGESTALTUNG (Ger.), n. Um'ge'stalt-un². See **METAMORPHOSIS**.—*Krankheitsu.* See **METASCHEMATISM**.

UMHÜLLUNG (Ger.), n. Um-hu'l'lun². An envelope or covering. [a, 14.]—**U'en des Eies**. The investing membranes of the ovum.—**U'shaut**. An investing membrane; in embryology, the vitelline membrane. [A, 317.]

UMKEHRUNG (Ger.), n. Um'kar-un². See **INVERSION**.

UMLAUF (Ger.), n. Um'la'uf. 1. See **CIRCULATION**. 2. See **PARONYCHIA** (1st def.).—**Feuriger U.** See **HERPES ZOSTER**.

UMLEGUNG (Ger.), n. Um'lag-un². See **ECTROPION**.

UMSATZ (Ger.), n. Um'za'ts. Exchange. [a, 48.]—**Stoffu.** Tissue-change. [K, 16.]

UMSCHLAG (Ger.), n. Um'shla'g. 1. An external application, such as a plaster, poultice, fomentation, or wet compress. [E; a, 48.] 2. See **PERIDIUM**.—**Stirnu.** 1. A head bandage. 2. A cataplasm for the head. [E.]

UMSCHNÜRUNG (Ger.), n. Um-shnu'r-un². Ligation, snaring. [A, 521 (a, 48).]

UMSETZUNG (Ger.), n. Um'ze'ts-un². See **METASTASIS**.

UMSTALTUNG (Ger.), n. Um'stalt-un². See **METAMORPHOSIS**.

UMSTECHUNG (Ger.), n. Um-ste'ch-un². The insertion of a suture to inclose a bleeding point. [E.]

UMSTÜLPUNG (Ger.), n. Um'stu'l-p-un². An inversion (as of the uterus). Cf. **EINSTÜLPUNG**.

UMWANDELN (Ger.), **UMWANDLUNG** (Ger.), n's. Um'va'nd-e'ln-, -va'nd-lun². See **TRANSFORMATION**.

UNÄCHT (Ger.), adj. Un'ach't. Spurious. [a, 35.]

UNANUEA (Lat.), n. f. Un-a'n-u'e-a. A genus of the *Scrophularineae*. [a, 35.]—**U. febrifuga**. A Peruvian shrub having a febrifuge root. [a, 35.]

UNATHEMBAR (Ger.), adj. Un'a't-e'm-ba'r. Irrespirable.

UNAUFLÖSBAR (Ger.), **UNAUFLÖSLICH** (Ger.), adj's. Un'a'uf-lö's-bar-, -li'ch. See **INSOLUBLE**.

UNAUFSPRINGEND (Ger.), adj. Un'a'uf-spr-i'ng-e'nd. See **INDEHISCENT**.

UNAUSROTBAR (Ger.), adj. Un'a'us-rot-ba'r. Ineradicable. [a, 14.]

UNBEDECKT (Ger.), adj. Un'be-de'ckt. Uncovered. [a, 14.]

UNBEHAART (Ger.), adj. Un'be-ha'rt. See **GLABROUS**.

UNBESCHNITTEN (Ger.), adj. Un'be-schni't-te'n. 1. Uncircumcised. 2. Unpruned. [a, 14.]

UNBESINNlichkeit (Ger.), n. Un'be-zinn-li'ch-keit. See **AMNESIA**.

UNBEWEGLICH (Ger.), adj. Un'be-vag-li'ch. Immobile, irreducible.

UNBEWUSST (Ger.), adj. Un'be-wust. See **UNCONSCIOUS**.

UNBIEGSAM (Ger.), adj. Un'beg-za'm. See **INFLEXIBLE**.

UNBLUTIG (Ger.), adj. Un'blut-ig. See **BLOODLESS**.

UNCAM, n. Of the alchemists, mercury. [A, 325 (a, 48).]

UNCARIA (Lat.), n. f. U'n'a'k(u'n'a'k)-ä'r(a'r)'i-a. From *uncus*, a hook. Fr., *uncaire*. Ger., *Gambirstrauch*. A genus of the *Rubiaceae*. [a, 35.]—**Extractum uncaria**. See **CATECHU** (2d def.).—**U. acida**. A species growing in the Malay Islands; used like *U. gambir*, of which some consider it a variety. [a, 35.]—**U. gambir**. *U. gambir*. Ger., *dächter Gambirstrauch*. A stout climbing shrub indigenous to the countries bordering the Straits of Malacca. It yields catechu (q. v., 2d def.). The detergent bitter leaves are used in aphthae and skin diseases. [a, 35.]

UNCIA (Lat.), n. f. U'n's(u'n'a'k)'i-a. Gr., *ὀνυμία, ονυμία*. 1. See **OUNCE**. 2. An inch.

UNCIAL, adj. U'n's-i-a'l. Lat., *uncialis*. An inch long. [a, 35.]

UNCIFORM, adj. U'n's-i'f'o-r'm. Lat., *unciformis* (from *uncus*, a hook, and *forma*, form). Fr., *unciforme*. Ger., *hakenförmig*. Hook-shaped, hooked. [L, 345.]

UNCINATE, adj. U'n's-i'n-at. Lat., *uncinatus* (from *uncinus*, a hook). Fr., *unciné*. Ger., *hakig*. Hooked, curved at the tip in the form of a hook; provided with hooks or bent spines. [a, 27, 35.]

95 (a, 38).—**U. Autenriethii**. See **U. ANTIMONIUM**.—**U. basilicum**. Fr., *onguent basilicum* [Fr. Cod.] (2d def.) (ou *suppuratif*). Sp., *unguento de colofonia pálido* [Sp. Ph.] (1st def.). 1. An ointment of 15 parts each of yellow wax, suet, and colophony (Burgundy pitch [Dan. Ph., Swed. Ph.], with 45 of olive-oil and 7½ of turpentine [Dan. Ph.], or 60 of olive-oil and 15 of turpentine [Fin. Ph., Swed. Ph.], or 45 of olive-oil and 10 of turpentine [Ger. Ph.], or 45 of olive-oil and 15 of Burgundy pitch [Sp. Ph.], or 40 of olive-oil and 15 of turpentine [Norw. Ph.]); or of 15 parts each of yellow wax, suet, and turpentine, 30 of colophony, and 45 of lard [Roum. Ph.]. 2. An ointment of 12 parts each of yellow wax, colophony, and black pitch with 12 each of suet and turpentine and 36 [Dan. Ph., Russ. Ph.] (40 [Norw. Ph.]) of olive-oil, or with 48 [Fr. Cod.] (72 [Gr. Ph.]) of olive-oil only; or of 12 parts each of yellow wax, black pitch, Burgundy pitch, and suet, 45 of oil of sesame, and 5 of larch turpentine [Swiss Ph.]; or of 143 parts each of yellow wax, colophony, and black pitch, and 571 [Belg. Ph.] (572 [Netherl. Ph.]) of olive-oil. [B. 95, 119 (a, 38).] See also **U. RESINÆ**.—**U. basilicum flavum**. See **U. basilicum** (1st def.).—**U. basilicum nigrum**. See **U. basilicum** (2d def.).—**U. basilicum veterinarium** [Belg. Ph.]. An ointment of 45 parts of colophony, 40 of mutton suet, 10 of tar, and 5 of cod-liver oil. [B. 95 (a, 38).]—**U. camphoratum**. Fr., *pommade camphrée*. Sp., *pomada alcanforada* [Sp. Ph.]. An ointment of 50 parts of camphor with 150 of lard and 164 [Fr. Cod.] (15 [Sp. Ph.]) of white wax (25 of yellow wax [Russ. Ph.]); or with 134 of lard and 16 of white wax [Belg. Ph.]; or with 200 of simple ointment [Swiss Ph.]. [B. 95 (a, 38).]—**U. carbolisatum** [Swiss Ph.]. An ointment of 2 parts of crystallized carbolic acid dissolved in 2 of glycerin and mixed with 200 of lard. [B. 95 (a, 38).]—**U. carminativum**. See **ONGUENT CARMINATIVUM**.—**U. ceratum**. See **CERATUM GALENI**.—**U. cereum** [Russ. Ph.]. A preparation corresponding nearly to the ceratum of the U. S. Ph., composed of 30 parts of yellow wax (white wax [Gr. Ph.]) and 90 (70 [Ger. Ph.], 75 [Gr. Ph.], 60 [Netherl. Ph.]) of olive-oil. [B. 95 (a, 38).]—**U. cinereum**. Gray ointment; the *onguent mercuriel simple* of the Fr. Cod. [B.]. See under **HYDRARGYRI**.—**U. citrinum**. See **HYDRARGYRI NITRATIS**.—**U. ALTHÆÆ**.—**U. basilicum**.—**U. cupratum**. See **U. ARGENTIS** (2d def.).—**U. Cyriilli**. See **POMMADE DE CIRILLO**.—**U. de arthanita**. Fr., *onguent d'arthanita (ou de pain de porreau)*. An ointment made by boiling 1,060 parts of the juice of *Cyclamen europæum*, 360 of the juice of squiring cucumber, 180 of polydop, 120 of colocynth, 720 of olive-oil, and 360 of fresh butter to dryness, straining, and adding 150 parts of yellow wax, 30 each of aloes, mezereum-berries, colocynth, scammony, and Indian jalap, 26 of euphorbium, 15 each of salt, chamomile, ginger, myrrh, and long pepper, and 30 each of sagapenum and ox-gall; or by macerating for 24 hours 664 parts each of the juices of *Cyclamen europæum* and of colocynth, and 138 of colocynth, straining down one half, straining, evaporating to an extract, and adding 28 parts each of ox-gall, salt, and sagapenum, 249 of yellow wax, 332 of butter, 664 of olive-oil, and 111 of powdered chamomile; or made of 360 parts of fresh butter or lard, 60 of inspissated ox-gall (or of extract of bile), 15 each of hepatic aloes and colocynth, and 8 to 12 of some essential oil or oils (wormwood alone or with tansy or rosemary). Sometimes 15 parts of sulphur were added, or, instead of 15 parts each, 45 parts each of aloes, colocynth, and flowers of sulphur were used. [L. 85 (a, 38).]—**U. defensivum cœruleum**. See **UNGUENTUM OXYDI COBALTI**.—**U. de nihilo**. See **U. ZINCI OXYDI**.—**U. digestivum**. Fr., *onguent digestif simple* [Fr. Cod.] (1st def.). 1. An ointment of 15 parts each of olive-oil and yolk of egg with 70 of larch turpentine [Belg. Ph.]; or of 10 grammes of olive-oil, 40 of larch turpentine, and the yolk of 1 egg [Fr. Cod.] (15 grammes of oil of hypericum, 60 of turpentine, and the yolks of 2 eggs [Sp. Ph.]). [B. 95 (a, 38).] 2. See **U. TEREBINTHINÆ COMPOSITUM**.—**U. digestivum aloeticum**. Fr., *onguent digestif aloétique*.—**U. Dupuytreni** [Swiss Ph.]. An ointment of 116 of rhodomel, 355 of turpentine, and 88 of olive-oil; or of 45 grammes of aloes, 180 each of turpentine and basilicum, and the yolks of 3 eggs; or of 179 grammes of turpentine, 119 of honey, 190 of tincture of aloes, and the yolks of 4 eggs. [L. 85; a, 38.]—**U. digestivum animatum**. An ointment of equal parts of liquid styrax and *u. digestivum*. In former times equal parts of basilicon ointment and compound ointment of elemi were added. [B. 95, 119 (a, 38).]—**U. digestivum mercuriale**. A mixture of equal parts of *u. digestivum* and *u. hydrargyri* (the Sp. preparation). [B. 95 (a, 38).]—**U. digestivum myrrhatum**. An ointment of 180 grammes of turpentine and the yolks of 4 eggs with either 22 grammes of myrrh and 45 of olive-oil or 11 each of myrrh and oilbalm, 45 of oil of St. John's wort, and enough saffron; or of 240 grammes of turpentine, 46 of oil of St. John's wort, 7 each of myrrh and oilbalm, and the yolks of 4 eggs; or of 30 parts of *u. digestivum* with 4 each of myrrh and oilbalm. [B. 119 (a, 38).]—**U. digestivum simplex** [Fr. Cod.]. See **U. digestivum** (1st def.).—**U. Dupuytreni** [Swiss Ph.]. An ointment of 250 parts of purified beef marrow, 4 of lead acetate, 8 of balsam of Peru, 30 of dilute alcohol, 14 part of tincture of cantharides, and 1 each of the tinctures of cloves and cinnamon. [B. 95 (a, 38).]—**U. emolliens**. 1. Of the Austr. Ph., Hung. Ph., 2d ed., see **U. aquæ rosæ**. 2. See **U. suppurans**.—**U. enulatum**. See **U. HELENII**.—**U. epispasticum**. See **U. MEZEREUM**.—**U. excelsanum rubrum Acrelii**. An ointment of 90 parts each of lead acetate and minium, 180 each of simple cerate, litharge, and calamine, 360 of goat's tallow, 240 of linseed oil, and 11 of camphor. [B. 119 (a, 38).]—**U. extensum**. Any ointment spread on a fabric. [Unna (a, 14).]—**U. flavum**. 1. Of the Ger. Ph., 1st ed., Russ. Ph., T. A., see **U. RESINÆ**. 2. See **U. ALTHÆÆ**.—**U. foliatum**. See **NARD OINTMENT**.—**U. fuscum**. Fr., *onguent mercuriel de Boecking* (2d def.) (ou *brun* [3d def.]). 1. An ointment of 72 parts of oil, 16 of yellow wax, 8 each of colophony and black pitch, 4 each of mastic, turpentine, galbanum, sagapenum, and oilbalm, and 2 of round birthwort. An ointment made by mixing resin precipitate with 16 times as much resin. [B. 119 (a, 38).] 3. See **U. matris**.—**U. griseum**. See **U. HYDRARGYRI**.—**U. hæmorrhoidale**. An ointment of 22 grammes each of starch, white lead, litharge, lead suboxide, and tragacanth, 5 each of opium and camphor, 180 each

of mucilage of the seeds of *Plantago psyllium*, oil of roses, and oil of great mullein, 90 of yellow wax, and the whites of 2 eggs. [B. 119 (a, 38).]—**U. Hebrae** (Swiss Ph.). An ointment of 250 parts each of litharge plaster and olive-oil with 5 of glycerin. [B. 95 (a, 38).] See also **U. DIACHYLON**.—**U. helleboratum** [Dan. Ph.]. An ointment of 3 parts of commercial potassium nitrate, 24 of rhizome of white hellebore, 90 of sublimed sulphur, 96 of green soap, and 288 of lard. [B. 95 (a, 38).]—**U. Holloway** (Gr. Ph.). An ointment made of 125 parts of white wax, 60 each of yellow wax and larch turpentine, 50 of spermaceti, 250 of Burgundy pitch, 500 of lard, and 625 of olive-oil. [B. 95 (a, 38).]—**U. iodatum**. Fr., *pomnade d'iode*. An ointment of iodine mixed with 16, 24, or 64 times as much lard. [B. 119 (a, 38).]—**U. irritans**. See **U. CANTHARIS**.—**U. iodatum** (Hung. Ph., 2d ed.). An ointment of tincture of iodine extemporaneously mixed with nine times as much simple ointment. [B. 95 (a, 38).]—**U. labiale**. See **U. rubrum labiale** and **CERATUM CETACEI RUBRUM**.—**U. laurincamporatum**. See **U. ad perionies**.—**U. laurinum**. Fr., *onguent de laurier*, *pomnade de laurier* [Fr. Cod.] (2d def.). 1. Of the Netherl. Ph., see **UNGUENTUM LAURI TEREBINTHINATUM**. 2. Of the Fr. Cod., an ointment of 80 parts each of fresh laurel-leaves and laurel-berries and 100 of lard. The Belg. Ph. orders the laurel-leaves and berries to be macerated in 25 parts of 32-per-cent. alcohol for two hours before heating with the lard, and both ph's order the ointment remelted when prepared. [B. 95 (a, 38).] 3. See **U. nerivinum** (3d def.).—**U. leniens**. 1. Of the Russ. Ph., an ointment of 3 parts of white wax, 6 of spermaceti, 24 of almond-oil, and 4 of glycerin. [B. 95 (a, 38).] See also **CERATUM CETACEI**. 2. Of the Ger. Ph., see **U. aquæ rosæ**.—**U. lenitivum**. Fr., *onguent emollient*. An ointment of 18 parts of colophony, 36 of yellow wax, 126 of olive-oil, and 9 of turpentine. [B. 119 (a, 38).]—**U. lilaceum**. See **CANOMYCON**.—**U. matris**. Brown salve; an ointment consisting essentially of 2 or 2 parts each of lard, butter, mutton suet, yellow wax, and litharge with 2, 3, or 8 of olive-oil. The butter was frequently omitted, sometimes also the olive-oil, and a little black pitch was occasionally added. Some ph's simply ordered 2 parts of mutton suet and 1 part of black pitch mixed with 56 parts of simple plaster, or 2 of camphor and 32 of yellow wax with 198 of simple plaster, or 5 of olive-oil with 8 of emplastrum mini rubri, or 4 of lard and 3 each of mutton suet and yellow wax with 6 of simple plaster. [B. 119 (a, 38).]—**U. mercuriale**. See **U. HYDRARGYRI**.—**U. mercuriale album**. See **U. HYDRARGYRI ammoniaci**.—**U. mercuriale aptalizonemonon**. See **POMMADE DE CIRILLO**.—**U. mercuriale camphoratum**. A mixture of equal parts of camphor and mercurial ointment or of 2 parts of camphor and 4 of the ointment. [B. 119 (a, 38).]—**U. mercuriale citrinum**. See **U. HYDRARGYRI NITRATIS**.—**U. mercuriale corrosivum**. See **POMMADE DE CIRILLO**.—**U. mundificans** Zellier. See **U. HYDRARGYRI ammoniaci**.—**U. mucosum compositum**. Fr., *pommade astringente*. An ointment of 345 parts of oil of myrtle, 66 of yellow wax, 29 each of gall-nuts and sumach-leaves, 7 each of myrtle-leaves, cypress-leaves, and pomegranate-peel, and 14 of mastic; or of 332 parts of oil of myrtle, 111 of yellow wax, 14 of alum, and 21 each of gall-nuts, cypress, plantain-seeds, and sumach-leaves. [B. 119 (a, 38).]—**Unguenta narcotica cum extractis parata** [Swiss Ph.]. Ointments consisting of 10 parts of a narcotic extract dissolved in 1 part each of dilute alcohol and water and mixed with 90 parts of wax ointment. [B. 95 (a, 38).]—**U. narcoticobalsamicum Hellmundi**. An ointment of 4 parts of lead acetate, 12 each of extract of hemlock and balsam of Peru, 2 of tinctura opii crocata, and 96 [Ger. Ph.] (100 [Swiss Ph.]) of wax ointment. [B. 95 (a, 38).]—**U. nardinum**. See **NARD OINTMENT**.—**U. neapolitanum**. See **U. HYDRARGYRI**.—**U. nervinum**. Fr., *onguent (ou baume) nervin*. 1. Of the Dan. Ph., see **U. aromaticum** (1st def.). 2. Of the Gr. Ph. and Swiss Ph., see **U. aromaticum** (2d def.). 3. An ointment made of 2 parts each of essence of turpentine, and oil of laurel, to which in various old ph's were added several other oils of numerous herbs and other ingredients. [B. 119 (a, 38).] Cf. **U. ROSMARINI COMPOSITUM**.—**U. nitricatum**. See **ADIPS OXYGENATUS**.—**U. oculare Kliseri**. Fr., *onguent ophtalmique vert*. An ointment of 8 parts of verdigris, 150 of tartar, 40 of camphor, and 630 of lard. [B. 119 (a, 38).]—**U. opthalmicum**. An ointment of 2 parts of red mercury oxide, 38 of yellow wax, and 60 of almond-oil [Ger. Ph., 1st ed.], or of 2 parts of yellow mercury oxide and 98 of *u. cetacei* [Swiss Ph.]. Some of the older ph's directed zinc sulphate with 6 or 7 times as much fresh butter. [B. 95, 119 (a, 38).]—**U. opthalmicum album**. See **U. ZINCI OXYDI**.—**U. opthalmicum compositum**. An ointment made of 15 parts of red mercury oxide with 24 of yellow wax, 140 of lard, 6 of zinc oxide, 5 of camphor, and 10 of almond-oil [Ger. Ph., 1st ed.] (with 30 of yellow wax, 210 of lard, 74 each of zinc oxide and olive-oil, and 4 of camphor [Swiss Ph.]). [B. 95 (a, 38).]—**U. opthalmicum Desaulti** [Belg. Ph.]. See **Desault** [Sp. Ph.]. An ointment of 80 parts each of alum (burned [Belg. Ph.]), red mercury oxide, and lead acetate, with 16 of calomel, 40 of zinc oxide, and 704 of benzoated lard [Belg. Ph.] (with 12 of calomel, 80 of tutia, and 600 of rose ointment [Sp. Ph.]). [B. 95 (a, 38).]—**U. opthalmicum Janini** [Swiss Ph.]. An ointment of 10 parts each of calomel, zinc oxide, and white bole and 50 of lard. [B. 95 (a, 38).]—**U. opthalmicum lansanense [Swiss Ph.]. An ointment of 2 parts of red mercury oxide, 130 of lard, 8 of tinctura opii crocata, and 12 of solution of subacetate of lead. [B. 95 (a, 38).]—**U. opthalmicum Richteri**. An ointment of 2 parts of red precipitate and 6 each of cacao butter and lard. [B. 119 (a, 38).]—**U. opthalmicum rubrum**. See **U. HYDRARGYRI OXYDI RUBRI**.—**U. opthalmicum Sti. Yviesi**. See **U. opthalmicum compositum**.—**U. opthalmicum simplex**. See **U. opthalmicum**.—**U. opiatum**. 1. An ointment made by mixing extemporaneously 5 parts each of extract of opium and water with 90 of wax ointment [Ger. Ph., 1st ed.] (of simple ointment [Swiss Ph.]), or of lard [Russ. Ph.]. 2. An ointment made by digesting 7 grammes of powdered opium with 60 grammes of calf's bile, and adding 60 of lard and 10 drops of oil of bergamot. [B. 95, 119 (a, 38).]—**U. opodeldoch**. See **LINIMENTUM SAPONATO-CAMPORATUM**.—**U. oxygenatum**. Sp.,**

pomada oxigenada [Sp. Ph.]. An ointment made by heating 100 parts of lard with 6 of nitric acid of sp. gr. 1.185 [Ger. Ph., 1st ed.], with 12 of sp. gr. 1.230 [Gr. Ph.] (1321 [Sp. Ph.], or with 10 of sp. gr. 1.32 to 1.34 [Swiss Ph.]) [B. 95 (a, 38)]. See also *ANDES oxy-*
genatus.—*U. oxigenatum* (Bañares). *Sp. aceite oxigenado de Bañares* [Sp. Ph.]. An ointment made by heating 460 parts of olive-oil with a solution of 29 of mercury in 58 of nitric acid of sp. gr. 1.321. [B. 95 (a, 38)].—*U. oxymenon*. See *U. ACIDI NITRICI* and *ANDES oxigenatus*.—*U. paraffinum* [Br. Ph.]. See *PETROLATUM*.—*U. phosphoratum*. *Sp. pomada fosforica* [Sp. Ph.]. An ointment made by heating phosphorus in a closed flask with 50 times as much melted lard. [B. 95 (a, 38)].—*U. plumbicum*. 1. Of the Gr. Ph., see *U. PLUMBI*. 2. Of the Swed. Ph., see *EMPLÂTRE brun*.—*U. pomadinum* [Aust. Ph.]. An ointment made by melting together 150 parts of white wax and 800 of lard washed with rose-water, straining, and adding, when the mixture is half cold, 3 parts each of the oils of bergamot and cloves. [B. 95 (a, 38)].—*U. populeum*. 1. Of the Belg. Ph. and Netherl. Ph., see *FOMATUM populeum*. 2. Of the Russ. Ph., an ointment made by extracting poplar buds with half as much again 90-per-cent. alcohol, filtering, distilling off the alcohol, evaporating to the consistency of turpentine, and adding 8 times as much lard [Russ. Ph.] or by boiling the buds with twice as much lard till the moisture is dissipated, expressing, and filtering [Gr. Ph.]. [B. 95 (a, 38)].—*U. pro nede*. *Fr. onguent de nede* [Fr. Cod.]. A variegated ointment made of 36 parts of colophony, 50 of mutton suet, 22 of cod-liver oil, and 2 of animal charcoal [Belg. Ph.]; or of equal parts of yellow wax, lard, turpentine, olive-oil, and vegetable tar [Fr. Cod.]. [B. 95 (a, 38)].—*U. quercinum*. See *PLICIBUM tannicum pulitforme*.—*U. refrigerans*. *Fr. onguent adoucissant* (2d def.). 1. Of the Swiss Ph., *U. aigue rose*. 2. A mixture of white wax with 3 or 4 times as much oil of roses. [B. 119 (a, 38)].—*U. rosatum*. *Fr. liparole de roses, onguent rosat (ou pomadin)*. *Ger. Rosensalbe*. *Sp. pomada de rosas* [Sp. Ph.] (1st def.). 1. An ointment made of 30 parts of rose-water with 60 of white wax and 300 of lard [Ger. Ph.], 30 of white wax and 120 of lard washed in rose-water [Gr. Ph.], 10 of white wax and 40 of olive-oil [Swiss Ph.], 60 of oil of theobroma and 130 of oil of sesamum [H. Hung. Ph.]; or 2 parts of oil of rose and 400 of white wax and 8,600 of benzoinated lard [Belg. Ph.] (with 48 of yellow wax and 432 of washed lard [Russ. Ph.]); or of equal parts of fresh pink-rose petals and lard digested for three days at a gentle heat. The older ph's generally directed rose petals instead of rose-water and sometimes a large number of aromatic ingredients. [B. 95, 119 (a, 38)]. 2. Of the Austr. Ph., see *U. pomadinum*.—*U. rosatum compositum*. See *U. HYDRAEGYI compositum*.—*U. rubefaciens*. *U. vesicari*.—*U. rubrum balsamicum* [Belg. Ph.]. An ointment made of 248 parts of yellow wax, 498 of olive-oil, 170 of lard turpentine, and 42 each of balsam of Peru and red sandal-wood. [B. 95 (a, 38)].—*U. rubrum labiale* [Belg. Ph.]. *Fr. céral à la rose*. *Sp. cerato rojo para los labios* [Sp. Ph.]. A preparation made up of 27 parts each of hog's lard and almond-oil and 46 of white wax, colored with alkaneet-root and flavored with a mixture of balsam of Peru and the oils of cloves, bergamot, and lemon. The preparations of the Swiss Ph. and Sp. Ph. are made of white wax mixed with about double its weight of expressed almond-oil colored with alkaneet-root, and flavored with oil of roses. [B.] Cf. *CERATUM CETACEI rubrum*.—*U. santalinum*. An ointment made of 996 parts of myrtle-oil, 249 of white wax, 111 each of red rose and red sandal-wood, and 14 of camphor; or by boiling together 22 parts each of white yellow and red sandal-wood, 45 of red poppies, 75 of roses, 360 of oil of roses, and 120 of white wine until the moisture is dissipated, straining, and adding 90 parts each of Armenian bole and white wax and 7 of camphor. [B. 119 (a, 38)].—*U. sedativo-narcoticum*. A preparation made by digesting 4 grammes of opium in the gastric juice of a calf for 24 hours in the acid of gentle heat, adding lard enough to make a soft ointment. [B. 119 (a, 38)].—*U. simplex*. 1. Of the Br. Ph., Austr. Ph., Belg. Ph., Gr. Ph., Hung. Ph. (2d ed.), and Swiss Ph., an ointment of 3 parts of white wax with 4 of benzoinated lard and 4 fluid parts of almond-oil [Br. Ph.], with 17 of benzoinated lard [Belg. Ph.], or with 12 (18 [Swiss Ph.]) of simple lard. [B. 95 (a, 38)]. 2. Of the Netherl. Ph., see *U. cereum*. 3. See *CERATUM Galeni*. 4. See *U. PLUMBI carbonatis*.—*U. sinapium*. See *Cataplasma SINAPIS*.—*U. stilbium*. See *U. ANTIMONIUM*.—*U. stomachicum*. *Fr. onguent stomacal* (1st def.) [ou *stomachique* (2d def.)]. 1. An ointment made of 240 parts each of wormwood, mint, sage, and yellow wax, 120 each of rose petals and strax, 1,200 of olive-oil, and 5 each of the oils of mint, cloves, and wormwood. [B. 119 (a, 38)]. 2. An ointment made of 30 parts each of nutmeg and cloves and 15 of mastic, all in powder. [B. 119 (a, 38)].—*U. universale* [Br. Ph.]. See *U. ROSATI todidi*.—*U. vesicatorium*. 1. Of the Swiss Ph., see *U. SULPHURIS*. 2. Of the Austr. Ph. and Hung. Ph., 2d ed., see *U. SULPHURIS compositum*.—*U. sulfuratum compositum*. See *U. SULPHURIS compositum*.—*U. sulfuratum simplex*. See *U. SULPHURIS*.—*U. sulphuratum*. 1. Of the Belg. Ph., see *U. SULPHURIS*. 2. Of the Netherl. Ph., see *U. SULPHURIS compositum*.—*U. sulphuratum alcaicum*. See *U. SULPHURIS alcaicum*.—*U. sulphuratum purpurum*. *Ger. Zitterungsalbe*. An ointment made of 4 pounds of honey, 3 of figs, 1 pound each of resin, Venetian soap, and pulp of onions, and 2 oz. of galbanum; or of $\frac{1}{2}$ pound each of yellow wax, resin, and white soap, and $\frac{1}{2}$ pounds each of roasted onions and honey. [B. 97 (a, 38)].—*U. terebinthinaceum*. See *U. TEREBINTHINUM compositum*.—*U. terebinthinatum*. See *U. TEREBINTHINUM*.—*U. universale* [Br. Ph.]. An ointment made of 12 parts of yellow wax, 34 of oil of rape-seed, and 2 each of lead acetate and warm oil of rape-seed. [B. 95 (a, 38)].—*U. venereum de Cirillo*. See *POMMADE de Cirillo*.—*U. vesicatorium*. See *U. CANTHARIDIS*.—*U. vesicatorium eum euphorbio* [Belg. Ph.]. *Fr. onguent vesicatoire (Lebas)* [Fr. Cod.]. A veterinary ointment made of 193 parts of cantharides, 65 of euphorbium, and 742 of pitch plaster [Belg. Ph.]; or of 300 parts of yellow wax, 400 each of terebinthina and black pitch, 1,000 of olive-oil, 600 of cantharides, and 200 of euphorbium [Fr. Cod.]. [B. 95 (a, 38)].—*U. vien-*

nense [Netherl. Ph.]. *Fr. pommade sulfureuse contre la gale* [Fr. Cod.]. An ointment made of 3 parts each of sublimed sulphur and tar, 2 of potassium carbonate, and 6 each of lard and green soap [Netherl. Ph.]; or of 10 parts of potassium sulphide, 2 of pure potassium carbonate, and 300 of lard [Fr. Cod.]. [B. 95 (a, 38)].—*U. viride*. See *U. JÆGUIS*.—*U. viride potabile*. *Fr. onguent vert*. An old preparation made of a large number of herbs and sometimes containing snails and crabs, made into an ointment with butter. [B. 119 (a, 38)].—*U. zincico-plumbicum* [Swed. Ph.]. An ointment made of 8 parts each of olive-oil, zinc oxide, white lead, and litharge, 4 each of minium and lead acetate, 16 of suet, and 2 of camphor liniment. [B. 95 (a, 38)].

UNGUICULAR, adj. $U^2n^2gw^{12}u^{12}a^2r$. *Lat. unguicularis* (from *unguiculus*, a small nail). *Ger. nagellang* (2d def.).—Of or pertaining to a claw or nail. 2. Half an inch in length. [a, 35.]

UNGUICULATE, adj. $U^2n^2gw^{12}u^{12}at$. *Lat. unguiculatus*. *Fr. onguiculé*. *Ger. benagelt, genagelt*. Furnished with claws; of petals, contracted at the base into an unguis. [a, 35.]

UNGUICULUS (Lat.), n. m. $U^2n^2(u^{42})gw^{12}u^{12}(u^{41})u^2s(u^{42})$. *Dim. of unguis*, a nail. See *UNGUIS* and *NAIL* (1st def.).

UNGUINOCELE (Fr.), n. $U^2n^2gwen-o-se^{12}$. From *unguen*, fat, and *κύηλη*, a tumor. See *AI*.

UNGUIS (Lat.), n. m. $U^2n^2(u^{42})gw^{12}u^{12}s$. *Fr. ongle* (5th def.). *Ger. Nagel* (1st and 5th def's), *Nagellänge* (6th def.). 1. See *NAIL* (1st def.). 2. The hard, horny termination of the beak of a bird. [L, 221.] 3. See *ONYX* (2d def.). 4. The pes hippocampi of the hippocampus major. [J, 3(K).] 5. In botany, a claw or stalk of a petal. 6. Half an inch, being the length of the thumb-nail. [a, 35.]—*U. avis*. See *HIPPOCAMPI minor*.—*U. corneus*. See *ONYX* (2d def.).—*U. hippocorticus*. Of Hippocrates, the bluish discoloration of the nails observed in pulmonary diseases. [L, 57 (a, 50)].—*U. incarnatus*, *U. in carne*. See *INGROWING NAIL*.—*U. in oculo*. See *PERYGIUM* (2d def.).

UNGULA (Lat.), n. f. $U^2n^2(u^{42})gu^{12}(gu^{14})a^2$. From *unguis*, a nail. See *HOOF*.—**UNGULÆ palpebrarum**. An old term for the tarsal cartilages. [F.]

UNGULATA (Lat.), n. n. pl. $U^2n^2g(u^{42})gu^{12}u^{12}(u^{41})a^2(u^{42})a^2$. From *ungula*, a hoof. An order of the *Mammalia* comprising the hoofed quadrupeds. [B, 28 (a, 27).]

UNHEILBAR (Ger.), adj. *Un'hil-ba'r*. See *INCURABLE*.

UNHEILSAM (Ger.), adj. *Un'hil-za'm*. Unwholesome, insalubrious. [A, 521 (a, 48).]

UNIAxIAL, adj. $Un^2i^2a^2x^2i^2l$. From *unus*, one, and *axis*, an axis. See *MONAXIAL*.

UNICELLULAR, adj. $Un^2i^2se^{12}u^{12}a^2r$. *Lat. unicellularis* (from *unus*, one, and *cellula*, a small cell). *Fr. unicellulaire*. *Ger. einzellig, unicellulär*. Consisting of but one cell. [J.]

UNICISM, n. $Un^2i^2is^2m$. From *unus*, one, only. *Lat. unitarismus*. *Fr. unicisme*. *Ger. Unitätslehre*. The doctrine that chancre and chancreoid are both due to a single virus (cf. *DUALISM* [5th def.]). [a, 48.]

UNICIST, n. $Un^2i^2is^2ist$. A believer in unicism. [a, 17.]

UNICITÉ (Fr.), n. $U^2ne-se-ta$. The property of being unique (applied by Ricord to syphilis to indicate that it can affect an individual only once). [A, 319 (a, 48).]

UNICORN-ROOT, n. $Un^2i^2ko^2rn-ru^{12}t$. See *ALETIS farnosa*.

UNICORNU (Lat.), n. n. $Un^2n(un)^2ko^2rn^2u^{12}(u)$. From *unus*, one, and *cornu*, a horn. See *RHINOCEROS*.

UNIFLOROUS, adj. $Un^2i^2flor^2u^2s$. *Lat. uniflorus* (from *unus*, one, and *flos*, a flower). *Fr. uniflore*. *Ger. einblüthig, einblumig*. Bearing a single flower. [a, 35.]

UNIFOLIATE, adj. $Un^2i^2fol^2i^2at$. *Lat. unifoliatus* (from *unus*, one, and *folium*, a leaf). *Fr. unifeuillé*. *Ger. einblättrig*. 1. Bearing but one leaf. 2. Unifoliolate. [a, 35.]

UNIFOLIOLATE, adj. $Un^2i^2fol^2i^2o^{12}at$. *Lat. unifoliolatus* (from *unus*, one, and *foliolum*, a little leaf). *Fr. unifoliolé*. *Ger. eintheilblättrig*. Of a compound leaf, consisting of a single leaflet. [a, 35.]

UNIGLANS (Lat.), n. f. $U^2n^2(un)^2glan^2u^2z(glan^2s)$. *Genl., gland's*. *Fr. unigland*. Of Mirel, a eupulate fruit containing but one gland (e. g., an acorn). [a, 35.]

UNIJUGATE, adj. $Un^2i^2i^2ug^2at$. *Lat. unijugus* (from *unus*, one, and *jugum*, a yoke). *Fr. unijugum*. *Ger. einpaarig*. Having but one jugum, or pair of leaflets. [a, 35.]

UNILABATE, adj. $Un^2i^2lab^2i^2at$. *Lat. unilabatus* (from *unus*, one, and *labium*, a lip). *Ger. einlippig*. Having but one lip (said of a corolla in which one lip is obsolete). [a, 35.]

UNILATERAL, adj. $Un^2i^2la^2t^2e^{12}al$. *Lat. unilateralis* (from *unus*, one, and *latus*, a side). *Fr. unilatéral*. *Ger. einseitig*. 1. One-sided, growing on or turned all toward one side of an axis. [a, 35.] 2. Affecting only one side of the body or one of two laterally paired organs.

UNIOBATE, adj. $Un^2n^2i^2o^{12}b^2at$. *Lat. unilobatus* (from *unus*, one, and *lobus*, a lobe). *Fr. unilobé*. *Ger. einlappig*. Having but one lobe. The *Unilobata* (Fr. *unilobées*) are the monocotyledons. [a, 35.]

UNIOCLULAR, adj. $Un^2n^2i^2lo^{12}c^2u^{12}a^2r$. *Lat. unilocularis* (from *unus*, one, and *loculus* [q. v.]). *Fr. uniloculaire*. *Ger. einkammerig, einfächerig*. 1. Having but one loculus; one-celled. [a, 35.] 2. Of a cystic tumor, made up of only one cyst.

UNINERVATE, adj. $Un^2i^2n^2i^2rv^2at$. *Lat. uninervis* (from *unus*, one, and *nervus*, a nerve). *Fr. innervé*. *Ger. einnervig*. Having only one rib or midrib. [a, 35.]

UNINERVI-OBLITERATUS (Lat.), adj. $U^2n(un)-i^2-nu^r$ - $(ne^r)-vi^2(wi^2)-o^2b-li^2c(let)-e^2r-at(a^2t)-u^2s(u^2s)$. From *unus*, one, *nervus*, a nerve, and *obliterare*, to obliterate. Fr., *uninervi-oblitéré*. Having a single rib (midrib) which is obliterated before reaching the margin of the leaf. [a, 35.]

UNINTERRUPTED, adj. $U^2n-i^2nt-u^2r-ru^2pt-e^2d$. Consisting of equal parts or of parts which increase or decrease regularly; continuous. [a, 35.]

UNINUCLEAR, adj. $U^2n-i^2-nu^2k-le^2-a^2r$. From *unus*, one, and *nucleus*, a nut. Ger., *einkernig*, *uninucleär*. Having but a single nucleus. [J.]

UNIO (Lat.), n. f. $U^2n(un)/i^2-o$. Gen., *o'nis*. From *unus*, one. See *UNION*.—*U. thalamorum nervorum opticorum*. See *Middle commissure of the brain*.—*U. vasorum*. See *ANASTOMOSIS* (2d def.).

UNIOCLAR, adj. $U^2n-i^2-o^2k-u^2l-a^2r$. Lat., *unioclaris*, *unio-oculatus* (from *unus*, one, and *oculus*, the eye). Fr., *unioclé*. Ger., *eindüglig*. 1. Having but one eye. [F.] See *Cyclops*. 2. In botany, having but one point (eye) of vegetation. [a, 35.]

UNION, n. U^2n-yu^2n . Gr., *ἕνωσις*. Lat., *unio* (from *unus*, one). Fr., *u*. Ger., *U*, *Verbindung*. The act or process of conjoining two or more things, also the condition of being so conjoined. [E; a, 48.]—**DISSOLVED** *u*. A condition sometimes seen in fractures in which, callus having once formed and the fragments having been united, the reparative material subsequently dissolves and disappears. [E, 4.]—**Primary u**. See *FIRST INTENTION*.—**Secondary u**. See *Second intention*.—**U. of granulations**. See *Third intention*.—**Vicious u**. The condition of deformity following badly united fractures. [E.]

UNIOVULAR, **UNIOVULATE**, adj's. $U^2n-i^2-o^2v-u^2l-a^2r$, -at. From *unus*, one, and *ovulum*, a little egg. Ger., *eineiig*. Having a solitary ovule. [a, 35.]

UNIPARA (Lat.), n. f. $U^2n(un)-i^2-p^2a^2r(a^2r)-a^2$. From *unus*, one, and *parere*, to bring forth. A woman who is parturient for the first time. [a, 48.]

UNIPAROUS, adj. $U^2n-i^2-p^2a^2r-u^2s$. From *unus*, one, and *parere*, to bring forth. 1. Of animals, usually bringing forth but one foetus at a birth. 2. In botany, producing but one (e. g., a *u*. cyme is a cyme with one lateral axis). [a, 35.]

UNIPETALOUS, adj. $U^2n-i^2-pe^2t-u^2s$. Lat., *unipetalus* (from *unus*, one and *petalum*, a petal). Fr., *unipétale*. Ger., *einschblumblütig*. Consisting of a single petal, the others being aborted or non-developed; not to be confounded with *gamopetalous*. [a, 35.]

UNIPOLAR, adj. $U^2n-i^2-p^2o^2l-a^2r$. Lat., *unipolaris* (from *unus*, one, and *polus*, a pole). Fr., *unipolaire*. Ger., *einpolig*. Of cells, having but one process. [B.]

UNISERIAL, **UNISERiate**, adj's. $U^2n-i^2-ser-i^2-l$, -at. From *unus*, one, and *series*, a row. Fr., *unisérié*. Arranged in a single line. [a, 35.]

UNISEXUAL, adj. $U^2n-i^2-se^2x-u^2l$. Lat., *unisexualis* (from *unus*, one, and *sexus*, a sex). Fr., *unisexual*. Ger., *eingeschlechtlich*. Having the sexual organs of but one sex; of a flower, having stamens or pistils only. The *Unisexuales* of Bentham and Hooker are a series of monochlamydeous dicotyledons, consisting of the *Euphorbiaceae*, *Cupuliferae*, *Juglandaceae*, etc. [a, 35.]

UNISSANT (Fr.), adj. $U^2n-ne-sa^2nt$. See *CONNECTIVE*.

UNIT, n. U^2n-i^2t . From *unus*, one. Fr., *unité*. Ger., *Einheit*. 1. A single individual. 2. A quantity adopted as a starting-point by comparison with which other quantities are measured. [a, 48.]

UNITAIRES (Fr.), n. pl. $U^2n-ne-ta^2r$. Isidore Geoffroy Saint-Hilaire's first class of monsters, including all in which the elements of a single individual only are found. [A, 301 (a, 34).]

UNITARISMUS (Lat.), n. m. $U^2n(un)-i^2-t^2a^2r(a^2r)-i^2z(i^2s)/mu^2s(mu^2s)$. From *unitas*, unity. Ger., *Unitätslehre*. See *UNICISM*.

UNITÉ (Fr.), n. $U^2n-ne-ta$. 1. Oneness, unity. [a, 48.] 2. See *UNITA*.—*U. morbide*. In pathology, the aggregate of the lesions and symptoms which present in different cases sufficient analogy to be classed together under one name. [L, 41 (a, 14).]

UNITIF (Fr.), adj. $U^2n-ne-tef$. See *CONNECTIVE*.

UNIVALENCE, n. $U^2n-i^2-v^2l-e^2ns$. Fr., *u*. Ger., *Einwerthigkeit*. The condition or property of being univalent. [B.]

UNIVALENT, adj. $U^2n-i^2-v^2l-e^2nt$. From *unus*, one, and *valere*, to be worth. Ger., *einwerthig*. Having an atomicity of one (i. e., being capable of replacing one atom of hydrogen in a compound). [B.]

UNIVALVE, adj. $U^2n-i^2-va^2lv$. From *unus*, one, and *valva*, a valve. Having a single valve; as a *n*, a mollusc having a shell consisting of a single valve or piece. [a, 48.]

UNIVERSAL, adj. $U^2n-i^2-vu^2r-s^2l$. Lat., *universalis* (from *universus*, together). In botany, general, in contradistinction to partial. [a, 35.]

UNIVOQUE (Fr.), adj. $U^2n-ne-vok$. Unequivocal, acting in one way only; of generation, normal (cf. *EQUIVOCAL*). [A, 385 (a, 48).]

UNLEBENSFÄHIG (Ger.), adj. $Un^2lab-e^2nz-fa^2ig$. Not viable. [a, 14.]

UNLING, n. U^2n-lin^2n . See *CHORISIS*.

UNLÖSLICH (Ger.), adj. $Un^2lu^2s-lp^2ch$. See *INSOLUBLE*.

UNMÄSSIGKEIT (Ger.), n. $Un^2mas-si^2g-kit$. See *INTemperANCE*.

UNOCULUS (Lat.), adj. $U^2n(un)-o^2k-u^2l(u^2l)-u^2s(u^2s)$. See *UNIOCLAR*.

UNONA (Lat.), n. f. $Un-on-a^2$. Fr., *u*, *unone*. A genus of ananaceous trees or shrubs. The *Unoneae* (Fr., *unonées*) are a subdivision (tribe) of the *Anonaceae*. [a, 35.]—*U. aethiopica*. See *HABZELIA aethiopica*.—*U. narum*. See *UVARIA narum*.

UNORDENTLICH (Ger.), adj. $Un^2ord-e^2nt-lp^2ch$. Irregular, atactic.

UNPAAR (Ger.), **UNPAARIG** (Ger.), adj's. Un^2pa^2r , $-pa^2r-i^2g$. See *AZYGOS*.

UNREGELMÄSSIG (Ger.), adj. $Un^2rag-e^2l-mas-si^2g$. See *IRREGULAR*.

UNREIF (Ger.), adj. Un^2rif . Unripe, immature. [a, 35.]

UNREIN (Ger.), n. Un^2rin . Unclean, dirty. [a, 14.]

UNREINHEIT (Ger.), **UNREINLICHKEIT** (Ger.), n. $Un^2rin-hit$, $-lfp^2ch-kit$. Uncleanliness. [a, 14.]

UNREIZBAR (Ger.), adj. $Un^2rits-ba^2r$. Not irritable.

UNRUHE (Ger.), n. Un^2ru-e^2 . Restlessness.—*Muskelu*¹. 1. Chorea minor. [D.] 2. See *CONVULSIBILITY*.

UNSATURATED, adj. $Un^2sa^2t-u^2r-at-e^2d$. Ger., *ungesättigt*. Of a compound, not having the total combining capacities of all its elements satisfied; of a solution, not containing its maximum of a soluble body. [B; L.]

UNSCHÄDLICH (Ger.), adj. $Un^2shad-lp^2ch$. Harmless. [a, 48.]

UNSCHMERZHAFT (Ger.), n. $Un^2shme^2rts-ha^2ft$. Painless.

UNSIINIG (Ger.), adj. $Un^2zi^2n-i^2g$. Demented, insane. [a, 14.]

UN SOUNDNESS OF MIND, n. $U^2n-su^2nd-ne^2s$. A mental condition in which there is inability to transact ordinary affairs properly or to follow certain lines of thought consecutively. [a, 34.]

UNSTABLE, adj. $U^2n-sta^2b'l$. Lat., *instabilis*. Fr., *instable*. Ger., *unbeständig*. Not fixed or permanent. [a, 48.]

UNSYMMETRICAL, adj. $Un^2si^2m-e^2tr-i^2p^2k'l$. 1. Destitute of symmetry (cf. *SYMMETRY* and *ASYMMETRY*). [a, 48.] 2. Of a flower, having whorls which differ in numerical plan. [a, 35.] 3. Of a tri-substituted benzene compound, having two of the replacing radicles attached to two neighboring carbon atoms and the third to the carbon atom which is not adjacent to either of these two. [B.] Cf. *SYMMETRICAL*.

UNTERBAUCH (Ger.), n. $Un^2te^2r-ba^2u^2ch$. See *HYPGASTRIUM*.

UNTERBINDUNG (Ger.), n. $Un^2te^2r-bi^2nd-un^2$. See *LIGATION* and *LIGATURE* (1st def.).

UNTERCHLORIG (Ger.), adj. $Un^2te^2r-klor-i^2g$. Hypochlorous. [B.]—*U'säure*. Hypochlorous acid. [B.]

UNTERCHLORSÄURE (Ger.), n. $Un^2te^2r-klor-zoir-e^2$. See *CHLORINE peroxide*.

UNTERDRÜCKUNG (Ger.), n. $Un^2te^2r-dru^2k-un^2$. See *SUPPRESSION*.

UNTEREITERN (Ger.), v. intr. $Un^2te^2r-it-e^2rn$. To suppurate beneath. [L, 46 (a, 21).]

UNTERGESICHT (Ger.), n. $Un^2te^2r-ge^2z-i^2ch$. The lower part of the face. [a, 32.]

UNTERHALS (Ger.), n. $Un^2te^2r-ha^2ls$. The lower part of the neck. [a, 48.]

UNTERHAUT (Ger.), n. $Un^2te^2r-ha^2u^2t$. 1. See *CORIUM* (1st def.). 2. The subcutaneous tissue. [J.]

UNTERÄUTIG (Ger.), adj. $Un^2te^2r-hoit-i^2g$. See *SUBCUTANEUS*.

UNTERHIRN (Ger.), n. $Un^2te^2r-hern$. See *SUBENCEPHALON*.

UNTERHORN (Ger.), n. $Un^2te^2r-ho^2rn$. See *Descending horn of the lateral ventricle*.

UNTERKIEFER (Ger.), n. $Un^2te^2r-kef-e^2r$. See *Inferior MAXILLA*.—*U'ast*. The ramus of the inferior maxilla. [L, 31.]—*U'phänomen*. See *Jaw-JERK*.

UNTERKIEMENDECKELSTÜCK (Ger.), n. $Un^2te^2r-kem-e^2n-de^2k-e^2l-stu^2k$. See *Subopercular BONE*.

UNTERKINN (Ger.), n. $Un^2te^2r-ki^2n$. 1. The lower part of the chin. [a, 14.] 2. See *BUCCULA* (1st def.).

UNTERKÜHLT (Ger.), adj. $Un^2te^2r-ku^2lt$. Cooled below the freezing point without solidifying. [B.]

UNTERLAPPEN (Ger.), n. $Un^2te^2r-la^2p-pe^2n$. See *Biventral LOBE* and *Temporo-sphenoidal LOBE*.—*Hinterer U*. See *Posterior inferior LOBE*.

UNTERLASSEN (Ger.), n. $Un^2te^2r-la^2s-se^2n$. See *INTERMISSION*.

UNTERLAUFUNG (Ger.), n. $Un^2te^2r-la^2u^2f-un^2$. See *ECCHYMOSIS* and *EXTRAVASATION*.

UNTERLEIB (Ger.), n. Un^2te^2r-lib . See *ABDOMEN*.—*U'sbeschauer*. See *LAPAROSCOPE*.—*U'sblähung*. See *TYMPANITES*.—*U'sbruch*. See *Abdominal HERNIA*.

UNTERPHOSPHORIG (Ger.), adj. $Un^2te^2r-fos-for-i^2g$. See *HYPOPHOSPHOROUS*.—*U'säure*. Hypophosphorous acid. [B.]

UNTERPHOSPHORSÄURE (Ger.), n. $Un^2te^2r-fos-for-zoir-e^2$. Phosphatic acid. [A, 324.]

UNTERPENGENDIAC (Ger.), n. $Un^2te^2r-ri^2p-pe^2n-gag-e^2nd$. See *Hypochondriac REGION*.

UNTERSALPETERSÄURE (Ger.), n. $Un^2te^2r-za^2l-pat-e^2r-zoir-e^2$. Hyponitric acid. [A, 324.]

UNTERSCHIEDUNG (Ger.), n. $Un^2te^2r-shid-un^2$. See *DIF-FERENTIATION* and *DIAGNOSIS*.

UNTERSCHENKEL (Ger.), n. *Unt'e'r-sche'n-kel*. See **LEG** (1st def.).—**U'strecker**, See **EXTENSOR quadriceps femoris**.

UNTERSCHIED (Ger.), n. *Unt'e'r-shed*. See **DIAPHORA**.

UNTERSCHLÄCHTIG (Ger.), adj. *Unt'e'r-schläch-tig*. See **SUCCOBIOUS**.

UNTERSCHLÄFENFISTE (Ger.), n. *Unt'e'r-schlaf-e'n-fest-e*. See **INFRATEMPORAL CREST**.

UNTERSCHLÜSSELBEINMUSKEL (Ger.), n. *Unt'e'r-schlü'ss-el-bin-musk-el*. See **SUBCLAVUS**.

UNTERSCHULTERBLATTMUSKEL (Ger.), n. *Unt'e'r-shul-t'er-blät-t-musk-el*. See **SUBSCAPULARIS**.

UNTERSCHWEFLIG (Ger.), adj. *Unt'e'r-schwef-lig*. See **HYPOSULFURIOUS**.

UNTERSCHWEFELSÄURE (Ger.), n. *Unt'e'r-schwef-el-zöhr-e*. Hyposulphuric acid. [A, 334.]

UNTERSUCHUNG (Ger.), n. *Unt'e'r-zuch-tung*. See **EXAMINATION**.—**Doppelte U.** Combined abdomino-vaginal examination.—**Fingeru'**. See **DIGITAL EXAMINATION**.—**Gemischte U.**, **Mehr-seitige U.** See **BIMANUAL EXAMINATION**.—**Sondenu'**. An examination with a sound.—**U'slehre**. See **DOCIMASIOLOGIA**.

UNTERTAUCHEN (Ger.), **UNTERTAUCHUNG** (Ger.), n's. *Unt'e'r-tauch-tung*. See **IMMERSION**.

UNTERTUCH (Ger.), n. *Unt'e'r-tuch*. See **ALÈZE**.

UNTERWEIBIG (Ger.), adj. *Unt'e'r-vib-ig*. See **HYPOGYNOS**.

UNTERWUNDRARTZT (Ger.), n. *Unt'e'r-vund-a'rtst*. An assistant surgeon. [a, 14.]

UNTERWURM (Ger.), n. *Unt'e'r-vurm*. See **INFERIOR VERMIFORM PROCESS**.

UNTERZWICKEL (Ger.), n. *Unt'e'r-tswi-kel*. See **SUBCUNUS**.

UNVERBRENNBAR (Ger.), **UNVERBRENNLICH** (Ger.), adj's. *Un'fe'r-bre'n-bar*, *Un'fe'r-brén-lich*. See **INCOMBUSTIBLE**.

UNVERDAULICH (Ger.), adj. *Un'fe'r-da-ü-lig*. See **INDIGESTIBLE**.

UNVERDAUUNG (Ger.), n. *Un'fe'r-da-ü-ung*. See **INDIGESTION** (1st def.).

UNVERMÖGEN (Ger.), n. *Un'fe'r-mü-g-e-n*. See **IMPOTENCE**.

UNVERTRÄGLICH (Ger.), adj. *Un'fe'r-trag-lig*. See **INCOMPATIBLE**.

UNVOLLKOMMEN (Ger.), adj. *Un'fol-ko-m-me-n*. See **IMPERFECT**.

UNWELL, adj. *Un'we-l*. 1. Sick, affected with illness. [a, 48.] 2. See **MISTRUCIOUS** (2d def.).

UNWILLKÜRLICH (Ger.), adj. *Un'völ-ku-r-lig*. See **IN-VOLUNTARY**.

UNWOHLSEIN (Ger.), n. *Un'vol-zin*. Indisposition. [L, 57.]

UNWURZELKEIMER (Ger.), n. pl. *Un'wurts-el-kim-e'r*. See **ARRIZOBLASTÆ**.

UNXIA (Lat.), n. f. *Un'xi-a* (un'xi-a). Fr., *unxie*. A genus of the Compositæ, referred by Bentham and Hooker to *Melanopodium*. [a, 35.]—**U. camphorata**. A Surinam species; used as a sudorific, and especially as an application in lumbago. [a, 35.]

UNZEITIG (Ger.), adj. *Un'tsit-ig*. Premature, immature. [A, 521 (a, 48).]

UNZÄHLGHEIT (Ger.), n. *Un'tsu-lan-tig*. See **INSUFFICIENCY**.

UNZURECHNUNGSFÄHIG (Ger.), adj. *Un'tsu-re-cht-nun-z-fa-lig*. Not accountable, irresponsible. [a, 14.]

UPAS (Mal.), n. *Upa's*. A poison, especially the *U. antiar* and *U. tieute*. [a, 35.]—**U. antiar**. See **ANTIAR**.—**U. bidji**. See **SOPHORA tomentosa**.—**U. radja**, *U. tieute*. A poison more active than the *antiar* u., prepared from a decoction of the root-bark of *Strychnos tieute*, mixed with garlic, pepper, etc. It resembles strychnine in its effects. [a, 35.]—**U. tree**. See **ANTIARIS toxicaria**.

UPPER BLUE LICK SPRINGS, n. *Up'p'le-bh-lig*. A place in Nicholas County, Kentucky, where there is a gaseous and sulphurous spring. [Anderson (a, 14).]

URACHAL, adj. *U'r-a-k'al*. Pertaining to the urachus.

URACHUS (Lat.), n. m. *U'r(u)r-a-k'us* (a'k'us). From *ovop*, urine, and *eyeu*, to hold. Fr., *ovraque*. Ger., *Harngang*, *Harnröhre*, *Harnblasehahn*, *Blasenband*. In the embryo, a tubular extension of the walls of the urinary bladder toward and in part through the umbilicus to join the allantois; in the human embryo it does not generally pass beyond the root of the umbilical cord. In the adult, a ligamentous cord resulting from obliteration of the u. of the embryo connecting the bladder with the front wall of the abdomen. [A, 5; L, 12 (a, 27).]

URACASIA (Lat.), **URACRATIA** (Lat.), n's f. *U'r(u)r-a-k'-(a'k)-raz* (ra's)/2-a', *ra'sh* (ra's)/2-(e'a'). From *ovop*, urine, and *axapia*, or *akapata*, debility. See **ENURESIS**.

URÆMIA (Lat.), n. f. *U'r(u)r-em'ia* (e'm'i-a). From *ovop*, urine, and *ajma*, blood. Fr., *urémie*. Ger., *Urimie*, *Harnstoff-blutvergiftung*. A poisoned state of the blood due to defective elimination of the elements of urine in consequence of impairment of the functional capability of the kidneys, or by their resorption in cases of retention of urine; characterized by stupor and, especially in lying-in women, by convulsions.—**Dyspnoic u.**, **Pulmonary u.** See **URÆMIC DYSPNOEA**.—**Renal u.** U. caused by retention of urine in the kidneys. [L, 57 (a, 14).]—**Ureteral u.** U. caused by

retention of urine in the ureters. [L, 57 (a, 14).]—**Urethral u.** U. caused by constriction of the urethra and consequent retention of urine. [L, 57 (a, 14).]—**Vesical u.** U. caused by retention of urine in the bladder. [L, 57 (a, 14).]

URÆMIC, adj. *U'r-em'ig*. Lat., *uræmicus*. Fr., *urémique*. Ger., *urämisch*. Pertaining to or due to uræmia. [D.]

URAGOGUS (Lat.), adj. *U'r(u)-a-g'og-us* (u's). From *ovop*, urine, and *eyeu*, to drive. Fr., *uragogue*. See **DIURETIC**.

URAL, n. *U'r'al*. Lat., *uralium*. A hypnotic combination of urethane and chloral hydrate; used in cardiac disease, mental disorders, and hysteria. [N. Y. Med. Jour., Feb. 1, 1890, p. 180.]

URALI, n. *U'r-a-lie*. See **CURARE** (1st def.).

URALIUM (Lat.), n. *U'r(u)-a-l'ium* (u'm). See **URAL**.

URAMIDOBENZOIC ACID, n. *U'r-a'm'id-o-b'e'n-zö-o'ig*. Fr., *acide uramidobenzoïque*. Ger., *Uramidobenzoësäure*. An acid, $C_{12}H_9NO_5$, known in three isomeric forms: *Orthou' acid*, acicular crystals; *metau' acid*, acicular or prismatic crystals containing water of crystallization; and *parau' acid*, long tabular crystals. [B, 5 (a, 38).]

URAMIDOXIME, n. *U'r-a'm'id-o-x'im*. A body having at once the structure of a substituted urea and of an amidoxime. [B.]

URAMIL, n. *U'r-a-m'iel*. Fr., *uramile*. Ger., *U* of Liebig and Wöhler, dialuramide. [B, 4.]

URANALYSIS (Lat.), n. f. *U'r(u)-a-n'ia* (a'n')/2-(a'l')/2-(s'u's)-ia. Ger., *uranalys* (*-lysis*). From *ovop*, urine, and *análysis*, a loosing. The analysis of urine.

URANATE, n. *U'r-a-n'at*. A compound of a metallic oxide with uranium trioxide. [B, 3.]

URANE (Fr.), n. *U'r-a-n*. A substance long considered an elementary body, but now shown to be a uranium oxide. [B.]

URANFÄHLICH (Ger.), adj. *U'r-a-n-fan-tig*. See **PARIMORDIAL**.

URANIC, adj. *U'r-a-n'ig*. Fr., *uranique*. Containing uranium as a hexad radicle. [B.]

URANIN, n. *U'r-a-n'in*. 1. A compound of fluorescein with ammonia. [Dtsch. med. Wchnscr., 1882, 2, 3, 4 (B).] 2. A dye-stuff, $C_{20}H_{10}O_4Na_2$, the sodium salt of fluorescein. [B, 270 (a, 38).]

URANISCHOCASMA (Lat.), n. *U'r(u)-a-n'ia* (a'n')/2-(s'u's)-ka-s'm'a/s'm'a. Gen., *-chas'matos* (-atis). From *ovapiavkos*, the palate, and *σχάσμα*, a yawning. See **CLEFT PALATE**.

URANISCONTIS (Lat.), n. f. *U'r(u)-a-n'ia* (a'n')/2-(s'u's)-i(-e)-tis. Gen., *-itidos* (-idis). From *ovapiavkos*, the palate, *Fr.*, *palatite*. Ger., *Gaumenentzündung*. Inflammation of the palate. [E.]

URANISCOPELASTY, n. *U'r-a-n'is-k'o-pla'st'ig*. Lat., *uraniscoplasticæ* (from *ovapiavkos*, the palate, and *πάσσω*, to mold). Fr., *uraniscoplasticæ*. See **URANOPLASTY**.

URANISCORRHAPHY, n. *U'r-a-n'is-k'o-r'a-f'ig*. Lat., *uraniscorrhaphia*, *uraniscorrhaphie* (from *ovapiavkos*, the palate, and *ῥαφή*, a suture). Fr., *uraniscorrhaphie*. See **STAPHYLORRHAPHY**.

URANISCOSTEOPLASTIE (Fr.), n. *U'r-a-n'is-k'o-sta-o-pla'st'e*. Restoration of the osseous palat by a plastic operation.

URANISCUS (Lat.), n. m. *U'r(u)-a-n'ia* (a'n')/2-(s'u's)-us. Ger., *ovapiavkos* (from *ovapiav*, the vault of heaven). The vault of the mouth, the palate. [a, 48.]

URANIUM (Lat.), n. *U'r(u)-a-n'ium* (u'm). Fr., *u.* Ger., *Uran*. A metallic element discovered by Klaproth in 1789, eight years after the discovery of the planet Uranus, from which it was named. It occurs in nature usually as an oxide. It is a hard, malleable, grayish-white metal of silvery lustre. In composition it acts as a tetrad, pentad, or hexad. Symbol, *U*; sp. gr. 18.33; atomic weight, 240. [B, 3.]—**U. tetroxide**. A body, UO_4 , forming either a colorless micro-crystalline powder, or, combined with water of crystallization, $UO_4 \cdot 2H_2O$, a yellowish-white substance. [B, 3.]—**U. trioxide**. A brownish-yellow powder, $UO_3 = (UO_2)_2O$. [B, 3.]

URANLAGE (Ger.), n. *U'r-a-n-lag-e*. A primary rudiment; a germ. [A, 8.]

URANOCOLOBOMA (Lat.), n. *U'r(u)-a-n'ia* (a'n')/2-(s'u's)-o-b'oma/s'oma. Ger., *-bom'atos* (-atis). From *ovapiavkos*, the palate, and *κολοβωμα*, mutilation. See **CLEFT PALATE**.

URANOMANIA (Lat.), n. f. *U'r(u)-a-n'ia* (a'n')/2-(s'u's)-man'ia. From *ovapiavkos*, heaven, and *μανία*, madness. A form of megalomania involving belief in the subject's divine or celestial origin. [A, 540 (a, 34).]

URANOPLASTIC, adj. *U'r-a-n'ia* (a'n')/2-(s'u's)-ig. Fr., *uranoplasticæ*. Ger., *Tranoplastik*. Pertaining to uranoplasty. [L, 197.]

URANOPLASTY, n. *U'r-a-n'ia* (a'n')/2-(s'u's)-ia. From *ovapiavkos*, the palate, and *πάσσω*, to mold). Fr., *uranoplasticæ*, *uranoplasticæ*. Ger., *Gaumenbildung*, *Tranoplastik*. The plastic surgery of the palate. Cf. **STAPHYLORRHAPHY**.—**Dieffenbach's u.**, **Fergusson's u.** An operation in which the edges of the hard palate are first drilled with holes with a curved Bradawl for the passage of the threads; the palate itself is then cut through with a chisel in a line parallel to and half an inch from the edge of the cleft; the edges are thus brought together, and the spaces left where the cuts are made by the chisel are allowed to heal by granulation. [E.]—**Mason's u.** An operation in which the holes are first drilled with a curved Bradawl through the hard palate on each side of the cleft to facilitate the use of the chisel and guide it in the division of the bone. [E.]

URANORRHAPHIE (Lat.), **URANORRHAPHIA** (Lat.), n's f. *U'r(u)-a-n'ia* (a'n')/2-(s'u's)-r'a-f'ig (-e-a), *-r'a-s* (r'a-f')/2-a'. Gen., *-rhap'h'es*, *-rhap'h'ie*. From *ovapiavkos*, the palate and *ῥαφή*, a suture. See **STAPHYLORRHAPHY**.

URANOSCHISIS (Lat.), **URANOSCHISMA** (Lat.), n. s. f. and n. $U_2(ur)-a^2(na^2n)-o^2sk(o^2sch^2)/P's-a^2s$, $-o(o^2)-ski^2(sch^2P's)/ma^2$. Gen., *-schis'eos (-osch'isis)*, *-schis'matos (-atis)*. From *urānos*, the palate, and *σχίζω*, to cleave. See *Cleft PALATE*.

URANOSO-URANIC, adj. $U_2r-a^2n-os'/o-o^2-a^2n-i^2k$. Containing uranium both as a tetrad and as a hexad radicle. [B.]

URANO-STAPHYLOKRAPHY, n. $U_2r'-a^2n-o-sta^2f-i^2l-o^2r-a^2f-i^2$. From *urānos*, the palate, *σταφυλή*, the uvula, and *ράφω*, a suture. Suture of the hard and of the soft palate. [a, 34.]

URANOUS, adj. $U_2r'-a^2n-u's$. Fr., *uranéux*. Containing uranium as a tetrad radicle. [B.]

URANOXYD (Ger.), n. $Ur-a^2n'-ox-u^2d'$. Uranium trioxide; in composition with a qualifying adjective, a salt of uranyl. [B.]

URANOXYDUL (Ger.), n. $Ur-a^2n'-ox-u^2d-ul'$. Uranium dioxide; in composition with a qualifying adjective, a uranous oxy-salt. [B.]

URANYL, n. $U_2r'-a^2n-i^2l$. Fr., *uranylle*. The dibasic radicle, UO_2' , supposed to be present in the uranic compounds. [B, 2, 3.]—**U. acetate**. A substance, $UO_2(C_2H_3O_2)_2+H_2O$, proposed as a test for albumin. [B.]—**U. and ammonium carbonate**. A lemon-colored, crystalline salt, $UO_2CO_3 \cdot (NH_4)_2CO_3$. [B.]—**U. and ammonium phosphate**. A greenish-yellow substance, $UO_2(NH_4)_2PO_4$, formed in one of the processes for the volumetric determination of phosphoric acid and also of uranium. [B.]—**U. and calcium carbonate**. An apple-green substance, $UO_2CO_3CaCO_3+10H_2O$, occurring native as a mineral. [B.]—**U. and potassium carbonate**. A crystalline salt, $UO_2CO_3 \cdot 3K_2CO_3$. [B.]—**U. and potassium fluoride**. A body, $UO_2F_2 \cdot 3KF$, forming lemon-colored crystals. [B.]—**U. arsenate**. A compound of u. and arsenic acid. Salts of the constitution $(UO_2)_3(AsO_4)_2+12H_2O$ and $(UO_2)_3HAsO_4+4H_2O$ are known. [B, 2, 3.]—**U. bromide**. A body, UO_2Br_2 , forming yellow acicular crystals. [B, 3.]—**U. borate**. A compound of u. and carbonic acid. Double carbonates of u. and the alkaline metals and earths are known. [B.]—**U. chloride**. A yellow crystalline mass, UO_2Cl_2 , or, combined with water of crystallization, $UO_2Cl_2 \cdot H_2O$. It forms double salts with the chlorides of the alkaline metals and with the hydrochlorides of organic basic compounds. [B, 3.]—**U. disulphate**. See *pyrosulphate*.—**U. fluoride**. A light-colored amorphous mass, UO_2F_2 . It forms double salts with the fluorides of potassium, sodium, ammonium, and barium. [B, 3.]—**U. hydroxide**. A yellowish mass, $UO_2(OH)_2+H_2O$. [B, 3.]—**U. nitrate**. A body, $UO_2(NO_3)_2+6H_2O$, forming prismatic crystals. [B, 3.]—**U. oxide**. See *URANIUM trioxide*.—**U. peruranate**. See *URANIUM tetroxide*.—**U. phosphate**. A compound of u. and phosphoric acid; the salt $UO_2(H_2PO_4)_2+3H_2O$, or $2UO_2(H_2PO_4)_2+3H_2O$, is known. [B, 3.]—**U. pyrosulphate**. A crystalline compound, $UO_2S_2O_7$. [B, 3.]—**U. sulphate**. A substance, $UO_2SO_4+3H_2O$, crystallizable with difficulty. It forms a green compound with sulphuric acid, $UO_2SO_4+H_2SO_4$, and double sulphates with the alkaline metals. [B, 3.] See also *U. pyrosulphate*.—**U. sulphide**. The compound UO_2S . [B, 3.]

URAPOSTEMA (Lat.), n. n. $U_2r(ur)-a^2p(a^2p)-o^2st-em(am)/a^2$. Gen., *-em'atos (-atis)*. From *urānos*, urine, and *ἀρσστημα*, an abscess. An abscess containing urine. [E.]

URARI, n. $U_2r-a^2r'e$. See *CURARE*.

URAROMA (Lat.), n. n. $U_2r(ur)-a^2r(a^2r)-om/a^2$. Gen., *-om'atos (-atis)*. From *urānos*, urine, and *ῥωμα*, a spice. Ger., *Harnaroma*. A special musk-like odor said to have been observed in the urine of gouty persons and of some animals. [L, 50 (a, 14).]

URARTHRIITIS (Lat.), n. f. $U_2r(ur)-a^2th-r(i)-f(re)/t'i's$. Gen., *-thrit'idios (-idis)*. From *urānos*, urine, and *ἄρθρον*, a joint. See *ARTHRITIS uratica*.

URATE, n. U_2r-at . Lat., *uras*. Fr., u. Ger., *harnsaures Salz*. A salt of uric acid. [K.]

URATOSIS (Lat.), n. f. $U_2r(ur)-a^2t(a^2t)-os'i's$. Gen., *-os'eos (-is)*. From *uras*, a urate. The precipitation of crystalline urates in the tissues or fluids of the body. [W. Roberts, "Brit. Med. Jour.," Nov. 22, 1890 (a, 34).]

URATURIA (Lat.), n. f. $U_2r(ur)-a^2t(a^2t)-u^2r(ur)/i^2a^2$. From *uras*, a urate, and *urānos*, urine. Ger., *Uraturie*. An abnormal excretion of urates in the urine. [L, 50 (a, 14).]

URAWEL, n. A place in the Caucasus where there is an alkaline and ferruginous spring. [L, 57 (a, 14).]

URBALACONE (It.), n. $Ur-ba^2l-a^2s-ko^2na$. A place in Corsica where there are hot sulphurous springs. [a, 14.]

URBANYA, n. $U_2r-ba^2n-ya^2$. A place in the department of the Pyrénées-Orientales, France, where there is a chalybeate spring.

URBEROAGA DE ALZOLA (Sp.), n. $Urb-ar-o-a^2g/a^2s$ da a^2l-tha^2o/la^2 . A place in Guipuzcoa, Spain, where there is a warm mineral spring. [L, 49, 57 (a, 14).]

URBEROAGA DE UBIELLA, n. $Urb-ar-o-a^2g/a^2s$ da $Ub-e^2l/ya^2$. A place in Biscay, Spain, where there is a warm saline spring. [L, 57 (a, 14).]

URBILD (Ger.), n. $Ur-b'i^2ld$. See *ARCHETYPE*.

URCEOLARIA (Lat.), n. f. $U_2rs(ur)-ic-e^2-o^2l-ar(a^2r)/i^2a^2$. From *urceolus*, a little pitcher. Fr., *urcéolaire*. Ger., *Krugflechte*. A genus of lichens. The *Urceolariaceae* (*Urceolarieae*, *Urceolarinæ*) are a subfamily of the *Lecanoreae*. [a, 35.]—**U. esculenta**. A species used as food in northern Russia. [a, 35.]

URCEOLATE, adj. $U_2rs'e^2-o^2l-at$. Lat., *urceolatus* (from *urceolus*, a little pitcher). Fr., *urcéolé*. Ger., *krugig*. Urn-shaped. [a, 35.]

URCEOLUS (Lat.), n. m. $U_2rs(ur)-ic-e^2-yo^2l-u^2s(u^2s)$. Dim. of *urceus*, a pitcher. Fr., *urcéole*. Ger., *Krug*. Any one of various urn-shaped parts (e. g., the calyx-tube of roses or [De Candolle] the

perigynium of the *Caricææ*). [a, 35.]—**U. nectarifer**. Ger., *Honigkrug*. The urceolate (often nectariferous) perianth of *Mirabilis*, *Balanites*, etc. [a, 35.]

URDARM (Ger.), n. $Ur-da^2rm$. See *ARCHENTERON* and *BLASTOCÆLE*.

UREA (Lat.), n. f. $U_2r(ur)-e(a)/a^2$. From *urānos*, urine. Fr., *urée*. Ger., *Harnstoff*. Carbamide, or carboxyldiamine, $CON_2H_4 = O \begin{smallmatrix} O \\ \parallel \end{smallmatrix} NH_2$ (or $H_2N-(CO)-NH_2$), the chief solid constituent of the urine and the principal excretory product containing nitrogen. It forms long, colorless, prismatic crystals, melting at 130° C., soluble in water and moderately soluble in alcohol. It acts as a base, forming addition compounds with acids and their salts and with metallic oxides. It is decomposed by heat and moisture, and more slowly by the action of an organized ferment (*Micrococcus ureæ*), into normal ammonium carbonate. This process takes place in the urine, constituting its so-called alkaline fermentation and giving to stale urine its peculiar strong ammoniacal odor. U. is also decomposed into cyanogen compounds (cyanuric acid and ammeline) by the action of dry heat. It is remarkable as being the first organic body that was prepared artificially. Wöhler having accomplished this in 1828 by making the isomeric cyanate of ammonium, and then transforming the latter into u. by evaporation. [B.]—**U. mesoxalyt**. See *ALLOXAN*.—**U. and mercuric nitrate**. An addition compound of varying composition formed by the action of mercuric nitrate on u. [B.]—**U. argentic oxide**. Ger., *Harnstoffsilberoxyd*. A grayish granular substance, $2CO.N_2H_4.3Ag_2O$. [B.]—**U. cyanurate**. See *TETRURET*.—**U. hydrochloride**. A deliquescent crystalline mass, $CON_2H_4.HCl = H_2N-CO-NH_2Cl$, formed by the action of dry hydrochloric acid gas on u. [B.]—**U. mercuric oxide**. Ger., *Harnstoffquecksilberoxyd*. 1. A white crystalline powder, $CON_2H_4.HgO$. 2. A gelatinous substance, $2CON_2H_4.3HgO$. 3. The compound $CON_2H_4.2HgO$. [B.]—**U. nitrate**. A substance, $CON_2H_4.HNO_3 = H_2N-CO-N_2HONO_2$, forming tabular crystals on the addition of nitric acid to a solution of u. (concentrated urine). [B.]—**U. oxalate**. A substance, $2CON_2H_4.H_2C_2O_4+2H_2O = H_2N-CO-NH_3.O.C_2O_4.O.H_2N-CO-NH_3+H_2O$, forming laminar crystals, and produced by the action of oxalic acid on a rather concentrated solution of u. [B.]—**U. sodiochloride**. A substance, $CON_2H_4.NaCl + H_2O$, obtained as a crystalline body by evaporating a solution containing both u. and sodium chloride urine. [B.]

URECHYSIS (Lat.), n. f. $U_2r(ur)-e^2k(k'i^2s(ch^2u^2s)/i^2s$. Gen., *-chys'eos (-ec'hysis)*. From *urānos*, urine, and *ὑρεχυσ*, a pouring out. Fr., *urechysse*. Ger., *Harnergussung*. Effusion of urine into the cellular tissue. [L, 50 (a, 14).]

URECHITES (Lat.), n. f. $U_2r(ur)-e^2k(e^2ch^2)/i^2t-ez(as)$. A genus of West Indian and Mexican apocynaceous undershrubs. [a, 35.]—**U. suberecta**. The *Echites suberecta*. [a, 35.]

URECHITIN, n. $U_2r-e^2k-i^2n$. From *urechites* (q. v.). A glucoside, $C_{28}H_{48}O_8 + XH_2O$, obtained by Bowrey from the leaves of *Urechites suberecta*. [B, 270 (a, 38).]

URECHITOXIN, n. $U_2r-e^2k-i^2to^2x/i^2n$. From *urechites* (q. v.), and *τόξον*, a bow. Of Bowrey, a glucoside obtained from the leaves of *Urechites suberecta*. [B, 270 (a, 38).]

UREDIO (Lat.), n. f. $U_2r(ur)-ed(ad)/o$. Gen., *-ed'inis*. From *urere*, to burn. Fr., *urédio*. Ger., *Schmierbrand* (3d def.). 1. Itching with a sensation of burning. 2. Urticaria. 3. The typical genus of the *Urediei* (of Fries, a subdivision of the *Uredineæ*). The *Uredineæ* of Lindley are the *Contomyces* of Fries. The *Uredineæ* (Ger., *Uredineen*, *Rostpilze*), or *Uredineæ* (Fr., *urédinees*), are a division of the *Hymenozonia*, parasitic as yellowish, brownish, or blackish spots (rusts) on the stems and leaves of various plants. Some of them are very destructive to crops (cf. *Corn-mildew*). [a, 35.]—**U. maydis**. See *USTILAGO maydis*.

UREDOSPORA, n. $U_2r-e^2d'o-spor$. From *uredo*, a blast, and *σπόρος*, a sowing. One of the yellowish spores (see under *Corn-mildew*) formed early in the season by the *Uredineæ*. U's are produced from a mycelium growing within a grass or other plant, on which they form rust-like spots. [a, 35.]

URÉE (Fr.), n. U_2-ra . See *UREA*.

UREI (Ger.), n. *Uri*. See *PRIMITIVE OVUM*.

URELCOMA (Lat.), n. n. $U_2r(ur)-e^2lk-om/a^2s$. Gen., *-om'atos (-atis)*. Ger., *Harngeschwür*. An ulcer of the urinary passages. [a, 34.]

URELOSIS (Lat.), n. f. $U_2r(ur)-e^2lk-os/i^2s$. Gen., *-cos'eos (-is)*. From *urānos*, urine, and *ἄλκωσις*, ulceration. Fr., *urelécose*. 1. Ulceration in the urinary tract. 2. Of Fuchs, any one of certain forms of ulceration, especially on the legs, supposed to be due to irregularities in the urinary secretion. [G, 5.]

UREMA (Lat.), n. n. $U_2r(ur)-em(am)/a^2s$. Gen., *-em'atos (-atis)*. Gr., *οὐρῆμα* (from *urānos*, urine). See *URINE*.

URÉMIE (Fr.), n. $U_2-ra-me$. See *URÉMIA*.

URENA (Lat.), n. f. $Ur-an/a^2$. Fr., *urène*. Indian mallow; a genus of tropical herbs and shrubs forming, with *Pavonia*, *Malva-viscus*, etc., a tribe (the *Urenææ*) of the *Malvaceæ*. [a, 35.]—**U. heterophylla**. An Indian species. The root is used in snake-bites. [a, 35.]—**U. lobata**. A species found in southeastern Asia. The flowers are used as an emollient and expectorant, the leaves as a vulnerary, and the root as an oxytocic. [a, 35.]—**U. scabripuscula**. A shrub found from India to Brazil. The flowers are used as a pectoral, and the root and stem for flatulent colic. [a, 35.]

URENIUM (Lat.), n. n. $U_2r(ur)-en(an)/i^2-u^2m(u^2m)$. See *UREA*.

URENS (Lat.), adj. $U_2r(ur)-e^2nz(ans)$. Gen., *-en'tia*. From *urere*, to burn. Stinging, having stinging hairs. [a, 35.]

UREO-CARBONIC ACID, n. $U_2r-e^2'o-ka^2rb-o^2n-i^2k$. See *ALLOPHANTIC acid*.

UREORRHŒA (Lat.), n. f. $U^2r(ur)-e^2o-r^e(ro^2e^2)-a^2$. From $\acute{\upsilon}\rho\acute{o}\varsigma$, urine, and $\rho\acute{\alpha}\nu\alpha$ flowing. Fr., *urorrhée*. Excessive flow of urine, diabetes. [L, 50 (a, 14).]

URESIÆSTHESIS (Lat.), n. f. $U^2r(ur)-e^2s(as)-i^2e^2s(a^2e^2s)-th(e)th(a)s^2s$. Gen., *-thes^2eos (-is)*. From $\acute{\upsilon}\rho\acute{o}\varsigma$, urination, and $\alpha\iota\sigma\theta\eta\varsigma$, sensation. Fr., *urésisthèse*. Ger., *Usserigsein*. A persistent inclination to urinate. [L, 50 (a, 48).]

URESIS (Lat.), n. f. $U^2r(ur)-e(a)s^2s$. Gen., *-es^2eos (-is)*. Gr., $\acute{\upsilon}\rho\acute{o}\varsigma$ (from $\acute{\upsilon}\rho\acute{o}\varsigma$, to urinate). Fr., *urée*. See URINATION.

URETER (Lat.), n. m. $U^2r(ur)-et(at)^2r(ar)-e^2r^e(-is)$. Gr., $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$. Fr., *urètre*. Ger., *Harnleiter*. The tube continuous with the pelvis of the kidney, which transports the urine to the bladder. It consists of an external fibrous, an internal mucous, and an intervening muscular coat, is about fifteen or sixteen inches in length, the size of a goose-quill, and descends beneath the peritoneum to the point of reflection of the posterior false ligament of the bladder, between the folds of which it passes to the side of the bladder along which it runs, and pierces it obliquely about an inch and a half to two inches posterior to the opening of the urethra. [L, 31, 142, 332.]

URETERALGIA (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-a^2l^2(a)s^2l^2g^2-$
 i^2a^2 . From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\acute{\alpha}\lambda\gamma\alpha$, pain. Fr., *urétéralgie*. Ger., *Harnleiterschmerz*. Pain in the ureter. [L, 50 (a, 14).]

URETERIC, adj. $U^2r-e^2t-e^2r^e(-is)$. Fr., *urétérique*, *urétéral*. Ger., *uretrisch*. Pertaining to the ureters.

URETERITIS (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-(i)e^2t^2is$. Gen., *-it^2idos (-idis)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter. Fr., *urétérisme*. Ger., *Harnleiterentzündung*. Inflammation of the ureter. [L, 14.]

URETERODIALYSIS (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)d^2i^2d^2is^2(a)s^2l^2(a)s^2l^2is^2$. Gen., *-ys^2eos (-olysis)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\acute{\alpha}\lambda\gamma\alpha$, dissolution. Fr., *urétérodialyse*. Ger., *Harnleiterverletzung*. Injury to or rupture of the ureter. [L, 14.]

URETEROLITHIASIS (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)l^2ith^2i^2a^2s^2is^2$. Gen., *-as^2eos (-is)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\lambda\iota\theta\iota\alpha\varsigma$, lithiasis. Fr., *urétérolithiase*. The formation or presence of a calculus in the ureter. [L, 50 (a, 14).]

URETEROLYSIS (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o^2l^2i^2s^2is^2$. Gen., *-ys^2eos (-olysis)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\lambda\upsilon\sigma\iota\varsigma$, a loosing. Ger., *Harnleiterlähmung* (1st def.). 1. Paralysis of the ureter. [L, 50 (a, 14).] 2. See URETERODIALYSIS.

URETEROPHLEGMA (Lat.), n. n. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)-f^2le^2g^2ma^2$. Gen., *-phle^2gmatis (-atis)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\phi\acute{\lambda}\epsilon\gamma\mu\alpha$, *uréterophlegme*. Ger., *Harnleiterverschleimung*. An accumulation of mucus in the ureter. [L, 14.]

URETEROPHLEGMASIA (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)-f^2le^2g^2ma^2z^2ia^2s^2is^2$. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\phi\acute{\lambda}\epsilon\gamma\mu\alpha$, *uréterophlegmasie*. Fr., *urétérophlegmasie*. See URETERITIS.

URETEROPYOSIS (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)-pi^2(pu)^2os^2is^2$. Gen., *-os^2eos (-is)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\pi\acute{o}\varsigma$, pus. Fr., *urétéropyose*. Ger., *Harnleitervereiterung*. Suppuration of the ureter. [L, 50 (a, 14).]

URETERORRHAGIA (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o^2r^2aj^2(r)a^2g^2i^2a^2$. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\rho\acute{\eta}\nu\upsilon\sigma\theta\alpha$, to burst forth. Fr., *urétérorrhagie*. Ger., *Harnleiterblutung*. Hemorrhage from the ureter. [L, 50 (a, 14).]

URETERORRHAPHY, n. $U^2r-e^2t-e^2r^e(-is)-r^2h^2a^2f^2y$. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\rho\acute{\alpha}\phi\eta$, a suture. Suture of the ureter. [a, 34.]

URETEROSTEGNOSIS (Lat.), n. f. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)-st^2eg^2nos^2is^2$. Gen., *-nos^2eos (-is)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\sigma\tau\acute{\epsilon}\gamma\nu\omega\varsigma$, stenosis. Fr., *urétérosténose*. Stricture of the ureter. [L, 50 (a, 14).]

URETEROSTOMIA (Lat.), n. n. $U^2r(ur)-e^2t(at)-e^2r(ar)-o(-o^2)-st^2eg^2nos^2is^2$. Gen., *-om^2atos (-atis)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\sigma\tau\acute{o}\mu\alpha$, a contraction. Fr., *urétérostomie*. Ger., *Harnleiterverengerung*. Contraction of the ureter. [L, 50 (a, 14).]

URETEROSTOMA (Lat.), n. n. $U^2r(ur)-e^2t(at)-e^2r(ar)-o^2st^2eg^2nos^2is^2$. Gen., *-om^2atos (-atis)*. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\sigma\tau\acute{o}\mu\alpha$, the mouth. Fr., *urétérostome*. Ger., *Harnleitermündung*. The mouth of the ureter, either in the pelvis of the kidney or in the bladder. [L, 41, 50 (a, 14).]

URETEROTOMY, n. $U^2r-e^2t-e^2r^e(-is)-o^2t^2om^2y$. From $\acute{\upsilon}\rho\acute{o}\tau\eta\rho$, the ureter, and $\tau\omicron\mu\eta$, a cutting. Fr., *urétérotomie*. Ger., *Harnleiterschchnitt*. Ureterotomy. An incision into the ureter. [a, 14.]

URETERO-VAGINAL, adj. $U^2r-e^2t-e^2r^e(-is)-v^2a^2g^2i^2n^2al$. Pertaining to the ureter and the vagina.

URETERO-UTERINE, adj. $U^2r-e^2t-e^2r^e(-is)-u^2t^2er^2i^2n^2e$. Pertaining to the ureter and the uterus.

URETHANE, n. U^2r-e^2th-an . Lat., *urethanum*. Fr., *uréthane*. Ger., *Urethan*. 1. Of Dumas, ethyl carbamate, so called because regarded as a compound of urea with ethyl carbonate $[2CO_2 + NH_2 = CON_2H_4(C_2H_5)_2CO_2]$. It acts as a hypnotic. 2. Any one of the carbamates of a hydrocarbon radicle. [B.]—Methyl u. See METHYL CARBAMATE.

URETHRA (Lat.), n. $U^2r(ur)-eth(ath)^2ra^2$. Gr., $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$ (from $\acute{\upsilon}\rho\acute{o}\varsigma$, to urinate). Fr., *urètre*, *urètre*. Ger., *Harnröhre*. The tube, consisting of an internal mucous coat and an external coat made up of two layers of muscular fibres, the internal being longitudinal and the external circular, which serves for voiding the urine, and in the male sex for the ejaculation of the semen. In the adult male it is about 9 inches in length and forms a portion of the penis. It is divided into three portions: the prostatic, where it passes through the prostate gland; the membranous, or intermediate part; and the spongy, or that which is surrounded by erectile tissue (the corpus spongiosum). Its mucous lining is freely supplied, ex-

cept near the meatus urinarius, with a large number of glands (glands of Littré) and pouch-like recesses. Into the prostatic portion the ejaculatory ducts open. Except during the passage of urine or semen it is collapsed, with its longest diameter directed transversely. In the female it is about 1½ inch in length, is highly distensible, and is lodged in the anterior wall of the vagina. [L, 31, 142, 172, 332.]—Irritable u. Hyperæsthesia or neuralgia of the u. [a, 34.]—Penile u. Penile u. That portion of the u. which is lodged within the penis.—Posterior u. See PREVENTAL U.—Pouched u. Of Fenwick, a sacculated u. [“Lancet,” 1886, ii, p. 820 (a, 34).]—Prevesical u., Prostatic u. The prostatic portion of the u. (q. v.). [L.]—Second u. The deep part of the u.

URETHREMORRHAGIA (Lat.), n. f. $U^2r(ur)-e^2th(ath)-re^2m(-ra^2)-e^2m(-ra^2)-r^2aj^2(r)a^2g^2i^2a^2$. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra, $\acute{\alpha}\lambda\gamma\alpha$, blood, and $\rho\acute{\eta}\nu\upsilon\sigma\theta\alpha$, to burst forth. Fr., *urétrémorrhagie*. Ger., *Harnröhrenblutung*. Hemorrhage from the urethra. [L, 50 (a, 14).]

URETHRAL, adj. $U^2r-eth^2r^e(-is)$. Lat., *urethralis*. Fr., *urétral*, *urétral*. Ger., u. Pertaining to, proceeding from, or affecting the urethra. [a, 17.]

URETHRALGIA (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2aj^2(r)a^2g^2i^2-$
 i^2a^2 . From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra, and $\acute{\alpha}\lambda\gamma\alpha$, pain. Fr., *urétralgie*. 1. Pain in the urethra. 2. Gonorrhœa. [L, 50, 57 (a, 14).]

URETHRALS (Lat.), adj. $U^2r(ur)-e^2th(ath)-r^2aj^2(r)a^2g^2i^2a^2$. See URETHRAL; as a n. m., muscular fibres arching over and surrounding the membranous portion of the urethra. [L, 332.]

URETHRAMETER, n. $U^2r-e^2th-ra^2m^2e^2t-u^2r$. See URETHROMETER.

URETHREMPHRASIS (Lat.), n. f. $U^2r(ur)-e^2th(ath)-re^2m(-ra^2)-f^2ra^2x^2(fra^2x)^2is^2$. Gen., *-phras^2eos (-is)*. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra, and $\acute{\epsilon}\mu\phi\alpha\varsigma$, a stopping. Ger., *Harnröhrenverstopfung*. Occlusion or obstruction of the urethra. [L, 41, 50 (a, 14).]

URETHREURYNTER (Lat.), n. m. $U^2r(ur)-e^2th(ath)-r^2u^2r^2int^2(u^2nt)^2u^2r^2ar$. Gen., *-er^2eos (-is)*. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra, and $\acute{\epsilon}\upsilon\upsilon\upsilon\epsilon\iota$, to make wide. Fr., *urétréuryntrère*. Ger., *Harnröhrenausdehner*. A dilating bougie for the urethra. [L, 50 (a, 14).]

URETHRIPRESSOR (Coves) (Lat.), n. m. $U^2r(ur)-eth(ath)^2r^2i^2-$
 r^2i^2- $pr^2e^2s^2sor$. Ger., *-sor^2is*. From *urethra* (q. v.), and *premere*, to press. See CONSTRUCTIO URETHRÆ.

URETHRISMUS (Lat.), n. m. $U^2r(ur)-e^2th(ath)-r^2i^2r^2is^2(mu^2s(-mu^2s))$. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra. Of Otis, spasm of the urethra.

URETHRITIS (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2i^2r^2is^2$. Gen., *-it^2idos (-idis)*. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra. Fr., *urétrite*. Ger., *Harnröhrentzündung*. Inflammation of the urethra, usually gonorrhœa. [E, L, 50 (a, 14).]—Posterior u., Prevesical u. Inflammation of the prostatic urethra.—Rheumatic u. A form of u. occurring in rheumatism, accompanied by a discharge of purulent fluid and other symptoms common to gonorrhœa, but differing from it in the complete absence of gonococci. [Riel, “Lyon méd.,” March 14, 1886; “N. Y. Med. Jour.,” July 10, 1886, p. 54 (a, 34).]—U. anterior acuta. Acute u. affecting the anterior portion of the urethra. [a, 34.]—U. blennorrhœa. See GLEET.—U. catarrhalis. Non-virulent gonorrhœa. [G.]—U. chronica. See GLEET.—U. externa. Of Guérin, a gonorrhœal affection of the follicles surrounding the meatus urinarius externus in either sex. [Ed. Odmansson, “Nord. med. Ark.,” xvii, 5; “Ctblr. f. Chir.,” Feb. 6, 1886, p. 1886.]—U. interna. See GONORRHOEA.—U. interna. Chronic u. accompanied with urethral granulations. [a, 34.]—U. herpeticæ. U. causing herpetic eruptions. [a, 34.]—U. inflammatoria. Acute u. [a, 34.]—U. membranacea. Chronic u. with a membranous formation in the urethra. [a, 34.]—U. membranacea desquamativa. Chronic u. with desquamation of the urethral mucous membrane. [a, 34.]—U. phlyctenulosa. Chronic u. with phlyctenule of the mucous membrane. [a, 34.]—U. pyrrhoica. U. with an abundant purulent discharge. [a, 34.]—U. pyrrhoica contagiosa. See GONORRHOEA.—U. suppurativa. See U. pyrrhoica.—U. venerea. See GONORRHOEA.

URETHRITOPROSTATITIS (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2i^2r^2i^2t^2is^2(-ret)^2o(-o^2)-pr^2os^2t^2at^2is^2(-it^2e)^2is^2$. Gen., *-it^2idos (-idis)*. Fr., *urétritoprostite*. Prostatitis accompanying gonorrhœa. [a, 14.]

URETHRITORCHITIS (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2i^2r^2i^2t^2is^2(-ret)^2o(-o^2)-r^2h^2o^2r^2h^2is^2(-it^2e)^2is^2$. Gen., *-it^2idos (-idis)*. Orchitis complicating gonorrhœa. [L, 30, 50 (a, 14).]

URETHRITOSYPHILLIS (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2i^2r^2i^2t^2is^2(-ret)^2o(-o^2)-s^2i^2p^2h^2il^2is^2(-it^2e)^2is^2$. Gen., *-it^2idos (-idis)*. Syphilis accompanied by gonorrhœa. [L, 30, 50 (a, 14).]

URETHROBLENNORRHOEA (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2h^2o(-ro^2)-ble^2n(-no^2)-r^2h^2o^2r^2h^2is^2(-it^2e)^2is^2$. See GLEET.

URETHRO-BULBAR, adj. $U^2r-eth^2r^e(-is)-r^2o(-ro^2)-b^2ul^2b^2ar$. Fr., *urétrorbulbaire*. Pertaining to the bulb of the urethra. [L, 41 (a, 14).]

URETHROCATAARRHUS (Lat.), n. m. $U^2r(ur)-eth(ath)^2r^2o(-ro^2)-k^2a^2t^2a^2r^2h^2us^2(ru^2s)$. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra, and $\kappa\alpha\tau\acute{\alpha}\rho\rho\omicron\varsigma$, running down. Fr., *urétrorcatarrhe*. Ger., *Harnröhren-catarrh*. Catarrh of the urethra. [L, 50 (a, 14).]

URETHROCELE (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2o(-ro^2)-cel^2le^2$ (a); in Eng., *urthrocele*. Gen., *-celles*. From $\acute{\upsilon}\rho\acute{o}\theta\eta\rho$, the urethra, and $\kappa\epsilon\lambda\eta$, a tumor. Fr., *urétrorcelle*. A hernia-like protrusion of a dilated portion of the urethra (generally such a protrusion of the urethra into the vagina).

URETHROCYSTITIS (Lat.), n. f. $U^2r(ur)-e^2th(ath)-r^2o(-ro^2)-s^2i^2s^2t^2is^2(-it^2e)^2is^2$. Gen., *-it^2idos (-idis)*. Cystitis associated with or consecutive upon urethritis. [a, 34.]

URETHROCYSTOPLYN (Lat.), n. n. $U^2r(ur)-e^2th(ath)-r^2o(-ro^2)-s^2i^2s^2t^2is^2(-it^2e)^2is^2$. Gen., *-it^2idos (-idis)*. An instrument invented by A. Fischer for irrigation of the bladder and urethra; consisting of two catheters, one within the other, the inner one to convey the water

into the bladder and urethra, and the outer one to serve for its outflow. [*"Cribl. f. Chir."*, July 22, 1882, p. 473.]

URETHROCYSTOTOME, *n.* U^r-eth-ro-si²-st-o-tom. From *ὀυρήθρα*, the urethra, *κύστις*, the bladder, and *τέμνω*, to cut. An instrument for performing urethral cystotomy.

URETHRO-CYSTOTOMY, *n.* U^r-eth'-ro-si²-st-o²-tōm-i². Lat., *urethrocystotomia*. Ger., *Harnröhrenblasenschnitt*. Urethral cystotomy.

URETHROGRAPH, *n.* U^r-eth'-ro-gra²f. From *ὀυρήθρα*, the urethra, and *γραφειν*, to write. An instrument devised by G. Herschell for detecting and recording variations in the calibre of the urethra, also their relative situation. [*"Lancet."*, 1884, ii, p. 608.]

URETHROHÆMORRHAGIA (Lat.), *n. f.* U^r-ur-(ur)-eth(ath)'ro(ro)-hæ'm(hæ)'mæ-i²-a²-gîa². From *ὀυρήθρα*, the urethra, *αἷμα*, blood, and *ῥήγνυσθαι*, to burst forth. See URETHROHÆMIA (1st def.).

URETHROLAPAROCYSTIDOTOMIA (Lat.), *n. f.* U^r(ur)-eth(ath)'ro(ro)-la²p(la²)'a²(a²)-o²(o²)-si²st(i²st)-i²d-o²(o²)-tom-(to²m)'i²-a². From *ὀυρήθρα*, the urethra, *λαπάρα*, the flank, *κύστις*, the bladder, and *τομή*, a cutting. Fr., *uréthrolaparocystidotomie*. Combined lateral and suprapubic cystotomy. [L, 30, 50 (a, 14).]

URETHROMETER, *n.* U^r-eth'-ro-m'et-u²r. From *ὀυρήθρα*, the urethra, and *μέτρον*, a measure. Fr., *uréthromètre*. Ger., *U.*

OTIS'S URETHROMETER.

An instrument for measuring the calibre of the urethra.—Otis's *u.* A catheter, part of which consists of several sections which may be spread apart by a screw in the handle. The extent to which there can be separation in any part of the urethra is indicated by a gauge at the handle. [E.]

URÉTHROPATHE (Fr.), *n.* U⁶-ra-ro-pa²t. A person affected with a urethral disease.

URÉTHRO-PÉNIEN (Fr.), *adj.* U⁶-ra-ro-pa-ne-a²n². Involving the urethra and the exterior of the penis.

URETHROPHRAXIS (Lat.), *n. f.* U^r(ur)-e²th(ath)-ro(ro)-frax(i²ra²x)'i²s. See URETHREMPHRAXIS.

URETHROPHYMA (Lat.), *n. n.* U^r(ur)-e²th(ath)-ro(ro)-fim-(fîm)'m'a². Gen., *-phym'atos* (-atis). From *ὀυρήθρα*, the urethra, and *φύμα*, a growth. Fr., *uréthrophymie*. Ger., *Harnröhrengeschwulst*. A swelling of a portion of the urethra. [L, 30, 50 (a, 14).]

URETHROPISTHORRHÆXIS (Lat.), *n. f.* U^r(ur)-e²th(ath)-ro(ro)-pi²sth-o²r-re²x(rax)'i²s. Gen., *-rheæ'os* (-is). From *ὀυρήθρα*, the urethra, *ῥισσιν*, behind, and *ῥήγνυσθαι*, a bursting. Fr., *uréthropisthorrhæxis*. Rupture of the urethra behind a stricture. [A, 322.]

URETHROPLASTY, *n.* U^r-eth-ro-pla²st-i². Lat., *urethroplastica* (from *ὀυρήθρα*, the urethra, and *πλάσσω*, to mold). Fr., *uréthroplastie*. Ger., *Harnröhrenbildung*, *Urethroplastik*. The plastic surgery of the urethra. [E.]

URETHROKRHAGIA (Lat.), *n. f.* U^r(ur)-e²th(ath)-ro²r-raj-(ra²j)'i²-a². From *ὀυρήθρα*, the urethra, and *ῥήγνυσθαι*, to burst forth. Fr., *uréthrorrhagie*. Ger., *Harnröhrenblutfluss* (1st def.). 1. Hemorrhage from the urethra. 2. A discharge from the urethra; gonorrhœa or gleet. [A, 34.]

URETHROKRAPHY, *n.* U^r-e²th-ro²r-a²f-i². Lat., *urethrorraphia* (from *ὀυρήθρα*, the urethra, and *γραφίη*, a seam. Fr., *uréthrorraphie*. Ger., *Harnröhrennaht*. The operation of closing an abnormal opening into the urethra with sutures.

URETHRORRHŒA (Lat.), *n. f.* U^r(ur)-e²th(ath)-ro²r-re²(ro²)'e²-a². From *ὀυρήθρα*, the urethra, and *ῥέω*, a flowing. Fr., *uréthrorrhée*. Ger., *Harnröhrenfluss*. A morbid discharge from the urethra, especially gleet. [L, 30, 50 (a, 14).]

URETHROSCOPE, *n.* U^r-eth-ro-skop. From *ὀυρήθρα*, the urethra, and *σκοπεῖν*, to examine. Fr., *uréthroscope*. Ger., *Urethroskop*. A tubular or fenestrated instrument used to dilate the urethra to permit of examination of its lining membrane. [A, 34.]

URETHROSPASMUS (Lat.), *n. m.* U^r(ur)-e²th(ath)-ro(ro)-spa²z(spa²)'s(mu²s(mu²)). From *ὀυρήθρα*, the urethra, and *σπασμός*, a spasm. Fr., *uréthrospasme*. Ger., *Harnröhrenkrampf*. Spasmodic stricture of the urethra. [L, 57 (a, 50).]

URETHROSTENIA (Lat.). **URETHROSTENOSIS** (Lat.), *n. s. f.* U^r(ur)-eth(ath)'ro(ro)-sti²en(sten)'i²-a²-sîa²-os'i²s. Gen., *-stén'ia*, -os'os (-is). From *ὀυρήθρα*, the urethra, and *στενέω*, to straiten. Fr., *uréthrosténie*, *uréthrosténose*. Ger., *Harnröhrenverengerung*. Stricture of the urethra. [E.]

URETHROSTOLEUS (Lat.), *n. m.* U^r(ur)-eth(ath)'ro(ro)-sti²-si²(su²)-tol(to²)'e²-i²s(u²s). From *ὀυρήθρα*, the urethra, and *στοστόλ*, contraction. Fr., *uréthrostolè*. Of Guthrie, the constrictor urethrae. [L, 30, 50 (a, 14).]

URETHROTOME, *n.* U^r-eth-ro-tom. Lat., *urethrotomus* (from *ὀυρήθρα*, the urethra, and *τέμνω*, to cut). Fr., *uréthrotome*. Ger., *Harnröhrenmesser*. An instrument for dividing strictures of the urethra. [E.]—**Dilating u.**, **Divulsing u.** 1. A combined dilator and u. the two blades of which can be separated equally along their entire length by a screw attachment at the handle, one of the blades carrying the knife in a groove. 2. A divulsor resembling Thompson's, but provided with a cutting blade. [E.]—**Gouley's tunneled u.** A tunneled sound with a convex cutting blade near the end which is guided by a filiform bougie running

through the tunnel. [E.]—**Maisonneuve's u.** A tunneled sound carrying a small cutting blade at the end of a stylet which works

OTIS'S DILATING URETHROTOME.

forward or backward in the tunnel and groove. [E.]—**Ricord's u.** A director-like instrument that conceals a blade which can be extruded after the instrument is introduced into the urethra. [a, 34.]—**Voilemier's u.** A u. resembling Maisonneuve's, but with a blade of different shape and a screw-tip for a filiform bougie. [E.]

URETHROTOMIE (Fr.), *n.* U^r-ra-tro-to-mie. See URETHROTOMY.—**U. d'emblée**. Perineal section for the purpose of searching for the proximal portion of a ruptured urethra. [P. Gueterbock (A, 319).]—**U. sur conducteur** (Fr.). See EXTERNAL URETHROTOMY with a guide.

URETHROTOMY, *n.* U^r-e²th-ro²tōm-i². Lat., *urethrotomia* (from *ὀυρήθρα*, the urethra, and *τομή*, a cutting). Fr., *uréthrotomie*. Ger., *Urethrotomie*. The operation of dividing a stricture of the urethra. [E.]—**Cock's external u.** U. in which the perineum is laid open without a guide, the stricture being impervious. [E.]—**External u.** The operation of dividing a stricture of the urethra by means of an incision through the perineum. [E.]—**External u. with a guide**. External u. in which the stricture is divided on a grooved sound passed into the urethra. [a, 18.]—**Internal u.** The operation of dividing a stricture of the urethra from within. [E.]—**Syme's external u.** U. in which the stricture is divided through the perineum on a grooved director passed through the stricture. [E.]—**Wheelhouse's external u.** An operation in which the urethra is opened in front of the stricture and a grooved probe passed through it into the bladder before its division. [E.]

URETHRO-VAGINAL, *adj.* U^r-eth'-ro-va²j'i²-n'l. Pertaining to the urethra and the vagina. [a, 48.]

URETHRO-VESICAL, *adj.* U^r-eth'-ro-ve²s'i²-k'l. Pertaining to the urethra and the bladder. [a, 48.]

URETHRYMENIA (Lat.), *n. f.* U^r(ur)-e²th(ath)-rim(ru²m)-en(e²n)'i²-a². From *ὀυρήθρα*, the urethra, and *μύμη*, a membrane. Fr., *uréthryménie*. Partial or total occlusion of the urethra by a membranous formation. [L, 50 (a, 14).]

URETHYLANE, *n.* U^r-e²th'i²-an. Fr., *uréthylane*. Methyl carbamate. [B, 2, 93.]

URETIC, *adj.* U^r-e²t'i²k. Ger., *urétrisches* (from *ὀυρον*, urine). Lat., *ureticus*. Fr., *urétique*. 1. Pertaining to urine. 2. Diuretic. [L, 41, 50 (a, 14).]

URÈTRE (Fr.), *n.* U^r-e²tr'. See URETHRA.

URGINEA (Lat.), *n. f.* U^r(ur)'gî-nî'e²-a². From *urgere*, to press. Fr., *urginée*. A genus of the *Liliaceæ*. [a, 35.]—**U. indica**. 1. An Indian and African species. Its tunicated bulb is used like squill, but is said to have little virtue when old and large. 2. A species indigenous to India and Abyssinia. Its bulb, which differs from that of the preceding in being scaly, resembles squill in properties. [a, 35.]—**U. maritima**. *U. scilla*. Fr., *scille maritime*. Ger., *gemeine Meerzwiebel*. Squill, sea-onion, the *σκόλλα* of the ancients; indigenous to Mediterranean regions. The bulb, sliced and dried, official in the U. S. and Br. Ph's as *scilla*, abounds in an acid and even corrosive juice. Squill is used as a diuretic, expectorant, emetic, and purgative. [a, 35.]

URIDROSIS (Lat.), *n. f.* U^r(ur)-hid(hed)-ros'i²s. Gen., -ros'eos (-is). See URIDROSIS.

URIAGE (Fr.), *n.* U^r-e-a²zh. A place in the department of the Isère, France, where there is a warm saline and sulphurous spring. [L, 57 (a, 14).]

URIAS (Lat.), *n. f.* U^r(ur)'i²-a²s(a²s). Gen., -i'ados (-adis). Gr., *ούριος* (from *ὀυρον*, urine). A urinary fistula. [L, 50 (a, 14).]

URIASIS (Lat.), *n. f.* U^r(ur)-i²(i²)'a²s(a²s)-i²s. Gen., -as'eos (-i'asis). See URINATION.

URIC, *adj.* U^r-i'k. Lat., *uricus* (from *ὀυρον*, urine). Fr., *urique*. 1. Derived from or contained in the urine. [B.] 2. Due to the excessive production of u. acid (e. g., arthritis urica).

URIC ACID, *n.* U^r-i'k. Lat., *acid urique*. Ger., *Harnsäure*. A feebly dibasic acid, C₅H₄N₂O₆, occurring in small quantities in the human urine and that of other mammals, and in large quantities in that of birds, amphibians, and some insects. It was first isolated by Scheele in 1776. It consists of a white, spongy powder, devoid of taste and odor, which under the microscope is seen to be constituted of rhombic tables or of elongated plates, often disposed in the form of sheaves or of rosettes. As deposited from the urine it has a more or less reddish tinge, due to the presence of urinary coloring matters. It is soluble in about 15,000 parts of water at 20° C., and in from 1,000 to 2,000 parts at 100° C., insoluble in alcohol, moderately soluble in glycerin (which, however, produces a change

in the form of its crystals, and when associated with lithium carbonate is rendered quite soluble in water, producing increased solubility in the lithium salt. [B, 3, 4.]

URICACIDÆMIA (Lat.), n. f. $U^2r(ur)-i^2k-a^2s(a^2k)-i^2d-em-(a^2e^2m)-i^2a^2$. From *opov*, urine, *acidus*, acid, and *aiua*, blood. Of von Jaksch, the presence of a recognizable amount of uric acid in the blood in consequence of the failure of the red blood-corpuscles to oxidize this acid. [a, 34.]

URICÆMIA (Lat.), n. f. $U^2r(ur)-i^2s(i^2k)-em-(a^2e^2m)-i^2a^2$. From *opov*, urine, and *aiua*, blood. Fr., *uricémie*. Of Flint, see *LITHÆMIA*.

URIDROSIS (Lat.), n. f. $U^2r(ur)-i^2d(ed)-ros(i^2s)$. Gen., *-ros(eos) (-is)*. From *opov*, urine, and *i^2dros*, a perspiring. Fr., *uridrose*. Ger., *Harnschweiß*, *Harnschwitzen*. A condition in which certain elements of the urine, especially urea, are excreted in the perspiration, sometimes in sufficient quantity to form a sensible deposit upon the skin. [G.]—**U. crystallina**. Fr., *épidrose sablonneuse*. A condition in which saline constituents of the sweat, supposed to be derived from the urine, crystallize upon the skin, forming sand-like granules of a reddish or white color [Fuchs]; observed especially in uræmia connected with certain cases of cholera, scarlet fever, and renal calculus, in which a deposit consisting of crystals of urea forms upon the skin. [Schöttlin, "Arch. f. physiol. Heilk." xi, p. 73; Drasche, "Ztschr. d. Gesellsch. d. Aerzte zu Wien," xii.]

URILE, n. $U^2r(i^2l)$. A radicle supposed by Morin to exist in urine. [B, 38 (a, 14).]

URILIC ACID, n. $U^2r-i^2l(i^2k)$. Fr., *acide urilique*. Ger., *Urilsäure*. Of Liebig, a hypothetical substance, $C_2N_2O_4$, which may be considered as oxalic acid in which the oxygen is replaced by cyanogen. [B, 48 (a, 14).]

URIN (Ger.), n. *Ur-en'*. See URINE.—**U'abgang**. See DIURETIS.—**U'ablagerung**, **U'abscheidung**, **U'absonderung**. See DIURETIS. The secretion of urine. [L, 80.]—**U'beschwerden**. Difficulty in urination.—**U'drang**. Vesical tenesmus or spasm. See URINATION.—**U'säure**. See URIC ACID.—**U'scham**. See URASCOR.—**U'treibend**. See DIURETIC.—**U'verhaltung**. See Retention of urine.

URINA (Lat.), n. f. $U^2r(ur)-in(en)-a^2$. See URINE.—**Acidum urinae**. Phosphoric acid. [B.]—**Extractum saponaceum urinae**. Of Rouelle, urea. [B, 3.]—**Spiritus salis urinae**. Ammonium carbonate. [B.]—**Spiritus urinae**. Ger., *Uringest*. An old name for aqueous ammonia. [B.]—**U. araneosa**. Urine loaded with cobweb-like filaments.—**U. cibi**, **U. digestions**. Urine voided several hours after digestion. It contains more solids and has a higher specific gravity than at other times. [K.]—**U. flammea**. High-colored urine. [L, 138.]—**U. galactodes**. Urine of a milky appearance. [L, 50 (a, 14).]—**U. genitalis**. See SEMEN.—**U. noctis**. See *U. sanguinis*.—**U. pericardii**. See *Liquor pericardii*.—**U. potus**. Of G. Bird, urine of low specific gravity, which is passed soon after drinking freely. [K.]—**U. sanguinis**. Urine secreted after a night's rest, and hence not influenced by food or drink. [K.]—**U. spastica**. Urine secreted during or after spasms (of hysteria, asthma, etc.). It is generally abundant, clear, and limpid, the coloring matter, urea, and sodium chloride being deficient in quantity. [D, 35.]

URINACCELERATOR [Coutes] (Lat.), n. m. $U^2r(ur)-i^2n(en)-a^2(k)(a^2k)-se^2l(i^2k)(e^2l)-e^2r-at(a^2t)(o^2t)$. Gen., *-oris*. From *urina*, urine, and *accelerare*, to hasten. See BULBO-CAVERNOSUS.

URINACULUM (Lat.), n. n. $U^2r(ur)-i^2n(en)-a^2(k)(a^2k)(u^2l)(u^2l)-u^2m(u^2m)$. Dim. of *urina*, urine. 1. See URACUS. 2. A urinal. [L, 50 (a, 14).]

URINÆMIA (Lat.), n. f. $U^2r(ur)-i^2n(en)-em-(a^2e^2m)-i^2a^2$. From *urina*, urine, and *aiua*, blood. Fr., *urinemie*. Poisoning by the retention of various urinary constituents (urea, creatin, creatinin, leucine, etc.) in the blood. It is to be distinguished from *uræmia*, which refers only to the retention of urea. Schöttlin maintained that it was the cause of puerperal eclampsia. [A, 15.]

URINAL, n. U^2r-i^2n-l . Gr., *ὀυροδοχείον*, *οὐροδόχον*. Lat., *urodochium*. Fr., *urinoir*. Ger., *Nachttopf*, *Pissoir*. 1. A stationary receptacle for receiving urine. 2. A porcelain or metal vessel for receiving urine from patients confined to bed. 3. A rubber apparatus constantly worn to receive the urine in vesical incontinence. [a, 34.]—**Spray u.** A u. (1st def.) fitted with sprays of water from the top and sides of the receptacle to keep it clean. [a, 34.]—**Vaginal u.** A u. consisting of a beak to be introduced into the vagina and of a receptacle to hang between the thighs. ["Ctbl. f. Gyn.," Nov. 21, 1861, p. 387 (a, 50).]

URINALIS (Lat.), adj. $U^2r(ur)-i^2n(en)-a^2(k)(a^2s)(i^2s)$. See URINARY; as a n., in the n. (*urinalis*), a urinal. [L, 50 (a, 48).]

URINALYSIS (Lat.), n. f. $U^2r(ur)-i^2n(en)-a^2(k)(a^2l)(i^2s)(u^2s)-i^2s$. See URANALYSIS.

URINARY, adj. $U^2r-i^2n-a-ri^2$. Lat., *urinosis*, *urinalis*. Fr., *urinaire*. Pertaining to the urine. [K.]

URINATION, n. $U^2r-i^2n-a-shu^n$. Fr., u. Ger., *Urinlassen*, *Harnlassen*. The act of voiding urine. [K.]

URINE, n. U^2r-i^2n . Gr., *ὀύρον*. Lat., *urina*. Fr., u. Ger., *Harn*, *Urin*. The excretion of the kidneys; normally an amber-colored, transparent fluid, having an acid reaction, a specific gravity varying from 1.00 to 1.090, a saline taste, and a faint odor. The latter is modified by food and drugs; the specific gravity, color, and reaction vary with the ingestion of food, the character and duration of the occupation, and the temperature. [a, 34.] See Plate IV.—**Anæmic u.** The u. in anæmia. [K.]—**Aqueous u.** See URINA POTUS.—**Black u.** U. containing melanin. [a, 34.]—**Blue u.** U. that deposited a sediment of deep-blue granules on standing. ["Lancet," ii, 1875, p. 144 (a, 34).]—**Chylous u.** Ger., *Chylusharn*, *Milchharn*. U. which is milky in appearance from the presence

of fat. [D.] Cf. CHYLURIA.—**Coagulating u.** See FIBRINOUS u.—**Crude u.** A clear watery u. which deposits no sediment. [K.]—**Cyano u.** See BLUE u.—**Cystinic u.** U. which deposits cystine. [K.]—**Definitive u.** The portion of the u. secreted by the epithelium lining the convoluted portions of the uriniferous tubules. ["N. Y. Med. Jour.," Aug. 18, 1888, p. 169 (a, 50).]—**Diabetic u.** U. passed in diabetes (q. v.). [K.]—**Dropsical u.** A highly albuminous u. [K.]—**Dyspeptic u.** U. passed by a dyspeptic patient. It sometimes deposits an excess of calcium oxalate (see OXALURIA). [K.]—**Elephant's u.** See ELEPHANTINUS.—**Febrile u.** The high-colored, scanty, acid, and slightly albuminous u. passed during acute febrile affections. [K.]—**Fibrinous u.** U. containing fibrin, that may coagulate in the tubules, in the bladder, or after extrusion. [a, 34.]—**Flocculent u.** U. in which flocculent masses are suspended. [K.]—**Gouty u.** U. passed during or after an attack of gout. It is of small amount, is highly colored, and deposits uric acid in excess. [K.]—**Hysterical u.** See URINA SPASTICA.—**Mucilaginous u.** U. abounding in mucus. [K.]—**Nebulous u.** Ger., *Harnwolke*. U. that is cloudy in consequence of a heavy deposit of the earthy phosphates. [a, 34.]—**Nervous u.** See URINA SPASTICA.—**Residual u.** In prostatic hypertrophy or cystic disease, a small quantity of u. that remains in the bladder after all efforts to empty it. [a, 34.]—**Rudimentary u.** The liquid that comes through the thin walls of the Malpighian glomeruli. ["N. Y. Med. Jour.," Aug. 18, 1888, p. 169 (a, 50).]—**Saccharine u.** U. containing sugar, as in diabetes. [K.]—**U. cuite** (Fr.). See URINA CIBI.—**U. de la boisson** (Fr.). See URINA POTUS.—**U. of digestion**. See URINA CIBI.

URINAL (Fr.), n. U^2r-no . A urinal to be worn on or applied to the person. [A, 81.]

URINIFEROUS, adj. $U^2r-i^2n-i^2f(er)-e^2r-u^2s$. Lat., *uriniferus* (from *urina*, urine, and *ferre*, to bear). Fr., *urinifère*. Ger., *harntragend*, *harnführend*. Producing and conveying the urine. [J.]

URINIPAROUS, adj. $U^2r-i^2n-i^2p(ar)-u^2s$. Lat., *uriniparus* (from *urina*, urine, and *parere*, to produce). Fr., *urinipare*. Urine-producing (said of the cortical portion of the uriniferous tubules). [J, 33.]

URINIREN (Ger.), n. *Ur-en-er'e^n*. Micturition.

URINO-GENITAL, adj. $U^2r-in-o-je^2n(i^2t)-l$. See URO-GENITAL.

URINOLOGY, n. $U^2r-i^2n-o-l(o^2l)-i^2$. From *urina*, urine, and *lógos*, understanding. See Urology.

URINOMETER, n. $U^2r-i^2n-o-m(e^2t)-u^2r$. See UROMETER.

URINOUS, adj. $U^2r-i^2n-u^2s$. Lat., *urinosis* (from *urina*, urine). Fr., *urineux*. Ger., *harnartig*. Like urine. [K.]

URITIS (Lat.), n. f. $U^2r(ur)-i^2e(it)-i^2s$. From *urere*, to burn. 1. Inflammation due to a burn. 2. A flat bullellike ichorous contents. [G, 11.]—**U. diurna**. A disease in which red itching papules appear by day and are absent by night. [G, 11.] Cf. EPINYCTIS *pruriginosa*.—**U. nocturna**. See EPINYCTIS.

URN, n. U^2rn . Lat., *urna*. Fr., *urne*. Ger., *Urne*. The sporangeum of mosses; also an ascidium (1st def.). [a, 35.]

URNIERE (Ger.), n. *Ur'ner-e*. See MESONEPHROS.—**U'nsprosse**. The rudiment of the primitive kidney of the embryo.

URNING, n. U^2rn-i^2n . A man or woman who has an aversion for the opposite sex, but obtains sexual gratification from contact or association with one of the same sex. [G.]

URO-AZOTIMÈTRE (Fr.), n. $U^2r-o-a^2z-to-me^2tr$. An instrument for the volumetric differential analysis of the nitrogenous constituents of urine by means of sodium hypobromite. ["Ann. des mal. des org. gén.-urin.," Feb., 1889, p. 85 (a, 50).]

UROBACILLUS (Lat.), n. m. $U^2r(ur)-o(o^2s)-ba^2s(ba^2k)-i^2n(u^2s)-lu^2s$. From *opov*, urine, and *bacillus* (q. v.). A bacillus obtained from decomposed urine. [Sternberg (a, 34).]—**U. Duclauxi**. Of Michel, an aerobic and facultative anaerobic motile, liquefying u. that grows in slender filaments in sewage or culture media containing ammonia or urea. [a, 34.]—**U. Freudenreichi**. A u. closely resembling *U. Pasteuri*, but forming longer chains and having more active movements. It is found in air, dust, sewer water, etc. [a, 34.]—**U. Maddoxi**. An aerobic, motile, liquefying, spore-forming u. that has round ends, is 1 μ thick and 3 μ to 6 μ long. It is relatively rare. [a, 34.]—**U. Pasteuri**. Of Michel, an aerobic, liquefying, motile u. that forms spherical, usually solitary spores at one extremity of the rod. It grows in the form of short rods each made up of two to six urobacilli, in culture media containing urea, and its size varies with the media in which it grows. [a, 34.]—**U. Schützenbergi**. An aerobic, liquefying, motile, small oval bacillus, about 5 μ thick and 1 μ long, usually found in pairs. It is obtained from river and sewer water. [a, 34.]

UROBENZOIC ACID, n. $U^2r-o-be^2nz-o^2i^2k$. See HIPPURIC ACID.

UROBILIN, n. $U^2r-o-bil-in$. Fr., *urobiline*. Ger., *U*. A derivative, $C_{22}H_{24}N_4O_7$, of bilirubin formed by the action of nascent hydrogen. It is the most important coloring matter in the urine; a dark amorphous powder, nearly insoluble in water, soluble in alcohol, in ether, and in chloroform. [a, 14, 34.]

UROBILINOIDIN, n. $U^2r-o-bil-in-o(i^2d)-i^2n$. A reduction product of hæmatin, resembling urobilin, but not identical with it. It is readily converted into isohæmatoporphyrin and hexahydrohæmatoporphyrin. It occurs in the urine under certain pathological conditions. [C. A. Nobel, "Ctbl. f. d. med. Wissensch.," Apr. 23, 1887, p. 305 (B).]

UROBILINURIA (Lat.), n. f. $U^2r(ur)-o(o^2s)-bil(bel)-i^2n-u^2r(ur)-i^2a^2$. From *urobilin* (q. v.), and *opov*, urine. See URIBILINURIE. The excretion of urobilin with the urine.

UROBUTYLCHLORALIC ACID, n. $U^2r-o-bu^2t-i^2l-i^2klor-a^2l-i^2k$. A body, $C_{10}H_{15}Cl_3O_2$ (or $C_{10}H_{15}Cl_3O$), obtained from the urine after the ingestion of butyl chloral. [B.]

UROCANINIC ACID, n. $\text{U}^2\text{r-o-ka}^2\text{n-i}^2\text{n-i}^2\text{k}$. A substance, $\text{C}_8\text{H}_6\text{N}_2\text{O}_2 + 2\text{H}_2\text{O}$, presenting both acid and basic properties, obtained from dogs' urine. It occurs in long, flattened, colorless prisms or long needles. [B, 93 (a, 14).]

UROCELE (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-se(ka)le(a)}$; in Eng., $\text{u}^2\text{r-o-sel}$. Gen., -cel'es. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\kappa\upsilon\lambda\eta$, a tumor. Fr., urocele. Ger., *Harnbruch*. A tumor formed by the extravasation of urine. [E.]

UROCHERAS (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-ch}^2\text{(e)z}^2\text{/e}^2\text{r-a}^2\text{s(a)s}$. Gen., -cher'ados (-adis). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\chi\epsilon\text{p}\alpha\delta\text{o}\varsigma$, gravel. Fr., *urochères*. See GRAVEL.

UROCHESIA (Lat.), **UROCHEZIA** (Lat.), n's f. $\text{U}^2\text{r(ur)-o(o)-ch}^2\text{(e)z}^2\text{/e}^2\text{r-a}^2\text{s(a)s}$. Gen., -ches'ia. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\chi\epsilon\text{iv}$, to ease one's self. Fr., *urochésie*. The discharge of urine per anum. [L, 41, 50 (a, 14).]

UROCHROME, n. $\text{U}^2\text{r-o-krom}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\chi\text{ρ}\omega\mu\alpha$, pigment. Fr., u. Ger., *Urochrom*. A yellow pigment described by Thudichum, who attributed the yellow color of normal urine to its presence; probably identical with hydrobilirubin. [B, 93 (a, 14); K.]

UROCLEPSIA (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-kle}^2\text{'ps}^2\text{/i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\kappa\lambda\epsilon\psi\iota\alpha$, theft. Fr., *uroclepsie*. Unconscious micturition. [L, 50 (a, 14).]

UROCELIA (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-sel}^2\text{'(ko}^2\text{'e}^2\text{z}^2\text{)-i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\kappa\upsilon\lambda\iota\alpha$, the belly. Fr., *urocelie*. Ger., *Harnbauch*. Swelling of the abdomen due to infiltration of urine. [L, 50 (a, 14).]

UROCRISIA (Lat.), **UROCRISIS** (Lat.), n's f. $\text{U}^2\text{r(ur)-o(o)-kri}^2\text{'z}^2\text{/i}^2\text{-a}^2$, $\text{-o}^2\text{p}^2\text{'kri}^2\text{'s-i}^2\text{-a}^2$. Gen., -cris'ia, -cris'eos (-oc'risis). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\kappa\rho\iota\varsigma$, a separating. Fr., *urocriste*. Ger., *Harnkrise*. 1. A crisis which manifests itself in urination. 2. Examination of the urine, diagnosis by means of the urine. [A, 322 (a, 48).]

UROCYANIN, n. $\text{U}^2\text{r-o-si}^2\text{'a}^2\text{n-i}^2\text{n}$. See CYANURIN.

UROCYANOGEN, n. $\text{U}^2\text{r-o-si}^2\text{'a}^2\text{n-o-i}^2\text{-en}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, $\kappa\upsilon\alpha\text{o}\varsigma$, blue, and $\gamma\epsilon\text{v}\alpha\text{i}\omega$, to produce. Fr., *urocyanose*. A blue sediment sometimes deposited from the urine of cholera patients. [K.]

UROCYSTIÆMORRHOIDES (Lat.), n. f. pl. $\text{U}^2\text{r(ur)-o(o)-si}^2\text{'sth}^2\text{(ku}^2\text{'sth)-e}^2\text{m}^2\text{(a}^2\text{-e}^2\text{m)-o}^2\text{r-ro}^2\text{'(r}^2\text{-i}^2\text{d(e}^2\text{'d(e}^2\text{'z(e}^2\text{'s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, $\kappa\upsilon\sigma\tau\iota\varsigma$, the bladder, and $\alpha\iota\mu\omega\rho\rho\iota\varsigma$, a hemorrhoid. Ger., *Blasenhämorrhoiden*. Hemorrhoids of the bladder. [L, 50 (a, 14).]

UROCYSTIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-si}^2\text{'st}^2\text{(ku}^2\text{'st)}^2\text{/i}^2\text{-a}^2$. Gen., -cyst'eos (-is). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\kappa\upsilon\sigma\tau\iota\varsigma$, the bladder. Fr., *urocyste*. See URINARY BLADDER.

UROCYSTITIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-si}^2\text{'st}^2\text{(ku}^2\text{'st)-i}^2\text{(e)'}^2\text{/i}^2\text{-a}^2$. Gen., -it'id'os (-idis). Fr., *urocystitis*. See CYSTITIS.

UROCYSTOCATARRHUS (Lat.), n. m. $\text{U}^2\text{r(ur)-o(o)-si}^2\text{'st}^2\text{(ku}^2\text{'st)-o}^2\text{(o}^2\text{'-ka}^2\text{'t}^2\text{(ka}^2\text{'t)-a}^2\text{'r(a}^2\text{'r)-ru}^2\text{'s(ru}^2\text{'s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, $\kappa\upsilon\sigma\tau\iota\varsigma$, the bladder, and $\kappa\alpha\tau\alpha\rho\rho\iota\varsigma$, a running down. See CYSTORRHEA (1st def.).

URODENSIMÈTRE (Fr.), n. $\text{U}^2\text{r-o-da}^2\text{'n}^2\text{-se-me}^2\text{'tr}$. See UROMETER.

URODIALYSIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-di}^2\text{'(di}^2\text{'-a}^2\text{)}^2\text{-a}^2\text{(a}^2\text{'l)-i}^2\text{(u}^2\text{'-s)}^2\text{/i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\delta\iota\alpha\lambda\upsilon\sigma\iota\varsigma$, a separating. Fr., *urodialyse*. 1. See UROPLASIA. 2. Decomposition of the urine. [L, 50 (a, 14).] - **U. neonatorum**. Of Schönlein, retarded secretion of urine in the kidneys of new-born infants. [L, 50 (a, 14).]

URODOCHUM (Lat.), n. n. $\text{U}^2\text{r(ur)-o(o)-do}^2\text{'k}^2\text{(do}^2\text{'ch}^2\text{)-i}^2\text{(e)'}^2\text{-u}^2\text{(u}^2\text{'m)}$. Gen., $\sigma\upsilon\upsilon\text{p}\delta\omega\chi\upsilon\mu$ (from $\sigma\upsilon\upsilon\text{pov}$, urine, and $\delta\omega\chi\epsilon\upsilon\omega$, a holder). See URINAL.

URODRIMYTES (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-dri}^2\text{'m}^2\text{(drem)}^2\text{/i}^2\text{(u}^2\text{'t)-ez}^2\text{(as)}$. Gen., -e'os (-e'is). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\delta\rho\iota\mu\tau\eta\varsigma$, acidness. Fr., *urodymies*. Acidity of the urine. [L, 41, 50 (a, 14).]

URODYNIA (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-di}^2\text{'n}^2\text{(du}^2\text{'n)}^2\text{/i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\delta\upsilon\delta\upsilon\eta$, pain. Fr., *urodynie*. Pain in passing urine. [E.]

URODEMA (Lat.), n. n. $\text{U}^2\text{r(ur)-ed}^2\text{(o}^2\text{'-e}^2\text{d)-em(am)}^2\text{/a}^2$. Gen., -em'ados (-atis). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\alpha\delta\upsilon\mu\alpha$, a swelling. A tumefaction caused by infiltration of urine. [E.]

UROERYTHRIC ACID, UROERYTHRIN, n's. $\text{U}^2\text{r-o-e}^2\text{r-i}^2\text{th}^2\text{-i}^2\text{c}$, $\text{-e}^2\text{r-i}^2\text{th}^2\text{-i}^2\text{n}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\epsilon\rho\omega\theta\acute{o}\varsigma$, red. Fr., *uroérythrine, matière rosacée*. Ger., *Uroerythrin*. A coloring matter found in small quantities in normal urine, but forming a copious deposit in certain febrile conditions. It gives a rose color to a urinary deposit sometimes observed after wounds or operations. Its appearance is said to indicate visceral, and especially hepatic disease, and to be often followed by secondary hemorrhage and gangrene. [Verneuil, "France méd.", May 2, 1885; "Glasgow Med. Jour.", Jan., 1886, p. 74.]

UROFUSCOHEMATIN, n. $\text{U}^2\text{r-o-fu}^2\text{'sk}^2\text{'-o-he}^2\text{'m}^2\text{/a}^2\text{'-i}^2\text{n}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, *fuscus*, dark, and $\alpha\iota\mu\alpha$, blood. Of Baumstark, a red urinary pigment derived from hematins, formed in acute or severe disease. [a, 34.]

URO-GENITAL, adj. $\text{U}^2\text{r-o-jen}^2\text{'i}^2\text{-t'}$. Lat., *urogenitalis*. Having reference both to the urinary and to the genital tract. This term and its equivalent, *urino-genital*, are more commonly used with regard to anatomical points, while the term *genito-urinary*, of essentially the same signification, is oftener employed in speaking of pathological matters.

UROGLAUCIN, n. $\text{U}^2\text{r-o-gla}^2\text{'s-i}^2\text{n}$. See CYANURIN.

UROGRAVIMETER, n. $\text{U}^2\text{r-o-gra}^2\text{'v-i}^2\text{m}^2\text{/e}^2\text{'t-u}^2\text{-r}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, *gravis*, heavy, and $\mu\epsilon\tau\rho\omega$, a measure. Of Thudichum, a urometer. [a, 34.]

UROHEMATIN, n. $\text{U}^2\text{r-o-he}^2\text{'m}^2\text{/a}^2\text{'-i}^2\text{n}$. Fr., *urohématine*. 1. Of Harley, uroerythrin. [K.] 2. Of MacMunn, see ISOHEMATOPORPHYRIN.

UROHEMATOPORPHYRIN, n. $\text{U}^2\text{r-o-he}^2\text{'m}^2\text{-a}^2\text{'-o-po}^2\text{'r}^2\text{/fi}^2\text{-i}^2\text{n}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, $\alpha\iota\mu\alpha$, blood, and $\varphi\omega\phi\upsilon\rho\omega\varsigma$, purple. Hematoporphyrin derived from urine. [a, 34.]

UROHYAL, n. $\text{U}^2\text{r-o-hi}^2\text{'l}$. From $\sigma\upsilon\upsilon\text{p}\acute{\alpha}$, a tail, and $\upsilon\omicron\epsilon\iota\eta\varsigma$, hyoid. See *Uro-hyal* BONE.

UROLEUCIC ACID, n. $\text{U}^2\text{r-o-lu}^2\text{'-i}^2\text{c}$. Ger., *Uroleucinsäure*. A monobasic acid, $\text{C}_8\text{H}_8\text{O}_4$, found in the urine in alkaptonuria. It has considerable antiseptic power, and is probably antipyretic. ["Brit. Med. Jour.", Aug. 4, 1888, p. 232, Nov. 23, 1889, p. 1149 (a, 50).]

UROLEUCORRHEA (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-lu}^2\text{'-i}^2\text{c-o}^2\text{'r-re}^2\text{'(ro}^2\text{'e}^2\text{'-a}^2\text{'-s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, $\lambda\epsilon\upsilon\kappa\omega\varsigma$, white, and $\epsilon\iota\upsilon\text{'v}$, to flow. Fr., *uroleucorrhée*. Ger., *Uroleukorrhöe*. A condition in which the urine contains much mucus.

UROLITHIASIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-li}^2\text{'th-i}^2\text{-a}^2\text{(a}^2\text{'s)}^2\text{/i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\lambda\iota\theta\iota\alpha\varsigma$, lithiasis. Fr., *urolithiase*. Ger., *Harnsteinbildung*. The formation of urinary calculi, also the condition of the stone that results from such formation. [a, 14.]

UROLITHOTOMIA (Lat.), n. f. $\text{U}^2\text{r(ur)-o(o)-li}^2\text{'th-o}^2\text{(o}^2\text{'-tom}^2\text{'(to}^2\text{'m)}^2\text{/i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, $\lambda\iota\theta\omega\varsigma$, a stone, and $\tau\omicron\upsilon\tau\eta$, a cutting. See LITHOTOMY.

UROLITHUS (Lat.), n. m. $\text{U}^2\text{r(ur)-o}^2\text{'l-i}^2\text{'th-u}^2\text{(u}^2\text{'s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\lambda\iota\theta\omega\varsigma$, a stone. Fr., *urolithe*. A urinary calculus.

UROLOGY, n. $\text{U}^2\text{r-o-ol}^2\text{'o-gi}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\lambda\omicron\gamma\omega\varsigma$, understanding. Fr., *urologie*. Ger., *Harnhehre*. The physiology, pathology, etc., of the urine and the urinary system. [a, 48.]

UROMELANIN, n. $\text{U}^2\text{r-o-me}^2\text{'l-a}^2\text{n-i}^2\text{n}$. Fr., *uromélanine*. A coloring matter present normally in urine to the amount of 5 or 6 grammes a day. It occurs as thin, black, shiny lamellæ. [Flósz, "Ztschr. f. phys. Chem.", viii, p. 85 (B).]

UROMELUS (Lat.), n. f. $\text{U}^2\text{r(ur)-o}^2\text{'m-e}^2\text{'l-u}^2\text{(u}^2\text{'s)}$. Gen., -mel'es. From $\sigma\upsilon\upsilon\text{p}\acute{\alpha}$, the tail, and $\mu\epsilon\lambda\omega\varsigma$, a limb. A single monster in which there is fusion of the lower limbs; the thigh usually shows evidence of a double formation, but the leg is single and there is a single foot having the heel turned forward. [a, 34.]

UROMETER, n. $\text{U}^2\text{r-o-m}^2\text{'e}^2\text{'t-u}^2\text{-r}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\mu\epsilon\tau\rho\omega$, a measure. Fr., *uromètre, pèse-urine*. A hydrometer for measuring the specific gravity of the urine. [K.]

UROMPHALUS (Lat.), n. m. $\text{U}^2\text{r(ur)-o}^2\text{'m-f}^2\text{'a}^2\text{(a}^2\text{'l)-u}^2\text{(u}^2\text{'s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\mu\phi\alpha\lambda\acute{o}\varsigma$, the navel. Fr., *uromphale*. Ger., *Nabelharnschwellung*. Swelling of the umbilicus due to infiltration of urine. [L, 50 (a, 14).]

URONCUS (Lat.), n. m. $\text{U}^2\text{r(ur)-o}^2\text{'n-k}^2\text{'u}^2\text{(u}^2\text{'s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\delta\gamma\kappa\omega\varsigma$, a tumor. A tumor containing urine. [a, 34.]

URONEPHROSIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o}^2\text{'(o}^2\text{'-ne}^2\text{'f-ros)}^2\text{/i}^2\text{-a}^2$. Gen., -ros'eos (-is). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\nu\epsilon\phi\rho\acute{o}\varsigma$, the kidney. See NEPHRYDROSIS.

URONITROTOLUENE ACID, n. $\text{U}^2\text{r-o-nit-ro-to}^2\text{'l-u}^2\text{'-en}$. A substance found in the urine after the ingestion of orthonitrotoluene. It is levorotary in aqueous solution, and on treatment with dilute acids is decomposed into orthonitrobenzyl, alcohol, and glycuronic acid. ["Ann. di chim. appl. alla farmacia ed alla med.", July, 1883 (B).]

UROPHEN, n. $\text{U}^2\text{r-o-fe}^2\text{'i}^2\text{n}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\phi\alpha\upsilon\varsigma$, gray. Of Heller, the ordinary coloring matter of the urine. [a, 34.]

UROPHANIC, adj. $\text{U}^2\text{r-o-fa}^2\text{'n-i}^2\text{c}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\phi\alpha\upsilon\varsigma$, conspicuous. Appearing in the urine. [a, 34.]

UROPHRENESIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o}^2\text{'(o}^2\text{'-fre}^2\text{'n-e}^2\text{'(a}^2\text{'-s)}^2\text{/i}^2\text{-a}^2$. Gen., -es'eos (-is). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\phi\rho\epsilon\text{'n}$, the mind. Fr., *urophrénésie*. A supposed metastasis of urine to the brain. [a, 14.]

UROPHTHISIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o}^2\text{'(o}^2\text{'-ph}^2\text{'th-i}^2\text{-s)}^2\text{/i}^2\text{-a}^2$. Gen., -phthi'seos (-ophth'i'sis). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\phi\theta\iota\varsigma$, decay. Fr., *urophthisie*. See DIABETES.

UROPIITTIN, n. $\text{U}^2\text{r-o-pi}^2\text{'t-i}^2\text{n}$. A crystallizable decomposition product (perhaps $\text{C}_8\text{H}_8\text{N}_2\text{O}_2$) of urochrome. [B, 93 (a, 14).]

UROPLASIA (Lat.), n. f. $\text{U}^2\text{r(ur)-o}^2\text{'(o}^2\text{'-pla}^2\text{'n}^2\text{(pla}^2\text{'n-i}^2\text{-a}^2\text{'-s)}^2\text{/i}^2\text{-a}^2$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\pi\lambda\alpha\varsigma\eta$, a wandering. Ger., *Uroplanie, Harnaus-tretung*. 1. A condition in which the elements of urine are present in other parts than the urinary organs. In the pl., *Uroplanie* (Ger., *Uroplanien*), a genus of the family Chynoplaniæ of Fuchs's classification of skin diseases, including such forms of uræmia as are attended with urinary deposits in the skin producing various cutaneous diseases. [G.] 2. See PARURIA erraticæ.

UROPOIESIS (Lat.), n. f. $\text{U}^2\text{r(ur)-o}^2\text{'(o}^2\text{'-poi}^2\text{'(po}^2\text{'-i}^2\text{-e}^2\text{'(a}^2\text{'-s)}^2\text{/i}^2\text{-a}^2$. Gen., -es'eos (-is). From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\pi\omicron\iota\epsilon\iota\upsilon$, to make. Fr., *uropoïèse*. Ger., *Harnbereitung*. The secretion of urine. [K.]

UROPOIETIC, adj. $\text{U}^2\text{r-o-poi}^2\text{'e}^2\text{'t-i}^2\text{c}$. Ger., *harnabsondernd*. Pertaining to or concerned in the secretion of urine. [K.]

UROPSAMMUS (Lat.), n. m. $\text{U}^2\text{r(ur)-o}^2\text{'ps-a}^2\text{'m}^2\text{(a}^2\text{'m)-mu}^2\text{'s(mu}^2\text{'s)}$. From $\sigma\upsilon\upsilon\text{pov}$, urine, and $\psi\acute{\alpha}\mu\mu\omega\varsigma$, gravel. Urinary gravel. [L, 50 (a, 14).]

UROPYGIAL, adj. $\text{U}^2\text{r-o-pi}^2\text{'g-i}^2\text{-l}$. Pertaining to the uropygial. [L, 12.]

UROPYGIUM (Lat.), n. n. $\text{U}^2\text{r(ur)-o}^2\text{'(o}^2\text{'-pi}^2\text{'g}^2\text{(pu}^2\text{'g)-i}^2\text{(u}^2\text{'m)}^2\text{/a}^2\text{-m}$. From $\sigma\upsilon\upsilon\text{p}\acute{\alpha}$, the tail, and $\pi\upsilon\gamma\eta$, the rump. Fr., *croupion*. Ger., *Burzel, Schwanzgegend*. The rump or coccygeal region in a bird. [a, 48.]

UROROSEIN, n. $\text{U}^2\text{r-o-roz}^2\text{'e}^2\text{-i}^2\text{n}$. Fr., *uroroséine*. Ger., *Urorosein*. A rose-colored pigment, $\text{C}_{22}\text{H}_{16}\text{N}_4\text{O}_8$, found in the urine of persons affected with diabetes, chlorosis, osteomalacia, nephritis, carcinoma, etc. Its solutions give a characteristic absorption line between the lines D and E of the spectrum. In its chemical relations

it behaves somewhat like the colors of the rosaniline series. [*Jour. f. prakt. Chem.*, N. F., xxvi, p. 333 (B); *"Arch. de méd. expér. et d'anat. path."*, Dec. 16, 1891, p. 808.]

URORHAGIA (Lat.), n. f. $U^2r(ur)-o^2r-raj(ras^2g)^2a^2$. From *o^2pov*, urine, and *ῥήγνυμαι*, to burst forth. Fr., *urorrhagie*. See DIABETES.

URORRHŒA (Lat.), n. f. $U^2r(ur)-o^2r-re(ro^2a^2)-a^2$. From *o^2pov*, urine, and *ῥέω*, a flowing. Fr., *urorrhée*. Ger., *Harnfluss*, *Urorrhœe*. See ENURISIS and POLYURIA.—**U. mellita**. See DIABETES mellitus.

UROHORRHŒA (Lat.), n. f. $U^2r(ur)-o^2r-ro^2r-re(ro^2a^2)-a^2$. From *o^2pov*, urine, *ῥόδος*, serum, and *ῥέω*, a flowing. Fr., *urorrhorrhée*. Albuminuria. [L, 50 (a, 14).]

UROUBIN, n. $U^2r-o-rub^2in$. Fr., *urorubine*. Ger., *U.* A coloring matter found in normal and pathological urines. It forms a dark cherry-red, brittle mass, whose ethereal solution gives an absorption band extending from the lines D to F of the spectrum. [*Plösz*, "Ztschr. f. phys. Chem.," xiii, p. 85 (B).]

UROURUBROHEMATIN, n. $U^2r(ur)-o-rub^2in$. From *o^2pov*, urine, *ruber*, red, and *αἷμα*, blood. Of Baumstark, a brown urinary pigment obtained from a patient suffering with pemphigus leprosus. [a, 34.]

UROSACRAL, adj. $U^2r-o-sak^2r'l$. From *οὐρά*, the tail, and *sacrum* (q. v.). Pertaining to the tail and the sacrum (said of a bone formed by the fusion of the sacrum and some of the vertebrae anterior to it). [L, 12, 221.]

UROSCHEOLE (Lat.), n. f. $U^2r(ur)-o^2sk(o^2sch^2)-e^2(o^2)-se(ka)^2le(la)^2$ in Eng., $u^2r-o^2sk(o^2)-o^2sel$. Ger., *coles*. From *οὐρος*, urine, *σχέω*, the scrotum, and *κύβη*, a tumor. Fr., *uroschécèle*. A urocele of the scrotum.

UROSCHESIS (Lat.), n. f. $U^2r(ur)-o^2sk(o^2sch^2)-e^2s-i^2s$. Gen., *-schés-eos* (*-osch'ésis*). From *οὐρος*, urine, and *σκέω*, retention. Fr., *uroschésie*. Suppression of urine. [L, 41 (a, 14).]

UROSCOPY, n. $U^2r-o^2sk(o^2p)^2$. Lat., *uroscopia* (from *οὐρος*, urine, and *σκοπεῖν*, to examine). Fr., *uroscopie*. Ger., *Uroskopie*, *Harnschau*, *Harnbeschauung*. Examination of the urine. [K.]

UROSEPSIS (Lat.), n. f. $U^2r(ur)-o^2s(-seps(saps))^2s$. Gen., *-seps(-ia)*. From *οὐρος*, urine, and *σepsis*, putrefaction. Septicæmia due to the putrefaction of urine extravasated within the tissues of the body. [a, 34.]

UROSIS (Lat.), n. f. $U^2r(ur)-o^2s-i^2s$. Gen., *-os(-ia)*. From *οὐρος*, urine. Fr., *urose*. Ger., *Harnkrankheit*. Of Alibert, any disease of the urinary organs. [L, 41, 50 (a, 14).]

UROSPASMUS (Lat.), n. m. $U^2r(ur)-o^2s(-spa^2s)^2mu^2s$ (*mu^2s*). From *οὐρος*, urine, and *σπασμός*, a spasm. Spasm of the urinary tract. [L, 50 (a, 14).]

UROSPERMUM (Lat.), n. n. $U^2r(ur)-o^2s(-spu^2rm)^2m$ (*spe^2rm*)-*u^2rm* (*u^2rm*). From *οὐρά*, the tail, and *σπέρμα*, seed. Fr., *urosperme*. Sheep's-beard; a genus of composite herbs, typical of a subdivision (*Urospermeæ*) of the *Lactucæ*. [a, 35.]—**U. picroides**. The *ἱερὰνιν μέγα* of Dioscorides, indigenous to Mediterranean regions; used in gastric complaints and externally as an antiphotic. [a, 35.]

UROSTEALITH, n. $U^2r-o^2ste^2a^2lith$. From *οὐρος*, urine, *στεῖν*, fat, and *λίθος*, stone. Fr., *urostéallithe*. A pseudo-calculus consisting of fatty matter combined with lime, forming a kind of soap. [E, 12.]

UROSTENOSIS (Lat.), n. f. $U^2r(ur)-o^2s(-ste^2n-o^2s)^2s$. Gen., *-os(-ia)*. From *οὐρος*, urine, and *στενωσις*, stenosis. See URETHROSTENOSIS.

UROSTIGMA (Lat.), n. n. $U^2r(ur)-o^2s(-stig^2ma^2)$. Gen., *-stigmato(-atis)*. A genus of the *Urticaceæ*, made by Bentham and Hooker a section of the genus *Ficus*. [a, 35.]—**U. elasticum**. See *Ficus elastica*.—**U. religiosum**. See *Ficus religiosa*.

UROSLUPHIC ACID, n. $U^2r-o-sul^2ph^2ik$. See THIOURIC ACID.

UROTHEOBROMINE, n. $U^2r-o-the-o-brom^2en$. See PARAXANTHINE.

UROTOXIC, adj. $U^2r-o-to^2x^2ik$. Fr., *urotoxique*. Pertaining to the toxicity of urine. [*"Sem. méd."*, Dec. 4, 1889, p. 449 (a, 18).]

UROUS ACID, n. Ur^2u^2s . See XANTHIN.

UROXANIC ACID, n. $U^2r-o^2x-a^2n^2ik$. Fr., *acide uroxanique*. Ger., *Uroxansäure*. A dibasic acid, $C_8H_8N_2O_6$, in prismatic crystals or spheroids, obtained by long exposure of uric acid dissolved in caustic potash to air free from carbon dioxide. [B, 3 (a, 38).]

UROXANTHIN, n. $U^2r-o-za^2nth^2in$. Fr., *uroxanthine*. Ger., *U.* See INDICAN.

UROXIN, n. $U^2r-o^2x^2in$. See ALLOXANTINE.

UROZEMIA (Lat.), n. f. $U^2r(ur)-o^2s(-zem^2zam)^2a^2$. From *οὐρος*, urine, and *ζῆμα*, loss. Fr., *urozémie*. See DIABETES.

URPETHITE (Fr.), n. $U^2r-pa^2tê$. See OZOKERITE.

URPFLANZE (Ger.), n. $Ur^2pfla^2nts^2a^2$. See PROTOPHYTE.

URRHODIN, n. U^2r-rod^2in . From *οὐρος*, urine, and *ῥόδινος*, made of roses. Of Thudichum, a decomposition product of the chemolysis by acids of a particular chromogen not yet isolated. [a, 34.]

URRHODENOGEN, n. $U^2r-rod-in^2o-gen^2n$. Of Thudichum, a substance not yet isolated, the decomposition of which by hydrochloric acid produces urrhodin. [a, 34.]

URRHODONIC ACID, n. $U^2r-rod-in^2o^2ik$. An acid obtained from urine, forming brown stellate or sheaf-like bundles of crystals, of a highly aromatic odor, very soluble in water and in ether. [a, 34.]

URSACHE (Ger.), n. $Ur^2za^2oh^2a^2$. See CAUSE.—**Gelegenheitsur**. See *Determining CAUSE*.—**Mitu^2**, *Mitwirkende*. U. See *Accessory CAUSE*.—**Nächste U.** See *Proximate CAUSE*.—**Nebenu^2**. See *Accessory CAUSE*.

URSCHLEIM (Ger.), n. Ur^2shlim . See PROTOPLASM.

URSONE, n. Ur^2son . Fr., u. Ger., *Urson*. A substance, $C_{10}H_{16}O$ (or $C_{10}H_{14}O_2$), obtained by Trommsdorff from the leaves of *Arbutus uva ursi* as silky, acicular crystals. [B, 270 (a, 38).]

URSPRUNG (Ger.), n. Ur^2sprun^2 . See ORIGIN.

URSTOFF (Ger.), n. Ur^2sto^2f . See ELEMENT.—**U^2theilchen**. See ATOM.

URTÈRE (Fr.), n. $U^2rt^2e^2r$. An old form of *urétère* (q. v.).

URTIERCHEN (Ger.), **URTIERE** (Ger.), n's pl. $Ur^2terch^2e^2n$, *ter^2e^2*. See PROTOZO.

URTICA (Lat.), n. f. $U^2rt(ur)^2ik(ek)^2a^2$. From *urere*, to burn. Fr., *ortie* (1st def.). Ger., *Brennnessel* (1st def.), *Nessel* (1st def.).

1. Nettle; a genus of herbs with stinging hairs, giving name to a large order (the *Urticales* [Fr., *urticacées*; Ger., *Nesselgewächse*], *Urticeae*, *Urticæ* [Fr., *urticées*; Ger., *Urticeen*], *Urticinae*, or *Urticinae* [Fr., *urticinae*]) of apetalous dicotyledons. In an extended sense, the order includes the *Ulmæe*, *Celastræ*, *Caniabineæ*, *Moræe*, *Araliaceæ*, *Conocephalæ*, *Thelypodeæ*, and *Urticæe* proper. These last, the nettleworks, including *U. Laportea*, *Urera*, *Boehmeria*, etc., are remarkable for the caustic secretion of their glandular hairs. [a, 35.] 2. The eruption produced by the sting of a nettle; a pomphus; a wheal.—**Extractum urticæ**. Fr., *extrait d'ortie*. An extract obtained from the juice of *U. dioica*, which is clarified by heating and evaporated. [B, 119 (a, 38).]—**Syrupus urticæ**. Fr., *sirap d'ortie*. A syrup made by boiling together equal parts of clarified juice of *U. dioica* and sugar. [B, 119 (a, 38).]

—**U. baccifera**. A West Indian species. The flowers and roots are used as an aperient, and the leaves as a resolvent. [a, 35.]—**U. dioica**. Fr., *ortie dioïque*, *grande ortie*, *ortuge*. Ger., *zweihäufige Nessel*, *grosse Brennnessel*. The common (stinging) nettle of Europe, Asia, and northern America. The root, herb, and achenes, radia, herba, et semen urticae (majoris, seu vulgaris, seu racemifera, seu dioica), were formerly official—the first, which contains a volatile oil, as a diuretic; the second as a diuretic, astringent, hæmostatic, anthelmintic, etc.; and the last as a mucilaginous emollient. The young shoots are eaten, boiled, as an antiscorbutic. The plant is applied to the skin in local paralysis, etc., as an irritant, the effect in such cases being due to the fact that it contains free formic acid in the hairs. [a, 35.]—**Urtice folia** (Gr. Ph.). The fresh leaves of *U. pilulifera*. [B, 95 (a, 38).]—**U. gigas**. See LAPORTEA *gigas*.—**U. iners**. See *LAMium album*.—**U. latifolia**. A laxative and diuretic species growing in South America. [a, 35.]

—**U. major**. See *U. dioica*.—**U. membranacea**. A species found in southern Europe and northern Africa, considered an aphrodisiac. In Egypt the herb and seed are used as an emmenagogue and pectoral. [a, 35.]—**U. mexicana**. The *yesgos del país* of the Mex. Ph. The root is used as a diaphoretic and as a substitute for *Sambucus ebulus*. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**U. minor**. See *U. urens*.—**U. mortua**. See *LAMium album*.—**U. nivea**. Fr., *ortie blanche*. The Chinese cotton-nettle. [a, 35.] See *BOEMERIA nivea*.—**U. pilulifera**. Roman nettle, growing in southern Europe and in Asia. The mucilaginous fruits, *semen urticae romanae* (seu hispanicae, seu piluliferæ), were formerly used as a pectoral and are now employed in Greece as a galactagogue. The root is considered astringent, diuretic, and pectoral. [a, 35.]—**U. Rumphii**. A native of the Moluccas, where it is cultivated and much used as a scourge in local tortures, stiffness of joints, paralysis, etc. [a, 35.]—**U. stimula**. See *LACONIA stimula*.—**U. urens**. Fr., *ortie brûlante* (ou *grièche*, ou *folle*, *petite ortie*. Ger., *kleine Nessel* (oder *Brennnessel*). The small (British) nettle, or dwarf-nettle, of Europe, middle and northern Asia, and North America. The herb and fruits (achenes), *herba et semen urticae* (*minoris*, seu *urentis*), were formerly used like those of *U. dioica*. The plant has been recommended in metrorrhagia. [a, 35.]—**U. urentissima**. Fr., *feuille du diable*. The *daoum setan* of Java, devil's-leaf of Timor; a very poisonous species, said to be used like *Laportea stimula*. [a, 35.]—**U. vulgaris**. See *U. dioica*.

URTICAL, adj. U^2rt-ik^2l . Lat., *urticalis*. Belonging to the *Urticales*, which are Lindley's u. alliance (Lat., *nicus urticalis*) of diclinous exogens, including the *Urticaceæ*, *Moraceæ*, *Artocarpaceæ*, etc. [a, 35.]

URTICARIA (Lat.), n. f. $U^2rt(ur)^2ik(ek)^2a^2a^2$. From *urtica*, a nettle. Fr., *urticaire*, *fièvre urticaire*, *grippe urticaire*, *Nesselsucht*, *Nesselsieber*, *Nesselsucht*, *Forcesucht*, *Wickelsucht*. Hives, nettle-rash; an acute or chronic disease of the skin characterized by an eruption of red, elevated, rounded efflorescences of irregular shape and size, which at a certain stage of their development appear blanched in the centre and erythematous at the periphery, being then commonly known as *wheals*. The eruption is attended with intense itching. It is usually transitory, though sometimes disposed to recur. The *Urticaria* of Plenck correspond to u. febrilis. 2. Of Bazin and Auspitz, u. acuta, the chronic form being termed by them *cnidosis*. [G, 4, 26.]—**Giant u.** Fr., *urticaire massive*. Of Milton, u. characterized by large oedematous swellings of the skin or of the mucous membrane of the tongue, throat, urethra, etc., which are rarely accompanied by change of color or itching and are considered as *Elinib. Med. Jour.*, vol. 53 (G). Cf. *U. oedematosa*.—**Internus**. U. affecting the mucous membranes in the interior of the body. It is sometimes observed on the tongue, pharynx, or larynx, and inasmuch as attacks are sometimes associated with nausea and vomiting or with spasmodic dyspnoea, it is inferred that the stomach and air passages may also be subject to the lesions of the disease, and perhaps the mucous membranes of other regions. (G.)—**ab ingestis**. U. provoked by the ingestion of certain articles of food.

[G.]—**U. acuta**. Ger. *Nesselfieber*. U. that runs an acute course and is usually attended with fever. [G.]—**U. alba**. U. of the ordinary type, with wheals that show a white surface in the centre with redness at the periphery. [G.]—**U. annularis**. U. in which the eruption takes the form of rings. [L, 57 (a, 14).]—**U. bullosa**. U. attended with a production of bullae. [G.]—**U. chronica**. Ger. *chronische Nesselsucht*. U. characterized by long continuance, or (more commonly) by a long-persisting tendency to relapsing attacks. [G.]—**U. conferta**. U. characterized by efflorescences closely clustered together. [G.]—**U. dermatographica**. See *U. factitia*.—**U. endemicia**. A form of u. coinciding with (perhaps due to) the presence of *Bombyx processionea*, and consisting in a cutaneous eruption, forming partly pustules, partly wheals, and spreading over the entire body. It is accompanied with violent itching. [Arch. f. path. Anat. u. Physiol., 1891, 125, 2, p. 220 (a, 50).]—**U. ephemera**. Acute u. of short duration. [G.]—**U. evanida**. Ger. *wandelbare Nesselsucht*. U. of very brief duration, or that comes and goes. [G, 10.]—**U. factitia**. Chronic u. in which by artificially irritating the skin the eruption may be produced at will. [G.]—**U. febrilis**. See *U. acuta*.—**U. figurata**. U. characterized by efflorescences grouped in determinate figures. [G.]—**U. fugax**. See *U. evanida*.—**U. gigans**. See *U. tuberosa*.—**U. gyrata**. U. the efflorescences of which form gyrate figures or lines. [G.]—**U. hamorrhagica**. See *PURPURA urticans*.—**U. medicamentosa**. U. provoked by the administration of drugs. [G.]—**U. miliaris**. U. attended with an eruption of miliary vesicles. [G.]—**U. neuritica**. U. due to a lesion of the nerve or nerves supplying the affected part. [G, 4.]—**U. nodosa**. See *U. tuberosa*.—**U. oedematosa**. A form of u. characterized by the sudden appearance of oedematous swellings upon different parts of the body, usually, though not always, accompanied by urticarial wheals and itching, and after a short time suddenly disappearing. [G, 51.]—**U. papulosa**. A form of u., observed especially in children, in which, instead of distinct wheals, smallish red papules are formed which itch violently and frequently appear excoriated from scratching. The eruption is usually more persistent than the ordinary form of u. [G, 3.]—**U. perstans**. Ger. *beharrende Nesselsucht*. U. in which the efflorescences persist throughout the attack. [G.]—**U. pigmentosa**. A form of chronic u., in young children, in which the efflorescences persist for a long time and are accompanied with a brownish-yellow pigmentation. [G.]—**U. porcellanea**. See *U. alba*.—**U. recidiva**. **U. recurrens**. U. characterized by a disposition to recur, as in u. chronica. [G.]—**U. rubra**. U. with red efflorescences. [G.]—**U. subcutanea**. Ger. *schlechte Nesselsucht*. Of Willan, a form of chronic or relapsing u. associated with itching or tingling of the skin, with an occasional eruption of wheals. [G, 1.]—**U. tuberosa**. Ger. *Nesselfriesel*, *harde Nesselsucht*. A form of u. marked by rapid increase of some of the wheals to a large size, forming hard tuberosities which seem to extend deeply and occasion deep-seated pains. [G, 12.]—**U. vaccinica**. U. induced by vaccination. [G, 27.]—**U. vesiculosa**. U. attended with vesicles. [G.]

URTICARIAL, adj. $Urt\text{-}i\text{-}k\text{-}ar\text{-}i\text{-}2\text{-}l$. Lat., *urticatus*. Fr., *orté*. Pertaining to or resembling urticaria. [G.]

URTICATING, adj. $Urt\text{-}i\text{-}k\text{-}at\text{-}i\text{-}2\text{-}n\text{-}2$. Fr., *urticant*. Stinging like a nettle. [a, 27.]

URTICATIO (Lat.), n. f. $Urt\text{-}i\text{-}t\text{-}r\text{-}t\text{-}i\text{-}k\text{-}ek\text{-}a\text{-}a\text{-}3\text{-}i\text{-}sh\text{-}i\text{-}2\text{-}i\text{-}o$. Gen., *-on\text{-}is*. See *URTICATION* and *URTICARIA chronica*.

URTICATION, n. $Urt\text{-}i\text{-}k\text{-}a\text{-}shu\text{-}n$. Lat., *urticatio* (from *urtica*, a nettle). Fr., u. A method of producing substitutive irritation by beating the skin with nettles. [G.]

URUCU, n. See *ANNOTTO*.

URUCURI, n. In Brazil, the *Attalea excelsa*. [a, 35.]

URUSHIC ACID, n. $U\text{-}r\text{-}ush\text{-}i\text{-}2\text{-}k$. From Jap., *urushi*, lacquer. A monobasic acid discovered in Japanese lacquer. [Nature, June 25, 1885, p. 150 (B).]

URWINDUNG (Ger.), n. $Urt\text{-}v\text{-}i\text{-}nd\text{-}un\text{-}2$. 1. A primitive convolution of the brain. 2. Of Huschke, one of the frontal convolutions. [I, 6 (K).]

URWIRBEL (Ger.), n. $Urt\text{-}v\text{-}ir\text{-}b\text{-}el$. A protovertebral somite. —*Eigentliches U.* [Kölliker]. All that portion of the protovertebral structure of the embryo which remains after the separation of the muscular plate; the *Wirbelkernmasse* of Remak. [A, 8.]

URZUGUNG (Ger.), n. $Urt\text{-}soig\text{-}un\text{-}2$. See *Spontaneous GENERATION*.

USAGRO, n. An Arabian term apparently applied to psoriasis. [Ray.]

USNEA (Lat.), n. f. $U\text{-}s\text{-}ne\text{-}a\text{-}3\text{-}i\text{-}ne\text{-}2\text{-}a\text{-}2$. Fr., *usnée*. Ger., *Bartflechte*. A genus of fruticose lichens. The *Usneaceae* (*Usnaceae*, *Usneae*, *Usneaceae*, or *Usneidae*), including *Cetraria*, *U. Evernia*, etc., are a division of the *Tricatæ*. [a, 35.]—*U. barbata*. Fr., *usnée barbuée*, *barbe de capucin*. Ger., *gemeine Bartflechte*, *Haarnosse*. Necklace moss, tree hair; a species found on the bark of trees (sometimes on Loxa-bark). This and similar species, known as *Musculus arboreus*, *Musculus quercinus*, *Musculus arboreus albus*, and *Musculus albus quernus*, are bitter and astringent, and were formerly used in indigestion, dysentery, ischorrhæges, etc. [a, 35.]—*U. crani humani*. The *Parmelia omphalodes*, *Parmelia saxatilis*, and other lichens found on human bones and skulls exposed to the elements. [a, 35.]—*U. jubata*. Tree-hair lichen, formerly official as *Musculus arboreus nigricans*. [a, 35.]

USNEIN, **USNIC ACID**, **USNIN**, n's. $U\text{-}s\text{-}ne\text{-}i\text{-}2\text{-}n\text{-}i\text{-}2\text{-}k$, $n\text{-}i\text{-}2\text{-}n$. Fr., *acide usnique*, *usnine*, *usnine*. Ger., *Usninsäure*. A crystallizable acid, $C_5H_8O_7$, obtained from *Parmelia prunastri* and other lichens. [B, 93 (a, 14).]

USNNIC ACID, n. $U\text{-}s\text{-}n\text{-}i\text{-}2\text{-}n\text{-}i\text{-}2\text{-}k$. Fr., *acide usannique*. An acid, $C_5H_8O_7$, obtained from various lichens, occurring as sulphur-yellow prismatic crystals. [B, 270 (a, 38).]

USSAT (Fr.), n. $U\text{-}s\text{-}a\text{-}2$. A place in the department of the Ariège, France, where there are hot springs. [L, 41, 49, 57 (a, 14).]

USTILAGO (Lat.), n. f. $U\text{-}st\text{-}i\text{-}l\text{-}ag\text{-}a\text{-}2\text{-}g\text{-}o$. Gen., *-ag\text{-}inis*. Fr., *charbon* (1st def.). Ger., *Flugbrand* (1st def.). 1. The typical genus of the *Ustilaginaceae*, or *Ustilaginæ* (Fr., *ustilaginées*; Ger., *Ustilagineen*, *Brandpilze*), or *Ustilaginei* (Fr., *ustilaginés*), which are the smut, *Frug.*, a division of the *Hymenomycetes* or of the *Zygomycetes*, parasitic on flowering plants. The mycelium penetrates through the intercellular spaces of the host-plant and destroys it. [a, 35.] 2. Of the U. S. Ph. see *U. maidis*.—**U. caries**, **U. foetida**. See *TILLETIA caries*.—**U. maidis**, **U. maydis**. Corn- (or maize-) smut; a species which occurs on the stem, grains, and tassels of *Zea mays* in smooth, irregular, roundish-lobed masses, inclosing innumerable blackish-brown nodular spores of disagreeable smell and taste. It is the u. of the U. S. Ph. (see *ENROT* of maize). [a, 35.]—**U. segetum**. Smut, brawn, brancora; a species affecting wheat, barley, oats, Indian corn, and other grasses. Its spores are absorbed into the tissues of the grass, and are carried up till they reach the grain in the ear, which becomes a sooty mass. It differs from *U. foetida* in having no odor. [a, 35.]

USTION, n. $U\text{-}st\text{-}i\text{-}u\text{-}3\text{-}n$. Gr., *καυσθ*. Lat., *ustio* (from *urere*, to burn). Fr., u. Ger., u. 1. A burn. 2. Cauterization. [E.]

USTULATION, n. $U\text{-}st\text{-}i\text{-}u\text{-}l\text{-}a\text{-}shu\text{-}n$. Lat., *ustulatio* (from *ustulare*, to scorch). Fr., u. In ancient pharmacy, the roasting of a moist substance before powdering it. [L, 41, 56 (a, 14).]

USTUS (Lat.), adj. $U\text{-}st\text{-}i\text{-}u\text{-}st\text{-}i\text{-}u\text{-}3\text{-}n$. From *urere*, to burn. Burnt, calcined. [E.]

USUR (Ger.), n. $U\text{-}zur\text{-}f$. Fr., *usure*. An abrasion.

USURE (Fr.), n. $U\text{-}3\text{-}zur\text{-}f$. See *USUR*.—**U. des dents**. See *ODONTOPOTRIE*.—**U. de l'utérus**. Ger., *Durchreibung des Uterus*. Slow perforation of the uterus by attrition during labor, as opposed to rupture properly so called.

UTER (Lat.), n. m. $U\text{-}t\text{-}r\text{-}i\text{-}u\text{-}t\text{-}i\text{-}u\text{-}3\text{-}n$. Gen., *ut\text{-}ri*. See *UTERUS*.

UTERALGIA (Lat.), n. f. $U\text{-}t\text{-}r\text{-}i\text{-}u\text{-}t\text{-}i\text{-}u\text{-}3\text{-}n$ [a] [a] [g] [i] [a] [2] [a] [2]. From *uterus* (q. v.), and *algos*, pain. Fr., *utérâlgie*. See *HYSTERALGIA*.

UTÉRANGIOLEUCITE (Piory) (Fr.), n. $U\text{-}t\text{-}r\text{-}a\text{-}n\text{-}g\text{-}i\text{-}o\text{-}l\text{-}e\text{-}u\text{-}c\text{-}i\text{-}t\text{-}e$. Inflammation of the lymphatics of the uterus. [a, 14.]

UTÉRÉMPHRAXIE (Fr.), n. $U\text{-}t\text{-}r\text{-}a\text{-}n\text{-}g\text{-}i\text{-}o\text{-}l\text{-}e\text{-}u\text{-}c\text{-}i\text{-}t\text{-}e$. Obstruction of the uterus. [L, 41 (a, 14).]

UTERINE, adj. $U\text{-}t\text{-}r\text{-}i\text{-}u\text{-}t\text{-}i\text{-}u\text{-}3\text{-}n$. Lat., *uterinus*. Fr., *utérin*. Ger., *uterinal*. Pertaining to associated with, or affecting the uterus.

UTERITIS (Lat.), n. f. $U\text{-}t\text{-}r\text{-}i\text{-}u\text{-}t\text{-}i\text{-}u\text{-}3\text{-}n$ [e] [t] [i] [2] [s]. Gen., *-it\text{-}idos* (-idis). Fr., *utérite*. See *METRITIS*.

UTÉROCEPS (Fr.), n. $U\text{-}t\text{-}r\text{-}o\text{-}c\text{-}e\text{-}p\text{-}s$. An instrument for grasping the cervix uteri. [L, 41 (a, 14).]

UTÉRO-ABDOMINAL, adj. $U\text{-}t\text{-}r\text{-}o\text{-}c\text{-}a\text{-}b\text{-}d\text{-}o\text{-}m\text{-}i\text{-}2\text{-}n\text{-}l$. Pertaining to the uterus and the abdomen. [a, 48.]

UTÉRO-EPICHORIAL (Fr.), n. $U\text{-}t\text{-}r\text{-}o\text{-}a\text{-}p\text{-}e\text{-}c\text{-}h\text{-}o\text{-}r\text{-}e\text{-}a\text{-}2\text{-}l$. See *DECIDUA serotina*.

UTEROFIXATION, n. $U\text{-}t\text{-}r\text{-}o\text{-}f\text{-}i\text{-}x\text{-}a\text{-}2\text{-}n$ [a] [shu] [2] [n]. From *uterus* (q. v.), and *fixare*, to fix. See *HYSTEROPEXIA*.

UTERO-GESTATION, n. $U\text{-}t\text{-}r\text{-}o\text{-}g\text{-}e\text{-}s\text{-}t\text{-}a\text{-}2\text{-}n$ [a] [shu] [2] [n]. See *GESTATION* (2d def.).

UTÉRO-INGUINORRHAPHIE (Fr.), n. $U\text{-}t\text{-}r\text{-}o\text{-}i\text{-}n\text{-}g\text{-}u\text{-}i\text{-}n\text{-}o\text{-}r\text{-}h\text{-}a\text{-}p\text{-}h\text{-}i\text{-}e$. See *ADVANCEMENT of the round ligaments*.

UTÉRO-LUMBAR, adj. $U\text{-}t\text{-}r\text{-}o\text{-}l\text{-}u\text{-}m\text{-}b\text{-}a\text{-}2\text{-}n$. Fr., *utéro-lombaire*. Pertaining to or connecting the uterus and the lumbar region. [L, 41, 49 (a, 14).]

UTEROMANIA (Lat.), n. f. $U\text{-}t\text{-}r\text{-}o\text{-}m\text{-}a\text{-}n\text{-}i\text{-}a$ [ma] [n] [i] [2] [a] [2]. From *uterus* (q. v.), and *mania*, madness. Fr., *utéromanie*. An old term for nymphomania. [A, 42.]

UTÉRO-OVARIAN, adj. $U\text{-}t\text{-}r\text{-}o\text{-}o\text{-}v\text{-}a\text{-}r\text{-}i\text{-}a\text{-}2\text{-}n$. Fr., *utéro-ovarien*, *utéro-ovarique*. Pertaining to the uterus and the ovary.

UTÉRO-PARIETAL, adj. $U\text{-}t\text{-}r\text{-}o\text{-}p\text{-}a\text{-}r\text{-}i\text{-}e\text{-}t\text{-}a\text{-}2\text{-}l$. Pertaining to the uterus and the abdominal wall.

UTÉRO-PLACENTAL, adj. $U\text{-}t\text{-}r\text{-}o\text{-}p\text{-}l\text{-}a\text{-}c\text{-}e\text{-}n\text{-}t\text{-}a\text{-}2\text{-}l$. Fr., *utéro-placentaire*. Ger., *uteroplacentar*. Pertaining to the uterus and the placenta. [a, 48.]

UTERORRHAGIA (Lat.), n. f. $U\text{-}t\text{-}r\text{-}o\text{-}r\text{-}h\text{-}a\text{-}g\text{-}i\text{-}a$ [ra] [g] [i] [2] [a] [2]. From *uterus* (q. v.), and *ῥήγνωσθαι*, to burst forth. See *METORRHAGIA*.

UTERORRHAPHY, n. $U\text{-}t\text{-}r\text{-}o\text{-}r\text{-}h\text{-}a\text{-}f\text{-}i\text{-}a$. From *uterus*, the uterus, and *ῥαφῆ*, a seam. See *HYSTEROORRHAPHY*.

UTÉRORRHÉE (Fr.), n. $U\text{-}t\text{-}r\text{-}o\text{-}r\text{-}h\text{-}e\text{-}e$. See *METORRHÆA*.

UTÉRO-SACRAL, adj. $U\text{-}t\text{-}r\text{-}o\text{-}s\text{-}a\text{-}c\text{-}r\text{-}a\text{-}2\text{-}n$. Fr., *utéro-sacré*. Pertaining to the uterus and the sacrum. [a, 48.]

UTÉROSCOPIE (Fr.), n. $U\text{-}t\text{-}r\text{-}o\text{-}s\text{-}k\text{-}o\text{-}p\text{-}i\text{-}e$. See *METROSCOPY*.

UTÉROSTOMELCIE (Piory) (Fr.), **UTÉROSTOMELCOSIE** (Piory) (Fr.), n's. $U\text{-}t\text{-}r\text{-}o\text{-}s\text{-}t\text{-}o\text{-}m\text{-}e\text{-}l\text{-}c\text{-}i\text{-}e$, $-e\text{-}l\text{-}c\text{-}o\text{-}z\text{-}e$. Ulceration of the cervix uteri. [L, 41 (a, 14).]

UTEROTOME, n. $U\text{-}t\text{-}r\text{-}o\text{-}t\text{-}o\text{-}m\text{-}e$. Fr., *utérótome*. See *HYSTÉROTOME*.

UTEROTOMY, n. $U\text{-}t\text{-}r\text{-}o\text{-}t\text{-}o\text{-}m\text{-}i\text{-}2$. Lat., *uterotomia* (from *uterus* [q. v.], and *τομή*, a cutting). Fr., *utératomie*. See *HYSTÉROTOMY*.

UTEROTRACTOR, n. $U\text{-}t\text{-}r\text{-}o\text{-}t\text{-}r\text{-}a\text{-}k\text{-}t\text{-}o\text{-}r$. From *uterus* (q. v.) and *trahere*, to drag. An instrument employed by A. C. Bernays for making traction on the cervix uteri, differing from Noeggerath's tenaculum-forceps chiefly in having several teeth on each blade. [Weekly Med. Rev., Apr. 12, 1884, p. 288.]

UTÉRO-VAGINAL, adj. $U\text{-}t\text{-}r\text{-}o\text{-}v\text{-}a\text{-}g\text{-}i\text{-}n\text{-}a\text{-}2\text{-}l$. Pertaining to the uterus and the vagina.

UTERO-VENTRAL, adj. $U^2v^2e^2r-o-v^2n^2t^2r^1$. Pertaining to the uterus and the abdominal cavity.

UTERRHÉMIE [Piorry] (Fr.), n. $U^2e^2r-r^1a-me$. See METRORRHEAGIA.

UTERUS (Lat.), n. m. $U^2(ut)^2e^2r-u^2s(ut)^2$. Gr., *ὑτέρα*. Fr., *utérus*, *matrice*. Ger., *U. Gebärmutter*, *Gebärmutter*, *Fruchthalter*, *Mutterbag* (3d def.). 1. The organ of gestation; made up chiefly of muscular fibres and having a cavity lined with mucous membrane continuous with that of the vagina. It is covered before and behind with peritoneum. In the human subject it is situated in the pelvis. In the non-gravid state it has the shape of a pear flattened from before backward. It is suspended in the pelvis by the broad ligaments. Its cavity is $\frac{3}{4}$ in. in depth. It is divided into a body and a neck; the latter projects backward and somewhat downward into the vagina. 2. In mycology, the *velum universale*. [a. 35.]—**Arched u.** Lat., *u. arcuatus*. That form of u. in which the longitudinal median furrow marking the union of the primitive halves of the organ is more than ordinarily pronounced at the fundus, from the fusion of the horns being somewhat defective. [A. 24.]—**Bilobed u.** See *U. bicornis*.—**Divided u.** See *U. septus*.—**Double u.** Ger., *doppelte Gebärmutter*. That malformation of the u. in which the two horns are developed, but have not become fused into one organ. See also *U. bicornis* and *U. septus*.—**Ductile u.** Syn.: *squatty u.* [Taylor]. Of I. E. Taylor (who repudiates "balloon u."), a condition of the u. in which its walls are lax and yielding, so that they collapse horizontally and may be carried up before a sound introduced into the cavity of the organ. [a. 34.]—**Duplex u.** See *Double u.*—**Fusiform u.** Lat., *u. fusiformis*. Ger., *spindel-förmiger U.* That form of the u. in which, during advanced pregnancy, its vertical diameter is the greatest. Schröder and Stratz (A. 388).—**Gravid u.** A u. containing a fecundated ovum.—**Imparous u.** Of Barnes, a u. that has never contained a product of conception. [a. 34.]—**Impregnated u.** See *Gravid u.*—**Incurdiform u.** An anvil-shaped u. [a. 34.]—**Infantile u.** Lat., *infantilis*. Fr., *utérus fœtal* (on embryonnaire). That abnormality of the u. in which it is normally formed, but has been arrested in its development. [Lefort (A. 15).]—**Intestiform u.** A u. having an elongated cervix and a thin body resembling a section of intestine. [a. 34.]—**Inverted u.** The u. in a state of inversion (q. v.).—**Irritable u.** See Hysterical (3d def.).—**Male u.** See *U. masculinus*.—**Membranous u.** Of Walter, a u. in which the walls are attenuated by distention and atrophy caused by fibroid tumors. [a. 34.]—**Pregnant u.** See *Gravid u.*—**Retort-shaped u.** Ger., *Retortengestalt der Gebärmutter*. A flexed u. that has an elongated cervix, giving the organ the appearance of a retort. [a. 34.]—**Saccated u.** A u. in the condition of hour-glass contraction. [A. 75.]—**Squatty u.** [Taylor]. See *Ductile u.*—**Twin u.** See *Double u.*—**U. acollis. See *U. parvicollis*.—**U. anhang** (Ger.). See *Uterine appendage*.—**U. arcuatus**. See *Arched u.*—**U. biangularis**. See *Incurdiform u.*—**U. bicornis**. That malformation of the u. in which the two rudimentary lateral halves, or horns, remain more or less separate, instead of coalescing through their whole length. See also *U. bicornis duplex* and *U. bicornis semiduplex*.—**U. bicornis duplex**. Ger., *gänzliche Verdoppelung der Gebärmutter*. That variety of double u. in which the duplicate formation affects the whole organ. [a. 34.]—**U. bicornis simplex**, *U. bicornis semiduplex* (see *infra simplex*). *U. bicornis uncollis*. Ger., *theilweise Verdoppelung der Gebärmutter*. A duplex u. in which the body alone is double and the cervix is single. [a. 34.]—**U. bicorpor**. A u. consisting of two bodies.—**U. bifid**. See *U. bicornis*.—**U. bifundalis uncollis**. See *U. bicornis uncollis*.—**U. biclucaris. *U. bipartitus*. See *U. septus*.—**U. bruch** (Ger.). Rupture of the u.—**U. cordiformis. Fr., *utérus échanuré*. That form of defective development of the u. in which the fundus remains depressed, so that the organ has somewhat the shape of the heart of a playing-card. [A. 22.]—**U. deficiens**. Absence of the uterus.—**U. didelphis**, *U. didelphis*. See *Double u.*—**U. diductus**. That variety of double u. in which there are complete independence and divergence of the two halves. [Lefort (A. 15).]—**U. duplex**. See *Double u.*—**U. duplex separatus**. A double u. in which there is no connection between the two halves of the organ; associated with double vagina. [Spiegelberg (a. 34).]—**U. flexus**. A u. with an abnormal flexion. [Lefort (A. 15).]—**U. foetalis**. See *Infantile u.*—**U. globularis. A u. subseptus with complete fusion of the two lateral halves externally. [Lefort (A. 15).]—**U. hals** (Ger.). See *Cervix uteri*.—**U. imperforatus**. 1. An imperforate u. 2. A u. that has no cavity at all. [Lefort (A. 15).]—**U. masculinus**. The prostatic vesicle of the male, with its occasional vestigial accompaniments. [A. 5.]—**U. muscularis**. A u. in which there is an interstitial myoma. [a. 34.]—**U. naant** (Ger.). See Hysteroepithymia.—**U. parvicolis**. See *U. acollis*.—**U. scollis. That variety of double u. in which its body is normal, but its neck atrophied or lacking. [Lefort (A. 15).]—**U. peristaltic** (Ger.). Peristaltic contraction of the u. [A. 32.]—**U. redresseur** (Ger.). See *Intra-uterine pessary*.—**U. retroflexus**. See *RETROFLEXION of the uterus*.—**U. retroversus**. A retroverted u.—**U. ruptur** (Ger.). Rupture of the uterus.—**U. septus** (*bicollis*). Fr., *utérus biclucaris*. That form of defective development of the u. in which the two Müllerian ducts have united, the partition between them remains wholly or in part. [A. 22.] See also *U. septus duplex* and *U. subseptus*.—**U. septus duplex**. That variety of u. biclucaris in which there is a division from the fundus to the external os, forming two equal halves. [Spiegelberg (a. 34).]—**U. semipartitus**. Fr., *utérus en partie doctonné* or *partiellement doctonné*. [Lefort (A. 15).]—**U. subseptus**. That variety of u. septus in which the dividing wall between the two lateral canals has partly disappeared, leaving the vagina and the cervix single, while the cavity of the body of the u. is double.—**U. unicornis**. Ger., *einhornige Gebärmutter*. A one-horned u.; that malformation of the u. in which only one of the two original lateral halves is fully developed, the other being rudimentary or wanting.—**U. unilucaris**. A u. of the former kind, in which the cavity of the organ is normally formed, the du-**********

plicity appearing only at the fundus on the outside. [Lefort (A. 15).]—**U. velatus**. See *U. subseptus*.—**U. virilis**. See *U. masculinus*.—**Ventral u.** A term sometimes applied to the fetal sac in cases of abdominal pregnancy. [A. 65.]

UTERUS (Fr.), n. See **UTERUS**.—**U. échanuré**. See **UTERUS cordiformis**.—**U. pubescent**. Of Puech, an imperfectly developed uterus. [a. 34.]

UTRICLE, n. $U^2r^1r^2k^1$. Lat., *utriculus* (dim. of *uter*, a leathern bag). Fr., *utricule*. Ger., *Schlauch* (1st def.), *Hautfrucht* (3d def.), *Schlauchfrucht* (3d def.). Syn.: *sinus communis* (2d def.). 1. A little pouch or bag, especially a membranous, closed, saclike part or organ. [a. 35.] 2. The larger of the two vesicles into which the otic vesicle of the embryo is divided by a constriction which at last shuts it off from the sacculle. [A. 5.] 3. A fruit in which the pericarp is like a bladder around the seed; of Gärtner, a cystidium (2d def.). [a. 35.]—**Primordial u.** 1. The membrane of a cartilage cell directly in contact with the cell. 2. A thin layer of protoplasm lining described by Hensen as the membrane of the red blood-corpuscles of the *Amphibia*, connected by delicate fibrils with a similar protoplasmic layer surrounding the nucleus. [J. 22, 35.] 3. A layer of protoplasm first deposited upon the inner surface of the wall of a cell. [a. 35.]—**U. of the prostatic portion of the urethra**. See **UTERUS masculinus**.—**U. of the vestibule**. The vestibular cavity which connects with the semicircular canals. It is imbedded in the recessus ellipticus, and communicates with the semicircular canals by five foramina. It is attached to the wall of the bony vestibule by loose connective tissue. It is surrounded by perilymph and contains endolymph. It consists of a fibrillar substantia propria bounded externally by vascular connective tissue and internally by angular pavement epithelium. [F. 32.]

UTRICULAR, adj. $U^2r^1r^2k^1u^2l^1a^2r$. Lat., *utricularis*. Fr., *utriculaire*. Ger., *schlauchartig*, *schlauchicht*, *schlauchricht*. Pertaining to a utricle; bladderlike in appearance; consisting of a utricle or bearing many utricles. [a. 35.]

UTRICULARIA (Lat.), n. f. $U^2r^1(ut)^2r^2k^1u^2l^1a^2r(u^2l^1a^2r)$. Fr., *utriculaire*, *utriculaire*. Ger., *Wasserschlauch*, *Bladderwort*, hooded (water-) milfoil; a genus of the *Lentibulariaceae*. The *Utriculariaceae*, *Utriculariæ*, *Utriculariæ*, or *Utriculariæ* are the *Lentibulariæ*. [a. 35.]—**U. reticulata**. A Malabar species, used in flatulence. [a. 35.]—**U. vulgaris**. Fr., *millefeuille des marais*. Ger., *gemeiner Wasserschlauch*, *Wassergarbe*, *Laichkräut*. Common bladderwort, formerly official as *herba lentibularis*, and used in dysuria and externally as a vulnerary. [a. 35.]

UTRICULUS (Lat.), n. m. $U^2r^1(ut)^2r^2k^1u^2l^1a^2r(u^2l^1a^2r)$. See **UTRICLE**.—**U. lacrimalis**, *U. lacrimarum*. See *Lacrymal sac*.—**U. lacteus**. See *RECEPTACULUM chyli*.—**U. prostaticus**. See **UTERUS masculinus**.

UTRIFORM, n. $U^2r^1r^2k^1o^2r^1m$. Lat., *utriformis* (from *uter*, a bag, and *forma*, form). Fr., *utriforme*. Ger., *schlauchförmig*. Having the form of a bladder or udder. [L. 41 (a. 14).]

UTUR, n. See **ATTAR**.

UVA (Lat.), n. f. $U^2v(u)^2va^2(wa^2)$. Fr., *baie* (1st def.), *raisins secs* [Fr. Cod.] (3d def.). Ger., *Beere*, *Traube* (1st def.). Sp., *vid* (*el fruto maduro y pasa* [Sp. Ph.]) (3d def.). Syn.: *fructus vitis minuts* (Swed. Ph.) (3d def.), *passule majores* (Gr. Ph.) (see *minor*) (3d def.), *uva* (1st def.), *passule majores* (Gr. Ph.) (see *minor*) (3d def.). 1. The fruit of the vine. 2. The grape. 3. In the pl., *uva*, of the Br. Ph. raisins, the dried fruit of *Vitis vinifera* (var. *aprena* [Swed. Ph.]). The Br. Ph. admits only large (Malaga) raisins; the Swed. Ph. and Belg. Ph. admit only small (Corinthian) raisins (black currants); the Fr. Cod., Gr. Ph., and apparently Sp. Ph., admit both kinds. [B. 36 (a. 38).]—**Uve corinthiæ**. See *Corinthian raisins*.—**U. crispa**. The fruit of *Vitis rotundifolia*. [a. 35.]—**U. inversa**, *U. lupina*. Old names for the *Paris quadrifolia*. [a. 35.]—**Uve malacenses**. See *Malaga raisins*.—**U. marina. The *Ephedra distachya*; in the pl., *uva marina*, the spawn of *Septa officinalis*. [a. 35.]—**Uve passe**. See *RAISINS*.—**Uve passe majores**. Ordinary raisins. [a. 35.]—**Uve passe minores**. See *Corinthian raisins*.—**U. ursi**. See the major list.—**U. versa**, *U. vulpina*. See *Paris quadrifolia*.**

UVARIA (Lat.), n. f. $U^2v(u)^2va^2(wa^2)r^2a^2$. From *uva*, a grape. Fr., *canong*. Ger., *Traubenbaum*. A genus of the *Urticæ*, which are a tribe of the *Anonaceæ*. [a. 35.]—**U. argentea**. A species found in the Moluccas. The bark is used as a carminative, etc. [a. 35.]—**U. latifolia**, *U. ligularis*. Species found in the Moluccas. From the fragrant spicy seed salves are prepared. [a. 35.]—**U. narum**. Ger., *kletterndes Traubenbaum*. An East Indian shrub, the *narumpan* of Malabar. The roots and a gummy oil obtained from them are used in fevers, dysentery, etc. and externally in rheumatism and gout. [a. 35.]—**U. odorata**. A tree growing throughout southern India. The flowers yield cananga oil. A stimulating salve, used as a febrifuge, is prepared from the flowers. The bitter root-bark and seed are used as a stomachic. [a. 35.]

UVATIO (Lat.), n. f. $U^2v(u)^2va^2(wa^2)sh^2i^2t^2i^2o$. Gen., *-onis*. From *uva*, a grape. An old term for a corneal staphyloma and for a keratocele. [F.]

UVA URSI (Lat.), n. $U^2v(u)^2va^2(wa^2)u^2rs(u^2rs)^2f(i)e$. 1. Of Tournefort, the genus *Arctostaphylos*. 2. The *Arctostaphylos u. u.* 3. Of the ph's, the leaves of *Arctostaphylos u. u.* [a. 35.]—**Decoctum uve u.** Fr., *decoction de busserole*. A decoction made by boiling 1 oz. of the leaves of *Arctostaphylos u. u.* with 1 pint of water and reducing to 1 pint. [B. 119.]—**Extractum uve u.** Fr., *extrait de busserole*. Of some of the older formulæ, an aqueous extract of the leaves of *Arctostaphylos u. u.* [B. 119.]—**Extractum uve u. fluidum** [U. S. Ph.]. A preparation made by moistening 10 grammes of u. u. in No. 30 powder with 35 of a mixture of 10 parts of glycerin and 90 of water, and, after exhausting in a percolator with the rest of the menstruum and then

with more alcohol, and bringing up to 100 c. c. [Fr. 95 (a, 38).]—*Folia uva u.* See *U. u.* (3d def.).—*Infusum uva u.* Fr., *tisane d'u. u.* A preparation made by infusing *u. u.* (3d def.) in twenty times as much boiling water for an hour [Fr. Ph.] (in one hundred times as much for half an hour [Fr. Cod.]), and straining, [a, 38].

UVEA (Lat.), n. f. $U^2(u)ve^2(we^2)a^2$. From *uva*, a grape. Fr., *uvée*. Ger., *Traubenhaut*, *U.* The pigmented or middle coat of the eye, including the iris, ciliary body, and choroid; usually confined to the choroid. [F.]

UVEAL, adj. $U^2v^2e^2a^2$. Fr., *uvéale*. Ger., *u.* Pertaining to or constituted the uvea. [F.]

UVEITIS (Lat.), n. f. $U^2(u)ve^2(we^2)i(e)^2ti^2s$. Gen., *-itidos (-idis)*. From *uvea* (q. v.). Fr., *uvéite*. Inflammation of the uvea. [F.]—**U. anterior**. Of Stellwag, parenchymatous keratitis, so called because it affects the posterior layers of the cornea that are embryologically classed with the uvea. [a, 34.]—**U. sympathica**. U. due to irritation of the ciliary nerves. [L, 57 (a, 14).]

UVIC ACID, n. $U^2v^2i^2k$. Fr., *acide uvique*. Ger., *Trauben-säure*. A substance, $C_7H_8O_3$, forming fine, white needles of glassy lustre. [B, 93 (a, 14).]

UVITIC ACID, n. $U^2v^2i^2t^2k$. Fr., *acide uvitique*. Ger., *Uvitinsäure*. A methylbenzenedicarboxylic acid, $C_8H_6O_4 = C_6H_4(CO_2H)_2$, occurring as grouped crystals or a crystalline powder. [B, 3 (a, 38).]

UVULA (Lat.), n. f. $U^2(u)vu^2l(wu^2l)a^2$. Dim. of *uva*, a grape. Gr., *κρανία*. Fr., *uvule*, *luette*. Ger., *Zäpfchen*. A conical process dependent in the middle line from the soft palate and made up of the azygos uvula, elastic and areolar tissue, small acinous glands, and an investment of mucous membrane. [L.]—**Lieu-taud's u.** See *Vesical u.*—**U. bifida**. A fissured state of the u., presenting the appearance of two uvulae. [a, 34.]—**U. cere-**

belli. See *U. of the cerebellum*.—**U. decidua**. See STAPHYLOPTOSIS.—**U. of the cerebellum**. Lat., *u. cerebelli*. Fr., *uvule du cervelet*, *pedicule de la tuerie*. Ger., *Zäpfen des Kleinhirns*, *Zäpfchen*. A small projection on the inferior vermiciform process of the cerebellum in front of the pyramid and between the amygdalae. [I, 15 (K).]—**U. of the urinary bladder**. See *Vesical u.*—**U. palati**. See *U.*—**U. relaxata**. See STAPHYLOPTOSIS.—**U. vermis**. See *U. of the cerebellum*.—**U. vesicæ**, *Vesical u.* The posterior part of the caput galli that projects into the prostatic urethra. [L, 115 (a, 34).]

UVULAR, adj. $U^2v^2u^2l-a^2r$. Lat., *uvularis*. Fr., *uvulaire*. Pertaining to the uvula. [L, 50 (a, 14).]

UVULARIA (Lat.), n. f. $U^2(u)vu^2l(wu^2l)a^2(a)^2ri^2a^2$. From *uva*, a grape. Fr., *uvulaire*. Ger., *Zäpfchenkraut*. Bellwort, a genus of lilaceous plants. The *Uvulariaceae*, formerly regarded as a distinct order, are a tribe (*Uvularieae*) of the *Liliaceae*. [a, 35.]—*Folia* (sen herba) *uvularia*. The herb of *Ruscus hypoglossum*. [a, 35.]—**U. grandiflora**. Large-flowered bellwort; a North American species. The leaves and root are used by the Indians against the bite of the rattlesnake. [a, 35.]—**U. perfoliata**. Mealy bellwort; found in North America. The root is used to make an astringent gargle. [a, 35.]

UVULARIS [Couses] (Lat.), n. m. $U^2(u)vu^2l(wu^2l)a^2r(a)^2ri^2a^2$. See *Azygos uvula*.

UVULATOME, n. $U^2v^2u^2l-a^2tom$. From *uvula* (q. v.) and *réveuv*, to cut. Ger., *Uvulotome*. See STAPHYLOTOME.

UVULITIS (Lat.), n. f. $U^2(u)vu^2l(wu^2l)i(e)^2ti^2s$. Gen., *-itidos (-idis)*. From *uvula* (q. v.). Fr., *uvulite*. Ger., *Zäpfchengeschwulst*. See STAPHYLITIS.

UVULOPTOSIS (Lat.), n. f. $U^2(u)vu^2l(wu^2l)-o^2pt-os^2i^2s$. Gen., *-ptos^2eos (-is)*. From *uvula* (q. v.) and *πτωσις*, a falling. See STAPHYLOPTOSIS.

V

V. n. Vo. The letter V, also a V-shaped structure. [a, 48.]—**V lingual** (Fr.). The V-shaped line of papillae on the dorsum of the tongue.

VACCIN (Fr.), n. $Va^2k-a^2n^2$. See VACCINE (n.).—**V. animal**. See *Animal LYMPH*.—**V. aviaire**. A protective serum obtained from birds in which the toxicity of certain pathogenic micro-organisms has been attenuated by inoculation. [a, 34.]—**V. en poudre**. Of the Belgian sanitary commission, vaccine lymph dried by hot air, powdered, and preserved in sterilized glass tubes. [L, 57 (a, 14).]—**V. liquide**. See *Glycerin LYMPH*.—**V. sec.** See *Dried LYMPH*.

VACCINA (Lat.), n. f. $Va^2k(wa^2k)-sin(ken)^2a^2$. From *vaccinus*, pertaining to the cow. See VACCINIA.

VACCINABLE (Fr.), adj. $Va^2k-se-na^2-bl^2$. Capable of being vaccinated. [a, 48.]

VACCINADS, n. $Va^2k-si^2n-a^2dz$. From *vaccina* (q. v.). The micro-organisms of vaccine lymph. [a, 18.]

VACCINAL, adj. $Va^2k-si^2n-l^2$. Lat., *vaccinalis*. Fr., *v.* See VACCINE (adj.).

VACCINATE, v. tr. Va^2k-si^2n-at . Lat., *vaccinare*. Fr., *vacciner*. Ger., *impfen*, *vaccinieren*. To inoculate with vaccine virus. [G.]

VACCINATION, n. $Va^2k-si^2n-a^2shu^2n$. Lat., *vaccinatio*. Fr., *v.* Ger., *Kuhpockenimpfung*, *Impfung*. *V.* Inoculation with vaccine virus as a protective measure against small-pox. [D; G.] Recently the term has been improperly applied to inoculation with various other viruses.—**Anthraxic v.** Inoculation of animals with attenuated cultivations of the anthrax bacillus. [a, 34.]—**Chemical v.** Of Castaneda and Borda, a v. done experimentally upon animals by injecting subcutaneously urine from yellow-fever patients, in the hope of its containing some chemical substance (perhaps a ptomaine) secreted by the specific micro-organism capable of affording protection against the disease. [“Lancet,” Mar. 1, 1890, p. 481 (a, 50).]—**Intra-uterine v.** *Id.*, *vaccinatione intra-uterina*. Variolous immunity communicated by the mother to the fetus as the result of her having been successfully vaccinated during pregnancy. [L, 87 (a, 34).]—**Retro-v.** The communication of vaccinia from man to the cow. [D, 1.]—**V. antirabique** (Fr.). Protective inoculation against rabies. The virus is secured by a series of inoculations of virus from the central nervous system of an animal dead of rabies under the dura of healthy animals; an emulsion is made of the spinal cord after it has dried for fourteen days, and some of this is inoculated into the animal to be protected, then the latter is inoculated with an emulsion of a cord dried for thirteen days, and so on in a decreasing series until an emulsion of fresh cord is used. [“N. Y. Med. Jour.,” Oct. 26, 1896, p. 462 (a, 34).]—**V'szwang** (Ger.). Compulsory vaccination. [a, 14.]

VACCINATOR, n. $Va^2k-si^2n-at-o^2r$. From *vaccinare*, to vaccinate. Fr., *vaccinateur* (1st def.). Ger., *Impfnadel* (2d def.). 1. One who vaccinates. 2. An instrument for performing vaccination. [G.]—**Carroll's v.** A v. (2d def.) composed of six needles fastened side by side at short distances from each other. [E.]—**Dawson's v.** A v. (2d def.) consisting of a number of needles worked by a spring. [E.]

VACCINE, adj. Va^2k-si^2n . Lat., *vaccinus*, *vaccinalis* (from *vacca*, a cow). Fr., *vaccinal*, *vaccinique*. Pertaining to the cow; also pertaining to vaccinia or to vaccination. [G.]

VACCINE, n. Va^2k-sen . Lat., *vaccinum*. Fr., *vaccin*. Ger., *Impfstoff*. The virus of cow-pox (vaccinia), being either the liquid contained in the pocks or the crust formed by their desiccation. For subheadings, see under LYMPH, and of VIRUS.

VACCINE (Fr.), n. Va^2k-sen . See COW-POX and VACCINIA.—**Fausse v.** See VACCINELLA.—**V. ulcéreuse**. See *VARIOLA vaccina ulcerosa*.

VACCINELLA (Lat.), n. f. $Va^2k(wa^2k)-si^2n(ken)-e^2l^2a^2$. Fr., *vaccinelle* (q. v.), *vaccinoïde*. Ger., *unächte Kuhpocken*. A disease or lesion produced by an abortive vaccination, differing in its symptoms from true vaccinia and usually failing to protect against variola. [G.]

VACCINELLE (Fr.), n. $Va^2k-sen-e^2l$. 1. A form of vaccinia attended by a generalized eruption, comparable to that of variola; supposed to result from successive self-inoculations from the original sore. [D, 74.] 2. See VACCINELLA.

VACCINEUSE (Fr.), n. $Va^2k-sen-u^2z$. Of Burq, an apparatus for charging needles with vaccine lymph and preserving them so charged. A number of needles are arranged in a circle, the points to the centre, and held between two discs of rubber forced together with a screw. The points are charged by smearing the lymph over them with a brush.

VACCINIA (Lat.), n. f. $Va^2k(wa^2k)-si^2n(ken)^2a^2$. From *vaccinus*, pertaining to the cow. Fr., *vaccine*. Ger., *Kuhpocken*, *Schutzpocken*, *Schutzblattern*. Cow-pox (q. v.) when inoculated upon the human subject, either immediately from an infected animal (v. *primigena*) or mediately from a person recently inoculated with the virus of the disease (v. *vaccinatoria*). The disease is characterized by the appearance of a small papule at the site of inoculation in from one to three days, which two days later becomes a vesicle with clear contents. It increases in size until about the end of the first week, becoming depressed in the centre and surrounded by a red areola. After the first week the contents of the efflorescence become purulent and soon begin to desiccate and form a scab, which, falling off during the second week or later, leaves a superficial, pitted and permanent cicatrix. The affection is usually attended with slight fever. [G.]—**Generalized v.** Fr., *vaccinide*, *pullulation vaccinale généralisée*. V. attended with a general exanthem consisting of efflorescences that closely resemble in their appearance, course, and resulting cicatrices the localized disease at the point of inoculation. [G.]—**Irregular v.**, **Spurious v.**, **V. anormis**. See VACCINELLA.—**V. antivariolosa**. See *V.*—**V. gangrenosa**. A general exanthem accompanying v., consisting of pustular efflorescences, sometimes like those of variola, which become gangrenous. [J. Hutchinson, “Brit. Med. Jour.,” Oct. 29, 1881 (G).]—**V. genuina**. True v. (i. e., v. capable of affording protection against variola). [G.]—**V. primigena**. See under *V.*—**V. tutoria**, *V. tutrix*. See *V.*—**V. vaccinatoria**. V. produced by inoculation with humanized lymph. [G.]

VACCINIACEOUS, adj. $Va^2k-si^2n-l^2a^2shu^2s$. Resembling the genus *Vaccinium*; of the *Vacciniaceae*, which are an order of monopetalous dicotyledons included by some authors as a tribe (*Vaccinieae*) in the *Ericaceae*. [a, 35.]

VACCINAL, adj. $Va^2k-si^2n-l^2$. See VACCINE (adj.).

VACCINIDE (Fr.), n. $Va^2k-sen-ed$. See *Generalized VACCINIA*.

VACCINIFER, n. $Va^2k-si^2n-l^2fu^2r$. From *vaccinia* (q. v.) and *ferre*, to bear. 1. An individual from whose body vaccinal virus is

taken for the purpose of conveying vaccinia to another. 2. An instrument for vaccination.

VACCINIFORM, adj. $Va^2k'si^n'i^2fo^2rm$. From *vaccinia* (q. v.) and *forma*, form. Fr. *vaccini-forme*. Having the appearance of vaccinia or of vaccine lymph. [A, 48.]

VACCININ, n. $Va^2k'si^n'i^2n$. Fr. *vaccinine*. A non-nitrogenous substance obtained from *Vaccinium myrtillus*; it occurs as silky acicular crystals. [B, 93 (a, 14).]

VACCININE, n. $Va^2k'si^n'i^2n$. 1. Of Farr, the morbid germ of cow-pox. 2. Vaccine virus. [G; K.]

VACCINOËLE (Lat.), n. f. pl. $Va^2k(wa^2k)si^2n(ken)i^2i^2o^2l-e(a^2e^2)$. See VACCINOËLE.

VACCINIST, n. $Va^2k'si^n'i^2st$. See VACCINATOR (1st def.).

VACCINIUM (Lat.), n. n. $Va^2k(wa^2k)si^2n(ken)i^2u^2m(u^2m)$. From *vaccinus*, pertaining to the cow. Fr. *vaccin*, *airelle*, *myrtille*. Ger. *Heidelbeere*. The typical genus of the *Vacciniaceae*. Some include in it the cranberries (*Oxycoccus*) as well as the blueberries. [A, 35.]—**V. arctostaphylos**. Fr. *airelle de Cypripède*. Ger. *azorische Heidelbeere*. Oriental whortleberry; a tree of the Azores and Madeira. The berries are used like those of *V. myrtillus* and the dried leaves as tea (Trebizon tea). [A, 35.]—**V. corymbosum**. Fr. *airelle commun* (or swamp) fruit. American North America, the huckleberry. The subacid, aromatic berries are used like those of *V. myrtillus*. [A, 35.]—**V. dumosum**. Ger. *spitzblättrige Heidelbeere*. See *GAYLUSSACIA dumosa*.—**V. frondosum**. Ger. *blattreiche Heidelbeere* (1st def.). 1. Blue (or leafy) whortleberry of North America. The berries, *bacca vaccini*, are used like those of *V. myrtillus*. [A, 35.] 2. See *GAYLUSSACIA dumosa*.—**V. macrocarpum**. Fr. *airelle à gros fruit*. American (or large) cranberry; found in sphagnum swamps. The fruits furnish citric acid, and both fruits and leaves are detersive and astringent. [A, 35.]—**V. myrtillus**, **V. nigrum**. Fr. *myrtille*, *maceret*, *airelle myrtille* (Fr. Cod.) (ou *anguleuse*). Ger. *gemeine Heidelbeere*, *Blaubeere*, *Schwarzbeere*, *Krackbeere*. Sp. *ardnado*, *mirtillo* (Mex. Th.). Common (or British) whortleberry (or huckleberry), black-heart, huckleberry, blue (or hurtle, or white) berry of Europe, northern and middle Asia, and Arctic America. All parts of the bush, especially the leaves, contain quinic acid. The fruits, *bacca* (seu *fructus*, *seu grana*) *myrtilli* (seu *myrtillorum*, seu *pseudomyrti*, seu *vaccini nigri*), formerly used as a mildly astringent gargle and as a hemostatic, and still used in diarrhoea, contain malic and citric acids, tannin, sugar, and a violet coloring matter. [A, 35.]—**V. oxycoccus**, **V. oxycoccus**. Fr. *canneberge*, *bassinet* (ou *cousinnet*) *des marais*, *airelle à fruits acides*. Ger. *europäische Moosbeere*, *Torfbeere*, *Sumpfbeere*, *Krühenbeere*, *Sauerbeere*. The cranberry of Europe, northern and middle Asia, and North America; bogberry, fenberry, crawberry, marsh- (or moor-) berry. The leaves are used as tea, and the acid fruits (*bacca oxycocci*), which become edible after frost, as an astringent, detersive, and antiscorbutic and as a refrigerant in fevers. [A, 35.]—**V. uliginosum**. Fr. *airelle (ou myrtille) veinée (ou des marais, ou bonbeuse)*. Ger. *Moos-Heidelbeere*, *grosse Sumpf-Heidelbeere*, *Rauschbeere*, *Trunkelbeere*. Bog-bilberry of Europe, northern and middle Asia, and North America. The berries, which are said to produce vertigo and delirium, are made into a spirit in Siberia. [A, 35.]—**V. vitis idaea**. Fr. *airelle ponctuée (ou à fruits rouges)*, *myrtille rouge*, *vigne du Mont Ida*. Ger. *Preisselbeere*, *rothe Heidelbeere*, *Bernitzbeere*, *Steinbeere*, *rothe Besinge*. Red whortleberry of Mt. Ida, cow-berry, flowering box, munshock; a shrub of Europe, northern and middle Asia, and North America. The leaves and berries, *folia et bacca vitis idae*, were formerly official. The leaves are used as adulterers of *uva ursi* leaves. The fruits were once used as a refrigerant. [A, 35.]

VACCINIZATION, n. $Va^2k'si^n'i^2z-a'shu^n$. Fr. *vaccinisation*. Of Warlomont, the process of vaccinating.

VACCINIZE, v. tr. $Va^2k'si^n-i^2z$. To vaccinate a subject repeatedly until no further effect is produced (until, as has been thought, the system is saturated with the virus).

VACCINOGENE (Fr.), adj. $Va^2k'se-no-zhe^n$. Devoted to the production or distribution of vaccine, or to both.

VACCINOID, n. $Va^2k'si^n-old$. Fr. *vaccinoïde*. See VACCINELLA.

VACCINOËLE (Lat.), n. f. pl. $Va^2k(wa^2k)si^2n(ken)o^2l-e(a^2e^2)$. Ger. *Nebenpocken*. Secondary pocks; efflorescences resembling the vaccine pock, but occurring at a distance from the point of vaccination, usually due to accidental inoculation from the original pock, often through scratching. [G.]

VACCINOPHBE (Fr.), n. $Va^2k'se-no-fob$. One who fears or affects to fear the harmful influence of vaccine virus. [D, 70.]

VACCINO-SYPHILIS (Lat.), n. f. $Va^2k(wa^2k)sin(ken)o^2o(a^2o)si^2fu^2i^2i^2ps$. Gen., *u^2idos (-idis)*. See Vaccination-syphilis.

VACCINIUM (Lat.), n. n. $Va^2k(wa^2k)sin(ken)u^2m$. See VACCININE.

VACCINUS (Lat.), adj. $Va^2k(wa^2k)sin(ken)u^2s(u^2s)$. See VACCINE (adj.).

VACCIOËLE (Lat.), n. f. $Va^2k(wa^2k)si^2i^2i^2o^2l-e(a^2e^2)$. See VACCINIA.—**V. leprosa**. See VACCINELLA.—**V. scutellata**. See VACCINIA.—**V. spuria**. See VACCINELLA.

VACUITÉ (Fr.), n. $Va^2k'u^2e-ta$. See VACUITY.—**V. postsystolique** [Marey]. A "negative" pressure observed in the ventricles at the end of their systole. [K, 23.]

VACUITY, n. $Va^2k-u^2i^2i^2j^2$. Lat., *vacuitas* (from *vacuus*, empty). Fr., *vacuité*. Vacancy; also a vacant or empty space.

VACULATED, adj. $Va^2k'u^2o^2l-at-e^2d$. Of a cell, containing one or more vacuoles. [J, 55.]

VACULATION, n. $Va^2k-u^2o^2l-a'shu^n$. The formation of vacuoles. [E.]

VACUOLE, n. $Va^2k'u^2o^2l$. Lat., *vacuola* (from *vacuus*, empty). Fr., v. Ger., *V. Vakule*. *Saftraum* (2d def.). 1. A small air-cell or a globular space containing either air or a pellucid liquid. [E.] 2. In botany, a cavity in a cell containing sap. [A, 35.]—**Auerbach's v.** An 8-shaped, transparent v. formed at the centre of the vitellus, according to Auerbach's theory of segmentation, after the disappearance of the original nucleus and as a step preliminary to the formation of the nuclei of the two succeeding segmentation spheres. [A, 8.] Cf. *ASTER*, *AMPHIPLASTER*, and *TETRASTER*.—**Contractile v.** A v. observed in a structureless mass of protoplasm (as in the *Endoplastica*) which slowly fills with a watery fluid and, after reaching a certain size, contracts to obliteration, the process of distention and contraction being repeated rhythmically, after the manner of a systole and diastole. [A, 12.]—**Food v's.** 1. Of Lankester, large v's in the endoderm cells of one of the *Medusae* (*Limnocoelium*). They have been found to contain an albuminous substance supposed to be the product of intracellular digestion. [*Quart. Jour. of Micr. Sci.*, 1881, p. 119 (J.).] 2. See *Gastric v.*—**Gastric v.** A v. formed in the protoplasm of certain *Protozoa* around a particle of food surrounded with water. [A, 12.]—**Nuclear v.** See *Auerbach's v.*—**Permanent v's.** Spaces in the *Protozoa*, etc., which may contain water, oil-drops, etc., and are persistent. [L, 121.]—**Pulsating v.** See *Contractile v.*

VACULOUS (Lat.), n. m. $Va^2k(wa^2k)u^2i^2o^2l-u^2s(u^2s)$. See VACUOLE.

VACUUM (Lat.), n. n. $Va^2k(wa^2k)u^2i^2o^2l-u^2m(u^2m)$. Fr., v. Ger., *Leere*. An empty space, especially a space from which the air that occupied it has been more or less completely removed. [A, 48.]—**Torricellian v.** The v. over the mercury in Torricelli's barometer. [A, 48.]

VACZA, n. A place in Broos County, Transylvania, where there is a hot sulphurous spring. [L, 30, 57 (a, 14).]

VAGABUNDITRIEB (Ger.), n. $Va^2g-a^2bund-er'treb$. Insanity with a special tendency to vagrancy. [L, 57 (a, 14).]

VAGAL, adj. $Va^2g'l$. Pertaining to the vagus nerve. [C.]

VAGIN (Fr.), n. Va^2zha^n . See VAGINA (2d def.).—**V. cloisonné**. See Double VAGINA.—**V. mâle**. See *UTERUS masculinus*.

VAGINA (Lat.), n. f. $Va^2j(wa^2g)in(en)a^2$. Gr., *ἄντρον*. Fr., *vagin*. Ger., *Scheide*, *Mutterscheide* (2d def.). 1. See SHEATH. 2. That part of the parturient canal which serves as the organ of copulation, extending from the vulva backward and somewhat upward to terminate in a blind pouch situated in front of the rectum and slightly to the right of it. Its anterior wall, near its posterior extremity, is pierced by the cervix uteri. When the v. is not distended, its anterior and posterior walls are flattened and in contact with each other. Its anterior wall lodges the urethra. 3. In botany, a sheath, especially a leaf-sheath. [A, 35.]—**Double v.**, **Septate v.** Lat., v. duplex. A v. divided into two lateral portions by a longitudinal septum. [A, 34.]—**V. bipartita**. See *Double v.—**V. cellularis**. See ADVENTITIA and EPINEURIUM.—**V. cordis**. See PERICARDIUM.—**V. femoris**. See FASCIA lata.—**V. fibrosa** (tendinis). See SYNOVIAL SHEATH.—**V. Glissoni**. See GLISSON'S CAPSULE.—**V. humoris vitrei**. See HYALOID MEMBRANE.—**V. lumbodorsalis**. See *Lumbor fascia*.—**V. masculina**. See *UTERUS masculinus*.—**V. muellagrosa**, **V. mucosa**. See SYNOVIAL SHEATH.—**V. muscularis**. See PERIMYSIUM.—**V. nervi cellulosa**, **V. nervorum**. See PERINEURIUM.—**V. pili**. See *Inner root-sheath of a hair* and *Outer root-sheath of a hair*.—**V. portæ**. See GLISSON'S CAPSULE.—**V. processus styloidei**. See *Vaginal process* (1st def.).—**V. radialis pili**. See *V. pili*.—**V. septata**. See *Double v.*, *subseptata*. A v. that is double for only a portion of its length.—**V. agina**, **synoviales tendinum**, **V. tendinis**. See SYNOVIAL SHEATH.—**V. tendinosa cruris**. See FASCIA lata.—**V. uteri**. See V. (2d def.).*

VAGINAL, adj. $Va^2j'i^2n'l$. Lat., *vaginalis*. Fr., v. Pertaining to the vagina or to a sheath, ensheathing. The *Vaginales* of Linnæus are an order of plants consisting of *Polygonum*, *Rheum*, *Rumex*, etc. [A, 35.]

VAGINALITIS (Lat.), n. f. $Va^2j(wa^2g)i^2n(en)a^2l(a^2l)i^2e(i^2e)i^2s$. Gen., *u^2idos (-idis)*. From *vagina* (q. v.). Fr., *vaginite*. 1. Inflammation of the vaginal portion of the cervix uteri. 2. Inflammation of the tunica vaginalis testis. [L, 49, 57 (a, 14).]

VAGINALPORTION (Ger.), n. $Va^2g-en-a^2jpor-te^2on'$. That portion of the cervix uteri which projects into the vagina. [A, 34.]—**Schnabelförmige V.** A beak-shaped cervix uteri. [A, 34.]—**Schürzenförmige V.** A cervix uteri resembling the head of a tapir. [A, 34.]

VAGINANT, adj. $Va^2j'i^2n-at$. Lat., *vaginans* (from *vagina*, a sheath). Fr., v. Ger., *umscheidend*, *scheidig*. Sheathing, forming a sheath around another part or organ. The *Vaginantes* of Link are a subclass of exogens, consisting of the *Umbellatae* and *Araliaceae*. [A, 35.]

VAGINATE, adj. $Va^2j'i^2n-at$. Lat., *vaginatus*. Fr., *vaginé*. Ger., *bescheidet*. Having a vagina or sheath. [A, 35.]

VAGINIGLUTEUS [E. Coues] (Lat.), n. m. $Va^2j(wa^2g)in(en)u^2l-u^2glu^2t-e(a^2e^2)u^2s(u^2s)$. See TENSOR FASCIA LATA.

VAGINELLA (Lat.), n. f. $Va^2j(wa^2g)i^2n(en)e^2l(a^2l)a^2$. Dim. of *vagina*, a scabbard. Fr., *vaginelle*. Ger., *Blattscheiden*. One of the leaf-like scales forming a sheath at the base of the clusters of leaves in pines. [A, 35.]

VAGINERVOSE, adj. $Va^2j'i^2n-er^2vo^2s$. Lat., *vaginervis* (from *vagus*, wandering, and *nervus*, a nerve). Fr., *vaginervé*. Of leaves, having the veins running in different directions without order. [A, 35.]

VAGINISMUS [Sims] (Lat.), n. m. $Va^2j(wa^2g)i^2n(en)i^2z(i^2z)u^2s(mu^2s)$. From *vagina* (q. v.). Fr., *vaginisme*. Ger., *Scheidenkrampf*. Painful spasmodic contraction and hyperæsthesia of the

vagina, especially of the constrictor cunni, causing dyspareunia. [L. 41, 49 (a, 14).]—**Mental v.** Of Bauduy, an unconquerable aversion of a woman to sexual intercourse, not dependent on a physical obstacle, although accompanied, in the case related, by violent muscular contraction when coitus was attempted. [¹⁴St. Louis Cour. of Med., Mar., 1885, p. 256.]—**Perineal v.** V. due to spasm of the perineal muscles, especially the transversus perinei. [Verneuil; A. Gillard, Thèse, "Ann. des mal. des org. gén.-ur.," July, 1885, p. 434.]—**Posterior v.** V. due to spasm of the deep-seated muscles. According to Gillard (l. c.), the term should be limited to that form in which the lower fibres of the levator ani are involved.—**Vulvar v.** V. due to spasm of the constrictor cunni. [Gillard, l. c.]

VAGINITIS (Lat.), n. f. $Va_2^3(wa_2^3) \cdot i^n(en) \cdot i(e) \cdot ti_2^3$. Gen., -it'idis (-idis). From *vagina* (q. v.). Fr., *vaginite*. Ger., *Scheidenentzündung*. See **ELYTHERITIC**, **DIPHTHERITIC** v. Diphtheria of the vagina. [a, 50.] Of *Puerperal* DIPHTHERIA.—**Dysenteric v.** Of Klebs, a modification of diphtheritic elytritis accompanying chronic dysentery. [L. 57 (a, 50).]—**Granular v.** See **Granular ELYTHERITIS**.—**V. adhesiva.** Elytritis resulting in more or less complete atresia of the vagina.

VAGINODYNIA (Lat.), n. f. $Va_2^3(wa_2^3) \cdot i^n(en) \cdot o(o) \cdot di^2n$ (du²n)². From *vagina* (q. v.) and *dýnōn*, pain. Pain in the vagina. [a, 34.]

VAGINATION, n. $Va_2^3 \cdot i^n \cdot o \cdot f_2x \cdot a \cdot shu^2n$. From *vagina* (q. v.) and *figere*, to fasten. Of Féan, fixation of the vagina to the sides of the pelvis. [a, 34.]

VAGINO-LABIAL, adj. $Va_2^3 \cdot i^n \cdot o \cdot lab \cdot i^2 \cdot l$. Pertaining to the vagina and to the labia pudendi. [L. 41 (a, 14).]

VAGINO-PÉRITONÉAL (Fr.), adj. $Va_2 \cdot zhe \cdot no \cdot pa \cdot re \cdot to \cdot na \cdot a^2$. Pertaining to the tunica vaginalis testis or the vagina (2d def.) and to the peritonæum. [L. 41 (a, 14).]

VAGINOSCOPE, n. $Va_2^3 \cdot i^n \cdot o \cdot skop$. From *vagina* (q. v.) and *skopein*, to examine. Ger., *Vaginoskop*. See **VAGINAL SPECULUM**.

VAGINOTOMY, n. $Va_2^3 \cdot i^n \cdot o \cdot to \cdot m \cdot i^2$. From *vagina* (q. v.) and *tomē*, a cutting. See **ELYTROTOMY**.

VAGINO-VESICAL, adj. $Va_2^3 \cdot i^n \cdot o \cdot ve \cdot s \cdot i^2 \cdot k \cdot l$. See **VESTICO-VAGINAL**.

VAGINO-VULVAR, adj. $Va_2^3 \cdot i^n \cdot o \cdot vu \cdot l \cdot v \cdot a^2$. See **VULVO-VAGINAL**.

VAGINULE, n. $Va_2^3 \cdot i^n \cdot u \cdot l$. Lat., *vaginula* (dim. of *vagina*, a sheath). Fr., *vaginule*. Ger., *Scheidchen*. The small, leaf-like mosses, the apex of the pedicel which forms a sheath round the foot of the sporogonium. 2. A tubular regular floret in the *Compositæ*. [a, 35.]

VAGITUS (Lat.), n. m. $Va_2^3(wa_2^3) \cdot i^t(et) \cdot u^2s(u)s$. Gen., -it'us. From *vagire*, to cry. Fr., *vagissement*. Ger., *Wimmern*, *Winseln*. The cry of a new-born child. [L. 41, 50 (a, 14).]—**V. interuterinus**, **V. uterinus**. The intra-uterine cry; the cry of a fœtus while its head is yet within the uterus, showing that air has entered the uterus and that the child has breathed. The possibility of the occurrence is denied by some writers. [A, 61.]—**V. vaginalis**. The child's cry heard while its head is in the vagina. [a, 34.]

VAGOSYMPATHICUS (Lat.), n. m. $Vag(wa_2^3) \cdot o(o) \cdot si^2m$ (su²m)²· pa^2i^2 · si^2th · i^2k · $us(u)s$. Fr., *vagosympathique*. The combined pneumogastric and cervical sympathetic nerves, as seen in the dog. [L. 49 (a, 14).]

VAGOTOMIE (Ger.), n. $Va_2^3 \cdot g \cdot o \cdot tom \cdot e'$. Section of the vagus nerves. [L. 57 (a, 14).]

VAGOTOMISÉ (Fr.), adj. $Va_2^3 \cdot go \cdot to \cdot me \cdot za$. Having the vagus nerves cut. [¹⁴Sem. méd., Apr. 24, 1889, p. 138 (a, 18).]

VAGUS (Lat.), adj. $Vag(wa_2^3) \cdot u^2s(u)s$. Fr., *vague*, Ger., *alleitswendig*, *flüchtig* (2d def.). 1. Uncertain, wandering; as a n., the v. nerve [see *Pneumogastric NERVE*]. 2. In botany, having no definite arrangement, without order. [a, 35.]—**V'gebiet** (Ger.). The region of the vagus nucleus. [I, 11 (K.).]

VAGUSWURZEL (Ger.), n. $Va_2^3 \cdot us \cdot wurts \cdot e \cdot l$. See *Vagus* NUCLEUS.—**Hintere V.** [Meynert]. See *V. Vordere V.* [Meynert]. See **NUCLEUS ambiguus**.

VAHEA (Lat.), n. f. $Va_3^2 \cdot e^2 \cdot a^2$. Fr., *vahé*. A genus of caoutchouc-yielding *Apocynaceæ*, referred by Bentham and Hooker to the genus *Landolphia*. [a, 35.]

VAISSE (Fr.), n. Ve^2s . A place in the department of the Allier, France, where there is a hot gaseous and alkaline spring.

VAISSEAU (Fr.), n. $Ve^2s \cdot so$. See **VESSEL**.—**V'x déferans**. An old term for the oviducts. [A, 44.]—**V. droit**. See *Collecting TUBE*.—**V'x préparans**. An old term for the spermatic arteries; so called because they were said to prepare the blood from which the semen or the ovule was elaborated by the testicle or the ovary. [A, 44.]—**V. sanguin**. A blood-vessel.—**V'x tourbillonnées**. See *Vasica tortuosa*.

VALDIERI (It.), n. $Va \cdot l \cdot de \cdot a \cdot re$. A place in Cuneo, Italy, where there are hot sulphurous springs and mud-baths. [a, 14.]

VALDINIO, n. $Va \cdot l \cdot di \cdot ni \cdot o$. Fr., *valdinio*. A glucoside, $C_{29}H_{48}O_{20} + 5H_2O$ obtained from the fruit of *Picrolema valdinio*, forming very bitter hexagonal prisms. [B, 370 (a, 38).]

VALENCE, **VALENCY**, n's. $Va \cdot l \cdot e \cdot ns$, -e²ns·i². Ger., *Wertigkeit*. See **ATOMICITY**.

VALERAL, n. $Va \cdot l \cdot e \cdot r \cdot al$. Fr., *valéral*. Ger., *V*. See under **AMYLENE oxide**.

VALERALDINE, n. $Va \cdot l \cdot e \cdot r \cdot al \cdot di \cdot en$. Fr., *valéraldine*. An artificial alkalioid, $C_{10}H_{17}NS_2$, formed by the action of hydrosulphuric acid on valeral ammonia. [A, 1.]

VALERAMIDE, n. $Va \cdot l \cdot e \cdot r \cdot am \cdot i \cdot de$ (id). Fr., *valéramide*. Ger., *Valeramid*. A primary amide, $C_6H_5 \cdot O \cdot NH_2$, of valeric acid, forming brilliant scales. [B, 93 (a, 14).]

VALERAS (Lat.), n. m. $Va \cdot l \cdot (wa \cdot l) \cdot e \cdot r \cdot a \cdot s(a)s$. Gen., -at'is. See **VALERIANATE**.—**V. ammonicus**. See **AMMONIUM valerianate**.—**V. atropinus**. See **ATROPINE valerianate**.—**V. quiniacus**. See **QUININE valerianate**.—**V. zincicus**. See **ZINC valerianate**.

VALERATE, n. $Va \cdot l \cdot e \cdot r \cdot at$. Lat., *valeras*. Fr., *valérate*. See **VALERIANATE**.

VALERENE, n. $Va \cdot l \cdot e \cdot r \cdot en$. Fr., *valérène*. Ger., *Valeren*. See **AMYLENE** and **BORNEENE**.

VALERIAN, n. $Va \cdot l \cdot e \cdot ri \cdot a$. n. 1. The genus *Valeriana*, especially *Valeriana officinalis*. [a, 35.] 2. See **F-root**.—**American v.** The *Cypripedium pubescens* and *Cypripedium parviflorum* or their rhizome and rootlets [see *Cypripedium* (2d def.)]. [a, 35.] See also *ASTROLOGIA serpentaria*.—**Clyster of v.** For **ENEMA antispasmodicum**.—**False v.** See **SENECIO aureus**.—**Greek v.** See **POLEMONIUM cereuleum**.—**Japanese v.** Kesso, the root-stock of *Patrinia scabiosifolia*. It smells and tastes nearly like medicinal v. [a, 35.]—**Medicinal v.** *Valeriana officinalis* or its root. [a, 35.]—**Oil of v.** Lat., *oleum* (seu *essentia*, seu *etheraleum*) *valeriane*. A pungent and aromatic volatile oil obtained from v.-root and consisting of a hydrocarbon ($C_{10}H_{16}$), a crystallizable compound ($C_{12}H_{18}O$), isomeric with borneol, compounds of the alcohol $C_{10}H_{17}O$ with formic, acetic, and isovaleric acids, and an ether ($C_{10}H_{17}O$). It is of a pale-greenish color, but on exposure becomes yellow and viscid. It is used medicinally like v.-root. [a, 35.]—**V. rhizome**, **V.-root**. Lat., *valeriana* [U. S. Ph.], *valeriane radix* [Gr. Ph.] (seu *rhizoma* [Br. Ph.], *radix* [seu *rhizoma* [Russ. Ph.]]) *valeriane* [Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Norw. Ph., Swed. Ph.], *Wurzel* [Aust. Ph., Netherl. Ph.], v. (*rhizoma*) [Hung. Ph., 2d ed.], Fr., *valériane*, *racine* (ou *souche*) de *valériane*, *valériane officinale* (*souche*) [Fr. Cod.], Ger., *wilde Baldrianwurzel*. The rhizome and rootlets of *Valeriana officinalis*. [a, 35.]

VALERIANA (Lat.), n. f. $Va \cdot l \cdot (wa \cdot l) \cdot e \cdot (e) \cdot ri \cdot a$ ·an(a²n)². Fr., *valériane*. Ger., *Baldrian*. 1. A genus of the valerians, or valerianorts, which are an order (*Valerianaceæ*, *Valerianeæ*, or *Valerianeæ*) of the *Asterales*. [a, 35.] 2. Of the U. S. Ph., see **VALERIAN-root**.—**Abstractum valerianæ** [U. S. Ph., 1880.]. A preparation made by exhausting 200 parts of valerian-root in No. 60 powder with 80 or more of alcohol, reserving 170 parts, evaporating the residue to 30, mixing the two, adding 50 of sugar of milk, drying, bringing up to 100, and reducing to a fine powder. [B, 95 (a, 38).]—**Etheroleum valerianæ** [Swed. Ph.]. See *Oil of VALERIAN*.—**Aqua valerianæ** [Ger. Ph. (1st ed.), Belg. Ph., Gr. Ph., Swiss Ph., Russ. Ph.]. Fr., *eau distillée de valériane* [Fr. Cod.], Sp., *agua de v.* [Sp. Ph.]. A preparation made by distilling 1 part of valerian-root with water enough to make 4 parts [Fr. Cod., Sp. Ph.] (10 [Ger. Ph., Belg. Ph., Swiss Ph., Gr. Ph.]); or by dissolving valerian in 1,500 times as much warm water [Russ. Ph.], [B, 95 (a, 38).]—**Aqua valerianæ concentrata** [Swiss Ph., 1880.]. A preparation made by distilling 10 parts of a mixture of 100 of aqua valerianæ and 2 of alcohol of sp. gr. 0.832. [B, 95 (a, 38).]—**Essentia valerianæ** [Belg. Ph.]. See *Oil of VALERIAN*.—**Extractum valerianæ** [Ger. Ph. (1st ed.), Belg. Ph., Finn. Ph., Gr. Ph., Swiss Ph., Netherl. Ph., Hung. Ph., Swed. Ph., Russ. Ph.]. Fr., *extrait de valériane* [Fr. Cod.], Ger., *Baldrianextract*. A thick extract (soft [Fr. Cod.], half-thick [Hung. Ph.], of plular consistence [Gr. Ph.]) made by extracting valerian-root with dilute alcohol (with water [Finn. Ph., Gr. Ph.]). The Sp. Ph. has both an aqueous and an alcoholic extract. [B, 95 (a, 38).]—**Extractum valerianæ fluidum** [U. S. Ph.]. A preparation made by exhausting 100 grammes of valerian-root in No. 60 powder with alcohol of sp. gr. 0.894, reserving 85 c. c., evaporating the residue to a soft consistence, mixing the two, and bringing up to 100 c. c. [B, 95 (a, 38).]—**Infusum valerianæ** [Br. Ph.]. Fr., *tisane de valériane* [Fr. Cod.], Ger., *Baldrianwasser*. Sp., *infusión de v.* [Sp. Ph.]. A preparation made by infusing 1 part of valerian-root for an hour in enough boiling water to make 40 parts [Fr. Ph.] (half an hour in enough boiling water to make 100 parts [Br. Cod.], in water enough to make 138 parts [Sp. Ph.]). [B, 95 (a, 38).]—**Oleosaccharum valerianæ**. A mixture of 3 drops of oil of valerian with 4 grammes of sugar. [B, 119 (a, 38).]—**Oleum valerianæ**. See *oil of VALERIAN*.—**Pulvis valerianæ**. See *Radix valerianæ pulverata*.—**Pulvis valerianæ aromaticus**. A powder of equal parts of valerian-root and orange-leaves; or of 53 parts of valerian and 8 of cinnamon; or of 73 of valerian, 124 of cinnamon, and 60 of oleosaccharum of valerian; or of 125 of valerian and 6 of camphor; or of 15 of valerian and 7 each of orange-peel and tartarated tartar; or of 16 each of valerian and magnesia, 24 of Florentine iris, 28 of licorice, 8 of anise, and 2 of saffron. [B, 119 (a, 38).]—**Radix valerianæ**. See **VALERIAN-root**.—**Radix valerianæ pulverata**. Fr., *poudre de valériane* [Fr. Cod.]. Valerian-root cleansed, dried at 40° C., powdered in a covered iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.]; or cleansed, dried in the oven, and powdered fine enough to leave a residuum [Sp. Ph.] (sifted through a No. 60-mesh sieve [Russ. Ph.]) or through a 1,000-mesh sieve with a pestle till a fibrous mass is left [Swed. Ph.]). [B, 95 (a, 38).]—**Rhizoma valerianæ**. See **VALERIAN-root**.—**Syrupus valerianæ** [Belg. Ph.]. Fr., *sirop de valériane* [Fr. Cod.]. A preparation made by macerating 125 parts of valerian-root for 24 hours in water enough to make 250 parts of clear filtered liquid, distilling the residue with water, drawing off 100 parts of the distillate, mixing with the first liquid, and adding 650 parts of sugar [Belg. Ph.]; or by dissolving 40 parts of extract of valerian in 1,000 of water of valerian, filtering, and adding 1,800 of sugar [Fr. Cod.]. [B, 95 (a, 38).]—**Tinctura valerianæ**. Fr., *teinture de valériane* [Fr. Cod.]. Sp., *tintura alcohólica de v.* [Sp. Ph.]. 1. Of the U. S. Ph., Br. Ph., Ger. Ph., etc., a preparation made by macerating 1 part of valerian-root in No. 60 powder with alcohol of sp. gr. 0.884 for a day and then treating in a percolator with enough more alcohol to make 5 parts of tincture [U. S. Ph.]; or by macerating 24 oz. of valerian-root in No. 40 powder for two days, then treating in a percolator with enough more alcohol to make 20 fl. oz. [Br. Ph.]; or by macerating or digest-

ing valerian-root with 5 times as much (6 times as much [Gr. Ph. Netherl. Ph.], enough [Roum. Ph.]) diluted alcohol. [B. 95 (a, 38).] 2. Of the Swed. Ph., see *Tinctura valerianae aetherea*.—*Tinctura valerianae aetherea* (Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Gr. Ph., Swiss Ph., Hung. Ph. [2d ed.], Norw. Ph., Russ. Ph.). *Fr. teinture étherée de valériane* [Fr. Cod.]. Ger. *ätherische Baldrianinctur* [Ger. Ph.]. Sp., *tinctura aetherea de v.* [Sp. Ph.]. A preparation made by macerating valerian-root for some days with 5 times (6 times [Gr. Ph.]) as much spiritus aethereus (5 times as much ether of sp. gr. 0.758 [Fr. Cod., Sp. Ph.]). The Russ. Ph. directs maceration of 1 part of the root with 4 parts of alcohol for 4 days, the addition of 2 parts of ether, and maceration for 3 days more. [B. 95 (a, 38).]—*Tinctura valerianae ammoniata*. A preparation made by macerating 20 parts of valerian-root in No. 60 powder one day with 20 of aromatic spirit of ammonia, then treating in a percolator with enough more spirit of ammonia to make 100 parts [U. S. Ph.]; or by macerating $\frac{3}{4}$ oz. of the root in No. 40 powder for seven days with enough of the aromatic spirit of ammonia to make 30 fl. oz. [Br. Ph.]; or by macerating 3 parts of the root with a mixture of 6 of caustic ammonia solution (of sp. gr. 0.970 [Pruss. Ph.]) (0.962 [Gr. Ph.]) and 12 of alcohol of sp. gr. 0.840 [Pruss. Ph., Gr. Ph.], or with a mixture of 5 parts of ammonia solution of sp. gr. 0.960 and 10 of alcohol of sp. gr. 0.832 [Swiss Ph.]. [B. 95 (a, 38).]—*Tinctura valerianae spirituosus*. See *Tinctura valerianae* (1st def.).—*V. anglica*. See *V. phu*.—*V. asarifolia*. Ger., *haselwurzblätteriger Baldrian*. A species found in Candia. The root is used like that of *V. celtica*. [a. 35.]—*V. capensis*. A species found in southern Africa. The root is used like that of *V. celtica*. [a. 35.]—*V. celtica*. Fr., *nard celtique* (ou de montagne). Ger., *Nardenbaldrian*, *Speik*, *Spikenard*. An alpine species. The aromatic root, which is stimulant, sudorific, emmenagogue, and antispasmodic, constitutes in part the *nardus celtica* of the ancients. [a. 35.]—*V. coarctata*. Fr., *valériane resserrée*. A Peruvian species. The root is used in fractures. [a. 35.]—*V. dioica*. Fr., *valériane quatique* (ou diétique). Ger., *Waldreiser*, *Waldreiserlein* (oder zweihäusiger) *Baldrian*, *Weissenbaldrian*, *Sumpf-baldrian*. Marsh- (or small) valerian of Europe and the Orient. The root, *radix valerianae palustris* (see *phu minoris*), was formerly official; it is similar to valerian-root, but milder, and is used to adulterate it. [a. 35.]—*V. Dioscoridis*. Ger., *raukenblätteriger Baldrian*. A species found in Asia Minor, identified with *V. Sibthorpi* with the $\phi\phi$ of Dioscorides. The root is more aromatic and of a less nauseous odor than valerian-root. [a. 35.]—*V. edulis*. A North American species. The root is eaten cooked. [a. 35.]—*V. Hardwickii*. An Asiatic species. The root, identified by some with the *nardus gangitis* of the ancients, is used medicinally and as an insectifuge. [a. 35.]—*V. hortensis*. See *V. phu*.—*V. italica*. A species found in Calabria Minor, identified with *V. pederosa*. The root was formerly official as *nardus montana*. [a. 35.]—*V. jatamansi*. See *Nardostachys jatamansi*.—*V. locusta* (olitoria). See *VALERIANELLA olitoria*.—*V. major*. See *V. phu*.—*V. mexicana*. The *cuttapatli* of Mexico. The roots, which have a strong odor and bitter taste, are used like valerian-root. [J. M. Maisch, "Am. Jour. of Pharm.," Apr. 1886, p. 166; a. 35.]—*V. minor*. See *V. officinalis* and *V. dioica*.—*V. montana*. 1. Mountain valerian, found in the European Alps. The root is said, probably erroneously, to be more active than true valerian-root. [a. 35.] 2. See *V. officinalis* and *V. dioica*.—*V. officinalis*. Fr., *valériane officinale* (ou sauvage), *herbe au chat* (ou de Saint-Georges). Ger., *gemeiner* (oder *gebräuchlicher*) *Baldrian*, *Katzenbaldrian*, *Speerkrautwurz*, *Katzenwurz*, *Katzenherke*, *Ackerbaldrian*. Great wild (or medicinal) valerian; all-hell, cut-finger, herb Ben-net, St. George's herb; found throughout Europe and northern and middle Asia. The rhizome, together with its rootlets, constitutes valerian-root, which has an aromatic, bitterish taste and a somewhat terebinthinous, camphoraceous, peculiar odor, though in its fresh state the odor is not pronounced. It contains oil of valerian, malic acid, a peculiar extractive matter, ether and in alcohol, an odorous resin, and (Runge) a peculiar fatty acid producing with bases white salts which turn green when exposed to the air. Valerian-root is stimulant and antispasmodic. The leaves are vulnerary. [a. 35.]—*V. olitoria*. See *VALERIANELLA olitoria*.—*V. phu*. *V. pontica*. Fr., *valériane phu* (ou *franche*, ou *des jardins*), *nard agreste* (ou *de Crète*), *grande valériane*, *encens terrestre*. Ger., *grosser* (oder *weisser*, oder *römischer*, oder *Garten*) *Baldrian*, *Theriakwurzel*, *Theriakraut*, *St. Georgenkraut*. Creten spikenard, garden-valerian of southern and middle Europe. The roots have properties resembling those of valerian-root, but are less aromatic. The $\phi\phi$ of the ancients, now identified with *V. Dioscoridis*, was formerly thought to be this plant. [a. 35.]—*V. saltuncea*. Ger., *wahrscheinlicher Baldrian*. An alpine European species having the properties of *V. celtica* and affording a variety of *nardus celtica*. [a. 35.]—*V. sambucifolia*. Elder-leaved valerian, a variety of *V. officinalis*. The root is less vigorous than that of *V. silvestris*, and is said to be less rich in volatile oil. [a. 35.]—*V. saxatilis*. 1. A species found in Europe. The root, which has a nauseous, penetrating odor, may be used in place of valerian-root. [a. 35.] 2. See *V. celtica*.—*V. silvestris*. A variety of *V. officinalis*. Its root is said to be superior to that of *V. sambucifolia*. [a. 35.]—*V. toluceana*. A species indigenous to northwestern America, considered by the Russians to be the most active of the genus. [a. 35.]—*V. toluceana*. A Mexican species. The tubers, which contain an abundance of valericinic acid, are reputed to be useful in diseases of the liver. [J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20.]—*V. tuberosa*. Mountain-spikenard of southern Europe. The root, which has a strong valerian-like taste and odor, was formerly official as *nardus montana*, and is still used. [a. 35.]—*V. virginiana*. The *Aristolochia serpentaria*. [a. 35.]—*V. Wallichii*. An East Indian species. The root is used like that of *Nardostachys jatamansi*, though it has a stronger and less pleasant odor. [a. 35.]

VALERIANAS (Lat.), n. m. $Va^2(wa^1)e^2r^2-a^2n^2(a^2n^2)a^2s^2(a^2s^2)$. Gen., -atis. See **VALERIANATE**.—**V. atropicus**. See **ATROPINE valerianate**.—**V. chinicus**. See **QUININE valerianate**.—**V. natri-**

cus, **V. sodicus**. See **SODIUM valerianate**.—**V. zincicus**. See **ZINC valerianate**.

VALERIANATE, n. $Va^2(e^2r^2-a^2n^2)at$. Lat., *valerianas*. Fr., *valérianate*. Ger., *valeriansaures* (oder *baldriansaures*) *Salz*. A salt of valericinic acid. [B.]

VALERIANE (Fr.), n. $Va^2-la-re-a^2n$. See **VALERIANA** and **VALERIAN-root**.—**Bain de v.** A bath used for hysteria and other nervous affections, made by infusing 500 grammes of dried valerian-root in 3 litres of water, and pouring the infusion into the bath. [B. 46.]—**Eau distillée** [Fr. Cod.] de **v.** See **Aqua VALERIANÆ**.—**Essence de v.** See **Oil of valerian**.—**Extrait de v.** See **Extractum VALERIANÆ**.—**Poudre de v.** See **Radix VALERIANÆ pulverata**.—**Sirop de v.** See **Syrupus VALERIANÆ**.—**Souche de v. officinale**. See **VALERIAN-root**.—**Teinture de v.** See *Tinctura VALERIANÆ* (1st def.).—**Teinture étherée de v.** See *Tinctura VALERIANÆ aetherea*.—**Tisane de v.** See *Infusum VALERIANÆ*.—**V. franche**. See **VALERIANA phu**.—**V. officinale**. See **VALERIANA officinalis**.—**V. officinale (souche)** [Fr. Cod.]. See **VALERIAN-root**.—**V. resserrée**. See **VALERIANA coarctata**.—**V. sauvage**. See **VALERIANA officinalis**.

VALERIANELLA (Lat.), n. f. $Va^2(wa^1)e^2r^2-e^2r^2-a^2n^2(a^2n^2)e^2l^2a^2$. Fr., *valérianelle*. Ger., *Rapünzchen*. A genus of the *Valerianaceae*. The *Valerianellæ* are a subdivision of the *Valerianæ*. [a. 35.]—**V. locusta**, **V. olitoria**. Fr., *frêche*, *salade de blé* (ou *royale*, ou *verte*), *doucette*, *poule grasse*, *oreillelle*, *coquille*. Ger., *gemeines* (oder *Feid*) *Rapünzchen*. Corn-salad, lamb's lettuce of Europe, northern Africa, and northern and middle Asia; an early salad plant formerly official as *herba valerianella* and used as an antiscorbutic and emollient. [a. 35.]

VALERIANIC, adj. $Va^2(e^2r^2-e^2r^2-a^2n^2)^{ic}$. Lat., *valerianicus*. Fr., *valérianique*. Pertaining to or derived from valerian. [B.]—**V. acid**. Lat., *acidum valerianicum* (seu *valericum*). Fr., *acid valérienique* (ou *valérienique officinal*) [Fr. Cod.]. Ger., *Baldrian-säure*. One of the isomeric forms of valeric acid, $C_5H_{10}O_2 = (CH_3)_2CH.CH_2.CO.OH$. It is found in the roots of *Valeriana officinalis* and *Archangelica officinalis* and in the bark and fruit of *Viburnum opulus*. It is also produced by the decomposition of aluminoid substances and the oxidation of fats. It is a colorless oily liquid, acting as a monobasic acid. [B.]—**V. anhydride**. A liquid, $[(CH_3)_2CH.CH_2CO]_2O = C_{10}H_{18}O_5$. [B. 4.]

VALERIANASAUER (Ger.), adj. $Va^2(ar-a^2n^2)za^2-s^2u^2-e^2r$. Combined with valericinic acid in the form of a valerianate.

VALERIC, adj. $Va^2(e^2r^2)^{ic}$. Fr., *valérique*. Derived from valerian. [B.]—**V. acid**. An acid, $C_5H_{10}O_2$, of which four isomeric forms are known: (1) *Normal* or *isobutyrocarbonic acid*, *isopropylacetic acid*, *pentic acid*, $CH_3-CH_2-CH_2-CH_2-C.OOH$, a liquid of rancid odor; (2) *isovaleric acid* (see **VALERIANIC acid**); (3) *ethmethacetic acid*, β -butylcarbonic acid, α -methylbutyric acid, a liquid, $CH_3-C_2H_5-CH.OOH$; and (4) *trimethacetic acid*, *trimethylcarbincarbonic acid*, *pseudovaleric acid*, *pinolic acid*, $(CH_3)_2=C.CO.OH$, occurring as foliate crystals. [B. 4.]—**V. aldehyde**. Amylène oxide. [B.]

VALERIN, n. $Va^2(e^2r^2)n$. Fr., *valérine*. A compound of glycerin and valeric acid; a glyceryl valerate. [B.] Cf. **TRIVALERIN**.

VALEROL, n. $Va^2(e^2r^2)ol$. Fr., *valérol*. Ger., *Valeröl*. That part of oil of valerian which boils between 205° and 215° C. [B. 270 (a, 38).]

VALERONITRILE, n. $Va^2(e^2r^2-o^2n^2)ri^2l$. Fr., *valéronitrile*. Ger., *Valeronitril*. See under **Butyl cyanide**.

VALERYL, n. $Va^2(e^2r^2)l$. Fr., *valéryle* (2d def.). Ger., **V.** 1. An old name for the radicle C_5H_9 , supposed to be contained in valericinic acid. The symbol **Vl** was sometimes given to it. [B. 118.] 2. The compound C_5H_9O . [B. 270 (a, 38).]

VALERYLENE, n. $Va^2(e^2r^2)l^2en$. Fr., *valérylène*. Ger., *Valerylén*. A liquid, $CH_3.C : C : C_2H_5 = C_5H_8$, boiling at 51° C. Two isomeric forms also exist, *isovalerylène*, $(CH_3)_2C : C : C_2H_5$, a liquid of garlicky odor, and *isopropylacetylene*. [B. 3; a. 88.]

VALET-A-PATIN (Fr.), n. $Va^2(e^2-a^2p^2-a^2ta^2n^2)$. A forceps, invented by Gui Patin, for compressing blood-vessels before their ligation. [L. 41 (a, 14).]

VALETUDINARIAN, adj. $Va^2(e^2l^2-u^2d^2-i^2n^2-a^2r^2i^2)n$. From *valetudo*, condition of health. Fr., *valetudinaire*. Ger., *kräftlich*, *schwachlich*. Pertaining to a condition of weakness or feeble health; as a n., an invalid. [D. 20.]

VALGUS (Lat.), adj. $Va^2(g(wa^2)g^2)u^2s^2(u^2s^2)$. 1. Bow-legged. [A. 312 (a, 17).] 2. As a n., see **TALIPES v.**—**Nervous v.** V. of neurotic origin. [a. 34.]—**Paralytic v.** V. caused by paralysis of the muscles of the foot, especially the tibialis anticus. [a. 34.]—**Rheumatic v.** V. caused by rickets. [a. 34.]—**Spasmodic v.** An ephemeral intermittent v. caused by muscular paresis. [a. 34.]—**Sparious v.** See **plenus**. [Reeves (a. 34).]—**Statical v.** Talipes v. caused by an altered axis of bodily pressure toward the inner side of the foot. [a. 34.]—**Traumatic v.** V. caused by fracture or dislocation of the tibia, or by injury of the tarsal or metatarsal joints, or by cleatrices. [a. 34.]

VALIDINE, n. $Va^2(l^2i^2d^2-en)$. Fr., v. A base, $C_{10}H_{15}N$, found in quinine. [B. 270 (a, 38).]

VALLECULA (Lat.), n. f. $Va^2(wa^1)l^2-e^2l^2-c^2u^2(l^2u^2)l^2a^2$. Dim. of *vallis*, a valley. 1. A longitudinal depression; specifically, the v. cerebelli. [a. 48.] 2. In botany, one of the grooves between the ridges on umbelliferous fruits. [a. 35.]—**V. cerebelli**. See **Fissura cerebelli longitudinalis**.—**V. cordis**. A shallow furrow at the apex of the heart uniting the anterior and posterior longitudinal furrows. [L.]—**V. glosso-epiglottica**, **Vallecula linguae**. See **Fossa glosso-epiglottica**.—**V. ovata**. See **Fissure for the gall-bladder**.—**V. petrosa**. See **Fossula petrosa**.—**V. Relii**. The depression between the cerebellar hemispheres which is occupied by the vermiciform process. [J. 17 (K).]—**V. Sylvii**. See **Stamm der Fissura Sylvii**.—**V. ungvis**. The fold of the nail. [G.]

VALLECULATE, VALLECULOSE, adj's. $Va^2l-e^2k'u^2l-at$, -os. Lat., *valleculatus, valleculosus*. Ger., *rillig, gerillt*. Provided with vallicules (2d def.).

VALLE DI SELLA (It.), n. Va^2l-la de se^2l-la^2 . An Italian health resort and hydrotherapeutic establishment for children. [Weiss, "Gazz. med. ital.-Prov. Venete," June 3, 1882, p. 175.]

VALLEË (Fr.), n. Va^2l-la . A valley or valley-like depression. [a. 48.]—**V. de Sylvius**. The primitive sulcus which afterward becomes the fissure of Sylvius [L. 35 (K).]—**V. longitudinalis de cerevel**. See *VALLECULA cerebri*.

VALLEJO WHITE SULPHUR SPRINGS, n. pl. Va^2l-ya' -ho hwit su^hl'f'u^r. A place in Solano County, California, where there are hot sulphurous springs. [Anderson a. 14.]

VALLICULA (Lat.), n. f. $Va^2l(wa^2l)-li^2k'u^2l(u^2l)-a^2$. See *VALLECULA*.

VALVUM (Lat.), n. n. $Va^2l(wa^2l)lu^2m(lu^2m)$. Lit., a rampart. An old term for the supercilium (q. v.). [P.]—**V. of the circumvallate papillæ of the tongue**. An elevation in the mucous membrane of the tongue which surrounds the fossa of the circumvallate papillæ. [C.]

VALMONT (Fr.), n. $Va^2l-mo^2n^2t$. A place in the department of the Seine-Inférieure, France, where there is a gaseous and alkaline spring. [L. 49 (a. 14).]

VALOID, n. Va^2l-oid . From *valere*, to be worth. Syn.: *equivalent extract*. A term applied in the United Kingdom to a class of proprietary pharmaceutical preparations. The v's seem to be nothing more than fluid extracts prepared with particular regard to making a given weight of the product contain the same amounts of the active principles as are contained in the crude drug.

VALONIA, n. $Va^2l-on'i-a^2$. From *βάλανος*, an acorn. Ger., *Valonen, Walonen*. A commercial name for the cups of *Quercus ceglops* and *Quercus tellonea*. [a. 35.]

VALS (Fr.), n. Va^2ls . A place in the department of the Ardèche, France, where there are numerous gaseous alkaline springs. [L. 41, 37 (a. 14).]

VAL SINISTRA (It.), n. $Va^2l-si^2n^2-e^2st-ra^2$. A place in the canton of the Grisons, Switzerland, where there are gaseous alkaline springs. [L. 57 (a. 14).]

VALVACEUS (Lat.), adj. $Va^2l(wa^2l)-vas(wa^2l)u^2c^2u^2s(u^2s)$. Fr., *valvacé*. 1. Of fruits, having marked seams or sutures, although indeludent. [a. 35.] 2. See *VALVATE*.

VALVATE, adj. Va^2l-v^2at . Lat., *valvatus, valvaris*. Fr., *valvé*. Ger., *klappig, klappenartig*. Syn.: *valvular*. 1. Composed of valves. 2. Opening by valves. 3. United by the margins. [a. 35.]

VALVE, n. Va^2l-v . Lat., *valva*. Fr., *panneau*. Ger., *Valvel, Ventil, Klappe*. 1. A movable flap or fold which acts to close a passage or orifice more or less completely. [a. 48.] 2. In botany, a separable part in various organs, especially one of the pieces into which a dehiscient pericarp splits. The name has also been applied to the halves of a silicified membrane in the *Diatomaceæ*, to the pieces of a glume, to the divisions of a spathe, to the volva in *Funghi* (by Fautet), and to the cotyledons (*valvæ seminum*) of seeds (by Jungius). [a. 35.]—**Aortic v.** The v. situated at the exit of the aorta from the heart. It consists of three semilunar segments, which prevent the reflux of the blood into the heart. [L.]—**Bicuspid v.** See *Mitral v.*—**Cerebral v.** See *V. of Vieussens*.—**Eustachian v.** A crescentic fold of the lining structure of the fetal heart so situated as to direct the blood entering the right auricle by the vena cava inferior toward the opening of the foramen ovale. In the adult it may be obliterated, may be reduced to a trace, or may persist nearly as in the foetus. [a. 5.]—**Hasner's v.** A mucous fold at the nasal aperture of the nasal duct. [L.]—**Heister's v.** A v. formed by folds of the mucous membrane of the neck of the gall-bladder. [L. 332.]—**Houston's v's**. In the rectum, oblique folds of the mucous membrane, situated one at about the level of the prostate gland, another a little higher, and a third still higher. [L. 142.]—**Huschke's v.** See *VALVULA sacci lacrimalis superior*.—**Ileo-cæcal v.**, **Ileo-colic v.** Ger., *Dickdarmklappe, Blinddarmklappe*. An incomplete partition divided by a narrow slit-like opening, which is rounded anteriorly and narrow and pointed posteriorly, through which the cavities of the ileum and colon communicate. It is made up of the mucous membrane, its submucosa, and a few muscular fibres. It is nearly at right angles to the long axis of the colon, toward which one surface faces, the other facing toward the ileum. [L.]—**Interauricular v.** See *V. of the foramen ovale*.—**Large v. of the brain**. See *V. of Vieussens*.—**Mitral v.** A v. situated at the left auriculo-ventricular opening, consisting of two more or less joined segments, continuous at their attached borders. [L. 31, 142, 332.]—**Pulmonary v.** The v. in the left ventricle of the heart, at the entrance of the pulmonary artery. It consists of three semilunar segments, and prevents reflux of blood from the heart into the artery. [L.]—**Pyloric v.** Ger., *unterer Magenmundring*. A ring-like elevation of the mucous membrane of the stomach around the pylorus. [L. 81.]—**Semilunar aortic v.** See *Aortic v.*—**Semilunar pulmonary v.** See *Pulmonary v.*—**Semilunar (or Sigmoid) v's of the heart**. Those v's of the heart which consist of three semilunar segments attached by their convex borders. [L.]—**Tricuspid v.** A v., made up of three triangular segments, situated at the right auriculo-ventricular opening. [L.]—**V. of Amussat**. See *Heister's v.*—**V's of a vein**. Ger., *Flügelthüren, Venenklappen*. Semilunar folds of the inner coat of the veins, strengthened by connective tissue, with their concave side placed like the inside of a pouch toward the heart, so that when they are filled they retard the backward flow of the blood. [C.]—**V. of Bauhin**. See *Ileo-cæcal v.*—**V's of Kerkring**. See *VALVULÆ conniventes*.—**V. of Thebesius**. A semilunar fold of the endocardium at the entrance of the coronary sinus into the heart. [L. 142, 332.]—**V. of the colon**. See *Ileo-cæcal v.*—**V. of the cystic duct**. See *Heister's v.*—**V. of**

the foramen ovale. A thin crescentic valvular fold, situated a little to the left of the foramen, in the embryonic heart, growing forward from the posterior wall of the auricles and projecting into the left auricle. Its office is to prevent the regurgitation of blood from the left auricle into the right one.—**V. of the gall-bladder**. See *Heister's v.*—**V's of the lymphatics**. Semilunar folds of the inner coat placed opposite each other, as in the veins. [C.]—**V's of the rectum**. See *Houston's v's*.—**V. of the trigone**. A depression between the anterior pillars of the fornix cerebri which Vieussens erroneously believed to be an opening leading into the fifth ventricle. [L. 55 (K).]—**V. of Tulpus**. See *Ileo-cæcal v.*—**V. of Vieussens**. Ger., *Hirnklappe, vorderes Markseigel*. A triangular lamina of white nerve substance which bridges over the interspace between the superior cerebellar peduncles, forming a portion of the roof of the fourth ventricle. It expands posteriorly, where it is connected with the lower surface of the vermiform process. It is crossed by the lingula, and gives origin to the fourth cranial nerve. [L. 15 (K).]

VALVULA (Lat.), n. f. $Va^2l(wa^2l)vu^2l(wu^2l)-a^2$. Dim. of *valva*, a valve. See *VALVE*, *VALVULE*, and *VALVE of Vieussens*.—**Valvulæ atrio-ventriculares**. The mitral and tricuspid valves. [L.]—**V. bicuspidalis**. See *Mitral valve*.—**V. cæci**. See *Ileo-cæcal valve*.—**V. anterior**. See *VALVE of Vieussens*.—**V. cerebelli posterior**. The posterior medullary velum. [L. 175 (a. 50).]—**V. cerebri (Galen)**, **seu major**. See *VALVE of Vieussens*.—**V. coli**. See *Ileo-cæcal valve*.—**V. coli vesicae**. See *V. vesico-urethralis*.—**Valvulæ conniventes**. Ger., *Querfalten*. Crescent folds of the mucous membrane of the intestine placed transversely to its long axis. [L.]—**V. V. cuspidalis**, **V. episcopalis**. See *Mitral valve*.—**V. Falloppii**. See *Ileo-cæcal valve*.—**V. faucium** [Schaarschmidt]. See *VELUM palati*.—**V. foraminis ovalis**. See *VALVE of the foramen ovale*.—**V. fossæ navicularis**. A transverse fold of the mucous membrane at the posterior extremity of the fossa navicularis urethrae. [L.]—**Valvula Hobokenii**. Semilunar or annular folds in the interior of the umbilical arteries. [L. 57 (a. 50).]—**V. hymenalis urethrae virilis**. See *V. fossæ navicularis*.—**Valvulæ intestinales**, **Valvulæ Kerkringii**. See *Valvulæ conniventes*.—**V. lacrimalis (inferior)**. See *V. sacci lacrimalis inferior*.—**V. lacrimalis superior**. See *V. sacci lacrimalis superior*.—**V. magna**. See *VALVE of Vieussens*.—**V. magni cerebri**. Of Prochaska, the superior cerebellar peduncles. [I. 3 (K).]—**V. ovalis**. Of Vicq d'Azyr, see *VALVE of Vieussens*.—**V. processus vermiformis**. A mucous fold surrounding the small orifice by which the vermiform appendix opens into the cæcum. [L. 57 (a. 50).]—**V. sacci lacrimalis inferior**. A fold of mucous membrane at the junction of the lacrymal duct and sac. [L. 31, 332.]—**V. sacci lacrimalis superior**. A crescentic fold of the mucous membrane of the lacrymal sac below the openings of the canaliculi lacrimales. [L. 31, 332.]—**V. semicircularis posterior inferior**. Of Tarini, the posterior medullary velum. [I. 3 (K).]—**Valvulæ semilunares arteriarum**. See *Semilunar VALVES of the heart*.—**V. semilunaris**. 1. See *Posterior medullary VELUM*. 2. The third eyelid, or plica semilunaris; an old term for a fold of conjunctiva, inclosing a layer of dense fibro-connective tissue between its folds, lying in the conjunctival cul-de-sac in birds and some other of the lower mammals. [F.]—**V. semilunaris arterie pulmonalis**. See *Pulmonary VALVE*.—**V. semilunaris (cerebelli, seu Farini)**. See *Posterior medullary VELUM*.—**V. semilunaris (septi atriorum)**, **V. sinus sinistri**. See *VALVE of the foramen ovale*.—**V. triglochis**. See *Tricuspid VALVE*.—**V. urethrae pylorica**. See *SPHINCTER urethrae prostaticus*.—**V. vaginæ**, **V. vaginalis**. See *HYMEN* (2d def.).—**Valvula venarum (seu venosæ)**. See *VALVES of a vein*.—**V. vesicae**, **V. vesico-urethralis**. A valvular membrane found in middle-aged men at the junction of the internal portion of the urethra and the neck of the bladder. It is formed by hypertrophied prostatic fibres and fibres of the sphincter urethrae. [a. 34.]—**V. Vieussenii**. 1. See *VALVE of Vieussens*. 2. A fold at the opening of the great coronary vein of the heart. [L. 332.]—**V. willisiana**. See *VALVE of Vieussens*.

VALVULAR, adj. $Va^2l-v^2u^2l-a^2r$. Lat., *valvularis*. Fr., *valvulaire*. 1. Pertaining to a valve. 2. See *VALVATE*.

VALVULE, n. $Va^2l-v^2u^2l$. Lat., *valvula* (dim. of *valva*, a valve). Fr., v. Ger., *Klappchen*. 1. A little valve. [a. 35.] 2. Of Wilder, see *VALVE of Vieussens*.—**Grande v. du cerveau** (Fr.). See *VALVE of Vieussens*.—**V. antérieure** (Fr.). See *Lamina cinerea*.—**V. de Cruveilhier** (Fr.). See *Hasner's valve*.—**V's de Guérin** (Fr.). Normal enlargements of the small mucous folds observed at the orifices of the glands of Littre. ["Jour. de l'anat. et de la physiol." xxviii, 1892, p. 244 (a. 50).]—**V. du col de la vessie** (Fr.). See *VALVULA vesicæ*.—**V. triglochine** (Fr.). See *Tricuspid valve*.

VALVULITIS (Lat.), n. f. $Va^2l(wa^2l)-vu^2l(wu^2l)-i^2t(u^2l)-is$. Gen., *-itidos (-idis)*. From *valvula*, a valve. Inflammation of one or more of the valves of the heart. [D. 68.]

VALVULOTOME, n. $Va^2l-v^2u^2l-o^2tom$. From *valvula* (q. v.), and *τομή*, a cutting. Fr., v. 1. An instrument devised by François-Franck for removing pieces from the aortic valves of a living animal for the purpose of studying the effects of such mutilation. It is introduced by way of the carotid artery. ["Gaz. hebdomadaire de médecine et de chirurgie," Feb. 5, 1886, p. 94.] 2. A catheter-like instrument having a concealed knife devised by Mercier for anterior or posterior incision of the prostatic urethra. [a. 34.]

VALYLENE, n. Va^2l-y^2l-en . Fr., *valylène*. Ger., *Valylen*. A liquid hydrocarbon, C_8H_8 . [B. 270 (a. 38).]

VAMPYRISMUS (Lat.), n. m. $Va^2mp(wa^2mp)-i^2r(u^2r)-i^2z(u^2s)$ -mus(mus). From *vampyrus*, a vampire. A form of delusional insanity epidemic early in the eighteenth century in Hungary, Siberia, etc., in which the patient believed that dead enemies had left their graves in order to suck his blood. [L. 57 (a. 50).]

VANAD (Ger.), n. Va^2n-a^2d . See *VANADIUM*.—**V'oxyd**. Vanadium pentoxide; in connection with a qualifying adjective, a

vanadic oxy salt. [B.]—**V^{oxydul}**. Vanadium trioxide; in connection with a qualifying adjective, a vanadious oxy salt. [B.]

VANADATE, n. $\text{Va}^2\text{n}^2\text{a}^2\text{d}^2\text{at}$. A salt of vanadic acid. [B.]

VANADIC, adj. $\text{Va}^2\text{n}^2\text{a}^2\text{d}^2\text{ik}$. Fr. *vanadique*. Containing vanadium as a pentad radicle. [a, 48.]—**V^{acid}**. Fr. *acide vanadique*. Ger. *Vanadinsäure*, *Vanadssäure*. An acid formed by the union of vanadium pentoxide with water. The v. acids are: (1) *Normal v. acid*, or *orthov^{icid}* H_3VO_4 , known only through its salts, the *vanadates*; (2) *metav^{icid}* HVO_3 ; and (3) *pyrov^{icid}*, $\text{H}_2\text{V}_2\text{O}_7$ ($= \text{V}_2\text{O}_5 \cdot 2\text{H}_2\text{O}$). [B.]

VANADIOUS, adj. $\text{Va}^2\text{n}^2\text{a}^2\text{d}^2\text{is-u}^2\text{s}$. Containing vanadium as a trivalent radicle. [B.]

VANADIUM (Lat.), n. n. $\text{Va}^2\text{n}^2(\text{wa}^2\text{n})\text{-ad}^2(\text{a}^2\text{d})^2\text{-u}^2\text{s}^2\text{m}$. From *Vanadis*, a Scandinavian goddess. Fr., v. Ger., *Vanad*. A metallic element discovered in 1801 by Del Rio, and rediscovered in 1850 by Sefström, who gave it its present name. It is found in various rare minerals. It forms a light-grayish micro-crystalline powder, not readily oxidized, and infusible at a red heat. In composition, it acts usually as a pentad, but combines with oxygen in five different proportions, forming compounds resembling those of nitrogen. Symbol, V; atomic weight, 51.2; sp. gr., 5.6. [B, 3.]—**V^{pentoxide}**. Ger., *Vanadoxyd*. Vanadic oxide, V_2O_5 , yellowish-red prismatic crystals. [B, 3.]

VANADYL, n. $\text{Va}^2\text{n}^2\text{a}^2\text{d}^2\text{yl}$. Fr. *vanadyle*. Ger., V. A trivalent radicle, VO^2 , occurring in the vanadic salts obtained by the action of vanadium pentoxide on acids. [B, 3.]

VANDA (Lat.), n. f. $\text{Va}^2\text{n}^2(\text{wa}^2\text{n})\text{-da}^2$. A genus of epiphyllal orchids. The *Vanidae* (Fr. *vanidées*) are a tribe of the *Orchideae*. [a, 35.]—**V^{ox-Roxburghii}**. See *AERIDES tessellatum*.—**V^{scripta}**. A species found on trees in the Moluccas. The sap is used in aphthae, the fruit in diarrhoea and dysentery, and the juicy pulp of the stem, in combination with curcuma-root, to heal ulcers and to hasten suppuration. [a, 35.]—**V^{spathulata}**. An East Indian species. The powdered leaves are used in diarrhoea and dysentery, the flowers as a pectoral, and the entire plant, mixed with oil, in skin diseases. [a, 35.]

VANDELLIA (Lat.), n. f. $\text{Va}^2\text{n}^2\text{-el}^2\text{li}^2\text{-a}^2$. From *Vandelli*, an Italian botanical writer. Fr. *vandellie*, *vandellie*. A genus of scrophulaceous herbs. [a, 35.]—**V^{diffusa}**. Fr., *vandellie* (ou *vandellie*) *étalée*. Bitter-blain; an emetic, diuretic, and purgative species found in tropical America; used in fevers, in liver derangements, as an anthelmintic, and as a detergent. [a, 35.]—**V^{prastensis}**. See *SCOPARIA dulcis*.

VANELLUS (Lat.), n. m. $\text{Va}^2\text{n}^2(\text{wa}^2\text{n})\text{-el}^2\text{lu}^2\text{s}^2(\text{lu}^2\text{s})^2$. From *vannus*, a fan. A genus of birds, of the *Charadrine*. [a, 48.]—**V^{cristatus}**. Fr., *vannet*. The lapwing; a European bird resembling a plover. [a, 48.]

VANGUERIA (Lat.), n. f. $\text{Va}^2\text{n}^2\text{-ge}^2\text{r}^2\text{-i}^2\text{-a}^2$. Fr. *vanguier*. A genus of shrubs or trees of the tribe *Vangueriee* of the *Rubiaceae*. In the Mauritius the leaves of some species are used as an antidysenteric and in strangulated hernia. [a, 35.]—**V^{spinosa}**. An East Indian species. The bark is febrifuge. [a, 35.]

VANILLA (Lat.), n. f. $\text{Va}^2\text{n}^2(\text{wa}^2\text{n})\text{-i}^2\text{li}^2\text{a}^2$. From Sp. *vainilla*, a v.-bean. Fr. *vanillier* (1st def.), *vanille* [Fr. Cod.], *fruit (ou gousse) de vanille* (2d def.). Ger., *Vanille*. 1. A genus of tropical climbing orchids. The *Vanillaceae*, *Vanilaceae*, or *Vanillidae* are a tribe of orchids of Benthams and Hooker, a subtribe of the *Neottieae*. [a, 35.] 2. The fruit of *V. planifolia* (of *V. aromatica* (Belg. Ph.)). [a, 38.]—**Bastard**. v. See *V. cinnamomum*.—**Bourbon**. v. An inferior variety of v.-bean, said to contain from 1.9 to 2.48 per cent. of vanillin. [a, 35.]—**Chocolata cum v.** [Fr. Cod.] (seu *vanille*). Fr., *chocolat à la vanille* [Fr. Cod.]. A mixture of 100 parts of chocolate (the *chocolat simple* of the Fr. Cod. without the cinnamon) and 4 of vanilla saccharata. [B, 13.]—**Cream v. syrup**. A mixture of 3 fluidrachms of strong fluid extract of v., a pint of simple syrup, and a pint of cream syrup. [B, 5 (a, 21).]—**Essence of v.**, **Fluid extract of v.** A preparation essentially equivalent to the tincture of v., but of about two thirds its strength. [B, 81 (a, 38).]—**Fructus vanillae**. See *V.* (2d def.).—**Mexican v.** The finest variety of v. [a, 35.]—**Pulvis vanillae cum saccharo**. See *V. saccharata*.—**Rio v.** See under *V. palmarum*.—**Small v.** See *V. cinnamomum*.—**Tinctura vanillae**. Fr., *teinture de vanille*. A preparation made by macerating 1 part of v. (2d def.) with 5 parts of alcohol of sp. gr. 0.894 for 12 hours, pouring off the liquid, adding 2 parts of sugar to the residue, and treating this in a percolator with the reserved liquid and with enough more alcohol to make 10 parts [U. S. Ph.]; or by macerating v. several days with five times as much dilute alcohol [Ger. Ph., Swiss Ph., T. A.] (70-per-cent. alcohol [Russ. Ph.], 80-per-cent. alcohol [Belg. Ph.]), or ten times as much 80-per-cent. alcohol [Fr. Cod.]. [B, 95 (a, 38).]—**V. aromatica**. Ger., *gewürzhafte Vanille*. A species with very long cylindrical capsules, which form a part of the v. of commerce. Probably a number of species have been described under this name. The plant is used empirically in syphilis and as a vulnerary. [a, 35.]—**V.-bean**. See *V.* (2d def.).—**V. cinnamomum**. Small bastard, or wild v.; the fruit of *V. vilvestris*. [a, 35.]—**V. claviculata**. Fr., *liane à blessures*. Ger., *keulenfrüchtige Vanille*. Purple-lip orchid, green with the of West Indies; a v.-yielding species (identified by some with *V. planifolia*) growing in the hot and damp regions of America and Africa; used like *V. aromatica*. [a, 35.]—**V. disease**. See *VANILLISM*.—**V. leg. V. ley**. Fr., *vanille ley*. The *vanilla manso* of the Spaniards; the larger and more valuable v. derived from *V. sativa*. [a, 35.]—**V. palmarum**. A Brazilian species affording an inferior v. (Rio v.) containing 1.03 per cent. of vanillin. [a, 35.]—**V. planifolia**. V.-plant. A climbing species growing in moist, shady forests; indigenous to eastern Mexico and other parts of tropical America, but cultivated in Réunion, the Seychelles, Java, etc., for its fruit, which forms the bulk of the v. of commerce. This is a fleshy pod about $\frac{1}{16}$ or $\frac{1}{8}$ inch wide and 3 to 12 inches long,

hooked at the base, and opening lengthwise by two unequal valves. It contains a viscid, aromatic juice in which are imbedded numerous black seeds. Its peculiar fragrance is due to vanillin, which is contained in the juice or pulp, and is diffused throughout the entire fruit when it is dried. The surface of the pod is finely furrowed and often beset with crystals (see *VANILLE giro*). It has been used as an excitant, stomachic, stimulant, etc., but is chiefly employed for flavoring. V. is said by Grasset to produce paralysis of the spinal cord and motor nerves in frogs. [a, 35.]—**V. pompona**. A South American species said to yield vanillin. [a, 35.]—**V. saccharata**. Fr., *poudre de vanille sucrée*. A preparation made by triturating 1 part of v. (2d def.) with 9 parts of sugar (10 of sugar and 5 of milk-sugar [Russ. Ph.]). The Fr. Cod. allows as a substitute a mixture of 1 part of crystallized vanillin dissolved in the least possible 90-per-cent. alcohol and 49 parts of sugar. [B, 95 (a, 38).]—**V. sativa**. The cultivated v.-plant, a variety of *V. planifolia* (or, according to some, of *V. aromatica*). [a, 35.]—**V. silvestris**. A variety of *V. planifolia* (according to some, a distinct species). Its fruit (*v. cinnamomum*) is smaller and less aromatic than that of *V. sativa*. [a, 35.]

VANILLA PLANIFOLIA. [A, 327.]

See *V. sativa*. The least possible 90-per-cent. alcohol and 49 parts of sugar. [B, 95 (a, 38).]—**V. sativa**. The cultivated v.-plant, a variety of *V. planifolia* (or, according to some, of *V. aromatica*). [a, 35.]—**V. silvestris**. A variety of *V. planifolia* (according to some, a distinct species). Its fruit (*v. cinnamomum*) is smaller and less aromatic than that of *V. sativa*. [a, 35.]

VANILLE (Fr. Ger.), n. f. $\text{Va}^2\text{n}^2\text{-el}^2\text{y}^2\text{-i}^2\text{li}^2\text{a}^2$. See *VANILLA*.—**Baume de v.** (Fr.). See *BAUME de v. Chocolat à la v.* (Fr.). See *Chocolata cum VANILLA*.—**Gesetzliche V.** (Ger.). **Lange V.** See *VANILLA leg.*—**Poudre de v. sucrée** (Fr.). See *VANILLA saccharata*.—**Teinture de v.** (Fr.). See *Tinctura VANILLAE*.—**V. giro (Fr.). V. the surface of which is beset with an efflorescence of minute colorless crystals of vanillin. [a, 35.]—**V. lee** (Fr.). See *VANILLA leg.***

VANILLIC ACID, n. $\text{Va}^2\text{n}^2\text{-i}^2\text{li}^2\text{a}^2$. An isomeric variety, $\text{C}_8\text{H}_7\text{O}_4 = \text{C}_6(\text{COOH}, \text{OH}, \text{H}, \text{OH}, \text{H}, \text{H}, \text{H})$, of methylparacatechualic acid, occurring as acicular crystals. [B, 3 (a, 38); B, 4.]

VANILLIC ALDEHYDE, n. See *VANILLIN*.

VANILLIN, n. $\text{Va}^2\text{n}^2\text{-i}^2\text{li}^2\text{a}^2$. Lat., *vanillina* [Fr. Cod.]. Fr., *vanilline* [Fr. Cod.]. A substance, $\text{C}_8\text{H}_7\text{O}_3 = \text{C}_6(\text{CHO}, \text{H}, \text{OH}, \text{H}, \text{H}, \text{H}, \text{H})$, found in the pods of *Vanilla planifolia* and in Siam benzoin, asafetida, etc. It forms white acicular crystals, of fragrant odor and pungent taste; an isomeric variety, *isovanillin*, $\text{C}_8\text{H}_7\text{O}_3(\text{OH}, \text{H}, \text{OH}, \text{H}, \text{H}, \text{H}, \text{H})$, forms prismatic crystals. [B, 3 (a, 38); B, 4, 5.]—**V. glucoside**. See *GLUCOVANILLIN*.

VANILLISM, n. $\text{Va}^2\text{n}^2\text{-i}^2\text{li}^2\text{zm}$. Fr., *vanillisme*. A disease occurring among those who sort vanilla-pods, due to contact with an insect found on the pods. The chief symptoms are pruritus with redness and swelling of the surface and some evidences of general malaise. 1st Drugg. Circ. and Chem. Gaz., Jan. 1884, p. 14 (B).—**Alimentary v.** V. attributed to the ingestion of vanilla. Poisoning by tyrotoxin has erroneously been called vanillism. [a, 34.]

VANILLON, n. $\text{Va}^2\text{n}^2\text{-i}^2\text{li}^2\text{on}$. An inferior variety of vanilla (fruit of *Vanilla pompona*), occurring as a broad, fleshy pod without efflorescence (*giro*) on its surface. It is of poor fragrance and contains, besides vanillin, benzaldehyde. [a, 35; B, 270 (a, 38).]

VANILLYL ALCOHOL, n. $\text{Va}^2\text{n}^2\text{-i}^2\text{li}^2\text{al}$. A substance, $\text{C}_8\text{H}_9\text{O}_3 = \text{C}_6\text{H}_5(\text{OH})(\text{OCH}_2\text{CH}_2\text{OH})$, occurring as prismatic crystals. [B, 3 (a, 38).]

VAO, n. An arrow-poison from the United States of Colombia, containing corvoline; supposed to be adulterated corvonal. [a, 35.]

VAPOR (Fr.), n. $\text{Va}^2\text{-pu}^2\text{r}$. Vapor; in the pl., v. s, see *VAPORS*.

VAPOR (Lat.), n. m. $\text{Vap}^2(\text{wa}^2\text{p})^2\text{-o}^2\text{r}$. Gen., *poris*. Gr., *ἀρῆς*. Fr., *vapeur*. Ger., *Dampf*. 1. A visible gaseous exhalation. [a, 48.] 2. See *INHALATION* (3d def.). 3. For the pl., the *vapors*, see the major list.—**V. aceticus**. See *Liquor alicetertus aceticus*.—**V. sanguinis**. See *Gas of the blood*.

VAPORARIUM (Lat.), n. n. $\text{Vap}^2(\text{wa}^2\text{p})^2\text{-o}^2\text{r}^2(\text{or})^2\text{-a}^2(\text{a}^2\text{p})^2\text{-ri}^2\text{a}^2\text{um}$. From vapor steam. Fr., *étuve humide*. Ger., *Dampfbad*. A vapor bath, also the apartment in which it is administered. [a, 48.]

VAPOREUX (Fr.), adj. $\text{Va}^2\text{-po}^2\text{-ru}^2$. 1. Vaporous. 2. Pertaining to the vapors.

VAPORIZABLE, adj. $\text{Vap}^2\text{-o}^2\text{-r}^2\text{-i}^2\text{z}^2\text{-a}^2\text{-bl}^2$. Fr., *vaporisable*. Ger., *verdamfbar*. Capable of being converted into vapor. [B.]

VAPORIZATION, n. $\text{Vap}^2\text{-o}^2\text{-r}^2\text{-i}^2\text{z}^2\text{-a}^2\text{-shun}^2$. From vapor, steam. Fr., *vaporisation*. Ger., *Verdunstung*. The conversion of a liquid or solid into a vapor by means of heat. [a, 48.]

VAPORIZE, v. tr. and intr. $\text{Vap}^2\text{-o}^2\text{-r}^2\text{-iz}^2$. Fr., *vaporiser*. Ger., *vaporisieren*, *ausdunsten*. To convert or be converted into a vapor. [B.]

VAPORIZER, n. $\text{Vap}^2\text{-o}^2\text{-r}^2\text{-iz}^2\text{-u}^2\text{-r}$. From vapor, steam. Fr., *vaporisateur*. See *ATOMIZER*.

VAPOROLE, n. *Vap'ôr-ol*. Of Burroughs, a friable glass capsule containing a drug to be employed for inhalation or fumigation, ensheathed in concentric layers of absorbent cotton, and the whole inclosed in a silken sac. [*"Dublin Jour. of Med. Sci."*, Feb., 1889, p. 192 (a, 50).]

VAPOROUS, adj. *Vap'ôr-u's*. Lat., *vaporosus* (from *vapor*, steam). Fr., *vaporeux*. 1. Pertaining to or containing vapor. 2. Of the blood, arterial. [Harvey (H).]

VAPORS, n. pl. *Vap'ôrz*. Fr., *affections vaporeuses, vapeurs*. An old popular term for hysterical and hypochondriacal affections.

VAREIRE (Fr.), n. *Va³-ra³r*. See *VERATRUM*.

VAREC (Fr.), **VARECH** (Fr.), n's. *Va³r-e³k*. Ger., *Vareh*. See *Fucus*.—*V. vésiculéux* [Fr. Cod.]. See *Fucus vesiculosus*.

VARENNIA, n. See *AMBULO*.

VARENNEA (Lat.), n. f. *Va³r-e³n-ne²-a³*. The genus *Eysenhardtia*. [a, 85].—*V. polystachya*. Sp., *cuarte, taray de México* [Mex. Ph.]. A Mexican species, used in nephritis, cystitis, and chicken-cholera. The gum has the properties of kino. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122 (a, 17).]

VARENNES (Fr.), n. *Va³-re³n*. A place in the department of the Maine-et-Loire, France, where there is a gaseous chalybeate spring. [L, 49 (a, 14).]

VARIATION, n. *Var-i²-a'sh³n*. Lat., *variatio* (from *variare*, to change). The act or process of changing in form, character, rate of motion, etc.; also the amount or degree of such change. [a, 48].—**Double v.** [Du Bois-Reymond]. The double current observed at any point in a muscle or nerve, caused by the passage through it of a single induction shock. [Mayer, "Arch. f. Anat. u. Phys.," 1868, p. 655 (K).]—**Negative v. of the muscle current**. Of Du Bois-Reymond, the diminution of the muscle current of a muscle that yields a strong electrical current, produced by throwing the muscle into a state of tetanic contraction by stimulating its motor nerve. [a, 34.]

VARICE (Fr.), n. *Va³-res*. See *VARIX*.

VARICELLA (Lat.), n. f. *Va³r(wa³r)-i³s(i³k)-el³-la³*. Fr., *varicelle, variole, vérole, fausse vérole, vérole bâtarde, petite vérole volante, vérole, pustules de poulet, nesses*. Ger., *Varicelle, Schafblattern, Spitzblattern, falsche Pocken*. 1. Chicken- (or swine-, or sheep-, or glass-, or water-) pox, water-jags, hives; a mild infectious disease of children, characterized by an eruption of vesicles on the skin and mucous membranes. In the usual form, commonly known as *chicken-pox*, the vesicles are superficial, with clear contents, and the disease is of short duration. It is sometimes followed by cicatrices, but usually not. A severer form, with deeper-seated or purulent efflorescences, is sometimes termed *swine-pox*. [G.] Cf. *V. lentiformis*, *V. coniformis*, and *V. globularis*. 2. See *VARIOLOIDA MITIGATA*. 3. See *VARIOLOID*.—**Conoidal v.** See *V. coniformis*.—**Gangrenous v.** Lat., *v. gangrenosa*. V. characterized by gangrenous efflorescences. [G.] Cf. *VACICIMA gangrenosa*.—**Pustular umbricated v.** See *VARIOLOIDA VARICELLOIDES*.—**Pustular v.** See *VARIOLOID*.—**V. acuminata**. V. in which the vesicles are acuminate. [a, 34].—**V. bulbosa**. See *V. V. cellulosa*. See *VARIOLOIDA VARICELLOIDES*.—**V. coniformis**, *V. conoidea*, *Varicellæ duræ ovales*. Swine-pox; v. in which the vesicles are conical, seated upon inflamed bases with hard borders, and apt to be followed by scars. [G, 9, 11].—**Varicellæ emphysematosæ**. Ger., *Windpocken*. V. in which the vesicles contain air. [G, 11].—**V. globata**, *V. globularis*. Swine-pox, hives; v. in which the vesicles are rounded. They are larger than in *V. lentiformis*, but attended with less induration than in *V. coniformis*. [D, 1; G, 9].—**V. hæmorrhagica**. V. attended with hæmorrhage into the vesicles. [G.]—**P. infantum**. See *V. (ist det.)*.—**V. lenticularis**, *V. lentiformis*, *Varicellæ lymphaticæ*. Ger., *Linsenpocke*. V. in which the efflorescences are lentiform, superficial, but slightly elevated, and not followed by scars. [G, 9].—**V. ovalis**. V. in which the vesicles are oval. [a, 34].—**V. papularis**. See *VARIOLOIDA CORNEA* and *VARIOLOIDA VERRUCOSA*.—**V. purulgo**. Of Hutchinson, an itching cutaneous eruption, consisting of papules, vesicles, and pustules, which sometimes follows v. and also vaccination. [*"Brit. Med. Jour."*, 1875, i, pp. 631, 663, 702 (G).]—**V. pustularis**. V. in which the contents of the efflorescences are more or less purulent. [G, 7].—**Varicellæ sine varicellis**. Of Wilson, varioloid without eruption. [G, 62].—**V. solidescens**. See *VARIOLOIDA CORNEA* and *VARIOLOIDA VERRUCOSA*.—**V. syphilitica**. Variocelliform syphiloderm (*q. v.*). When occurring in scattered efflorescences it is known as *V. syphilitica disseminata*; when confluent, as *V. syphilitica confluens* (see *EMPHYSIUM syphiliticum*). [G.]—**V. varioloides**. See *VARIOLOID*.—**Varicellæ ventosæ**. See *Varicellæ emphysematosæ*.—**Varicellæ verrucosæ**. See *VARIOLOIDA VERRUCOSA*.—**V. vesicularis**. V. in which vesicles form with clear contents. [G, 7.]

VARICELLE (Fr.), n. *Va³-re³-se³l*. See *VARICELLA*.—**V. A petites vésicules**. See *V. V. A vésicules globuleuses*, *V. globuleuse proprement dite*. See *VARICELLA globata*.—**V. tronquée**. See *VARIOLOID*.

VARICELLOID, n. *Va³r-i³e³-se³l-oid*. See *Abortive SMALL-POX*.

VARICIFORM, adj. *Va³r-i³s-i³e³-f³o³rm*. From *varix* (*q. v.*), and *forma*, form. Like a varix. [a, 48.]

VARICOBLEPHARON (Lat.), n. n. *Va³r(wa³r)-i³k-o³(a³)-ble²(a³r(a³r)-o³n*. From *varix* (*q. v.*), and *βλέφαρον*, the eyelid. An old term for a varicose tumor or swelling of the eyelid. [F.]

VARICOCELE (Lat.), n. f. *Va³r(wa³r)-i³k-o³(a³)-sel(kal³)(e³)a³*; in Eng., *va³r-i³k-o³-sel*. Gen., *-cel³es*. From *varix* (*q. v.*), and *κύλη*, a tumor. Fr., *varicocele*. Ger., *V. Krampfaderbruch*. An enlarged and tortuous condition of the veins of the pampiniform plexus. [a, 34].—**Ovarian v.** Of Richet, a varicose enlargement of the veins of the broad ligament. [a, 34].—**Utero-ovarian v.** V. in the female. [a, 34.]

VARICOCELECTOMIE (Fr.), n. *Va³r-ek-o³-sal-e³kt-om-e*. Excision of a varicocele. [a, 34.]

VARICOMPHALUS (Lat.), n. m. *Va³r(wa³r)-i³k-o³(m³)(a³)(a³)-u³s(u³s)*. From *varix* (*q. v.*), and *μφαλός*, the navel. Fr., *varicomphale*. Ger., *Krampfadernebelbruch*. A varicose tumor at the navel. [E.] See also *CAPUT MEDUSÆ*.

VARICOSE, adj. *Va³r-i³k-os*. Lat., *varicosus*. Fr., *variqueux*. Ger., *Krampfaderig*. Pertaining to a varix; of a vein, abnormally dilated. [a, 48.]

VARICOSIS (Lat.), n. f. *Va³r(wa³r)-i³k-os-i³s*. Gen., *-os³-eos* (*-osis*). From *varix* (*q. v.*). A varicose state of the veins of a part.

VARIICOSITY, n. *Va³r-i³k-o³-s-i³t³-i³s*. Ger., *Varikosität*. See *VARIX* and *VARICOSIS*.

VARIOTOMY, n. *Va³r-i³k-o³-ot³-m-i³*. From *varix* (*q. v.*), and *τομή*, a cutting. See *CIRCOTOMY*.

VARICULA (Lat.), n. f. *Va³r(wa³r)-i³k-u³l(u³l)-a³*. Dim. of *varix* (*q. v.*). See *CIRCOPHTHALMIA*.

VARIETY SPRINGS, n. pl. *Va³r-i³-e³t³-i³*. A place in Augusta County, Virginia, where there are gaseous springs. [Anderson (a, 14).]

VARIKOSITÄT (Ger.), n. *Va³r-ek-o³-et³-at³*. See *VARICOSITY*.—*Nervnen*. The varicosities seen on the axis-fibrillæ of nerves, especially near their termination. [J.]

VARIOLOA (Lat.), n. f. *Va³r(wa³r)-i³(y³)(o³)-a³*. Written also in the pl. *variolæ*. From *varius*, mottled. See *SMALL-POX*.—**Black v.** See *V. hæmorrhagica*.—**Congenital v.** V. of new-born children due to intra-uterine infection. The pustules are usually discrete; they do not develop as when exposed to the air, and form no crusts. It is usually fatal. [a, 34].—**Emphysematous v.** V. in which the pustules contain gas. [D, 74]. Cf. *V. siliquosa*.—**False v.** See *VARICELLA*.—**Hæmorrhagic v.** See *V. hæmorrhagica* and *Variolæ sanguinea*.—**Tuberculous v.** V. in which certain of the pustules take the form of cutaneous tubercles. [D, 74].—**V. acutissima**. See *V. maligna*.—**V. amboinensis**. See *FRAMBESIA*.—**Variolæ anomala**. 1. V. complicated with other diseases. 2. V. characterized by an unusual or anomalous exanthem. [G.]—**V. apyretica**. V. of a very mild form, attended with little or no fever. [G.]—**V. Arabum**. V. of the Arabians.—**V. benigna**. V. of a mild type, and attended with a comparatively superficial eruption. [G.]—**Variolæ bullata**. V. lymphatica in which the efflorescences coalesce so as to form large bullæ. [G, 11].—**V. coherens**. V. in which the efflorescences barely touch each other, or in which confluent pustules occur here and there in rows; intermediate between *V. discreta* and *V. confluens*. [D, 1; G, 11].—**V. confluens**. Ger., *Flüsspocken*. 1. V. in which the papules are small, less prominent than in the discrete form, and so numerous that even on the first appearance of the eruption there is hardly any distinct separation between them. They extend over the greater part of the body. [D, 1.] 2. V. in which the pustules form and run into each other; a variety that is often but not necessarily malignant. [G.]—**V. cornea**. Stone-pox, horn-pox; a variety of small-pox in which, in place of pustules, solid papular efflorescences appear upon the skin. [G.] Cf. *V. verrucosa*.—**V. corymbosa**. V. in which the efflorescences occur in groups or clusters; usually a severe form of the disease, and often fatal. [G.]—**V. crustacea**. See *V. hæmorrhagica*.—**Variolæ crystalline**. See *VARICELLA* and *V. lymphatica*.—**V. curta**. See *VARIOLOID*.—**Variolæ cuspidata**. V. the pustules of which are pointed or acuminate. [G, 11].—**V. discreta**, *V. distincta*. V. in which the pustules remain distinct and separate. [G.]—**V. emphysematica**. See *Emphysematous v.*—**V. equina**. Fr., *eaux aux jambes, javart*. Ger., *Mauke, Fussrose*. (Pustular) grease, grease-pox, horse-pox; a contagious disease of horses, attended with fever and an erysipelatous or eczematous exanthem in the region of the pastern joint, furnishing a clear, yellowish, odorous, and greasy discharge, the hair falling out where the eruption appears. The disease is communicable to man, and is believed to be allied to cow-pox. [G.]—**V. gangrenosa**. See *Gangrenous SMALL-POX*.—**V. gastrica**. V. with gastric complications. [a, 34].—**Variolæ hematoides**. See *Variolæ sanguinea*.—**V. hæmorrhagica**. Ger., *schwarze Blattern*. V. (usually of a grave form) associated with hæmorrhages into the efflorescences, giving the pustules and crusts a blackish color. There is also a tendency to hæmorrhage from the mucous surfaces. [D, 1; G.] See also *Variolæ sanguinea*, *V. maligna*, and *V. petechialis*.—**Variolæ hali-tuosæ** (seu *hybridæ*, seu *illegitimæ*). See *VARICELLA*.—**Variolæ inoculatum**. V. of inoculators; said to be a modified v., which consisted in the appearance of a pustule here and there upon the hands of those who practiced small-pox inoculation or of such as were in the habit of handling children with v., or occurring in persons who had already had small-pox. [G, 11].—**Variolæ insti-tu-tæ**. V. acquired by inoculation. [G.]—**Variolæ irregulares**. V. that pursue an irregular course. [G.]—**V. lymphatica**. V. in which the efflorescences are filled with clear lymph. [G, 11].—**V. maligna**. Fr., *variole foudroyante*. Ger., *fauitige Blattern*. A very severe and often fatal form of v., chiefly characterized by the presence of a hæmorrhagic tendency. The exanthem is marked by intense, diffuse redness and swelling of the skin, especially of the face, sometimes together with papular efflorescences or bloody vesicles, but without pustulation. Hæmorrhagic extravasations take place in the skin, forming deep-red macule or petechiæ, and severe hæmorrhages occur from the mucous orifices. [G.]—**Variolæ miliaris**. V. with pustules of about the size of a millet-seed or a little larger. [Plenck (G, 11).]—**V. mitigata**. A mild form of v. without severe fever, and with comparatively few efflorescences. [G, 7].—**V. modificata**. See *VARIOLOID*.—**V. morbilli**. V. complicated with measles. [G.]—**Variolæ naturales**. V. acquired by accidental (natural) infection. [G, 11].—**V. nigra**. See *V. hæmorrhagica* and *V. maligna*.—**Variolæ nothæ**. See *VARICELLA*.—**Variolæ ovine**. See *SHEEP-POX* (1st det.).—**V. petechi-**

alis. V. attended with hemorrhagic effluences, either in the form of petechiae in the interpaces between the pustules, or of bloody effusions within the pustules themselves, in consequence of which their contents become red. [D. 11.]—*Variolæ præcurrentes.* V. in which one or more pustules appear several days before the fever or just at the beginning of the stage of invasion; supposed by Plenck to indicate a favorable issue. [G. 11.]—*V. puerperalis.* Small-pox in a lying-in woman.—*Variolæ purulentes.* See *V. pustulosa*.—*V. pusillæ* (Heberden). See *VARI-CELLA*.—*V. pustulosa.* The ordinary form of v., characterized by a pustular exanthem. [G.]—*Variolæ regulares.* V. that pursues a regular course. [H. 11.]—*Variolæ sanguineæ.* V. hemorrhagica with black pustules containing and discharging blood, with a black, gangrenous base. [G. 11.]—*V. semiconfluens.* 1. V. in which the pustules are partly coalescent. [D. 5.] 2. V. confined to a portion of the cutaneous surface. [G. 5.]—*V. serosa.* See *V. lymphatica*.—*V. siliquosa.* *Variolæ siliquosæ.* V. exhibiting pod-like vesicles, the contents having been absorbed. [G. 11.]—*V. silvatica.* *V. silvestris.* See *VARI-CELLA*.—*Variolæ simplices crystallinae.* See *VARI-CELLA*.—*V. sine eruptione* (see sine exanthemate). V. without eruption. [G.] Cf. *Variolous fever*.—*V. sine variolis.* V. without eruption.—*V. spuria.* See *VARIOLID* and *VARI-CELLA*.—*Variolæ suilla.* See *SWINE-POX*.—*V. syphilitica.* See *Varioformum SYPHILIDERM*.—*V. truncata.* See *VARIOLID*.—*V. tutoria.* See *VACCINIA*.—*Variolæ umbilicatae.* V. the pustules of which are umbilicated. [G. 11.]—*V. vaccina atrophica.* Ger. *verkleinerte* (oder *varrige*) *Schutzpocken*, *Steinpocken*. Stone-pox; an abortive form of vaccinia in which the pustules are small and shallow, normally, forms only a papular or small vesicular effluence and soon dries, with the production of a small brownish-yellow scab resembling a wart, and is not followed by a scar. The contents of the vesicle may or may not be inoculable. [G.] *V. vaccina bullosa.* Ger. *Blasenpocken*. Vaccinia characterized by the appearance at the site of inoculation, in place of the ordinary papular or vesicular effluences, of single bullae with watery contents which dry into crusts, are not further inoculable, and are not generally followed by scars, though sometimes deep ulcers form beneath the scabs, leaving deep cicatrices. [G.]—*Variolæ vaccinae* [Jenner]. See *VACCINIA* and *COW-POX*.—*V. vaccina erysipelatosæ.* Ger. *Vaccinio-Erysipel*, *Impfersypsel*. Vaccinia complicated with erysipelas proceeding from the point of vaccination at the period of maturation and spreading with pain, swelling, and redness, over the arm and sometimes on the body. [G.]—*V. vaccina furunculosa.* Ger. *Vaccinefurunkel*. A form of vaccinia in which, at the site of inoculation, a pea-sized red tubercle forms which suppurates and presents the appearance of a follicular furuncle, the contents of which are not inoculable, and which is not followed by a characteristic scar. [G.]—*V. vaccina herpetica.* Ger. *Eczempocken*, *Kritzpocken*. Vaccinia in which, on the third day after vaccination, there appear at the point of inoculation a number of watery vesicles attended with itching, which leads to rubbing or scratching of the part and rupture of the vesicles, together with the development of a surrounding eczema. [G. 3.]—*V. vaccina pemphigodes.* See *V. vaccina bullosa*.—*V. vaccinatorum.* See *VARIOLID*.—*V. vaccina ulcerosa.* Ger. *Vaccinegeschwür*. Vaccinia characterized by the appearance, at the seat of vaccination, of an ulcer believed to be due to the presence of some extraneous virus. It is often attended with constitutional disturbance. [1st Sem. med., 11th Nov. 27, 1889, p. 439 (a, 18); G.]—*V. varicelloides.* See *ABORTIVE SMALL-POX* and *VARIOLID*.—*V. vera.* Small-pox as distinguished from varioloid. [D.]—*V. verrucosa.* Wild form of v. in which the effluences fail to develop fully, not passing the papular stage, and begin to subside after a few days. [G.] Cf. *Variolæ verrucosæ*.—*Variolæ verrucosæ.* V. attended with an eruption of "hard, pointed papule resembling atheromatous material." [G. 11.]—*Variolæ volatiles.* See *VARI-CELLA*.

VARIOLAD, n. *Va*^{3r}*i*²*o*²*a*⁴*d*. One of the active or infectious elements or germs of small-pox virus. [Farr (a, 18).]

VARIOLAR, adj. *Va*^{2r}*i*²*o*²*a*^{3r}. Lat., *variolaris*. See *VARIOLATE* and *VARIOLOUS*.

VARIOLARIA (Lat.), n. f. *Va*^{3r}*(wa*^{3r}*)i*²*o*²*a*^{3r}*i*²*a*³. Fr., *variolaire*. From *variola*, small-pox. A genus of lichens. The *Variolariaceæ* (*Variolariæ*, *Variolariæ*) are a division of the *Teliothalamaceæ*. [a, 35.]—*V. amara*. A species used as an antelmintic and febrifuge. [a, 35.]

VARIOLARYNGITE (Fr.), n. *Va*^{3r}*e*²*o*²*a*³*ra*²*n*²*z*het. Laryngitis due to variola. [L, 41 (a, 14).]

VARIOLATE, adj. *Va*^{2r}*i*²*o*²*a*⁴*t*. Lat., *variolatus*. Having markings resembling the pits of small-pox. [a, 35.]

VARIOLATION, n. *Va*^{2r}*i*²*o*²*a*⁴*shu*ⁿ. From *variola*, small-pox. Ger. *Blatterbelzen*. The act of communicating variola. [D. 1.]—*Artificial v.* V. by inoculation. [D. 1.]

VARIOLATED, adj. *Va*^{2r}*i*²*o*²*a*⁴*t*-e^d. Lat., *variolatus*. Fr., *variolté*. 1. Affected or inoculated with variola. 2. Pock-marked.

VARIOLÉ (Fr.), n. *Va*^{2r}*e*²*o*²*a*³. See *VARIOLA*.—*V. adultérine*, *V. bâtarde*. See *VARIOLID*.—*V. des vaches*. See *COW-POX*.—*V. foudroyante*. See *VARIOLA maligna*.—*V. petite volante*. See *VARI-CELLA*.

VARIOLLETTE (Fr.), n. *Va*^{2r}*e*²*o*²*a*³le^t. See *VARI-CELLA*.

VARIOLI (Lat.), n. m. pl. *Va*^{3r}*(wa*^{3r}*)i*²*o*²*a*³*i*. An old term for variola. [G.]

VARIOLIC, adj. *Va*^{2r}*e*²*i*²*o*²*a*³ik. Lat., *variolicus*. Fr., *varioliqe*. 1. Variolous. 2. Pocky.

VARIOLIFORMIS (Lat.), adj. *Va*^{3r}*(wa*^{3r}*)i*²*o*²*a*³*i*²*o*²*rm*^{is}. From *variola* (a. v.), and *forma*, form. Fr., *varioliforme*. Having the appearance of small-pox.

VARIOLINE, n. *Va*^{2r}*i*²*o*²*en*. Lat., *variolinum*. Ger., *Pock-entgift*, *Blattergift*. The specific virus of small-pox. [G.]

VARIOLOID, adj. *Va*^{2r}*i*²*o*²*oid*. Lat., *variolooides* (from *variola*, small-pox, and *eidos*, resemblance). Fr., *varioloïde*. Ger., *v.* Resembling variola; pertaining to the disease v.; as a n. (Lat., *variolooides*, *variolois*, *varicella*, *varioloidea*; Ger., *V. Mittel-pocken*), small-pox modified by recent vaccination or by a previous attack of variola. It is usually milder in character and of shorter duration than ordinary variola, and the exanthem is apt to be less extensive and each effluence more superficial. [G.]

VARIOLIS (Lat.), n. f. *Va*^{2r}*(wa*^{3r}*)i*²*o*²*i*²*s*. Gen., *-lo'idis* (*-idis*). From *variola* (a. v.). 1. Variola mitigata. 2. Varioloid. [G.]—*V. bimbiaria*. See *GRASPEDCEPHALOSIS*.

VARIOLOUS, adj. *Va*^{2r}*i*²*o*²*us*. Lat., *variolosus*. Fr., *variolozeux*. Ger., *variolois*. Of the nature of or pertaining to variola. [G.]

VARIQUEUX (Fr.), adj. *Va*^{2r}*re*-ku^s. See *VARI-COSE*.

VARIX (Lat.), n. m. and f. *Var*^{2r}*(wa*^{3r}*)i*²*x*. Gen., *varicis*. From *varus*, bent awry. Fr., *varice*. Ger., *Aderbruch*, *Adergeschwulst*, *Aderknuten*, *Aderkropf*, *Blutadergeschwulst*, *Kramvader*. A morbid dilatation of a vein; a varicosity. [C.]—*Aneurysmal v.* Fr., *anévrisme de Pott* (ou par *érosion*). A direct communication between an artery and a varicose vein, without any intervening sac. See also *VARI-COSE* ANEURYSM and ANEURYSM by *anastomosis*.—*Arterial v.* A circoid aneurysm, especially one composed of a single dilated and tortuous artery. [D.]—*Lymphatic v.* V. of the lymphatic vessels. [a, 34.]—*Varices arteriarum*. See *GERMUTLE Hobokenii*.—*Varices gelatinosæ*. Ger., *Sulzknuten*. Nodular accumulations of the gelatinous matter of the umbilical cord. [A, 112.]

VARUS (Lat.), adj. *Var*^{2r}*(wa*^{3r}*)i*²*us* (*u*^s). Bent awry, knock-kneed; as a n., see *TALIPES v.*

VARUS (Lat.), n. m. *Var*^{2r}*(wa*^{3r}*)i*²*us* (*u*^s). 1. An old term for acne. 2. See *TALIPES v.*—*Equino-v.* See *EQUINO-v.*—*V. comedo*. Acne punctata. [G.]—*V. disseminata*. Acne disseminata. [G.]—*V. equin* (Fr.). See *EQUINO-v.*—*V. frontalis*. See *MILIUM* (1st def.).—*V. gutta* (Jessel). See *ROSACEA*.—*V. hircus*. Fr., *v. orgéol*. See *HORDEOLUM*.—*V. mentagra*. See *SCYSSIS v. miliaris*. See *MILIUM* (1st def.).—*V. punctatus*. See *ACNE punctata*.—*V. sebaceus*. See *SEBORRHEA* and *ACNE punctata*.

VAS (Lat.), n. n. *Va*^{2s}*(wa*^{3s}*)s*. Gen., *va'sis*. Gr., *ἀγγειον*. See *VESSEL*.—*V. aberrans*. A vessel following an anomalous course or occupying an anomalous position. [L.]—*V. aberrans Halleri*. A long convoluted tube connected with the lower part of the canal of the epididymis or with the v. deferens. It has a blind extremity which lies in the lower part of the spermatic cord. [L, 31, 115, 142.]—*V. aberrans inferius*. A v. aberrans springing from the head of the epididymis. [L, 332.]—*V. aberrans superius*. See *V. aberrans Halleri*.—*Vasa aberrantia bilifera*. Biliary ducts in the triangular ligament of the liver, in its transverse fissure, and in other parts adjacent to the liver; commonly regarded as ducts of atrophied hepatic tissue, by some regarded as blood-vessels or lymphatic vessels. [L, 31.]—*Vasa aberrantia media*. Vasa aberrantia lying along the middle of the epididymis. [L.]—*Vasa aberrantia testis*. Certain convoluted vessels hanging free from the general substance of the epididymis, but communicating with its main tube, supposed to be vestiges of one or more of the tubes of the mesonephros. [A, 5.]—*V. afferens glomeruli*. The artery adding to a glomerulus of the kidney. [L.]—*V. afferens glomeruli*. Vessels conveying blood to a part. [L.]—*Vasa afferentia of the Malpighian corpuscles*. Branches of the interlobular arteries of the kidney from which the glomeruli are formed. [L, 31, 142.]—*Vasa annularia*. Ger., *ringförmige Gefässe*. In botany, those vessels whose membrane is thickened by successive cross-rings. [L, 49 (a, 14).]—*V. capillare*. See *CAPILLARY* (3d def.).—*Vasa capreolaria*. The capillary veins of the spermatic cord. [A, 301, 322, 325.]—*Vasa centralia retinae*. The central artery and veins of the retina. [L.]—*Vasa chyliifera*. See *CHYLIFEROUS VESSELS*.—*Vasa ciliaria*. The ciliary arteries and veins. [L.]—*V. deferens*. Fr., *canal déférent*. Ger., *Samenleiter*. The excretory duct of the testicle, a tube about 2 feet long, the upward continuation of the canal of the epididymis. From the globus minor it passes up in the spermatic cord to the inguinal canal, through which it enters the abdominal cavity. Here it runs beneath the peritoneum across the external iliac vessels to the side of the bladder, where it curves backward and downward to the base of the prostate gland and unites with the duct from the seminal vesicle to form the ejaculatory duct. [L, 31, 142, 332.]—*V. deferens mulieris*. See *OVIDUCT*.—*V. efferens glomeruli*. The efferent vein from a glomerulus of the kidney. [L.]—*Vasa efferentia corporis Malpighii*. The venous trunks which emerge from the glomeruli of the kidney and form a dense network over the walls of the uriniferous tubules. [L.]—*Vasa efferentia testis*. Canals which continue those of the rete vasculosum, pierce the tunica albuginea beneath the globus major, form the coni vasculosi, and empty into the canal of the epididymis. [L, 31, 142, 332.]—*V. efferentia testis*. See *CANAL of Vasa efferentia*.—*V. hemorrhoidalia*. See *HÆMORRHOID*.—*V. Halleri*. See *V. aberrans Halleri*.—*Vasa hepatis interlobularia*. The interlobular veins of the liver. [L.]—*Vasa inferentia*. See *Vasa afferentia*.—*Vasa intestini tenuis*. Small intestinal branches of the mesenteric arteries. [a, 34.]—*Vasa lactea*. See *CHYLIFEROUS VESSELS*.—*Vasa lymphatica*. The lymphatics.—*V. mammariarum internarum*. See *INTERNAL MAMMARY ARTERY*.—*Vasa omphalo-mesenterica*. The omphalo-mesenteric arteries and veins. [L.]—*Vasa plasmatica*. See *SEROUS CANALICULI*.—*Vasa propria*. Of Mohl, soft, thin-walled cells constituting typical parenchyma. [a, 35.]—*Vasa propria of the fetus*. Of Jungbluth, certain vessels (not observed by any one else) which form a capillary network in the chorion up to the middle of gestation. [1st Arch. f. Gyn., 11th v. p. 554 (a, 34).]—*Vasa recta (of the kidney)*. Veins which collect the

blood from the substance of the medulla and pass upward to join the arches at the bases of the pyramids. [C.]—*V. resorbens*. See LYMPHATIC (1st def.).—*V. sanguiferum*, *V. sanguineum*. A blood-vessel.—*Vasa sedalia*. Of Willis, the hemorrhoidal veins.—*Vasa serosa*. See *Serosa* CANALICULI.—*V. serpentinum testis*. See *Convolutus* TUBULE.—*Vasa spermatica externa*. See UTERINE ARTERIES.—*Vasa spermatica interna*. The blood-vessels and lymphatics which enter the substance of the testicle at its posterior edge. [L.]—*Vasa spermatica preparantia*. The small blood-vessels of the testicle. [L. 349 (a. 34).]—*V. spermaticum*. See *V. deferens*.—*Vasa umbilicalia*. The umbilical arteries and veins.—*Vasa vasorum*. Small arteries and veins which supply blood to and return it from the coats of arteries, lymphatics, and veins. [L.]—*Vasa vorticosa*. Fr., *vaisseaux tourbillonnés*, *tourbillons vasculaires*. Ger., *Wirbelvenen*, *büschelförmige Gefässe*. The whorl-like arrangement of the veins of the choroid just before they unite into the short, straight trunks which perforate the sclera obliquely to empty into the ophthalmic vein. [F.]

VASAL, adj. *Va'sal*. See **VASCULAR**.

VASCOA (Lat.), n. f. *Va'sko-a's*. Fr., *v.* A genus of the *Leguminosae*. [a. 35.]—*V. amplexicaulis*. The licorice-bush of southern Africa. The roots are demulcent. [a. 35.]—*V. perfoliata*. A Cape-of-Good-Hope species. The root is diuretic. [a. 35.]

VASCULAR, adj. *Va'skul'ar*. Lat., *vasculosus*, *vascularis* (from *vasculum* [q. v.]). Fr., *vasculaire*, *vasculeux*. Ger., *gefäßreich*, *gefäßig*, *vasculös*. Having vessels; richly supplied with blood-vessels; pertaining to the circulatory system. The *Vasculæ* of Lindley are a class of plants consisting of the *Ecovæ* and *Endogæ*. [a. 35.]

VASCULARITY, n. *Va'skul'ar-i'ti*. Fr., *vascularité*. Ger., *Vascularität*, *Gefässreichthum*. The state of being vascular.

VASCULO-MOTOR, adj. *Va'skul'eol-mot'o'r*. Lat., *vasculo-motorius*. See **VASO-MOTOR**.

VASCULOSE, adj. *Va'skul'us*. Lat., *vasculosus*. Fr., *v.* See **VASCULAR**; as n., of Frémy, the ground substance of the vessels of plants. [B. 93 (a. 14).]

VASCULUM (Lat.), n. n. *Va'skul(wa'skul'u'l'u)*. Dim. of *vas*, a vessel, especially a small vessel. [a. 48.] 2. A pitcher-shaped leaf. 3. A case used by botanists for freshly gathered specimens. [a. 35.]—*V. aberrans Halleri* (see *testis*). See *Vas aberrans Halleri*.—*V. testium*. See *SCROTUM*.

VASELINE, n. *Va'se'lin*. Lat., *vaselinum*. Fr., *v.* Ger., *Vaselin*. 1. Petroleum ointment; a commercial product for which the official petrolatum (q. v.) is intended as a substitute. [B.] 2. See *UNGUENTUM PARAFFINI*.—*White v.* V. that is freed from volatile products by simmering over a water-bath and then filtered repeatedly through charcoal until it is opal-white. [a. 34.]

VASIFACTIVE, adj. *Vas-i'fa'ktiv*. From *vas*, a vessel, and *facere*, to make. See **ANGIOPLASTIC**.

VASIFORM, adj. *Vas-i'fo'r*. Resembling a duct. [a. 35.]

VASO-CONSTRICTOR, n. *Vas'o-ko'n-strik'to'r*. A nerve the action of which is to constrict blood-vessels.

VASODENTIN, n. *Vas-o-de'n-tin*. Fr., *vaso-dentine*. Ger., *V.* A variety of dentin which contains blood-vessels. [L.]

VASO-DILATOR, adj. *Vas-o-dilat'o'r*. From *vas*, a vessel, and *dilatare*, to dilate. Fr., *vaso-dilatateur*. Ger., *vasodilatatorisch*, *gefäßverweiternd*. Causing active dilatation of the smaller arteries (said of certain nerves and drugs). [K.]

VASO-FORMATIVE, adj. *Vas-o-förm'a'tiv*. From *vas*, a vessel, and *formare*, to form. Fr., *v.-f.*, *vaso-formateur*. Ger., *vaso-formativ*. See **HÆMATOPOIETIC** (2d def.).

VASO-INHIBITORY, adj. *Vas-o-in-hib'i'to'r*. Producing or causing inhibition of the action of the vaso-motor nerves. [Landois (a. 34).]

VASO-MOTOR, adj. *Vas-o-mot'o'r*. Fr., *vaso-moteur*, *vasculo-moteur*. Ger., *vaso-motorisch*. Causing constriction of the smaller arteries; pertaining to or constituting nerves or drugs so acting. [K. 9.]

VASO-MOTRICITÉ (Fr.), n. *Va'so-mo-tre-se-té*. The property possessed by blood-vessels of varying their calibres through the influence of the vaso-motor and vaso-inhibitory nerves. [*"Sem. méd."*, Oct. 9, p. 381 (a. 18).]

VASONEUROSE (Ger.), n. *Va'so-noir-oz'e*. See **ANGIONEUROSIS**.

VASO-SENSITIVE (Fr.), adj. *Va'so-sen-si'te*. Pertaining to sensation and circulation (said of the nerves of blood-vessels). [A. 301 (a. 34).]

VASTUS (Lat.), adj. *Va'st(wa'st'u)*. Of large size, immense; as a n., the *v. externus* and *v. internus* regarded as one muscle. [L.]—*V. anterior*. See **CRURÆUS**.—*V. externus*. Ger., (*äußerer*) *Unterschenkelstrecker*. A muscle arising from the outer surface and base of the great trochanter, the line between this and the linea aspera, and the upper half of the outer border of the linea aspera. It passes down the outer and anterior surfaces of the thigh to be inserted into the tendon of the rectus femoris and the upper and outer margins of the patella. [L. 81, 42, 332.]—*V. internus*. Ger., (*innerer*) *dicker Schenkelmuskel*. A part of the quadriceps extensor cruris arising from the inner lip of the linea aspera of the femur. After blending with the crureus and the tendon of the rectus femoris, it is inserted into the inner margin of the upper half of the patella. [L.]—*V. lateralis* [Ger. Anat. Soc.]. See *V. externus*.—*V. longus*. See **ISCHIOTIBIALIS externus**.—*V. medialis* [Ger. Anat. Soc.]. See *V. internus*.—*V. medius*. See **CRURÆUS**.

VATAIREA (Lat.), n. f. *Va'ta-e'a'e-a's*. Fr., *vatairée*. A genus of the *Leguminosae*. [a. 35.]—*V. guianensis*. A Guiana tree. The seeds (Fr., *graines à dardres*) are used in skin diseases. [a. 35.]

VATERIA (Lat.), n. f. *Va'ter-e'a'e-a's*. From *Vater*, a German botanist. Fr., *vaterie*. A genus of tropical Asiatic trees. The *Vaterieæ* are a suborder of the *Dipterocarpeæ*. [a. 35.]—*V. acuminata*. A Ceylon tree yielding East Indian dammar. [a. 35.]—*V. indica*. 1. See *V. acuminata*. 2. Of Roxburgh, a species which is the source of Indian copal. The seeds contain an aromatic fat used in rheumatism, etc. The astringent bark is used to retard fermentation in making jaggery from toddy. [a. 35.]—*V. malabarica*. See *V. indica* (2d def.).

VATICINATIO (Lat.), n. f. *Va't(wa't'i's)(i'k)-i'n-a(s)'shi'ti*. (2d)-o. Gen., -on'is. From *vaticinari*, to foretell. Propheying. [D. 18.]—*V. morientium*. The last words of the dying. [D. 5.] Cf. **ECSTASY**.

VAUGNIÈRES (Fr.), n. *Von-y-e'r*. A place in the department of the Drôme, France, where there is a gaseous and chalybeate spring. [L. 49 (a. 14).]

VAULI, n. *Va'it*. See **FORNIX**.—*V. of the cranium*. The upper curved portion of the cranium. [L.]—*V. of the vagina*. Lat., *forix* (see *fundus*) *vaginae*. Fr., *Fond du vagin*. Ger., *Scheidegewölbe*, *Scheidenmund*. The upper portion of the vagina, forming, when the passage is distended, a v-like structure surrounding the neck of the uterus.

VAUQUELINE (Fr.), n. *Vok-len*. An old term for strychnine. [B. 85, 98 (a. 14).]

VAYSONIER (Fr.), n. *Va'se-zo-ne-a*. A porous vessel used for the transport of leeches; so named from Vayson, the inventor. [B. 93 (a. 14).]

VEAU (Fr.), n. *Vo*. A calf; also veal.—*Gélee de v. médicinale*. See *Calf's-foot JELLY*.—*Suif de v.* Veal suet. [B.]

VECORDIA (Lat.), n. f. *Ve(wa)-ko'r'd'i'a-s*. From *vecora*, destitute of reason. Of Kahlbaum, a mild form of insanity occurring mostly at the time of puberty. [A. 319.]—*V. diastrophia*. See **DIASTROPHIA**.

VECTIS (Lat.), n. m. *Ve'kt(wekt)'i's*. Gen., *vect'is*. From *vehere*, to carry. Fr., *levier*. Ger., *Hebel*. 1. A lever; in obstetrics, an instrument, usually shaped like one of the blades of an obstetrical forceps, but with only the cephalic curve, used as a lever or tractor. It was probably invented by one of the Chamberlens. [A. 15.] 2. See **LEMNISCUS** (2d def.).—*Baudelocque's v.*

A VECTIS.

A v. having a strong, large handle, and a shaft that is curved at its extremity and expanded into a fillet. [A. 15 (a. 34).]—*Boddaert's v.*

A v. having a wooden handle holding a shaft that has a double curve; the shaft is concave from side to side, and scoop-shaped at its extremity. [A. 15 (a. 34).]—*Hubert's v.* A v. invented by the younger Hubert, of Louvain; used with a fillet. [A. 15.]—*Roonhuysen's v.* A v. supposed to be the original form, secretly sold to Roonhuysen by one of the Chamberlens. [A. 15.]—*V. elevatorium*. See **BONE-ELEVATOR**.—*V. triploides*. See **TRIPLIOD ELEVATOR.—*Veradini's v.* A v. having a handle like a lithotrite, the shaft being long, concave, curved, and fenestrated. [A. 15 (a. 34).]**

VEGETABLE, adj. *Ve'j'e't-a'b'l*. Lat., *vegetabilis* (from *vegetare*, to quicken). Fr., *végétal*. Ger., *vegetabilisch*, *pflanzlich*. Pertaining to or of the nature of plants; as a n., a plant, especially an esculent plant or the esculent portion of a plant. [a. 35.]

VEGETARIAN, n. *Ve'j'e't-a'r'i-an*. Ger., *Vegetarier*. A person who subsists exclusively on vegetable food. [L. 30, 57 (a. 14).]

VEGETARIANISM, n. *Ve'j'e't-a'r'i-an-i'z-m*. Lat., *vegetarianismus*. Fr., *végétarisme*. The practice of living exclusively on vegetable food; also the doctrine that this is the only kind of food proper for man. [a. 48.]

VEGETATIO (Lat.), n. f. *Ve'j'(we'j)-e't-a(s)'shi'ti*. (2d)-o. Gen., -on'is. See **VEGETATION**.—*Vegetationes globulosæ cordis*. Globular fibrous vegetations found in the heart. [a. 34.]

VEGETATION, n. *Ve'j'e't-a'shu'n*. Lat., *vegetatio* (from *vegetare*, to quicken). Fr., *végétation*. Ger., *V.*, *Wachsthum* (3d def.). 1. The vital processes (absorption, circulation, exhalation, assimilation, etc.) on which the life and growth of a plant depend. 2. Plants in general. [a. 35.] 3. A growth or deposit upon some portion of the body of a substance or tissue foreign to that part; especially a condyloma acuminatum. [D.]—*Adenoid v's of the naso-pharynx*. V's resulting from excessive growth (due to chronic inflammation) of the adenoid or cytogenous tissue contained in the stroma of the mucous membrane lining the naso-pharyngeal cavity. These v's are comb-like, tongue-shaped, or globular, and are mostly found on the superior pharyngeal wall, but often extend forward into the posterior nares. [F.]—*Dermal v.* See **CONDYLOMA acuminatum**.—*Digital v's*. Prominent villous v's. [A. 42.]—*Fibrinous v's*. Small or large semi-transparent or opaque grayish or grayish-yellow wart-like bodies, projecting from a serous surface, especially the pleura and pericardium. When separated from their base they leave a rough, slightly projecting surface. [a. 34.]—*Travelled heart v.* See **EMBOLUS** (2d def.).—*Umbilical v.* See **FUNGUS EXCRESCENCE of the umbilicus**.—*Urethral v's*. See **URETHRAL PAPILLOMA**.

VEGETATIVE, adj. *Ve21'e2t-at-i2v*. Lat., *vegetativus*. Fr., *végétatif*. Ger., *vegetativ*. 1. Pertaining to a vegetable. 2. Pertaining to growth, nutritive. [K.]

VEGETO-ALKALOID, n. *Ve21'e2t-o-a21k'a21-oid*. A vegetable alkaloid. [B.]

VEGETUS (Lat.), adj. *Ve21'(we21g)-e2t-u2s(u)s*. Ger., *frisch, grünleibend*. Remining green, not withering. [A, 35.]

VEHICLE, n. *Ve21'i-k1*. Lat., *vehiculum* (from *vehere*, to bear). Fr., *véhicule*. Ger., *Bindemittel, Vehikel*. A liquid or solid excipient. [B, 93 (A, 14).]

VEIL, n. Val. Lat., *velum*. Fr., *voile*. Ger., *Schlier*. 1. A cloth or similar fabric used as a covering. [A, 48.] 2. In botany, the partial covering of the stem or margin of the pileus of *Fungi*, also the indusium of ferns. [A, 35.]—**Uterine v.** Lat., *pessarum oclussivum*. A cap for the cervix uteri, used to prevent conception.

VEILCHEN (Ger.), n. *Fil'ch3en*. See *VIOLA* (1st def.).—**Ackerv.**, *Dreifarbigen*. See *VIOLA tricolor* (1st def.).—**Hundsv.** See *VIOLA canina*.—**Märzv.** See *VIOLA odorata*.—**Vcampher**. See *Iris camphor*.—**V'syrup**. Syrup of the flowers of *Viola odorata*. [B, 108 (A, 14).]—**V'wurzel**. See *Iris florentina* (3d def.).

VEIN, n. Van. Gr., *φλέψ*. Lat., *vena*. Fr., *veine*. Ger., *Ader, Blutader, Vene*. 1. A vessel the function of which is to convey blood toward the heart. [A, 48.] 2. A rib or nerve of an insect's wing. [L, 206 (A, 27).] 3. A distinct thread-like structure in a plant organ, especially one of a group of branching threads. [A, 35, 48.]—**Accessory portal v's**. Of Sney, small v's of the axillary, the axillary tissue and peritoneal folds around the liver, emptying into the portal v. [C.]—**Acromio-thoracic v.** A v. accompanying the artery of like name, and emptying into the axillary v. [C.]—**Adipose v's**. Lat., *adiposæ venæ*. Ger., *Fettvenen*. Branches of the emulgent v's arising in the fat around the kidneys. [A, 343.]—**Alar thoracic v.** A branch of the axillary v. accompanying the alar thoracic artery. [C.]—**Anastomotic v.** of Troiard. See *Vena communicans magna*.—**Angular v.** A v. formed by the union of the supra-orbital, frontal, superior palpebral, and nasal v's, emptying into the facial v. [C.]—**Annular v.** See *VENA metacarpea ulnaris*.—**Anterior auricular v.** A small v. emptying into the temporo-maxillary v. [F.]—**Anterior cardiac v's**. Lat., *venæ cordis anteriores*. Ger., *vordere Kroneblutadern des Herzes*. Two or three v's on the front of the right auricle and the right border of the heart, emptying separately into the auricle. [C.]—**Anterior ciliary v's**. Ger., *vordere Blutungsblutadern*. V's accompanying the anterior ciliary arteries which empty into the ophthalmic v. [L.]—**Anterior cutaneous v. of the neck**. See *Anterior jugular v.*—**Anterior ethmoidal v.** A v. accompanying the anterior ethmoidal artery, and emptying into the ophthalmic v. [C.]—**Anterior facial v.** See *Facial v.*—**Anterior intercostal v's**. Small offshoots of the internal mammary v. which accompany the arteries of like name. [L.]—**Anterior internal maxillary v.** See *Deep facial v.*—**Anterior jugular v.** Ger., *vordere oberflächliche Halsvene*. A v. formed by branches from the submaxillary region, the lower lip, and the chin, and ending in the external jugular v. or in the subclavian v. [C.]—**Anterior longitudinal spinal v's**. Lat., *venæ spiniales longitudinales*. Two plexiform v's which extend along the whole spinal canal in front of the cord and connect above with the basilar sinus. [C.]—**Anterior mediastinal v's**. Lat., *venæ mediastinæ anteriores*. Branches of the innominate v. from the anterior mediastinal space. [L, 332.]—**Anterior temporal v.** A v. arising from the diploe of the frontal and temporal bones, and emptying into one of the branches of the temporal v. [L.]—**Anterior tibial v.** Lat., *vena poplitea anterior*. A v. corresponding to the artery of like name; it empties into the popliteal v. [C.]—**Anterior ulnar cutaneous v.** A v. which ascends from the anterior surface of the wrist and unites below the bend of the elbow with the posterior ulnar cutaneous v. to form the median ulnar cutaneous v. [L.]—**Ulnar v.** A v. which returns the blood from the dorsal plexus of the hand to the posterior ulnar v. or the median basilic v. [C.]—**Anterior vertebral v.** Lat., *vena cervicalis ascendens*. A v. arising from a plexus over the cervical vertebra, receiving branches from the prevertebral and scaleni muscles, and emptying into the inferior end of the vertebral v. [C.]—**Anterior vitelline v.** Lat., *vena vitellina anterior, vena omphalomesenterica anterior*. Ger., *vordere Dotterveine*. The v. (often two v's) by which the sinus terminalis of the primitive embryonic circulation empties into the posterior vitelline v. [A, 8.]—**Articular v.** A v. that returns blood from the structures of a joint. [A, 34.]—**Ascending cervical v.** See *Anterior vertebral v.*—**Ascending lumbar v.** A v. formed by a series of vertical communications between the lumbar v's, and also connecting the lateral sacral, ilio-lumbar, and common iliac v's. It empties into the azygos v. of its side. [C.]—**Auditory v's**, *Auricular v's*. Ger., *Gehörblutadern*. See *VENA auditoria interna* and *Deep auricular v's*.—**Axillary v.** Lat., *vena axillaris*. Ger., *Achselvene*. A v. that returns the blood from the arm. It is a continuation of the basilic v., and extends from the lower border of the *teres major* muscle, formed by the union of the median basilic and posterior ulnar cutaneous v's; continuous with the axillary v. [C.]—**Basivertebral v's**. Ger., *Wirbelkieferrblutadern*. Small v's, reduced to their intima, which ramify in the bodies of the vertebrae and empty into the anterior longitudinal spinal v's. [L, 332.]—**Brachial v's**. V's, one on each side of the brachial artery, which follow its branches and empty into the axillary v. at the lower border of the subscapularis. [L.]—**Brachio-cephalic v.** See *In-*

nominate v's.—**Branchial v's**. The vessels that return the blood from the branchial arches. [L.]—**Bronchial v's**. Small v's receiving the blood from the nutrient arteries of the lungs and bronchial tubes. They empty into the large azygos v. on the right side, and into the upper azygos v. on the left side. [L.]—**Buccal v's**. Ger., *Mundblutadern*. V's returning the blood from the buccal muscles and emptying into the facial v. [C.]—**Capsular v's**. Lat., *venæ adheventes capsulares* (2d def.). 1. See *Suprarenal v's*. 2. Branches of the portal v. which return the blood from the capsule of the liver. [L, 142.]—**Cardiac v's**. Ger., *Herzvenen*. V's from the tissue of the heart. [L.]—**Cardinal v's**. Lat., *venæ cardinales*. The fetal v's which return the blood from the mesopharynx, the vertebral column, and the parietes of the trunk. Their inferior portions afterward become the internal iliac v's; above the latter they become obliterated for the most part. [A, 5.]—**Central v's (of the liver)**. See *Intrahepatic v's of the liver*.—**Central v. of the retina**. Lat., *vena retina centralis*. A branch of the superior ophthalmic v. which returns the blood from the tissues supplied by the branches of the central artery of the retina. [L.]—**Central v's of the spinal cord**. Two v's, one on each side, in the substantia gelatinosa centralis of the spinal cord, which terminate at the upper and lower ends of the cord in a number of small branches. [L, 332.]—**Cephalic v.** A v. formed by the union of the median cephalic and radial cutaneous v's, which passes up along the outer border of the biceps brachii to empty into the axillary v. [L.]—**Cerebral v's**. Ger., *Gehirnvenen*. V's divided into two sets—those which return the blood from the surface of the brain, and those which return it from the ventricles. [L.]—**Chorioid v.** Lat., *vena chorioidæ (lateralis)*. A v. which returns the blood from the lateral ventricle and chorioid plexus, and unites with the vena corporalis interna v. of Galen. [L, 332.]—**Ciliary v's**. Ger., *Blutungsblutadern*. V's which usually extend from the choriocapillaris in a radiate direction through the chorioid, and form the vasa vorticosa, five or six in number, which perforate the sclera obliquely at or just behind the equator of the eye, pass into the orbit, and empty into the ophthalmic v. [F.]—**Circumflex iliac v.** Ger., *umglenkigene Hüftblutader*. A v. receiving the blood from the circumflex iliac artery and emptying into the external iliac v. [L.]—**Circumflex v's**. V's accompanying the circumflex arteries. [L.]—**Circumflex v's of Kohlrausch**. See *VENA circumflexæ penis*.—**Circumflex v's of the arm**. Branches of the axillary v. returning the blood from the distribution of the anterior and posterior circumflex arteries of the arm. [L.]—**Common facial v.** Ger., *gemeinschaftliche Gesichtsbloodader*. A v. formed by the union of the facial and temporal v's, emptying into the internal jugular v. [L.]—**Common iliac v.** Lat., *vena iliaca communis*. Ger., *gemeinschaftliche Hüftblutader, Hüftvene*. A v. formed by the union of the external and internal iliac v's. It extends from the sacro-iliac synchondrosis to about the junction of the fourth and fifth lumbar vertebrae, and unites with its fellow to form the inferior vena cava. [L.]—**Common jugular v.** 1. The portion of the internal jugular v. below the entrance of the common facial v. 2. Of the older authors, the innominate v. 3. The internal jugular v. [L.]—**Common pudic v.** Ger., *gemeinschaftliche Schambloodader*. See *Internal pudic v.*—**Common ulnar cutaneous v.** A v. formed by the union of the anterior and posterior ulnar cutaneous v's, which joins the median basilic v. at the bend of the elbow. [L, 142.]—**Common vitelline v.** See *MESENTERICUS*.—**Condylar emissary v.** See *EMISSARIUM occipitale inferius*.—**Coronary v.** See *Large coronary v.*—**Coronary v. of the placenta**. Lat., *vena coronaria placentæ*. Ger., *grosses Randgefäss*. A v. which courses along the border of the placenta for more or less of its extent, gathers its blood from radicles in the substance of the placenta, and returns it to the maternal organism by channels leading to the v's of the uterus. [A, 61.]—**Coronary v. of the stomach**. Lat., *vena coronaria ventriculi*. Ger., *obere Magenblutader*. A v. which runs parallel to the coronary artery and empties into the portal v. [L.]—**Costal v.** A v. proceeding from the midrib of a leaf. [A, 35.]—**Crural v.** See *Femoral v.*—**Cystic v.** See *VENA cystica*.—**Deep auricular v's**. V's which return the blood from a portion of the auricle and empty into the

THE SUPERFICIAL VEINS OF THE HEAD, FACE, AND NECK.

1, the frontal vein; 2, the supra-orbital vein; 3, 3', the nasal vein; 4, the transverse vein of the face; 5, the facial vein; 6, the anterior terminal branch of the temporal vein; 7, the internal jugular vein; 8, the anterior jugular vein; 9, 14, the external jugular vein; 10, the subclavian vein; 11, the middle temporal vein; 11', 12, the temporal vein; 13, the occipital vein.

temporal v. [F.]—**Deep cerebral v's.** See *V's of Galen.*—**Deep cervical v.** A branch of the vertebral v., close to its entrance into the innominate v., which returns the blood from the suboccipital region. [L, 142.]—**Deep circumflex iliac v.** A branch of the external iliac v. receiving the blood from the distribution of the deep circumflex iliac artery. [L.]—**Deep facial v.** Ger., *tiefe Gesichtsbhtader, vordere innere Kieferbhtader.* A v. receiving the blood from the pterygoid plexus and joining the facial v. below

SECTION THROUGH THE CRANIUM, SHOWING THE VEINS WHICH ENTER INTO THE FORMATION OF THE SINUSES.

the malar bone. [C.]—**Deep femoral v.** Lat., *vena femoralis profunda.* A branch of the femoral v. which returns the blood from the parts supplied by the deep femoral artery. [L, 332.]—**Deep median v.** A branch of the median cutaneous v. which communicates with the deep v's of the forearm. [L, 31, 142.]—**Deep palmar v's.** Branches of the brachial v's which follow the distribution of the deep palmar arch. [L.]—**Deep temporal v's.** Three or four v's coming from the temporal muscles to join the pterygoid plexus. [C.]—**Diaphragmatic v's.** See *Phrenic v's.*—**Digital v's.** Ger., *Fingerbhtader.* Small v's returning the blood from the parts supplied by the digital arteries. [L.]—**Dorsal costal v's.** See *Intercostal v's.*—**Dorsal spinal v's.** Lat., *venae spiniales dorsales.* V's returning the blood from the muscles and integument of the back, forming a plexus over the arches of the vertebrae and emptying into the posterior branches of the intercostal v's, or, as in the neck, into the vertebral v. [C.]—**Dorsal v. of the clitoris.** Lat., *vena dorsalis clitoridis.* A v. returning the blood from the clitoris and its vicinity and emptying into the pudendal plexus (2d def.). [L.]—**Dorsal v. of the penis.** Lat., *vena dorsalis penis.* A v. returning the blood from the glans penis and prepuce, the corpus spongiosum, the corpora cavernosa, and the overlying skin, and emptying into the prostatic plexus. [C.]—**Dorsal v's of the tongue.** V's which connect the plexus beneath the mucous membrane of the posterior third of the tongue with the internal jugular or common facial v. [C.]—**Dorsi-spinal v's.** V's lying on the exterior of the spinal column. [a, 34.]—**Efferent v's of the kidney.** The v's which emerge from the glomeruli of the kidney and form a network on the convoluted tubules. [L, 142.]—**Emissary mastoid v.** See *EMISSARIUM mastoideum.*—**Emissary v's.** See *EMISSARIA Santorini.*—**Emissary v. of Luschka.** See *EMISSARIUM condyloideum anterius.*—**Emissary v. of Rektorzik.** A v. or plexus of v's accompanying the internal carotid artery and connecting the internal jugular v. with the cavernous sinus. [C.]—**Emulgent v.** See *Renal v.*—**Epigastric v.** Ger., *Bauchdeckenbhtader.* See *Superficial epigastric v.*—**Ethmoidal v's.** Ger., *Siebbeinbhtader, Riechbeinvenen.* The anterior and posterior ethmoidal v's.—**External cervical v.** See *Anterior vertebral v.*—**External hæmorrhoidal v.** A v. following the distribution of the inferior hæmorrhoidal arteries and emptying into the hæmorrhoidal plexus. [L, 142, 332.]—**External iliac v.** Ger., *äussere Hüftbhtader.* The continuation of the femoral v. from Poupart's ligament to its junction with the internal iliac v. near the lumbosacral articulation. It receives the deep circumflex iliac and epigastric v's. [C.]—**External jugular v.** A v. formed by the union of the posterior auricular v. and the posterior part of the temporomaxillary v. and joined by the posterior external jugular, transverse cervical, and suprascapular v's. It descends from about the level of the angle of the inferior maxilla between the platysma and the fascia and empties into the subclavian v. by one or more trunks. [C; L.]—**External mammary v.** A branch of the axillary v. or subclavian v. accompanying the artery of the same name. [L.]—**External maxillary v.** See *Facial v.*—**External posterior spinal v's.** Ger., *äussere Rückenbhtader der Wirbelsäule.* See *Dorsal spinal v's.*—**External pudic v's.** V's returning the blood from the parts supplied by the inferior and superior external pudic arteries and emptying into the internal saphenous v. [C.]—**External saphenous v.** Lat., *saphena parva.* Ger., *äussere (oder kleine) Rosenader.* A v. formed by the confluence of v's on the dorsum of the foot, which passes along the outer border of the tendo Achillis and runs on the gastrocnemius, between the heads of which it passes ending in the popliteal v. [C; L.]—**External spermatic v.** A branch of the external iliac v. running from the inguinal canal. [L.]—**External thoracic v.** See *Est-*

ternal mammary v.—**Facial communicating v.** A short, nearly transverse v. uniting the facial and temporal v's near the angle of the jaw. [L.]—**Facial v.** Lat., *vena facialis.* Ger., *Gesichtsbhtader, äussere Kopfblutader.* A v. which receives the frontal, supra-orbital, angular, inferior palpebral, superior labial, deep facial, buccal, submental, submaxillary, and inferior palatine v's, and empties into the common facial v. [C.]—**Femoral v.** Lat., *vena femoralis.* Ger., *Schenkelbhtader.* The continuation upward of the popliteal v. above the opening in the adductor magnus to Poupart's ligament, where it terminates in the external iliac v. It lies at first on the outer side of the femoral artery, then behind it, and in the upper part of the thigh on the inner side of it, and is included with it in a common sheath. [L.]—**Fluid-v's.** Fr., *veines fluides.* Of Chauveau, the oscillatory movements of the blood-stream in the dilated portion of a vessel just beyond a point of constriction. [K, 35.]—**Frontal v.** Lat., *vena frontalis.* Ger., *Stirnblutader.* 1. A v. which returns the blood from the upper surface of the head and forehead, emptying into the facial v. [C.] 2. A branch of the supra-orbital v. from the diploe of the frontal bone. [L, 172.]—**Funicular v.** The umbilical v. [a, 18.]—**Gastric v's.** Lat., *venae gastricae (breves).* Branches of the splenic v. running from the left extremity of the stomach. [L.]—**Gastro-duodenal v.** A branch of the right gastro-epiploic v. running from the pancreas and duodenum. [L.]—**Gastro-epiploic v's.** The right and left gastro-epiploic v's. [L.]—**Gastro-splenic v.** See *Splenic v.*—**Gate v.** See *Portal v.*—**Gluteal v.** Lat., *vena glutea.* Fr., *veine fessière.* Ger., *Gesässvene.* A branch of the internal iliac v. following the ramifications of the gluteal artery. [C.]—**Great cardiac v.** See *Large coronary v.*—**Hæmorrhoidal v's.** The external, inferior, middle, and superior hæmorrhoidal v's.—**Hemi-azygous v.** See *Small azygous v.*—**Hepatic brachial v.** See *Right basilic v.*—**Hepatic v's.** Ger., *Lebervenen.* A number of v's, usually in three sets, which empty into the inferior vena cava, where it lies in its fissure. They arise in the substance of the liver as the interlobular v's. [L.]—**Hyaloid v.** A v. accompanying the hyaloid artery. [L.]—**Hypogastric v.** See *Internal iliac v.*—**Ileo-colic v.** See *VENA ileo-colica.*—**Iliac v's.** The common external and internal iliac v's. [a, 34.]—**Ilio-lumbar v's.** Lat., *venae ilio-lumbales.* V's from the posterior part of the abdominal wall, the muscles of the back, and the spinal canal, which empty into the common iliac v. [C.]—**Inferior cerebellar v's.** V's from the lower surface of the cerebellum which enter the inferior petrosal and the occipital sinuses. [C.]—**Inferior cerebral v.** A v. which receives the blood from the lower surface of the cerebrum and empties into one or another of the sinuses at the base of the skull. [L, 332.]—**Inferior dental v.** A v. which returns the blood from the parts supplied by the inferior dental artery into the pterygoid plexus. [L.]—**Inferior diaphragmatic v's.** See *Inferior phrenic v's.*—

THE VEINS ENTERING INTO THE FORMATION OF THE SINUSES AT THE BASE OF THE SKULL.
1, the ophthalmic vein.

Inferior hæmorrhoidal v. A v. which returns the blood from the parts supplied by the artery of like name and empties into the internal iliac v. [C.]—**Inferior labial v's.** Two or three v's which collect the blood in the lower lip and empty into the submental branch of the facial v. [C.]—**Inferior laryngeal v.** A branch of the inferior thyroid v. which receives the blood from

the lower part of the larynx. [L.]—**Inferior longitudinal v.** See *Inferior longitudinal sinus*.—**Inferior mesenteric v.** A branch of the portal or the splenic v. which returns the blood from the distribution of the inferior mesenteric artery. [L, 172, 332.]—**Inferior ophthalmic v.** Lat., *vena ophthalmica externa* (seu *facialis*, seu *inferior*). Ger., *untere Augenblutader*. A v. which begins at the lower margin of the orbit by an anastomosis with the facial v. and empties into the cavernous sinus or the ophthalmic v. [L, 31, 332.]—**Inferior palatine v.** See *Palatine v.* (1st def.).—**Inferior phrenic v's.** Branches of the inferior vena cava or of the suprarenal v. which follow the distribution of the inferior phrenic arteries. [L.]—**Inferior thyroid v's.** Ger., *untere Schilddrüsenvenen*. V's whose radicles form a plexus on the anterior surface of the larynx, returning the blood from the thyroid gland, the lower part of the larynx, the trachea, and the oesophagus, and emptying, one on each side, into the innominate v's. [L, 142, 332.]—**Intra-orbital v.** A branch of the inferior ophthalmic v. from the face just below the orbit. [L, 332.]—**Innominate v's.** Lat., *venae innominate*. Ger., *ungenannte Venen*. The large v's, one on each side, formed by the union of the subclavian and internal jugular v's behind the sterno-clavicular articulations. They unite on the right side a little below the cartilage of the first rib to form the superior vena cava. That of the right side is short and nearly vertical, and lies on the pleura and the upper part of the right lung; that of the left side runs obliquely downward from left to right, and rests on the arch of the aorta in front of the innominate carotid, and subclavian arteries. [L, 34, 142, 332.]—**Innominate v's of Veissens.** See *Anterior cardiac v's*.—**Intercostal v's.** Ger., *Zwischenrippenblutadern*. Branches of the large and small azygos v's and the superior intercostal v's which accompany the arteries of the same name. [L.]—**Interlobular v's.** Small v's running between the lobules of a gland. [L.]—**Interlobular v's of the kidney.** V's which accompany the interlobular arteries and convey the blood from the cortex of the kidney to the arches at the bases of the renal pyramids. [C.]—**Interlobular v's of the liver.** Lat., *venae interlobulares hepatis*, *venulae centrales lobulorum*. Small branches of the portal v. which run between and around the lobules of the liver. [C.]—**Intermediate v's.** See *Interlobular v's*.—**Internal auditory v's.** See *VENÆ AUDITIVÆ INTERNÆ*.—**Internal cerebral v.** A v. formed by the union of the choroid v. and the vena corporis striati, with its companion with the v. of Galen of its own side when there are two, but converging to form the v. of Galen when it is single. [L, 31, 332.]—**Internal hæmorrhoidal v.** See *Superior hæmorrhoidal v.*—**Internal iliac v.** Ger., *Beckenblutader*, *Unterbauchvene*. A short trunk which lies behind the internal iliac artery, receives the blood from the v's corresponding to the branches of that vessel, and unites near the margin of the pelvis with the external iliac v. to form the common iliac v. [L.]—**Internal jugular v.** Ger., *innere Drosselblutader*. 1. A large v. which is continuous above with the lateral sinus and joins below with the subclavian v. to form the innominate v. In its upper portion it lies to the outer side of and close to the internal carotid artery as far as the cornu of the hyoid bone, where it receives the common facial v. and descends upon the outer side of the common carotid artery. Its most important branches are the lingual, pharyngeal, occipital, laryngeal, and superior thyroid v's. [L, 31, 142, 332.] 2. See *Common jugular v.*—**Internal mammary v.** A branch of the innominate v. receiving small v's from the costal region. [L, 332.]—**Internal maxillary v.** A v. which returns the blood from the pterygoid plexus, and empties into the temporal v. [C.]—**Internal pudic v.** Lat., *vena pudenda communis* (seu *interna*). A v. emptying into the internal iliac v. or into the pudendal plexus, formed by the union of the internal v's from the perineum, scrotum, and anus. It accompanies the internal pudic artery. [L, 332.]—**Internal saphenous v.** Lat., *saphena*, *vena interna saphena* (seu *magna*). Fr., *saphène*. Ger., *grosse Rosenvene*. A v. which, beginning in a plexus upon the dorsal aspect of the foot, runs upward in front of the inner ankle and along the inner side of the leg to the internal condyle of the femur, behind which it passes to ascend upon the inner side of the thigh to the saphenous opening, through which it passes to empty into the femoral v. a little below Poupart's ligament. It receives a large number of cutaneous branches and communicates freely with the deeper v's of the thigh and leg. [L, 142, 172, 332.]—**Internal spermatic v.** Ger., *innere Samenblutader*. A v. (sometimes one of several) that returns the blood from the testicle. It forms a constituent of the spermatic cord, and empties on the right side into the inferior vena cava and on the left into the renal v. [L, 142, 332.]—**Interosseous v's.** See *VENÆ INTEROSSEÆ ANTI-Brachii*.—**Intralobular v's of the liver.** Branches of the interlobular v's which spring from the capillary plexus within the lobules of the liver. [L, 142, 172.]—**Ichiadic v., Ichiatic v.** See *Sciatic v.*—**Jugular v's.** Ger., *Drosselblutadern*. The anterior, external, and internal jugular v's. [L.]—**Jugulo-cephalic v.** An anomalous v. which passes over the clavicle, uniting the cephalic and external jugular v's. [L, 142.]—**Cabial v.** A branch of the facial v. from the region of the lip. [L, 142.]—**Lacrimal v's.** Ger., *Thränenvenen*. V's from the upper eyelid and lacrymal gland which accompany the lacrymal artery and empty into the palpebral and ophthalmic v's. [F.]—**Large azygos v.** Lat., *vena azygos major*. Ger., *grosse unpaarige Blutader*, *unpaare Vene*. A v. of the right side which arises opposite the first or second lumbar v. and by a branch from the anterior surface of the lumbar v's, the renal v's, or the inferior vena cava. It perforates the diaphragm in company with the aorta and ends in the superior vena cava close to the pericardium. It receives the nine or ten lower right intercostal v's, the small azygos v., the right bronchial v., and small v's from the thoracic cavity. [L, 31, 142, 172, 332.]—**Large coronary v. (of the heart).** Lat., *vena coronaria magna (cordis)*. Fr., *grande veine cardiaque*. Ger., *grosse Kranzblutader des Herzens*. A v. which arises upon the anterior surface of the apex of the heart, and ascends in the anterior interventricular groove to that between the left auricle and ventricle, along which

it runs to the posterior surface of the heart, where it terminates in the left end of the coronary sinus. [L, 31, 142, 332.]—**Large mesaraic v.** See *Superior mesenteric v.*—**Laryngeal v.** Lat., *vena laryngea (superior)*. Ger., *Luftröhrenkopfsvene*. A branch of the internal jugular v. or of one of its branches. It receives small vessels from the interior of the larynx which pierce the thyreo-hyoid membrane. [L, 142, 332.]—**Lateral sacral v's.** V's which receive the blood from the lateral sacral arteries and, with the middle sacral v's, form the anterior sacral plexus. [L, 142, 172.]—**Lateral vitelline v's.** Lat., *venae vitellinae laterales*. Those two of the vitelline v's which, arising laterally, accompany the trunks of the large arteries of the primitive embryonic circulation. On the left side this vessel unites with the posterior vitelline v. on the right side with the anterior, or if the latter is wanting, forms alone the trunk of the right omphalo-mesenteric v. [A, 8.]—**Left coronary v.** See *Large coronary v. of the heart*.—**Left gastro-epiploic v.** A v. from the great curvature of the stomach which empties into the splenic v. [C.]—**Left lower azygos v.** See *Small azygos v.*—**Left upper azygos v.** An inconstant v. which receives those of the intercostal v's below the superior intercostal v. of the left side that do not empty into the small azygos v. When it is absent its place is supplied by the left superior intercostal v. [L, 31, 142, 172.]—**Lieno-intestinal v.** See *Splenic v.*—**Lingual dorsal v's.** See *Dorsal v's of the tongue*.—**Lingual v.** Lat., *vena lingualis*. Ger., *Zungenvene*. A branch of the internal jugular v. which anastomoses freely with the v's of the vicinity and returns the blood from the tongue, the sublingual and submaxillary glands, and the floor of the mouth. [L, 31, 142, 332.]—**Longitudinal spinal v's.** The anterior and posterior longitudinal spinal v's. [L.]—**Long saphenous v.** See *Internal saphenous v.*—**Long thoracic v.** A branch of the axillary v. accompanying the branches of the external mammary artery. [C.]—**Lumbar v's.** Lat., *venae lumbales*. V's accompanying the

1, 1, the external jugular veins; 2, the right internal jugular vein; 3, 3, the internal jugular veins; 4, 4, the subclavian veins; 5, 5, the right innominate vein; 6, the left innominate vein; 7, the superior vena cava; 8, the left axillary vein; 9, the right cephalic vein; 10, the inferior vena cava.

lumbar arteries and emptying into the inferior vena cava. [L, 142, 332.]—**Lumbo-costal v.** See *Ascending lumbar v.*—**Marginal v. of the heart.** See *Middle cardiac v.*—**Masseteric v's.** Lat., *venae massetericae*. Ger., *Kaumuskelblutadern*. Branches of the facial v. from the masseter muscle. [L.]—**Mastoid emissary v.** See *EMISSARIUM MASTOIDEUM*.—**Maxillary v's.** Ger., *Kieferblutadern*. The external and internal maxillary v's.—**Median basilic v.** Lat., *vena basilica mediana*. The innermost of the two terminal branches of the median cutaneous v. It is given off at the bend of the elbow on the anterior surface of the arm, passes up in front of the brachial artery between the biceps brachii and the pronator radii teres, and joins the basilic v. [L, 172, 332.]—**Median cephalic v.** Lat., *vena cephalica mediana*. The outer and smaller of the two terminal branches of the median cutaneous v. It passes upward in the bend of the elbow between the supinator longus and the biceps brachii to join the cephalic v. [L, 172, 332.]—**Median cutaneous v.** A cutaneous branch of the median v. [L.]—**Median labial v.** See *Vena anguli oris*.—**Median v. (of the arm).** Lat., *vena mediana*. Ger., *Mittellarmblutader*. A short v. upon the anterior surface of the forearm which divides at the bend of the elbow into the median basilic v. and the median cephalic v. [L.] See also *Median cutaneous v.* and *Deep median v.*—**Median v. of the neck.** Lat., *vena colli mediana*. See *Anterior jugular v.*—**Mediastinal v's.** The anterior and posterior mediastinal v's. [L.]—**Medullary-spinal v's.** A venous plexus between the spinal arachnoid and pia. [L.]—**Meningeal v's.** V's accompanying the meningeal arteries. [L.]—**Meningo-rachidian v's.** V's situated in the interior of the spinal canal, between the vertebræ and the theca vertebralis. [A, 34.]—**Menstriferous v's of the uterus.** An old term

for certain v's of the uterus which were supposed to be the special source of the menstrual flow. [A. 42.]—**Mental v.** Lat., *vena mentalis*. A branch of the anterior jugular v. running from the chin. [L.]—**Mesenteric v's.** Ger., *Gekrösblutadern*. The inferior and superior mesenteric v's.—**Middle cardiac v.** Lat., *vena cordis media*. Ger., *mittlere Kranzblutader des Herzens*. The largest of the v's on the posterior surface of the heart. It lies in the groove between the ventricles, and empties into the right extremity of the coronary sinus. [L. 31, 142.]—**Middle cerebral v.** Lat., *vena cerebri media*. A v. accompanying the middle cerebral artery and emptying into the cavernous or sphenoparietal sinus (2d def.). [L. 31, 332.]—**Middle hemorrhoidal v's.** Small v's which connect the hemorrhoidal plexus with the internal iliac v. [L. 332.]—**Middle meningeal v.** A v. accompanying the middle meningeal artery, and emptying into the cavernous, sphenoparietal, or sphenosquamous sinus or the internal maxillary or pterygoid plexus. [L. 142, 332.]—**Middle sacral v.** Lat., *vena caudalis (seu sacralis media)*. A v. on the anterior surface of the sacrum, returning the blood from the middle sacral artery and emptying into the left common iliac v. or the inferior vena cava. [L. 142, 172.]—**Middle temporal v.** A v. which arises in the vicinity of the eyebrow, communicates with the supra-

diploe of the occipital bone, emptying into the occipital sinus or the occipital v. (1st def.). [L.]—**Oesophageal v's.** Lat., *vena esophagea*. Branches of the inferior thyroid v's running from the oesophagus. [L. 332.]—**Omphalo-mesenteric v's.** See *Vitelline v's*.—**Ophthalmic v.** Lat., *vena ophthalmica (cerebralis, seu interna, seu superior)*. Ger., *Gesichtsaugenvene*. A large v. which commences the frontal v. at the inner angle of the orbit, and passes out of the orbit through the inner extremity of the sphenoidal fissure to empty into the cavernous sinus. [F.]—**Orbital v's.** Ger., *Augenhöhlenblutadern*. Branches of the ophthalmic v. and the vena ophthalmica externa running from the tissues in the orbit. [L.]—**Ovarian v.** A v. following the same course as the ovarian artery and emptying into the vena cava or renal v. [L.]—**Palatine v.** Lat., *vena palatina (inferior (1st def.))*. Ger., *Gaumenblutader*. 1. A branch of the facial v., or of one of its branches, returning the blood from the vicinity of the tonsil and soft palate. 2. In the pl., small branches of the internal maxillary v. [L. 142, 332.]—**Pancreatico-duodenal v's.** Branches of the superior mesenteric v. running from the head of the pancreas and from the duodenum. [L. 7.]—**Pancreatic v.** A branch of the splenic v. running from the pancreas. [L.]—**Parietal emissary v.** See *EMISSARIUM parietale*.—**Parotid v's.** Small v's running from the parotid gland to the temporal v. [A. 34.]—**Parumbilical v.** Lat., *vena paraumbilicalis (seu peromphalica)*. 1. Of Hyrtl, a venous channel said to be formed in the adult by a reopening of the hepatic portion of the umbilical v. in cases of obstruction of the portal circulation. [A. 19.] 2. In the pl., branches of the portal v., or of a pervious umbilical v., which connect with the deep epigastric v. [L. 142, 332.]—**Pericardiac v's.** Ger., *Herzbeutelvenen*. Small branches of the azygos, internal mammary, and innominate v's running from the pericardium. [L. 332.]—**Peroneal v's.** See *VENA peronea (1st def.)*.—**Pharyngeal v's.** Lat., *vena pharyngea*. Ger., *Schlundkopfblutadern*. Branches of the internal jugular (occasionally of the superior thyroid or lingual) v's which form a plexus in the walls of the pharynx. [L. 142, 332.]—**Phrenic v's.** Lat., *vena phrenica*. Small branches of the inferior vena cava which accompany the phrenic arteries. [L. 142, 332.] Cf. *Superior phrenic v's* and *Inferior phrenic v's*.—**Plantar v's.** Lat., *vena plantares*. The deep v's of the sole of the foot. [L. 332.]—**Popliteal v.** Lat., *vena poplitea*. Ger., *Kniekehlblutader*. A v. formed by the union of the anterior and posterior tibial v's, near the lower border of the popliteus. It becomes continuous with the femoral v. above the opening in the adductor magnus. It lies in a plane posterior to the popliteal artery, at first on its inner side, then behind it, and finally on its outer side. It receives small branches in the popliteal space and also the external saphenous v. [L. 142, 332.]—**Portal v.** Lat., *vena portae (seu portarum)*. Ger., *Pfortader*. A v. from three to four inches long, formed by the union of the splenic and superior mesenteric v's, which conveys the blood from the chyliferous organs to the liver. It is situated behind the hepatic artery and bile duct, and is included within the layers of the lesser omentum. Close to the right end of the transverse fissure of the liver it divides into two branches which enter the substance of the liver (where it receives blood from the branches of the hepatic artery) and give off branches to form the vaginal plexus and the interlobular v's. [L. 31, 142, 172, 332.]—**Postcaval v.** In birds, the v. returning the blood from the trunk and lower extremities. [L. 332.]—**Posterior auricular v.** Ger., *hintere Ohrvene*. A branch of the temporal maxillary v. which receives the blood from the back part of the external ear and its vicinity. [L. 172, 332.]—**Posterior cardiac v's.** Lat., *vena cordis posteriores*. Three or four v's which run on the posterior surface of the ventricles and empty into the coronary sinus at its lower border. [C.]—**Posterior ciliary v's.** V's which collect the blood from the choroid, pass out through the sclera midway between the cornea and the optic nerve, and empty into the ophthalmic v. [C.]—**Posterior external jugular v.** of the neck. See *External jugular v.* and *Posterior external jugular v.* (1st def.).—**Posterior dental v.** A branch of the internal maxillary v. accompanying an artery of the same name. [L.]—**Posterior ethmoid v.** A branch of the ophthalmic v. accompanying an artery of the same name. [L.]—**Posterior external jugular v.** 1. A v. which collects blood from the occipital region and from the integument and superficial muscles of the back of the neck, and empties into the external jugular v. [C.] 2. See *External jugular v.*—**Posterior facial v.** See *Temporo-maxillary v.* and *Temporal v.*—**Posterior intercostal v's.** Lat., *vena intercostales posteriores*. Branches of the intercostal v's accompanying the posterior intercostal arteries. [L.]—**Posterior internal maxillary v.** See *Internal maxillary v.*—**Posterior longitudinal spinal v's.** Two v's in the spinal canal between the dura and the posterior wall. They anastomose freely with each other and empty into the occipital sinus. [C.]—**Posterior mediastinal v's.** Lat., *vena mediastinae posteriores*. Branches of the large azygos v. running from the posterior mediastinum. [L. 332.]—**Posterior saphenous v.** See *External saphenous v.*—**Posterior temporal v.** 1. The posterior branch of the temporal v. 2. A v. from the diploe of the parietal bone, emptying into the lateral sinus. [L.]—**Posterior tibial v's.** Two v's following the distribution of the posterior tibial artery and emptying into the popliteal v. [C.]—**Posterior ulnar (cutaneous) v.** A v. beginning on the back of the hand by a number of vessels which unite to form the vena salvatica, and running up on the posterior aspect of the ulnar border of the forearm to unite with the anterior ulnar cutaneous v. [C.]—**Posterior vertebral v.** 1. See *Deep cervical v.* 2. In the pl., of Rathke, two fetal v's, continuous with the upper portions of the cardinal v's, which receive the lumbar and intercostal twigs. [A. 5.]—**Posterior vitelline v.** Lat., *vena vitellina posterior*. Ger., *hintere (linke) Dotterveine*. A v. of the primitive embryonic circulation which arises posteriorly from the sinus terminalis and empties into the left cephalomesenteric v.—**Preaural v's.** In birds, the v's receiving the blood from the head and upper extremities. [L. 321.]—**Primary v.** Ger., *Hauptader*. One of the primary branches sent off from the mid-

1, the splenic vein; 2, the portal vein; 3, the superior mesenteric vein; 4, the inferior mesenteric vein.

orbital and frontal v's, receives the palpebral v's and branches from the temporals, and unites with the superficial temporal v. over the temporal portion of the zygomatic arch. [L. 142, 332.]—**Middle thyroid v.** Lat., *vena thyroidea lateralis (seu media)*. A branch of the lower portion of the internal jugular v. which returns the blood from the lower portion of the lateral lobe of the thyroid gland and receives twigs from the trachea and larynx. [L. 142, 172.]—**Nasal v.** The midrib of a leaf. [A. 35.]—**Nasal v's.** Lat., *vena nasales*. Unimportant branches of the angular v. running from the dorsal and lateral surfaces of the nose. [L. 142, 332.]—**Oblique v. of the heart.** Lat., *vena posterior atrii sinistri*. A small v., the relic of the left innominate v. of the fœtus, which runs on the back part of the left auricle of the heart to the coronary sinus. [L. 172.]—**Obturator v.** Lat., *vena obturatoria*. Fr., *veine obturatrice*. Ger., *Hüftlochvene*. A branch of the internal iliac v. which returns the blood from the distribution of the obturator artery. [L. 332.]—**Occipital emissary v.** [Hehle]. See *EMISSARIUM occipitale superius*.—**Occipital v.** Ger., *Hinterhauptvene*. 1. A branch of either the external or internal jugular v. which arises in a plexus in the occipital region. 2. A branch from the mid-

vein of a leaf. [a, 35].—**Primitive jugular v.** A v. of the foetus which receives the blood from the cranial cavity. The greater part of it afterward becomes the internal jugular v., but on the right side that portion of it situated below a communicating v. that runs to its fellow forms, together with the right duct of Cuvier, the *vena cava superior*. [A, 5].—**Pubic v.** Lat., *vena publica*. A v., sometimes doubled, which runs externally to the crural ring over the superior ramus of the os pubis to join the external iliac v. [L, 332.]

1, the left external jugular vein; 2, the left internal jugular vein; 3, the left anterior jugular vein; 4, the left innominate vein; 5, the left subclavian vein; 6, the superior vena cava; 7, the large azygos vein; 8, the small azygos vein; 9, the left inferior thyroid vein; 10, the left superior intercostal vein; 11, the inferior vena cava; 12, the right common iliac vein; 13, the right internal iliac vein; 14, the right external iliac vein; 15, the right femoral vein; 16, the right deep femoral vein; 17, the renal veins; 18, the internal spermatic vein.

—**Pudic v's.** Ger., *Schamblutadern*. The external and internal pudic v's.—**Pulmonary v's.** Lat., *venae pulmonales*. Ger., *Lungenvenen*. Four (occasionally five) v's which return the aerated blood from the lungs to the left auricle of the heart, into the posterior portion of which they open. The two of the right side lie behind the right pulmonary artery, the aorta, the right auricle, and the superior vena cava; those of the left side lie in front of the aorta. They arise in the substance of the lung, in the capillary network of the alveoli and smaller bronchial tubes, and form freely anastomosing vessels, which become larger as they approach the root of the lung, where they unite to form the main trunks. [L, 31, 142, 172, 332].—**Radial (cutaneous) v.** A v. which arises in a plexus on the posterior surfaces of the thumb and index finger and ascends upon the radial border of the forearm, where it unites with the median cephalic v. [L, 142, 172].—**Ranine v.** Lat., *vena ranina*. A branch of the internal jugular, facial, or lingual v., which arises at the apex of the tongue and runs superficially on its lower surface close to the frenum, in company with the ranine artery. [L, 142, 172, 332].—**Renal v.** Lat., *vena renalis*. Ger., *Nierenblutader, Nierenvene*. A short v. with a large lumen which returns the blood from the kidney into the inferior vena cava. That of the right side is the longer, and passes in front of the aorta. It receives branches from the suprarenal capsule and, on the left side, the internal spermatic v. [L, 142, 332].—**Right azygos v.** See *Large azygos v.*—**Right basilic v.** The basilic v. of the right arm.—**Right coronary v.** See *Small cardiac v.*—**Right gastro-epiploic v.** A branch of the superior mesenteric v. running from the right extremity of the stomach. [L, 332].—**Sacral v's.** Ger., *Kreuzbeinblutadern*. The lateral and middle sacral v's. [L].—**Saphenous v's.** The external and internal saphenous v's.—**Satellite v's.** See *VENÆ COMITANTES*.—**Sciatic v.** Lat., *vena ischiadica*. A v. which collects the blood from the parts supplied by the sciatic artery and empties into the internal iliac v. [C].—**Secondary v.** One of the branches of a primary v. [a, 35].—**Short gastric v's.** See *Gastric v's.*—**Short saphenous v.** See *External saphenous v.*—**Small azygos v.** Lat., *vena hemi azygos*. A v. which arises from one or two lumbar v's and the renal, suprarenal, or spermatic v. of the left side, and empties into the right azygos v. after crossing the vertebral column over the ninth dorsal

vertebra. It receives a varying number of the lower intercostal v's, also small v's from the thoracic cavity. [C; L].—**Small cardiac (or coronary) v.** Lat., *vena coronaria parva*. Ger., *kleine Kranzblutader des Herzens*. A v. which receives the blood from the posterior portion of the right auricle and ventricle of the heart, and empties into the right extremity of the coronary sinus. [L, 31, 142, 332].—**Smallest cardiac v's.** See *VENÆ cordis minime*.—**Small mesaraic v.** See *Inferior mesenteric v.*—**Spermatic v's.** Ger., *Samenvene*. The external and internal spermatic v's. [L].—**Spheno-palatine v.** Lat., *vena spheno-palatina*. A v. from the sphenoid bone and palate, emptying into the pterygoid plexus. [C].—**Spinal v's.** The venous plexuses placed upon and within the vertebral column. They include the dorsi-spinal v's, the meningo-rhachidian v's, the v's of the bodies of the vertebrae, and the medullary-spinal v's.—**Splenic v.** Lat., *vena lienalis*. Ger., *Milzblutader, Milzvene*. A large branch of the portal v. which returns the blood from the spleen, the pancreas, the duodenum, part of the rectum, the descending colon, and the larger part of the stomach and omentum; formed by the union of several vessels which emerge from the spleen. It runs beneath the pancreas in company with the splenic artery, and joins with the superior mesenteric v. in front of the vertebral column. It receives the gastric and left gastro-epiploic v's and a number of unnamed vessels from the intestines, etc. [L].—**Stellate v's.** See *VENÆ stellatæ*.—**Stylo-mastoid v.** A v. accompanying the stylo-mastoid artery and emptying into the posterior auricular v. [a, 34].—**Subclavian v.** Lat., *vena subclavia*. Ger., *Schlüsselbeinblutader, Unterschüsselbeinvene*. A large v., the continuation of the axillary v., extending from the upper margin of the serratus anticus major to the inner end of the clavicle, where it unites with the internal jugular v. to form the innominate v. It receives the anterior and external jugular and the vertebral v's. [L, 31, 142, 332].—**Subintestinal v.** In embryonic fishes, the homologue of the caudal v. and the ductus venosus. [L].—**Sublingual v.** See *Ranine v.*—**Sublobular v.** A venous trunk formed by the union of several of the intralobular v's of the liver and emptying into the hepatic v. or its branches. [L, 351].—**Submaxillary v's.** Branches of the facial v. running from the submaxillary gland. [L, 332].—**Submental v.** Ger., *Unterkinnblutader*. A branch of the facial v. (occasionally of the lingual or superior thyroid v.) which returns the blood from the submaxillary gland and the mylo-hyoideus. [L, 142, 332].—**Subscapular v.** Lat., *vena subscapularis*. A branch of the axillary v. accompanying the distribution of the subscapular artery. [L, 142, 332].—**Superficial circumflex iliac v.** A v. returning the blood of the artery of like name, and emptying into the internal

THE SUPERFICIAL VEINS OF THE DORSAL ASPECT OF THE FOREARM.

1, the radial cutaneous vein; 2, the posterior ulnar cutaneous vein.

THE VEINS OF THE PALMAR ASPECT OF THE ARM AND FOREARM.

1, the radial cutaneous vein; 2, the cephalic vein; 3, the anterior ulnar cutaneous vein; 4, the posterior ulnar cutaneous vein; 5, the basilic vein; 6, the median vein; 7, the median basilic vein; 8, the median cephalic vein.

saphenous v. [C].—**Superficial epigastric v's.** Branches of the internal saphenous v. running from the superficial epigastric region. [L].—**Superficial external pudic v.** A branch of the internal saphenous v. corresponding to the inferior external pudic artery. [L].—**Superficial interosseous v's.** See *VENÆ meta-*

carpea.—**Superficial temporal v.** A v. made up of the posterior auricular v's and their branches that extend over the lateral and superior aspects of the skull, anastomosing freely with the vessels of the vicinity, and converging near the posterior portion of the zygoma to unite with the middle temporal v. [L. 142, 332.]—**Superficial ulnar v's.** The anterior and posterior ulnar v's. [L.]—**Superior auricular v's.** Branches of the external jugular v's running from the cranial aspect of the auricle and the side of the head. [L.]—**Superior cerebellar v's.** Branches of the straight or transverse sinus or of the v. of Galen running from the upper surface of the cerebellum. [L. 142, 332.]—**Superior cerebral v's.** Ten or twelve v's lying mostly in the sulci of the upper part of the cerebrum and emptying into the superior and inferior longitudinal sinuses. They anastomose freely with each other and with the inferior cerebral v's. [C.]—**Superior epigastric v.** A branch of the internal mammary v. which accompanies the superior epigastric artery. [L. 332.]—**Superior gastric v.** Ger., *obere Magenblutader*. See *Coronary v. of the stomach*.—**Superior hemorrhoidal v.** A branch of the inferior mesenteric v. which returns the blood from the upper half of the rectum. [L. 332.]—**Superior intercostal v's.** Lat., *venae intercostales superiores*. V's which return the blood from the upper three or four intercostal spaces. That of the right side is the smaller, corresponds to the distribution of the superior intercostal artery, receives the blood from one, two, or three of the upper intercostal spaces, and empties into the right innominate v. or the large azygos v. That of the left side receives branches from the upper three or four intercostal spaces and the left branchial v., passes across the arch of the aorta, and empties into the left innominate v. [L. 142, 172, 332.]—**Superior labial v.** Ger., *obere Lippenblutader*. A branch of the facial v. which returns the blood from the upper lip. [L. 332.]—**Superior laryngeal v.** See *Laryngeal v.*—**Superior mesenteric v.** Ger., *grosse (oder obere) Gekrösblutader*. A large v. which by its union with the splenic v. forms the portal v. It lies on the right side of and a little in front of the superior mesenteric artery, accompanying its branches and returning the blood from the parts supplied by them. [L. 142, 332.]—**Superior ophthalmic v.** See *Ophthalmic v.*—**Superior palatine v.** See *Palatine v.*—**Superior palpebral v's.** Ger., *obere Augenlidblutadern*. Branches of the facial v. running from the upper eyelid. [L.]—**Superior phrenic v's.** Branches of the innominate v's running from the diaphragm. [L. 31.]—**Superior thoracic v.** A branch of the axillary v. which returns the blood from the parts supplied by the superior thoracic artery. [L. 142, 332.]—**Superior thyroid v.** A branch of the internal jugular v. which arises by branches in the thyroid gland which anastomose freely with the v's of the vicinity. [L. 142, 332.]—**Supra-orbital v.** Ger., *Oberaugenhöhlenvene*. A branch of the facial or frontal v. which lies beneath the occipito-frontalis, running in toward the eyebrow. It receives branches from the adjacent structures and anastomoses freely with the v's of the vicinity. [L. 142, 332.]—**Suprarenal v's.** Ger., *Nebennierenblutadern*. V's running from the suprarenal capsules. That of the right side empties into the vena cava, that of the left into the phrenic or renal v. of the same side. [L. 142, 332.]—**Suprascapular v.** Ger., *Oberschulterblutblutader*. A branch of the external jugular v., near its termination, which accompanies the suprascapular artery and its branches. [L. 142, 332.]—**Sural v's.** See *VENÆ gastrocnemicae*.—**Systemic v's.** Ger., *Körpervenen*. The v's which return the blood to the right auricle of the heart from all the tissues and organs except the lungs and chylipoietic organs. [L.]—**Temporal v.** Lat., *vena temporalis (communis)*. Ger., *Schläfenvene*. A v. formed by the union of the superficial and middle temporal v's and joining with the internal maxillary v. to form the temporo-maxillary v. [C.] See also *Anterior temporal v.*, *Posterior temporal v.*, and *Deep temporal v.*—**Temporo-maxillary v.** A v. formed by the union of the temporal and internal maxillary v's near the neck of the lower jaw. It divides near the angle of the jaw into two branches, one of which goes to the facial v., the other to the external jugular v. [L. 142, 332.]—**Thymic v's.** Branches of the right and left innominate v's (especially of the former) running from the thymus gland. [L. 332.]—**Thyroid v's.** The inferior, middle, and superior thyroid v's and the vena thyroidea ima.—**Tibial v's.** The anterior and posterior tibial v's. [L.]—**Transverse cervical v.**

Lat., *vena colli transversa*. A branch of the transverse cervico-scapular v. which receives blood from the deep lateral cervical muscles. [L. 332.]—**Transverse cervico-scapular v.** Lat., *vena transversa colli et scapulae*. A v. formed by the union of the transverse cervical and scapular v's. It lies beneath the trapezius and empties normally into the subclavian v., occasionally into the external jugular v. [L. 332.]—**Transverse facial v.** A branch of the temporal v. which accompanies the branches of the transverse facial artery. [L. 142, 332.]—**Transverse lumbar v's.** See *Lumbar v's*.—**Transverse scapular v.** Lat., *vena scapula transversa*. A branch of the transverse cervico-scapular v. which receives blood from the posterior and upper scapular regions. [L. 332.]—**Ulnar cutaneous v.** See *Anterior ulnar cutaneous v.*, *Posterior ulnar cutaneous v.*, and *Superficial ulnar v's*.—**Ulnar v.** A branch of the brachial v. accompanying the branches of the ulnar artery. [L.]—**Umbilical v's.** Lat., *venae umbilicales*. Ger., *Nabelvenen*. Two v's, a right and a left, made up of radicles arising in the chorionic villi of the placenta, and formed in the embryo at the time of the development of the allantoic circulation. Uniting to form a short trunk, they return the blood from the placenta into the meatus venosus. The right umbilical v. soon disappears; the left one, now termed the umbilical v., courses through the umbilical cord, enters the abdomen of the foetus, and proceeds to the lower border of the suspensory ligament of the liver, in the anterior part of the longitudinal fissure, where it divides into two branches, one of which goes to the portal v., while the other, the ductus venosus Arantii, empties into the ascending vena cava. [A. 23.]—**Uterine v's.** Ger., *Muttervenen*. Branches of the internal iliac v. which accompany the uterine arteries and form a plexus in the walls of the uterus. [L.]—**Utero-ovarian v.** See *Ovarian v.*—**Vaginal v's of the liver.** V's ramifying in Glisson's capsule, accompanying the vaginal branch of the hepatic artery. [A. 34.]—**Varicose v.** See *VARIX*.—**V's of Galen.** Two v's, one on each side, which are continuations of the internal cerebral v's. They run back in the folds of the velum interpositum, emerge through the transverse fissure of the cerebrum, and, after joining to form one trunk, empty into the straight sinus. Often they are replaced by a single vessel, then called the *v. of Galen*, which sometimes is separated by a longitudinal septum into two. [L. 31, 142, 172, 332.]—**V's of Santorini.** See *EMISSARIA Santorini*.—**V's of the corpus spongiosum.** V's carrying blood from the corpus spongiosum to the dorsal v. of the penis. [A. 34.]—**V's of the testis.** See *VENÆ testis*.—**V's of the corpus cavernosum.** A v. which returns the blood from the corpus cavernosum and empties into the internal pudic v. [C.]—**V's of the liver.** The right basilic v. [L. 104.]—**Ventricular v's.** See *V's of Galen*.—**Vertebral v.** Lat., *vena vertebralis interna (seu lateralis, seu superficialis)*. Ger., *Wirbelblutader, Halswirbelvene*. 1. A branch of the subclavian v., near its termination, which arises in the suboccipital region and accompanies the vertebral artery. [L. 32.] 2. In the pl., the vertebral v., anterior vertebral v., posterior vertebral v., and basivertebral v's. [L.]—**Visceral v's.** V's which return the blood from the viscera. [L.]—**Vitelline v's.** Lat., *vena vitellinae (seu omphalomesentericae)*. Ger., *Dottervenen*. Several venous trunks of the primitive embryonic circulation which carry the blood from the sinus terminalis to the meatus venosus. See *Anterior vitelline v.*, *MEATUS venosus*, *Lateral vitelline v's*, and *Posterior vitelline v.*

VEINE (Fr.), n. *Ve'n*. See *VEIN*.—**V. anastomotique cérébrale.** See *VENA communicans magna*.—**V. apoplectique.** A jugular v., especially the external jugular v. [L.]—**V. artériuse.** See *Pulmonary artery*.—**V. auriculaire.** See *auricular v.*—**V. Deep auricular vein.** See *cardiacque grande*. See *Large coronary vein of the heart*.—**V's cardiaques petites.** See *Anterior cardiac veins*.—**V. cave abdominale (ou ascendante).** See *Inferior vena cava*.—**V. cave descendante (ou thoracique).** See *Superior vena cava*.—**V. céphalique du bras.** See *Cephalic vein*.—**V. céphalique du ponce.** See *VENA cephalica pollicis*.—**V. céphalique interne.** See *Internal jugular vein*.—**V's céphaliques grandes (ou internes).** See *VEINS*.—**V. cubitale cutanée.** See *Ulnar cutaneous vein* and *basilic vein*.—**V. demi-azygos.** See *Small azygos vein*.—**V's des ailes du nez.** See *VENÆ laterales nasi*.—**V's des corps des vertèbres.** See *Basivertebral veins*.—**V's du dioplé.** See *VENÆ diploeticae*.—**V. fessière.** See *Gluteal vein*.—**V. grande lymphatique droite.** The right lymphatic duct. [L.]—**V. grande mésentérique.** See *Superior mesenteric vein*.—**V. honteuse.** A pudic vein.—**V. iliaque externe.** See *External iliac vein*.—**V. iliaque interne.** See *Internal iliac vein*.—**V. iliaque primitive.** See *Common iliac vein*.—**V. obturatrice.** See *Obturator vein*.—**V. porte.** See *Portal vein*.—**V's surrénales.** See *Suprarenal veins*.—**V. terminale.** See *SINUS terminalis*.

VEINED, adj. Vand. Fr., *veiné*. Ger., *geadert*. Provided with veins. [a. 35.]—**Digitate v.** See *PALMINERVED*.—**Feather-v.** See *PINNINERVED*.—**Fork-v.** Having the fibro-vascular bundles forking. [a. 35.]—**Hidden-v.** Having the veins, as of a leaf, buried in the parenchyma so that they are not visible. [a. 35.]—**Netted-v.** Of leaves, reticulate. [a. 35.]—**Palmetate v.** See *PALMINERVED*.—**Pinnately v.** See *PINNINERVED*.—**Radiately v.** See *PALMINERVED*.

VEINING, n. Van¹in². See *VENATION*.

VEINLESS, adj. Van¹le's. Without veins. [a. 35.]

VEINLET, n. Van¹le't. Lat., *venula*. Fr., *veinule*. Ger., *Aederchen*. A branch of a primary vein; of some botanists, a primary vein or branch of the midvein. [a. 35.]

VEINOSITÉ (Fr.), n. *Ve'n*-no-ze-ta. A variety of varicosity in which, according to Briquet, there is a simple development of little veins, which are very numerous, enlarged, and excessively branched, and have become very superficial, almost hyperdermic, so that they color the skin violet or bright red. It is most commonly seen on the lower limbs in women of middle age or older. [A. 15.]

VEINULET, n. Van'u^l-e²t. A branch of a veinlet (in either sense). [a, 35.]

VEINY, adj. Van'¹. See **VENOSE**.

VEITSTANZ (Ger.), n. Vits'ta²nts. See **CHOREA**.—**Englischer V.** See **CHOREA minor**.—**Grosser V.** See **CHOREA magna**.—**Kleiner V.** See **CHOREA minor**.

VELAMEN (Lat.), n. n. Ve²l(wa²)-a(a³)me²n. Gen., -am'¹inis. From *velare*, to cover. A covering; a veil; in the pl., *velamina*, the meninges of the brain. [I, 3 (K).]—**V. radicum**. A peculiar covering formed on epiphyllous roots by epidermal cells which have become filled with air after losing their succulent contents. [a, 35.]—**V. vulvae**. See **Pudendal APRON**.

VELAMENTOUS, adj. Ve²l-a²m-e²nt'u³s. Ger., *velamental*, *velamentös*. Resembling a veil or membrane. [a, 48.]

VELAMENTUM (Lat.), n. n. Ve²l(wa²)-a(a³)me²nt'u³m(u⁴m). From *velare*, to cover. A covering or investment. [G.]—**V. abdominale**. See **PARTOXISM**.—**Velamenta cerebri**, The cerebral dura, pia, and arachnoid. [L.]—**V. nativum**. The skin; the common integument. [G.]

VELAMINARIS (Lat.), adj. Ve²l(wa²)-a²m(a³m)-i²n-a(a³)ri²s. From *velamen*, a cover. Fr., *velaminaire*. Of the dehiscence of an anther, valvular. [a, 35.]

VELAR (Ger.), n. Va-la²r. Of the Fr. Cod., either the flowering plant or simply the leaves of *Sisymbrium officinale*. [a, 38.]

VELATE, adj. Vel'a²t. *Velatus* (from *velare*, to cover). Fr., *voilé*. Ger., *beschleiert*, *verschleiert*. Veiled, partly concealed from view (said of *Fungi* with a veil or of fruits with induvies). [a, 35.]

VELLARINE, n. Ve²l'a²r-en. Fr., v. Ger., *Vellarin*. An oily liquid obtained from *Hydrocotyle asiatica*. It has been recommended against leprosy. [B, 93, 108 (a, 14).]

VELLERON (Fr.), n. Ve²l-l'ro²n². A place in the department of Vaucluse, France, where there is a gaseous and alkaline spring. [L, 49 (a, 14).]

VELICATION, n. Ve²l-i²k-a'shu²n. Lat., *vellicatio* (from *vellicare*, to pluck). See **CARPOLOGY**.

VELLUS (Lat.), n. Ve²l(wa²)-lu²s(lu³s). Gen., *vel'leris*. The stipe of certain *Fungi*. [a, 35.]

VELOPORPHYRE, n. Ve²l-o-po²r'fir. A cylindrical apparatus used for mixing fatty bodies intimately by means of a solid ball which rolls inside. [Proc. of the Am. Pharm. Assoc., xxxiv, p. 307 (a, 50).]

VELOSYNTHESIS (Lat.), n. f. Vel(wa²)-o(a³)si²n(su²n)'the²s-²i²s. Gen., -thes'eos (-synth'esis). From *velum*, a veil, and *σύνθεσις*, a putting together. Of Syme, staphylocephaly. [a, 34.]

VELU (Fr.), adj. V-lu². See **VILLOUS**.

VELUM (Lat.), n. n. Vel(wa²)-u³m(u⁴m). Fr., *voile*. Ger., *Schleier*. A veil or curtain; a membrane or other thin structure serving as a covering or partition; in the brain, the posterior medullary v. [A, 312 (a, 17); I, 17 (K).]—**Anterior medullary v.** See **VALVE of Vieussens**.—**Inferior medullary v.** See **Posterior medullary v.** Ger., *hintere Markseigel*. A lamina of gray nervous substance which stretches across the fourth ventricle from the sides of the uvula to the amygdalæ. [I, 1 (K).]—**Superior medullary v.** See **VALVE of Vieussens**.—**V. apophysis vermiciformi obtentum**. See **VALVE of Vieussens**.—**V. cerebelli (posterius)**. See **Posterior medullary v.**—**V. cerebri vasculosum**. See **V. chorioides** (Vicq d'Azyr) (*interpositum*). See **V. interpositum**.—**V. confine**. A close irregular plexus formed by the spongiblasts at the junction of the gray with the white matter. [a, 34.]—**V. flocculi**. See **INTERJECTUM cerebelli**. See **Posterior medullary v.**—**V. interpositum**. Fr., *toile vasculaire*. Ger., *obere Gefäßplatte*, *Gefäßvorhang*. A fold of pia situated just beneath the fornix, which extends over the third ventricle and the optic thalami. Its borders are vascular fringes which constitute the choroid plexuses of the lateral ventricles. [I, 15 (K).]—**V. medullare anterius**. See **VALVE of Vieussens**.—**V. medullare cerebelli**. See **VALVE of Vieussens**.—**V. medullare posterius** (see **interpositum**). See **Posterior medullary v.**—**V. medullare superius**. See **VALVE of Vieussens**.—**V. palati**. See **V. palatinum**. Fr., *voile du palais*. Ger., *Ganmensegel*. The incomplete partition between the mouth and the pharynx which is suspended from the posterior margin of the hard palate. Its anterior and posterior surfaces are covered with mucous membrane continuous respectively with that which covers the hard palate and that lining the pharynx and the nasal passages. In the middle, vine it is prolonged into the uvula, and is made up of muscular fibres, acinous glands, and areolar tissue. [L.]—**V. parziale**. The veil extending from the stipe to the margin of the plicus in the *Hymenomyces*. [a, 35.]—**V. processibus cerebello ad testes interjectum**. See **VALVE of Vieussens**.—**V. pendulum palati**. See **V. palati**.—**V. pupille**. See **MEMBRANA pupillaris**.—**V. Tarini**. See **Posterior medullary v.**—**V. terminale**. See **TENIA semicircularis**.—**V. triangulare**. See **TENIA chorioidica superior**.—**V. vesicae urinariae**. See **TRIGONE of the bladder**.—**V. Vieussenii**. See **VALVE of Vieussens**.

VELUMEN (Lat.), n. n. Ve²l(wa²)-u³(u⁴)me²n. Gen., -um'¹inis. From *vellere*, to pluck. Fr., *velours*. The velvety covering formed over some leaves by hairs! [a, 35.]

VELUTINOUS, adj. Ve²l-u²t'i²n-u²s. Lat., *velutinus*. Fr., *velouté*. Ger., *samtartig*, *samtig*. Velvety, covered with a short silky pubescence. [a, 35.]

VELVET-LEAF, n. Ve²l'v-e²t-lef. The *Cissampelos pareira*, *Abutilon Avicennæ*, and *Anthema arborea*. [a, 35.]

VELVOTE (Fr.), **VELVOTTE** (Fr.), n's. Ve²l-vot. The *Linaria latine* and *Linaria spuria*. [a, 35.]

VENA (Lat.), n. f. Ven(wan)²a². 1. See **VEIN**. 2. Of the ancients, either a vein or an artery. [H, 12.]—**Ascending v. cava**. See **Inferior v. cava**.—**Descending v. cava**. See **Superior v. cava**.—**Inferior v. cava**. Ger., *untere Hohlader*. A large vein which collects the blood from the lower limbs and the abdomen. It starts from the junction of the common iliac veins and ends in the right auricle of the heart. [C.]—**Superior v. cava**. A large vein which carries the blood from the head and neck, the upper limbs, and the walls of the thorax to the heart. It originates in the union of the right and left innominate veins. [C.]—**Venæ absorbentes**. The lymphatics. [L.]—**Venæ adiposæ**. See **ADIPPOSE VEINS**.—**Venæ adheventes**. See **TENIA hepaticæ adheventes**.—**Venæ adheventes capsulares**. See **Capsular veins** (2d def.).—**Venæ alares (narium)**. See **Venæ laterales nasi**.—**Venæ albae**. The lymphatics. [L.]—**V. anastomotica magna** (*cavii cranii*, seu *cerebri*). See **V. communicans magna**.—**V. angularis**. See **Angular VEIN**.—**V. anguli oris**. A branch of the facial vein leading from the angle of the mouth. [L, 332.]—**V. anonyma** (*brachiocephalica*). See **INOMINATE VEIN**.—**V. anonyma iliaca**. See **Common iliac VEIN**.—**V. anterior cerebri**. See **Inferior cerebral VEIN**.—**V. aqueductus cochleæ**. One of the venæ auditivæ internæ running from the aqueduct of the cochlea. [L.]—**V. arteriarum nutrit.** See **FORAMEN of Botallo**.—**V. arteriosa**. Of Harvey, the pulmonary artery. [H.]—**Venæ articulares genu**. Branches of the popliteal vein running from the knee joint. [L.]—**V. articularis genu communis**. See **V. poplitea collateralis**.—**V. ascendens**. See **Inferior v. cava**.—**Venæ ascendentes columnæ vertebralis**. The anterior and posterior longitudinal spinal veins. [L.]—**Venæ atrabiliaria**. See **Suprarenal VEINS**.—**V. auditiva**. A branch of the inferior petrosal sinus that returns the blood from the distribution of the auditory artery. [L.]—**Venæ auditivæ internæ**. Branches of the superior petrosal and transverse sinuses which receive blood from the ear. [L.]—**V. auricularis anterior**. See **Anterior auricular VEIN**.—**V. auricularis posterior**. See **Posterior auricular VEIN**.—**V. axillaris**. See **Axillary VEIN**.—**V. azygos**. See **Large azygos VEIN**.—**V. azygos accessoria**. See **Left upper azygos VEIN**.—**V. azygos cerebelli posterior**. One of the inferior cerebellar veins that returns the blood from the vermis posterior. [L, 332.]—**V. azygos eorum**. A branch of the vein of Galen running to the conarium. [L, 332.]—**V. azygos lumbaris**. See **Ascending lumbar VEIN**.—**V. azygos magna** (seu *major*). See **Large azygos VEIN**.—**V. azygos minor** (seu *parva*, seu *sinistra*). See **Small azygos VEIN**.—**V. basilaris (cerebri)**. See **Basilar VEIN** and **Inferior cerebral VEIN**.—**V. basilaris Rosenthalii (ascendens)**. See **Inferior cerebral VEIN**.—**V. basillia**. See **Basilic VEIN**.—**V. basillia mediana**. See **Median basilic VEIN**.—**Venæ basili venosæ**. See **Basili venæ**.—**Brachial VEINS**.—**Venæ bronchiales anteriores**. Branches of the innominate veins running from the bronchi. [L, 332.]—**Venæ bronchiales posteriores**. Branches of the superior intercostal veins running from the bronchi. [L, 332.]—**Venæ buccales**. See **Buccal VEINS**.—**Venæ bulbosæ** (seu *bulbo-urethrales*). Branches of the pudendal plexus running from the bulb of the urethra. [L.]—**Venæ calvæ**. Veins running from the heel to the posterior tibial veins. [L.]—**V. capitalis** (Bardeleben) (*brachii*). A fetal vein beginning on the dorsum of the hand and ascending the arm to the primitive jugular vein. [L.]—**V. venæ cardiæ**. See **Cardiac VEINS**.—**Venæ capsulares**. See **Suprarenal VEINS**.—**Venæ cardinales**. See **Cardinal VEINS**.—**V. carotidis externa**. See **Temporal VEIN**.—**V. caudalis**. See **Middle sacral VEIN**.—**V. cava abdominalis** (seu *ascendens*). See **Inferior v. cava**.—**V. cava descendens** (seu *inferior*, seu *thoracica*). See **Superior v. cava**.—**Venæ cavernosæ**. Branches of the pudendal plexus running from the corpora cavernosa of the penis. [L.]—**Venæ centrales** (*hepatis*). See **Intralobular VEINS of the liver**.—**V. centralis**. See **V. suprarenalis centralis**.—**V. centralis retine**. See **Central VEIN of the retina**.—**V. cephalica anterior**. See **Common facial VEIN**.—**V. cephalica (antibrachii et brachii)**. See **Cephalic VEIN**.—**V. cephalica communis**. See **Common jugular VEIN**.—**V. cephalica externa**. See **Common facial VEIN**.—**V. cephalica humeri**. See **Cephalic VEIN**.—**V. cephalica interna**. See **Internal jugular VEIN**.—**V. cephalica mediana**. See **Median cephalic VEIN**.—**V. cephalica pollicis**. A branch of the venous plexus upon the dorsum of the hand running between the metacarpal bones of the thumb and index finger. [L, 31, 332.]—**V. cephalica posterior**. See **Internal jugular VEIN**.—**V. cephalica radialis**. See **Cephalic VEIN**.—**Venæ cerebelli inferiores**. See **Inferior cerebellar VEINS**.—**Venæ cerebelli superiores laterales**. The most external of the superior cerebellar veins. [L, 7.]—**Venæ cerebelli superiores mediae**. Those of the cerebellar veins that have a median situation. [L, 7.]—**Venæ cerebrales inferiores**. Branches of the cavernous, circular, or petrosal sinus from the lower surface of the cerebrium. [L, 332.]—**V. cerebrales laterales**. Veins from the lower lateral portions of the cerebrium emptying into the cavernous, circular, or petrosal sinus. [L.]—**V. cerebialis Galeni**. See **VEINS of Galen**.—**V. cerebialis interna**. See **Internal cerebral VEIN**.—**V. cerebialis magna**. See **V. magna Galeni**.—**V. cerebri anterior** (seu *ascendens*, seu *inferior*). See **Inferior cerebral VEIN**.—**V. cerebri interna communis**. See **Internal cerebral VEIN**.—**V. cerebri media**. See **V. cerebri magna**.—**V. cerebri profunda**. The choroid vein and the v. corporis striati. [L.]—**V. cerebri relata**. See **V. corporis striati**.—**Venæ cerebri superiores**. See **Superior cerebral VEINS**.—**V. cervicalis ascendens**. See **Anterior vertebral VEIN**.—**V. cervicalis profunda**. See **Deep cervical VEIN**.—**V. cervicalis superficialis**. See **Posterior external jugular VEIN** (1st def.).—**V. chorioides lateralis**. See **Choroid vein**.—**Venæ ciliares**. See **Ciliary VEINS**.—**Venæ ciliares anteriores**. See **Anterior ciliary VEINS**.—**Venæ ciliares posteriores**. See **Posterior ciliary VEINS**.

ores (see posticæ). See *Posterior ciliary veins*.—**V. circumflexa brachii posterior**. A branch of the axillary vein accompanying the posterior circumflex artery of the arm. [L.]—**Venæ circumflexæ femoris**. Branches of the v. profunda femoris accompanying the external and internal circumflex arteries of the thigh. [L. 332.]—**Venæ circumflexæ penis**. Branches of the dorsal vein of the penis running from the lateral portions of the organ. [L. 332.]—**V. circumflexa illi**. See *Circumflex iliac vein*.—**V. circumflexa illi profunda**. See *Deep circumflex iliac vein*.—**V. clitoridis dorsalis**. See *Dorsal vein of the clitoris*.—**V. colica dextra**. A branch of the superior mesenteric vein that returns the blood from the distribution of the right colic artery. [L.]—**V. colica sinistra**. A branch of the superior mesenteric vein that returns the blood from the distribution of the left colic artery. [L. 332.]—**V. colli cutanea anterior**. See *Anterior jugular vein*.—**V. colli cutanea posterior**. See *Posterior cutaneous vein of the neck*.—**V. colli mediana**. See *Anterior jugular vein*.—**V. colli superficialis inferior**. See *Arcus venosus juguli*.—**V. colli transversa**. See *Transverse cervical vein* and *Arcus venosus juguli*.—**V. comitans cruralis tertia**. An anomalous third crural vein. [L. 332.]—**V. comitans hypoglossi**. See *Emissarius condyloideum anterus*.—**Venæ comitantes**. Veins which accompany arteries in pairs, usually one on each side. [L.]—**Venæ comitantes crurales (seu femoris)**. The venæ comitantes of the femoral artery. [L.] Cf. *Femoral vein*.—**Venæ comitantes popliteæ**. The venæ comitantes of the popliteal artery. [L.] Cf. *Popliteal vein*.—**Venæ comites**. See *Venæ comitantes*.—**V. communicans cephalica pollicis**. A branch of the v. cephalica pollicis that joins the radial vein. [L.]—**V. communicans magna**. A vein connecting the middle cerebral vein and the superior petrosal sinus. [L.]—**V. communicans ulnaris**. A branch of the basilic vein which communicates with the arcus volaris carpi venosus profundus. [L. 332.]—**Venæ communicantes obturatorie**. Two veins into which the dorsal vein of the penis sometimes divides, that empty into the obturator veins. [L.]—**V. conarii**. See *V. azygos conarii*.—**V. condyloidea postica**. See *Emissarius condyloideum anterus*.—**V. conjugata**. See *Small azygos vein*.—**V. conjugata dextra**. See *Large azygos vein*.—**Venæ cordis anteriores**. See *Anterior cardiac veins*.—**V. cordis Galeni**. 1. See *Middle cardiac vein*. 2. In the pl. veins traversing the walls of the right ventricle, into which they empty. [L.]—**V. cordis magna**. See *Large coronary vein*.—**V. cordis media**. See *Middle cardiac vein*.—**Venæ cordis minime**. The smallest of the cardiac veins emptying into the cavities of the heart. [L. 31.]—**Venæ cordis posteriores**. See *Posterior cardiac veins*.—**Venæ cordis minores (seu parvæ)**. See *Anterior cardiac veins*.—**V. cornu** [Lenhossek]. Ger. *Hornveine*. A branch of the internal iliac vein from the apex of the pudendal plexus. [L. 31.]—**V. coronaria cordis dextra**. See *Small cardiac vein*.—**V. coronaria cordis dextra posterior**. See *Small cardiac vein*.—**V. coronaria cordis magna**. See *Large coronary vein of the heart*.—**V. coronaria cordis media (seu minor)**. See *Middle cardiac vein*.—**V. coronaria cordis parva**. The small cardiac vein; in the pl., the anterior cardiac veins. [L.]—**V. coronaria cordis posterior**. See *Middle cardiac vein*.—**V. coronaria cordis sinistra**. See *Large coronary vein of the heart*.—**Venæ coronaria cordis anteriores**. See *Anterior cardiac veins*.—**V. coronaria labii inferioris**. See *Inferior labial veins*.—**V. coronaria labii superioris**. See *Superior labial veins*.—**V. coronaria magna (cordis)**. See *Large coronary vein*.—**V. coronaria parva**. See *Small cardiac vein*.—**V. coronaria uteri**. A vein which with its fellow forms a circle around the os internum of the uterus. [L. 332.]—**V. coronaria ventriculi**. **V. coronaria ventriculi dextra**. See *Coronary vein of the stomach*.—**V. coronaria ventriculi inferior**. See *Right gastro-epiploic vein*.—**V. coronaria ventriculi superior**. See *Coronary vein of the stomach*.—**Venæ corporis callosi anteriores inferiores**. Branches of the v. corporis striati running from the corpus callosum. [L.]—**Venæ corporis callosi posteriores inferiores**. Veins running from the posterior and superior part of the corpus callosum, and emptying into the cavernous or inferior longitudinal sinus. [L. 31.]—**V. corporis striati**. A vein which aids in forming the internal cerebral vein and returns the blood from the corpus striatum. [L. 332.]—**Venæ costales supremæ**. See *Superior intercostal veins*.—**V. cruralis**. See *Femoral vein*.—**V. cruralis poplitea**. See *Popliteal vein*.—**V. cruris**. 1. See *Femoral vein*. 2. See *Filaria mediensis*.—**V. cubitalis cutanea**. See *Ulnar cutaneous vein*.—**V. cubiti profunda**. A branch of the median vein running to the inner side of the forearm. [L. 37.]—**V. cutanea externa**. See *Cephalic vein*.—**V. cutanea cervicis magna**. See *Posterior external jugular vein*. (1st def.)—**V. cutanea colli anterior**. See *Anterior jugular vein*.—**V. cutanea colli inferior**. See *Common facial vein*.—**V. cutanea colli magna**. **V. cutanea colli posterior**. See *External jugular vein*.—**V. cutanea externa**. See *Cephalic vein*.—**Venæ cutaneæ femoris**. The external and internal saphenous veins and their superficial branches. [L.]—**V. cutanea frontis magna**. See *Frontal vein*.—**V. cutanea interna**. See *Ulnar cutaneous vein*.—**V. cutanea media**. See *Posterior external jugular vein*. (1st def.)—**V. cutanea mediana**. See *Median cutaneous vein*.—**V. cutanea radialis (brachii)**. See *Cephalic vein*.—**V. cutanea ulnaris (brachii)**. See *Basilic vein* and *Ulnar cutaneous vein*.—**V. cystica**. Fr. *veine cystique*. A branch of the portal vein running from the gall-bladder. [L.]—**V. dentalis inferior**. See *Inferior dental vein*.—**Venæ diaphragmaticæ inferiores**. See *Inferior phrenic veins*.—**Venæ diaphragmaticæ superiores**. See *Superior phrenic veins*.—**Venæ digitales**. See *Digital veins*.—**Venæ digitales pedis**. Ger. *Fusschenveinen*. Veins running from the toes. [L.]—**V. diploica diploetica (seu diploica)**. Small veins, reduced to their intima, found in the diploe of the flat cranial bones. They empty into the cranial sinuses, into the veins on the exterior of the skull, or into both. [L.]—**V. diploica frontalis**. A vein from the diploe of

the frontal bone which empties either into the superior longitudinal sinus or into the frontal vein. [L. 332.]—**V. diploica occipitalis**. Ger. *Hinterhauptknochenblutader*. A vein from the diploe of the tabular portion of the occipital bone which empties into the torcular Herophili, the transverse sinus, or one of the occipital veins. [L. 332.]—**V. diploica temporalis anterior**. A vein from the diploe of the temporal bone which empties into the sphenoparietal sinus or some vein over the temporal bone. [L. 332.]—**V. diploica temporalis posterior**. A vein from the diploe of the posterior portion of the temporal bone which empties into the superior longitudinal or the cavernous sinus or the deep auricular vein. [L. 332.]—**Venæ dorsales nasi**. Branches of the angular vein running from the dorsum of the nose. [L. 332.]—**Venæ dorsales penis**. Ger. *Fussrückenveinen*. Veins forming a plexus on the dorsum of the foot. [L.]—**Venæ dorsales penis subcutaneæ**. Small veins running from the prepuce and skin of the dorsum of the penis. [L. 332.]—**V. dorsalis clitoridis**. See *Dorsal vein of the clitoris*.—**V. dorsalis mediana**. See *Dorsal vein of the penis*.—**V. dorsalis pedis externa**. A superficial dorsal vein in the first metatarsal space. [L. 332.]—**V. dorsalis pedis interna**. A superficial dorsal vein in the fourth metatarsal space. [L. 332.]—**V. dorsalis penis (profunda)**. See *Dorsal vein of the penis*.—**Venæ dorsales spinales**. See *Dorsal spinal veins*.—**Venæ duodenales**. Branches of the superior mesenteric veins from the duodenum. [L.]—**Venæ dura matris**. See *Meningeal veins*.—**Venæ emissariae Santorini**. See *Emissaria Santorini*.—**V. emulgens**. See *Renal vein*.—**V. epigastrica superior**. See *Superior epigastric vein*.—**V. ethmoidalis anterior**. See *Anterior ethmoidal vein*.—**V. facialis (anterior)**. See *Facial vein*.—**V. facialis communis**. See *Common facial vein*.—**V. facialis cutanea communis**. See *Facial vein*.—**V. facialis externa**. See *Temporal vein*.—**V. facialis interna (seu magna)**. See *Facial vein*.—**V. facialis posterior**. See *Temporal vein*.—**V. faciei transversa**. See *Transverse facial vein*.—**V. falciformis**. See *Inferior longitudinal sinus*.—**V. femoralis**. See *Femoral vein*.—**V. femoralis profunda**. See *Deep femoral vein*.—**V. femoropoplitea**. A branch of the external saphenous vein in the popliteal space running from the posterior surface of the thigh. [L. 332.]—**V. fossæ Sylvii**. See *Middle cerebral vein*.—**V. frontalis**. See *Frontal vein*.—**V. Galeni**. See *Middle cardiac vein*.—**V. Galeni of Galen**. and *V. cordis Galeni*.—**V. gastrica dextra inferior**. See *Right gastro-epiploic vein*.—**Venæ gastricae (breves)**. See *Gastric veins*.—**V. gastrica sinistra inferior**. See *Left gastro-epiploic vein*.—**V. gastrica superior**. See *Coronary vein of the stomach*.—**Venæ gastrocnemicæ**. Branches of the popliteal vein running from the gastrocnemii. [L.]—**V. gastrocolica**. A venous stem sometimes formed by the union of the right gastro-epiploic vein and the v. colica dextra. [L.]—**V. gastero-epiploica**. See *Splenic vein*.—**V. glandularis**. See *Vas deferens*.—**Venæ glandulosæ**. See *Subcutaneous veins*.—**V. glutææ**. See *Gluteal vein*.—**V. grandis Galeni**. See *Veins of Galen*.—**Venæ hæmorrhoidales medise**. See *Middle hæmorrhoidal veins*.—**V. hæmorrhoidales externa**. See *External hæmorrhoidal vein*.—**V. hæmorrhoidales inferior**. See *Inferior hæmorrhoidal vein*.—**V. hæmorrhoidales interna (seu superior)**. See *Superior hæmorrhoidal vein*.—**V. hemi-azygos**. See *Small azygos vein*.—**V. hemi-azygos accessoria (superior)**. See *Left upper azygos vein*.—**V. hepatica brachii**. See *Right basilic vein*.—**Venæ hepaticæ**. See *Hepatic veins*.—**Venæ hepaticæ adheventes**. Two veins, a right and a left, branches of the umbilical vein, which become the right and left divisions of the portal vein. [A. 5.]—**Venæ hepaticæ intralobulares**. See *Intralobular veins of the liver*.—**Venæ hepaticæ revehentes**. Two veins in the foetus, a right and a left, which afterward become the hepatic veins. [A. 5.]—**V. hyaloidea**. See *Hyaloid vein*.—**V. hypogastrica**. See *Internal iliac vein*.—**V. ilio-colica**. A branch of the superior mesenteric vein running from the ileum and colon. [L. 332.]—**V. iliaca communis**. See *Common iliac vein*.—**V. iliaca externa**. See *External iliac vein*.—**V. iliaca interna**. See *Internal iliac vein*.—**V. iliaca primitiva**. See *Common iliac vein*.—**Venæ iliolumbales**. See *Ilio-lumbar veins*.—**V. ima impar**. See *V. thyroidea ima*.—**V. infra-orbitalis**. See *Infra-orbital vein*.—**Venæ inguinales**. Branches of the internal saphenous vein running from the groin. [L.]—**Venæ innominate**. See *Innominate veins*.—**Venæ intercavitales**. Trunks which receive the veins from the palmar aspect of the fingers. [L.]—**Venæ intercostales**. See *Intercostal veins*.—**Venæ intercostales anteriores**. See *Anterior intercostal veins*.—**Venæ intercostales supremæ**. See *Superior intercostal veins*.—**V. intercostalis suprema accessoria**. An anomalous vein accompanying the artery of like name. [L.]—**Venæ interlobulares hepatis**. See *Interlobular veins of the liver*.—**Venæ interlobulares renales**. See *Interlobular veins of the kidney*.—**Venæ interosseæ antibrachii**. Branches of the brachial veins which follow the distribution of the anterior and posterior interosseous arteries of the forearm. [L. 332.]—**Venæ interosseæ superficiales**. See *Venæ metacarpeæ*.—**V. intervertebralis postica (seu posterior)**. See *Middle cardiac vein*.—**V. ischiadica**. See *Sciatic vein*.—**V. jugularis anterior**. See *Anterior jugular vein*.—**V. jugularis anterior horizontalis**. See *Arcus venosus juguli*.—**V. jugularis cephalica (posterior)**. **V. jugularis cerebialis**. See *Internal jugular vein*. (1st def.)—**V. jugularis communis**. See *Common jugular vein*.—**V. jugularis externa**. See *External jugular vein*.—**V. jugularis externa posterior**. See *External jugular vein* and *Posterior external jugular vein*.—**V. jugularis interna**. See *Internal jugular vein*.—**V. jugularis primitiva**. See *Primitive jugular vein*.—**V. jugularis thoracica**. See *Innominate vein*.—**V. jugularis ulnaris anteriores**. Branches of the internal saphenous vein running from the labia pudendi. [L. 332.]—**Venæ labiales inferiores**. See *Inferior labial veins*.—**Venæ labiales posteriores**. Branches of the pudendal plexus running from the labia pudendi. [L.]—**V. labi-**

alis media. See *V. anguli oris*.—*V. labialis superior.* See *Superior labial vein*.—*Vena lacrimales.* See *Lacrymal veins*.—*Venae lacteae.* The lymphatics. [L.]—*V. laryngea inferior.* See *Inferior laryngeal vein*.—*Venae laterales nasi.* Ger. *Nasengefassenvenen*. Branches of the angular vein running from the lateral aspect of the nose. [L.]—*V. lienalis.* See *Splenic vein*.—*V. lienalis accessoria.* An anomalous branch of the portal vein accessory to the splenic vein. [L. 332.]—*V. lingualis.* See *Lingual vein*.—*Venae lumbales (transversae).* See *Lumbar veins*.—*V. lumbalis ascendens.* See *Ascending lumbar vein*.—*Venae lumbares.* See *Lumbar veins*.—*Venae lumbocostales communes.* Foral veins, one on each side, which unite to form the large azygos vein. [L. 332.]—*V. lumbocostalis.* See *Ascending lumbar vein*.—*Venae lymphaticae.* The lymphatics. [H. 13.]—*Venae musculares.* Veins accompanying the arteriae musculares inferiores et superiores. *V. magna.* Of Harvey, the vena cava. [H. 12.]—*V. magna Galeni.* 1. See *Veins of Galen*. 2. The common trunk formed by the union of the veins of Galen. [L.] Cf. *Internal cerebral vein*.—*V. magna longitudinalis anterior.* See *Anterior longitudinal spinal veins*.—*V. mammaria interna.* See *Internal mammary vein*.—*V. marginalis ventriculi sinistri.* See *Middle cardiac vein*.—*Venae masetericae.* See *Masseteric vein*.—*V. maxillaris anterior.* See *Maxillary vein*.—*V. maxillaris externa.* See *Facial vein*.—*V. maxillaris interna.* See *Internal maxillary vein*.—*V. media cordis.* See *Middle cardiac vein*.—*V. mediana.* See *Median vein* and *Filaria medienensis*.—*V. mediana antibrachii.* See *Median vein*.—*V. mediana basilica.* See *Median basilic vein*.—*V. mediana brachii.* See *Median cutaneous vein* and *Deep median vein*.—*V. mediana carotidis.* See *Carotid vein*.—*V. mediana colli.* See *Anterior jugular vein*.—*V. mediana communis (seu cutanea).* See *Median cutaneous vein*.—*V. mediana medullae spinalis anterior.* A vein (or veins) of small size in the anterior median longitudinal fissure of the spinal cord. [L. 332.]—*V. mediana medullae spinalis posterior.* See *Venae spinales propriae laterales*.—*Venae mediastinae (seu mediastinales anteriores).* See *Anterior mediastinal veins*.—*Venae mediastinales posteriores.* See *Posterior mediastinal veins*.—*Venae meningeae.* See *Meningeal veins*.—*V. meningea media.* See *Middle meningeal vein*.—*V. mentalis.* See *Mental vein*.—*V. mesenterica inferior.* See *Inferior mesenteric vein*.—*V. mesenterica magna (seu major).* See *Superior mesenteric vein*.—*V. mesenterica minor (seu parva).* See *Inferior mesenteric vein*.—*V. mesenterica superior.* See *Superior mesenteric vein*.—*V. metacarpea ulnaris.* Small veins of the dorsum of the hand in the intermetacarpal spaces. [L.]—*V. metacarpea ulnaris.* A cutaneous vein in the fourth metacarpal space. [L. 332.]—*Venae musculares.* Venous twigs running from muscles. [L.]—*Venae musculares oculi.* Branches of the ophthalmic vein running from the extrinsic muscles of the eye. [L. 332.]—*Venae nasales.* See *Nasal veins*.—*Venae nasales dorsales.* See *Venae dorsales nasi*.—*Venae nasales laterales (alares).* See *Venae laterales nasi*.—*V. nasal posterior.* See *Sphenopalatine vein*.—*V. nervi hypoglossi.* See *EMISSARIUM condyloideum anterius*.—*Venae nutritiae.* Ger. *Ernährungsvenen*, *Knochenvenen*. Veins accompanying the nutrient arteries of bones. [L.]—*V. obliqua atri posterior (seu sinistra).* *V. obliqua auricularis.* See *Oblique vein of the heart*.—*V. obturatoria.* See *Obturator vein*.—*Venae ophthalmicae posteriores.* The posterior ophthalmic vein, running from the occipital region. [L.]—*V. ophthalmica posterior.* See *Occipital vein*.—*Venae oesophagae.* See *Oesophageal veins*.—*Venae omphalomesentericae.* See *Vitelline veins*.—*V. ophthalmica (cerebralis).* See *Ophthalmic vein*.—*V. ophthalmica externa (seu facialis, seu inferior).* See *Inferior ophthalmic vein*.—*V. ophthalmica interna (seu superior).* See *Ophthalmic vein*.—*V. ophthalmica profunda.* See *Either of the sphenoparietal sinus or the ophthalmic vein running from the fissure of Sylvius*. [L.]—*V. palatina (inferior).* See *Palatine vein (ist def.)*.—*Venae palpebrales superiores.* See *Superior palpebral veins*.—*V. pancreatica.* See *Pancreatic vein*.—*Venae pancreatoduodenales.* See *Pancreatoduodenal veins*.—*V. para-umbilicalis (Hyrul).* *V. paramphalica (Schiff).* See *Paraumbilical vein (ist def.)*.—*V. penis dorsalis.* See *Dorsal vein of the penis*.—*Venae pericardiacae.* See *Pericardiac veins*.—*Venae perinaei.* Ger. *Mittelfleischvenen*, *Dammvenen*. Veins accompanying the arteries of the perinaeum. [L.]—*V. peronea.* 1. A branch of the posterior tibial vein accompanying the distribution of the peroneal artery. [L.] 2. In the pl., see *Peroneal veins*.—*V. petrosa inferior.* A small vein which enters the skull through the jugular foramen and empties into the inferior petrosal sinus. [L.]—*V. pharyngea.* See *Pharyngeal veins*.—*V. phrenica.* See *Phrenic veins*.—*Venae phrenicae inferiores.* See *Inferior phrenic veins*.—*Venae phrenicae superiores.* See *Superior phrenic veins*.—*Venae plantares.* See *Plantar veins*.—*V. poplitea.* See *Popliteal vein*.—*V. poplitea anterior.* See *Anterior tibial vein*.—*V. poplitea collateralis.* An anomalous branch of the femoral vein running from the knee joint. [L. 332.]—*V. porta.* *V. portae.* *V. portarum.* See *Portal vein*.—*V. posterior vetriculi sinistri.* See *Oblique vein of the heart*.—*V. posterior ventriculi sinistri.* A vein on the posterior surface of the left ventricle of the heart opening usually into the coronary sinus, occasionally into the large coronary vein of the heart. [L. 31.]—*V. preparata.* See *Frontal vein*.—*Venae profundae brachii concomitantes.* See *Brachial veins*.—*Venae profundae brachii (propriae).* Branches of the axillary vein which accompany the inferior and superior profunda arteries of the arm. [L. 332.]—*Venae profundae clitoridis.* Branches of the pudendal plexus running from the clitoris. [L. 332.]—*Venae profundae crurales et femorales.* The veins that return the blood from the deep structures of the leg and thigh. [L. 332.]—*V. profunda linguae.* See *Ranine vein*.—*V. profunda penis.* A branch of the pudendal plexus running from the deep

portions of the penis. [L. 332.]—*Venae pterygoideae.* Branches of the internal maxillary plexus running from the pterygoid muscles. [L. 332.]—*V. publica.* See *Pubic vein*.—*V. pudenda communis.* See *Internal pudic vein*.—*Venae pudendae externae profundae.* Branches of the femoral vein running from the symphysis pubis and its vicinity. [L. 332.]—*V. pudenda interna.* See *Internal pudic vein*.—*V. pudendo-glutea (Lenhoussek).* A branch of the internal iliac vein connected with the pudendal plexus and receiving the gluteal and sciatic veins. [L. 332.]—*Venae pulmonales.* See *Pulmonary veins*.—*V. pulmonalis dextra inferior.* A vein running from the lower lobe of the right lung to the right pulmonary vein. [L. 332.]—*V. pulmonalis dextra media.* An occasional vein running from the middle lobe of the right lung to the right pulmonary artery. [L. 332.]—*V. pulmonalis dextra superior.* A vein running from the middle and upper lobes (occasionally from the latter alone) to the right pulmonary vein. [L. 332.]—*V. pulmonalis sinistra inferior.* The lower of the two vessels which unite to form the left pulmonary vein. [L. 332.]—*V. pulmonalis sinistra superior.* The upper of the two vessels which form the left pulmonary vein. [L. 332.]—*V. pylorica.* A branch of the portal vein, or of one of its branches, that returns the blood from the pylorus. [L.]—*V. radialis cephalica (seu cutanea).* See *Radial cutaneous vein*.—*V. ranina.* See *Ranine vein*.—*Venae rectae.* The vasa recta of the kidney. [L.]—*V. reflexa.* See *V. corporis striati*.—*V. renalis.* See *Renal vein*.—*V. renalis adhevens.* In the *Amphibia*, a renal vein whose contents pass through the liver. [L.]—*V. retina centralis.* See *Central vein of the retina*.—*Venae revehentes.* See *Venae hepaticae revehentes*.—*V. Rosenthalii.* See *Inferior cerebral vein*.—*V. sacral lateralis.* Ger. *Thalvenvein*. A branch of the ophthalmic vein running from the lacrymal sac. [L.]—*Venae sacrales laterales.* See *Lateral sacral veins*.—*V. sacralis media.* See *Middle sacral vein*.—*V. septi lucidi.* Of Schwabe, a vein which enters the anterior extremity of the septum lucidum and runs backward along its lower edge to anastomose with the *V. corporis striati*. [I. 17 (K.).]—*V. salutis.* *V. salvatella.* See *V. salutis*.—*V. saphena interna.* See *Saphenous vein*.—*V. saphena externa.* See *External saphenous vein*.—*V. saphena interna (seu magna).* See *Internal saphenous vein*.—*V. saphena minor (seu parva, seu posterior).* See *External saphenous vein*.—*Venae satellites arteriarum.* See *Venae comitantes*.—*V. scapulae transversae.* See *Transverse scapular vein*.—*Venae scrotales anteriores.* Branches of the internal saphenous vein running from the anterior portion of the scrotum. [L. 332.]—*Venae scrotales posteriores.* Branches of the internal iliac vein running from the posterior portion of the scrotum. [L. 332.]—*V. semino-urethro-sacralis.* A branch of the internal iliac vein connected with the pudendal plexus. It receives veins from the seminal vesicles and one emerging from the second anterior sacral foramen. [L. 332.]—*V. sine comite (seu sine pare).* See *Large azygos vein*.—*V. spermatica interna.* See *Internal spermatic vein*.—*V. spermatica externa.* See *Sphenopalatine vein*.—*Venae spinales externae posteriores.* See *Dorsal spinal veins*.—*Venae spinales internae anteriores.* See *Anterior longitudinal spinal veins*.—*Venae spinales internae posteriores.* See *Posterior longitudinal spinal veins*.—*Venae spinales longitudinales anteriores.* See *Anterior longitudinal spinal veins*.—*Venae spinales longitudinales posteriores.* See *Posterior longitudinal spinal veins*.—*Venae spinales propriae.* The veins running from the substance of the spinal cord and anastomosing with the veins within the spinal canal and above with the inferior cerebellar veins of the inferior petrosal sinuses. [L.]—*Venae spinales propriae laterales (seu posteriores).* Small veins running along the postero-lateral surfaces of the spinal cord. [L. 332.]—*V. spinalis mediana posterior.* A vein running along the middle of the posterior aspect of the spinal cord. [L.]—*V. spinalis posterior.* See *Posterior spinal vein*.—*V. mediana anterior.* See *V. splenica.* See *Splenic vein*.—*V. splenica brachii.* See *Left basilic vein*.—*Venae stellatae.* Numerous small groups of venous radicles on the surface of the kidney, which converge, unite, penetrate the renal substance, and form the beginnings of the interlobular renal veins. [J. 24, 28, 30.]—*V. stylo mastoidea.* A branch of the temporal vein running from the mastoid region. [L.]—*V. subclavia.* See *Arillary vein*.—*V. subclavia.* See *Subclavian vein*.—*V. subcutanea colli (anterior).* See *Anterior jugular vein*.—*V. subcutanea colli posterior.* See *Posterior external jugular vein (ist def.)*.—*Venae subcutaneae brachii.* The basilic, cephalic, and median veins and their branches. [L. 332.]—*Venae subcutaneae femoris.* See *Venae cutaneae femoris*.—*V. subcutanea radialis.* See *Radial cutaneous vein*.—*V. sublingualis.* See *Ranine vein*.—*V. sublobularis.* See *Sublobular vein*.—*V. submaxillaris.* See *Submaxillary vein*.—*V. submentalis.* See *Submental vein*.—*V. subscapularis.* See *Subscapular vein*.—*Venae subventrales.* The internal mammary and the inferior and superior epigastric veins. [L. 332.]—*Venae subvertebrales laterales.* A collective name for the veins in front of and on each side of the vertebral column (i. e., the large, small, and left upper azygos, superior intercostal, external vertebral, internal jugular, ilio-lumbar, and the small and middle sacral veins). [L. 332.]—*V. subvertebrale media.* See *Inferior v. cava*.—*V. subcentralis.* A vein in the central fissure of the brain which empties into the superior longitudinal or transverse sinus. [L. 332.]—*Venae superficiales cruris et femoris.* See *Venae cutaneae femoris*.—*V. superficialis colli anterior.* See *Anterior jugular vein*.—*V. superficialis colli posterior.* See *ARCUS venosus juguli*.—*V. superficialis colli verticalis.* *V. superficialis mediana colli.* See *Anterior jugular vein*.—*V. superficialis supraorbitalis.* See *Supraorbital vein*.—*Venae supra renales.* See *Suprarenal veins*.—*V. suprarenalis centralis.* The largest of the suprarenal veins. [L. 332.]—*V. suprascapularis.* See *Suprascapular vein*.—*Venae surales profundae.* See *Venae gastrocnemiae*.—*V. temporalis anterior.* See *Anterior temporal vein*.—*V. temporalis communis.* See *Temporal vein*.—*V. temporalis media (seu pro-*

ment (literally a sail) of a valve of the heart. [L.]

VENTILATION, n. *Ve^{nt}-lⁱ-a'shuⁿ*. Lat., *ventilatio* (from *ventilare*, to fan). Fr., *v.* Ger., *V.* *Ventilierung*. The act or process of supplying fresh and pure air (e.g., to a chamber or to the lungs). [a, 48.]—**Lung v.** *Pulmonary v.*, *Pulmonie v.* The constant supply of pure air to the lungs and the removal of vitiated air by the processes of inspiration and expiration. [J.]—**Respiratory v.** The constant supply of a fluid rich in oxygen and comparatively poor in carbon dioxide to a respiratory membrane, and the constant removal of the fluid (air or water) after it has given up oxygen and received carbon dioxide in return. [J.]

VENTILATOR, n. *Ve^{nt}-lⁱ-at-o^r*. From *ventilare*, to fan. Fr., *ventilateur*. Ger., *V.* Any apparatus used for purposes of ventilation. [L.]

VENTNOK, n. *Ve^{nt}-n^o-r*. A sea-bathing resort on the south coast of the Isle of Wight, England. [L, 67 (a, 14).]

VENTOUSE (Fr.), n. *Vaⁿ-t^u-z*. See *CUP* (2d def.).—**V. de Junod**. See *BOOT*.—**V. utérine**. See *METROMYZEUS*.

VENTRAD, adv. *Ve^{nt}-r^a-d*. Toward the belly; in human anatomy, anterior to the vertebral column. [L, 343.]

VENTRAL, adj. *Ve^{nt}-rⁱ-l*. Lat., *ventralis* (from *venter*, the belly). 1. Pertaining to or to the portion of the body anterior to the vertebral column; the opposite of dorsal. [L, 343.] 2. In botany, pertaining to the anterior surface. [a, 35.]

VENTRALLY, adv. *Ve^{nt}-rⁱ-lⁱ*. Ventrad.

VENTRE (Fr.), n. *Vaⁿ-t^r*. The belly. See *VENTER*.—**Bas-v.** See the major list.—**V. avalé**. See *PENDULOUS ABDOMEN*.—**V. en bateau**. The boat-like appearance which results from retraction of the abdominal walls. [A. Fournier, "Union méd." June 10, 1884, p. 1021 (D).]—**V. en besace**, **V. en surplomb**. See *PENDULOUS ABDOMEN*.—**V. inférieur**. See *Bas-v.*—**V. réservé**. See *CONTINUATION*.

VENTRICLE, n. *Ve^{nt}-rⁱ-k^l*. Lat., *ventriculus* (dim. of *venter*, the belly). Fr., *ventricule*. Ger., *Ventrikel*, *Kammer*. A small thick-walled cavity in an organ, especially the heart or brain.—**Anterior v's.** See *LATERAL V'S.*—**Anterior v. of the heart.** See *RIGHT V. of the heart.*—**Aortic v.** See *LEFT V. of the heart.*—**Cerebellar v.** [Owen]. A prolongation of the fourth v. into the primary cephalic vesicle; described as strictly embryonic in man, but persistent in birds, fishes, and reptiles. [I, 14 (K).]—**Cerebral v.** A v. of the brain.—**Fifth v.** First v. [Wenzel]. Lat., *sinus quintus*. Ger., *Kammer der Scheidevand*. The space between the two laminae of the septum lucidum. [L.]—**Fourth v.** Lat., *ventriculus cerebri quartus*. Ger., *Kammer des kleinen Hirns*. A lozenge-shaped space bounded laterally above by the processus cerebelli ad testes and below by the posterior pyramids and the restiform bodies. Its floor is formed by the posterior surface of the pons Varolii and medulla oblongata, and its roof by the valve of Veissens and the inferior surface of the cerebellum (a layer of the pia being interposed). It connects above with the aqueduct of Sylvius, and below with the central canal of the spinal cord. [L, 31, 172, 332.]—**Large v's**, **Lateral v's (of the brain)**. Lat., *ventriculi cerebri laterales*. Ger., *Seitenventrikel des Gehirns*. Serous cavities, one on each side, in the cerebral hemispheres, lined with ciliated epithelium, and separated from each other in the middle line by the septum lucidum. They communicate with the anterior portion of the third v. and with each other by the foramen of Monro. Each is divided into a central triangular portion, the body, from which the anterior, middle, and posterior cornua descend into the substance of the hemisphere. The roof is formed by the lower surface of the corpus callosum and the substance of the cerebrum, and the floor by the corpus striatum, tenia semicircularis, optic chorioid, plexus chorioides, and the lamina fornicis, cornu Ammonis, eminentia collateralis, fasciculi dentata, and the substance of the cerebrum. [L, 142, 172, 332.]—**Lateral v. of the cerebellum**. A furrow on the floor of each half of the fourth v. near the lateral wall. [I, 35 (K).]—**Left v. of the heart**. Lat., *ventriculus cordis sinister*. Ger., *linker Ventrikel*. The cavity which occupies a small part of the left anterior portion of the heart and the larger part of its left posterior portion, and forms the apex. It communicates with the aorta and the left auricle. By the contractions of its walls it propels the arterial blood into the arterial system through the aorta. [L.]—**Middle v.** See *Third v.*—**Middle v. of the cerebellum**. The median fissure on the floor of the fourth v. [I, 35 (K).]—**Optic v's**. See *Lateral v's.*—**Pineal v.** Of Leuret and Graëtiolet, a small cavity in the centre of the pineal gland. [I, 35 (K).]—**Posterior v. of the heart.** See *Left v. of the heart.*—**Optic v.** [Owen]. The lateral v. in the brain of the embryo. [I, 14 (K).]—**Right v. of the heart**. Lat., *ventriculus cordis dexter*. Ger., *rechter Ventrikel*. The rounded triangular cavity of the heart which forms the greater part of its anterior and a small part of its posterior portion. It communicates with the right auricle, and propels the venous blood through the pulmonary arteries. [L.]—**Second v's**, **Superior v's**. See *Lateral v's.*—**Sylvian v.** See *Fifth v.*—**Terminal v.** See *Fourth v.*—**Third v.** *Mittelhirnshöhle*, *mittlere Kammer*. An open space between the optic thalami, bounded above by the lower surface of the velum interpositum, and laterally by the peduncles of the pineal gland. Its floor is formed by the lamina cinerea, tuber cinereum, infundibulum, corpora albicantia, and posterior perforated space. It communicates with the lateral v's through the foramen of Monro, and with the fourth v. through the aqueduct of Sylvius and with the cavity of the infundibulum. [L, 31, 149, 172.]—**Thin v. proper**. Ger., *Third v.* as distinguished from the foramen of Monro. ["Boston Med. and Surg. Jour." Aug. 12, 1880, p. 152 (K).]—**V. of Arantius**. 1. The small depression or cavity at the pointed extremity of the calamus scriptorius. [I, 17 (K).] 2. See *CALAMUS scriptorius*.—**V. of Morgagni**. See *V. of the larynx*.—**V. of the corpus callosum**. See *Fifth v.*—**V's of the heart**. The right and left v's of the heart.—**V. of the larynx**. Lat., *sinus laryngis*. An elongated depression between the superior and inferior vocal

bands which is prolonged upward as the laryngeal pouch. [C; L.]—**V. of the olfactory nerve**. Lat., *ventriculus bulbi*. A cavity in the olfactory bulb which in some animals communicates directly with the corresponding lateral v. [I, 13, 17 (K).]—**V. of the pelvic enlargement**. The persistent central canal of the spinal cord seen in cold-blooded animals. [I, 14 (K).]—**V. of the prosencephalon**. See *PROSENCEPHALIC V.*—**V. of the septum**. See *Fifth v.*—**V. of the spinal cord**. See *CENTRAL CANAL of the spinal cord*.—**Verga's v.** A space sometimes existing between the lyra Davidis and the corpus callosum. [a, 34.]

VENTRICULUM (Lat.), n. f. pl. *Ve^{nt}-rⁱ-k^l-u^m*. From *venter*, the belly, and *columna*, a column. Of Wilder, see *ANTERIOR COLUMNS of the spinal cord*.

VENTRICOSE, **VENTRICIOUS**, adj's. *Ve^{nt}-rⁱ-k^l-os*, -u's. Lat., *ventricosus* (from *venter*, the belly). Fr., *ventru*, *renflé*. Ger., *bauchig*. Inflated on one side, swollen unequally; bulbous. [a, 35.]

VENTRICULAR, adj. *Ve^{nt}-rⁱ-k^l-u^m-a^r*. Fr., *ventriculaire*. Pertaining to a ventricle. [L.]

VENTRICULE (Fr.), n. *Vaⁿ-t^r-e-k^l*. See *VENTRICLE*.—**Grand v.** See *Lateral VENTRICLE*.—**Premier v.** See *Fifth VENTRICLE*.—**V's antérieurs**. See *Lateral VENTRICLES*.—**V. aortique**. See *LEFT VENTRICLE of the heart*.—**V. cérébelleux**. See *FOURTH VENTRICLE and Cerebellar VENTRICLE*.—**V. commun** [Vesalius]. See *THIRD VENTRICLE*.—**V. de la cloison (transparente)**. See *Fifth VENTRICLE*.—**V. de la glande pinéale**. See *Pineal VENTRICLE*.—**V. de la moelle épinière**. See *CENTRAL CANAL of the spinal cord*.—**V. des couches optiques**. 1. See *THIRD VENTRICLE*. 2. In the pl. See *Lateral VENTRICLES*.—**V. des tubercules quadrijumeaux**. V. du cervelet (ouvert). See *FOURTH VENTRICLE*.—**V. du corps calleux**. See *Fifth VENTRICLE*.—**V. inférieur**, **V. intermédiaire**. See *THIRD VENTRICLE*.—**V. médian du cervelet**. See *Middle VENTRICLE of the cerebellum*.—**V. moyen**. See *THIRD VENTRICLE*.

VENTRICULO-AORTIQUE (Fr.), adj. *Vaⁿ-t^r-e-k^l-o^a-or-tek*. Pertaining to the left ventricle of the heart and to the aorta. [L, 41 (a, 14).]

VENTRICULO-PULMONAIRE (Fr.), adj. *Vaⁿ-t^r-e-k^l-o^p-lo-pu^l-mo-na^r*. Pertaining to the right ventricle of the heart and to the pulmonary artery. [L, 41 (a, 14).]

VENTRICULUS (Lat.), n. m. *Ve^{nt}-rⁱ-k^l-u^s* (u^l), -u's (u's). 1. See *VENTRICLE*. 2. See *STOMACH*. 3. The cavity of a cup-shaped sponge. [A, 12.]—**V. anterior cordis**. See *RIGHT VENTRICLE of the heart*.—**Ventriculi anteriores**. See *Lateral VENTRICLES*.—**V. aorticus cordis**. See *LEFT VENTRICLE of the heart*.—**V. Arantii**. See *VENTRICLE of the calamus scriptorius*.—**V. bombus**. The descending cornu of the lateral ventricle. [I, 3 (K).]—**V. bulbi**. See *VENTRICLE of the olfactory nerve*.—**V. bulbi olfactorii**. See *OLFACTORY FISTULE and cf. V. olfactorius*.—**V. bulbosus**. See *GIZZARD*.—**V. cerebelli**. V. cerebello et medulla dorsali communis [Vesalius]. See *FOURTH VENTRICLE*.—**Ventriculi cerebri**. The ventricles of the brain. [L.]—**V. cerebri primus**. See *Fifth VENTRICLE*.—**V. communis** [Vesalius]. See *THIRD VENTRICLE*.—**V. cornu**. A small depression situated between the posterior edges of the peduncles of the pineal gland and the upper edge of the posterior cerebral commissure. [I, 6 (K).]—**Ventriculi cordis**. The ventricles of the heart. [L.]—**V. cordis anterior**. See *RIGHT VENTRICLE of the heart*.—**V. cordis aorticus**. See *LEFT VENTRICLE of the heart*.—**V. cordis pulmonalis**. See *RIGHT VENTRICLE of the heart*.—**V. corporis callosi**. See *Fifth VENTRICLE*.—**V. descori**. The right lateral ventricle of the brain. [I, 3 (K).]—**V. furunculi**. Fr., *bovillon*. The core of a boil.—**V. Galeni**. See *VENTRICLE of the larynx*.—**V. glandulosus**. See *PROVENTRICULUS*.—**V. hippocampi** [Arantius]. V. inferior hippocampi. See *CORNU DESCENDENS*.—**V. intermedius**. See *Fifth VENTRICLE*.—**V. laryngis**. See *VENTRICLE of the larynx*.—**V. intestinales**. See *ABOMASUM*.—**Ventriculi laterales**. See *Lateral VENTRICLES*.—**V. lobii olfactorii**. See *VENTRICLE of the olfactory nerve*.—**Ventriculi magni**. See *Lateral VENTRICLES*.—**V. medius anterior**. See *THIRD VENTRICLE*.—**V. mesencephali**. See *AQUEDUCT of Sylvius*.—**V. nobilis** [Herophilus]. See *FOURTH VENTRICLE*.—**V. olfactorius**. The cavity of the primary olfactory lobe, which is early obliterated in man. [K.] Cf. *VENTRICLE of the olfactory nerve*.—**Ventriculi optici**. See *Lateral VENTRICLES*.—**V. primus**. See *Fifth VENTRICLE*.—**V. pulmonaris**. See *RIGHT VENTRICLE of the heart*.—**V. quartus**. See *FOURTH VENTRICLE*.—**V. quintus**. See *Fifth VENTRICLE*.—**V. rhinencephalicus**. See *V. olfactorius*.—**V. rhomboidalis**. See *FOURTH VENTRICLE*.—**V. septi (lucidi, seu pellucidi)**. See *Fifth VENTRICLE*.—**Ventriculi secundi**. See *Lateral VENTRICLES*.—**V. sinister**. The left lateral ventricle of the brain. [I, 3 (K).]—**V. subter nates** (seu nates et testes, seu testes). See *AQUEDUCT of Sylvius*.—**V. succenturiatus**. See *PROVENTRICULUS*.—**Ventriculi superiores** [Berengiar]. See *Lateral VENTRICLES*.—**V. Sylvii**. See *Fifth VENTRICLE*.—**V. tertius**, **V. thalami optici** [Vicq d'Azyr]. See *THIRD VENTRICLE*.—**Ventriculi tricornes**. See *Lateral VENTRICLES*.

VENTRIÈRE (Fr.), n. *Vaⁿ-t^r-e-c^r*. See *TUNICA abdominalis*.

VENTRIKEL (Ger.), n. *Fe^{nt}-rek^{el}*. See *VENTRICLE*.—**Gehirnv.** A ventricle of the brain. [L.]—**Herzv.** A ventricle of the heart. [L.]—**Hirnv.** See *Gehirnv.*—**Seitenv.** V. des Grosshirns. See *Lateral VENTRICLES*.—**V. Hohraum** [Schwalbe]. The cavity of the fourth ventricle. [I, 17 (K).]

VENTRILOQUISM, n. *Ve^{nt}-rⁱ-lⁱ-o-kwiz^m*. From *venter*, the belly, and *loqui*, to speak. Fr., *ventriloquisme*. Ger., *Bauchreden*. The art or practice of speaking so that the sounds appear not to come from the speaker's lips, but to have some other origin. [a, 48.]

VENTRIPYRAMIDS, *n.* $\text{Ve}^{\text{nt}}\text{-ri}^{\text{p}}\text{-pi}^{\text{r}}\text{-a}^{\text{2}}\text{-m}^{\text{-i}}\text{dz}$. From *ven-*, the belly, and *pyramis*, a pyramid. See *Anterior PYRAMIDS*.

VENTROFIXATION, *n.* $\text{Ve}^{\text{nt}}\text{-ro-fik}^{\text{s}}\text{-a}^{\text{2}}\text{'shu}^{\text{n}}$. Lat., *ventrofixatio* (from *venter*, the belly, and *fixus*, fastened). Of Olshausen, see *HYSTEROPEXIA*.

VENTRO-LATERAL, *adj.* $\text{Ve}^{\text{nt}}\text{-ro-la}^{\text{t}}\text{'e}^{\text{2}}\text{-r}^{\text{l}}$. From *venter*, the belly, and *latus*, a side. 1. On the lateral aspect of the abdomen. 2. Ventral and lateral at the same time.

VENTROSITY, *n.* $\text{Ve}^{\text{nt}}\text{-ro}^{\text{s}}\text{'i}^{\text{2}}\text{-i}^{\text{2}}$. From *venter*, the belly. Fr., *ventrosité*. Protuberance of the abdomen due to obesity. [L, 41 (a, 14).]

VENTROTOMY, *n.* $\text{Ve}^{\text{nt}}\text{-ro-t}^{\text{o}}\text{'o}^{\text{2}}\text{-m}^{\text{-i}}$. From *venter*, the belly, and *tomé*, a cutting. See *LAPAROTOMY*.

VENTRO-UTERO-VAGINAL, *adj.* $\text{Ve}^{\text{nt}}\text{'ro-u}^{\text{t}}\text{'i}^{\text{2}}\text{'e}^{\text{2}}\text{-o-ra}^{\text{2}}\text{'i}^{\text{2}}\text{-n}^{\text{l}}$. Pertaining to the abdominal cavity, the uterus, and the vagina.

VENULA (Lat.), *n. f.* $\text{Ve}^{\text{n}}\text{'wan}^{\text{u}}\text{'l}^{\text{u}}\text{'l}^{\text{u}}\text{'a}^{\text{2}}$. Dim. of *vena*, a vein. See **VENULE**.—**Venulae centrales lobulorum**, **Venulae intralobulares hepatis**. See *Intralobular VEINS of the liver*.

VENULE, *n.* $\text{Ven}^{\text{'u}}\text{'l}$. Lat., *venula*. A small vein. [C.]

VENULOSE, *adj.* $\text{Ve}^{\text{n}}\text{'u}^{\text{l}}\text{'o}^{\text{s}}$. Abounding in small veins. [a, 35.]

VENUS (Lat.), *n. f.* $\text{Ven}^{\text{'we}}\text{'n}^{\text{u}}\text{'s}^{\text{u}}\text{'s}^{\text{u}}\text{'s}$. Gen., *Veneris*. Gr., *Ἀφροδίτη*. Fr., *Vénus*. Ger., *V.* 1. The goddess of love of the ancient Romans; hence, of the alchemists, copper. [A, 325 (a, 48).] 2. Of Paracelsus, see **SYPHILIS**.—**Bezoardicum Veneris**. A preparation made by extracting a tincture made from copper filings with rectified antimony trichloride and fixing with nitric acid. [B, 300.]—*V.berg*. See *Mons Veneris*.—*V. beule* (Ger.). See *Bubo*.—*V. blüthen*, *V. gürtel* (Ger.). See *CORONA Veneris*.—*V. hügel* (Ger.). See *Mons Veneris*.—*V. seuche* (Ger.). See **SYPHILIS**.

VER (Fr.), *n.* Ve^{r} . A worm or a worm-like structure. [L, 41, 49 (a, 14).]—*Huile de v's de terre*. See *Oleum LUMBRICORUM*.—*V. cutané*, *V. de Guinée*, *V. de Médine*. See *FILARIA medinensis*.—*V. du lobe centrale*. See *Superior vermiform PROCESS*.—*V. du vinaigre*. See *REABDITIS aceti*.—*V. inférieur* (du cervelet). See *Inferior vermiform PROCESS*.—*V's intestinaux cavitaires*. See *COELEMINTHA*.—*V's intestinaux parenchymateux*. See *STERELMINTHA*.—*V. palmiste*. See under *Cocos amara*.—*V. solitaire*. See *LENIA solima* (1st def.).—*V. spermaticque* [Jacquewhoek]. See *SPERMATIZOID*.—*V. supérieur*. See *Superior vermiform PROCESS*.

VERÄHNLICHTUNG (Ger.), *n.* $\text{Fe}^{\text{r}}\text{-an}^{\text{'li}}\text{'ch}^{\text{2}}\text{-un}^{\text{2}}$. See *ASSIMILATION*.

VERÄNDERND (Ger.), *adj.* $\text{Fe}^{\text{r}}\text{-and}^{\text{'e}}\text{'r}^{\text{nd}}$. Alternative.

VERÄNDERUNG (Ger.), *n.* $\text{Fe}^{\text{r}}\text{-and}^{\text{'e}}\text{'r}^{\text{nd}}$. Change; degeneration.

VERARBEITUNG (Ger.), *n.* $\text{Fe}^{\text{r}}\text{-a}^{\text{2}}\text{'r}^{\text{bit}}\text{-un}^{\text{2}}$. See *DIGESTION*.

VERARMT (Ger.), *adj.* $\text{Fe}^{\text{r}}\text{-a}^{\text{2}}\text{'r}^{\text{mt}}$. See *DEAUPERATE*.

VERÄSTELUNG (Ger.), *n.* $\text{Fe}^{\text{r}}\text{-ast}^{\text{'e}}\text{'l}^{\text{2}}\text{-un}^{\text{2}}$. 1. See *RAMIFICATION*. 2. One of the branched processes of the arbor vitae cerebelli. [L, 17 (K).]

VERATRALBINE, *n.* $\text{Ve}^{\text{r}}\text{-a}^{\text{2}}\text{'t}^{\text{r}}\text{-al}^{\text{b}}\text{'en}$. Fr., *vétralbaine*. An amorphous alkaloid, $\text{C}_{28}\text{H}_{48}\text{NO}_6$, obtained from the root of *Veratrum album*. [B, 5, 270 (a, 38).]

VERATRAMARIN, *n.* $\text{Ve}^{\text{r}}\text{-a}^{\text{2}}\text{'t}^{\text{r}}\text{-a}^{\text{2}}\text{'m}^{\text{'a}}\text{'r}^{\text{'i}}\text{'n}$. Fr., *vétramarine*. Of Weppen, a non-nitrogenous bitter principle contained in the rhizome of *Veratrum album*. [B, 270 (a, 38).]

VÉRATRE (Fr.), *n.* $\text{Va}^{\text{-r}}\text{'a}^{\text{2}}\text{'-tr}$. See **VERATRUM**.—*Extrait liquide de v. américain*. See *Extractum VERATRI viridis fluidum*.

VERATRIA (Lat.), *n. f.* $\text{Ve}^{\text{r}}\text{'(war)-a}^{\text{2}}\text{'(a}^{\text{2}}\text{'b}^{\text{'t})}\text{'ri}^{\text{2}}\text{'a}^{\text{2}}$. See **VERATRINE**.

VERATRIC ACID, *n.* $\text{Ve}^{\text{r}}\text{-at}^{\text{'r}}\text{'i}^{\text{2}}\text{'k}$. Ger., *Veratrinssäure*, *Veratrumssäure*. An insoluble crystalline substance, $\text{C}_8\text{H}_8(\text{OCH}_3)_2\text{CO}_2\text{OH}$, found in *Veratrum sabadilla*. [B, 3, 93 (a, 14, 38).]

VERATRINA (Lat.), *n. f.* $\text{Ve}^{\text{r}}\text{'(war)-a}^{\text{2}}\text{'(a}^{\text{2}}\text{'b}^{\text{'t})}\text{'rin}^{\text{'(ren)}}\text{'a}^{\text{2}}$. See **VERATRINE**.—**Oleum veratrinae** [U. S. Ph.]. A preparation made by rubbing up 2 parts of veratrine with a little oleic acid, gradually adding more of the acid till 100 parts are obtained, and stirring till the veratrine is dissolved. [B, 95 (a, 38).]—*Tinctura veratrinae* [Belg. Ph.]. A solution of veratrine in 199 times as much 92-per-cent alcohol. [B, 95 (a, 38).]—**Unguentum veratrinae**. An ointment consisting of 4 parts of veratrine, 6 of alcohol, and 96 of benzoated lard [U. S. Ph.]; or of 1 part of veratrine, triturated with a little almond-oil, and 90 parts of lard [Br. Ph.]; or of 1 part of veratrine, 7 parts of olive-oil, and a mixture of 14 of solid paraffin and 41 of petrolatum [Russ. Ph.]. [B, 95 (a, 38).]

VERATRINE, *n.* $\text{Ve}^{\text{r}}\text{'a}^{\text{2}}\text{'t}^{\text{r}}\text{-en}$. Lat., *veratrina*, *veratria*. A poisonous alkaloid, $\text{C}_{28}\text{H}_{48}\text{NO}_6$, or mixture of alkaloids, obtained from the seeds of *Schenocaulon officinale*. Commercial *v.* occurs as a yellowish-white or grayish-white amorphous powder. Though it has no odor, it produces violent sneezing. The crystalline *v.* of Merck (identical with the pure *v.* of Flückiger and the cevadine of Wright and Luff) occurs as anhydrous, transparent crystals becoming opaque in the air. A soluble variety, the amorphous *v.* of Flückiger and the veratridine of Bosetti, is known as a yellowish resinous mass soluble in cold water but passing into the insoluble crystalline form when its solution is heated. Schmidt and Köppen recognize a third modification of *v.*, but this seems to be a mixture similar to commercial *v.* *V.* is used externally in neuralgia. [B, 95, 270 (a, 38).]

VERATRINUM (Lat.), *n.* $\text{Ve}^{\text{r}}\text{'(war)-a}^{\text{2}}\text{'(a}^{\text{2}}\text{'b}^{\text{'t})}\text{'rin}^{\text{'(ren)}}\text{'u}^{\text{'m}}$. See **VERATRINE**.—**Unguentum veratrinum** [Russ. Ph.]. See **Unguentum VERATRINAE**.

VERATROIDINE, *n.* $\text{Ve}^{\text{r}}\text{-a}^{\text{2}}\text{'t}^{\text{-roid}}\text{'en}$. Fr., *vétratoïdine*. An amorphous or partially crystalline alkaloid said to be found in veratrum. Its existence is doubted by E. Schmidt. [B, 270 (a, 38).]

VERATROL, *n.* $\text{Ve}^{\text{r}}\text{'a}^{\text{2}}\text{'t}^{\text{-rol}}$. Fr., *vétratrol*. Ger., *V.* A liquid, $\text{C}_8\text{H}_8(\text{OCH}_3)_2$. [B, 3, 270 (a, 38).]

VERATRUM (Lat.), *n. n.* $\text{Ve}^{\text{r}}\text{'(war)-a}^{\text{2}}\text{'(a}^{\text{2}}\text{'b}^{\text{'t})}\text{'ru}^{\text{'m}}\text{'(ru}^{\text{'m}}$. Fr., *vétrate*, *vétratrum*. Ger., *Germer*. False hellebore; a genus of the *Veratrea*, which are a tribe of the *Liliaceae*. [a, 35].—**Decoctum veratri**. Fr., *decoction (ou hydrolé) d'élébore blanc*. A preparation made by boiling 33 parts of white hellebore in 946 parts of water until reduced one half, then straining and adding 61 parts of alcohol. [B, 119 (a, 38).]—**Extractum veratri viridis fluidum** [U. S. Ph.]. A preparation made by exhausting 100 grammes of *V. viride* with alcohol in a percolator, reserving 90 c. c., evaporating the residue to a soft extract, mixing the two, and bringing up to 100 c. c. [B, 5, 93 (a, 38).]—**Infusum veratri albi** [Russ. Ph.]. A preparation made by treating 18 centigrammes of white hellebore over the water-bath for five minutes with water enough to make 90 grammes of strained infusion. [B, 95 (a, 38).]—*Radix veratri*. 1. The root of *Helleborus niger*. [a, 35.] 2. Of the Ger. Ph., see under *V. album*.—**Rhizoma veratri (albi)**. Fr., *hellebore blanc (souche)* [Fr. Cod.]. Sp., *eleboro blanco*, *vedegambre (rhizoma)* [Sp. Ph.]. The rhizome of *V. album*. [B, 95 (a, 38).]—**Rhizoma veratri albi pulveratum**. White hellebore-root cleansed, dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.] (through a 1,000-mesh sieve [Russ. Ph.]). [B, 95 (a, 38).]—**Tinctura veratri** [Ger. Ph., Swiss Ph.] (albi [Aust. Ph., Belg. Ph., Russ. Ph.]). Fr., *teinture d'hellebore blanc* [Fr. Cod.]. A tincture made by macerating or digesting the rhizome of white hellebore in 5 (10 [Ger. Ph., Russ. Ph.]) times as much dilute alcohol. [B, 95 (a, 38).]—**Tinctura veratri viridis**. A tincture made by treating 1 part of the rhizome of *V. viride* in No. 60 powder with alcohol enough to make 2 parts by percolation after one day's maceration [U. S. Ph.]; or 4 oz. of the rhizome in No. 40 powder with alcohol enough to make 20 fluid oz. after two days' maceration [Br. Ph.]; or 1 part of the rhizome with 5 parts of dilute alcohol [Huss. Ph., 1st ed.]. [B, 95 (a, 38).]—*V. album*. Fr., *vétratrum (ou vétrate) blanc*, *vaivare*, Ger., *weisser Germer*, *weisse Nieswurz*. 1. Langwort, lyngwort, white hellebore; a native of the mountainous regions of Europe and northern and middle Asia. It has the acrid, poisonous properties of *V. viride*, and probably in greater degree. The fleshy root-stock (*radix veratri* [Ger. Ph.], *v. album* [U. S. Ph., 1870]) occurs in cylindrical or subconical, rough pieces, more or less beset with the remains of roots. It is a general stimulant to the secretions, but is now rarely used, except in scabies, etc., and by the veterinarians. It was formerly used in dropsy, mania, epilepsy, leprosy, etc. It contains, according to Wright and Luff, jervine, rubijervine, pseudojervine, veratralbine, and traces of a sternutatory alkaloid. It does not contain veratrine (Maisch). [a, 35.] 2. Of the U. S. Ph., see under 1st def.—*V. frigidum*. A Mexican species. The rhizome closely resembles that of *V. album*, and has like properties. [a, 35.]—*V. lobelianum*. Ger., *Lobel's Germer*. A variety (by some considered a distinct species) of *V. album* found in southern and middle Europe. [a, 35.]—*V. nigrum*. 1. The *Helleborus niger* and other species of *Helleborus*. 2. A species found in central and southern Europe. Its rhizome is substituted for that of *V. album*, but is smaller and less active. [a, 35.]—*V. officinale*. See *SCHENOCaulon officinale*.—*V. sabadilla*. A species indigenous to Mexico, the West Indies, and (according to some) China. It resembles *V. album*, and is said, probably erroneously, to furnish a portion of the osvaldi seed of comcomers. [a, 35.]—*V. viride*. Fr., *vétratrum (ou vétrate) vert*. Ger., *grüner Germer*. 1. American (or swamp) hellebore, Indian poke, poke-root, itch-weed, a variety, according to Hanbury, of *V. album*, but usually regarded as a distinct species, growing in the United States and Canada. The acrid rhizome (the *v. viride* of the U. S. Ph.), a powerful spinal and arterial depressant, is from an inch to three inches long, obtuse at the end, externally of a dark-brown color, and beset with yellowish roots marked with numerous indentations; in the shops it occurs in small fragment or transverse slices of a dull purplish, or whitish color. By the early colonists it was used as a purgative, antiscorbutic, and insecticide, but it is now employed as a cardiac, arterial, and nervous sedative. It is said not to be narcotic and rarely to cause purging. [a, 35.] 2. Of the U. S. Ph., see under 1st def.

VERBÄLT (Ger.), *adj.* $\text{Fe}^{\text{r}}\text{-bal}^{\text{'t}}$. Inflamed and stiff as a result of continued pressure. [B, 30 (a, 14).]

VERBAND (Ger.), *n.* $\text{Fe}^{\text{r}}\text{-ba}^{\text{'nd}}$. See **BANDAGE** and **DRESSING** (2d def.).—**Bleibender V.** See **Permanent DRESSING**.—**Contentivv'**. See **Retentive BANDAGE**.—**Deckv'**. A protective dressing. [L, 57 (a, 14).]—**Drückender V.**, **Druckv'**. cotton-wadding bandage. [a. 34.]—**V'zeug**. Material for dressing wounds, especially bandages. [L. 57 (a. 14).]—**Wasserglasv'**. See **Silico-BANDAGE**.—**Zungenv'**. See **GLOSSODERMIS** (2d def.).

VERBASCUM (Lat.), n. n. Vuŕ(wē'r)-ba'sk(ba'sk)/u'm(u)m. Fr., *molène*. Ger., *Wollkraut*, *Königskeze*. 1. Mullein; a genus of the *Verbenaceae*, which are a tribe of scrophularaceous plants. The *Verbascares* are a section of the *Cajavariæ*. The *Verbasca* comprise *V. celsia*, and *Ianthera* = the *Verbasceina*, *V.* and *Celsia*. [a. 35.] 2. Of the Austr. Ph. and Hung. Ph., see *Flores verbasci*.—**Decoctum verbasci anodynum**. A preparation made by boiling for a quarter of an hour 1 lb. oz. each of great mullein-leaves and mallow-leaves, 2 oz. of linseed, and 1 scruple of poppy-heads in 4 lbs. of water. [B. 97 (a. 38).]—**Decoctum verbasci compositum**. Sp., *cocimiento de gordolobo compuesto* [Sp. Ph.]. A preparation made by boiling 45 parts each of the leaves of *V. thapsus* and mallow, 58 of flaxseed, and 4 of poppy-seed in 1380 of water and straining. [B. 95 (a. 38).]—**Flores verbasci**. Fr., *bouillon blanc* (ou *molène*) [Fr. Cod.]. Mullein-flowers, especially the corolla without the calyx of *V. phlomoides*, *V. thapsiforme*, and *V. thapsus* (only of the last [Fr. Cod., Roum. Ph.], of various large-flowered kinds of *V.* [Finn. Ph.]). [B. 95 (a. 38).]—**Folia verbasci**. Fr., *bouillon blanc* (ou *molène*) [Fr. Cod.]. Sp., *verbasco*, *gordolobo* [Sp. Ph.]. The leaves of *V. thapsus* (and of *V. thapsiforme* also [Belg. Ph.]). [B. 95 (a. 38).]—**V. blattaria**. Fr., (*molène*) *blattaria*, *herbe aux mittes*. Ger., *Mottencollkraut*, *Schabenkraut*, *Rattenkraut*. Moth-mullein of southern Europe and eastern Asia. The bitter herb (*herbe blattaria*) has properties like those of *V. thapsus*. It has an unpleasant odor, and is said to be an insectifuge. [a. 35.]—**V. lychnitis**. Fr., *molène cunéiforme*, *bouillon femelle*. A European species. The leaves have the properties of those of other species. [a. 35.]—**V. montanum**. Fr., *molène de montagne*. Ger., *Bergwollkraut*. A species found in southern Europe, closely related to *V. phlomoides*; used like *V. thapsus*. [a. 35.]—**V. nigrum**. Fr., *molène noire*. Ger., *schwärzliches Wollkraut*, *Brannwurz*. Black-rooted mullein of Europe. The root and flowers, *radix et flores verbasci* (*nigr.*), were formerly official. The former is no longer used; the latter are smaller than those of *V. thapsus*, and not so much used, though they have the same emollient properties. [a. 35.]—**V. phoeniceum**. Fr., *molène de Phénicie*, *thé de Sibirie*. Purple-flowered mullein of Europe; its properties resemble those of *V. thapsus*. [a. 35.]—**V. phlomoides**. Fr., *molène phlomioide*. Ger., *Königskeze*. Woolly mullein of Europe. It has the properties of *V. thapsus*. The flowers, *flores verbasci*, are found in European shops. [a. 35.]—**V. Schraderi**. A European species. The flowers are used like those of *V. thapsus* and *V. phlomoides*. [a. 35.]—**V. strictum**. Ger., *buchisches Wollkraut*. A species found in northern Africa and southern Europe; the *φλωκίς θίατα* of Dioscorides. [a. 35.]—**V. thapsiforme**. A variety of *V. thapsus*. [a. 34.]—**V. thapoides**. See *V. phlomoides*.—**V. thapsus**. Fr., *molène commune*, *bon-homme*, *bouillon blanc* [Fr.

VERBASCUM THAPSUS. [A. 327.]

Cod.] (ou *mâle*, *cierge de Notre-Dame*, *herbe à bonhomme* (ou *Saint-Fiacre*), *molène*. Ger., *gemeines Wollkraut*, *Himmelskeze*, *Himmelbrand*, *Fackelkraut*, *Feldkerzenkraut*. Common (or great) mullein of middle and southern Europe, Siberia, the Himalayas, and North America. The flowers and leaves, *flores et folia verbasci* (seu *verbasci albi*, seu *verbasci maris*, seu *thapsi barbati*, seu *candelæ*, seu *pulmonaria vaccarum*), are official in the Fr. Cod. and the leaves in the Ger. Ph. The flowers are used in mild catarrhs, etc., and externally in itching skin diseases. The leaves are mildly astringent, emollient, and anodyne. They are used for diarrhoea; dried and smoked like tobacco, in aphonia from irritation of the pharynx; and steeped in hot water or boiled in lard, as an external anodyne. The root is employed in pulmonary diseases of cattle, and the seed to poison mice and to stupefy fish. [a. 35.]

VERBENA (Lat.), n. f. Vuŕ(wē'r)-ben(ban)/a's. From *v.* or *verbenæ*, foliis used in religious ceremonies. Fr., *verveine*. Ger., *Eisenkraut*. Vervain; a genus of the *Verbenæ*, or *Verbenaceæ*, or *Verbenæ*, which are the vervains, an order of gamopetalous dicotyledonous plants, some of which have the aromatic properties of the *Labiata*. Bentham and Hooker place them in the *Lami-*

ales. The *Verbenæ* are also a tribe of the *Verbenaceæ*. The *Verbenæ* of Brongniart are a class of hypogynous *Gamopetalæ*. [a. 35.]—**Lemon** (scented) *v.* Fr., *verveine odorante* [Fr. Cod.]. See *ALYSSA citriodora*.—**Oil of v.** Lemon-grass oil (see under *ANDROPOGON citratus*). [a. 35.]—**Upright v.** See *V. officinalis*.—**V. erinoides**. A diuretic species found in Chile and Peru, used in gonorrhoea and as an emmenagogue. [a. 35.]—**V. hastata**. Wild hyssop, blue vervain, simpler's joy; an emetic and sudorific North American species. It has been used in fevers. [a. 35.]—**V. mas**. *V. officinalis*. Fr., *verveine officinale* [Fr. Cod.], *herbe de sang* (ou *du foie*, ou *sacré*). Ger., *gemeines* (oder *gebrüchliches*) *Eisenkraut*, *Eisenhart*, *Eisenreichkraut*, *Eiseric*, *Stahlkraut*, *Taubenliebkraut*. Common vervain, holy herb, Juno's tears, pigeon's grass, simpler's joy, the *πεπρωτερον ὄρος* (upright *v.*) of Dioscorides; a plant widely distributed in the warmer and temperate parts of the eastern hemisphere. Marvelous properties were formerly attributed to its herb, *herba verbenæ* (seu *verbenæ maris*, seu *verbenæ vulgaris*, seu *sacra*), but at most it is only a mild astringent and feeble aromatic. [a. 35.]—**V. pseudo-gervao**. A Brazilian species; the leaves have been used as tea. [a. 35.]—**V. supina**. The *πεπρωτερον υντρον* of Dioscorides; a species having the properties of *V. officinalis*. [a. 35.]—**V. urticifolia**. White (or nettle-leaved) vervain of North America. The astringent root is used as a wash against poisoning by *Rhus toxicodendron*. [a. 35.]—**V. vulgaris**. See *V. officinalis*.

VERBENACA (Lat.), n. f. Vuŕ(wē'r)-be'n(ban)-ak(a'sk)/a's. An old name for *Verbenæ officinalis*. [a. 35.]

VERBERGER (Ger.), n. Fe'r-be'r'g'e'r. A concealer. [a. 48.]—**Hodenv'**. See **CREMASTER**.

VERBESINA (Lat.), n. f. Vuŕ(wē'r)-be'sa(bas)-in(en)/a's. Fr., *verbésine*. Ger., *V.* 1. Crown-beard; a genus of the *Verbesinæ*, which are a subtribe of the *Helianthoideæ*. 2. An old name for *Bidens cernua* and *Bidens tripartita*. [a. 35.]—**V. biflora**. An East Indian species. The root, leaves, and flowers are used as a carminative. [a. 35.]—**V. capitaneja**. The *capitaneja* of the Mexicans; a species used to cure saddle-galls on horses' backs. [B. 121.]—**V. javanica**. Fr., *herbe de Java*. A species found in southern Asia and in Oceania. The root, leaves, and flowers are carminative, the leaves are antispasmodic, and the sap is a stimulating sternutatory. [a. 35.]—**V. mutica**. Fr., *verbésine sans barbe*. A Guinea species, applied to gangrenous sores. [a. 35.]—**V. virginica**. Crown-beard; a diaphoretic species found in the United States. [a. 35.]

VERBESSERND (Ger.), adj. Fe'r-be's'e's'e'r'nd. See **CORRECTANT**.

VERBIEGUNG (Ger.), n. Fe'r-beg'un'g. See **CAMPISIS** (1st def.).—**Rückgratv'**. See **SCOLIOSIS**.

VERBIGATION (Ger.), n. Vuŕ(wē'r)-bi'e'r-a'shu'n. From *verbigere*, to talk. Fr., *verbigération*. The repetition by an insane person of words and phrases in the form of a discourse, but without sense or sequence. [a. 18.] Cf. **CATATONY**.

VERBINDEN (Ger.), n. Fe'r-bi'nd'e'n. See **BANDAGING**.

VERBINDEND (Ger.), adj. Fe'r-bi'nd'e'n'd. See **CONNECTIVE** and **KNITTING** (1st def.).

VERBINDER (Ger.), n. Fe'r-bi'nd'e'r. See **DRESSER**.

VERBINTASCHE (Ger.), n. Fe'r-bi'nd'ta'sh-e's. See **DRESSING CASE**.

VERBINDUNG (Ger.), n. Fe'r-bi'nd'un'g. See **DRESSING** (1st def.), **KNITTING** (2d def.), and **SUTURE**.—**Gelenkv'**. See **ARTICULATION** (1st def.).—**Knochenv'**. See **SYNOSTOSIS** (1st def.).—**V'sast**. See **RAMUS anastomoticus**.—**V'sblatt**. A superficial lamina of white substance in the hippocampus major, prolonged from the gyrus hippocampi. [I. 6 (K).]—**V'sfäden**. 1. See **ACHROMATIC FIBRILS**. 2. Processes connecting prickles-cells. [K.] See **INTERCELLULAR BRIDGES**.—**V'sfasern**. Connective or condensation fibres. [K.]—**V'sgefäße**. See **RAMUS anastomoticus**.—**V'skanälchen**. See **Second convoluted TUBULE**.—**V'skraft**. See **ATOMICITY** and **QUANTVALENCE**.

VERBUNDUNGSHAUT (Ger.), n. Fe'r-bi'nd'un'g-sha's-u't. A connecting membrane. [a. 48.]—**Untere V.** See **MEMBRANA re-uniens inferior**.—**V. des Auges**. See **CONJUNCTIVA**.

VERBLUTUNG (Ger.), n. Fe'r-blut'un'g. 1. Excessive hæmorrhage. [a. 14.] 2. Cessation of bleeding. [A. 450 (a. 17).]

VERBORGEN (Ger.), adj. Fe'r-bo'r'g'e'n. See **LATENT** and **RECONDITE**.

VERBRENNBAR (Ger.), adj. Fe'r-bre'n'n'ba'r. See **COMBUSTIBLE**.

VERBRENNUNG (Ger.), n. Fe'r-bre'n'n'un'g. See **BURN** and **CAUTERIZATION**.

VERDAMPFUNG (Ger.), n. Fe'r-da'smpf'un'g. See **EVAPORATION**.

VERDAUER (Ger.), n. Fe'r-da's'u'e'r. See **DIGESTER**.

VERDAULICH (Ger.), adj. Fe'r-da's'u'i-l'ich. See **DIGESTIBLE**.

VERDAUUNG (Ger.), n. Fe'r-da's'u'e'n'g. See **DIGESTION**.—**Künstliche V.** See **Artificial DIGESTION**.—**Mundhöhlenv'**, **Mundv'**. See **Oral DIGESTION**.—**V'sbeschwerde**. See **DYSPEPSIA**.—**V'smittel**. See **DIGESTANT**.—**V'ssaft**. See **CHYLE** and **Nutrient JUICE**.—**V'swerk**. See **DIGESTION**.

VERDERAME (Fr.), n. Ve'r'de-ra'm. See **SPORISORIUM maidis**.

VERDERBEN (Ger.), n. Fe'r-de'r'b'e'n. See **DEPRAVATION**.

VERDERBLICH (Ger.), adj. Fe'r-de'r'b'l'ich. Deleterious, pernicious.

VERDERBTHEIT (Ger.), n. Fe'r-de'r'b't'h'eit. See **DEPRAVATION**.

VERDET (Fr.), n. $\text{Ve}^2\text{r-da}$. See **VERDIGRIS** and **RUST** (2d def.).
VERDICHUNG (Ger.), n. $\text{Fe}^2\text{r-di}^2\text{ch}^2\text{t}^2\text{un}^2$. See **CONCENTRATION**, **CONDENSATION**, and **CONSOLIDATION**.—**V'smittel**. See **ASTRINGENT** (3d def.).

VERDICKUNG (Ger.), n. $\text{Fe}^2\text{r-di}^2\text{k}^2\text{un}^2$. Thickening, inspissation, condensation. [A, 521 (a, 48).]—**Muskely**. See **MYOPACHYSIS**.—**Nagely**. See **HYPERONYCHIA**.

VERDIGRIS, n. $\text{Vu}^2\text{r-di}^2\text{gr}^2\text{s}$. Fr. *vert-de-gris*. Ger., *Grünspan*, *Spangrün*. See under **COPPER SUBACETATE**. The term is also applied, although less properly, to any green deposit occurring on utensils of copper. Such deposits are usually made up of copper carbonate or copper chloride. [B.]—**Bibasic v.**, **Blue v.** A v. consisting almost wholly of dibasic cupric acetate, but of somewhat varying composition. [B, 2.]—**Common v.** A substance composed of basic cupric acetates. [B, 2.]—**Green v.** A mixture of sesquibasic cupric acetate with small quantities of dibasic and tribasic cupric acetates, sometimes also cuprous acetates and other impurities. [B, 2.]

VERDORREN (Ger.), adj. Corrupted, tainted. [L, 46 (a, 21).]
VERDREHUNG (Ger.), n. $\text{Fe}^2\text{r-dre}^2\text{aun}^2$. See **CONORTION** and **DISTORTION**.

VERDUNKELUNG (Ger.), n. $\text{Fe}^2\text{r-dun}^2\text{k}^2\text{el}^2\text{un}^2$. An obscuration. [A, 14.] See **CALIGO**.—**V'sapparat**. See **EPISCOTISTER**.

VERDÜNNEND (Ger.), adj. $\text{Fe}^2\text{r-du}^2\text{n}^2\text{ne}^2\text{nd}$. See **ATTENUANT** (1st def.) and **DILUENT**.

VERDÜNNUNG (Ger.), n. $\text{Fe}^2\text{r-du}^2\text{n}^2\text{un}^2$. See **ATTENUATION**, **DILUTION**, and **EMACIATION**.—**V'smittel**. See **DILUENT**, n.

VERDUNSTUNG (Ger.), n. $\text{Fe}^2\text{r-dunst}^2\text{un}^2$. See **EVAPORATION**.

VEREINIGUNG (Ger.), n. $\text{Fe}^2\text{r-in}^2\text{igun}^2$. See **ASSOCIATION** (2d def.), **ARTICULATION**, and **UNION**.—**V'sort**. One of the cerebral commissures. [K.]—**V'spunkt**. See **COMMISSURE** and **CORPUS callosum**.

VEREINIGUNGSHAUT (Ger.), n. $\text{Fe}^2\text{r-in}^2\text{igun}^2\text{z-ha}^2\text{ut}$. A uniting membrane.—**Obere v.** See **MEMBRANA reuniens superior**.—**Untere v.** See **MEMBRANA reuniens inferior**.

VEREITERN (Ger.), v. intr. $\text{Fe}^2\text{r-it}^2\text{ern}$. To suppurate.

VEREITERUNG (Ger.), n. $\text{Fe}^2\text{r-it}^2\text{erun}^2$. See **SUPPURATION**.

VERENGENDER (Ger.), n. $\text{Fe}^2\text{r-en}^2\text{er}^2\text{er}$. A constrictor or sphincter muscle. [a, 17.]—**V. der Pupille**. See **SPHINCTER iridis**.—**V. der Rachenmündung**. See **GLOSSOPALATINUS** (2d def.).

VERENGERUNG (Ger.), n. $\text{Fe}^2\text{r-en}^2\text{er}^2\text{un}^2$. Narrowing, stenosis, contraction, stricture.—**Becken v.** See **PELVIC CONTRACTION**.—**Gebärmutter v.** See **METROSTENOSIS**.—**Luftrohr en v.** See **LARYNGOSTENOSIS**.

VERERBLICH (Ger.), adj. $\text{Fe}^2\text{r-er}^2\text{bl}^2\text{ich}$. See **HEREDITARY**.

VERERBUNG (Ger.), n. $\text{Fe}^2\text{r-er}^2\text{bun}^2$. See **HEREDITY**.

VERETRUM (Lat.), n. n. $\text{Ve}^2\text{r(we}^2\text{r)-e}^2\text{t(at)ru}^2\text{m(ru}^2\text{m)}$. From *vereri*, to be abashed. See **FEMIS**.

VERETTE (Fr.), n. $\text{Va-re}^2\text{t}$. See **VARICELLA**.

VEREUX (Fr.), adj. Va-ru^2 . Containing worms. [L, 41 (a, 14).]

VERFAHREN (Ger.), n. $\text{Fe}^2\text{r-fa}^2\text{r}^2\text{en}$. See **OPERATION**.

VERFALL (Ger.), n. $\text{Fe}^2\text{r-fa}^2\text{l}$. See **DECAY**.

VERFALLENSEIN (Ger.), n. $\text{Fe}^2\text{r-fa}^2\text{l}^2\text{e}^2\text{n-zin}$. A condition of systemic waste. [a, 84.]

VERFÄLSCHTSEIN (Ger.), n. $\text{Fe}^2\text{r-falsht}^2\text{zin}$. See **ADULTERATION** (2d def.).

VERFÄLSCHUNG (Ger.), n. $\text{Fe}^2\text{r-falsh}^2\text{un}^2$. See **ADULTERATION** (1st def.).

VERFÄRBUNG (Ger.), n. $\text{Fe}^2\text{r-farb}^2\text{un}^2$. See **DISCOLORATION**.—**V. der Augenlider**. See **BLEPHARODYSCHRIA**.

VERFAULEN (Ger.), v. tr. and intr. $\text{Fe}^2\text{r-fa}^2\text{u}^2\text{el}^2\text{en}$. See **DECOMPOSE** (2d def.).

VERFETTUNG (Ger.), v. $\text{Fe}^2\text{r-fe}^2\text{tun}^2$. See **FATTY DEGENERATION**.

VERFLEISCHUNG (Ger.), n. $\text{Fe}^2\text{r-flish}^2\text{un}^2$. See **CARNIFICATION**.—**V. der Knochen**. See **OSTEOSARCOISIS**.

VERFLÜCHTIGUNG (Ger.), n. $\text{Fe}^2\text{r-flu}^2\text{ch}^2\text{t}^2\text{igun}^2$. See **AERIFICATION** and **EVAPORATION**.

VERFLÜSSIGUNG (Ger.), n. $\text{Fe}^2\text{r-flu}^2\text{s}^2\text{igun}^2$. See **FLUIDIFICATION**.

VERGÄHRUNG (Ger.), n. $\text{Fe}^2\text{r-gar}^2\text{un}^2$. See **FERMENTATION**.

VERGÄNGLICH (Ger.), adj. $\text{Fe}^2\text{r-gan}^2\text{lich}$. See **FIGACIOUS**.

VERGE (Fr.), n. Ve^2rzh . 1. A wand or rod (so used in the names of various plants). [a, 35.] 2. The penis.—**V. féminine**. See **CLITORIS**.

VERGETURE (Fr.), n. $\text{Ve}^2\text{r-zh}^2\text{ur}$. 1. See **VIBEX**; 2. One of the reddish linear marks observed on the skin after violent distention. [A, 800.]

VERGIFTUNG (Ger.), n. $\text{Fe}^2\text{r-gi}^2\text{ftun}^2$. See **POISONING**.—**Wurst v.** See **ALLANTIASIS**.

VERGLIEDERUNG (Ger.), n. $\text{Fe}^2\text{r-gled}^2\text{erun}^2$. See **SYNARTHROSIS**.

VERGRÖßERUNG (Ger.), n. $\text{Fe}^2\text{r-gru}^2\text{s}^2\text{erun}^2$. Amplification; enlargement.

VERHALTUNG (Ger.), n. $\text{Fe}^2\text{r-ha}^2\text{ltun}^2$. Retention, suppression. [A, 521 (a, 17).]

VERHARSCHEN (Ger.), v. intr. $\text{Fe}^2\text{r-ha}^2\text{rsh}^2\text{en}$. To form a crust, to ciliate. [a, 14.]

VERHÄRTET (Ger.), adj. $\text{Fe}^2\text{r-hart}^2\text{et}$. See **INDURATED** and **SCIRRHOUS**.

VERHÄRTUNG (Ger.), n. $\text{Fe}^2\text{r-hart}^2\text{un}^2$. See **CALLOSITY**, **INDURATION**, and **SCIRRHUS**.—**Faserhautgeweb v.** See **INOSCLEROMA**.—**Krebsartige v.** See **SCIRRHOMA**.—**Oberflächliche v.** See **CALLUS** (1st def.).—**Scirrhus v.** See **SCIRRHOMA**.—**V. der Krystalline**. See **HARD CATARACT**.—**V'sgeschwulst**. See **SCIRRHUS**.

VERHEILUNG (Ger.), n. $\text{Fe}^2\text{r-hil}^2\text{un}^2$. A healing over.

VERHEIMLICHUNG (Ger.), n. $\text{Fe}^2\text{r-him}^2\text{lichun}^2$. See **CELATION**.

VERHÖLUNG (Ger.), n. $\text{Fe}^2\text{r-ho}^2\text{ltun}^2$. See **LIGNIFICATION**.

VERHÖREN (Ger.), n. $\text{Fe}^2\text{r-hu}^2\text{r}^2\text{en}$. See **COPHOSIS** and **PARACUSIS**.

VERHORUNG (Ger.), n. $\text{Fe}^2\text{r-ho}^2\text{rnun}^2$. See **CORNIFICATION**.

VERHUNGERUNG (Ger.), n. $\text{Fe}^2\text{r-hu}^2\text{n}^2\text{erun}^2$. See **STARVATION**.

VERINE, n. $\text{Ve}^2\text{r-en}$. An alkaloid, $\text{C}_8\text{H}_4\text{N}_2\text{O}_8$, obtained as a decomposition product of veratrine; an amorphous substance melting at about 145°C . [B, 5, 270 (a, 38).]

VERJAUCHUNG (Ger.), n. $\text{Fe}^2\text{r-ya}^2\text{uchun}^2$. Putrefaction; an ichorous discharge. [a, 14.]

VERJUICE, n. $\text{Vu}^2\text{r-ju}^2\text{s}$. Fr., *verjus*. Ger., *Traubensauer*. See **OMPHACIUM**.

VERJUS (Fr.), n. $\text{Ve}^2\text{r-zhu}^2$. See **OMPHACIUM**.—**Suc de v.** [Fr. Cod.]. The fermented and filtered juice of unripe grapes mixed, perhaps, with one tenth as much black cherries. [B, 95 (a, 38).] See also **OMPHACIUM**.

VERKALKUNG (Ger.), n. $\text{Fe}^2\text{r-ka}^2\text{lkun}^2$. See **CALCINATION** and **Calcareous DEGENERATION**.

VERKÄSUNG (Ger.), n. $\text{Fe}^2\text{r-kazun}^2$. See **CASEATION**.

VERKEHRT (Ger.), adj. $\text{Fe}^2\text{r-kart}^2$. See **OBVERSE** and **INVERTED**.

VERKEHRTSEHEN (Ger.), n. $\text{Fe}^2\text{r-kart}^2\text{zaen}^2$. See **METAMORPHOSIA**.

VERKITUNG (Ger.), n. $\text{Fe}^2\text{r-ki}^2\text{tun}^2$. See **OBSTRUCTION**.

VERKLEBUNG (Ger.), n. $\text{Fe}^2\text{r-klabun}^2$. See **OCCLUSION**.

VERKNÖCHERUNG (Ger.), n. $\text{Fe}^2\text{r-knu}^2\text{ch}^2\text{erun}^2$. See **ECRINATION** and **OSTEOGENESIS**.—**Muskely**. See **SARCOSTOSIS**.—**V'skern**, **V'spunkt**. See **CENTRE of ossification**.

VERKNORPELUNG (Ger.), n. $\text{Fe}^2\text{r-kno}^2\text{rpelun}^2$. See **CHONDROGENESIS**.

VERKÖHLUNG (Ger.), n. $\text{Fe}^2\text{r-kolun}^2$. See **CARBONIZATION**.

VERKREIDUNG (Ger.), n. $\text{Fe}^2\text{r-kridun}^2$. See **Calcareous DEGENERATION**.

VERKRÜMMUNG (Ger.), n. $\text{Fe}^2\text{r-kru}^2\text{mun}^2$. See **CAMPIS** and **SCOLIOSIS**.

VERKRÜPPELUNG (Ger.), n. $\text{Fe}^2\text{r-kru}^2\text{p}^2\text{elun}^2$. A crippling, mutilation. [a, 14.]

VERKRUSTUNG (Ger.), n. $\text{Fe}^2\text{r-krustun}^2$. See **INCRUSTATION**.

VERKÜMMERND (Ger.), adj. $\text{Fe}^2\text{r-ku}^2\text{m}^2\text{ernd}$. See **TABESCENT**.

VERKÜMMERT (Ger.), adj. $\text{Fe}^2\text{r-ku}^2\text{m}^2\text{ert}$. Stunted; in botany, abortive. [a, 35.]

VERKÜMMERUNG (Ger.), n. $\text{Fe}^2\text{r-ku}^2\text{m}^2\text{erun}^2$. Marasmus, atrophy. [a, 14.]

VERKÜRZUNG (Ger.), n. $\text{Fe}^2\text{r-ku}^2\text{rtsun}^2$. See **CONTRACTION** and **SHORTENING**.—**V. der Ligamenta rotunda Uteri**. See **ADVANCEMENT of the round ligaments**.—**V'srückstand**. The contracture induced in a muscle by excessive exhaustion. [K, 16.]

VERLÄHMUNG (Ger.), n. $\text{Fe}^2\text{r-lamun}^2$. The condition of becoming lame; lameness. [a, 14.]

VERLANGEN (Ger.), n. $\text{Fe}^2\text{r-la}^2\text{n}^2\text{en}$. Desire, longing.

VERLÄNGERUNG (Ger.), n. $\text{Fe}^2\text{r-la}^2\text{n}^2\text{erun}^2$. See **ELONGATION**.

VERLARVT (Ger.), adj. $\text{Fe}^2\text{r-la}^2\text{rvt}$. See **MASKED** and **PERSONATE**.

VERLEBERUNG (Ger.), n. $\text{Fe}^2\text{r-lab}^2\text{erun}^2$. See **HEPATIZATION**.

VERLEBTHEIT (Ger.), n. $\text{Fe}^2\text{r-labt}^2\text{hit}$. See **DECREPITUDE**.

VERLEIMUNG (Ger.), n. $\text{Fe}^2\text{r-limun}^2$. See **AGGLUTINATION**.

VERLETZBARKEIT (Ger.), n. $\text{Fe}^2\text{r-le}^2\text{tsbar}^2\text{kit}$. Vulnerability. [a, 14.]

VERLETZUNG (Ger.), n. $\text{Fe}^2\text{r-le}^2\text{tsun}^2$. See **INJURY** and **LESION**.

VERLÖSCHEND (Ger.), adj. $\text{Fe}^2\text{r-lu}^2\text{sh}^2\text{end}$. See **DELIQUESCENT** and **EVANESCENT**.

VERMEHRUNG (Ger.), n. $\text{Fe}^2\text{r-marun}^2$. Increase, multiplication, reproduction.

VERMICELLI, n. $\text{Vu}^2\text{r-m-i}^2\text{se}^2\text{li}$. A dried dough of a worm-like form made from the flour of a small, hard-grained wheat grown in Italy. [a, 35.]

VERMICIDE, n. $\text{Vu}^2\text{r-m-i}^2\text{sid}$. From *vermis*, a worm, and *cadere*, to slay. Fr., v. A medicine that destroys intestinal worms. [a, 48.] Cf. **VERMIFUGE**.

VERMICULAR (Fr.), adj. $\text{Ve}^2\text{r-me-kul}^2\text{ar}$. See **VERMICULAR**; as a n., a body having a worm-like appearance or movement. [a, 48.]—**V. supérieure**. See **Superior vermiform PROCESS**.

VERMICULAR, Lat. $\text{Vu}^2\text{r-m-i}^2\text{cul}^2\text{ar}$. Lat. *vermicularis* (from *vermiculus*, a little worm). Fr., *vermiculaire*, *vermiculair*. Ger., *wurmartig*. Worm-like in appearance or in movement. [a, 35.]

VERMIFORM, adj. Vu^rm/i²-fo^rm. Lat., *vermiformis* (from *vermis*, a worm, and *forma*, form). Fr., *vermiforme*. Ger., *wurmformig*. Worm-shaped, worm-like.

VERMIFUGE, adj. Vu^rm/i²-fu^j. From *vermis*, a worm, and *fugare*, to put to flight. Fr., *v. vermifuge*. Having the property of expelling intestinal worms.

VERMINATION, n. Vu^rm/i²-a^u-shuⁿ. Lat., *verminatio* (from *verminare*, to have worms). Fr., *v. See HELMINTHIASIS*.

VERMINOUS, adj. Vu^rm/i²-u^s. Lat., *verminosus* (from *vermis*, a worm). Fr., *vermineux*. Due to or having the characters of worms. [A, 385 (a, 48).]

VERMIS (Lat.), n. m. Vu^rm/(we^rm)/i²s. Gen., *ver'mis*. Gr., *ἄμυς*, *Amys*. Fr., *v. 1. A worm or worm-like structure; in the pl., Vermes*, a group of worm-like animals (a term that has been employed by different taxonomists with great diversity of application, now comparatively little used). [a, 48.] 2. See *Vermiform* PROCESS (1st def.).—*V. bombycinus* (Arctius). See *HIPPOCAMPUS major*.—*V. cerebelli*. See *Vermiform* PROCESS (1st def.).—*Vermes cerebri*. See *Chorioid plexus*.—*V. cucurbitinus*. See *TENIA solium* (1st def.).—*V. digiti*. See *PARONYCHIA* (1st def.).—*V. du cerveau latéral* (Fr.). A convoluted projection in the cerebellar hemispheres of some of the lower animals, the termination of the restiform bodies. [I, 35 (K).]—*V. du cerveau médian* (ou moyen) (Fr.). See *Vermiform* PROCESS (1st def.).—*V. inferior* (cerebelli). Ger., *Untervurm*. See *Inferior vermiform* PROCESS.—*V. inferior posterior*. See *NODULE* (2d def.).—*V. intermedius*. See *Vermiform* PROCESS (1st def.).—*V. intermedius anterior*. See *Superior vermiform* PROCESS.—*V. intermedius inferior* (seu posterior). See *Inferior vermiform* PROCESS.—*V. intermedius superior*. See *Superior vermiform* PROCESS.—*Vermes laterales* (Günther). See *Cerebellar hemispheres*.—*V. major*. One of the cerebellar hemispheres. [I, 35 (K).]—*V. medinensis*. See *FILARIA medinensis*.—*V. superior* (cerebelli). See *Superior vermiform* PROCESS.—*V. superior posterior*. See *FOLIUM cacuminis*.—*V. terre*, *V. terrestris*. See *LUMBRICUS terrestris*.—*V. vesicularis* (eremita). See *CYSTICERCUS cellulosus*.—*V. vesicularis socialis*. See *CERNUS cerebrales*.

VERMISCHUNG (Ger.), n. Fe^r-mi³-sh^un². See *ALLOY* and *COMPOSITION*.

VERMIVORE (Fr.), n. Ve^r-me-vo^r. Lit., a worm-eater; a remedy which destroys intestinal parasites and digests them. [Bouchut, "Paris méd.," "Nouv. remèdes"; "N. Y. Med. Jour.," Sept. 19, 1885, p. 336.]

VERMOLKUNG (Ger.), n. Fe^r-mo³-lk^un². See *APPORESIS*.

VERMONT SPRING, n. Vu^r-mo³-nt¹. A chalybeate spring in Franklin County, Vermont. [L, 57 (a, 14).]

VERMOUTH, n. Vu^r-mut^h. Fr., *v. Ger., Wermuth*. A fortified white wine flavored with *Artemisia absinthium* and various other bitter and aromatic substances. [A, 385.]

VERNAL, adj. Vu^r-n¹-l. Lat., *vernalis*, *vernus* (from *ver*, the spring). Fr., *printanier*, *v. Ger., Frühling*. Pertaining to or occurring or appearing in spring. [a, 35.]

VERNARBUNG (Ger.), n. Fe^r-na^r-b^un². See *CICATRIZATION*.

VERNATION, n. Vu^r-n¹-a^u-shuⁿ. Lat., *vernatio* (from *vernare*, to bloom). Fr., *v. Ger., Knospenlage, Blätterknospenlage*. The arrangement of leaves in the bud. [Many of the terms applied to aestivation are also applicable to v.] [a, 35.]—*Imbricate* *v. v.* In which the leaves of the bud are applied over each other. [a, 35.]—*Valvate* *v. v.* In which the leaves, being nearly in a circle at the same level, touch each other by their edges. [a, 35.]

VERNICOSE, adj. Vu^r-n¹-i²-ko^s. Lat., *vernicosus* (from *vernix*, varnish). Ger., *firnisglänzend*. Shining as if varnished. [a, 35.]

VERNINE, n. Vu^r-n¹-en. A substance, C₆H₁₁N₄O₄, obtained from *Trifolium, Medicago sativa*, etc., occurring as fine acicular crystals. [B, 270 (a, 38).]

VERNIS (Fr.), n. Ve^r-n¹-e. See *VARNISH*.—*V. caséux*. See *VERNIX caseosa*.—*V. du Canada*. See *RHUS radicans*.—*V. du Japon*. See *RHUS vernicifera* and *AILANTUS glandulosa*.

VERNIX (Lat.), n. f. Vu^r-n¹/(we^rn)/i²x. Gen., *vern'icis*. 1. See *VARNISH*. 2. *Thea articulata*. 3. The genus *Toxicodendron*. [a, 35.]—*Resina* *v.* See *SANDARAC*.—*V. caseosa*. Fr., *entuit à-bac*, *vernix caséux*. Ger., *käsig*, *Schmiere*, *Hautschlacke*, *Fruchtschleim*. A viscid, whitish, fatty material found on the fetus at birth; a mixture of cast-off epithelium, downy hairs, and the secretion of the sebaceous glands.—*V. sandaraca*, *V. sicca*. See *SANDARAC*.

VERNONIA (Lat.), n. f. Vu^r-no³-i²-a^s. From *W. Vernon*, an English botanist. Fr., *vernonie*. Ger., *Vernonie*. Iron-weed; a genus of the *Vernoniaceae*, or *Vernonia* (a division or tribe of the *Compositae*). [a, 35.]—*V. anthelmintica*. Khatzun (or kinka) oil-plant of the East Indies. The nauseous, bitter seeds, which yield a solid green oil, are diuretic, powerfully anthelmintic, and, according to some, tonic and stomachic, and are used in Malabar for coughs and flatulency. They form a part of a powder used in snake-bites, and, mixed with lime-juice, are used to kill pediculi. The bitter leaves and roots are used externally in rheumatism. [a, 35.]—*V. arborescens*. West Indian febrifuge. The flowers and fruits are used in stimulating fomentations, and the leaves as an antispasmodic and diaphoretic. [a, 35.]—*V. chinensis*. A species found in southern Asia; used as a tonic, astringent, pectoral, and emmenagogue. [a, 35.]—*V. cinerea*. An East Indian and tropical African species, used as a tonic and diaphoretic. The root is used as a pectoral and in diarrhoea. The young leaves are eaten. [a, 35.]—*V. leptophylla*. A species found in the Moluccas; used

as a tonic, pectoral, and aphrodisiac. [a, 35.]—*V. nigritiana*. A species found in western Africa, where it is called *batiator*. The root is used as a febrifuge. [1st Gaz. hebdom. de méd. et de chir., May 25, 1888, p. 330 (a, 50).]—*V. noveboracensis*. New York iron-weed, flat-tops. The herb and root are said to be used against snake-bites. [a, 35.]—*V. praealta*. 1. See *V. noveboracensis*. 2. A North American species; considered alexipharmic and used like *V. noveboracensis*. [a, 35.]—*V. Rheedi*. An East Indian shrub doubtfully referred to this genus. The spicy leaves are diaphoretic, stomachic, etc. [a, 35.]—*V. scabra*. A Brazilian shrub. The leaves and flowers have a vanilla-like odor, and are used in ophthalmia and, together with the young branches, in aromatic baths and fomentations. [a, 35.]

VERNONIN, n. Vu^r-n¹-o³-i²-n. A glucoside, C₁₅H₂₄O₇, obtained from *Vernonia nigritiana*, a white hygroscopic powder. [B, 270 (a, 38).]

VERNUS (Lat.), adj. Vu^r-n¹/(we^rn)/u^s (u^s). See *VERNAL*.

VERÜDUNG (Ger.), n. Fe^r-u³-u³-u³. Atrophy, obliteration.

VEROLE (Fr.), n. Va-ro-l. An eruptive disorder, especially syphilis. [a, 14.]—*Fausse* *v.* See *VARICELLA*.—*Grosse* *v.* See *SYPHILIS*.—*Petit* *v.* See *SMALL-POX*.—*Pétite* *v. de l'esprit*. A poetical term for the reserve, bordering on melancholy, sometimes observed as the result of puberty in girls. [A, 18.]—*V. d'atarde*. See *VARICELLA*.—*V. bénigne*. See *BENIGN* SYPHILIS.—*V. d'Amboyne*. See *FRAMGESIA*.—*V. des vaches*. See *COW-POX*.—*V. galopante*, *V. grave*. See *MALIGNANT* SYPHILIS.

VEROLETTE (Fr.), n. Va-ro-l^{et}. See *VARICELLA*.

VEROLÉ (Fr.), adj. Va-ro-lek. See *SYPHILITIC*.

VERONICA (Lat.), n. f. Ve^r/(war)-o³-n¹-i²(ek)/a³. Perhaps from *verus*, true, and *eikon*, an image. Fr., *véronique*. Ger., *Ehrenpreis*. Cancer-wort, speedwell; a genus of the *Scrophulariaceae*. The *Veronica* are an order of plants consisting of *V. Pedicularis*, *Primula*, etc. The *Veronica* are a tribe of the *Veronica*. [a, 35.]—*V. americana*. American brooklime, found in the United States and Canada; formerly used in scurvy and as an alternative. [a, 35.]—*V. anagallis*. Fr., *mouron d'eau*, *petit beccabunga*. Ger., *Wasserehrenpreis*, *Wassergauchheil*. Great water-speedwell, water-pimpernel, faverel; found in Europe, northern Asia, northern Africa, and North America. The fresh herb, *herba anagallis aquatica*, is used as a laxative and the dried herb as a cathartic. [a, 35.]—*V. arvensis*. Fr., *velvette sauvage*. Wall- (or spiked field-, or corn-) speedwell; a European and North American species. The leaves are said to be stimulant, diuretic, and antiscorbutic. [a, 35.]—*V. beccabunga*. Fr., *beccabunga* [Fr. Cod.], *beccabunga*, *grand beccabunga*, *cresson de chien*, *laïue* (ou *salade*) *de chouette*. Ger., *Bachbohnen*, *Bachbohnen*, *Wasserrungen*, *Quellehrenpreis*, *Wassergauchheil*. Brooklime, horse-weed grass, water-pimpernel; a succulent salad plant found in all climates, especially in the temperate regions. The fresh herb, *herba recens beccabunga* (seu *veronica beccabunga*, seu *veronica aquatica*, seu *anagallis aquatica*), is used as an antiscorbutic and in chronic diarrhoea. [a, 35.] Cf. *V. americana*.—*V. chamædrys*. Fr., *fausse germandrée*, *nichol-chaine*, *veronique*, *chamedrys*, *veronique chenette* (ou *des bois*, ou *des haies*, ou *germandrée*, ou *petit chrys*). Ger., *Gamander*, *derehrenpreis*, *wilder Gamander*, *kleines Gamanderlein*, *Blaumanderle*, *Frauenbiss*. Angel's-eyes, God's-eye, bird's- (or blue-) eyes, blue stars, female fluellen, gamander speedwell; a European species. The herb, gathered usually with the flower, was formerly official as *herba chamædrys* (seu *chamedrys*, seu *chamedrys*) *spuria* *fennina*, and was used like *V. officinalis*. [a, 35.]—*V. latifolia*. See *V. teucrium*.—*V. major*, *V. mas*. See *V. officinalis*.—*V. montana*. The mountain-speedwell of Europe; similar to *V. chamædrys* in properties. [a, 35.]—*V. officinalis*. Fr., *veronique officinale* (ou *malle*, *herbe aux ladres*, *le d'Europe* (ou *du Nord*). Ger., *ächter* (oder *gebräuchlicher*, oder *gemeiner*) *Ehrenpreis*, *Grossbachengel*, *Grundheil*, *europäischer*, *Thee*, *Köhlerkraut*, *Hundkraut*, *Hundkraut*, *Frauenbiss*, *Frauenbiss*, *Hühnerauge*, *aller Welt*. European tea, fluellen, common medicinal tea-speedwell, ground-hele; found throughout all (especially temperate) climates. The stem, *herba veronica* (seu *veronica officinalis* seu *majoris*, seu *maris*, seu *vulgaris* *serpentina*), seu *betonica* *alba* (seu *Pauli*), seu *alsines* *palustris*), including the leaves and flowers, is astringent and tonic. [a, 35.]—*V. parvifolia*. A New Zealand plant furnishing koromiko (q. v.).—*V. scutellata*. Fr., *veronique à feuilles linéaires* (ou *à écusson*). The bog- (or marsh-) speedwell of Europe. The stimulant stomachic tops are used like tea. [a, 35.]—*V. spicata*. The spike-flowered speedwell of Europe; used like *V. officinalis*. [a, 35.]—*V. teucriolia*, *V. teucrium*. Fr., *veronique à feuilles de germandrée*, *germandrée d'atarde*, *teucrie* *d'Allemagne*, *teucrie*, *teucrie*, *veronique des prés*. Ger., *dreiblättriger* (oder *edler*, oder *wahrer*) *Gamander*, *derehrenpreis*, *Erabächengel*, *Erabächengel*. Hungarian (or saw-leaved) speedwell. The herb, *herba chamædrys* (seu *chamedrys*, seu *chamedrys*) *spuria* *maris* (seu *veronica teucriolia*), was formerly used like that of *V. officinalis*. [a, 35.]—*V. triphylos*. Fr., *veronique à trois feuilles*. Ger., *dreiblättriger* *Ehrenpreis*, *blaves* *Hungerblümchen*, *Händelkraut*. A European species; formerly used, especially in jaundice, under the name of *herba alsines triphylla*. [a, 35.]—*V. virginica*. Culver's physic (or root), great Virginian speedwell; a North American herb. The bitterish, somewhat acid rhizome is the *leptandra* of the U. S. Ph. In its dried state it is a mild cathartic and is recommended in duodenal indigestion and chronic constipation. The eclectics use it in place of mercurials, though it has but little influence on the liver. The fresh root is a violent purgative and emetic. [a, 35.]—*V. vulgaris* *serpens*. See *V. officinalis*.

VERORDNUNG (Ger.), n. Fe^r-o³-rd^u-nun². See *PRESCRIPTION*.

VERPFLANZUNG (Ger.), n. Fe^r-pfla³-nts^u-u³. See *TRANSPLANTATION*.

VERPFLEGEUNG (Ger.), n. Fe^r-pfla³-u³-u³. 1. Maintenance. [a, 14.] 2. See *NURSING* (4th def.).

VERPRASSELUNG (Ger.), n. Fe²r-pra'se'2l-un². See CREPITATION.

VERPRELLUNG (Ger.), n. Ve²r-pre'l'lun². See CONTUSION (2d def.).

VERPUFFUNG (Ger.), n. Fe²r-puff'un². See EXPLOSION.

VERQUICKUNG (Ger.), n. Fe²r-kw'2k'un². See AMALGAMATION.

VERRE (Fr.), n. Ve²r. See GLASS (1st and 2d def's).—**Fiel** (ou Sel) de v. See ANATRON and SEL de v.—**V. liquide**. See WATERGLASS.

VERRÉE (Fr.), n. Ve²r-ra. A glassful; a measure of 150 grammes (about 5 oz.) of distilled water. [B, 93 (a, 14).]

VERRENKUNG (Ger.), n. Fe²r-re'n'2k'un². See SPRAIN.

VERRICHTUNG (Ger.), n. Fe²r-r'2cht'un². The function of an organ; also the exercise of that function. [a, 14, 48.]

VERRUCA (Lat.), n. f. Ve²r(we²r)-ru²(ru)/ka². Gr. θύμων, Fr., verrue. Ger., Warze. 1. A wart; a circumscribed hypertrophy of the papillary layer of the corium and of the epidermis, producing a rounded, flat or acuminated, smooth or rough and horny protuberance of the skin. [G.] 2. A pedunculated wart growing from a mucous surface, such as that of the vulva. [A, 42.] Cf. THYMION (2d def.). 3. In botany, a sessile wart-like elevation. [a, 35.]—**V. alicolia**. See VERRUGAS.—**V. ani**. A condyloma in the region of the anus. [G.]—**V. caduca**. A falling or transitory wart; a wart that tends after a short duration to disappear spontaneously. [G.]—**V. cancrrosa**. See CANCER verrucosus.—**V. carnea**, **V. carnosia**. See FIBROMA molluscum and CONDYLOMA.—**V. congenita**. A congenital wart; a v. appearing at or shortly after birth. Frequently more than one is present, occurring often along the course of a cutaneous nerve (see PAPILLOMA neuropathicum). Sometimes it is pigmented and hairy (see NÆVUS verrucosus). [G.]—**V. febrilis**. See VARIOLA verrucosa.—**V. filiformis**. See ACROCHORDON (2d def.).—**V. follicularis**. Fr., verrue seborrhéique (ou plate de la vieillesse). Ger., Sebumwarze [Hebra], Comedonenscheibe. A disease first described by Hebra, consisting in an accumulation of dried horny and sebaceous matter about the orifices of the sebaceous glands upon the surface of the skin, forming circumscribed, dark-colored, rough, wart-like elevations, which, on being removed, show the skin beneath to be intact. [Barthélemy, "Ann. de dermat. et de syph.," 1881, No. 3; G, 3, 75.]—**V. formicaria**. Fr., myrmécie. Ger., Ameisenwarze. A wart developed in the palmar and plantar regions, producing painful itching. [L, 43.]—**V. gallica**. See CONDYLOMA latum.—**V. glabra**. A smooth wart, one the surface of which is not broken by clefts. [G.]—**V. gregalis**. A wart of a kind occurring in clusters on the hands or face. They often disappear spontaneously. [G, 11, 17.]—**V. lobosa**. A wart characterized by vertical clefts. [G.]—**V. madida** [Plenck]. See CONDYLOMA latum.—**V. mollusca**. See V. carnea.—**V. necrogenica**. Ger., Leichten tuberkel, Leichenwarze. Anatomical tubercle; a form of tuberculosis verrucosa cutis occurring on the hands of persons engaged in dissecting the dead bodies of men or animals. There first appears a pustule with an inflamed base, which is succeeded by a tough, warty growth, with a rough, horny surface, often broken by numerous clefts or fissures. It may disappear in time spontaneously or may remain for life. [G.]—**V. non gallica**. See CONDYLOMA acuminatum.—**Verruca** oesophagi. A simple elongation of a group of normal papillæ of the oesophageal mucous membrane, with simultaneous thickening of their epithelial covering. [a, 34.]—**Verruca palpebrarum**, **V. penilis**. See ACROCHORDON (2d def.).—**V. perstans**. A wart that persists for a long time, that does not tend to disappear spontaneously. [G.]—**V. plana**. A wart that has a flattened appearance, and is not much elevated above the surrounding skin. [G.]—**V. plana juvenilis**. Flat warts occurring in young people, affecting usually the backs of the hands or the face. [Mntsh. f. prakt. Dermat., ix, 10, p. 471 (G).]—**V. rhagodea**. A wart with a cleft or fissured surface. [G.]—**V. senilis**. Ger., Greisenwarze, Alterswarze. A wart occurring on the trunk, face, or extremities of an old person. They are usually discolored, flat, and uneven, and are easily detached, usually leaving a bleeding surface. They differ from ordinary warts chiefly in that the papillæ of the skin are very slightly implicated. [G, 34.]—**V. sessilis**. See V. plana.—**V. simplex**. See ACROCHORDON (2d def.) and V. vulgaris.—**V. syphilitica**. Condyloma of syphilitic origin. [G.]—**Verruca venerea**. Of Plenck, tubercular syphiloderm of the face with the tubercles in compact clusters. [G.]—**V. vulgaris**. 1. Common or simple wart; a tough, insensitive, more or less elevated growth, varying in size from that of a pin-head to that of a pea. Its surface is sometimes smooth, but often rough and split into many divisions by numerous vertical clefts. It is most common in children, and occurs usually on the hands. [G.] 2. Of Alibert, see V. plana.

VERRUCARIA (Lat.), n. f. Ve²r(we²r)-ru²(ru)-a(a)²/ri²a-a². From verruca, a wart. Fr., verrucarie. Ger., Warzenflechte. The typical genus of an order (Verrucariales, Verrucariae, Verrucariæ, Verrucarieæ, Verrucariæ, Verrucari, or Verrucarine) of angelicarpous lichens, various species of which are often found on medicinal barks; also the *Heliotropium europæum*, *Calendula officinalis*, or *Lapsana communis*. [a, 35.]

VERRUCATUS (Lat.), adj. Ve²r(we²r)-ru²(ru)-at(a)²/u's-(u's). See VERRUCOSE.

VERRÜCKT (Ger.), adj. Fe²r-ru²k't'. Dislocated; mentally deranged. [A, 521 (a, 48).]

VERRÜCKTHEIT (Ger.), n. Fe²r-ru²k't'h'it. See IDIOCY and INSANITY.—**Hallucinatorische V.** Dementia with hallucinations. [L, 57 (a, 14).]—**Originäre V.** See ORIGINAL MONOMANIA.—**Primäre V.** See MONOMANIA.

VERRÜCKUNG (Ger.), n. Fe²r-ru²k'un². See DISLOCATION.—**Fiebertv.** Febrile delirium. [a, 34.]

VERRUCOSE, VERRUCOUS, adj's. Ve²r(we²r)-ru²(ru)-os, -u's. Lat., verrucosus. Fr., verrucueux. Ger., verrückt, warzig, warzenartig. Warty, of the nature of a wart; attended with or covered with warts or wart-like growths. [G.; a, 35.]

VERRUCULOSE, adj. Ve²r(we²r)-ru²(ru)-os. Lat., verruculosus (from verrucula, a little wart). Fr., verruculeux. Ger., kleinwarzig. Covered with minute warts. [a, 35.]

VERRUE (Fr.), n. Ve²r-ru². See VERRUCA.—**V. charnue**. See FIBROMA molluscum.

VERRUGA (Sp.), n. Ve²r-rug'a². See VERRUCA and VERRUGAS.—**V. andina**, **V. peruana**. See VERRUGAS.

VERRUGAS (Sp.), n. pl. Ve²r-rug'a²s. An endemic disease resembling framboesia in its general appearances, which is not known to exist except in Peru, on the Pacific slope of the Andes. Fatigue, debility, and non-acclimation are predisposing causes; neither age, sex, nor race seems to have any influence on the disease, and it attacks animals as well as man. There is a period of incubation of from twenty to forty days, in which malaise, lassitude, depression, and gastric disturbances are present; subsequently there are muscular soreness, arthritic and spinal pain (worse at night), and sometimes more or less spasm, producing torticollis or opisthotonus, etc. A chill initiates a fever (Onyza fever) that is accompanied by a rise of temperature to from 102° to 104° F. (39° to 40° C.), defervescence occurring about midnight. The pulse is soft and compressible, the blood-corpuscles are decreased in number, and there is loss of hemoglobin. The mind becomes dull, there is effusion into the serous cavities, and, after the twentieth day, there is an eruption on the face, body, limbs, and mucous membranes, of small reddish spots that become papules and eventually form wart-like, sessile tumors usually of about the size of a pea. According to Izquierdo [Arch. f. path. Anat. u. Physiol. u. f. klin. Med., xcix, p. 411], they are connective-tissue neoplasms, having a strong resemblance to sarcomata. They are very vascular, and are associated with a peculiar bacillus (see BACILLUS of verruga peruana). They eventually desiccate, leaving no scar. Occasionally they attain a diameter of several centimetres, and exhaust the patient by suppuration and hemorrhage. The eruption may last from a few weeks to several months. Convalescence is slow. [B, a, 34.]—**Frog v.** V.; so called from the resemblance of the eruption to the skin of the frog. [a, 34.]—**Mule v.** V. in mules. [a, 34.]—**Peruvian v.** See V.

VERSAILLES (Fr.), n. Ve²r-sa²-e'ly'. A place in the department of the Seine-et-Oise, France, where there are gaseous and chalybeate springs. [L, 49 (a, 14).]

VERSAILLES SPRINGS, n. Vu²r-salz'. A place in Brown County, Illinois, where there are gaseous and alkaline springs. [Anderson (a, 14).]

VERSAMENTO A BISACCIA (It.), n. Ve²r-sa²-me²nt'o a² bez-a²t'che-a². Lit., a saddle-bag effusion. An effusion of blood situated both without and within the dura, from a lesion of a branch of the middle meningeal artery, with simultaneous perforation of the dura. [Ceccherelli, "Gazz. med. ital., Prov. Venete," Apr. 29, 1882, p. 141.]

VERSÄURUNG (Ger.), n. Fe²r-zo'ir-un². See ACIDIFICATION.

VERSCHIEBUNG (Ger.), n. Fe²r-she'b'un². See DISLOCATION and DISPLACEMENT (3d def.).—**Nahtv.** See HEAD-MOLD SHOT.—**Zeitv.** See HETEROCHRONY.

VERSCHIEDENARTIG (Ger.), adj. Fe²r-she'd'e'n-a't'ri-g. See HETEROGENEOUS.

VERSCHIEDENGESTALTET (Ger.), adj. Fe²r-she'd'e'n-ge²-sta't'e't. See DIVERSIFORM.

VERSCHLAGEN (Ger.), n. Fe²r-shla'g'e'n. Rheumatism or any other disease (especially of a horse) contracted by sudden cooling after perspiration. [L, 30 (a, 14).]

VERSCHLEIMUNG (Ger.), n. Fe²r-shlim'un². 1. The copious secretion of mucus. 2. The condition of being covered with mucus.

VERSCHLEPPBARKEIT (Ger.), n. Fe²r-shle'p'ba'r-kit. Transportability (e. g., of a contagium). [a, 14.]

VERSCHLIESSMUSKEL (Ger.), n. Fe²r-shles'musk-e'l. See OBTURATOR (1st def.) and SPHINCTER.

VERSCHLIESSUNG (Ger.), n. Fe²r-shles'sun². Occlusion, closure, atresia.

VERSCHLIMMERN (Ger.), v. tr. and intr. Fe²r-shli'm'm'e'r'n. To make or to become worse. [a, 14.]

VERSCHLIMMERUNG (Ger.), n. Fe²r-shli'm'm'e'r-un². Deterioration. [a, 14.]

VERSCHLINGUNG (Ger.), n. Fe²r-shli'n'2n'un². 1. See DEGLUTITION. 2. An entwining. [a, 14.]

VERSCHLOSSENSEIN (Ger.), n. Fe²r-shlo's'e'n-zin. Occlusion, closure.

VERSCHLUCKEN (Ger.), n. and v. tr. Fe²r-shluk'e'n. 1. To swallow. 2. As a n., (a) hicough; (b) deglutition. [a, 14.]

VERSCHLUCKUNG (Ger.), n. Fe²r-shluk'un². See DEGLUTITION.

VERSCHLUSS (Ger.), n. Fe²r-shlus'. See ATRESIA, CLOSURE, and OCCLUSION.

VERSCHMÄCHTUNG (Ger.), n. Fe²r-shma'ch't'un². Languishing, starving. [a, 14.]

VERSCHMÄLERUNG (Ger.), n. Fe²r-shma'l'e'r-un². See STENOSIS.

VERSCHMELZUNG (Ger.), n. Fe²r-shme'l'ts-un². Fusion, confluence. See also ANKLYSIS (2d and 3d def's).

VERSCHNEIDUNG (Ger.), n. Fe²r-shnid'un². See CASTRATION.

VERSCHNITTENER (Ger.), n. $\text{Fe}^2\text{r-shn}^2\text{t}^2\text{e}^2\text{n-e}^2\text{r}$. See **CASTRATUS**.

VERSCHÜFFUNG (Ger.), n. $\text{Fe}^2\text{r-sho}^2\text{rf-un}^2$. The formation of scurf. [a. 14.]

VERSCHREIBUNG (Ger.), n. $\text{Fe}^2\text{r-shri}^2\text{b-un}^2$. See **PRESCRIPTION**.

VERSCHWÄRUNG (Ger.), n. $\text{Fe}^2\text{r-shwa}^2\text{r-un}^2$. See **ULCERATION**.

VERSCHWINDEND (Ger.), adj. $\text{Fe}^2\text{r-shwi}^2\text{nd-e}^2\text{nd}$. See **DELIQUESCENT** and **EVANESCENT**.

VERSCHWITZEN (Ger.), v. tr. and intr. $\text{Fe}^2\text{r-shwi}^2\text{ts-e}^2\text{n}$. 1. To perspire ; to excrete by perspiration. 2. To cease sweating.

VERSEHEN (Ger.), n. $\text{Fe}^2\text{r-za}^2\text{e}^2\text{n}$. See **HALLUCINATION**.

VERSEIFUNG (Ger.), n. $\text{Fe}^2\text{r-zif-un}^2$. See **SAPONIFICATION**.

VERSETZUNG (Ger.), n. $\text{Fe}^2\text{r-ze}^2\text{ts-un}^2$. 1. See **ALLOY**. 2. See **METATHESIS** and **METASTASIS**.

VERSICOLOR (Lat.), adj. $\text{Vu}^2\text{rs}(\text{we}^2\text{rs})\text{-i}^2\text{k-o}^2\text{l-o}^2\text{r}$. From *vertere*, to turn, and *color*, color. Fr., v. Ger., *verschiedenfarbig*. 1. Variegated. 2. Of corollas, etc., having the sides differing in color. 3. Changing color. [a. 35.]

VERSILBERN (Ger.), v. tr. $\text{Fe}^2\text{r-zi}^2\text{lb-e}^2\text{rn}$. To silver (q. v.).

VERSIO (Lat.), n. f. $\text{Vu}^2\text{r}(\text{we}^2\text{r})\text{zhi}^2\text{d}(\text{si}^2\text{r})\text{-o}$. Gen., -on^{is}. See **VERSION**.—V. in clunes. See **Pelvic version**.

VERSION, n. $\text{Vu}^2\text{r-zhu}^2\text{n}$. Gr., *στροφή*. Lat., *versio* (from *vertere*, to turn). Fr., v. Ger., *Wendung* (1st def.), *Lageab- weichung* (2d def.). 1. The operation of turning the fetus in utero so as to change the presenting part materially. 2. A deviation of an organ, especially the uterus, from its natural posture ; an inclination.—**Abdominal v.** See **External v.**—**Ano-pelvic v.** Of Cazeaux and Guéniot, a method of pelvic v., recommended in difficult cases, in which the child is seized by the pubic arch or the tip of the coccyx, a finger being hooked into the mother's rectum for the purpose. [A. 15.]—**Bipolar v.** Turning by acting upon both poles of the foetus. See also *Combined external and internal v.*—**Busch's cephalic v.** See under **METHOD**.—**Cephalic spontaneous v.** That variety of spontaneous v. in which the cephalic pole engages. [A. 24.]—**Cephalic v.** Syn.: *head-turning, rectification* (applied to a mere change of position). Turning so as to cause the head to present in combined (external and internal) v. Fr., v. *par manœuvres internes et externes combinées* (ou combinées, ou bipolaire, ou mixte). Ger., *combinirte äussere und innere Wendung*. Of J. B. Hicks, a variety of bipolar v. ;

VERSPRECHEN (Ger.), n. $\text{Fe}^2\text{r-spre}^2\text{ch}^2\text{e}^2\text{n}$. See **HETERO-LALIA**.

VERSPRINGEN (Ger.), n. $\text{Fe}^2\text{r-spri}^2\text{zn}^2\text{e}^2\text{n}$. See **SPRAIN**.

VERSTAND (Ger.), n. $\text{Fe}^2\text{r-sta}^2\text{nd}$. Sense, meaning ; intelligence, wit ; understanding, intellect. [A. 450 (a. 17).]—**V'esbe-raubung**. See **DEMENTIA**.—**V'eskrankheit**. See **INSANITY**.—**V'eschwäche**. See **DYSNUSIA**.—**V'estörung**. Any intellectual disorder. [a. 34.]—**V'esinnne**. See **Intellectual SENSES**.—**V'esver-wirung**. See **PARANOA**.

VERSTÄRKUNG (Ger.), n. $\text{Fe}^2\text{r-stark-un}^2$. See **CONCENTRATION**, **EXACERBATION**, and **INTENSITY**.

VERSTARUNG (Ger.), n. $\text{Fe}^2\text{r-sta}^2\text{r-un}^2$. Stiffness, numbness. [A. 450 (a. 17).]

VERSTAUCHUNG (Ger.), n. $\text{Fe}^2\text{r-sta}^2\text{u}^2\text{ch}^2\text{-un}^2$. See **SPRAIN**.

VERSTEINERUNG (Ger.), n. $\text{Fe}^2\text{r-stin}^2\text{e}^2\text{r-un}^2$. See **Calcareous DEGENERATION** and **PETRIFICATION**.

VERSTOPFUNG (Ger.), n. $\text{Fe}^2\text{r-sto}^2\text{pf-un}^2$. See **ASTRICTIO**, **CONSTIPATION**, **OBSTIPATION**, and **OBSTRUCTION**.—**Albuminöse V.** See **Amyloid DEGENERATION**.—**Leibesv.** See **CONSTIPATION** and **OBSTIPATION**.—**V'muskel**. See under **OBSTRUTOR** (1st def.).

VERSTOPFUNGSBAND (Ger.), n. $\text{Fe}^2\text{r-sto}^2\text{pf-un}^2\text{-ba}^2\text{nd}$. See **Obturator LIGAMENT**.—**Aeusseres V.** See **Posterior occipito-atlantal LIGAMENT**.

VERSTREICHEN (Ger.), **VERSTREICHUNG** (Ger.), n's. $\text{Fe}^2\text{r-strich}^2\text{e}^2\text{n}$, -un². The act of spreading out. [a. 14.]—**V. der Vaginalportion**. The shortening of the canal of the cervix uteri formerly supposed to take place during pregnancy.

VERSTÜMMELUNG (Ger.), n. $\text{Fe}^2\text{r-stu}^2\text{m-me}^2\text{l-un}^2$. See **MUTILATION**.

VERSTUMMUNG (Ger.), n. $\text{Fe}^2\text{r-stum}^2\text{-un}^2$. See **APHONIA**.

VERSUCH (Ger.), n. $\text{Fe}^2\text{r-zuch}^2$. See **ASSAY**, n., and **EXPERIMENT**.—**Klopfv.** See **AUSCULTATION**.

VERT-DE-GRIS (Fr.), n. $\text{Ve}^2\text{r-d-gre}$. See **COPPER subacetate**.

VERTEBRA (Lat.), n. f. $\text{Vu}^2\text{rt}(\text{we}^2\text{rt})\text{e}^2\text{b-ra}^2$. From *vertere*, to turn. Gr., *σπόνδυλος*, *σπονδυλος*. Fr., *vertèbre*. Ger., *Wirbel*. 1. One of the osseous segments of which the "skeleton proper" is made up. It consists typically of a number of osseous pieces definitely arranged so as to form two wings, a dorsal and a ventral, meeting in a common centre (the centrum), which inclose respectively the central nervous system and the circulatory organs and vis-

only two or three fingers are introduced into the uterus, and with them the presenting pole is pushed away from the brim of the pelvis while the other hand, applied to the abdominal wall, presses, or slides the opposite pole down into the pelvic inlet.—**D'Outre- pont's cephalic v.** See **D'Outrepoint's METHOD** of **cephalic v.**—**External v.** Fr., v. *par manœuvres externes*. Ger., *Wendung durch äussere Handgriffe*. V. by external manipulation solely.—**Forced v.** See **ACCOUCHEMENT forcé**.—**French method of v.** A method of podalic v. in which the hand is first directed to the breech as a guide, and then follows down between the thighs to the feet. [A. 61.] Cf. *German method of v.*—**German method of v.** A method of podalic v. in which the hand is carried up on the abdominal aspect of the fetus directly to the feet. [A. 61.] Cf. *French method of v.*—**Hicks's method of v.** See **Combined v.**—**Internal v.** Fr., v. *par manœuvres internes*. Ger., *Wendung durch innere Handgriffe*. V. with the hand carried into the uterus.—**Mixed v.** See **Combined v.**—**Pelvic spontaneous v.** That variety of spontaneous v. in which the pelvic pole engages. [A. 24.]—**Pelvic v.** Fr., v. *pelvienne*. Ger., *Wendung auf den Steiss*. Turning by the breech ; v. by the pelvic pole.—**Podalic v.** Lat., *in pedes versio*. Fr., v. *podalique*. Ger., *Wendung auf die Füße*. Turning by the feet.—**Spontaneous v.** Ger., *Selbstwendung*. The process by which a transverse presentation of the fetus is converted by the powers of nature into a presentation of one or the other pole. See also **Cephalic spontaneous v.**, **Pelvic spontaneous v.**, and **Spontaneous evolution**.—**Two-finger v.** V. by the introduction of two fingers within the uterus.—V. by the breech. Lat., *in pedes versio*. See **Pelvic v.**—V. by the head. See **Cephalic v.**—**V. monopode** (Fr.), V. on one leg. Podalic v. in which only one foot is brought down.

cera, and are known as the neural and hæmal arches (q. v.). 2. As commonly used, one of the separate pieces which make up the vertebral column. [L.]—**Amphicœlous v.** [Huxley]. A v. of which the body is concave both before and behind. Cf. **Pro-cœlous v.** and **Opisthocœlous v.**—**Basilar v.** The last lumbar v.—**Caudal vertebrae**. 1. The vertebrae of the tail. [L. 41 (a. 14).] 2. In man, see **Coccygeal vertebrae**.—**Cephalic vertebrae**. Ger., *Kopfwirbel*. The bones of the skull considered as vertebral in type. Some writers restrict the term to such of the cranial bones as are developed from primordial cartilage, excluding those of intra-membranous formation. Cf. **Cranial vertebrae**.—**Cervical vertebrae**. The anterior or superior seven of the vertebrae, the two nearest the skull being termed the atlas and axis. They have the transverse processes perforated for the vertebral artery, the spinous process short and bifid and the lumen of the neural arch somewhat triangular and larger than in the dorsal or lumbar vertebrae. [L.]—**Coccygeal vertebrae**. Ger., *Steiss-wirbel*. Syn.: **caudal vertebrae**. The vertebrae of the coccygeal region. They are rudimentary, commonly four in number, sometimes five, seldom three.—**Cranial vertebrae**. Ger., *Schädel-wirbel*. Vertebrae whose component parts consist of cranial bones and the osseous and cartilaginous appendages of the skull. The theory of their existence was advanced by Goethe and Oken and elaborated by Cuvier and Sir Richard Owen. Their homology with true vertebrae is no longer accepted on embryological evidence. [L.]—**Dorsal vertebrae**. The vertebrae, twelve in number, with which the ribs articulate. They are especially characterized by articular surfaces for the ribs, downward-sloping spinous processes, and a small circular lumen of the neural arch. [L.]—**False vertebrae**. The fused segments of the coccyx and the sacrum.

[L.]—First cervical v. See ATLAS.—Fixed vertebrae. See False vertebrae.—Fronto v., Fronto-mandibular v. A cranial v. having the body of the presphenoid as its centrum, its neural arch made up of the presphenoid, orbito-sphenoid, and frontal bones, and its hæmal arch consisting of the vomer and the prefrontal and nasal bones. [L, 27].—Lumbar vertebrae. Ger., *Lendenwirbel*. The five vertebrae which lie above or anterior to the sacrum. They lack costal articular surfaces, and the transverse diameters of their bodies is greater than the antero-posterior.—Movable vertebrae. See True vertebrae.—Nasal v., Nasoturbinal v. A cranial v. with its vomer as its centrum, its neural arch made up of the ethmoid and nasal bones, and its hæmal arch of the turbinate bones. [L, 13].—Occipital v., Occipito-hyoid

A LUMBAR VERTEBRA, VIEWED FROM ABOVE.

v. The basilar process of the occipital bone (centrum), the lateral and anterior portions of the same bone and the mastoid walls of the tympanum (neural arch), and the scapulae, clavicles, and hyoid bones (hæmal arch). [L, 13].—Opisthocœlous v. [Huxley]. A v. having its body concave behind. Cf. *Procoelous v.* and *Amphicoelous v.*—Parietal v., Parieto-maxillary v. A cranial v. having the body of the basisphenoid bone as its centrum, its neural arch made up of the basisphenoid, alisphenoid, parietal, and mastoid bones, and its hæmal arch of the inferior maxilla. [L, 13, 27].—Pelvic vertebrae. See Sacral vertebrae.—Primitive v., Primordial vertebrae. See Mesoblastic somites.—Procœlous v. [Huxley]. A v. having its body concave in front. Cf. *Amphicoelous v.* and *Opisthocœlous v.*—Sacral vertebrae. Fr., *vertèbres*

A LUMBAR VERTEBRA, VIEWED Laterally.

saeries. Ger., *Kreuzbeinwirbel*. The segments, five in number, which in adult life fuse to form the sacrum. [L.]—Sphenofrontal v. See Fronto-v.—Thoracic vertebrae. Ger., *Briustwirbel*. See Dorsal vertebrae.—Triacspid v. The sixth cervical v. in lower animals. [L, 13].—True vertebrae. Ger., *wahre Wirbel*. The vertebrae which are not fused in adult life, i. e., the cervical, dorsal, and lumbar. [L.]—United vertebrae. See False vertebrae.—Vertebrae abdominales (seu abdominis). See Lumbar vertebrae.—Vertebrae caudales. See Caudal vertebrae.—Vertebrae cervicis. See Cervical vertebrae.—Vertebrae coccygeales. See Coccygeal vertebrae.—Vertebrae colli. See Cervical vertebrae.—Vertebrae interscapulii [Vesalius]. See Dorsal vertebrae.—Vertebrae lumbales (seu lumborum). See Lumbar vertebrae.—V. magna [Realdus]. See ATLAS.—V. prominens. The seventh cervical v.; so called on account of the prominence of its spinous process. [C.]—Vertebrae spuriae (ossis sacri). See False vertebrae.—Vertebrae thoracicae (seu thoracis). See Dorsal vertebrae.—Vertebrae verae. See True vertebrae.

VERTEBRAL, adj. *Vuʹrt/eʹ-brʹl*. Lat., *vertebralis*. Fr., *vertébral*. Ger., *wirbelig*. 1. Pertaining to a vertebra. 2. Having vertebrae, vertebrate. [C.]

VETEBRARTERIAL, adj. *Vuʹrt/eʹ-b-rʹrt-eʹriʹ-l*. Pertaining to the vertebral arteries or veins. [L, 153.]

VERTEBRATA (Lat.), n. n. pl. *Vuʹrt/(weʹrt)-eʹb-ratʹ(rʹstʹ)/aʹ*. From *vertebra* (q. v.). Fr., *vertébrés*. Ger., *Wirbelthiere*. 1. Animals having a backbone, or spinal column. They are distinguished

by a partition, shown in a transverse or vertical section, completely separating the body into two cavities: the dorsal (containing the cerebro-spinal nervous system), and the ventral (containing the heart, alimentary canal, and ordinarily the sympathetic nervous system). The V. are divided into three primary groups: *Ichthyopsida* (fishes and amphibians), *Sauropsida* (reptiles and birds), and *Mammalia*. Haeckel proposes the division into *Leptocardia* and *Pachycardia*. [L, 12.] 2. A phylum of the animal kingdom characterized by a notochord, pharyngeal clefts, and a dorsal median nerve tract, derived from the epiblast, beneath the surface of the body and usually tubular. It includes the *Craniata*, *Cephalochorda*, *Unichorda*, and *Hemichorda*. [L, 121.]

VERTEBRATE, adj. *Vuʹrt/(eʹb)-rat*. Lat., *vertebratus, vertebratus*. Fr., *vertébré, vertébral*. Ger., *wirbelartig, gewirbelt*. 1. Pertaining to a vertebra; having vertebrae; as a n., a v. animal. [C.] 2. In botany, (a) see LOMENTACEOUS; (b) having the blade connected with the petiole by a joint (said of a leaf). [a, 35.]

VERTEBRO-BASILAR, adj. *Vuʹrt/(eʹb-ro-baʹsʹ/iʹl)-aʹr*. Pertaining to the vertebrae and the lower portion of the skull, especially the basilar bone or process. [L.]

VERTEBRO-CHONDRAL, adj. *Vuʹrt/(eʹb-ro-kondʹrʹl*. Connecting the vertebrae and the costal cartilages. [L.]

VERTEBRO-COSTAL, adj. *Vuʹrt/(eʹb-ro-koʹstʹ/tʹl*. Pertaining to or connecting the ribs and the vertebrae. [L.]

VERTEBRO-CRANIEN (Fr.), adj. *Veʹr-ta-bro-kraʹ-ne-aʹnʹ*. Pertaining to or connecting the spinal column and the skull. [A, 385 (a, 48).]

VERTEBRODIDYMIA (Lat.), n. f. *Vuʹrt/(weʹrt)-eʹb-roʹ(roʹ)-diʹ-dʹmʹ(duʹmʹ)/iʹ-aʹ*. From *vertebra* (q. v.), and *δίδυμος*, double. A double monstrosity in which the individuals are united by the vertebrae. [a, 34.]

VERTEBRO-FEMORAL, adj. *Vuʹrt/(eʹb-ro-feʹmʹ/oʹ-rʹl*. Pertaining to the vertebral column and the femur. [L.]

VERTEBRO-ILIAC, adj. *Vuʹrt/(eʹb-ro-iʹlʹ/iʹ-aʹk*. Lat., *vertebro-iliacus*. Fr., *vertébro-iliaque*. Pertaining to the vertebrae and the ilium. [C.]

VERTEBRUM [Zerbis] (Lat.), n. n. *Vuʹrt/(weʹrt)-eʹb-ruʹmʹ(ruʹm)*. The head of the femur. [L, 349.]

VERTEX (Lat.), n. m. *Vuʹrt/(weʹrt)-eʹx*. Gen., *verticis*. From *vertere*, to turn. Gr., *κορυφή*. Fr., *sommet*. Ger., *Scheitel*. 1. The crown of the head; a somewhat indefinite area of the head that is highest when the subject is in the erect posture. Obstetrical writers vary in the meaning they attach to the term, some applying it to the anterior fontanelle, others to the posterior fontanelle, others to a point a little in front of the posterior fontanelle, others to a point midway between the two fontanelles, and others to the whole portion of the head between them. The last-mentioned sense of the term is generally recognized by writers of the present day. [A, 60.] 2. The apex of an organ. [a, 35.]—V. cranii. See V. (1st def.).—V. cubiti. See OLECRANON.—V. of the bladder, Ger., *Blasenscheitel, Blaseneyfel*. The portion of the urinary bladder at the upper extremity of its longest axis (when distended). [L.]—V. palpitans. See FONTANELLE (1st def.).

VERTIBULUM (Lat.), n. m. *Vuʹrt/(weʹrt)-iʹbʹ(uʹlʹ)/uʹmʹ(uʹm)*. From *vertere*, to turn. See ARTICULAR HEAD and TREPHINE.

VERTICAL, adj. *Vuʹrtʹ/iʹ-kʹl*. Lat., *verticalis* from *vertex* (q. v.). Fr., v. Ger., *vertikal, scheitelrecht*. Perpendicular to the plane of the horizon. [a, 48.]

VERTICIL, n. *Vuʹrtʹ/iʹ-sʹiʹl*. Lat., *verticillus* (dim. of *vertex*, a whirlpool). Fr., *verticille*. Ger., *Quirl, Wirbel*. A circle of leaves or other parts lying in the same horizontal plane around an axis. [a, 35.]—Dimidiata v. Ger., *Halbwirbel, Halbquirl*. A whorl in which the parts are so inclined toward one side of the axis or so spread out as to seem to surround only half the axis. [a, 35.]

VERTICILLASTER, n. *Vuʹrtʹ-iʹsʹ-iʹlʹ-aʹstʹ/uʹr*. Lat., *verticillastrum* (from *verticillus*, a verticil, and *aster*, a star). Fr., *verticillastre*. A spurious verticil, one of the pairs of cymes in the axils of the opposite leaves of *Mentha*, etc. [a, 35.]

VERTICILLATE, adj. *Vuʹrtʹ-iʹsʹ-iʹlʹ-at*. Lat., *verticillatus, verticillaris* (from *verticillus*, a whirl). Fr., *verticillé*. Ger., *quirlig, wirteilig*. Whorled, arranged in a whorl or whorls; of leaves, having the verticil composed of three whorls. The *Verticillate* are an order of plants corresponding to the *Labiate*. [a, 35.]

VERTICILLIUM (Lat.), n. n. *Vuʹrtʹ/(weʹrt)-iʹsʹ(iʹkʹ)-iʹlʹ/iʹ-uʹmʹ(uʹm)*. From *verticillus*, a whirl. A genus of *Fungi*. [a, 35.]—V. candelabrum. A species occurring on rotten wood. Its micrococci form was said by Tschamer to occur in the blood, urine, feces, epithelial cells, and mucus of scarlet-fever patients. [C] Ctrbl. f. *Kinderheilk.* "1879, no. 23; " Ctrbl. f. *Bacteriol. u. Parasitenk.* " 1887, 13, p. 381 (B).—V. cylindrosporum. A species forming colorless threads often overgrowing *Claviceps purpurea*. [a, 35.]

VERTICILLUM (Lat.), n. n. *Vuʹrt/(weʹrt)-iʹsʹ(iʹkʹ)-iʹlʹ/uʹmʹ(huʹm)*. From *vertere*, to turn. See TOURNIQUET.

VERTICO-MENTAL, adj. *Vuʹrtʹ/iʹkʹ-o-meʹnʹtʹl*. Pertaining to the vertex and the chin. [L, 125.]

VERTICO-TRANSVERSE, adj. *Vuʹrtʹ/iʹkʹ-o-traʹns-vuʹrʹs*. 1. Transverse and passing through the vertex of the skull. 2. Vertical and transverse at the same time (said of the perpendicular transverse plane or section of a body). [L.]

VERTICULA (Lat.), VERTICULUM (Lat.), VERTICULUS (Lat.), n's f., n., and m. *Vuʹrtʹ/(weʹrt)-iʹkʹ(uʹlʹ)/uʹlʹ-aʹ, -uʹmʹ(uʹm), -uʹsʹ(uʹs)*. From *vertere*, to turn. 1. See JOINT and ARTICULATION. 2. See VERTEBRA.

VEITIEFUNG (Ger.), n. *Feʹr-tefʹ/unʹ*. A cavity, a recess. [a, 14.]

VERTIGE (Fr.), n. *Veʹr-tesh*. See **VERTIGO**.—**V. de Ménière**. See **MÉNIÈRE'S DISEASE**.—**V. marin**. See **SEASICKNESS**.—**V. paralyant**. See **Gerlier's DISEASE**.—**V. stomacal**. See **GASTRIC VERTIGO**.

VERTIGINOUS, adj. *Vuʹrt-izʹjʹn-uʹs*. Lat., *vertiginosus*. Fr., *vertigineux*. Ger., *schwindelig*, *schwindelsüchtig*. Pertaining to, of the nature of, subject to, or affected with vertigo. [D.]

VERTIGO (Lat.), n. f. *Vuʹrt-(weʹrt)-ig(e)ʹo*; in Eng., *vuʹrtʹig-o*. Gen., *-iginis*. From *vertere*, to turn. Gr., *ῥίσις*. Fr., *vertige*. Ger., *Schwindel*. 1. Any movement or sense of movement, either in the individual himself or in external objects, that involves a real or seeming defect in the equilibrium of the body and is associated with more or less disturbance of consciousness. [a. 34.] 2. Of Rhazes, see **COCHLEA** (4th def.).—**Arterio-sclerotic v.** V. due to impaired brain nutrition in consequence of arterio-sclerosis of the cerebral vessels. [a. 34.]—**Auditory v.** Aural v. Aural v. Ger., *Ohrschwindel*. See **MÉNIÈRE'S DISEASE**.—**Bilious v.** Of C. L. Dana, v. due to self-intoxication from hepatic torpidity. [a. 34.]—**Cerebral v.** Ger., *Kopfschwindel*. V. entirely due to cerebral disorder. [D. 47.]—**Epileptic v.** A vertiginous or quasi-vertiginous condition assumed in one of the forms of epilepsy. [D. 35.]—**Essential v.** Of Gowers, v. that is caused by some unrecognizable morbid state. [a. 34.]—**Gastric v.** Lat., *v. a stomacho laeso*. Fr., *vertige stomacal*. Ger., *Magenschwindel*. V. caused by disorder of the stomach. [a. 34.]—**Greenland fisherman v.** An hallucination occurring to an Eskimo fisherman when he finds himself alone in his boat with no land and no other boat in sight, in which he believes his boat has lost its balance so that he rushes from one end of it to the other to restore the equilibrium. ["N. Y. Med. Jour.," July 30, 1887, p. 131 (a. 34).]—**Horizontal v.** V. which appears when the patient reclines, and ceases when he assumes the erect posture. [L. 88 (a. 50).]—**Intestinal v.** V. due to some intestinal disturbance. [a. 34.]—**Labyrinthine v.** See **MÉNIÈRE'S DISEASE**.—**Laryngeal v.** A mild v. that begins with a short cough followed by a laryngeal spasm, limited convulsive movements, and transitory syncope. [a. 34.]—**Lateral v.** V. appearing while the patient is walking along by the side of some structure (e. g., a fence) made up of similar parts. [L. 88 (a. 50).]—**Lithæmic v.** Of C. L. Dana, paroxysmal v. due to lithæmia. [a. 34.]—**Mechanical v.** V. produced by the movements of a ship, steam-car, elevator, or other rapidly moving objects. [a. 34.]—**Ménieré's v.** See **MÉNIÈRE'S DISEASE**.—**Mental v.** V. caused by some mental disturbance. [a. 34.]—**Migrainous v.** Of Gowers, v. occurring either as part of an attack or as an occasional symptom of migraine. [a. 34.]—**Neurasthenic v.** **Neurotic v.** Subjective v. due to exhausted or irritated nerve-centres. [a. 34.]—**Nocturnal v.** A sensation of falling felt shortly after going to sleep.—**Objective v.** V. in which external objects seem to whirl around. [a. 34.]—**Ocular v.** **Ophthalmic v.** **Optical v.** **Optic v.** Ger., *Augenschwindel*, *Gesichtsschwindel*. Of Abadie, a variety of v. accompanied by severe pain in the back of the neck, inability to elevate the pupils more than two or three millimetres above the horizontal plane, and a feeling as of falling backward. It is secondary to disorder of the ocular muscles. [F.]—**Otopathic v.** See **MÉNIÈRE'S DISEASE**.—**Rotatory v.** V. produced by rapid rotation of the body or by looking at rotating objects. [a. 34.]—**Stomachal v.** See **GASTRIC v.**—**Subjective v.** V. in which the person affected seems to himself to move. [a. 34.]—**Vertical v.** V. caused by looking upward to or downward from an elevation. [L. 88 (a. 50).]—**V. à la sue (laesa)**. See **MÉNIÈRE'S DISEASE**.—**V. a stomacho laeso**. See **GASTRIC v.**—**V. auditiva miasmatica**. Of Longhi, aural v. occurring periodically at regular intervals among patients in the marshy districts of Upper Italy. [F. 3.]—**V. of the kakaj**. See **Greenland fisherman's v.**—**V. tenebriosa**. See **SCOTODINTA**.—**V. titubans**, **V. vacillans**. V. with a sensation as of falling forward or backward. [L. 87 (a. 50).]

VERTILGUNG (Ger.), n. *Feʹr-tiʹlg-unʹ*. See **EXTIRPATION**.

VERTRETUNG (Ger.), n. *Feʹr-treʹtʹunʹ*. A dislocation or sprain (of the foot). [A. 450 (a. 17).]

VERTROCKNUNG (Ger.), n. *Feʹr-troʹkʹn-unʹ*. See **XEROSIS**.

VERUGAS, n. *Veʹr-ugʹaʹs*. See **VERRUGAS**.

VERUMONTANUM (Lat.), n. n. *Ver-(weʹr)-uʹ(u)-moʹnt-an-(aʹn)uʹm(uʹm)*. See **CAPUT gallinaginis**.

VERNASTALUNG (Ger.), n. *Feʹr-unʹstaʹlt-unʹ*. Disfigurement, deformity. [a. 14.]

VERVAIN, VERVEIN, n's. *Vuʹrʹvan*. 1. See **VERBENA** and **VERBENA officinalis**. 2. See **STACHYTARPHETA jamaicensis**.

VERVEINE (Fr.), n. *Veʹr-veʹn*. See **VERBENA**; and of the Fr. Cod., see **VERBENA officinalis**.—**V. odorante** [Fr. Cod.]. The *Aloysia citrodora* or its leaves. [B. 95 (a. 38); a. 35.]—**V. officinale**. 1. See **VERBENA officinalis**. 2. Of the Fr. Cod., the flowering plant (leaves [Sp. Ph.]) of *Verbena officinalis*. [B. 95 (a. 38).]

VERWACHSEN (Ger.), adj. *Feʹr-vaʹschʹs-eʹn*. 1. See **ADHERENT** and **CONNATE** (2d def.). 2. Grown crooked, hunch-backed. [A. 450 (a. 17).]

VERWACHSUNG (Ger.), n. *Feʹr-vaʹschʹs-unʹ*. Adhesion, agglutination, coalescence.—**V. s'brücke** [Uskow]. See **SPERM transversum**.

VERWAHRMITTEL (Ger.), n. *Feʹr-vaʹr-miʹt-teʹl*. A prophylactic remedy. [a. 14.]

VERWANDLUNG (Ger.), n. *Feʹr-vaʹndʹl-unʹ*. Transformation, metamorphosis. [a. 14.]

VERWANDTSCHAFT (Ger.), n. *Feʹr-vaʹntʹshaʹft*. See **AFINITY**.

VERWECHSELUNG (Ger.), n. *Feʹr-veʹchʹs-eʹl-unʹ*. Permutation. [a. 14.]

VERWELKEND (Ger.), adj. *Feʹr-veʹlkʹeʹnd*. See **MARCESCENT**.

VERWERFEN (Ger.), n. *Feʹr-veʹrfʹeʹn*. Abortion (in lower animals only). [a. 14.]

VERWESUNG (Ger.), n. *Feʹr-vaʹz-unʹ*. See **PUTREFACTION**.

VERWIRRTHEIT (Ger.), n. *Feʹr-vertʹhit*. See **HALLUCINATION**.

VERWITTERUNG (Ger.), n. *Feʹr-viʹtʹteʹr-unʹ*. Decay, etc., resulting from exposure to the weather. [a. 14.]

VERWUNDBARKEIT (Ger.), n. *Feʹr-vundʹbaʹr-kit*. Vulnerability. [a. 14.]

VERWUNDUNG (Ger.), n. *Feʹr-vundʹunʹ*. A wounding, a wound. [a. 14.]

VERZEHREND (Ger.), adj. *Feʹr-tsarʹeʹnd*. Consuming, consumptive. [a. 14.]

VERZERRTSEHEN (Ger.), n. *Feʹr-tseʹrtʹzaʹeʹn*. Distorted vision. [L. 87 (a. 14).] See **METAMORPHOSIS**.

VERZERRUNG (Ger.), n. *Feʹr-tseʹrʹrunʹ*. Distortion by external force, a sprain. [a. 14.]

VERZIEHUNG (Ger.), n. *Feʹr-tseʹunʹ*. Distortion by displacement. [A. 450 (a. 17).]

VERZUCKUNG (Ger.), n. *Feʹr-tsukʹunʹ*. See **CONVULSION**.

VERZUCKUNG (Ger.), n. *Feʹr-tsukʹunʹ*. Ecstasy, delirium. [a. 14.]

VERZWEIGUNG (Ger.), n. *Feʹr-tswigʹunʹ*. See **DIVARICATION** and **RAMIFICATION**.

VESANIA (Lat.), n. f. *Veʹs(was)-an(aʹn)ʹiʹa*. From *vesanus*, insane. Fr., *véranie*. See **INSANITY**.—**Primary intellectual v.** See **DELIRIUM grandiosum**.—**V. abortiva**. An abortive insanity. [a. 34.]—**V. acuta**. Of Kahlbaum, see **FEBRILE DELIRIUM**.—**V. in puerpera**. See **Puerperal insanity**.—**V. paralytica progressiva**. Progressive paralytic insanity. [L. 87 (a. 34).]—**V. paralytica progressiva circularis**. Of Fabre, a recurrent form of general paresis. [L. 87 (a. 34).]—**V. paralytica progressiva diversans**. Of Kahlbaum, general paralytic insanity with occasional lucid intervals in the early part of the disease. [L. 87 (a. 34).]—**V. paralytica progressiva maniacalis**. Progressive paralytic insanity with access of fury. [L. 87 (a. 34).]—**V. paralytica progressiva melancholica**. Progressive paralytic insanity with melancholic symptoms. [a. 34.]—**V. paralytica progressiva rapida**. See **GALLOPING PARALYSIS**.—**V. paralytica progressiva stuporosa** (see **STUPIDA**). Progressive paralytic insanity in which the patient is generally in a state of stupor. [L. 87 (a. 14).]—**V. progressiva simplex**. Of Kahlbaum, primary paralytic dementia. [L. 87 (a. 14).]—**V. typica completa circularis**. Recurrent typical insanity. [L. 87 (a. 14).]—**V. typica incompleta**. Periodic insanity with variable symptoms. [L. 87 (a. 14).]—**V. typica katatonica**. See **CATATONIA**.—**V. typica legitima incompleta**. Transitory insanity. [L. 87 (a. 14).]—**V. typica legitima sevens**. Acute insanity, generally followed by death. [L. 87 (a. 14).]—**V. typica vera**. Typical insanity without stuporous accidents. [L. 87 (a. 14).]

VESANICUS (Lat.), **VESANUS** (Lat.), adj's. *Veʹs(was)-aʹn-(aʹn)ʹiʹk-uʹs(uʹs)*, *-an(aʹn)ʹuʹs(uʹs)*. From *ve*, not, and *sanus*, sane. Fr., *vesanique*. See **INSANE**.

VESCE (Fr.), n. *Veʹs*. See **VICIA**.

VESCUS (Lat.), adj. *Veʹsk(weskʹ)uʹs(uʹs)*. In botany, small, thin, weak. [a. 35.]

VESICA (Lat.), n. f. *Veʹs(was)-ik(ekʹ)ʹaʹ*. Gr., *κύστις*. Fr., *vesie*. Ger., *Blase*. 1. A bladder, especially the urinary bladder. 2. See **GRAFFIAN VESICLE**.—**V. biliaris**. See **GALL-BLADDER**.—**V. bipartita**. A more or less incomplete division of the urinary bladder into two parts by the shortening of a bundle of longitudinal muscular fibres. [L.]—**V. bovina** [Finn. Ph.]. The bladder of the ox blown up and dried. [B. 95 (a. 38).]—**V. cordis**. See **PERICARDIUM**.—**V. fellea**, **V. fellis**. See **GALL-BLADDER**.—**V. natoria**. See **SWIM-BLADDER**.—**V. prostatica**. See **UTERUS masculinus**.—**V. saccata**. See **SACculated BLADDER**.—**V. urinae**. **V. urinaria**. See **Urinary bladder**.

VESICAL, adj. *Veʹsʹiʹkʹl*. Lat., *vesicalis*. Fr., *vésical*. Pertaining to the bladder. [C.]

VESICALIS (Lat.), adj. *Veʹs(was)-iʹk(ekʹ)-al(aʹl)ʹiʹa*. From *vesica*, the bladder. Vesical; as *a. n. m.*, see **COMPRESSOR prostatic**; as *a. n. f.*, a vesical artery. [a. 48.]—**V. suprema**. Ger., *vierte Blasenarterie*. Of Hyrtl, a fourth vesical artery found during the patency of the funicular portion of the umbilical artery. [A. 19.]

VESICANT, adj. *Veʹsʹiʹkʹ-kʹnt*. Lat., *vesicans* (from *vesica*, a bladder). Fr., *vésicant*. Ger., *blasenziehend*. Producing vesication; as *a. n.* (Ger., *Blasenzieher*), a v. substance.

VESICARIA (Lat.), n. f. *Veʹs(was)-iʹk(ekʹ)-ar(aʹr)ʹiʹa*. From *vesica*, the bladder. Fr., *vésicaire*. 1. Of Crantz, a section of the genus *Trifolium*. 2. Of Lamarck, a genus of the *Cruciferae*. 3. An old name for the *Physalis alkekengi* and *Cardiospermum halicababum*. [a. 35.] 4. Of Schrank, a genus of the *Tenellidae* in the larval state. [L. 6.]—**V. granulosa**. See *Echinococcus hominis*.

—**V. hygrota**, **V. lobata** (nulla), **V. orbicularis**. See **CYSTICERCUS cellulosa**.—**V. socialis**. See **CENTRUS cerebri**.

VESICARIUM (Lat.), n. n. *Veʹs(was)-iʹk(ekʹ)-ar(aʹr)ʹiʹuʹm(uʹm)*. From *vesica*, a bladder. See **OVARY**.

VESICATION, n. *Veʹsʹiʹkʹ-shuʹn*. Lat., *vesicatio* (from *vesica*, a bladder). Fr., *vésication*. Ger., *Blasenziehen* (1st def.). 1. The act or process of raising a blister. 2. The formation of a blister.

VÉSICATOIRE (Fr.), n. *Vaz-ekʹ-aʹ-twaʹr*. See **BLISTER** (2d def.).—**V. ambulans**. See **Flying BLISTER**.—**V. ammoniacal**. See **POMADE of Goudret**.—**V. camphré** [Fr. Cod.]. See *Emplastrum campharum*.—**V. de Janin**. See *Emplastrum picis irritans*.

VESICATORY, adj. *Ve's*/'*ik*-a't-or-*i*². Lat., *vesicatorius*. See **VESICANT**.

VESICLE, n. *Ve's*/'*i*²-k'l. Gr., *κύστος*. Lat., *vesicula* (dim. of *vesica*, a bladder). Fr., *vésicule*. Ger., *Bläschen*, *Blase*. 1. A little sac or cyst; in histology, a minute solid or semisolid mass (e. g., a cell or nucleus) inclosed by a membrane. [J. 2.] 2. A lesion of the skin or mucous membrane formed by a collection of clear liquid within or beneath the epithelium, causing a small, circumscribed elevation of the surface. Cf. *BLES*, *BULLA*, and *POCK*. 3. In botany, (a) a cell of vegetable tissue; (b) an air-cavity or little bladder (e. g., one of the air-bladders in many *Fuaceae*, which render the branches buoyant); and (c) a spore-v. [a, 35.]—**Adipose v.** See **FAT-CELL**.—**Air v.** 1. See **AIR-LACUNA**. 2. See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.). 3. See **V**, (3d def., [J. 2.])—**Air v's of the lungs**. See **Air v.** (2d def.).—**Alar v.** The internal, epithelial portion of the alantoids.—**Alar v's** (or **cerebral**, or **encephalic**) v. Ger., *nordere Hirnblase*. A thin-walled cavity formed by the closing in of the dorsal laminae over the cephalic extremity of the primitive groove of the embryo and a subsequent transverse constriction at about the extremity of the notochord. From it are developed the cerebral hemispheres, pineal gland, pituitary body, corpus callosum, cerebral peduncles, fornx, and lateral and third ventricles. Subsequently it is divided by the anterior-posterior cleft, which finally becomes the longitudinal fissure. [L.]—**Antipodal v.** See **ANTIPODAL CELL**.—**Ascheronian v's**. V's formed by shaking fluid fat and fluid albumin together, the latter forming a kind of investment or membrane for the minute globules of the fat. [J.] See also **Haplogenous MEMBRANE**.—**Auditory v.** See **Otic v.**—**Blastodermic v.** See **BLASTULA**.—**Blood v's**. Blood-corpuscles. [J.]—**Cerebral v's**. See **ENCEPHALIC v's**.—**Contractile v.** 1. An expansion of the lower end of the excretory canal of some of the *Distomidae*. [L, 16.] 2. See **CONTRACTILE VACUOLE**.—**Directing v.** See **DIRECTING GLOBULE**.—**Embryonic v.** **Embryonic v.** Ger., *Keimschlauch*. See **EMBRYONIC CELL** (4th def.).—**Encephalic v's**. Lat., *vesicula cephalica*. Ger., *Hirnbläschen*. The three compartments into which the anterior extremity of the primitive medullary tube is divided at an early period in foetal life. Other secondary v's spring from the primary one, from which are formed the organs of sense. [L, 15 (K).]—**Erythroid v.** Fr., *vésicule érythroïde*. Of Pockel, a vesicular structure described as constituting one of the elements of the ovum; pyriform, milky white, and larger than the umbilical vesicle; thought by Velpaen to be pathological. [A, 46.]—**Fat v.** See **FAT-CELL**.—**Germinal v.** **Germinal v.** 1. A somewhat spherical body in the ovum with an investing membrane, having fluid and granular contents with a protoplasmic network and germinal spot or spots; regarded essentially as a nucleus. [L, 142, 201.] See **UTERUS** under **OVUM**. 2. In botany, the imperfectly formed germ-cell in the embryo-sac previous to fertilization. [a, 35.]—**Glandular v.** **Gland v.** See **ACINUS** (7th def.).—**Graafian v.** Fr., *vésicule de Graaf*, *poche vésiculaire*. Ger., *Eierstocksfollikel*, *Eierstock*. A closed sac which contains the ovarian ovum. It consists of an external membrane lined with small granular cells (the membrana granulosa) which are condensed at one point to form the discus proligerus. Prior to the ripening of the ovum the is situated within the stroma of the ovary, but as maturation advances it becomes superficial, its walls grow vascular, and it is distended with a serous fluid. It finally ruptures, allowing the ovum to escape. [L.]—**Kerper's v.** See **Postanal v.**—**Lens v.** See **Secondary ocular v.**—**Malignant v.** See **CONTAGIOUS ANTHRAX**.—**Marginal v's**. See **Marginal BODIES**.—**Medullary v. of the eye**. See **Primary optic v.**—**Mesencephalic v.** Middle cerebral (or **encephalic**, or **primary v.** Ger., *mittlere Hirnblase*. In embryology, the dilatation of the medullary tube just posterior to the cephalic extremity of the notochord, from which the corpora quadrigemina, cerebral peduncles, and aqueduct of Sylvius are developed. [L.]—**Nuclear v.** See **NUCLEUS** (1st def.).—**Ocular v's**. See **Primary optic v's**.—**Olfactory v.** The primitive v. from which is developed the olfactory lobe. [L, 2 (K).]—**Otic v.** Ger., *Gehörbläschen*, *Ohrbläschen*, *Gehörkapsel*. The embryonic rudiment of the organ of hearing, formed by an involution of the epiblast from the outer surface of the head in the region of the medulla oblongata, opposite the dorsal end of the hyoid arch. [A, 5.]—**Ovarian v.** See **Graafian v.**—**Polar v.** See **EXTRUSION GLOBULE**.—**Pituitary v.** The primitive pituitary body in the embryo. [L, 2 (K).]—**Postanal v.** A vesicular dilatation of the posterior extremity of the postanal gut. [L, 201.]—**Posterior cephalic (or cerebral, or encephalic) v.** The posterior enlargement of the medullary tube from which the cerebellum, pons Varoli, medulla oblongata, and fourth ventricle are developed. [L.]—**Primary ocular (or optic) v's**. Lateral projections from the anterior cerebral v. from which the eyes are developed. [L.]—**Primitive cerebral v.** An expansion at the anterior extremity of the medullary tube, from which is developed the encephalon. It is subsequently divided into the anterior, middle, and posterior cerebral v's. [L, 28 (K).]—**Primitive optic v's**. See **Primary ocular v's**.—**Proencephalic v.** See **Anterior cephalic v.**—**Prostatic v.** See **UTERUS masculinus**.—**Pulmonary v.** See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.).—**Purkinjean v.** See **PURKINJE CELL**.—**Secondary ocular v.** See **Primary optic v.**—**Secondary ocular (or optic) v.** A depression, or involution, in the wall of the primary optic v., which receives the lens. [L, 15 (K).]—**Seminal v's**. Lat., *vesiculae seminales*. Ger., *Samenbläschen*, *Samenblasen*, *Samenäckchen*. Two membranous tubes, coiled and doubled upon themselves so as to present a sacculated appearance, and lying on the base of the bladder with their blind posterior extremities (between which the vasa deferentia run) considerably separated. They converge toward the prostate and unite each with its corresponding vas deferens. They serve as receptacles for the semen. [L.]—**Sense v.** A v. from which an organ of special sense is developed. [L.]—**Spore v.** Lat., *vesicula sporum* (seu *sporidium*). Ger., *Sporenblase*. In the *Phycomycetes* (vesicular molds), one of the bladder-like fruits containing sporidia. [a, 35.]—**Umbilical v.**

Ger., *Nabelbläschen*, *Dottersack*, *Nabelblase*. The navel sac, a structure of the human ovum which in the lower animals is called the vitelline sac or yolk sac. It is situated on the abdominal aspect of the embryo, being continuous with the omphalo-mesenteric duct. [A, 11.]—**Unpaired (anterior) v.** See **Anterior cephalic v.**—**Urinary v.** The alantoids.—**V. of Baer**. The ovum in the Graafian v. [J, 33.]—**V. of Balbiani**. See **Yolk NUCLEUS**.—**V. of Graaf**. See **Graafian v.**—**V's of Naboth**. See **Nabothian FOLLICLES**.—**V. of Purkinje**. See **Germinal v.**—**V. of the optic thalamus**. See **Anterior cerebral v.**

VESICO-ABDOMINAL, adj. *Ve's*/'*i*²k-o-a'b-do'm/'*i*²-n'l. For deriv., see **VESICA** and **ABDOMEN**. Pertaining to the urinary bladder and the abdomen. [L.]

VESICOCELE (Lat.), n. f. *Ve's* (was)-'i²k(ek)-o(o²)-sel(kal)'(e)a; in Eng., *ve's*/'*i*²k-sel. Gen., *-celles*. From *vesica*, a bladder, and *κῆλη*, a tumor. See **CYSTOCLE**.

VESICO-CERVICAL, adj. *Ve's*/'*i*²k-o-su'r/'*i*²-k'l. For deriv., see **VESICA** and **CERVIX**. Pertaining to the urinary bladder and cervix uteri. [L.]

VESICOCLYSIS (Lat.), n. f. *Ve's* (was)-'i²k(ek)-o(o²)-k'l'i's(in's)-i²s. Gen., *-clysos* (*-oclysis*). From *vesica*, the bladder, and *κλῆσις*, a washing. Of McDowall, the injection of fluids into the bladder. [a, 34.]

VESICOPLASTIC (Ger.), n. *Vaz-ek-o-pla'st*-ek'. The plastic surgery of the urinary bladder. [L.]

VESICO-PROSTATIC, adj. *Ve's*/'*i*²k-o-pro-sta't/'*i*²k. Pertaining to the urinary bladder (or the seminal vesicle) and the prostate.

VESICO-PROSTATIQUE (Fr.), n. *Va-se-ko-pro-sta't*-tek. See **COMPRESSOR prostate**.

VESICO-PUBIEN (Fr.), adj. *Va-se-ko-pu'a*-be-e'n. Pertaining to the urinary bladder and the pubic bone or region. [L.]

VESICO-SPINAL, adj. *Ve's*/'*i*²k-o-spi'n'l. Pertaining to the urinary bladder and the spinal cord. [L.]

VESICO-UMBILICAL, adj. *Ve's*/'*i*²k-o-u'mb-i'l/'*i*²-k'l. Pertaining to the urinary bladder and the umbilicus. [L.]

VESICO-UTERINE, adj. *Ve's*/'*i*²k-o-ut'e'r/'*i*²n. Pertaining to the urinary bladder and the uterus. [L.]

VESICO-UTERO-VAGINALIS (Lat.), adj. *Ve's* (was)-'ik(ek)-o(o²)-u't(u²)-e'r-o(o²)-va'j(wa'g)-i²n(en)-al(a²)'*i*²s. Pertaining to the urinary bladder, uterus, and vagina. [L.]

VESICO-VAGINAL, adj. *Ve's*/'*i*²k-o-va'j/'*i*²-n'l. Pertaining to the urinary bladder and the vagina. [L.]

VESICULA (Lat.), n. f. *Ve's* (was)-'i²k(ek)'*i*²l(u²)'*i*²-a². See **VESICLE**.—**V. alba**. The umbilical vesicle.—**V. blastodermica**. See **BLASTULA**.—**V. bronchica**. See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.).—**V. cephalica**. See **ENCEPHALIC VESICLES**.—**Vesiculae cervicis uteri**. See **Nabothian FOLLICLES**.—**Vesiculae cristallinae genitalium**. *Testes progentiales*. [G, 11.]—**V. directrix**. See **DIRECTING GLOBULE**.—**Vesiculae divae barbarae**. See **VARIOLA confuens**.—**V. fellae**. **V. fellis**. See **GALL-BLADDER**.—**Vesiculae gelatinosae**. See **GELATIN CAPSULE**.—**V. germinativa** [Bernhardt]. See **Germinal VESICLE**.—**V. graafiana**. **V. Graafii**. See **Graafian VESICLE**.—**Vesiculae griseae** (Hienis). See **MALPIGHIAN CORPUSCLES** (3d def.).—**V. malpighiana**. See **V. pulmonalis**.—**V. omphalo-mesenterica**. **V. ovalis**. See **UMBILICAL VESICLE**.—**V. praeformis**. **V. prolifica**. See **Germinal VESICLE**.—**V. pulmonis**. **V. pulmonalis**. **V. pulmonum**. See **AIR-CELL** (1st def.) and **ALVEOLUS** (2d def.).—**V. Purkinjei**. See **Germinal VESICLE**.—**Vesiculae sanguinis**. Blood-corpuscles. [J.]—**Vesiculae seminales**. See **Seminal VESICLES**.—**V. serosa**. See **FALSE AMNION**.—**Vesiculae spermaticae**. See **Seminal VESICLES**.—**V. spermatica spuria**. See **UTERUS masculinus**.—**V. sporum**. **V. sporidium**. See **Spore VESICLE**.—**V. umbilicalis**. See **UMBILICAL VESICLE**.

VESICULAR, adj. *Ve's*/'*i*²k'u²'l-a²r. Lat., *vesicularis* (from *vesicula*, a vesicle). Fr., *vésiculaire*. Ger., *blasig*, *blasenartig*, *bläschenförmig*. 1. Pertaining to a vesicle; affected with, consisting of, or of the nature of vesicles. 2. Pertaining to or resembling a bladder-like structure (e. g., the seminal vesicles). 3. Of a murmur, sounding as if generated within vesicles; emitting a soft, sighing sound. [D, 1.]

VESICULATED, adj. *Ve's*/'*i*²k'u²'l-at-e'd. From *vesicula*, a vesicle. Fr., *vésiculé*, *en grappes*. Having the appearance of a bunch of grapes; hydatidiform. [A, 42.]

VESICULATION, n. *Ve's*/'*i*²k-u²'l-a'shu'n. From *vesicula*, a vesicle. The formation of vesicles.

VÉSICULE (Fr.), n. *Vaz-ek-u²l*. See **VESICLE**.—**Première v. cérébrale**. See **Anterior cerebral VESICLE**.—**Seconde v. encéphalique**. See **Mesencephalic VESICLE**.—**Troisième v. cérébrale primitive**. **Troisième v. encéphalique**. See **Posterior cerebral VESICLE**.—**V. auditive**. See **Otic VESICLE**.—**V. biliaire**. VÉSICULEUX (Fr.), adj. *Va-se-kù'-lu'*. See *VESICULOSE*.

VESICULIFEROUS, adj. *Ve's-i-fë-rù'-lîf-e'r-u's*. Lat., *vesiculiferus* (from *vesicula*, a vesicle, and *ferre*, to bear). Fr., *vésiculifère*. Bearing vesicles. The *Vesiculiferi* are the *Physo-mycetes*. [a. 35.]

VESICULIFORM, adj. *Ve's-i-fë-rù'-lî-fô-rm*. From *vesicula*, a vesicle, and *forma*, form. Fr., *vésiculiforme*. Bladdery, having the form of a vesicle. [a. 35.]

VESICULITIS (Lat.), n. *Ve's-i-fë-rù'-lî-tis* (ek) (u) (i) (e) (t) (s). Gen., *-itidis* (*-idis*). From *vesicula*, a vesicle. Inflammation of a vesicle, especially of the seminal vesicle. [a. 34.] See *seminal vesicle*. An acute or chronic infective inflammation of the seminal vesicles. ["N. Y. Med. Jour." Aug., 1889, p. 631 (a. 34).]

VESICULO-PROSTATIQUE (Fr.), adj. *Va-se-kù'-lo-pro-sta'tek*. Pertaining to the bladder and the prostate.

VESICULOSE, adj. *Ve's-i-fë-rù'-lo-s*. Lat., *vesiculosus*. Fr., *vésiculeux*. Ger., *blasig*. 1. Consisting of or covered with vesicles. 2. Vesiculiform. [a. 35.]

VESICULO-TUBULAR, adj. *Ve's-i-fë-rù'-lo-tù'b-u'l-a'r*. Vesicular and tubular at the same time (said of a murmur). [L.]

VESICULOUS, adj. *Ve's-i-fë-rù'-lo-s*. Lat., *vesiculosus*. Fr., *vésiculeux*. See *VESICULAR* and *VESICULOSE*.

VESOU (Fr.), n. *V'zu*. Sugar-cane juice. [L. 49 (a. 14).]

VESPA (Lat.), n. f. *Ve'sp-ë-sp'a*. Ger., *Wespe*. Fr., *guêpe*. Ger., *Wespe*. A genus of the *Vespidæ*, or wasps (a family of hymenopterous insects). [a. 35.]—*V. crabro*. Fr., *frelon*. Ger., *Hornisse*. The hornet; formerly used as a purgative and diuretic. [a. 35.]—*V. vulgaris*. Ger., *gemeine Wespe*, *Erdwespe*. The common wasp; formerly used as a purgative and diuretic. [a. 35.]

VESPAJO (L.), n. *Ve's-pa'jo*. 1. A wasp's nest. 2. Anthrax. 3. Malignant pustule. [G. 71.] Cf. *FURUNCULUS vespajus*. *V. del capillizio*. See *KEIRON*.

VESPARIUS (Lat.), adj. *Ve'sp(wë-sp)-a-a's* (r) (u) (s) (u) (s). From *vespa*, a wasp. Fr., *guêprière*. Pertaining to or containing wasps. [A. 385 (a. 48).]

VESPERTINE, adj. *Ve'sp(wë-sp)-ë-r-ti-n*. Lat., *vespertinus* (from *vesper*, the evening). Of the evening, appearing in the evening; of flowers, opening at nightfall. [a. 35.]

VESSE-DE-LOUP (Fr.), **VESSE-LOUP** (Fr.), n's. *Ve's-dë-lu, ve's-lu*. The *Lycoperdon giganteum* and other species of *Lycoperdon*. [a. 35.]

VESSEL, n. *Ve's-ë-l*. Gr., *ἀγγείον*. Lat., *vas*. Fr., *vaisseau*. Ger., *Gefäss*. A utensil for holding liquids, etc.; in anatomy, a duct or channel for containing or conveying fluids of the body, especially the blood. [a. 43.]—**ABSORBENT V'S**. The lacteals and lymphatics. [C.]—**AMBUCLARAL V'S**. A system of v's consisting of a circular canal around the mouth (in the echinoderms), giving origin usually to canals which follow the middle line of each of the ambulacral metameræ. [A. 12.]—**BLOOD-V**. See the major list.—**CAPILLARY V**. See *CAPILLARY* (3d def.).—**CHYLIFEROUS V'S**. Lat., *chyliferæ*. Ger., *Milchgefässe*. Absorbent v's which arise in the villi of the intestinal walls and terminate in the thoracic duct. Those from the descending colon and sigmoid flexure connect with the lumbar lymphatics or the thoracic duct by a separate trunk. [C.]—**HÆMORRHOIDAL V'S**. The dilated veins of the rectum and anus. [a. 34.]—**LACTEAL V'S**. See *CHYLIFEROUS V'S*.—**LACTIFEROUS V'S**. Lat., *vasa lactifera* (see *lactis*). Milk-v's, the tubes secreting the peculiar juice of plants. [a. 35.] See *LACTEAL*.—**LYMPHATIC V'S**, **LYMPH V'S**. See *LYMPHATICS*.—**MILK-V'S**. See *LACTIFEROUS V'S*.—**PITTED V**. See *PITTED CELL*.—**PLASMATIC V'S**. See *SEROUS CANALICULI*.—**SPIRAL V**. See *SPIRAL CELL*.—**UMBILICAL V'S**. Lat., *vasa umbilicalia*. Fr., *vaisseaux ombilicaux*. Ger., *Nabelgefässe*. The umbilical arteries and veins. [L.]

VESSE (Fr.), n. *Ve's-se*. See *BLADDER*.—**V. à cellules. See *Stratified bladder*.—**V. à colonnes. See *Columnar bladder*.—**V. du bel**. See *Bladder* for the gall-bladder. [A. 44.]—**V. à bisac**. See *Bilobed bladder*.—**V. natatoire**. See *Air-bladder*.****

VESSEIGNON (Fr.), n. *Ve's-ë-en-yo-né*. A chronic synovial tumor sometimes observed on one side of a horse's hock. [A. 301 (a. 34).]

VESTIBULAR, adj. *Ve'st-i'b-u'l-a'r*. From *vestibulum*, an entrance-court. Pertaining to a vestibule, especially the vestibule of the vulva.

VESTIBULE, n. *Ve'st-i'b-u-l*. Lat., *vestibulum*. Fr., *v. Ger.*, *Vorhof*. 1. A triangular space bounded on the two sides by the labia pudendi minora and below by the ostium vaginae. [A. 15.] 2. The first division of the osseous labyrinth of the internal ear; an irregular, elliptical cavity, 4 to 5 mm. in diameter. Its lateral wall is formed in great part by the fenestra ovalis and the foot-plate of the stapes. On the median and inferior walls are two depressions for the reception of the sacculi. On the posterior and partly on the superior and inferior walls lie the mouths of the semicircular canals. On the anterior inferior wall is the entrance of the cochlea

into the scala vestibuli. [F. 3.] 3. Of Gratiotet, the upper portion of the third ventricle of the brain. [L. 35 (K.).] 4. In botany, see *STOMA* (2d def.).—**AORTIC V**. Of Sibson, the small compartment formed by the left ventricle, adjoining the root of the aorta. Its walls are formed of fibro-cartilage and do not collapse, thus leaving room for the flaps of the aortic valve to descend during diastole of the heart. [C.]—**V. of the ear**. See *V. (2d def.)*.—**V. of the mouth**. The portion of the mouth outside of the teeth, bounded by the lips and the cheeks. [L. 67 (a. 50).]—**V. of the nose**. The region of the external nostrils, including all parts rostral by the nasal cartilages. [C.]—**V. of the vagina**. Ger., *Schamvorhof*. See *V. (1st def.)*.—**V. of the ventricles**. The entrance to the ventricles of the brain. [L. 43.]

VESTIBULUM (Lat.), n. *Ve'st(wë'st)-i'b-u'l(u) (u) (i) (e) (t) (s)*. See *VESTIBULE*.—**V. labyrinthi**. See *VESTIBULE* (2d def.).—**V. membranaceum**. See *UTRICLE* (2d def.).—**V. pharyngis**. The isthmus faucium.—**V. vaginae**. See *VESTIBULE* (1st def.).

VESTIGIUM (Lat.), n. *Ve'st(wë'st)-i'j(eg) (i) (u) (i) (e) (t) (s)*. Lit., a foot-print; a trace, a slight impression or marking, a rudimentary structure; also the sole. [L. 50 (a. 48).]—**V. foraminis ovalis**. See *Fovea of the right auricle of the heart*.—**Vestigia of muscles**. The seven intrinsic muscles of the auricle; so called from their extremely rudimentary condition in man. [F.]—**V. pedis**. The metatarsus. [L. 50 (a. 48).]

VESTIMENTUM (Lat.), n. *Ve'st(wë'st)-i'j(e)-mënt(u) (u) (i) (e) (t) (s)*. From *vestis*, clothing. Ger., *Bekleidung*. See *INDUMENTUM* (1st def.).

VESUVIN, n. *Ve's-u'v-i'n*. See *TRIAMIDO-AZOBENZENE hydrochloride*.

VETA, n. See *Mountain sickness*.

VETCH, n. *Ve'ch*. The genus *Vicia*. [a. 35.]—**Bitter v**. See *LATHYRUS macrorrhizus*, *OROBUS* (2d def.), and *Vicia ervilia*.—**Chickling v**. See *LATHYRUS sativus*.—**Kidney-v**. See the major list.—**Licorice-v**. See *ASTRAGALUS glycyphyllos*.—**Milk-v**. See *ASTRAGALUS* (6th def.).

VETCHLING, n. *Ve'ch'lî'n*. The genus *Lathyrus*. [a. 35.]

VETERINARIAN, n. *Ve't-ë-r-i'n-a-r-i'* (a) (r) (i) (e) (t) (s). Lat., *veterinarius*, *equarius*. Fr., *vétérinaire*. Ger., *Veterinärarzt*. A practitioner of veterinary medicine. [a. 48.]

VETERINARY, adj. *Ve't-ë-r-i'n-ä-r-i'* (a) (r) (i) (e) (t) (s). Lat., *veterinarius*, *veterinus*. Fr., *vétérinaire*. Ger., *Veterinär*. Pertaining to or concerned with the domestic animals (cf. *V. MEDICINE*).

VETERONOMANIA (Lat.), n. f. *Ve't(wë't)-u-r'n(e'r'n)-o(m)-man(ma'n) (i) (a) (s)*. From *veterinus*, drowsiness, and *mania*, madness. See *TYPHOMANIA*.

VETERNOSITAS (Lat.), **VETERNUS** (Lat.), n's f. and m. *Ve't(wë't)-u-r'n(e'r'n)-o-s(os) (i) (a) (s) (a) (s)*, *-u-r'n(e'r'n) (u) (s) (u) (s)*. Gen., *-at'is*, *-ter'ni*. See *DROWSINESS*.

VÉTIVER (Fr.), n. *Va-te-va*. 1. The *Hemidesmus indicus*. [a. 35.] 2. See *VETIVERIA* (2d def.).

VETIVERIA (Lat.), n. f. *Vat-e-ve'r-i'a* (a) (s). From E. Ind., *vetivayr*. Fr., *vetiverie* (1st def.), *vétiver* (2d def.). *Vetiver* (2d def.). Ger., *Vetiver*. 1. A section of the genus *Andropogon*. 2. The *Andropogon muricatus* or its root. [a. 35.]—**Oldenla vetiveria**. *Feitveid*. An ethereal oil obtained from radix vetiverie. [B. 108 (a. 14).]—**Radix vetiveria**. Sp., *vetiver*, grama de las Indias (raiz) [Sp. Ph.]. The root of *Andropogon muricatus*. [B. 95 (a. 38).]—**V. odorata**. See *ANDROPOGON muricatus*.

VELULA (Lat.), n. f. *Ve't(wë't)-u'l(u) (u) (i) (e) (t) (s)*. From *vetus*, old. 1. Of old writers, the skin of the navel wrinkled by age. 2. Less correctly, the os sacrum. [A. 322, 500 (a. 48).]

VEVEY, n. *Ve'-va*. A climatic health resort in the canton of Vaud, Switzerland. [L. 57 (a. 14).]

VEXILLAR, VEXILLARY, adj's. *Ve'x-i'l-a'r, -ar-i'* (a) (r) (i) (e) (t) (s). From *vexillum*, a military ensign. Fr., *vexillaire*. Ger., *fahnenförmig*. Pertaining to or resembling a vexillum. [a. 35.]

VEXILLUM (Lat.), n. *Ve'x(wë'x)-i'l(u) (u) (i) (e) (t) (s)*. From *ex*, here, to carry. Fr., *étendard, pavillon*. Ger., *Fähne, Wimpel*. The standard; the large upper petal of a papilionaceous corolla. [a. 35.]

VIA (Lat.), n. f. *Vi(wi) (i) (a) (s)*. Gr., *δόξω*. Fr., *voie*. Ger., *Weg*. A way, passage, or tract; also a method or manner. [a. 48.]—**Prime vie**. Fr., *premières voies*. The gastro-intestinal tract. [K.]—**Secundæ vie**. An old term for the lacteals. [K.]—**V. humida**. See *Wet way*.—**V. lacrimales**. See *LACRYMAL PASSAGES*.—**V. siccæ**. See *Dry way*.

VIABILITY, n. *Vi-ä-b-i-l-i't-ä* (i) (e) (t) (s). Fr., *viabilité*. Ger., *Lebensfähigkeit* (des Fötus). The state of being viable.

VIALABLE, adj. *Vi-ä'b-l-ä* (i) (e) (t) (s). Lat., *vitabilis*, *viabilis* (from *vita*, life). Fr., *vi-vable*, *vie*, life, whence the English word. Ger., *lebensfähig*. Of a fœtus, far enough advanced in development to be capable of survival apart from the maternal organism.

VIAL, n. *V'i-ä*. See *PHIAL*.

VIANDE (Fr.), n. *Ve-a-n'd*. See *MEAT*.—**Extrait de v**. See *BEEF-extract*.—**Jus de v**. See *BEEF-juice*.—**Poudre de v**, *V. desséchée*, *V. en poudre*. See *MEAT flour*.

VIBEX (Lat.), n. f. *Vib(wëb)-ë-x*. Gen., *-i'cis*. Gr., *μάλωψ*. Fr., *vergeture*. Ger., *Striemen*, *Blutschwiele*. 1. A mark produced or appearing as if produced by the stroke of a whip. 2. A linear ecchymosis.—**V. a flagello**. *V*, due to the stroke of a whip. [G. 11.]—**V. a parasitio**. Of Plencq, a red stripe extending from a finger affected with paronychia to the forearm, and disappearing after incision of the finger; probably due to an inflamed lymphatic vessel. [G. 11.]—**V. febrilis**. *V*, sometimes observed in the course of malignant fevers. [G. 11.]—**V. scorbutica**. See *PURPURA scorbutica*.

VIELGLIEDERIG (Ger.), adj. Fel'gled-e²r-i²g. See POLYMEROUS.

VIELHARNEN (Ger.), n. Fel'ha²rn-e²n. See POLYURIA (1st def.).

VIELJÄHRIG (Ger.), adj. Fel'yar-i²g. See PERENNIAL.

VIELKERNIG (Ger.), adj. Fel'ke²rn-i²g. See MULTINUCLEAR and MULTINUCLEOLATE.

VIELKOPF (Ger.), n. Fel'ko²pf. A many-headed animal. See POLYCEPHALUS.—*Menschenv.* V. See ECHINOOCOCCUS *hominis*.—V. des Schafes. See *Conurus cerebralis*.

VIELAPPIG (Ger.), adj. Fel'la²p-pi²g. See MULTILOBATE.

VIELSEHEN (Ger.), n. Fel'za-e²n. See POLYPOIA.

VIELTHEILIG (Ger.), adj. Fel'til-i²g. See POLYMEROUS and MULTIPARTITE.

VIELZELLBILDUNG (Ger.), **VIELZELLENBILDUNG** (Ger.), n's. Fel'tse²l-bi²ld-un², -tse²l-le²n-bi²ld-un². See Multiple CELL-formation.

VIELZELLIG (Ger.), adj. Fel'tse²l-li²g. See MULTICELLULAR.

VIERECK (Ger.), n. Fer'e²k. A quadrangle.

VIERECKIG (Ger.), adj. Fer'e²k-i²g. Quadrangular.

VIERFLÄCHIG (Ger.), adj. Fer'flach²-i²g. See TETRAEDRAL.

VIERTHÜBL (Ger.), n. Fer'hü²g-e². See CORPORA quadrigena.—*Hinterer V.* See TESTES (2d def.).—*Obere V.* The anterior pair of corpora quadrigena. [I, 17 (K).]—*Untere V.* See TESTES (2d def.).—*Vgiebiet, V'gegend* [Schwalbe]. See V.—*V'hm.* See MESENCOPHALON.—*V'paar.* A single pair of the corpora quadrigena. [I, 27 (K).]—*Vordere V.* The anterior pair of corpora quadrigena. [I, 17 (K).]

VIERTLIG (Ger.), n. Fer'li²n². See QUADRUPLT.

VIERTÄGIG (Ger.), adj. Fer'tag-i²g. See QUARTAN.

VIERTGEBÄRENDE (Ger.), n. Fer'tge²-bar-e²nd-e². A quadripara.

VIERTWERTHIG (Ger.), adj. Fer've²rt-i²g. See QUADRIVALENT.

VIEXU-MAL (Fr.), n. Ve-u²-ma²l. Intermittent boiterie. [A, 385 (a, 48).]

VIGNALE (It.), n. Ven-ya²-la. A place in Alessandria, Italy, where there is a saline and sulphurous spring. [L, 30, 49 (a, 14).]

VIGNE (Fr.), n. Ven-y². See VITIS.

VIGNETTE (Fr.), n. Ven-ye²t. See SPIRÆA ulmaria.

VIGNOLLES (Fr.), n. Ven-yo²l. A place in the department of the Vienne, France, where there is a saline spring. [L, 49 (a, 14).]

VILLAFÁFILA (Sp.), n. Vel-ya²-fa²-fe-la². A place in Zamora, Spain, where there is a hot sulphurous spring. [L, 49 (a, 14).]

VILLAFRANCA (It.), n. Vel-la²-fra²n²ka². A sea-bathing resort in the department of the Alpes-Maritimes, France. [a, 14].]

VILLATOYA (Sp.), n. Vel-ya²-to²-ya². A place in Albacete, Spain, where there are hot chalybeate and saline springs. [a, 14].]

VILLAVIEJA DE NULES (Sp.), n. Vel-ya²-ve-a²-ha² da nul'e²s. A place in Castellón de la Plana, Spain, where there are ferruginous and hot sulphurous springs. [L, 49, 57 (a, 14).]

VILLEFRANCHE (Fr.), n. Vel-fra²n²sh. See VILLAFRANCA.

VILLESUR MER (Fr.), **VILLERVILLE** (Fr.), n's. Vel-ye²r su²r me²r, -ye²r-vel. Sea-bathing resorts in the department of Calvados, France. [L, 49, 57 (a, 14).]

VILLITIS (Lat.), n. f. Vi²l(wi²l)-li²e(t)i²s. Gen. -it'idis (-idis). Of Haycock, inflammation of the coronary substance of a horse's hoof. [a, 34].]

VILLOSE, adj. Vi²l-os². See VILLOUS.

VILLOSIUSCULUS (Lat.), adj. Vi²l(wi²l)-lo²s-i²-us²sk(u²sk)-u²l(u²l)-u²s(u²s). Dim. of *villosus*, hairy. Ger., *kurzzottig, schwachzottig*. Villosus, but with the hairs shorter or more widely separated. [a, 35].]

VILLOSIUS (Fr.), n. Ve-lo-ze²a. See VILLUS and VILLOSTITY.—*Ve amiotiques*. The equivalent of Alfeld's term for villi that are often found produced by proliferation of the caroncules amiotiques. [A, 15].]

VILLOSTITY, n. Vi²l-o²s-i²t-i². Fr., *villosité*. A soft, flexible offshoot, more or less branching, from a membranous surface (e. g., that of the vitelline membrane and that of the chorion).

VILLOUS, adj. Vi²l-u²s. Lat., *villosus* (from *villus*, shaggy hair). Fr., *villexus*. Ger., *villos, zottig*. Bearing villi. [a, 35].]

VILLUS (Lat.), n. m. Vi²l(wi²l)-u²s(u²s). Fr., *villosité*. Ger., *Zotte, Zottenhaar*. Lit., a tuft of hair, a hair-like growth or process, especially from a membranous surface; in botany, one of numerous shaggy or long and weak hairs, also such hairs considered collectively as a covering of a part or organ. [G, a, 35].]—*Arachnoidal villi* [Luschka]. See *Pachionian* bodies.—*Fœtal villi*. See *Villi of the chorion*.—*Intestinal villi*. Fr., *villosités intestinales*. Ger., *Zotten des Dünndarms, Darmzotten*. Minute finger-like or tongue-like processes projecting from the free surface of the mucous membrane of the small intestine. They consist of a central part, or core, formed by a projection of the mucous membrane and a few longitudinally arranged muscular fibre-cells from the muscularis mucosæ. The core of the v. contains a closely set network of blood-vessels and one or more lacteal trunks with a caecal termination near the free end of the v. If a v. contains more than one lacteal vessel, as in the sheep, there are usually numerous anastomosing branches between them. The villi are covered with typical columnar epithelium continuous with that lining the lumen of the intestine and dipping into the crypts of Lieberkühn. In the duo-

denum and jejunum the villi are large and closely set, but near the termination of the ileum they are comparatively small and sparse. [J, 24, 30, 35.]—*Synovial villi*. Ger., *Synovialsotten*. Minute finger-like processes projecting from the surface of the vascular or Haversian fringes of the synovial membranes. They consist of a central non-vascular core of connective tissue and a covering of small, rounded cells which appear, after staining with silver nitrate, somewhat like endothelia. Some of these villi seem to be entirely composed of fibro-cartilage. [J, 30; "Arch. f. mik. Anat." 1874, p. 40 (J).]—*Vascular villi*. See *Villi of the chorion*.—*Villi of a finger membrane*. Small thread-like elevations of the corium seen in the stomach and elsewhere. They are covered with epithelium, and contain blood-vessels, nerves, and lacteals. [C.]—*Villi of the chorion*. Fr., *villosités choriales*. Cellular processes or fringes growing outward from the external surface of the vitelline membrane or the outer layer of the blastoderm and eventually covering the entire chorion. Only those confined to that portion of the chorion that forms the fetal part of the placenta become fully developed. [a, 34.]—*Villi pericardiaci*. Vascular villi on the inner surface of the pericardium. [L, 332.]—*Villi peritoneales*. Villi upon the free surface of the peritoneum. [L, 332.]—*Villi pleurales*. Villi on the parietal pleura. [L, 332.]

VILTRUM (Lat.), n. d. Vi²l(wi²l)-tu²m(plu²m). See FILTER.—**V. philosophorum**. See ALEMBOIC.

VIMINAL, VIMINEOUS, adj's. Vi²m-i²n²-l, vi²m-i²n²-e²-us. Lat., *vimineus* (from *vimen*, a plant twig). Fr., *vimineux*. Ger., *gertenartig*. Bearing long, flexible twigs. [a, 35].]

VIN (Fr.), n. Va²n². See VINUM and WINE.—*Esprit de v.* Spirit of wine; ordinary alcohol. [B.]—*Huile* (douce, ou volatile) de v. See *Ethereal oil*.—*Pierre de v.* Crude potassium bichromate. [B.]—*V. aloëtique*. See *Alcoholic*.—*V. antiseptique*. A veterinary preparation consisting of powdered alum dissolved in 25 times as much red wine. [B, 95 (a, 38).]—*V. amer*. See *Vinum GENTIANÆ*.—*V. antimonial* (d'Huxham). **V. antimonii**. See *Vinum ANTIMONII*.—*V. antiseorbutique*. Sp., *vino antiescorbútico*. A preparation made by macerating 30 parts of horseradish-root, 15 each of the leaves of *Cochlearia officinalis* and *Nasturtium officinale*, 3 of the dried leaves of *Mentha, thea trifoliata*, 7 of ammonium chloride, 15 of black mustard, and 16 of compound spirit of cochlearia [Fr. Cod.] (80 each of horseradish-root and the leaves of *Nasturtium officinale*, and either *Cochlearia officinalis* or *Lepidium latifolium* [Sp. Ph.], with 1,000 of (strong [Sp. Ph.]) white wine for ten days, expressing, and filtering. [B, 95 (a, 38).]—*V. aromatique*. [Fr. Cod.] A mixture of alcoholate vulgaire with 7 times as much red wine. [B, 95 (a, 38).] See also *Vinum aromaticum*.—*V. aromo-alcoëtique*. See *Vinum ALOES*.—*V. arsenical cuivreux*. See *Mixture cathérétique*.—*V. blanc* [Fr. Cod.]. French white wine containing about 10 per cent. of alcohol. [B, 95 (a, 38).] Cf. *Vinum album*.—*V. chalybé* [Fr. Cod.]. See *Vinum FERRI citratis*.—*V. de Cérès*. An ancient name for beer.—*V. de Champagne*. See *CHAMPAGNE*.—*V. de Grenache* [Fr. Cod.]. A sweet wine containing about 15 per cent. of alcohol and having a sp. gr. of about 1.028. It comes from the region of France bordering on the eastern Pyrenees, and is sometimes white, but more commonly dark red. [B, 95 (a, 38).]—*V. de Lunel* [Fr. Cod.]. A French wine containing about 15 per cent. of alcohol. It is rarely obtained pure. [B, 95 (a, 38).]—*V. de Troussau* [Fr. Cod.]. See *Vin de digitale composé de l'Hôpital Dieu*.—*V. d'Huxham*. See *Tinctura CINCHONÆ composita*.—*V. diurétique amer de la Charité*. See *V. de SCILLE composé de la Charité*.—*V. ferrugineux*. See *Vinum FERRI citratis*.—*V. Mariani*. Mariani's wine of coca.—*V's médicinaux*. See *VINA medicata*.—*V. musquée*. See *Tinctura MOSCHI vinosa*.—*V. ordinaire*. See *Vinum cibarium*.—*V. rouge* [Fr. Cod.]. French red wine. [B, 95 (a, 38).]—*V. scillitique*. See *Vinum SCILLÆ*.—*V. stibie*. See *Vinum ANTIMONII*.

VINADIO (It.), n. Ven-a²d-e²-o. A place in Cuneo, Italy, where there are hot saline and sulphurous springs. [L, 37, 41, 57 (a, 14).]

VINAGE (Fr.), n. Ve-na²-zh. The addition of alcohol to weak wines. [B, 38, 93 (a, 14).]

VINAGRILLO (Sp.), n. Ven-a²g-re²-lo. In South America, the *Oxalis acetosella*; also, in Chile, dried cakes of pounded oxalis-leaves, which are infused in water to make an acid drink. [a, 35].]

VINAIGRE (Fr.), n. Ve-ne²g-r². See VINEGAR and ACETUM.—*Esprit de v.* Glacial acetic acid. [B.]—*Mellite de v.* See under OXYMEL.—*Mellite de v. scillitique*. See *Oxymel SCILLÆ*.—*Sel de v.* See *Liquor alexiteris acetatus*.—*Sirap de v.* Lat., *oxysaccharum aceticum*. Sp., *jirabe de vinagre* [Sp. Ph.]. A preparation made by dissolving 175 parts of sugar in 100 of white vinegar containing 10 per cent. of acetic acid, and 50 parts of sugar in 345 of white vinegar containing 6½ per cent. of acid [Belg. Ph.]. [B, 95 (a, 38).]—*Sirap de v. framboisé* [Fr. Cod.]. A mixture of equal parts of syrup of vinegar and raspberry syrup. [B, 95 (a, 38).]—*V. anglais*. See *ACETUM britannicum* (2d def.).—*V. antihystérique*. See *ACETUM antihystericum* and *Acetum RUTÆ compositum*.—*V. antiseptique*. See *ACETUM aromaticum*.—*V. aromatique*. 1. Cf. the Fr. Cod. See *VINUM aromaticum*. 2. See *Compound vinegar of ANGELOICA*.—*V. camphoraté*. **V. camphré**. See *ACETUM camphoratum*.—*V. cantharidé*. See *ACETUM CANTHARIDIS*.—*V. chalybé*. See *ACETUM chalybeatum*.—*V. de Marsailles*. **V. des quatre voleurs**. See *ACETUM aromaticum*.—*V. glacial*. Glacial acetic acid. [B.]—*V. martial*. See *ACETUM chalybeatum*.—*V. médicinal*. See *ACÉTOLÉ*.—*V. phéniqué* [Fr. Cod.]. A filtered mixture of 10 parts of crystallized carbolic acid, 20 parts of acetic acid of sp. gr. 1.060 (containing 10 parts of glacial acetic acid), and 79 parts of distilled water. [B, 95 (a, 38).]—*V. rosat*. See *ACETUM ROSARUM*.—*V. scillitique*. See *ACETUM SCILLÆ*.

VINAIGRIER (Fr.), n. Ve-ne²-gre-a. The *Rhus coriaria* and other species of *Rhus*. [a, 35.]

VINCA (Lat.), n. f. $V^{12}n^2k(w^{12}n^2k/a^3$. From *vincere*, to bind. Fr., *perenche*. Ger., *Sinngrün*, *Wintergrün*. Periwinkle; a genus of the *Vinceae* (a section or tribe of the *Apocynaceae*). The *Vinceae* are a family of the *Corolliflorae*. [a. 35.]—**Herba vinceæ** [Russ. Ph.]. The leafy and flowering branches of *V. minor*. [a. 35.]—**V. major**. Fr., (*grande*) *perenche*, *grand pucelage*. Ger., *grosses Sinngrün*. Large periwinkle, band-plant, cut-flagger; an undershrub of southern Europe having the properties and uses of *V. minor*. [a. 35.]—**V. minor**. Fr., *petite perenche*, *petit pucelage*, *violette des sorciers*, *herbe à la capucine*, *bergère*. Ger., *kleines Sinngrün*, *Wintergrün*, *Elwigrün*, *Todtenmyrte*, *Jungfernkronen*, *Mädgelpalmen*, *Todtengrün*, *Bergwinckelkraut*. Ground ivy, common (or small) periwinkle of Europe. The leafy and flowering branches, formerly official as *herba vinceæ* (see *perenche*, see *vince perenche*, see *vince minoris*, see *clematitidis perenche*, etc.), are used as a hemostatic, as a mild purgative and diaphoretic, and, in Poland, in plica polonica. The *exsiccatis diaphoreticis* of Dioscorides was probably both this species and *V. major*. [a. 35.]—**V. parviflora**. An East Indian species used externally in sciatica and rheumatism. [a. 35.]—**V. pervinca**. See *V. minor*.—**V. pusilla**. A Malabar species, used externally in lumbago. [a. 35.]—**V. rosea**. Madagascar periwinkle, old maid of the West Indies, rosy-flowered Indian periwinkle; a small herb said to be used as an alternative. [a. 35.]

VINÇA (Fr.), n. $Va^{2n}sa^2$. A place in the department of the Pyrénées-Orientales, France, where there is a hot saline and sulphurous spring. [L. 49 (a. 14.)]

VINCEOTOXICUM (Lat.), n. $V^{12}ns(w^{12}n^2k)-e^2-to^2x^{12}k-u^3m$ (u³m). From *vincere*, to conquer, and *toxicum*, poison. Fr., *vinetoxicum*, *dompte-vin*, *Schwebwurz*. 1. A genus of the *Asclepiadeae*, referred by Brown to *Cynanchum*. 2. In pharmacy, the *Cynanchum v. (V. officinale)*. [a. 35.]—**Extractum vince-toxici**. A preparation made by digesting the root of *Cynanchum v.* with 6 times as much water for some days, boiling a little, expressing, and evaporating. [B. 119 (a. 38).]—**Tinctura vince-toxici**. Fr., *teinture de dompte-vin*. A tincture made of the root of *Cynanchum v.* with 5 times as much alcohol. [B. 119 (a. 38).]—**V. luteum**. *V. v. luteum*. See *CYNANCHUM fuscatum*.—**V. officinale**. See *CYNANCHUM v.*

VINCEOTOXIN, n. $V^{12}n-se^2-o^2x^{12}n$. A glucoside, $C_{16}H_{12}O_{16}$, obtained by Tausert from the root of *Cynanchum vince-toxicum*. There are two varieties, both amorphous. [B.]

VINCTURA (Lat.), n. f. $V^{12}n^2kt(w^{12}n^2kt)-u^2r(ur)/a^3$. From *vincere*, to bind. See **BANDAGE** and **LIGATURE** (1st def.).

VINCULUM (Lat.), n. $V^{12}n^2k(w^{12}n^2k)-u^2l(u^2l)-u^3m(u^3m)$. From *vincire*, to bind. See **BANDAGE** and **LIGAMENT**.—**Vincula tendinum**. Vascular synovial folds which stretch over the flexor tendons of the hand and foot on the first and second phalanges. [L. 31, 332.]—**Vincula vaginalia tendinum**. Ligamentous bridgelike bands connected with the tendons of the fingers.—**Vincula vasculosa** (tendinum). See *Vincula tendinum*.

VINE, n. *Vin*. 1. The genus *Vitis*. 2. Any plant with a climbing or trailing stem. [a. 35.]—**Mercury v.**, **Poison v.** See **Rhus radicans**.

VINEAL, adj. $V^{12}n-e^2-l$. Lat., *vinealis*. Fr., *vinéal*. Ger., *weinbergbewohnd*. Of plants, growing wild in vineyards. [a. 35.]

VINEGAR, n. $V^{12}n-e^2-g-a^3r$. Lat., *acetum*. Fr., *vinaigre*, *acétol*, *acétolat*, *acétolature*, *acétolé* (2d def.). Ger., *Essig*, *Weinessig* (1st def.). 1. A liquid of pungent aromatic odor and sour taste obtained from wine and other alcoholic solutions by acetous fermentation. 2. A pharmaceutical preparation consisting of a solution of a medicinal substance in v. (1st def.). The v's (Lat., *aceta*) of the U. S. Ph. are made with 10 per cent. of the crude gr. [B.]—**Antiseptic v.**, **Aromatic v.** A preparation made by dissolving various aromatic essential oils in highly concentrated acetic acid. [B. 5.] See also **ACETUM aromaticum**.—**Crude v.** Commercial *v.*—**Distilled v.** *V.* prepared by distilling about three quarters of crude *v.* It should have no color, contain at least 4 per cent. of acetic acid, and have a sp. gr. of about 1.004. [B. 81 (a. 38).]—**English v.** See **ACETUM britannicum** (2d def.).—**Marseilles v.** See **ACETUM aromaticum**.—**Malt v.** *V.* obtained from an infusion of malt. [B.]—**Mother of v.** Lat., *mater aceti*. A gelatinous nitrogenized substance having the power of exciting the acetification of pure alcohol in the presence of atmospheric air. It has been described as a fungus, the *Mycoderma vini* (*Saccharomyces mycoderma*). [A. 1.]—**Proof v.** *V.* containing from 4 to 5 per cent. of acetic acid. [B.]—**Purified v.** See **Distilled v.**—**Pyroligneous v.** *Pyroligneous acid*; impure acetic acid. [B.]—**Radical v.** Lat., *aceticum radicale*. Acetic acid made from verdigris. The term is also often applied to glacial acetic acid, however prepared. [B. 3, 5, 10.]—**Spirit of v.** See **ACETUM aceticum dilutum**.—**Thieves' v.** See **ACETUM aromaticum**.—**V. of lead**. See **Liquor PLUMBI subac-tatis**.—**V. plant**. The *Penicillium glaucum*. [a. 35.]—**V.-tree**. The *Rhus typhina* and *Rhus glabra*. [a. 35.]

VINETINE, n. $V^{12}n-e^2t-en$. Fr., *vinétine*. See **OXYACANTHINE**.

VINIFEROUS, adj. $V^{12}n-iff-e^2r-u^2s$ Lat., *viniferus* (from *vinum*, wine, and *ferre*, to bear). Fr., *vinifère*. Ger., *weintragend*. Bearing viticulus, or vines. The *Vinifera* (Fr., *vinifères*) are the *Amelipeceae* and a tribe or suborder of that family. [a. 35.]

VINOMETER, n. $V^{12}n-o^2m-e^2t-u^3r$. From *vinum*, wine, and *metron*, a measure. Fr., *vinomètre*. An instrument for measuring the percentage of alcoholic acid in a liquor. [a. 49.]

VINOPHOSPHORIC ACID, n. $Vin-o-fo^2s-o^2r^{12}k$. See **ETHYLPHOSPHORIC ACID**.

VINOSULPHURIC ACID, n. $Vin-o-su^2lf-u^2r^{12}k$. Sulphovinic acid (see under **ETHYL sulphate**).

VINOSUS (Lat.), adj. $V^{12}n(wen)-os/u^2s(u^2s)$. From *vinum*, wine. Vinous; alcoholic; spirituous.

VINOUS, adj. $Vin-u^2s$. From *vinum*, wine. Gr., *οινώδης*. Lat., *vinosus*. Fr., *vineux*. Ger., *weinig*. Containing wine or possessing its characteristics. [a. 38.]

VINOXALIC ACID, n. $Vin-o^2x-a^2l^{12}k$. Acid ethyl oxalate.

VINUM (Lat.), n. n. $Vin(wen)/u^2m(u^2m)$. Gr., *οἶνος*. See **WINE**; in the pl., *vinca*, of the Belg., Finn., and Swed. Ph's, see *Vina medicata*.—**Alcohol vini**. See **ETHYL ALCOHOL**.—**Clysmma vini antimonialis**. Of the Sp. Ph., 1798, a mixture of antimonial wine with twice as much water. [B. 97 (a. 21).]—**Lautisches vinum**. Very excellent wines of old writers, wines spiced with myrrh. [A. 312, 325 (a. 48).]—**Mistura spiritus vini gallici**. Egg brandy, brandy mixture; made by triturating the yolks of 2 eggs with 1 oz. of powdered sugar and adding 4 fl. oz. each of cinnamon water and brandy. [B. 95 (a. 38).]—**Spiritus vini**. 1. Alcohol. 2. Brandy.—**Spiritus vini æthereus**. Ethyl ether. [B. 19.]—**Spiritus vini alcoholisatus**. See **SPRITUS alcoholisatus**.—**Spiritus vini camphoratus crocatus**. See **Aqua pestilentialis**.—**Spiritus vini cognac**. See **COGNAC** and **Spiritus vini gallici**.—**Spiritus vini communis**. A mixture of concentrated alcohol and water. [B.]—**Spiritus vini concentratus** (see *dephlegmatissimus*). See **ETHYL ALCOHOL**.—**Spiritus vini depuratus**. Alcohol obtained by distillation of brandy. [B. 97.]—**Spiritus vini dilutus** [Aust. Ph.]. Dilute alcohol. See **ETHYL ALCOHOL**.—**Spiritus vini et salis** (Valentine). A solution of ethyl chloride in alcohol, prepared by the action of hydrochloric acid (*spiritus salis*) on alcohol (*spiritus vini*). [B. 3.]—**Spiritus vini gallici**. Fr., *eau de vin de cognac* [Hung. Ph. 2d ed.], Ger., *Brantwein*, Brandy. Of the Fr. Ph. the spirit obtained from French wine; of the U. S. Ph., any spirit distilled from fermented grapes and containing the proper proportion of alcohol. [B. 5.]—**Spiritus vini tartarizatus**. Very strong alcohol obtained by dehydration of rectified spirit with potassium carbonate. [B. 97.]—**Spiritus vini tenuis**. A mixture of 20 parts of rectified spirit with 17 of water. [B.]—**V. absinthiatum**. Wormwood wine; made by macerating *Artemisia absinthium*, sometimes combined with *Artemisia pontica* and with *Acorus calamus*, in white wine. [B. 97.] Cf. *Vin d'absinthe*.—**V. adustum**. Brandy. [B. 97.]—**V. album**. White wine; any wine of light color, made from white grapes or from dark grapes fermented apart from the skins and seeds (*marc*) [U. S. Ph.]; German or other white wine [Ger. Ph.]; white wine from Naxos [Gr. Ph.]; French white wine [Netherl. Ph.]. [B. 3, 95 (a. 38).]—**V. album fortius** [U. S. Ph.]. A mixture of white wine with one seventh as much alcohol of sp. gr. 0.820. It must contain from 20 to 35 per cent. by weight of absolute alcohol. [B. 95 (a. 38).]—**V. album generosum** [Swiss Ph.]. The best white Swiss wine. [B. 95 (a. 38).]—**V. alcoholicum** [Gr. Ph.]. Wine from the island of Thera. [B. 95 (a. 38).]—**V. amarum**. 1. Of the Netherl. Ph., a preparation made by dissolving 2 parts each of cascariella, lesser centaury, gentian, myrrh, and extract of blessed thistle in 180 of Spanish wine, and adding 12 of tincture of orange-peel. 2. Of the Belg. Ph., see *Élixir AURANTII compositum*.—**V. anglicanum**. See *Beer*.—**V. antihelminthicum**. See *V. absinthiatum*.—**V. antimonialis**. *V. antimoniatum* (Huxhami). See *V. ANTIMONIUM*.—**V. aromaticum**. Sp., *vino de especias aromáticas* [Sp. Ph.]. A preparation made by extracting 1 part each of lavender-flowers, peppermint, rosemary, sage-leaves, and the herbs of wormwood and origanum with enough stronger white wine to make 100 parts by percolation [U. S. Ph.]; or by macerating for five days 6 parts each of lavender-flowers and the leaves of rosemary and sage with 90 of red French wine [Swed. Ph.]; or 1 part each of peppermint, rosemary, sage-leaves, and the herbs of wormwood, hyssop, origanum, *Thymus serpyllum*, and *Thymus vulgaris* with 80 of red French wine [Russ. Ph.]; or by macerating for some days 100 parts of aromatic species with 1,000 of red wine containing 10 per cent. of alcohol [Belg. Ph.]; 800 of red wine and 250 of aqua vulneraria spirituosus [Ger. Ph.]; 900 of red wine and 100 of strong alcohol [Swiss Ph.]; 834 of red wine [Sp. Ph.]; 1,000 of red wine and 100 of aromatic spirit [Roum. Ph.]. The Belg. Ph. orders 64 parts of spirit of camomile, the Sp. Ph. 50 of spiritus vulneraria, to be added to the expressed and filtered product of the maceration. [B. 95 (a. 38).] See also *VIN aromaticum*.—**V. benedictum**. See *V. ANTIMONIUM*.—**V. camphoratum** [Ger. Ph., Swiss Ph.]. Ger., *Kampferwein*. A whitish fluid composed of 1 part each of camphor and alcohol, 3 parts of mucilage of gum arabic, and 45 of white wine. The Swiss Ph. directs the use of 1 part each of camphor and gum arabic and 48 parts of white wine. [A. 319 (a. 21); B. 95 (a. 38).]—**V. cedrinum**. See *CEDRITES*.—**V. chalybeatum**. See *V. ferru citratis*.—**V. chalybeatum compositum**. See *CENOLÉ de citrate de FER*.—**V. chamæpitynum**. Wine in which the green leaves of *Agua chamæpitys* have been infused. It was formerly considered diuretic. [B. 115, 200.]—**V. chinatum**. See *Vinum CHINÆ*.—**V. cibarium**. Fr., *vin ordinaire*. Ger., *Tischwein*. A table wine. [A. 322.]—**V. crocatum**. A preparation made by macerating 3 parts of saffron with 48 of white wine for some days and straining. [B. 119 (a. 38).]—**V. Partialeum compositum**. See *Vin de digitale*.—**V. de l'Hôtel Dieu**.—**V. diureticum** [Swiss Ph.]. A preparation consisting of 3 parts each of squill, juniper-berries, mace, angelica-root, and calamus, 6 each of melissa-leaves and wormwood, 12 each of pale cinchona-bark, orange-peel, and lemon-peel, 40 of strong alcohol, and 760 of white wine, expressed and filtered after ten days' maceration. [B. 95 (a. 38).]—**V. emeticum**. See *V. ANTIMONIUM*.—**V. ex cerevisia**. An old name for beer. [Martin, "Jour. de méd. de Paris," A. 15, 1852.]—**V. extracti Smith**. Sp., *vino de extracto de Smith* [Sp. Ph.]. A preparation made by dissolving 30 parts of extractum spectrum Smith in 540 of stronger white wine, filtering, and adding 4 part of oil of sassafras. [B. 95 (a. 38).]—**V. ferratum** [Swiss Ph.]. A preparation identical with the vin chalybé of the Fr. Cod. (see *V. ferru citratis*) except that Malaga wine is used. [B. 95 (a. 38).]—**V. ferruginosum** [Gr. Ph.]. A preparation made by digesting 4 parts of iron filings and 2 of cassia with 48 of white wine for some days and filtering. [B. 95 (a. 38).] See also *V. ferru*.—**V. gallicum**. Fr., *vin de galles*. French white wine. [B. 95 (a. 38).]—**V. gallicum rubrum**. 1. Of the Russ. Ph., French red wine. 2. Of

the Swed. Ph. red Bordeaux wine. [B. 95 (a, 38).]—*V. hippocra-tium*. See *Hippocras*.—*V. hippocastanale*. 1. preparation containing the product of the action of vinegar on antimony or its oxide. [B.]—*V. hispanicum* [Netherl. Ph.]. Brown Spanish wine. [B. 95 (a, 38).]—*V. hordeaceum*. Barley wine; beer. [B. 59.]—*V. lusitanicum*. Port wine. [B.]—*V. madei-rense*. Madeira wine. [B. 95 (a, 38).]—*V. malacense*, *V. mala-gense*. Malaga wine. [B. 95 (a, 38).]—*V. martiatum* [Belg. Ph.]. An extemporaneous mixture of 1 part of iron lactate and 999 parts of Malaga wine. [B. 95 (a, 38).]—*Vina medicata* [Dan. Ph.] (seu *medicinalia* [Gr. Ph., Russ. Ph.]). *Fr. vins medicinaux* [Fr. Cod.], *cenolis* [Fr. Cod.]. Medicinal preparations made by digesting or macerating drugs with wine in the same general way as for the preparation of tinctures. The Dan. Ph. replaces with more wine the portion which is evaporated in the process. [B. 95 (a, 38).]—*V. pepticum*. See *V. pepsin*.—*V. portense*. Port wine. [B.]—*V. regionum septentrionalium*. Beer. [B. 59.]—*V. robo-rans*. See *Vinum CRINÆ amarum*.—*V. rubrum*. *Fr. vin rouge*. Sp. *vino tinto*. Red wine; any wine of deep-red color made from black grapes fermented with the skins and seeds (*marc*) [U. S. Ph.]; French red wine [Fr. Cod., Russ. Ph.]; Bordeaux red wine [Swed. Ph.]; German and other red wine [Ger. Ph.]; red wine from the island of Syra [Gr. Ph.]. [B. 95 (a, 38).]—*V. rubrum generosum* [Swiss Ph.]. The best Swiss red wine [B. 95 (a, 38).]—*V. scillitium* [Fr. Cod.]. See *V. scilla*.—*V. stibiato-tartari-cum*, *V. stibiatum*. See *V. ANTIMONI*.—*V. stibiatum turbi-dum*. Sp. *vino emetico turbido* [Sp. Ph.]. A mixture of 3 parts of washed liver of antimony and 24 of white wine. [B. 95 (a, 38).]—*V. strumale* [Swiss Ph.]. A preparation made by macerating 48 parts of powdered burnt sponge, 4 of orange-peel, 6 of cinnamon, and 2 of cloves with 1,000 of Malaga wine for three days, express-ing, and filtering. [B. 95 (a, 38).]—*V. thebaicum*. See *V. opii* (1st def.).—*V. thebaicum crocatum*. See *Tinctura opii crocata*.—*V. xerense*, *V. xericum* [Br. Ph.]. Sherry wine. [B.]

VINYL, n. Vin¹². *Fr. vinylo*. *Ger. V. Ethenyl* (q. v.). It is supposed to exist in acetic aldehyde. [B.]

VIOL (Fr.), n. Ve-ol. Violation, rape. [A. 48.]

VIOLA (Lat.), n. f. Vi¹²(w)²o¹a². *Gr. lov*. *Fr. violette* (1st def.). *Ger. Veilchen* (1st def.). *Violet*, pansy; a genus of herbs, rarely undershrubs, forming, with *Noisettia*, *Ionidium*, etc., an order (*Violaceae*) of polypetalous dicotyledons. [a, 35.] 2. Of the Netherl. Ph. see *Flores violae*.—**Decoctum herbe violae tricoloris cum aqua**. A decoction of 6 drachms of the herb of *V. tricolor* in water enough to make 6 fl. oz. when strained. [B. 97 (a, 38).]—**Decoctum herbe violae tricoloris cum lacte**. A decoction of 1 oz. of the herb of *V. tricolor* in 6 of cow milk. [B. 97 (a, 38).]—**Flores violae** (seu *violae odorata* [Belg. Ph.], seu *violarum*). *Fr. violette odorata* [Fr. Cod.]. Sp. *viola* [Sp. Ph.]. The flowers of *V. odorata*. [B. 95 (a, 38).]—**Oleum violarum**. A preparation made by infusing sweet violets in four times as much oil or by boiling together equal parts of sweet violets and olive oil till the moisture is dissipated. [B. 119 (a, 38).]—**Syrupus violae odoratae**, **Syrupus violarum**. *Fr. sirop de violette* [Fr. Cod.]. Sp. *jarbe de violetas azul* [Sp. Ph.]. A preparation made by infusing sweet-violet flowers without the calyx in three times as much boiling water (twice as much, after previous washing with three times as much [Sp. Ph.]), and dissolving in 400 parts of the strained liquid 730 [Sp. Ph.] (800 [Gr. Ph.], 730 [Swiss Ph., Rom. Ph.]) of sugar (654 of sugar in 346 of liquid [Belg. Ph.], 380 in 210 [Fr. Cod.], 400 in 230 [Netherl. Ph.]). [B. 95 (a, 38).]—**Syrupus violarum com-munis**. *Fr. jarbe de violetas comùn* [Sp. Ph.]. A preparation made by pouring upon 3 parts of dried sweet violets water enough to make 80 parts of strained liquid and dissolving in this 144 of sugar. [B. 95 (a, 38).]—*V. arvensis*. *Fr. violette des champs*, *petite jacie*. 1. A European species used as a depurative. The root is emetic. 2. The

VIOLA ODORATA. [A. 327.]

See *Hesperis matronalis*.—*V. diandra*. A Guiana species with emetic roots. [a, 35.]—*V. enneasperma*. *Fr. violette à neuf arèneses*. A Malabar plant. The root is emetic. [a, 35.]—*V. hirta*. Hairy violet; a European species having a purgative and emetic root. [a, 35.]—*V. indecorum*. *Fr. violette du Brésil*. A Brazilian emetic-rooted species. [a, 35.]—*V. ipeacuanha*, *V. itouboua*. See *IONIDIUM ipeacuanha*.—*V. lunaris*. The *Luna-*

ria rediviva. [a, 35.]—*V. lutes*. 1. See *CHEIRANTHUS cheiri*. 2. Mountain (vine-) violet; found in Switzerland. [a, 35.]—*V. mar-tia*, *V. martiana*. See *V. odorata*.—*V. matronalis*. See *HESPERIS matronalis*.—*V. mirabilis*. Broad-leaved violet of Europe. The root is emetic and purgative. [a, 35.]—*V. mortuorum*. See *VINCA minor*.—*V. odorata*. *Fr. violette odorante* [Fr. Cod.] (ou de mars), *violier commun* (ou de mars), *jacie de printemps*. *Ger. wohlriechendes* (oder *blauer* oder *März-*) *Veilchen*, *wohlriechende Viola*. Sweet-scented (or March-) violet of middle and southern Europe, northern Africa, and middle Asia; the *Aekouros* *adans* of the ancients. The flowers, root, and seed, *flores*, *radix*, et *semen violarum* (seu *violae*) have been used, the flowers as a cardiac tonic

VIOLA TRICOLOR. [A. 337.]

and as a diuretic (now employed only in the preparation of a pec-toral and emollient syrup [see *Syrupus violarum*]) and as a test for acids and alkalies. The acid root is emetic and purgative. The seeds were used in calculus complaints. [a, 35.]—*V. ovata*. *Ger. eirundblättriges Veilchen*. A species (a variety of *V. sagittata*, according to Wood) found from New Jersey southward; used in diarrhoea, dysentery, and urinary complaints, and internally and externally for rattlesnake-bites. [a, 35.]—*V. palmata*. Hand-leaf violet of the Southern States, by Wood considered a variety of *V. cucullata*; used like *V. pedata*. [a, 35.]—*V. pedata*. *Fr. violette pédiate*, *pensée d'Amérique*. *Ger. fassförmigblättriges Veilchen*. Bird's-foot violet; an expectorant and demulcent species found from New England to the Carolinas; formerly official in the U. S. Ph. [a, 35.]—*V. riviniana*. A European species. The root is emetic and purgative. [a, 35.]—*V. sagittata*. Arrow-leaved violet; growing from Canada to Florida and westward to Arkansas. [a, 35.] Cf. *V. ovata*.—*V. silvestris*. 1. See *V. tricolor*. 2. A European species having a purgative and emetic root. [a, 35.]—*V. tricolor*, *V. trinitatis*. *Fr. violette (ou jacie) tricolore* (1st def.), *fleur* (ou herbe) de la Trinité (1st def.), *pensée sauvage* [Fr. Cod.] (2d def.). *Ger. dreifarbiges Veilchen*, *Ackerveilchen*, *Freisamkraut*, *Stief-mütterchen*, *Dreifaltigkeitsblume*, *Jelängerjelieber* (all 1st def.). Sp. *trinitaria* [Sp. Ph.]. 1. Heart's-ease or pansy of the gardens, fancy herb Trinity, love-in-idleness, etc.; a native of Europe, natu-ralized in the United States. The herb (the flowering plant with-out the root), *herb. jacea* (seu *jacea tricolor* seu *majoris*, seu *viola tricoloris*, seu *silvestris*, seu *trinitatis*, seu *heptachiri*), is laxa-tive, emollient, diuretic, diaphoretic, and antispasmodic, and was formerly used externally and internally in various skin diseases. Of the numerous varieties, the var. *arvensis* is considered the most active. [a, 35.] 2. The flowering herb (the herb [Sp. Ph.], flowering plant [Fr. Cod.]) of *V. tricolor* (var. *arvensis* [Fr. Cod., Sp. Ph.]). [B. 95 (a, 38).]

VIOLACEOUS, adj. Vi-o¹a¹-shu^s. 1. Violet in color. 2. Per-taining to the genus *Viola*, belonging to the *Violaceae*. [a, 35.]

VIOLAL, adj. Vi-o¹a¹-l. Lat. *violalis*. Belonging to the *Viola*s, Lindley's v. allyance (Lat. *nizus violalis*), which includes the *Flacouaceae*, *Samyidae*, *Cruciferae*, *Violaceae*, etc. [a, 35.]

VIOLANILINE, n. Vi-o¹a¹-an¹(i)-en. *Fr. v.* *Ger. Violanilin*. A violet coloring matter, C₁₅H₉N₃, obtained as a by-product in the manufacture of rosaniline. [A. 49.]

VIOLARIA (Lat.), n. f. Vi¹²(w)²o¹a²(a)³/ri²a³. From *viola*, a violet. The *Viola odorata*. The *Violaria*, or *Violarica*, are the *Violaceae*. [a, 35.]

VIOLATION, n. Vi-o¹a¹-shu^s. From *violare*, to outrage. See *RAPE* (in law).

VIOLE (Ger.), n. Ve-ol^{e2}. See *VIOLA* (1st def.) and *VIOLA odorata*.—*Abendv.* *Nachtv.* *Pfingstv.* See *HESPERIS ma-tronalis*.—*Vnschwertelwurzel*, *Vnwurzel*. See *Iris florentina* (3d def.).

VIOLET, n. Vi-o¹a¹-e²t. Lat. *viola* (1st def.). *Fr. violette* (1st def.), *v.* (2d def.). *Ger. Violet* (1st def.). 1. The genus *Viola*, especially *Viola odorata* (in Europe) and *Viola cucullata* (in America). [a, 35.] 2. A color more or less resembling the purple of v's; also a dye-stuff producing such color. [a, 46.]—*Britannia v.* An aniline v. dye-stuff produced by the action of brominated oil of turpentine on an alcoholic solution of magenta (aniline red). [B. 2.]—*Damask v.*, *Dame's v.* See *HESPERIS matronalis*.—*Gentian v.* An important v. aniline dye, used in histological and bacteriological investigations. [J. 64, 194.]—*Green v.* See *SOLSA concolor*.—*Hof-*

mann's v., Iodine v. See TRIMETHYLOSANILINE *hydriodide* and TRIMETHYLOSANILINE *hydriodide*.—Paris v. See METHYLANILINE v. —Sweet v. See *Viola odorata*.—V. *impérial* (Fr.). A v. dye of the aniline series, prepared by heating rosaniline or one of its salts with less aniline than would be required for aniline blue. It is much used in the arts. [B, 2.]

VIOLETTE (Fr.), n. Ve-o-le^{te}. See *VIOLA* (1st def.).—**Élécôlé de v.** Huile de v. See *OLEUM violarum*.—**Sirop de v.** [Fr. Cod.]. See *Syrupus violarum*.—**Tisane de v.** [Fr. Cod.]. A preparation made by infusing the flowers of *Viola odorata* with 100 times as much boiling water for half an hour and straining. [B, 95 (a, 38).]—V. de mars, V. odorante. See *VIOLA odorata*.

VIOLETT (Fr.), n. Ve-o-le-a. See *CHEIRANTHRUS incanus*, *LEUCOUM* (2d def.), and *NARCISSUS* (1st def.).

VIOLINE, n. Vi'o^l-en. 1. See MAUVEINE. 2. See AZODIPHENYL blue. 3. An emetic and poisonous alkaloid obtained from *Viola cucullata* and *Viola odorata*. [B, 38, 48, 93 (a, 14).]

VIOLURIC ACID, n. Vi-o^l-u^r-i^k. A monobasic acid, C₄H₅N₃O₄, occurring as pyramidal crystals. Its salts (the *violurates*) are of brilliant violet colors. [B, 3, 4.]

VIORENE (Fr.), n. Ve-orn. See *VIBURNUM* (1st def.).—V. des pauvres. See *VIBURNUM lantana* and *CLEMATIS vitalba*.—V. obier. See *VIBURNUM opulus*.

VIPERA (Lat.), n. f. Vip(wep)/e^r-a². From *vivus*, living, and *perere*, to bring forth. Fr. *vipère*. Ger. *Viper*. Sp. *víbora* [Sp. Ph.]. A genus of viviparous venomous serpents, of which *V. burs* is the type; *V. aspis*. [a, 43.]—**Spiritus viperarum**. See *Spiritus cornu cervi*.—V. *aspis*, V. *burs*. Ger. *Atter*. The common viper of Europe, known as the adder in England, and the only venomous reptile in that country. [a, 48.] Cf. *JUSCULUM viperinum*.

VIPERINA (Lat.), n. f. Vip(wep)-e^r-in(en)/a². Fr., *vipérine*. See *ECHUM vulgare* and *ARISTOLOCHIA serpentaria*.

VIPERINE, n. Vip-e^r-en. A principle found in the venom of *Vipera burs*, corresponding to the pytalyn of the saliva. [D.]

VIPÉRINE (Fr.), n. Ve-pa-ren. See *ECHUM*.

VIRE (Fr.), n. Ver. See *PARONYCHIA vulgaris*.

VIRENS (Lat.), adj. Vir(wir)/eⁿ-z(ans). Gen., -ent/is. From *virere*, to be green. Ger., *grünlich* (1st def.). 1. Greenish. 2. Evergreen. [a, 35.]

VIRESCENCE, n. Vir-e^s-eⁿs. The production, in flowers, of green (chlorophyll) in place of the usual color. [a, 35.]

VIRESCENT, adj. Vir-e^s-eⁿt. Lat., *virescent* (from *virescere*, to become green). 1. Greenish. 2. Turning green. [a, 35.]

VIRGA (Lat.), n. f. Vu^r-g(e)/wⁱ-r(g)a². Fr., *verge*. 1. A rod or rod-like structure (e. g., the penis). 2. See *SOLIDAGO*.—**Extractum virgæ aureæ**. An extract made by boiling golden rod in water and evaporating. [B, 119 (a, 38).]—V. *aurea*. 1. The genus *Solidago*. 2. The *Solidago v. aurea*. [a, 35.]—V. *cerea*. See *Wax boggie*.—V. *cerebri*. See *Pineal GLAND*.

VIRGAUREA (Lat.), n. f. Vu^r-g(e)/wⁱ-r(g)a²-a^r(a³u^r)-e²-a². See *VIRGA aurea*.

VIRGILIA (Lat.), n. f. Vu^r-g(e)/wⁱ-r(g)-i²/i²-a². From P. *Virgilius* (Vergilius) Maro, the poet. Fr., *virgile*. A genus of the *Leguminosæ*. [a, 35.]—V. *capensis*. A South African tree with edible seeds. The roots are said to be used against colic. [a, 35.]

VIRGIN, n. Vu^r-g(e)/i²-n. Ger., *napévos*, Lat., *virgo*. Fr., *vierge*. Ger., *Junfer* (1st def.), *Jungfrau* (1st def.). 1. A woman who has had no experience of sexual intercourse. [a, 48.] 2. As an adj. (applied to oil, wine, etc.), flowing spontaneously, without pressure being used.

VIRGINAL, adj. Vu^r-g(e)/i²-n^l. Lat., *virginæus* (from *virgo*, a virgin). Ger., *jungfräulich*. Pertaining to or in the state proper to virginity; in botany, pertaining to the time before anthesis. [a, 35.]

VIRGINIC ACID, n. Vu^r-g(e)/i²-n^l-i^k. Fr., *acide virginiéque*. Ger., *Virginsäure*. A fatty acid obtained from the root of *Polygala senega*. [B, 93 (a, 14).]

VIRGINITY, n. Vu^r-g(e)/i²-n^l-i². Lat., *virginitas* (from *virgo*, a virgin). Fr., *virginité*. Ger., *Jungferschaft*. The condition of being a virgin. [a, 48.]—**Physical v.** That condition of a woman in which no coitus has actually taken place, whatever the real state of her virtue may be.

VIRGIN'S-BOWER, n. Vu^r-g(e)/i²-n^l-b^u-u^r. The *Clematis vitalba* and other species of *Clematis*. [a, 35.]

VIRIDE (Lat.), n., n. of adj. *viridis* (q. v.). Vi^r(wⁱr)/i²-d-e(a). Gen., *vir'idis*. From *virere*, to be green. Green color, also something of that color. [a, 48.]—V. *æris*. See *VERIDIGIS*.—V. *cubicum*. See *Iron sulphate* (1st def.).

VIRIDESCENS (Lat.), adj. Vi^r(wⁱr)/i²-d-e^s-e²-s(e²n²kans). Ger., *grünwendend*. Viridescant, becoming green. [a, 35.]

VIRIDIC ACID, n. Vi^r(wⁱr)/i²-d-i^k. Fr., *acide viridique*. Ger., *Viridsäure*. An acid, C₁₄H₁₄O₈, derived from caffeotannic acid. [B, 93 (a, 14).]

VIRIDINE, n. Vi^r(wⁱr)/i²-d-en. Fr., v. Ger., *Viridin*. 1. An oily liquid, C₁₂H₁₆N, derived from the oils obtained from the distillation of organic matter. [B, 4.] 2. See *CHLOROPHYLL*.

VIRILE, adj. Vi^r(wⁱr)/i². Lat., *virilis* (from *vir*, a man). Fr., *viril*. Ger., *mannbar*, *männlich*. Pertaining to a man or to the faculties or powers of a man or the male sex. [a, 48.]

VIRILESCENCE, n. Vir-i²-e^s-eⁿs. From *virilis*, virile. Ger., *Virilescenz*. The development of masculine characteristics in a woman. [A, 69.]

VIRILITY, n. Vi^r(wⁱr)/i²-i²-t². Lat., *virilitas* (from *virilis*, virile). Fr., *virilité*. Ger., *Mannbarkeit*, *Virilität*. The condition of possessing virile powers. [a, 48.]

VIOLA (Lat.), n. f. Vi^r(wⁱr)/o²-l-a². Fr., *viole*. See MYRISTICA (1st def.).—V. *sebifera*. See MYRISTICA *sebifera*.

VIROSE, adj. Vi^r-o^s. Lat., *virosus* (from *virus*, poison). Fr., *virueux*. Ger., *virös*. Poisonous; having a taste and smell indicative of poisonous properties. [a, 35.]

VIRULENCE, n. Vi^r-u²-eⁿs. Lat., *virulentia* (from *virulentus*, virulent). Fr., v. Ger., *Virulenz*. The condition of being virulent; of a disease, intensity or malignancy, also infectiousness. [a, 48.]

VIRULENT, adj. Vi^r-u²-l²-nt. Lat., *virulentus* (from *virus*, poison). Fr., v. Poisonous, containing or due to an active virus, malignant. [D; a, 17.]

VIRUS (Lat.), n. n. Vir(wer)/u²-s(u²s). Gen., *vir'i*. Fr., v. Ger., *Jauche*, *Krankheitsgift*. 1. A poison. 2. Any morbid agent which, when brought into contact with animal tissue, disseminates itself so as to affect the vitality of the parts on which it acts and in many cases that of the entire organism. [D.]—**Specific v.** The characteristic poison of a particular disease. [D.]—**Vaccine v.** See *Vaccine LYMPH*.—V. *dartreux* (Fr.). See *Dartreux HUMOR*.

VIS (Lat.), n. f. Vi^s(wes). Gen., *vis*; plur., *vires*. Gr., *is*. See *FORCE* and *POWER*.—V. *a tergo*. Pressure from behind (used especially, in physiology, for that exerted by the heart's action on the circulation of the blood). [K.]—V. *medicatrix*. See *V. medicatrix natura*.—V. *contractilis insita*. See *MUSCULAR IRITABILITY*.—V. *essentialis* (Wolff). The "physical soul," the mysterious cause of the development of animal organisms according to the Wolffian theory of epigenesis. [A, 42.]—V. *expultrix*. An old term for a supposed force which effected the removal of excrementitious matters from the system. [K.]—V. *formativa*. See *PLASTIC POWER*.—V. *insita* [Haller]. The inherent irritability of a muscle (cf. *V. nervosa*, 2d def.). [K.]—V. *medicatrix*. A remedial force or impulse. [a, 43.]—V. *medicatrix natura*. Ger., *Naturheilung*. The remedial impulse of nature; the self-recreative power of the bodily system independent of the use of medicines. [a, 48.]—V. *metabolica*. See *METABOLISM*.—V. *mortua* [Haller]. The physical properties of tissues aside from those depending on their vitality (e. g., the elasticity which may remain in tendons after the occurrence of somatic death). [K, 3.]—V. *muscularis*. See *MUSCULAR FORCE*.—V. *neriosa*. 1. See *NERVOUS POWER*. 2. Of Haller, the nerve-current which excites a muscular contraction (cf. *V. insita*). [K.]—V. *opposita*. Ger., *Gegenkraft*. A force acting in the direction opposite to that of another force or of the resultant of other forces. [a, 48.]—V. *plastica*. See *PLASTIC FORCE*.—V. *vitalis*. *V. vitalis*. The energy or force that characterizes an organism in virtue of its possessing life. [a, 48.]—V. *viva*. See *LIVING FORCE*.

VISAGE, n. Vi^s-e²-j. Fr., v. See *FACE*.—V. *pleurard* (Fr.). In neurology (e. g., as a symptom of labio-glosso-laryngeal paralysis), a weeping or whining countenance caused by paralysis of the facial muscles. [a, 34.]

VISCAOUTSCHINE, n. Vi^s-ka²-u²-t²-ch²-n. A substance, C₈H₁₀O, obtained from crude viscin. [B, 38, 93 (a, 14).]

VISCERA (Lat.), n., n., pl. of *viscus* (q. v.). Vi^s(s/wi²s)/s(e²r(ke²r)-a²). See under *VISCUS*.

VISCERAL, adj. Vi^s-s(e²-r^l). Lat., *visceralis*. Fr., *viscéral*. Ger., v. Pertaining to the viscera or to a viscus. [a, 17.]

VISCERALGIA (Lat.), n. f. Vi^s(s/wi²s)-s(e²r(ke²r)-a²)-i²(a²g)/i²-a². From *viscus* (q. v.), and *álgos*, pain. See *ENTERALGIA*.

VISCÈRE (Fr.), n. Ve-se²-r. See *VISCUS*.

VISCÉROPATHIE (Fr.), n. Ve-sa-ro-pa²-te. A visceral lesion or disease. [a, 18.]

VISCID, adj. Vi^s-i²-d. Lat., *viscidus* (from *viscum*, the mistletoe). Fr., *visqueux*. Ger., *schleimig*. Slimy, glutinous. [a, 35.]

VISCIN, n. Vi^s-si²-n. Fr., *viscine*. Ger., V. A viscous, soft, and elastic substance, C₂₀H₃₀O₈, obtained from *Viscum album*, the bark of *Ilex aquifolium*, the sap of *Ficus religiosa*, etc. Dried at 120° C., it is a colorless, transparent, inodorous, insipid, and feebly acid mass. [B, 93 (a, 14).]

VISCOSE, adj. Vi^s-k²-os. See *VISCIN*; as a n., the gummy substance formed by the viscous fermentation of cane-sugar. ["Proc. of the Am. Pharm. Assoc.," xxx, p. 308 (a, 50).]

VISCOSIMETER, n. Vi^s-k²-o²-s-i²-m(e²t²-u²r). From *viscosus*, viscous, and *μέτρον*, a measure. An instrument for determining the degree of viscosity of a liquid. ["Drugg. Circ. and Chem. Gaz.," Aug., 1880, p. 149 (B).]

VISCOSITY, n. Vi^s-k²-o²-s-i²-t²-i². Fr., *viscosité*. Ger., *Klebrigkeit*. The state of being viscous. [B.]

VISCOUS, adj. Vi^s-k²-u²-s. Lat., *viscosus*. Fr., *visqueux*. See *VISCID*.

VISCUM (Lat.), n. n. Vi^s(sk/wi²sk)/u²m(u²m). Fr., *gui* (1st def.). Ger., *Mistel* (1st def.). 1. A genus of lorantheaceous shrubs parasitic on trees. The *Viscæ* are a division of the *Loranthæ*, a tribe of the *Viscoidæ*, or a tribe of the *Loranthæ*. The *Viscoidæ* are a suborder of the *Loranthæ*. The *Viscina* are a family of the *Polymorphæ*. [a, 35.] 2. See under *V. album*.—**Decoetum visci albi**. A preparation made by boiling 30 to 60 grammes of *V. album* in 2 litres of water till the liquid is reduced one half. [B, 119 (a, 38).]—**Extractum visci aquosum**. Fr., *extrait aqueux de gui*. A preparation made by boiling *V. album* in three times as much water, expressing, clarifying with white of egg, and evaporating. [B, 119 (a, 38).]—**Extractum visci vinosum**. A preparation made by digesting *V. album* with five or six times as much white wine for three days, straining, boiling the residue with fresh wine, mixing the liquids, and evaporating. [B, 119 (a, 38).]—V. *æthiopicum*. Fr., *gui d'Ethiopie*. A species used as tea at the Cape of Good Hope. [a, 35.]—V. *album*. Fr., *gui blanc*, *gillon*, *pomme hémorrhoidale*, *verguet*. Ger., *geme-*

the Mistel, Eichenmistel, Vogelleimistel, Kensterholz, Kreuzholz, Eichenkenster. Common mistletoe, mistletoe of the oak; parasitic on trees, found in middle and southern Europe. The young branches (including the bark and leaves), *lignum* (see *stipites*) *visci* (*albi*, *seu quercini*), *v. v. album* [Pruss. Ph., 6th ed., Gr. Ph.], *v. quernum*, were formerly used in epilepsy, catarrh, etc. The bark is rich in bird-life as are also the poisonous berries (*baccæ visci albi*, etc.), which were formerly employed as emollients, discutients, and maturatives. [a, 35.]—*V. Bavesiensis*. See *PRODRANDRON flavescens*.—*V. quercinum*, *V. quernum*. See *V. album* and *LORANTHUS europæus*.

VISCUS (Lat.), *n. n.* *Vī'sk(wi'sk)u's(u's)*. Gen., *vis'ceris*. Gr., *σπάργγος*, Fr., *viscère*. Any one of the internal organs of the body; generally used in the pl., *viscera* (Ger., *Eingeweide*).

VISH, *n.* *Vī'sh*. See *BISH*.

VISION, *n.* *Vī'zh'u'sn*. Gr., *ὄψις*. Lat., *visio*, *visus* (from *videre*, to see). Fr., *v. vue*. Ger., *Sehen*. The act of seeing; the power of seeing; sight. [F.]—**After-v.** The perception of an after-image. [K.]—**Binocular (single) v.** *V.* in which both eyes are used simultaneously to obtain a simple (single) image. When the fovea centralis of the retina of each eye is fixed on an object, all objects lying in the same horopter will form images on the respective retinae which will lie at equal distances from the fovea, and will therefore be appreciated as single. [F.]—**Double v.** See *DIPLOPIA*.—**False v.** See *PSEUDODIPLOPIA*.—**Half-v.** See *HEMI-OPHIA*.—**Iridescent v.** An anomaly of *v.*, usually arising in the lens, in which objects appear either colored (chromatic) or with their edges or outlines exhibiting prismatic colors. [F.]—**Lateral v.** See *DYSOPIA lateralis*. **Manifold v.**, **Multiple v.** See *POLY-OPHIA*.—**Quadruple v.** Ger., *Vierfachsehen*. The perception of four visual images at once. [*Rev. des sci. méd.*, April, 1889, p. 682 (a, 18).]—**Skin-v.** The apperception of light, both quantitatively and qualitatively, by the skin, without a visual organ, as in earthworms, *Trilobites*, etc. (Graber, "Am. Nat.", xviii, p. 680 (a, 32)).—**Stereoscopic v.** That form of *v.* in which the combined virtual image seen appears to be a solid body and a perfect counterpart of the object. It is a blending of the virtual images of an object presented separately one to each eye. [F.]—**Triple v.** See *TRIPOPIA*.

VISIREBENE (Ger.), *n.* *Ve-z'er-ab-e'n-e'n*. See *PLANE* of regard.

VISIR-LINE, *n.* *Vī'z'er-līn*. Fr., *ligne de visée*. Ger., *Visirlinie*. See *Visual axis*.—**Crossing-point of the v.-l.** See *LINE of sight*.—**Principal v.-l.** See *LINE of fixation*.

VISIR-PLAN, *n.* *Vī'z'er-plan*. Fr., *plan de visée*. Ger., *Visirebene*. See *Visual PLANE*.

VISITE (Fr.), *n.* *Ve-zet*. A visit; a search or examination.—*V. de l'aisement*. An examination of the lymphatic glands of the axilla, as in cases of mammary tumor, with a view to their removal if necessary. [A, 94.]

VISITIRISEN (Ger.), *n.* *Ve-zet'er-iz-e'n*. See *PROBE*.

VISITIRKERZE (Ger.), *n.* *Ve-zet'er-ke'rts-e'*. See *CEREOPLUS* (2d def.).

VISMIA (Lat.), *n. f.* *Vī'smi'ā*. From *Visma*, a Portuguese botanist. Fr., *vismie*. *v.* A genus typical of the *Vismia*, which are a tribe of the *Hypericaceae*. [a, 35.]—*V. cayennensis*. Fr., *arbre à la fièvre*, *bois baptiste*, *arbre à sang*. Ger., *cayennensis Guttibaum*. A Guiana species yielding a resin like that of *V. guianensis*. [a, 35.]—*V. guianensis*. Fr., *arbre à la fièvre*. American gum-plant (or gamboge-tree, or gutta-gum-tree), wax-tree of Guiana. All parts yield a yellow resinous juice (American gamboge), which is used as a purgative and in eczema, etc. [a, 35.]—*V. laccifera*, *V. latifolia*, *V. longifolia*, *V. micrantha*, *V. sessilifolia*. Species yielding American gamboge. The second is found in Guiana, the third and fourth in Brazil, and the fifth (the leaves of which are used as a febrifuge) in the northern part of South America. [a, 35.]

VISMUTHUM (Lat.), *n. n.* *Vī'z(wi's)mu'th(muth)u'sm(u'm)*. See *BISMUTH*.—*Calx vismuthi*. See *BISMUTH subnitrate*.

VISNEA (Lat.), *n. f.* *Vī'sne'ā*. Fr., *v. visnée*. A genus of the *Ternstroemiaceae*. [a, 35.]—*V. mocanera*. Fr., *moacan*. Ger., *Mocanere*. A shrub found in the Canaries; used in hemorrhoids (cf. *MOCAN*). [a, 35.]

VISIORIUS (Lat.), *adj.* *Vī'z(wes)-or-i'z-u's(u's)*. See *VISUAL*.

VISOS (Fr.), *n.* *Ve-zo*. A place in the department of the Hautes-Pyrénées, Fr., where there is a saline and chalybeate spring. [L, 49, 57 (a, 14).]

VISUAL, *adj.* *Vī'zh'u'ā*. Lat., *visorius* (from *videre*, to see). Fr., *visuel*. Pertaining to vision. [F.]

VISUAL REPERTUM (Lat.), *n. n.* *Vis(wes)u'sm(u'm)-re(re')-pū't(r)u'sm(u'm)*. See *FUNDSCHEIN*.

VISUOMETER, *n.* *Vī'zh'u'ō-m'et-ur*. From *visus*, sight, and *μέτρον*, a measure. Fr., *visuomètre*. Ger., *V.* An instrument for measuring the range of vision. Risley's *v.* consists of a stand which is clamped firmly to a table. To the top of the stand is fixed a pair of semicircles, with their concavity upward, for the reception of trial-glasses, stenopæic slit, etc. In front of the holders is a triangular horizontal bar, 30" long and graduated in fractions of an inch. Upon this bar is adjusted a movable carrier, designed to bear a series of cords containing the test-types of Snellen and Jaeger, and test-figures for astigmatism. The examinations are all made at an artificial far-point of 10' or 12'. [F, a, 34.]

VISUS (Lat.), *n. m.* *Vī's(wes)u's(u's)*. Gen., *vis'us*. From *videre*, to see. See *VISION*.—*V. acris*. See *OXYDERGIA*.—*V. amplificatus*. See *MACROPIA*.—*V. coloratus*. See *CHROMATOPSIA*.—*V. debilitas*. See *ASTHENIOPIA*.—*V. decolor*. See *COLOR-BLINDNESS*.—*V. defiguratus*. See *PSEUDOBLEPSIS*.—*V. dimidiatus*.

See *HEMIOPIA*.—*V. diminutus*. See *MICROPIA*.—*V. diurnus*. See *HEMERALOPIA* (1st def.).—*V. duplicatus*. See *DIPLOPIA*.—*V. evanidus*. An old term for failure to recognize objects and their gradual disappearance, owing to fatigue of the retina. [F.]—*V. interruptus*. An old term for a form of amblyopia in which the patient loses sight of a word here and there on the printed page. [F.]—*V. juvenis*. An old term for myopia. [F.]—*V. lateralis*. See *DYSOPIA lateralis*.—*V. lucidus*. See *PHOTOPSIA*.—*V. muscarum*. See *MUSCÆ volitantes*, and cf. *METAMORPHOPSIA*.—*V. nebulosus*. See *LEUCOMA* (4th def.).—*V. nocturnus*. See *NYCTALOPSIA*.—*V. obliquus*. See *STRABISMUS*.—*V. senilis*. See *PRESBYOPIA*.—*V. triplex*. See *TRIPOPIA*.

VITA (Lat.), *n. f.* *Vīt(wet)u's*. Fr., *vie*. See *LIFE*.—*V. cerebralis*. See *Cerebral LIFE*.—*V. psychica*. See *Psychic LIFE*.

VITAL, *adj.* *Vīt'l*. Gr., *βίωτικός*. Lat., *vitalis*. Fr., *v.* Ger., *v. lebensfähig*, *lebensd.* Pertaining to life, also essential to life; as a *n.*, in the pl., *v's*, organs which are regarded as necessary to life, or injury to which endangers or destroys life. [a, 48.]

VITALBA (Lat.), *n. f.* *Vīt(wet)-a'lb(a'lb)u's*. The genus *Clematis*, especially *Clematis v.* [a, 35.]

VITALISM, *n.* *Vīt'l-i'z'm*. Lat., *vitalismus* (from *vitalis*, vital). Ger., *Vitalisme*. Ger., *Vitalismus*. The doctrine of vital force; an old system of physiology which considered life as a "pure entity" apart from the body. [K.]

VITALITY, *n.* *Vīt-a'li'tē-tē*. Lat., *vitalitas* (from *vitalis*, vital). Fr., *vitalité*. Ger., *Lebenskraft*. 1. The principle of life. 2. Action, animation. [K.] 3. The state of being alive, also the power to resist death.

VITALIZE, *v. tr.* *Vīt'l-lz*. To impart life to, to endue with life. [a, 48.]

VITELLARY, *adj.* *Vīt'e'l-ar-i'*. See *VITELLINE*.

VITELLIN, *n.* *Vīt'e'l-i'n*. Fr., *vitelline*. Ger., *V.* An albuminoid principle contained in the yolk of eggs, etc. [B, 98 (a, 14).]—*Crystalline v.* See *Crystalline GLOBULIN*.

VITELLINE, *adj.* *Vīt'e'l-i'n*. Lat., *vitellinus*. Fr., *vitellin*. Ger., *vitellin*, *dottergelb* (2d def.). 1. Pertaining to the vitellus. [J.] 2. In botany, of the color of the yolk of egg. [a, 35.]

VITELLO-INTESTINAL, *adj.* *Vīt'e'l-o-i'n-tē-tē'st'i'n-l*. Lat., *vitello-intestinalis*. Pertaining to the vitelline sac and the intestine. [a, 48.]

VITELLOLUTEIN, *n.* *Vīt'e'l-o-lut'e'i'n*. A non-nitrogenous yellow pigment obtained from the yolk of hen's eggs. [B, 3.]

VITELLO-NESCENTERIC, *adj.* *Vīt'e'l-o-me'se'n-tē'rik*. Fr., *vitello-néscentérique*. Of Vulpéau, see *OMPHALO-MESENTERIC*.

VITELLORUBIN, *n.* *Vīt'e'l-o-ru'b-i'n*. Fr., *vitellorubine*. A red pigment obtained from the yolk of hen's eggs, a chemically unstable, dark-red powder. [B.]

VITELLOUSE, *n.* *Vīt'e'l-o-s*. Intermediate products in the hydration of vitellin analogous to an albumose. [Halliburton (a, 34).]

VITELLUS (Lat.), *n. m.* *Vīt(wi't)-e'l'u's(hu's)*. Dim. of *vitulus*, a calf. Gr., *τέλειος*. Fr., *v. matière vitelline* (*ou jaune*), *jaune de l'œuf* (2d def.). Ger., *Dotter*, *Eigelb* (2d def.). Syn.: *ovī v.* [Br. Ph.] (2d def.). 1. The cell-body of the ovum; the yolk of an egg or of an ovule; that portion of the contents of the vitelline membrane which is to afford nutriment to the embryo and take part in its development during the period of incubation in the *Ovipara*, and up to the establishment of a nutritive connection with the maternal organism in the *Vivipara*. 2. Of the U. S. Ph., yolk of egg, the yolks of hen's eggs.—**Formative v.**, **Germinal v.**, **Germ v.** Lat., *morphocellitus*. Fr., *v. de formation*. Ger., *Bildungsdotter*, *Hauptdotter*. The protoplasmic portion of the *v.* as distinguished from the nutritive *v.*—**Glyceritin vitelli** [U. S. Ph.]. A preparation made by triturating together 9 parts of yolk of egg and 11 of glycerin. [B, 95 (a, 38).]—**Nutritive v.** Lat., *trophicellitus*. Fr., *protocellithe*. Ger., *Nahrungsdotter*. The granular portion of the yolk; the part that serves not directly for development, but in a subsidiary way by nourishing the formative *v.* [A, 5.]—**Oleum e vitellis ovorum. See *Oil of eggs*.—**Plastic v.** See *Formative v.*—**Primary v.** The *v.* of a simple ovum.—**Retrait du v.** (Fr.). A process of shrinkage on the part of the *v.* giving rise to a space between it and the vitelline membrane. See *LACUNA* (2d def.).—**Secondary v.** [Kölliker]. An additional nutritive *v.* substance found in compound ova, formed in special organs or in special cells of the ovary. [A, 8.]—**V. ovarien** (Fr.). The yolk of an ovarian ovum.—**V. ovi**. See *V.* (2d def.).—**White v.** Ger., *weisser Dotter*, *weisser Nahrungsdotter*, *Dotterweiss*. A thin, white portion of the nutritive *v.*, forming a layer surrounding the yellow *v.* and penetrating to the centre of the latter in the form of a whitish cord terminating in a globular mass. [A, 8.]—**Yellow v.** Ger., *Gelb*, *gelber Dotter*. The whole of the nutritive *v.* that is not included in the term white *v.***

VITERBO (It.), *n.* *Vet-er'b'o*. A place in the province of Rome, Italy, where there are hot sulphurous springs and a gaseous chalybeate spring. [L, 30, 37, 49, 57 (a, 14).]

VITEX (Lat.), *n. f.* *Vīt(wet)u's*. Gen., *vit'icis*. Fr., *gattilier*. Ger., *Müllen*. A genus of verbenaceae trees and shrubs. The *Viticeæ* are a family comprising the *Myoporeæ* and *Verbenaceæ*, or a division (tribe) of the *Verbenaceæ*. The *Viticeæ* are the *Verbenaceæ*. [a, 35.]—*V. agnus castus*. Fr., *(gattilier) agnus castus*, *arbre au jeune*, *potire faux*. Ger., *genuine Müllen*, *Kuschbaum*, *Schufmülen*, *Kuschbaumstrauch*, *Abrahambaum*, *Mönchs Pfefferstrauch*. Tree-of-chastity, hemp- (or chaste- or monk's pepper)-tree; an aromatic shrub of the Orient and southern Europe, known as *aynos* to the ancients, who ascribed to it anteroptic virtues, and used the leaves as an emmenagogue and oxytocic and externally as a discutient. The hot, pungent, and acrid seeds (or by substitution the fruits), *semen agni casti* (see *arboris castæ*, see *viticis officinalis*).

*nal*is), have been used as an emmenagogue, as a digestive, in diarrhoea and intermittent fever, and as a diaphoretic and diuretic in snake-bites; more recently they have been used, like cubebes, in gonorrhoea. [a, 35.]—*V. arborea*. A Sumatra species. The bark is used in ophthalmia. [a, 35.]—*V. latifolia*. An East Indian tree. The leaves are used for venomous bites and the bark and root in diarrhoea and dysentery. [a, 35.]—*V. moluccana*. A tree of the Moluccas where the bark is used as a vulnerary. [a, 35.]—*V. negundo*. Fr. *guttifer* *indica*. Five-leaved chaste-tree of India and other warm parts of Asia. The aromatic leaves are used as a topical application in rheumatism, sprains, etc., and in decoction as a bath for women after delivery. The bitter root and the dried fruits are anthelmintic, and the former also febrifuge. The Mohammedans smoke the dried leaves for headache and catarrh. [a, 35.]—*V. pinnata*. A Ceylon species. The flowers are used to aromatize tea. [a, 35.]—*V. Rheedi*. A Malabar tree. The mildly aromatic bark is used in abdominal complaints and, with the fragrant leaves, as an emmenagogue and in after-pains. The young branches are used for rheumatism and gout. [a, 35.]—*V. spicata*. A species found in China and Cochinchina; used as a calefactant, stimulant, and discutient, and especially in various nervous disorders. [a, 35.]—*V. trifolia*. Three-leaved chaste-tree, (East) Indian privet; a species having the medicinal properties of *V. negundo* in greater degree. The young shoots and the leaves are a powerful discutient. The powdered leaves are used as a febrifuge, and the root as an anodyne application. The fruit is used in the Fiji Islands as a nerve, cephalic, and emmenagogue. [a, 35.]

VITIATED-HUMORIST, n. *Vit*^{sh}/2-at-e^d-hu^m/o^r-ist. A believer in the origin of a given disease in a vitiation of the fluids of the body. [A, 84.]

VITICULA (Lat.), n. f. *Vit*²(wet)-i²k-u²(u¹)-a². Dim. of *vitis*, a vine. Fr., *viticule*. A vine or sucker. [a, 35.]

VITILIGO (Lat.), n. f. *Vit*²(w²)-i²l-ig(e^g)/o. Gen., *-ig/itis*. From *vitium*, a defect. Fr., *v.*, *achrome*, *vitiligo*. Ger., *Pigment-schwund*, *Nebelack*, *Melack*, *verticierter Hautfleck*. 1. In the modern acceptation of the term, and also as defined by certain of the older writers (e. g., *gorgeus*), an acquired form of achromatosis, characterized by white or light-colored patches of skin of irregular shape, usually bordered by a zone more darkly pigmented than the surrounding skin. [G, 3.] Cf. *V. of Bateman* and *V. of Celsus*, also *ALBINISMUS partialis*. 2. See *LEPROSY*.—*V. alba*. See *V. (1st def.)*.—*V. alba gravior*. See *White LEPROSY* (1st def.).—*V. alba levior*. An old term for macular leprosy. [G.] See *LEPRA maculosa*.—*V. alba*. *White LEPROSY*.—*V. nigra*. Vitiligo of Celsus (q. v.) in which white spots appeared on the hairy scalp. 2. *V. (1st def.)*, affecting the hairy scalp so as to produce circumscribed areas of canities. 3. Of Cazenave, *alopecia areata*. [G.]—*V. congenital* (Fr.). See *ALBINISMUS partialis*.—*V. gravior*. See *V. of Celsus*.—*V. hepatica*. See *CHLOASMA hepaticum*.—*V. hydropicorum*. Linear atrophy of the skin due to its over-distention from dropsy. [G.]—*V. matrum*. Linear atrophy of the skin due to pregnancy. [G.]—*V. m. m.*. Probably a variety of leprosy. [G, 17.] See *Black LEPROSY* and cf. *V. of Celsus* and *MORPHEA nigra*.—*V. nigra*. See *Black LEPROSY*.—*V. obscurum*. Linear atrophy of the skin due to corpulence. [G.]—*V. of Bateman*. A tubercular skin disease of uncertain character said to be followed, on the subsidence of the tubercles, by permanent white, glistening patches. [G, 17.]—*V. of Celsus*. "A loathsome disease" arising "from a bad habit of body," attended with alteration of the color of the skin (leprosy) b. Celsus described three kinds: *albus*, *melas*, and *leuce*. The first occurred in disseminated white patches or spots, attended with roughening of the surface. The second (*melas*) differed from *albus* only in the spots being black or dark-colored. The third (*leuce*) was characterized by spots whiter than those of *albus*, affecting the skin more deeply, so that the hairs were rendered white, and the disease was incurable. By some the first and second forms are supposed to have been superficial scaly diseases belonging either to psoriasis or to eczema, while the third form was leprosy. [G, 13.]

VITILIGOIDEA (Lat.), n. f. *Vit*²(w²)-i²l-ig(e^g)/o(o²)-i²d(ed)-e²-a². From *vitiligo* (q. v., 1st def.), and *ides*, resemblance. See *XANTHOMA*.—*V. granulosum*. See *XANTHOMA tuberculatum*.—*V. palpebrarum*. See *XANTHELASMA palpebrarum*.—*V. papulosa*. See *XANTHOMA tuberculatum*.—*V. plana*. See *XANTHOMA planum*.—*V. tuberosa*. See *XANTHOMA tuberosum*.

VITIS (Lat.), n. f. *Vit*(wet)/i²s. Gen., *vit/is*. Fr., *vigne*, Ger., *Weinrebe*. The vine; a genus of the *Ampelidae*. [a, 35.]—*Fructus v. minutus* [Swed. Ph.]. Corinthian raisins. [B, 95 (a, 38).] Cf. *Uve*.—*Fructus v. sennatus* [Dan. Ph.]. A preparation made by digesting 10 parts of senna-leaves in enough boiling water to make 15 parts when expressed at the end of an hour, boiling up with 30 of white sugar into a syrup, and adding 80 of grapes and 1 part of cassia. [B, 35 (a, 38).]—*Rob baccarum v. idææ*, *Rob v. idææ*. Fr., *rob de cantharide*. A preparation made by boiling the juice of the berries of *Vaccinium v. idææ* with one fourth of its weight of sugar to the consistency of honey. [B, 119.]—*V. acetosa*. North Australian vine; an acid plant which has been used as an antiscorbutic. The fruit is edible. [a, 35.]—*V. æstivalis*. The summer grape of the United States. The berries are edible. [a, 35.]—*V. alba* (*silvestris*). See *BRONIA alba*.—*V. apyrena*. A seedless variety of *V. vinifera*, yielding passula minores. [a, 35.]—*V. caribbea*. Ger., *westindische einrebe*. Jamaica grape, warm wine. The leaves and young branches are refrigerant and mildly astringent. The berries are eaten. [a, 35.]—*V. carnosa*. See *Cissus carnosa*.—*V. chironia*. An old term for the *Tamus communis*.—*V. corinthica*. See *V. apyrena*.—*V. idæa*. The *Vaccinium v. idææ*, also the genus *Vaccinium* or a section of that genus. [a, 35.]—*V. idæa myrtillus*. The *Vaccinium myrtillus*. [a, 35.]—*V. labrusca*. Fr., *vigne cotonneuse*. American plum- (or isabella-, or Northern fox-) grape, found also in Japan. The edible fruits are used in making wine. [a, 35.]—*V. latifolia*. An East

Indian species; used in odontalgia, as a detergent in indolent ulcers, and as an alternative. [a, 35.] Cf. *Cissus latifolia* (*glauca*).—*V. salix*. Of Dumortier, a section of the genus *Salix*. [a, 35.]—*V. setosa*. A very acrid East Indian species. The leaves, toasted and smeared with oil, are used as a maturant. [a, 35.]—*V. silvestris*. See *BRONIA alba*, *BRONIA dioica*, and *SOLANUM dulcamara*.—*V. trifolia*. An East Indian species. The leaves are used as a febrifuge and the roots as a discutient. [a, 35.]—*V. vinifera*. Fr., *vigne cultivée* (ou de Noë). Ger., *edle Weinrebe*, *Weinstock*, *Traubenstock*. The grape-vine; a native probably of Caspian regions, but now cultivated under numerous forms (*alexandria*, *alcantia*, *apyrena*, *muscatella*, etc.) in all countries having a mean summer temperature of 66° F. or more. The leaves and tendrils (Lat., *folia et pampini*) contain tartaric and malic acids, tartarates and malates, glucose and cane-sugar; they are cooling and astringent, and have been used in diarrhoea, hemorrhages, etc. The juice which flows from the stem when incised in the spring was formerly official as *lacrimum v.*, and has been used as a tonic eye-wash and in ophthalmia. The unripe fruits contain malic, tartaric, and racemic acids, and (in their skins) tannic acid; their refrigerant juice (Lat., *omphacium*, *succus omphacii*, *agresta*, *succus agrestis*) was formerly used against epilepsy. The ripe fruits are diuretic, laxative, and refrigerant, and their fermented juice constitutes wine. The dried fruits constitute raisins. The seeds contain 5 or 6 per cent. of tannin and over 15 per cent. of a bland fixed oil consisting of the glycerides of croctic, stearic, and palmitic acids; they have been used in chronic diarrhoea. [a, 35.]—*V. vulpina*. Bullet- (or Muscadine, or Southern fox-) grape; a United States species, found also in Japan. A variety known as "*scuppernon*" is cultivated in the Southern States. [a, 35.]

VITIUM (Lat.), n. n. *Vit*²(w²)/shi²(ti²)-u²m(u²m). Gr., *ἀνάρημα*, *vócos*. A fault, a defect; an abnormality. [a, 17.]—*V. prima* *conformationis*. See *Congenital MALFORMATION*.

VITRÉ (Fr.), n. *Ve*-tra. A place in the department of the Ille-et-Vilaine, France, where there is a ferruginous spring. [a, 14.]

VITREATUS (Lat.), adj. *Vit*²(w²)-re²-at(a²t²)/u²s(u²s). From *vitrum*, glass. Made into glass. [B.]

VITREOCAPSULITIS (Lat.), n. f. *Vit*²(w²)/re²-o(o²)-ka²-ps-(ka²ps)-u²(u²)-i(e²)/ti²s. Gen., *-itidos* (*-idis*). An old term for hyalitis. [F.]

VITREOUS, adj. *Vit*²-re²-u²s. Lat., *vitreus*, *vitrosus* (from *vitrum*, glass). Fr., *vitreux*, *vitré*. Ger., *glässig*, *gläsern*. Glassy, resembling glass; as a n. (Lat., *vitrum*), the corpus vitreum.—*Primordial v.* The embryonic v. It differs mainly from the v. of extra-uterine life in having many parabolic elements. [F.]

VITRIFICATUS (Lat.), adj. *Vit*²(w²)-ri²-fi²k-at(a²t²)/u²s(u²s). From *vitrum*, glass, and *facere*, to make. Made into glass or made like glass. [B, 119.]

VITRINA (Lat.), n. f. *Vit*²(w²)-ri²n(ren)/a². From *vitrum*, glass. Fr., *vitrine*. A vitreous humor.—*V. ocularia*, *V. ocularis*, *V. oculi*. See *CORPUS vitreum*.

VITRIOL, n. *Vit*²-ri²-u²l. From *vitrum*, glass. Lat., *vitriolum*. Fr., *v. Ger.*, *V.* Any metallic salt (as now used, generally a sulphate) having a glassy lustre. [B, 3.]—*Blue v.* See *COPPER sulphate*.—*Calcareous v.* Calcium sulphate. [B, 91.]—*Copper v.* Cypric sulphate (Ger.). Lat., *vitriolum cupri*. See *COPPER sulphate*.—*Double v.* Fr., *de Salzbourg*. An impure copper sulphate containing 70 to 80 per cent. of ferrous sulphate. [B, 81 (a, 38).]—*Elixir of v.* See *ACIDUM SULPHURICUM aromaticum*.—*Esprit de v. étheré martial*. See *Tinctura FERRI chlorati ætheræa*.—*Green v.*, *Martial v.* See *IRON sulphate* (1st def.).—*Nordhausen oil of v.*, *Nordhausen V.öl* (Ger.). Nordhausen sulphuric acid. [B.]—*Oil of v.* Ger., *Vitriölöl*. Sulphuric acid; so called because originally prepared from green vitriol. [B.]—*Roman v.* See *COPPER sulphate* and *Iron sulphate* (1st def.).—*V. blanc* (Fr.). White v.—*V. bleu* (Fr.). See *COPPER sulphate*.—*V. d'Angleterre* (Fr.). See *IRON sulphate* (1st def.).—*V. de Vénius* (Fr.). See *COPPER sulphate*.—*V. mixte de Chypre* (Fr.). A variety of v. containing zinc sulphate. [B, 81 (a, 38).]—*V.öl*. Oil of v., especially Nordhausen sulphuric acid. [B.]—*V. pesant* (Fr.). Barium sulphate. [B, 119.]—*V. sâure* (Ger.). See *SULPHURIC acid*.—*V. todtenkopf* (Ger.). See *Caput mortuum VITRIOLI*.—*V. végétal* (Fr.). See *Noscor commune*.—*V. vert* (Fr.). Green v.; ferrous sulphate.—*White v.* Zinc sulphate, especially the commercial salt. [B.]

VITRIOLATED, adj. *Vit*²/ri²-o²l-at-e²d. Lat., *vitriolatus*. Fr., *vitriolé*. Composed of or containing vitriol; containing sulphur or sulphuric acid. [B.]

VITRIOLIC, adj. *Vit*²-ri²-o²l/i²k. Containing or derived from vitriol; sulphuric. [B.]—*V. acid*. See *SULPHURIC acid*.

VITRIOLUM (Lat.), n. n. *Vit*²(w²)/ri²-o²l(u²m(u²m)). See *VITRIOL*.—*Ether vitrioli*. See *ETHER ætheræa*.—*Ether vitrioli aquosus*. See *Liquor ANODYNUS mineralis aquosus*.—*Aqua vitrioli alba*. See *Aqua ophthalmica aluminosa*.—*Aqua vitrioli cerulea*. See *Solutio CUPRI ammoniacalis*.—*Caput mortuum vitrioli*. Ger., *Vitrioltodtenkopf*. The residue of impure ferric oxide obtained when ferrous sulphate is distilled to obtain fuming sulphuric acid. [B, 2.]—*Colcothar vitrioli*. See *COLCOthar*.—*Collyrium adstringens e vitriolo albo*. See *Aqua ophthalmica aluminosa*.—*Elixir vitrioli Myrsinchi*. See *ACIDUM sulphuricum aromaticum*.—*Naphtha vitrioli*. See *ETHYL ETHER*.—*Naphtha vitrioli camphorata*. See *Solutio CAMPHORÆ ætheræa*.—*Naphtha vitrioli diluta*. See *Liquor ANODYNUS mineralis aquosus*.—*Naphtha vitrioli martialis*. See *Tinctura FERRI chlorati ætheræa*.—*Oleum vitrioli*. See *SULPHURIC acid*.—*Oleum vitrioli depuratum*. Purified sulphuric acid. [B, 97.]—*Oleum vitrioli dulce*. Impure ether mixed with alcohol. [B, 97.]—*Oleum vitrioli purificatum*. Purified sulphuric acid. [B, 97.]—*Sal vitrioli narcoticum*. Boric acid. [B, 97.]—

Spiritus vitrioli dulcis. Impure ether mixed with alcohol. [B. 97.]—**Spiritus vitrioli philosophicum.** A preparation made by inspissating to one half the limpid acid liquid obtained in the preparation of the powder of Alargoth, precipitated when antimony trichloride is dropped into water. [B. 200.]—**Spiritus vitrioli phlogisticatus.** See **ANTIMONY OXYGEN.**—**V. album.** See **White vitriol.**—**V. calcareatum.** Calcium sulphate. [B. 180.]—**V. camphoratum.** See **Camphor.**—**V. hungaricum.** See **Camphor.**—**V. Riverii.** See **Iron sulphate** (1st def.).—**V. romanum.** See **Roman vitriol.**—**V. Veneris.** See **COPPER sulphate.**

VITRO-DENTIN. n. *Vitro-dent* [Fr.]. *vitro-dentine.* Ger., *Vitrodentin.* Of Owen, a very dense form of dentin, such as that covering the teeth in the pike. [J. 28, 29, 35.]

VITREOUS (Lat.), adj. *Vitruosus* [Fr.]. See **VITREOUS.**

VITRUM (Lat.), n. *Vitruum* [Fr.]. See **GLASS.**—**Fœx vitri.** **Recrementa vitri.** **Sagimen vitri.** **Sal vitri.** See **ANATRON.**—**V. causticum.** See **BURNING-GLASS.**—**V. hypocleptum.** Ger., *Scheidetrichter.* A funnel for separating water from oil. [L. 50, 185 (a, 39).]—**V. ruthenicum.** See **SELENITE** (2d def.).

VITRY-LE-FRANÇOIS (Fr.). **VITRY-SUR-MARNE** (Fr.), n.s. *Ve-tre-le-françois*, *sur-marne*. A place in the department of the Marne, France, where there is a chalybeate spring. [a, 14.]

VITTA (Lat.), n. f. *Vitta* [Fr.]. *Vitta* (from *vitte*, to bend. Fr., *vitte*, Ger., *Strieme*, *Striemen* (1st def.), *Blude* (3d def.), *Bandstreifen* (3d def.), 1. See **FASCIA** (1st def.). 2. See **CLAVI** (1st def.). 3. A broad transverse or colored streak or band on a part of an organ. 4. One of the narrow canals or oil-tubes on the pericarp of umbelliferous plants. [a, 35.]—**Vittæ commissurales.** Ger., *Fugenstriemen*. The vittæ imbedded in the face of the commissure of some umbelliferous fruits. [a, 35.]—**Vittæ dorsales.** Ger., *Rückentriemen*. The vittæ beneath the intervals of the ribs of umbelliferous fruits. [a, 35.]

VITTATE, adj. *Vittatus* [Fr.]. *vittatus*. Provided with vittæ.

VITTEL (Fr.), n. *Ve-tel*. A place in the department of the Vosges, France, where there are gaseous alkaline and chalybeate springs. [L. 49, 57 (a, 14).]

VITULAR, VITULARY, VITULINE, adj.s. *Vitular* [Fr.]. *vitular*, *vitularis*, *vitulina*, a calf. Fr., *vituliner*. Pertaining to or associated with calves (cf. *V. FEVER*). [a, 48.]

VIVACE (Fr.), n. *Ve-vace*. Of Levret, a malignant fungous polypus-like outgrowth from the interior of the uterus. [A, 42.]

VIVANT (Fr.), adj. *Ve-vant*. Living, active. [a, 14.]

VIVERRA (Lat.), n. f. *Viverra* [Fr.]. *viverra*. The civet or cat; a genus of the *Viverridae*, which are a family of cat-like carnivorous mammals. [a, 48.]—**V. civetta**, **V. zibetha**. Fr., *civette*, *cive*. Ger., *Zibethkatze*, *Bisankkatze*. A species (or perhaps distinct species) found in northern Africa and in Asia. For the perfume obtained from their anal glands, see **CRVET** (2d def.). [a, 48.]

VIVES, n. *Vivs*. See under **AVIVES**.

VIVIPARITY, n. *Viviparitas* [Fr.]. *viviparitas*. From *vivus*, alive, and *parere*, to bring forth. Fr., *viviparité*. Viviparous generation.

VIVIPAROUS, adj. *Viviparus* [Fr.]. *viviparus*. Lat., *viviparus*. Fr., *vivipare*. Ger., *lebendiggebärend*. Bringing forth the young alive and free; in botany, germinating from seed, or sprouting from buds, while on the parent plant. The *Vivipares* of *De Blainville* are a subtype of the *Osteozoures* equivalent to mammals. [L. 231 (a, 35).]

VIVISECTION, n. *Vivisection* [Fr.]. *vivisection*. From *vivus*, alive, and *secare*, to cut. Fr., *v. Ger.*, *V. Vivisektion*. The performance of cutting operations on living animals for purposes of scientific investigation or demonstration. [a, 48.]

VIVISECTOR, n. *Vivisektor* [Fr.]. *vivisektor*. One who practices or advocates vivisection. [K.]

VIVUS (Lat.), adj. *Vivus* [Fr.]. *vivus*. From *vivere*, to live. Fr., *vivant*. Ger., *lebendig*. Living. [a, 14.]

VLEES (Ger.), n. *Fles*. See **FLEECE.**—**V. faser.** A nerve-fibre which interlaces or forms a network with others. [I, 6 (K).]

VOCAL, adj. *Vocalis* [Fr.]. *vocalis* (from *vox*, the voice). Fr., *vocal*. Ger., *v.* Pertaining to, produced by, or contributing to the production of the voice. [a, 48.]

VOGEL (Ger.), n. *Fogel*. A bird; in the pl., *Vögel*, the class *Aves*. [a, 48.]—**V. klause.** See **HIPPOCAMPUS minor.**—**V. kraut.** The genus *Orthogalum*, also *Stellaria media* and various other plants. [a, 35.]—**V. kunde.** See **ORNITHOLOGY.**—**V. leim.** See **BIRD LIME.**—**V. sporn.** See **HIPPOCAMPUS minor.**—**V. Strauss.** See **STRUTHIO camelus.**

VOICE, n. *Vois*. Gr., *φωνή*, *φώνος*. Lat., *vox*. Fr., *voix*. Ger., *Stimme*. The utterance of articulate sounds; also the faculty of uttering such sounds or the instrumentality by which they are produced, or an articulate sound of some particular character. [a, 48.]—**Amphoric v.** See **AMPHORIC RESONANCE** (2d def.).

Breaking v. See **PARAPHONIA puberum.**—**Bronchial v.** See **BRONCHOPHONY.**—**Cavernous v.** See **PECTORILLOQUY.**—**Chest v.** Fr., *voix de poitrine*. Ger., *Bruststimme*. The ordinary normal v. of [Ch.]—**Choleric v.** The weak whispering or husky voice characteristic of cholera. [D, 38.]—**Laryngeal v.** See **LARYNGOPHONY.**—**Nasal v.** See **MYCTEROPHONIA.**—**Thoracic v.** The sound of the v. as heard in thoracic auscultation. [a, 34.]—**Tracheal v.** The v. as heard over (and appearing to be produced in) the trachea. [D.]—**Whispering v.** 1. Articulation in whispers. [a, 48.] 2. See **CHUCHOTEMENT.**

VOIE (Fr.), n. *Vwa*. See **VIA.**—**Premières v's.** See **PRIMA VIE.**—**V. spermaticue.** See **Vas deferens.**

VOILE (Fr.), n. *Vwa*. See **VEL.**—**V. du palais.** See **VELUM palati.**—**V. du quatrième ventricule.** See **VALVE of Ventricle.**—**V. médullaire.** See **VELUM medullare.**—**V. médullaire inférieur.** See **Inferior (posterior) medullary VELUM.**—**V. médullaire postérieur.** See **Posterior medullary VELUM.**—**V. membraneux.** See **SAPTUM lucidum.**

VOITURE (Fr.), n. *Vwa*. A carriage. [a, 48.]—**V. caisson.** See **AMBULANCE** (3d def.).—**V. Macon.** A French two-wheeled ambulance wagon. [A, 244.]

VOIX (Fr.), n. *Vwa*. See **VOICE.**—**V. chevrotante.** See **ECHOPHONY.**—**V. chuchotée.** See **CHUCHOTEMENT.**—**V. convulsive.** A vocal neurosis in which there is difficulty in talking in consequence of defective innervation of the laryngeal muscles. [a, 34.]—**V. scandée.** A form of speech, occurring in various cerebral affections, in which words and sentences are uttered in a hesitating, staccato manner. [a, 18.]—**V. soufflée.** A voice that has as auscultatory blowing sound; it is only produced when there is a respiratory bronchial or cavernous murmur in that part of the lung where it is heard. [A, 301 (a, 34).]

VOLA (Lat.), n. f. *Vol* [Fr.]. *vola*. Ger., *élevé*. The palm of the hand, also the sole of the foot. [A, 312 (a, 17).]—**V. manus.** See **PALM** (2d def.).

VOLAR, adj. *Volarius* [Fr.]. *volarius* (from *vola*, the palm of the hand). Ger., *v.* See **PALMAR.**

VOLATICUS (Lat.), adj. *Volaticus* [Fr.]. *volaticus* (from *vola*, to fly. Fr., *volatique*. Fleeting; of an eruption, transient. [G.]

VOLATILE, adj. *Volatil* [Fr.]. *volatil* (from *vola*, to fly). Fr., *volatil*. Ger., *flüchtig*, *flüchtig*. Fleeting; tending to assume the state of vapor. [B.]

VOLATILIZATION, n. *Volatilization* [Fr.]. *volatilization* (from *vola*, to fly). Fr., *volatilisation*. The act or process of conversion of a solid or liquid into vapor. [B.]

VOLATILIZER, n. *Volatiliseur* [Fr.]. *volatiliseur*. Ger., *Flüchtigmacher*. An apparatus for effecting volatilization. Von Trüllsch's v. consists of a glass bottle with a wide neck, closed by a stopper of vulcanized rubber, pierced with three holes and fixed on a stand. Into the middle orifice is inserted a thermometer, and into the lateral orifices two glass tubes are passed; the one serves for the conduction of the compressed air, and the other for the introduction of the vapor into the tympanic cavity. At the bottom of the glass bottle is a layer of sand, which is heated by the flame of a spirit-lamp, and soon causes the medicated substance in the metal vessel to evaporate. [F, 32.]

VOLCANIC MINERAL SPRINGS, n. *Volcanic mineral springs*. A place in Inyo County, California, where there are gaseous alkaline springs. [Anderson (a, 14).]

VOLCANIC STATION SPRINGS, n. *Volcanic station springs*. A place in San Diego County, California, where there are sulphurous springs. [Anderson (a, 14).]

VOLITION, n. *Volition* [Fr.]. *volition*. From *velle*, to wish. Fr., *v. Ger.*, *V.*, *Willensäußerung*. The act of willing. [L. 49 (a, 14).]

VOLITIONAL, adj. *Volitional* [Fr.]. *volitional*. Pertaining to volition; voluntary. [a, 17.]

VOLKAMERIA (Lat.), n. f. *Volkameria* [Fr.]. *volkameria*. From *Volkamer*, a German botanist. Fr., *volkamerie*, *volkamer*. 1. Of Browne, see **CLETHRA** (2d def.). 2. Of Linnæus, see **CLEODENDRON** (1st def.). 3. The genus *Capparis*. [a, 35.]—**V. aculeata.** Fr., *amourette de Saint-Christophe*. A native of tropical America. The bark is said to be substituted for cinchona. [a, 35.]—**V. inermis.** See **CLEODENDRON inermis**.

VOLLBLÜTIG (Ger.), adj. *Vollblütig* [Fr.]. *vollblütig*. See **PLETHORIC** and **SANGUINE** (2d def.).

VOLLBLÜTIGKEIT (Ger.), n. *Vollblütigkeit* [Fr.]. *vollblütigkeit*. See **PLETHORA.**—**Arterielle V.** See **ERYTHROSIS**.

VOLLGEBAUT (Ger.), adj. *Vollgebaut* [Fr.]. *vollgebaut*. Full-formed, full-grown. [a, 14.]

VOLLKOMMEN (Ger.), adj. *Vollkommen* [Fr.]. *vollkommen*. See **PERFECT.**

VOLLLEIBIG (Ger.), adj. *Vollleibig* [Fr.]. *vollleibig*. See **CORPULENT.**

VOLLSAFTIG (Ger.), adj. *Vollsaftig* [Fr.]. *vollsaftig*. Full of sap; plethoric.

VOLLZELLBILDUNG (Ger.), n. *Vollzellbildung* [Fr.]. *vollzellbildung*. See **REJUVENESCENCE** (2d def.).

VOLSELLA (Lat.), n. f. *Volsella* [Fr.]. *volsella*. From *vellere*, to pluck. Ger., *Aasig*. A forceps having one or more hooks at the free extremity of each blade. [a, 34.]

VOLT, n. *Volt*. From *A. Volta*, one of the discoverers of galvanism. Ger., *V.*, *Volte*. The unit of electromotive force. [a, 48.]

VOLTAGE, n. *Voltage* [Fr.]. *voltage*. The electro-motive strength of an electrical current measured in volts.

VOLTAIC, adj. *Voltaic* [Fr.]. *voltaic*. Ger., *voltaisch*. See **GALVANIC**.

VOLTAISM, n. *Voltaismus* [Fr.]. *voltaismus*. Fr., *voltaisme*. See **GALVANISM**.

VOLTAMETER, n. *Voltameter* [Fr.]. *voltameter*. From *Volta* (see **VOLT**), and *μετρον* (a measure). Ger., *V.* An apparatus for measuring absolute quantities of electricity by electrolytic decomposition. [L; a, 49.]

VOLTMETER, n. *Voltmeter* [Fr.]. *voltmeter*. An instrument for indicating the voltage of an electric current. [a, 49.]

VOLUBLE, adj. *Voluble* [Fr.]. *voluble* (from *volvere*, to turn). Fr., *voluble*. Ger., *windend*, *gewunden*. Twining, ascending by coiling round a support. [a, 35.]

VOLUME, n. Vo¹u²m. Lat., *volumen* (from *volvere*, to roll). Fr., v. Ger., *Volum*, *Volumen*, *Umfang*. Bulk.—**Atomic v.** Fr., *v. atomique*. Ger., *Atomvolum*. 1. As formerly used, molecular v. 2. The v. occupied by an atom in a solid or liquid compound as measured by the increase in molecular v. or the compound due to the addition of one atom of the element to its molecule. This quantity is not constant for each element, but varies according to the method of its union with the compounds. [B. 4.]—**Diffusion v.** The v. through which a given v. of matter will diffuse itself within a given time on being added to a fluid. [A. 49.]—**Equivalent v.** **Molecular v.** **Specific v.** Formerly called *atomic v.* The v. occupied by a molecule of a substance. In the gaseous state, and under equal conditions of temperature and pressure, the molecular v.'s are the same for all substances, and are equal to the molecular weights divided by the specific gravity referred to hydrogen as a unit. In the solid and liquid states the molecular v. is equal to the molecular weight divided by the specific gravity referred to water as a unit. [B.]

VOLUMEN (Lat.), n. n. Vo¹(wo¹)u²(u/me²n. Gen., -um/ins. From *volvere*, to roll. Ger., *V.* 1. A roll; anything rolled or wound up. [L. 30 (a. 14).] 2. See **VOLUME**.—**V. chirurgicum**. See *Eighteen-tailed BANDAGE*.—**V. pulmonum auctum**. See *Pulmonary EMPHYSEMA*.

VOLUMETRIC, adj. Vo¹u²m-e²t²rik. From *volumen*, volume, and *μέτρον*, a measure. Fr., *volumétrique*. Ger., *volumetrisch*. Pertaining to measurement by volume. [A. 43.] See *V. ANALYSIS*.

VOLUNTARY, adj. Vo¹u²nt-a-ri². Fr., *volontaire*. Lat., *voluntarius* (from *volutus*, will). Fr., *volontaire*. Ger., *freiwillig*. In accordance with and under the control of the will. [K.]

VOLUTE, adj. Vo¹u²t'. Lat., *volutus* (from *volvere*, to roll). Rolled up. [A. 35.]

VOLVA (Lat.), n. f. Vo¹(wo¹)va²(wa²). From *volvere*, to roll. Fr., *volve* (1st def.). Ger., *Wulst* (1st def.). 1. The membrane covering the fruiting organs in some *Fungi*. [A. 35.] 2. See **VULVA**.

VOLVACEOUS, adj. Vo¹lv-a'shu's. Lat., *volvaceus*. Fr., *volvacé*. *Volvate*; especially having a well-developed volva (1st def.). [A. 35.]

VOLVAL, adj. Vo¹lv'. Lat., *volvalis*. Pertaining to the *Volvae*, which are Lindley's v. alliance (Lat., *nizus volvalis*) of the *Polycarpae*, consisting of the *Cuscutae*, *Convolvulaceae*, *Polemoniaceae*, and *Hydrocleaceae*. [A. 35.]

VOLVATE, adj. Vo¹lv'at. Lat., *volutatus*. Fr., *voldé*. Ger., *beumstelt*. Having a volva (1st def.). [A. 35.]

VOLVENS (Lat.), adj. Vo¹(wo¹)ve²nz(wans). Gen., -vent/is. From *volvere*, to roll. Rolling, causing to roll; as a n. m., a muscle that acts to cause rolling. [A. 43.]—**Volventes bulbi**. The oblique muscles of the eye. [L. 349.]

VOLVOX (Lat.), n. m. Vo¹(wo¹)lv'o²x(wo²x). Gen., -voc/is. From *volvere*, to roll. Ger., *Kugelhierchen*. A genus giving its name to an order (the *Volvocineae*; Fr., *volvocinées*; Ger., *Volvocineen*) of the *Chlorophyceae*. [A. 35.]—**V. globator**. A freshwater plant consisting of a hollow spherical colony (coenobium) composed of numerous cells imbedded in a tough gelatinous transparent membrane. The cells are connected with each other by threads of protoplasm forming a network over the surface of the sphere, and are provided each with a pair of cilia projecting beyond the membrane, which, by their vibrations, give a rolling motion to the sphere. The colony, when mature, has a diameter about half that of a pin's head. [A. 35.]

VOLVULUS (Lat.), n. m. Vo¹(wo¹)lv'u²(wu¹l'u²s(u²s). From *volvere*, to roll. Fr., *volute*, *enroulement*. Ger., *Gedärmsverschlingung*. 1. A twisting of an intestine about its mesenteric axis, or (rarely) upon its own axis, so that the lumen is occluded. 2. An intertwining or knotting of two coils of intestines so as to cause obstruction in their lumen. [A. 34.]—**V. sanguineus**. Of the Hippocratic school, scurvy. [A. 34.]

VOMER (Lat.), n. m. Vom(wom)'u²r(e²r). Gen., vom'eris. From v., a plowshare. Fr., *v. Fflugschaar*. 1. A thin mesial bone, which is irregularly quadrilateral, placed vertically between the nasal fossae. [C.] 2. In ornithology, see *PROOSTYLE*.—**V. cartilagineus**. A cartilaginous plate which extends from the anterior extremity of the v. to the nasal spine of the superior maxilla. [L. 332.]

VOMERINE, adj. Vom'e²r-i²n. Fr., *vomérien*. Pertaining to the vomer.

VOMICA (Lat.), n. f. Vo²m(wo²m)'ik-a². From *vomere*, to vomit. Fr., *vomique* (2d def.). 1. A pulmonary cavity due to destruction of lung tissue. 2. As understood by the French, a sudden and profuse expectoration of a foetid, purulent liquid. [Hardy, "Med. and Surg. Reporter," June 3, 1882, p. 589.]—**V. liquoris aeterni**. An old term for mercury. [B. 59.]

VOMICINE, n. Vo²m'i²s-en. See *BRUCINE*.

VOMI-PURGATIF (Fr.), n. Vo-me-pu²r-ga²-tef. See *EMETO-CATHARTIC*.

VOMIQUE (Fr.), n. Vo-mek. 1. See **VOMICA** (2d def.). 2. See *STRYCHNOS*.

VOMIQUEUR (Fr.), n. Vo-me-ke-a. See *STRYCHNOS*.

VOMISSEMENT (Fr.), n. Vo-mes-ma²n². See **VOMIT** and **VOMITING**.—**V's de la grossesse**. See *Morning SICKNESS*.—**V. de sang**. See *HÆMATEMESIS*.—**V. incoercible**. Uncontrollable vomiting. —**V. noir fébrile**. Black vomit due to malarial poisoning.—**V's simples de la grossesse**. The vomiting of pregnancy of a mild form. [A. 96.]

VOMIT, n. Vo²m'i²t. Gr., *ῥέρος*. Lat., *vomitus*. Fr., *vomissement* (1st def.), *vomitif* (2d def.). Ger., *Erbrechen* (1st def.). 1.

Matter vomited. 2. An emetic.—**Bilious v.** V. stained by bile forced back into the stomach. [D.]—**Black v.** Lat., *melanemesis* (1st def.). 1. The vomiting of dark-colored matter. 2. The characteristic dark fluid ejected in yellow fever. It is produced by mixture of the blood with the contents of the stomach, changes of decomposition being added. It is of low sp. gr. (1.004 to 1.066), and is acid in reaction, though containing ammonia. The sediment is composed of coagulated albumin and the débris of blood-cells. [D. 1.]—**Bloody v.** V. of blood, or containing blood.—**Coffee-ground v.** V. consisting of disintegrated blood-clots mingled with the contents of the stomach. [D. 25.]—**Green v.** V. containing biliary matter. [A. 34.]—**White v.** The clear, pale, opalescent acid fluid which is ejected in yellow fever at the beginning of the stage of acid elimination. [D. 1.]

VOMITIF (Fr.), adj. and n. Vo-me-tef. See *EMETIC*.—**V. central**. See *Indirect EMETIC*.—**V. périphérique**. See *Direct EMETIC*.

VOMITINE, n. Vo²m'i²t-en. See *EMETINE*.

VOMITING, n. Vo²m'i²t-i²n². Gr., *ῥέρος*, *ῥέρος*. Lat., *vomitio*, *vomitio*. Fr., *vomissement*. Ger., *Erbrechen*, *Vomitren*, *Brech-act*. The ejection from the mouth of matter regurgitated from the stomach. [D.]—**Dry v.** A popular term for persistent nausea with retching and straining, but with little or no actual ejection of more than gas from the stomach.—**Fæcal v.** See *Stercoraceous v.*—**Gastric v.** V. caused by some disturbance of the stomach. [A. 34.]—**Hysterical v.** V. which sometimes accompanies an attack of hysteria; said to be sometimes a complement of hysterical suppression of urine. [D. 35.]—**Pernicious v.** of pregnancy. See *Vomitus gravidarum perniciosis*.—**Pregnancy v.** V. of pregnancy.—**Spasmodic v.** V. in which the ejection occurs spasmodically. [A. 34.]—**Stercoraceous v.** Lat., *copremesis*, *vomit feculentus*. Fr., *vomissement fécaloïde*. The v. of fecal matter or what appears to be such. It is usually of a dark-yellow color, sometimes brownish, and often mixed with greenish particles, the remains of food, mucus, and bile. Rarely it is due to a fistulous opening between the stomach and the colon; most frequently to a mechanical obstruction to the passage of feces. [D. 35.]—**Sympathetic v.** 1. V. caused by derangement of the sympathetic nervous system. [A. 34.] 2. The v. with which a husband is sometimes affected in consequence of his wife's pregnancy.—**Uncontrollable v.** Fr., *vomissement incoercible*. Ger., *nicht zu stillendes Erbrechen*. V. that proves rebellious to treatment, as in some cases of the v. of pregnancy.—**V. of pregnancy**. Lat., *vomit* (see *nausea*) *gravidarum*. Fr., *vomissement* (ou *nausées*) *des femmes enceintes*. V. occurring during pregnancy and due to disturbances of the sympathetic nervous system. [A. 34.]

VOMITORY, adj. Vo²m'i²t-o-ri². Lat., *vomitarius* (from *vomere*, to vomit). Fr., *vomitatoire*. See *EMETIC*.

VOMITURITION, n. Vo²m'i²t-u²r-i²shu²n. Lat., *vomituri-tio* (from *vomituri*, to desire to vomit). Fr., *v. Ger.*, *V. Brech-reiz*. 1. Retching, inclination to vomit. [D. 20.] 2. Vomiting of but little matter. 3. An incomplete regurgitation of the contents of the stomach. [L. 41, 57 (a. 14).]

VOMITUS (Lat.), n. m. Vo²m(wo²m)'i²t-u²s(u²s). Gen., -vom'itus. See **VOMIT** and **VOMITING**.—**V. ærginusius**. The vomiting of grass-green material. [L. 50 (a. 34).]—**V. atrabiliaris**. V. containing black bile. [A. 34.]—**V. bezoardicus**. Vomit produced by an emetic. [A. 34.]—**V. biliosus**. See *Bilious VOMIT*.—**V. callosus**. Tough viscid vomit. [A. 34.]—**V. erapulosus**. The vomiting of drunkards. [L. 57 (a. 14).]—**V. cruentus**. See *Bloody vomit*.—**V. feculentus**. See *Stercoraceous vomiting*.—**V. gravidarum**. See *Vomiting of pregnancy*.—**V. gravidarum pernici-olous**. A term proposed by M. Horwitz for severe cases of the vomiting of pregnancy—those which prove intractable and which affect the general health. ["Med. Times," Apr. 12, 1884, p. 506.]—**V. lacteus**. Ger., *Milchbrechen*. Vomit containing milk. [A. 34.]—**V. marinus**. See *SEASICKNESS*.—**V. matutinus**. Morning vomiting, as of drunkards. [L. 57 (a. 14).]—**V. niger**. See *Black vomit*.—**V. pituitosus**. See *BLENNEMESIS*.—**V. potatorum**. See *V. crapulosus*.—**V. prasinus**. See *Green vomit*.—**V. pulmonis**. See *HÆMOPTYSIS*.—**V. purulentus**. Ger., *Eiterbrechen*. The vomiting of pus. [L. 80.]—**V. urinosus**. Vomit of matter having the odor of urine. [A. 34.]—**V. verminosus**. Vomit containing worms. [A. 34.]

VORACIOUS, adj. Vo²r-a'shu's. Lat., *vorax* (from *vorare*, to eat greedily). Fr., *vorace*, *gefrässig*. Devouring much food, eating ravenously. [A. 48.]

VORARMBEINMUSKEL (Ger.), n. For'a²rm-bin-musk-e²l. See *PECTORALIS superficialis*.—**V. des Fessel**, *Kron*, und *Hufbeins*. See *CUBITO-PREPHALANGEUS*.

VORARMSCHENBEINMUSKEL (Ger.), n. For'a²rm-shen'-bin-musk-e²l. See *EXTENSOR metacarpi obliquus*.

VORBAUUNG (Ger.), n. For'ba²u²-u²n². See *PROPHYLAXIS*.

VORBERG (Ger.), n. For'bo²erg. See *PROMONTORY*.—**V. des heiligen Beins**. See *PROMONTORY of the sacrum*.

VORBEUGEND (Ger.), adj. For'bo²ig-e²nd. See *PROPHYLACTIC*.

VORBEUGER (Ger.), n. For'bo²ig-e²r. See *PROMOTOR*.

VORBEUGUNG (Ger.), n. For'bo²ig-u²n². 1. A bending. 2. Prevention. [A. 14.]—**V'smittel**. A preventive or preservative remedy. [A. 14.]

VORBINDEND (Ger.), adj. For'bi²nd-e²nd. See *AGGLUTINANT* (1st def.).

VORBLÄTTER (Ger.), n. pl. For'blat-te²r. 1. Bracteoles; so called because they are the first leaves borne by the new axis. 2. Primordial leaves in germination. [A. 35.]

VORBOTE (Ger.), n. For'bot-e². A premonitory symptom.

VORCAPILLAREN (Ger.), n. pl. Vor-ka²p-el-la²r'e²n. See *CAPILLAIRES de transition*.

VORDERANSICHT (Ger.), n. For'de'r-a'n-zí'ch't. See *NORMA frontalis*.

VORDERARM (Ger.), n. For'de'r-a'rm. The forearm.—*V'-beuger*. See *Biceps flexor cubiti*.—*V'bínde*. See *Common carpal ligament*.

VORDERDARM (Ger.), n. For'de'r-da'rm. The prosgaster or foregut (*q. n.*). As used by some, the term does not include the stomach and duodenum. [Quain (H).]

VORDERFLÄCHE (Ger.), n. For'de'r-flach'e. The anterior surface or face. [L, 81; a, 35.]

VORDERFUSS (Ger.), n. For'de'r-fus. See *FOREFOOT*.

VORDERHALS (Ger.), n. For'de'r-ha'ls. The forepart of the neck.

VORDERHAND (Ger.), n. For'de'r-ha'nd. See *CARPUS* (1st def.).

VORDERHAUPT (Ger.), n. For'de'r-ha'upt. The forepart of the head; the forehead.—*V'bein*. See *Frontal bone*.—*V's-brette*. See *Maximum frontal diameter*.

VORDERHIRN (Ger.), n. For'de'r-hern. See *PROSENCEPHALON*.—*Primäres V.* *Primitives V.* The primary prosencephalon. [L, 17 (K).]—*Secundäres V.* [Mihalkovics]. The portion of the prosencephalon that is situated in front of and above the ocular vesicle. [A, 8.]—*V'bläschen*. The anterior cephalic vesicle. [L, 17 (K).]

VORDERHORN (Ger.), n. For'de'r-ho'rn. See *Anterior horn of the lateral ventricle and Anterior gray cornu*.

VORDERKOPF (Ger.), n. For'de'r-ko'pf. See *FOREHEAD* and *SINCIPT*.

VORDERLAPPEN (Ger.), n. For'de'r-la'p-pe'n. See *Frontal lobe*.

VORDERSCHEITELSTELLUNG (Ger.), n. For'de'r-shit-e'l-ste'l-lun'g. That form of obliquity of the fetal head, during parturition, in which the forehead is situated in the axis of the pelvic canal. [A, 15.]

VORFALL (Ger.), n. For'fa'l. See *PROLAPSE* and cf. *VORLAGERUNG*.

VORFUSS (Ger.), n. For'fus. See *FOREFOOT*.

VORGANG (Ger.), n. For'ga'ng. See *PROCESS* (1st def.).

VORGEbirge (Ger.), n. For'ge'berg-e. See *PROMONTORY*.

VORGEFALLENEIN (Ger.), n. For'ge'-fa'l-le'n-zin. See under *VORLAGERUNG*.

VORHANG (Ger.), n. For'ha'ng. 1. A curtain. [A, 450 (a, 17).] 2. See *CORTINA*.—*Gaumen v'*. The soft palate.

VORHAUT (Ger.), n. For'ha'ut. See *PREPUCE*.—*Kitzler v'*. See *PREPUTIUM clitoridis*.—*V'band*, *V'bändchen*. See *FRENUM glandis*.—*V'entzündung*. See *ACROBYSTITIS*.—*V'geschwulst*. See *POSTHONCUS*.—*V'schmiere*. See *SMEGMA preputiale*.—*V'spette*. See *PHIMOSIS*.—*V'stein*. See *PREPUTIAL CALCULUS*.—*V'talg*. See *SMEGMA præputii*.—*V'verengung*. See *PHIMOSIS*.

VORHERSAGUNG (Ger.), n. For-he'r'sa'g-un'. See *PROGNOSIS*.

VORHOF (Ger.), n. For'ho'f. See *ATRIUM*, *ACRILE* (4th def.), and *VESTIBULE*.—*Gehör v'*. The vestibule of the ear. [L, 46 (a, 21).]—*V'sfenster*. See *FENESTRA ovalis*.—*V'gsang*. See *SCALA vestibuli*.—*V'shaut*. See *MEMBRANA REISSNERI*.—*V'skammerfurchen*. See *AVRICULO-VENTRICULAR GROOVE*.—*V'streppe*. See *SCALA vestibuli*.—*V'szweibel*. See *BULBI vestibuli vagina*.

VORHÜLE (Ger.), n. For'hu'l-le. See *PROCHORION* (2d def.).

VORIMPfung (Ger.), n. For'ímpf-un'. Preliminary inoculation. [a, 14.]

VORKAMMER (Ger.), n. For'ka'm-me'r. An auricle of the heart. [a, 48.]

VORKEIM (Ger.), n. For'kim. 1. The germ epithelium of the embryo. 2. See *PROEMBRYO* (2d def.).

VORKIEMENDECKELSTÜCK (Ger.), n. For'kem-e'n-de'st'k-e'l-stu'k. See *Pre-ocular bone*.

VORKOMMEN (Ger.), n. For'ko'm-me'n. See *HABITAT*.

VORKOPF (Ger.), n. For'ko'pf. See *SINCIPT* and *CAPUT succedaneum*.

VORLAGERUNG (Ger.), n. For'la'ge-r-un'. 1. See *ADVANCEMENT*. 2. In obstetrics, a presentation (the state of being the presenting part). To be distinguished from *Vorfall* and *Vorgefallensein*. As concerns the fetal limbs and the umbilical cord, their V. is their being situated alongside the main presenting part, while it is only to their actual prolapse (escape into the vagina in advance of the main presenting part) that the terms *Vorfall* and *Vorgefallensein* are applied. [A, 61.]—*Muskelv'*. See *ADVANCEMENT* (1st def.).

VORLÄUFER (Ger.), n. For'loif-e'r. See *PRECURSOR* and *PRODROME*.

VORLÄUFIG (Ger.), adj. For'loif-i'g. *PRECURSORY*. [a, 14.]

VORLEBER (Ger.), n. For'lab-e'r. See *LEBERVULST*.

VORLIEGEN (Ger.), n. For'lieg-e'n. See *PRESENTATION*.—*V. des Nabelstranges*, *V. des Nabelschnur*. See *FETUS PRESENTATION*.

VORMAGEN (Ger.), n. For'ma'g-e'n. See *INGLUVIES* (2d def.) and *Cardiac ANTRUM*.

VORMAUER (Ger.), n. For'ma'u-e'r. See *CLAUSTRUM*.

VORNÄHUNG (Ger.), n. For'na-un'. See *ADVANCEMENT*.

VORNIERE (Ger.), n. For'ner-e. See *PRONIPERO*.

VORNÜBERGEBEUGT (Ger.), adj. Forn'u'b-e'r-ge'boigt. Anteflexed.

VORRAUM (Ger.), n. For'ra'u-m. An atrium. [a, 14.]

VORSAAL (Ger.), n. For'za'l. See *VESTIBULE*.

VORSCHRIFT (Ger.), n. For'shri'ft. See *PRESCRIPTION*.

VORSPRINGEND (Ger.), adj. For'spri'ng-e'nd. See *PROMINENT*.

VORSPRUNG (Ger.), n. For'sprung. See *PROMINENCE* (2d def.) and *PROTUBERANCE*.—*Darwin'scher V.* See *SPINE of Darwin*.—*Höckerähnlicher V.* See *MAMILLA*.

VORSTEHER (Ger.), n. For'sta-e'r. See *PROSTATE*.—*V'nd-rücker*. See *Compressor prostatae*.

VORSTELLUNG (Ger.), n. For'ste'l-lun'. Representation, perception. [a, 14.]—*V'svermögen*. The power of recognition, or of forming an ideal representation.—*Wahn v'*. See *HALLUCINATION*.

VORSTOSS (Ger.), n. For'sto's. See *ADAPTER* and *PROPOLIS*.

VORTEX (Lat.), n. m. Vo'r't(wo'r't)/e'x. Gen., *vorticis*. From *vertens*, to turn. Fr., *tourbillon*. Ger., *Wirbel*. A whirl; a structure having the appearance of being produced by some whirling or twisting motion. [a, 48.]—*Vortices lentis*. See *RADIUS lentis*.—*V. of the heart*. The spiral concentration of muscle fibres at the apex of the heart; its whorl.

VORTICELLA (Lat.), n. f. Vo'r't(wo'r't)-i's(i'k)-e'l-la'. From *vortex*, a whirl. The typical genus of the *Vorticellidae*, or bell-animalcules, which are a family of bell-shaped infusorians. [a, 48.]

VORTICOSUS (Lat.), adj. Vo'r't(wo'r't)-i'k-os'u's(u's). Shaped like a whorl or spiral. [a, 48.]

VORVERDAUUNG (Ger.), n. For'fe'r-dä-u-un'. See *Oral DIGESTION*.

VORWACHS (Ger.), n. For'va'ch's. See *PROPOLIS*.

VORWÄRTSBEUGER (Ger.), **VORWÄRTSDREHER** (Ger.), n's. For'varts-boig-e'r, -dra-e'r. See *PRONATOR*.

VORWÄRTSNEIGUNG (Ger.), n. For'varts-nig-un'. See *ANTEVERSION*.

VORWÄRTSWENDER (Ger.), n. For'varts-v'e'nd-e'r. See *PRONATOR*.—*Länglicher V.*, *Runder V.* See *PRONATOR teres*.—*Viereckiger V.* See *PRONATOR quadratus*.

VORWÄRTSIEHER (Ger.), n. For'varts-tse-e'r. See *ATTRAHENS*.

VORWASSER (Ger.), n. For'va's-se'r. That portion of the liquor amnii which lies in advance of the presenting part of the fetus during labor.

VORWEHEN (Ger.), n. For'va-e'n. See *DOLORES præparantes*.

VORZEICHEN (Ger.), n. For'tsich'e'n. See *PROGNOSTIC*, n.

VORZEITIG (Ger.), adj. For'tsit-i'g. See *PREMATURE*.

VORZIEHER (Ger.), n. For'tse-e'r. See *ATTRAHENS*.

VORZWICKEL (Ger.), n. For'tsvi'k-e'l. See *PRÆCUNEUS*.

VÖSLAU (Ger.), n. A place in Lower Austria where there is a warm gaseous and sulphurous spring. [L, 49, 57 (a, 14).]

VOSS (Ger.), n. Fo's. See *APHRA*.

VOUSSURE (Fr.), n. Vu-su'r. The curvature of a vault or similar cavity. [L, 41 (a, 14).]—*V. de la poitrine*. Dilation of the thorax. [L, 41 (a, 14).]—*V. précordiale*. The bulging on the left side of the thorax observed in some heart diseases. [L, 41 (a, 14).]

VOÛTE (Fr.), n. Vut. See *FORNIX*.—*V. à quatre piliers*, *V. à trois piliers* [Winslow]. See *FORNIX cerebri*.—*V. du crâne*. See *VAULT of the cranium*.—*V. médullaire*. See *CORPUS callosum*.—*V. palatine*. The palate (hard and soft). [a, 18.]

VOÛTURE (Fr.), n. Vu-tu'r. Fracture of the cranium with elevation of the fragments. [L, 41 (a, 14).]

VOX (Lat.), n. f. Vo'x(wox). Gen., *voc'is*. From *vocare*, to call. See *VOICE*.—*V. absclissa*. See *APHONIA* (1st def.).—*V. clandestina*. Whispering. [K, 16.]—*V. falsa*. See *FALSETTO*.—*V. instar canis galli*. A voice (or noise) like the crowing of a cock; of home, the peculiar cry of croup. [D, 1.]

VRILLE (Fr.), n. Vrel'y. A tendril. [a, 35.]

VRILLÉE (Fr.), n. Vrel-ya. See *CONVOLVULUS arvensis*.—*Grande v'*. See *CONVOLVULUS sepium*.

VUE (Fr.), n. Vu's. See *VISION*.—*V. basse*, *V. courte*. See *MYOPIA*.—*V. diurne*. See *HEMERALOPIA* (1st def.).—*V. longue*. See *PRESBYOPIA*.—*V. louché*. See *STRABISMUS*.—*V. nocturne*. See *NYCTALOPIA*.—*V. oblique*. See *STRABISMUS*.—*V. prochaine*. See *MYOPIA*.—*V. pyroptique*. See *PHOTOPSIA*.—*V. trouble*. See *AMBLYOPIA*.

VUEROMETER, n. Vu'e'r-o'm'e't'r. An instrument for determining the distance of the eyes from each other. Smee's v. consists of two narrow horizontal cylinders movable along a graduated bar. The head of the person to be examined is so placed that one eye sees a distant object through one tube, and then the other tube is pushed forward until the same object seems to the other eye to be in the centre. The distance of the cylinder-axes from each other then corresponds to the distance of the visual lines of the eyes from each other. [Graefe u. Saemisch (F).]

VULCANITE, n. Vu'l'k'n-it. From *Vulcanus*, the Roman fire-god. Hard rubber.

VULCANIZATION, n. Vu'l'k'n-i'z-a'shu'n. Fr., *vulcanisation*. 1. The process of heating caoutchouc with sulphur under pressure. The degree of hardness of the product is determined by

the height of the temperature. 2. Loosely, the subjecting of any organic body to a high heat for the purpose of increasing its resistance to decay, etc. [L.]

VULCANÖL (Ger.), n. Vulk-a-n'öl. A heavy, dark-colored petroleum. [L. 57 (a, 14).]

VULGAGO (Lat.), n. f. Vu^lg(wu^lg)-ag(a^g)/o. Gen., -ag'itis. See *ASARUM europæum*.

VULGARIS (Lat.), adj. Vu^l(wu^ll)-gar(ga^r)/is. From *vulgus*, the common people. Common. [a, 35.]

VULNERABILITY, n. Vu^l-ne^r-a-b'il-i^l-it². From *vulnus*, a wound. Fr., *vulnerabilité*. Ger., *Vulnerabilität*. Susceptibility to hurt or to contagion. [L. 57 (a, 14).]

VULNERARIUS (Lat.), n. m. Vu^l(wu^ll)-ne^r-a(a³)/ri²-u³s(u⁴s). From *vulnus*, a wound. Anciently, a surgeon.

VULNERARY, adj. Vu^l(ne^r-ar-i²). Lat., *vulnerarius* (1st def.), *agglutinans* (2d def.). Fr., *vulnératoire*. Ger., *Klebmittel* (2d def.), *Wundmittel* (2d def.). Traumatic; as a n., a remedy used to promote the healing of wounds. [E; a, 17.]

VULNUS (Lat.), n. n. Vu^l(wu^ll)/nu³s(nu⁴s). Gen., *vul'neris*. Gr., *ῥάγνα*. Fr., *blessure*. Ger., *Wunde*. A wound. [L. 290.]—**V. a scopetis**, **V. scopetarium**. A gunshot wound. [E.]—**V. simplex**. An incised wound. [E.]

VULPES (Lat.), n. f. Vu^l(p(wu^lp)/ez(as). Gen., *vulp'is*. See *CANIS v.*—**Looch de pulmone vulpis**. Fr., *looch de poumons de renard*. An old preparation consisting of 1 part each of anise, fennel, licorice juice, *Adiantum petatum*, and foxes' lungs, and 15 parts of clarified sugar. [L. 85.]—**Pulmones vulpis siccati**. The dried lungs of *Canis v.* [a, 35.]

VULPIC ACID, **VULPIN**, **VULPINIC ACID**, **VULPILINE**, n. Vu^lp/i²k, -i²n. Vu^lp-i²n/i²k, vu^lp/u^l-en. Fr., *acide vulpinique* (on vulpinique), *vulpinique*. Ger., *Vulpinsäure*, *Vulpin*. A acid, CH₃C₁₅H₁₁O₅ = C₁₆H₁₁O₅, obtained from *Parmelia parietina*, *Cetraria vulpina*, and other lichens. [B. 93 (a, 14).]

VULSELLA (Lat.), n. f. Vu^ls(wu^ls)-e²l'la³. See *VOLSELLA*.

VULTUEUX (Fr.), **VULTUÖS** (Ger.), adj. a. Vu^l-tu⁴-u⁴, fult-u⁴-u⁴. Having the capillaries of the skin unusually congested (said of the face). [K.]

VULTUS (Lat.), n. m. Vu^lt(wu^ll)t/u³s(u⁴s). Gen., *vult'us*. See *FACE*.

VULVA (Lat.), n. f. Vu^l(wu^ll)/va³(wa³). From *volvere*, to roll. Fr., *vulve*. Ger., *Aussere (oder weibliche) Scham* (1st def.). 1. The external genitals of the female, except the mons Veneris. The latter and the v. together constitute the pudendum. 2. Of Palfin, see *ADITUS ad infundibulum*.—**V. cerebri**. See *V.* (2d def.).—**V. connivens**. That form of the v. in which the labia majora are plump and closely approximated. [A, 22.]—**V. hians**. That form in which the labia majora are flaccid and gaping. [A, 22.]

VULVAR, adj. Vu^llv'a^r. Fr., *vulvaire*. Ger., v. Pertaining to the vulva.

VULVARIA (Lat.), n. f. Vu^l(wu^ll)-va(wa³)/ri²-a³. Fr., *vulvaire*. See *CHENOPODIUM v.*

VULVISM, n. Vu^llv'i²z'm. Lat., *vulvismus* from *vulva* [q. v.]. Fr., *vulvisme*. Of Martineau, see *Vulvar VAGINISMUS*.

VULVITE (Fr.), n. Vu^llv-et. See *VULVITIS*.

VULVITIS (Lat.), n. f. Vu^l(wu^ll)-vi(we^l)/tis. Gen., -vit'idis (-idis). From *vulva* [q. v.]. Inflammation of the vulva. [L. 41, 50 (a, 14).]—**Diphtheritic v.** V. with a diphtheritic or diphtheroid deposit on the mucous membrane. [a, 34.]—**Follicular v.** Inflammation of the mucous follicles of the vulva. [a, 34.]—**Gangrenous v.** See *NOMA pudendi*.—**V. crouposa**. See *Diphtheritic v.*—**V. diabetica**. V. due to the diabetic cachexia. [a, 34.]—**V. diphtherica**. See *Diphtheritic v.*

VULVO-UTÉRIN (Fr.), adj. Vu^l-vo-u⁴-ta-ra²n². Pertaining to the vulva and the uterus. [L. 41 (a, 14).]

VULVO-VAGINAL, adj. Vu^llv'o-va³/i²-n². Fr., v.-v. Pertaining to the vulva and the vagina. [L. 41 (a, 14).]

VULVOVAGINITIS (Lat.), n. f. Vu^l(wu^ll)-vo(wo³)-va³(wa³g)-i²n(-i²e)/tis. Gen., -it'idis (-idis). Fr., *vulvo-vaginite*. Ger., *Scham-scheidenentzündung*. Inflammation of the vulva and of the vagina.

W

WABAÏN (Ger.), n. Wa³-ba³-en'. See *OUABAIN*.

WABE (Ger.), n. Va³b'e². Honey, honeycomb. [L. 46 (a, 21).]—**W'artig**. See *FAVEOLATE* and *FAVOUS*.

WABIG (Ger.), adj. Va³b'i²g. See *FAVEOLATE* and *FAVOUS*.

WACHHOLDER (Ger.), n. Va³ch²'hold-er. See *JUNIPERUS* (1st def.).—**Cedernw'**. See *JUNIPERUS oxycedrus*.—**Gemeiner W.**, **Krametsw'**. See *JUNIPERUS communis*.—**Stinkender W.** See *JUNIPERUS sabina*.—**W'beeren**. See *JUNIPERUS* (2d def.).—**W'beeröl**. See *Oil of JUNIPER*.—**W'brandtwein**. See *GIN*.—**W'holz**. See *SANDARAC* and cf. *JUNIPERIN*.—**W'mis**. See *Extractum JUNIPERI*.—**W'öl**, **W'theer**. See *Oil of CADE*.—**Zedernw'**. The *Juniperus oxycedrus*. [L. 80.]

WACHIRREN (Ger.), n. Va³ch²'er-re²n. See *METAMORPHOSIS*.

WACHS (Ger.), n. Va³ch's. See *WAX*.—**Bienenw'**. See *Bees' WAX*.—**Fettw'**. See *ADIPOCERE*.—**Korkw'**. See *CERIN* (2d def.).—**Leichenw'**. See *ADIPOCERE*.—**Pflanzenw'**. See *Vegetable WAX*.—**W'ähnlich**, **W'artig**. See *CERACEOUS*.—**W'bildnerel**. See *CEROPLASTY*.—**W'haut**. See *CERE*.—**W'kerze**. See *CEREOLUS* (2d def.).—**W'kropf**. See *Amyloid goitre*.—**W'öl**. See *Oleum CERE*.—**W'papier**. See *CHARTA cerata*.—**W'pfaster**, **W'salbe**. See *CERATUM* (2d def.).—**W'schwamm**. See *SPONGIA cerata*.—**W'stock**. See *BOTOLE*.

WACHSBEULE (Ger.), n. Va³ch's-boil-e². Swelling of the lymphatic glands in adolescents. [L. 80 (a, 14).]

WACHSTHUM (Ger.), n. Va³ch's'tum. See *GROWTH* (1st def.) and *INCREMENT*.—**W'skrankheit**. A disease of growth, morbid growth. [E.]

WACHSUCHT (Ger.), n. Va³ch's'zucht. See *INSOMNIA*.

WADDING, n. Wo³d/i²n². Fr., *ouate*. Ger., *Watte*. Carded cotton in sheets. [E.]—**W'-bearer**. Ger., *Wattenträger*. Of Hasenstein, a forceps for holding a firmly rolled, lengthy pad of w. The branches are held together by a movable ring. [F, 32.]

WADE (Ger.), n. Va³d'e². The calf of the leg. [a, 48.]—**W'bauch**. See *W*.

WADENBEIN (Ger.), n. Va³d'e²n-bin. See *FIBULA*.—**W'-beuger**. See *Biceps FLEXOR cruris*.

WADENBEINMUSKEL (Ger.), n. Va³d'e²n-bin-musk-e². See *PERONEUS*, n.—**Dritter W.** See *PERONEUS tertius*.—**Erster W.** See *PERONEUS longus*.—**Kürzer W.** See *PERONEUS brevis*.—**Langer W.** See *PERONEUS longus* and *PERONEO-PRÆPHALANGIUS*.—**Zweiter W.** See *PERONEUS brevis*.

WADENMUSKEL (Ger.), n. Va³d'e²n-musk-e². See *GASTROCNEMIUS*, *TRICEPS suæ*, and *BIFEMORO-CALCANÆUS*.—**Äusserer zweiköpfiger W.** See *GASTROCNEMIUS*.—**Dreiköpfiger W.** See *TRICEPS suæ*.—**Dritter W.** See *TRIPROPRIETATIS*.—**Grosser W.** See *SOLÆUS*.—**Langer W.** See *PLANTARIS*.—**Zweiköpfiger W.**, **Zwillingsw'**. See *GASTROCNEMIUS*.

WAFER, n. Wa³f'u^r. Fr., *cachet*. Ger., *Obolat*. A small sheet of gelatinous material which becomes flexible when it is moistened,

in which state it is wrapped around a dose of medicine and swallowed.

WAFFEN (Ger.), n. pl. Va³f'fe²n. See *ARMA*.

WAGE (Ger.), n. Va³g'e². See *BALANCE* (1st def.).—**Äerostatische W.** See *MANOMETER* (1st def.).—**Drehw'**. See *Torsion BALANCE*.—**Kinderw'**. See *BAROMACROMETER*.—**Römische W.** See *STEELYARD*.

WAGERECHT (Ger.), adj. Va³g'e²-re²ch't. Horizontal.

WAHAHE, n. See *HARTIGESHA spectabilis*.

WAHLENBERGIA (Lat.), n. f. Va³l'en-be²rg'i²-a³. From *Wahlenberg*, a Swedish botanist. Fr., *wahlenbergie*. A genus of campanulaceous plants. The *Wahlenbergieæ* are a tribe of the *Campanulaceæ*. [a, 35.]—**W. graminifolia**. A South European species. The leaves and flowers have been used for epilepsy. [a, 35.]—**W. linaroides**. A South American species used for flatulence. [a, 35.]

WÄHLEN (Ger.), adj. Val'e²nd. See *ELECTIVE*.

WAHLMITTEL (Ger.), n. Va³l'mi²t-te²l. A remedy having an elective or specific action. [L. 57 (a, 14).]

WAHLVERWANDTSCHAFT (Ger.), n. Va³l'fe²r-va³nt-sha³ft. See *Elective AFFINITY*.

WAHN (Ger.), n. Va³n. See *ILLUSION* and *DELIRIUM*.—**Fieberw'**. See *Febrile DELIRIUM*.—**Höhenw'**. Delirium grandiosum. [a, 34.]—**Kleinheitsw'**. Micromania. [a, 34.]—**W'muth**. See *WAINSDIN*.

WAHNSINN (Ger.), n. Va³n'z'i²a. Insanity, frenzy, dementia; of snell, delusional monomania. [D, 39.] See also *MONOMANIA*.—**Allgemeiner W.** See *Acute MANIA*.—**Fieberhafter W.** Febrile delirium. [a, 34.]—**Fixer W.** Partial mania. [L. 80.]—**Fluchtw'**. See *DRAPETOMANIA*.—**Gefangenew'**. Insanity consequent upon isolation. [a, 34.]—**Gemüthsw'**. Moral insanity. [a, 34.]—**Grössenw'**. See *DELIRIUM grandiosum*.—**Liebesw'**. See *EROTOMANIA*.—**Lustiger W.** See *CHERAPHROSYNE*.—**Muthloser W.** See *DEMENTIA*.—**Querulantenw'**. See *Querulous MONOMANIA*.—**Rastloser W.** See *MELANCHOLIA erabunda*.—**Religiöser W.** See *Religious MONOMANIA*.—**Säuferw'**. See *Alcoholic MANIA*.—**Stiller W.** See *PARAPHROSYNE*.—**Unruhiger W.** See *HYDROPHOBUS* and *MELANCHOLIA erabunda*.—**Verbrecherw'**. See *Moral INSANITY*.—**Verbreiteter W.** Of Flemming, general insanity. [a, 34.]—**Verfolgungsw'**. See *DELIRIUM de persecutions*.—**Verliebter W.** See *Amorous MELANCHOLIA*.—**W. bei Kindbetterinnen**. See *Puerperal INSANITY*.—**W'ig**. Mad, insane, delirious, demented.—**Zitterw'**. See *DELIRIUM tremens*.

WAHNSUCHT (Ger.), n. Va³n'zucht. Insanity. [a, 34.]

WAHNWITZ (Ger.), n. Va³n'vi²ts. See *DELIRIUM*.

WAHOÖ, n. Wa³-hu'. See *ECONYMUS atropurpureus*.

WAHRKNORPEL (Ger.), n. Va³r'knorp-e²l. See *Hyaline CARTILAGE*.

WAID (Ger.), n. Va³i²d. See *ISATIS* and *ISATIS tinctoria*.—**W'farbig**. Bluish. [L. 80.]

WAIST, n. Wast. The narrowest portion of the trunk above the innominate bones; loosely, the trunk between the axillae and the hips. [L.]

WAIZEN (Ger.), n. *Va3¹i2s-e2n*. See WEIZEN.

WAKE-ROBIN, n. *Wak¹ro¹b¹in*. The *Arum maculatum*, *Arisaema atrovirens*, *Trillium cernuum*, and *Trillium grandiflorum*; also the genera *Anthurium* and *Philodendron*. [a, 35.]

WALAI, n. In Fiji, the *Entada scandens* used as an oxytocic. [¹ Glasgow Med. Jour., Jan., 1889, p. 1 (a, 50).]

WALDFARN (Ger.), n. *Va3¹d¹fa¹rn*. See *ASPIDIUM filix mas*.

WALDMEISTER (Ger.), n. *Va3¹d¹mist-e2r*. The genus *Asperula*. [a, 35.]—**Gemeiner W.** See *ASPERULA odorata*.—**Hügelw.** See *ASPERULA cynanchica*.—**Wohlräucher W.** See *ASPERULA odorata*.

WALDMENSCH (Ger.), n. *Va3¹d¹me¹nsh*. A person affected with hypertrichosis universalis. [L, 57 (a, 50).]

WALDREBE (Ger.), n. *Va3¹d¹rab-e2*. See *CLEMATIS* (1st def.).—**Gemeine W.** See *CLEMATIS vitalba*.

WALDSTATT (Ger.), n. *Va3¹d¹sta¹t*. A place in the canton of Appenzel, Switzerland, where there is an alkaline spring. [a, 14.]

WALDSTROH (Ger.), n. *Va3¹d¹stro*. See *GALIUM*.

WALDWÖLLE (Ger.), n. *Va3¹d¹vol-e2*. See *FIR-WOOL*.

WALDWÖLLÖL (Ger.), n. *Va3¹d¹vol-u¹l*. See *PINE-needle oil*.

WALE, n. Wal. See *VIBEX* and *WHEAL*.

WALFISCH (Ger.), n. *Va3¹i¹f¹sch*. See *BALENA*.—**Flossw.** See *BALENOPTERA*.—**Gemeiner W.**, **Grönländischer W.**, **Nordischer W.** See *BALENA mysticetus*.—**Schnabelw.** See *BALENOPTERA rostrata*.—**Wohr.** See *LAPIS manati*.—**W'sehen.** Sinsews of the whale; used for surgical sutures. [L, 57 (a, 14).]—**W'thran.** See *Oleum BALENE*.

WALIDA, n. See *HOLARRHENA antidyenterica*.

WALKER (Lat.), n. f. *Wa¹k¹e¹ra¹s*. From Walker, founder of the Botanic Garden at Cambridge. Fr., *walkère*. A genus of the *Ochnaceae*, not now recognized. [a, 35.]—**W. serrata**, **W. zeylonensis**. Fr., *walkère dentée*. A tree found in tropical Asia. The roots and leaves are tonic and stomachic. [a, 35.]

WALL, n. *Wa¹l*. Gr., *τῆλος*. Lat., *paries*. Fr., *paroi*. Ger., *Wand*. W. An inclosing or limiting structure. [a, 17.]—**Germinal w. (of the yolk)**. Ger., *Keimwall*. That portion of the formative substance of the yolk that forms a ring-like thickening around the germinal disc.—**Keimw.** (Ger.). See the major list.—**Parietal w. (of the blastoderm)**. The outer or upper composite sheet of the blastoderm, made up of the epiblast and the outer layer of the mesoblast. [a, 5.]—**Periotic w.** The w. of the otic vesicle.—**Somatic w. of the blastoderm**. See *Parietal w.*—**Splanchnic (or visceral) w. of the blastoderm**. The inner layer of the blastoderm, made up of the hypoblast and the inner layer of the mesoblast. [a, 5.]—**W. of an abscess**. Ger., *Abzesswandung*. The living tissue, infiltrated with dead leucocytes, fluid intercellular substance, living cells, and other exudation products, that forms the boundary of an abscess. [a, 34.]—**W. of the nail**. That portion of the fold of the nail which projects over the nail. [G.]

WALLABA, n. See *EPERUA falcata*.

WALLACHEN (Ger.), n. *Va3¹la¹sch¹e2n*. See *BISTOURNAGE*.

WALL-EYE, n. *Wa¹l¹i*. 1. Achromia of the iris. 2. Leucoma.

WALL-EYED, adj. *Wa¹l¹id*. Having wall-eyes. [a, 34.]

WALLFISCH (Ger.), n. *Va3¹i¹f¹sh*. See *BALENA*.

WALLFLOWER, n. *Wa¹lf¹u¹-u¹er*. See *CHEIRANTHUS cheiri*.

WALLNUSS (Ger.), n. *Va3¹l¹nus*. See *JUGLANS* (1st def.) and *JUGLANS regia*. In the pl., *Wallnüsse*, the fruits of *Juglans regia*. [a, 35.]—**Grüne W'schalen**. See *Cortex nucum JUGLANDIS*.—**Landw'öl**. See *KEKUNA-OIL*, and cf. *ALUEURIS triloba*.—**W'blät-ter**. See *Folia JUGLANDIS*.—**W'öl**. See *WALNUT-OIL*.

WALLRATH (Ger.), n. *Va3¹ra¹th*. See *SPERMACEITI*.

WALLUNG (Ger.), n. *Va3¹lun¹2*. 1. Ebullition, undulation. [A, 450 (a, 17).] 2. Active congestion. [D.]—**Blutw.** See *ORGASM* (1st def.).—**W'sblutfülle**. Congestion due to emotional excitement (as of the ovary during the venereal orgasm).—**W'sdeck**. A spot of erythematous redness. [G.]

WALLWORT, n. *Wa¹l¹w¹ort*. See *PARETARIA officinalis* (1st def.). *Sedum acre*, *SAMBUCUS ebulus*, and *COTYLEDON umbilicus*.

WALNUT, n. *Wa¹l¹n¹ut*. Ger., *Walnuss*. The *Juglans regia* (or its fruit) and other species of *Juglans*. [a, 35.]—**American w.** See *JUGLANS nigra*.—**Belgium w.** See *ALUEURIS triloba*.—**Decoction of w. rinds**. See *Decoctum drupae JUGLANDIS regiae*.—**European w.** See *JUGLANS regia*.—**Indian w.** See *ALUEURIS triloba*.—**Rob of w's**. See *Rob nucum*.—**Spanish w.-oil**. See *KEKUNA-OIL*.—**W. fruit**. The fruit of *Juglans regia*. [a, 35.]—**W. leaves**. See *Folia JUGLANDIS*.—**W.-oil**. *Oleum juglandis* (see under *JUGLANS regia*).—**White w.** See *JUGLANS cinerea*.

WALONEN (Ger.), n. pl. *Va3¹l¹on-e2n*. See *VALCNIA*.

WALPURGISKRAUT (Ger.), n. *Va3¹l¹purg¹i2s-kra¹2-u¹t*. See *BOTRYCHUM lumaris*.

WALRATH (Ger.), n. *Va¹l¹ra¹th*. See *SPERMACEITI*.—**W'cerat**. See *Ceratum CETACEI*.—**W'kalbe**. See *Unguentum CETACEI*.

WÄLSCHKORN (Ger.), n. *Walsh¹ko¹rn*. See *MAIZE*.

WALSURA (Lat.), n. f. *Wa¹ls¹u¹ra¹s*. Fr., *walsure*. A genus of melacous trees. [a, 35.]—**W. piscifia**. East Indian fish-poison plant. The bark contains a narcotic principle. [a, 35.]

WALTHERIA (Lat.), n. f. *Va¹lt¹e¹r¹i2s*. From Walther, a German forester. Fr., *walthérie*. Ger., *Waltherie*. A genus of

the *Malvaceae*. [a, 35.]—**W. americana**, **W. arborescens**. A tropical American species having mucilaginous flowers and leaves. It is used as a febrifuge and antisyphilitic. [a, 35.]—**W. douradina**. A mucilaginous South American undershrub; used as a pectoral and vulnerary. [a, 35.]—**W. glomerata**. A Panama species. The leaves are vulnerary. [a, 35.]—**W. indica**. See *W. americana*.

WALTHERIE (Ger.), n. *Va¹l¹ter-e2*. See *CETOMORPHA*.

WALZE (Ger.), n. *Va3¹lts-e2*. See *CYLINDER* (1st def.).

WALZENKRAUT (Ger.), n. *Va3¹lts-e2n-kra¹2-u¹t*. See *LOTUS corniculatus*.

WALZIG (Ger.), adj. *Va3¹lts¹i2g*. See *CYLINDRICAL*.

WAMBLE, n. *Wa¹m¹bl*. See *NAUSEA* (2d def.).

WAN, adj. *Wa¹n*. Having a pale or sickly color.

WAND (Ger.), n. *Va¹nd*. See *WALL*.—**Scheidew.** See the major list.

WANDELBAR (Ger.), adj. *Va¹nd¹e2l¹ba¹r*. See *AMBULATORY*.

WANDERKÖRPER (Ger.), n. pl. *Va¹nd¹e¹r¹ku¹2-tp-e2r*. See *Wandering CELLS*.

WANDFLÄCHE (Ger.), n. *Va¹nd¹flach¹2-e2*. The surface of a wall. [a, 14.]—**Freie W.** [Reichert]. The free surface of the ovum within the uterus. [a, 8.]

WANDKNOCHEN (Ger.), n. *Va¹nd¹kno¹ch¹2-e2n*. See *Parietal BONE*.

WANDNAHT (Ger.), n. *Va¹nd¹na¹ht*. See *Sagittal suture*.

WANDSTROM (Ger.), n. *Va¹nd¹stro¹m*. See *Sluggish LAYER*.

WANDUNG (Ger.), n. *Va¹nd¹un¹2*. See *WALL*.—**W'strom**. See *Sluggish LAYER*.

WANGE (Ger.), n. *Va3¹n¹2-e2*. See *CHEEK*.—**W'nblutung**. See *GNATHORRHAGIA*.—**W'nbrnd**. See *Gangrenous STOMATITIS*.—**W'ntzündung**. See *GNATHITIS*.

WANGENFortsatz (Ger.), n. *Va3¹n¹e2n-fort¹2a¹ts*. See *Zygomatic APOPHYSIS*.—**W'nflidfurche**. The lower orbito-palpebral sulcus. [K.]—**W'n'schnürchen**. See *TRISMUS neonatorum*.—**W'nstellung**. See *Cheek PRESENTATION*.—**W'nzug**. See *GNATHOGRAMMA*.

WANGENMUSKEL (Ger.), n. *Va3¹n¹e2n-musk-e2l*. 1. Any muscle of the cheek. [a, 32.] 2. See *ALVEOLO-LABIALIS*.—**Aeusserer W.** See *LACRIMO-LABIALIS*.

WANNE (Ger.), n. *Va3¹n¹e2*. A large tub, especially a bathing tub. [a, 14.]—**Pneumatische W.** A tub inclosing the body, all but the head, the contained air being either rarefied or condensed, to facilitate respiration. [L, 57 (a, 14).] Cf. *Pneumatic CABINET*.

WANST (Ger.), n. *Va3¹nst*. See *RUMEN*.

WANZE (Ger.), n. *Va3¹nts-e2*. See *ACANTHIA lectularia*.—**W'nkraut**. See *CHENOPodium vulvaria*, *CIMICIFUGA* (1st def.), *GERANIUM robertianum*, and *LEDUM palustre*.

WARBLE, n. *Wa¹rb¹l*. A name given to the pimples of acne in the horse. [a, 34.]

WARE, n. *Wa¹r*. Any one of various seaweeds. [a, 35.]—**Sea-w.** See *Fucus vesiculosus*.

WARENCE, n. *Wa¹r¹e¹ns*. An old name for madder. [a, 35.]

WARMBRUNN (Ger.), n. *Va3¹m¹brun*. A place in Prussian Silesia where there are hot alkaline, saline, and sulphurous springs. [L, 30, 37, 49, 57 (a, 14).]

WÄRME (Ger.), n. *Va¹rm-e2*. See *HEAT* (1st def.).—**Eigen-tümliche W.** See *Specific HEAT*.—**Eigenw.** The temperature peculiar to any species of animal. It is nearly constant in warm-blooded animals, and about 1° C. higher than the surrounding medium in cold-blooded animals. [J, 54.] Cf. *Animal HEAT*.—**Gebundene W.** See *Latent HEAT*.—**Körperw.** The temperature of the body.—**Lebensw.** See *Animal HEAT*.—**Spezifische W.** See *Specific HEAT*.—**Strahlende W.** See *Radiant HEAT*.—**Therische W.** See *Animal HEAT*.—**Verbindungsw.** See *HEAT of combination*.—**Verdampfungsw.** See *Latent HEAT of vaporization*.—**Wahrnehmbare W.** See *Sensible HEAT*.—**W'abgabe**. The giving off of heat. [K.]—**W'bildung**. See *CALORIFICATION*.—**W'erzeugung**. See *CALORICITY*.—**W'färbung**. See *THERMOCHROMISM*.—**W'leitung**. The conduction of heat.—**W'messer**. See *CALORIMETER*.—**W'starre**. Rigidity due to heat. [K.]—**W'stoff**. See *CALORIC*, n. pl.

WARMSPRINGS, n. pl. *Wa¹rm*. 1. A place near Little Owen's Lake, San Bernardino County, California, where there is a hot alkaline and saline spring. 2. A place in Meriwether County, Georgia, where there are hot gaseous, alkaline, and chalybeate springs. 3. A place in Madison County, North Carolina, where there are hot gaseous, saline, and sulphurous springs. 4. A place in Bath County, Virginia, where there are hot gaseous, alkaline, chalybeate, and sulphurous springs. [Anderson (a, 14).]

WARNAS, n. See *ACETUM philosophicum*.

WARNEMÜNDE (Ger.), n. *Va3¹rm¹e2-mu¹nd-e2*. A sea-bathing resort in Mecklenburg-Schwerin, Germany. [L, 49, 57 (a, 14).]

WARNER'S RANCH SPRINGS, n. *Va¹rm¹u¹tr¹-ra¹n¹sch¹*. A place in San Diego County, California, where there are hot sulphurous and saline springs. [Anderson (a, 14).]

WART, n. *Wa¹rt*. A.-S., *wearte*. Ger., *Warte*. See *VERRUCA*.—**Fig-w.** A condyloma, especially condyloma acuminatum. [G.] See also *Fucus* (1st def.).—**Necrogenic w's**. See *VERRUCA necrogenica*.—**Scot-w.** See *Chimney-sweeper's CANCER*.—**Veneral w.** See *CONDYLOMA acuminatum*.

WARTED, adj. *Wa¹rt¹e2d*. See *VERRUCOSE*.

WARTEPERSONAL (Ger.), n. *Va3¹rt¹e2-pe3¹2-zon-a¹l*. The personnel of a hospital ward, including the nurses, servants, etc.

WÄRTER (Ger.), **WÄRTERIN** (Ger.), n's. Vart'e^r, -e^ri²n. See NURSE (2d def.).

WARTWEED, **WARTWORT**, n's. Wa^rt'wed, -wu^rt. See EUPHORBIA helioscopia, EUPHORBIA peplus, SENEIERA coronopus, CHELIDONIUM majus, and GNAPHALUM uliginosum.

WARTY, adj. Wa^rt'i². See VERRUCCOSE.

WÄRZCHEN (Ger.), n. Varts'ch'eⁿ. See VERRUCULA.—**Fadenförmige W.** See FILIFORM PAPILLÆ.—**Fleischw.** See CARUNCLE (4th def.).—**Gefässw.** A vascular papilla. [A, 521].—**Gefühlw.** See TACTILE CORPUSCLES (1st def.).—**Geschmackw.** See GUSTATORY PAPILLÆ and TASTE-BUDS.—**Hautw.** See PAPILLÆ CUTIS.—**Nervew.** See NERVE PAPILLÆ.—**Nierenw.** See PAPILLÆ RENALES.—**Scheidenklappenw.** See CARUNCULÆ MYRTIFORMES.—**Schwarzmartige W.** See FUNGIFORM PAPILLÆ.—**Tastw.** See TACTILE CORPUSCLES (1st def.) and NERVE PAPILLÆ.—**Thänenw.** See LACRYMAL CARUNCLE and LACRYMAL PAPILLÆ.—**Umwallte Zungenw.** Wallförmige W. See CIRCUMVALLATE PAPILLÆ.—**W'bildung.** See GRANULATION (1st def.).

WARZE (Ger.), n. Va^rts'e². See VERRICA and NIPPLE.—**Fleischw.** See CARUNCLE (4th def.).—**Geschmacksw'n.** See GUSTATORY PAPILLÆ.—**Grindw.** See CONDYLOMA latum.—**Haarw.** 1. A hairy mole. 2. A hair papilla. [a, 29].—**Hautw.** See VERRUCA.—**Keimw.** See CARUNCLE (2d def.).—**Lagerw.** See PHYMA.—**Molluscumw.** See MOLLUSCUM contagiosum.—**Nervew'n.** See NERVE PAPILLÆ.—**Nierenw'n.** See PAPILLÆ RENALES.—**Saitenw.** See ACROCHORDON.—**Saugw.** See HAUSTORIUM.—**Sebumw.** 1. OF Hebra, see VERRUCA follicularis. 2. See MOLLUSCUM contagiosum.—**Thänenw.** See LACRYMAL CARUNCLE.—**Thymianw.** See THYMUS GLAND.—**W'nbreite.** See Bimastoid DIAMETER.—**W'ngeschwulst.** A warty growth. [E].—**W'ngewebe.** Tissue found in the various forms of papilla. [J].—**W'nhof.** See AREOLA of the nipple.—**W'nhütchen.** See NIPPLE SHIELD.—**W'nkörper.** See CORPUS albanus (2d def.).—**W'nkrebs.** See CANCEROMA.—**W'pfilz.** See TELEPORA (2d def.).—**W'nhell.** See MASTOID PROCESS of the temporal bone.—**W'nzelenzugang.** See MASTOID APERTURE.

WARZIG (Ger.), adj. Va^rts'i²g. Verrucose; papillary; clavate. [G.]

WÄSCHE (Ger.), n. Vash'e². See LAVAGE.

WASCHMITTEL (Ger.), n. Va^sh'mi²t-e²l. See LOTION.

WASCHUNG (Ger.), n. Va^sh'ung. See LAVAGE and LOTION.

WASH, n. Wa^sh. See LOTION.—**Black (mercurial) W.** See LOTIO HYDRARGYRI nigra.—**Yellow w.** See LOTIO HYDRARGYRI flava.

WASUM (Lat.), n. n. Waz(va^ss'i²u³m'u³m). Fr., v. The name given by Bahr to a supposed new metal, now known to be thorium. [B, 3.]

WASE, n. Wa^sp. See VESPA.

WASSER (Ger.), n. Va^s'se^r. See WATER and cf. AQUA.—**Abgezogenes W.** Aetherisches W. Water impregnated with a volatile oil. [B].—**Blutw.** See BLOOD SERUM.—**Bretfelder W.** A perfume made of 300 parts of Cologne, 50 of rose-water, and 1 part of tincture of ambra moschata. [Bernatzik (A, 319)].—**Conrad's Augenw.** See COLIRIUM HYDRARGYRI mercurialis corrosivum.—**Farbloses phagedänisches W.** See AQUA phagedænica decolorata.—**Fliessw.** See LYMPH (1st def.).—**Fruchtw.** Geburtsw. See LIQUOR AMNII.—**Gehirnw.** See CEREBRO-SPINAL FLUID.—**Ge-hörw.** See PERILYMPH.—**Geistig-aromatisches W.** See AQUA aromatica spirituosus.—**Gelbes phagedänisches W.** See AQUA phagedænica lutea.—**Gliederw.** Gliedw. See SYNOVIA.—**Grauw.** See AQUA grisea.—**Hauptw.** Aromatic water. [L, 80].—**Kindesw.** Kindsw. See LIQUOR AMNII.—**Kohlensäures W.** See AQUA acid carbonica.—**Kohlisches W.** See SPIRITUS o²loratus.—**Königsscheidew.** Königsw. See NITROHYDRO-CHLORIC ACID.—**Kühlw.** See LIQUOR PLUMBI subacetatis dilutus.—**Labyrinthw.** See PERILYMPH.—**Leiningerw.** See under LAMSCHEID.—**Lösew.** See AQUA corrodens.—**Nährw.** See LYMPH (1st def.).—**Rabelw.** Dilute nitric acid. [B, 48 (a, 14)].—**Schwarzes W.** See LOTIO HYDRARGYRI nigra.—**Stehendes W.** That condition in which, during labor, the membranes have not yet ruptured.—**Trinkw.** Water fit for drinking. [L, 57 (a, 17)].—**Wahres W.** See LIQUOR AMNII.—**Waschw.** See LOTION.—**W'ab-zapfung.** See PAR CENTESIS.—**W'aderbruch.** See HYDROCIRSOC-ELE.—**W'ansammlung.** A collection of water or fluid; dropsy.—**W'arzt.** See HYDRIATROS.—**W'athmung.** See AQUATIC RESPIRATION.—**W'auge.** See HYDROPHETALMIA.—**W'ausleerend.** See HYDRAGOGUE.—**W'balg.** See HYDROMA.—**W'bildung.** See HYDATOGENESIS.—**W'bläschen.** See HYDATIS (2d def.) and PHLYCTENA.—**W'blatt.** See HYDROPHYLLUM.—**W'blattern.** See VARI-CELLA.—**W'blau.** See NICHOLSON'S BLUE and SOLUBLE BLUE.—**W'brechen.** See HYDREMESIS.—**W'bruch.** See the major list.—**W'brust.** See HYDROTHORAX.—**W'dampf.** Aqueous vapor, steam. [B].—**W'darmbruch.** See HYDRENTEROCELE.—**W'dicht.** Water-tight. [B].—**W'dosten.** The genus Eupatorium. [a, 35].—**W'entleierung.** See HYDROCECIS.—**W'fäule.** See HYDROSEPSIS.—**W'fenchel.** See CENANTHE phellandrium.—**W'fleischbruch.** Oedema of the scrotum. [A, 521 (a, 48)].—**W'frei.** See ANHYDROUS.—**W'führend.** See HYDRAGOGUE.—**W'gung.** 1. A watercourse, a canal or aqueduct. [a, 48]. 2. See AQUEDUCT of Sylvius.—**W'ger-räusch.** See HYDATISM.—**W'geschwulst.** See HYDATOCYCLOS and HYGROMA.—**W'hanf.** See BIDENS tripartita and EUPATORIUM canabinum.—**W'harz.** Burgundy pitch purified by melting in hot water and straining. It is opaque and contains much moisture. [a, 35].—**W'haut.** See AMNION (1st def.) and MEMBRANE of De-mours.—**W'häutchen.** See AMNION (1st def.).—**W'heilkraft.** See HYDRIASIS.—**W'heilkunst.** See HYDRIATRICES.—**W'heil.** See HYALINE.—**W'hedenbruch.** See HYDROCELE.—**W'kolik.** See PYROSIS.—**W'krampfaberbruch.** See HYDROCIRSOC-ELE.—**W'kropf.** See CYSTIC GOITRE.—**W'kur.** See HYDROTHERAPY.

—**W'lebens.** See AQUATIC.—**W'lefen.** The nymphæ. [L, 80].—**W'leiter.** See AQUEDUCT.—**W'leiter des Vor-hofs.** See AQUEDUCT of the vestibule.—**W'luftnabelbruch.** See HYDROPNEMATOPHALLOCELE.—**W'nabelbruch.** See HYDREPI-PLOMPHALUS.—**W'netzbruch.** See ORCHIOCELE.—**W'nier.** See HYDRONEPHROSIS (1st def.).—**W'nuss.** See TRAPA.—**W'pfeffer.** See POLYGONUM hydropiper and BIDENS cernua.—**W'pocken.** 1. Water-pox, varicella. [G.] 2. See HYDRACHNIDES (1st def.).—**W'reis.** See TURION.—**W'säure.** See OXYGEN.—**W'schen.** See HYDROPHOBIA.—**W'schlag.** See SEROUS APOPLEXY.—**W'stoff.** See the major list.—**W'treibend.** See HYDRAGOGUE.—**W'umschlag.** See WATER DRESSING.—**W'windbruch.** See HYDROPHYSOC-ELE.—**W'zapfenspleiss.** See TROCAR.—**Windw.** See AQUA carminativa.—**Wundw.** See AQUA vulneraria.

WASSERBLASE (Ger.), n. Va^s'se^r-bla^sz'e². A hydratid, a bleb.—**Frieselartige W.** See HYDRACHNE.—**W'nbruch.** See HYDATIDOC-ELE.—**W'nschwamm.** See CYSTOSARCOMA.

WASSERBLEI (Ger.), n. Va^s'se^r-bli. See GRAPHITE.—**W'säure.** See MOLYBDIC ACID.

WASSERBRUCH (Ger.), n. Va^s'se^r-bruch². See HYDRO-CELE.—**Aechter W.** See HYDROSCROC-ELE.—**Fleischw.** See HYDROSARCOC-ELE.—**Hodensackw.** See HYDROSCHOC-ELE.—**Netz-w.** See HYDREPILOCELE.—**Rückenmarksw.** See HYDRORRHACHIS.—**W. des Halses.** See CYSTIC GOITRE.

WÄSSERIG (Ger.), adj. Vas'se^ri²g. Watery, aqueous. [L, 31.]

WASSERKOPF (Ger.), n. Va^s'se^r-ko³p²f. See HYDROCEPHALUS and Chronic HYDROCEPHALUS.—**Hitziger W.** See TUBERCULAR MENINGITIS.

WASSERSPRENGEN (Ger.), n. Va^s'se^r-spreⁿe²n². Rupture of the foetal envelopes.

WASSERSTOFF (Ger.), n. Va^s'se^r-sto³f. See HYDROGEN. In composition, following the name of a substance and forming one word with the same, the hydride of that substance. [K, 46]. See the major list.—**Naphtylw.** See NAPHTHALENE.—**W'blau-säure.** See HYDROCYANIC ACID.—**W'bromid.** See HYDROBROMIC ACID.—**W'dioxyd.** W'hyperoxyd, W'superoxyd. See HYDRO-GEN peroxide.

WASSERSUCHT (Ger.), n. Va^s'se^r-zucht². See DROPSY.—**Aeussere Sucht.** See HYDREPIGASTRIUM.—**Augenw.** See HYDROPHETALMIA.—**Bauchw.** See ASCITES.—**Eierstockw.** See OVARIAN CYSTOMA.—**Eileiterw.** See HYDROSALPINX.—**Entzündliche Bauchfellw.** See HYDROPERITONITIS.—**Entzündliche Brustfellw.** See HYDROPLEURITIS.—**Entzündliche Gallen-blasenw.** See HYDROCHOLECYSTITIS.—**Entzündliche Herz-beutelw.** See HYDROPERICARDITIS.—**Entzündliche Hirnw.** See HYDROENCEPHALITIS.—**Entzündliche W.** See INFLAMMATORY DROPSY.—**Gliederw.** Gliedw. See HYDRARTHROSIS.—**Herzw.** See CARDIAC DROPSY.—**Hirnhautw.** See HYDROMENINX.—**Lungenw.** Pulmonary oedema.—**Magenw.** See ASCITES.—**Netz-w.** See OMENTAL DROPSY.—**Offene Rückgratsw.** See SPINA BIFIDA.—**Pauckenhöhlenw.** See HYDROMYRINGA (2d def.).—**Rippen-fellw.** See HYDROTHORAX.—**Rückgratsw.** See HYDRORRHACHIS.—**Sackw.** See FALSE DROPSY.

WASSERSÜCHTIG (Ger.), adj. Va^s'se^r-zu³ch²t-i²g. See DROPSICAL.

WÄSSERUNG (Ger.), n. Vas'se^r-un². Irrigation, maceration.

WASTING, n. Wast'i²n². A familiar term for tuberculosis in cattle. [a, 34.]

WATER, n. Wa^t'u³r. Gr. ύδωρ, Lat., aqua. Fr., eau. Ger., Wasser. It., acqua. Sp., agua. 1. A transparent, colorless liquid, H₂O, devoid of odor or taste and neutral in reaction. It is found everywhere in nature, constituting, in the form of seas, rivers, lakes, and springs, about three quarters of the earth's surface, forming also one of the constant constituents of the atmosphere, in which it appears under the forms of invisible aqueous vapor, mist, clouds, rain, hail, and snow; and, lastly, constituting the important element of all animal and vegetable fluids and entering into the composition of every one of the liquid and solid animal and vegetable tissues. As occurring in nature, w. is never perfectly pure, but contains solid, liquid, or gaseous admixtures, either suspended or dissolved. Hence different varieties of w. are recognized and named according to their source or their contained constituents (river-water, sea-water, lake-water, spring-water, rain-water, hard water, soft water, mineral-water, chalybeate water, sulphur-water, etc.). Pure w. may be obtained by distillation. It freezes at 0° C. (32° F.) to form ice, and boils at 100° C. (212° F.), forming invisible aqueous vapor. Steam is aqueous vapor associated with particles of liquid water in a very fine state of subdivision. Above the temperature of 4° C. water expands on heating and contracts on cooling; below that temperature the reverse is the case. Hence water at 4° C. occupies a minimum amount of space and consequently possesses its maximum degree of density. As w. is taken as a standard of density for solids and liquids, its sp. gr. is reckoned, at the temperature of maximum density, or 4° C., as 1. W. is a poor conductor of heat. It possesses very great solvent powers, dissolving a large number of solid, liquid, and gaseous substances. Aqueous solutions of non-volatile liquids are usually called simply *dilutions* (Lat., *liquores*)—solutions of liquids are designated as *dilutions* and solutions of gases or of volatile substances are called *waters* (Lat., *acqua*). Partial aqueous solutions of many substances are also employed in pharmacy, and are prepared by boiling or steeping vegetable substances in w. (*infusions*, *decoctions*). In certain crystalline compounds w. appears to enter into a weak chemical combination with salts (*w. of crystallization*), and its presence appears to define and maintain the crystalline form. A similar weak chemical combination perhaps takes place in the formation of an aqueous solution (see CRYSTALLIZATION). 2. In pharmacy, a solution of a gas, a solid, or a liquid in w. [B]. See also WATERS. 3. A familiar term for urine.—**Aerated w.**

Ger., *Aërat*, W. containing air or other gas in solution. [B.]—**Antimephitic w.** of Larnauds. A solution of 23 parts of zinc sulphate and 2 of copper sulphate in 975 of w. [¹ Med. News, Apr. 8, 1882 (B.).]—**Black mercurial w.** See *Lotio HYDRARGYRI nigra*. [a, 48.]—**Black w.** A disease of cattle characterized by the emission of red, chocolate-colored, or black urine containing albumin and broken-down blood-corpuscles. [a, 34.]—**Camphorated w.** See *Aqua CAMPHORE*.—**Carbonated w.** Carbonic-acid w. See *Aqua ACIDI CARBONICI*.—**Carraira w.** W. containing calcium carbonate held in solution by an excess of carbonic acid. [L, 41, 77 (a, 14).]—**Chalybeate w's.** W's holding salts of iron in solution. [a, 48.]—**Chlorine w.** See *Aqua chlori*.—**Chloroformated w.** See *Aqua CHLOROFORMI*.—**Cologne w.** See *SPRITUS odoratus*.—**Cosmetic w.** See *Aqua cosmetica*.—**Distilled w.** W. freed from its impurities by distillation. [B.]—**Effervescent alkaline w.** See *Liquor sodæ effervescens* and *Eau alcaline gazeuse*.—**Extemporaneous Sedlitz w.** See *Aqua sedlitzensis*.—**Eye-w.** See *COLLYRIUM*.—**Ferruginous w's.** Ger., *Eisenwässer*. See *Chalybeate w's*.—**Forge w.** See *Aqua fabrorum*.—**Gaseous alkaline w.** See *Eau alcaline gazeuse*.—**Goulard's w.** See *Liquor PLUMBI subacetatis dilutus*.—**Ground w.** See *Subsoil w.*—**Hard w.** W. containing in solution salts of calcium or magnesium. Such w. requires more soap than ordinary w. to make a lather, because the fatty acid of the soap forms an insoluble compound with calcium and magnesium, and the salts of these metals must first be removed before a permanent lather is formed. [B, 3.]—**Hell w.** See *Aqua infernalis*.—**Ice-w.** *eau de glace*, *eau de neige*. W. obtained wholly or in part from the melting of ice or made cold by the addition of ice.—**Javelle w.** Lat., *kali hypochlorosum solum* [Russ. Ph.], *liquor kali chlorati*. Fr., *eau de Javelle*. Ger., *Chloralkaliflüssigkeit*. An aqueous solution of hypochlorite of potassium, used for bleaching purposes. [B.]—**Marmalade distilled w.** See *Chalybeate w's*.—**Mineral w's.** Fr., *eaux minérales*. W's having a special effect upon the system in virtue of salts or similar substances contained in them to such an amount as to give them a characteristic taste. [B, 5 (a, 38).]—**Morphinated w.** A saturated (0.04-percent) watery solution of morphine, by frequent and long-continued agitation. [¹ Proc. of the Am. Pharm. Assoc., xxv (a, 19).]—**Natural w.** W. as it occurs in nature. [B.]—**Nitrous-oxide w.** See *Searle's patent oxygenous aerated w.*—**Oxygenated w.** Oxygenized w. See *HYDROGEN peroxide*.—**Red w.** See *Black w.*—**River w.** W. obtained from rivers. [B.]—**Saline purgative w.** See *Aqua sedlitzensis*.—**Searle's patent oxygenous aerated w.** Fr., *eau oxygénée*. A remedy consisting of nitrogen monoxide dissolved in water. [B, 5.]—**Sea w.** The salt w. of the ocean, or a sea-green communicating with it. It contains from 33 to 36 parts in a thousand of solid ingredients, of which over 30 parts are made up of various chlorides (sodium chloride from 26 to 27 parts, magnesium chloride 3 parts, and potassium chloride $\frac{1}{2}$ part). The sulphates form the next largest constituent, comprising 3 to 4 parts in a thousand (magnesium sulphate forming $\frac{2}{3}$ parts, and sodium sulphate $\frac{1}{3}$ part). [B, 3.]—**Soft w.** W. which readily forms a lather with soap. [B.]—**Spring w.** Fr., *eau de fontaine*. W. derived from springs. It is often prescribed in medicines.—**Subsoil w.** A sheet of w. found below the surface of the soil, at depths that vary with the character and situation of the ground.—**Sulphurated w.** See *Eau sulfurée*.—**Vegeto-mineral w.** of Goulard. Lat., *Vegeto-mineralis* [Fr. Cod. a. 19].—**Water w.** A responding nearly to the *liquor plumbi subacetatis dilutus* of the U. S. Ph., but usually containing a small amount either of alcohol or of an alcoholic solution of a drug. It is sometimes designated *spirituosus vegeto-mineral w.* [B, 10.]—**W-brash.** See *Pyrosis*.—**W. closet.** Fr., *garderobe*, *cabinet d'aisance*, *latrine*. Ger., *Abtritt*. A closet containing a stool for defecation, the discharges being carried off by the intervention of water. [B, 10.]—**W. cur.** See *Wasserkur*. See *HYDROTHERAPY*.—**W. in the head.** See *HYDROCEPHALUS*.—**Wjags.** A provincial term for varicella. [G.]—**W. of carbonated soda.** See *Liquor sodæ effervescens*.—**W. of Cotunnus.** See *PERILYMPH*.—**W. of crystallization.** Fr., *eau de combinaison*. W. which is associated with another substance in a state of molecular combination and in definite proportions, and is essential to the preservation of the crystalline form of that substance. The proportion of w. of crystallization increases as the temperature is lowered, and is reduced as the temperature is elevated; and by exposure to a temperature of 100° C. or to a vacuum all the w. of crystallization may be removed, when the substance immediately loses its crystalline form. In chemical formulæ, the w. of crystallization is designated by appending the symbol for water (H₂O), with the intervention of either of a comma, or a sign of addition, to the formula of the anhydrous salt. Thus, Na₂SO₄·10H₂O, or Na₂SO₄ + 10H₂O, denotes sodium sulphate containing ten molecules of w. of crystallization. [B.]—**W. of the labyrinth.** See *PERILYMPH*.—**W. on the brain.** See *HYDROCEPHALUS*.—**W. on the chest.** See *HYDROTORAX*.—**W. pang.** W. qualm. See *Pyrosis*.—**W. pox.** Ger., *Wasserpocken*. See *VARICELLA*.—**W. stiffening.** See *WASSENARE*.

WATERS, n. pl. of water (q. v.). Wa't'ers. Fr., *eaux*. See *Liquor AMNII*.—**Bag of w.** See *AMNION* (1st def.).—**Breaking of the w.** Lat., *aquarum effluxus*. Ger., *Abfluss des Fruchtwassers*. The rupture of the foetal envelopes at the time of parturition.—**Faise w.** Fr., *fauces œmæ*. 1. The liquid sometimes found between the chorion and the amnion at an advanced stage of gestation. [A, 43.] 2. The liquid discharged from the uterus in cases of haemorrhœa. [A, 16.]

WATER-VASCULAR, adj. Wa't'-'u'sr-vā'sk'-'u'l-a'sr. Vascular and carrying water contents.

WATERY, adj. Wa't'-'u'sr-i'sr. See *AQUEOUS*.

WATT, n. Wo't. The unit of electrical energy. [a, 48.]

WATTE (Ger.), n. Va't'te. See *WADDING*.—**W-träger.** See *WADDING-bearer*.—**W'nverband.** A padded bandage. [E.]

WATTENWEILER (Ger.), n. Va't'te'n-vil-e'r. A place in Alsace-Lorraine, where there is a gaseous, chalybeate, and sulphurous spring. [L, 30, 49 (a, 14).]

WATTLE, n. Wo't't'l. In Australia and California, the *Acacia decurrens* and other astringent species of *Acacia*. [a, 35.]—**Black w.** See *ACACIA decurrens* and *Acacia mollissima*.

WATTWILLER (Fr.), n. Va't'-vel-yā. See *WATTENWEILER*.

WAVE, n. Wāv. Gr., *κύμα*. Lat., *unda*. Fr., *onde*. Ger., *Welle*. A ridge-like elevation (accompanied by a corresponding depression) of the surface of a fluid which advances while the particles of the fluid have little or no onward motion; hence a cycle of muscular alternating movement. [a, 48.]—**Contraction w.** Fr., *onde musculaire*. 1. The w.-like progression of the contraction from the point of stimulation in a muscle. The length of the w. is 200 to 350 millimetres in striated muscle, and consequently greater than the length of the fibres, so that normally a whole fibre is in contraction at once. The rapidity with which the w. travels is in a living man 10 to 13 metres a second, but is much slower in cold-blooded animals (3 to 4 metres in the frog). [L, 19, 55, 57.] 2. The graphic representation of a contracting muscle. [K.]—**Dicrotic w.** A pulse-w. showing dicrotism (q. v.), due to low tension and extensibility of the vessel-walls. It is regarded as an oscillation w. (q. v.). [K, 3.]—**Expansion-w.** See *PULSE* (1st def.).—**Fixed w. of contraction of voluntary-muscle tissue.** One or more swellings which appear on a dead muscle-fibre (as prepared for the microscope), where the remainder of the fibre is stretched, giving the idea that the contraction is reflected back to its origin. [K.]—**Fixed w. of blood which moves toward the heart during the auricular systole**; used as synonymous with "negative pressure," to which expression it is preferable. [K, 13.]—**Oscillation w.** A secondary pulse-w. due to inertia of the vessel-walls. [K, 3.]—**Pericussion w.** A vibration produced by the act of percussing. [D.]—**Pre-dicrotic w.** A slight rise of the pulse-w. which precedes the dicrotic w. [K.]—**Pulse-w.** The w. of blood proceeding throughout the arterial system from the root of the aorta. The velocity is 9-24 metres a second, and it is propagated more slowly in arteries with soft, extensible walls than in arteries having resistant and thick walls. [Landois (a, 34).]—**Recoil w.** See *Dicrotic w.*—**Reflected w.** In physiological physics, a w. which travels along a closed tube, and, meeting with an obstruction, is reflected back to its origin. [K.]—**Respiratory w.** An oscillation in the blood-pressure curve, rising during inspiration and falling during expiration in consequence of the variations of intra-thoracic pressure during respiration. [a, 24.]—**Stationary flexion w's.** Oscillations of all the particles of an elastic vibrating body, so that all of them are always in the same phase of a vibrating tuning fork or plucked string. The small parts of the auditory apparatus oscillate in stationary flexion w's. [Landois (a, 34).]—**Stimulus-w.** Ger., *Reizwelle*. The contraction-w. which passes along a muscle as the result of a stimulus applied at a certain point. [Gruenhagen (K).]—**Tricotic w.** A third w., in addition to the tidal and dicrotic w's, occurring during systole and giving the impression of a triple-striking pulse. [Weiske (a, 34).]—**True tidal w.** (Mahomed). That portion of a sphygmographic tracing which is sometimes seen between its apex and its aortic notch; supposed to correspond to the onward passage of the blood resulting from the ventricular systole. [D, 68.]

WAVED, WAVY, adj's. Wāv'd, wāv'z. Wave-like, undulate, repand. [a, 35.]

WAX, n. Wa'x. Gr., *κνός*. Lat., *cera*. Fr., *cire*. Ger., *Wachs*. A softish, plastic concrete substance, consisting essentially of various compounds of the higher acids of the fatty-acid series, especially myricylic and cerotic acids. [B.]—**Andaques w.** The w. of a peculiar species of bee found near the Orinoco and Amazon rivers. [B, 2.]—**Bee-w.** *Bees' w.* Fr., *cire d'abeilles* [Fr. Cod.]. A yellowish or brownish concrete substance deposited by the honey-bee in the honeycomb. It dissolves in boiling alcohol and sparingly in ether, and melts at 63° C. It consists essentially of myricin, cerotic acid, and cerolin. When bleached, it forms the *cera alba* of the U. S. Ph. [B.]—**Brazil w.** See *CARNAUBA w.*—**Butter of w.** A strongly smelling, buttery substance left behind on freeing w. of its acid principle by distillation. [B, 36.]—**Carnauba-w.** *Cera w.* See *CARNAUBA w.*—**China w.** *Chinese (insect) w.* A hard, white, crystalline substance, consisting chiefly of ceryl cerotate, used in China and Japan medicinally and for making candles. It is the purified product of an insect (*Coccus ceriferus*), which deposits it on the twigs of *Fraxinus chinensis*. It melts at 82° to 86° C. [B, 4 (a, 38).]—**Ear-w.** See *CERUMEN*.—**Earth w.** Fossil w. See *OPROCEAN w.*—**Earwax.** See *OPROCEAN w.*—**Indian insect w.** deposited on *Ligustrum ibota*. [a, 35.]—**Indian vegetable w.** See *GETAHLAHOE*.—**Insect w.** Any w. deposited by insects. [a, 35.]—**Japanese w.** Japan w. A hard, waxy fat, derived from the stone-fruits of several species of *Myrica*. It is more brittle than beesw. is somewhat bitter, and is readily saponifiable with the alkalis. It varies somewhat in composition. It is used with beesw. and is used like honey, and by the Hindoos in food. [L, 77, 185 (a, 35); B, 270 (a, 38).]—**Ocuba w.** A fatty substance (sometimes confounded with myrtle-w.) obtained from the fruits of *Myristica ocuba*; used like beesw. [a, 35.]—**Oil of w.** See *Oleum CERÆ*.—**Ointment of w.** See *UNGUENTUM CERÆ*.—**Paraffin w.** See *PARAFFIN* (1st def.).—**Pulverulent w.** See *CERA amygdala*.—**Vegetable insect w.** See *Chinese w.*—**Vegetable w.** Lat., *phytocerasum*, w., *cf. waxes*. Fr., *Ger., Pflanzenwachs*. A w. or waxy substance of vegetable origin,

especially myrtle w. It occurs (in the form of coherent layers, or crowded, vertical rods, or rounded or acicular grains) as excretions on the cuticularized epidermis of many plants to protect them from moisture and to check excessive evaporation, and is sometimes so abundant as to furnish a commercial product. [a, 35].—**Wberry**. See MYRTLE.—**W. plaster**. See SPANADRAPE cire and CERATUM (2d def.).—**W-tree**. In China and Japan, the *Louistrium lucidum*; in Japan, also the *Rhus succedanea* and other species of *Rhus*; in Brazil, the *Vismia brasiliensis*; in Guiana, the *Vismia guianensis*; in New Granada, the *Elaeagia utilis*. [a, 35].—**White w**. See *Cera alba*.—**Yellow w. Lat., cera flava**. Fr. *cire jaune* [Fr. Cod.]. Sp., *cera* [Sp. Ph.]. Beesw' as obtained from the comb without purification. [B.]

WAXY, adj. Wa'x'i. Gr., κήρυος. Lat., cereus. Fr., cireux. Ger., wachsartig. Of the nature of or having the appearance of wax. [a, 48.]

WAX, n. Wa. Gr., ὄξος. Lat., via. Fr., voie. Ger., Weg. 1. A road or path. 2. A manner or method. [a, 48].—**Dry w. Lat., via sicc.** Fr., voie sèche. In chemistry, the employment of heat for liquefaction (See also ANALYSIS in the dry w.). [B, 38 (at 14).]—**Wet w. Lat., via humida**. Fr., voie humide. In chemistry, the employment of liquid solvents (See also ANALYSIS in the wet w.). [B, 38 (at 14).]

WAYLAND SPRINGS, n. Wa'land. A place in Lawrence County, Tennessee, where there is a saline and chalybeate spring.

WEAKNESS, n. Wek'nes. Gr., ἀσθένεια. Lat., infirmitas. Fr., infirmité. Ger., Schwachheit. A condition in which there is a lack of physical or mental force. It may be simply the result of over-exertion and fatigue, without any attendant pathological condition, or it may be an accompaniment of an acute or a chronic disease. [D.]—**Cerebro-acoustical w.** [Goltz]. The temporary loss of hearing resulting from destruction of the auditory area in the cortex cerebri. [Landois (K.).]—**Cerebro-optical w.** [Goltz]. A temporary loss of vision due to lesions of the visual area in the cortex cerebri. [Landois (K.).]—**Inward w.** A popular term for leucorrhœa.

WEANING, n. Wen'in. Gr., ἀπογαλακτισμός. Lat., ablactatio. Fr., sevrage. Ger., Entwöhnung. The discontinuation of the supply of mother's milk to a child. [a, 48.]

WEANLING, n. Wen'lin. A child or animal newly weaned.

WEB, n. We'b. Gr., ισός. Lat., tela. 1. A fabric produced by weaving. [a, 48.] 2. The vane of a feather on either side of the rachis. 3. The membrane connecting the toes of some animals. [L, 341 (a, 27).]—**Mucous w.** See RETE mucosum.—**Spider's w.** See CORWEB.

WEBBED, adj. We'bd. Of digits, connected by a web or membrane. [a, 48.]

WEBER, n. Vah'e'r. See AMPÈRE.

WEBERA (Lat.), n. f. Vab'e'r-a. Fr., webère. 1. A genus of the Rubiaceæ. 2. A genus of mosses; of some authors, a section of the genus *Bryum*.—**W. corymbosa**. An East Indian shrub. [a, 35].—**W. tetrandra**. An East Indian shrub. The leaves and root are used as an astringent, the root also as an antelmintic, the bark and young shoots as an antisyphenteric. [a, 35.]

WEB-EYE, n. We'b'i. An old term for caligo and leucoma.

WECHSEL (Ger.), n. Ve'ch's'el. See CONVERSION and MUTATION.—**Hautöffnungs'w.** See METAPOROPIEA (1st def.).—**Krankheits'w.** 1. The crisis of a disease. 2. See METASTASIS (1st def.).—**Wahre der Frau**. See MENOPAUSE.

WECHSELFIEBER (Ger.), n. Ve'ch's'el-feb-e'r. See INTERMITTENT FEVER.—**Alltägiges W.** See QUOTIDIAN FEVER.—**Bösartiges W.** See PERNICIOUS MALARIAL FEVER.—**Doppeltes W.** See DOUBLE (intermittent) FEVER.—**Dreitägiges W.** See TERTIAN FEVER.—**Schwarzgallichtes W.** See ATBILIARY FEVER.—**Vier-tägiges W.** See QUARTAN FEVER.

WEDEL (Ger.), n. Vad'e'l. See FROND (1st def.).

WEDELIA (Lat.), n. f. Vad-e'l'i-a. Fr., wédélie. A genus of the Wedeliæ, which are a division of the *Heliantheæ*. [a, 35].—**W. calendulacea**. An East Indian herb. The aromatic leaves, seeds, and flowers are used as a deobstruent and discutient. The juice of the plant is an ingredient in *amritakalpa rasa*. [a, 35.]

WEDGE, n. We'j. Gr., σφῆν, σφηνεύς, σφηνικός. Lat., cuneus. Fr., coin. Ger., Keil. 1. A solid block two of the opposite sides of which slope to a narrow edge. [a, 48.] 2. A piece of soft rubber to be inserted between two teeth to force them apart.

WEED, n. Wed. 1. A troublesome, useless, or unsightly plant. [a, 35.] 2. See WEED—**Bitter-w.** See AMBROSIA artemisiæfolia.—**Emetic w.** See LOBELIA inflata.—**White w.** See CHRISANTHEMUM leucanthemum, ACHILLEA ptarmica, and ANTHRISCUS silvestris.—**Yellow-w.** See RESEDA luteola.

WEG (Ger.), n. Vag. 1. A way. 2. A passage, a duct. [a, 14].—**Callen'w.** See BILE-DUCTS.—**Lymph'w.** A lymphatic channel or vessel. [a, 18].—**W'dorn.** See RHAMNUS.—**W'weiser**. See GORGET (1st def.).

WEGERICH (Ger.), **WEGERIC** (Ger.), n's. Vag'e'r-i'ch, i'zg. See PLANTAGO.

WEGFALLEN (Ger.), n. Vag'fa'l-le'n. See INTERCISIO.

WEGHUSTEN (Ger.), v. tr. Vag'hust-e'n. To cough up. [A, 450 (a, 17).]

WEGLEITEND (Ger.), adj. Vag'lit-e'nd. See EFFERENT.

WEGNAHME (Ger.), n. Vag'na'm-e. See ABLATION (1st def.).

WEGSCHNEIDEN (Ger.), **WEGSCHNEIDUNG** (Ger.), n's. Vag'shnd-e'n, -un. See ABSCISSION.

WEGWARTE (Ger.), n. Vag'va'rt-e. The genus *Cichorium*.

WEH (Ger.), n. Va. Pain, suffering; in the pl., *W'en*, labor-pains. [a, 14.] See also DOLOR.—**Ab-springende W'en**. See METASTATIC LABOR.—**Blutige W'en**. See DOLORS sanguinolenti.—**Falsche W'en**. See FALSE PAINS.—**Gebärw'en, Geburtsw'en**. See EXPULSIVE PAINS.—**Gichtisches Halsw'**. See TRACHELAGRA.—**Hüftgelenkw'**, **Hüftw'**. See COXALGIA.—**Knochenw'en**. See DOLORS osteopoi.—**Krampf'w'en**. SPASMODIC labor pains.—**Nachgeburtsw'en, Nachw'en**. See AFTER-PAINS.—**Treibw'en**. See EXPULSIVE PAINS.—**Vorhersagende W'en, Weissagende W'en**. The premonitory pains of labor.—**W'ader**. A varix due to pregnancy. [L, 135 (a, 14).]—**W'enartig**. Resembling labor-pains.—**W'ennergend**. See OXYTOIC.—**W'enlosigkeit**. A morbid cessation of the pains of labor after the escape of the liquor amnii; uterine inertia. It differs from *W'enpause* (2d def.) in not being due to the natural distention of the uterus by the unruptured ovum, but to some pathological cause, like exhaustion (*Erschöpfung*).—**W'enpause**, 1. The ordinary interval between labor-pains. 2. A cessation of the pains for a considerable length of time. [A, 61.] See also *W'enlosigkeit*.—**W'enschmerz**. The pain of a uterine contraction.—**W'enthätigkeit**. The character of the labor-pains as regards efficiency.—**W'enversetzung**. See METASTATIC LABOR.—**W'enverstärkung**. An increase in the force of the labor-pains.—**W'frau, W'mutter**. See MIDWIFE.—**Wilde W'en**. See FALSE PAINS.

WEHENSCHWÄCHE (Ger.), n. Va'e'n-shwach'e. Weakness of the labor-pains.—**Primäre W.** That form in which the weakness of the pains is observed from the first. [A, 20.]—**Secundäre W.** That form in which the inefficiency comes on after labor has progressed to some degree. [A, 20.]

WEHNE (Ger.), n. Van'e. See WEN.

WEIB (Ger.), n. Vib. A woman. [A, 521 (a, 21).]—**W'erzeit**. See MENSTRUAL PERIOD.—**W'lich**. See FEMALE, GYNÆCEOUS, and PISTILLATE.

WEICHE (Ger.), n. Vich'e. 1. The side, the flank, the groin. [A, 450 (a, 17).] Cf. LAPARA. 2. See LINT.—**Rippenw'**. See HYPOCHONDRIAC REGION.—**W'after**. An artificial anus in the inguinal region. [L, 30 (a, 14).]—**W'band**. See GIMBERNAT'S LIGAMENT.—**W'nbruch**. See INGUINAL HERNIA.

WEICHAARIG (Ger.), adj. Vich'ha'r-i'zg. See PUBESCENT.

WEICHAUT (Ger.), n. Vich'ha's-u't. See PIA.

WEICHELIGKEIT (Ger.), n. Vich'lib-i'g-keit. Looseness of the bowels. [a, 14.]

WEICHLICH (Ger.), adj. Vich'2'lib'ch. Tender, delicate, effeminate. [a, 14.]

WEICHPARAFFIN (Ger.), n. Vich'pa'r-a'f-fen'. See PETROLATUM.

WEICHSELZOPF (Ger.), n. Vich's'e'l-tso'pf. See PLICA polonica.

WEICHSPIZTE (Ger.), n. Vich'spi'ts-e. See MUCRO.

WEICHESTACHELIG (Ger.), adj. Vich's'ta'ch'2-e'l-i'zg. See MURICATE.

WEICHWERDEN (Ger.), n. Vich've'r'd-e'n. Softening.

WEID, n. Wed. Written, also, *weed*. In Scotland, acute mammary inflammation. [a, 48.]

WEIDE (Ger.), n. Vid'e. See SALIX (1st def.).—**Fieberw'**. See SALIX pentandra and SALIX fragilis.

WEIDERICH (Ger.), n. Vid'e'r-i'ch. See EPILOBIUM and LYTHRUM.

WEIGHT, n. Wat. Gr., σπάσις. Lat., pondus. Fr., poids. Ger., Gewicht. 1. That property of matter (due to the force of gravitation) in virtue of which it tends to fall downward. 2. The amount of such tendency to downward motion. 3. A system of related units or denominations for the measurement of the w. of bodies: a table of w. [a, 48].—**Atomic w.** The w. of an atom of an elementary substance compared with that of hydrogen as unity. [B.]—**Curve of w.** A graphic representation of the different w's of the human body at different ages. [H. P. Bowditch, "Ann. Rep. of State Bd. of Health of Mass., 1877 (K).]—**Molecular w.** Fr., poids moléculaire. Ger., Molekulargewicht. The w. of a molecule of a substance as compared with that of an atom of hydrogen. In the case of most elementary bodies this is double the atomic w., since one elementary molecule usually contains two atoms; and, since a molecule of a gas, simple or compound, occupies two volumes, the molecular w. of the gas is double the sp. gr. of the gas referred to that of hydrogen as unity. [B.]

WEIHRÄUCH (Ger.), n. Vi'ra'u'ch. See OLIBANUM.—**Gemeiner W.** See OLIBANUM in sortis and OLIBANUM silvestre (1st def.).—**W'baum**. The *Boswellia Carteri* and some other species of *Boswellia*. [a, 35].—**W'rinde**. The bark of *Liquidambar orientale*. [B, 108 (a, 14).]

WEILBACH (Ger.), n. Vil'ba'ch. A place in Hesse-Nassau where there are sulphurous and alkaline and also gaseous chalybeate and saline springs. [L, 30, 37, 49, 57 (a, 14).]

WEIN (Ger.), n. Vin. See WINE.—**Franzbranntw'**. See SPIRITUS VINI gallici.—**Gliederw'**. Antarthritic wine. [L, 46 (a, 21).]—**Glühw'**. See AROMATICES.—**Liqueurw'e**. Wines containing 15 to 20 per cent. of alcohol. They include sherry, Malaga, Tokay, port, and the Greek, Italian, and Spanish wines in general. [B, 270 (a, 38).]—**W'blüchlich, W'artig**. Vinous.—**W'auszug**. See ENOLATURE.—**W'beere**. A grape.—**W'blatter**. See ROSA.—**W'blumensäure**. See CENANTHIC acid.—**W'essig**. Vine vinegar. [B.]—**W'eist**. See ETHYL ALCOHOL.—**W'meth**. See GENOMEL.—**W'molken**. See CENOGALA.—**W'öl**. See CERALEON.—**W'ranken**. Grape-vine tendrils (*pampini vitis*). See under VITIS vinifera.—**W'schwefelsäure**. Sulphuric acid. [A, 324.]

WEINKRAMPF (Ger.), n. Vin'kra'mpf. A paroxysm of weeping. [D, 66.]

WEINSAURE (Ger.), n. Vin'zoi-e. Tartaric acid. [B.]—**Brenzliche W.** Pyrotartaric acid. [A, 324.]—**Lösliches W'anhydrid.** Tartaric acid. [A, 324.]—**W.-Äthylester.** See ETHYL tartrate.—**W.-Amylester.** See AMYL tartrate.—**W'anhydrid.** Tartaric anhydride. [B.]

WEINSTEIN (Ger.), n. Vin'stin. See TARTAR (1st def.).—**Brenzliche W'flüssigkeit.** Pyrotartaric acid. [L, 80.]—**Geblätterte W'erde.** Normal potassium acetate. [B.]—**Kreideartiger W.** Kreidesaurer W., Mephitischer W. See POTASSIUM carbonate.—**W'geist.** See ADIAPHOROUS SPIRIT.—**W'kali, W'laugensalz.** See POTASSIUM carbonate.—**W'rahm.** See Cream of TARTAR.—**W'salz.** See POTASSIUM tartrate and ALCALI tartari.—**W'säure.** Tartaric acid. [B.]—**W'spiritus.** See LIQUOR pyrotartareus.

WEISS (Ger.), adj. and n. Vis. White. [a, 35.]—**Lendenmarkw'.** The white substance of the lumbar portion of the spinal cord.—**W'hüftigkeit.** See LEUCOCYTIC.—**W'duss.** See LEUCORRHEA.—**W'hügel.** See CORPORA albicantia.—**W'zelenblut.** See LEUCOCYTHÆMIA.

WEISSBLECH (Ger.), n. Vis'ble'ch. Sheet iron coated with tin. [B.]

WEISSENBURG (Ger.), n. Vis'sen-burg. 1. A place in the Canton of Bern, Switzerland, where there is a warm gaseous and sulphurous spring. 2. A place in Middle Franconia, Bavaria, where there is an alkaline spring. [L, 37, 49, 57 (a, 14).]

WEISGLAS (Ger.), n. Vis'glas. Arsenic trioxide. [B, 49.]

WEITBEINIG (Ger.), adj. Vit'bin-iq. See BOW-LEGGED.

WEITSEHEND (Ger.), **WEITSICHTIG** (Ger.), adj's. Vit'-za-e'nd, -zi'cht'iq. See PRESBYOPIC and HYPERMETROPIC.

WEIZEN (Ger.), n. Vits'e'n. Wheat; the genus *Triticum*. [a, 35.]—**Buchw'.** See the major list.—**Gurkenw'.** See TRITICUM repens.—**Koblenw'.** The *Triticum compactum* and other varieties of *Triticum vulgare*. [a, 35.]—**Kuhw'.** See MELAMPYRUM and LOLIUM tenuifolium.

WELD, n. See *RESEDA luteola*.

WELKEN (Ger.), n. Ve'lk'e'n. See ATROPHY.

WELL, n. We'll. Gr., κρήνη. Lat., fons. Fr., puit. Ger., Brunnen. A fountain of water; a hole or pit containing water; any pit or cavity. [a, 48.]—**Lymph-w'.** Fr., puits lymphatiques. Of Ravius, stomata in the diaphragm. [J, 26, 31.]

WELLE (Ger.), n. Ve'l'le. An undulation, a wave; a cerebral convulsion; in the pl., W'en, fluctuili. [J, 30 (K).]

WELLIG (Ger.), adj. Ve'l'i'q. See UNULATE.

WELLINGTONIA (Lat.), n. f. We'l'i'n2n2-ti'2-a. From the Duke of Wellington. Fr., wellingtonie. The genus *Sequoia*.

WELTLICH (Ger.), adj. Ve'l't'i'ch. See COSMIC.

WEMDING (Ger.), n. Ve'm'di'2n. A place in Bavaria where there is a sulphurous and saline spring. [L, 30, 37, 135 (a, 14).]

WEN, n. We'n. A.-S., wenn. Gr., ἀνίωμα (1st def.). Lat., lupia. Fr., loupe. Ger., Wölfschwuulst, Balggeschwuulst. 1. See ATHEROMA (1st def.). 2. See GOITRE.

WENDEL (Ger.), n. Ve'nd'e'l. See GYRUS (1st def.).

WENDLANDIA (Lat.), n. f. Ve'nd-la'ndi'2-a. From *Wendland*, a German horticulturist. Fr., wendlandie. A genus of the Rubiaceæ. [a, 35.]—**W. Lawsonie.** A Malabar tree. All parts are used in baths as an antispasmodic, and the leaves in coma. [a, 35.]

WENDSTEHEN (Ger.), n. Ve'nd'sta-e'2n. In kinesiatrics, a standing posture with the trunk curved backward as far as possible. [L, 57 (a, 14).]

WENDUNG (Ger.), n. Ve'nd'un'2. See VERSION.—**W'sschlinge.** See FILLET (1st def.).

WERBLOCHE (Ger.), n. Ve'r'b'lo'k'e. See PLICA polonica.

WERG (Ger.), n. Ve'rg. See STUPA.

WERGIG (Ger.), adj. Ve'rg'i'q. See STUPOSE.

WERK (Ger.), n. Ve'rk. Work, a work.—**Maschenw'.** A network, especially that formed by fibrin during the coagulation of blood. [K.]—**W'stätte.** See LABORATORY.

WERKZEUG (Ger.), n. Ve'rk'zoi'q. An apparatus, instrument, or organ.—**Katheterschneidew'.** See OSTEOTOME.—**Marterw'.** See ARTHREMBOLA.

WERMUTH (Ger.), n. Ve'r'mut'. The *Artemisia absinthium* or its flowering herb. [a, 35.]—**W'bitter.** See ABSINTH.—**W'-extract.** See EXTRACTUM ABSINTH.—**W'kraut.** Wormwood. See ARTEMISIA absinthium.—**W'öl.** See OLEUM ABSINTH.—**W'säure.** See ABSINTHIC acid.—**W'tinctur.** See TINCTURA ABSINTH.—**W'wein.** See ABSINTHITES.

WERSEN (Ger.), n. Ve'r's'e'n. The seeds of *Rhamnus cathartica*. [a, 35.]

WERTHIGKEIT (Ger.), n. Ve'r't'i'q-keit. See ATOMICITY.

WESEN (Ger.), n. Vaz'e'n. See ENS.—**Böses W.** See EPILEPSY.—**Netzformiges W.** See RETE mucosum.

WESENTLICH (Ger.), adj. Vaz'e'n2t-li'ch. See ESSENTIAL and FUNDAMENTAL.

WESPENBEIN (Ger.), n. Ve'sp'e'n-bin. See SPHENOID BONE.—**W'schnabel.** The rostrum of the sphenoid bone. [L, 31.]—**W'tuten.** See SPHENOIDAL CORNUA.

WEST BADEN SPRINGS, n. We'st ba'd'e'n. A place in Orange County, Indiana, where there are gaseous, alkaline, saline, and sulphurous springs. [Anderson (a, 14).]

WESTON-SUPER-MARE, n. We'st'n-su'p-u'r-mar'e. A sea-bathing resort in Somerset, England. [L, 37 (a, 14).]

WESTWARD HO, n. We'st'wa'r'd-ho'. A sea-bathing resort in Devonshire, England. [L, 37 (a, 14).]

WETHERBEE-AIL, n. We'th'2-u'r-be-al. See PROGRESSIVE muscular ATROPHY.

WETTER (Ger.), n. Ve't'te'r. 1. Weather. 2. Air, vapor, fumes. [A, 450 (a, 17).]—**Böses W., Schlagendes W., Tödtenes W.** See METHANE.

WETZKRANKHEIT (Ger.), n. Ve't's'kra'n'k-hit. See DREH-KRANKHEIT.

WHALE, n. Hwal. See BALÆNA.—**Greenland w., Right w.** See BALÆNA mysticetus.—**Spermaceti-w., Sperrm-w.** The *Physeter macrocephalus*. See also under CETACEUM and AMBRA grisea.—**W.-oil.** Ger., Fischthran. See OLEUM BALÆNE.

WHALEBONE, n. Hwal'bo'n. Fr., (barbe de) baleine. Ger., Fischbein. An elastic horny substance slender plates of which form a fringe on the upper jaw in the *Balenide*. [a, 48.]

WHEAL, n. Hwel. From A.-S., hwele, putrefaction. Gr., τριβός. Lat., pomphus, urtica. Ger., Quaddel, Blatter. 1 (obsolete). A pustule. 2. An elevation of the skin, usually of a circular duration, of a roundish, oval, linear, or irregular shape, pinkish in color except during the height of its development, when at the centre it becomes pale or blanched. It is attended with spastic contraction of the muscles in the skin, with circumscribed effusion of serum into the corium and rete mucosum, and causes violent itching. It may be produced by local injury, as from the stroke of a rod or whip or from the bite or sting of an insect, or it may occur as the symptom of urticaria. [G, 30.] Cf. URTICARIA and VIBEX.

WHEAT, n. Hwet. Gr., τριβός. Lat., triticum. Fr., froment. Ger., Weizen. The genus *Triticum*, especially *Triticum sativum*, also its grain. [a, 35.]—**Cow-w.** See the major list.—**Oil of w.** A purgative oil contained in the embryos of w., of beans, etc. [Therap. Gaz., Oct. 15, 1890, p. 632 (a, 50).]

WHEEZING, n. Hwez'i'2n. Fr., sifflement. Ger., Schnauf-en. A peculiar quality of disordered respiration, which is accomplished with difficulty, often with distress, and which is expressed with a harsh rasping sound; also the act of breathing in this manner. [D.]

WHELK, n. Hwe'lk. A.-S., hwyloca. 1. A wrinkle; an inequality of the surface; a protuberance; a pustule; a pustule or other lesion of rosacea; rosacea. [G, 30.] 2. A wheel, a wheel. 3. Acne.—**Chin-w.** Sycosis of the chin. [Green (a, 34).]—**Rosy w.** See ROSACEA.

WHEY, n. Hwa. Gr., ὀπὸς γάλακτος. Lat., serum lactis. Fr., sérum de lait, petit lait [Fr. Cod.]. Ger., Molken, Milchflüssigkeit. The watery part of milk remaining after the separation of the butter and casein. [K.]—**Alum w.** A preparation made by boiling 720 parts of cow's milk, adding gradually from 50 to 20 parts of powdered alum, removing the clot, and straining. [B, 119 (a, 38).]—**Ferrated w.** A preparation made by mixing 200 parts of milk with one part of iron acetate, or dissolving 3 parts of iron and ammonium citrate in 1,000 of w. [Proc. of the Am. Pharm. Assoc., xxvii (a, 14).]—**Mustard w.** See SERUM LACTIS sinapium.—**Vitriolated w.** A preparation made by adding 1 part of diluted sulphuric acid to 400 parts of milk. [Proc. of the Am. Pharm. Assoc., xxvii (a, 14).]—**Wine w.** A mixture of 4 parts of milk and 1 part of Rhine wine. [Proc. of the Am. Pharm. Assoc., xxvii (a, 14).]

WHIN, n. Hwi'n. The *Ulex europæus*. [a, 25.]—**Petty w.** 1. See ONONIS arvensis and ONONIS procurrens.—**W.-berry.** The *Vaccinium myrtillus*. [a, 35.]

WHISKEY, WHISKY, n's. Hwi'2sk'i'2. Irish, usquebach. Lat., spiritus (vinosus) frumenti. Fr., eau-de-vie de grain. Ger., W., Kornbranntwein. An alcoholic beverage obtained by the distillation of an infusion of fermented grain: a liquid of peculiar taste and odor, nearly colorless when freshly prepared, but acquiring by age a tint varying from light amber to a yellowish-brown. Sp. gr., 917 to 930. It contains from 44 to 55 per cent, by weight of alcohol. [B, 5.]—**Blue-grass w.** W. made in Kentucky, the "blue-grass State." [a, 34.]—**Bourbon w.** A corn w. originally made in Bourbon County, Kentucky. [a, 34.]—**Corn w.** Ger., Maiskornspiritus. W. manufactured from maize. [a, 48.]—**Irish w.** W. made in Ireland from malt and rye-grain. [a, 34.]—**Pot-still w.** New w. impregnated with fusel-oil. [a, 34.]—**Rye w.** W. made from rye. [a, 34.]—**Scotch w.** W. made in Scotland from malted grain, usually barley. The smoky flavor is due to the peat and turf fires used in drying the grain. [a, 34.]—**Wheat w.** W. made from wheat. [a, 34.]

WHISPER, n. Hwi'2sp'u'r. Lat., susurrus. Fr., chuchotement, murmure. Ger., Geflüster, Geisper. A sound uttered by the voice without sonant breath. [a, 48.]—**Cavernous w.** In auscultation, a sound heard with whispered words, low in pitch and blowing in quality. It indicates the existence of a cavity. [D, 26.]—**Exaggerated bronchial w.** In auscultation, the sound heard with whispered words. It is very intense, but neither so intense, nor so acute, nor so near the ear, as the sound heard in whispering bronchophony. [D, 26.]

WHISTLE, n. Hwi'2s'l. Fr., sifflet. Ger., Pfeife (2d def.). 1. A shrill sound formed by forcing air through a small opening. 2. An instrument producing such a sound. [a, 48.]—**Galton's w.** An instrument for testing the acuity of hearing with very high tones. [F.]

WHITBY, n. Hwi'2bi'2. A sea-bathing resort in Yorkshire, England. [L, 37 (a, 14).]

WHITE, adj. Hwit. Gr., λευκός. Lat., albus. Fr., blanc. Ger., weiss. Capable of reflecting light completely, of a color combining

in due proportion all the colors of the solar spectrum; as a n., a substance so characterized. [a. 48.] Cf. ALBUM and BLANC.
Dutch w. A mixture of one part of white lead (basic carbonate of lead) with 3 parts of barium sulphate. [B. 3.]—**Hamburg w.** A mixture of 1 part of white lead with 2 parts of barium sulphate. [B. 3.]—**Medullary w.** Of Flechsig, the white matter of the spinal cord. ["*Jour. of Nerv. and Ment. Dis.*," Oct., 1880, p. 573 (K).]—**Paris w.** Whiting. [B.]—**Pearl w.** See *Bismuth subnitrate*.—**Permanent w.** Fr., *blanc fixe*. Finely ground barium sulphate mixed with white lead; used as a white paint. [B. 3.5.]—**Venetian w.** A mixture of equal parts of white lead and barium sulphate. [B. 3.]

WHITES, n. pl. Hwits. A popular term for leucorrhœa.

WHITE SULPHUR SPRINGS, n. Hwit sulf'w'rs. 1. A place in Napa County, California, where there are hot sulphurous springs. 2. The name of several undeveloped sulphurous springs in Inyo, Amador, Sonoma, and Tehama Counties, California. 3. A place in Hall County, Georgia, where there are hot sulphurous springs. 4. A watering place in Meriwether County, Georgia, where there are hot sulphurous springs. 5. Mineral springs situated in Catahoula Parish, Louisiana. 6. Mineral springs situated at Calro, Greene County, New York. 7. A place in Catawba County, North Carolina, where there are sulphur springs. 8. Mineral springs situated in Delaware County, Ohio, containing a small amount of sulphur. [A. 363 (a. 21); Anderson (a. 14).] 9. See GREENBRIER W. S. S.

WHITE SWELLING, n. Hwit swe'll'ing. See *Fungous Arthritis*.—**Syphilitic w.** A form of hydrarthrosis encountered in tertiary syphilis. It appears as an infiltration of the synovial membrane and subsynovial tissue of a gummatous type, with a varying amount of effusion and a tendency to enlargement of the bones, but not especially to stiffening of the joint. [A. 520 (a. 29).]

WHITING, n. Hwit'ing. A purified calcium carbonate prepared from chalk by pulverization and decantation. [B.]

WHITLOW, n. Hwit'lo. See PARONYCHIA (1st def.).—**Melanosis w.** Melanotic w. Melanotic sarcoma having the appearance of a w. with a faint border of melanotic tissue. [Hutchinson. "*Am. Jour. of the Med. Sci.*," 1886, p. 470 (a. 34).]—**Morvan's w.** The anæsthetic-analgesic w. forming an initial symptom in Morvan's disease. ["*Brain*," 1891, p. 370 (a. 34).]

WHOOOP, n. Hup. The peculiar crowing sound which occurs during inspiration in a paroxysm of whooping-cough. [D.]

WHOOPIING-COUGH, n. Hup'ing'-ko'f. Lat., *pertussis*. Fr., *coqueluche*. Ger., *Keuchhusten*, *Stichkusten*. See PERTUSSIS.

WHORL, n. Hwo'rl. See VERTICIL and VORTEX.—**W. of the heart**. See VORTEX of the heart.

WHORLED, adj. Hwo'rl'd. See VERTICILLATE.

WHORTS, n. Hwo'ts. 1. The *Vaccinium myrtillus*. 2. The *Vaccinium vitis-idaea*. 3. A small blackberry. [a. 35.]

WICHELZOPF (Ger.), n. Vi'ch'z'ep'l-tso'pf. See PLICA polonica.

WICKE (Ger.), n. Vi'k'e'z. See OROBUS, ERVUM, and VICIA.

WICKEL (Ger.), n. Vi'k'e'l. See CINCINUS.

WICKELFLECHTE (Ger.), n. Vi'k'e'l'-fle'ch't'e'z. The *Usnea barbata* and similar lichens. [a. 35.]

WIDERHALLFORSCHER (Ger.), n. Ved'e'r'-ha'l'-forsh'e'r. See FLEXIMETER.

WIDERRATHEND (Ger.), adj. Ved'e'r'-ra't'-e'nd. See CONTRA-INDICANT.

WIDERRIST (Ger.), n. Ved'e'r'-ri'st. See GARROT (2d def.).

WIDERTREBER (Ger.), n. Ved'e'r'-strab-e'r. See ANTAGONIST.

WIDERTHON (Ger.), n. Ved'e'r'-ton. See POLYTRICHUM.

WIDERWILLE (Ger.), n. Ved'e'r'-vi'l'-le. See ANTIPATHY and HAPSORICIA.

WIEBELN (Ger.), n. Veb'e'ln. See STROPHULUS, URTICARIA, ROSEOLA, and IGNIS silvaticus.

WIEDERAUFLEBEND (Ger.), adj. Ved'e'r'-a'-uf-lab-e'nd. See REVIVISCENT.

WIEDERBELEBUNG (Ger.), n. Ved'e'r'-be'-lab-un'. See REVIVIFICATION.

WIEDERBILDUNG (Ger.), n. Ved'e'r'-bi'l'd-un'. See ANALASTY.

WIEDEREINBRINGUNG (Ger.), **WIEDEREINFÜGUNG** (Ger.), **WIEDEREINRENKUNG** (Ger.), **WIEDEREINSETZUNG** (Ger.), n's. Ved'e'r'-in-bri'g-un', -fu'g-un', -re'n'k-un', -ze'ts-un'. See REDUCTION (1st def.).

WIEDERERWECKUNG (Ger.), n. Ved'e'r'-e'r'-ve'k-un'. See RESUSCITATION.

WIEDERERZEUGUNG (Ger.), n. Ved'e'r'-e'r'-tso'ig-un'. Regeneration. [a. 48.]

WIEDERGEBUNG (Ger.), n. Ved'e'r'-ge'-naz-un'. Convalence. [L. 80.]

WIEDERHERSTELLEND (Ger.), adj. Ved'e'r'-he'r'-ste'l'-le'nd. See RESTORATIVE.

WIEDERIMPfung (Ger.), n. Ved'e'r'-i'mpf-un'. See REVACCINATION.

WIEDERKÄEN (Ger.), **WIEDERKÄUNG** (Ger.), n's. Ved'e'r'-koi-e'n', -un'. See RUMINATION and MERYCISM.

WIEDERKEHREND (Ger.), adj. Ved'e'r'-kar-e'nd. Recurrent, relapsing. [A. 521 (a. 45).]

WIEDERWACHSEN (Ger.), n. Ved'e'r'-va'ch'se'n. See ANAPHYSIS.

WIEKE (Ger.), n. Vek'e'z. See TENT.

WIESAU (Ger.), n. Ve'za'-u'. A place in the Palatinate where there are a sulphurous spring and a chalybeate one. [a. 14.]

WIESBADEN (Ger.), n. Ves'ba'd-e'n. A place in Hesse-Nassau where there are numerous saline springs. [a. 14.]

WIESENBAD (Ger.), n. Ve'ze'n-ba'd. A place in Zwickau, Saxony, where there is a warm alkaline and sulphurous spring.

WIESENKNOPF (Ger.), n. Vez'e'n-kno'pf. See SANGUISORBA.

WIESENKÖNIGIN (Ger.), n. Ve'ze'n-ku'n'-ig'-in. See SPREA ulmaria.

WIESENRAUTE (Ger.), n. Ve'ze'n-ra'-u't-e'z. The genus *Thalictrum*. [a. 35.]

WIKSTROEMIA (Lat.), n. f. Vi'k-stru'e'm'-i'a. Fr., *wikstroemie*. A genus of the *Thymelæaceæ*. [a. 35.]—**W. canescens**. Of Misner, a Japanese species, the source of a bibulous paper, called *usago*, recommended for making wafers and capsules. ["*Proc. of the Am. Pharm. Assoc.*," xxxviii, xxxix (a. 14).]—**W. indica**. A tree-like shrub growing in Australia and Polynesia. In the Fiji Islands the bark and leaves are used in coughs, and the bark is applied to ulcers. [a. 35.]

WILBRANDIA (Lat.), n. f. Vi'l'-bra'nd'-i'a. From *Wilbrand*, a German physician. Fr., *vilbrandie*. A genus of Brazilian curcubitaceous herbs. Several species have the evacuant properties of *Ecballium elaterium*. [a. 35.]—**W. hibiscoides**. A purgative species. [a. 35.]—**W. drastica**. A species used in gout and syphilis. [a. 35.]—**W. fluminensis**, **W. Riedel**, **W. scabra**, **W. verticillata**. A powerfully hydragogue species. [a. 35.]

WILBUR SPRINGS, n. Wi'lb'ur's. A place in Colusa County, California, where there are hot saline and sulphurous springs.

WILDBAD (Ger.), n. Vi'l'd'ba'd. 1. See *Akratotherme*. 2. A place in the Black Forest district, Württemberg, where there are warm saline and alkaline springs. 3. A place in Lower Franconia, Bavaria, where there is an earthy and saline spring. [a. 14.] 4. See GASTEIN. 5. See NEUMARKT (1st def.).

WILDECK, WILDEGG, n's. Vi'l'd'e'k', -e'g. A place in the canton of Aargau, Switzerland, where there is a saline spring containing iodine and bromine. [a. 14.]

WILDFIRE, n. Wild'fir. Ger., *Wildfeuer*. See ERYSIPELAS.
WILDEUCHE (Ger.), n. Vi'l'd'e'uch'e. A disease of cattle, swine, and horses, the chief pathological lesion of which is a multiple gangrenous broncho-pneumonia. Pectoral, septicemic (with cutaneous symptoms), and intestinal varieties are described. It is caused by a special micro-organism (see *BACILLUS of W.*). According to Hueppe, this disease is only a variety of the affection (*septicæmia hæmorrhagica*) of which other varieties constitute rabbit's septicæmia, Schweineuche, and chicken cholera. ["*Dtsch. med. Wchnschr.*," No. 14, 1887 (B).]

WILDGÜTEN (Ger.), n. Vi'l'd'gu't-e'n. A place in Waldeck, Germany, where there are gaseous, earthy, and chalybeate springs.

WILHELMSBAD (Ger.), n. Vi'l'he'lm's-ba'd. 1. A place in Prussian Hesse where there is a saline and chalybeate spring. 2. A place in Prussian Silesia where there is a sulphurous spring. 3. A place near Aschersleben, Prussian Saxony, where there are saline and chalybeate ferruginous springs. [a. 14.] 4. See DRAIBURG.

WILHOIT'S SODA SPRINGS, n. Wi'l'hoit's. A place in Clackamas County, Oregon, where there are gaseous, alkaline, and saline springs. [Anderson (a. 14).]

WILLKÜRLICH (Ger.), adj. Vi'l'ku'r'-li'ch. See VOLUNTARY.

WILLOW, n. Wi'l'o. See SALIX (1st def.).—**W.-bark**. See SALIX (2d def.).—**W.-weed**. 1. The *LYTHRUM salicaria*. 2. The *Polygonum lapathifolium* and other species of *Polygonum*. [a. 35.]

WILLOW-HERB, n. Wi'l'o'-u'rb. The genus *Epilobium*.

WIMMER (Ger.), n. Vi'm'me'r. A pustule, a pimple.

WIMMERN (Ger.), n. Vi'm'me'r'n. See VAGITUS.

WIMPEL (Ger.), n. Vi'm'pe'l. See VEXILLUM.

WIMPER (Ger.), n. Vi'm'p'e'r. An eyelash. See also CILIA (1st def.) and BARBICELS.—**Flimmerw'n**, **Schwingende W'n**. See CILIA (2d def.).—**W'wurzeln**. See INTRACELLULAR FIBRES.

WIMPERIG (Ger.), adj. Vi'm'p'e'r'-ig. See CILIATE.

WINCH, n. Wi'nc'h. The handle for turning any revolving apparatus, also the apparatus so turned. [a. 48.]—**Verona w.** A cog-wheel arrangement for tightening a ligature around a hæmorrhoid. [E.]

WIND, n. Wi'nd. Ger., *äveus*. Lat., *ventus*. Fr., *vent*. Ger., *W*. 1. Moving air, a current of air. [a. 48.] 2. See FLATUS.—**Electric w.** That form of current from a static electrical machine which, striking the person, causes a sensation as if a gentle breeze were blowing upon the part.

WIND (Ger.), n. Vi'nd. See WIND (Eng.).—**W'anhäufung**, **W'bach**. Flatulence. [L. 80.]—**W'blattern**. See VARICELLA.—**W'bruch**. See PHYSCOELE.—**W'darm**. See COLON.—**W'dorn**. See OSTEOPONGIOMA and ARTEROCACE.—**W'drehe**. Hemoglobinuria in horses. [L. 57 (a. 14).]—**W'geschwulst**. See FIBROMATOSIS.—**W'kropf**. See GOITRE.—**W'treibend**. See CARMINATIVE.

WINDE (Ger.), n. Vi'nd'e'. The genus *Convolvulus*. [a. 35.]

WINDEL (Ger.), n. Vi'nd'e'l. A swaddling cloth.

WINDEN (Ger.), n. Vi'nd'e'n. See TORSION.

WINDEND (Ger.), adj. Vi'nd'e'nd. See VOLUBLE.

WIND-FLOWER, n. Wi'nd'flu'e'-u'f'r. See ANEMONE.

WINDLASS, n. Wind'l's. Fr., *treuil*, *cabestan*. Ger., *Winde*, *Haspel*. Any apparatus for winding on an axle a cord that is

tightened by a weight or strain. [a, 48.]—**Spanish w.** See TOURNEQUIST.

WINDLE-STRAW, n. Wi'nd'l-strā'. The *Cynosurus cristatus*, *Triticum repens*, and other grasses. [a, 35.]

WINDOW, n. Wi'nd'ō. Gr. *ōpis*, *ōnē*. Lat. *fenestra*. Fr. *fenêtre*. Ger. *Fenster*. An opening in a wall for the admission of light. [a, 48.]—**Oval w.** See *FENESTRA OVALIS*.—**Round w.** See *FENESTRA ROTUNDA*.

WINDPIPE, n. Wi'nd'pīp. See TRACHEA.

WINDPOCKEN (Ger.), n. pl. Vi'nd'pōk'e-n. See VARICELLE *emphysematosa*.

WINDSUCHT (Ger.), n. Vi'nd'zucht'. See EMPHYSEMA and TYMPANITIS.—**Gebärmutterw.** See PYSIOMETRIA.—**Herzw.** See PNEUMOTACARDIA.

WINDUNG (Ger.), n. Vi'nd'un'. See CONVOLUTION and GYRUS.—**Äussere Riechw.** See *External olfactory convolution*.—**Äussere Schläfenw.** See *Subcollateral gyrus*.—**Augenw.** A frontal convolution. [a, 52] (a, 48).—**Beibende w.** [Kölker]. See *Secundäre w.*—**Bogenw.** See *gyrus fornicatus*.—**Broca'sche w.** See *Broca's convolution*.—**Centralw.** The convolutions around the fissure of Rolando. [I, 17 (K)].—**Darmw.** en. See *Intestinal convolutions*.—**Dritte Hinterhauptw.** See *Inferior occipital convolution*.—**Dritte Scheitelbogenw.** See *Middle occipital convolution*.—**Erste Scheitellappennw.** See *Supramarginal convolution*.—**Dritte Schläfenw.** See *Inferior temporal convolution*.—**Dritte Stirnw.** See *Inferior frontal convolution*.—**Dritte untere Hinterlappennw.** See *Inferior occipital convolution*.—**Erste Hinterhauptw.** See *Superior occipital convolution*.—**Erste obere Hinterhauptw.** See *Cuneus* (2d def.).—**Erste obere Schläfenw.** See *Superior temporo-sphenoidal convolution*.—**Erste Scheitellappennw.** See *Superior temporo-sphenoidal convolution*.—**Erste Scheitelbogenw.** See *Supramarginal convolution*.—**Erste Scheitelw.** See *Superior parietal convolution*.—**Erste Schläfenw.** See *Superior parietal convolution* and *Inframarginal convolution*.—**Erste Stirnw.** See *Superior frontal convolution*.—**Fünfte Scheitelbogenw.** [Bischoff]. See *Gyrus isthmus*.—**Gehirnw.** *Gehirnw.* A cerebral gyrus.—**Hakenw.** *Hakenzüge*. See *Uncinate convolution*.—**Hinter Centralw.** See *Ascending parietal convolution*.—**Hinter innere Hinterhauptw.** See *Subcalcarine gyrus*.—**Hinter Orbitalw.** See *Posterior orbital convolution*.—**Hinter Scheitelbogenw.** See *Middle occipital convolution*.—**Hinterhauptw.** See *Occipito temporal convolution*.—**Hirnw.** en. See *Cerebral convolution*.—**Innere obere Schläfenw.** See *Superior parietal convolution*.—**Innere obere Schläfenw.** See *Uncinate gyrus*.—**Innere Riechw.** See *Internal olfactory convolution*.—**Inselw.** See *Insular convolution*.—**Klappdeckelw.** en. See *Gyrus brevis*.—**Kleinhirnw.** en. The gyri of the cerebellum. [L.]—**Marginalw.** See *Marginal convolution*.—**Mediale erste Übergangsw.** See *First annectant convolution*.—**Mittlere Hinterhauptw.** See *Middle occipital convolution*.—**Mittlere Schläfenw.** See *Middle temporo-sphenoidal convolution*.—**Mittlere Stirnw.** See *Middle frontal convolution*.—**Obere Hinterhauptw.** See *Superior occipital convolution*.—**Obere innere Scheitelbogenw.** See *Paroccipital gyrus*.—**Obere (innere) Scheitelw.** See *Superior parietal convolution*.—**Obere Scheitelbeinlappennw.** See *Superior temporo-sphenoidal convolution*.—**Obere Scheitelw.** See *Superior parietal convolution*.—**Obere Schläfenw.** See *Superior temporo-sphenoidal convolution*.—**Obere Stirnw.** See *Superior frontal convolution*.—**Occipitalw.** The convolutions of the occipital lobe. [I, 6].—**Olivenkernw.** en. The convolutions of the corpus dentatum olive. [I, 17 (K)].—**Orbitalw.** en. See *Orbital convolutions*.—**Primitive w.** One of the convolutions of the embryonic brain which result from an actual folding of the cortex cerebri. [I, 9 (K)].—**Quere Schläfenw.** en. 1. Of Heschl, certain small transverse gyri on the upper surface of the temporo-sphenoidal lobe. [I, 17 (K)]. 2. See *Gyrus temporales transversi*.—**Retrocetralw.** See *Postcentral gyrus*.—**Riechw.** w. See *Olfactory lobe*.—**Ringw.** en. See *Primitive gyri*.—**Schläfenw.** A parietal convolution. [I, 6 (K)].—**Secundäre w.** Of Kölliker, a convolution of the embryonic brain which is not formed originally, but results from a subsequent thickening of the hemisphere. [I, 9 (K)].—**Spindelw.** See *Subcollateral gyrus*.—**Superciliäre w.** See *Inferior frontal convolution*.—**Übergangsw.** en. See *Annectant convolutions*.—**Untere Hinterhauptw.** See *Gyrus occipitalis inferior*.—**Untere Scheitelbogenw.** [Bischoff]. See *Gyrus isthmus*.—**Untere Schläfenw.** See *Inferior temporal convolution*.—**Untere Stirnw.** See *Inferior frontal convolution*.—**Vordere Centralw.** See *Ascending frontal convolution*.—**Vordere Orbitalw.** See *Anterior orbital convolution*.—**Vordere Scheitelbogenw.** See *Supramarginal convolution*.—**Vordere Schläfenw.** See *First temporal convolution*.—**W'sblättchen.** One of the laminae of a cerebral convolution. [I, 11 (K)].—**W'szug.** Of Schwabe, a term nearly synonymous with *W*. [I, 17 (K)].—**Zungenw.** See *Subcalcarine gyrus*.—**Zweite Hinterhauptw.** See *Middle occipital convolution*.—**Zweite (mittlere) Schläfenw.** See *Middle temporo-sphenoidal convolution*.—**Zweite Stirnw.** See *Second frontal convolution*.—**Zwickelw.** See *Cuneus* (2d def.).

WINDWASSERBRUCH (Ger.), n. Vi'nd'wa'ss'er-bruch'. Hydrophrysocela. [a, 14.]

WINDZAPFENPIESS (Ger.), n. Vi'nd'tsa'pf'e-n-spes. See TROCAR.

WINE, n. Win. A-S. *win*. Gr. *ōnos*. Lat. *vinum*. Fr. *vin*. Ger. *Wein*. 1. The fermented juice of the grape, also of currants, etc. 2. W. holding a medicinal substance in solution. See also VINUM and VIN.—**Antimonial w.** See *W. of ANTIMONY*.

—**Barley w.** Lat. *vinum hordeaceum*. Beer. [B, 59.]—**Burgundy w.** Red or white w. from Burgundy in France. It is one of the strongest of the light wines. [a, 38.]—**Camphorated w.** See VINUM CAMPHORATUM.—**Champagne w.** See CHAMPAGNE.—**Concrete oil of w.** See ETHERAL.—**Heavy oil of w.** See ETHERAL OIL (1st def.).—**Heavy w.** Ger. *schwere Weine*. W's containing more than 12 per cent. by weight of alcohol, such as sherry, port, and Madeira. [B, 9 (a, 38).]—**High w's.** Commercial ethyl alcohol.—**Light oil of w.** A mixture of ether and ethyl alcohol; a light-yellow oily liquid of aromatic odor, derived from heavy oil of wine by heating with water or alkalies. [B, 5.]—**Light w's.** W's containing less than 12 per cent. by weight of alcohol. [a, 38.] Rhine w., Sauterne, claret, or Burgundy. [B, 9 (a, 38).]—**Low w.** The water in crude turpentine. [Proc. of the Am. Pharm. Assoc., xxix (a, 39).]—**Low w's.** See *Acqua vite* (5th def.).—**Ma-deira w.** A strong w. from the island of Madeira having an aromatic, nut-like taste. It contains about 15 per cent. of alcohol. [a, 38.]—**Malaga w.** A sweet Spanish w. from the region of Malaga, containing about 34 per cent. of alcohol. [a, 38.]—**Moselle w.** See KEIFER.—**Moselle w.** W. from the district along the River Moselle in Germany, containing about 12 per cent. by volume of alcohol. [a, 38.]—**Mulled w.** Ger. *Eierwein*. W. to which eggs and spices have been added, and the w. then heated.—**Oil of w.** See ETHERAL OIL (1st def.).—**Light oil of w.**—**Port w.** Ger. *Portwein*. A red or sometimes, white w. from Oporto in Portugal, containing from 15 to nearly 18 per cent. of alcohol. [a, 38.]—**Raisin w.** W. consisting mostly of a fermented infusion of Corinth raisins, but partly of the fermented juice of fresh grapes, with the addition of sugar and tartaric acid.—**Sherry w.** A white or brown w. from the neighborhood of Xeres, in Spain, containing from 16 to 18 per cent. of alcohol. The Br. Ph. demands 17 per cent. [B, 5, 35 (a, 35).]—**Spirit of w.** Lat. *spiritus vini*. Fr. *esprit de vin*. Ger. *Weingeist*. See ETHERAL.—**White w.** See VINUM ALBUM.—**Winess.** See OINOMANIA.

WING, n. Wi'ng. Gr. *πτερόν*, *πτερεῖς*. Lat. *ala*. Fr. *aile*. Ger. *Flügel*. 1. The fore-limb by means of which birds, bats, etc., are enabled to fly. 2. Any structure or process resembling a w. or occupying some analogous position. [a, 48.]—**Bastard w.** See ALULA.—**Cerato-hyal w's** (of the hyoid bone). The lesser cornua of that bone.—**False w.** See ALULA.—**Greater w's** of the sphenoid bone. See ALA magna ossis sphenoidalis.—**Lesser (or orbital) w's** of the sphenoid bone. See ALA parva ossis sphenoidalis.—**Temporal w's** of the sphenoid bone. See ALA magna ossis sphenoidalis.—**W's of Ingrassias.** See ALA parva ossis sphenoidalis.—**W's of the sacrum.** Ger. *Kreuzbeinflügel*. See ALA of the sacrum.

WINGED, adj. Wi'ng'd. See ALATE.

WINKEL (Ger.), n. Wi'ng'k'el. See ANGLE.—**Abgestumpfter w.** See ANGULUS mastoideus.—**Augenw.** See ANGULUS ocularis.—**Gesichtsw.** See FACIAL ANGLE.—**Hinterhauptsw.** See OCCIPITAL ANGLE.—**Insertionsw.** des Nabelstranges. The angle formed by the umbilical cord with the surface of the placenta at its insertion. [a, 19.]—**Kieferw.** See ANGLE of the lower jaw.—**Kopfw.** See CEPHALIC ANGLES.—**Louis'scher w.** See ANGULUS Ludovici.—**Mundw.** See ANGULUS oris.—**Rippenw.** See ANGLE of a rib.—**Sattelw.** See SPHENOIDAL ANGLE.—**Schädelw.** See CRANIAL ANGLES.—**Schamw.** See ANGLE of the pubes.—**Schielw.** See SQUINTING ANGLE.—**Sehw.** See ANGLE of the optic.—**Sternalw.** See ANGULUS Ludovici.—**Unterkieferw.** See ANGLE of the lower jaw.—**Vorhofsw.** See VESTIBULAR ANGLE.—**W'ig.** 1. Angulate. 2. W'ig. [a, 35.]—**W'messer.** See GONIOMETER.—**W'ständig.** See AXILLARY.

WINKING, n. Wi'ng'k'el'n. Gr. *σκαρδαγγυγμός*. Lat. *nictatio*. See NICTATION.

WINTERA (Lat.), n. f. Wi'nt'er-a. 1. The genus *Drims*. The *Winteraceae* are the *Illiciaceae*; the *Winteraceae* (Fr. *winteriées*; Ger. *Winteren*) of R. Brown are an order of plants, consisting of *Tasmannia*, *Illicium*, and *Wintera*; of Reichenbach, a section of the *Illiciaceae*, consisting of *Drims* and *Tamus*; of Bentham and Hooker, a tribe of the *Magnoliaceae*, comprising *Drims* and *Illicium*. 2. Of the U. S. Ph., 1860, *Winter's bark*. [a, 35.]—**aromatica.** The *Drims Winteri*. [a, 35.]—**w. cortex** [Belg. Ph.]. Fr. *winter (écorce)* [Fr. Cod.]. Sp. *cortezta winterana* [Sp. Ph.]. The bark of *Drims Winteri* (var. *gratensis* [Fr. Cod.]). [B, 95 (a, 38).]

WINTERANA (Lat.), n. f. Wi'nt'ur-and(an')a. The genus *Camella*. The *Winteraceae* are the *Winteraceae* (1st def.). [a, 35.]—**W. canella.** See CANELLA alba.

WINTERBERRY, n. Wi'nt'ur-be-er-ri. See PRINOS and ILEX verticillata.

WINTERBEULE (Ger.), n. Vi'nt'er-boil-e. See CHILBLAIN.

WINTERCUREORT (Ger.), n. Vi'nt'er-kur-ort. A climatic health resort for the cold season. [L, 57 (a, 14).]

WINTERGREEN, n. Wi'nt'ur-gren. Ger. *Wintergrün*. 1. The genus *Pyrola* (including *Chimaphila*). 2. The *Gaultheria procumbens*. 3. The genus *Vinca*. [a, 35.]—**Common w.** The *Pyrola minor*. [a, 35.]—**Oil of w.** Lat. *oleum gaultheriae* [U. S. Ph.]. Fr. *essence de w.* [Fr. Cod.]. Ger. *Wintergrünöl*. Oil of gaultheria (or teaberry), essence of w.; a sweet, very fragrant oil obtained from *Gaultheria procumbens*, also from other species of *Gaultheria*, from *Betula alba*, etc. It is nearly colorless when freshly prepared, has the sp. gr. of 1.173, dissolves readily in alcohol, and boils at 211° C. When pure it consists of 90 per cent. of methyl salicylate and 10 per cent. of gaultheriène. It resembles salicylic acid in physiological action. An artificial oil is prepared having the sp. gr. of 1.173 and boiling at 203° C. It contains apparently a small proportion of methyl ether. [a, 35.]

WINTERSRINDE (Ger.), n. Vi'nt'ers-rind-e. See *Winter's BARK*.—**Falsche w.** See CORTEX *winteranus spurius*.

WINZIG (Ger.), adj. $V^{12}nts^{12}g$. Diminutive, small, dwarfed. [a, 35.]

WIPFEL (Ger.), n. $V^{12}p^{e1}$. See **CACUMEN**.—**W'blatt** (Burdach). See **FOLIUM CACUMINIS**.

WIPFELD (Ger.), n. $V^{12}p^{e1}d$. A place in Lower Franconia where there are springs containing calcium sulphate. [a, 14.]

WIPPE (Ger.), n. $V^{12}p^{e2}$. See **ARCHEA** (2d def.).

WIRBEL (Ger.), n. Verb^{e1}. See **VERTEBRAL** and **VORTEX**.—**Bauchw'**. See **LUMBAR VERTEBRÆ**.—**Beugew'**. The lowermost of the cervical vertebrae. [L, 31.]—**Brustw'**. See **DORSAL VERTEBRÆ**.—**Falsche W.** See **FALSA VERTEBRÆ**.—**Halbw'**. A cervical vertebra. [L.]—**Herzw'**. See **VORTEX of the heart**.—**Hinterhauptw'**. See **OCIPITAL VERTEBRÆ**.—**Knotpelw'**. A cartilaginous vertebra. [L.]—**Kopfw'**. See **CEPHALIC VERTEBRÆ**.—**Kreuzbeinw'**, **Kreuzw'**. See **SACRAL VERTEBRÆ**.—**Lendenw'**, **Lumbalw'**. See **LUMBAR VERTEBRÆ**.—**Nasenw'**. A nasal vertebra.—**Rückenw'**. A dorsal vertebra. [L.]—**Schädelw'**. See **CRANIAL VERTEBRÆ**.—**Scheitelw'**. See **PARIETAL VERTEBRÆ**.—**Steissbeinw'**, **Steissw'**. See **OCYGGAL VERTEBRÆ**.—**Stirn w'**. See **FRONTAL VERTEBRÆ**.—**Unächte W.**, **Unvollkommene W.** See **FALSA VERTEBRÆ**.—**Urw'**. A primitive vertebra. [a, 17.]—**Walre W.** See **TRUE VERTEBRÆ**.—**W'artig**. See **VERTEBRATE**.—**W'chorde**. See **NOTOCHORD**.—**W'dorn**. See **SPINOUS PROCESS**.—**W'doster**. The *Clinopodium vulgare*. [a, 35.]—**W'entzündung**. See **SPONDYLITIS**.—**W'furche**. See **MEDULLARY GROOVE**.—**W'gefässe**. See **VENÆ VORTICOSÆ**.—**W'gicht**. See **SPONDYLITIS DEFORMANS**.—**W'glitt**. See **SPONDYLOLISTHESIS**.—**W'ig**. See **VERTEBRAL**.—**W'körper**. The body of a vertebra. [L, 31.]—**W'krankheit**, **W'leiden**. See **SPONDYLOPATHIA**.—**W'schmerz**. See **RHACHODYNIA**.—**W'spalte**. See **SPINA bifida**.—**W'strang**. See **SPINAL CORD**.—**W'synchron**. The articulation between the bodies of vertebrae. [L, 31.]—**W'thier**. A vertebrae.—**W'verteuerung**. See **SPONDYLOPSYOSIS**.—**Zahnw'**. See **AXIS** (8th def.).

WIRBELBOGEN (Ger.), n. Verb^{e1}l-bog-e²n. See **NEURAL ARCH** (1st def.).—**Häutiger W.** The membrana reuniens superior.

WIRBELSÄULE (Ger.), n. Verb^{e1}l-zoll-e². See **VERTEBRAL COLUMN**.—**Halbw'**. The cervical portion of the vertebral column. [a, 29.]—**Häutige W.** A structure formed in the embryo by the coalescence of the protovertebrae so as to shut in the notochord and the cord behind. [A, 8.]

WIRE-BREECHES, n. Wir-brī²ch'e²z. See **CUIRASS** (2d def.).

WIRING, n. Wir¹in². Fastening by means of wire. [a, 48.]—**Pin-w.** A method of fixing the fragments of a broken bone (especially the patella) by means of pins inserted above and below the fracture. [“N. Y. Med. Jour.” Aug. 9, 1890, p. 159 (a, 50).]

WIRKEND (Ger.), adj. Verk^{e1}nd. Active, operative.

WIRKLICH (Ger.), adj. Verk¹līch². See **ACTUAL**.

WIRKSAM (Ger.), adj. Verk²za²m. See **WIRKEND**.

WIRKUNG (Ger.), n. Verk¹un². See **ACTION**.—**Unzusammenw'**. See **INCO-ORDINATION**.

WIRTEL (Ger.), n. Vert^{e1}l. See **VERTICIL**.—**Halbw'**. A dimidiated verticil. [a, 35.]—**W'ig**, **W'ständig**. See **VERTICILLATE**.

WIRTH (Ger.), n. Vert. See **HOSR**.

WISDOM-OF-SURGEONS, n. Wīz²/du²m-o²v-su²rj²u²nz. A translation of an old Latin name (*sophia chirurgorum*) of *Sisymbrium sophia*. [a, 35.]

WISMUT (Ger.), **WISMUTH** (Ger.), n's. Vī²s²mut. Written also *Wismut* and *Wismuth*. See **BISMUTH**.—**Baldriansaures W.** See **BISMUTH VALERIANATE**.—**Graues Sauerw'**. See **BISMUTH DIOXIDE**.—**Milchsäures W.** See **BISMUTH LACTATE**.—**Salicylsäures W.** See **BISMUTH SALICYLATE**.—**Schwefelsäures W.** See **BISMUTH SULPHATE**.—**W'annuoncitrat**. See **BISMUTH AND AMMONIUM CITRATE**.—**W'chlorid**. See **BISMUTH TRICHLORIDE**.—**W'chlorür**. See **BISMUTH DICHLORIDE**.—**W'halboxyd**. See **BISMUTH DIOXIDE**.—**W'jodid**. See **BISMUTH TRIIODIDE**.—**W'oxydul**. See **BISMUTH DIOXIDE**.—**W'säure**. Bismuthic acid. [A, 324.]—**W'weiss**. See **BISMUTH SUBNITRATE**.

WISMUTOXYD (Ger.), n. Vī²s²mut-o²x-u²d. See **BISMUTH TRIOXIDE**.—**Citronensaures W'ammionum**. See **BISMUTH AND AMMONIUM CITRATE**.—**Gerbssaures W.** See **BISMUTH TANNATE**.—**Graues W.** See **BISMUTH DIOXIDE**.—**Kieselsaures W.** See **BISMUTH SILICATE**.—**Kohlensaures W.** See **BISMUTH CARBONATE**.—**Salpetersaures W.** See **BISMUTH NITRATE**.—**Schwefelsaures W.** See **BISMUTH SULPHATE**.—**W'hydrat**. See **BISMUTH TRIHYDROXIDE**.

WISPELN (Ger.), n. Vī²sp²e²ln. See **BLESITAS**.

WISSMUT (Ger.), **WISSMUTH** (Ger.), n's. Vī²s²mut. See **WISMUT**.

WISTARIA (Ger.), **WISTERIA** (Lat.), n's f. Wī²st-ar(e²p²)-ī²-a².—**er(ar)²i²a²**. From *Wistar*, an American anatomist. Fr., *Wistérie*. A genus of leguminous shrubs of the *Galegeæ*. The *Wisterieæ* are (Endlicher) a subtribe of the *Phaseoleæ*, or (Reichenbach) a section of the *Glycineæ*. [a, 35.]—**W. chinensis**, **W. sinensis**. The fiji; a Chinese species. The flowers are probably distilled for their perfume. The bark contains wistarin and a resin which appears to be toxic.

WISTARIN, n. Wī²st/a²r-ī²n. A poisonous crystallizable glucoside obtained from the bark of *Wistaria chinensis*. [“Proc. of the Am. Pharm. Assoc.” xxxv (a, 14).]

WITCH-WOOD, n. Wī²ch²wu²d. See **EUONYMUS EUROPEUS**, **PYRUS ACUPARIA**, and **ULMUS MONTANA**.

WITHANIA (Lat.), n. f. Wī²th-an(a²n)²i²a². Fr., *withanie*. A genus of solanaceous shrubs. [a, 35.]—**W. coagulans**. Vegetable rennet; a shrub common in Afghanistan and northern India. The dried berries, the *puneerbund* (cheese-maker) of the Afghans, con-

tain a ferment closely resembling animal rennet, and are used for coagulating milk. The active principle may be extracted from the seeds. The fruits, when fresh, are emetic, and, dried, are used for dyspepsia and flatulent colic, either alone or combined with the tonic leaves and twigs of *Rhazya stricta*. The bitter leaves are anthelmintic. The plant is also used in veterinary medicine. [a, 35.]—**W. frutescens**. A species referred by some authors to *Physalis*. In Spain the seeds are used as beads. [a, 35.]—**W. somnifera**. The winter-cherry of India, probably the *στυάχων ὑντορίκον* of Dioscorides. The root and bitter leaves are powerfully narcotic and have been used as a hypnotic in alcoholism and emphysematous dyspnea. In India the leaves are used as an anthelmintic and as an application to carbuncles; the root is used as a deobstruent, diuretic, and alexipharmac and as an application in obstinate ulcers and rheumatic swellings. The fruits are used as a diuretic and to coagulate milk. [a, 35.]

WITHE, n. Wī²th. A flexible branch or twig used for binding. **WITHERS**, n. pl. Wī²th²u²r². The ridge on a horse's back extending from the root of the neck to between the shoulder blades; formed by the prominent spinous processes of the first eight or ten dorsal vertebrae. [L; a, 34.]

WITHER-WRUNG, adj. Wī²th²u²r-ru²a²n². Of the veterinarians, injured in the withers. [a, 34.]

WITHY, n. Wī²th²i². The *Salix viminalis* and other species of *Salix*. [a, 35.]

WITLOOF, n. Wī²l²huf. A large-rooted variety of *Cichorium intybus*. [a, 35.]

WITTEKIND (Ger.), n. Vī²t²te²-ki²nd. A place in Prussian Saxony where there is a saline spring containing bromine and iodine. [L, 49, 57, 135 (a, 14).]

WITTER'S MINERAL SPRINGS, n. Wī²t²u²r². A place in Lake County, California, where there are gaseous alkaline, chalybeate, and sulphurous springs. [Anderson (a, 14).]

WITTENKIND (Ger.), n. Vī²t²ve²n-ki²nd. A posthumous child. [a, 48.]

WOAD, n. Wod. The *Isatis tinctoria*; also the *Reseda luteola* and *Genista tinctoria*. [a, 35.]—**Wild w.** The *Reseda luteola*. [a, 35.]—**W-waxen**. See **GENISTA TINCTORIA**.

WOCHENABGANG (Ger.), n. Voch²e²n-a²b-ga²n². See **LOCHIA**.

WOCHENBETT (Ger.), n. Voch²e²n-be²t. The puerperium. —**W'reinigung**. See **LOCHIA**.

WOCHENFIEBER (Ger.), n. Voch²e²n-feb-e²r. See **PUERPERAL FEVER**.

WOCHENFLUSS (Ger.), **WOCHENREINIGUNG** (Ger.), n's. Voch²e²n-flus, -rin-i²g-un². See **LOCHIA**.

WOCHENTUPEL (Ger.), n. Voch²e²n-tu²p-el². See **MUMPS**.

WÖCHNERIN (Ger.), n. Vu²ch²ne²r-ī²n. A lying-in woman.—**Abgang der W'nen**. See **LOCHIA**.

WOHLBELEIBTHEIT (Ger.), n. Vol²be²-libt-hit. See **COPULENCE**.

WOHLGEMUTH (Ger.), n. Vol²ge²mu²t. The *Origanum vulgare*. [a, 35.]

WOHLVERLEI (Ger.), **WOHLVERLEIH** (Ger.), n's. Vol²fe²r-li. See **ARNICA**.—**Berg-W.** See **ARNICA MONTANA**.

WÖLBUNG (Ger.), n. Vu²l²b-un². See **VAULT**.—**W'smesser**. See **CYRTOMETER**.

WOLD, n. Wo²ld. Written also *wolds* and *woulds*. The *Reseda luteola*. [a, 35.] Cf. **WOAD**.

WOLF, n. Wu²lf. Gr., *λύκος*. Lat., *lupus*. Fr., *loup*. Ger., *W*. See **CANIS LUPUS**.—**W's-jaw**. See **CLEFT PALATE**.

WOLF (Ger.), n. Vo²lf. See **ECTHILIMMA** and **PARATRIMMA**.—**W'geschwulst**. See **ATHEROMA** (1st def.).

WOLFACH (Ger.), n. Vo²l²fa²ch². A place in Baden, Germany, where there is a chalybeate spring. [L, 49, 135 (a, 14).]

WOLFFIAN, adj. Wu²lf²i²a²n. Investigated by or named from K. F. Wolff, a German anatomist. [a, 48.]

WOLFRAM (Ger.), n. Vo²l²f²ra²m. See **TUNGSTEN**.

WOLFSBANE, n. Wu²lf²z-ban. 1. The genus *Aconitum*, especially *Aconitum lycoctonum* and *Aconitum napellus*. 2. The *Arnica montana*. 3. The *Veratrum viride*. [a, 35.]

WOLFSBAST (Ger.), n. Vo²l²fs-ba²st. See **DAPHNE MEZEREUM**.

WOLFSBOHNE (Ger.), n. Vo²l²fs-bon-e². See **LUPINUS** (2d def.).

WOLFSFUSS (Ger.), n. Vo²l²fs²fus. The genus *Lycopodium*.

WOLFSKIRSCH (Ger.), n. Vo²l²fs²kersch-e². The *Atropa belladonna*. [a, 35.]

WOLFSKRAUT (Ger.), n. Vo²l²fs²kra²u²t. 1. The *Delphinium staphisagria*. 2. The genus *Aconitum*. [a, 14, 35.]

WOLFSMILCH (Ger.), n. Vo²l²fs²mi²lch². The genus *Euphorbia*. [a, 35.]

WOLFSRACHEN (Ger.), n. Vo²l²fs²ra²ch²e²n. See **CLEFT PALATE**.

WOLFSTODSTURMHUT (Ger.), n. Vo²l²fs²tod-sturm-hut. See **ACONITUM LYCOCTONUM**.

WOLFSTRAPP (Ger.), n. Vo²l²fs²tra²p. See **LEONURUS**.

WOLFSWURZEL (Ger.), n. Vo²l²fs²wur²ts-e². 1. The *Actaea spicata*. [a, 35.] 2. The genus *Aconitum*. [a, 35.]

WÖLKCHEN (Ger.), n. Vu²l²k²ch²e²n. See **MACULA CORNEÆ** and **ENECORNEÆ**.—**Hornhautw'**. See **MACULA CORNEÆ**.

WOLKE (Ger.), n. Vo'l'k'e². See NEBULA (1st def.).

WOLKENSTEIN (Ger.), n. Vo'l'k'e²-stin. 1. A place in Zwickau, Saxony, where there are hot sulphurous springs. 2. A place in Styria, Austria, where there are sulphurous springs. [a, 14.]

WOLKIG (Ger.), adj. Vo'l'k'ig. See NEBULOSE.

WOLLBAUM (Ger.), n. Vo'l'ba²-u²m. See ERIODENDRON and BOMBAX (2d def.).

WOLLE (Ger.), n. Vo'l'e². See WOOL.—**Haarw.** See DOWN (1st def.).—**Holz-w.** See FIR-WOOL.—**Hundsw.** See APOCYNUM.—**Schleissbaumw.** See PYROXYLIN.—**Seebaumw.** See ADENOS.

WOLLFETT (Ger.), n. Vo'l'fe². See CERYPUM and SUNT, and cf. LANOLIN.

WOLLGRAS (Ger.), n. Vo'l'gra²s. The genus *Eriophorum*. [a, 35.]

WOLLIG (Ger.), adj. Vo'l'lig. See LANATE and LANEUS (1st def.).

WOLLKRAUT (Ger.), n. Vo'l'kra²-u²t. The genus *Verbascum*. [a, 35.]

WOLLUST (Ger.), n. Vo'l'lust. Sensuality, lust, voluptuousness. [a, 14.]—**W'seuche.** Epidemic syphilis. [a, 34.]

WOLRAM (Ger.), n. Vo'l'ra²m. Spermaceti. [a, 35.]

WOMB, n. Wum. See UTERUS.—**W.-passage.** See VAGINA.—**W.-stono.** See UTERINE CALCULUS.

WOODA, n. In the Orient, a sort of diarrhoea. [L, 41 (a, 14).]

WOOD, n. Wu'd. See LIGNUM.—**Amboyna w.** Ger. *Amboinholz*. The w. of a sort of palm growing in Amboyna. [B, 49.]—**Anacahuite w.** Lat. *lignum anacahuite* [Gr. Ph.]. Ger. *Anacahuiteholz*. A Mexican wood derived from *Cordia Boissieri*, formerly used in pulmonary phthisis. [a, 35.]—**Bitter-w.** See the major list and *SHARBA*.—**Bukku w.** See under *CASSIA*.—**Heart-w.** Lat. *duramen*. Ger. *Herzholz*. The older, harder, central portion of an exogenous stem, taking no important part in the vital processes of the plant. It differs usually from sap-w. in color. The term *duramen* is applied by some authors only to heart-w. which has become very dense from peculiar infiltrations. [a, 35.]—**Mountain w.** See *Lignum asbestos*.—**Nicaragua-w.** See BRAZIL-W.—**Nephritic w.** See LIGNUM NEPHRITICUM.—**Peach w.** Pernambuco w. See BRAZIL-W.—**Sap-w.** The exterior zone of uncolored active cells forming the newer and softer w. of an exogenous stem. [a, 35.]—**W. alcohol.** W. naphtha, W. spirit. See METHYL ALCOHOL.

WOODBIND, WOODBINE, n's. Wu'd'bind, -bin. The *Lonicera periclymenum* and other species of *Lonicera*.—**American w.** See *LONICERA GRATA* and *AMPELOPSIS QUINQUEFOLIA*.

WOODHALL SPA, n. Wu'd'hal'. A place in Yorkshire, England, where there is a saline spring. [L, 49, 57 (a, 14).]

WOOD-LILY, n. Wu'd'li²-l². The *Pyrola minor*. [a, 35.]—**American w.-l.** The genus *Trillium*. [a, 35.]

WOODRUFF, n. Wu'd'ru²f. The *Asperula odorata* and other species of *Asperula*. [a, 35.]

WOODRUSH, n. Wu'd'ru²sh. The genus *Luzula*. [a, 35.]

WOOL, n. Wu'l. Gr. *ῥῆμα*. Lat. *lana*. Ger. *Wolle*. The peculiar outgrowth from the skin of the sheep, corresponding to the hair of other animals. [a, 48.] Used for vaginal tampons and for other means of making pressure.—**Antiseptic w.** Cleaned w. that is impregnated with some antiseptic substance. [a, 34.]—**Holmgren's w's.** Small skeins of w., of all colors, for testing the color-sense. Three of them are selected as special tests: (1) pure green mixed with white, (2) a pale shade of purple, and (3) a bright red. The confusion colors in the heap of worsteds are of all shades and colors. [F.]—**Inhalation of fir-w.-oil.** See *Vapor olei pini silvestris*.—**Pelt-w.** See LAINE MORAINÉ.—**Wood-w.** Finely ground wood; a delicately fibred, soft substance used as an absorbent dressing for wounds. [E.]—**W.-fat.** See CERYPUM and LANOLIN.

WOORALI, WOORARA, WOORARI, n's. Wu-ra²le, -ra², -re. See CURARE.

WORM, n. Wu'r'm. Gr. *ἄλυσ*, *ἄλυσ*. Lat. *vermis*. Fr. *vers*. Ger. *Wurm*. 1. A small, limbless, creeping animal, such as an annelid or helminth. [a, 48.] 2. The median portion of the cerebellum, as distinguished from its hemispheres. [A, 5.]—**Bladder-w.** See CYSTICERCUS.—**Bot-w.** See OXYURIS VERMICULARIS.—**Earthw.** See the major list.—**Flesh-w.** See COMEDO.—**Gourd-w.** An old term for a distoma. [L.]—**Guinea-w.** See *FIARIA MEDINENSIS*.—**Hair-headed w.** See TRICHOCEPHALUS.—**Hooked-w's.** See ACANTHOCEPHALA.—**Long round w.** See ASCARIS LUMBRICOIDES.—**Long thread-w.** See TRICHOCEPHALUS dispar.—**Pallsade w.** See STRONGYLUS ARMATUS, EUSTRONGYLUS gigas, and DOCHMIUS DUODENALIS.—**Pin-w.** See OXYURIS VERMICULARIS.—**Round w.** See ASCARIS LUMBRICOIDES.—**Thread-w.** Any w. of thread-like appearance, especially *Oxyuris vermicularis*. [a, 48.]—**Wheal-w.** See LEPTUS AUTUMNALIS and SARCOPEUS scabiei.

WORMIAN, adj. Wu'r'm'i²-n. Named from O. Wurm, a Danish physician (see W. BONES). [a, 48.]

WORMSEED, n. Wu'r'm'sed. 1. Santonica or one of the plants yielding it. 2. The *Chenopodium anthelminticum* or its seed. 3. *Erysimum cheiranthoides*. [a, 35.]—**Aleppo w.** See ANDRISIA w. See under ARTEMISIA MARTIMA.—**American w.** See W. (2d def.).—**Barbary w.** A variety of santonica lighter than the official sort and covered with a whitish down, said to be derived from *Artemisia judaica* or from *Artemisia Sieberti* and *Artemisia ramosa*. It consists of calices, either attached to or separate from their peduncles, and of small globular flower-buds. [a, 35.]—**Levant w.** See under ARTEMISIA MARTIMA.—**Oil of w.** The

essential oil of santonica. It consists chiefly of cineol and chene. [a, 35.]—**Spanish w.** The flower-spikelets and tops of *Anabasis tamariscifolia*; used as an anthelmintic in Spain under the name of *chovan*. It resembles santonica, but the parts are larger, without odor, and of a salty taste. [a, 35.]

WORMWOOD, n. Wu'r'm'wu'd. 1. The *Artemisia absinthium* and other species of *Artemisia*. 2. Of the U. S. Fl., the leaves and tops of *Artemisia absinthium*. [a, 35.]—**Bastard w.** The genus *Ambrosia*. [a, 35.]—**Compound tincture of w.** See TINCTURA ABSINTHII COMPOSITA.—**Roman w.** 1. The *Artemisia pontica*. 2. The *Ambrosia artemisiifolia*. [a, 35.]—**Salt of w.** See SAL ABSINTHII.—**Tincture of w.** See TINCTURA ARTEMISIE ABSINTHII.

WORT, n. Wu'r't. A.-S. *wurt*, or *wyrt*, a plant. 1. A plant, especially an herb. 2. Formerly, an extract of herbs, now restricted to the liquid infusion of malt. [a, 35.]—**Sweet w.** The clear liquor left after a mash of malt and water has been allowed to clarify.

WÜRTH (Ger.), n. Wu'r't. A place in Bavaria where there is a saline and chalybeate spring. [L, 135 (a, 14).]

WORTKLANGSBILD (Ger.), n. Wu'r't'kla²ng's-bi²ld. An auditory word-impression. [F. Brain, xxviii, 1885, p. 435 (K.).]

WORTTAUBHEIT (Ger.), n. Vo'r't'a²-u²b-hit. See WORD-DEAFNESS.

WOUND, n. Wund. Gr. *παῖς*. Lat. *vulnus*, *plaga*, *læsis*. Fr. *blesure*, *plaie*. Ger. *Wunde*. It, *verita*, *sc. verita*. A division of the soft parts of the body by a mechanical force applied externally. [E.]—**Complicated w.** A w. accompanied by great hemorrhage, pain, or the presence of a foreign body. [E.]—**Contused w.** Fr. *plaie par écrasement*. A w. produced by contusion. [a, 34.]—**Flesh-w.** A w. involving only skin and superficial muscular layer. [a, 34.]—**Gunshot w.** Lat. *sclopetoplagia*. Fr. *plaie d'armes à feu*. A w. inflicted by fire-arms. [E.]—**Incised w.** Ger. *Schnittwunde*. A cut produced by a sharp-edged instrument. [E.]—**Lacerated w.** Fr. *plaie par arrachement*. Ger. *Risswunde*. A w. by tearing.—**Open w.** A w. that has free external communication. [a, 34.] Cf. *Subcutaneous w.*—**Poisoned w.** See *PLAIE ENVENIMÉE*.—**Punctured w.** *Stichverletzung*, *Stichwunde*. A more or less deep w. with little laceration of the skin; produced by a thrust with a sharp instrument, an animal's horn or tooth, etc. [a, 34.]—**Simple w.** A w. in which the parts are only divided, as distinguished from a complicated w. [E.]—**Subcutaneous w.** A w. in which the external opening is very small. [E.]—**Uterine w.** Fr. *plaie utérine*. A term sometimes employed to denote the condition of that portion of the inner surface of the uterus from which the placenta has been recently cast off.

WOUNDWORT, n. Wund'wu'r't. One of the various species of *Stachys*; also *Anthyllis vulneraria*, *Solidago virga aurea*, *Symphitum officinale*, etc. [a, 35.]—**Clown's w.** The *Stachys palustris*. [a, 35.]—**Heracles's w.** The *Heracleum pinnatifidum*. [a, 35.]—**Knights's water-w.** The *Stratiotes aloides*. [a, 35.]

WOORALI, WOORARA, n's. Wu-ra²le, -ra². See CURARE.

WRACK, n. Ra'k. Sea-weed, especially that used for kelp. [a, 35.]—**Grass-w.** Sea-w. The *Zostera marina*. [a, 35.]

WRAPPER, n. Ra'p'u'r. See VOLVA (1st def.).

WREATH, n. Reth. See KRANZFORM.

WRENCH, n. Re'n²ch. 1. See SPRAIN. 2. An instrument used for turning or twisting. [a, 48.]—**Thomas's w.** A w. for holding and twisting club-foot, consisting of a monkey-w. with two arms bent to conform to the dorsum and sole of the foot and secured at right angles to each of the jaws of the w. [A, 520 (a, 29).]

WRIGHTIA (Lat.), n. f. Ri't'i²-a². From W. Wright, a Jamaica botanist. Fr. *wrightie*. A genus of shrubs or small trees. The *Wrightee* and *Wrightiee* are tribes of the *Apocynaceae*. [a, 35.]—**W. antidyenterica.** See *HOLARRHENA ANTIDYENTERICA*.—**W. tinctoria.** A small tree of southern India. The pungent leaves are chewed for toothache, and yield Pala indigo. The bark is substituted for cress-bark, though destitute of its properties. [a, 35.]—**W. tomentosa.** A species which yields a yellow dye. The bark is used for scorpion bites. [a, 35.]

WRIGHTINE, n. Ri't'en. See CONESSINE.

WRINKLE, n. Ri'n²k'l. Gr. *ρύση*. Lat. *ruga*. Fr. *ride*, *pli*. Ger. *Rünzel*, *Falte*. A linear depression in a surface, sometimes also a corresponding elevation. [a, 48.]

WRIST, n. Ri'st. See CARPUS.

WRY-NECK, n. Ri'n²ek. Lat. *torticollis*, *caput obliquum*. Fr. *cou tortu*. Ger. *Halssteifheit*. See TORTICOLLIS.—**Rotatory w.-n.** A variety in which movements of lateral flexion and rotation of the head take place, commonly spasmodic. [A, 77.]

WUCHERBLUME (Ger.), n. Vuch²e'r-blum-e². See CHRYSE-ANTHEMUM.

WUCHERND (Ger.), adj. Vuch²e'r-nd. See LUXURIANT.

WUCHERUNG (Ger.), n. Vuch²e'r-ung². See PROLIFERATION.—**Hautw.** See HYPERDERMATOSIS.

WULST (Ger.), n. Vulet. 1. A swelling, eminence, convolution, or tuberosity. 2. See VOLVA.—**Allantoisw.** See ALLANTOISW.—**Aufgesetzte W.** See SPLENUM (3d def.).—**Bogenw.** See GYRUS FORNICATUS.—**Centralw.** Lit. central convolution; one of the convolutions around the fissure of Rolando. [I, 6 (K.).]—**Gerollte W.** See HIPPOCAMPUS MAJOR.—**Grenzw.' des Gefäßhofes.** The cerebral wall.—**Grosse Hirnw.** A cerebral hemisphere. [I, 3 (K.).]—**Grosshirnrandw.** Hauptw.' (des Gehirns). A cerebral convolution. [K.]—**Hintere W.** See HIPPOCAMPUS MINOR.—**Idiomuskuläre W.** Lit. idio-muscular swelling; a swelling or contraction of a muscle at the negative pole on passing a strong galvanic current through it. [Gruenhagen (K.).]—**Kehledeckelw.** See TUBERCULUM EPIGLOTTIDIS.—**Klappenw.** See VERMIS INFERIOR posterior.—**Kleine W.** See HIPPOCAMPUS MINOR.—**Lange Insel-**

w'. The lower edge of the insula. [I, 6 (K).]—**Leberw'**. The portion of the mesoderm from which the liver is developed. [L.].—**Markw'**. A cerebral convolution. [K.].—**Medullarwülste**. See **Medullary RIDGES**.—**Nabelw'**. See **CARUNCLE** (2d def.).—**Rindenw'**. A cerebral convolution. [I, 17 (K).]—**Rückenwülste**. See **Medullary CENTRE and Dorsal RIDGES**.—**Scheidenwülste**. See **COLUMNS of the vagina**.—**Spindelw'**. See **Subcalcarate**. **GYRUS**.—**V. des Balkens**. See **SPLENIUM** (3d def.).—**Zungenw'**. See **Subcalcarine GYRUS**.—**Zwingenw'**. See **GYRUS fornicatus**.

WULSTIG (Ger.), adj. **Vulst'ig**. Inflated, puffy, tumefied, volvate. [a, 35.]

WULSTUNG (Ger.), n. **Vulst'un**. Swelling, puffiness. [A, 521.]

WUNDARZENEI (Ger.), n. **Vund'a'rts-e'n-i**. Surgery. [a, 14.]

WUNDARZT (Ger.), n. **Vund'a'rst**. See **SURGEON**.

WUNDÄRZTLICH (Ger.), adj. **Vund'a'rst-li'ch**. See **SURGICAL**.

WUNDBRAND (Ger.), n. **Vund'bra'nd**. See **DIPHTHERIA** of wounds.

WUNDE (Ger.), n. **Vund'e**. See **WOUND**.—**Bissw'**. A bite. [a, 34.]—**Durchdringende W.** A penetrating wound. [L, 80.]—**Geschlagene W.** See **Contused WOUND**.—**Geschossene W.** **Gewehrschussw'**. See **Gunshot WOUND**.—**Hieb'w'**. A gash. [a, 34.]—**Moxabrandw'**. See **BRADYCAEMA**.—**Onelischw'**. See **Contused WOUND**.—**Rissw'**. See **Lacerated WOUND**.—**Schnittw'**. See **Incised WOUND**.—**Schussw'**. See **Gunshot WOUND**.—**Stichw'**. See **Punctured WOUND**.

WUNDEISEN (Ger.), n. **Vund'iz-e'n**. See **PROBE and SOUND**.

WUNDERBAUM (Ger.), n. **Vund'e'r-ba's-u'm**. See **RICINUS**.

WUNDERBLUME (Ger.), n. **Vund'e'r-blum-e**. See **MIRABILIS**.

WUNDERBLUT (Ger.), n. **Vund'e'r-blut**. See **BACILLUS prodigiosus**.

WUNDERGEBURT (Ger.), n. **Vund'e'r-ge's-burt**. See **MONSTROSITY**.

WUNDERNETZ (Ger.), n. **Vund'e'r-ne'ts**. See **Chorioid PLEXUS and Rete mirabile**.

WUNDFÄDEN (Ger.), n. **Vund'fad-e'n**. See **CHARPIE**.

WUNDFÄULNISS (Ger.), n. **Vund'föul-nis**. See **Hospital GANGRENE**.

WUNDHOLZBAUM (Ger.), n. **Vund'ho'lts-ba's-u'm**. The *Fraxinus excelsior*. [a, 35.]

WUNDKLEMMER (Ger.), n. **Vund'kle'm-me**. See **SERRE-FINE**.

WUNDKRAUT (Ger.), n. **Vund'kra's-ut**. The *Sedum anacampseros*, *Veronica officinalis*, *Anthyllis vulneraria*, and *Senecio jacobaeus*; in the pl., *Wundkräuter*, see **SPECIES vulnerariae**. [B, 48 (a, 14); a, 35.] Cf. **WUNDWORT**.—**Helliges W.**, **Indianisches W.**, **Peruvianisches W.** *Tobacco* leaves. [a, 35.]

WUNDMITTEL (Ger.), n. **Vund'mit'e-tel**. A vulnerary.

WUNDNARBIG (Ger.), adj. **Vund'na'r-b'ig**. See **CICATRICAL**.

WUNDPLASTER (Ger.), n. **Vund'p'da'st-e'r**. See **Emplastrum RESINÆ**.

WUNDSCHECK (Ger.), n. **Vund'sh're'k**. See **SHOCK** (1st def.).

WUNSEIN (Ger.), n. **Vund'zin**. See **INTERTRIGO**.

WURZELBAUM (Ger.), n. **Vurts'e'l-ba's-u'm**. See **RHIZOPHORA mangifera**.

WÜRZELCHEN (Ger.), n. **Vu'r'ts'e'l-ch'e'n**. See **RADICLE** (1st, 2d, and 3d def.).

WURZELND (Ger.), adj. **Vurts'e'lnd**. See **RADICANT**.

WURZELSTOCK (Ger.), n. **Vurts'e'l-sto'k**. See **RHIZOME**.—**W'artig**, **W'förmig**, **W'ig**. See **RHIZOMATOID**.

WUT (Ger.), n. **Vut**. See **FUROR and RABIES canina**.—**Chronische W.** See **INSANITY**.—**Feuerw'**. See **PYROMANIA**.—**Hundsw'**. See **RABIES canina**.—**Liebesw'**. See **EROTOMANIA**.—**Mannw'**. See **NYMPHOMANIA**.—**Matrosenw'**. See **NAUTOMANIA**.—**Mutterw'**. See **NYMPHOMANIA**.—**W'hülsenchen**. See **LYSSA** (3d def.).—**W'krankheit**. See **RABIES**.—**Wasserw'**. See **HYDROPHOBIA**.

WÜTHERICH (Ger.), n. **Vu't'e'r-i'ch**. The genus *Cicutaria* (*Cicuta*). [a, 35.]—**Giftiger W.** See *Cicutaria aquatica*.

WYH, n. A place in the Lower Engadine, Switzerland, where there are saline purgative springs. [A, 369 (a, 21).]

WYK, n. A sea-bathing resort on the island of Föhr, Schleswig-Holstein. [L, 30, 37, 67 (a, 14).]

X

XALAPA, XALAPPA, n's. Ger., *Xalapa*. See *JALAPA*.—**X-Winde** (Ger.). See *IPOMEA jalapa* (1st def.).

XANG, n. A name for several species of *Pluchea* cultivated in Cochinchina for their medicinal properties. The leaves are vulnerary and sudorific and are used in tonic and emollient baths. The juice is salish, and is used in aphthae, being both swallowed and applied to the mucous membrane after the latter has been cleaned with the oil of a certain fish. [a, 35.]

XANTHAMIDE, n. $\text{Za}^2\text{nth}^{\text{a}2\text{m}}\text{I}^2\text{d}$. Fr., *xanthogénamide*. Ger., *Xanthogenamid*. A substance, $\text{CS} \begin{smallmatrix} \text{NH}_2 \\ \text{O}_2\text{C}_2\text{H}_5 \end{smallmatrix}$, forming pyramidal crystals. [B.]

XANTHEIN, n. $\text{Za}^2\text{nth}^{\text{e}2}\text{I}^2\text{n}$. From *ξανθός*, yellow. Fr., *xanthéine*. Of Filhol, a yellow substance obtained by treating dahlia flowers with alcohol. [B, 270 (a, 38).] Cf. **ANTHOXANTHEIN**.

XANTHELASMA (Lat.), n. n. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{e}^2\text{I}^2\text{a}^2(\text{a}^2\text{s})\text{ma}^2$. Gen., -*as'matos* (-*atis*). From *ξανθός*, yellow, and *ελασμα*, a lamina. Fr., *xanthelasma*. See **XANTHOMA**.—**X. multiplex**. See **XANTHOMA multiplex**.—**X. palpebrarum**. X. of the skin of the eyelids. [F.]—**X. villigoides**. See **XANTHOMA**.

XANTHELASMA (Fr.), n. $\text{Za}^2\text{nth}^{\text{a}2}\text{I}^2\text{a}^2\text{s}^2\text{ma}^2$. See **XANTHOMA planum**.—**X. en tumeurs**. A very rare pathological variety of xanthoma in which there are developed first nodosities and afterward tumors varying in size from that of an almond to that of a hen's egg, and generally lobulated. [L, 88 (a, 14).]—**X. généralisé**. See **XANTHOMA multiplex**.—**X. tuberculeux**. Xanthoma combined with general tuberculousis. [L, 87 (a, 14).]—**X. tubéreux**. See **XANTHOMA tuberosum**.

XANTHELASMOIDEA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{e}^2\text{I}^2\text{a}^2\text{z}$ (e^2s), mo^2mo^2 . $\text{I}^2\text{d}(\text{e}^2)\text{a}^2$. From *ξανθός*, yellow, *ελασμα*, a lamina, and *είδος*, resemblance. Of Fox, see *USCUTARIA pignuifera*.

XANTHENE, n. $\text{Za}^2\text{nth}^{\text{en}}$. Fr., *xanthène*. Ger., *Xanthan*. A yellow substance (probably a mixture of different substances) obtained by heating persulphuric acid. [a, 14.]

XANTHIC, adj. $\text{Za}^2\text{nth}^{\text{I}^2}\text{k}$. From *ξανθός*, yellow. Fr., *xanthique*. 1. Yellow. 2. Derived from xanthin. [B.]—**X. oxide** [Marcel]. See **XANTHIN**.

XANTHIC ACID, n. $\text{Za}^2\text{nth}^{\text{I}^2}\text{k}$. Fr., *acide xanthique*. Ger., *Xanthogensäure*. A monobasic acid, $\text{CS} \begin{smallmatrix} \text{O}_2\text{C}_2\text{H}_5 \\ \text{SH} \end{smallmatrix} = \text{C}_6\text{S}_2\text{O}_6\text{H}_5$, a colorless, oily liquid, having a penetrating, sulphurous odor and a sharp, astringent taste. [B.]

XANTHIN, n. $\text{Za}^2\text{nth}^{\text{I}^2}\text{n}$. From *ξανθός*, yellow. Fr., *xanthine*. Ger., *X.*, *Krappgelb*. 1. A substance, $\text{C}_5\text{H}_4\text{N}_4\text{O}_6$, occurring in minute quantities in the urine (especially after the use of sulphur baths), in the serum of the blood, in muscular tissue, in the liver, spleen, thymus gland, pancreas, and brain, and pathologically as a constituent of xanthic calculi. It occurs as a white or pale-yellow amorphous powder, or, if deposited from a slowly evaporating solution, as small scales. It acts as a base, forming crystalline compounds with acids and alkalis. [B, 3, 12, 13, 49.] 2. See **PHOSPHINE** (3d def.). 3. See **ANTHOXANTHEIN**.—**X'stein** (Ger.). See **XANTHIC CALCULUS**.

XANTHINURIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{n}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *ουρον*, urine. See **XANTHURIA**.

XANTHIUM (Lat.), n. n. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{m}^2(\text{u}^2\text{m})$. Gr., *ξανθιον* (from *ξανθός*, yellow). Fr., *lampourde*. Ger., *Spitzklette*. Cockle- (or clot-) weed; a genus of coarse herbs variously placed in the *Ambrosiaceae* and in the *Helianthoideae*. The *Xanthiceae* are a division of the *Compositae*. [a, 35.]—**X. catharticum**. Fr., *lampourde cathartique*. Ger., *Purgirspitzklette*. A Peruvian purgative species. [a, 35.]—**X. indicum**. X. *italicum*. X. *macrocarpum*. X. *orientale*. A widely dispersed species used like X. *strumarium*. The fruit is demulcent and the involucre is applied to the ear in cephalalgia. [a, 35.]—**X. spinosum**. Fr., *glouteron*. Bathurst bur, spiny clot-bur; perhaps a native of Chile. It is tonic and febrifuge, and was formerly prescribed for rabies. [a, 35.]—**X. strumarium**. X. *vulgare*. Fr., *lampourde commune*, *glouteron*, *petit glouteron*, *herbe aux écrouelles*. Ger., *gemeine Spitzklette*, *Knopfklette*. Small burdock, ditch- (or louse-) bur, the *échiol* of the ancient, a widely dispersed species containing a yellow dye. The root has been used as a diaphoretic, and in China its extract is applied to ulcers. The herb and fruit, formerly official as *herba et semen xanthii* (seu *bardanae* [seu *lappae*] *minoris*), have been used as a laxative, diuretic, vesicant, styptic, etc. [a, 35.]

XANTHURIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *ουρον*, urine. A condition of urine in which xanthic oxide is deposited. [a, 34.]

XANTHOCROIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *ουρον*, urine. A condition of urine in which xanthic oxide is deposited. [a, 34.]

XANTHOCROIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *ουρον*, urine. A condition of urine in which xanthic oxide is deposited. [a, 34.]

XANTHOCHYMUS (Lat.), n. m. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{m}^2(\text{u}^2\text{m})$. Fr., *xanthochyme*. Ger., *Ghorkabaum*. A genus of guttiferous trees differing but little from *Garcinia*. [a, 35.]—**X. olealis**. An edible fruited tree of the Moluccas and East Indies. [a, 35.]—**X. ovalifolius**. A Ceylon species. Its juice was formerly regarded as the source of gamboge. [a, 35.]—**X. pictorius**. X. *tinctorius*. An East Indian tree. The fruits, which are eaten ripe, yield, when nearly matured, an acid yellow gamboge gum used as a water-color. [a, 35.]

XANTHOCREATININE, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-kre-a}^2\text{t}^2\text{I}^2\text{n}$ en. Fr., *xanthocréatinine*. Ger., *Xanthocréatinin*. A poisonous alkaloid, $\text{C}_8\text{H}_8\text{N}_4\text{O}_6$, obtained as yellow crystals from fresh beef by extracting with water and a little oxalic acid, exhausting with alcohol, precipitating with ether, and partially evaporating. It produces lassitude, sleepiness, vomiting, and purgation. [B, 270 (a, 38); D. Ferguson, "N. Y. Med. Jour.," Aug. 4, 1888.]

XANTHOCYANOPIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, *κύανος*, blue, and *ὄψις*, appearance. Of Mauthner, red-green blindness, blue and yellow being the colors that are perceived. [a, 34.]

XANTHOCYSTINE, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-si}^2\text{s}^2\text{t}^2\text{en}$. From *ξανθός*, yellow, and *κύστις*, the bladder. A nitrogenous substance of doubtful composition, intermediate between cystine and xanthine, found in the whitish tubercles developed in the digestive mucous membranes, liver, pericardium, and hepatic tissue of a corpse that had been buried for two months. [B, 83 (a, 14).]

XANTHODERMA (Lat.), n. n. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. Gen., -*dermatos* (-*atis*). From *ξανθός*, yellow, and *δέρμα*, the skin. Fr., *xanthodermie*. Yellowness of the skin. [G.]

XANTHOGEN, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-je}^2\text{n}$. From *ξανθός*, yellow, and *γενος*, to engender. Fr., *xanthogène*. Ger., *X.* 1. The radicle, $\text{CS.O}_2\text{C}_2\text{H}_5$, of xanthic acid. [B.] 2. See **XANTHEIN**.—**X. amide**. See **XANTHAMIDE**.

XANTHOGLOBULIN, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-gl}^2\text{b}^2\text{u}^2\text{l}^2\text{I}^2\text{n}$. From *ξανθός*, yellow, and *globulus*, a globule. Fr., *xanthoglobuline*. A substance found by Scherer in the liver and pancreas; now known to be identical with hypoxanthine. [B, 3.]

XANTHOKYANOPIY, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-si}^2\text{a}^2\text{n}^2\text{o}^2\text{p}^2\text{-i}$. See **XANTHOCYANOPIA**.

XANTHOLINE, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-len}$. See **SANTONICA**.

XANTHOMA (Lat.), n. n. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{m}^2(\text{u}^2\text{m})$. From *ξανθός*, yellow. Fr., *xanthome*. Ger., *Xanthom*. A neoplastic disease of the skin, occurring most commonly, though not always, near the inner or outer canthus of the eye and usually symmetrically, in the form of soft elevations or flat patches of a light- or dark-yellow color, due to new formation of connective tissue together with a deposit of fat in the corium and subcutaneous areolar tissue. [G, 2.]—**X. diabetorum**, X. *diabeticum*. An eruption of dull-red, discrete or confluent papules, firm to the touch, that have well-defined margins, are roundish or obtusely conical, and may have a solid yellow or yellowish white head, occurring on the forearms first, then on other parts of the body of persons affected with diabetes mellitus. [Crockier, 34.]—**X. multiplex**. X. in the form of multiple tumors disseminated over the body. [G.] Cf. **XANTHOMATOSIS**.—**X. planum**. A variety of x. that appears in the form of yellowish-white or lemon-yellow patches but slightly elevated above the surface, situated most commonly near the angles of the eyes or on the lids, usually appearing symmetrically on both eyes. It also occasionally occurs on other parts of the face or on certain of the mucous membranes. [G.]—**X. tuberculatum**, X. *tuberculosum*, X. *tuberosum*. X. characterized by milium-like yellowish-white nodules or tubercular elevations occurring either singly or in groups, and situated usually on the face (though rarely on the eyelids) and on various regions of the trunk and extremities, especially about the joints. They also occur as flattened elevations on the palms or soles. [G.]

XANTHOMATOSIS (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{m}^2(\text{u}^2\text{m})$. Gen., -*os* (-*is*). From *xanthoma* (q. v.). Fr., *xanthomatose*. A cutaneous disease in which xanthoma tubercles or patches are disseminated over the body so as to imply a special diathesis. [G.] Cf. **XANTHOMA multiplex**.

XANTHOPATHIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *πάθος*, disease. See **XANTHOMA** and **XANTHOMATOSIS**.

XANTHOPHANE, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-fan}$. From *ξανθός*, yellow, and *φαίνω*, to show. A yellowish fat obtained from the cones of the retina. [K.]

XANTHOPHTHALMUM (Lat.), n. n. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{m}^2(\text{u}^2\text{m})$. From *ξανθός*, yellow, and *ὀφθαλμός*, the eye. Fr., *xanthophthalmie*. The genus *Chrysanthemum*. [a, 35.]

XANTHOPHYLL, n. $\text{Za}^2\text{nth}^{\text{o}}\text{-f}^2\text{I}^2$. From *ξανθός*, yellow, and *φύλλον*, a leaf. Fr., *xanthophylle*. 1. The yellow coloring matter of plants. [a, 35.] Cf. **ERYTHROLIN**.

XANTHOPICRINE, **XANTHOPICRITE**, n's. $\text{Za}^2\text{nth}^{\text{o}}\text{-pi}^2\text{c}^2\text{r}^2\text{en}$, -*rit*. Lat., *xanthopicrocrinum* (from *ξανθός*, yellow, and *πικρός*, pungent). Ger., *Xanthopicroit*. 1. See **BERBERIS**. 2. The aromatic principle in the bark of *Xanthoxylum caribaeum*. [B, 5, 93, 270 (a, 38).] 3. A bitter astringent crystalline substance in the root of *Xanthoxylum ternatum*. [a, 35.]

XANTHOPROTEIC ACIDS, n. pl. $\text{Za}^2\text{nth}^{\text{o}}\text{-prot-e}^2\text{I}^2\text{k}$. Fr., *acides xanthoprotéiques*. Ger., *Xanthoproteinsäuren*. The nitro-compounds produced by the action of strong nitric acid on a solution containing albumin or albuminoids. [B, 4, 270 (a, 38).]

XANTHOPSIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *ὄψις*, appearance. Fr., *xanthopsie*. Ger., *Gelbsehen*, *Xanthopsie*, *Xanthopsis*. A disturbance of the function of vision in which objects appear yellow.

XANTHOPSYDRACIA (Lat.), n. f. $\text{Za}^2\text{nth}(\text{za}^2\text{nth})\text{I}^2\text{u}^2\text{r}^2(\text{ur})^{\text{I}^2}\text{a}^2$. From *ξανθός*, yellow, and *ψόδραξ*, a blister.

Ger., gelbe Wasserkrütze. Yellowish eczema impetiginosum. [L, 50 (a, 14).]

XANTHOPOCCINE, n. $Za^{2n}th-o-pu^{1r}sen$. An alkaloid obtained from the rhizome of *Hydrastis canadensis*. According to Lloyd, it is only impure berberine; but Maisch considers it distinct. [B, 270 (a, 38); "Proc. of the Am. Pharm. Assoc.," xxxii (a, 14).]

XANTHOPURPURIN, n. $Za^{2n}th-o-pu^{1r}pu^{2r}i^{2n}$. From *fav6es*, yellow, and *purpura*, purple. Fr., *xanthopurpurine*. Ger., *X. a yellow coloring matter*, $C_{14}H_{10}O_4$, obtained from *Rubia tinctorum*. It occurs as yellowish-red acicular crystals. [B, 5 (a, 38); B, 46, 93 (a, 14).]

XANTHORRHAMNIN, n. $Za^{2n}th-or-ra^{2m}ni^{2n}$. Fr., *xanthorrhamin*. A substance identical with the rhamnin of Stein and the x-rhamnegin of Schützenberger, but Liebermann and Hörmann give it the formula $C_{48}H_{46}O_{29}$. [B, 5, 270 (a, 38).]

XANTHORRIZA (Lat.), n. f. $Za^{2n}th(za^{2n}th)-o^{2r}ri^{2n}(rez)^{2a}$. From *fav6es*, yellow, and *rhiza*, a root. Fr., *xanthorrhize*. Ger., *Gelbwurz*. A genus of the *Ranunculaceae*. [a, 35.]—*X. apiifolia*, *X. simplicissima*, *X. tinctoria*. Ger., *sellerieblättrige Gelbwurz*, *Gelbwurzel*. North American yellow-root-(shrub). The root, formerly in the secondary list of the U. S. Ph., may be used as a simple tonic. The bark of the stem has the same properties. The wood is used as a yellow dye. [a, 35.]

XANTHORRHEA (Lat.), n. f. $Za^{2n}th(za^{2n}th)-o^{2r}re^{2r}(ro^{2r}e^{2r})^{2a}$. From *fav6es*, yellow, and *rhoia*, a flowing. Fr., *xanthorrhée*. Ger., *Gelbharbaum*. A genus of lilaceous plants. [a, 35.]—*X. arborea*, *X. axillaris*, *X. bracteata*, *X. hastata*, *X. media*, *X. minor*, *X. pumilio*, *X. quadrangularis*. Species indigenous to Australia. They yield acaroid resin or similar products. [a, 35.] Cf. *Red acaroid resin*.

XANTHOSIS (Fr.), n. $Gza^{2n}toz$. 1. See **XANTHOSIS**. 2. A yellow pigment found in cancers, usually forming a fatty or opalescent infiltration without any trace of a preceding extravasation of blood. [Lebert, "Path. Anat.," i, p. 275 (a, 18).]

XANTHOSIS (Lat.), n. f. $Za^{2n}th(za^{2n}th)-os^{1s}$. Gen., *-os^{1s}eos* (-is). From *fav6es*, yellow. Fr., *xanthose*. The formation or a deposit of yellow pigment in the skin or mucous membrane. [a, 34.]—*X. of the nasal mucosa*. Of Zuckerkandl, an affection in which abundant and repeated hemorrhages from the mucous membrane of the nose, followed by a degenerative transformation of the blood, result in a persistent infiltration of the mucous membrane with an amorphous matter, giving it a dirty-yellow color. This lesion occurs in patches in all parts of the nose, especially on the septum. ["Ann. des mal. de l'oreille," xix, Feb., 1893, p. 153 (a, 50).]

XANTHOSOMA (Lat.), n. n. $Za^{2n}th(za^{2n}th)-o(s)^{2s}-som^{1a}$. Gen., *-som^{1atos} (-atis)*. From *fav6es*, yellow, and *sōma*, a body. Fr., *xanthosome*. A genus of tropical American *Araceae*. [a, 35.]—*X. edulis*. Ger., *Gelbkehlwurz*. A Guiana species, perhaps identical with *X. sagittifolium*. The root-stock is eaten. [B, a, 35.]—*X. sagittifolium*. *X. utile*, *X. xanthorrhizon*. Fr., *chou caraibe*. Arrow-leaved spoon-flower of tropical America; used for snakebites. The young shoots (Caraibe cabbage) and the starchy root-stock are eaten. [B, a, 35.]

XANTHOXYLENE, n. $Za^{2n}th-o^{2r}xl-en$. Fr., *xanthoxylène*. A colorless, volatile oil, $C_{10}H_{16}$, of very pleasant smell, obtained from the fruit of *Xanthoxylum alatum*. [a, 14, 38.]

XANTHOXYLIN, n. $Za^{2n}th-o^{2r}xl^{1n}$. Fr., *xanthoxylène*. Ger., *X. 1. Aromatic crystalline substance*, $C_{20}H_{24}O_8$, obtained from the fruit of *Xanthoxylum alatum*. 2. A preparation made in North America from *Xanthoxylum fraxineum* or *Xanthoxylum carolinianum*. [B, 5, 270 (a, 38).]

XANTHOXYLUM (Lat.), **XANTHOXYLUM** (Lat.), n's n. $Za^{2n}th(za^{2n}th)-o^{2r}xl^{1n}(u^{1n})^{2n}$. From *fav6es*, yellow, and *ξύλον*, wood. Fr., *xanthoxyle* (1st def.), *Gelbholz* (1st def.), *Zahnweeholz* (1st def.). 1. The typical genus of a tribe or suborder (the *Xanthoxylaceae* or *Xanthoxyleae*) of the *Rutaceae*, by some authors made an order. Most of the plants of the division are aromatic and pungent. [a, 35.] 2. Of the U. S. Ph., the bark of *X. fraxineum* and *X. carolinianum*. [B, 95 (a, 38).]—**Extractum xanthoxyl fluidum** [U. S. Ph.]. A preparation made by moistening 100 grammes of x. in No. 40 powder with 25 of alcohol, exhausting in a percolator with more alcohol, reserving 90 c. c. of percolate, evaporating the residue to a soft extract, mixing the two, and bringing up to 100 c. c. with alcohol. [B, 95 (a, 38).]—*X. alatum*. Ger., *geftigelttes Gelbholz*. Japan pepper; a species found in Japan, China, and southern Asia, having a peculiar aromatic pungency. The fruits are used as a condiment and stimulant. [a, 35.]—*X. americanum*. See *X. fraxineum*.—*X. aromaticum*. A species found in the Bahamas. The bark of the root, stem, and branches is used as an antiperiodic, and in blennorrhoea, syphilis, and odontalgia. [a, 35.]—*X. Arizense*. A stimulant Chinese species used as an alexipharmic. [a, 35.]—*X. budrungs*. A tree of Assam and India. The fruits, which have the odor of lemon-peel and are used medicinally, contain in their outer coat a fragrant balsam and in their warm, spicy seeds an aromatic oil. The aromatic root is sudorific, emmenagogue, and febrifuge. [a, 35.]—*X. capense*. Wild cardamom; an aromatic South African species. [a, 35.]—*X. caribbeum*. Fr., *xanthoxyle à gros aiguillons*, *bois épineux blanc*, *frêne épineux*. Ger., *carabisches Zahnweeholz*. 1. Satinwood tree of tropical America. The wood (*bois piquant*) is said to contain a poisonous alkaloid. [a, 35.] 2. See *X. clava*.—*X. carolinianum*. 1. Of Gärtner, see *X. clava*. 2. A species found in the Southern States. The bark has properties like those of *X. fraxineum*. [a, 35.]—*X. cauliflorum*. Fr., *xanthoxyle (ou cavalier) à feuilles de frêne*. A North American species. The inner bark is sialagogue and sudorific. The peppery seeds are used in odontalgia. [a, 35.]—*X. clava* (Herculis), *X. clavatum*. Fr., *massue d'Hercule* (1st def.), *bois épineux jaune (ou blanc)* (2d def.). Ger., *Zahnweeholz* (1st def.), *carabisches Gelbholz* (1st def.). 1. Hercules's

club, southern prickly ash, West Indian (or prickly) yellow-wood. The aromatic and astringent bark contains berberine and is used like that of *X. aromaticum*. [a, 35.] 2. See *X. fraxineum*.—*X. elegans*. A South American species, locally called *jaborandi*. [a, 35, 39.] Cf. *JABORANDI* of Riedel.—*X. emarginatum*. Ger., *ausgerandetes Gelbholz*. An aromatic tree the wood of which is known in Jamaica as *lymunum rosum*. The leaves and the bark of the branches are used in stimulant baths and fomentations. [a, 35.]—*X. floridanum*. See *X. clava* (1st def.).—*X. fraxineum*. Fr., *xanthoxyle (ou frêne) épineux*. Ger., *Zahnweeholz*. Toothache tree, prickly ash, angelica tree; a North American species. The

XANTHOXYLUM FRAXINEUM. [A, 327.]

capsules and leaves smell like oil of lemon. The bark, which with that of *X. carolinianum* constitutes the x. of the U. S. Ph., occurs in light, brittle, nearly odorless, dark-gray quills covered with whitish patches and small black dots. It has at first a sweetish, somewhat aromatic taste, but becomes bitter and acrid if chewed. It is diuretic, diaphoretic, and stimulant. The powder is also used topically as an irritant. The bark is chewed for odontalgia, and has been recommended in paralysis of the tongue. [a, 35.]—*X. fraxinifolium*. See *X. cauliflorum* and *X. fraxineum*.—*X. hermaphroditum*. Ger., *zwitterblättriges Gelbholz*. A Guiana and West Indian tree yielding a yellow balsamic resin used for plasters. The pungent, aromatic capsules are used like pepper. [a, 35.]—*X. hiemale*. A Brazilian shrub. The bark is used in otalgia. [a, 35.]—*X. naranjillo*. A species used as a sudorific and diuretic in the Argentine Republic. ["Am. Jour. of Pharm.," Apr. 1890, p. 177 (a, 50).]—*X. nitidum*. A Chinese shrub. The aromatic leaves are used as a spice, and the aromatic root and bark as a sudorific, emmenagogue, and febrifuge. [a, 35.]—*X. peckoltianum*. A Brazilian species. The juice of the fresh leaves is an active emmenagogue, and is used as an abortifacient. ["Proc. of the Am. Pharm. Assoc.," xxiv (a, 14).]—*X. pentanome*. Sp., *palo mulato de México* [Mex. Ph.]. A species found in Mexico; used as a tonic, stimulant, and antisyphilitic. [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1896, p. 73.]—*X. piperitum*. Fr., *xanthoxyle potéré*, *potirier du Japon*. Ger., *pfefferartiges Gelbholz*, *Pfefferlimone*. Chinese (or Japanese) pepper; an aromatic and pungent shrub. The fruits and the bark are used as a condiment. The leaves, which are also eaten, are applied as a stimulant. The root has been known to European commerce as *peppé mool*. [a, 35.]—*X. rhetsa*. Ger., *sichelblättriges Gelbholz*. A prickly tree found in the East Indian Islands. The aromatic bark, the unripe capsules (which taste like fresh orange-peel), and the pungent seeds are used as spices and medicinally as stimulant tonics. The root is purgative. ["Proc. of the Am. Pharm. Assoc.," xxv (a, 14); a, 35.]—*X. senegalense*. A tree found on the west coast of Africa. The astringent bark is used externally in rheumatism. Its leaves being sometimes found with artar-root, some regard it as the source of that drug. [a, 35.]—*X. ternatum*. Ger., *reigblättriges Gelbholz*, *Zahnweeholz*. A West Indian shrub. The root is used in odontalgia. The fruits are mildly pungent. [a, 35.]—*X. triphyllum*. A resin-yielding tree of the Western Ghats. The capsules have the aromatic properties of those of *X. rhetsa*. In Ambonya a cosmetic is prepared from the bark. [Rumphius (a, 35).]

XANTHURIA (Lat.), n. f. $Za^{2n}th(za^{2n}th)-u^{1r}(ur)^{1a}i^{2a}$. From *fav6es*, yellow, and *oxydop*, urine. An excess of xanthic oxide in the urine. [K.]

X-BEIN (Ger.), n. $I^{2r}bin$. See **GENU valgium**.

XENEMBOLE (Lat.), **XENENTHESIS** (Lat.), n's f. $Ze^{2n}e^{2m}b(o^{1a}e)a$, $e^{2n}th(e^{1s})^{1a}$. Gen., *-emboles*, *thes^{1s}eos* (-enthesis). From *éξως*, foreign, and *ἐμβολή*, a hurling, or *ἐνθεσις*, a putting in. Fr., *xénembole*. The introduction of foreign bodies (into the system). [L, 50 (a, 14).]

XENODOCHUM (Lat.), **XENODOCIUM** (Lat.), n's n. $Zen^{2n}(ze^{2n})-o(o^{1a})-do^{1k}(do^{2k}e^{1a})-ie(u^{1m}u^{1m})$, $-do^{1k}-ie(u^{1m}u^{1m})$. Gr., *ξενοδοχείον* (from *έξως*, a stranger, and *δοχεῖον*, to receive). Fr., *xénodoque*. Ger., *Wirthshaus* (1st def.). 1. Originally, a public house or hotel. 2. A hospital. [L, 41, 50, 57 (a, 14).]

XENOGAMY, n. $Ze^{2n}-o^{1g}a^{2m}i^{1n}$. From *έξως*, a stranger, and *γάμος*, to marry. Fertilization by pollen from a flower on another plant of the same species; a form of cross-fertilization. [a, 35.]

XYLIC ACID, n. Zil¹²k. An acid, $C_9H_{10}O_3 = C_6H_5(CH_2)_3CO.OH$, isomeric with mesitylenic acid, and known in four forms: *Ordinary* α , $C_6(CH_2)_3H.CH_3.CO.OH.H.H.$, transparent prismatic crystals; *parax* α , $C_6(CH_2)_3H.CO.OH.H.H.$, groups of prismatic crystals; *isox* α , $C_6(CH_2)_3CO.OH.H.CH_3.H.H.$, star-shaped groups of large acicular crystals; and ν - α α , $C_6(CH_2)_3CO.OH.CH_3.H.H.H.$, long acicular crystals. [B, 3 (a, 38).]

XYLIDIC ACID, n. Zil¹²d¹²k. Fr., *acide xylidique*. Ger., *Xylidinsäure*. An acid, $C_9H_8O_4 = C_6H_5(CH_2)_3CO.OH$, isomeric with ulitic acid, and known in two forms— α - α , $C_6[CO.OH.CH_3.H.CO.OH.H.H.]$, crystalline masses or semi-crystalline flocks, and β - α , $C_6[CH_3.CO.OH.H.CO.OH.H.H.]$, microscopic acicular crystals. The *isox* α of Senhofer is probably the same as the latter. [B, 3 (a, 38).]

XYLIDINE, n. Zil¹²d-en. Fr., α . Ger., *Xylidin*. A substance, $C_9H_{11}N = C_6H_5(CH_2)_3NH_2$, known in six isomeric forms, all of which are liquids except one (α -*ortho*), which forms crystals. Commercial α is a mixture of five of the forms. [B, 4; B, 3, 270 (a, 38).]—**X. red**, Fr., *rouge de x*. A red dye made by mixing aniline and α . It closely resembles roseaniline. [B, 93 (a, 14).]

XYLOBALSAMUM (Lat.), n. n. Zil¹²(ul¹²)-o(o²)-ba²(ba²)/sa²m-(sa²m)-u²m(u²m). From *ξύλον*, wood, and *βάλσαμον*, balsam. See under *BALSAMODENDRON glaucense*.

XYLOCARACTA (Lat.), n. n. pl. Zil¹²(ul¹²)-o(o²)-ka²r(ka²)-a²kt(a²kt/a²). Fr., *See CAROB-beans*.

XYLOCARP, n. Zil¹²-o-ka²r. From *ξύλον*, wood, and *καρπός*, fruit. A hard, woody fruit. [a, 35.]

XYLOCASSIA (Lat.), n. f. Zil¹²(ul¹²)-o(o²)-ka²s(ka²s)/si²a². Fr., *xyloucassee*. Fr., *See CASSIA lignea*.

XYLOCHINON (Ger.), n. Ksu¹²-o-ken-on². See *XYLOQUINONE*.

XYLOGENE, n. Zil¹²-o-jen. From *ξύλον*, wood, and *γεννάω*, to engender. Fr., *xylougène*. A complex woody substance contained in the walls of vegetable cells, and causing their rigidity when lignified. [B, 93 (a, 14).]

XYLOIDIN, n. Zil¹²-o-i²d-i²n. Fr., *xylodine*, *féculé azotique*. Ger., *Xylidin*. A substance, $C_9H_7(NO_2)_3$, probably dinitroxy-aminyl, or $C_9H_7O_2NO_2$, obtained by the action of nitric acid on starch. *Ordinary or insoluble* α (Fr., *amidum monoozoté insoluble* [Béchamp]) is a white pulverulent substance, without taste or odor. It explodes on percussion like gun-cotton, but with less violence. *Soluble* α , *isoxylidin* (Fr., *amidum monoozoté soluble* [Béchamp]), formed by the action of an excess of strong nitric acid on starch, has the same composition as insoluble α , and similar properties. [B, 2, 4, 92, 270.]

XYLOL (Ger.), n. Ksu¹²-o²l. See *XYLENE*.

XYLOMARATHRUM (Lat.), n. n. Zil¹²(ul¹²)-o(o²)-ma²r(ma²r)-a²th(a²th)/ru²m(ru²m). From *ξύλον*, wood, and *μαράθρον*, marathrum. See *SASSAFRAS-root*.

XYLON (Lat.), n. n. Zil¹²(ul¹²)-o²n. Gr., *ξύλον*. 1. Wood. 2. The genus *Gossypium*. [a, 35.] 3. Of Benzilic a substance, $C_{12}H_{22}O_{11}$, identical with wood cellulose and the shell tissue of fruit-stones. [B, 93 (a, 14).]

XYLOPIA (Lat.), n. f. Zil¹²(ul¹²)-o(o²)/p²-a². From *ξύλον*, wood, and *πίπερος*, bitter. Fr., *xylapie*, *xyllope*. Ger., *Bitterholz*. A genus of aromatic trees or shrubs forming, with *Anona*, *Hobelia*, etc., a tribe (*Xylopieae*) of the *Anonaceae*. [a, 35.]—**X. æthiopica**, **X. aromatica**. Fr., *See HAZELIA æthiopica*.—**X. frutescens**. Fr., *xylapie arbrisseau*. Ger., *strauchiges Bitterholz*. (Shrubby) bitter-wood of Guiana. The pungent bark and the fruit are used as aromatic tonics, and the seeds as a spice. [a, 35.]—**X. grandiflora**. A Brazilian species with pimenta-like fruits, which are used as a condiment and as a carminative and febrifuge. [a, 35.]—**X. longifolia**. A species growing on the Orinoco, where the febrifuge fruits are used as a bitter tonic. [a, 35.]—**X. sericea**. A Brazilian species; the pepper-like berries are used like those of *X. grandiflora*. [a, 35.]—**X. setosa**. See *X. frutescens*.

XYLOPICRUM (Lat.), n. n. Zil¹²(ul¹²)-o(o²)-pi²k(ru²m(ru²m)). From *ξύλον*, wood, and *πίπερος*, bitter. See *XANTHOXYLUM clava*.

XYLOQUINOL, n. Zil¹²-o-ki²n²-o²l. A substance, $C_9H_{10}O_2 = C_6H_5(CH_2)_3(OH)_2$, isomeric with xylorcinol, and known in three forms—*ortho* α , $C_6[CH_3.CH_2.OH.H.H.OH.]$, crystalline crusts; *metax* α , $C_6[CH_2.OH.CH_2.H.OH.H.]$, acicular crystals; and *parax* α , or *hydrophlorone*, pearly tabular crystals. [B, 3 (a, 38).]

XYLOQUINONE, n. Zil¹²-o-ki²n²-on. Ger., *Xylochinon*. A substance, $C_9H_6(CH_2)_3O_2$, known in three isomeric forms, all occurring as yellow acicular crystals. [B, 3 (a, 38).]

XYLORCINOL, n. Zil¹²-o²rs¹²/i²n-o²l. Fr., *xylorcinine*. A substance, $C_9H_6(CH_2)_3(OH)_2$, isomeric with xylolquinol, and known in two forms—*metax* α , $C_6[CH_3.H.CH_2.OH.H.OH.]$, white tabular crystals, and *parax* α , or *homomercinol*, $C_6[CH_3.OH.H.CH_2.H.OH.]$, quadratic crystals. [B, 3 (a, 38).]

XYLORRHETINE, n. Zil¹²-o²-ret'en. From *ξύλον*, wood, and *ῥήτινη*, resin. See *HARTINE*.

XYLOSE, n. Zil¹²-os. Fr., α . A kind of sugar, $C_5H_{10}O_5$, obtained from the wood of the beech, and also found in jute. [B, 270 (a, 38).]

XYLOSTEIN, n. Zil¹²-o²st¹²/e²-i²n. Fr., *xylostéine*. Ger., *Xylosteïn*. A bitter principle obtained from the poisonous berries of *Lonicera xylosteum*, occurring as long colorless crystals. [B, 270 (a, 38).]

XYLOSTEUM (Lat.), n. n. Zil¹²(ul¹²)-o²st¹²/e²-u²m(u²m). From *ξύλον*, wood, and *στέον*, a bone. Fr., *xylostéon*. 1. See *LONICERA* α . 2. A section of the genus *Lonicera*. [a, 35.]

XYLOSTYPTIC, adj. Zil¹²-o²sti¹²/pt¹²/k. From *ξύλον*, wood, and *στυπτικός*, astringent. Styptic and derived from wood or woody fibre (cellulose). [B.]

XYLOTHERAPY, n. Zil¹²-o-the²r/a²p-i². From *ξύλον*, wood, and *θεραπεία*, medical treatment. Fr., *xylothérapie*. Of Dujardin-Beauchamp, medical treatment in which certain eschisogenic phenomena, similar to those of metalloscopy, are produced by applications of particular woods, such as thuja, rosewood, pitch-pine, mahogany, walnut, maple, apple, and especially cinchona. Other woods, such as ebony, ash, poplar, and sycamore, are said to produce no phenomena. [“Bull. de théér.” xcix, p. 97 (a, 34).]

XYLUM [Fr. Cod.], (Lat.), n. n. Zil¹²(ul¹²)/u²m(u²m). Gr., *ξύλον*. See *COTTON*.—**X. iodatum** [Fr. Cod.]. Fr., *Iodized cotton*.

XYLYL, n. Zil¹²/l. Fr., *xylyle*. Ger., χ . The radicle of xylene, $C_6H_3(CH_3)_2$. [B.]—**X. alcohol**. A substance, $CH_3C_6H_4CH_2.OH = C_8H_{10}O$, known in three isomeric forms—*ortho* α *alcohol*, acicular crystals; *metax* α *alcohol*, a liquid; and *parax* α *alcohol*, or *toluetyl alcohol*, white acicular crystals. [B, 3 (a, 38).]

XYLYLACETAMIDE, n. Zil¹²-l-a²s-e²t/a²m-i²d(i²d). The substance $C_9H_9.NH.C_2H_5O$ (or $C_8H_7(CH_3)_2.NH.C_2H_5O$). [B, 2.]

XYLYLENE ALCOHOL, n. Zil¹²/l-en. A substance, $C_8H_8.OH$, known in three isomeric forms—*ortho* α α , or *phthal-alcohol*, forming tabular crystals; *metax* α α , microscopic crystals; and *parax* α α , or *tolylene glycol*, shining acicular crystals. [B, 3 (a, 38).]

XYRIDAL, adj. Zi¹²-r¹²/i²-d¹²l. Lat., *xyridalis*. Pertaining to the *Xyridales*, which are Lindley's χ alliance (Lat., *nixus xyridalis*) of the *Endogeneae*, including the *Xyridaceae*, *Commelynacae*, etc.

XYRIS (Lat.), n. f. Zi¹²-r¹²/is¹². Gen., *xyr'idis* (-idis). Gr., *ξύρις* (1st def.) (from *ξύρις*, a razor). Ger., *Degenkraut* (2d def.). 1. An old term for the *Iris foetidissima*. 2. A genus of sedge-like herbs forming, with *Abolboda*, a small order (the *Xyridaceae*, or *Xyridae*, or *xyrids*) of hypogynous monocotyledons. [a, 35.] 3. A scraper, a curette. [L, 50 (a, 14).]—**X. americana**. A South American species of *X.* (2d def.). The juice is used in chronic skin eruptions. [a, 35.]—**X. indica**. An East Indian and Chinese species of *X.* (2d def.). The juice of the leaves, mixed with vinegar, is used in skin diseases, and the root and leaves, boiled in oil, are used in leprosy. In Bengal the herb is considered a certain cure for ringworm. [a, 35.]—**X. vaginata**. A Brazilian species of *X.* (2d def.) used in chronic skin diseases. [a, 35.]

XYSIS (Lat.), **XYSMA** (Lat.), **XYSME** (Lat.), n's f., n., and f. Zi¹²(zu²s)/i²s, zi¹²z(zu²s)/ma², -me(ma). Gen., *xy'se* (-ise), *xy's/matos* (-atis), *xy's/mes*. Gr., *ξύσις*, *ξύσμα*, *ξύσμα* (from *ξύειν*, to scrape). 1. The process of scraping or polishing. 2. Lint. [L, 50 (a, 14).]

XYSMALOBUM (Lat.), n. n. Zi¹²(s(zu²s)-ma²-lob(lu²b)/i²-u²m(u²m)). A genus of asclepiadaceous herbs. [a, 35.]—**X. undulatum**. A Cape-of-Good-Hope species. The root is used in colic and as a diuretic. [a, 35.]

XYSTER (Lat.), n. m. Zi¹²st(zu²st)/u²r(ar). Gen., *er'os* (-is), *er'it*. Gr., *ξύστης*, *ξύστης* (from *ξύειν*, to scrape). Fr., *xystre*. See *RASPARTORY*.—**X. ophthalmicus**. See *BLEPHAROXYSTON*.

XYSTERIUM (Lat.), n. n. Zi¹²st(zu²st)-er(ar)/i²-u²m(u²m). See *XYSTER*.

XYSTOS (Fr.), n. Kxest-os. Of Bégin, scraped lint. [L, 41 (a, 14).]

XYSTRA (Lat.), **XYSTRUM** (Lat.), n's f., n., and f. Zi¹²st(zu²st)/ra², -ru²m(ru²m). Gr., *ξύστρα*, *ξύστρα*. See *RASPARTORY*.

Y

YABINE, n. Ya²b'en. An alkaloid obtained from yaba (the bark of *Andira excelsa*); a yellowish-white, amorphous, bitter powder. [“Proc. of the Am. Pharm. Assoc.” xxviii (a, 14).]

YAM, n. Ya²m. Any one of various species of *Dioscorea*, especially *Dioscorea alata* and *Dioscorea sativa*. Their roots, known also as y's, contain a large amount of starch, and in the West Indies are used as a source of arrow-root. They often contain an acrid principle, which is dissipated in cooking. [a, 35.]—**Y. American wild y**. See *Dioscorea villosa*.—**Chinese y**. See *Dioscorea batatas*.—**Common y**. See *Dioscorea sativa*.—**Negro y**, **Red y**. See *Dioscorea alata*.—**Tivoli y**. See *Dioscorea nummularia*.—**White y**. See *Dioscorea alata*.—**Y'swurzel** (Ger.). See *Dioscorea*.

YAMADOU, n. In Brazil, the *Myristica sebifera*, or the oil expressed from its seeds. [a, 35.]

YANCONA, **YANGONA**, n's. See *PIPER methysticum*.

YANUCORINDE (Ger.), n. Ya²n-uk-o-ri²nd-e². See *Huanuco BARK*.

YÁ PIEN (Chin.), n. See *OPIMUM*.

YARMOUTH, n. Ya²r/mu²th. A sea-bathing resort in Norfolk, England. [L, 30, 37, 49 (a, 14).]

YARR, n. Ya²r. In Scotland, the *Spergularia arvensis*. [a, 35.]

YARROW, n. Ya²r'o. The genus *Achillea*, especially *Achillea millefolium*. [a, 35.]

YAUPON, n. See *ILEX cassena* (1st def.).

YAVA SKIN, n. See *ELEPHANTIASIS Arabum*.

YAWNING, n. Ya'n/ŋn. Gr., *χάσνυ*. Lat., *oscedo, oscitatio*. Fr., *bâillement*. Ger., *Gähnen*. A long, full inspiration followed by a similar expiration in which the air passes through the widely and peculiarly opened mouth. [J.]

YAW-ROOT, n. Ya'w/rŭt. See *STILLINGIA siliatica*.

YAWS, n. Ya'wz. An African term, meaning literally a raspberry, for ambasia, v. 2d def.; in the slang, *yaw*, a single efflorescence of the disease. "Daddy," "fadee," "grandy," "mama," "master," "moder," and "mother" y. are the large tubercles occurring in the course of the eruption, often at the seat of inoculation. Guinea-corn y. are those resembling a grain of maize; ringworm y. are the circular lesions; and watery y. are the oedematous tubercles occurring in cachectic patients. [G. 69.]

YDES (Fr.), n. Ed. A place in the department of Cantal, France, where there is a saline, alkaline, and chalybeate spring. [a, 14.]

YEAST, n. Yest. Gr., *ζύμα*. Lat., *fermentum*. Fr., *levûre*. Ger., *Hefe*. A semi-fluid, viscid, flocculent scum forming on the surface of a saccharine juice when it is in a state of vinous fermentation. Y. is composed chiefly of *Saccharomyces*. Ordinary y. is beer y. [a, 35].—**Beer y.** Lat., *fermentum* [U. S. Ph., 1870], *cerevisia fermentum* [Br. Ph.]. Fr., *levûre (de bière)*. Ger., *Bierhefe*. The ferment (see *SACCHAROMYCES cerevisiae*) obtained in brewing beer. It is insoluble in water or alcohol, has a dirty-yellowish color, a bitter taste, and a peculiar odor. Its ultimate composition, according to Schlossberger, is carbon 49.9 per cent., hydrogen 6.0 per cent., nitrogen 12.1 per cent., and oxygen 31.4 per cent. If separated from its nitrogenous principle, it becomes inert as a ferment. It has been used as an external stimulating poultice, and internally in typhoid and similar fevers, and against successive eruptions of boils. [a, 35].—**Bottom y.** The y. that settles when fermentation is restrained in a German y. Its ultimate composition, according to Schlossberger, is carbon 49.9 per cent., hydrogen 6.0 per cent., nitrogen 12.1 per cent., and oxygen 31.4 per cent. If separated from its nitrogenous principle, it becomes inert as a ferment. It has been used as an external stimulating poultice, and internally in typhoid and similar fevers, and against successive eruptions of boils. [a, 35].—**Top y.** The y. formed on the surface of fermenting liquids. [a, 35].—**Y. cakes.** Cakes made by pressing and drying y. that has been put into sacks and washed with water. [a, 35].—**Y. plant.** The genus *Saccharomyces*, especially the *Saccharomyces cerevisiae*. [a, 35].—**Y. poultice.** See *Cataplasma fermenti*.

YEBLE (Fr.), n. E-e'bl'. The *Sambucus ebulus*. [a, 35.]

YELK, n. Ye'lk. See *VITELLUS*.

YELLOW, adj. Ye'lo' o. Gr., *ζαφύρος*. Lat., *flavus*. Fr., *jaune*. Ger., *gelb*. Of a color resembling that of gold; as a n., a y. color or pigment, also anything of a y. color; as a n., in the pl., y's, (1) jaundice, more particularly in horses, cattle, and sheep, and, (2) popularly, leucorrhoea in which the discharge is yellowish.—**Cassell's y.** A lead oxychloride obtained by fusing together ammonium chloride and an oxide or carbonate of lead. [B, 3].—**Chrome y.** Lead chromate. [B.]—**Cologne y.** A light-yellow pigment, made up of a mixture of lead chromate and lead sulphate. [B, 3].—**Indian y.** Fr., *jaune indien*. A y. pigment prepared in Tibet, but exported from India and China. Its mode of preparation is not known, but it is thought by some to be derived from the fruit of *Garcinia mangostana*, by others to be prepared by macerating certain plants in fermented urine, since much hippuric acid is found in it. [B, 46] [a, 39].—**King's y.** See *ORPIMENT*.—**Martins y.** A dinitroresol of sodium sometimes used as a dye for food-stuffs. [a, 34].—**Naples y.** Fr., *jaune brillante*. Ger., *Neapelgelb*. A y. pigment made up of a salt of antimony, with lead, dried alum, and ammonium chloride. [B, 5].—**Patent y.** Turner's y. A lead oxychloride obtained by heating lead oxide and a solution of common salt. [B, 3].—**Uranium y.** Ger., *Uran-geib*. 1. Sodium uranate. 2. Ammonium uranate. 3. Victoria y. Aniline orange, a pigment consisting of a salt of a dinitroresol, crystallizing from a hot aqueous solution as yellowish acicular crystals. [B, 3] [a, 38].—**Visual y.** See *XANTHOPHANE*.

YELLOW-ROOT, n. Ye'lo'o-ru't. The *Hydrastis canadensis*, *Xanthorrhiza apifolia*, *Coptis trifolia*, and *Jeffersonia Bartonis*. [a, 35.]

YELLOW SPRINGS, n. Ye'lo'o. A place in Greene County, Ohio, where there are alkaline and sulphurous springs. [Anderson (a, 14).]

YELLOWSTONE PARK, n. Ye'lo'o-sto'n. A place in Wyoming Territory, set apart as a national park, where there are numerous hot and cold mineral springs. [a, 14.]

YELLOW SULPHUR SPRINGS, n. Ye'lo'o-sul'f'u'r. A place in Montgomery County, Virginia, where there are gaseous mineral springs. [L, 37, 37; Anderson (a, 14).]

YELLOW-WEED, n. Ye'lo'o-wed. The *Reseda luteola*, *Senecio jacobaea*, and *Brassica napus*. [a, 35.]

YELLOW-WOOD, n. Ye'lo'o-wu'd. The name of various plants, such as *Aralia spinosa*, the genera *Tobinia* and *Xanthoxylum*, the *Virgilia lutea* (in America), the *Podocarpus Thunbergii* (in southern Africa), the *Ochroxyllum punctatum* (in Brazil), the *Chloroxylon vietneta* (in India), the *Ochrosta borbonica* (in the Isle of Bourbon), etc. [a, 35.]

YELLOWS, n. Ye'lo'o. 1. See under *YELLOW*. 2. The *Reseda luteola*, *Genista tinctoria*, *Brassica campestris*, and *Ranunculus acris*. [a, 35.]

YELLOW-WORT, n. Ye'lo'o-wu't. 1. See *CHLORA perfoliata*. 2. The *Xanthorrhiza apifolia*. [a, 35.]

YERBA (Sp.), n. Ye'r'b'a. An herb; in Buenos Ayres, maté (see under *ILEX paraguayensis*). [a, 35].—**Y. buena.** See *MICROMERIA barbata*.—**Y. buena piperita** [Mex. Ph.]. See *MENTHA pi-*

perita.—**Y. de gato.** See *VALERIAN*.—**Y. de la cucaracha** [Mex. Ph.]. A species of *Ecites* found in Cuernavaca, Mexico, where the powdered leaves and stem, mixed with sugar, are used to kill cockroaches. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**Y. de la doncella** [Mex. Ph.]. See *BEGONIA bulbilifera* and *BEGONIA gracilis*.—**Y. de la golondrina**. 1. Of the Mex. Ph., see *EUPHORIA maculata*. 2. In the western United States, any one of various species of *Euphorbia*, used in rattlesnake bites. [B.]—**Y. del alacrán** [Mex. Ph.]. See *PLUMBAGO scandens*.—**Y. de la maha** [Mex. Ph.]. See *MONNINA Ocampi*.—**Y. del ángel** [Mex. Ph.]. See *EUPATORIUM collinum*.—**Y. de la Fuela** [Mex. Ph.]. See *SENECIO canicoides*.—**Y. de las ánimas**. A Mexican name for the *Helenium autumnale* and *Ipomoea orizabensis*. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]—**Y. del golpe [Mex. Ph.]. See *CENOTHERA pumila*.—**Y. de Santa Maria de México** [Mex. Ph.]. See *CHRYSANTHEMUM parthenium*.—**Y. de Santa Maria de tierra adentro** [Mex. Ph.]. See *TAGETES lucida*.—**Y. doncella**. See *VINCA major*.—**Y. dulce** [Mex. Ph.]. See *LIPPIA graveolens* and *LIPPIA dulcis*.—**Y. maté**. Maté. [a, 35].—**Y. mora** [Mex. Ph.]. See *SOLANUM nigrum*.—**Y. santa**. 1. The *Eriodictyon californicum* and *Eriodictyon tomentosum*. [a, 35]. 2. See *YERBA sanctum*.—**Y. viperina** [Mex. Ph.]. See *MYRIADENUS tetraphyllus*.**

YERBINE, n. Ye'r'b/en. The caffeine obtained from *Ilex paraguayensis*. ["Proc. of the Am. Pharm. Assoc.," xxxiv (a, 14).]

YERVA (Lat.), n. f. Ye'r'v'a. See *YERBA* and *CONTRAYERVA*.—**Radix yervae**. See *Rhizoma CONTRAYERVA*.

YESCA (Sp.), n. Ye's'ka. Amadon. [a, 14.]

YESGOS, n. In Mexico, the *Urtica mexicana*. [a, 35.]

YEUSE (Fr.), n. E-u'z. The *Quercus ilex*. [a, 35.]

YEW, n. U. The genus *Taxus*, especially *Taxus baccata*. [a, 35.]

YODURETUM (Lat.), n. n. Yod-u'r(ur)et(at)u'm(u'tm). See *IODIDE*.

YOH, n. In Japanese pharmacy, leaves. ["Proc. of the Am. Pharm. Assoc.," xxviii (a, 14).]

YOLK, n. Yo'lk. See *VITELLUS*.—**Accessory y.** Food y. See *Nutritive VITELLUS*.—**Formative y.** See *Nutritive VITELLUS*.—**Principal y.** See *Formative VITELLUS*.—**Subordinate y.** See *Nutritive VITELLUS*.—**White y.** See *White VITELLUS*.—**Yellow y.** See *Yellow VITELLUS*.—**Y. cleavage**, **Y. division**. See *Germ SEGMENTATION*.—**Y. of egg**. See *VITELLUS* (2d def.).—**Y. rest**. In embryology, the residual internal mass of segmentation spheres. [A, 5.] **Y-spherules**. See *Vitelline GRANULES*.—**Y-stalk**. That portion of the y.-sack that connects the latter with the embryo. [a, 34.]

YONÉ, n. Of Calderón, the *Peliveria tetrandra*; said to be a part of curare. [a, 35.]

YORK SULPHUR SPRINGS, n. Yo'r'k sul'f'u'r. A place in Adams County, Pennsylvania, where there are sulphurous springs. ["Lipp. Gaz.," (a, 14).]

YOUNG'S GAS WELL, n. Yu'n'z ga'z. A place in Lake County, California, where there is a spouting alkaline and sulphurous spring. [Anderson (a, 14).]

YOUPON, n. See *ILEX cassena* (1st def.).

YPRÉAU (Fr.), n. E-pra-o. The *Populus alba*. [a, 35.]

YPSILOGLOSSUS (Lat.), n. m. I'ps(u'ps)ilo(o's)glo's(glos)-su's(su'ts). An incorrect form of *HYPSOGLOSSUS* (q. v.).

YSP (Ger.), n. U'z'op. See *HYSSOPUS*.—**Feldy**. See *HELLANTHEM vulgare*.—**Gebräuchlicher Y.** See *HYSSOPUS officinalis*.—**Hecken-y.** See *GRATIOLA officinalis*.—**Kalbs'ykraut**, **Wilder Y.** The *Satureia hortensis*. [a, 35].—**Y'gi**. See *OIL OF HYSSOP*.—**Y'wein**. See *HYSSOPITES*.

YTTERAN, n. A place in the province of Jämtland, Sweden, where there is a chalybeate spring. [L, 57 (a, 14).]

YTTERBIA (Lat.), n. f. I't-te'r'b'i-a. See *YTTERBIUM OXIDE*.

YTTERBIUM (Lat.), n. n. I't-te'r'b'i-u'm(u'tm). From *Ytterby*, in Sweden. A new metal (not yet isolated) said to have been discovered by Marignac. Symbol, Yb; atomic weight, 173.01. ["Proc. of the Am. Pharm. Assoc.," xxvii, xxix (a, 14).]—**Y. oxide**. A perfectly white earth, Yb₂O₃. ["Proc. of the Am. Pharm. Assoc.," xxvii, xxix (a, 14).]

YTRIA (Lat.), n. f. I't'ri'a-a. Ger., *Yttererde*. Yttrium oxide. [B, 93 (a, 14).]

YTRIUM (Lat.), n. n. I't'ri-u'm(u'tm). Fr., y. Ger., Y. A metallic element discovered in the beginning of the nineteenth century at Ytterby, in Sweden, whence it derives its name. It occurs in very minute quantities, and its physical properties have not been thoroughly examined. In compounds it acts as a trivalent radicle. Symbol, Y; atomic weight, 92.5. [B, 3].—**Y. acetate**. The compound (C₂H₃O₂)₃Y + 2H₂O. [B.]—**Y. oxide**. The compound Y₂O₃. [B, 93 (a, 14).]

YVERDON (Fr.), **YVERDUN** (Fr.), n's. E-ve²r-do²n², -du³n².
A place in the canton of Vaud, Switzerland, where there are alkaline and sulphurous springs. [L, 49, 57, 87, 135 (a, 14).]

Z

ZAIZON, n. A place in Kronstadt, Transylvania, where there are saline springs. [L, 30, 49, 57 (a, 14).]

ZALDIVAR, ZALDUA, n's. A place in Biscay, Spain, where there is a sulphurous spring. [L, 49 (a, 14).]

ZALICO (Hind.), n. Of Adanson, the *Rhizophora cylindrica*. [a, 35.]

ZALIL (Afghan), n. A species of *Delphinium* having yellow flowers which are used as a tonic and as a dye. [a, 35.]

ZAMIA (Lat.), n. f. *Zam* (za'm)/i²a². Fr., *zámie*. A genus of sago-yielding *Cycadaceae*, forming, with *Encephalartos*, etc., a family of the *Angiospermales* or a section of the *Cycadeae*. The *Zamiae* are a class of plants, including the *Cycadaceae*. The *Zamiae* are: Of Unger, the *Zamia*; of Eichler and others, a tribe of the *Cycadaceae*, corresponding to the *Encephalartes*; of Bentham and Hooker, a subtribe of the *Encephalartes*. [a, 35.]—*Z. cafra*, *Z. cycadifolia*, *Z. cycadis*. Fr., *z* (ou arbre à pain) *des Cafres*. A species identical with *Cycas cafra* and *Encephalartos caffer*. [a, 35.]—*Z. integrifolia*. A species found in the Bahamas and tropical America. The pith yields *z*. arrow-root. [a, 35.]—*Z. lanuginosa*. A tropical American species yielding an inferior sago. [a, 35.]—*Z. villosa*. See *Z. cafra*.

ZANALON, n. *Za'n-a'l*/o²n. An active principle, probably C₁₅H₁₈O₇, extracted from Zanzibar aloes; said to be identical with barbaloin. It forms a number of substitution compounds (see ACETYLZANALON, BROMOZANALON, and CHLORZANALON). [B, 2.]

ZANDÍA (Sp.), n. *Tha'nd-e'a*/a. Watermelon.

ZANGCHEN (Ger.), n. *Tsan'ch'e'n*. See *Volseella*.

ZANGE (Ger.), n. *Tsa'z'e'n*. See *FORCES*.—*Abortusz*. See *OVUM-FORCES*.—*Axentrationsz*. See *Axis-traction FORCES*.—*Blasensteinz*. See *Lithotomy FORCES*.—*Churpiez*. See *Dressing FORCES*.—*Leburtz*. See *Obstetrical FORCES*.—*Grätenz*. See *ACANTHOBOLUS* (1st def.).—*Grössere Z*. See *FORCES major corporis callosi*.—*Grosze Z*. See *Long FORCES* and *FORCES major corporis callosi*.—*Haarz*. See *Depilating FORCES*.—*Hakenz*. See *Hook-FORCES*.—*Halsz*. See *Cusco's throat FORCES* and *Burge's throat FORCES*.—*Hintere Z*. See *FORCES major corporis callosi*.—*Hohlmeisselz*. See *Gauge FORCES*.—*Kehlkopfz*. A laryngeal force. [a, 34.]—*Kleinere Z*. See *FORCES minor corporis callosi*.—*Kleine Z*. See *Short FORCES* and *FORCES minor corporis callosi*.—*Klemmz*. A clamp force. [a, 34.]—*Klotz*. A dental-stump force. [a, 34.]—*Knochen splitterz*. A bone-cutting force. [a, 34.]—*Knochenz*. See *Bone FORCES* and *Craniotomy FORCES*.—*Kopfz*. See *Obstetrical FORCES*.—*Kornz*. See *FORCES crenata*.—*Kriekenz*. A crutch-shaped force. [E.]—*Kugolz*. See *Bullet FORCES*.—*Luxationsz*. See *Dislocation FORCES*.—*Mutterkuchenz*. See *Placenta FORCES*.—*Ohrenz*. See *Ear FORCES*.—*Polypenz*. See *Polypus FORCES*.—*Rupfz*. See *Volseella*.—*Schlundz*. See *Esophageal FORCES*.—*Schneidez*. See *Cutting FORCES*.—*Sequesterz*. See *Ferguson's sequester FORCES*.—*Steinz*. See *Lithotomy FORCES*.—*Steisenz*. See *Breath FORCES*.—*Stielz*. See *ANTHOXYLIUM*.—*Tonsillenz*. A tonsil force. [a, 34.]—*Vordere Z*. See *FORCES minor corporis callosi*.—*Wurzelz*. A tooth-stump force. [a, 34.]—*Z'band*. See *FILET* (1st def.).—*Z'nentbindung*. A forceps delivery.—*Z'nörmig*. Forceps-shaped. [a, 48.]—*Z'ngelburt*. See *Z'nentbindung*.—*Z'nöfelf*. A blade of an obstetrical forceps.—*Z'nmesser*. See *LABIDOMETER*.—*Z'nsäge*. See *FORCES-SAW*.—*Zäpfchenz*. See *STAPHYLURA*.

ZÄNGELCHEN (Ger.), n. *Tsan'g'e'l*/ch'e'n. A little forceps. [a, 14.]—*Blasensteinz*. See *Lithotomy FORCES*.

ZANGENRECHT (Ger.), adj. *Tsa'n'e'n*/re'ch't. Situated favorably for the application of the obstetrical forces (said of the fetal head).

ZÄNGLEIN (Ger.), n. *Tsan'g'l*/in. A little forceps.

ZANONIA (Lat.), n. f. *Dsa'n-on*/i²a². From *G. Zanon*, an Italian botanist. Fr., *zanonie*. A genus of climbing plants giving name to a tribe or section (the *Zanoniceae*, or *Zanonieae*) of the *Cucurbitaceae*. [a, 35.]—*Z. indica*. Bandler fruit; an East Indian plant with a capsule containing very bitter seeds. The leaves are used as a nerve. [a, 35.]

ZANTE-WOOD, n. *Za'nt-e*/wud. See *Rhus cotinus* and *CHLOROXYLON suietina*.

ZANTHOXYLIUM (Lat.), n. *Za'nth* (za'n'th)-o'x'i/2(lu'o²)/u²m (u²m). See *XANTHOXYLIUM*. For other words in *Zanth-* not here given, see the corresponding (and more correct) forms in *Xanth-*.

ZAPANIA (Lat.), n. f. *Dsa'p-a'n*/i²a². Fr., *zapanie*. The genus *Lippia*. [a, 35.]—*Z. nodiflora*. See *LIPPIA nodiflora* and cf. *ANACOLUPPA*.

ZÄPFCHEN (Ger.), n. *Tsa'p'ch'e'n*. See *PAPILLA* (2d def.). *UVULA* and *UVULA of the cerebellum*.—*Mutterz*. See *Pessary* (1st def.).—*Stühlz*. See *SUPPOSITORY*.—*Z'bräune*. See *STAPHYLITIS*.—*Z. der Därme*. The intestinal villi. [L, 80.]—*Z'entzündung*. See *STAPHYLITIS*.—*Z'geschwulst*. Swelling of the uvula. [E.]—*Z'halter*. See *STAPHYLURA*.—*Z'messer*. See *CIONOTOME*.—*Z'mist*. See *STAPHYLOGRAPHY*.—*Z'schnitt*. See *STAPHYLOMY* (1st def.).

ZÄPFEN (Ger.), n. *Tsa'p'f'e'n*. See *CONE* and *CONUS terminalis*.—*Kugolz*. See *GALBULUS*.—*Markz*. See *CONUS terminalis*.—*Z'aussenglied*. See *CONE rod*.—*Z. der Netzhaut*. See *Retinal cones*.—*Z. des Rückenmarks*. See *CONE terminalis*.—*Z. faseren*. See *CONE fibres*.—*Z'fortsatz*. See *Odontoid PROCESS*.—*Z'frucht*. See *STROBLE*.—*Z'immenglied*. See *CONE body*.—*Z'körper*. See *CONE granules*.—*Z'meissel*. A conical plectet. [A, 521 (a, 48).]—*Z'schnitt*. See *STAPHYLOMY*.—*Z'tübchen*. See *CONE*.—*Z'theil* (des Grundbeins). The basilar portion of the occipital bone. [L.]

ZÄPFLEIN (Ger.), n. *Tsap'f'l*/in. See *ZÄPFCHEN*.—*Kehlz*. See *UVULA*.

ZAPIS, n. Ger., *Erdcautschuk*. A variety of rubber found in the earth in the vicinity of the Orinoco, identical with or similar to dapicho. [a, 35.]

ZAPPELSUCHT (Ger.), n. *Tsa'p'pe'l*/such't. See *CHOREA*.

ZARATHAN (Ar.), n. *Za'r'a'th-a'n*. Scirrhus induration of the mamma. [A, 322, 325 (a, 48).]

ZARNICH, n. Of the alchemists, orpiment. [A, 325 (a, 48).]

ZARZAPARILLA (Sp.), n. *Tha'r-tha'p-a'r-re'l*/ya². See *SARSAPARILLA* and *SMILAX medica*.

ZASER (Ger.), n. *Tsa'z'e'r*. See *FIBRE* and *FIBRIL*.—*Z'blume*. See *MESEMBRYANTHEUM*.—*Z'gewächs*. See *POLYPUS*.

ZASMIDIUM (Lat.), n. *Za's* (za's)-m'i'd'i²/u²m (u²m). A genus of the *Perisporiaceae*. [a, 35.]—*Z. cellare*. Wine-cellar fungus; a species covering the walls of cellars, casks, bottles, etc., with a felt-like coating. It sometimes penetrates the corks in wine-bottles, but does not apparently injure the wine. [a, 35.]

ZAUBERSTRAUCH (Ger.), n. *Tsa'u'b-e'r*/stra'2-u'ch². See *HAMAMELIS* (1st def.).

ZAÜKE (Ger.), n. *Tsa'ü'k-e*. The genus *Convallaria*. [a, 35.]

ZAUM (Ger.), n. *Tsa'ü'm*. See *FRENUM* and *HABENA*.—*Z'binde*. See *HABENA* (1st def.).

ZAUNREIS (Ger.), n. *Tsa'ü'n*/ris. See *GALIUM aparine*.

ZAUNRÜBE (Ger.), n. *Tsa'ü'n*/rüb-e². The genus *BRONIA*. [a, 35.]—*Z'nbitter*. See *BRONIA*.

ZEÄ (Lat.), n. f. *Ze'ze'a*/a². Gr., *ζέα* (1st def.), *ζέα*. Fr., *mais*, *zéa*. Ger., *Mais*, *Mays*. 1. Of the ancients, probably spelt. 2. A genus of grasses. The *Zeaceae* (of Reichenbach, a division of the *Gramineae*) consists of this single genus. [a, 35.]—*Z. japonica*. Japanese maize; a variety of *Z. mais*. [a, 35.]—*Z. mais*, *Z. mais*, *Z. mayz*. Fr., *zéa* *mais*, *blé de Barbarie* (ou d'Espagne, ou de Guinée, ou d'Inde, ou d'Italie, ou de Turquie), froment (ou graine) de Turquie, maiz, troquet. Ger., gemeiner *Mais*, *Mays*, türkischer *Weizen*, *Wälschkorn*. Indian corn, maize, Guinea (or Turkey) wheat; probably indigenous to tropical America but now cultivated throughout warm and temperate climates for its grain, which yields various food products and is used in the manufacture of oil, glucose, starch (see *CORN STARCH*), alcohol, whisky, etc. It is said to contain from 3 to 10 percent of oil and to be richer in albuminoids than any other cereal. The stalks are used in making sugar and molasses. The grain is used (in Mexico) in inflammatory complaints like barley or rice, and the meal as a dry poultice. The male flowers (tassel) were formerly used in diseases of the urinary organs. [a, 35.]

ZEBA-WOOD, n. *Zeb'a*/wud. The *Connarus africanus* (in Guinea), *Guettarda speciosa* (in India), *Eugenia fragrans* (in Jamaica), etc. [a, 35.]

ZECKE (Ger.), n. *Tse'k*/e². See *IXODES ricinus*.

ZEDER (Ger.), n. *Tsad'e'r*. See *CEDAR*.

ZEDERACH (Ger.), n. *Tsad'e'r*/ach². See *MELIA* (2d def.).

ZÉDOAIRE (Fr.), n. *Za-do-a'r*. 1. See *ZEDOARY*. 2. The genus *Kempferia*. [a, 35.]—*Graines de z*. See *SANTONICA*.—*Poudre de z*. [Fr. Cod.] *Zedoary* dried at 40° C., powdered in an iron mortar, and sifted through a No. 120 silk sieve. [B, 96 (a, 38).]—*Z. longue* (rhizome) [Fr. Cod.]. See *Long ZEDOARY*.—*Z. ronde* (rhizome) [Fr. Cod.]. See *Round ZEDOARY*.

ZÉDOARIA (Lat.), n. f. *Ze'd* (za'd)-o-a'r²/a². See *ZEDOARY*.—*Radix zedoariae longa*, *Rhizoma zedoariae*. See *Long ZEDOARY*.—*Rhizoma zedoariae rotunda*. See *Round ZEDOARY*.—*Semen zedoariae*. See *SANTONICA*.—*Tinctura zedoariae composita*. A preparation made by extracting with alcohol or spirit of lemon a mixture of zedoary and various aromatic substances, and adding ether (or a little nitric acid). A typical variety consisted of 120 parts of zedoary, 60 each of sweet-flag and galangal, 30 each of chamomile, anise, and caraway, 22 each of laurel-berries and cloves, 15 each of orange-peel and mace, 720 each of alcohol and peppermint water, and 130 of hydrochloric ether. [B, 119 (a, 38).]—*Zedoariae radix*. See *Long ZEDOARY*.—*Z. germanica*. See *ACORUS calamus*.—*Z. longa*. See *Long ZEDOARY*.—*Z. lutea*. The *Zingiber cassumunar*. [a, 35.]—*Z. rotunda*. See *Round ZEDOARY*.

ZEDOARY, n. *Ze'd*/o-a'r². Lat., *zedoaria*. Fr., *zedoaire*. Ger., *Zittwerwurzel*, *Zedoarwurzel*. Long *z*. and round *z*. also the plants yielding them. [a, 35.]—*Long z*. Lat., *rhizoma zedoariae* [Ger. Ph., Belg. Ph., Russ. Ph.], *radix zedoariae longa*. Fr., *zedoaire longue* (rhizome) [Fr. Cod.]. Ger., *lange Zittwerwurzel*. The aromatic rhizome of *Curcuma zedoaria*. It is grayish-white externally and yellowish-brown within, and occurs in small slices about half an inch thick and two inches in circumference, showing remnants of radicles. It is bitter, pungent, and somewhat camphoraceous in taste, and is used as a tonic and carminative. [a, 35.]—*Round z*. Lat., *radix zedoariae rotunda*. Fr., *zedoaire ronde* (rhizome) [Fr. Cod.]. Ger., *runde Zittwerwurzel*. A rhizome resembling long *z*, but occurring usually in small sections having a heart-shaped outline. It is the product of *Curcuma aromatica*, or, according to some, of *Kempferia rotunda*. It is said to be less spicy than long *z*. [a, 35.]

ZEDRACH (Ger.), n. *Tsad'r*/ach². See *MELIA* (2d def.).—*Gemeiner Z*. See *MELIA zederach*.—*Indischer Z*. See *AZADRACHTA indica*.—*Z'rinde*. The bark of *Azadrachta indica*, also the root-bark of *Melia zederach*. [a, 35.]

ZEHE (Ger.), n. *Tsa'e*. 1. See *TOE*. 2. One of the secondary convolutions of the hippocampus major. [L, 17 (K).]—*Glanzz*. *Toes* affected with glossy skin (q. v.).—*Grossz*. The great toe. [L.]—*Kleinz*. The little toe. [L.]—*Z'negleder*. The phalanges of the foot. [L.]—*Z'nücken*. See *ACRODACTYLUM*.—*Z'nsetz*. See *PARADACTYLE*.

ZEHNTELNORMALLAUGE (Ger.), n. Tsan^{te}l-norm-a³-la²-u²-g-e³. A decinormal alkaline solution used in acidimetry. [B. 108 (a. 14).]

ZEHNTELNORMALSÄURE (Ger.), n. Tsan^{te}l-norm-a³-loir-e³. A decinormal acid solution. [B. 108 (a. 14).]

ZEHNRUNG (Ger.), n. Tsar^{un}3. See CONSUMPTION and PATHISIS.

ZEHNRURZEL (Ger.), n. Tsar^{vur}ts-e². The root of *Arum maculatum* and of *Acorus calamus*. [a. 35.]

ZEHRSUCHT (Ger.), n. Tsar^{zuch}st. Pulmonary phthisis.

ZEICHEN (Ger.), n. Tsch²e²n. See SIGN and SYMPTOM.—**Hauptz**'. A diagnostic sign. [L. 80.]—**Malz**'. See NEVUS.—**Z'lehre**. See SYMPTOMATOLOGY.

ZEICHNUNG (Ger.), n. Tsch²un². A drawing, a delineation. [L. 46 (a. 21).]—**Kolbenzellenz**'. Of Krause, the peculiar cell-like appearance produced by the transverse markings of the core of a tactile corpuscle. ["Arch. f. mikr. Anat." 1881, p. 111 (J.).]

ZEIN, n. Ze¹²n. Fr., *zéine*. Ger., *Zein*, *Maiskeleber*. 1. Of Gorham, the gluten of maize. 2. Of Stöf, a white solid obtained from the alcoholic extract of maize-meal; perhaps merely a mixture of vegetable gelatin and casein. [B. 93 (a. 14); "Pharm. Jour. and Trans.," Apr. 30, 1892, p. 896.]

ZEISMUS (Lat.), n. m. Ze²is²-mu³s(mu⁴s). From *Zea*, maize. Fr., *zéisme*. Pellagra regarded as due to a maize diet. [L. 41 (a. 14).]

ZEIT (Ger.), n. Tsit. Time; a period. [a. 14.]—**Lebez**'. The duration of life. [L. 80.]—**Menstruationsz**'. See MENSTRUAL PERIOD.—**Wochenbeztz**'. See PUERPERAL PERIOD.—**Z'raum**, **Z'umlauf**. A period or stage. [L. 80.]

ZEITIGUNG (Ger.), n. Tsit¹ig-un². See MATURATION.

ZEITLOSE (Ger.), n. Tsit¹os-e³. The genus *Colchicum*. [a. 35.]—**Flüssiges Z'nknohlenextrakt**. See *Extractum colchici fluidum*.—**Flüssiges Z'nasamenextrakt**. See *Extractum colchici seminis fluidum*.—**Fremde Z'nwurzel**. See *HERMODACTYL*.—**Geflechte Z.**, **Geschechte Z.** See *COLCHICUM variegatum*.—**Herb-z'nwurzel**. See *COLCHICUM corn.*.—**Z'nessig**. See *Acetum colchici cum bulbis recentibus*.—**Z'nextrakt**. See *Extractum colchici radices*.—**Z'nknollentinktur**. See *Tinctura colchici autumnalis*.—**Z'nknollenstein**. See *Vinum colchici radices*.—**Z'nasamenwein**. See *Vinum colchici seminis*.

ZELLAGGREGAT (Ger.), n. Tse²l'ag-grag-as²t'. See CELL-complex.

ZELLAUSLÄUFER (Ger.), n. Tse²l'a³-u³s-loi¹-e²r. See CELL-process.

ZELLBAIKE (Ger.), n. Tse²l'ba¹ik-e². See CELL-chain.

ZELLBILDUNG (Ger.), n. Tse²l'bi¹ld-un². See CELL-genesis.

ZELLBLUTLEITERGEFLECHT (Ger.), n. Tse²l'blut-lit-e²-ge²-fle²ch²t'. See CAVERNOSUS FLEXUS.

ZELLCHEN (Ger.), n. Tse²l'ch²e-n. See CELLULE.

ZELLDECKEL (Ger.), n. Tse²l'de²k-e²l. See CUTICULAR LAYER.

ZELLE (Ger.), n. Tse²l'e². See CELL.—**Absteigende Hörz'n**. See *External ciliated cells*.—**Aestige Z.** See *Ramosae CELL.*.—**Aeusserer Haaren**. See *External ciliated cells*.—**Amphiblastische Stammz.** See *AMPHIBLASTIC*.—**Amphiblastische Z.** See *AMPHIBLASTULA*.—**Aufsteigende Hörz'n**. See *Deiters's cells*.—**Becherz**'. See *Goblet-cell*.—**Beiz**'. Of Courvoisier, a small apolar nerve-cell of the spinal ganglia of frogs, found within the capsule of a much larger nerve-cell having processes. ["Arch. f. mikr. Anat." 1888, p. 188 (J.).]—**Belegz**'. See *Parietal cell* and *Delomorphous cell*.—**Bildungsz**'. See *Formative cell*.—**Bindegewebz**', **Bindesubstanzz**'. ZELLKOSPUNG (Ger.), n. Tse²l'kno²-sp-un². See **GERMINATION**.

ZELLKÖRPER (Ger.), n. Tse²l'ku²r-e²r. 1. See **CELL-body**. 2. See **CELL-mass**. 3. Carnovous tissue. [L.]—**Z. der Ruthe**. The corpora cavernosa of the penis. [L.]

ZELLEBEIN (Ger.), n. Tse²l'lab-e²n. See **CELL-LIFE**.

ZELLEHRE (Ger.), n. Tse²l'lar-e². See **CELL-theory**.

ZELLEIB (Ger.), n. Tse²l'lib. See **CELL-body**.

ZELLINIE (Ger.), n. Tse²l'i²n-e. See **CELL-chain**.

ZELLPLASMA (Ger.), n. Tse²l'pl²as-ma². See **CYTOPLASMA**.

ZELLPLATTE (Ger.), n. Tse²l'pl²a²-te². See **CELL-plate** (2d def.).

ZELLPROTODERM (Ger.), n. Tse²l'prot-o-pl²as-ma². Cellular protoplasm (see under **CELL** [2d def.]).

ZELLRAUM (Ger.), n. Tse²l'ra²-u²m. See **CELL-space**.

ZELLROHR (Ger.), n. Tse²l'ror. See **Cellular coat**.

ZELLSAFT (Ger.), n. Tse²l'za²-ft. See **CELL-fluid** and **NUCLEOCHYME**.

ZELLSAUM (Ger.), n. Tse²l'za²-u²m. See **Cuticular layer**.

ZELLSTOFF (Ger.), n. Tse²l'sto²f. See **CELLULOSE**.

ZELLSTRANG (Ger.), n. Tse²l'stra²n². See **CELL-chain**.

ZELLTHÄTIGKEIT (Ger.), n. Tse²l'tat-i²g-kit. See **CELL-LOSTY**.

ZELLTHEILUNG (Ger.), n. Tse²l'til-un². See **CELL-division**.

—**Freie Z.** See **Free SEGMENTATION**.

ZELLULOSE (Ger.), n. Tse²l'jul-o²-e². See **CELLULOSE**.

ZELLVERJÜNGERUNG (Ger.), n. Tse²l'fe²r-yu²n²'ar-un². See **CELL-rejuvenescence**.

ZELLVERMEHRUNG (Ger.), n. Tse²l'fe²r-mar-un². See **CELL-multiplication**.

ZELLVERSCHMELZUNG (Ger.), n. Tse²l'fe²r-shme²lts-un². See **CELL-union**.

ZELLWAND (Ger.), n. Tse²l'va²-nd. See **CELL-wall**.—**Primäre Z.** See **Primary cell-wall**.

ZELOTYPIA (Lat.), n. f. Ze²l(zal)-o²-ti²p(tu²p)/i²-a². Gr., ζήλοτυπία (from ζήλος, zeal, and τύπτειν, to strike). Fr., zélotypie. Morbid jealousy or zeal. [L. 41, 50 (a, 14).]

ZELT (Ger.), n. Tse²l't. 1. See **FAGITUM** (1st def.). 2. Of Reil, the roof of the fourth ventricle. [I. 6 (K.).]—**Dreieckiges Z.** [Reil]. See **Z.** (2d def.).—**Hirnz'**. See the major list.—**Kleines Z.** See **Z.** (2d def.).—**Kleinhirnz'**. See **TENTORIUM cerebelli** and **VALVE of Vieussens**.

ZELTCHEN (Ger.), n. Tse²l't'ch²-e²n. See **LOZENGE**.

ZEMA (Lat.), n. n. Zem(zem)²/a². Gen., zematos (-atis). Gr., ζημα (from ζείν, to boil). See **DECOCTION** (2d def.).

ZEMENT (Ger.), n. Tsam-e²nt'. See **CEMENT** (2d def.).

ZEM-ZEM, n. Ze²m/ze²m. A place in Lake County, California, where there are saline and chalybeate springs. [Anderson (a, 14).]

ZENKERISM, n. Tse²pn²ke²r-i²z'm. A peculiar form of degeneration, allied to colloid, described by Zenker as occurring in the voluntary muscles in typhoid fever. [B. 25.]

ZEOLITE, n. Ze²o²l-i²t. From ζείν, to boil, and λίθος, a stone. Fr., zéolithe. Ger., Zeolith. A hydrated silicate. [B. 3.]

ZEORA (Lat.), n. f. Ze²o²-ra². Fr., zéore. Of Fries, a subdivision of the genus *Parmelia*. [B. 38, 48 (a, 14).]

ZEORIN, n. Ze²o²r-i²n. Fr., zéorine. A neutral substance, C₁₂H₂₂O, obtained from *Zeora sordida*. [B. 270 (a, 38).]

ZEOSCOPE, n. Ze²o²-skop. From ζείν, to boil, and σκοπεῖν, to examine. Fr., zéoscope. An apparatus provided with a dial-plate or a graduated stem, for determining from its boiling point the alcoholic strength of a liquid, zero marking the boiling point of pure water and 100 that of absolute alcohol. [L. 49 (a, 14).]

ZEPHYRANTHES (Lat.), **ZEPHYRANTHUS** (Lat.), n's m. Ze²ph²i²r(anth)²-a²nth(a²nth/e²zias), -us(us). From ζέφυρος, the west wind, and άνθος, a flower. Zephyr-flower; a genus of the *Amoryllidaceae*, sometimes referred to *Amoryllis*. [a. 35.]—**Z. atamasco**. Atamasco lily, stagger-grass; a bulbous plant found from Virginia to Florida. [a. 35.]

ZEPHERWURZEL (Ger.), n. Tse²pt'e²r-vurts-e²l. Zedoadry (root). [a. 35.]

ZERÄSTELUNG (Ger.), n. Tse²r-ast'e²l-un². See **RAMIFICATION**.

ZERBORSTEN (Ger.), adj. Tse²r-borst'e²n. See **DIFFRACT**.

ZERBRECHLICH (Ger.), adj. Tse²r-bre²ch²'l²ch². See **FRAGILE**.

ZERBRECHUNG (Ger.), n. Tse²r-bre²ch²'un². A fracturing, a fracture.

ZERBRÜCKELT (Ger.), adj. Tse²r-bru²k'e²lt. See **FRUSTULOSE**.

ZERBST (Ger.), n. Tse²r²bst. A place in Anhalt, Germany, where there is a gaseous and chalybeate spring. [L, 49 (a, 14).]
ZERFALL (Ger.), n. Tse²r²-fa²l'. See DISINTEGRATION.
ZERFASERUNG (Ger.), n. Tse²r²-fa²z'e²r-un². See FIBRILLATION.
ZERFLIESSBAR (Ger.), adj. Tse²r²-fles²ba²r. See DELIQUESCENCE.
ZERFLIESEN (Ger.), n. Tse²r²-fles²se²n. See COLLIQUATION.
ZERFLIESSUNG (Ger.), n. Tse²r²-fles²sun². See DELIQUESCENCE.
ZERFRESEN (Ger.), **ZERFRESSUNG** (Ger.), n's. Tse²r²-fre²s²se²n. sun². Cauterization, corrosion, erosion, ulceration.—Z. des Magens. See *Perforating ulcer of the stomach*.
ZERGLEDERUNG (Ger.), n. Tse²r²-gled²e²r-un². See DISSECTION.—Menschenz'. See *Human anatomy*.—Muskelz'. See MYOTOMY.—Vollkommene Z. See *Holotomy*.—Z. der Lymphgefäße. See *HYDRANGEOTOMY*.—Z'skunde. See *ANATOMY* (4th def.).—Z'skunst. See *DISSECTION* (1st def.).
ZERKAUEN (Ger.), **ZERKAUUNG** (Ger.), n's. Tse²r²-ka²u²e²n. un². See *MASTICATION*.
ZERKLEINERT (Ger.), adj. Tse²r²-klin²e²rt. See *COMMUNUTED*.
ZERKLÜTTUNG (Ger.), n. Tse²r²-klü²ft²un². A splitting or segmentation; dissociation, disintegration. [a, 50].
ZERLEGEND (Ger.), adj. Tse²r²-lag²e²nd. See *ANALYTIC*.
ZERLEGUNG (Ger.), n. Tse²r²-lag²un². Analysis, dissection.—Lungenz'. See *PNEUMOTOMY*.—Muskelz'. See *MYOTOMY*.
ZERMALMEND (Ger.), adj. Tse²r²-ma²lm²e²nd. See *CATALYTIC*.
ZERMALMUNG (Ger.), n. Tse²r²-ma²lm²un². See *ATTRITION* (1st def.) and *CONTUSION*.
ZERNAGEND (Ger.), adj. Tse²r²-na²g'e²nd. See *CORROSIVE*.
ZERNAGUNG (Ger.), n. Tse²r²-na²g'un². Corrosion. [A, 450 (a, 17).]
ZERPULVERUNG (Ger.), n. Tse²r²-pul²f'e²r-un². See *PULVERIZATION*.
ZERQUETSCHER (Ger.), n. Tse²r²-kwe²tsh'e²r. See *ÉCRASEUR* and *LITHOTRITE*.
ZERQUETSCHUNG (Ger.), n. Tse²r²-kwe²tsh'un². See *CONTUSION* and *ÉCRASEMENT*.
ZERREIBLICH (Ger.), adj. Tse²r²-rib²li²ch². See *FRIABLE*.
ZERREIBUNG (Ger.), n. Tse²r²-rib'un². Trituration, levigation, comminution.
ZERREISSUNG (Ger.), n. Tse²r²-ris²sun². Laceration, disruption, division, rupture.—Rauchfellsz'. See *HYPGASTRORRHEXIS*.—Magenz'. See *GASTRORRHEXIS*.—Z. der Harnblase. See *CYSTORRHEXIS*.—Z. der Hornhaut. See *KERATORRHEXIS*.—Z. der Mutterscheide. See *COLPORRHEXIS*.—Z. der Nabelschnur. See *OMPHALOTOMY* (2d def.).—Z. des Herzens. See *CARDIORRHEXIS*.
ZERRGEBURT (Ger.), n. Tse²r²-ge²e²-burt. See *MONSTER* (1st def.).
ZERRIEBEN (Ger.), adj. Tse²r²-reb'e²n. See *CONTRITUS*.
ZERRISSEN (Ger.), adj. Tse²r²-ri²s'e²n. See *LACERATE*.
ZERRUPPEN (Ger.), n. Tse²r²-rup'e²n. See *TEASING*.
ZERRÜTTUNG (Ger.), n. Tse²r²-rü²t²un². Derangement, disorder, confusion. [A, 450 (a, 17).]
ZERSCHLITZ (Ger.), adj. Tse²r²-shli²ts²t'. See *LACINATE*.
ZERSCHMELZUNG (Ger.), n. Tse²r²-shme²ts²un². See *COLLIQUATION*.
ZERSCHMETTERT (Ger.), adj. Tse²r²-shme²t²e²rt. See *COMMUNUTED*.
ZERSCHMETTERUNG (Ger.), n. Tse²r²-shme²t²e²r-un². Comminution. [A, 621 (a, 48).]—Z'sbruch. A comminuted fracture.
ZERSCHNEIDEN (Ger.), **ZERSCHNEIDUNG** (Ger.), n's. Tse²r²-shnid'e²n. un². A cutting apart or into pieces. See *DISSECTION* and *DIACOPE*.
ZERSCHNITTEN (Ger.), adj. Tse²r²-shni²t²e²n. See *DISSECTED*.
ZERSETZUNG (Ger.), n. Tse²r²-ze²ts²un². See *DECOMPOSITION*.—Fäulnisz'. Putrefaction.—Gährungs'. Fermentative decomposition. [K, 16].—Theilweise Z. See *MERODIALYSIS*.
ZERSPALTUNG (Ger.), n. Tse²r²-spa²lt²un². Splitting, fissure.
ZERSPLITTERUNG (Ger.), n. Tse²r²-spli²t²e²r-un². A breaking into splinters. [A, 450 (a, 17).]
ZERSPRENGEND (Ger.), adj. Tse²r²-spri²z'e²nd. See *DEHISCENT*.
ZERSTÄUBER (Ger.), n. Tse²r²-stoib'e²r. See *ATOMIZER*.
ZERSTÄUBT (Ger.), adj. Tse²r²-stoibt'. Pulverized, atomized.
ZERSTÖRUNG (Ger.), n. Tse²r²-stü²r²un². Destruction, disorganization.
ZERSTOSSUNG (Ger.), n. Tse²r²-sto²ts²sun². A bruising; in pharmacy, see *CONCASSATION* and *TRITURATION*.
ZERSTREUT (Ger.), adj. Tse²r²-stroit'. 1. Scattered, sparse, disseminated. [a, 35.] 2. Absent-minded. [A, 621 (a, 48).]
ZERSTREUTHET (Ger.), n. Tse²r²-stroit²/hit. Absent-mindedness. [A, 621].
ZERSTREUUNG (Ger.), n. Tse²r²-stro²un². See *DISPERSION* and *DISSEMINATION*.—Z'bild. An image produced by a dispersing lens or mirror. [B.]—Z'sglas. A dispersing lens.—Z'skreise. See *Circles of DISPERSION*.—Z'spiegel. A convex mirror. [B.]

ZERSTÜCKELUNG (Ger.), n. Tse²r²-stü²k'e²l-un². Dismemberment, comminution, fragmentation.—Z. des Kindes. See *EMBRYOTOMY* (2d def.).
ZERTHEILEND (Ger.), adj. Tse²r²-til'e²nd. See *RESOLVENT* and *DISCUTIENT*.
ZERTHEILUNG (Ger.), n. Tse²r²-til'un². Division, separation, distribution. [A, 450 (a, 17).]—Z'smittel. A discutient.
ZERTRENNUNG (Ger.), n. Tse²r²-tre²n'un². Separation, dissolution, dissolution. [A, 450 (a, 17).]
ZERTRÜMMERUNG (Ger.), n. Tse²r²-tru²m²e²r-un². Destruction.—Z'sbrand. See *Acute inflammatory GANGRENE*.
ZERUMBET (Lat.), n. indecl. Ze²r-umb²(u²m²b²e²). Fr., *zérumbet*. Ger., Z. 1. The *Zingiber* z., or its root-stock (z-root). 2. A section of the genus *Zingiber*. 3. The genus *Curcuma*, especially the *Curcuma* z. 4. The genus *Alpinia*. [a, 35.]—Z.-root. Lat., *radix z.*, *radix zerumbet*. 1. See under Z. (1st def.). 2. The tubers of *Zingiber cassumunar*. [a, 35].
ZERUMBETUM (Lat.), n. n. Ze²r-umb²-et(at)²u²m(u²m). See *ZERUMBET* (1st def.).—*Radix zerumbeti*. See *ZERUMBET*-root.
ZERUPFEN (Ger.), v. tr. Tse²r²-tsup²f'e²n. To tease a microscopic preparation. [B.]
ZESIS (Lat.), n. f. Ze²ze²sis. Gr., *zēsēōs* (-is). Gr., *ζέσις* (from *ζείν*, to boil). Fr., *zesse*. Ebulition. [L, 50 (a, 14).]
ZEST, n. Ze²st. Fr., *zeste*. See *LIMONIS cortex*.
ZESTOLUSIA (Lat.), n. f. Ze²st-ol²(o²)-lu²(u²)/zi²(si²)²-a². Gr., *ζεστόλουσία* (from *ζεστός*, boiling hot, and *αἰώω*, to wash). Fr., *zestolusie*. Washing or bathing with hot water. [A, 311, 322 (a, 48).]
ZEUGEND (Ger.), adj. Tsoig'e²nd. Generative, procreating.
ZEUGUNG (Ger.), n. Tsoig'un². Generation.—*Abwechselnde Z.* See *Alternate GENERATION*.—*Beutethierische Z.* See *Marsupial GENERATION*.—*Eierlegende Z.* See *Oviparous GENERATION*.—*Freiwillige Z.* See *Spontaneous GENERATION*.—*Geschlechtliche Z.* See *GAMOGENESIS*.—*Jungfernz.* See *PARTHENOGENESIS*.—*Lebendige Z.* See *Viviparous GENERATION*.—Z'sfähig. Capable of generation. [a, 48.]—Z'skraft. Procreative power.—Z'skreis. See *CYCLUS generationis*.—Z'sreife. See *PUBERTY*.—Z'sthelle. The genitals; in botany, the organs of fructification. [a, 35.]—Z'strieb. Procreative impulse.—Z'sunfähig. See *IMPOTENT*.—Z'svermögen. Capability of generation. [a, 48].
ZEYSUM, n. See under *SANTALINA fragrantissima*.
ZIBATUM (Lat.), n. n. Zi²b-at(a²b²)u²m(u²m). Zaibach, the alchemical name for mercury. [B, 52].
ZIBET, **ZIBETH**, n's. Zi²b'e²t, -e²th. See *CIVET* (1st def.).
ZIBETH (Ger.), n. Tseb-at'. Lat., *zibetha*, *zibethium*, *zibethum*. See *CIVET* (2d def.).—Z'baum. See *DURIO zibethinus*.—Z'katze, Z'thier. See *VIVERRA*.
ZIBEBÆ (Lat.), n. f. pl. Zi²b'e²b-æ(a²e²-e). Ger., *Zibeben*. See *RAISINS*.
ZICKZACKIG (Ger.), adj. Tsi²k²/tsa²k-i²g. See *FLEXUOSE*.
ZIEGE (Ger.), n. Tseg'e². See *GOAT*.—Z'nauge. See *ÆGLOPS* (1st def.).—Z'inkotharznei. See *DIACAPLEGON*.—Z'nsäure. See *CAPRIC acid*.—Z'ntimste. See *ÆGOPHONY*.—Z'ntalg. See *SEBUM hircinum*.
ZIEGEL (Ger.), n. Tseg'e². A tile or brick. [a, 50.]—Z'dachig. See *IMBRICATE*.—Z'öl, Z'steinöl. See *OLEUM lateritum*.
ZIEGENBEIN (Ger.), n. Tseg'e²n-be²n. See *GENU valgum*.

See *Cortex MALABATHRI* and *CASSIA lignea*.—Orientalischer Z., Orientalische Z'rinde, Wahrer Z., Wahre Z'rinde. Ceylon cinnamon. [a, 35.]—Weisser Z., Weissz'. See under *CANELLA alba* (1st def.).—Winter'scher Z. See *WINTER'S BARK*.—Z'alkohol. Cinnamonic alcohol. [B.]—Z'kassie. See *CHINESE CINNAMON*.—Z'keiche, Z'niglein. See *FLORES CASSIE*.—Z'öl. See *CINNAMON OIL*.—Z'säure. See the major list.—Z'spiritus. See *SPIRITUS CINNAMOMI*.—Z'syrup. See *SYRUPUS CINNAMOMI*.—Z'tinktur. See *TINCTURA CINNAMOMI*.

ZIMMISÄURE (Ger.), n. Ts'zint'zoi-e². See CINNAMIC ACID.
—**Z.-Aethylester**. See ETHYL CINNAMATE.—**Z.-Anhydrid**. See CINNAMIC ANHYDRIDE.—**Z.-Benzylester**. See CINNAMYNE.—**Z.-essigsäureanhydrid**. See ACETO CINNAMIC ANHYDRIDE.—**Z.-Zimmt-ester**. See STYRACIN.

ZINALINE, n. $Zn^{2+}n^{2+}$ -en. A yellow coloring matter, $C_{20}H_{18}N_2O_8$, produced by the action of nitrous acid on aniline. [B. 2.]

ZINC, n. $Zn^{2+}n^{2+}$. Lat., *zincum*. Fr., z. Ger., *Zink*. A metallic element known to the ancients under the form of its alloy with copper, but not recognized as a distinct metal till the end of the seventeenth century. It is found in nature, sometimes uncombined but usually under the form of compounds constituting various minerals. Some of these (calamine, tatty, etc.) are employed in medicine. Z. is a hard, bluish-white metal, malleable and ductile at a temperature of 100° to 150° C., but brittle when heated above 200° C. It melts at 438° C., and when cooled after fusion has a crystalline texture. It acts as a bivalent radicle. Symbol, Zn; atomic weight, 65.4; sp. gr., 6.9. [B. 3.]—**Aerated z.** Z. carbonate. [B. 91.]—**Basic z. chromate**. One of several yellow compounds, $Zn_3(OH)_2CrO_4 + H_2O$, $2Zn_3(OH)_2CrO_4 + H_2O$, and $Zn_3(OH)_2CrO_4$. [B. 3.]—**Brown z. oxide**. See TRIOXIDE.—**Butter of z.** See Z. chloride.—**Cauticue an chlorure of z.** (Fr.). See *Pasta zinci chlorati*.—**Cerate of carbonate of z.** See *Ceratum zinci carbonatis*.—**Collyre an sulfate de z.** (Fr. Cod.) [Fr.]. Lat., *collyrium cum sulfato zinci*. A preparation consisting of 15 grammes of zinc sulfate dissolved in 100 grammes of rose-water. [B.] Cf. *Collyrium cum sulfato zincico ex Sanchez*.—**Ethyleure de z.** (Fr.). See *Zethyl*.—**Flowers of z.** Fr., *fleurs de z.*, *oxyde de z. par voie sèche* [Fr. Cod.]. Ger., *Zinkblumen*. Z. oxide prepared by subjecting pure metallic z. to a bright red heat with access to the air. [B.]—**Glycerite of oxide of z.** Lat., *glycerinum cum oxydo zincico* [Netherl. Ph.]. Fr., *glycère d'oxyde de z.* [Fr. Cod.]. Sp., *glycero zincico*. One of several yellow compounds made by mixing 1 part of z. oxide (prepared by calcination) with 2 parts of glycerite of starch [Fr. Cod.] or 1 part of z. oxide (prepared in the wet way) with 8 [Netherl. Ph.] (10 [Sp. Ph.]) parts of glycerite of starch. [B. 3.] [B. 95 (a, 38)].—**Granulated z.** [Br. Ph.]. Z. obtained in granulated masses by pouring the fused metal into cold water. [B. 3.]—**Hydrolyolé sulfate de z. composé** (Fr.). A preparation made by macerating for 72 days 5 parts of z. sulphate with 540 each of rose-water and water of plantain and 11 of powdered iris, and straining. [B. 119 (a, 38)].—**Hydrolotif de sulfate de z.** (Fr.). See *LOTION astrigente*.—**Injection de sulfate de z.** (Fr.). A solution of z. sulphate in 500 times as much water. [B. 119 (a, 38)].—**Jaune de z.** (Fr.). See Z. yellow.—**Memphitite z.** Z. carbonate. [B. 98.]—**Milch-zinc** z. oxide. [B. 96.]—**Ointment of oxide of z.** [U. S. Ph.]. See *Unguentum zinci oxidis*.—**Oleate of z.** See Z. oleate.—**Oxide of z. by the dry way**. Fr., *oxyde de z. par voie sèche*. See *Flowers of z.*—**Oxide of z. by the wet way**. Fr., *oxyde de z. par voie humide* [Fr. Cod.]. The zinci oxidum of the U. S. Ph. (see under Z. oxide).—**Phosphure de z.** (Fr.). See Z. phosphide.—**Pommade d'oxyde de z.** (Fr.). See *Unguentum zinci oxidis*.—**Precipitated z. carbonate**. Lat., *zinci carbonas* [Br. Ph.] (*præcipitatus* [U. S. Ph.]), *zincum carbonicum* [Swiss Ph.]. Fr., *souscarbonate de z. hydraté* [Fr. Cod.]. A basic z. carbonate prepared by precipitation from a solution of z. sulphate by the action of sodium carbonate. It varies in composition according to the degree of concentration of the solutions and the temperature at which precipitation occurs. As prepared by the U. S. process it consists of $ZnCO_3 \cdot 2ZnO$ and $2H_2O$. [B. 3.] The British formula, $ZnCO_3 \cdot 3ZnO + 3H_2O$, and by the process of the Fr. Cod., $(ZnCO_3)_2 \cdot 5Zn(OH)_2 + H_2O$. It is a very fine white powder, devoid of taste and odor, and insoluble in alcohol and in water. [B.]—**Sea-salt of z.** Z. chloride. [B. 91.]—**Solution of z. chloride**. See *Liquor zinci chloridi*.—**Solution of z. hypochlorite**. An aqueous solution of an extemporaneously formed z. hypochlorite; prepared by adding to a solution of 24 oz. of z. sulphate with water in which 12 oz. of chlorinated lime have been thoroughly triturated, and making the product measure 114 pints. [B. 5.]—**Souscarbonate de z. hydraté** (Fr.). See under *Precipitated z. carbonate*.—**Sulfate de z. du commerce** (Fr.). See *ZINCUM sulphuricum crudum*.—**Sulfate de z. officinal** [Fr. Cod.] (ou pur) (Fr.). Purified z. sulphate. [B.] See Z. sulphate.—**Test z.** Metallic z. melted and allowed to run in a thin stream into water, thus forming small sticks or thin discs or fragments free from arsenic. [B. 5 (a, 38)].—**Z. acetate**. Lat., *acetas zinci* [Bel. Ph.] (see *zincicus* [Dan. Ph., Netherl. Ph.]), *zinci acetas* [U. S. Ph., Br. Ph.], *zincum aceticum* [Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.)]. Russ. Ph., *Swiss Ph.*. Fr., *acétate de z.* [Fr. Cod.]. Sp., *acetato zincico* [Sp. Ph.]. A white crystalline substance, $Zn(C_2H_3O_2)_2 + H_2O$. [B. 3.]—**Z. acrylate**. The compound $C_3H_5O_2Zn$. [B. 3.] [B. 38.]—**Z. aluminate**. The compound $Al_2O_3 \cdot ZnO$. [B. 2.]—**Z.-amide**. Ger., *Zinkamid*. A white amorphous substance, $Zn(NH_2)_2$. [B. 3.]—**Z.-amyl**. See Z. diisobutyl.—**Z. and creatinine chloride**. A body, $(C_4H_9N_3O_2)ZnCl_2$, forming acicular crystals. [B. 4, 158 (a, 24)].—**Z. and mercury cyanide**. See MERCURY and Z. cyanide.—**Z. and potassium cyanide**. A substance, $K_2Zn(CN)_4 = Zn(CN)_2 \cdot 2KCN$, crystallizing into octahedra; formed by the evaporation of a solution of z. cyanide in a solution of an excess of potassium cyanide. [B.]—**Z. antimonate**. The compound $Zn(SbO_3)_2$. [B. 2.]—**Z. antimonide**. An alloy of z. and antimony. [B.]—**Z. arsenate**. A substance, $Zn_3(AsO_4)_2 + 5H_2O$, occurring native as a mineral. [B. 2.]—**Z. bromide**. Lat., *zinci bromidum* [U. S. Ph.]. Ger., *Bromzink*, *Zinkbromür*. A white, granular deliquescent powder, $ZnBr_2$, of saline, metallic taste. [B.]—**Z. carbonate**. Normal z. carbonate, $ZnCO_3$, occurs native in the impure form as calamine. It may also be prepared artificially. What is usually called z. carbonate is the precipitated z. carbonate (q. v.). [B.]—**Z. chloride**. Lat., *chlorure zinci* [Bel. Ph.], *zinci chloridum* [U. S. Ph., Br. Ph.], *zincum chloratum* [Ger. Ph., Austr. Ph., Hung. Ph. (2d ed.)],

Russ. Ph., Swiss Ph.] (see *chlorurem* [Gr. Ph.]). Fr., *chlorure de z.* [Fr. Cod.]. Sp., *cloruro zincico* [Sp. Ph.]. Butter of z.: a white, deliquescent crystalline substance, $ZnCl_2$, of caustic, metallic taste, acid reaction, and marked caustic properties. It is readily soluble in water and in alcohol. [B.]—**Z. chromate**. See *Basic z. chromate*.—**Z. chromite**. A dark-green crystalline body, $ZnCr_2O_4$. [B. 3.]—**Z. colloid**. See Z. COLOID.—**Z. cyanide**. Fr., *cyanure de z.* [Fr. Cod.]. Ger., *Cyanzink*, *Sp. cianuro zincico* [Sp. Ph.]. A white insoluble powder, $Zn(CN)_2 = Zn(CO \cdot N)_2$, formed by the action of hydrocyanic acid on z. acetate or of potassium cyanide on other salts of z.—**Z. diamine**. See *Z.-amide*.—**Z. diethyl**. See *Zethyl* (2d def.).—**Z. diethylate**. Ger., *Zinkäthylat*. A white powder, $Zn(C_2H_5)_2$. [B. 3.]—**Z. diethoxyacetate**. A substance, $(C_2H_5O)_2Zn$, occurring as acicular or laminar crystals and forming the most characteristic salt known of diethoxyacetic acid. [B. 3 (a, 38)].—**Z. diisobutyl**. A liquid, $Zn(C_4H_9)_2$. [B. 3.]—**Z. diisobutyl**. A liquid, $Zn(C_4H_9)_2$. [B. 3.]—**Z. dust**. Ger., *Zinkstaub*. Metallic z. obtained as a fine powder in the process of z. manufacture; used as a reducing agent. [B. 3.]—**Z. ethide**. See *Zethyl* (2d def.).—**Z. ethoxide**. See *Zethylate*.—**Zethyl**. Fr., *zethyl*. Ger., *Zinkäthyl*. 1. A univalent radicle, $Zn(C_2H_5)$. 2. The compound $Zn(C_2H_5)_2$ (more properly called *diethyl* or *z. ethide*), a mobile liquid having a peculiar odor and taking fire spontaneously on exposure to the air. [B. 3.]—**Z. ferrocyanide**. A yellow powder, $Zn_2Fe(CN)_6$. [B.]—**Z. ferro-cyanide**. Lat., *zincum ferrocyanatum* [Ger. Ph. (1st ed.)]. Russ. Ph., Swiss Ph.], *cyanatum zincicoferrosum* [U. S. Ph.]. A colorless, spontaneously inflammable liquid of very powerful and disagreeable odor of the vapor of which produces a sense of constriction of the throat and dyspnea and is said to be poisonous. [B. 3.]—**Z. nitrate**. The compound $Zn(NO_3)_2 + 6H_2O$, forming deliquescent prismatic crystals. [B. 3.]—**Z. nitride**. A green powder, Zn_3N_2 . [B. 3.]—**Z. nitroacetone**. See Z. fulminate.—**Z. ointment**. See *Unguentum zinci oxidis*.—**Z. oleate**. Lat., *oleum zincicum*. 1. A preparation made by dissolving 1 part of z. oxide in 3 parts of oleic acid, forming a soft, talc-like white powder. It is used in hyperidrosis and various skin diseases. 2. Z. oleate (1st def.) diluted with any ointment base to form a soft, talc-like solid. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 480, xxxiv, p. 570 (a, 14)]. Cf. *Oleatum zinci*.—**Z. orthophosphate**. Lat., *zinci phosphas*. Normal z. orthophosphate, $Zn_3(PO_4)_2 + 2H_2O$, usually termed *z. phosphate*, is a white powder, used as a nerve. [B. 5.]—**Z. oxide**. Lat., *oxidum* (see *oxydum* [Dan. Ph., Netherl. Ph., Norw. Ph.]), *zincicum* [Finn. Ph., Swed. Ph.], *oxydum zinci*, *oxydum zinci præcipitatum* [Bel. Ph.], *zinci oxidum* [U. S. Ph., Br. Ph.], *zincum oxydatum* [Ger. Ph., Austr. Ph., Hung. Ph., Gr. Ph., Russ. Ph., Swiss Ph.]. Fr., *oxyde de z. par voie humide et par voie sèche* [Fr. Cod.]. Sp., *óxido de z. por vía húmeda y por vía seca* [Fr. Cod.]. A soft, white, earthy substance, ZnO , devoid of taste and odor, and insoluble in water and in alcohol. It may be prepared either by calcining the precipitated z. carbonate at a low red heat, forming then the *zinci oxidum* of the U. S. Ph. and Br. Ph., the *zincum oxydatum* of the Ger. Ph., and the *oxyde de z. par voie humide* of the Fr. Cod., or by direct oxidation of the metal (by calcining), when it is called *flowers of z.*, *lana philosophica*, *poussière*, *nia alba*, or *nitrium album*, and is the *oxyde de z. par voie sèche* of the Fr. Cod. As it occurs in its purest form in commerce, it is the commercial z. oxide (Lat., *oxidum zincicum crudum* [Finn. Ph.]) (see *venale* [Swed. Ph.]), *oxydum zinci* [Bel. Ph.], *oxydum zincicum venale* [Dan. Ph.], or *zincum oxydatum crudum* (Ger. Ph.). A commercial z. oxide produced in the smelting of lead ores is called *cadmia* or *tatty*. [B. 3.] [B. 95 (a, 38)].—**Z. oxychloride**. A crystalline substance, $ZnCl_2 \cdot 3ZnO + 4H_2O$, obtained by the action of a strong solution of z. chloride on z. oxide. [B. 16.]—**Z. pentasulphide**. A white amorphous substance, ZnS_5 . [B. 3.]—**Z. permanganate**. The compound $ZnMnO_4$, occurring as dark-red tabular crystals. [B. 370 (a, 38)].—**Z. phosphate**. See Z. orthophosphate.—**Z. phosphide**. Lat., *zinci phosphidum* [U. S. Ph.], *zincum phosphureum* [Fr. Cod.]. Ger., *Phosphorzink*. The compound Zn_3P_2 , forming either crystalline fragments or a dark-grayish powder, having a faint taste of phosphorus. [B.]—**Z. pur** [Fr. Cod.] (Fr.). Lat., *zincum* [U. S. Ph., Br. Ph., Gr. Ph., Russ. Ph.] (*purissimum*). Sp., z. [Sp. Ph.]. Metallic z. freed from impurities and suitable for pharmaceutical purposes. [B.]—**Z. salicylate**. Lat., *zincum salicylicum* [Russ. Ph.]. A dibasic substance, $Zn(C_7H_5O_2)_2$, forming colorless crystals of metallic taste. [B. 10.] [B. 95 (a, 38)].—**Z. sarcosylactate**. Ger., *fleischmilchsäures Zink*. A crystalline body, $Zn(C_4H_9O_2)_2 + 2H_2O$, isomeric with z. lactate and occurring as levorotatory acicular crystals. [B. 3 (a, 38)]. [B. 4.]—**Z. spar**. Ger., *Zinkspath*. See CALAMINE (1st def.).—**Z. sulphate**. Lat., *sulfas* (see *sulphas* [Dan. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.]), *zincus* [Finn. Ph.], *sulfas zinci* [Bel. Ph.], *zinci sulfas* [U. S. Ph., Br. Ph.], *zincum sulfuricum* [Ger. Ph., Austr. Ph., Hung. Ph., Russ. Ph., Swiss Ph.] (see *sulphuricum purum* [Gr. Ph.]). Fr., *sulfate de z. officinal* [Fr. Cod.]. Sp., *sulfato zincico* [Sp. Ph.]. White vitriol (or white copper), $ZnSO_4 + 7H_2O$, forming small colorless prismatic or acicular crystals having a saline metallic taste and acid reaction, soluble in about half its weight of water. It is used as an emetic and topically as an astringent. [B.]—**Z. sulphide**. A substance, ZnS , occurring in nature as the crystalline z. blende

and wurtzite, and also obtained artificially in the amorphous state. [B. 3.] See also *Z. pentasulphide*.—*Z. sulphocarbonate*. Lat., *zinci sulphocarbonas* [Br. Ph.], *zincum sulphocarbonicum* [Ger. Ph., Russ. Ph., Swiss Ph.]. Fr., *sulfophosphate* de z. Ger., *Zinksulfophosphat*. Z. paraphenolsulphonate, $\text{Zn}(\text{C}_6\text{H}_4\text{SO}_3)_2 \cdot 3\text{H}_2\text{O}$, forming efflorescent, rhombic prismatic crystals. It is odorless and has a metallic taste and an acid reaction. [Gigih, "Ann. di chim. appl. alla farm. ed alla med." June, 1884, p. 321 (B).]—*Z. thioarsenite*. A lemon-yellow substance, $\text{Zn}_2\text{As}_2\text{S}_3$. [B. 2.]—*Z. valerianate*. Lat., *valerianae zinci* [Belg. Ph.], *valerianae zincicus* [Finn. Ph., Neth. Ph., Norw. Ph., Swed. Ph.], *zinci valerianae* [U. S. Ph., Br. Ph.], *zincum valerianicum* [Ger. Ph. (1st ed.)], Gr. Ph., Hung. Ph. (2d ed.), Russ. Ph., Swiss Ph.]. Fr., *valérianate de z.* [Fr. Cod.]. Sp., *valerianato zincico* [Sp. Ph.]. The compound $\text{Zn}(\text{C}_4\text{H}_9\text{O}_2)_2$, forming white scaly crystals which have a faint odor of valerianic acid and a sweetish, metallic taste. [B. 5, 95.]—*Z. white*. Ger., *Zinkweiss*. Commercial z. oxide.—*Z. yellow*. Fr., *jaune de z.* Ger., *Zingelb*. Basic z. chromate. [B.]

ZINCIBER (Lat.), n. n. $\text{Zi}^2\text{nk}(\text{zi}^2\text{nk})/\text{ib}^2\text{-u}^2(\text{er})$. Gen., *-ib'eri*. See ZINGIBER.

ZINCIC, adj. $\text{Zi}^2\text{nk}'\text{ik}$. Lat., *zincicus*. Pertaining to or containing zinc. [B.]

ZINCONITE, n. $\text{Zi}^2\text{nk}'\text{o}^2\text{n}$ -it. See CALAMINE (1st def.).

ZINCUM (Lat.), n. n. $\text{Zi}^2\text{nk}'\text{u}^2\text{m}$ (u'm). See ZINC; of the U. S., Br., Gr., and Russ. Ph.'s, see ZINC pur.—*Acetas zinci*. See ZINC acetate.—*Aether zinci*. Fr., *ether zincé*. A preparation made by treating 15 parts of zinc chloride with 61 of ether and 30 of absolute alcohol for some days and decanting. [B. 119 (a, 38).]—*Aqua ophthalmica adstringens e vitriolo zinci*. See *Collyrium adstringens zinci*.—*Aqua sulphatis zinci aluminosa*. See *Liquor aluminis compositus*.—*Aqua zinci cum camphora*. Fr., *au zincé camphrée*. A solution of 18 parts of zinc sulphate and 8 of camphor in 786 of boiling water; or of 28 parts of zinc sulphate and 8 of camphor in 786 of water. [L. 49, 87 (a, 14).]—*Butyrum zinci*. Zinc chloride. [B. 270.]—*Calx zinci*. Zinc oxide. [B. 270.]—*Carbonas zinci impurus*. See CALAMINE (1st def.).—*Ceratum carbonatis zinci impuri*. See *Ceratum CALAMINAE*.—*Ceratum zinci*. See *Unguentum zinci oxid.*—*Ceratum zinci carbonatis* [U. S. Ph., 8c]. A mixture of 1 part of precipitated zinc carbonate with 5 parts of ointment of lard. [B.]—*Collyrium adstringens e zinco sulphurico*. See *Aqua ophthalmica aluminosa* and *Collyrium adstringens zinci*.—*Collyrium adstringens zinci*. A solution of zinc sulphate in from 95 to 320 times as much water. Sometimes rose-water or infusion of elder was used, and, according to one old formula, the yolk of a hard-boiled egg was removed, zinc sulphate put in its place, and the resulting liquid mixed with 166 grammae each of rose-water and water of plantain. [B. 119 (a, 38).]—*Collyrium zinci*. See *Collyrium adstringens zinci*.—*Flores zinci*. See *Flores* of ZINC.—*Injectio sulphatis zinci compositus*. See *Liquor aluminis compositus*.—*Injectio zinci chlorati*. Sp., *inyección de cloruro de zinc* [Sp. Ph.]. A solution of zinc chloride in twice as much water to which from 1 to 3 per cent. of hydrochloric acid has been added; used for embalming. It should have a sp. gr. of 1.33. [B. 95 (a, 38).]—*Lactas zinci*. Zinc lactate. [B. 95 (a, 38).]—*Liquor sulphatis zinci aluminosa*. See *Liquor aluminis compositus*.—*Liquor zinci chlorati* (seu *chloridi* [U. S. Ph., Br. Ph.]). Solution of zinc chloride; made by dissolving metallic zinc in hydrochloric acid. It contains, however, impurities in the form of iron salts. These are removed by conversion into iron chloride (by means of nitric acid [U. S. Ph.]) or chlorine water [Br. Ph.]) and subsequent precipitation by the gradual addition of zinc carbonate. In the U. S. process, 240 parts of zinc are employed and the solution is brought to measure 1,000 parts; for the Br. process 1 lb. av. of zinc is used to form 2 imperial pints of the solution. The sp. gr. of the former is 1.555, of the latter 1.593; and each contains about 50 per cent. of zinc chloride. The official solution forms a colorless liquid having a sweetish, styptic taste and an acid reaction. [B.]—*Liquor zinci et aluminæ sulfure basice*. See *Solutio de sulfato d'alumine et de zinc*.—*Liquor zinci sulfurici* [Sp. Ph.]. Sp., *solución de sulfato zincico* [Sp. Ph.]. A solution of 30 centigrammes of zinc sulphate in 180 grammes of distilled water. [B. 95.]—*Oleatum zinci* [Br. Ph.]. A preparation made by triturating 1 part of zinc oxide (obtained in the wet way) with 9 parts of olive oil, allowing to stand for two hours, and dissolving over the water bath. [B. 95 (a, 38).] Cf. *Zinc oleate*.—*Oxydum zinci* [Belg. Ph.]. A term applied apparently to the commercial zinc oxide of the best grade and also to the more carefully prepared zinc oxide of the ph's. [B. 95 (a, 38).]—*Oxydum zinci precipitatum*. See ZINC oxide.—*Pasta zinci chlorati* [Gr. Ph., Russ. Ph.]. Fr., *caustique au chlorure de zinc* [Fr. Cod.]. Sp., *caustico de cloruro de zinc* [Sp. Ph.]. A paste made of 32 parts of zinc chloride dissolved in 4 of water and mixed with 2 of zinc oxide and 24 of dried wheat flour [Fr. Cod.]; of equal parts of zinc chloride and wheat flour with a little water [Sp. Ph., Russ. Ph.]; or of zinc oxide with a strong solution of zinc chloride [Gr. Ph.]. The Fr. Cod. directs that the paste be cut into thin pieces and thoroughly dried; the Gr. Ph. directs that it be colored at pleasure when used to fill teeth. The Belg. Ph. recognizes four grades of paste, containing respectively twice, three times, four times, and five times as much wheat flour as zinc chloride. [B. 95 (a, 38).]—*Solutio zinci aluminosa*. See *Liquor aluminis compositus*.—*Sulphas zinci*. See ZINC sulphate.—*Unguentum oxydi zinci compositum* [Belg. Ph.]. An ointment of 60 parts of zinc oxide, 125 of white lead, 80 of olive oil, 275 each of yellow wax and beef marrow, and 195 of mutton suet. [B. 95 (a, 38).]—*Unguentum refrigerans zinci*. An ointment of 1 part of anhydrous lanolin, 2 of benzoated zinc ointment, and 3 of rose-water. [1st Am. Jour. of Pharm., July, 1890, p. 346 (a, 56).]—*Unguentum zinci*. See *Unguentum zinci oxid.*—*Unguentum zinci olei* [Br. Ph.]. A mixture of equal parts of zinc oleate and petroleum. [B. 95 (a, 38).]—*Unguentum zinci oxid* [U. S. Ph.]. Fr., *pommade d'oxyde de zinc* [Fr. Cod.], *onguent gris* (ou *ophtalmique*, ou *de pompho-*

lyx). Sp., *pomada de óxido zincico* [Sp. Ph.]. Ointment of oxide of zinc, zinc ointment; made by rubbing up 1 part of (crude [Gr. Ph., Finn. Ph., Dan. Ph.]) zinc oxide with 9 parts of (benzoated [Fr. Cod.]) lard (simple cerate [Belg. Ph.]), simple ointment [Hung. Ph.], with 15 [Sp. Ph.], 8 [Netherl. Ph.]) of lard, 4 [U. S. Ph.], 54 [Br. Ph.] of benzoated lard, or with 8 of washed lard and 1 part of yellow wax [Russ. Ph.]. The older ph's varied the proportion of lard slightly or used 7 parts of verdigris with 22 each of zinc oxide and a solution of camphor in alcohol and 60 each of lard and mutton suet, or 1 part of zinc oxide with 2 parts of olive-oil. [B. 95, 119 (a, 38).]—*Valerianae zinci*. See ZINC valerianate.—*Zinci acetas*. See ZINC acetate.—*Zinci bromidum*. See ZINC bromide.—*Zinci carbonas precipitatus*. See *Precipitated zinc carbonate*.—*Zinci chloridum*. See ZINC chloride.—*Zinci iodidum*. See ZINC iodide.—*Zinci oxidum*. See ZINC oxide.—*Zinci phosphidum*. See ZINC phosphide.—*Zinci preparata*. Preparations of zinc; zinc salts. [B. 95.]—*Zinci salia* [Gr. Ph.]. Zinc salts, regarded as a class of poisons. [B. 95.]—*Zinci sulphas*. See ZINC sulphate.—*Zinci valerianas*. See ZINC valerianate.—*Z. acetium* [Gr. Ph., Austr. Ph., Hung. Ph. (2d ed.)], Russ. Ph., Swiss Ph. See ZINC acetate.—*Z. carbonicum* [Swiss Ph.]. Precipitated zinc carbonate. [B. 95 (a, 38).]—*Z. chloratum*. Z. chloroform. See ZINC chloride.—*Z. ferrocyanatum*. See ZINC ferrocyanide.—*Z. granulatum* [Br. Ph.]. Granulated zinc. [a, 38.]—*Z. granulatum depuratum* [Hung. Ph. 1st ed.]. Granulated zinc purified. [B. 95 (a, 38).]—*Z. lacticum*. See ZINC lactate.—*Z. oleinicum*. Zinc oleate. [a, 38.]—*Z. oxydatum*. See ZINC oxide.—*Z. oxydatum crudum*. See under ZINC oxide.—*Z. purissimum*. See ZINC pur.—*Z. salicylicum*. See ZINC salicylate.—*Z. sulphocarbonicum*. Z. sulphocarbonicum. See ZINC sulphocarbonate.—*Z. sulfuricum*. See ZINC sulphate.—*Z. sulfuricum crudum* [Gr. Ph.]. Fr., *sulfate de zinc du commerce* [Fr. Cod.]. Sp., *vitriolo blanco* (ó de zinc) [Sp. Ph.]. Unpurified commercial zinc sulphate. [B. 95 (a, 38).]—*Z. sulphuricum purum*. See ZINC sulphate.—*Z. valerianicum*. See ZINC valerianate.

ZINGAR, n. Of the alchemists, verdigris. [B. 52.]

ZINGIBER (Lat.), n. n. $\text{Zi}^2\text{nk}(\text{zi}^2\text{nk})/\text{ib}^2\text{-u}^2(\text{er})$. Gen., *-ib'eri*. Gr., *gingyberis*. Fr., *gingembre* (gris et blanc, rhizome) [Fr. Cod.] (2d def.). Ger., *Ingwer* (2d def.). Sp., *jengibre* (rhizoma) [Sp. Ph.] (2d def.). 1. A genus of plants forming, with *Costus*, *Elettaria*, *Alpinia*, *Amomum*, &c., an order (the Zingiberaceae) of monocotyledons or a tribe (the *gingibereae*) of the *Scitamineae*. 2. Of the U. S. Ph. and Br. Ph. (*rhizoma zingiberis* [Gr. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Norw. Ph., Russ. Ph., Swed. Ph., Swiss Ph.], z. [rhizoma] [Austr. Ph., Hung. Ph., 2d ed., Netherl. Ph.]), *zingiberis radix* [Gr. Ph.], ginger, the rhizoma of *Z. officinale*. [a, 35.]—*Aetheroleum zingiberis*. See Oil of GINGER.—*Cerevisia cum zingibere* (seu *zingiberis*). See GINGER-beer.—*Essentia zingiberis*. See *Tinctura zingiberis*.—*Extractum zingiberis aethereum*. See *OLEUM zingiberis*.—*Extractum zingiberis fluidum* [U. S. Ph.]. A preparation made by exhausting with alcohol 100 grammes of ginger in No. 40 powder, reserving 90 c. c. of percolate, evaporating the residue to a soft extract, mixing the two, and bringing up to 100 c. c. [B. 95 (a, 38).]—*Infusum zingiberis* [U. S. Ph., 1870]. A preparation made by macerating 1 Troy oz. of ginger in a pint of boiling water for two hours and straining. [B. 5 (a, 38).]—*Oleoresina zingiberis* [U. S. Ph.]. A preparation made by exhausting with ether 100 grammes of ginger in No. 60 powder (or carrying the process far enough to obtain 150 parts of percolate), and evaporating the ether off. [B. 95 (a, 38).]—*Oleum zingiberis aethereum*. See Oil of GINGER.—*Radix zingiberis*. See Z. (2d def.).—*Radix zingiberis (albi) e Jamaica*. See *White GINGER*.—*Radix zingiberis silvestris*, 1. Long zedoary. 2. The tuberous root-stock of *Z. cassumunar*. 3. The root-stock of *Z. zerumbet* [Roscoe]. [a, 35.]—*Rhizoma zingiberis*. See Z. (2d def.).—*Rhizoma zingiberis pulveratum*. Ginger dried at 40° C. powdered in an iron mortar, and sifted through a No. 120 silk sieve [Fr. Cod.], or powdered and sifted through a 1,600-mesh sieve [Russ. Ph.], or through a 1,000-mesh sieve till the residue forms a fibrous mass [Swed. Ph.]. [B. 95 (a, 38).]—*Syrupus zingiberis*. A preparation made by triturating 2 parts of fluid extract of ginger with 25 of powdered sugar, maintaining at a heat of not more than 60° C. till the alcohol is evaporated, dissolving the residue in 35 parts of water, filtering, washing till 60 parts are obtained, adding 40 of sugar and straining [U. S. Ph.]; or by mixing 6 fluid drachms of stronger tincture of ginger with 19 fluid oz. of syrup [Br. Ph.]; or by macerating 1 part of ginger in 7 parts of water and 1 part of 90-per-cent. alcohol [Russ. Ph.] (in enough boiling water [Swed. Ph.]), and dissolving 120 [Russ. Ph.] (126 [Swed. Ph.]) of sugar in 70 of filtered liquid. [B. 95 (a, 38).]—*Tabellæ zingiberis*. See *Trochisci zingiberis*.—*Tinctura zingiberis*. Fr., *leinture de gingembre* [Fr. Cod.]. A tincture made of 5 parts of ginger in No. 40 powder, alcohol enough to make 5 parts by percolation [U. S. Ph.] (with 5 parts of dilute alcohol [Gr. Ph., Hung. Ph., Swiss Ph.], 70-per-cent. alcohol [Russ. Ph.], or 80-per-cent. alcohol [Fr. Cod., Belg. Ph.]), or of 24 oz. of ginger with enough alcohol to make 20 fl. oz. by percolation [Br. Ph.]. [B. 95, 119 (a, 38).]—*Tinctura zingiberis anglica* [Swiss Ph. (seu *fortior* [Br. Ph.])]. A tincture made of 10 oz. of ginger with alcohol enough to make 20 fl. oz. by percolation [Br. Ph.]; or of 10 parts of ginger with alcohol enough to make 30 parts [Swiss Ph.]. [B. 95 (a, 38).]—*Trochisci zingiberis* [U. S. Ph.]. Syn., *tabellæ zingiberis* [Belg. Ph.]. Lozenges made of 200 parts of tincture of ginger with 2,000 of sugar, 60 of tragacanth, and enough syrup of ginger [U. S. Ph.]; or with 12 of tragacanth, 1,788 of sugar, and enough water [Belg. Ph.]. [B. 95 (a, 38).]—*Z. album*. 1. Formerly the corm of *Arum maculatum*. [a, 35.] 2. See *White GINGER*.—*Z. amarum*. Ger., *bitterer Ingwer*. A species found in Java and the Moluccas. The spicy, bitterish rhizome is used like that of *Z. zerumbet*. The young stems are used as a spice, and the young leaves are eaten. [a, 35.]—*Z. cassumunar*. *Z. cassumuniar*. Bengal root: a native of the East Indies, Java, and the Moluccas. The tubers of the root-stock, *radix cassumunar* (seu

cassumuniar, seu *casmonar*, seu *risagon*, seu *bengale* [inodorum], seu *zingiberis silvestris*, seu *zedoaria lutea*, have a spicy, bitterish taste and a strong camphoraceous smell. They have properties somewhat like those of ginger, but are not now known in commerce. The plant is used by the natives in diarrhoea and colic. [a. 35.]—*Z. citrinum*. The *Curcuma longa*. [a. 35.]—*Z. commune*. See *Black ginger*.—*Z. dubium*. Ger., *zweifelhafter Ingwer*. A Guinea plant used as an aromatic. It is not well known, and is doubtfully referred to this genus. [a. 35.]—*Z. flavum*. The *Curcuma longa*. [a. 35.]—*Z. germanicum*. Formerly the corn of *Arum maculatum*. [a. 35.]—*Z. graminum*. A species found in the islands of the Indian Ocean. The root-stock, which is grayish externally and white internally, is smaller than true ginger and has shorter joints. It has the medicinal properties of ginger, but is not used as a spice, on account of its unpleasant bitterish taste. [a. 35.]—*Zingiberis radix*. See *Z. (2d def.)*.—*Z. luteum*. The *Curcuma longa*. [a. 35.]—*Z. marginatum*. A species found in the East Indies, Java, and the Moluccas. The seeds and root-stock are used as a mild aromatic. [a. 35.]—*Z. mioga*. A Japanese species. The tuberous, spicy root-stock is used as a food and in medicine. [a. 35.]—*Z. nigrum*. See *Black ginger*.—*Z. officinale*. Fr., *gingembre*, *herbe au gingembre*. Ger., *gebrüchlicher* (oder *gemeiner*, oder *echter*, oder *wahrer*) *Ingwer*. A native probably of India, but not known in its wild state; a plant cultivated in the

ZINGIBER OFFICINALE. [A. 327.]

tropics for its fleshy rhizome, which constitutes ginger. Ginger contains starch, a yellow, volatile oil belonging to the terpenes, and a pungent resinous principle; it is used as a stimulant, carminative, rubefacient, etc. [a. 35.]—*Z. purpureum*. See *Z. cassumunar*.—*Z. spurium*. See *Z. zerumbet*.—*Z. vulgare*. See *Black ginger*.—*Z. zanthorrhizon*. See *Z. cassumunar*.—*Z. zerumbet*. Fr., *amome sauvage*, *balisier*. Broad-leaved ginger of Ceylon and the East Indies. The root-stock, *radix zerumbet* (seu *zerumbeth*, seu *zerumbet*, seu *zingiberis silvestris*, seu *bengale*, seu *bringalle inodorum*), is aromatic and bitter, and is used in fomentations and cataplasms. It is not now used internally. [a. 35.]

ZINGIBERIN, n. $Zi^{2n}jib^{2e}r^{2n}$. Ger., *Z. See Oleoresina ZINGIBERIS*.

ZINK (Ger.), n. $Tsi^{2n}nk$. See **ZINC**.—**Antimonsaures Z.** Zinc antimonate.—**Arsensaures Z.** Zinc arsenate.—**Baldriansaures Z.** See **Zinc valerianate**.—**Bromz'**. See **Zinc bromide**.—**Carbolschwefelsaures Z'oxyd**. See **Zinc sulphocarbolate**.—**Cyanz'**. ZINN (Ger.), n. Tsi^{2n} . See **TIN**.—**Graues Sauerz'**, **Graues Z'oxyd**. See **CALX Jovis**.—**Körnerz'**. See **Grain tin**.—**Salpetersaures Z.** Tetrachloride of tin obtained by the action of nitrohydrochloric acid upon metallic tin.—**Weissliches Z'oxyd**, **Z'asche**. See **CALX Jovis**.—**Z'baum. See **ARBOR Jovis**.—**Z'bromid**. See **TIN tetrabromide**.—**Z'bronür. See **TIN dibromide**.—**Z'butter**. Butter of tin (see under **TIN tetrachloride**). [B.]—**Z. chlorid**. See **TIN tetrachloride**.—**Z'chlorür**. See **TIN dichloride**.—**Z'diäthyl**. See **STANDIETHYL**.—**Z'dipropyl**. See **STANDIPROPYL**.—**Z'geschrei**. The "tin-cry"; the peculiar creaking sound made by tin when it is bent. [B.]—**Z'jodid**. See **TIN tetraiodide**.—**Z'jodür**. See **TIN diiodide**.—**Z'krätze**. The pellicle which covers the surface of tin when it is oxidized. It consists of a mixture of metallic tin and tin dioxide. [B.]—**Z'oxyd**. See **TIN dioxide**.—**Z'oxydul**. See **TIN monoxide**.—**Z'salz**. See **TIN salt**.—**Z'säure**. See **STANNIC acid**.—**Z'stein**. See **TINSTONE**.—**Z'triäthyl**. See **STANTRIETHYL**.****

ZINNOBER (Ger.), n.s. Tsi^{2n} -nob^{es}r. Written also *Zinnabar*. See *Red mercury sulphide*.—**Falscher Z.** See **BASIC LEAD chromate**.—**Grüner Z.** See **CHROMIUM GREEN**.

ZINZIBER (Lat.), n. n. $Zi^{2n}zib^{2u}r^{2e}(r)$. Gen., *-zib'eris*. Gr., *ζινζιβερ*. Ginger. [a. 35.]

ZIPPEL (Ger.), n. $Tsi^{2p}f^{2e}l$. See **CULMEN** and **LACINIA**.—**Z'chen**. See **LACINULA**.

ZIPPERLEIN (Ger.), n. $Tsi^{2p}p^{2e}r^{2l}in$. See **PODAGRA**.

ZIRBEL (Ger.), n. $Tserb^{2e}l$. See **PINEAL GLAND**.—**Z'drüse**, **Z'knapf**. See **Z. (2d def.)**. See **PEDUNCLES of the pineal gland**.—**Z'saud**, **Z'steichen**. See **ACERVULUS**.—**Z'streife**. See **PEDUNCLES of the pineal gland**.

ZIRBELNUSS (Ger.), n. $Tserb^{2e}l$ -nuss. The fruit of *Pinus cembra*. [a. 35.]—**Z'baum**, **Z'fichte**. See **PINUS cembra**.

ZIRBUS (Lat.), n. m. $Zu^{2r}b(z^{2r}b)^{2u}s(u)^{2a}$. See **OMENTUM**.

ZIRCON, n. $Zu^{2r}k^{2o}n$. Fr., *Z. Ger., Zirkon*. Native zirconium silicate. [B.]

ZIRCONATE, n. $Zu^{2r}k^{2o}n$ -at. A compound of zirconium oxide with the oxide of another element or radicle. [B. 3.]

ZIRCONIA, **ZIRCONIC ACID**, n.s. $Zu^{2r}k^{2o}n^{2i}a^{2s}$.— $o^{2n}i^{2k}$. Fr., *zircone*, *acide zirconique*. See **ZIRCONIUM oxide**.

ZIRCONIUM (Lat.), n. n. $Zu^{2r}k^{2i}(z^{2r}k)^{2u}m^{2u}(u)^{2m}$. Fr., *z. Ger., Zirkon, Zirkonium*. A metallic element discovered by Klaproth in 1789. It occurs in the mineral zircon, and other rare mineral compounds. It is obtained either in the form of an amorphous iron-gray powder, which acquires a metallic lustre on polishing, or as brittle, scale-like crystals. In composition it acts usually as a tetrad, forming compounds resembling in chemical structure those of tin. Symbol, Zr ; atomic weight, 90. [B. 3.]—**Z. oxide**. The compound ZrO_2 , obtainable both as an amorphous powder and as prismatic crystals. [B. 3.]

ZIRCONOFLUORIDE, n. $Zu^{2r}k^{2o}n$ -o-flu² $z^{2o}r^{2d}(id)$. A double fluoride of zirconium and another metal. [B. 3.]

ZIRKEL (Ger.), n. $Tserk^{2e}l$. See **CIRCLE** and **CIRCULUS**.—**Röhrenz'**. The circulatory system. [K. 13.]

ZIRKON (Ger.), n. $Tserk$ -on'. See **ZIRCON**.—**Z'erde**. See **ZIRCONIUM oxide**.

ZIRKONIUM (Ger.), n. $Tserk$ -on'-ium. See **ZIRCONIUM**.

ZIRMET (Ger.), n. $Tserm^{2e}t$. The genus *Tordylus*. [a. 35.]

ZISCHELN (Ger.), n. $Tsi^{2s}h^{2e}ln$. See **BLESTIAS**.

ZISCHEN (Ger.), adj. $Tsi^{2s}h^{2e}nd$. See **SIBILLANT**.

ZISTENSAFT (Ger.), n. $Tsi^{2st}e^{2n}$ -za^{2ft}. Succus hypocistidis. [a. 35.] See under **CYTISUS hypocistis**.

ZITTER (Ger.), n. $Tsi^{2t}e^{2r}$. See **TETTER**.

ZITTERGRAS (Ger.), n. $Tsi^{2t}e^{2r}$ -gra^{2s}. The genus *Briza*.

ZITTERLÄHMUNG (Ger.), n. $Tsi^{2t}e^{2r}$ -lam-un². See **PARALYSIS agitata**.

ZITTERMAL (Ger.), n. $Tsi^{2t}e^{2r}$ -ma^{2l}. Tetter; herpes; serpigo. [G.]

ZITTERN (Ger.), n. $Tsi^{2t}e^{2r}n$. See **SHIVER** and **TREMOR**.—**Bleiz'**. See **MOLYBDOPTOMOS**.—**Gliederz'**. Tremor of the limbs. [a. 34.]—**Horizontales Augenz'**. See **NYSTAGMUS oscillatorius**.—**Hydatidenz'**. See **HYDATID THRILL**.—**Intentionsz'**. See **Volitional tremor**.—**Säufierz'**. See **DELIRIUM tremens**.

ZITTERSTAAR (Ger.), n. $Tsi^{2t}e^{2r}$ -sta^{2r}. See **Tremulous CATARACT**.

ZITTWER (Ger.), n. $Tsi^{2t}v^{2e}r$. See **ZEDOARY**.—**Z'öl**. See **Oil of WORMSEED**.—**Z'samen**. See **SANTONICA**.—**Z'wurzel**. See **ZEDOARY**.

ZITZE (Ger.), n. $Tsi^{2i}z^{2e}$. 1. See **NIPPLE**. 2. The mastoid process of the temporal bone.—**Z'nausschnitt**. See **Digastric fossa**.—**Z'necke**. See **ANGULUS mastoideus**.—**Z'nörmig**. Mammary form, mastoid.

ZIZANIA (Lat.), n. f. $Zi^{2z}(zez)$ -an²ⁿ $i^{2i}a^{2s}$. From *ζίζανιον*, darnel. Fr., *zizane*, *zizanie*. Ger., *Haferreis*. A genus of aquatic grasses. [a. 35.]—**Z. aquatica**. Fr., *zizane* (ou *zizanie*) *aquatique*. Indian (or Canadian) rice, water-oat of North America. The grain is said to be more nutritious than ordinary rice. [a. 35.]

ZIZYPHIC ACID, n. $Zi^{2z}i^{2f}i^{2c}k$. Fr., *acide zizyphique*. Of Latour, a crystallizable acid contained in the aqueous extract of the wood of *Zizyphus sativa*. [B. 93, 93 (a. 14).]

ZIZYPHUS (Lat.), n. f. $Zi^{2z}(zez)^{2i}(u)^{2f}$ -u^{2s} $(u)^{2a}$. Fr., *jujubier*. Ger., *Judendorn*. A genus of shrubs or trees typical of a tribe (*Zizyphacee*) of the *Rhamnaceae*; in the pl., *zizyphi*, the fruits of *Z. vulgaris*. [a. 35.]—**Baccae** (seu *Fructus*) *zizyphi*. See *Jujubes*.—**Z. Baeli**. A singular species. The astringent root is used for gonorrhoea and other discharges. The fruits are considered poisonous. [a. 35.]—**Z. exserta**. A species found in the Philippines; used in syphilis and skin diseases. [a. 35.]—**Z. glabrata**. An Indian species. The leaves are used as an alternative, and the bark yields a sort of kino. [a. 35.]—**Z. Joazeiro**. A Brazilian tree with a bitter, astringent, anemic, and febrifuge bark. [a. 35.]—**Z. Jujuba**. *Z. laeflora*. Fr., *jujube cotonneux*, *masson*. Ger., *stumpfblättriger Judendorn*, *echter Jujubenbaum*. Jujube-tree of China, Cochinchina, the East Indies, etc. The fruits are used like those of *Z. vulgaris*, but are not so sweet. The leaves are used in gonorrhoea. The bitter, astringent bark, which yields a variety of kino, is used in aphthae, diarrhoea, etc., and as a tonic. The juices of the root-bark is used as a purgative and in gout and rheumatism. Lac is obtained from this tree. [a. 35.]—**Z. lotus**. Fr., *lotier des lotophages*. Ger., *Lotosbaum*. A species found along the African shore of the Mediterranean, the *Λωτός* of Theophrastus. The fruits (see under *JUUBE*) are used medicinally, and are supposed to have

been the fruits eaten by the lotophagi. [a. 35.]—*Z. mitis*, *Z. mucronata*. A Senegambian species with edible fruits. [a. 35.]—*Z. napaea*. Fr., *jububier napaea*. Ger., *glatter Judendorn*. An East Indian species. The seeds produce mild vertigo and diarrhoea. The root is used in flatulent colic and as a vulnerary, the bark of the branches in fevers and various painful affections, and the leaves for washing dead bodies. [a. 35.]—*Z. onoplia*. Ger., *schieblättriger Judendorn*. A species found in Ceylon, the East Indies, Java, etc. The bark is used as a febrifuge and as a digestive tonic. The seeds have the properties of those of *Z. napaea*. [a. 35.]—*Z. orthacantha*, *Z. orthacantha*. Fr., *jububier sedorum*. An edible-fruited species found in Senegal, perhaps a variety of *Z. jububa*. The leaves are used in gonorrhoea. [a. 35.]—*Z. sinensis*. Ger., *chinesischer Judendorn*. A species probably indigenous to China, cultivated in southern Europe for its fruits, which are used like jujubes. [a. 35.]—*Z. saporifera*. A shrub of northern China. The seeds, which are used in Chinese medicine, are calmative and hyponic. [a. 35.]—*Z. sororia*. An East Indian species closely related to *Z. jububa*. The leaves are used as an alternative. [a. 35.]—*Z. spina Christi*. Ger., *Christdorn*, *palastin'scher Judendorn*. Nubk-tree of Palestine, Christ's thorn. The unripe fruits, which are astringent, are used in atonic conditions of the stomach and intestines, and the ripe fruits to make a refrigerant drink for use in fevers and inflammatory complaints. [a. 35.]—*Z. vulgaris*. Fr., *jububier cultivé*, *chichoulier*, *croc de chien*, *épine à cerise*, *gindowier*. Ger., *gemeiner Judendorn*, *Brustbeerenbaum*, *Jububa*. A native of the Orient, especially of Syria, cultivated in the Mediterranean regions of Europe for its fruits (See JUJUBE). [a. 35.]—*Z. xylopyra*, *Z. xylopyrus*. An East Indian and Ceylon species with edible kernels. [a. 35.]

ZOAMINE (Fr.), n. Zo-a'-men. An animal alkaloid. [Boucheron, "Union méd.", Dec. 12, 1885, p. 979.] See PROMAINE.

ZOAMYLIN, n. Zo-a'm'il-i'n. See AMYLOID (2d and 4th def's).

ZOANTHROPY, n. Zo-a'nth'rop'i-Lat., *zoanthropia* (from ζῶον, an animal, and ἄνθρωπος, a man). Ger., *Thierwahn*. A variety of insanity in which the patient imagines himself changed into some animal. [a. 34.]

ZOETROPE, n. Zo-e'trop. From ζῶν, life, and τροπή, a turning. A toy, known also as the "wheel of life" and called by Stricker a *stroboscope*, in which a number of pictures, closely alike, but yet varying progressively in one or more particular features, are brought into view in rapid succession by rotating a drum-like wheel in which they are laid, the effect being that the object portrayed seems to perform intrinsic movements.

ZOIATRIA (Lat.), **ZOIATRICA** (Lat.), n's f. Zo-i-a't'ri-a (a't-ri-re) a't'ri-a (a't'ri) a't'ri-a. From ζῶον, an animal, and ιατρεία, or ιατρική, medical treatment. Fr., *zoiatricque*. Ger., *Thierheilkunde*. Veterinary medicine.

ZOIATRUS (Lat.), n. m. Zo-i-a't'ri-us (ru's) (ru's). From ζῶον, an animal, and ιατρός, a physician. Fr., *zoiatre*. Ger., *Thierarzt*. A veterinarian.

ZOICITE (Fr.), n. Zo-e-se-ta. See NEURICITY.

ZOIDIN, n. Zo-i'd-i'n. Fr., *zoidine*. See BAREGIN.

ZOISM, n. Zo-i'zm. Lat., *zoismus* (from ζῶν, life). Fr., *zoïsme*. The aggregate of vital functions and processes. [A. 385 (a. 48).]

ZOMIDIN, n. Zo-m'i'd-i'n. Fr., *zomidine*. An aromatic brown substance obtained from beef extract. [A. 385 (a. 48).]

ZOMODON (Lat.), n. n. Zom-o'd'o'n. A reddish-brown aromatic coloring matter obtained from flesh, bile, and other animal substances. [L. 50 (a. 14).]

ZOMOS (Lat.), n. m. Zom-o's. Gr., ζώμος. Lat. broth.

ZONA (Lat.), n. f. Zon'a. See ZONE and ZOSTER.—**Ophthalmic z.** See ZOSTER ophthalmicus.—**Z. arcuata** (of the cochlea). The middle section of the membrana basilaris. [F. 3.]—**Z. castiatis** [Stephanus]. See HYMEN (2d def.).—**Z. choriacea. The thickened margin of the membrana basilaris where it rests on the lamina spiralis ossæ. [L. 31.]—**Z. denticulata** (cochleæ). 1. The z. choriacea and the z. interna of the basilar membrane. 2. Of Deiters, the upper surface of the z. choriacea. [L.]—**Z. externa**. That portion of the membrana basilaris that is external to the outer rods of Corti. [L.]—**Z. fasciculata**. Of Arnold, the main portion of the cortex of the supracapsular capsule. It lies beneath the z. glomerulosa, and is composed of elongated and column-like anastomosing groups of cells. [C. J. 30.]—**Z. ganglionaria**. A large ganglion layer in Rosenthal's canal, lying on the periphery of the modiolus, between the fibrous bundles of the latter and the spiral lamina. [F. 8.]—**Z. ganglioneux** (Fr.). A form of zoster in which grayish eschars develop about the vesicles, followed by deep ulceration; occurring usually in the aged or in persons of depraved constitution. [G. 51.]—**Z. glomerulosa**. Of Arnold, the layer of the supracapsular capsule next the fibrous capsule, forming the proper substance of the body of the organ and consisting of oval or rounded masses of cells that are really the ends of cells of the z. fasciculata. [U. 30.]—**Z. granulosa**. 1. See *Z. radiata* (1st def.). 2. Of von Baer, the discus proligerus.—**Z. herpetica**. See HERPES pericelsis.—**Z. ignea**. See ZOSTER.—**Z. incerta**. Of Forrel, a layer of fine longitudinal nerve-fibres, with a few scattered ganglion-cells, immediately adjoining the reticular formation. [I. 17 (K.).]—**Z. interna**, *Z. lævis*. The portion of the membrana basilaris that is internal to the outer rods of Corti. [L. 31.]—**Z. mediana**. See *Z. choriacea*.—**Z. membranacea**. See MEMBRANA basilaris.—**Z. mollis**. See LAMINA spiralis membranacea.—**Z. nervæ**. See *Z. interna* and *Z. choriacea*.—**Z. orbicularis**. A thickening of the capsular ligament of the hip joint corresponding to the margin of the acetabulum. [L.]—**Z. ossæ**. See LAMINA spiralis ossæ.—**Z. pectinata** (of the cochlea). The external, finely-striated section of the lamina spiralis membranacea. [F. 32.]—**Z. pellucida**. Fr., *zone transparente*, *membrane ovulaire* (ou vitelline). Ger., *Dotterhaut*, *Dotterhülle*,**

Eihaut, *Keimhülle*. Of von Baer, the vitelline membrane, so called on account of its appearing as a broad transparent band lying between the opaque yolk substance within and the granular cells of the discus proligerus which adhere to it externally. According to Pflüger, however, it is an adventitious layer, external to the true vitelline membrane. It is thought by some to be a product of the membrana granulosa, but others regard it as a product or transformation of the surface of the vitellus. When moderately magnified it appears homogeneous, but under a high power it exhibits a striated appearance as if it were porous. [A. 8; J. 1, 21, 23, 30, 35.]—**Z. perforata** of the cochlea. The inner division of the lamina spiralis membranacea, which is perforated in numerous places for the passage of the fibres of the cochlear nerve. [F. 32.]—**Z. radiata**. 1. The subepithelial coat of the ovarian ovum, made up of a layer of columnar cells, belonging to the discus proligerus. 2. See *Z. pellucida*.—**Z. repens**. See ZOSTER.—**Z. reticularis**. The deepest layer of the cortex of the supracapsular capsule. Here the columns of cells disappear, only round groups remaining in between the septal connective tissue. [C. J.]—**Z. serpinigosa**. See ZOSTER.—**Z. striata**. See *Z. pellucida*.—**Z. tecta**. See HABENULA tecta.—**Z. tendinosa**. See ANNULUS fibrosus atrio-ventricularis.—**Z. traumatica paradoxa**. Fr., *z. traumatique paradoxal*. A name given by Besnier to a case of zoster following traumatism, but appearing upon the side opposite to that upon which the injury was received. [Ann. de dermat., Arch. f. Derm. u. Syph., xlii, 1890, 4, 5, p. 751 (C.).]—**Z. valsalvæ**. See LAMINA spiralis membranacea.—**Z. vasculosa**. Of Waldeyer, the central vascular stroma of the ovary.—**Z. volatica**. See ZOSTER.

ZONARIA (Lat.), n. f. Zon-a'ri-a (i'a). From *zonarius*, belonging to a belt. Ger., *Gürteltang*, genus of algae. The *Zonariaceæ* of Nägeli are an order of Alga, consisting of *Fuacea*, etc. The *Zonariæ* of Gray are the *Dictyotidæ*. The *Zonariæ* are a tribe of Alga, consisting of *Z.* and another genus. [a. 35.]—**Z. fasciola**, *Z. pavonia*, *Z. squamaria*. Species found in the Mediterranean Sea and warm parts of the Atlantic, sometimes forming a part of helminthochorton. [a. 35.]

ZONATE, adj. Zon'at. Lat., *zonatus*. Ger., *gegrütelte*. Zoned, marked with concentric bands or zones. [a. 35.]

ZONE, n. Zon. Ger., *Gürtel*, from *ζώνναι*, to girdle. Lat., *zona*. Fr., *z.* Ger., *Z.*, *Gürtel*, *Gürtelstreifen*. A belt or girdle, a circular band differing from the surface carrying it. [a. 35.]—**Boundary z.** Fr., *z. limitante*. Ger., *Grenzschicht*. The part of the medulla of the kidney next the cortex. In it are groups of blood-vessels and uriniferous tubules alternate. [J. 30, 35.]—**Cervical z. of the uterus** [Barnes]. Fr., *z. cervicale (ou inférieure)*. Syn.: *official z.* [Barnes]. See figure under *Z's of the uterus*.—**Ciliary z.** Lat., *ligamentum suspensorium lentis*, *zonula zinnii*. Fr., *ligament suspenseur du cristallin*. Ger., *Zonula der Linse*, *Strahlenbündchen*, *Ciliarlamelle*. A thin, transparent membrane which begins with a serrated margin on the ciliary processes, and extends inward nearly to the equator of the lens, where it is intimately connected with the posterior capsule. It consists of a portion lying above the ciliary processes in folds, and a smooth portion covering the processes and extending to the capsule. Microscopically it consists of slight, sharply defined fibres connected by a delicate intercellular substance. [F.]—**Epileptic z.** A region of the face, stimulation of which gives rise to epileptic convulsions in animals which have sustained a severe lesion of the spinal cord upon the same side. [Landois (K.).]—**Epileptogenous z.** A z. comprising certain motor tracts of the cerebral cortex which give rise to convulsions which give rise to epileptoid convulsions of Brown-Séquard, a tract including those portions of the skin of the body that produce epileptoid convulsions on being irritated, as observed in guinea-pigs after section of the spinal cord. [Neurol. Ctbl., iii, 1883, p. 34 (K.); a. 34.]—**Fibrous z. of the heart**. See ANNULUS fibrosus atrioventricularis.—**Fundal z. of the uterus**. Fr., *z. du fond*. See figure under *Z's of the uterus*.—**Gefässz.** (Ger.). See VASCULAR AREA.—**Granular boundary z. of dentin. See GRANULAR LAYER of dentin.—**Hysterogenic z's**. Hypersensitive areas in various portions of the body pressure on which produces symptoms of hysteria. [a. 34.]—**Intermediate z.** Of Guillard, the active z. of tissue immediately surrounding the central region of parenchyma in the stem of monocotyledonous plants. [a. 35.]—**Internal z. of the lenticular nucleus**. A z. adjacent to the internal capsule, with which it is connected by transverse white fibres. [I. 1 (K.).]—**Keimz.** (Ger.). See under SPERMATOMERE (1st def.).—**Körnerz.** (Ger.). The stratum granulosa of the cerebellum. [J.]—**Kreuzungsz.** (Ger.). An area comprising certain portions of the cerebral hemispheres in which there is marked decussation of the nerve-fibres. [I. 17 (K.).]—**Meridional z. of the uterus** [Barnes]. Fr., *z. du méridien (ou du milieu)*. See figure under *Z's of the uterus*.—**Neutral z.** In the *Characææ*, a line, produced by the absence of chlorophyll-bodies, situated on the outer non-moving portion of the protoplasm of a cell. [a. 35.]—**Official z.** [Barnes]. See *Cervical z. of the uterus*.—**Papillary z.** See *Boundary z.*—**Placental z.** Fr., *z. placentaire*. The z. of the uterus in which the placenta is attached.—**Posterior radicular z.** See CUNEATE FUNICULUS.—**Spinalz.** (Ger.). The z., or tract, of nerve-fibres in the spinal cord. [I. 27 (K.).]—**Striated z.** See *Zona pellucida*.—**Thickening z.** Fr., *z. génératrice*. The z. of thin-walled cells (cambium) between the wood and bark, constituting the active formative tissue of a dicotyledonous stem. [a. 35.]—**Transparent z.** See *Lateral disc.*—**Vordere gemischte Seitenstrangz.** (Ger.). The anterior mixed z. or tract of the lateral column of the spinal cord. [I. 1 (K.).]—**Wachsthumz.** (Ger.). See under SPERMATOMERE (2d def.).—**Z's blanches** (Fr.). Of Vicq d'Azyr, certain arc-like folds of the membrana chazalifera that extend from the insertion of one chazala to that of the other. [A. 4.]—**Z. dangereuse** (Fr.). In surgery, a region about the clavicle extending from 14 to 18 centimetres over the neck, the arm, and the chest, operations in which are dangerous because of the risk of opening the veins and admitting**

air into them. [A. 301 (a, 34).]—*Z. des papilles* (Fr.). See *STRUTUM glomerulosum* and cf. *Papillary z.—Z. du méridien* (Fr.). *Z. du milieu* (Fr.). See figure under *Z's of the uterus*.—*Z. génératrice* (Fr.). See *Thickening z.—Z. inférieure* (Fr.). See figure under *Z's of the uterus*.—*Z. maniable* (Berl) (Fr.). An atmosphere, charged with a measured quantity of anesthetic vapor, in which it is perfectly safe to leave a patient for an unlimited period without attention. [Holmes (a, 25).]—*Z. of Haller*. See *Ciliary z.—Z's of the basilar membrane*.—See *Zona externa* and *Zona interna*.—*Z's of the lenticular nucleus*. Three laminae consisting of masses of gray matter separated by white bundles (medullary laminae). [I, 23 (K).]—*Z's of the uterus*. Three z's into which R. Barnes divides the inner surface of the gravid uterus, with reference to the implantation of the placenta, designated the *fundal z.*, the *meridional z.*, and the *cervical z.* [A. 40.]—*Z. of Zinn*. See *Ciliary z.—Z. transparent* (Fr.). See *Zona pellucida*.

THE ZONES OF THE UTERUS (AFTER R. BARNES).

a, The fundal zone; b, the equatorial zone; c, the cervical zone; d, the limit of spontaneous placental detachment.

ZONED, adj. *Zond.* Fr. *zoné*. See *ZONATE*.

ZONITE, n. *Zon'it*. From *zona*, a zone. Of Packard, see *Somite* (3d def.).

ZONOPOLACENTAIRES (Fr.), n. pl. *Zo-no-pla-sa-n'z-ta'r*. See *MESALLANTOIDS*.

ZONULA (Lat.), n. f. *Zo'n(zon)'u(l)'u'*-a³. Dim. of *zona*, a belt. See *ZONULE.—Z. cartilaginea*. See *Lamina spiralis.—Z. ciliaris*. See *Ciliary zone.—Z. ossea laminae spiralis*. See *Lamina spiralis ossea.—Z. Zinnii*. See *Ciliary zone*.

ZONULAR, adj. *Zo'n'u'l-a'r*. Fr. *zonulaire*. Having the form of a zone or zonule.

ZONULE, n. *Zo'n'u'l*. Lat., *zonula*. A small zone. [a, 48.]—*Z. of Zinn*. See *Ciliary zone*.

ZOO-AMYLIN, n. *Zo-o-a'm'i'l-i'n*. From *ζῷον*, an animal, and *ἀμύλον*, starch. See *AMYLOID* (2d and 4th def's).

ZOOBIOLOGY, n. *Zo-o-bi-o'l'o'-j'i*. From *ζῷον*, an animal, *βίος*, life, and *λόγος*, understanding. Animal biology. [a, 48.]

ZOOBLASTE (Fr.), n. *Zo-o-bla'st*. See *Animal CELL*.

ZOOCAMBIUM (Lat.), n. n. *Zo-o(o)-ka'm'b(k'a'm'b)'i'u-m'*-(u'm). From *ζῷον*, an animal, and *cambium* (q. v.). See *BLASTEMA* (4th def.).

ZOOCARPUM (Lat.), n. n. *Zo-o(o)-ka'r'p'u'm'*-(u'm). From *ζῷον*, an animal, and *καρπός*, fruit. Fr. *zoocarpe*. See *ZOOSPORE* (1st def.).

ZOOCHEMIA (Lat.), n. f. *Zo-o(o)-ke'z'm(ch'a'm)'i'e'*-a³. From *ζῷον*, an animal, and *χημία*, chemistry. Fr. *zoochimie*. Ger. *Zoochemie*. See *BIOCHEMISTRY*.

ZOOCHIRURGIA (Lat.), n. f. *Zo-o(o)-ki'r(ch'a'r)'u-r'*-(u'r)'j'i²-(g'i²)-a³. From *ζῷον*, an animal, *χέρς*, the hand, and *εργον*, work. See *Veterinary SURGERY*.

ZOODERMIES [Plorry] (Fr.), n. pl. *Zo-o-de'r-m'e*. Cutaneous diseases caused by animal parasites. [A. 260 (a, 21).]

ZOODYNAMIA (Lat.), n. f. *Zo-o(o)-di'n'a(m)'a-m'*-(a'm)'i²-a³. From *ζῷον*, an animal, and *δύναμις*, power. Fr. *zoodynamie*. Ger. *Zoodynamie*. Vital force as developed in animals. [A. 50 (a, 48).]

ZOOALACTINIA (Lat.), n. f. *Zo-o(o)-ga'l'(ga'l)'a-kt'(a'kt)'i-n'*-(en)'a³. From *ζῷον*, an animal, and *γάλα*, milk. See *PALMELLA.—Z. imetropia*. See *BACILLUS prodigiosus*.

ZOOGAMETE, n. *Zo-o-ga'm'e't*. See *PLANO-GAMETE*.

ZOOGENE, n. *Zo'o-jen*. Lat., *zoogenum*. Fr. *zoogène*. See *BAREGIN*.

ZOOGENY, n. *Zo-o-j'e'n-i*. Lat., *zoogenia*, *zoogenesis* (from *ζῷον*, an animal, and *γεννάν*, to engender). Fr. *zoogénie*. Ger. *Thierzeugung*. Animal reproduction. [A. 50 (a, 48).]

ZOOGLCEA (Lat.), n. f. *Zo-o(o)-gle'(glo'z'e)-a³*. From *ζῷον*, an animal, and *γλοιός*, a glutinous substance. Fr. *zooglee*. Ger. *Galertstock* (1st def.). 1. A mass or colony of schizomycetous *Fungi* enveloped in a gelatinous matrix secreted by them in some stage (the z stage) of development during which the cells increase rapidly by fission. 2. The genus *Palumella*. [a, 35.]

ZOOCONIDIUM (Lat.), n. n. *Zo-o(o)-go'ni'd'i'u-m'*-(u'm). From *ζῷον*, an animal, and *gonidium* (q. v.). A motile gonidium (conidium). [a, 35.]

ZOOGONOUS, adj. *Zo-o-g'o'n'o'u-s*. From *ζῷον*, life, and *γεννάν*, generation. Fr. *zoogone*. See *VITIPAROUS*.

ZOOGONY, n. *Zo-o-g'o'n-i*. From *ζῷον*, an animal, and *γεννάν*, generation. Ger. *Zoogonie*. That department of embryology which relates to the origin of species of animals. [A. 8.]

ZOOGRAPHY, n. *Zo-o-g'r'a'f'i*. Lat., *zoographia* (from *ζῷον*, an animal, and *γράφειν*, to write). Fr. *zoographie*. Ger. *Thierbeschreibung*. Descriptive zoology.

ZOOIATRIE (Fr.), n. *Zo-o-e-a'tri-e*. Veterinary medicine.

ZOOID, adj. *Zo'o'id*. Ger. *zooideus* (from *ζῷον*, an animal, and *είδος*, resemblance). Lat., *zoides*. Fr. *zooïde*. Ger. *z.* 1. Like an animal; 2. of the nature of an animal. 2. As a n., an organism resembling an animal, especially one of the more or less completely independent organisms produced by gemmation or fission, whether remaining attached to one another or detached and set free. [A. 12; B, 28 (a, 27).] 3. As a n., of Brücke, the nucleus and coloring

matter of a red blood-corpuscle (cf. *Ecoind* [1st def.]). [J, 26, 35; K.] 4. As a n., in the pl. z's, the highly specialized organs of such animals as the hydroids and other compound forms, which might be mistaken for distinct individuals. [L, 206 (a, 27).]

ZOOLOGY, n. *Zo-o'l'o'-j'i*. Lat., *zoologia* (from *ζῷον*, an animal, and *λόγος*, understanding). Fr. *zoologie*. Ger. *Zoologie*. The science of the structure, physiology, distribution, and classification of animals.—*Medical z.* Of Moquin-Tandon, the study of drugs of animal origin. [a, 34.]

ZOOMAGNETISM, n. *Zo-o-ma'g'n'e't-i'z'm*. Lat., *zoomagnetismus* (from *ζῷον*, an animal, and *ἀγνῆς*, a magnet). Fr., *zoomagnétisme*. See *Animal MAGNETISM*.

ZOOMEPHITIS (Lat.), n. f. *Zo-o(o)-me'p'i'e'*-(ti's). Gen., *-it'idis* (-idis). From *ζῷον*, an animal, and *mephitis*, a pestilential exhalation. Fr. *zooméphite*. Mephitis originating in the decay of animal matter. [L, 50 (a, 48).]

ZOOMYLE (Fr.), n. *Zo-o-mel*. From *ζῷον*, an animal, and *μύλη*, a mole. Of I. Geoffroy Saint-Hilaire, a genus of monsters including uterine moles. [a, 34.]

ZOON (Lat.), n. *Zo-o'n*. Gr., *ζῷον* (from *ζωή*, life). See *ANIMAL*.

ZOONIC, adj. *Zo-o'n'i'k*. Pertaining to animals; obtained from animal substances. [L, 56.]—*Z. acid*. Fr., *acide zoonique*. Of Berthollet, an acid obtained from animal oil; said to be pyroigneous acid mixed with an animal substance. [B, 46 (a, 14).]

ZOONOMY, n. *Zo-o'n'o'm-i*. Lat., *zoonomia* (from *ζῷον*, an animal, and *νόμος*, a law). Fr. *zoonomie*. See *Animal PHYSIOLOGY*.

ZOONOSIS (Lat.), n. f. *Zo-o'n'o's'i's*. Gen., *-os'osis* (-is). From *ζῷον*, an animal, and *νόσος*, disease. Ger., *Zoonose*. A contagious disease transmitted from one individual to another of different species, especially from an animal to man. [D, 3.]

ZOONOSLOGY, n. *Zo-o-no's-a-l'o'-j'i*. From *ζῷον*, an animal, *νόσος*, disease, and *λόγος*, understanding. The nosology of the lower animals.

ZOONULE (Fr.), n. *Zo-o-nu'l*. See *Somite*.

ZOOPATHOLOGY, n. *Zo-o-pa'th'o-l'o'-j'i*. Lat., *zoopathologia* (from *ζῷον*, an animal, *πάθος*, disease, and *λόγος*, understanding). See *ZOONOSLOGY*.

ZOOPELYOMETRY, n. *Zo-o-pe'l'i'-i'o'-m'e't'r-i*. Lat., *zoopelyometria* (from *ζῷον*, an animal, *πέλξ*, the pelvis, and *μέτρον*, a measure). Fr., *zoopélyométrie*. Veterinary pelvimetry. [L, 50 (a, 48).]

ZOOPLÆNOMENOLOGIA (Lat.), n. f. *Zo-o(o)-fe'n(fa'z'e'n)-o'm'e'n-o(o)-lo'i'(lo'e'g'i)'i-a³*. From *ζῷον*, life, *φαίνεσθαι*, to appear, and *λόγος*, understanding. Fr., *zooplœnomenologie*. The study of the morbid phenomena of life. [L, 30.]

ZOOPLARMACOLOGY, n. *Zo-o-fa'r'm-a'z'k-o'-l'o'-j'i*. From *ζῷον*, an animal, *φάρμακον*, a drug, and *λόγος*, understanding. Veterinary pharmacology.

ZOOPTHALMUS (Lat.), n. m. *Zo-o'p'th-a'l'(tha'z)'i-m'u's'*-(m'u's). From *ζῷον*, an animal, and *ὀφθαλμός*, the eye. Fr., *zoophthalmie*. Ger., *Thierauge*. See *BUPHTHALMUS* (2d def.).

ZOOPLYSIOLOGY, n. *Zo-o-pl'z-i'o'-l'o'-j'i*. Lat., *zoophysiology* (from *ζῷον*, an animal, *φύσις*, nature, and *λόγος*, understanding). Fr., *zoophysiology*. Ger., *Zoophysiology*. Animal physiology.

ZOOPHYTE, n. *Zo'o-fit*. Lat., *zophytum* (from *ζῷον*, an animal, and *φύτον*, a plant). Fr., *z.* Ger., *Pflanzenhier, Thierpflanze*. A plant-like animal, such as a sponge, a coral, etc. [B, 28 (a, 27).]

ZOOPLASTE (Fr.), n. *Zo-o-pla'st*. See *Spermatocyst* (1st def.).

ZOOPLASTIC, adj. *Zo-o-pla'st'i'k*. From *ζῷον*, an animal, and *πλάσσειν*, to mold. Fr., *zooplastique*. Formed from the tissue of an animal (said of grafts transplanted from some lower animal to man). [a, 34.]

ZOOSPERM, n. *Zo'o-sp'e'r'm*. Lat., *zoosperma* (from *ζῷον*, an animal, and *σπέρμα*, seed). Fr., *zoosperme*. Ger., *Samenfaden*. 1. See *ZOOSPORE*. 2. Of Bory Saint-Vincent, a spermatozoid.

ZOOSPORANGIUM (Lat.), n. n. *Zo-o(o)-sp'o'r(sp'o'r)'a-n'*-(a'n)'i, *j'i'(ge'z'i'u-m'*-(u'm). From *ζῷον*, an animal, *σπορά*, a spore, and *ἀγγών*, a cell. Fr., *zoosporangie*. In certain algae and in the phycomycetous *Fungi*, a sporangium containing motile spores (zoospores). [a, 35.]

ZOOSPORE, n. *Zo'o-sp'o'r*. From *ζῷον*, an animal, and *σπορά*, a spore. 1. A reproductive body produced by a zoosporangium; so called because it is endowed, for a while at least, with the power of locomotion. 2. A plano-gamete. [a, 35.] 3. See *FLAGELLULA*.

ZOOSPOREÆ, n. f. pl. *Zo-o(o)-sp'o'r(sp'o'r)'e'-e'*-(a'3-e'3). From *ζῷον*, an animal, and *σπορά*, seed. Fr., *Thiersporie*. A division of *Algae* having ciliated, non-sexual reproductive bodies. In some cases the division has a very extensive range, embracing the *Edogoniaceae*, *Vaucheriaceae*, a portion of the *Fuocidae*, *Cicillariaceae*, etc. [a, 35.]

ZOOSTEARIC ACID, n. *Zo-o-ste-a'r'i'k*. Fr., *acide zoostéarique*. Of Landerer, a crystallizable fatty acid obtained from the bones of fossil mammals. [B, 46, 93 (a, 14).]

ZOOTHPASIS (Lat.), n. f. *Zo-o(o)-tha'p's(th'a'p's)'i's*. Gen., *-thaps'osis* (-is). From *ζῷον*, life, and *θάπτειν*, to bury. Burial of a living person. [a, 48.]

ZOOTHECA (Lat.), n. f. *Zo-o(o)-th'e'k(thak)'a³*. From *ζῷον*, an animal, and *θήκη*, a chest. Fr., *zoothèque*. Ger., *Thierbehälter* (1st def.). 1. A case containing animals or parts of animals preserved for purposes of exhibition or demonstration. [L, 50 (a, 48).] 2. See *ANTHERIDIUM* (1st def.).

ZOOTHERAPY, n. Zo-o-thē'rā-pi-ā. Lat., *zootherapia* (from ζῷον, an animal, and θεραπεία, medical treatment). Fr., *zootérapie*. Ger., *Thierheilkunde*. Veterinary therapeutics. [a, 48.]

ZOOTOCUS (Lat.), adj. Zo-o't-ō's-ū's (u's). Gr., ζωοτόκος (from ζῷον, life, and τόκος, childbirth). See VITULO-RO.

ZOOTOXÉMIES (Piorry) (Fr.), n. pl. Zo-o-tō'x-am-e. Deteriorations of the blood resulting from animal poison. [A, 250 (a, 21).]

ZOOTOMY, n. Zo-o't-ō'm-ī. Lat., *zootomia* (from ζῷον, an animal, and τομή, a cutting). Fr., *zootomie*. The dissection of animals, especially of the lower animals; comparative anatomy.

ZOPF (Ger.), n. Tso'pf. A plait of hair. [A, 315 (a, 48).]—**Juden-z**. See *Plica polonica*.

ZOPHODES (Lat.), adj. Zo'f-od'ez(as). Gr., ζοφώδης (from ζῶφος, darkness, and εἶδος, resemblance). Fr., *zopheux*, *zophoïde*. Of Hippocrates, dark, turbid (said of urine, etc.). [L, 50 (a, 14).]

ZOPILOTL, n. See *ATLA* (4th def.).

ZOPISSA (Lat.), n. f. Zo'p(zop)-i's'sa. Gr., ζώπισσα. See *PITCE*.

ZORNIA (Lat.), n. f. Zo'r'n'i-a. A genus of leguminous herbs. [a, 35.]—**Z. angustifolia**, **Z. diphylla**. An East Indian febrifuge species. [a, 35.]

ZOSTER (Lat.), n. m. Zo'st(zost)'u'r(ar). Gen., -er'os (-er'is). Gr., *ζωστήρ* (from *ζώνω*, to gird, Fr., *z. zone*, *sangle*, *ceinturon*, *ceinture*, *feu persique* (ou sacré). Ger., *Rose*, *Gürtel*, *Gürtelflechte*, *Feuergürtel*. Shingles, eruptions; an acute vesicular eruption, usually painful, characterized by the development of groups of herpetic (see *HERPES* [2d def.]) vesicles corresponding in situation to the cutaneous distribution of a nerve. The term arises from the fact that in a common form of the disease the eruption apparently tends to encircle the body like a girdle, though practically it hardly ever occupies more than one lateral half. [G, 16.]—**Z. aigu** (Fr.). See *Z. atypicus gangrenosus et hysteriens*. See *Z. gangrenosus hystericus*.—**Z. auricularis**. A rare form of *Z. developed* only in the structures of the ear, which attacks the parts covered by the skin and also extends to the drumhead and cavity of the middle ear. [F.]—**Z. brachialis**. *Z.* of the arm and forearm, corresponding to the cutaneous distribution of the internal middle, and external cutaneous, the median, and the ulnar nerves. [G.]—**Z. capillitii et frontalis**. An awkward expression (to which *z. capillitii et frontis* would be preferable) for *z.* of the scalp and the upper portion of the face, occasionally involving the conjunctiva, cornea, and iris, corresponding to the distribution of the first branch of the fifth nerve. [G.]—**Z. cerebri**. *Z.* of cerebral origin, characterized by its extensive distribution, sometimes occupying the whole or the greater part of one side of the body. [G.]—**Z. cervico-subclavicularis**. *Z.* which begins on the neck, near the edge of the hair, and descends along the side of the neck to the shoulder, thence spreading forward over the skin between the clavicle and the nipple and over a part of the neck above the clavicle. [L, 57 (a, 50).]—**Z. chronique** (Fr.). See *Z. redivivus*.—**Z. collaris**. See *Z. occipito-collaris*.—**Z. dorso-abdominalis**. *Z.* of the back and abdomen, corresponding to the cutaneous distribution of the eighth, ninth, tenth, eleventh, and twelfth dorsal nerves. [G.]—**Z. dorso-pectoralis. *Z.* of the back and pectoral region, corresponding to the cutaneous distribution of the third, fourth, fifth, sixth, and seventh dorsal nerves.—**Z. facialis**, **Z. faciei**. Facial *z.*, which may appear upon the face, the temporal region, the external ear, and the mucous membrane of the nose, mouth, and throat; corresponding to the superficial distribution of the trigeminal nerve. [G.]—**Z. femoralis**. See *Z. lumbofemoralis*.—**Z. gangrenosus**. *Z.* in which certain the vesicles or vesicular groups become gangrenous. Usually the gangrene begins after the vesicle has formed, and can be seen in its progress, through the unbroken epidermis. At other times it occurs primarily, affecting either a single vesicle or an entire group. In the latter case the border of the gangrenous patch is seen to preserve this irregular and indented outline of a vesicular group. [G.]—**Z. gangrenosus hysteriens. Of Kaposi, a form observed in patients with hysterical symptoms among which it is supposed to belong. It differs from ordinary *z.* in the distribution of the efflorescences, which do not follow the course of a particular nerve; also in the fact that in most of the cases described the eruption was symmetrical and in the occurrence of gangrene in certain vesicular groups of the eruption. [1st Arch. für Derm. u. Syph., 1889, p. 561 (G).]—**Z. hystericus**. An eruption resembling *z.* due to hysteria (cf. *Z. gangrenosus hysteriens*). [G.]—**Z. lumbofemoralis**. *Z.* corresponding to the cutaneous distribution of the second, third, and fourth lumbar, the external anterior cutaneous, the genito-crural, and the crural nerves. It may appear upon the nates, the front and back of the thigh, and sometimes the calf of the leg.—**Z. lumbinguinalis**. *Z.* of the back and groin, corresponding to the cutaneous distribution of the twelfth intercostal and the first lumbar nerves, together with their anastomoses. [G.]—**Z. nuchæ**, **Z. occipito-collaris**. *Z.* extending from the region of the second and third vertebrae around the neck to the median line of the throat and to the chin, corresponding to the cutaneous distribution of the fourth cervical nerve. [G.]—**Z. ophthalmicus**. A disease of nervous origin, usually ushered in by more or less severe pain and tenderness in the brow or head, followed by redness and swelling of the skin and the appearance of numerous small vesicles, usually arranged in oval groups. The eruption only extends in the course of the ophthalmic division of the fifth nerve, and is therefore confined to the forehead, the anterior part of the scalp, the eyelids, and the side of the nose. It may affect only certain branches of the ophthalmic nerve. The individual vesicles become confluent, and their contents dry up into scabs which afterward drop off, leaving deep and characteristic scars. The eyeball does not suffer, unless the oculo-nasal branch is involved, when small corneal ulcers may occur or iritis may develop. The temperature of the affected parts is decidedly increased, but the sensibility is dimin-****

ished. It is said to occur but once in the life of a patient. [F.]—**Z. pectoralis**. *Z.* affecting the skin of the chest.—**Z. perinaealis**. *Z.* of the perineum, affecting the skin of the perineum, the posterior surface of the scrotum, and the penis or vulva, corresponding to the cutaneous distribution of the pudic, the posterior cutaneous, and the ischiadic nerves. [G.]—**Z. redivivus** (Alibert). The form of *z.* that is followed by a chronic neuralgia. [G, 7.]—**Z. sacro-genitalis**, **Z. sacro-ischiadicus**. See *Z. perinaealis*.

ZOSTERA (Lat.), n. f. Zo'st(zost)-er(ar)'a. From *ζωστήρ*, a girdle. Fr., *zostère*. 1. Sea-wrack; a genus of maritime herbs of the *Zosteraceæ*, which are an order of monocotyledons now made a tribe (the *Zosteræ*) of the *Posidaceæ*. [a, 35.] 2. Of Alibert, see *ZOSTER*.—**Z. marina**, **Z. maritima**. Fr., *algue marine* (ou des verriers, ou des vitriers). Ger., *gemeiner Wasserriemen*, *Wier*, *Wirr*, *Meergras*, *Seegras*. Glass-wrack of Atlantic shores, grass-wood (or-wrack), glaziers' sea-weed, turtle-grass, bell-ware. The leaves are sometimes found on shores in the form of balls (see *HALCYONIUM rotundum*). They contain potash and a little iodine, and have been used as an antiscorbutic. [a, 35.]—**Z. mediterranea**. A Mediterranean species having the properties of *Z. marina* and sometimes forming similar balls. It is used for various economic purposes. [a, 35.]

ZOSTERIC, adj. Zo'st-e'r'i-k. Lat., *zostericus*. Pertaining to *zoster*.

ZÖTTCHEN (Ger.), n. Tso't'ch'e'n. A diminutive villus.

ZOTTE (Ger.), n. Tso't'te. See *VILLUS*.—**Darm-z**, **Dünndarm-z**. See *Intestinal VILLI*.—**Gefäss-z**. One of the vascular tufts of the choroid plexus. [I, 17 (K).]—**Geschwulst-z**. A villous process of a tumor. [a, 34.]—**Z'nblümchen**. A chorionic villus.—**Z'nblume**. See *MENYANTHES*.—**Z'ncomplex**. An assemblage or system of villi, such as that of the chorion. [A, 19.]—**Z'ngeschwulst**. See *PAPILOMA*.—**Z'nhaar**. See *VILLUS*.—**Z'nherz**. See *Cor hirsutum*.—**Z'nkrebs**. See *PAPILOMA*.—**Z'nparenchym**. The central part or core of an intestinal villus. It is usually covered by epithelium. [J.]—**Z'nseide**. The sheath of a chorionic villus, i. e., a depression in the decidua into which the villus is received.

ZOTTENHAUT (Ger.), n. Tso't'te'n-ha't-u't. See *CHORION* (1st def.).—**Primäre Z**, **Primitive Z**. See *Primitive CHORION* (1st def.).

ZOTTIG (Ger.), adj. Tso't'tig. See *VILLOUS*.—**Klebrig-z**. Covered with viscid villi. [a, 35.]

ZUCCARUM (Lat.), n. n. Zu'st(zu'tk)'ka'r(k'a'r)-u'm(u'm). See *SACCHARUM*.

ZÜCHTUNG (Ger.), n. Tso'ch't'ung. Breeding, cultivation, especially of micro-organisms. [a, 14.]—**Z'slehere**. The theory of selection in breeding. [L.]

ZUCHTWAHL (Ger.), n. Tsuch't'va'sl. See *SELECTION*.

ZUCKEN (Ger.), n. Tsuch'e'n. See *CONVULSION*.

ZUCKER (Ger.), n. Tsuch'e'r. See *SUGAR*.—**Braungekochter Z**. See *CARAMEL*.—**Candisz'**. See *SUGAR candy*.—**Fleischz'**. See *INSOITE*.—**Gallenz'**. See *PICROMEL*.—**Honigz'**. See *LEVULOSE*.—**Hutz'**. See *Refined SUGAR*.—**Invertz'**. See *Invert SUGAR*.—**Kandisz'**. See *CANDY*.—**Kartoffelz'**. See *GLUCOSE* (1st def.).—**Krümelmz'**. Dextrose. [a, 34.]—**Leimz'**. See *GLYCOCOLL*.—**Mannaz'**. See *MANNITE*.—**Milchz'**. See *LACTOSE*.—**Muskelz'**. See *INSOITE*.—**Oelz'**. See *ELAESACCHARUM* and *GLYCERIN*.—**Rohrz'**. See *Cane sugar*.—**Rübenz'**. See *Beet sugar*.—**Schleimz'**. See *LEVULOSE*.—**Thomaz'**. See *Italian HONEY*.—**Traubenz'**. See *Grape sugar*.—**Weissz'**. See *Refined sugar*.—**Z'hähnlich**. See *SACCHAROID*.—**Z'artig**. See *SACCHARINE*.—**Z'bildung**. See *GLYCOGENESIS*.—**Z'haltig**. See *SACCHARINE*.—**Z'krankheit**. Diabetes mellitus. [a, 34.]—**Z'mandel**. See *CONFECTION*.—**Z'messer**. See *SACCHARIMETER*.—**Z'rühr**. See *DIABETES mellitus*.—**Z'saft**. See *SYRUP*.—**Z'stich**. See *SUGAR-PUNCTURE*.—**Z'syrup**. See *MOLASSES*.—**Z'wasser**. See *HYDROSACCHARUM*.

ZUCKERROHR (Ger.), n. Tsuch'e'r-ror. See *SACCHARUM* (1st def.).—**Schilfartiges Z**. See *SACCHARUM arundinaceum*.

ZUCKERSÄURE (Ger.), n. Tsuch'e'r-zoir-e. See *SACCHARIC acid*.—**Z'ethylester**. See *ETHYL saccharate*.

ZUCKUNG (Ger.), n. Tsuch'ung. See *CONTRACTION*, *CLONUS*, and *CONVULSION*.—**Anfängliche Z**. See *Initial contraction*.—**Bleibende Z**. See *Elastic after-vibration*.—**Diplegische Zuckungen**. Diplegic twitching. [a, 34.]—**Kathodendanz'**. See *Cathodal duration contraction*.—**Kathodenschliessungz'**. See *Cathodal closure clonus*.—**Muskelz'**. Muscular spasm, cramp.—**Öffnungsz'**. See *Breaking contraction*.—**Paradoxe Z**. See *Paradoxical pulsation*.—**Residuale Z**. See *Elastic after-vibration*.—**Secundäre Z**. See *Secondary contraction*.—**Starrkrampfartige Z**. See *Tetanic contraction*.—**Übermaximale Z**. See *Over-maximal contraction*.—**Unipolare induzierte Z**. See *Unipolar induced contraction*.—**Z'beginn**. The initial period of a muscular contraction. [Gruenhagen (K).]

ZUDREHUNG (Ger.), n. Tsu'dra-ung. Torsion.

ZUFÄLLIG (Ger.), adj. Tso'fal'i-g. Adventitious, accidental.

ZUFLUCHTORT (Ger.), n. Tso'fuch'ts-ort. See *ASTYLUM*.

ZUFLUSS (Ger.), n. Tso'fuss. See *AFFLUENCE* and *APFLUX*.

ZUFÜHRGEBÄREN (Ger.), n. Tso'fru'ge'2-bar-e'n. See *Premature delivery*.

ZUFÜHREND (Ger.), adj. Tso'fu'r-e'nd. See *AFFERENT*.

ZUFÜHRUNG (Ger.), n. Tso'fu'r-ung. See *ADDUCTION*.

ZUG (Ger.), n. Tso'g. See *TRACT* and *TRACTION*.—**Markz'**. A medullary or central cord of nerve-fibres. [I, 4 (K).]—**Nasenz'**. See *Nasal line*.—**Oberer Z**. der hinteren Centralwindung. See *Ascending parietal convolution*.—**Z'glas**. A cupping glass. [a, 48.]—**Z'mittel**. See *EPISPASTIC*, n.—**Z'salbe**. See *Ceratum RESINÆ*.

ZUGANG (Ger.), n. *Tsu'ga'n²*. See ADITUS and MEATUS.—*Z. zum Trichter*. See *ITEN* *ad infundibulum*.—*Z. zur Wasserleitung*. The entrance to the aqueduct of Sylvius. [I, 3 (K).]

ZUGBOHRER (Ger.), n. *Tsug'bor-e²r*. See TREPHINE.

ZÜGEL (Ger.), n. *Tsu'g'e²l*. See HABENA.

ZUGEMÜSE (Ger.), n. *Tsu'ge²-mu²-e²*. See GRUEL.

ZUGERUNDET (Ger.), adj. *Tsu'ge²-rund-e²t*. See ROTUND.

ZUGESPIZT (Ger.), adj. *Tsu'ge²-spi²st*. See ACUMINATE.

ZUGEWANDT (Ger.), adj. *Tsu'ge²-van²t*. See ADVERSE.

ZUHEILUNG (Ger.), n. *Tsu'hil-un²*. The closing of a wound, healing. [A, 521 (a, 48).]

ZUHÖREN (Ger.), **ZUHÖREN** (Ger.), n's. *Tsu'horch²-e²n*, *hu²-e²n*. See AUSCULTATION.

ZULAPIUM (Lat.), n. n. *Zu²l(zul)-a²p(a²p)²²-u²m(u²m)*. See JULEP.

ZULAUF (Ger.), n. *Tsu'la²-u²f*. See AFFLUX.

ZUMA (Lat.), n. f. *Zu²m(zum)²²-a²*. See FERMENT.

ZUMIC, adj. *Zu²m²²-k*. Lat., *zunicus*. Fr., *zunique*. See ZYMIC.

ZUNAHME (Ger.), n. *Tsu'na²m-e²*. Increase, growth. [a, 48.]

ZUNDER (Ger.), n. *Tsund²²-r*. See AMADOU.

ZÜNDEWUTH (Ger.), n. *Tsu²nd²²-vut*. See EMPRESOMANIA.

ZUNEHMEN (Ger.), n. *Tsu²nam-e²n*. See ZUNAHME.

ZUNEHMEND (Ger.), adj. *Tsu²nam-e²nd*. See ACCRESCENT.

ZUNEIGUNG (Ger.), n. *Tsu²nig-un²*. See ATTACHMENT.

ZUNGE (Ger.), n. *Tsu²n²²-g²*. See TONGUE.—**Haar²²**. An affection of the tongue in which the filiform papillae are dark, elongated, and unduly cornified. [“Rev. des. sci. méd.” Oct. 15, 1888, p. 566 (a, 18).]—**Holz²²**. In cattle, actinomycosis. [A, 319 (a, 34).]—**Landkartenz²²**. See GEOGRAPHICAL TONGUE.—**Natter²²z²²**. See GLOSSOPETRE.—**Scharlach²²**. The peculiar state of the tongue seen in scarlet fever. [a, 34.]—**Z²²nabtragung**. Depression of the tongue.—**Z²²narwuchs**. See ANGYLOGLOSSUM.—**Z²²nähchen**. 1. See FRENUM OF THE TONGUE. 2. Of Stilling, a thin lamina of nerve-substance which extends laterally from the lingua cerebelli over the posterior third of the crura ad pontem. [I, 6 (K).]—**Z²²nbelag**. **Z²²nbeleg**. See FUR (2d def.).—**Z²²nblüthe**. See LIGULE (2d def.).—**Z²²nblutung**. See GLOSSORRHAGIA.—**Z²²nbrand**. See GLOSSANTHRAX.—**Z²²nbräune**. See GLOSSITIS.—**Z²²nbruch**. See GLOSSOCELE.—**Z²²nbruch**. See GLOSSANTHRAX.—**Z²²ndrucker**. 1. See TONGUE-PRESSOR.—**Z²²nentzündung**. See GLOSSITIS.—**Z²²nfäule**. See CACOGLOSSIA AND GLOSSANTHRAX.—**Z²²ngeschwulst**. See GLOSSOCYST.—**Z²²ngeschwür**. See CACOGLOSSIA.—**Z²²ngrund**. See BASIS LINGUAE.—**Z²²nhalter**. See TONGUE-DEPRESSOR.—**Z²²nheber**. **Z²²nhochhalter**. See GLOSSANISCHON.—**Z²²nhorn** [Meckel, Wagner]. See EPITHAL BONE.—**Z²²nhaut**. **Z²²nhäutchen**. See PERIOLOTTIS (1st def.).—**Z²²nnknuskel**. See GENIO-GLOSSUS.—**Z²²nnknochen**. See HYOID BONE.—**Z²²nnknorpel**. See SEPTUM LINGUAE.—**Z²²nnkrätzer**. See TONGUE SCRAPER.—**Z²²nkrebs**. See GLOSSOCARCINOMA.—**Z²²nlahm**. See TONGUE-TIED.—**Z²²nähmung**. See ANGYLOGLOSSUM.—**Z²²niehre**. See GLOSSOGRAPHY (1st def.).—**Z²²niöser**. See ANGYLOTOME (2d def.).—**Z²²nlosigkeit**. **Z²²nmangel**. See GLOSSIA.—**Z²²nnahl**. See RHAPHIS OF THE TONGUE.—**Z²²nprüfen**. See DORSUM LINGUAE.—**Z²²nschnitt**. See GLOSSOTOMY.—**Z²²nspalt**. See FISSURE OF THE TONGUE.—**Z²²nüber**. See GLOSSALGIA.—**Z²²nverwachsung**. See ANGYLOGLOSSUM.—**Z²²nvorfall**. See GLOSSOCELE AND PARAGLOSSA.—**Z²²nwurzel**. See BASIS LINGUAE.—**Z²²nzergliederung**. See GLOSSOTOMY (1st def.).

ZÜNGELCHEN (Ger.), n. *Tsu²n²²-e²l-ch²²-e²n*. See LINGULA.

ZUNGENBEIN (Ger.), n. *Tsu²n²²-e²n-bin*. See Z²²NBEIN.—**Z²²körper**. See CORPUS OSSIS HYOIDÆ AND COPULA LINGUALIS.

ZUNGENBOGEN [Meckel] (Ger.), n. *Tsu²n²²-e²n-bog-e²n*. See CERATO-HYAL BONE (1st def.).—**Gaumen²²**. See ARCH OF THE PALATE.

ZÜNGLEIN (Ger.), n. *Tsu²n²²-lin*. See LINGULA AND LIGULE (3d def.).

ZURECHNUNGSFÄHIGKEIT (Ger.), n. *Tsu²re²ch²²-nun²²-fa²²g²²-kil²²*. See IMPUTABILITY.

ZURECHTSETZUNG (Ger.), n. *Tsu²re²ch²²t²²/ze²²ts-un²²*. See EPANORRHOSIS.

ZURÜCKBEUGUNG (Ger.), n. *Tsu²ru²k²²-boig-un²²*. See RETROFLEXION.

ZURÜCKBILDUNG (Ger.), n. *Tsu²ru²k²²-bi²²ld-un²²*. See ANAPLASTY.

ZURÜCKBRINGUNG (Ger.), n. *Tsu²ru²k²²-bri²²n-un²²*. See REDUCTION.

ZURÜCKDREHUNG (Ger.), n. *Tsu²ru²k²²-dra-un²²*. See SUPINATION.

ZURÜCKFLUSS (Ger.), n. *Tsu²ru²k²²-flus*. See REFLUX.

ZURÜCKGEBOGEN (Ger.), adj. *Tsu²ru²k²²/ge²²-bog-e²n*. See REFLEXED.

ZURÜCKGEHEND (Ger.), adj. *Tsu²ru²k²²/ga-e²nd*. See RELAPSING.

ZURÜCKGEROLLT (Ger.), adj. *Tsu²ru²k²²/ge²²-rolt*. See REVOLUTE.

ZURÜCKGESCHLAGEN (Ger.), adj. *Tsu²ru²k²²/ge²²-shla²²g-e²n*. See REPLICATE.

ZURÜCKGEZOGEN (Ger.), adj. *Tsu²ru²k²²/ge²²-tso²²g-e²n*. See RETRACTED.

ZURÜCKHALTUNG (Ger.), n. *Tsu²ru²k²²-ha²²lt-un²²*. See ERI-SCHESIS AND RETENTION.

ZURÜCKLAUFEND (Ger.), adj. *Tsu²ru²k²²/la²²-u²f-e²nd*. See RECURRENT.

ZURÜCKSCHIEBUNG (Ger.), n. *Tsu²ru²k²²/sheb-un²²*. See REPOSITION.

ZURÜCKSCHLAGEN (Ger.), n. *Tsu²ru²k²²/shla²²g-e²n*. See RETRACTION.

ZURÜCKSPRINGEN (Ger.), n. *Tsu²ru²k²²/spri²²n-e²n*. See RESILIENCY.

ZURÜCKSTOSSUNG (Ger.), n. *Tsu²ru²k²²/sto²²s-sun²²*. See REPULSION.

ZURÜCKTREIBEND (Ger.), adj. *Tsu²ru²k²²/trib-e²nd*. Repellent, catastatic.

ZURÜCKTREIBUNG (Ger.), n. *Tsu²ru²k²²/trib-un²²*. See REPULSION.

ZURÜCKTRETEN (Ger.), n. *Tsu²ru²k²²/tre²²t-e²n*. Retrogression, subsidence. [a, 14.]

ZURÜCKWENDUNG (Ger.), n. *Tsu²ru²k²²/ve²²nd-un²²*. See RETROVERSION.

ZURÜCKWERFUNG (Ger.), n. *Tsu²ru²k²²/ve²²rf-un²²*. See REFLECTION.

ZURÜCKZIEHBAR (Ger.), adj. *Tsu²ru²k²²/tse-ba²²r*. See RETRACTILE.—**Z²²keit**. See RETRACTILITY.

ZURÜCKZIEHER (Ger.), n. *Tsu²ru²k²²/tse-e²r*. See RETRACTOR.—**Z. des äusseren Ohres**. See RETRAHENS AUREM.

ZURÜCKZIEHUNG (Ger.), n. *Tsu²ru²k²²/tse-un²²*. See RETRACTION.

ZUSAMMENBALLEN (Ger.), **ZUSAMMENBALLUNG** (Ger.), n's. *Tsu²za²m²²/me²²n-ba²²l-le²n*, *-lun²²*. See COMPRESSION AND CONGLOBATION.

ZUSAMMENBIEGUNG (Ger.), n. *Tsu²za²m²²/me²²n-beg-un²²*. See COMPRESSION.

ZUSAMMENDREHUNG (Ger.), n. *Tsu²za²m²²/me²²n-dra-un²²*. See CONTORTION AND TORSION.

ZUSAMMENDEÜCKBARKEIT (Ger.), n. *Tsu²za²m²²/me²²n-dru²²k²²-ba²²r-kil²²*. See COMPRESSIBILITY.

ZUSAMMENDRÜCKER (Ger.), n. *Tsu²za²m²²/me²²n-dru²²k²²-e²r*. See COMPRESSOR.—**Z. der Nase**. See COMPRESSOR NASIS.

ZUSAMMENDRÜCKUNG (Ger.), n. *Tsu²za²m²²/me²²n-dru²²k²²-un²²*. See COMPRESSION.

ZUSAMMENFALLEN (Ger.), n. *Tsu²za²m²²/me²²n-fa²²l-le²n*. See COLLAPSE (1st def.).

ZUSAMMENFLIESSEND (Ger.), adj. *Tsu²za²m²²/me²²n-fles²²-e²nd*. See CONFLUENT (1st def.).

ZUSAMMENFLUSS (Ger.), n. *Tsu²za²m²²/me²²n-flus*. See AFFLUX.

ZUSAMMENFÜGUNG (Ger.), n. *Tsu²za²m²²/me²²n-fu²²g-un²²*. A joining together; a commissure. [a, 14.]

ZUSAMMENGEBALLT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²ba²²lt*. See CONGLOBATE.

ZUSAMMENGEDRÄNGT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²dran²²t*. See CONFERTUS AND CONDENSED.

ZUSAMMENGEDREHT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²drat*. See CONTORTED.

ZUSAMMENGEDRÜCKT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²dru²²kt*. See COMPRESSED.

ZUSAMMENGEFALLET (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²fa²²lt-e²t*. See COMPLICATE.

ZUSAMMENGEFLACHT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²fla²²ch²²t*. See COMPINATUS.

ZUSAMMENGEGHÄUFT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²hoift*. See COACERVATE AND CONGLOMERATE.

ZUSAMMENGEKETTET (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²ke²²t-le²t*. See CATENULATE.

ZUSAMMENGEKLEBT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²kle²²bt*. See CONGLUTINATE.

ZUSAMMENGEKNÄUelt (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²knol-e²lt*. See CONGLOMERATE.

ZUSAMMENGELEGT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²lagt*. See CONDUPLICATE.

ZUSAMMENGELEIMT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²limt*. See CONGLUTINATE.

ZUSAMMENGELOTHET (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²lu²²t-e²t*. See CONFERRUMINATE.

ZUSAMMENGEROLLT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²rolt*. See CONVOLUTE.

ZUSAMMENGESCHLAGEN (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²shla²²g-e²n*. See CONDUPLICATE.

ZUSAMMENGESCHNÜRT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²shnu²²rt*. See CONSTRICTED.

ZUSAMMENGESETZT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²ze²²tst*. See COMPOUND.

ZUSAMMENGESTELLT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²ste²²lt*. See COLLOCATUS.

ZUSAMMENGEWACHSEN (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²va²²ch²²s-e²n*. See CONNATE, COADNATE, AND CONCRETE.

ZUSAMMENGEWICKELT (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²vi²²k-e²lt*. See CONVOLUTE.

ZUSAMMENGEWUNDEN (Ger.), adj. *Tsu²za²m²²/me²²n-ge²²vund-e²n*. See CONGLOMERATE.

ZUSAMMENGEZOGEN (Ger.), adj. Tsu-za³m/me²n-ge²-tsog-e²n. See CONTRACTED.

ZUSAMMENHALTEN (Ger.), n. Tsu-za³m/me²n-ha²l²-e²n. See ADHESION.

ZUSAMMENHANG (Ger.), **ZUSAMMENHÄNGUNG** (Ger.), n's. Tsu-za³m/me²n-ha²n²-han²-un². Connection, continuity, cohesion. [L, 31.]

ZUSAMMENHÄNGEND (Ger.), adj. Tsu-za³m/me²n-han²-e²nd. See COHERENT.

ZUSAMMENHÄUFUNG (Ger.), n. Tsu-za³m/me²n-hoi²-un². Aggregation, conglomeration.

ZUSAMMENHEFTUNG (Ger.), adj. Tsu-za³m/me²n-he²ft-un². See INFIBULATION.

ZUSAMMENHEILEN (Ger.), **ZUSAMMENHEILUNG** (Ger.), **ZUSAMMENKLEBEN** (Ger.), n's. Tsu-za³m/me²n-hil-e²n, -un², -klab-e²n. Agglutination, conglutination.

ZUSAMMENKLEBEND (Ger.), adj. Tsu-za³m/me²n-klab-e²nd. See CONGLUTINANT.

ZUSAMMENLAUFEND (Ger.), adj. Tsu-za³m/me²n-la²-u²-f-e²nd. See CONVERGENT.

ZUSAMMENLEIMEND (Ger.), adj. Tsu-za³m/me²n-lim-e²nd. See AGGLUTINANT (1st def.).

ZUSAMMENLEIMUNG (Ger.), n. Tsu-za³m/me²n-lim-un². See AGGLUTINATION.

ZUSAMMENMÜNDUNG (Ger.), n. Tsu-za³m/me²n-mu²-nd-un². Anastomosis.

ZUSAMMENSCHMELZEN (Ger.), n. Tsu-za³m/me²n-shme²lts-e²n. See COLLIGATION.

ZUSAMMENSCHNÜREN (Ger.), n. Tsu-za³m/me²n-shnu²-r-e²r. See CONSTRUCTION.

ZUSAMMENSCHNÜRUNG (Ger.), n. Tsu-za³m/me²n-shnu²-r-un². See CONSTRICTION (1st def.).

ZUSAMMENSCHRUMPEN (Ger.), n. Tsu-za³m/me²n-shrump²-un². See CORRUGATION.

ZUSAMMENSETZUNG (Ger.), n. Tsu-za³m/me²n-ze²ts-un². See COMPOSITION.

ZUSAMMENSTOSS (Ger.), **ZUSAMMENSTOSSUNG** (Ger.), **ZUSAMMENTREFFEN** (Ger.), n's. Tsu-za³m/me²n-sto²s, -sun², -tre²-fe²n. See CONTUSION.

ZUSAMMENWACHSEN (Ger.), **ZUSAMMENWACHSUNG** (Ger.), n's. Tsu-za³m/me²n-va²ch²s-un². Coalescence. [a, 14.]

ZUSAMMENWOHNEN (Ger.), n. Tsu-za³m/me²n-von-e²n. See COHABITATION.

ZUSAMMENZUEGEND (Ger.), adj. Tsu-za³m/me²n-tsoig-e²nd. See CONGENITAL.

ZUSAMMENZIEHBAR (Ger.), adj. Tsu-za³m/me²n-tse-ba²r. See CONTRACTILE.

ZUSAMMENZIEHEND (Ger.), adj. Tsu-za³m/me²n-tse-e²nd. Astringent, constrictive.

ZUSAMMENZIEHER (Ger.), n. Tsu-za³m/me²n-tse-e²r. See CONSTRICTOR.

ZUSAMMENZIEHUNG (Ger.), n. Tsu-za³m/me²n-tse-un². See ADSTRICTIO, CRISPATION, and CONTRACTION.—**Pulsierende Z'**-en. See *Pulsatile CONTRACTIONS*.—**Sanduhrz'**. See *Hour-glass CONTRACTION*.

ZUSATZ (Ger.), n. Tsu-za³ts. See ADMIXTION and ADDITION.—**Z'product**, **Z'verbinding**. See ADDITION COMPOUND.

ZUSCHNÜREN (Ger.), n. Tsu-shnu²-r-e²r. See SPINCTER.

ZUSPITZEN (Ger.), v. intr. Tsu-spi²ts-e²n. See POINT (v.).

ZUSTRÖMEND (Ger.), adj. Tsu-stru²m-e²nd. Affluent, afferent.

ZUTRIFF (Ger.), n. Tsu-tri²t. See ABCESS.

ZUVORKOMMEN (Ger.), n. Tsu-for-ko²m²-e²n. Prevention.

ZUWACHS (Ger.), n. Tsu-va²ch²s. See ACCREMENTATION.

ZUZIEHER (Ger.), n. Tsu-tse-e²r. An adductor muscle. [a, 48.]—**Grosser Z. des Oberschenkels** (oder **Schenkels**). See **ADDUCTOR femoris magnus**.—**Kurzer Z. des Oberschenkels**. See **ADDUCTOR femoris brevis** and **Small ADDUCTOR of the thigh**.—**Langer Z. des Schenkels**. See **ADDUCTOR femoris longus**.—**Langer Z. des Schenkels**. See **ADDUCTOR longus**.—**Z. des Daumens**. See **ADDUCTOR pollicis manus**.

ZWANG (Ger.), n. Tsu-va²n. 1. Compulsion, constraint. 2. Tension. [A, 621 (a, 48).]—**Kinnbackenz'**. See **TRISMUS**.—**Stuhlz'**. See **Rectal TENESMUS**.—**Z'bugig**. See **HOOR-bound**.—**Z'sjacket**, **Z'swamm**. See **CAMISOLE**.—**Z'svorstellung**. See **Primordial DELIRIUM**.

ZWEI (Ger.), adj. Tsui. Two.—**Z'äugig**. See **BINOCLAR**.—**Z'basisch**. See **DIBASIC**.—**Z'büchig**. See **DIGASTRIC**.—**Z'blättrig**. Of the involucre and perigon, diphyllous; of the flower, dipetalous; of the calyx, disepalous. [a, 35.]—**Z'fach**. See **DUPPLICATE**.—**Z'fächerig**. See **BINOCLAR**.—**Z'farbigkeit**. See **DICHOISM**.—**Z'fügelnaus**. See **DIPTEROCARPUS**.—**Z'gelenkig**. Having two joints; of muscles, having two articulations between the origin and insertion. [L, 31.]—**Z'hügel**. See **CORPORA quadrigenina**.—**Z'keimblättrig**. See **DICOTYLEDONOUS**.—**Z'köpfig**. See **DICEPHALOUS**.—**Z'malklopfend**. See **DICROTAL**.—**Z'samenlappig**. See **DICOTYLEDONOUS**.—**Z'schwänzig**. See **BICAUDAL**.—**Z'theilig**. See **DICROTOMY** and **FISSION**.—**Z'werthig**. See **BIVALENT**.

ZWEIG (Ger.), n. Tsuiwg. See **BRANCH**.—**Hautz'**. A cutaneous filament. [L, 31.]—**Z'chen**, **Z'eichen**, **Z'lein**. A small twig, as of a blood-vessel.

ZWEITGEBÄRENDE (Ger.), n. Tsui²ge²-bar-e²nd-e². See SECUNDIPARA.

ZWEIWIUCHS (Ger.), n. Tsui²wuch²s. See RHACITIS.

ZWERCHFELL (Ger.), n. Tsue²rch²fe²l. See DIAPHRAGM (1st def.).—**Z'eiterung**. See *Diaphragmatic EMPYEMA*.—**Z'entzündung**. See *DIAPHRAGMATITIS*.—**Z'geschwür**. See *DIAPHRAGMATICULOSIS*.—**Z'sband der Uriere** [Kölliker]. An arch-like fold of the peritoneum extending from the pronephros to the diaphragm in the embryo. [A, 8.]—**Z'schmerz**. See *DIAPHRAGMALGIA*.

ZWERG (Ger.), n. Tsue²rg. See DWARF.—**Z'rumpf**. See *NA-NOSOMIA*.

ZWERGFEHL (Ger.), n. Tsue²rg²fe²l. See DIAPHRAGM (1st def.).

ZWICKAU (Ger.), n. Tsui²wi²ka²-u². A place in Saxony where there is a gaseous and saline spring. [L, 49, 87, 105 (a, 14).]

ZWICKEL (Ger.), n. Tsui²wi²ke²l. See CUNEUS (2d def.).

ZWIEBACK (Ger.), n. Tsue²ba²ck. A sweetish kind of bread cut into large pieces and browned in the oven.—**Fleischz'**. See *MEAT BISCUITS*.

ZWIEBEL (Ger.), n. Tsue²be²l. See BULB and ALLIUM CEPA.—**Brutz'**. See *BULBUS*.—**Ewige Z.** See *ALLIUM fistulosum*.—**Gemeine Z.** See *ALLIUM CEPA*.—**Geschmacksz'n**. See *Taste-buds*.—**Harnröhrenz'**. See *BULB of the urethra*.—**Häutige Z.** See *Tunicated BULB*.—**Knollenz'**. See *CORM* (2d def.).—**Knospenz'**. See *BULBIL*.—**Markz'**. 1. See *MEDELLA oblongata*. 2. In the pl., *Markz'n*, see *CORPORA albicantia*.—**Vorhoisz'n**. See *BULBI vestibuli vagina*.—**Winterz'**. See *ALLIUM fistulosum*.—**Z'haut**. The integument of a bulb. [a, 35.]—**Z'ig**. See *BULBOSUM*.—**Z'knollen**. See *CORM* (2d def.).—**Z'knospe**. See *BULBIL*.—**Z'tragend**. See *BULBIFEROUS*.

ZWIEWUCHS (Ger.), n. Tsue²wuch²s. See RHACITIS.

ZWILLING (Ger.), n. Tsui²wi²l²ing. See TWIN.—**Eineilige Z'e**. See *Uniovalar TWINS*.—**Z'sbinde**. See *FORNIX cerebri*.—**Z'sfäden**. See *Cleft nuclear FILAMENTS*.—**Z'sfrucht**. A twin.—**Z'smuskel**. See *BIFEMOR*—*CALCANEUS*.—**Z'sschwangerschaft**. Twin pregnancy.

ZWINGE (Ger.), n. Tsui²z²ing. See *FORNIX cerebri*.

ZWISCHENBALKEN (Ger.), n. Tsui²sh²e²n-ba²lk-e²n. See DIAPEGMA.

ZWISCHENBAND (Ger.), n. Tsui²sh²e²n-ba²nd. See *LIGAMENTUM teres* (1st def.).

ZWISCHENEINTRETEND (Ger.), adj. Tsui²sh²e²n-in²-tre²-e²nd. See SUBINTRANS.

ZWISCHENFALLEN (Ger.), adj. Tsui²sh²e²n-fa²l²-e²nd. See INTERCALAR.

ZWISCHENFELLNERV (Ger.), n. Tsui²sh²e²n-fe²l²-ne²rf. See *PHRENIC NERVE*.

ZWISCHENGelenKIG (Ger.), adj. Tsui²sh²e²n-ge²-le²n²-k²-ig. See *INTERARTICULAR*.

ZWISCHENGelenKKNORPEL (Ger.), n. Tsui²sh²e²n-ge²-le²n²-k²-kno²-rp-e²l. See *INTERARTICULAR CARTILAGE*.

ZWISCHENGESTELLT (Ger.), adj. Tsui²sh²e²n-ge²-ste²-lt. See INTERPOSED.

ZWISCHENGeweBE (Ger.), n. Tsui²sh²e²n-ge²-wab-e². See *AREOLAR TISSUE*, *TISSU annexiel*, and *GROUND-SUBSTANCE*.

ZWISCHENGLED (Ger.), n. Tsui²sh²e²n-gled. See *INTERMEDIATE SEGMENT of a cilium*.

ZWISCHENHIRN (Ger.), n. Tsui²sh²e²n-her²n. See *MESENCEPHALON* and *THALAMENCEPHALON*.—**Z'bläschen**. The primary vesicle of the mesencephalon. [I, 17 (K).]—**Z'boden**. The anterior region of the brain, including the structures just behind the optic chiasm. [I, 17 (K).]—**Z'dach**. The roof of the third ventricle. [I, 17 (K).]

ZWISCHENKIEFER (Ger.), n. Tsui²sh²e²n-kef-e²r. See *Intermaxillary BONE*.—**Lateraler Z.** See *MESOGNATHION*.—**Z'knochen**. See *Z*.

ZWISCHENKIEMENDECKELSTÜCK (Ger.), n. Tsui²sh²e²n-kem-e²n-de²ck-e²l-stu²ck. See *INTEROPERCULAR BONE*.

ZWISCHENKNOCHEN (Ger.), adj. (in comp.) Tsui²sh²e²n-kno²ch²-e²n. See *INTEROSSEOUS*.—**Z'muskel**. An interosseous muscle. [L, 304.]—**Ersterer äusserer Z'muskel des Fusses**. See *ADDUCTOR indicis pedis*.

ZWISCHENKNOTEN (Ger.), n. Tsui²sh²e²n-kno²t-e²n. See INTERNODE.

ZWISCHENKÖRNERNSCHICHT (Ger.), n. Tsui²sh²e²n-kör²n-e²-sch²icht. See *STRATUM granulosum*.—**Äussere kahle Z.** [Meynert]. The sixth layer in the cerebral cortex, consisting of large pyramidal cells. [I, 17 (K).]—**Innere kahle Z.** [Meynert]. A layer of large pyramidal cells (the fourth) in the cortex cerebri in the neighborhood of the calcarine fissure. [I, 17 (K).]—**Kahle Z'en** [Meynert]. A term for two layers of the cortex cerebri which are poor in nerve-cells. [I, 11 (K).]

ZWISCHENLAGERUNG (Ger.), n. Tsui²sh²e²n-la²g-e²-r-un². An interstitial deposit. [A, 521 (a, 48).]

ZWISCHENLAUFEND (Ger.), adj. Tsui²sh²e²n-la²-u²-f-e²nd. See INTERCURRENT.

ZWISCHENPLATE (Ger.), n. Tsui²sh²e²n-pla²t-e². See *LAMINA interperina*.

ZWISCHENQUERMUSKEL (Ger.), n. Tsui²sh²e²n-kwe²-r-musk-e²l. See *INTERTRANSVERSARIUS*; in the pl. *Z'n*, see *INTERTRANSVERSALES*.

ZWISCHENRAUM (Ger.), n. Tswi'sh'e'n-ra³-u⁴m. An interspace. [L, 31.] See also *Interpeduncular space*.

ZWISCHENRIPPEN- (Ger.), adj. (in comp.). Tswi'sh'e'n-ri³-p-pe²n. See *INTERCOSTAL*.

ZWISCHENSCHNITTELHORN [Huscke] (Ger.), n. Tswi'sh'e'n-shit-e²-h²ern. See *Occipital lobe*.

ZWISCHENSCHNEL- (Ger.), adj. (in comp.). Tswi'sh'e'n-sh²e²-nk-e²l. See *INTERCULAL*.—*Z'*dreieck. See *Interpeduncular space*.

ZWISCHENSCHICHT (Ger.), n. Tswi'sh'e'n-shi²-ch²st. An intermediary layer of nerve-fibres in the cerebral cortex, especially the external molecular stratum. [K.]

ZWISCHENSCHLAG (Ger.), n. Tswi'sh'e'n-shla³g. See *INTERCARENCE*.

ZWISCHENSTAND (Ger.), n. Tswi'sh'e'n-sta³nd. See *INTERSTICE*.

ZWISCHENSTÄNDIG (Ger.), adj. Tswi'sh'e'n-stand-i³g. See *INTERMEDIARY*.

ZWISCHENSTRANG [His] (Ger.), n. Tswi'sh'e'n-stra³n². A longitudinal dorsal projection of the epiblast at its junction with the medullary tube of the embryo. [A, 8.]

ZWISCHENVORKOMME (Ger.), adj. Tswi'sh'e'n-fo²-r-ko²m-me²nd. See *INTERCURRENT*.

ZWISCHENWAND- (Ger.), adj. (in comp.). Tswi'sh'e'n-wa³nd. See *INTERPARIETAL*.

ZWISCHENWIRBEL- (Ger.), adj. (in comp.). Tswi'sh'e'n-verb'e²l. See *INTERVERTEBRAL*.

ZWISCHENWIRTH (Ger.), n. Tswi'sh'e'n-vert. An intermediary host. [A, 521 (a, 48).]

ZWISCHENZIT (Ger.), n. Tswi'sh'e'n-tsit. See *INTERMISSION* (1st and 2d def's).

ZWITER (Ger.), n. Tswi't'e²r. See *HERMAPHRODITE*.—*Z'*bildung, *Z'*gestaltung. See *HERMAPHRODITISM*.—*Z'*haft. Bisexual; hermaphroditic.—*Z'*heit, *Z'*thum. See *HERMAPHRODITISM*.

ZWITTERWESEN (Ger.), n. Tswi't'e²r-vaz-e²n. 1. An hermaphrodite or hybrid. 2. The condition of being an hermaphrodite or a hybrid. [A, 816 (a, 48).]

ZYGADENUS (Lat.), n. m. Zi³g(zu³g)-a²d(a²d)²e²n-u³s(u³s). From *zygōn*, a yoke, and *adēn*, a gland. A genus of the *Melanthaceae*. [B, 48 (a, 14).]—*Z. elegans*. A Kansas species. The herb is said to cause fatal cerebral disturbance in sheep. ["Proc. of the Am. Pharm. Assoc.," xxxviii (a, 14).]—*Z. frigidula*. A Mexican species. Its seeds have properties similar to those of *cevadilla*. [B, 48 (a, 14).]—*Z. Nuttallii*. A poisonous Californian species. The tuber has properties similar to those of *Z. venenosus*. ["Proc. of the Am. Pharm. Assoc.," xxxvi (a, 14).]—*Z. venenosus*. Hogs-potato, death-emoss; a Californian species having a very poisonous tuber. ["Proc. of the Am. Pharm. Assoc.," xxxvi, xxxvii (a, 14).]

ZYGAPOPHYSIS (Lat.), n. f. Zi³g(zu³g)-a²p(a²p)-o²f(i³u³s). Gen., -*physis*. From *zygōn*, a yoke, and *apo²physis*, a process. Fr., *zygapophyse*. An articular process of a vertebra.

ZYGODACTYLE, adj. Zi³g-o-da²kt²yl². Lat., *zygodactylus* (from *zygōn*, a yoke, and *δάκτυλος*, a digit). Fr., *zygodactyle*. Ger., *jochfingerig*. Yoke-toed; having the toes in pairs. [L, 341 (a, 27).]

ZYGOLABIALIS [Cuvier] (Lat.), n. m. Zi³g(zu³g)-o(a²o)-lab-(la³b)-i²-al(a²l)²is. From *zygōn*, a yoke, and *labium*, a lip. See *ZYGOMATICS minor*.

ZYGOMA (Lat.), n. n. Zi³g(zu³g)-om²a². Gen., -om²/atos (-atis). Gr., *ζυγωμα*. Fr., *zygome*. Ger., *Jochbein*. See *ZYGOMATIC ARCH*.

ZYGOMATIC, adj. Zi³g-o²m-a²t²/ik. Lat., *zygomatice*. Fr., *zygomatique*. Ger., *zygomatisch*. Pertaining to the zygoma. [L, 343.]

ZYGOMATIO-LABIALIS (Lat.), n. m. Zi³g(zu³g)-o²m(om)-a²t(a²t)²/ik-o(a²o)-lab-(la³b)-i²-al(a²l)²is. Fr., *zygomatio-labial*. The analogue of the zygomatic major of man found in most of the lower mammals. [L, 131.]

ZYGOMATIO-MAXILLARIS (Lat.), n. m. Zi³g(zu³g)-o²m(om)-a²t(a²t)²/ik-o(a²o)-ma²x(ma²x)-i²-lar(la³r)²is. See *MASSETER*.

ZYGOMATICUM (Lat.), n. n. Zi³g(zu³g)-o²m(om)-a²t(a²t)²/ik-u³m(u³m). See *MALAR BONE*.—*Z. posterius*, *Z. posticum*. See *Quadrato-jugal bone* (1st def.).

ZYGOMATICUS (Lat.), adj. Zi³g(zu³g)-o²m(om)-a²t(a²t)²/ik-u³s(u³s). Fr., *zygomatique*. Pertaining to or connected with the zygoma; as a n. m. (Ger., *Jochmuskel*), a muscle so connected, especially the z. major. [a, 48.]—*Z. major*. Ger., *grosser Jochmuskel*. A muscle having its origin in the malar bone near the zygomatic suture and running to the angle of the mouth to be attached to the skin and to be continuous with the orbicularis and depressor anguli oris. [C.]—*Z. minor*. Ger., *kleiner Jochmuskel*. A small muscle which has its origin in the anterior and inferior part of the malar bone and terminates by combining with the outer margin of the levator labii superioris. [C.]

ZYGOMATICUS (Fr.), adj. Ze-go-ma³-tek. See *ZYGOMATIC*; as a n., see *ZYGOMATICUS*.—Grand z. See *ZYGOMATICUS major*.—Petit z. See *ZYGOMATICUS minor*.

ZYGOMATO-AURICULARIS (Lat.), n. m. Zi³g(zu³g)-o²m(om)-a²t(a²t)²/ik-o(a²o)-ar(a²r)-i²-k(u³l)-ar(a²r)²is. Fr., *zygomato-conchiten*, *zygomato-auriculaire*. 1. See *ANTITRANS AURIS* (in Supplement). 2. A muscle of the lower animals arising from the zygomatic process of the temporal bone and attached to the outside of the base of the concha of the ear. It draws the ear forward. [L.]

ZYGOMATO-LABIAL (Fr.), adj. and n. Ze-go-ma³-to-la³-be-a²l. See *ZYGOMATICUS*.

ZYGOMATO-MAXILLARE (Fr.), n. Ze-go-ma³-to-ma³-x-e-la³r. See *MASSETER*.

ZYGOMAXILLARY, adj. Zi³g'o-ma³x'i²l-ar-i². See *JUGOMAXILLARY*.

ZYGMORPHOUS, adj. Zi³g-o-mo²rfu³s. Lat., *zygomorphus* (from *zygōn*, a yoke, and *μορφή*, form). Of a structure (a flower especially), divisible in only one plane into similar halves. The term is extended by Sachs to cases in which the structure may be bisected in two planes at right angles, the halves of either section being similar to each other but different from those of the other. [a, 35.]

ZYGYMYCELES (Lat.), n. m. pl. Zi³g(zu³g)-o(a²o)-mi(mu³)-set-(kat/ez(e²a)). From *zygōn*, a yoke, and *μύκης*, a mushroom. Ger., *Jochpilze*. The conjugating *Pungi*; so called because they reproduce sexually by zygospores. In Vireo's classification they are a subdivision of the *Phycomycetes*, including the *Chytridiaceae*, *Mucorini*, *Entomophthoraceae*, and *Ustilaginaceae*. [a, 35.]

ZYGO-OOSPORE, n. Zi³g-o-o-spor. From *zygōn*, a yoke, *oōn*, an egg, and *σπορά*, a spore. Of T. J. Parker, a motile zygote formed by the fusion of two similar gametes. ["Jour. of the Roy. Micr. Soc.," 1890, p. 19 (a, 35).] Cf. *ZYGOSPORE*.

ZYGO-ORBITAL, adj. Zi³g-o-rb'i²-l. Pertaining to the zygoma and the orbit. [a, 48.]

ZYGOPHYCEAE (Lat.), n. f. pl. Zi³g(zu³g)-o(a²o)-f(i³u³l)²e²-a²(a²e²). From *zygōn*, a yoke, and *φυκος*, seaweed. A division of the *Chlorophytophyceae* consisting of the *Desmidiaceae* and *Zygnemaceae*. They are unicellular or unbranching filaments, reproducing by zygospores. [a, 35.] Cf. *CONJUGATEE*.

ZYGOPHYLLUM (Lat.), n. n. Zi³g(zu³g)-o(a²o)-f(i³u³l)²u³m(lu³m). From *zygōn*, a yoke, and *φύλλον*, a leaf. Fr., *zygophylle*, *fabagelle*. Ger., *Doppelblatt*. The typical genus of an order of polypetalous dicotyledons (the *Zygophyllaceae*, or *Zygophylleae*) considered by Baillon a series of the *Rutaceae*. [a, 35.]—*Z. coccineum*, *Z. desertorum*. Fr., *fabagelle écarlate*. A species the aromatic seeds of which are used by the Arabs in place of pepper. [a, 35.]—*Z. fabago*. Fr., *fabagelle officinale* (ou commune), *fauz cyprier*. Ger., *gemeines Doppelblatt*, *Bohnenkapper*. Sp., *gubernadora de México* [Mex. Ph.]. Syrian bean-caper; a native of Asia Minor and northern Africa, having an unpleasant odor and used as an anthelmintic and antispasmodic. The flower-buds are substituted for capers. The leaves are used externally in rheumatism. [a, 35.]—*Z. portulacoides*, *Z. simplex*. A very foetid species. The leaves are used in ophthalmia and to remove freckles, and the entire plant as an anthelmintic. [a, 35.]

ZYGOPHYTES, n. pl. Zi³g-o-fits. From *zygōn*, a yoke, and *φύτον*, a plant. See *ZYGOSPOREAE*.

ZYGOSIS (Lat.), n. f. Zi³g(zu³g)-o²s²is. Gen., -o²s²is (-is). From *ζύγωσις*, a balancing. In botany, see *CONJUGATION*.

ZYGOSPORE, n. Zi³g-o-spor. Lat., *zygospore* (from *zygōn*, a yoke, and *σπορά*, a spore. Ger., *Jochspore*. 1. A compound spore formed by the fusion of the protoplasm of two similar cells (gametes). It germinates after a long period of rest. [a, 35.] 2. A fertilized egg-cell. [L, 121.]

ZYGOSPOREAE (Lat.), n. f. pl. Zi³g(zu³g)-o(a²o)-spor(o²sp²r)²e²-a²(a²e²). From *zygōn*, a yoke, and *σπορά*, seed. Ger., *Jochsporen*. The zygophytes; of Sachs, *Algae Zoosporae, Conjugatae*, and, according to some authors, *Volvocineae* and *Pungi* (*Mycomycetes* and *Zygomycetes*) reproducing sexually by the confluence of the protoplasmic contents of cells (gametes). The conjugating cells are either free wandering spores, as in the *Zoosporae* and *Mycomycetes*, or fixed cells, as in the *Conjugatae* and *Zygomycetes*. [a, 35.]

ZYGOTE, n. Zi³g-ot. From *ζύγωσις*, yoked. 1. In botany, the product of the union of any two reproductive cells (gametes); of some authors, a spore formed by the union of two zoospores. [a, 35.] 2. See *ZYGOSPORE* (2d def.).

ZYGOZOOSPORE, n. Zi³g-o-zo-spor. From *zygōn*, a yoke, *oōn*, an egg, and *σπορά*, a spore. A motile zygospore. [B, 279.]

ZYLONITE, n. Zi³l'o²n-it. More properly written *zylonite* (from *ξύλον*, wood). An American filtering paper prepared from nitrated cellulose with camphor and alcohol; recommended for quantitative analysis. [B, 270 (a, 38).]

ZYMA (Lat.), n. f. Zim(zu³m)²a². Gr., *ζύμη*. See *FERMENT*.

ZYMAD, n. Zim²a²d. Of Farr, the moribund germ of a zymotic disease.

ZYMASE (Fr.), n. Ze-ma³z. Of Béchamp, a soluble ferment. Diastase in this nomenclature is hordeozymase, trypsin is pancrazymase, and pepsin is gastrozymase.

ZYME (Lat.), n. f. Zim(zu³m)²e(a). Gen., *zym²es*. Gr., *ζύμη* (from *ζειν*, to boil). See *FERMENT*.

ZYMIC, adj. Zi³m'i²k. Fr., *zymique*. Ger., *gährungsartig*. Pertaining to fermentation. [B, 78 (a, 14).]—*Z. acid*. Fr., *acide zymique* (ou *zymique*, ou *mancéique*). Ger., *Gährstoffsaure*. Of Plouquet, an acid formed in the fermentation of any mucous substance, probably a mixture of lactic and butyric acids. [B, 46, 78, 93 (a, 14).]

ZYMOGEN, n. Zim'o²j-en. From *ζύμη*, a ferment, and *γεννάω*, to engender. Ger., *Z*. A ferment extracted from the pancreas. [K, 3.]—*Lab²z*. (Ger.). A product secreted by the glands of the stomach during digestion and converted into lactic ferment by the action of free acids. ["Rev. des sci. méd.," Oct. 15, 1888, p. 434 (a, 18).]

ZYMOGENIC, adj. Zim-o-je²n'i²k. Producing fermentation.

ZYMOLOGY, n. Zim-o¹/o-jî². Lat., *zymologia* (from ζύμη, a ferment, and λόγος, understanding). Fr., *zymologie*. Ger., *Gährungslehre*. The physiology of fermentation. [B, 88, 78, 93 (a, 14).]

ZYMOMA (Lat.), n. n. Zi²m(zu⁶m)-om/a³. Gen., -om'atos (-atis). Gr., ζύμμα. Fr., *zymome*. 1. Leaven, a ferment. 2. An old term for gluten washed with water and alcohol. [L, 41 (a, 14).]

ZYMOPHYTES, n. pl. Zim'o-fits. From ζύμη, a ferment, and φυτόν, a plant. Plants that produce fermentation. [a, 35.] Cf. MICROZYMES.

ZYMOSE, n. Zim'os. See ZYMASE.

ZYMOSIS (Lat.), n. f. Zi²m(zu⁶m)-os'î²s. Gen., -os'eos (-is). Gr., ζύμωσις (from ζύμη, a ferment). 1. See FERMENTATION. 2. A zymotic disease. [K.]

ZYMOTECNÏY, n. Zim'o-te²k-nî². Lat., *zymotechnia* (from ζύμη, a ferment, τέχνη, art). Fr., *zymotechnie*. Ger., *Gährkunst, Braukunst*. The employment of fermentation-processes; the manufacture of products of fermentation (beer, spirit, yeast, etc.).

ZYMOTHERMÆ (Lat.), n. f. pl. Zi²m(zu⁶m)-o(o²)-thu⁶rm- (the²rm)'e(a³-e²). From ζύμη, a ferment, and θερμαί, hot springs. Baths of a warm fermenting fluid. [L, 50 (a, 14).]

ZYMOTIC, adj. Zim-o²/i²k. Lat., *zymoticus* (from ζύμωσις, fermentation). Fr., *zymotique*. Ger., *gährend, zymotisch*. Of diseases, produced by a micro-organism supposed to act as a ferment.

ZYRBUS (Lat.), n. m. Zu⁶rb(zu⁶rb)/u³s(u⁴s). Written also *zirbi*. See OMENTUM.

ZYTHOGALA (Lat.), **ZYTHOGALUM** (Lat.), n's n. Zi²th-(zu⁶th)-o²g'a²[(a³)-a³]-u³m(u⁴m). Gen., -galac'tos (-tis), -thog'ali. From ζύθος, beer, and γάλα, milk. Fr., *zythogale*. Ger., *Biermolken, Biermilch*. A mixture of beer and boiled milk. [L, 41, 49, 50 (a, 14).]

ZYTHUM (Lat.), **ZYTHUS** (Lat.), n's n. and m. Zith(zu⁶th)/-u³m(u⁴m), -u³s(u⁴s). Gr., ζύθος. Of the ancients, a beer prepared from barley and lupines. [a, 35.]

A, ape; A², at; A³, ah; A⁴, all; Ch, chin; Ch², loch (Scottish); E, he; E², ell; G, go; I, die; I² in; N, in; N², tank;

SUPPLEMENT.

AALÄHNLICH
ACHILLODYNIA

AALÄHNLICH (Ger.), **AALKÖRPERIG** (Ger.), adj's. See ENCHELYSOMUS.

AALRAUPE (Ger.), n. See *LOTA vulgaris*.

ABAISSEUR.—*A. long de la queue*. See *SACROCOCYGEUS inferior*.

ABASIA (Lat.), n. f. $A^{2b}(a^{2b})-a^{2b}/si^{2}-a^{2}$. From a priv. and *bairev*, to walk. Loss or impairment of the power of walking. See *ASTASIA-A.* (in Supplement).—**Paroxysmal trepidant** *a.* *As-tasia-a.* in which walking is hindered by contradictory movements that stiffen the legs and consist of a sort of trepidation resembling that of spastic paraplegia. [P. C. Knapp, "Jour. of Nerv. and Ment. Dis.," xviii, p. 673 (a, 34).]

ABAXIAL, adj. $A^{2b}-a^{2x}/i^{2}-l$. See *ABAXILE*.

ABCES.—*A. ostéopathique*. An abscess due to diseased bone. [a, 18].—*A. spirillaire* [Verneuil]. An abscess containing spirilla from the saliva. ["Sem. méd.," Feb. 13, 1889, p. 51 (a, 18).]

ABDUCTOR.—*A. linguae*. See *STYLOGLOSSUS*.—*A. pollicis bicornis*. See *EXTENSOR ossis metacarpi pollicis*.—*A. pollicis brevis alter*, *A. pollicis internus*. The deep head of the flexor brevis pollicis. [L.]

ABFEGEND.—For *A'e* Mittel substitute *A'es* Mittel.

ABFÜHREND.—For *A'e* Mittel substitute *A'es* Mittel.

ABGAS, n. A mediæval Arabo-Latin name for the amnion. [F. B. Stephenson, "N. Y. Med. Jour.," July 24, 1886, p. 92.]

ABGREDHT (Ger.), adj. $A^{2b}/ge^{2}-drat$. See *INTORTUS*.

ABGEFLACHT (Ger.), adj. $A^{2b}/ge^{2}-flacht$. See *DEFLANATE*.

ABGESCHÄLT (Ger.), adj. $A^{2b}/ge^{2}-shalt$. See *DEORTICATE* (1st def.).

ABGEZOGEN (Ger.), adj. $A^{2b}/ge^{2}-tsog-e^{2}n$. See *DISTILLED*.

ABGHAS (Ar.), n. See *ABGAS* (in Supplement).

ABIES.—*A. pendula*. See *LARIX americana*.—*A. pinus*. See *A. excelsa*.—*A. webbiana*. A species the dried leaves of which (the talispatra of India) are reputed carminative, expectorant, stomachic, tonic, and astringent. [P. L. Simmonds, "Am. Jour. of Pharm.," Sept., 1890, p. 471].—*Cerevisia abietis*. See *SPRUCE beer*.—*Gemma abietis*. The young sprouts of *Picea vulgaris*. [B. 180 (a, 24)].—*Hydrolatum gemmarum abietis*. See *Eau distillée de bourgeon de pin*.—*Lacrimæ turionum abietis*. Resin from the scales of fir-cones. ["Proc. of the Am. Pharm. Assoc.," xxix (a, 39).]

ABJUNCTION, n. $A^{2b}-ju^{2}n^{2}k/shu^{2}n$. From *abjungere*, to un-yoke. Separation by a joint, as that of spores from a growing hypha in some *Pungi*. [a, 35.]

ABLENKUNG (Ger.), n. $A^{2b}/le^{2}n^{2}k-un^{2}$. See *DEFLECTION*.

ABORTION.—**Tubal** *a.* The escape of a fertilized ovum from the oviduct through its ostium abdominale into the peritoneal cavity. [A, 542.]

ABRICOTIER (Fr.), n. $A^{2b}-bre-ko-te-a$. See *PRUNUS armeniaca*.

ABRIN, n. $A^{2b}/ri^{2}n$. A glucoside obtained from *Abrus precatorius*; supposed to be its poisonous principle. [B.]

ABRUS.—**Radix abri**. Fr., *réglisse d'Amérique*. The long woody root of *A. precatorius*. It has a peculiar unpleasant odor and a bitterish, acid taste; used as a substitute for licorice, and in the Indian bazaars found mixed with the latter. [B, 18 (a, 35).]

ABSATZ (Ger.), n. $A^{2b}/za^{2}ts$. See *APOTHEME*.

ABSCCESS.—*Gas-a.* See *Tympanitis a.*—*Gelenka'* (Ger.). See *ARTHRAPOSTEMA*.—*Senkungs-a'* (Ger.). 1. A wandering *a.* 2. A burrowing *a.*

ABSCCESSUS.—*A. carniformis*. Of Severinus, a hard and compact species of sarcoma affecting joints. [L, 50 (a, 34).]

ABSTHNITT (Ger.), n. $A^{2b}/shn^{2}t$. See *SEGMENT*.

ABSTREHEND (Ger.), adj. $A^{2b}/sta-e^{2}nd$. See *PATENT* (1st def.).

ABSTERGENT.—For *abstergirende* substitute *abstergirendes*.

ABWASCHUNG (Ger.), n. $A^{2b}/va^{2}sh-un^{2}$. See *ELUTRIATION*.

ABZIEHER (Ger.), n. $A^{2b}/tse-e^{2}r$. An abductor.

ACACIA.—*A. acapulcensis* [Kunth]. Sp., *tepeguaje* [Mex. Ph.]. A Mexican species. The bark is rich in tannin, and a gum that exudes from it is used like gum arabic. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122].—*A. cavenia*. The *cavenia* of the Chileans; the cavan-tree; a species with fragrant flowers and nauseous seeds. The stem and branches yield a gum. [a, 35].—*A. glaucophylla*. A species found on the Somali coast, yielding gum arabic. [a, 35].—*A. grandiflora*. See *ANNESLEE grandiflora*.

ACALYPHA.—*A. prunifolia*. Sp., *yerva del pastor* [Mex. Ph.]. A Mexican species, used in decoction as a vulnerary. [J. M. Maisch, "Am. Jour. of Pharm.," Apr., 1886, p. 168.]

ACANTHUS.—*A. germanicus*. See *CENTAUREA benedicta*.

ACARUS.—*A. eruditus*. See *CHEYLETUS eruditus*.—*A. nidulans*. A species parasitic on small birds, sometimes found on man. [L, 15].—*A. reduvius*. See *IXODES reticulatus*.

ACCESSIFLEXOR [Coudes] (Lat.), n. m. $A^{2k}(a^{2k})-se^{2s}(ke^{2s})-si^{2}-fle^{2x}/o^{2}r$. Gen., *-or'is*. A muscle that is accessory to a flexor muscle. The lumbricales, ancillary to the tendons of the flexor perforans, are divided into the *a.* indicis, the *a.* medii, the *a.* annularis, and the *a.* quinti. The flexor digitorum accessorius becomes the *a.* digitorum, and the pedal lumbricales become the *a.* secundi, the *a.* tertii, the *a.* quarti, and the *a.* quinti. ["Med. Rec.," 1887, vol. xxxii, p. 126 (a, 34).]

ACCESSISPINAL, n. $A^{2k}-se^{2s}/si^{2}-spi^{2}n^{2}l$. Of Coudes, a muscle that is accessory to a spinal muscle. [a, 34.]

ACCESSORIUS.—*A. tragi*. See *PYRAMIDALIS auricularis*.

ACCOUCHEMENT.—*A. de crâne*. See *VERTER DELIVERY*.—*A. de face*. See *FACE DELIVERY*.—*A. de tête*. See *HEAD DELIVERY*.—*A. par le siège*. See *BREECH LABOR*.

ACER.—*A. campestre*. Fr., *érable champêtre* (ou commun), *auzerault*, *petit érable*, *bois chaud*. Ger., *Feldahorn*, *Marshahorn*. Common European (or field-) maple, dog-oak, maser-tree of Europe and central Asia. The wood furnishes the best charcoal. The bark was formerly used medicinally like elm-bark. [a, 35].—*A. dasycarpum*. Fr., *érable blanc* (ou *à fruit cotonneux*). Silver (or soft, or white) maple of North America. The sap yields sugar, but in smaller proportions than the other sugar-maples. [a, 35].—*A. negundo*. See *NEGUNDO aceroides*.—*A. platanoides*. Fr., *érable à feuilles de platane*, *fauz sycamore*, *érable plane*. Ger., *Lehne*. Norway (or platanus-leaved) maple. Its properties are like those of *A. pseudo-platanus*. [a, 35].—*A. pseudo-platanus*. Fr., *sycamore*, *grand érable*, *érable blanc*. Ger., *Bergahorn*, *weisser Ahorn*. Greater maple, common sycamore of Europe, plane of Scotland. The sap, which yields in early spring some sugar and in Scotland is sometimes made into wine, was formerly used as an antiscorbutic and in diseases of the skin and urinary organs. [a, 35].—*A. tartaricum*. A bushy shrub or tree of southeastern Europe and central Asia. The fruits have been used, under the name of *samaræ aceris tartarici*, in intermittent fever. [a, 35.]

ACESIMUS (Lat.), adj. $A^{2s}(a^{2k})-e^{2s}/i^{2}m-u^{2}s(u^{2}s)$. Gr., *ἀκεσίμος*. Wholesome, curative. [A, 311.]

ACETAS.—**Unguentum acetatis plumbici compositum** [Dan. Ph., Norw. Ph.]. An ointment of 2 parts of saffron, 4 of camphor, 8 of oil of hyoscyamus, and 36 of ointment of lead acetate. [B, 95 (a, 38).]

ACETOPHENETIDINE, n. $A^{2s}/e^{2t}-fe^{2n}-e^{2t}/i^{2}d-en$. Fr., *acétophénétidine*. See *PHENACETINE*.

ACETOPHENONE, n. $A^{2s}-e^{2t}-o-fe^{2n}/on$. Fr., *acétophénone*. See *HYPPONE* and *PHENYLMETHYL ketone*.

ACETOSELLA.—**Kali acetosella**. See *POTASSIUM binzoalate*.

ACETOXIME, n. $A^{2s}-e^{2t}-o^{2}x'im$. Fr., *acétoxime*. An oxime substitution product of an acetone. [Paschis, Obermayer, "Mitsch. f. Chem.," xlii, p. 451; "Rev. des sci. méd.," Jan., 1893, p. 92.]

ACETPHENETIDINE, n. $A^{2s}/e^{2t}-fe^{2n}-e^{2t}/i^{2}d-en$. See *PHENACETINE*.

ACETYPHENYLHYDRAZINE, n. $A^{2s}/e^{2t}-i^{2}l-fe^{2n}-i^{2}l-hid^{2}ra^{2}z-en$. See *HYDRA CETIN*.

ACHATINA (Lat.), n. f. $A^{2k}(a^{2ch2})-a^{2t}(a^{2b})-i(e)/na^{2}$. See *AGATINE*.

ACHETA (Lat.), n. m. $A^{2k}(a^{2ch2})/e^{2t}-a^{2}$. Gr., *ἀχέτα*, *ἀχέτης*. Ger., *Heimchen*. The typical genus of a family (*Achetidae*; Ger., *Achetiden*) of saltatory orthopterous insects (crickets) having very long slender legs, and wings and wing-covers which fold horizontally. [a, 35].—*A. campestris* [Fabr.]. Ger., *Feldheimchen*, *Feldgrille*. The field-cricket, used like *A. domesticus*. [a, 35].—*A. domesticus*. Ger., *Hausgrille*, *Hausheimchen*. The house-cricket; formerly used as a laxative and recently recommended (the expressed juice) in darkening or discoloration of the cornea. [a, 35.]

ACHILLODYNIA (Lat.), n. f. $A^{2k}(a^{2ch2})-i^{2}l^{2}/o^{2}lo^{2}-di^{2}n^{2}(du^{2}n^{2})/i^{2}-a^{2}$. From *Ἀχιλλεύς*, see *TENDO Achillis*, and *δύνη*, pain. Fr., *achillodymie*. Ger., *Achillodynie*. A morbid state characterized by great pain at the point of insertion of the tendo Achillis on walking or standing, together with thickening of the tendon at that point. [Albert, "Wien. med. Presse," 1892, p. 41; "Gaz. hebd. de méd. et de chir.," Jan. 28, 1893, p. 47.]

ACHONDROPLASIA (Lat.), n. f. $A^2k(a^2ch^2) \cdot o^2n''dro(dro^2) \cdot pla(pla^2)/zi^2(zi^2) \cdot a^2$. From a priv., $\chi\acute{o}\nu\delta\rho\acute{o}s$, cartilage, and $\pi\lambda\acute{\alpha}\sigma\sigma\epsilon\upsilon\varsigma$, to mold. Micromelic rickets; fetal rachitis with disturbances of endochondral ossification. [¹Edinb. Med. Jour., Dec., 1891, p. 579 (a, 34).]

ACHROMATURIA (Lat.), n. f. $A^2k(a^2ch^2) \cdot rom \cdot a^2t(a^2t) \cdot u^2 \cdot (u)^2i^2 \cdot a^2$. From a priv., $\chi\rho\acute{o}\mu\alpha$, color, and $\acute{o}\upsilon\rho\omicron\nu$, urine. Colorlessness of the urine. [A, 314.]

ACHROMOPHOULOUS, adj. $A^2k \cdot rom \cdot o^2t^2(2l) \cdot u^2s$. From a priv., $\chi\rho\acute{o}\mu\alpha$, color, and $\phi\acute{\alpha}\lambda\epsilon\iota\varsigma$, to love. Ger., *achromophil*. See **ACHROMATIC** (2d def.).

ACHYRANTHES.—A. calea. Of Ibbáñez, a Mexican species with ovoid-lanceolate leaves, and small hermaphrodite flowers arranged in woolly glomerules. [B, 224 (a, 14).]—A. prostrata. The *Papalia prostrata*. [a, 33.]

ACID.—Sozolic a. See **ASEPTOL**.

ACIDE.—A. anilidé. An acid compounded with aniline in the same way that an amido-acid is with ammonia. [B, 46.]

ACIDE NITRIQUE (Fr.), n. $A^3 \cdot sed \cdot ne \cdot trek$. Nitric acid.—*Liparolé d'a*. n. See **ADEPS oxygenatus**.

ACNE.—A. of the throat. See **Follicular PHARYNGITIS** and **Follicular ANGINA**.

ACNÉ.—A. chéloi'dienne. See **DERMATITIS papularis capillitii**.—A. des cachectiques. See **ACNE cachecticum**.

ACNEMIA.—2. Fr., *aknémie*. Absence of the lower limbs. [L, 49.]

ACNISTUS (Lat.), n. m. $A^2k(a^2k) \cdot ni^2st^2(u)s(u)s$. From a priv. and $\kappa\acute{\iota}\nu\epsilon\iota\omega$, to irritate. Fr., *acniste*. A genus of tropical American solanaceous shrubs or trees. [a, 35.]—A. aggregatus, A. arborescens. Very poisonous West Indian species, by some authors considered identical. The second, known as deadly dweale, is not to be confounded with *Atropa belladonna*. [B, 114; a, 35.]—A. Plumieri. A species growing in the island of Martinique; a small shrub with oblong-lanceolate leaves and clusters of white flowers. [a, 35.]

ACONINE, n. $A^1k \cdot o^2n \cdot en$. A base, $C_{26}H_{41}NO_{11}$, obtained when aconitine undergoes hydrolysis; hygroscopic, brittle, and uncyclizable. Its physiological action is unknown. [¹Am. Jour. of Pharm., Apr., 1892, p. 209 (a, 34).]

ACONITE.—Country a., Wild a. The *Gloriosa superba* or its root. [a, 35.]

ACONTIUM.—A. cæruleum. The *A. napellus* or other blue-flowered species of A. [a, 35.]—A. cammarum. 1. Of Jacquin, the *A. bernhardianum*. The tuberous roots, formerly official in the Paris Codex, are less virulent than those of *A. napellus*. 2. Of Linnaeus, *A. stoerkianum*. [a, 35.]—A. saluterium. 1. See *A. anthora*. 2. The *Paris quadrifolia*. [a, 35.]—A. tragactonum. The *A. lycotomum*. [a, 35.]

ACONOUS [Grenacher], adj. $A^2k \cdot on \cdot u^2s$. From a priv., and $\kappa\acute{o}\nu\omicron\varsigma$, a cone. Of a compound eye, having the cells which usually give rise to the crystalline cones remaining uncoalesced. [L.]

ACONURESIS (Lat.), n. f. $A^1k(a^2k) \cdot o^2n(ou) \cdot u^2r(ur) \cdot es(as)^2s$. Gen., $-es^2eos(-is)$. From $\acute{\alpha}\kappa\omega\nu$, involuntary, and $\acute{o}\upsilon\rho\eta\sigma\iota\varsigma$, urination. Of Gouley, involuntary urination. [a, 34.]

ACROMEGALY, n. $A^2k \cdot ro \cdot me^2g^2a^2l \cdot i^2$. Lat., *acromegalia* (from $\acute{\alpha}\kappa\rho\omicron\nu$, an extremity, and $\mu\acute{\epsilon}\gamma\alpha\varsigma$, great). Fr., *acromégalie*. Ger., *Akromegalie*. Lit., hypertrophy of the extremities (face, hands, and feet); a disease characterized, especially in its early stages, by enlargement of one or more of those parts, with mental dullness, fatigue, and severe neuralgic pains in the head and extremities. [a, 34.]

ACROMICRIA (Lat.), n. f. $A^2k(a^2k) \cdot ro(ro^2) \cdot mi^2k^2(ri^2) \cdot a^2$. From $\acute{\alpha}\kappa\rho\omicron\nu$, an extremity, and $\mu\acute{\iota}\kappa\rho\acute{o}\varsigma$, small. Abnormal smallness of one or more of the extremities. [a, 34.]

ACROPARÆSTHESIA (Lat.), n. f. $A^2k(a^2k) \cdot ro(ro^2) \cdot pa^2r \cdot (pa^2r) \cdot es^2(as)^2e^2s^2 \cdot thez(thas)^2i^2 \cdot a^2$. From $\acute{\alpha}\kappa\rho\omicron\nu$, an extremity (see also **PARÆSTHESIA**). Of Laquer, paræsthesia affecting the extremities. [a, 34.]

ACROSTICHUM.—A. radiatum. See *A. dichotomum*.

ACTE.—Grana actes. The berries of *Sambucus nigra*. [a, 35.]

ACUMEN.—A. ossis sacri. See **Coccyx**.

ACUS.—A. ossea. The styloid process of the temporal bone. [L, 349.]

ADDUCTEUR.—A. oblique du quatrième os du métacarpe. See **OPONENS minimi digiti**.

ADDUCTOR.—A. hallucis, caput obliquum [Ger. Anat. Soc.]. See *A. hallucis obliquus*.—A. hallucis, caput transversum [Ger. Anat. Soc.]. See *A. hallucis transversalis*.

ADELPHOTAXY, n. $A^2d \cdot e^2l^2(2) \cdot o \cdot ta^2x \cdot i^2$. From $\acute{\alpha}\delta\epsilon\lambda\phi\acute{o}\varsigma$, a brother, and $\tau\acute{\alpha}\xi\iota\varsigma$, arrangement. The tendency of motile cells to assume definite positions. [L.]

ADENTIS.—A. calcuosa. Calcareous degeneration and inflammation of a lymph node. [a, 34.]

ADENOMA.—A. gelatinosum. Ger., *Gallertkropf*. See *Colloid GOITRE*.

ADENOPHORE, n. $A^2d \cdot e^2n \cdot o \cdot for$. From $\acute{\alpha}\delta\eta\nu$, a gland, and $\phi\acute{o}\rho\acute{o}\varsigma$, bearing. A stalk bearing a nectar gland. [B, 229 (a, 35).]

ADENOSARCOMERHABDOMYOMA (Lat.), n. n. Gen., $-om^2(atis)$. From $\acute{\alpha}\delta\eta\nu$, a gland, $\sigma\acute{\alpha}\rho\acute{x}$, flesh, $\rho\acute{\alpha}\delta\delta\omicron\varsigma$, a rod, and $\mu\acute{\upsilon\varsigma}$, a muscle. A neoplasm containing the elements of adenoma, sarcoma, and rhabdomyoma. [a, 34.]

ADER.—A'kuchen. See **PLACENTA**.—**Hohla'**. See the major list.—**Kegela'**. See **BRACHIAL ARTERY**.—**Königsgr.** See **Basilic VEIN**.—**Kopfarma'**. See **Innominate VEIN**.—**Leberpforta'**. See

Portal vein.—**Lufta'**. See **TRACHEA**.—**Milcha'**. See **LACTEAL** (n.).—**Milchbrusta'**. See **THORACIC DUCT**.—**Zorna'**. The frontal vein.

ADESMOSIS.—Adesmoses of the skin. Ger., *Adesmosen der Haut*. Of Auspitz, an order of skin diseases of the class of *Choriblastoses*, comprising those characterized by atrophy or defective development of the connective tissue of the skin. They include *Lidioderma essentialis* and *Stria atrophica cutis*. [G, 4.]

ADIE MORRHYSIS (Lat.), n. f. $A^2d(a^2d) \cdot i(i^2) \cdot e^2m(m^2) \cdot a^2 \cdot e^2m \cdot o^2r^2(ri^2) \cdot ru^2s$. Gen., $-rhy^2s^2eos(-or^2rhy^2sis)$. From a priv., $\acute{\alpha}\delta\iota$, through, $\acute{\alpha}\iota\mu\alpha$, blood, and $\rho\acute{\upsilon\sigma\iota\varsigma}$, a flowing. A failure of the blood to circulate through the vessels in consequence of intrinsic or extrinsic obstruction. [a, 34.]

ADIN, n. See **BUBO**.

ADIPOSIS.—A. dolorosa. Of F. X. Dercum, an obscure disease in which there are fatty swellings occurring in different regions, with pain. [a, 34.]

ADJUNCTION, n. $A^2d \cdot ju^2n^2k^2shu^2n$. Lat., *adjunctio* (from *adjungere*, to add). The act of joining or state of being joined [a, 34.]

ADULESCENS. For **ADOLESCENS** substitute **ADOLESCENT**.

ADULESCENTIA. For **ADOLESCENTIA** substitute **ADOLESCENCE**.

ADVANCEMENT.—A. of Tenon's capsule. See **Capsular a**.

ADZUKE (Jap.), n. A small, red laxative and diuretic bean, used (alone or mixed with rice) by the Japanese as a remedy for beri-beri. [D. B. Simmons (a, 35).]

ÆDROMANIA (Lat.), n. f. $E^2d(a^2 \cdot e^2d) \cdot e^2(2) \cdot e^2 \cdot o(2) \cdot ma \cdot (ma^2) \cdot ni^2 \cdot a^2$. From $\acute{\alpha}\iota\delta\iota\alpha$, the genitals, and $\mu\acute{\alpha}\nu\iota\alpha$, madness. See **EROTOMANIA**.

ÆGITHOGNATHISM, n. $E^2j \cdot i^2 \cdot tho^2g^2na^2th \cdot i^2zm$. From $\acute{\alpha}\gamma\theta\acute{o}\varsigma$, the hedge-sparrow, and $\gamma\acute{\nu}\alpha\theta\acute{o}\varsigma$, the jaw. The condition of the *Ægithognathos*; having a broad vomer truncated in front, its cleft posterior extremity including the sphenoidal rostrum. [a, 34.]

AER.—A. hepaticus. Hydrogen sulphide. [B.]—A. phlogisticatus. Nitrogen. [B.]

AEROPLETHYSMOGRAPH, n. $A^1 \cdot e^2r(ar) \cdot o(2) \cdot ple^2th \cdot (plath) \cdot i^2z \cdot mo \cdot gra^2f$. From $\acute{\alpha}\epsilon\rho$, air, $\pi\lambda\eta\theta\eta\sigma\mu\acute{o}\varsigma$, increase, and $\gamma\rho\acute{\alpha}\phi\epsilon\upsilon$, to write. Ger., A. A pneumograph, consisting of a large air chamber connected by a tube to an animal's trachea, and suitable connections by which simultaneous tracings of the movements of the inspired and expired air are obtained on a revolving cylinder. [J, 53.]

ÆTAS.—Æ. florens. Adolescence.

ÆTHYLATUS (Lat.), adj. $E^2th(a^2 \cdot e^2th) \cdot i^2l(u^2l) \cdot at(a^2t) \cdot u^2s(u^2s)$. Combined with or containing ethyl. [B.]

AFFECTIVE, adj. Pertaining to the affections or to mental emotions. [a, 34.]

AFFECTUS.—A. epidemicus liedensis. Of Sylvius, see **INTERMITTENT FEVER**.

AFTER.—Rusconi'scher A. See **BLASTOPORE**.

AGARICUS.—A. aggregatus [Bulliard]. Fr., *chair de Bavière*. A species used as a food in Germany. [B, 88.]—A. albo-rufus. Fr., *aloumère*, *agaric du saureau*, *jahuguère*. An edible species found in southern France. [a, 35.]

AGATHIN, n. $A^2g^2a^2th \cdot i^2n$. From $\acute{\alpha}\gamma\alpha\theta\acute{o}\varsigma$, good. A proprietary name for salicylmethylphenylhydrazine, used in neuralgia. [a, 34.]

AGENOUILLE (Fr.), adj. $A^2 \cdot zhe^2n \cdot el \cdot ya$. See **GENICULATE**.

AGGLUTINATIO.—A. squameformis. See **FALSE SUTURE**.

AGNINE, n. A^2g^2n . From *agnus*, a lamb. A proprietary name for a fat prepared from sheep's wool. [a, 34.]

AGRAPHA.—A. amnemonica. A. in which letters or words can be written but, in consequence of loss of memory, are not expressive. [A, 540 (a, 34).]—A. atactica. A. in which the power of writing the separate letters is lost, in consequence of loss of muscular co-ordination. [A, 540 (a, 34).]

AGRYPNIC, adj. $A^2g \cdot ri^2p^2ni^2k$. From $\acute{\alpha}\gamma\rho\epsilon\iota\nu$, to search for, and $\nu\eta\pi\omicron\varsigma$, sleep. Pertaining to or affected with insomnia. [a, 34.]

ACHMOPHOBIA (Lat.), n. f. $A^2 \cdot i^2k^2(2) \cdot ch^2 \cdot mo^2mo^2 \cdot fob \cdot (fo^2b) \cdot i^2 \cdot a^2$. From $\acute{\alpha}\chi\mu\acute{\alpha}$, the point of a spear, and $\phi\acute{o}\beta\omicron\varsigma$, fear. Of Magnar, morbid fear of being touched. [A, 349.]

AIGRETTE.—A. simple. See **HAPLOPAPPUS** (1st def.).

AIL.—Horn-a. An æmemic disease of horned cattle; so-called on account of the horns being abnormally cold. [L.]

AKAMPSIE (Ger.), n. For this and similar words, see **ACAMP-SIA**, etc.

AKATAMATHESTIA (Lat.), n. f. $A^2(a^2) \cdot ka^2t(ka^2t) \cdot a^2 \cdot ma^2th \cdot (ma^2th) \cdot ez(as)^2i^2 \cdot a^2$. From a priv., and $\kappa\alpha\tau\alpha\mu\alpha\theta\eta\sigma\alpha\iota\nu$, to understand. Inability to understand ordinary conversation; observed in some forms of insanity. [A, 540 (a, 34).]

ALA.—Ala atlantis. Ger., *Flügel des Atlas*. The transverse processes of the atlas. [L, 44.]—A. lobus centralis. A lateral part of the lobus centralis cerebelli. [a, 18.]

ALABASTRINE, n. $A^2l \cdot a^2 \cdot ba^2st^2ren$. A proprietary name for naphthalene. [a, 34.]

ALAGAO.—Omit 2d def.

ALBICATUS (Lat.), adj. $A^2l(ba^2l) \cdot i^2k \cdot at(a^2t) \cdot u^2s(u^2s)$. From *albicare*, to make white. See **ETIOLOGED**.

ALBOLENE, **ALBOLIN**, n's. $A^2l(b) \cdot o^2l \cdot en \cdot i^2n$. From *albus*, white, and *oleum*, oil. A purified, nearly colorless ointment base, supposed to be purified vaseline.

ALBUMIN.—Storage a. A. stored in the tissues. [L.]

ALBUMINURIA.—A. *acetonica*. See *NEPHRITIS acetonica*.
—A. *renal*. Nephrogenous a. [L.]—**Hepatic a.** A. due to a retrograde metamorphosis of albuminoids in the processes of digestion and assimilation, to liver disease, or to a consumption of albuminoids in excess of the capabilities of the liver. [a, 34.]

ALCAROME, n. A²/ka²-om. An aromatic liquor, recommended by R. Rother as a base for elixirs, prepared by removing the shells from 3 drachms of cardamoms, trituring the grains to a fine powder, mixing with 4 drachms each of finely powdered coriander and magnesium carbonate, and 10 drops of oil of cassia, digesting for several days with a mixture of 2 pints of alcohol and 4 pints of water, shaking occasionally, filtering, and adding enough alcohol to produce 6 pints. [“Proc. of the Am. Pharm. Assoc.,” xxxv (a, 14).]

ALCEDO (Lat.), n. f. A²/al²-sed(kad)/o. Gen., -ced'/inis. Ger., *Eisvogel*, *Königfischer*. The typical genus of the *Alcedinidae* (the *Halcyonidae*). [a, 35.]—A. *aspida*. Ger., *gemeiner Eisvogel* (oder *Königfischer*). The kingfisher, the halcyon (*άλκυων*) of the ancients. Its dried heart (*cor alcedinis*) was formerly worn by children, not only to prevent but to cure epilepsy. [a, 35.]

ALCOHOL.—Perfumers' a. A very high grade of a. (ethyl a.) in the manufacture of which fusel oil and other foreign substances have been destroyed by the use of manganic acid or potassium (or sodium) permanganate. [a, 35.]

ALEXIN, n. A²/e²x/i²n. From *άλεξιν*, to defend. Of H. Buchner, an unstable albuminous body, of complicated structure, that may be isolated from a cultivation of a specific micro-organism and when injected into the body produces an acquired immunity to the disease produced by that organism. [a, 34.]

ALEXOCYTE, n. A²/e²x-o-sit. Of Hankin, an eosinophilous leucocyte. [a, 34.]

ALLOGENIC, adj. A²/go-je²n/i²k. From *άλγος*, pain (1st def.), or *algere*, to be cold (2d def.), and *γεννέω*, to engender. Fr., *allogène*. 1. Giving rise to neuralgic pain (said by E. C. Seguin of certain areas on the head and face that often become hyperæsthetic as a case of trigeminal neuralgia approaches cure, and, if irritated, cause a momentary return of the neuralgia in greater or lesser severity). [“N. Y. Med. Jour.,” Apr. 25, 1890, p. 449.] 2. Causing reduction of the bodily temperature below the normal. [a, 35.]

ALLOGÉNINE (Fr.), n. A²/go-zha-nen. A substance extracted from fermented animal matter that produces, when administered to animals, a decided fall of temperature. [a, 34.]

ALINJECTION, n. A²/i²n-je²k/shu²n. From *alcohol* and *injection*. Of B. G. Wilder, a process of repeatedly injecting anatomical specimens with alcohol.

ALKADERMIC, adj. A²/ka²-de²rm/i²k. From *alkali* (q. v.), and *δέρμα*, skin. Containing an alkalioid for hypodermic medication. [a, 34.]

ALKALESCENCE.—A. of the humors. Fr., *alkalescence des humeurs*. A peculiar disposition of the system, characterized by a tendency to putrid or alkaline fermentation. [B, 38.]

ALKALOID.—*Leichena*' (Ger.). See *PROMAINE*.

ALKAMETRIC, adj. A²/ka²-me²t/r'i²k. Containing a metric dose of an alkalioid. [a, 34.]

ALKANET.—A. *paper*. A test paper prepared by soaking in an ethereal tincture of a. [L.]

ALKATRIT, n. A²/ka²-tri²t. From *alkali* (q. v.), and *terere*, to rub. A triturate containing an alkalioid. [a, 34.]

ALLOGAMY, n. A²/lo²g'a²m/i². From *άλος*, other, and *γάμος*, marriage. Lat., *allogamia*. In botany, cross-fertilization. [a, 35.]

ALOCASIA.—A. *indica*. A species growing in Borneo with a large underground tuber from which springs a cluster of leaves 1 foot or more in length and of a metallic bronze color on their upper surface. [a, 35.]—A. *macrorrhiza*. Roasting cocoa; a species found in the East Indies and Molucca Islands. The root-stock is eaten cooked. [a, 35.]—A. *odora* (*odorata*). A species found in Pegu with a powerfully acid juice. The lower surface of the leaf secretes a waxy substance. [a, 35.]

ALOËS.—*Pilules d'a. et de galbanum*. See *PILULE gummoso-laxatives*.—*Pilules d'a. et d'opium*. See *PILULE anglicæ*.

ALOPÉCIE.—A. *inminuée*. See *FOLLICULITIS decalvans*.

ALUMNOL, n. A²/u²m-no²l. A salt containing about fifteen per cent. of silver and five per cent. of aluminum; a fine white powder, soluble in water, in glycerin, and in alcohol; used as a topical antiseptic. [a, 34.]

AMARYLLISME (Fr.), n. A³-ma³-re-lezm. Yellow fever. [a, 15.]

AMAXOPHOBIA (Lat.), n. f. A²/m(a²)-a²x(a²)-o²-fob(fob)/B-a². From *άμαφα*, wagon, and *φόβος*, fear. A morbid fear of being in a wagon or cart. [A, 540 (a, 34).]

AMECBA.—A. *malariae*. See *PLASMODIUM malariae*.

AMOMUM.—A. *medium*. A species the aromatic stimulant fruits of which are known as ovoid *China cardamoms*. [a, 35.]

AMORPHOPHALLUS.—A. *lyratu*. A species growing in the Circar Mountains. The roots are acrid but are eaten boiled. [a, 35.]

AMPHOPHILE, adj. A²/m'fo-fi²l. From *άμφω*, both, and *φιλέω*, to love. Having an affinity both for acid eosin and for basic methyl-blue. [a, 34.]

AMPULLA.—A. of *Lorenzini*. Fr., *ampoule de Lorenzini*. The dilated internal extremity of the tubes of *Lorenzini*. [L, 158.]

AMYLOGENIC, adj. A²m-i²l-o-je²n/i²k. Producing starch. [a, 35.]

AMYLOPLASTS, n. A²m/i²l-o-pla²sts. From *άμυλον*, starch, and *πλάσσειν*, to form. Leucoplastids. [B, 291 (a, 35).]

ANABOLIC, adj. A²n-a²-bo²i/i²k. Pertaining or relating to anabolism. [a, 33.]

ANABOLISM, n. A²n-a²b-o²i-i²zm. From *αναβάλλειν*, to throw up. That form of metabolism in which a substance is transformed into one more complex or more highly organized. [a, 35.]

ANACAMPTOMETER, n. A²n-a²-ka²mp-to²m'e²t-u²r. From *ανάκμπτειν*, to bend back, and *μέτρον*, a measure. Of Duprat, an instrument for measuring reflexes. [“Compt. rend. soc. d. biol.,” 1889, iii, p. 151 (a, 34).]

ANÆMIA.—*Fæcal a.* A. due to self-intoxication caused by deficient intestinal action; steatorrhea. [a, 34.]

ANÆSTHESIA.—*Genital a.* Absence of the special sensation accompanying coition. [a, 34.]

ANALGENE, n. A²n-a²-je²n. Orthoxyethylananamonoacetyl-amidoquinoline, a white crystalline powder derived from oxyquinoline. Used as an antirheumatic. [a, 34.]

ANALGÉSINE (Fr.), n. A²-na²-l-zha-zen. A name proposed for antipyrine manufactured in France, to evade the copyright of the name antipyrine.

ANANTOCHASMUS (Lat.), adj. A²n(a²n)-a²nt(a²nt)-o²(o²)-ka²z(ch²a²s)/mu²s(mu²s). From *άναπτα*, up-hill, and *χάσμα*, a chasm. Having the line connecting the punctum spinæ nasalis posterioris and the punctum foraminis magni anterius making an angle of from -14° to -1° with the radius fixus. [Lissauer (a, 48).] Cf. figure under CATANTOSTOMUS.

ANANTOPYLLUS (Lat.), adj. A²n(a²n)-a²nt(a²nt)-o²p'i²l(u²l)-u²s(u²s). From *άναπτα*, up-hill, and *πύλη*, a gate. Having the line connecting the punctum foraminis magni anterius and the punctum foraminis magni posterius making an angle of from 0° to -7.5° with the radius fixus. [Lissauer (a, 48).]

ANANTURANISCUS (Lat.), adj. A²n(a²n)-a²nt(a²nt)-u²r(ur)/a²n(a²n)-i²sk'u²s(u²s). From *άναπτα*, up-hill, and *οὐρανισκος*, the palate. Having the line connecting the punctum præmaxillare and the punctum foraminis incisivi making an angle of from -18° to 0° with the radius fixus. [Lissauer (a, 48).]

ANANTURANUS (Lat.), adj. A²n(a²n)-a²nt(a²nt)-u²r(ur)/a²n(a²n)-u²s(u²s). From *άναπτα*, up-hill, and *οὐρανός*, the palate. Having the line connecting the punctum præmaxillare and the punctum spinæ nasalis posterioris making an angle of from -12° to 0° with the radius fixus. [Lissauer (a, 48).]

ANAPLASTS, n. A²n/a²-pla²sts. Of Meyer, leucoplastids. [a, 35.]

ANASTOMOSE.—A. *elliptique* (Fr.). Anastomosis between neighboring nerve-trunks in which the connecting fibres describe part of an ellipse. [a, 18.]—A. *par canal collatérale* (Fr.). Anastomosis by an artery which rejoins its trunk. [L.]—**Enteroa.** See *A. intestinale*.

ANASTOMOSIS.—*Intestinal a.* See *ANASTOMOSE intestinale*.

ANCONÆUS.—A. *lateralis*. See *A. externus*.—A. *medialis*. See *A. internus* (1st def.) and *A. longus*.

ANCYLOBLEPHARON (Lat.), n. n. A²n(a²n)-si²l(ku²l)-o²(o²)-ble²f'a²r(a²r)-o²n. See *ANCYLOBLEPHARON*.

ANCYRA (Lat.), n. f. A²n(a²n)-si²r(ku²r)/a². Gr., *άγκυρα*. A hook. [a, 34.]

ANDROLOGY, n. A²n-dro²l-i²o-je². From *άνρ*, a man, and *λόγος*, understanding. An absurd term for the pathology, etc., of the male genito-urinary organs.

ANDROMEDOTOXIN, *ANDROMETOXIN*, n's. A²n-dro²m'e²d-o-to²x'i²n. -dro²m-e²-to²x'i²n. Fr., *andromédoxine*. An anodyne poisonous principle obtained from *Monotropa uniflora*, *Andromeda japonica*, *Rhododendron maximum*, and other Ericaceæ plants. [B, 5 (a, 35).]

ANDROPHYLL, n. A²n-dro-fi²l. Lat., *androphyllyum* (from *άνρ*, a man, and *φύλλον*, a leaf). A stamen. [a, 35.]

ANÉMIE.—A. *globulaire essentielle* [Jaccoud]. See *CRUROSIS*.—A. *vraie*. Syn.: *a. posthémorrhagique*. Anæmia caused by hæmorrhage, so that all the elements of the blood are diminished in equal proportion. [a, 18.]

ANGLE.—*Rolandic a.* The a. formed by the meeting of the upper end of the fissure of Rolando with the mesial plane. [a, 29.]—*Sylvian a.* The a. formed by the posterior horizontal limb of the Sylvian fissure with a line drawn at right a²s to the longest antero-posterior diameter of the hemisphere. [a, 29.]—**Temporal a.** of the eye. The external canthus. [L.]

ANGST.—*Herz'a*. See *ANXIETAS cardiaca*.—*Platz'a*. See *AGORAPHOBIA*.

ANGULARIS.—A. *oris superior*. See *LEVATOR anguli oris*.

ANGULIBIALIS [Coes] (Lat.), n. m. A²n(a²n)-i²al(bi²al)/gu²l(gu²l)-i²e-la²b(bi²b)-i²-al(a²l)/i²s. See *DEPRESSOR anguli oris*.

ANTI-LEVATOR [Coes] (Lat.), n. m. An(a²n)-i²-le²-vat-(wa²t)-o²r. See *LEVATOR anti*.

ANISOCORIA (Lat.), n. f. A²n(a²n)-i²s-o²(o²)-ko²r(ko²r)/i²-a². From *a priv.*, *ισος*, equal, and *κόρη*, the pupil. Inequality of the pupils.

ANISOTHECUS (Lat.), adj. A²n(a²n)-i²s-o²(o²)-the²k(thak)/u²s(u²s). From *a priv.*, *ισος*, equal, and *θεκν*, a case. Fr., *anisothèque*. Of an ovary or anther, having the two cells unequal or differing in contents. [a, 35.]

ANISPHINCTER [Coes] (Lat.), n. m. An(a²n)-i²-sf²i²n²k'i²-tu²r(tar). See *SPHINCTER ani externus*.

APPLIQUÉ (Fr.), adj. A³p-ple-ka. See APPRESSED.

ASEBOTOXIN, n. A²s-e²b-o-to²x'i²n. From a priv., *sebum*, fat, and τοξικόν, poison. A poisonous glucoside found in *Andromeda japonica*. [B. 5 (a, 35).]

ASELLINE, n. $A^2s\text{-}e^2l\text{-}en$. From *asellus*, the cod. An alkalioid. $C_{12}H_{22}N_4$, found in cod-liver oil. [B.]

ASH,—Bitter a. For the 3d def., substitute *The Picramnia excelsa*. [a, 35].—Field-a. *The Pyrus aucuparia*. [A, 505 (a, 21)].—Ground-a. 1. *The Eupodium podagraria*. 2. *The Angelica silvestris*. [A, 505 (a, 21)].—Spanish a. *The Syringa vulgaris*. [A, 505 (a, 21)].—Water-a. See *PTELEA trifoliata*.

ASPHYXIA.—A. solaris. See INSOLATION.

ASSONANCE, n. $A^2s\text{-}so^n\text{-}ns$. From *assonare*, to respond to. A morbid propensity to employ alliteration.

ASTASIA-ABASIA (Lat.), n. f. $A^2s\text{-}(a^2s)\text{-}taz\text{-}(ta^2s)\text{-}i^2\text{-}a\text{-}a^2b\text{-}(a^2b)\text{-}az\text{-}(a^2s)\text{-}i^2\text{-}a$. From *astasia*, unsteadiness, a priv., and *abasis*, a stepping. Fr., *astasie-abasie*. A nervous disorder in which the sufferer suddenly falls to the ground when walking, and when sitting suddenly bends forward, his head dropping on his chest and his body seeming to lose its power of support. There is no loss of consciousness. [a, 34.]

ÄSTIG (Ger.), adj. See RAMOSE.

ASTRAGALECTOMY, n. $A^2s\text{-}tra^2g\text{-}a^2l\text{-}e^2t\text{-}co\text{-}m\text{-}i^2$. From *astragalos*, the astragalus and *ectom*, excision. Fr., *astragalectomie*. Of Ollier, excision of the astragalus. [a, 34.]

ASTROCARYUM.—A. ayri. For *Tophophoenix* substitute *Tocophania*.

ATROPHODERMA (Lat.), n. n. $A^2t\text{-}(a^2t)\text{-}ro^2f\text{-}o\text{-}(o^2s)\text{-}du^2rm\text{-}(de^2rm)\text{-}a^2$. Gen., *-derm\text{-}atos\text{-}(atis)*. From *atrophos*, ill-fed, and *derma*, the skin. Of Crocker, atrophy of the skin in which there may be either simply diminution in the number or size of its component elements or a degenerative alteration in those elements. [a, 34].—A. albidum. A variety of xeroderma (of Kaposi) in which the skin from the middle of the thigh to the sole, more rarely from the upper arm to the palm, exhibits white patches, is stretched, and glistens, the epidermis being thin and peeling off in shining flakes. There is hyperesthesia. [a, 34].—A. idiopathicum. A quantitative or degenerative atrophy of the skin not due to any other disease. [a, 34].—A. neuriticum. See GLOSSY SKIN.—A. pigmentosum. Xeroderma pigmentosum. [a, 34].—A. striatum et maculatum. Linear atrophy of the skin. [a, 34].—A. symptomaticum. A symptomatic of some other disease of the skin or of the trophic nerves. [a, 34].—Senile a. Atrophy of the skin and its appendages in senile degeneration. [a, 34.]

ATROPHODERMATOSIS (Lat.), n. f. pl. $A^2t\text{-}(a^2t)\text{-}ro^2f\text{-}o\text{-}(o^2s)\text{-}du^2rm\text{-}(de^2rm)\text{-}a^2t\text{-}(a^2t)\text{-}os\text{-}(ez)\text{-}as$. From *atrophia*, atrophy, and *derma*, skin. An order of skin diseases in which there is atrophy of the cutaneous tissues. [a, 34.]

ATROPINA.—Lamellæ atropinæ. Discs of atropine; grain gelatin discs containing each $\frac{1}{100}$ of a grain of atropine sulphate. [a, 35.]

ATROPINE.—Discs of a. See Lamellæ ATROPINÆ (in Supplement).

ATTIC OF THE TYMPANUM. For *atticus tympanicus* substitute *conaculum*.

ATTITUDE.—A. of the fœtus. The position of the foetal ovoid as regards the relation of its parts to the mother.

ATTRAHENS, A. aurem. A thin fan-shaped muscle having pale indistinct fibres that arise from the lateral edge of the aponeurosis of the occipito-frontalis and converge to be inserted into a projection on the front of the helix. [a, 34.]

ATTRITA (Lat.), n. f. $A^2t\text{-}(a^2t)\text{-}trit\text{-}(tret)\text{-}a^2$. From *atterere*, to rub against. See CHAFING.

AUFREGEN (Ger.), adj. $A^2u\text{-}f\text{-}rag\text{-}e^2nd$. See IRRITABLE.

AUFRICHTBAR (Ger.), adj. $A^2u\text{-}f\text{-}ri^2ch\text{-}t\text{-}ba^2r$. See ERECTILE.

AUFSPRINGEND (Ger.), adj. $A^2u\text{-}f\text{-}spr\text{-}i^2n\text{-}d\text{-}e^2nd$. See DEHISCENT.

AUFWÄRTSGEKÜRMT (Ger.), adj. $A^2u\text{-}f\text{-}varts\text{-}ge^2kr\text{-}u\text{-}mt$. See INCURVED.

AUSGEDRÜCKT (Ger.), adj. $A^2u\text{-}s\text{-}ge^2d\text{-}ru\text{-}kt$. See EXPRESSED.

AUSHAUCHUNG (Ger.), n. $A^2u\text{-}s\text{-}ha^2u\text{-}ch\text{-}un\text{-}2$. See EXOSMOSE.

AUSMELKEND (Ger.), adj. $A^2u\text{-}s\text{-}me^2lk\text{-}e^2nd$. See EMULGENT.

AUSREISSUNG (Ger.), n. $A^2u\text{-}s\text{-}ri\text{-}s\text{-}un\text{-}2$. See EVULSION.

AUSSATZ.—Gelenka'. See ARTHROLEPROSIS.—Kiefera'. See SYCOISIS.—Kinna'. Mentagra. [L, 80].—Knötena'. Tubercular leprosy.—Löwena'. See LEONTIASIS.—Schlangena'. Tyriasis. [L, 80.]

AUSSCHLAG.—A'artig. See EXANTHEMATOUS.—Frühjahrs'. Lichen. [L, 80].—Impfa'. An eruption following vaccination. [a, 14].—Kieien'. See PTYRIASIS.—Kopfa'. Tinea capitis. [L, 80].—Fustulöser Darna'. See ENTERODIETHENIA.—Schuppena'. A scaly eruption; psoriasis. [G.]

AUSSCHNITT.—Hüfta'. See VENTER OF THE ILLUM.

AUSPÜLUNG (Ger.), **AUSWASCHUNG** (Ger.), n's. $A^2u\text{-}s\text{-}pu\text{-}l\text{-}un\text{-}2$, $va^2s\text{-}ha\text{-}un\text{-}2$. The process of washing out.

AUTOTOMY, n. $A^2t\text{-}o\text{-}t\text{-}o\text{-}m\text{-}i^2$. From *autós*, self, and *toméiv*, to cut. Self-amputation; the voluntary shedding of a limb by a crustacean. [L.]

AVENA.—Decoctum avenæ Loversi. A decoction made by boiling 40 parts of a. exorticata and 5 of lignum santali with enough water to make 500, and dissolving in this 3 of potassium nitrate and 12 of sugar. [B, 270 (a, 38)].—Grutum avenæ. See A. exorticata.

AXILEMMA [Kühne] (Lat.), n. n. $A^2x\text{-}(a^2x)\text{-}i^2le\text{-}m\text{-}ma^2$. Gen., *-lem\text{-}matus\text{-}(atis)*. From *axis* (q. v.), and *λέμμα*, a husk. The sheath of an axis-cylinder. [L, 351.]

AXIS.—Moment-a. of a couple. The line which represents in direction the direction of the couple, and by its length the moment. [a, 49.]

AXOLEMMA (Lat.), n. n. $A^2x\text{-}(a^2x)\text{-}o\text{-}(o^2s)\text{-}le^2m\text{-}ma^2$. See AXILEMMA (in Supplement).

AZOMURIA (Lat.), n. f. $A^2z\text{-}(a^2z)\text{-}o\text{-}mu\text{-}(mu)\text{-}i^2\text{-}a^2$. For deriv., see AZOTE and MURIATIC. The hypothetical radicle or base contained in nitrohydrochloric acid. [Kerr (B, 91).]

BACILLÆMIA (Lat.), n. f. $Ba^2s\text{-}(ba^2k)\text{-}i^2l\text{-}lem\text{-}(la^2s\text{-}e^2m)\text{-}i^2\text{-}a^2$. From *bacillus* (q. v.) and *æmia*, blood. The presence of bacilli, including their products, in the blood. [a, 34.]

BACILLUS.—B. aluminis. The *B. putrificus coli*. [a, 35].—B. bizzozzerianus. The *Leptothrix epidemidis*. [a, 35].—B. cereuleus. A species observed by A. J. Smith in flowing water (Schuykill River); rods 2 to 2.5 μ long and 0.5 μ thick, often connected in long filaments. It quickly liquefies gelatin, and on potatoes forms colonies which are at first of a bluish, and finally of a deep dark-blue color. [a, 35].—B. Chauveii. The *B. of symptomatic carbon*. [a, 35].—B. coli communis. The *Bacterium coli commune*. [a, 35].—B. coli choleroformis. Of Gilbert and Girode, a virulent variety of *B. typhi abdominalis*. [a, 34].—B. der gelben Milch. See BACTERIUM SYNCHONTHUM.—B. epidemidis. The *Leptothrix epidemidis*. [a, 35].—B. Escherichii. Of Saccardo, the *Bacterium coli commune*. [a, 35].—B. mesentericus rubiginosus. The *Leptothrix epidemidis*. [a, 35].—B. of acne contagiosa. An aerobic, non-liquefying b. found by Driekerhoff and Gravit in the pus and scales of horses affected with the disease. [a, 34].—B. of Affanassiev. An aerobic, non-liquefying, motile spore-forming b., from 0.6 μ to 2.2 μ long, occurring solitary, in pairs, or in short chains in the mucus coughed up in pertussis. [a, 34].—B. of Babes and Opprescu. An aerobic and fastidious, especially non-liquefying, actively motile b., from 0.4 μ to 0.5 μ thick, united in pairs and sometimes growing like the figure 8, obtained from a case of hemorrhagic septicæmia. [a, 34].—B. putidus. The *B. fluorescens putidus*. [a, 35].—B. septicus putridus. A small, mobile, oval b., having a diameter of from 0.6 μ to 1 μ , and developing easily in all culture media; it rapidly liquefies gelatin, slowly coagulates milk, and produces an odor of trimethylamine, especially marked on potato cultures. It produces septicæmia with no apparent lesions in man and in animals. [a, 34].—B. tussis convulsivæ. See B. of Affanassiev.

BACK-KNEE, n. $Ba^2k\text{-}ne$. A deformity resulting from a sharp backward bend of the knee near the upper end of the tibia. It is due to a deficiency in growth at the fore part of the epiphyseal line. [a, 34.]

BACTERIUM.—B. alii. Of A. B. Griffins, a b. found in putrefying onions, 5 μ to 7 μ in length, 2.5 μ broad, and producing a peculiar green pigment; when cultivated in peptonized agar-agar, it develops, at the expense of the proteids of the latter, a pioniame, $C_{12}H_{17}N$, a white, crystalline, deliquescent, monacid base, perhaps identical in composition with hydrocodine. [B.]—B. Boudrouxii. A species sometimes confounded with *B. oblongum*. It is found in alcoholic infusions. It converts glucose into gluconic acid, and the latter eventually into oxygluconic acid. [a, 35].—B. glischrochromum. See GLISCHROBACTERIUM.—B. oblongum. Syn.: *Micrococcus oblongus*. A species found in vinegar. It has the characters of *B. aerif.*, but with a diameter from twice to three times as large. By oxidation it transforms glucose into gluconic acid. [a, 35].—R. phosphorescens. A species occurring, in the form of thin rods rounded at their apices, in the seas of northern Europe, rendering the water phosphorescent. It grows best on gelatin without liquefying it, but does not develop on potatoes. [a, 35].—Peach-colored b. Of Lankester, the *Beggiatoa roseo-perisclina*. [a, 35.]

BALEEN.—B.-plates. For PLATE substitute WHALEBONE.

BASAD, adv. $Ba^2s\text{-}a^2d$. Toward the basal aspect. [L.]

BASOPHORIA (Lat.), n. f. $Ba^2s\text{-}(ba^2s)\text{-}o\text{-}(o^2s)\text{-}fo\text{-}(fo^2b)\text{-}i^2\text{-}a^2$. From *basileus*, to walk, and *phos*, fear. Morbid distrust of one's power of walking. [a, 34].—Staso-b. Inability to walk or stand erect due to emotional causes, the strength of the muscles concerned not being appreciably diminished. [a, 34.]

BATH.—Olive-lees b. See OLIVE-lees b.

BATTERY.—Fluid-cell b. A b. in which the electrolyte is a liquid. [a, 34].—Immersion b. A b. in which one of the elements must be immersed in the b. fluid before the current can be generated. [a, 34.]

BDELLATOMY. For this title and the pronunciation substitute BDELLOTOMY. n. $De^2l\text{-}o\text{-}t\text{-}o\text{-}m\text{-}i^2$.

BECHER.—B'chen. See SCYPHULUS.—Gehrb'. See INFUNDIBULUM COCHLEÆ.—Geschmacksb'. See TASTE-BUDS.

BEFRUCHTUNG.—B'smasse. See SPERM (2d def.).—Selbst-b'. See CLOSE FERTILIZATION and SELF-FERTILIZATION.

BEGGIATOA.—For B. multisepta substitute B. multisepta.

BEIN.—Bogenb'e. See PARIETAL BONE.—Fusswurzelb'e. The tarsal bones. [L.]—Gabelb'. See FRIGULA.—Gedankenb'. The parietal bone. [L, 46 (a, 21)].—Gesässb'. See ISCHIUM.—Gewerbb'e. Vertebrae. [L, 80].—Gleichb'e. See SESAMOID BONES.—Griffelb'. See STYLOID PROCESS.—Gurgelb'. See CLAVICLE.—Halsb'. Of Meckel, the body of the hyoid bone. [L, 34 (a, 29)].—Handwurzelb'e. The carpal bones. [L.]—Hangb'. In locomotion, the swinging leg. [a, 14].—Herzb'. The sternum. [L, 80].—Hinterb' des Armes. The radius. [L, 80].—Hüftenwirbelb'e. The lumbar vertebrae. [L.]—Kinnbackenb'. The maxillary bone.—Kranzb'. The frontal bone. [L.]—Kronb'. The coronary bone. [A, 315 (a, 45)].—Kropfb'. See HYOID BONE.—

O, no; O², not; O², whole; Th, thin; Th², the; U, like oo in too; U², blue; U³, lull; U⁴, full; U⁵, urn; U⁶, like ü (German).

Iinsenb'. See *Lenticular process of the incus*.—**Nervenb'**. The occipital bone. [L. 80 (a, 43).]—**Rachenb'**. See *Inferior maxilla*.—**Ringb'**. See *King bone*.—**Sälselb'**. See *Geni osum*.—**Stälzb'**. In locomotion the supporting leg. [a, 14.]—**Tribasillarb'**. The basilar bone (1st def.).—**Urschlüsselb'**. See *Precoracoid bone*.—**Vernunftb'e**. The parietal bones.

BEINCHEN (Ger.), n. Bin'ch²en. See *Ossicle*.—**Gelenkb'**. Sesamoid bones. [L. 43, 80.]

BENZOL.—**B. gnaiaacol**. Benzosol. [L.]

BENZONAPHTHOL, n. Be²nz'o-na²f'ho²l. See *Benzoyl-naphthol* (in Supplement).

BENZOPHENOID, n. Be²nz'o-fe²n'oid. Tetramethyldiapsidobenzophenoid, obtained by the decomposition of an aniline dye; used locally as a germicide. [a, 34.]

BENZOSOL, n. Benz'o-sol. A compound of benzoic acid and guaiacol; used instead of creosote in phthisis. [a, 34.]

BENZOYLNAPHTHOL, n. Be²nz'o-l²na²f'ho²l. A product obtained by treating 250 grammes of β -naphthol and 270 of very pure benzoyl chloride, and purifying the product by crystallization; used as an intestinal antiseptic. [a, 34.]

BERIBERI.—**Dropsical b.** Ankylostomiasis.—**Web b.** In countries in which b. is endemic, anemia and dropsy without paralysis. It is not related to true b. [a, 34.]

BERUFSSCHÄDLICHKEITEN (Ger.), n. pl. Be²rufs/shad'²l²ch²-kit-e²n. Unhygienic conditions due to the occupation or profession of a person, such as inhalation of dust, etc. [a, 18.]

BESTREUBUNG (Ger.), n. Be²-strab'um². See *Molimen*.

BEULE.—**Feuerb'**. See *Contagious anthrax*.—**Flugb'n**. See *Zoster*.—**Knotenb'**. See *Schirrus*.—**Kohlenb'**. See *ANTRAX*.—**Leistenb'**. See *Bubo*.—**Milzbrandb'**. See *ANTRAX*.—**Speckb'**. See *LIPOMA*.

BEUTEL.—**Netzb'**. See *Bursa omentalis*.—**Zungenschleimb'**. See *Bursa mucosa sublingualis*.

BIAURICULAR, adj. Bi-a²r-i²k'u²l-a²r. Extending between the two auricular points. [L.]

BIFOCAL, adj. Bi-f²o/k²l. Having two foci; said of lenses. [L.]

BIGLENOID, adj. Bi-gle²n'oid. Extending between the glenoid fossae of the two temporal bones. [L.]

BIMALAR, adj. Bi-mal'a²r. Extending between the malar points. [L.]

BIMASTOID, adj. Bi-ma²st'oid. Extending between the two mastoid processes. [L.]

BIMAXILLARY, adj. Bi-ma²x'i²l-a²ri². Pertaining to opposite sides of a maxilla. [L.]

BINAURICULAR, adj. Bi²n-a²r-i²k'u²l-a²r. See *BINAURAL* and *BIAURICULAR* (in Supplement).

BINOTIC, adj. Bi²n-o²t'ik. See *BINAURAL*.

BIOPHAGISM, n. Bi-o²f'a²i²z-m. From *bios*, life, and *phagēin*, to devour. The capacity of absorbing and digesting living bodies (e. g., micro-organisms). [² ftschr. d. Med.,² July 1, 1889 (a, 50).]

BIOPSIE (Fr.), n. Be-op-sé. Examination (microscopical, etc.) of a portion of a body during life; the excision and examination of a lesion or a portion of a lesion from a living body. [a, 18.]

BIPHOROUS, adj. Bi²f'o²r-u²s. See *BIFOROUS*.

BISFERIENS (Lat.), adj. Bi²s-fe²r'i²-e²nz(ans). Gen., -ent'is. From *bis*, twice, and *ferire*, to strike. See *DICROTAL* and *DICROTIC*.

BITEMPORAL, adj. Bi-te²mp'o²r'l. Extending from one temporal bone or region to the other. [L.]

BIZYGOMATIC, adj. Bi-zi-go-ma²t'i²k. Extending between the two zygomatic arches. [L.]

BLADDER.—**Germ b.** See *GASTRULA*.

BLASTIDULES, n. Bla²st'id-u²l-z. A term proposed by W. R. McNab for special reproductive bodies in non-sexual generation (conidia, propagula, buds, etc.) not included under the head of sporogenesis. [a, 35.]

BLATTER.—**Milchb'n**. See *COW-POX*.

BLEU.—**B. d'urine**. See *CYANURIN*.

BLINDHEIT.—**Halbb'**. See *HEMIALMAUROSI*.—**Hühnerb'**. See *HEMERALOPTA*.

BLINDNESS.—**Hen-b.** A b. natural to hens. A vulgarism synonymous with hemeralopia, or night-b. [F.]—**Sand-b.** An old term for a variety of metamorphosis in which small particles like sand seemed to fly before the eye. [F.] Cf. *Musca volitans*.—**Violet-b.** Color-b. in which purple is confounded with red and orange. [L. 57 (a, 14).]—**Word-b.** Inability to understand anything that is written, though ability to write and speak exists; due to the unilateral destruction of the nervous centre of sight. [A. 540 (a, 34).]

BLOOD.—**B. clyster**. Ger., *Blutklyster*. An enema made of the blood of cattle or swine; used in acute anemia. [L. 57 (a, 21).]

BLOODLETTING.—**Spoliative b.** B. to diminish the number of corpuscles. [L.]

BODY.—**Chromatin bodies**. Bodies variously described as spherules and as tube-shaped discs found in the network of a cell undergoing carvocyneis. [a, 34.]—**Crystalline b.** See *CRYSTALLINE*.

LENS.—**External accessory olivary b.** The external mass of gray matter in the accessory olivary nucleus. [a, 34.]—**Geniculate b.** See *External geniculate b.* and *Internal geniculate b.*—**Innominate b.** of Giraldis. See *PARADIDYMI*.—**Intercarotid b.** See *Intercarotid gland*.—**Internal accessory olivary b.** The internal mass of gray matter in the accessory olivary nucleus.

[a, 34.]—**Internal olivary b.** [Meynert]. See *Internal olivary nucleus*.—**Opto-striate b.** The conjoined thalamus opticus and corpus striatum. [a, 34.]—**Spongy b.** See *CORPUS SPONGIOSUM*.

BOHRER.—**Hauptb'**. See *TREPINE*.

BOLLINGERA (Ger.), n. f. Bo²l-li²n²e²r-a². After *Bollinger*, the discoverer of these organisms. A genus of Schizomycetes (*Micrococci*), including, among other species, the *Botryomyces* (*Micrococcus botryogenes* or *B. equi*). [a, 35.]—**B. equi**. See *Micrococcus botryogenes*.

BOLUS.—**Hysterical b.** See *GLOBUS HYSTERICUS*.

BONE.—**Anterior otocranial b.** See *Pro-otic b.*—**Cavalry b.** See *Rider's b.*—**Crazy b.**, **Funny-b.** Colloquial terms for the internal condyle of the humerus where the ulnar nerve passes over it. [a, 34.]—**Furcular b.** See *Coracoid b.* (1st def.).—**Hamate b.** See *Unciform b.*—**Hammer b.** See *MALEUS*.—**Heart b.** See *Os cordis*.—**Internasal b's.** See *Ossa prenasalia*.—**Lepidoid b.** The squamous portion of the temporal b.—**Lunate b.** See *Semilunar b.*—**Manual-exercise b.** See *Exercise b.*—**Pastern b.** Ger., *Fesselbein*. One of the proximal phalanges of a horse's foot. [a, 34.]—**Posterior otocranial b.** See *Opisthotic b.*—**Superior otocranial b.** See *Epiotic b.*

BORKE.—**Milchb'**. See *CRUSTA LACTEA*.

BOROGLYCERIN, n. Bo-ro-gli²s'e²r-i²n. Lat., *boroglycerinum*. See *BOROGLYCERIDE*.

BOROPHENOL, n. Bo-ro-fe²n'o²l. A combination of borax and carbolic acid, used as a disinfectant. It has an agreeable smell and dissolves completely in water. [B. 5 (a, 35).]

BOROSALICYLIC ACID, n. Bo-ro-sa²l-i²s'i²l'i²k. The compound BOH(OC₂H₄CO₂H)₂, known only in a sodium and a barium salt. [B. 370 (a, 14).]

BOSS.—**Parietal b.** Ger., *Scheitelhöcker*. See *PARIETAL EMINENCE*.—**Pott's b.** The characteristic projection of the spinous processes in the region of the diseased vertebrae of a spinal column affected with spondylitis (q. v.) (Pott's disease). [a, 25.]

BOTE, n. Bot. An Indian term for one who practices suction and lingual friction of the penis. [a, 34.]

BOUFFE (Fr.), n. Buf. Erection. [L.]

BOURGEON.—**B. caudal**. In embryology, the enlargement of the posterior extremity of the primitive line. [a, 18.]

BOUVIAGE (Fr.), n. Bu-va²zh. Tamponing.

BRACHIORADIALIS.—**B. brevis**, **B. minor**. See *SUPINATOR LONGUS ACROSSORIUS*.

BRACHYKERKIC, adj. Bra²k-i²-ku²r²k'i²k. From *brachys*, short, and *kērkis*, a shuttle. Having the fore-arm relatively short as compared with the upper arm. [L.] Cf. *DOLICHOKERKIC* and *MESATIKERKIC* (in Supplement).

BRACHYKNEMIC, adj. Bra²k-i²-ke²-ne²m'i²k. From *brachys*, short, and *κνήμη*, the leg. Of Sir W. Turner, having the leg proportionally shorter than the thigh. [a, 35.]

BRADYCARDIA (Lat.), n. f. Bra²d-i²-ka²rd'i²a. From *bradys*, slow, and *καρδία*, the heart. A physiological or pathological slowing of the heart's action, the pulsations being fewer than sixty a minute. [a, 34.]

BREAD.—**Indian b.** The fruit of the *Artocarpus integrifolia*. [a, 35.]—**Indian b.-plant**. The *Artocarpus integrifolia*. [a, 35.]

Little man's b. An underground fungus of the genus *Mycetozoa*, perhaps identical with the so-called native bread of Tasmania. It is found at high elevations in the Neigherries, and receives its name in allusion to the tradition that the Neigherries where once peopled by a race of dwarfs. [Cooke (a, 35).]—**St. John's b.** The *Ceratonia siliqua*. [a, 35.]

BROMAMIDE, n. Brom'a²m-i²d'id. A bromine compound, C₂H₂Br₂NH.HBr, of the anilide group; used as an antipyretic, antineuralgic, and antirheumatic. [a, 34.]

BROMOL, n. Brom'o²l. A proprietary name for tribromophenol; a caustic and disinfectant. [a, 34.]

BROMOMANIA (Lat.), n. f. Brom-o(m)²-man(ma²n'i²a. For deriv. see *BROMINE* and *MANIA*. A maniacal condition caused by the prolonged administration of the bromides. [a, 34.]

BRONCHARCTIA (Lat.), n. f. Bro²n²ch²(bro²n²ch²)-a²r²k'shi²(ti²)²a. From *brōnchus*, a bronchus, and *arctere*, to shut up. See *BRONCHOSTENOSIS* (in Supplement).

BRONCHIOSTENOSIS (Lat.), n. f. Gen., -os'eos (-is). From *brōnchus*, the bronchial tubes, and *στένωσις*, stenosis. Stenosis of a bronchial tube.

BRONCHITIS.—**Asthmatic b.** Of Strümpell, b. exsudativa. [a, 34.]

BRONCHITIS.—**Convulsive b.** Whooping-cough.—**Summer b.** Hay fever.

CÆCECTOMY, n. See *e²k'to²m-i²*. From *cæcum* (q. v.), and *ἐκτομή*, excision. Excision of a portion of the cæcum. [a, 34.]

CÆCOCELE (Lat.), n. f. Sek(kā²s'e²k)-o(o²)-sel(kal'e(a)) in Eng., sek'o-sel. Gen., -cel'es. From *cæcum* (q. v.), and *κῆλη*, a tumor. See *TYPHLOCELE*.

CALCO-SUBPHALANGEUS MINIMI DIGITI (Lat.), n. m. Ka²l²k(kā²l²k'i²)-(o²)-su²b²(su²b)-fa²l²(fa²l). a²n(a²n²)-je²(ge²)-u²s(u²s). See *CALCANEO-SUBPHALANGIEN*.

CALCO-SUBPHALANGEUS POLLICIS (Lat.), n. m. See *ABDUCTOR SUBPULCIS*.

CAMPHOR.—**C. naphthol**. A brownish transparent liquid, prepared by mixing one part of beta-naphthol and two parts of camphor; used as an antiseptic.

DARÜBERGESTELLT (Ger.), adj. Da²r-u⁶b'e²r-ge²-ste¹lt. See SUPERPOSED.

DEAFNESS.—Speech-d. A condition differing from word-d. in that the faculty of repeating and writing after dictation is preserved. [a, 34.]

DEFEMINATION, n. De-fe²m-i²n-a-shu²n. From *de* priv. and *femina*, a woman. Of Krafft-Ebing, sexual perversion in which a woman undergoes such a change of character that her feelings and inclinations become those of a man. [a, 34.]

DENDROCALAMUS (Lat.), n. m. De²nd-ro²(ro²)-ka²l(kal²)/a²-mu²s(mu²s). From *déndro*, a tree, and *kálamos*, a reed. A genus of the *Bambuseae*. [a, 35.]—**D. strictus**. Syn.: *Bambusa stricta*. Male bamboo, the *sadanapavedroo* of the Telogeos, indigenous to the East Indies, Cochín-China, and the Molucca Islands. Its properties are similar to those of *Bambusa arundinacea*. [a, 35.]

DERMATOL, n. Du²m'a²l-o²l. Basic bismuth gallate, C₆H₃(OH)₃.CO₂Bi(OH)₃, occurring as an odorless powder, not affected by light or air; used as an antiseptic. [B, 108 (a, 14).]

DIABOLEPTIC, n. Di-a²b-o-le²p'ti²k. From *diábolos*, the devil, and *λήψις*, a seizure. Of Maudsley, an ecstatic who professes to have supernatural communications. [A, 540 (a, 34).]

DIAPHTERIN, n. Di-a²f'te²r-i²n. A compound of sozolic acid and quinoline. [a, 34.]

DIBROMTOLUENE, n. Di-brom-to²l-u²en. The compound C₆H₃Br₂CH₃, obtained from monobromotoluidine by the replacement of the amido-group by bromine. [B, 3 (a, 14).]

DICHLOROXETHYL, n. Di-klor-o²x-e²th'i²l. See DICHLOR-ETHER.

DICHLOROPROPYLENE, n. Di-klor-pro²/pi²l-en. The chemical group C₂H₄Cl₂. [a, 38.]

DICHLORQUINHYDRONE, n. Di-klor-kwi²n hid'ron. A substance, C₁₂H₈Cl₂O₄, obtained as the first product of the action of hydrochloric acid on quinone. [B, 3 (a, 14).]

DICHLORSALIGENIN, n. A substance, C₇H₄Cl₂O₃, that seems to be obtained when dichlorsalicin is saponified with emulsin.

DI-iodoform, n. Di-i-o²d-o-f'o²rm. An iodide of carbon containing 4.62 parts of carbon and 95.38 of iodine. It is insoluble in water, sparingly soluble in alcohol and in ether, but freely soluble in chloroform, in carbon bisulphide, in benzene, and in hot toluene. It has a slight odor and is used as an antiseptic. [a, 34.]

DIPHTHERIN, n. Di²p'the²r-i²n. Of A. Wilson, the poison evolved by the diphtherococci. [a, 34.]

DIPsOPATHY, n. Di²p-s-o²p'a²th-i². From *dipsos*, thirst, and *πάθος*, disease. Of H. C. Wood, that variety of neuropathy in which dipsomania is the essential feature. [a, 34.]

DISEASE.—Beigel's d. See *TRICHOUREXIS nodosa*.—**Bell's d.** See *Acute delirious mania*.—**Buhl's d.** Acute fatty degeneration occurring in the new-born. [a, 34.]—**Concato's d.** See *Polyorchismenitis*.—**Darier's d.** A cutaneous psoriasis, appearing as an acne cornea, in which coccidia-like bodies are found in the proliferating epithelial cells of the mouths of the glands. [a, 34.]—**Grancher's d.** Spleno-pneumonia. [a, 34.]—**Hip-joint d.** See *Morbus coxarius*.—**Hutchinson's d.** Ophthalmitis with degeneration of that portion of the retina surrounding the macula lutea; it occurs in old age. [a, 34.]—**Krishaber's d.** A neurosis characterized by sensory illusions, vertigo, and hyperæsthesia associated with cardiac irritability.—**Lacemaker's d.** Lead poisoning occurring in lacemakers. [a, 34.]—**Marie's d.** See *ACROMEGALY* (in Supplement).—**Pott's d. of the spine.** See *ANGULAR CURVATURE of the spine*.—**Van Buren's d. of the penis.** An idiopathic chronic circumscribed inflammation of the corpora cavernosa. [a, 34.]—**Whytt's d.** Hydrocephalus. [a, 34.]

DIURETIN, n. Di-u²r-et'i²n. A proprietary name for salicylate of theobromine and sodium; a powerful diuretic. [a, 34.]

DOLICHOHERIC, adj. Do²l'i²k-o-h'i²e²r-i²k. From *δολιχός*, long, and *ἑρῶς*, sacred (see SACRUM). Having the sacrum longer than it is broad. [a, 34.]

DOLICHOKNEMIC, adj. Do²l'i²k-o²k-ne²m'i²k. From *δολιχός*, long, and *κνήμη*, the leg. Having the leg nearly as long as the thigh. [a, 34.]

DOLICHOPELIC, adj. Do²l'i²k-o-pe²l'i²k. From *δολιχός*, long, and *πέλλος*, a drinking-cup. Having the conjugate diameter of the pelvic brim longer than or equal to the transverse diameter. [a, 34.]

DRACO.—D. volans. See *MERCURY bichloride*.

DRÜSE.—Vernunft'd. See *GNOMADEN*.—**Zwischenwand'd.** See *INTERCELLULAR GLANDS*.

DUCT.—Thyreoglossal d. See *DUCTUS thyreoglossus*.

DYSMORPHOPHOBIA (Lat.), n. f. Di²s(mu²)-ph'o²-bi'a(o²). *φοβία*(b'i²a). From *dysmorphos*, deformed, and *φόβος*, fear. Of Morselli, morbid fear of becoming deformed. [a, 34.]

DYSTHYMIA.—D. algetica. Of Emminghaus, mental perversion due to any peripheral-nerve irritation. [A, 540 (a, 34).]

EBULUS.—Spiritus ebuli [Würt. Ph. 1798]. Fr., *alcoolat* (ou *esprit*) *d'hibble*. A preparation made by allowing the bruised fruits of the dwarf elder to ferment, and, when they have acquired a vinous odor, distilling and if necessary rectifying. [B, 97 (a, 14).]

ECHITIDE E (Lat.), n. f. pl. E²k(e²ch'i²)-i²l(et)-i²d(e²-e(a²-e²). Of Benthams and Hooker, a tribe of the *Apocynaceae*, consisting of *Echites*, *Ichnocarpus*, *Malouetia*, *Nerium*, *Urechites*, *Wrightia*, *Apocynum*, *Strophanthus*, and numerous other genera. [a, 35.]

ECHOPATHIES, n. pl. E²k-o²p'a²th-i²z. From *ἑχός*, an echo, and *πάθος*, disease. Those forms of abnormal nervous action in which the patient spasmodically and quite involuntarily repeats words heard or actions seen by him. [A, 540 (a, 34).]

ECMNESIA (Lat.), n. f. E²k-mne²(mnas)/i²-a². From *ἐκ*, out of, and *μνήσις*, remembrance. A variety of amnesia in which the patient remembers occurrences prior to a certain date, with loss of memory of what happened for a certain time after that date. [A, 540 (a, 34).]

ECTOSYLVIAN, adj. E²k-to-si²l'vi²-n. From *ἐκτός*, outside of, and *Sylvius* (see SYLVIAN). Situated externally to the fissure of Sylvius. [L, 14.]

ECTOTENTORIAL, adj. E²k-to-te²nt-o²ri²-l. From *ἐκτός*, outside of, and *tentorium* (q. v.). Situated externally to the tentorial fissure or convolution. [L, 14.]

EJULATION, n. E²j-u²l'a²-shu²n. Lat., *ejulatio* (from *ejulare*, to wall). Of Laycock, a rhythmic sighing or utterance of the same syllable, observed in hysterical cases. [a, 34.]

ELIXIR.—Hoffmann's visceral e. See *E. AURANTIUM compositum*.

ELYTROPEXIA (Lat.), n. f. E²l'i²t(u²)-ro(ro²)-pe²x(pax)/i²-a². From *ἐλτρον*, a sheath, and *πῆξις*, a fixing. See *VAGINOFIXATION*.

ENANTHESIS (Lat.), n. f. E²n-a²n(a²n)-thes(thas)/i²s. Gen., -thes'eos (-is). See *ENANTHEMA*.

ENDOCARDITIS.—E. mycetica. E. of bacterial origin. [a, 34.]

ENDOCYSTOMATITIS (Lat.), n. f. E²nd'u²(o²)-si²st(ku²)-st-o²m-a²t(a²t)-i²(e)-t'i²s. Gen., -it'idōs (-idis). From *ἐνδον*, within, and *κύστις*, a sac. Inflammation of the inner layer of the wall of a cystoma. [a, 34.]

ENOSOMANIA (Lat.), n. f. E²n-o²s-o²(o²)-ma(ma²)/ni²-a². From *ἐννοσις*, agitation, and *μανία*, madness. A variety of insanity in which the subject believes that he has committed unpardonable crimes. [A, 540 (a, 34).]

ENTACOUSMIC, adj. E²nt-a²k-ust'i²k. From *ἐντός*, within, and *ἀκούειν*, to hear. Of auditory sensations, subjective and originating within or in the neighborhood of the ear.

ENTEROTOMY.—Nélaton's e. An operation for the relief of intestinal obstruction in which an incision is made in the right iliac or inguinal region and the small intestine is sutured to the wound and opened. [a, 34.]

EPEIRA (Lat.), n. f. E²p-ir'(e²p'i²r)-a². A genus of *Arachnida* giving name to a family (*Epeiridae*) of true spiders. [a, 35.]—**E. diadema.** Ger., *Kreuzspinne*, *Kreuzkanker*, *Diademspinne*, *Kugelspinne*. A European species. The web, which is said to contain a substance soluble in water, a resinous substance, and a sweetish-bitter substance, is used like *tela aranea*. [a, 35.]

EPIGASTER (Lat.), n. f. E²p-i²-ga²st(ga²st)/u²r(ar). Gen., -er'os (-is). From *ἐπί*, upon, and *γαστήρ*, the belly. See *Hind eur*.

EPINEPHRIDUM (Lat.), n. n. E²p-i²-ne²p-r'i²d(i²-u²m(u²m)). From *ἐπί*, upon, and *νεφρός*, the kidney. The fat situated upon the kidney. [a, 34.]

EROGENOUS, adj. E²r-o²i²e²n-u²s. From *ἔρως*, lust, and *γενᾶν*, to engender. Giving rise to erotic sensations when stimulated. [a, 34.]

ÉRYSIPELE.—E. salutaire. Erysipelas recovery from which cures or favorably influences some other disease, e. g., erysipelas designedly induced by inoculations of pure cultivations of the *Streptococcus erysipelatos*, or an accidental attack, in a patient suffering from a malignant tumor, such as sarcoma. [a, 35.]

ERYTHROCYTOSIS (Lat.), n. f. E²r'i²(u²)-thro(thro²)-sit(ku²t)-os'i²s. Gen., -os'eos (-is). From *έρυθρός*, red, and *κύτος*, a cell. A condition in which there is an excess of red blood-corpuscles. [B.]

ESSENTIA.—E. arthritica Hoffmanni sine opio. Fr., *essence anti-arthritique d'Hoffmann*. A preparation made by treating 90 parts of earth-worms with 80 of liquid potassium carbonate for twenty-four hours, adding 7 parts of castoreum, 4 of saffron, and 360 of alcohol, and filtering in three days. [B, 119 (a, 38).]

EUPHORIN, n. U²z'o²r-i²n. A carbonate of ethyl and phenyl or phenyl-ethyl urethane; a white slightly aromatic powder soluble in alcohol, slightly soluble in water; antipyretic, anodyne, and antiseptic. [a, 34.]

EUPHORY, n. U²z'o²r-i². The normal state of health. [a, 34.]

EUROPHEN, n. U²z'o²-fe²n. An iodoisobutyrothorcesol containing 21.8 per cent. of iodine; a yellow powder soluble in alcohol, in ether, in chloroform, and in oils; used as an antisyphilitic. [a, 34.]

EVIL.—Joint e. In the West Indies, mutilating leprosy. [G.]

EXCLUSION.—E. of the pupil. That condition in which the entire sphincter margin is adherent to the capsule of the lens, owing to repeated attacks of iritis. The iris neither dilates nor contracts in response to any stimulus. [F.]

EXCRESCENCE.—Fungating e. of the umbilicus. Of Simpson, an elevated fungus-like e. that sometimes forms at the bottom of the umbilical depression in new-born infants after the remnant of the umbilical cord has separated. [A, 69.]

EXTIMA (Lat.), n. f. E²x'ti²m-a². Fem. of adj. *extimus* (superl. of *exter*), outermost (*tunica* understood). The outermost coat, as of an artery.

EYE.—Cylindrical e. That defective refraction of one or more meridians of the e. which requires correction by cylindrical lenses. [F.]—**Luminous e.** That condition which is occasionally observed in the e's of some of the lower animals and more rarely

in human beings, notably the negro, in which the e's are seen to glow in the dark; supposed to be due to the arrangement of the pigment cells of the tapetum. In this condition all the rays of light which enter the pupil are apparently reflected, giving out a reddish or yellowish-red reflection. [F.]—**Pineal e.** Fr., *oil pineal*. A third e. produced as a secondary differentiation of the distal part of the pineal gland. It was present in the extinct *Amphibia* and *Reptilia*, but is found among living forms only in *Lacertilia*. [a, 29.]—**Tabetic e.** An e. in which pathological changes have occurred which are symptomatic of tabes dorsalis. [a, 29.]—**Tea-leaf e.** An e. in a morbid state caused by the application of a poultice made of tea-leaves. [a, 29.]

FACULTATIVE, adj. Fašk'u'l-tat-iv. Of hypermetropia, characterized by objects infinitely remote being distinctly seen both with and without convex glasses, i. e., with the assistance of the accommodation. [F.]

FALLSÜCHTIG (Ger.), adj. Faß'zu'sch't-ig. See EPILEPTIC.

FARADIMETER, n. Fa'r-a'd-i'm'e't-r. From *Faraday*, a proper name, and μέτρον, a measure. An instrument for determining the intensity of a faradaic current. [a, 34.]

FARADO-PUNCTURE, n. Fa'r-a'd-o-pu'n'sk't'u'r. The introduction of needle electrodes into a part for the purpose of applying the faradaic current. [a, 29.]

FASCIÆ.—**Cephalo-pharyngeal f.** F. cephalopharyngea. A strong fibro-elastic submucous membrane lining the pharynx. [a, 29.]—**F. colli propria.** See *Deep cervical f.*—**Fasciæ multiplices.** See *Many-tailed bandage*.—**F. ocularis duplex.** See *Binoctulus*.—**Fasciæ of the orbit.** Condensed layers of the connective tissue within the orbit, constituting the true orbital f., the periorbita, Tenon's capsule, and a number of unnamed slips connected with the extrinsic muscles, etc. [L.]—**Orbital f.** 1. A fibrous layer covering in part the eyeball and reflected at the junction of the cornea and the sclera to the margin of the orbit. 2. The orbital f. (1st def.) and the periorbita. [L.]—**Semilunar f. of the biceps flexor cubiti muscle.** An aponeurosis which passes down from the inner side of the muscle to the deep f. of the forearm. [F.]—**Suprascapular f.** An offshoot from the brachial f. running to the suprascapular region. [L, 332.]

FASER.—**Gallertf.** A non-medullated nerve-fibre. [L.]—**Gürtelfn.** See *Arctiform fibres*.

FASERLAPPIG (Ger.), adj. Fa'se'r-la'p-pi'g. See PANNOSE.

FAT.—**Physiological f.** Of Virchow, the proceeds of the fatty liquefaction of superfluous tissues, as in post-partum involution. [a, 34.]

FERRIS.—**F. aleppensis.** See *Aleppo ROIL*.—**F. hydroses.** See *HYDRODEOPYRA*.—**F. vasculosa.** See *ANGIOEYRA*.

FERRAMENTUM.—**F. gammatum.** See GAMMOIDE.

FERRUM.—**Citras quinæ et ferri.** See *IRON and quinine citrate*.—**Ferri cyanidum.** See *IRON cyanide*.—**Ferri et potassii sulphas.** See *IRON and potassium sulphate*.—**Ferri hyposulphis.** See *IRON hyposulphite*.—**Ferri murias.** See *IRON chloride* (2d def.).—**Ferri oxidum humidum.** See *IRON hydroxide*.—**Ferri tersulphas.** See *IRON sulphate* (2d var.).—**Gelatina ferri oxid.** Of E. Dietrich, a preparation made by dissolving 3 parts of the best white gelatin in 30 of water with the aid of heat, adding a mixture of 12 parts of solution of oxychloride of iron (Ger. Ph.), 20 of syrup of orange-flowers, and 20 of distilled water, and incorporating the whole afterward with a mixture of 0.5 part each of water of ammonia and solution of soda (Ger. Ph.); on cooling, a reddish-brown transparent jelly results which has an alkaline reaction and a pleasant taste. [Proc. of the Am. Pharm. Assoc., XXXVI, (a, 14).]—**Globuli tartratis ferri et lixivie.** See *MARIAL BALLS*.—**Hydrochloras ammoniacus cum sesquichloreto ferri.** See *IRON and ammonium chloride*.—**Lac ferri.** See *LAC FERRATUM*.—**Oxydum ferricum igne paratum.** See *IRON sesquioxide*.

FERULA.—**F. maxillarum.** See GNATROPLASTINX.

FEUER.—**Höllisches F.** Erysipelas. [E.]—**Lebensf.** Vital force.

FEUILLET.—**F. séreux.** See EPIBLAST. — **F. végétatif.** See *Vegetative LAYER of the blastoderm*.

FEVER.—**Bubble f.** See PEMPHIGUS.

FIEBER.—**Niesef.** See *HAY FEVER*.—**Polka f.** See DENGUE. — **Zinkf.** Fever associated with zinc poisoning. [a, 34.]

FIEDER.—**F'lappig.** See PINNATILABATE. — **F'spaltig.** See PINNATIFID.

FILARIA.—**F. sanguinis hominis diurna.** Of Manson, an African form, probably the free embryo of *F. sanguinis*, that is found in the blood during the day. [a, 34.]—**F. sanguinis hominis perstans.** An African form constantly present in the blood. There is some evidence that connects it with the sleeping sickness. [a, 34.]

FILIXOLIN, n. Fi'l'i'z'o'l'i'n. A glyceride constituting the greater portion of the green liquid remaining after the separation of fillic acid from the ethereal extract of the rhizome of *Aspidium filix mas*. [B, 18 (a, 35).]

FILUM.—**Fila olfactorii.** See *PROCESSUS bulbii olfactorii*.

FISSURE.—**Anterior cerebral f.** See *Presylvian f.*—**Anterior median f. of the medulla oblongata.** For the first clause of the def. substitute The continuation of the anterior median f. of the spinal cord upward on the anterior surface of the medulla.—**Great longitudinal f.** See *Great longitudinal f. of the brain*.—**Posterior cerebral f.** See *Occipital f.*—**Posterior median f. of the medulla oblongata.** Ger., *hintere Mittelspalte des ver-*

längerten Marks. The prolongation of the posterior longitudinal f. of the spinal cord upward on the posterior surface of the medulla. [L.]—**Posterior transverse f. (of the brain).** See *Inferior transverse f.*—**Tympanico-mastoid f.** See *FISSURA tympanico-mastoides*.—**Umbilical f.** See *Interlobar NOTCH of the liver*.

FLAUMIG (Ger.), adj. Fla'um-ig. See PUBESCENT.

FLOCCULUS.—**Flocculi retine.** See *CLILARY PROCESSES of the retina*.

FLOS.—**F. sanguineus.** Fr., *fleur de sang, fleur sanguine*. Of Monardus, the *Tropeolum majus*. [B, 121 (a, 35).]

FOLLICULE.—**Lenticular f's.** Of some authors, isolated or agminate lymphatic f's in the mucous membrane of the stomach resembling those of the intestine. [a, 45.]—**Meibomian f's.** See *Meibomian GLANDS*.

FOOD.—**F. of the gods.** 1. Cibus deorum, asafotida. 2. Chocolate. [a, 35.]

FORAMEN.—**Neural foramina.** 1. See *Intervertebral foramina*. 2. In the sing. see *Vertebral f.*—**Oesophageal f.** See *F. oesophageum*.—**Orbital foramina.** Small holes or canals in the walls of the orbit, which give entrance or exit to small vessels and nerves. [F.]

FORCEPS.—**Lithotritry f.** A f. having scoop-shaped extremities for seizing and crushing fragments of calculi in lithotritry. [a, 34.]

FORMALIN, n. Fo'r'm'a'l'i'n. An antiseptic consisting of a 40-per-cent. aqueous solution of formic aldehyde. [B, 108 (a, 14).]

FORMOL, n. Fo'r'm'o'l. A proprietary name for formic aldehyde; antiseptic and germicide. [a, 34.]

FORMULA.—**Dental f.** For canine, 2-2 substitute canine, 1-1
1-1'

PORTSATZ.—**Krähenschabelf.** The coronary process of the inferior maxilla. [a, 45.]

FOSSA.—**Anterior ileo-cæcal f.** See *F. ileo-cæcalis anterior*.—**Cæcal f.** See *F. cæcalis*.—**Orbital f.** The portion of the orbit formed by the frontal bone. [L.]—**Peritoneal fossæ.** The pouches or recesses lined with the peritoneum, e. g., the *rectovesical f.* [L.]

FOTUS.—**F. nitricus.** See *FUMENTUM nitricum*.

FRENJAK, n. A Scandinavian name for epidemic syphilis. [a, 34.]

FUCHS.—**Greiff.** See GRYPALOPLEX.

FUCHSINOPHILE, n. Fuch's'i'n-o-phi'l. A cell or organism that is fuchsinophilous. [a, 34.]

FUCHSINOPHILOUS, adj. Fuch's-i'n-o-phi'l'u-s. Readily stained with fuchsin.

FURCHE.—**Hautf'n.** The creases or wrinkles in the skin over the joints or the shallow furrows extending between the hairs. [L, 31, 332.]—**Urethralf.** The groove upon the inner surface of the corpus cavernosum into which the corpus spongiosum fits. [L, 332.]

FUSS.—**Hackenf.** See *CALCANESUS*.

GALLACETOPHENONE, n. Ga'l'l-a's-e't-o-phi'e'n-on. A derivative of pyrogallol in which an atom of hydrogen has been replaced by the acetyl group. It occurs as a yellowish brown powder; used externally in dermatopathies. [a, 34.]

GALLANOL, n. Ga'l'l'a'n-o'l. A white crystalline powder prepared by heating tannin with aniline; used topically in psoriasis and chronic eczema.

GAMETOID, n. Ga'm'e't-o'id. For deriv., see GAMETE and -oid.* An apoclytic structure that unites like a gamete. [a, 21.]

GANGLION.—**Maxillary g.** Meckel's lesser g. See *Submaxillary g.*—**Olfactory g.** See *Olfactory BULB*.

GANGRENE.—**Syphilitic g.** Caused by the arterial degeneration due to syphilis. [a, 34.]

GASTRITIS.—**Chronic interstitial g.** See *Chronic sclerosis of g.*

GASTRODIAPHANE, n. Ga's't'r'o-di'a'f-a-n. From *γαστήρ*, the belly, and διαφανής, transparent. A soft rubbery tube at the end of which is fastened an electric lamp connected by wires with a battery. It is introduced into the stomach to render the wall of that organ translucent and the overlying parts semi-transparent for purposes of diagnosis. [a, 34.]

GASTROHYSTEROPEXIA (Lat.), n. f. Ga's't'(ga'st')/ro(ro')-hi'st(hu'st)-e'r(o-o')-p'e-x'i'a. From *γαστήρ*, the belly, *hystéra*, the womb, and πῆξς, a fixing. Of Pozzi, hysteropexia. [a, 34.]

GASTROHYSTEROGRAPHY, **GASTROHYSTERO-SYNAPHY**, n's. Ga's't'r'o-hi'st-e'r-o-phi'a'f'i'-o-si'n'a'f'i'-i. From *γαστήρ*, the belly, *hystéra*, the womb, and *γράφω*, a suture, or *συνάφω*, union. Of Sänger, hysteropexia. [a, 34.]

GEMMULA.—**G. embryonalis.** Ger., *Keimknöschen*. Gemmule (1st def.). [B, 123 (a, 35).]

GENERATION.—**Viviparus g.** At end of def. add free and alive.

GENOCATACHRESIA (Lat.), n. f. Je'n'(ge'n')/o(o')-ka't-(ka't)-a's-tre-z'(ch'r'a')/i'a. From *γενος*, sex, and *κατάχρησις*, mis-use. Of C. E. Warren, masturbation. [a, 34.]

GENTIANA.—**G. nana.** An Alpine European species with branching stem, distinct from *G. campestris*. [a, 35.]

GENU.—**G. of the internal capsule.** See *G. capsula internæ*.

GENU-CUBITAL, adj. Je'n^u/i²-ku²/bi²-t'. From *genu*, the knee, and *cubitus*, the forearm. Of a posture, characterized by the subjects resting on the elbows and knees.

GENUELEXURA (Lat.), n. f. Je'n^u(ge'n^u)-u²(u²) fle²x-u²r(ur)-a². From *genu*, the knee, and *flexura*, a bending. Ger., *Kniebeugung*. In botany, the bending of a part at an angle, also the angle itself. [B, 123 (a, 35).]

GEÖHRT.—Kleing'. See *AURICULATE*.

GICTI (Lat.), n. n., indecl. Ji²k(gi²k'/ti)te. See *GIR* (in Supplement).

GINGIVITIS.—G. *biennorrhoeica*. Of Federn, Fauchard's disease. [a, 34.]

GIT (Lat.), **GITH** (Lat.), n's n., indecl. Ji²t(gi²t), ji²th(gi²th). Of the ancients, the *Nigella saliva*. [a, 35.]

GLABRESCENT, adj. Gla²b-re's²nt. From *glabrescere*, to grow smooth. Lat., *glabrescens*. Ger., *kahlwerdend*. In botany, glabrate. [B, 123 (a, 35).]

GLAND.—Inframaxillary g's. See *Submaxillary g's*.—Innominate g. See *GLANDULA innominata Galeni*.—Orbital g. See *Lacrymal g.*

GLANDE.—G. *muqueuse*. An old term for the pituitary gland because it was supposed to secrete the nasal mucus. [a, 34.]

GLISCHURIA (Lat.), n. f. Gli²sk(gli²sch²)-ru²r(rur)/i²-a². From *glischuros*, glutinous, and *ouros*, urine. See *MUCINARIA*.

GLOBO-CELLULAR, adj. Glob^o-o-se²/u²l-a²r. Formed of round cells. [a, 34.]

GLOBULICIDAL, adj. Glob^u-u²l-i²-si²d'. Capable of destroying red and white blood-corpuscles. [a, 34.]

GLOSSOCOMIUM (Lat.), n. n. Glo²s(glos)-so(so²)-kom(ko²m)-i²-u²m(u²m). See *Glossocomion*.

GORGET.—In 1st def., for *Stinerarium* substitute *Itinerarium*.

GRAIN.—In the 2d def., for "sixteenth" substitute "sixtieth."

GROOVE.—Intermediate g. See *Intermediate fissure*.

GYNECOPHOBIA (Lat.), n. f. Ji²n(gu²n)-e²k(k²-e²k)-o(o²)-fob(fo²b)/i²-a². From *gynē*, a woman, and *phobos*, fear. Of Müller, a form of monomania characterized by exaggerated fear of women. [a, 34.]

HÆMARUMASCOPE, n. He²m-a²-ru²m/a²-skop. From *μαῖα*, the blood, *βίνα*, a stream, and *σκοπεῖν*, to examine. A graduated glass tube of fine calibre free at both extremities and bent symmetrically upon itself; one extremity has a bell-shaped expansion to facilitate application over a blood-vessel, and the tube contains a solution of rosaniline. It is used as a manometer. [a, 34.]

HAHNENKAMM.—Siebeinh'. See *CHRISTA galli* (1st def.).

HAIR.—Root-h's. See *Radical h's*.

HAKEN.—Scharfer H. See *DECAPITATOR*.—Tyrrell'scher H. See *Tyrrell's hook*.—Vertebra'h'. See *Vertebral hook*.

HALBSTRAUCH (Ger.), adj. Ha²lb'stra²-u²ch²-i²g. See *SUFFRUTESCENS*.

HAPHALGESIA (Lat.), n. f. Ha²f(ha²f)-a²l(a²l)-jez(gas)/i²-a². From *αφή*, touch, and *αλγος*, a sense of pain. Of Flires, paræsthesia characterized by the production of an intense painful sensation by applying to the skin certain substances that, under normal conditions, only provoke an ordinary sensation of contact. [a, 34.]

HELLEBORUS.—H. *americanus*. The *Veratrum viride*. [a, 35].—*Tinctura hellebori viridis* (Ger. Ph. (1st ed.), Russ. Ph.). See *Extractum Hellebori viridis*.

HEPATOPLEXIA (Lat.), n. f. He²p(hap)/a²t(a²t)-o(o²)-pe²x-(pax)/i²-a². From *hēpar*, the liver, and *πλῆξις*, a fixing. Of Fæure, fixation of a displaced or floating liver by suturing the organ to the costal perichondrium. [a, 34.]

HEPATORRHAPHY, n. He²p-a²t-o²r-ra²f-i². From *hēpar*, the liver, and *ρᾶψις*, a seam. An operation combining laparotomy and suture of the liver. [a, 34.]

HEXAHYDROPHTHALIC ACID, n. He²x'/a²-hid-ro²f-tha²/i²-a². A dibasic crystalline acid, C₆H₈(CO.OH)₂, occurring as small prisms or plates melting at about 205° C. [B, 3 (a, 38).]

HILUM.—In 1st line omit the word "form."

HONEYSTONE, n. Hu²n/i²-sto²n. See *MELLITE*.

HORMION (Lat.), n. n. Ho²r/i²-o²n. See *PUNCTUM alæ vomeris*.

HYDRODERMIA (Lat.), n. f. Hid(hu²d)-ro(ro²)-du²r(m)(de²rm)-i²-a². From *ὕδωρ*, water, and *δέρμα*, the skin. Excessive activity of the sweat glands. [a, 34.]

HYDROFERROCANYOUS, adj. Hid^o-ro-fe²r-o-si²a²n-u²s. From *ὕδωρ*, water, *ferrum*, iron, and *κύανος*, a dark-blue substance. See *FERROSO-HYDROCANYOUS*.

HYDROPS.—H. *vaginæ tendinis*. Serous effusion within the sheath of a tendon.

HYDROXYPROCITRIC ACID, n. Hid-ro²x'/i²-pir-o-si²t'-ri²k. An acid of the constitution C₆H₈O₆ = C₆H₈O₄ + O. [B, 2.]

HYGRODERMIA (Lat.), n. f. Hig(hu²g)-ro(ro²)-du²r(m)(de²rm)-i²-a². From *ὕγρως*, wet, and *δέρμα*, the skin. A non-inflammatory skin disease characterized by increased moisture. [a, 34.]

HYOSCYAMUS.—Cigarette *hyoscyami*. Cigarettes made of the dried leaves of h. wrapped in paper impregnated with an aqueous solution of h. extract. [B, 92 (a, 14).]

HYPERICUM.—Oleum *hyperici*. Oil of h., red oil; used as a popular remedy for bruises. [a, 35].—*Tinctura hyperici vul-*

neraria. Sp., *tintura alcohólica de hipérico vulneraria* [Sp. Ph.]. A preparation made by macerating 15 parts each of the flowering tops of *H. perforatum* and the rhizome of *Acorus calamus* for 8 days in 1,000 parts of diluted alcohol, adding 140 of crushed benzoin, 60 of Tolu balsam, and 15 of myrrh, macerating for 8 days more, expressing, and filtering through paper. [B, 95 (a, 14).]

HYPERLEUCOCYTOSIS (Lat.), n. f. Hip(hu²p)/u²r(e²r)-lu²k-o(o²)-sit(ku²t)-os'i²s. Gen., -os'eos (-is). From *ὕπερ*, in excess, *λευκός*, white, and *κύτος*, a cell. An increase in the normal number of leucocytes in the blood. [a, 34.]

HYPNOTO-THERAPEUTICAL, adj. Hi²p/'no²t-o-the²r-a²-pu²t/i²-k-l. Pertaining to the therapeutic use of hypnotism. [a, 34.]

HYPOLEUCOCYTOSIS (Lat.), n. f. Hip(hu²p)/o(o²)-lu²k-o(o²)-sit(ku²t)-os'i²s. Gen., -os'eos (-is). From *ὕπο*, under, *λευκός*, white, and *κύτος*, a cell. A diminution in the normal number of leucocytes in the blood. [a, 34.]

HYPOSTENOCEPHALIA (Lat.), n. f. Hi²p(s)(hu²ps)/o(o²)-ste²n-o(o²)-se²f(ke²t)-a²l(a²l)/i²-a². From *ὕπο*, below, *στενός*, narrow, and *κεφαλή*, the head. Concurrent hypsocephaly and stenoccephaly. [a, 34.]

HYSTERECTOMOPEXIA (Lat.), n. f. Hi²st(e²h/ut)-e²r-e²k'/-to²m-o(o²)-pe²x(pax)/i²-a². From *ὕστερα*, the uterus, *ἐκτομή*, excision, and *πῆξις*, a fixing. Fixation of the body of the uterus after excision of a portion of the organ. [a, 34.]

HYSTEROCAUTOMY, n. Hi²st'e²r-o-ka²t'o²m-i². From *ὕστερα*, the uterus, *καίω*, to burn, and *τομή*, a cutting. Amputation of the cervix uteri with a thermo-cautery. [a, 34.]

HYSTEROGASTROKRAPHY, n. Hi²st'e²r-o-ga²st-ro²r'-a²f-i². From *ὕστερα*, the uterus, *γαστήρ*, the belly, and *ρᾶψις*, a suture. Of Candela, dilatation of the cavity of the uterus and suture of the fundus to the abdominal wall by means of a long needle introduced by the uterine canal. [a, 34.]

HYSTEROPEXIA.—False h. Morbid fixation of the body of the uterus. [a, 34.]

ICHTHYOCOLLA.—Emplastrum *ichthyocolle*. See *Court PLASTER*.—*Gelatina ichthyocolle* [Swed. Ph., 1817]. A preparation made by boiling 12 parts of isinglass for 2 hours in 168 parts of water, and adding 4 parts of sugar and 1 part each of Rhine wine and lemon-juice. [B, 97 (a, 14).]

ICTERUS.—I. *verus*. See *JAUNDICE*.

ILIACUS.—I. *magnus*. See *I. internus*.

ILICICIUM.—Oleum *ilicii anisati*. Fr., *huile volatile de badiane* [Fr. Cod.], *essence de badiane*. Ger., *Sternaniöl*. Syn.: *oleum badiani*. Oil of star-anise, consisting chiefly of solid anethol (anise camphor) and liquid anethol, distilled from the fruit of *I. anisatum*. It coagels at about 2° C., but otherwise has nearly the same properties as oil of anise (see *Oleum ANISI*), and furnishes most of the latter found in commerce. [B, 5 (a, 35).]

IMPRESSION.—For *Material i.* substitute *Maternal i.*

INCUDO-ORBICULAR, adj. In²z²/ku²d-o-o²r-b'i²k/u²l-a²r. See *INCO-ORBICULAR*.

INJECTIO.—I. *cuprata*. An old preparation made by adding 48 drops of a 6-per-cent. solution of copper ammoniosulphate in 1 pint of water; used in blennorrhagia and menorrhagia. [B, 97 (a, 14).]

INSANITY.—Arthritic i. I. supposed to be caused by rheumatism or gout. [a, 34].—Egressing i. I. growing out of a former disease of which it is an exaggeration. [A, 540 (a, 34).]—*Protopathic i.* 1. Idiopathic i. 2. I. caused by disorder of or developmental changes in the encephalon. [A, 540 (a, 34).]

INTERMITTENS.—I. *larvata*. For "Marked AGE" substitute *Masked AGE*.

INTERTRIGO.—I. *scrotalis*. I. affecting the scrotum. [G.]

IODOPIRYNE, n. I-o²d-o²p/i²-r-en. A one-atom iodine substitution compound of antipyrine; white, colorless, silky needles, tasteless and odorless; used as an antipyretic. [a, 34.]

IODOZONE, n. I-o²d-o²-zon. A liquid formed by a combination of iodine and ozone; used as an antiseptic. [a, 34.]

IODUM.—Potio *resolvens ex iodo*. See *Solution d'iodure de POTASSIUM*.

ISATIS.—I. *tinctoria*. For dyer's wood, substitute dyer's wood.

ISOLATED, adj. Is²o²-al-at-e²ud. Fr., *isolé*. Ger., *isoliert*. Of a patient, kept apart for the purpose of preventing the spread of his disease to other persons.

ISONITROSOANTIPYRINE, n. Is²s²/o²-ni-tros'-o-a²n-ti²p/i²-r-en. A compound of nitric acid and antipyrine, C₁₁H₁₁N₃O₂, occurring in small bluish-green crystals. It is used as a diaphoretic, diuretic, and febrifuge. [a, 34.]

ISTHMUS.—I. of the external auditory meatus. The line of union of the middle and inner thirds of the osseous portion of the meatus, at which point the calibre of the canal is the narrowest. [F, 32.]

JALAPA.—Massa *pilularum resinæ jalapæ* [Dan. Ph., Norw. Ph.]. See *Sapo jalapinus*.

JATRORRHIZA (Lat.), n. f. Ja²t(ya²t)-ro²r-ri(r'i²)/za². A genus of the *Menispermaceæ*. [a, 35].—*J. calumbæ*, *J. palmata*. The sources of Calumba. They are now regarded as forms of the same species (see *Cocculus palmatus*), a climbing plant indigenous to the forests of eastern Africa. [a, 35.]

JODIRT (Ger.), adj. Yod-ert'. See IODIZED.
JOINT.—**Saddle-j.** Ger., *Satteltgelenk*. See ARTICULATION par emboîtement réciproque.
JUGLANS.—**Extractum juglandis corticis**. See *Extractum juglandis fructuum immaturorum*.
JUICE.—**Testicular j.** See under *Brown-Séquard's ELIXIR*.
JUJUBE.—**Italian jujubes**. See under *J.*
JUNIPERUS.—**Ethereoleum juniperi**. See Oil of JUNIPER.
J. chinensis. A Chinese species with decurrent, umbricated closely packed leaves. [B, 71 (a, 14).]

KALL.—**Syrupus k. sulphurati**. Fr., *sirop béchique de Willis*. A syrup consisting of 15 parts of liver of sulphur, 135 each of water and fennel-water, and 480 of sugar. [B, 119 (a, 38).]
KATABOLIN, n. $Ka^{2+}a^{2b}o^{2l}i^{2n}$. Any substance produced by katabolism. [a, 34.]

KELORRHAPHY, n. $Ke^{2+}r^{2+}ra^{2f}i^{2n}$. From *κῆλη*, a tumor, and *ῥαφή*, a suture. See ORCHIDORRHAPHY.

KENOPHOBIA (Lat.), n. f. $Ke^{2n}o^{(o^2)}fo^{(b^2)}i^{2a^2}$. From *κένος*, empty, and *φόβος*, fear. See AGORAPHOBIA.

KERAUNOELOSIS (Lat.), n. f. $Ke^{2+}ra^{2n}o^{(a^2)}(a^2)no^{(o^2)}no^{(o^2)}i^{2a^2}$. Gen., *-os'elos (-is)*. From *κεραυνός*, a thunderbolt, and *νέυρω*, a nerve. Any neurosis resulting from a stroke of lightning. [a, 29.]

KINESTHETIC THERAPY, n. $Ki^{2n}e^{2s}i^{2a}o^{2e}r^{2a}p^{2i}$. See CINESTHETIC THERAPY.

KNESMOS (Lat.), n. m. $Ne^{2s}(kna^{2s})mo^{2s}$. Gr., *κνησμός*. See CNESMUS.

KNIFE.—**Concealed k.** Fr., *lancette cachée*. A k. in which the blade is concealed in the handle or in a cannula. [a, 34.]

KNOCHEN.—**Schäffenk'**. See Temporal bone (1st def.).—**Schlussk'**. See Wormian bones.—**Secundäre Handwurzelk'**. See *Ossa carpi accessoria*.—**Spitzenk'**. See *Os interparietale* (2d def.).—**Urethral'k'**. A bony deposit around the male urethra. [L, 57 (a, 14).]

KNOPE.—**Markk'**. See *Medulla oblongata*.

KNORPEL.—**Grössere Nasenflügelk'**. See ALAR CARTILAGES.—**Hintere Nasenflügelk'**, **Kleinere Nasenflügelk'**. See *Epactal cartilages*.—**Seitenwandk'**. See *Upper lateral cartilages of the nose*.—**Seitliche Nasenk'**. See *Alar cartilages*.—**Symphysenk'**. The intercartilaginous cartilage of a symphysis.—**Untere Nasenk'**, **Untere Seitenk'**, **Vordere Nasenflügelk'**. See *Alar cartilages*.

KNOT.—**Life k.** See Respiratory centre.—**Milk k.** Ger., *Milchknöten*. A nodule in an inflamed breast, due to stasis of milk in the lactiferous ducts.—**Vital k.** See Respiratory centre.

KOROSCOPY, n. $Kor^{2+}o^{2s}ko^{2p}i^{2n}$. From *κόρη*, the pupil, and *σκοπεῖν*, to examine. See SKIASCOPY and KERATOSCOPY.

KÖRPER.—**Muschelbeink'**. The portion of the inferior turbinate bone from which its processes spring. [L.]

KURZGESTIELT (Ger.), adj. *Kurts'ge²-stelt*. See PEDICULATE.

KÜSTENBEWOHNEND (Ger.), adj. *Ku²st'e²ⁿ-be²-von-e^{2nd}*. See LITTORAL.

LACRYMÆFORM, adj. $La^{2l}c^{2r}i^{2m}-e^{2a}fo^{2r}m$. Lat., *lacrimæformis* from *lacrima*, a tear, and *forma*, form). Fr., *larmière*. Ger., *trähenformig*. Tear-shaped (said of certain seeds). [a, 35.]

LACTOGLOBIN, n. $La^{2l}k^{2+}to^{2l}ob^{2l}i^{2n}$. From *lac*, milk, and *globus*, a ball. A globulin present in colostrum; the report that it was also present in milk has not been confirmed. [a, 34.]

LAMINA.—**Lamine medullares nuclei lenticularis**. See *Medullary laminae of the lenticular nucleus*.—**L. medullaris des Thalamus** (Ger.). See *Inner medullary l.*

LAPATHUM.—**Infusum lapathi**. Fr., *infusion de patience* [Fr. Cod., 1887]. A preparation made by infusing 32 parts of the root of *Rumex aquaticus* and 12 of licorice-root for 4 hours in 1,000 of boiling water and straining. [B, 119 (a, 14).]

LAPIS.—**Morochoit**. A white earth found in Egypt; supposed to be a species of fuller's earth or an earth containing magnesia. [L, 53, 105 (a, 46).]

LAUBROTETANINE, n. $La^{2l}r^{2+}o^{2e}t^{2a}n$. An alkaloid obtained from various plants of the *Laurineæ* that produces strong tetanic symptoms. [a, 34.]

LAW.—**Gudden's l.** The l. that lesions of the cerebral cortex do not produce lesions of the peripheral nerves. [a, 34.]

LENTISCUS.—**Lignum lentisci**. The wood of *Pistacia l.* [a, 35.]

LEPROSY.—**L. of South America**. L. occurring in South America. [a, 34.]—**L. of the Antilles**. L. occurring in the Antilles. [a, 34.]

LETHEOMANIA (Lat.), n. f. $Le^{2h}(ath)^{2e}(a)^{2o}(o^2)-ma^{2n}i^{2a^2}$. From *λήθη*, forgetfulness, and *μανία*, madness. An insane longing for narcotics or anesthetics. [a, 34.]

LICHEN.—**Inflammatory l. pilaris**. Change the reference to See *Ichthyosis follicularis*.

LIGAMENT.—**L. de dent**. See ODONTODESMIUM.—**Superficial transverse l. of the fingers**. A band of fibrous tissue which stretches across the roots of the four fingers. [C.]—**Vaginal l's of the hand**. Strong bands which bind the flexor tendons down to the fingers. [C.]

LIBBUS.—**L. lamina spiralis**. See *Zona choriacea*.

LINEA.—**Linea Douglassi** [Ger. Anat. Soc.]. See *Recto-uterine folds*.

LIQUOR.—**L. stibiatum cum acenito**. A preparation consisting of 16 parts of extract of acenite, 28 of powdered guaiac resin, 5 of golden sulphur of antimony, 120 of glycerinated honey, and 840 of water. [B, 119 (a, 38).]

LITHARGYRUM.—**Unguentum lithargyri**. See *Unguentum acetatis plumbi*.

LITCHI (Chin.), n. Written also *lichi*. The fruit of the *Nephelium l.* (the l. tree). [a, 35.]

LITHOTRITLAPAXY, n. $Li^{2h}t^{2+}r^{2i}t^{2a}p^{2a}x^{2i^2}$. From *λίθος*, a stone, *τερεω*, to rub, and *λανάσσειν*, to empty. Of Keith, perineal or urethral lithotripsy and removal of the fragments of the calculi by syringing out the bladder. [a, 34.]

LOBULE.—**Postero-parietal l. of the cerebrum**. See PRÆCUNEUS.

LOBULUS.—**L. cerebri frontalis inferior**. See *Subfrontal gyrus*.—**L. cerebri frontalis superior**. See *Superfrontal gyrus*.

LORETINE, n. $Lo^{2r}-et^{2e}n$. A variety of quinoline, a yellow crystalline powder, inodorous and but slightly soluble; used as a local antiseptic. [a, 34.]

LOSOPHAN, n. $Lo^{2s}o^{2+}fa^{2n}$. A colorless crystalline substance containing nearly 80 per cent. of iodine; used topically in skin diseases. [a, 34.]

LUMBODYNIA (Lat.), n. f. $Lu^{2m}(lu^{2m})-bo^{(b^2)}-di^{2n}(du^{2n})i^{2a^2}$. From *lumbus*, the loin, and *δύσιν*, pain. See LUMBAGO.

LUSTRAL, n. $Lu^{2s}-tr^{2l}$. From *lustrare*, to purify. A material for surgical dressings made from flax; it is more absorbent than cotton. [a, 34.]

LYMPHANGIOFIBROMA (Lat.), n. n. $Li^{2m}f^{2+}(lu^{2m}f^{2+})-a^{2n}-a^{2n}i^{2+}-ji^{2+}(ge^{2+}i^{2+})-o^{(o^2)}-fi^{2e}-br^{2o}-ma^{2s}$. From *lymphā*, lymph, *αγγείον*, a vessel, and *fibra*, a fibre. A neoplasm containing the structural elements of a lymphangioma and a fibroma. [a, 34.]

MACRENCEPHALIC, adj. $Ma^{2k}-re^{2n}-se^{2a}f^{2+}i^{2k}$. From *μακρός*, large, and *ἐγκέφαλος*, the brain. Having a large brain. [a, 34.]

MACRURA (Lat.), n. n. pl. $Ma^{2k}(ma^{2k})-ru^{2a}$. From *μακρός*, long, and *οὐρά*, the tail. The long-tailed decapods (*Decapoda m.*), a section of the *Anomura*, including the lobster, prawn, etc. [a, 35.]

MACULA.—**M. acustica of the utricle**. A yellow, thickened, and opaque spot upon the median wall of the utricle about 2 mm. in diameter, caused by the deposition of otoconia. [F.]—**Maculae eribrosae of the vestibule**. Certain spots or regions on the crista vestibuli, as well as on the floor of the two vestibular recesses, which contain a number of foramina intended for the passage of the fibres of the vestibular nerve. [F.]—**M. cutanea**. Any pigmentary spot on the skin, especially if congenital. [a, 14.]

MAGNESIA.—**Magnesiae hypocarbonas** (seu subcarbonas). See MAGNESIUM subcarbonate.—**M. salicylica**. See MAGNESIUM salicylate.—**M. silicea**. See MAGNESIUM silicate.—**M. valerianica**. See MAGNESIUM valerianate.

MAIDISMUS (Lat.), n. m. $Ma^{2a}(ma^{2s})-i^{2d}-i^{2e}-mu^{2s}(mu^{2s})$. From *maiz*, maize. See PELLAGRA.

MALACINE, n. $Ma^{2l}a^{2s}-en$. From *μαλακός*, soft. A salicylic derivative of phenacetine, insoluble in water, but moderately soluble in alcohol; used in rheumatism. [a, 34.]

MALLEOLUS.—**External m.** and **Internal m.** For *cheville* substitute *cheville*.

MATTOID, n. $Ma^{2t}-oid$. Of Lombroso, an individual whose mind is the product of culture and a high degree of civilization, but who is a monomaniac or "crank." [a, 34.]

MEDIA (Lat.), n. f. of *ad. mediis*, middle (*tunica* understood). The middle coat (as of an artery).

MEDICINE.—**Conservative m.** A method of treatment that aims to preserve and support the vital forces. [a, 34.]

MELANCHOLIA.—**M. misanthropica**. Of Guislain, a form of active m. in which the patient seeks solitude and avoids contact with mankind. [a, 34.]

MELANOMA.—**M. iridis**. M. affecting a portion of the iris. [a, 34.]

MENTULATUS, adj. $Me^{2n}-u^{2l}(u^{2l})-at^{2a}(a^{2b})i^{2s}(u^{2s})$. From *mentula*, the penis. Having a large penis. [a, 34.]

MEROCTES, n. pl. $Me^{2r}-o^{2s}$. From *μέρος*, a part, and *κύτος*, a cell. *Merocten*. Of Lang, the nucleated masses of protoplasm in meroblastic ova which finally form the blastoderm and use the nutritive yolk for food. [J, 215.]

MESATIKERKIC, adj. $Me^{2s}-at^{2i}-ku^{2r}k^{2i^2}$. From *μέστος*, midmost, and *κερκίς*, the radius. Intermediate between dolichokerkic and brachykerkic. [L.]

MESATIPPELLIC, adj. $Me^{2s}-at^{2i}-pe^{2l}i^{2k}$. From *μέστος*, midmost, and *πέλλα*, a bowl. Having a pelvis in which the transverse exceeds the conjugate diameter, though not so much as in the platypelvic pelvis. [a, 34.]

MESOEPLAST, n. $Me^{2s}o^{2+}-pl^{2e}st$. From *μέστος*, middle, and *πλάσσειν*, to mold. The material of the nucleus of a cell. [a, 34.]

MESSER.—**Ritzm'**. See LANCET and SCARIFICATOR.

METABOLIN, n. $Me^{2t}-a^{2b}o^{2l}i^{2n}$. From *μεταβολή*, a change. See METABOLITE.

METAPSYCHOSIS (Lat.), n. f. Me²t-a³-si²k(psu⁶ch²)-os¹ts. Gen., -chos¹eos (-is). From μετὰ, over, and ψύχσις, a giving of life. Transmigration of the soul. [A, 34.]

METHYLARSEN, n. Me²th-i²l-a³rs'e²n. See ARSEN METHYL.

METHYL CHLORIDE, n. Me²th-i²l klor-i²d(id). A mobile, ethereal smelling liquid, CH₃Cl, discovered by Dumas and Peligot, slightly soluble in water, but dissolving readily in alcohol; used to produce local anesthesia. [B, 3 (a, 14); A, 34.]

METOPISM, n. Me²t-op-i²zm. From μέτωπον, the forehead. A condition of the human skull in which the midfrontal suture persists. [A, 34.]

METROCYTE, n. Me²t-ro-sit. From μήτηρ, a mother, and κύτος, a cell. A cell that gives origin to daughter cells. [A, 34.]

MICROBICIDE, n. Mi²k-rob-i²-sid. A substance that is toxic to micro-organisms. [A, 34.]

MICROCIDINE, n. Mi²k-ro-sid'en. From μικρός, small, and cedere, to kill. A whitish powder obtained by fusing β-naphthol with caustic soda; non-poisonous and powerfully antiseptic. [A, 34.]

MICRONECROSIS (Lat.), n. f. Mi²k²'ro(ro³)-ne²k-ro³ts'is. Gen., -ros¹eos (-is). From μικρός, small, and νέκρσις, necrosis. Necrosis of histological elements, as in inflammation. [A, 34.]

MICROPHONE, n. Mi²k-ro-fon. From μικρός, small, and φωνή, a sound. An electrical instrument that renders very slight sounds audible. [A, 34.]

MICROPHONOPHOBIA (Lat.), n. f. Mi²k²'ro(ro³)-fon''o-(o³)-fob(fo²b)¹-a³. From μικρός, small, φωνή, a sound, and φόβος, fear. Of Juhel-Renoy, a morbid dread of slight sounds. [A, 34.]

MICROPHOTOGRAPH, n. Mi²k-ro-fot-o-gra²f. From μικρός, small, φώς, light, and γράφειν, to write. A minute photograph of a large object. [A, 34.] Cf. PHOTOMICROGRAPH (in Supplement).

MICROSTHENIC, adj. Mi²k-ro³-then'ik. From μικρός, small, and σθένος, strength. Having slight muscular power. [A, 34.]

MICOTRICHIA (Lat.), n. f. Mi²k(mek)-ro(ro³)-tri²k(tri²ch²y²)-i²-a³. From μικρός, small, and τρίχ, a hair. A condition in which the hair is extremely fine. [A, 34.]

MISLOGIA (Lat.), n. f. Mi²ps(mes)-o(o³)-loj(lo²g)-i²-a³. From μίσος, hatred, and λόγος, understanding. An unreasonable hatred of intellectual matters. [A, 540 (a, 34).]

MISOMANIA (Lat.), n. f. Mi²ps(mes)-o(o³)-ma(ma³)/ni²-a³. From μίσος, hatred, and μανία, madness. See DÉLIÉRE des persécutions.

MGEISOMEDIPEDIA (Lat.), n. f. Me²r(mo²-e²r)-i²ps-mo(mo³)-ped(pe²d)¹-i²-a³. See SARCINA.

MONOBROMOTOLUENE, n. Mo²n-o-brom-to²l-u²-en. A bromine substitution product, C₆H₄Br.CH₃, of toluene, known in three isomeric varieties. [B, 3 (a, 14).]

MONONITROBENZOIC ACID, n. Mo²n-o-nit-ro-be²nz-o¹i²k. The compound C₆H₄(NO₂)CO.OH, known in three isomeric varieties. [B, 3 (a, 38).]

MONOPSYCHOSIS (Lat.), n. f. Mo²n-o(o³)-si²k(psu⁶ch²)-os¹ts. Gen., -chos¹eos (-is). From μόνος, alone, and ψύχσις, psychosis. See MONOMANIA.

MTURABOAH, n. An antipyretic recently introduced from Liberia, said to be derived from the *Melanthera Brownei*. [B, 270 (a, 14).]

MUSCLE.—M. de Treitz (Fr.). See SUSPENSUR du duodénium. —**Æsophageal m.** The transverse muscular fibres surrounding the upper end of the œsophagus. [A, 34.] —**Omo-hyoid m.** A m. arising from the upper border of the scapula, and occasionally from the transverse ligament that crosses the suprascapular notch. It has two bellies, the posterior of which forms a flat fasciculus that inclines forward across the lower part of the neck, behind the sterno-mastoid, where it becomes tendinous; it then changes its direction, forming an obtuse angle, and the anterior belly ascends almost vertically upward, close to the outer border of the sterno-hyoid, to be inserted into the lower border of the body of the hyoid bone. [A, 34.] —**Orbital m.** A set of fibres of the orbicularis palpebrarum m. lying beneath the tendon of the levator palpebræ. [A, 34.] —**Pterygo-maxillary m's.** The pterygoid m. [A, 34.] —**Pterygo-palatine m.** A fasciculus of the levator palati that extends from the hamular process to the palate. [A, 34.] —**Pyloric m.** The sphincter fibres of the pylorus. [A, 34.] —**Rouget's m.** The circular fibres of the ciliary m. [A, 34.] —**Ruyseh's uterine m.** A bundle of fibres at the fundus uteri. [A, 34.]

MUSICOMANIA (Lat.), n. f. Mu²z(mus)/i²k-o(o³)-ma(ma³)/ni²-a³. From μουσική, music, and μανία, madness. Also written *musomania*. A monomania caused by excessive devotion to music. [A, 540 (a, 34).]

MUSICOTHERAPY, n. Mu²z/i²k-o-the²a²-p²-i². From μουσική, music, and θεραπεία, medical attendance. The therapeutic use of music. [A, 34.]

MYCALE.—Omit the 2d def.

MYRRH.—Balsam of m. Fr., baume de myrrhe. See M. (1st def.).

NAPHTHALENE.—N. yellow. A brilliant yellow dye-stuff obtained by treating an acid solution of n. with calcium, potassium, or ammonium nitrate; it forms yellow needles soluble in water and in alcohol. [A, 14.]

NAPHTHOPYRINE, n. Na²f-tho²p²i²r-en. A compound of antipyrine with naphthol; used as an intestinal antiseptic. [A, 34.]

NATRIUM.—N²nitroferri cyanid. For See Sodium ferricyanide, substitute See Sodium nitroferri cyanide (in Supplement).

NEIGEUX. Ne²-zhu². See GLACIAL.

NEMATHECIUM (Lat.), n. n. Ne²m(nam)-a³-thes(thak)¹-i²-u²m(u²m). From νήμα, a thread, and θήκη, a case. Ger., Fädenhäuse. A wart-like formation on the thallus of certain Algae; said to consist of moniliform crowded threads and to produce tetraspores. [A, 35.]

NEMOBLAST, n. Ne²m'o-bla³st. From νήμα, a thread, and βλαστός, a sprout. Fr., némoblaste. In botany, a filiform embryo. [B, 38 (a, 14).]

NEONATUS (Lat.), n. m. Ne(ne²o³)-o(o³)-nat(na²b¹)u²s(u²s). From νεός, young, and nasci, to be born. Fr., nouveau-né. Ger., Neugeborener. A new-born infant. [L, 50 (a, 14).]

NERVE.—Andersch's n. See Jacobson's n. —**Antagonistic n's.** N's which antagonize the action of each other. [L.] —**Bell's n.** See Posterior thoracic n's. —**Compound n's.** Motor-sensory n's. N's containing motor and sensory fibres. [L.] —**Respiratory n. of the face.** See Facial n. —**Trachelo-diaphragmatic n.** Fr., nerf trachelodiaphragmatique. Ger., Halszwerchfellnerv. Of Chaussier, the fourth cervical n. [L, 41, 50 (a, 14).]

NERVUS.—N. abdomino-genitalis superior. See Ilio-hypogastric NERVE.—N. Anderschii. See Jacobson's NERVE.—N. auricularis vagi. Auricular branch of the pneumogastric nerve. [L.] —**N. cardiacus anticus.** See Superior cardiac NERVE.—N. cardiacus internus. See Middle cardiac NERVE.—N. cardiacus minor. See Inferior cardiac NERVE.—Nerv. entobrainontes. See ENTORAINONTES.—N. intercistalis Willisii. See Sympathetic NERVE.—N. quinti recurrens. See Vidian NERVE.—N. recurrens nervi trigemini. See Vidian NERVE.—N. splanchnicus secundus. See Small splanchnic NERVE.—N. splanchnicus supremus. See Great splanchnic NERVE.—N. trisplanchnicus. See Sympathetic NERVE.—N. tympanico-lingualis. See CHORDA tympani.—N. vocalis. See PNEUMOGASTRIC NERVE.

NEURALGIA.—Trigeminal n. N. affecting the trigeminal nerve. [A, 34.]

NEURITIS.—Centripetal n. Of W. Gerstang, a preferable term to "peripheral n." as the malady usually ascends and affects the nerve trunks. [A, 34.]

NEURODERMATOSIS (Lat.), n. f. pl. Nu²r'o(o³)-du²rm-(de²rm)-a³(a³t)-os¹ts. See DERMATONEURITIS.

NEUROPYRA (Lat.), n. f. Nu²r'o³-p²i²(u²r²)-a³. From νευρ, a nerve, and πύρ, fever. See NERVOUS FEVER.

NTDUS.—N. cochlearis. See Accessory auditory NUCLEUS.

NIERE.—Schwangerschaft¹ n. The inflamed kidney of pregnancy. [A, 34.] —**Stammn¹.** See ARCHINEPHRON.

NITRACROL, n. Nit-ra²k-ro²l. Fr., n., cholacrol. A substance of the doubtful formula C₆H₄(NO₂)₂O₂, obtained by the action of nitric acid on choleic acid. [B, 93 (a, 14).]

NODOSITY.—Bouchard's nodosities. Nodosities of the fingers associated with dilatation of the stomach. [L.]

NOTCH.—Sciatic n. See Great sciatic n.

OBLIQUUS.—O. ascendens. See O. abdominis internus.—O. descendens.—O. descendens externus. See O. abdominis externus.—O. oculi longus. See O. oculi superior.

OPAXESMUS.—Add 2. Of M. Hall, biting of the tongue, cheek, or lip in an epileptic fit. [A, 540 (a, 34).]

ODOUR, n. Od'o²r. Lat., o. Fr., odeur. Ger., Geruch. See SMELL.

OTOALYMANIA (Lat.), n. n. O¹-i²-o(o³)-ka²l(ka²l)-i²m(u²m)/ma³. Gen., -ym¹/matos (-atis). From ὠόν, an egg, and κάλυμμα, a hood. Lat., membrana ovuli corticalis. Ger., äussere Eihülle (oder Schalenhaut). The outer cortical membrane of the ovum. [L, 50 (a, 14).]

OLDFIELDIA, n. f. Old-feld¹-i²-a³. A genus of the Euphorbiaceae (according to some, of the Sapindaceae). [a, 35.]—O. africana. African oak (or teak). [A, 35.]

OLEARIA (Lat.), n. f. O²l-e²a(a³)/ni²-a³. From Olearius, a proper name. Fr., oléaire. A genus of the Asteroidaceae. [a, 14.] —**O. argophylla.** Muskwood, silver-leaved musk-tree; a Tasmanian plant. The leaves emit the odor of musk. [B, 19, 275 (a, 35).]

ÖLICHT (Ger.), ÖLIG (Ger.), adj's. U²l-i²ch²t, -i²g. See OILY and OLEAGINOUS.

ONIOMANIA (Lat.), n. f. On¹-i²-o(o³)-ma(ma³)/ni²-a³. From ὄνιος, to be bought, and μανία, madness. Of Magnan, a mania for spending money for all kinds of articles. [A, 34.]

OPERATION.—Knapp's o. for symblepharon. 6. The lid is carefully dissected up from its adhesions to the cornea and sclera for some distance beyond the insertion of the inferior rectus muscle. Then from this detached portion all useless cicatricial and granulation tissue is to be cut away. In order to cover up this loss of substance, the ocular conjunctiva is dissected upon both sides from the corneal margin from 7 to 9 mm upward by making two vertical incisions and then dissecting out two quadrangular flaps upward, one on the temporal side and one on the nasal side. These are then transplanted into the vacant space below and carefully united in place by numerous fine sutures. [F.]—Sigaultian o. See PUBIC SYMPHYSECTOMY.

OPERCULIFORM, adj. O²p-e²r-kul²i²-fo²rm. Lat., operculiformis (from operculum, a lid, and forma, form). Fr., operculiforme. Ger., deckelförmig. Resembling an operculum. [a, 35.]

OPHELIA (Lat.), n. f. O²p-e²l-i²(e)²-a³. From ὀφέλεια, help. See SWERTIA.

OPHRYS.—O. fucifera. Drone-orchis. The tubers have been used as salep. [a, 35.]

OPORANTHUS LUTEUS (Lat.), n. m. O²p-o²-a³-nth(a²nth¹)-u²s(u²s). See STERNBERGIA lutea.

ORANGE.—**O.** of Portugal. The fruit of *Citrus aurantium* *lyssipnonense*, a variety of the sweet o. grown in Portugal. [a, 35.]

ORDER. n. *O*rder. Gr., *τάξις*. Lat., *ordo*. Fr., *ordre*. Ger., *Ordnung*. A group between class and genus. It bears the same relation to genus as the latter does to species, comprising genera which have in common certain important and constant particulars. In botany it is equivalent to family, but in zoology is the next higher grade. [a, 35.]

OSAZONE. n. *O*sazon. Fr., o. Ger., *Osazon*. Of E. Fischer, a substance formed by the combination of two molecules of phenylhydrazine with the various kinds of sugar. By the different melting points of the product obtained it serves as a test for what kind of sugar is contained in the body to be tested. They are arabinosazone, galactosazone, glucosazone, lactosazone, maltosazone, rhamnosazone, sorbinosazone, and xylosazone. [B, 270 (a, 14).]

OTITIS.—**Acute migratory o. media.** Of Szencs, a form of acute o. media that attacks first one ear and then the other.

OTOCONIA.—**O. of the utricle.** A deposit of fine, crystalline, calcareous concretions upon the median wall of the utricle of the ear. [F.]

OTONECRONECTOMY, OTOSCLERONECTOMY. n's. *O*tonecronek-*o*toscleronektomiz. From *ot*, the ear, *nek*, dead, or *σκληρός*, hard, and *ektom*z, excision. See *Secton's* OPERATION.

OVIARIOTOMY.—**Normal o.** See *OOPHORECTOMY*.

OVOTOMY. (Fr.), n. *O*-*v*o-to-me. A cutting operation involving the ovum.—**O. abdominale.** See *Cæsarean OPERATION*.

OXYCOCOUS.—**O. macrocarpus.** The *Vaccinium macrocarpum*. [a, 35].—**O. palustris.** See *VACCINIUM o.*

OXYDUM.—**Unguentum oxydi zinci et ferri** [Dan. Ph.]. An ointment of 6 parts of crude zinc oxide, 2 of hematite crystals, 12 of yellow wax, and 90 of olive-oil. [B, 95 (a, 39).]

PAINTED, adj. *P*ant'ed. Coated with paint; of animals, brightly colored. [a, 48.]

PALEMON (Lat.), n. m. *P*al(*pa*)l-e'(*a*'e')-mon(mon). Gen., -*on*'(os)-(is). Gr., *Παλαίμων*. A genus of macruran decapods. [a, 35].—**P. serratus, P. squilla.** The prawn. [a, 35.]

PANNUS.—**Synovialp'** (Ger.). A morbid, opaque concretion of the synovia. [L, 57 (a, 14).]

PARADROSIS (Lat.), n. f. *P*ar(*pa*)r-as-dros'is. See *PARIDROSIS*.—**P. oleosa.** See *SEBORRHOEA*.

PARALYSIS.—**P. spastica spinalis.** Ger., *spastische Spinalparalyse*. A gradually developing paresis, sometimes amounting to p., spreading slowly upward and accompanied by muscular tension, reflex contractions and contractures, conspicuously increased tendon reflexes, and complete absence of sensory and trophic disturbances, with weakness of the bladder and genital organs, and general cerebral disturbances. [A, 386 (a, 21).]

PASTER, n. *P*ast'urn. Fr., *pasteur*. Ger., *Fessel*. That part of a horse's leg between the fetlock-joint and the hoof. [a, 14.]

PENTAL, adj. *P*en'tl. From *πέντε*, five. Trimethylethylene, a colorless liquid of a penetrating mustard-like odor, very volatile and inflammable; used like chloroform. [a, 34.]

PERIMETRIC, adj. *P*er-ie'metr'ik. Pertaining to the perimetricum. [a, 14.]

PES.—**P. anserinus nervi mediani.** The digital branch of the median nerve. [a, 34.]

PEST.—**Siberian p.** See *CHARBON*.

PFANNE.—**Rippenp'.** The articular fossa of a vertebra for the head of a rib. [L, 31.]

PHENETOL, n. *P*en'et-ol. Commercial name for a red dye, also wrongly called *coccin*in, obtained from β-naphtholsulphonic acid; it is soluble in water. [B, 270 (a, 14).]

PHENOMENON.—**Trousseau p.** In tetany, the spasm produced by pressure upon certain points of the affected limbs. [a, 34.]

PHLORETIC ACID, n. *F*lor-et'ik. Fr., *acide phlorétique*. The compound *C*₆*H*₅(*O**H**C*₂*H*₄)₂*C*₂*H*₅. [B, 3 (a, 14).]

PHONASTHENA (Lat.), n. f. *F*on-ast'hena'(*a*'uti)-o'(*a*)-*st*hena'(*e*)*s*. From *φωνή*, a sound, *άνω*, self, and *σθένος*, strength. Of P. Diday, the stimulation of thought in a speaker by the excitement of speaking. [a, 34.]

PHOTOMICROGRAPH, n. *P*ho-to-mik'ro-graph. From *φως*, light, *μικρός*, small, and *γράφειν*, to write. A large photograph of a microscopic object. [a, 34.]

PHRAGMIDUM (Lat.), n. n. *F*rag(*fra*)*g*-m'id'iz-u'm(u'm). From *φράγμα*, a fence. A genus of *Uredineæ* found on the leaves of rosaceous plants. [a, 35.]

PHYSALIZATION, n. *F*is-al'iz-a'shu'n. From *φυσάλλει*, a bubble. The property that certain organic liquids, especially albuminous ones, possess of yielding a more or less permanent froth when agitated with a gas. [a, 34.]

PIPERAZIDINE, PIPEAZINE, n's. *P*ip-ea'z-id-en, -ei'z-en. The compound (*C*₄*H*₈)₂(*NH*)₂, formed by the decomposition of ethylenediamine hydrochloride by heat; a powerful solvent of uric acid. [a, 34.]

PLASODERMATOSIS (Lat.), n. f. *P*las(*pla*)*s*'o'(*a*)-*der*-m(e'*rm*)-a'ti(*a*t)*s*'o'ez(as). From *πλάσσειν*, to mold, and *δέρμα*, the skin. Of Tommasoli, an order of skin diseases characterized by new formations. [a, 34.]

PLATE.—**Horizontal p. of the ethmoid bone.** Its cribriform p. [a, 34.]

PLATTE.—**Tastp'.** See *Tactile disc*.

PLOCAMUM (Lat.), n. n. *P*lok-am(a'm)'iz-u'm(u'm). From *πλόκαμος*, a lock of hair. A genus of rose-spired *Alga*. [a, 35].—**P. coccineum, P. vulgare.** Ger., *Knorpeliger Seetang*. A species common on the sea-coasts of Europe and rare on those of America. In Kamchatka it is mixed with fish-oil and used as a cosmetic. [a, 35.]

PLUMULACEOUS, adj. *P*lum-u'l-a'shu's. From *plumula*, a little down, feather. Having downy feathers; not pennaceous. [a, 34.]

PNEUMOBACILLINE, n. *N*u'*m*-o-ba's-i'l'en. From *πνεύμων*, the lung, and *bacillus* (q. v.). Of Arloing, a concentrated extract of an organic substance obtained from bouillon cultures of the bacillus of bovine pneumonia. [a, 34.]

POCKE.—**Menschenp'n.** See *SMALL-POX*.

POLIOMYELITIS.—**Anterior p.** See *Acute anterior p.*—**Chronic anterior p.** See *P. anterior chronica*.

POMEGRANATE.—**P. root-bark.** See *GRANATUM* (2d def.).

POPLAR.—**P. buds.** The buds of various species of *Populus*, official as *gemmæ populi*. [a, 35.]

PORTION.—**Cavernous p. of the urethra.** The posterior, dilated part of the spongy p. of the urethra constituting the urethral bulb. [a, 34].—**Nasal p. of the frontal bone.** The p. that lies between the two internal angular processes of the supra-orbital arches. [a, 34.]

POWDER.—**Ague p.** Lat., *pulvis febrifugus pauperum*. Ger., *Fieberpulver*. A p. official in the Disp. Fuld. of 1791, made by mixing 1 part of ammonium chloride with 3 parts of powdered root of *Geum urbanum*. [B, 97 (a, 14).]

PREMOSE.—**Substitute premoose,** and for the Lat. *præmorus*.

PSYCHONEUROSIS.—**P. maidica.** Pellagra. [a, 34.]

PULP.—**Tooth-p.** Lat., *pulpa dentis*. Ger., *Zahnpulpa*. A jelly-like connective tissue within the cavity of a tooth containing a large number of blood-vessels, nerves, and odontoblasts. [L.]

PULSELUM (Lat.), n. n. *P*uls'(pu'l)s-e'l'u'm(u'm). From *pellere*, to drive. A form of flagellum which propels a cell or animal in front of it (e. g., the tail of a spermatozoid). [L.]

PULSOGRAPH, n. *P*uls'o'-graph. From *pulsus*, the pulse, and *γράφειν*, to write. Of Ozanam, a sphygmograph. [a, 34.]

PULVIS.—**P. ad lumbricos.** A powder of 1 part of calomel with 1, 2, 3, or 6 parts of jalap. [B, 119 (a, 38)].—**P. confortativus.** Fr., *poudre confortant*. A powder of 5 parts of Oriental pearls, 8 of white coral, 10 of hart's-horn prepared without heat, and 300 of barley sugar. [B, 119 (a, 38)].—**P. cryspiletoides.** A powder of 6 parts of farina, 2 each of *ses ustum* and Armenian bole, and 1 part each of mastic, oilbalm, and white lead. [B, 119 (a, 38)].—**P. Halyabbatis.** A powder differing but slightly from p. anonymous and used for the same purposes. [L, 85].—**P. viennensis diaphoreticus** (see *virginicus*). An old preparation made by calcining 1 part of mica and 2 parts of gypsum together, porphyzizing, washing, and reducing to a fine powder. It was said to allay thirst and abate fever. [B, 119.]

PUTORIUS (Lat.), adj. From *putor*, a foul smell. Fr., *putois*. Ger., *Ilitis*. A subgenus of *Mus*. [L, 30 (a, 14)].—**P. furo.** Fr., *furet*. Ger., *Frett*. The ferret. The musk-like secretion of a gland situated beneath its tail was formerly official. [L, 30 (a, 14).]

QUADRICEPS.—**Q. extensor cruris.** See *EXTENSOR CRURIS q.*

RANUNCULUS.—**R. silvaticus.** Fr., *renoncule des bois*. A variety of *R. acris*. [B, 173 (a, 35).]

RAPHIA (Lat.), n. f. *R*az'(*ra*)*z*'f'y-is. A genus of palms. [a, 35].—**R. vinifera.** Ger., *weingebende Sago-palm*. Bamboo palm, wine palm of the west coast of Africa. A good sago is prepared from its pith, and in Guinea a strong brandy is distilled from the seed. The undeveloped leaves are eaten like cabbage. [a, 35.]

RECESSUS.—**R. hemiellipticus of the vestibule.** The posterior of the two depressions on the median and inferior walls of the vestibule for the reception of the utricle. [F.]—**R. hemisphericus of the vestibule.** The anterior of the two depressions on the median and inferior walls of the vestibule, for the reception of the sacculus. [F.]

RHEUM.—**Pulvis rhei tartarizatus.** Fr., *poudre digestive de Klein*. A preparation official in several of the old pharmacopœias, made by mixing equal parts of potassium tartrate, rhubarb, and orange-peel, all well powdered. [L, 97, 119 (a, 14).]

ROSOLIC ACID, n. *R*oz-ol'ik. Fr., *acide rosolique*. Ger., *Rosolsäure*. The compound *C*₂₀*H*₁₆*O*₈. [B, 93, 270 (a, 14).]

RÜCKWÄRTSBEUGUNG (Ger.), n. *R*uk'warts-boig-uns. See *RETROVERSION*.

SAC.—**Conjunctival s.** The s. formed by the reflection of the palpebral conjunctiva.

SADISM, n. *S*ad'izm. Lat., *sadismus*. The association of active cruelty and violence with lust; so named from the novelist de Sade. The lustful emotion awakens the impulse to cruelty, and acts done in obedience to the impulse cause sexual gratification. [a, 34.]

SÆPTUM.—**S. valvulare Lieutaudii.** The internal segment of the tricuspid valve. [L, 332.]

SAGE.—**Oil of s.** See *Volatile oil of s.*

O, no; O², not; O³, whole; Th, thin; Th² the; U, like oo in too; U², blue; U³, lull; U⁴, full; U⁵, urn; U⁶, like ü (German).

SÄGEZÄHNIG (Ger.), adj. Zag'e²-tsan-i²g. See **SERRATE**.

SALACETOL, n. Sa²l'a²s'o²t-o²l. Acetyl carbinol, a synthetic compound of salicylic acid; used like salol. [a, 34.]

SALIPHEN, n. Sa²l'i²e²fa²n. A salicyl-phenetidine. A combination, C₆H₄(OH)C₆H₄(OH)CO, of phenetidine and salicylic acid; used as an antipyretic. [a, 34.]

SALOCOLL, n. Sa²l'o²k-o²l. The salicylic-acid salt of phenocoll; used as an antipyretic and antirheumatic. [a, 34.]

SALT.—Wall s. Exudation from moist walls, consisting chiefly of sodium carbonate contained in the stones employed. [B, 48 (a, 14).]

SAPROL, n. Sa²p'r'o²l. From *sappos*, putrid. A dark-brown oily compound containing phenol, creosol, and other coal-tar products; used as a disinfectant. [a, 34.]

SAURIDON (Lat.), n. n. Sa²r'i²d-o²n. From *sauria*, a lizard. A disinfectant preparation said to consist of the granular residuum of the distillation of a kind of Blackstone shale containing semi-fossilized animal and vegetable remains. [a, 35.]

SAVON.—Lavement de s. A preparation made by dissolving 8 parts of Castile soap in 500 of hot water, to be used tepid. [B, 23, 119 (a, 14).]—S. *médicinal* [Fr. Cod.]. A preparation made by melting together 10 parts of veal tallow and 20 of distilled water, saponifying with 5 of soapmaker's lye, adding afterward 2 of sodium chloride with continual agitation, melting the supernatant soap with moderate heat, and casting in molds. [B, 213 (a, 14).]

SCHUPPE.—For the 2d def. substitute See *Squamous PORTION of the temporal bone* and *Tabular PORTION of the occipital bone*.

SCILLOCEPHALUS (Lat.), n. m. Si²l'(ski²)l-lo²(o²)-se²f(ke²f)-a²l(a²l)-u²s(u²s). From *σκίλλα*, the squill, and *κεφαλή*, the head. A person with a large and long skull, shaped like a squill. [L, 50 (a, 14).]

SECHSWERTHIG (Ger.), adj. Ze²ch's've²rt-i²g. See **SEXV-LENT**.

SECRETODERMATOSIS (Lat.), n. f. Se²k(sak)-ret(rat)'o(o²)-du²rm(de²rm)-a²t(a²t)-os'i²s. Gen., -os'eos(-is). From *secernere*, to secrete, and *derma*, the skin. Any disease of the secretory glands of the skin. [a, 34.]

SHARK.—S.-oil. A train oil derived from *Squalus maximus* and allied species. [a, 35.]

SHEATH.—Axillary s. A process of the prevertebral fascia covering the initial portion of the axillary artery and vein. [L.]—Carotid s. A process of the deep cervical fascia surrounding the carotid artery, pneumogastric nerve, and internal jugular vein, the last two separated from the first by a septum. [L.]—Cranial s. Femoral s. Lat., *vagina vasorum cruralium*. A funnel-shaped fascial investment of the femoral vessels. It is continuous above with the transversalis and iliac fasciæ, and is divided by septa into three compartments: the outer, for the femoral artery; the middle, for the femoral vein; and the inner, known as the femoral canal (q. v.). [L.]—Mucilaginous s. A mass of parenchyma cells which have become mucilaginous, surrounding a fibro-vascular bundle. [a, 35.]—S. of the rectus abdominis. The s. formed by the division of the aponeurosis of the obliquus abdominis externus at the outer border of the rectus and their union in the linea alba. [L.]

SIVENS, n. Si²v'e²nz. See **SIBENS**.

SKATOPHAGY, n. Ska²t-o²f'a²j-i². From *σκατοφαγείν*, to eat dirt. See **COPROPHAGY**.

SMALT, n. Sma²l't. The azure used in painting, decorating porcelain, etc.; obtained by powdering the blue glass which results from heating sand, potash, and impure cobalt oxide together. [a, 35.]

SODIUM.—S. nitroferrocyanide, S. nitroprusside. Ger., *Natriumnitroferrocyanid*, *Natriumnitroprussid*. *Nitroprussidnatrium*. The compound Na₂FeO₂(NO)₂·4H₂O, occurring in large, red, rhombic prisms. [B, 270 (a, 14).]—S. pyroantimonate. The compound (NH₄)₂Sb₂O₇, only known in solution and obtained by treating acid s. metantimonate with ammonia. [B, 3 (a, 14).]

SONNENKÄFER (Ger.), n. Zo²n'e²n'-kaf-e²r. See **COCCINELLA**.

SORE.—Bay s. See **ULOÈRE de la baie**.

SPACE.—Anterior mediastinal s. A s. directed obliquely from above downward and to the left of the median line. It is bounded in front by the sternum, on each side by the pleura, and behind by the pericardium. [a, 34.]—Posterior mediastinal s. An irregular triangular s., running parallel with the vertebral column; bounded in front by the pericardium and the roots of the lungs, behind by the vertebral column, and on either side by the pleura. [a, 34.]

SPHINCTERPLASTY, n. Sfī²n't'u²r-pla²st-i². From *σφινκτηρ*, a sphincter, and *πλάσσειν*, to mold. 1. Of Gersung, the formation of a sphincter after rectal resection by rotating the rectum on its long axis and then suturing the bowel to the skin. 2. The formation of a sphincter and by transplanting portions of the abdominal or gluteal muscles. [a, 34.]

SPUTICULUS (Lat.), adj. Spu²t'ic(spu²)-i²l'o²-u²s(u²s). From *sputum* (q. v.), and *colere*, to inhabit. The specific name of a *Schizomyces* living in sputum, occurring in the secretions of the air-passages. [a, 35.]

STACHYS.—S. *betonica*. Ger., *braune* (oder *Wiesen*-) *Betonie*. Wood betony, bishop's-wort; a European species, mildly aromatic and astringent. [a, 35.]

STAPHYLOCOCCÆMIA (Lat.), n. f. Sta²f(sta²f)'i²l(u²l)-o(o²)-ko²k-sem'([ka²e²m)-i²a²s. From *σταφυλή*, a bunch of grapes, *κόκκος*, a kernel, and *αίμα*, blood. The presence of staphylococci in the blood. [a, 34.]

STEARODERMIA (Lat.), n. f. Ste²(ste²)'a²r(a²r)-o(o²)-du²rm-(de²rm)'i²a²s. From *στεάριον*, fat, and *derma*, the skin. A skin disease affecting the sebaceous glands. [a, 34.]

STERESOL, n. Ste²r'e²s-o²l. An antiseptic varnish originated by Berlioz, consisting of 270 grammes of purified shellac, 10 each of purified benzoin and balsam of Tolu, 100 of crystallized carbolic acid, 6 each of Chinese essence of cannella and of saccharin, and alcohol enough to make 1,000. [a, 34.]

STIELLOS (Ger.), adj. Stel'los. See **SESSILE**.

STOMATITIS.—Septic s. See **S. septica**.

STREPTOCOCCÆMIA (Lat.), n. f. Stre²p-to²(to²)-ko²k-sem'-(ka²e²m)-i²a²s. From *σπέρτος*, twisted, *κόκκος*, a kernel, and *αίμα*, blood. The presence of streptococci in the blood. [a, 34.]

STRICTUROTOME, n. Strī²k'tu²r-o²tom. From *strictura*, a stricture, and *τέμνειν*, to cut. An instrument for cutting a stricture.

STROBILIFORM, adj. Stro²bi'l'i²-fo²rm. Lat., *strobiliformis* (from *στροβίλος*, anything twisted, and *forma*, form). Ger., *zapfenförmig*. Resembling a strobile. [a, 35.]

STYLUS (Lat.), n. m. Stil(stu²)'u²s(u²s). Gr., *στυλος*. See **SOUND** (the instrument).

SUÇOIR (Fr.), n. Su²-sua²r. See **HAUSTORIUM**.

SULCUS.—S. *longitudinalis anterior*. See *Anterior median fissure of the spinal cord*.

SULPHONAPHTHALENE, n. Su²l'f'o²-na²f'tha²l-en. Fr., *sulfonaphthide*, *sulfonaphthaline*. A substance, SO₂(C₆H₄)₂, obtained by the action of sulphur anhydride on naphthalene; it occurs in inodorously masses, melting at 70° C. [B, 93 (a, 14).]

SULPHUR.—Balsamum sulphuris succinum [Ed. Ph., 1836, Sard. Ph., 1773, Tur. Ph., 1833]. A preparation made by digesting in a sand-bath 1 part of flowers of sulphur with 4 parts [Ed. Ph. and Tur. Ph.] or 6 [Sard. Ph.] of rectified oil of amber. [B, 119 (a, 14).]—*Flores sulphuris compositi* [Brunsw. Ph., 1791, Hannov. Ph., 1819, Würt. Ph., 1798]. A powder of 2 parts of saffron, 96 of flowers of sulphur, and 24 each of myrrh and aloes. [B, 119 (a, 14).]

SUSPENSION.—S. of the uterus. See **HYSTEROPEXIA**.

SYN-CEREBRUM (Lat.), n. n. Si²n(su²)-e²r(ke²r)'e²-bru²m-(bru²m). From *σύν*, with, and *cerebrum*, the brain. A brain consisting of a number of parts. [Lankester (L).]

TEST.—Beccaria's t. An intense, pulsating pain in the occipital region, supposed to be a sign of pregnancy. [a, 34.]

THERMIFUGIN, n. Thu²rm-i²f'u²j-i²n. From *θερμὸν*, heat, and *fugere*, to flee. A commercial name for the antipyretic sodium salt of methyltrihydroxyquinolinecarboxylic acid. [B, 270 (a, 14).]

THILANIN, n. Thi²l'a²n-i²n. A yellowish, unctuous substance consisting of lanolin with 3 per cent. of sulphur. [a, 34.]

THIONIC, adj. Thi²-o²n'i²k. From *θειον*, sulphur. Having one or more atoms of sulphur for 2 of hydrogen and 6 of oxygen; there are *monothionic*, *dithionic*, *trithionic*, *tetrathionic*, and *pentathionic* acids. [B, 93, 270 (a, 14).]

THIORESORCIN, n. Thi²-o²re²s-o²r's'i²n. A yellowish-white, inodorous, non-poisonous powder formed by a combination of resorcin and sulphur; used as a local antiseptic. [a, 34.]

TOLYPYRINE, n. To²l'i²p'i²r-en. A colorless, crystalline substance of bitter taste, slightly soluble in water; used as an antipyretic. [a, 34.]

TOLYSAL, n. To²l'i²s-a²l. Tolypyrine salicylate. [a, 34.]

TONNERET (Fr.), n. Ton-ne²r-a. A gaseous and ferruginous spring near Absie, department of the Deux-Sèvres, France. [a, 14.]

TRAJET.—T's *intramusculaires*. Venous canals in the tissue of the heart uniting the smaller cardiac veins near their openings into the cavity of the heart. [L, 81.]

TUNICA.—T. *vasculosa*. A vascular network. [a, 34.]

URIN.—U²verhaltung. For See *Retention of urine* substitute *Retention of urine*.

VAGINA.—V. *recti*. See *SHEATH of the rectus abdominis* (in Supplement).—V. *vasorum cruralium*. See *Cranial SHEATH* (in Supplement).

VAGO-GLOSSOPHARYNGEAL, adj. Vag'o²-o-glo²s'f'o²-fa²r-i²n(je²)-l. Pertaining or relating to the vagus and glossopharyngeal nerves, whose root-fibres arise from a common nucleus. [a, 34.]

VASO-HYPOTONIC, adj. Vas'o²-h-ip-o²-to²n'i²k. Pertaining to or causing subnormal vascular tension. [a, 34.]

A, ape; A², at; A³, ah; A⁴, alth; Ch, chin; Ch², loch (Scottish); E, he; E², ell; G, go; I, die; I², in; N, in; N², tank; O, no; O², not; O³, whole; Th, thin; Th², the; U, like oo in too; U², blue; U³, lull; U⁴, full; U⁵, urn; U⁶, like ü (German).

LIST OF THE CHIEF INITIAL AND TERMINAL PARTS OF COMPOUND WORDS.

A-. 1. A privative (*av-* before a vowel), an inseparable particle, used only as a prefix, with a negative force, like English *un-*, Latin *in-*. It is prefixed to noun, adjective, and verb stems, with which it generally forms adjectives. 2. A intensive, increasing the force. 3. A euphonic, in a few words, used merely for phonetic purposes. [a, 21.]

Ab-. 1. Default, failure, as in the word *abortion*. 2. Extending or drawing away from some point, as in *abductor*.

Ad- (occurring also as *Ac-, Af-, Ag-, Al-, An-, Ap-, Ar-, As-, and At-*). Toward, as in *adduction*.

After-. Subsequent, behind (also, in German, similar, pretended, pseudo-).

Allotrio-. From *ἀλλότριος*. Belonging to another, foreign.

Amphi-. Gr., *ἀμφί*. About, on both sides, on all sides, as in *amphiarthrosis*.

An-. 1. See *A-*. 2. See *Ana-*.

Ana-. Gr., *ἀνά*. 1. Upward, as in *anaspadias* (sometimes abbreviated, as in *anode*). 2. Communication, as in *anastomosis*.

-ane. A termination common to the paraffins or series of saturated hydrocarbons. [B.]

Ante-. 1. Before, forward, as in *anteversion*. 2. Previously, as in *antental*.

Anti-. Gr., *ἀντί*. Against.

-ate. Gr., *ατ*. Fr., *-ate*. 1. A suffix indicative of a salt derived from that one of two related acids which contains the more oxygen, and whose distinctive title according to modern nomenclature ends in *-ic*. [B.] 2. Indicative of a material resulting from a particular process, as in *exudate* and *distillate*.

Auto-. From *αὐτός*, self. 1. Of itself, natural, not made artificially, not proceeding from without. 2. Reflexive.

Azo-. A prefix used in designating certain chemical compounds (especially those of the aromatic series) in which nitrogen replaces hydrogen; more particularly employed to denote a member of a special class of compounds (azo-compounds), of which 2 nitrogen atoms form a nucleus. [B.]

Cac-, Caco-. From *κακός*, evil. Indicative of unfavorableness, severity, or malignancy.

Cata-. Gr., *κατά*. 1. Downward. 2. In accordance with. 3. Against.

-cele. Gr., *κύλη*. Indicative originally of hernia, made subsequently to apply to other swellings occurring in the parts usually occupied by hernia, and finally applied to some tumors and to certain swellings (such as *hematocele*) that are not true tumors.

Con- (occurring also as *Co-, Col-, Com-, and Cor-*). Lat., *cum*. Together.

Dia-. Gr., *διά*. 1. Through. 2. Made of (as in *diachylon*).

Dis- (occurring also as *Di-* and *Dif-*). A prefix having (1) a separative or disjunctive force, asunder, apart, in different directions; (2) a privative or negative force, like the English *un-*, reversing or negating the primitive. [a, 21.]

Dys-. Gr., *δυσ*. "Equivalent to our *un-* or *mis-*, always with the notion of hard, bad, unlucky, etc." [A, 31.]

Ecto-. From *ἐκτός*, outside. A prepositional particle indicative of exterior situation or direction. [a, 48.]

End-, Endo-. From *ἐντός*, within. A prepositional particle indicating that which is situated or takes place within anything. [a, 21.]

-ene. A termination characteristic of the bivalent series of hydrocarbons or alkylidenes. [B.] Cf. *-idene*.

Ento-. From *ἐντός*, within. A prepositional particle indicating interior situation.

-enyl. Designative of the trivalent hydrocarbons (compounded of *-ene*, the termination appropriated to the bivalent series, and *-yl*).

Eui-. Gr., *εὖ*. 1. Indicative of a favorable or agreeable character, as in *euthanasia*; the opposite of *Caco-*. 2. Before the name of a subgenus or other subdivision, indicative of the section containing the typical or genuine species. [a, 24.]

Ex- (occurring also as *E-* and *Eg-*). Gr., *ἐξ*. Out of, from. [a, 21.]

Extra-. Without, outside. [a, 48.]

Gamo-. From *γάμος*, marriage. Union, junction. [a, 24.]

-genesis. From *γεννᾶν*, to engender. Denoting origin, source, productive, cause, generation. [a, 21.]

-graphy. From *γράφειν*, to write. A termination signifying writing, description, discourse, science. [a, 21.] Cf. *-logy*.

Haplo-. From *ἁπλός*, single. Simple or single.

Hemi-. Gr., *ἡμι*. Lat., *semi-*. Fr., *demi-*. Ger., *halb-*. Half or halved, as in *hemicarpous*. [a, 24.]

Hetero-. From *ἕτερος*, the other. Anomalous, diverse, variable. [a, 24.]

Homæo-. From *ὁμοιος*. Similar, like, equal. [a, 24.]

Hyp-. See *Hypo-*.

Hyper-. Gr., *ὑπέρ*. Above, beyond, excessive.

Hypo-. Gr., *ὑπό*. 1. Under. 2. When followed by the name of an acid or a salt, indicative of its containing a smaller proportion of oxygen than the one denoted by the name without the prefix. 3. Diminution in quantity or degree. [B.]

-iasis. Gr., *-ιασις*. Indicative of a process or of its result (as in *psoriasis*, *lithiasis*, etc.). Cf. *-osis*.

-ic. Lat., *-icus*. Fr., *-ique*. A suffix appended to the name of a chemical which combines in more than one proportion with another body, to indicate the compound that contains the greater proportion of the other body; in the names of acids, indicative of the one containing the greater amount of oxygen. [a, 48.]

-ide. Fr., *-yde*, *-ide*. Ger., *-yd*, *-id*. Affixed to the name of an element, indicative of the fact that the element is united directly with another element or radicle. [B.]

-idene. Designating the bivalent series of hydrocarbons of the general formula $C_nH_{2n+2}CH$ = (aldehyde radicles), while the termination *-ene* designates the isomeric hydrocarbons of the general formula $-CH_2-(C_n-1H_{2n-1})-CH_2-$. Thus, ethylidene is CH_3-CH , while ethylene is $CH_2=CH_2$. [B.]

-ides, -ideus. From *είδος*, resemblance. See *-oid*.

-imide. Indicative of a monamide in which one bivalent acid radicle takes the place of two atoms of hydrogen in a molecule of ammonia. [B.]

In- (occurring also as *Il-, Im-, and Ir-*). 1. In, within. 2. In contact with. 3. An inseparable particle that negatives the word with which it is joined. [a, 21.]

-in. Indicative of compounds containing the radicle $(C_2H_5)'''$ of glyceryl; e. g., *monobromhydrin*, a body having the composition of glyceryl dihydrate bromide = $C_2H_5(OH)_2Br$, *ethylin*, a body having the composition $C_2H_5(OH)_2C_2H_5$. [B.]

-ine. A termination used in forming (1) adjectives, such as *saccharine*; (2) the names of the elements *bromine*, *chlorine*, *fluorine*, and *iodine*; (3) all bodies whose chemical formula may be regarded as that of a basic derivative of ammonia and all the alkaloïds, or as a basic derivative analogous to an amine in its method of formation. [B.]

Infra-. Below, under. [a, 21.]

Inter-. Between.

Intra-. 1. Within, as in *intracranial*. 2. Into. 3. During, as in *intra-partum*.

-inus. Similarity or augmentation. [a, 24.]

-inyl. Appropriated to the quinquivalent hydrocarbons. [B.]

-ise. See *-ize*.

-ismus. A condition or process.

Iso-. From *ἴσος*. Equal.

-ite. Indicative of a salt derived from that one of two related acids which contains the less oxygen and whose name according to modern nomenclature ends in *-ous*. [B.]

-ites. Gr., *-ίτης*, a masculine adjective termination. In *ascites* and *tympanites* the masculine noun *ἰσχυρ*, dropsy, is understood.

-itis. Gr., *-ίτις*, a feminine adjective termination now conventionally appended to the name of a part to signify inflammation of that part, although it really has no such meaning. In such expressions the feminine noun *νόσος*, disease, is understood, and *νόσος πλευρίτις* simply meant the *pleura* (or *side*) *disease*.

-ize. Gr., *-ίζειν*. Fr., *-iser*. Also written *-ise*. A suffix derived from the Greek which, when added to a noun or an adjective, forms verbs meaning to do or to be the thing expressed by the noun or adjective. [a, 21.]

Leuco-. From λευκός, white. White. [a, 35.]
-logy. From λόγος, understanding. A termination meaning the science of whatever is indicated by the preceding part of the word. [a, 21.]

Macro-. Gr., μακρός. Indicative of extent or magnitude.
Mal-. From malus, bad. See *Caco*.
Mega-, Megalo-. From μέγας, large. Indicative of magnitude.
Meio-. Gr., μείων (irreg. comparative of μικρός, small). Indicative of diminution. [a, 35.]
Mela-, Melan-. From μέλας, black. Indicative of blackness.
Meta-. Gr., μετά. Among, with, after, beyond. [a, 48.]
-meter. From μέτρον, a measure. Denoting an instrument for measuring. [a, 21.]
Micro-. Gr., μικρός. Indicative of minuteness.
Mis-. Abnormal, disordered, as in *mismenstruation*.
Mono-. From μόνος, alone, single. Indicative of singleness or of primacy.

Ob- (occurring also as *Oc-, Of-, Og-, and Op-*). A prefix meaning to, toward, about, before, in front of, over, on account of, inversely, etc., but often merely intensive. [a, 21.]

-odes. See *-oid*.
-odynia. From δόνην, pain. Indicative of a painful affection. [a, 21.]

-oid. Gr., -ώδης, -οειδής (from εἶδος, resemblance). Lat., *-oides, -odes, -oideus*. Indicative of resemblance. [a, 21.]

-ol. 1. A suffix appropriated to alcohol and bodies of analogous composition (carbinol, phenol, glycol, etc.). 2. Indicative of an oily body.

-oma. Gr., -ωμα. Indicative of the material result of a process denoted by a cognate word ending in *-osis*; of late years applied almost exclusively to tumors.

-one. A suffix appropriated to the ketones (e. g., *acetone*). [B.]

-onyl. Designative of the septivalent hydrocarbons. Cf. *-yl*.

Opistho-. From ὀπίσθεν, behind. Indicative of posterior direction. [a, 21.]

Ortho-. From ὀρθός, straight. Straight, upright; in chemistry, normal.

-osis. Gr., -ωσις. Properly implying a morbid process, but generally applied indiscriminately to that and to its results.

-ous. Lat., *-osus*. Fr., *-eux*. A suffix appended to the name of an element which combines in more than one proportion with another body, to indicate the compound that contains the smaller proportion of the other body. In the names of acids it designates the one which has the smaller amount of oxygen.

Oxy-. From ὀξύς, sharp. A prefix meaning sharp, acute; in chemistry, containing oxygen. [B; a, 21.]

Para-. Gr., παρά-. 1. Alongside of, beside (e. g., *parametritis*, inflammation by the side of the uterus). 2. To, to the side of. 3. To one side of, by, past (e. g., *paraphimosis*). 4. Amiss, wrong (e. g., *paramenia*, abnormal menstruation). 5. Signifying alteration or change (e. g., *paralbumin*).

-pathy. From πάθος, a condition. Indicative of a condition, especially a morbid condition.

Per-. Indicative of intensity; used with the name of an element which combines with another radicle in several proportions, it indicates the compound which contains the higher proportion of the other radicle. When followed by the name of an acid or salt, it designates an acid or salt which contains more oxygen than the one in the name of which it occurs. [B.]

Peri-. Gr., περί-. In Greek derivatives, around, enveloping. [a, 35.]

Pluri-. From plus, comp. of multus, much. See *Poly*.

Poly-. Gr., πολυ-. Indicative of multiplicity.

Pre-. Lat., *prae*. Indicative of situation before, in front of, or of occurrence in advance of. [a, 21.]

Proto-. From πρῶτος, first. Indicative of originality; before the name of a salt, it indicates that the latter is the first in a series of similar compounds, and usually designates the compound which contains one atom of the element to which it is prefixed. [B.]

Pseudo-. From ψευδής, false. False, spurious.

Pyro-. From πῦρ, fire. Indicative of preparation by means of heat.

Retro-. Indicative of backward situation or tendency.

-rrhagia. From ῥήγνυσθαι, to burst forth. Indicative of an escape, especially of blood.

-rrhœa. Gr., ῥοία, a flow. Indicative of a morbid flux.

-scopy. From σκοπεῖν, to examine. Indicative of examination.

Semi-. Half or apparently half (e. g., *semi-amplexicaul*, half-clasping, etc.). [a, 35.]

Sesqui-. A prefix indicating that the element or radicle to whose name it is prefixed is contained in a compound in the proportion of three parts to two of the other constituent of the compound. [B.]

Sub- (occurring also as *Suc-, Suf-, Sug-, Sum-, Sup-, Sur-, and Sus-*). See *Hypo*.

Super-, Supra-. See *Hyper*.

Syn- (occurring also as *Syl-, Sym-, and Sys-*). Gr., συν-. Indicative of association.

Thi-, thio-. From θείον, brimstone. Indicative of the presence of sulphur.

-une. Designative of the octivalent hydrocarbons. [B.]

Uni-. From unus, one. Indicative of singleness.

-unyl. Designative of the nonivalent hydrocarbons.

-uret-. Denoting a combination of simple inflammable bodies with each other or with metals.

-yl. From ὕλη, matter. Indicative of a substance supposed to be the source of another or the primitive form of which other substances are modifications; hence applied to designate many compound radicles in chemistry (e. g., *carboxyl*). The termination *-yl* alone generally designates a univalent radicle, while among the hydrocarbons the affixes *-enyl, -inyl, -onyl*, and *-unyl* are employed to denote respectively trivalent, quinquivalent, septivalent, and nonivalent radicles. [B.]

-ylene. A termination applied to certain quadrivalent hydrocarbons derived from corresponding trivalent hydrocarbons with names ending in *-yl* (e. g., *allylene*). [B.]

LIST OF ABBREVIATIONS.

ā, usually **ss** or (more correctly) **sa**. For *ana* (Gr. *ἀνά*), contracted *āa*. Of each (used of ingredients in prescriptions).
Abdom. *Abdomen*. The abdomen.
Abs. febr. *Absente febre*. In the absence of fever.
Ad., **Add.** *Adde*, seu *Addatur*. Add, let there be added.
Ad def. an., **Ad deliq.** *Ad defectionem animi*, *Ad deliquium*. To fainting (used in directions for venesection).
Adhib. *Adhibendus*. To be administered.
Ad lib. *Ad libitum*. At pleasure.
Admov. *Admove*, seu *Admoveatur*, seu *Admoveantur*. Apply, let there (or let it, or let them) be applied.
Ad pond. om. *Ad pondus omnium*. To the weight of the whole (used in indicating the proportion of a particular ingredient).
Adst. febre. *Adstante febre*. Fever being present.
Æg. *Æger*, seu *Ægra*. The sick person, the patient.
Ag. Symbol for silver (*argentum*).
Al. Simple hypermetropic astigmatism.
Alm. Mixed astigmatism with predominant hypermetropia.
Altern. dieb. *Alternis diebus*. On alternate days, every second day.
Altern. hor. *Alternis horis*. Once every two hours.
Alv. adst. *Alvo adstricta*. The bowels being constipated.
Am. Simple myopic astigmatism.
Amh. Mixed astigmatism with predominant myopia.
An. Anode.
AnCl. Anodal closure.
AnClC. Anodal-closure clonus.
AnD. Anodal duration.
AnO. Anodal opening.
AnOCl. Anodal-opening clonus.
Aq. *Aqua*. Water.
Aq. astr. *Aqua astricta*. Frozen water.
Aq. bull. *Aqua bulliens*. Boiling water.
Aq. com. *Aqua communis*. Ordinary water.
Aq. destill. *Aqua destillata*. Distilled water.
Aq. ferv. *Aqua fervens*. Boiling water, hot water.
Aq. fluv. *Aqua fluvialis*. River water.
Aq. font. *Aqua fontana*, seu *Aqua fontis*. Spring water.
Aq. marin. *Aqua marina*. Sea water.
Aq. niv. *Aqua nivosa*. Snow water.
Aq. pluv. *Aqua pluvialis*. Rain water.
Aq. pur. *Aqua pura*. Pure water.
Arg. *Argentum*. Silver.
As. Astigmatism.

B. a. *Balneum arenæ*. A sandbath.
Bals. *Balsamum*. A balsam.
Bb., **Bbds.** *Barbadosensis*. Of Barbadoes.
B. Ch. *Baccalarius chirurgie*. Bachelor of surgery.
Bib. *Bibe*. Drink.
Bis ind. *Bis indies*. Twice a day.
B. M. *Baccalarius medicine*. Bachelor of medicine.
B. M. 1. *Balneum Mariæ*. See *Water-napa* (2d def.). 2. *Balneum marinum*, *Balneum maris*. A sea bath.
Bol. *Bolus*. A bolus.
B. S. Bachelor of surgery.
Bull. *Bulliat*, seu *Bulliant*. Let it (or them) boil.
But. *Butyrum*. Butter.
B. v. *Balneum vaporis*. A vapor bath.

C. *Congius*. A gallon.
C. Centigrade scale of temperature.
Ca. Cathode.
CaCl. Cathodal closure.
CaClC. Cathodal-closure clonus.
CaClTe., **CaCTe.** Cathodal-closure tetanus.
CaD. Cathodal duration.
Cal. *Calometas*. Calomel.
Calef. *Calefactus*. Warmed.
CaO. Cathodal opening.
CaOC. Cathodal-opening clonus.
CaOTe. Cathodal-opening tetanus.
Cap. *Cape*, seu *Capiat*. Take, let the patient take.
Cath. *Catharticus*. Cathartic.
C. c. *Cornu cervi*. Hartshorn.
C. c. *Cucurbitula cruenta*. A wet cup.
C. c. Cubic centimetre.
C. c. u. *Cornu cervi ustum*. Burnt hartshorn.
Cent. Centigrade scale of temperature.
Cgm. Centigramme.
C. G. S. Centimetre-gramme-second (designating a system of physical units).
Ch., **Chart.** *Charta*. 1. Paper. 2. A powder.
Ch. c. *Charta cerata*. Wax paper.
Cl. Closure of an electrical circuit.

C. M. *Chirurgiæ magister*. Master in surgery.
Cm. Centimetre.
C. m. *Cras mane*. To-morrow morning.
C. m. s. *Cras mane sumendus*. To be taken to-morrow morning.
C. n. *Cras nocte*. To-morrow night.
Co. *Compositus*. Compound.
Coch., **Cochl.** *Cochleare*. A spoon, a spoonful.
Cochl. ampl. *Cochleare amplum*. A tablespoonful.
Cochleat. *Cochleatina*. By spoonfuls.
Cochl. infant. *Cochleare infantis*. A teaspoonful.
Cochl. mag. *Cochleare magnum*. A tablespoonful.
Cochl. med., **Cochl. mod.** *Cochleare medium*, *Cochleare modicum*. A dessertspoonful.
Cochl. parv. *Cochleare parvum*. A teaspoonful.
Coct. *Coctio*. A boiling.
Col. *Cola*. Strain.
Col., **Colatur.** *Colatura*. To the liquor strained.
Collut. *Collutorium*. A mouth-wash.
Collyr. *Collyrium*. An eye-wash.
Color. *Coloretur*, seu *Colorentur*. Let it (or them) be colored.
Comp. *Compositus*. Compound.
Concl. *Concisus*. Cut.
Conf. *Confectio*. A confection.
Cong. *Congius*. A gallon.
Cons. *Conserva*. A conserve.
Cons. *Conserva*, seu *Conservetur*. Keep, let it be kept.
Cont., **Contin.** *Continuetur*, seu *Continuentur*. Let it (or them) be continued.
Cont. rem. *Continuetur remedium*. Let the remedy be continued.
Contus. *Contusus*. Bruised.
Coq. *Coque*, seu *coquatur*, seu *coquantur*. Boil, let it (or them) be boiled.
Coq. ad. med. consump. *Coque ad medietatis consumptionem*. Boil down to one half.
Coq. in s. a. *Coque in sufficiente aqua*. Boil in a sufficient quantity of water.
Coq. s. a. *Coque secundum artem*. Boil properly.
Cort. *Cortex*. Bark.
Cox. *Coxa*. The hip.
Cras., **Crast.** *Crasinus*. For to-morrow.
Cuj. *Cujus*. Of which.
Cujul. *Cujuslibet*. Of any.
C. v., **C. vesp.** *Cras vespere*. To-morrow evening.
Cyath. *Cyathus*. A glassful, a cupful.
Cyath. theæ. *Cyathus theæ*. A teacupful.
Cyath. vin. *Cyathus vinarius*. A wineglassful.

D. *Dosis*. A dose.
D. *Dioptre*.
D. D. M. Doctor of dental medicine.
D. D. S. Doctor of dental surgery.
Dearg. pil. *Deargentetur pilule*. Let the pills be silvered.
Deaur. pil. *Deaurentur pilule*. Let the pills be gilded.
Deb. spiss. *Debita spissitudine*. Of the proper consistence.
Dec. *Decanta*. Pour off.
Dec., **Decoct.** *Decoctum*. A decoction.
Decub. *Decubitu*. On lying down (i. e., at bedtime).
De d. in d. *De die in diem*. From day to day.
Deglut. *Deglutiatur*. Let it be swallowed.
Dej. alv. *Dejectiones alvine*. Stools.
Dep. *Depuratus*. Purified.
Dest. *Destilla*. Distill.
Det. *Detur*. Let there (or let it) be given.
Det. in dup., **Det. in 2plo.** *Detur in duplo*. Let twice as much be given.
D. et s. *Detur et signetur*. Let it be given and labeled.
Dieb. alt. *Diebus alternis*. Every second day.
Dieb. tert. *Diebus tertis*. Every third day.
Dig. *Digeratur*. Let it be digested.
Dil. 1. *Diluat*. Let it be diluted. 2. *Dilutus*. Diluted.
Diluc. *Diluendo*. At daybreak.
Dim. *Dimidium*. A half.
D. in p. seq. *Divide in partes æquales*. Divide into equal parts.
Dir. prop. *Directione propria*. With a proper direction.
Div. *Divide*, seu *dividatur*. Divide, let it be divided.
D. M. D. Doctor of dental medicine.
Donec alv. sol. ft. *Donec alvus soluta fuerit*. Till the bowels are opened.
D. p. *Directione propria*. With a proper direction.
Dr. *Doctor*. Doctor.
Grn. *Drachm.* *Drachm.* A drachm.
Dur. dolor. *Durante dolore*. While the pain continues.

Ead. *Eadem* (plur. of *idem*). The same substances.
Eburn. *Eburneus*. Of ivory.

Ejusd. *Ejusdem*. Of the same.
Elect. *Electuarium*. An electuary.
Emp. *Emplastrum*. A plaster.
Emp. vesic. *Emplastrum vesicatorium*. A blister.
En. *Enem.* *Enema*. An enema.
Exhib. *Exhibeatur*, seu *Exhibeantur*. Let it (or them) be administered.
Ext. *Extende*. Spread.
Ext. extr. *Extractum*. An extract.
Ext. sup. alut. moll. *Extende super alutam mollem*. Spread on soft leather.

F. *Fac*, seu *fiat*, seu *fiant*. Make, let there be made.
F. *Fahr.* Fahrenheit scale of temperature.
Fasc. *Fasciculus*. A bundle.
F. C. S. Fellow of the Chemical Society.
Feb. dur. *Febre durante*. While the fever continues.
Febr. *Febris*. Fever.
Fem. intern. *Femoribus internis*. Toward the inner side of the thighs.
F. K. P. S. Fellow of the Faculty of Physicians and Surgeons (of Glasgow).
F. h. *Fiat haustus*. Let a draught be made.
Fict. *Fictilis*. Of earthenware.
Filt. *Filtrum*. A filter.
Fist. arm. *Fistula armata*. A clyster apparatus fitted up for use.
F. K. Q. C. P. Fellow of the King and Queen's College of Physicians (in Ireland).
Fl. *Fluidus*. Fluid.
F. l. a. *Fiat lege artis*. Let it be made (or done) properly.
Flor. *Flores*. Flowers.
F. L. S. Fellow of the Linnean Society.
F. m. *Fiat mistura*. Let a mixture be made.
Fol. *Folia*. Leaves.
Form. *Formula*. A formula or prescription.
F. p. *Fiat potio*. Let a potion be made.
F. pil. *F. pil. xij.* *Fiat pilula*, *Fiant pilulae duodecim*. Let a pill (or 12 pills) be made.
F. R. C. P. Fellow of the Royal College of Physicians.
F. R. C. S. Fellow of the Royal College of Surgeons.
F. R. M. S. Fellow of the Royal Microscopical Society.
Frust. *Frustillatim*. In small pieces.
F. s. a. *Fiat secundum artem*. Let it be made (or done) skillfully.
Ft. *Foot*.
Ft. *Fiat*, seu *fiant*. Let there be made.
Ft. emp. *Fiat emplastrum*. Let a plaster be made.
Ft. mas. div. in pil. xij. *Fiat massa dividenda in pilulas duodecim*. Make a pill-mass, and divide it into 12 pills.
Ft. pulv. *Fiat pulvis*. Let a powder be made.
F. venas. *F. vs.* *Fiat venesection*. Let the patient be bled.
F. Z. S. Fellow of the Zoological Society.

Garg. *Gargarisma*. A gargle.
Gel. quav. *Gelatina quavis*. In any kind of jelly.
G. g. g. *Gummi guttæ gambæ*. Gamboge.
Gr. *Granum*. A grain.
Gm. *Gramme*.
Grad. *Gradatim*. By degrees.
Grat. *Gratus*. Pleasant.
Gt. *Gtt.* *Gutta*. A drop.
Gum. *Gummi*. Gum.
Gutt. *Gutta*, seu *guttæ*. A drop, or drops.
Guttat. *Guttatim*. By drops.
Gutt. quibusd. *Guttis quibusdam*. With a few drops.

Har. *Harum*. Of these.
Har. pil. sum. ij. *Harum pilularum sumantur duæ*. Let two of these pills be taken.
Haust. *Haustus*. A draught.
Haust. purg. *Haustus purgans*. A purgative draught.
H. d. *H. decub.* *Hora decubitus*. At bedtime.
H. D. L. W. In otology, hearing distance, left ear, for a watch.
H. D. R. W. In otology, hearing distance, right ear, for a watch.
H + Hm. Compound hypermetropic astigmatism.
Hor. decub. *Hora decubitus*. At bedtime.
Hor. interm. *Horis intermediis*. At the intermediate hours.
Hor. som. *Hora somni*. At bedtime.
Hor. un. spat. *Horæ unus spatium*. After the interval of an hour.
H. p. n. *Haustus purgans noster*. Our (*i. e.*, the practitioner's own special) purging draught.
H. s. *Hora somni*. At bedtime.

Id. *Idem*. The same.
Idon. *Idoneus*. Proper.
III-pa. *A tertipara*.
II-pa. *A secundipara*.
In. *Inch*.
Ind. *Indies*. Daily.
Inf. *Infund.* *Infunde*. Infuse.
Infus. *Infusum*. An infusion.
Inj. *Inject.* *Injectio*. An injection.
Inj. enem. *Injectio enema*. Let an enema be injected.
In pulm. In pulmento. In gruel.
I-pa. *A primipara*.
IV-pa. *A quartipara*.

Jul. *Julepum* or *Julapium*. A julep.
Juscul. *Jusculum*. A broth.

Ka. Cathode (used especially in German works).
Kal. ppt. *Kali præparatum*. Potassium carbonate.
Kg. *Kilo*. Kilogramme.

Lag. *Lagena*. A flask.
L. A. H. Licensitate of the Apothecaries' Hall (of Ireland).
Lat. dol. *Lateri dolenti*. To the painful side.
Lb. *Libra*. A pound.
L. Ch. *Licentiatius chirurgia*. Licensitate in surgery.
L. D. S. Licensitate in dental surgery.
Lect. *Lectus*. A bed.
L. F. P. S. Licensitate of the Faculty of Physicians and Surgeons (of Glasgow).
Lic. Med. *Licentiatius medicinæ*. Licensitate in medicine.
Lin. *Linim.* *Liniementum*. A liniment.
Liq. *Liquor*. A liquor or solution.
L. K. Q. C. P. Licensitate of the King and Queen's College of Physicians (in Ireland).
L. M. Licensitate in midwifery.
L. M. A. Of the position of the fœtus, left mento-anterior.
L. O. A. Of the position of the fœtus, left occipito-anterior.
Lot. *Lotio*. A lotion.
L. R. C. P. Licensitate of the Royal College of Physicians.
L. R. C. S. Licensitate of the Royal College of Surgeons.
L. S. A. *Licentiatius Societatis Apothecariorum*. Licensitate of the Apothecaries' Society.

M. *Misce*. Mix.
M. *Manipulus*. A handful.
M. *µ.* *Minimum*. A minim.
µ. A micron.
Mac. *Macera*. Macerate.
M + Am. Compound myopic astigmatism.
Man. *Manipulus*. A handful.
Man. pr. *Mane primo*. In the early morning.
M. A. O. Master of the art of obstetrics.
Mass. pil. *Massa pilularum*. A pill-mass.
Matut. *Matutinus*. In (or for) the morning.
M. B. *Medicinæ baccalarius*. Bachelor of medicine.
M. Ch. *Magister chirurgiæ*. Master in surgery.
M. D. *Medicine doctor*. Doctor of medicine.
Md. *Medius*. Middle.
Mgm. *Milligramme*.
Mic. pan. *Mica panis*. Bread-crumbs.
Min. *Minimum*. A minim.
Mist. *Mistura*. A mixture.
Mit. *Mitte*, seu *mittatur*, seu *mittantur*. Send, let it (or them) be sent.
Mitt. sang. *Mitte sanguinem*, seu *Mittatur sanguis*. Bleed, let blood be drawn.
M. K. Q. C. P. Member of the King and Queen's College of Physicians (in Ireland).
M. l. *Macula lutea*. The yellow spot in the retina.
M. L. A. *Mento-læva anterior*. Of the position of the fœtus, left mento-anterior.
M. L. P. *Mento-læva posterior*. Of the position of the fœtus, left mento-posterior.
Mm. *Millimetre*.
Mod. press. *Mod. dict.* *Modo præscripto*, *More dicto*. In the manner directed.
Mor. sol. *Morre solito*. In the usual manner.
M. R. C. P. Member of the Royal College of Physicians.
M. R. C. S. Member of the Royal College of Surgeons.
M. S. Master in surgery.
M. S. A. Member of the Apothecaries' Society.
Muc. *Mucilago*. Mucilage.

Necn. *Necnon*. Also.
Ne tr. s. num. *Ne tradas sine nummo*. Do not deliver without the money. A private direction given by an apothecary to his assistant.
N. m. *Nux moschata*. Nutmeg.
No. *Numero*. In number; hence, loosely, number.
Noct. *Nocte*. *Nocte*. At night, by night.
Noct. maneq. *Nocte maneq.* At night and in the morning.

O. *Ocularis*. A pint.
O. D. 1. *Oculus dexter*. The right eye. 2. Optic disc.
O. D. A. *Occipito-dextra anterior*. Of the position of the fœtus, right occipito-anterior.
O. D. P. *O. l. D. P.* *Occipito-dextra posterior*, *Occipito-iliacque droite postérieure* (Fr.). Of the position of the fœtus, right occipito-posterior.
Ol. *Oleum*. Oil.
O. L. A. *Occipito-læva anterior*. Of the position of the fœtus, left occipito-anterior.
Ol. lini s. l. *Oleum lini sine igne*. Cold-drawn linseed-oil.
Ol. oliv. *Oleum olivæ*. Olive-oil.
O. L. P. *Occipito-læva posterior*. Of the position of the fœtus, left occipito-posterior.
Ol. res. *Oleoresina*. An oleoresin.
O. m. *Omni mane*. Every morning.
Omni. bid. *Omni biduo*. Every two days.
Omni. bih. *Omni bihorio*. Every two hours.
Omni. hor. *Omni hora*. Every hour.
Omni. man. *Omni mane*. Every morning.
Omni. noct. *Omni nocte*. Every night.
Omni. quad. hor. *Omni quadrante horæ*. Every quarter of an hour.
O. n. *Omni nocte*. Every night.
O. o. o. *Oleum olivæ optimum*. Best olive-oil.
O. S. *Oculus sinister*. Left eye.

Ov. *Ovum*. An egg.

Ox. Oxy mel.

Oz. An ounce. The *z* here is not the letter *z*, but an adaptation of $\frac{1}{2}$, a mediæval mark of abbreviation. The prescription symbol $\frac{1}{2}$, the ounce, and its derivative $\frac{3}{4}$, the drachm, appear to be derived from the *oz*.

P. *Pondere*. By weight.

P. æ. *Par. æq.* *Partes æquales*. Equal parts.

Par. aff. *Pars affecta*. The part affected.

Par. dol. *Pars dolens*. The part in pain.

Part. vic. *Partitis vicibus*. In divided doses.

Past. *Pastil.* *Pastillus*. A pastille.

Per. op. emet. *Peracta operatione enetici*. When the action of the emetic has ceased.

Ph. A pharmacopœia.

Pil. *Pilula*. A pill.

Pil., Pill. *Pilula*. Pills.

Pocill. *Pocillum*. A small cup.

Pocul. *Poculum*. A cup.

Pond. *Pondere*. By weight.

Post sing. sed. liq. *Post singulas sedes liquidas*. After every loose stool.

Pot. *Potio*. A potion.

Pp. A precipitate.

P. p. *Punctum proximum*. The near point.

P. p. a. *Phiala prius agitata*. The bottle having been first shaken.

Ppt. *Preparatus*. Prepared.

P. r. *Punctum remotum*. The far point.

P. rat. æt. *Pro ratione ætatis*. In due proportion to the age of the patient.

P. r. n. *Pro re nata*. For the particular occasion; as the occasion may require.

Pt. Pint.

Pug. *Pugil.* *Pugillus*. A pugil; as much as can be lifted between the fingers and the thumb.

Pulm. *Pulmentum*. Gruel.

Pulv. *Pulvis*, seu *pulveres*. A powder, or powders.

P. U. S. The United States Pharmacopœia.

Q. lib. **Q. p.** *Quantum libet* (seu *libeat*). *Quantum placet* (seu *placeat*). As much as is (or may be) thought fit.

Qq. i. *Quisque*. Every. **2.** *Quoque*. Also.

Qq. hor. *Quaque hora*. Every hour.

Q. s. *Quantum sufficit* (seu *sufficiat*). A sufficient amount.

Quor. *Quorum*. Of which.

Quotid. *Quotidie*. Daily.

Q. v. **Q. vol.** *Quantum vis*, *Quantum volueris*. As much as you will.

R., B. *Recipe*. Take. In the form *R.*, constantly written as the superscription in prescriptions, we appear to have a survival of the old practice of invoking the favoring aid of a divinity—the bar across the tail of the *R* being explained as a remnant of the symbol of Jupiter (J).

R. Réaumur scale of temperature.

Rad. *Radix*. Root.

Ras. *Rasura*. Shavings.

Rect. *Rectificatus*. Rectified.

Redig. in pulv. *Redigatur in pulverem*. Let it be reduced to powder.

Red. in pulv. *Reductus in pulverem*. Reduced to powder.

Reg. umb. *Regio umbilici*. The region of the navel.

Rep., Repet., Rept. *Repetatur*, seu *Repetantur*. Let it (or them) be repeated.

R. M. A. Of the position of the fœtus, right mento-anterior.

R. O. A. Of the position of the fœtus, right occipito-anterior.

R. O. P. Of the position of the fœtus, right occipito-posterior.

S. *Signa*. Label; write directions.

σ. The thousandth part of a second.

S. A. *Secundum artem*. According to art, properly, skillfully.

Sat. *Saturatus*. Saturated.

Scat. *Scatula*. A box.

Se. D. A. *Scapulo-dextra anterior*. Of the position of the fœtus, right scapulo-anterior.

Se. D. P. *Scapulo-dextra posterior*. Of the position of the fœtus, right scapulo-posterior.

Se. L. A. *Scapulo-læva anterior*. Of the position of the fœtus, left scapulo-anterior.

S. D. A. *Sacro-dextra anterior*. Of the position of the fœtus, right sacro-anterior.

S. D. P. *Sacro-dextra posterior*. Of the position of the fœtus, right sacro-posterior.

Sed. *Sedes*. A stool.

Sem. *Semen*. Seed.

Semidr. *Semidrachma*. Half a drachm.

Semih. *Semihora*. Half an hour.

Serv. *Serva*. Keep, preserve.

Sesquih. An hour and a half.

Sig. *Signetur*. Let it be labeled.

Sig. n. pr. *Signa nomine proprio*. Label with its proper name (not a popular name or trade name).

Sing. *Singulorum*. Of each.

Si n. val. *Si non valeat*. If it does not answer.

Si op. sit. *Si opus sit*. If there is need, if necessary.

Si vir. perm. *Si vires permittant*. If the patient's strength will permit.

S. L. A. *Sacro-læva anterior*. Of the position of the fœtus, left sacro-anterior.

S. L. P. *Sacro-læva posterior*. Of the position of the fœtus, left sacro-posterior.

S. n. *Secundum naturam*. According to nature.

Solut. *Solutus*. Dissolved.

Solv. *Solve*. Dissolve.

Sp., Spt. *Spiritus*. Spirit.

Spt. vin. rect. *Spiritus vini rectificatus*. Rectified spirit of wine.

Ss. *Semis*. A half.

S. s. s. *Stratum super stratum*. Layer upon layer.

St. *Stet*, seu *Stent*. Let it (or them) remain unchanged.

Sub fin. coct. *Sub finem coctionis*. Toward the end of the boiling.

Sum. *Sumat*, seu *Sumendum*. Let the patient take, to be taken.

Summ., Summit. *Summitates*. The flowering tops.

Sum. tal. *Sumat talem*. Let the patient take something like this.

Sup. bib. haust. *Superbibendo hausto*. This draught being drank over and above.

S. v. r. *Spiritus vini rectificatus*. Rectified spirit of wine.

Syr. *Syrupus*. A syrup.

Tab. *Tabella*. A tablet.

T. d. *Ter in die*. Three times a day.

Te. Tetanic contraction.

Temp. dext. *Tempori dextro*. To the right temple.

Temp. sinist. *Tempori sinistro*. To the left temple.

Tinct. *Tinctura*. A tincture.

Tn. Tension.

T. o. *Tinctura opii*. Tincture of opium.

T. o. c. *Tinctura opii camphorata*. Camphorated tincture of opium.

Tr. *Tra.* *Tinctura*. A tincture.

Trit. *Tritura*. Triturate.

Troch. *Trochiscus*, seu *Trochisci*. A troche, or troches.

Tus. *Tussis*. A cough.

Ult. præsc. *Ultimum præscriptus*. Last prescribed.

Umb. *Umbilicus*. The navel.

Unc. *Uncia*. An ounce.

Ung. *Unguentum*. An ointment.

Ut dict. *Ut dictum*. As directed.

Utend. *Utendus*. To be used.

Vehic. *Vehiculum*. A vehicle.

Ves. *Vesica*. The bladder.

Vesic. *Vesicatorium*. A blister.

V. f. The visual field.

Vitel. *Vitellus*. Yolk.

Vit. ov. *Vitellum ovi*. Yolk of egg.

Vit. ov. sol. *Vitello ovi solutus*. Dissolved in yolk of egg.

Vitr. *Vitrum*. Glass.

V. o. s. *Vitello ovi solutus*. Dissolved in yolk of egg.

Vs. *Venæsectio*. Venesection.

Y. s. The yellow spot (*macula lutea*). [a, 48.]

WEIGHTS AND MEASURES.

The metric system of measurement (see under *Metric system*) has been legalized in Great Britain since 1864, and in the United States since 1866, but has not been adopted in either country to the extent that its superiority over the current system indicates as eminently desirable.

The customary weights and measures now (1894) authorized for use in the United States are based on the metric system, being all derived theoretically from the "national prototype standards" of the metre and the kilogramme, made of platinum-iridium, deposited in the office of Standard Weights and Measures at Washington. The United States *yard* is defined as equal to $\frac{3600}{128}$ metre (the length of the yard being 36 and that of the metre $39\frac{370}{1000}$ inches); the commercial *pound*, or pound avoirdupois, as $\frac{7000}{15432}$ kilogramme (the pound being 7,000 and the kilogramme $15432\frac{35639}{100000}$ grains); and the *gallon* as $3785\frac{434}{1000}$ grammes of distilled water at its maximum density, weighed *in vacuo*.

The United States inch and grain are practically identical with the British inch and grain, although the United States standards of length and weight, based on the inch and the grain, theoretically depend, through the metric system, on the dimensions of the earth, while the British standards depend on the length of the day. A pendulum vibrating once in a second *in vacuo*, at sea-level, in the latitude of London is $39\frac{13829}{1000}$ inches in length, and the British standard *yard* is defined as 36 of such inches. A cubic inch of distilled water at the temperature of 62° Fahr. weighs $252\frac{458}{1000}$ grains, and the British standard *pound troy* is defined as 5,760 of such grains. There is, however, considerable difference between the values of the units of measurement of volume, the United States *gallon* corresponding to that of the old British wine measure, with a capacity of 231 cubic inches, while the British standard *gallon*, or imperial gallon, is defined as the space occupied by 10 pounds avoirdupois (70,000 grains) of distilled water at 62° Fahr., with a capacity of $277\frac{274}{1000}$ inches.

It is to be remembered that, in the convenient decimal notation of the metric system, the *decimetre* (or *dekmetre*), *hectometre*, and *kilometre* (having Greek prefixes) are respectively 10, 100, and 1,000 metres, and the *decimetre*, *centimetre*, and *millimetre* (having Latin prefixes) are $\frac{1}{10}$, $\frac{1}{100}$, and $\frac{1}{1000}$ metre, and that the same prefixes used with *gramme* and *litre* indicate the same multiples and fractions of those units.

MEASURES OF LENGTH.

Yard.	Fest.	Inches.	Lines.	Metre equiv.
1 yd.	= 3	= 36	= 432	= 9144 metre.
1 ft.	= 12	= 144	= 30'480 centimetres.	
1 in.	= 12	= 2'540 "		
		= 2'116 millimetres.		

1 kilometre = 1093.6 yards (a little under $\frac{1}{2}$ mile [1 mile = 1,760 yards]); 1 metre = 1'0936 yard (a little over $\frac{3}{4}$ foot); 1 centimetre = .3937 inch (a little under $\frac{1}{2}$ inch); 1 millimetre = a little under $\frac{1}{16}$ inch.

WEIGHTS.

The tables of weight in customary pharmaceutical use are modifications of the avoirdupois and troy weights. The apothecary buys his medicines by avoirdupois, but in the United States (as formerly in Great Britain) they are prescribed, compounded, and dispensed by apothecaries' weight, which is substantially troy weight. The latter has, in addition to the *pound*, the *ounce*, and the *grain*, a *pennyweight* (dwt.) of 24 grains, and avoirdupois has a *dram* (dr.), the sixteenth part of an ounce (about 27½ grains), while the *grain*, imported into avoirdupois in the British Pharmacopœia, really belongs to troy weight. Particular care must be taken to avoid confounding the troy ounce of 480 grains with the avoirdupois ounce of $437\frac{1}{4}$ grains. When apothecaries' weight is employed in prescriptions, Roman numerals are used, written after the denomination sign, the letter *i* when alone or final being ordinarily written *i*; thus, $\frac{3}{4}$ j (= 1 ounce), 3 viij (= 8 drachms), $\frac{3}{4}$ ss (= 2½ scruples). For metric and British (avoirdupois) weights Arabic numerals are used, written after the denomination.

Avoirdupois Weight (including Grains).

[Used in the British Pharmacopœia.]

Pound.	Ounces.	Grains.	Met. equiv.
1 lb.	= 16	= 7,000	= 453.59 grammes.
1 oz.	= 437½	= 28.35	
		1 gr.	= 64.8 centigrammes.

1 kilogramme = 2'20462 pounds (a little over $2\frac{1}{4}$ lb.). The pound is a little over $\frac{1}{2}$ or $\frac{1}{16}$ kilogramme.

Compared with imperial measure (British), 1 lb. of distilled water corresponds to $\frac{1}{16}$ gallon, 1 oz. to 1 fl. oz., and 1 gr. to 1'06714 minim.

Apothecaries' Weight.

Pound.	Ounces.	Drachms.	Scruples.	Grains.	Met. equiv.
1 troy lb.	= 12	= 96	= 288	= 5,760	= 373.24 gms.
	1 (j) = 8	= 24	= 480	= 31.10 "	
		1 (j) = 3	= 480	= 3.89 "	
			1 (j) = 20	= 1.29 "	
				1 (gr. j) = 64.8 cgms.	

1 gramme = 15.43235 grains (a little under 15½ grs.); 1 centigramme = .15432 grain (a little under $\frac{1}{6}$ gr.); 1 milligramme = .01543 grain (a little over $\frac{1}{64}$ gr.).

Compared with apothecaries' fluid measure (United States), 1 pound troy of distilled water corresponds to $12\frac{6207}{1000}$ f 3, 1 ounce troy to 1'0517 f 3, 1 drachm to 1'0517 f 3, and 1 grain to 1'0517 m. As a cubic centimetre of pure water weighs a gramme, the cubic centimetres contained in the pound, ounce, etc., of water correspond to the grammes as given above.

Equivalents of Milligrammes, Centigrammes, and Grammes in Grains.

Mgms.	Grs.	Cgms.	Grs.	Cgms.	Grs.	Gms.	Grs.
1 = .015	1 = .15	15 = 2.31	65 = 10.03	1 = 15.43

9 = .139	9 = 1.39	55 = 8.49	105 = 16.20	9 = 138.90			
10 = .154	10 = 1.54	60 = 9.26	110 = 16.97	10 = 154.32			

MEASURES OF CAPACITY.

The relation of the units is identical in the United States and British measures of capacity, except that the pint is 16 fluidounces in the former and 20 in the latter. This makes the corresponding lower denominations much more nearly equal than the higher, for, whereas the British gallon and pint are greater than those of the United States by about one fifth, the United States fluidounce, fluidrachm, and minim are greater than the British by about one twenty-fourth.

Apothecaries' Fluid Measure [United States Measure].

Gal.	Pints.	Fluidounces.	Fluidrachms.	Minims.	Cubic inches.	Met. equiv.
1 C.	= 8	= 128	= 1,024	= 61,440	= 231	= 3.78543 litres.
1 pt.	= 16	= 128	= 7,680	= 28,875	= 473.179	c. cms.
		1 (f 3 j) = 8	= 480	= 1,804.7	= 29.574 "	
			1 (f 3 j) = 60	= 0.2256 = 3.687 "		
			1 (m j) = 0.0038 = .06161 "			

1 litre = 32.814 f 3 (a little over $2\frac{1}{2}$ pints); 1 cubic centimetre (= 1 millilitre) = 16.231 m.

1 United States gallon = .8331 (a little under $\frac{1}{2}$) imperial gallon; 1 United States minim = 1'0414 (a little under $\frac{1}{16}$) imperial minim. The weight of 1 United States gallon of distilled water is 8.3454 lb. avoird., that of 1 fluidounce is 1.043 oz. avoird. (= .9508 troy ounce), and that of 1 minim is .9508 grain.

Imperial Measure of Capacity [British Measure].

Gal.	Pints.	Fluid ounces.	Fluid drachms.	Minims.	Cubic inches.	Met. equiv.
1 C.	= 8	= 160	= 1,280	= 76,800	= 277.274	= 4.54346 litres.
1 pt.	= 20	= 160	= 9,600	= 34,659	= 567.932	c. cms.
		1 fl. oz. = 8	= 480	= 1,733 = 28.397 "		
			1 fl. dr. = 60	= .217 = 3.550 "		
				1 min. = .004 = .05916 "		

1 litre = 35.2154 fl. oz. (a little over $1\frac{1}{2}$ pint); 1 cubic centimetre (= 1 millilitre) = 16.9034 min.

1 imperial gallon = 1.2008 (a little over $1\frac{1}{4}$) United States gallon; 1 imperial minim = .9601 (a little over $\frac{1}{16}$) United States minim. The weight of 1 imperial gallon of distilled water is 10 lb. avoird., that of 1 fluid ounce is 1 oz. avoird., and that of 1 minim is .91146 grains.
